| <b>6 Lead a group of snowboarders safely</b>       | <p>6.1 Monitor appropriate spacing between clients appropriate to conditions</p> <p>6.2 Identify a variety of potential <b>hazards</b></p> <p>6.3 Decide how each <b>hazard</b> can be safely negotiated</p> <p>6.4 Recognise situations where a <b>hazard</b> needs to be scouted</p> <p>6.5 Identify the best lines through <b>hazards</b> taking into consideration the ability of the group and safety issues</p> <p>6.6 Provide guidance of how to negotiate a <b>hazard</b> clearly and concisely to the group</p> <p>6.7 Demonstrate clearly to the group how to negotiate the <b>hazard</b></p> <p>6.8 Manage the movement of the group to maintain the safest situation when negotiating the <b>hazard</b></p> <p>6.9 Respond accordingly to any emergency or non-routine situation</p> |
| <b>7 Conduct activity in a professional manner</b> | <p>7.1 Avoid contentious issues in general conversation</p> <p>7.2 Use positive words throughout activity to refer to clients and avoid using negative or disparaging words</p> <p>7.3 Avoid negative statements about own organisation, commercial competitors, public bodies and other individuals</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |
| <b>8 Complete post-trip responsibilities</b>       | <p>8.1 Notify relevant authority of trip completion</p> <p>8.2 Retrieve, inspect, repair and store (or retire) <b>equipment</b> according to procedures</p> <p>8.3 Evaluate, including client feedback, all aspects of trip organisation and conduct</p> <p>8.4 Suggest modifications if needed</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |

## Range Statements

The Range Statements provide advice to interpret the scope and context of this unit of competence, allowing for differences between enterprises and workplaces. The Range Statements relate to the unit as a whole and helps facilitate holistic assessment. In addition, the following variables may be present for this particular unit of competency:

| RANGE STATEMENT          | CATEGORIES                                                                                                                                                                                                                                                                                                                                                                                       |

| SKB        | Snowboarding                            |

**DESCRIPTION:** This unit has been developed for the Outdoor Recreation Industry Training Package.

This unit covers the knowledge and skills required to guide or lead clients on day and/or overnight snowboarding trips at a snowsport area.

| ELEMENT                                             | PERFORMANCE CRITERIA                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |
|-----------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>1 Select appropriate equipment for the group</b> | 1.1 Select <b>equipment</b> after consideration of <b>contextual issues</b> and check to ensure that it is in good working condition<br>1.2 Fit and adjust <b>equipment</b> correctly and ensure suitability to the participant and conditions<br>1.3 Pack <b>equipment</b> that is not required on hand in a suitable manner<br>1.5 Check <b>safety and rescue equipment</b> to ensure suitability to group and planned trip                                                                                                                                                                                                                                                                                                                                   |
| <b>2 Plan a snowboarding trip for clients</b>       | 2.1 Assess skill level, experience and physical capabilities of each member of the group<br>2.2 Establish attainable group objectives<br>2.3 Select suitable location for trip to suit abilities and objectives of the group<br>2.4 Obtain and interpret weather information for local conditions of the trip<br>2.5 Obtain permits or permission for access where necessary<br>2.6 Ensure correct leader/client ratios are met<br>2.7 Prepare a checklist for personal equipment as trip leader<br>2.8 Determine food and drink requirements for group taking into account contextual issues<br>2.9 Assess, minimise and eliminate risks, where possible whilst forming a risk management plan                                                                 |
| <b>3 Brief clients</b>                              | 3.1 Communicate logistical details to clients<br>3.2 Brief group of standard safety procedures<br>3.3 Explain symptoms, treatment and prevention of hypothermia and dehydration to group to assist in self-monitoring<br>3.4 Outline procedure following an incident to a group member<br>3.5 Establish verbal and non-verbal <b>communication</b> system for use during trip and ensure that all clients understand system(s)                                                                                                                                                                                                                                                                                                                                  |
| <b>4 Maintain physical welfare of group</b>         | 4.1 Apply knowledge of hypothermia and dehydration to trip planning in terms of food, clothing, snowboarding times and distances<br>4.2 Assess capabilities of group members on the day before commencing<br>4.3 Ensure all clients are properly equipped for the trip and conditions including protection from weather conditions eg sunscreen<br>4.4 Monitor individual client's performance and needs<br>4.5 Evaluate boarding pace and conditions<br>4.6 Monitor weather conditions<br>4.7 Evaluate implications of weather signs on trip plans<br>4.8 Implement appropriate modifications to trip in regard to all variable factors that are monitored<br>4.9 Control the group to maintain a safe enjoyable atmosphere<br>4.10 Apply risk management plan |
| <b>5 Establish effective communication</b>          | 5.1 Communicate clearly objectives and nature of the trip to the group<br>5.2 Provide clear and concise direction and advice to group during the trip                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |

|                                                                              |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |

## Range Statements

The Range Statements provide advice to interpret the scope and context of this unit of competence, allowing for differences between enterprises and workplaces. The Range Statements relate to the unit as a whole and helps facilitate holistic assessment. In addition, the following variables may be present for this particular unit of competency:

| RANGE STATEMENT          | CATEGORIES                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |

## Evidence Guide

The Evidence Guide identifies the critical aspects, knowledge and skills to be demonstrated to confirm competence for this unit. This is an integral part of the assessment of competence and should be read in conjunction with the Range Statements.

|                                                      |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |

| SKB         | Snowboarding          |

**DESCRIPTION:** This unit has been developed for the Outdoor Recreation Industry Training Package.

This unit covers the knowledge and skills to instruct learners to achieve competencies in order to participate independently, or with minimal supervision, in a snowboarding activity.

| ELEMENT                                                                     | PERFORMANCE CRITERIA                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |

| <b>1 Plan an instructional session for teaching snowboarding skills</b>     | 1.1 Identify client needs and assess current competencies of group/individuals in order to determine the aims and objectives of the instructional session<br>1.2 Select a suitable site for the instructional session, based on an assessment of client needs, <b>hazards</b> , abilities and session aims<br>1.3 Plan appropriate instructional activities which will facilitate and enhance the learning process<br>1.4 Determine a suitable <b>sequence</b> of instruction<br>1.5 Access resources to conduct instructional activities, games and drills<br>1.6 Provide relevant pre-activity information to clients<br>1.7 Prepare contingency plans for instructional session to cope with inclement weather and other factors which may affect the ability to conduct the session<br>1.8 Conduct a risk assessment of the instructional activities and location and implement a risk management plan in accordance with the organisation's guidelines and operating procedures |
| <b>2 Select appropriate resources required to teach snowboarding skills</b> | 2.1 Select and access <b>equipment</b> and <b>other resources</b> suitable for the instructional objectives<br>2.2 Select, fit and adjust <b>equipment</b> (where appropriate) to suit the needs of individual clients<br>2.3 Check all <b>equipment</b> to ensure compliance with occupational health and safety legislation, manufacturer's recommendations and/or operating procedures, and to ensure that it is in good working order<br>2.4 Check contents of first aid and repair kits to ensure their suitability to the location and activity<br>2.5 Arrange, where required, protective and/or safety clothing for each client                                                                                                                                                                                                                                                                                                                                              |
| <b>3 Introduce an instructional snowboarding session</b>                    | 3.1 Communicate the aims of the instructional session to the clients<br>3.2 Encourage clients to seek clarification, information and feedback<br>3.3 Brief the clients on the safety practices, procedures and behaviour appropriate to the instructional session<br>3.4 Define activity boundaries/training area and/or clearly outline to the clients<br>3.5 Check clothing and footwear of clients for suitability to the session<br>3.6 Provide information on <b>equipment</b> selection, fitting or use where relevant to the instructional session's aims                                                                                                                                                                                                                                                                                                                                                                                                                     |
| <b>4 Conduct an instructional snowboarding session</b>                      | 4.1 Conduct "warm up"/introductory activities (where required) to reduce the risk of injury when client's are participating in physical activities<br>4.2 Monitor individual client's performance in instructional activities<br>4.3 Provide positive encouragement and/or feedback to each client at a suitable time to maintain a positive learning environment<br>4.4 Ensure instructional activity allows for repetition of skills<br>4.5 Evaluate instructional activities for effectiveness and implement modifications when required<br>4.6 Assess risks associated with the conduct of instructional activities constantly and remove, minimise or avoid hazards in accordance with risk management                                                                                                                                                                                                                                                                          |

|                                                                                     |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |
|-------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                                                                                     | <p>plan and instructional objectives.</p> <p>4.7 Monitor <b>equipment</b> usage, behaviour and location of clients in order to review safety</p> <p>4.8 Ensure personal competencies with respect to topics and skills within the instructional session are at a sufficient level to enable correct demonstration of skills, accurate provision of information and to engender the confidence of the client(s)</p> <p>4.9 Demonstrate how personal competencies enable emergency and non - routine situations to be dealt with in accordance with operating procedures</p>                                                                                                                                                                                                   |
| <b>5 Apply appropriate teaching techniques for a snowboarding session</b>           | <p>5.1 Communicate instructions and information clearly and concisely</p> <p>5.2 Perform demonstrations for clients (where required) with a high level of technical correctness and accurate description</p> <p>5.3 Break-down complex skills and techniques into component parts and describe with key teaching points</p> <p>5.4 Identify faults in technique and provide a variety of solutions, where relevant, to correct faults</p> <p>5.5 Provide adequate time for practice, following fault correction and feedback</p> <p>5.6 Explain activities, drills or techniques which may improve skills</p>                                                                                                                                                                |
| <b>6 Teach required knowledge that applies to a snowboarding activity</b>           | <p>6.1 Teach required knowledge, ethics, codes of behaviour, points of interest or principles relevant to snowboarding and achievement of competency, in a manner which achieves interest and client understanding</p> <p>6.2 Instruct clients on factors to consider when planning for participation in snowboarding</p> <p>6.3 Identify minimal impact practices appropriate to snowboarding, and determine client level of understanding</p> <p>6.4 Outline specific aspects of <b>equipment</b> selection, use and care, to enable the client to achieve competency at the relevant level</p> <p>6.5 Explain communication systems and relevant calls or signals used whilst participating in snowboarding, and determine client level of understanding in their use</p> |
| <b>7 Teach safety and rescue procedures appropriate to a alpine skiing activity</b> | <p>7.1 Instruct clients in appropriate emergency response procedures and techniques applicable to alpine skiing, and the level of competency required</p> <p>7.2 Explain the principles and practices of group management, in the context of emergency situations</p> <p>7.3 Teach clients industry standard safety practices relevant to alpine skiing</p> <p>7.4 Demonstrate rescue techniques specific to alpine skiing, and provide opportunities for practice</p> <p>7.5 Clarify the use and selection of specific emergency response <b>equipment</b> that should be carried, relevant to the level of competency</p> <p>7.6 Assess client's level of understanding via questioning techniques and/or formal assessment</p>                                            |
| <b>8 Teach alpine skiing skills</b>                                                 | <p>8.1 Explain and demonstrate key points of technique or skill</p> <p>8.2 Outline the <b>sequence</b> or combination of skill to achieve effective or efficient results</p> <p>8.3 Identify different applications of skill or technique, and where it is applicable/not applicable</p> <p>8.4 Practice skills or techniques and observe clients in order to provide feedback</p> <p>8.5 Assess clients to determine poor or incorrect technique</p> <p>8.6 Provide opportunities for additional practice, where required</p>                                                                                                                                                                                                                                               |
| <b>9 Communicate further alpine skiing knowledge</b>                                | <p>9.1 Inform clients of locations, suitable to their skill level, for participating in alpine skiing</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |

|                                                                         |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |
|-------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                                                                         | <p>9.2 Provide information relevant to the competencies being taught, on the range of <b>equipment</b> and clothing available or required, and factors affecting choice</p> <p>9.3 Inform clients of opportunities to further develop their personal skills and knowledge</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |
| <b>10 Conclude and evaluate the alpine skiing instructional session</b> | <p>10.1 Allow time for "cooling down" at the end of the session, check <b>equipment</b> for damage and return and store in an appropriate fashion</p> <p>10.2 Determine the level of learning achieved directly through assessment or indirectly from Assessor</p> <p>10.3 Apply feedback from Assessor or assessment to evaluate the effectiveness of the instructional activities, the suitability of the instructional method, the feedback provided to clients and the initial assessment of client's abilities</p> <p>10.4 Evaluate the validity and reliability of assessment/evaluation tools used throughout the session to monitor learning</p> <p>10.5 Determine modifications to activities and delivery method(s), based on evaluations</p> <p>10.6 Evaluate the suitability of <b>other related factors</b></p> |

## Range Statements

The Range Statements provide advice to interpret the scope and context of this unit of competence, allowing for differences between enterprises and workplaces. The Range Statements relate to the unit as a whole and helps facilitate holistic assessment. In addition, the following variables may be present for this particular unit of competency:

| RANGE STATEMENT              | CATEGORIES                                                                                                                                                                                                                                                                                                         |

## Evidence Guide

The Evidence Guide identifies the critical aspects, knowledge and skills to be demonstrated to confirm competence for this unit. This is an integral part of the assessment of competence and should be read in conjunction with the Range Statements.

|                                                      |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |

**DESCRIPTION:** This unit has been developed for the Outdoor Recreation Industry Training Package.

This unit covers the knowledge and skills required to, alpine ski beginner terrain at a snowsport area using a range of techniques, and explain and adhere to safe skiing practices. Beginner terrain is equivalent to green runs at a snowsport area.

| ELEMENT                                                                  | PERFORMANCE CRITERIA                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |
|--------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>1 Plan for an alpine skiing activity</b>                              | 1.1 Ensure sufficient food and water is available to maintain physiological well-being during activity<br>1.2 Select personal clothing for activity and identify the design/construction features that make it appropriate<br>1.3 Identify an appropriate activity site/location after consideration of statutory and organisational procedures, where applicable, and contextual issues relating to the activity<br>1.4 Access and interpret meteorological data and determine activity plans following consideration of weather information                                                                                    |
| <b>2 Select appropriate equipment to participate in activity</b>         | 2.1 Select appropriate equipment after consideration of issues that include season, weather and length of activity<br>2.2 Check to ensure that equipment is in good working condition<br>2.3 Fit and adjust equipment correctly and ensure suitability to activity and compliance with manufacturers' specification for use                                                                                                                                                                                                                                                                                                      |
| <b>3 Alpine ski on a minimum of one beginner run at a snowsport area</b> | 3.1 Execute a gliding wedge demonstrating a centred stance in relation to the fore, aft and lateral planes while looking at the terrain ahead<br>3.2 Execute a wedge turn in alpine skiing techniques, demonstrating a centred and athletic skiing stance in relation to the fore and aft plane of movement<br>3.3 Execute wedge turns in alpine skiing techniques showing effective usage in the <b>rotational, lateral and vertical planes of movement</b><br>3.4 Demonstrate linked wedge <b>turns</b> through the fall line<br>3.5 Demonstrate <b>speed control</b> whilst traversing and using the <b>shape of the turn</b> |
| <b>4 Explain and adhere to safe skiing practices</b>                     | 4.1 Explain and identify the importance of <b>comfort and safety</b> when selecting <b>skis, ski boots, ski bindings</b> and <b>ski poles</b> for a beginner skier<br>4.2 Explain and identify the basic functions of ski bindings, one of which must be a safety function<br>4.3 Demonstrate skiing skills to avoid <b>hazards</b> in a variety of <b>snow, terrain</b> and <b>weather</b> conditions<br>4.4 Comply with all snowsport area signs and regulations<br>4.5 Explain the Alpine Responsibility Code and compliance of skiing practices with the code                                                                |

## Range Statements

The Range Statements provide advice to interpret the scope and context of this unit of competence, allowing for differences between enterprises and workplaces. The Range Statements relate to the unit as a whole and helps facilitate holistic assessment. In addition, the following variables may be present for this particular unit of competency:

| RANGE STATEMENT    | CATEGORIES                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |

## Evidence Guide

The Evidence Guide identifies the critical aspects, knowledge and skills to be demonstrated to confirm competence for this unit. This is an integral part of the assessment of competence and should be read in conjunction with the Range Statements.

|                                                      |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |
|------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Critical aspects of evidence to be considered</b> | <ul style="list-style-type: none"> <li>• Assessment must confirm sufficient basic knowledge of skiing, Alpine downhill on beginner terrain, i.e., green runs</li> <li>• Assessment of performance should be over a minimum of two (2) different occasions covering the prescribed number of categories from the Range Statements</li> <li>• Assessment must confirm the ability to perform basic gliding wedge turns on beginner terrain and adhere to safe skiing practices</li> <li>• In particular, assessment must confirm the ability to               <ul style="list-style-type: none"> <li>○ control speed during turns</li> <li>○ link wedge turns through the fall line</li> <li>○ avoid hazards using skiing skills</li> <li>○ select suitable equipment</li> </ul> </li> </ul> |
| <b>Interdependent assessment of units</b>            | <ul style="list-style-type: none"> <li>• This unit must be assessed after attainment of competency in the following unit(s)               <ul style="list-style-type: none"> <li>○ SROOPS001B Implement minimal environmental impact practices</li> <li>○ SROODR001A Apply basic outdoor recreation logistics</li> </ul> </li> <li>• This unit must be assessed in conjunction with the following unit(s)               <ul style="list-style-type: none"> <li>○ Nil</li> </ul> </li> <li>• For the purpose of integrated assessment, this unit may be assessed in conjunction with the following unit(s)               <ul style="list-style-type: none"> <li>○ SRONAV001B Navigate in tracked or easy untracked areas</li> </ul> </li> </ul>                                             |
| <b>Required knowledge and skills</b>                 | <ul style="list-style-type: none"> <li>• Required knowledge               <ul style="list-style-type: none"> <li>○ Alpine Responsibility Code</li> <li>○ DIN system (Deutsches Institute fur Normung (DIN) - German Standards)</li> <li>○ Weather conditions</li> <li>○ Terrain conditions</li> <li>○ Snow conditions</li> <li>○ Equipment selection</li> <li>○ Braking systems</li> </ul> </li> <li>• Required skills               <ul style="list-style-type: none"> <li>○ Balance on downhill skis</li> </ul> </li> </ul>                                                                                                                                                                                                                                                              |
| <b>Resource implications</b>                         | <ul style="list-style-type: none"> <li>• Physical resources - assessment of this unit of competency requires access to               <ul style="list-style-type: none"> <li>○ snowsport area with suitable terrain (green runs)</li> <li>○ suitable clothing</li> <li>○ skis</li> <li>○ bindings</li> <li>○ boots</li> <li>○ poles</li> <li>○ food and water</li> </ul> </li> <li>• Human resources - assessment of this unit of competency will require human resources consistent with those outlined in the Assessment Guidelines. That is, assessors (or persons within the assessment team) must               <ul style="list-style-type: none"> <li>○ be competent in the unit SROSKI002A</li> <li>○ be competent in the units SRXFAD001A, SRXRIK001A,</li> </ul> </li> </ul>       |

**DESCRIPTION:** This unit has been developed for the Outdoor Recreation Industry Training Package.

This unit covers the knowledge and skills required to alpine ski intermediate terrain at a snowsport area using a range of techniques and adhere to safe skiing practices. Intermediate terrain is equivalent to blue runs at a snowsport area.

| ELEMENT                                                          | PERFORMANCE CRITERIA                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |
|------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>1 Plan for an alpine skiing activity</b>                      | 1.1 Ensure sufficient food and water is available to maintain physiological well-being during activity<br>1.2 Select personal clothing for activity and identify the design/construction features that make it appropriate<br>1.3 Identify an appropriate activity site/location after consideration of statutory and organisational procedures, where applicable, and contextual issues relating to the activity<br>1.4 Access and interpret meteorological data and determine activity plans following consideration of weather information                                                                                                       |
| <b>2 Select appropriate equipment to participate in activity</b> | 2.1 Select appropriate equipment after consideration of issues that include season, weather and length of activity<br>2.2 Check to ensure that equipment is in good working condition<br>2.3 Fit and adjust equipment correctly and ensure suitability to activity and compliance with manufacturers' specification for use                                                                                                                                                                                                                                                                                                                         |
| <b>3 Alpine ski intermediate terrain at a snowsport area</b>     | 3.1 Execute a basic parallel turn in alpine skiing techniques demonstrating a centred and athletic skiing stance in relation to the fore and aft <b>plane of movement</b><br>3.2 Execute alpine skiing techniques in a basic parallel turn demonstrating efficient use of the <b>rotational, lateral</b> and <b>vertical, planes of movement</b><br>3.3 Execute alpine skiing techniques in a basic parallel turn demonstrating the use of a <b>pole touch</b><br>3.4 Demonstrate linked parallel <b>turns</b> through the fall line<br>3.5 Demonstrate <b>speed control</b> whilst turning and using the <b>shape of the turn</b> on all blue runs |
| <b>4 Adhere to safe skiing practices</b>                         | 4.1 Identify and explain the importance of <b>comfort and safety</b> when selecting <b>skis, ski boots, ski bindings</b> and <b>ski poles</b> , for an <b>intermediate skier</b><br>4.2 Identify and explain the basic functions of <b>ski bindings</b> , one of which must be a safety function<br>4.3 Demonstrate skiing skills to avoid <b>hazards</b> in a variety of <b>snow, terrain</b> and <b>weather conditions</b><br>4.4 Comply with all snowsport area signs and regulations<br>4.5 Explain the Alpine Responsibility Code and compliance of skiing practices with the code                                                             |

## Range Statements

The Range Statements provide advice to interpret the scope and context of this unit of competence, allowing for differences between enterprises and workplaces. The Range Statements relate to the unit as a whole and helps facilitate holistic assessment. In addition, the following variables may be present for this particular unit of competency:

| RANGE STATEMENT                                              | CATEGORIES                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |

## Evidence Guide

The Evidence Guide identifies the critical aspects, knowledge and skills to be demonstrated to confirm competence for this unit. This is an integral part of the assessment of competence and should be read in conjunction with the Range Statements.

|                                                      |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |

**DESCRIPTION:** This unit has been developed for the Outdoor Recreation Industry Training Package.

This unit covers the knowledge and skills required to alpine ski advanced terrain at a snowsport area and adhere to safe skiing practices. Advanced terrain is equivalent to black runs.

| ELEMENT                                                          | PERFORMANCE CRITERIA                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |
|------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>1 Plan for the activity</b>                                   | 1.1 Ensure sufficient food and water is available to maintain physiological well-being during activity<br>1.2 Select personal clothing for activity and identify the design/construction features that make it appropriate<br>1.3 Identify an appropriate activity site/location after consideration of statutory and organisational procedures, where applicable, and contextual issues relating to the activity<br>1.4 Access and interpret meteorological data and determine activity plans following consideration of weather information                                                                                                                                                                                                                                                                                               |
| <b>2 Select appropriate equipment to participate in activity</b> | 2.1 Select appropriate equipment after consideration of issues that include season, weather and length of activity<br>2.2 Check to ensure that equipment is in good working condition<br>2.3 Fit and adjust equipment correctly and ensure suitability to activity and compliance with manufacturers' specification for use                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |
| <b>3 Alpine ski advanced terrain at a snowsport area</b>         | 3.1 Execute alpine ski techniques in <b>parallel turns</b> demonstrating a centred, athletic stance in relation to the fore and aft <b>plane of movement</b><br>3.2 Execute alpine ski techniques in <b>parallel turns</b> demonstrating efficient movement within the <b>planes of movement</b><br>3.3 Execute alpine skiing techniques in <b>parallel turns</b> demonstrating <b>co-ordination</b> in the rotational, lateral and vertical <b>planes of movement</b><br>3.4 Apply linked <b>parallel turns</b> skiing through the fall line on all terrain<br>3.5 Apply controlled speed using <b>turn-shape</b> , with the <b>turn-shape</b> adapted for <b>conditions and terrain</b><br>3.6 Execute alpine ski techniques in <b>parallel turns</b> demonstrating ski performance and utilisation of the <b>design of the equipment</b> |
| <b>4 Adhere to safe skiing practices</b>                         | 4.1 Identify and explain the functions and performance characteristics of skis, ski bindings, ski boots and ski poles, three of which must be a safety function<br>4.2 <b>Maintain ski equipment</b> to match performance requirements<br>4.3 Apply skiing skills to avoid <b>hazards</b> in a variety of <b>snow, terrain and weather conditions</b><br>4.4 Comply with all snowsport area signs and regulations<br>4.5 Explain the Alpine Responsibility Code and compliance of skiing practices with the code                                                                                                                                                                                                                                                                                                                            |

## Range Statements

The Range Statements provide advice to interpret the scope and context of this unit of competence, allowing for differences between enterprises and workplaces. The Range Statements relate to the unit as a whole and helps facilitate holistic assessment. In addition, the following variables may be present for this particular unit of competency:

| RANGE STATEMENT                            | CATEGORIES                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |

## Evidence Guide

The Evidence Guide identifies the critical aspects, knowledge and skills to be demonstrated to confirm competence for this unit. This is an integral part of the assessment of competence and should be read in conjunction with the Range Statements.

|                                                      |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |

**DESCRIPTION:** This unit has been developed for the Outdoor Recreation Industry Training Package.

This unit covers the knowledge and skills required to alpine ski off-piste using a range of techniques, and adhere to safe skiing practices.

| ELEMENT                                                          | PERFORMANCE CRITERIA                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |
|------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>1 Plan for the activity</b>                                   | 1.1 Ensure sufficient food and water is available to maintain physiological well-being during activity<br>1.2 Select personal clothing for activity and identify the design/construction features that make it appropriate<br>1.3 Identify an appropriate activity site/location after consideration of statutory and organisational procedures, where applicable, and contextual issues relating to the activity<br>1.4 Access and interpret meteorological data and determine activity plans following consideration of weather information                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |
| <b>2 Select appropriate equipment to participate in activity</b> | 2.1 Select appropriate equipment after consideration of issues that include season, weather and length of activity<br>2.2 Check to ensure that equipment is in good working condition<br>2.3 Fit and adjust equipment correctly and ensure suitability to activity and compliance with manufacturers' specification for use                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |
| <b>3 Alpine ski off-piste using a range of techniques</b>        | 3.1 Execute <b>alpine skiing techniques</b> demonstrating a centred, athletic skiing stance in relation to the fore and aft <b>plane of movement</b><br>3.2 Execute alpine ski techniques in parallel turns in <b>off-piste conditions</b> demonstrating efficient movements within the <b>planes of movement</b><br>3.3 Execute alpine skiing techniques in parallel turns in <b>off-piste conditions</b> demonstrating <b>co-ordination of movement</b> in the <b>rotational, lateral</b> and <b>vertical planes of movement</b><br>3.4 Execute alpine skiing techniques in <b>parallel turns</b> in <b>off-piste</b> demonstrating a well timed and strong pole touch which aids balance<br>3.5 Apply linked parallel turns skiing through the fall line in off-piste conditions and terrain<br>3.6 Control speed using <b>turn-shape</b> , with the turn-shape adapted for <b>snow conditions</b> and <b>terrain</b><br>3.7 Execute alpine ski techniques in parallel turns, demonstrating ski performance and utilisation of the <b>design of the equipment</b> |
| <b>4 Adhere to safe skiing practices</b>                         | 4.1 Identify and explain the functions and performance characteristics of skis, ski bindings, ski boots and ski poles, three of which must be a safety function<br>4.2 <b>Maintain ski equipment</b> to match performance requirement<br>4.3 Apply skiing skills to avoid <b>hazards</b> in a variety of <b>snow, terrain</b> and <b>weather conditions</b><br>4.4 Comply with all snowsport area signs and regulations<br>4.5 Explain the Alpine Responsibility Code and skiing practice compliance with the code                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |

## Range Statements

The Range Statements provide advice to interpret the scope and context of this unit of competence, allowing for differences between enterprises and workplaces. The Range Statements relate to the unit as a whole and helps facilitate holistic assessment. In addition, the following variables may be present for this particular unit of competency:

| RANGE STATEMENT                     | CATEGORIES                                                                                                                                                                                                                                                                                                                                                                                                                                              |

## Evidence Guide

The Evidence Guide identifies the critical aspects, knowledge and skills to be demonstrated to confirm competence for this unit. This is an integral part of the assessment of competence and should be read in conjunction with the Range Statements.

|                                                      |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |

| SKI        | Skiing                                          |

**DESCRIPTION:** This unit has been developed for the Outdoor Recreation Industry Training Package.

This unit covers the knowledge and skills required to alpine ski on all terrain at a snowsport area with a high level of ski performance, and to adhere to safe skiing practices.

| ELEMENT                                                                                     | PERFORMANCE CRITERIA                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |

| <b>2 Select appropriate equipment to participate in activity</b>                            | 2.1 Select appropriate equipment after consideration of issues that include season, weather and length of activity<br>2.2 Check to ensure that equipment is in good working condition<br>2.3 Fit and adjust equipment correctly and ensure suitability to activity and compliance with manufacturers' specification for use                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |
| <b>3 Alpine ski on all terrain at a snowsport area with a high level of ski performance</b> | 3.1 Execute free ski techniques in <b>dynamic parallel turns on all terrain</b> and through changing <b>snow conditions</b> , demonstrating a centred, athletic stance in relation to the fore and aft plane of movement<br>3.2 Execute alpine skiing techniques in <b>dynamic parallel turns on all terrain</b> and through changing <b>snow conditions</b> , demonstrating efficient movement within the <b>planes of movement</b><br>3.3 Execute alpine skiing techniques in <b>dynamic parallel turns in all terrain and snow conditions</b> , demonstrating <b>co-ordination of movement</b> in the <b>rotational, lateral and vertical planes of movement</b><br>3.4 Apply <b>dynamic parallel turns</b> skiing with speed through the fall line in <b>all terrain and snow conditions</b><br>3.5 Control speed using <b>turn-shape</b> with the <b>turn-shape</b> adapted for <b>conditions, terrain and carriage of speed</b><br>3.6 Execute alpine ski techniques in <b>dynamic parallel turns</b> , demonstrating ski performance and utilisation of the <b>design of the equipment</b> in all <b>conditions and terrain</b> |
| <b>4 Adhere to safe skiing practices</b>                                                    | 4.1 Identify and explain the functions and performance characteristics of skis, ski bindings, ski boots and ski poles, three of which must be a safety function<br>4.2 <b>Maintain ski equipment</b> to match performance requirements<br>4.3 Apply skiing skills to avoid <b>hazards</b> in a variety of <b>snow, terrain and weather conditions</b><br>4.4 Comply with all snowsport area signs and regulations<br>4.5 Explain the Alpine Responsibility Code and compliance of skiing practice with the code                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |

## Range Statements

The Range Statements provide advice to interpret the scope and context of this unit of competence, allowing for differences between enterprises and workplaces. The Range Statements relate to the unit as a whole and helps facilitate holistic assessment. In addition, the following variables may be present for this particular unit of competency:

| RANGE STATEMENT                  | CATEGORIES                                                                                                                                                                                                                                                                                    |

## Evidence Guide

The Evidence Guide identifies the critical aspects, knowledge and skills to be demonstrated to confirm competence for this unit. This is an integral part of the assessment of competence and should be read in conjunction with the Range Statements.

|                                                      |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |

**DESCRIPTION:** This unit has been developed for the Outdoor Recreation Industry Training Package.

This unit covers the knowledge and skills required to perform a range of techniques on Telemark equipment on intermediate terrain at a snowsport area, and to adhere to safe skiing practices. Intermediate terrain is equivalent to blue runs at a snowsport area.

| ELEMENT                                                                                       | PERFORMANCE CRITERIA                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |
|-----------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>1 Plan for the activity</b>                                                                | 1.1 Ensure sufficient food and water is available to maintain physiological well-being during activity<br>1.2 Select personal clothing for activity and identify the design/construction features that make it appropriate<br>1.3 Identify an appropriate activity site/location after consideration of statutory and organisational procedures, where applicable, and contextual issues relating to the activity<br>1.4 Access and interpret meteorological data and determine activity plans following consideration of weather information<br>1.5 Demonstrate knowledge of snowsport area protocol and run status for the day |
| <b>2 Select appropriate equipment to participate in activity</b>                              | 2.1 Select appropriate equipment after consideration of issues that include <b>safety and comfort</b> , season, weather and length of activity<br>2.2 Check to ensure that equipment is in good working condition<br>2.3 Fit and adjust equipment correctly and ensure suitability to activity and compliance with manufacturers' specification for use                                                                                                                                                                                                                                                                          |
| <b>3 Telemark ski on intermediate terrain at a snowsport area using a range of techniques</b> | 3.1 Execute Telemark skiing techniques and turns, demonstrating a centred and athletic skiing stance in relation to the four planes of movement<br>3.2 Execute Telemark skiing techniques and turns showing a blending of the <b>movements of Telemark</b><br>3.3 Demonstrate linked Telemarks <b>turns</b> through the fall line<br>3.4 Control speed with the <b>shape of the turn</b> , with the turn-shape adapted for <b>conditions and terrain</b><br>3.5 Utilise <b>design of equipment</b> to enhance Telemark skiing performance                                                                                        |
| <b>4 Adhere to safe Telemark practices</b>                                                    | 4.1 Demonstrate a good understanding of Telemark skiing equipment by outlining reasons for owning/using personal equipment<br>4.2 Outline the checks required to ensure personal Telemark boots and bindings are in <b>good working order</b><br>4.3 Apply Telemark skills to avoid <b>hazards</b> in a variety of <b>snow, terrain and weather conditions</b><br>4.4 Comply with all snowsport area regulations<br>4.5 Explain the Alpine Responsibility Code and compliance of Telemarking practice with the code                                                                                                              |

## Range Statements

The Range Statements provide advice to interpret the scope and context of this unit of competence, allowing for differences between enterprises and workplaces. The Range Statements relate to the unit as a whole and helps facilitate holistic assessment. In addition, the following variables may be present for this particular unit of competency:

| RANGE STATEMENT            | CATEGORIES                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |

## Evidence Guide

The Evidence Guide identifies the critical aspects, knowledge and skills to be demonstrated to confirm competence for this unit. This is an integral part of the assessment of competence and should be read in conjunction with the Range Statements.

**DESCRIPTION:** This unit has been developed for the Outdoor Recreation Industry Training Package.

This unit covers the knowledge and skills required to Telemark ski on advanced terrain using advanced Telemark skiing techniques, and to adhere to safe skiing practices. Advanced terrain is equivalent to black runs at a snowsport area.

| ELEMENT                                                                             | PERFORMANCE CRITERIA                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |
|-------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>1 Plan for the activity</b>                                                      | 1.1 Ensure sufficient food and water is available to maintain physiological well-being during activity<br>1.2 Select personal clothing for activity and identify the design/construction features that make it appropriate<br>1.3 Identify an appropriate activity site/location after consideration of statutory and organisational procedures, where applicable, and contextual issues relating to the activity<br>1.4 Access and interpret meteorological data and determine activity plans following consideration of weather information<br>1.5 Demonstrate knowledge of snowsport area protocol and run status for the day                       |
| <b>2 Select appropriate equipment to participate in activity</b>                    | 2.1 Select appropriate equipment after consideration of issues that include season, weather and length of activity<br>2.2 Check to ensure that equipment is in good working condition<br>2.3 Fit and adjust equipment correctly and ensure suitability to activity and compliance with manufacturers' specification for use                                                                                                                                                                                                                                                                                                                            |
| <b>3 Telemark ski on advanced terrain using advanced telemark skiing techniques</b> | 3.1 Execute Telemark skiing techniques and turns, demonstrating an athletic and balanced stance in relation to the four planes of <b>movement</b><br>3.2 Execute <b>movement of Telemark</b> skiing techniques, demonstrating <b>co-ordination of the movements</b><br>3.3 Demonstrate linked Telemark <b>turns</b> through the fall line skiing with speed<br>3.4 Control speed by the <b>shape</b> and type <b>of turn</b> , with the turn-shape and type adapted for conditions and terrain<br>3.5 Utilise <b>design of equipment</b> to enhance skiing performance<br>3.6 Demonstrate correct usage of edges during retraction and extension turns |
| <b>4 Adhere to safe skiing practices</b>                                            | 4.1 <b>Maintain Telemark equipment</b> to match performance requirements<br>4.2 Identify and explain the importance of <b>comfort and safety</b> when selecting skis, boots and bindings, for an advanced telemark skier<br>4.3 Identify and explain the basic functions of <b>Telemark equipment</b> , one of which must be a safety function<br>4.4 Use safety skills to avoid <b>hazards</b> in a variety of <b>snow, terrain and weather conditions</b><br>4.5 Comply with all snowsport area regulations<br>4.6 Explain the Alpine Responsibility Code and telemarking practice compliance with the code                                          |

## Range Statements

The Range Statements provide advice to interpret the scope and context of this unit of competence, allowing for differences between enterprises and workplaces. The Range Statements relate to the unit as a whole and helps facilitate holistic assessment. In addition, the following variables may be present for this particular unit of competency:

| RANGE STATEMENT                   | CATEGORIES                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |

## Evidence Guide

The Evidence Guide identifies the critical aspects, knowledge and skills to be demonstrated to confirm competence for this unit. This is an integral part of the assessment of competence and should be read in conjunction with the Range Statements.

|                                                      |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |

**DESCRIPTION:** This unit has been developed for the Outdoor Recreation Industry Training Package.

This unit covers the knowledge and skills to instruct learners to achieve competencies in order to participate independently, or with minimal supervision, in an alpine skiing activity.

| ELEMENT                                                                      | PERFORMANCE CRITERIA                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |
|------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>1 Plan an instructional session for teaching alpine skiing skills</b>     | 1.1 Identify client needs and assess current competencies of group/individuals in order to determine the aims and objectives of the instructional session<br>1.2 Select a suitable site for the instructional session, based on an assessment of client needs, <b>hazards</b> , abilities and session aims<br>1.3 Plan appropriate instructional activities which will facilitate and enhance the learning process<br>1.4 Determine a suitable <b>sequence</b> of instruction<br>1.5 Access resources to conduct instructional activities, games and drills<br>1.6 Provide relevant pre-activity information to clients<br>1.7 Prepare contingency plans for instructional session to cope with inclement weather and other factors which may affect the ability to conduct the session<br>1.8 Conduct a risk assessment of the instructional activities and location and implement a risk management plan in accordance with the organisation's guidelines and operating procedures |
| <b>2 Select appropriate resources required to teach alpine skiing skills</b> | 2.1 Select and access <b>equipment</b> and <b>other resources</b> suitable for the instructional objectives<br>2.2 Select, fit and adjust <b>equipment</b> (where appropriate) to suit the needs of individual clients<br>2.3 Check all <b>equipment</b> to ensure compliance with occupational health and safety legislation, manufacturer's recommendations and/or operating procedures, and to ensure that it is in good working order<br>2.4 Check contents of first aid and repair kits to ensure their suitability to the location and activity<br>2.5 Arrange, where required, protective and/or safety clothing for each client                                                                                                                                                                                                                                                                                                                                              |
| <b>3 Introduce an instructional alpine skiing session</b>                    | 3.1 Communicate the aim of the instructional session to the clients<br>3.2 Encourage clients to seek clarification, information and feedback<br>3.3 Brief the clients on the safety practices, procedures and behaviour appropriate to the instructional session<br>3.4 Define activity boundaries/training area and/or clearly outline to the clients<br>3.5 Check clothing and footwear of clients for suitability to the session<br>3.6 Provide information on <b>equipment</b> selection, fitting or use where relevant to the instructional session's aims                                                                                                                                                                                                                                                                                                                                                                                                                      |
| <b>4 Conduct an instructional alpine skiing session</b>                      | 4.1 Conduct "warm up"/introductory activities (where required) to reduce the risk of injury when client's are participating in physical activities<br>4.2 Monitor individual client's performance in instructional activities<br>4.3 Provide positive encouragement and/or feedback to each client at a suitable time to maintain a positive learning environment<br>4.4 Ensure instructional activity allows for repetition of skills<br>4.5 Evaluate instructional activities for effectiveness and implement modifications when required<br>4.6 Assess risks associated with the conduct of instructional activities constantly and remove, minimise or avoid hazards in accordance with risk management                                                                                                                                                                                                                                                                          |

|                                                                                     |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |
|-------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                                                                                     | <p>plan and instructional objectives.</p> <p>4.7 Monitor <b>equipment</b> usage, behaviour and location of clients in order to review safety</p> <p>4.8 Ensure personal competencies with respect to topics and skills within the instructional session are at a sufficient level to enable correct demonstration of skills, accurate provision of information and to engender the confidence of the client(s)</p> <p>4.9 Demonstrate how personal competencies enable emergency and non-routine situations to be dealt with in accordance with operating procedures</p>                                                                                                                                                                                                         |
| <b>5 Apply appropriate teaching techniques for an alpine skiing session</b>         | <p>5.1 Communicate instructions and information clearly and concisely</p> <p>5.2 Perform demonstrations for clients (where required) with a high level of technical correctness and accurate description</p> <p>5.3 Break-down complex skills and techniques into component parts and describe with key teaching points</p> <p>5.4 Identify faults in technique and provide a variety of solutions, where relevant, to correct faults</p> <p>5.5 Provide adequate time for practice, following fault correction and feedback</p> <p>5.6 Explain activities, drills or techniques which may improve skills</p>                                                                                                                                                                    |
| <b>6 Teach required knowledge that applies to an alpine skiing activity</b>         | <p>6.1 Teach required knowledge, ethics, codes of behaviour, points of interest or principles relevant to alpine skiing and achievement of competency, in a manner which achieves interest and client understanding</p> <p>6.2 Instruct clients on factors to consider when planning for participation in alpine skiing</p> <p>6.3 Identify minimal impact practices appropriate to alpine skiing, and determine client level of understanding</p> <p>6.4 Outline specific aspects of <b>equipment</b> selection, use and care, to enable the client to achieve competency at the relevant level</p> <p>6.5 Explain communication systems and relevant calls or signals used whilst participating in alpine skiing, and determine client level of understanding in their use</p> |
| <b>7 Teach safety and rescue procedures appropriate to a alpine skiing activity</b> | <p>7.1 Instruct clients in appropriate emergency response procedures and techniques applicable to alpine skiing, and the level of competency required</p> <p>7.2 Explain the principles and practices of group management, in the context of emergency situations</p> <p>7.3 Teach clients industry standard safety practices relevant to alpine skiing</p> <p>7.4 Demonstrate rescue techniques specific to alpine skiing, and provide opportunities for practice</p> <p>7.5 Clarify the use and selection of specific emergency response <b>equipment</b> that should be carried, relevant to the level of competency</p> <p>7.6 Assess client's level of understanding via questioning techniques and/or formal assessment</p>                                                |
| <b>8 Teach alpine skiing skills</b>                                                 | <p>8.1 Explain and demonstrate key points of technique or skill</p> <p>8.2 Outline the <b>sequence</b> or combination of skill to achieve effective or efficient results</p> <p>8.3 Identify different applications of skill or technique, and where it is applicable/not applicable</p> <p>8.4 Practice skills or techniques and observe clients in order to provide feedback</p> <p>8.5 Assess clients to determine poor or incorrect technique</p> <p>8.6 Provide opportunities for additional practice, where required</p>                                                                                                                                                                                                                                                   |
| <b>9 Communicate further</b>                                                        | <p>9.1 Inform clients of locations, suitable to their skill level, for participating in alpine skiing</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |

|                                                                  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |

| 10 Conclude and evaluate the alpine skiing instructional session | 10.1 Allow time for "cooling down" at the end of the session, check <b>equipment</b> for damage and return and store in an appropriate fashion<br>10.2 Determine the level of learning achieved directly through assessment or indirectly from Assessor<br>10.3 Apply feedback from Assessor or assessment to evaluate the effectiveness of the instructional activities, the suitability of the instructional method, the feedback provided to clients and the initial assessment of client's abilities<br>10.4 Evaluate the validity and reliability of assessment/evaluation tools used throughout the session to monitor learning<br>10.5 Determine modifications to activities and delivery method(s), based on evaluations<br>10.6 Evaluate the suitability of <b>other related factors</b> |

## Range Statements

The Range Statements provide advice to interpret the scope and context of this unit of competence, allowing for differences between enterprises and workplaces. The Range Statements relate to the unit as a whole and helps facilitate holistic assessment. In addition, the following variables may be present for this particular unit of competency:

| RANGE STATEMENT              | CATEGORIES                                                                                                                                                                                                                                                                                                                 |

## Evidence Guide

The Evidence Guide identifies the critical aspects, knowledge and skills to be demonstrated to confirm competence for this unit. This is an integral part of the assessment of competence and should be read in conjunction with the Range Statements.

|                                                      |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |

**DESCRIPTION:** This unit has been developed for the Outdoor Recreation Industry Training Package.

This unit applies to travel on skis in a variety of conditions in a controlled environment near resorts carrying equipment for personal safety at an adequate level of degree of balance and level of confidence. Other related competencies, such as navigation, are defined in other units.

| ELEMENT                                                          | PERFORMANCE CRITERIA                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |
|------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>1 Plan for the activity</b>                                   | 1.1 Ensure sufficient food and water is available to maintain physiological well-being during activity<br>1.2 Select personal clothing for activity and identify the design/construction features that make it appropriate<br>1.3 Identify an appropriate activity site/location after consideration of statutory and organisational procedures, where applicable, and contextual issues relating to the activity<br>1.4 Access and interpret meteorological data and determine activity plans following consideration of weather information |
| <b>2 Select appropriate equipment to participate in activity</b> | 2.1 Select appropriate equipment after consideration of issues that include season, weather and length of activity<br>2.2 Check to ensure that equipment is in good working condition<br>2.3 Fit and adjust equipment correctly and ensure suitability to activity and compliance with manufacturers' specification for use                                                                                                                                                                                                                   |
| <b>3 Demonstrate <i>skiing skills</i></b>                        | 3.1 Demonstrate a degree of balance and confidence<br>3.2 Display efficiency of movement across <b><i>terrain</i></b><br>3.3 Modify <b><i>technique</i></b> to account for changes in <b><i>terrain</i></b><br>3.4 Demonstrate rhythm and smooth transfers between strides, steps and turns                                                                                                                                                                                                                                                   |
| <b>4 Ski in a safe manner</b>                                    | 4.1 Identify <b><i>hazards</i></b> and minimise, avoid or eliminate <b><i>risks</i></b><br>4.2 Take <b><i>measures</i></b> to guard personal and group safety<br>4.3 Consider the <b><i>safety of others</i></b> whilst skiing                                                                                                                                                                                                                                                                                                                |

## Range Statements

The Range Statements provide advice to interpret the scope and context of this unit of competence, allowing for differences between enterprises and workplaces. The Range Statements relate to the unit as a whole and helps facilitate holistic assessment. In addition, the following variables may be present for this particular unit of competency:

| RANGE STATEMENT         | CATEGORIES                                                                                                                                                                                                                                                                                             |

## Evidence Guide

The Evidence Guide identifies the critical aspects, knowledge and skills to be demonstrated to confirm competence for this unit. This is an integral part of the assessment of competence and should be read in conjunction with the Range Statements.

|                                                      |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |

**DESCRIPTION:** This unit has been developed for the Outdoor Recreation Industry Training Package.

This unit covers the knowledge and skills to undertake day ski tours in patrolled areas which may include untracked and ungroomed areas and slopes angled up to and including 10 degrees.

| ELEMENT                                                          | PERFORMANCE CRITERIA                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |
|------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>1 Plan for the activity</b>                                   | 1.1 Ensure sufficient food and water is available to maintain physiological well-being during activity<br>1.2 Select personal clothing for activity and identify the design/construction features that make it appropriate<br>1.3 Identify an appropriate activity site/location after consideration of statutory and organisational procedures, where applicable, and contextual issues relating to the activity<br>1.4 Access and interpret meteorological data and determine activity plans following consideration of weather information |
| <b>2 Select appropriate equipment to participate in activity</b> | 2.1 Select appropriate equipment after consideration of issues that include season, weather and length of activity<br>2.2 Check to ensure that equipment is in good working condition<br>2.3 Fit and adjust equipment correctly and ensure suitability to activity and compliance with manufacturers' specification for use                                                                                                                                                                                                                   |
| <b>3 Adhere to safe backcountry ski touring practices</b>        | 3.1 Select <b>equipment</b> appropriate to skiing skills, snow conditions and location<br>3.2 Determine route selection after considering efficiency and ease of route and potential <b>hazards</b> , and skiing avoids these <b>hazards</b><br>3.3 Carry clothing and <b>minimum supplies</b> for a backcountry day trip to meet safety requirements for minimising <b>hazards</b> and/or dealing with emergencies<br>3.4 Monitor the weather and incorporate information into skiing and route decisions                                    |
| <b>4 Perform skiing techniques whilst ski touring</b>            | 4.1 Select and execute <b>skiing techniques</b> taking into account terrain, weather and <b>snow conditions</b><br>4.2 Execute <b>single turns</b> through the fall-line under <b>good snow conditions</b><br>4.3 Choose the angle of climb and selection of slope, and complete climbs taking into account the terrain, weather and <b>snow conditions</b><br>4.4 Select the <b>method of climbing and turning</b> for the terrain, <b>snow conditions</b> , <b>skier needs</b> and assist climb                                             |

## Range Statements

The Range Statements provide advice to interpret the scope and context of this unit of competence, allowing for differences between enterprises and workplaces. The Range Statements relate to the unit as a whole and helps facilitate holistic assessment. In addition, the following variables may be present for this particular unit of competency:

| RANGE STATEMENT                       | CATEGORIES                                                                                                                                                                                                                                                                                                                                                               |

## Evidence Guide

The Evidence Guide identifies the critical aspects, knowledge and skills to be demonstrated to confirm competence for this unit. This is an integral part of the assessment of competence and should be read in conjunction with the Range Statements.

|                                                      |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |

**DESCRIPTION:** This unit has been developed for the Outdoor Recreation Industry Training Package.

This unit applies to travel on skis in a variety of conditions carrying equipment for personal and group safety at a good level of degree of balance and level of confidence. Other related competencies, such as navigation, are defined in other units.

| ELEMENT                                                          | PERFORMANCE CRITERIA                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |

| <b>1 Plan for the activity</b>                                   | 1.1 Ensure sufficient food and water is available to maintain physiological well-being during activity<br>1.2 Select personal clothing for activity and identify the design/construction features that make it appropriate<br>1.3 Identify an appropriate activity site/location after consideration of statutory and organisational procedures, where applicable, and contextual issues relating to the activity<br>1.4 Access and interpret meteorological data and determine activity plans following consideration of weather information |
| <b>2 Select appropriate equipment to participate in activity</b> | 2.1 Select appropriate equipment after consideration of issues that include season, weather and length of activity<br>2.2 Check to ensure that equipment is in good working condition<br>2.3 Fit and adjust equipment correctly and ensure suitability to activity and compliance with manufacturers' specification for use                                                                                                                                                                                                                   |
| <b>3 Demonstrate <i>skiing skills</i></b>                        | 3.1 Demonstrate a <b><i>degree of balance and confidence</i></b><br>3.2 Display efficiency of movement across <b><i>terrain</i></b><br>3.3 Modify <b><i>technique</i></b> to account for changes in <b><i>terrain</i></b><br>3.4 Demonstrate rhythm and smooth transfers between strides, steps and turns                                                                                                                                                                                                                                     |
| <b>4 Ski in a safe manner</b>                                    | 4.1 Identify <b><i>hazards</i></b> and minimise, avoid or eliminate <b><i>risks</i></b><br>4.2 Take <b><i>measures</i></b> to guard personal and group safety<br>4.3 Consider the <b><i>safety of others</i></b> whilst skiing                                                                                                                                                                                                                                                                                                                |

## Range Statements

The Range Statements provide advice to interpret the scope and context of this unit of competence, allowing for differences between enterprises and workplaces. The Range Statements relate to the unit as a whole and helps facilitate holistic assessment. In addition, the following variables may be present for this particular unit of competency:

| RANGE STATEMENT         | CATEGORIES                                                                                                                                                                                                                                                                      |

## Evidence Guide

The Evidence Guide identifies the critical aspects, knowledge and skills to be demonstrated to confirm competence for this unit. This is an integral part of the assessment of competence and should be read in conjunction with the Range Statements.

|                                                      |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |
|------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Critical aspects of evidence to be considered</b> | <ul style="list-style-type: none"> <li>• Assessment must confirm sufficient knowledge of cross country skiing technique and safety practices to ski in controlled environments where ski trails may be groomed and set and carrying personal requirements for a day tour</li> <li>• Assessment of performance should be over a minimum of two (2) days covering the prescribed number of categories from each of the Range Statements that are applicable in the learner's environment</li> <li>• Cross country skiing skills must be demonstrated at an intermediate level according to the following criteria             <ul style="list-style-type: none"> <li>○ diagonal striding in open terrain: maintaining consistent speed and rhythm over varying terrain including short and not too steep uphills</li> <li>○ free skating: with easy rhythmical skating steps, keeping knees flexed, moving forward by shifting weight from ski to ski, lifting the ski forward and to the side to start skating. Shoulders kept square to the skating ski, with arms swinging naturally</li> <li>○ downhill traversing: skiing across the fall line, stepping back up into the hill to stop. Body weight permanently on the downhill ski with shoulders turned down the slope, hands low and forward</li> <li>○ step turns: with ski heels close together, take small steps to the right and left to change direction, returning skis to parallel to complete each step</li> <li>○ basic stem turning: uphill ski lifted into a snowplough turn, applying turning pressure gradually. On passing through the fall line, slide the inside ski in smoothly to the stemmed ski to start a new traverse. Reduce the length of each traverse to develop a rhythm between turns. Lower pole jabbed forward into snow as the upper ski starts the stemming action. Body rises up as the skis are stemmed apart and lowered when the skis are brought back together</li> <li>○ telemark straight running: Dropping down into Telemark position in dips or sudden changes in terrain to lower centre of gravity and create greater stability. Also essential for crossing "snow bridges" to disperse the weight</li> <li>○ kick turns: with skis still, body facing downhill, poles behind, lift and pivot one ski 180 degrees by its heel, followed by the other ski and poles to face the new direction. (Should be performed on steep terrain at this level, whilst carry a pack)</li> <li>○ side slipping: Skis across a moderately steep slope on two level skis (knees flexed well forward with uphill ski slightly forward), keeping head and shoulders facing down the hill and over the skis, with knees and hips pushed into the hill to hold an uphill edge on each ski. Hips and body raised up, over and down the slope to start the skis slipping sideways. Upper body moves down the hill over the skis, with lowered hips, to maintain balance and control. Roll knees and hips back into hill to edge the skis in order to control sliding, adjust sliding speed and to stop</li> </ul> </li> </ul> |

| SROSKT004B | DAY SKI TOUR AWAY FROM A PATROLLED AREA |
|            |                                         |
| SKT        | Ski touring                             |

**DESCRIPTION:** This unit has been developed for the Outdoor Recreation Industry Training Package.

This unit covers the knowledge and skills to undertake day ski tours in non patrolled areas which are untracked and ungroomed on slopes angled up to and including 15 degrees.

| ELEMENT                                                                       | PERFORMANCE CRITERIA                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |
|-------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>1 Plan for the activity</b>                                                | 1.1 Ensure sufficient food and water is available to maintain physiological well-being during activity<br>1.2 Select personal clothing for activity and identify the design/construction features that make it appropriate<br>1.3 Identify an appropriate activity site/location after consideration of statutory and organisational procedures, where applicable, and contextual issues relating to the activity<br>1.4 Access and interpret meteorological data and determine activity plans following consideration of weather information                                                                                                                                                                                   |
| <b>2 Select appropriate equipment to participate in activity</b>              | 2.1 Select appropriate equipment after consideration of issues that include season, weather and length of activity<br>2.2 Check to ensure that equipment is in good working condition<br>2.3 Fit and adjust equipment correctly and ensure suitability to activity and compliance with manufacturers' specification for use                                                                                                                                                                                                                                                                                                                                                                                                     |
| <b>3 Adhere to safe backcountry ski touring practices</b>                     | 3.1 Select appropriate <b>equipment</b> for the terrain and expected snow conditions<br>3.2 <b>Maintain ski touring equipment</b> to match performance requirements<br>3.3 Take into account potential <b>hazards</b> , efficiency and ease of route and terrain, snow and weather conditions in route selection<br>3.4 Carry clothing and supplies for a backcountry day trip to meet safety requirements for minimising <b>hazards</b> and/or dealing with emergencies<br>3.5 Monitor the weather and incorporate information into skiing and route decisions                                                                                                                                                                 |
| <b>4 Perform skiing techniques whilst ski touring on intermediate terrain</b> | 4.1 Select and execute <b>skiing techniques</b> taking into account terrain, weather and <b>snow conditions</b><br>4.2 Link together <b>turns</b> through the fall-line under <b>good snow conditions</b> , with speed and <b>turn-shape</b> adapted for conditions and terrain<br>4.3 Choose the angle of climbs and selection of slope and complete climb taking into account the terrain, weather and <b>snow conditions</b><br>4.4 Select the <b>method of climbing and turning</b> points of climb for the terrain, <b>skier needs</b> and <b>snow conditions</b> , and assist the climb<br>4.5 Utilise knowledge of the <b>design features of equipment</b> to enhance skiing performance and the carving of <b>turns</b> |

## Range Statements

The Range Statements provide advice to interpret the scope and context of this unit of competence, allowing for differences between enterprises and workplaces. The Range Statements relate to the unit as a whole and helps facilitate holistic assessment. In addition, the following variables may be present for this particular unit of competency:

| RANGE STATEMENT                       | CATEGORIES                                                                                                                                                                                                                                                |

## Evidence Guide

The Evidence Guide identifies the critical aspects, knowledge and skills to be demonstrated to confirm competence for this unit. This is an integral part of the assessment of competence and should be read in conjunction with the Range Statements.

**DESCRIPTION:** This unit has been developed for the Outdoor Recreation Industry Training Package.

This unit covers the knowledge and skills to safely undertake day activities in a snow environment.

| ELEMENT                                                                      | PERFORMANCE CRITERIA                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |
|------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>1 Select and carry equipment for day activities in a snow environment</b> | 1.1 Identify specific <b>hazards</b> associated with activities in a snow environment<br>1.2 Identify <b>minimum emergency and safety equipment</b> to be carried whilst participating in day activities in a snow environment<br>1.3 Demonstrate suitable use of protective clothing, pace of travel and other methods to reduce the possibility of hypothermia<br>1.4 Demonstrate food and water/liquid consumption appropriate to the degree of physical activity and environmental conditions in order to maintain energy levels and adequate hydration |
| <b>2 Determine snow conditions</b>                                           | 2.1 Identify and access sources of information on weather and snowpack<br>2.2 Determine the effect of weather conditions on the snowpack and the planned activity                                                                                                                                                                                                                                                                                                                                                                                           |
| <b>3 Demonstrate personal safety skills in potential avalanche terrain</b>   | 3.1 Identify potential avalanche terrain using knowledge of <b>factors contributing to avalanches</b><br>3.2 Select, where necessary, a line of travel which reduces exposure to avalanche hazard                                                                                                                                                                                                                                                                                                                                                           |
| <b>4 Construct an emergency shelter</b>                                      | 4.1 Determine <b>factors to be considered when locating and building emergency shelters</b><br>4.2 Select and justify <b>snow shelter site</b> and <b>type of emergency snow shelter</b><br>4.3 Select and construct an emergency snow shelter appropriate to the site and conditions<br>4.4 Utilise resources of equipment, people and environment efficiently                                                                                                                                                                                             |

## Range Statements

The Range Statements provide advice to interpret the scope and context of this unit of competence, allowing for differences between enterprises and workplaces. The Range Statements relate to the unit as a whole and helps facilitate holistic assessment. In addition, the following variables may be present for this particular unit of competency:

| RANGE STATEMENT                                                         | CATEGORIES                                                                                                                                                                                                                                                                                                                                                                                                                          |

## Evidence Guide

The Evidence Guide identifies the critical aspects, knowledge and skills to be demonstrated to confirm competence for this unit. This is an integral part of the assessment of competence and should be read in conjunction with the Range Statements.

|                                                      |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |
|------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Critical aspects of evidence to be considered</b> | <ul style="list-style-type: none"> <li>• Assessment must confirm sufficient knowledge of safety requirements for day touring in a snow environment</li> <li>• Assessment of performance should be over a minimum of two (2) different occasions covering the prescribed number of categories from the Range Statements that are applicable in the learner's environment</li> <li>• In particular, assessment must confirm the ability to               <ul style="list-style-type: none"> <li>○ apply knowledge of weather conditions to determine snow conditions</li> <li>○ apply knowledge of snow conditions to determine potential avalanche areas</li> <li>○ take adequate safety precautions with respect to personal safety and hazards in a snow environment</li> <li>○ construct an emergency shelter to accommodate up to five persons</li> </ul> </li> </ul>        |
| <b>Interdependent assessment of units</b>            | <ul style="list-style-type: none"> <li>• This unit must be assessed after attainment of competency in the following unit(s)               <ul style="list-style-type: none"> <li>○ SROODR002A Plan outdoor recreation activities</li> <li>○ SROOPS002B Plan for minimal environmental impact</li> </ul> </li> <li>• This unit must be assessed in conjunction with the following unit(s)               <ul style="list-style-type: none"> <li>○ Nil</li> </ul> </li> <li>• For the purpose of integrated assessment, this unit may be assessed in conjunction with the following unit(s)               <ul style="list-style-type: none"> <li>○ Nil</li> </ul> </li> </ul>                                                                                                                                                                                                      |
| <b>Required knowledge and skills</b>                 | <ul style="list-style-type: none"> <li>• Required knowledge               <ul style="list-style-type: none"> <li>○ Sources of information on weather and snow conditions</li> <li>○ Factors affecting snow conditions</li> <li>○ Alpine Responsibility Code</li> <li>○ Snow shelter construction techniques</li> <li>○ Signs, symptoms and treatment of hypothermia</li> </ul> </li> <li>• Required skills               <ul style="list-style-type: none"> <li>○ Travelling in a snow environment, eg, cross country ski skills, snow shoe or snowboard skills</li> </ul> </li> </ul>                                                                                                                                                                                                                                                                                          |
| <b>Resource implications</b>                         | <ul style="list-style-type: none"> <li>• Physical resources - assessment of this competency requires access to               <ul style="list-style-type: none"> <li>○ snow environments</li> <li>○ equipment to participate in a day activity</li> <li>○ skiing equipment</li> <li>○ day pack</li> <li>○ personal protective clothing</li> <li>○ first aid kit</li> <li>○ map and compass</li> <li>○ whistle</li> <li>○ food and water resources</li> </ul> </li> <li>• Human resources - assessment of this unit of competency will require human resources consistent with those outlined in the Assessment Guidelines. That is, assessors (or persons within the assessment team) must               <ul style="list-style-type: none"> <li>○ be competent in this unit but preferably be competent in the unit at the level above (i.e., SROSKT008B)</li> </ul> </li> </ul> |

|                                   |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |
|-----------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                                   | <ul style="list-style-type: none"> <li>○ be competent, as a minimum, in the units SRXFAD001A, SRXRIK001A and SRXEMR001A to ensure adequate risk management during the assessment</li> <li>○ be current in their knowledge and understanding of the industry through provision of evidence of professional activity in the relevant area</li> <li>○ have attained the mandatory competency requirements for assessors under the Australian Quality Training Framework (AQTF) as specified in Standard 7.3 of the <i>Standards for Registered Training Organisations</i></li> </ul>                                                                                                                                     |
| <b>Consistency in performance</b> | <ul style="list-style-type: none"> <li>• Due to issues such as demonstrating the required skills in the specified conditions, this unit must be assessed over a minimum of two (2) different occasions, such as a number of day trips, in order to ensure consistency of performance over the Range Statements, conditions and contexts applicable</li> </ul>                                                                                                                                                                                                                                                                                                                                                         |
| <b>Context for assessment</b>     | <ul style="list-style-type: none"> <li>• This unit of competency must be assessed in the context of an outdoor recreation activity and must be demonstrated whilst participating in an actual/real snowsport activity</li> <li>• Assessment of this unit of competence will usually include observation of processes and procedures, oral and/or written questioning on required knowledge and skills and consideration of required attitudes</li> <li>• Where performance is not directly observed and/or is required to be demonstrated over a 'period of time' and/or in a 'number of locations', any evidence should be authenticated by colleagues, supervisors, clients or other appropriate persons</li> </ul> |

| KEY COMPETENCIES                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |                                 |                            |                             |                                     |                |                |

**DESCRIPTION:** This unit has been developed for the Outdoor Recreation Industry Training Package.

This unit applies to travel on skis in a variety of conditions carrying equipment for personal and group safety at a high level of degree of balance and level of confidence. Other related competencies, such as navigation, are defined in other units.

| ELEMENT                                                          | PERFORMANCE CRITERIA                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |
|------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>1 Plan for the activity</b>                                   | 1.1 Ensure sufficient food and water is available to maintain physiological well-being during activity<br>1.2 Select personal clothing for activity and identify the design/construction features that make it appropriate<br>1.3 Identify an appropriate activity site/location after consideration of statutory and organisational procedures, where applicable, and contextual issues relating to the activity<br>1.4 Access and interpret meteorological data and determine activity plans following consideration of weather information |
| <b>2 Select appropriate equipment to participate in activity</b> | 2.1 Select appropriate equipment after consideration of issues that include season, weather and length of activity<br>2.2 Check to ensure that equipment is in good working condition<br>2.3 Fit and adjust equipment correctly and ensure suitability to activity and compliance with manufacturers' specification for use                                                                                                                                                                                                                   |
| <b>3 Demonstrate <i>skiing skills</i></b>                        | 3.1 Demonstrate a <b><i>degree of balance and confidence</i></b><br>3.2 Display efficiency of movement across <b><i>terrain</i></b><br>3.3 Modify <b><i>technique</i></b> to account for changes in <b><i>terrain</i></b><br>3.4 Demonstrate rhythm and smooth transfers between strides, steps and turns                                                                                                                                                                                                                                     |
| <b>4 Ski in a safe manner</b>                                    | 4.1 Identify <b><i>hazards</i></b> and minimise, avoid or eliminate <b><i>risks</i></b><br>4.2 Take <b><i>measures</i></b> to guard personal and group safety<br>4.3 Consider the <b><i>safety of others</i></b> whilst skiing                                                                                                                                                                                                                                                                                                                |

## Range Statements

The Range Statements provide advice to interpret the scope and context of this unit of competence, allowing for differences between enterprises and workplaces. The Range Statements relate to the unit as a whole and helps facilitate holistic assessment. In addition, the following variables may be present for this particular unit of competency:

| RANGE STATEMENT         | CATEGORIES                                                                                                                                                                                                                                                              |

## Evidence Guide

The Evidence Guide identifies the critical aspects, knowledge and skills to be demonstrated to confirm competence for this unit. This is an integral part of the assessment of competence and should be read in conjunction with the Range Statements.

|------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Critical aspects of evidence to be considered</b> | <ul style="list-style-type: none"> <li>Assessment must confirm sufficient knowledge of advanced cross country skiing technique and safety practices to enable cross country skiing on groomed trails with moderate to steep slopes with all types of snow conditions</li> <li>Assessment must confirm the ability to apply knowledge and understanding of skiing techniques to demonstrate them to a high level of expertise</li> <li>The following skiing skills should be demonstrated with a high level of expertise according to the following criteria               <ul style="list-style-type: none"> <li>two skating: combines double poling action with two single-leg skating action, i.e., poles, skate ski 1, skate ski 2, poles, skate ski 1, ..., etc. In between poling actions the skis should be returned to a flat position to facilitate gliding</li> <li>one skating: combining one single-leg skating action with a double poling action. Poling action is short and quick, as is the skating action. Starting off with a single skate and double poling off that gliding ski across onto the other, then standing on new gliding skate ski before poling back to the other side again</li> <li>linked stem turning: smooth, rounded turns with skier finishing in a low position, rising up with the next poling action to stem immediately into the next turn, without necessarily having to traverse. Use of poling action to trigger turn and rising up of the body to stem the ski to start the turn. Short and long radius turns at different speeds must be demonstrated</li> <li>linked telemark turning: with skis a stable distance apart, upper body turned in the opposite direction to the direction of the skis. Skis forward and aft under body, hands forward and low. Turn initiated by rocking forward onto outside turning ski and then moving body weight down onto both skis to complete the turn then rising up slightly to stem into the new turn</li> <li>linked parallel turning: one phase turn where both skis are turned together. Releasing the ski edges from one turn to the next achieved by rising up (extending ankle, knee and hip) and rolling knees downhill while keeping skis hip-width apart for stability. Upweighting the outside turning ski well before the fall line allows both skis to turn simultaneously (gradual to moderate slope, well packed and smooth)</li> </ul> </li> </ul> |

**DESCRIPTION: This unit has been developed for the Outdoor Recreation Industry Training Package.**

**This unit covers the knowledge and skills to undertake overnight ski tours in non patrolled areas which are untracked and ungroomed on slopes angled up to and including 25 degrees.**

| ELEMENT                                                                   | PERFORMANCE CRITERIA                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |
|---------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>1 Plan for the activity</b>                                            | 1.1 Ensure sufficient food and water is available to maintain physiological well-being during activity<br>1.2 Select personal clothing for activity and identify the design/construction features that make it appropriate<br>1.3 Identify an appropriate activity site/location after consideration of statutory and organisational procedures, where applicable, and contextual issues relating to the activity<br>1.4 Access and interpret meteorological data and determine activity plans following consideration of weather information                                                                                                                                              |
| <b>2 Select appropriate equipment to participate in activity</b>          | 2.1 Select appropriate equipment after consideration of issues that include <b>design features of equipment</b> , season, weather and length of activity<br>2.2 Check to ensure that equipment is in good working condition<br>2.3 Fit and adjust equipment correctly and ensure suitability to activity and compliance with manufacturers' specification for use                                                                                                                                                                                                                                                                                                                          |
| <b>3 Adhere to safe backcountry ski touring practices</b>                 | 3.1 Select and check <b>nordic equipment</b> suitable for the terrain, conditions and <b>skier needs</b><br>3.2 Match <b>maintenance of nordic equipment</b> to performance requirements<br>3.3 Take into account potential <b>hazards</b> , efficiency and ease of route and terrain, snow and weather conditions in route selection<br>3.4 Carry clothing and <b>supplies</b> for a backcountry trip to meet safety requirements for minimising <b>hazards</b> and/or dealing with emergencies<br>3.5 Monitor the weather and incorporate information into skiing and route decisions                                                                                                    |
| <b>4 Perform skiing techniques whilst ski touring on advanced terrain</b> | 4.1 Select and execute <b>skiing techniques</b> taking into account terrain, weather and <b>snow conditions</b><br>4.2 Link together Telemark or parallel turns through the fall-line under a <b>range of snow conditions</b> , with speed and <b>turn-shape</b> for conditions and terrain<br>4.3 Link together <b>advanced turns</b> through the fall-line under <b>good snow conditions</b><br>4.4 Chose the angle of climb and selection of slope and complete the climb taking into account the terrain, weather and <b>snow conditions</b><br>4.5 Select the <b>method of climbing and turning</b> points of climb for the terrain and <b>snow conditions</b> , and assist the climb |

## Range Statements

The Range Statements provide advice to interpret the scope and context of this unit of competence, allowing for differences between enterprises and workplaces. The Range Statements relate to the unit as a whole and helps facilitate holistic assessment. In addition, the following variables may be present for this particular unit of competency:

| RANGE STATEMENT                        | CATEGORIES                                                                                                                                                                                                                                                                            |

## Evidence Guide

The Evidence Guide identifies the critical aspects, knowledge and skills to be demonstrated to confirm competence for this unit. This is an integral part of the assessment of competence and should be read in conjunction with the Range Statements.

|                                                      |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |

**DESCRIPTION:** This unit has been developed for the Outdoor Recreation Industry Training Package.

This unit covers the knowledge and skills to safely undertake overnight activities in a snow environment.

| ELEMENT                                                                            | PERFORMANCE CRITERIA                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |
|------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>1 Select and carry equipment for overnight activities in a snow environment</b> | 1.1 Identify specific <b>hazards</b> associated with activities in a snow environment<br>1.2 Identify <b>minimum emergency and safety equipment</b> to be carried whilst participating in overnight activities in a snow environment<br>1.3 Demonstrate suitable use of protective clothing, pace of travel and other methods to reduce the possibility of hypothermia<br>1.4 Demonstrate food and water/liquid consumption appropriate to the degree of physical activity and environmental conditions in order to maintain energy levels and adequate hydration |
| <b>2 Determine snow conditions</b>                                                 | 2.1 Identify and access sources of information on weather and snow pack<br>2.2 Determine the effect of weather conditions on the snow pack and the planned activity                                                                                                                                                                                                                                                                                                                                                                                               |
| <b>3 Demonstrate personal safety skills in potential avalanche terrain</b>         | 3.1 Identify potential avalanche terrain using knowledge of <b>factors contributing to avalanches</b><br>3.2 Select, where necessary, a line of travel which reduces exposure to avalanche hazard                                                                                                                                                                                                                                                                                                                                                                 |
| <b>4 Construct an emergency shelter</b>                                            | 4.1 Determine <b>factors to be considered when locating and building emergency shelters</b><br>4.2 Select and justify a <b>snow shelter site</b> and a the <b>type of emergency snow shelter</b><br>4.3 Select and construct an emergency <b>snow shelter</b> appropriate to the site and conditions<br>4.4 Utilise resources of equipment, people and environment efficiently                                                                                                                                                                                    |

## Range Statements

The Range Statements provide advice to interpret the scope and context of this unit of competence, allowing for differences between enterprises and workplaces. The Range Statements relate to the unit as a whole and helps facilitate holistic assessment. In addition, the following variables may be present for this particular unit of competency:

| RANGE STATEMENT                                                              | CATEGORIES                                                                                                                                                                                                                                                                                                                                                                                                                          |

## Evidence Guide

The Evidence Guide identifies the critical aspects, knowledge and skills to be demonstrated to confirm competence for this unit. This is an integral part of the assessment of competence and should be read in conjunction with the Range Statements.

|                                                      |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |
|------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Critical aspects of evidence to be considered</b> | <ul style="list-style-type: none"> <li>• Assessment must confirm sufficient knowledge of safety requirements for overnight touring in a snow environment</li> <li>• Assessment of performance should be over a minimum of two (2) different occasions covering the prescribed number of categories from the Range Statements that are applicable in the learner's environment</li> <li>• In particular, assessment must confirm the ability to               <ul style="list-style-type: none"> <li>○ apply knowledge of weather conditions to determine snow conditions</li> <li>○ apply knowledge of snow conditions to determine potential avalanche areas</li> <li>○ take adequate safety precautions with respect to personal safety and hazards in a snow environment</li> <li>○ construct an emergency shelter to accommodate up to five persons</li> </ul> </li> </ul>        |

| <b>6 Lead a group of skiers safely</b>             | <p>6.1 Monitor appropriate spacing between clients appropriate to conditions</p> <p>6.2 Identify a variety of potential <b>hazards</b></p> <p>6.3 Decide how each <b>hazard</b> can be safely negotiated</p> <p>6.4 Recognise situations where a <b>hazard</b> needs to be scouted</p> <p>6.5 Identify the best lines through <b>hazards</b> taking into consideration the ability of the group and safety issues</p> <p>6.6 Provide guidance of how to negotiate a <b>hazard</b> clearly and concisely to the group</p> <p>6.7 Demonstrate clearly to the group how to negotiate the <b>hazard</b></p> <p>6.8 Manage the movement of the group to maintain the safest situation when negotiating the <b>hazard</b></p> <p>6.9 Respond accordingly to any emergency or non-routine situation</p> |
| <b>7 Conduct activity in a professional manner</b> | <p>7.1 Avoid contentious issues in general conversation</p> <p>7.2 Use positive words throughout activity to refer to clients and avoid using negative or disparaging words</p> <p>7.3 Avoid negative statements about own organisation, commercial competitors, public bodies and other individuals</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |
| <b>8 Complete post-trip responsibilities</b>       | <p>8.1 Notify relevant authority of trip completion</p> <p>8.2 Retrieve, inspect, repair and store (or retire) <b>equipment</b> according to procedures</p> <p>8.3 Evaluate, including client feedback, all aspects of trip organisation and conduct</p> <p>8.4 Suggest modifications if needed</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |

## Range Statements

The Range Statements provide advice to interpret the scope and context of this unit of competence, allowing for differences between enterprises and workplaces. The Range Statements relate to the unit as a whole and helps facilitate holistic assessment. In addition, the following variables may be present for this particular unit of competency:

| RANGE STATEMENT   | CATEGORIES                                                                                                                                                                                                                                                                                                                                                                                       |

## Evidence Guide

The Evidence Guide identifies the critical aspects, knowledge and skills to be demonstrated to confirm competence for this unit. This is an integral part of the assessment of competence and should be read in conjunction with the Range Statements.

|                                                      |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |

**DESCRIPTION:** This unit has been developed for the Outdoor Recreation Industry Training Package.

This unit covers the knowledge and skills required to guide or lead clients on day and/or overnight ski tours.

| ELEMENT                                             | PERFORMANCE CRITERIA                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |
|-----------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>1 Select appropriate equipment for the group</b> | 1.1 Select <b>equipment</b> after consideration of <b>contextual issues</b> and check to ensure that it is in good working condition<br>1.2 Fit and adjust <b>equipment</b> correctly and ensure suitability to the participant and conditions<br>1.3 Pack <b>equipment</b> that is not required on hand in a suitable manner<br>1.5 Check <b>safety and rescue equipment</b> to ensure suitability to group and planned trip                                                                                                                                                                                                                                                                                                                           |
| <b>2 Plan a ski tours for clients</b>               | 2.1 Assess skill level, experience and physical capabilities of each member of the group<br>2.2 Establish attainable group objectives<br>2.3 Select suitable location for trip to suit abilities and objectives of the group<br>2.4 Obtain and interpret weather information for local conditions of the trip<br>2.5 Obtain permits or permission for access where necessary<br>2.6 Ensure correct leader/client ratios are met<br>2.7 Prepare a checklist for personal equipment as trip leader<br>2.8 Determine food and drink requirements for group taking into account contextual issues<br>2.9 Assess, minimise and eliminate risks, where possible whilst forming a risk management plan                                                         |
| <b>3 Brief clients</b>                              | 3.1 Communicate logistical details to clients<br>3.2 Brief group of standard safety procedures<br>3.3 Explain symptoms, treatment and prevention of hypothermia and dehydration to group to assist in self-monitoring<br>3.4 Outline procedure following an incident to a group member<br>3.5 Establish verbal and non-verbal <b>communication</b> system for use during trip and ensure that all clients understand system(s)                                                                                                                                                                                                                                                                                                                          |
| <b>4 Maintain physical welfare of group</b>         | 4.1 Apply knowledge of hypothermia and dehydration to trip planning in terms of food, clothing, skiing times and distances<br>4.2 Assess capabilities of group members on the day before commencing<br>4.3 Ensure all clients are properly equipped for the trip and conditions including protection from weather conditions eg sunscreen<br>4.4 Monitor individual client's performance and needs<br>4.5 Evaluate skiing pace and conditions<br>4.6 Monitor weather conditions<br>4.7 Evaluate implications of weather signs on trip plans<br>4.8 Implement appropriate modifications to trip in regard to all variable factors that are monitored<br>4.9 Control the group to maintain a safe enjoyable atmosphere<br>4.10 Apply risk management plan |
| <b>5 Establish effective communication</b>          | 5.1 Communicate clearly objectives and nature of the trip to the group<br>5.2 Provide clear and concise direction and advice to group during the trip                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |

|                                                                              |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |

## Range Statements

The Range Statements provide advice to interpret the scope and context of this unit of competence, allowing for differences between enterprises and workplaces. The Range Statements relate to the unit as a whole and helps facilitate holistic assessment. In addition, the following variables may be present for this particular unit of competency:

| RANGE STATEMENT          | CATEGORIES                                                                                                                                                                                                                                                                                                                                                                                       |

## Evidence Guide

The Evidence Guide identifies the critical aspects, knowledge and skills to be demonstrated to confirm competence for this unit. This is an integral part of the assessment of competence and should be read in conjunction with the Range Statements.

|                                                      |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |

**DESCRIPTION:** This unit has been developed for the Outdoor Recreation Industry Training Package.

This unit covers the knowledge and skills to instruct learners to achieve competencies in order to participate independently, or with minimal supervision, in a cross country skiing activity. This unit can be applied to the instruction of cross country skiing at a basic level or at an intermediate to advanced level.

| ELEMENT                                                                             | PERFORMANCE CRITERIA                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |
|-------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>1 Plan an instructional session for teaching cross country skiing skills</b>     | 1.1 Identify client needs and assess current competencies of group/individuals in order to determine the aims and objectives of the instructional session<br>1.2 Select a suitable site for the instructional session, based on an assessment of client needs, <b>hazards</b> , abilities and session aims<br>1.3 Plan appropriate instructional activities which will facilitate and enhance the learning process<br>1.4 Determine a suitable <b>sequence</b> of instruction<br>1.5 Access resources to conduct instructional activities, games and drills<br>1.6 Provide relevant pre-activity information to clients<br>1.7 Prepare contingency plans for instructional session to cope with inclement weather and other factors which may affect the ability to conduct the session<br>1.8 Conduct a risk assessment of the instructional activities and location and implement a risk management plan in accordance with the organisation's guidelines and operating procedures |
| <b>2 Select appropriate resources required to teach cross country skiing skills</b> | 2.1 Select and access <b>equipment</b> and <b>other resources</b> suitable for the instructional objectives<br>2.2 Select, fit and adjust <b>equipment</b> (where appropriate) to suit the needs of individual clients<br>2.3 Check all <b>equipment</b> to ensure compliance with occupational health and safety legislation, manufacturer's recommendations and/or operating procedures, and to ensure that it is in good working order<br>2.4 Check contents of first aid and repair kits to ensure their suitability to the location and activity<br>2.5 Arrange, where required, protective and/or safety clothing for each client                                                                                                                                                                                                                                                                                                                                              |
| <b>3 Introduce an instructional cross country skiing session</b>                    | 3.1 Communicate the aims of the instructional session to the clients<br>3.2 Encourage clients to seek clarification, information and feedback<br>3.3 Brief the clients on the safety practices, procedures and behaviour appropriate to the instructional session<br>3.4 Define activity boundaries/training area and/or clearly outline to the clients<br>3.5 Check clothing and footwear of clients for suitability to the session<br>3.6 Provide information on <b>equipment</b> selection, fitting or use where relevant to the instructional session's aims                                                                                                                                                                                                                                                                                                                                                                                                                     |
| <b>4 Conduct an instructional cross country skiing session</b>                      | 4.1 Conduct "warm up"/introductory activities (where required) to reduce the risk of injury when client's are participating in physical activities<br>4.2 Monitor individual client's performance in instructional activities<br>4.3 Provide positive encouragement and/or feedback to each client at a suitable time to maintain a positive learning environment<br>4.4 Ensure instructional activity allows for repetition of skills<br>4.5 Evaluate instructional activities for effectiveness and implement modifications when required                                                                                                                                                                                                                                                                                                                                                                                                                                          |

|                                                                                            |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |
|--------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                                                                                            | <p>4.6 Assess risks associated with the conduct of instructional activities constantly and remove, minimise or avoid hazards in accordance with risk management plan and instructional objectives.</p> <p>4.7 Monitor <b>equipment</b> usage, behaviour and location of clients in order to review safety</p> <p>4.8 Ensure personal competencies with respect to topics and skills within the instructional session are at a sufficient level to enable correct demonstration of skills, accurate provision of information and to engender the confidence of the client(s)</p> <p>4.9 Demonstrate how personal competencies enable emergency and non - routine situations to be dealt with in accordance with operating procedures</p>                                                                      |
| <b>5 Apply appropriate teaching techniques for a cross country skiing session</b>          | <p>5.1 Communicate instructions and information clearly and concisely</p> <p>5.2 Perform demonstrations for clients (where required) with a high level of technical correctness and accurate description</p> <p>5.3 Break-down complex skills and techniques into component parts and describe with key teaching points</p> <p>5.4 Identify faults in technique and provide a variety of solutions, where relevant, to correct faults</p> <p>5.5 Provide adequate time for practice, following fault correction and feedback</p> <p>5.6 Explain activities, drills or techniques which may improve skills</p>                                                                                                                                                                                                |
| <b>6 Teach required knowledge that applies to a cross country skiing activity</b>          | <p>6.1 Teach required knowledge, ethics, codes of behaviour, points of interest or principles relevant to cross country skiing and achievement of competency, in a manner which achieves interest and client understanding</p> <p>6.2 Instruct clients on factors to consider when planning for participation in cross country skiing</p> <p>6.3 Identify minimal impact practices appropriate to cross country skiing, and determine client level of understanding</p> <p>6.4 Outline specific aspects of <b>equipment</b> selection, use and care, to enable the client to achieve competency at the relevant level</p> <p>6.5 Explain communication systems and relevant calls or signals used whilst participating in cross country skiing, and determine client level of understanding in their use</p> |
| <b>7 Teach safety and rescue procedures appropriate to a cross country skiing activity</b> | <p>7.1 Instruct clients in appropriate emergency response procedures and techniques applicable to cross country skiing, and the level of competency required</p> <p>7.2 Explain the principles and practices of group management, in the context of emergency situations</p> <p>7.3 Teach clients industry standard safety practices relevant to cross country skiing</p> <p>7.4 Demonstrate rescue techniques specific to cross country skiing, and provide opportunities for practice</p> <p>7.5 Clarify the use and selection of specific emergency response <b>equipment</b> that should be carried, relevant to the level of competency</p> <p>7.6 Assess client's level of understanding via questioning techniques and/or formal assessment</p>                                                       |
| <b>8 Teach cross country skiing skills</b>                                                 | <p>8.1 Explain and demonstrate key points of technique or skill</p> <p>8.2 Outline the <b>sequence</b> or combination of skill to achieve effective or efficient results</p> <p>8.3 Identify different applications of skill or technique, and where it is applicable/not applicable</p> <p>8.4 Practice skills or techniques and observe clients in order to provide feedback</p> <p>8.5 Assess clients to determine poor or incorrect technique</p> <p>8.6 Provide opportunities for additional practice, where required</p>                                                                                                                                                                                                                                                                               |

|                                                                                            |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |

| <b>9<br/>Communicate further<br/>cross country skiing<br/>knowledge</b>                    | <p>9.1 Inform clients of locations, suitable to their skill level, for participating in cross country skiing</p> <p>9.2 Provide information relevant to the competencies being taught, on the range of <b>equipment</b> and clothing available or required, and factors affecting choice</p> <p>9.3 Inform clients of opportunities to further develop their personal skills and knowledge</p>                                                                                                                                                                                                                                                                                                                                                                                                                               |
| <b>10 Conclude and<br/>evaluate the cross<br/>country skiing<br/>instructional session</b> | <p>10.1 Allow time for "cooling down" at the end of the session, check <b>equipment</b> for damage and return and store in an appropriate fashion</p> <p>10.2 Determine the level of learning achieved directly through assessment or indirectly from Assessor</p> <p>10.3 Apply feedback from Assessor or assessment to evaluate the effectiveness of the instructional activities, the suitability of the instructional method, the feedback provided to clients and the initial assessment of client's abilities</p> <p>10.4 Evaluate the validity and reliability of assessment/evaluation tools used throughout the session to monitor learning</p> <p>10.5 Determine modifications to activities and delivery method(s), based on evaluations</p> <p>10.6 Evaluate the suitability of <b>other related factors</b></p> |

## Range Statements

The Range Statements provide advice to interpret the scope and context of this unit of competence, allowing for differences between enterprises and workplaces. The Range Statements relate to the unit as a whole and helps facilitate holistic assessment. In addition, the following variables may be present for this particular unit of competency:

| RANGE STATEMENT              | CATEGORIES                                                                                                                                                                                                                                                                                                                 |

## Evidence Guide

The Evidence Guide identifies the critical aspects, knowledge and skills to be demonstrated to confirm competence for this unit. This is an integral part of the assessment of competence and should be read in conjunction with the Range Statements.

|                                                      |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |

| SNK         | Snorkelling                           |

**DESCRIPTION:** This unit has been developed for the Outdoor Recreation Industry Training Package.

This unit covers the knowledge and skills to enable participation in snorkelling activities in confined and/or open water and the use and maintenance of snorkel dive equipment.

| ELEMENT                                          | PERFORMANCE CRITERIA                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |
|--------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>1 Use and maintain snorkel dive equipment</b> | 1.1 Select <b>snorkel dive equipment</b> to match build and experience<br>1.2 Use <b>snorkel dive equipment</b> to <b>industry criteria</b><br>1.3 Explain and demonstrate maintenance requirements to manufacturer's recommendations                                                                                                                                                                                                                                                                                                                                               |
| <b>2 Execute snorkel dives</b>                   | 2.1 Explain the <b>effects of pressure, temperature and volume</b> in relation to snorkel diving<br>2.2 Ensure selected <b>snorkel dive site</b> meets safety criteria of industry<br>2.3 Identify <b>entries to and exits from</b> the water so that they meet <b>industry criteria</b><br>2.4 Maintain <b>buddy system</b> at all times<br>2.5 Demonstrate how surface dives meet industry technical and safety criteria<br>2.6 Demonstrate equalising to clear ears<br>2.7 Demonstrate surface and underwater swimming on snorkel to meet industry technical and safety criteria |
| <b>3 Perform snorkel dive rescues</b>            | 3.1 Explain and demonstrate <b>first aid situation</b> for potential snorkel dive incidents to industry technical and safety criteria<br>3.2 Support buddy and tow 10 metres in a simulated rescue exercise<br>3.3 Demonstrate cramp release techniques on self and buddy to relieve cramp<br>3.4 Demonstrate self rescue techniques to achieve buoyancy                                                                                                                                                                                                                            |

## Range Statements

The Range Statements provide advice to interpret the scope and context of this unit of competence, allowing for differences between enterprises and workplaces. The Range Statements relate to the unit as a whole and helps facilitate holistic assessment. In addition, the following variables may be present for this particular unit of competency:

| RANGE STATEMENT                                    | CATEGORIES                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |

## Evidence Guide

The Evidence Guide identifies the critical aspects, knowledge and skills to be demonstrated to confirm competence for this unit. This is an integral part of the assessment of competence and should be read in conjunction with the Range Statements.

|                                                      |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |

| SNK         | Snorkelling       |

**DESCRIPTION:** This unit has been developed for the Outdoor Recreation Industry Training Package.

**This unit covers the knowledge and skills required to guide clients in a snorkelling activity.**

| ELEMENT                                                           | PERFORMANCE CRITERIA                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |
|-------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>1 Plan a snorkelling activity for clients</b>                  | 1.1 Assess skill level, experience and physical capabilities of each member of the group<br>1.2 Establish attainable group objectives<br>1.3 Select suitable site for snorkelling to suit abilities and objectives of the group<br>1.4 Obtain and interpret local weather information relevant to the activity<br>1.5 Obtain permits or permission for access where necessary<br>1.6 Ensure correct guide/client ratios are met, according to operational procedures<br>1.7 Prepare a personal equipment checklist for client<br>1.8 Assess, minimise and eliminate <b>hazards</b> (where possible) whilst forming a risk management plan |
| <b>2 Ensure appropriate equipment is selected for snorkelling</b> | 2.1 Supervise selection of <b>equipment</b> , ensuring it is safe and suitable in light of the <b>contextual issues</b><br>2.2 Ensure <b>equipment</b> is fitted and adjusted correctly<br>2.3 Check <b>safety and rescue equipment</b> to ensure suitability to the group and the dive                                                                                                                                                                                                                                                                                                                                                   |
| <b>3 Brief clients</b>                                            | 3.1 Communicate the aim of the guided activity to the clients<br>3.2 Communicate <b>logistical details</b> to clients<br>3.3 Establish a <b>communication system</b> for use during snorkelling activity and ensure that all clients understand the system<br>3.4 Demonstrate correct snorkelling techniques, eg, entering water, clearing mask and snorkel<br>3.5 Devolve decision making (where appropriate)                                                                                                                                                                                                                            |
| <b>4 Maintain physical welfare of group</b>                       | 4.1 Assess capabilities of group members on the day<br>4.2 Ensure all clients are properly equipped for the snorkelling activity<br>4.3 Monitor individual client's performance and needs<br>4.4 Evaluate snorkelling conditions<br>4.5 Monitor weather conditions<br>4.6 Evaluate implications of weather signs on snorkelling plans<br>4.7 Implement appropriate modifications to activity in regard to all variable factors that are monitored<br>4.8 Control the group to maintain a safe enjoyable atmosphere<br>4.9 Apply risk management plan<br>4.10 Recognise and resolve conflict situations (where practical)                  |
| <b>5 Lead a snorkelling activity safely</b>                       | 5.1 Provide clear and concise direction and advice to group during the activity<br>5.2 Monitor appropriate duration and depth of dives appropriate to conditions<br>5.3 Identify a variety of potential <b>hazards</b><br>5.4 Decide how each hazard can be overcome/avoided<br>5.5 Provide clear and concise guidance (including demonstration where appropriate) to the group on how to overcome/avoid each hazard<br>5.6 Provide positive encouragement and empathy<br>5.7 Manage the actions of the group to maintain the safest situation<br>5.8 Respond accordingly to any emergency or non-routine situation                       |

|                                                    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |

| <b>6 Conduct activity in a professional manner</b> | 6.1 Encourage feedback and questioning from group members<br>6.2 Avoid contentious issues in general conversation<br>6.3 Use positive words throughout the activity to refer to clients and avoid using negative or disparaging words<br>6.4 Avoid negative statements about own organisation, commercial competitors, public bodies and other individuals<br>6.5 Debrief the dive with the clients to discuss habitat, environment, diver actions, positive feedback, and suggestions for performance improvement |
| <b>7 Complete post-trip responsibilities</b>       | 7.1 Retrieve, inspect, repair and store (or retire) <b>equipment</b> according to procedures<br>7.2 Evaluate all aspects of activity organisation and conduct, including client feedback<br>7.3 Suggest modifications (if required)                                                                                                                                                                                                                                                                                |

## Range Statements

The Range Statements provide advice to interpret the scope and context of this unit of competence, allowing for differences between enterprises and workplaces. The Range Statements relate to the unit as a whole and helps facilitate holistic assessment. In addition, the following variables may be present for this particular unit of competency:

| RANGE STATEMENT             | CATEGORIES                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |

## Evidence Guide

The Evidence Guide identifies the critical aspects, knowledge and skills to be demonstrated to confirm competence for this unit. This is an integral part of the assessment of competence and should be read in conjunction with the Range Statements.

|                                                      |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |

| SNK         | Snorkelling                 |

**DESCRIPTION:** This unit has been developed for the Outdoor Recreation Industry Training Package.

This unit covers the knowledge and skills to instruct learners to achieve competencies in order to participate independently, or with minimal supervision, in a snorkelling activity.

| ELEMENT                                                                    | PERFORMANCE CRITERIA                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |
|----------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>1 Plan an instructional session for teaching snorkelling skills</b>     | 1.1 Identify client needs and assess current competencies of group/individuals in order to determine the aims and objectives of the instructional session<br>1.2 Select a suitable site for the instructional session, based on an assessment of client needs, <b>hazards</b> , abilities and session aims<br>1.3 Plan appropriate instructional activities which will facilitate and enhance the learning process<br>1.4 Determine a suitable <b>sequence</b> of instruction<br>1.5 Access resources to conduct instructional activities, games and drills<br>1.6 Provide relevant pre-activity information to clients<br>1.7 Prepare contingency plans for instructional session to cope with inclement weather and other factors which may affect the ability to conduct the session<br>1.8 Conduct a risk assessment of the instructional activities and location and implement a risk management plan in accordance with the organisation's guidelines and operating procedures |
| <b>2 Select appropriate resources required to teach snorkelling skills</b> | 2.1 Select and access <b>equipment</b> and <b>other resources</b> suitable for the instructional objectives<br>2.2 Select, fit and adjust <b>equipment</b> (where appropriate) to suit the needs of individual clients<br>2.3 Check all <b>equipment</b> to ensure compliance with occupational health and safety legislation, manufacturer's recommendations and/or operating procedures, and to ensure that it is in good working order<br>2.4 Check contents of first aid and repair kits to ensure their suitability to the location and activity<br>2.5 Arrange, where required, protective and/or safety clothing for each client                                                                                                                                                                                                                                                                                                                                              |
| <b>3 Introduce an instructional snorkelling session</b>                    | 3.1 Communicate the aim of the instructional session to the clients<br>3.2 Encourage clients to seek clarification, information and feedback<br>3.3 Brief the clients on the safety practices, procedures and behaviour appropriate to the instructional session<br>3.4 Define activity boundaries/training area and/or clearly outline to the clients<br>3.5 Check clothing and footwear of clients for suitability to the session<br>3.6 Provide information on <b>equipment</b> selection, fitting or use where relevant to the instructional session's aims                                                                                                                                                                                                                                                                                                                                                                                                                      |
| <b>4 Conduct an instructional snorkelling session</b>                      | 4.1 Conduct "warm up"/introductory activities (where required) to reduce the risk of injury when client's are participating in physical activities<br>4.2 Monitor individual client's performance in instructional activities<br>4.3 Provide positive encouragement and/or feedback to each client at a suitable time to maintain a positive learning environment<br>4.4 Ensure instructional activity allows for repetition of skills<br>4.5 Evaluate instructional activities for effectiveness and implement modifications when required<br>4.6 Assess risks associated with the conduct of instructional activities constantly and remove, minimise or avoid hazards in accordance with risk management plan and instructional objectives.                                                                                                                                                                                                                                       |

|                                                                                   |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |
|-----------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                                                                                   | <p>4.7 Monitor <b>equipment</b> usage, behaviour and location of clients in order to review safety</p> <p>4.8 Ensure personal competencies with respect to topics and skills within the instructional session are at a sufficient level to enable correct demonstration of skills, accurate provision of information and to engender the confidence of the client(s)</p> <p>4.9 Demonstrate how personal competencies enable emergency and non - routine situations to be dealt with in accordance with operating procedures</p>                                                                                                                                                                                                                                                     |
| <b>5 Apply appropriate teaching techniques for a snorkelling session</b>          | <p>5.1 Communicate instructions and information clearly and concisely</p> <p>5.2 Perform demonstrations for clients (where required) with a high level of technical correctness and accurate description</p> <p>5.3 Break-down complex skills and techniques into component parts and describe with key teaching points</p> <p>5.4 Identify faults in technique and provide a variety of solutions, where relevant, to correct faults</p> <p>5.5 Provide adequate time for practice, following fault correction and feedback</p> <p>5.6 Explain activities, drills or techniques which may improve skills</p>                                                                                                                                                                        |
| <b>6 Teach required knowledge that applies to a snorkelling activity</b>          | <p>6.1 Teach required knowledge, ethics, codes of behaviour, points of interest or principles relevant to scuba diving and achievement of competency, in a manner which achieves interest and client understanding</p> <p>6.2 Instruct clients on factors to consider when planning for participation in a snorkelling activity</p> <p>6.3 Identify minimal impact practices appropriate to snorkelling, and determine client level of understanding</p> <p>6.4 Outline specific aspects of <b>equipment</b> selection, use and care, to enable the client to achieve competency at the relevant level</p> <p>6.5 Explain communication systems and relevant calls or signals used whilst participating in snorkelling, and determine client level of understanding in their use</p> |
| <b>7 Teach safety and rescue procedures appropriate to a snorkelling activity</b> | <p>7.1 Instruct clients in appropriate emergency response procedures and techniques applicable to snorkelling, and the level of competency required</p> <p>7.2 Explain the principles and practices of group management, in the context of emergency situations</p> <p>7.3 Teach clients industry standard safety practices relevant to snorkelling</p> <p>7.4 Demonstrate rescue techniques specific to snorkelling, and provide opportunities for practice</p> <p>7.5 Clarify the use and selection of specific emergency response <b>equipment</b> that should be carried, relevant to the level of competency</p> <p>7.6 Assess client's level of understanding via questioning techniques and/or formal assessment</p>                                                          |
| <b>8 Teach snorkelling skills</b>                                                 | <p>8.1 Explain and demonstrate key points of technique or skill</p> <p>8.2 Outline the <b>sequence</b> or combination of skill to achieve effective or efficient results</p> <p>8.3 Identify different applications of skill or technique, and where it is applicable/not applicable</p> <p>8.4 Practice skills or techniques and observe clients in order to provide feedback</p> <p>8.5 Assess clients to determine poor or incorrect technique</p> <p>8.6 Provide opportunities for additional practice, where required</p>                                                                                                                                                                                                                                                       |
| <b>9 Communicate further snorkelling knowledge</b>                                | <p>9.1 Inform clients of locations, suitable to their skill level, for participating in snorkelling</p> <p>9.2 Provide information relevant to the competencies being taught, on the range of <b>equipment</b> and clothing available or required, and factors affecting choice</p> <p>9.3 Inform clients of opportunities to further develop their personal skills and</p>                                                                                                                                                                                                                                                                                                                                                                                                          |

|                                                                       |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |

|                                                                       | knowledge                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |
| <b>10 Conclude and evaluate the snorkelling instructional session</b> | <p>10.1 Allow time for "cooling down" at the end of the session, check <b>equipment</b> for damage and return and store (or retire) in an appropriate fashion</p> <p>10.2 Determine the level of learning achieved directly through assessment or indirectly from Assessor</p> <p>10.3 Apply feedback from Assessor or assessment to evaluate the effectiveness of the instructional activities, the suitability of the instructional method, the feedback provided to clients and the initial assessment of client's abilities</p> <p>10.4 Evaluate the validity and reliability of assessment/evaluation tools used throughout the session to monitor learning</p> <p>10.5 Determine modifications to activities and delivery method(s), based on evaluations</p> <p>10.6 Evaluate the suitability of <b>other related factors</b></p> |

## Range Statements

The Range Statements provide advice to interpret the scope and context of this unit of competence, allowing for differences between enterprises and workplaces. The Range Statements relate to the unit as a whole and helps facilitate holistic assessment. In addition, the following variables may be present for this particular unit of competency:

| RANGE STATEMENT              | CATEGORIES                                                                                                                                                                                                                                                                                                                                           |

## Evidence Guide

The Evidence Guide identifies the critical aspects, knowledge and skills to be demonstrated to confirm competence for this unit. This is an integral part of the assessment of competence and should be read in conjunction with the Range Statements.

|                                                      |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |

**DESCRIPTION:** This unit has been developed for the Outdoor Recreation Industry Training Package.

This unit deals with surf awareness and self-rescue knowledge and skills in order to safely participate in activities in the surf environment.

| ELEMENT                                                | PERFORMANCE CRITERIA                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |
|--------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>1 Plan for the surfing activity</b>                 | 1.1 Ensure sufficient food and water is available to maintain physiological well-being during activity<br>1.2 Select personal clothing for activity and identify the design/construction features that make it appropriate<br>1.3 Identify an appropriate activity site/location after consideration of <b>statutory and organisational procedures</b> , where applicable, and contextual issues relating to the activity<br>1.4 Access and interpret meteorological data and determine activity plans following consideration of weather information |
| <b>2 Demonstrate knowledge of the surf environment</b> | 2.1 Identify the potential <b>hazards</b> and <b>personal safety/environmental hazards</b> within the surf environment<br>2.2 Apply knowledge of the <b>characteristics of different types of waves</b> , and their impact on surf safety to identify safe surfing locations<br>2.3 Identify <b>distinguishing features of rips</b> , gutters and sweeps and determine the most suitable surfing venue                                                                                                                                                |
| <b>3 Apply surf survival techniques</b>                | 3.1 Demonstrate <b>techniques for survival</b> in the water<br>3.2 Demonstrate the ability to avoid <b>hazards</b> whilst in the water                                                                                                                                                                                                                                                                                                                                                                                                                |
| <b>4 Demonstrate self rescue techniques</b>            | 4.1 Demonstrate the ability to get back to the shore in the <b>prevailing conditions</b> , using <b>craft</b> and without craft<br>4.2 Identify and apply <b>strategies to implement when not able to self rescue</b> or return to shore unassisted                                                                                                                                                                                                                                                                                                   |

## Range Statements

The Range Statements provide advice to interpret the scope and context of this unit of competence, allowing for differences between enterprises and workplaces. The Range Statements relate to the unit as a whole and helps facilitate holistic assessment. In addition, the following variables may be present for this particular unit of competency:

| RANGE STATEMENT                                    | CATEGORIES                                                                                                                                                                                                                                                                                                                                                                                                                              |

## Evidence Guide

The Evidence Guide identifies the critical aspects, knowledge and skills to be demonstrated to confirm competence for this unit. This is an integral part of the assessment of competence and should be read in conjunction with the Range Statements.

|                                                      |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |

| SROSRF002B | PERFORM BASIC SURFING MANOEUVRES IN CONTROLLED CONDITIONS |
|            |                                                           |
| SRF        | Surfing                                                   |

**DESCRIPTION:** This unit has been developed for the Outdoor Recreation Industry Training Package.

This unit covers the knowledge and skills required to manoeuvre in the surf in controlled conditions using basic skills and a craft of choice.

| ELEMENT                                 | PERFORMANCE CRITERIA                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |
|-----------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>1 Plan for the surfing activity</b>  | 1.1 Ensure sufficient food and water is available to maintain physiological well-being during activity<br>1.2 Select personal clothing for activity and identify the design/construction features that make it appropriate<br>1.3 Identify an appropriate activity site/location after consideration of <b>statutory and organisational procedures</b> , where applicable, and contextual issues relating to the activity<br>1.4 Access and interpret meteorological data and determine activity plans following consideration of weather information                                                                                                                                                                     |
| <b>2 Select and transport equipment</b> | 2.1 Select the <b>craft</b> , where used, after consideration of all <b>contextual issues</b> and check to ensure that it is in good working order<br>2.2 <b>Transport</b> and carry the <b>craft</b> , where used, in a manner to minimise damage and to suit the situation<br>2.3 Fit, check and adjust <b>personal equipment</b> and ensure suitability for personal requirements and abilities<br>2.4 Identify the need for board waxing and demonstrate waxing technique, where appropriate                                                                                                                                                                                                                          |
| <b>3 Enter and exit the water</b>       | 3.1 Select a suitable safe location for entering the water, based on consideration of <b>contextual issues, controlled conditions</b> , council regulations and marked beach zones<br>3.2 Carry the <b>craft</b> , where used, in a manner to assist ease of movement in the water and carry out to a depth where it can be safely sat/laid upon, avoiding all relevant <b>hazards</b><br>3.3 Propel the <b>craft</b> through broken and unbroken waves whilst walking<br>3.4 Demonstrate the appropriate method for walking with a legrope attached, where applicable<br>3.5 Apply skills to ensure measures are taken so that the <b>craft</b> is always facing into oncoming waves                                     |
| <b>4 Manoeuvre the craft</b>            | 4.1 Demonstrate the ability to sit/lay upon the <b>craft</b> both within depth and outside depth in still water<br>4.2 Identify <b>features of efficient board paddling technique</b> and demonstrate <b>methods of manoeuvring</b> whilst propelling the craft (where used) in still water and then through broken and unbroken waves<br>4.3 <b>Manoeuvre</b> and turn the <b>craft</b> both within the surf zone and outside the surf zones using a variety of methods<br>4.4 Demonstrate correct dismount drill in both the prone and standing positions<br>4.5 Demonstrate the ability to control the craft with <b>wipeout procedures</b> , ensuring personal safety and with regard for the safety of other surfers |
| <b>5 Catch and ride a wave</b>          | 5.1 Observe surfing etiquette when catching and riding waves<br>5.2 Select and catch broken waves whilst demonstrating control and without wiping out and demonstrate <b>basic surfing manoeuvres on broken waves</b>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |

|  |                                                                                                                |
|--|----------------------------------------------------------------------------------------------------------------|
|  | 5.3 Ride broken waves prone and, where appropriate to the <i>craft</i> , whilst kneeling, sitting and standing |
|--|----------------------------------------------------------------------------------------------------------------|

## Range Statements

The Range Statements provide advice to interpret the scope and context of this unit of competence, allowing for differences between enterprises and workplaces. The Range Statements relate to the unit as a whole and helps facilitate holistic assessment. In addition, the following variables may be present for this particular unit of competency:

| RANGE STATEMENT                                 | CATEGORIES                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |

## Evidence Guide

The Evidence Guide identifies the critical aspects, knowledge and skills to be demonstrated to confirm competence for this unit. This is an integral part of the assessment of competence and should be read in conjunction with the Range Statements.

|                                                      |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |

| SRF         | Surfing                                       |

**DESCRIPTION:** This unit has been developed for the Outdoor Recreation Industry Training Package.

This unit addresses the knowledge and skills to manoeuvre a board or sit on kayak using an intermediate level of skill on small, spilling unbroken waves.

| ELEMENT                                | PERFORMANCE CRITERIA                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |
|----------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>1 Plan for the surfing activity</b> | 1.1 Ensure sufficient food and water is available to maintain physiological well-being during activity<br>1.2 Select personal clothing for activity and identify the design/construction features that make it appropriate<br>1.3 Identify an appropriate activity site/location after consideration of <b>statutory and organisational procedures</b> , where applicable, and contextual issues relating to the activity<br>1.4 Access and interpret meteorological data and determine activity plans following consideration of weather information |
| <b>2 Select a suitable venue</b>       | 2.1 Determine the criteria affecting the selection of a suitable venue in relation to all <b>contextual issues</b><br>2.2 Select a venue after due consideration of all <b>contextual issues</b>                                                                                                                                                                                                                                                                                                                                                      |
| <b>3 Select suitable equipment</b>     | 3.1 Select the <b>craft</b> after consideration of all <b>contextual issues</b><br>3.2 Fit, check and adjust <b>equipment</b> and ensure suitability for personal requirements and the conditions                                                                                                                                                                                                                                                                                                                                                     |
| <b>4 Enter and exit the water</b>      | 4.1 Select a suitable location for entering the water, based on consideration of <b>contextual issues</b> , council regulations and marked beach zones<br>4.2 Carry the <b>craft</b> out to a depth where it can be safely sat/lay upon, avoiding all relevant <b>hazards</b><br>4.3 Demonstrate various <b>paddling techniques</b> through broken and unbroken waves<br>4.4 Demonstrate various methods for paddling out back in a safe manner                                                                                                       |
| <b>5 Catch and ride waves</b>          | 5.1 Display appropriate balance and confidence when demonstrating <b>methods of manoeuvring</b> and <b>intermediate surfing manoeuvres</b> on <b>small, spilling unbroken waves</b><br>5.2 Demonstrate traversing along the green face of a spilling wave<br>5.3 Demonstrate turning and linking of basic manoeuvres<br>5.4 Select appropriate waves to catch and ride                                                                                                                                                                                |
| <b>6 Surf in a safe manner</b>         | 6.1 Demonstrate the ability to control the <b>craft</b> in a wipeout, ensuring personal safety and with regard for the safety of other surfers<br>6.2 Demonstrate awareness of other persons in the vicinity and apply surf etiquette when riding waves                                                                                                                                                                                                                                                                                               |

## Range Statements

The Range Statements provide advice to interpret the scope and context of this unit of competence, allowing for differences between enterprises and workplaces. The Range Statements relate to the unit as a whole and helps facilitate holistic assessment. In addition, the following variables may be present for this particular unit of competency:

| RANGE STATEMENT          | CATEGORIES                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |

## Evidence Guide

The Evidence Guide identifies the critical aspects, knowledge and skills to be demonstrated to confirm competence for this unit. This is an integral part of the assessment of competence and should be read in conjunction with the Range Statements.

|                                                      |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |

| SROSRF004B | PERFORM A SIMPLE RESCUE IN MODERATE SURF CONDITIONS |
|            |                                                     |
| SRF        | Surfing                                             |

**DESCRIPTION:** This unit has been developed for the Outdoor Recreation Industry Training Package.

This unit deals with the knowledge and skills to perform rescues and recoveries in moderate surf conditions.

| ELEMENT                                                                     | PERFORMANCE CRITERIA                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |
|-----------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>1 Determine the appropriate rescue/recovery technique</b>                | 1.1 Identify immediate <b>hazards</b> to self and others<br>1.2 Assess <b>risks</b> to self and others<br>1.3 Assess the situation in terms of <b>situational variances</b> including hazards, rescue abilities, degree of urgency, <b>physical and human resources</b><br>1.4 Select a <b>rescue/recovery method</b> suitable to the situation                                                                                                                                                                                                                                                                                                                                                   |
| <b>2 Demonstrate the necessary skills to perform rescues and recoveries</b> | 2.1 Demonstrate correct use of rescue tubes and rescue <b>craft</b> to perform a rescue and bring a rescuee to shore in <b>moderate conditions</b><br>2.2 Select approach and contact methods with the to reduce the possibility of injury or submersion of the rescuer<br>2.3 Demonstrate rescues of conscious and unconscious patients, displaying the ability to support, tow and monitor the patient<br>2.4 Demonstrate adequate carrying techniques to ensure clear airways<br>2.5 Demonstrate deep water resuscitation techniques in accordance with industry standards<br>2.6 Apply relevant signals and signs to communicate with other persons involved in the rescue, where appropriate |

## Range Statements

The Range Statements provide advice to interpret the scope and context of this unit of competence, allowing for differences between enterprises and workplaces. The Range Statements relate to the unit as a whole and helps facilitate holistic assessment. In addition, the following variables may be present for this particular unit of competency:

| RANGE STATEMENT                     | CATEGORIES                                                                                                                                                                                                                                                                                                                                |

## Evidence Guide

The Evidence Guide identifies the critical aspects, knowledge and skills to be demonstrated to confirm competence for this unit. This is an integral part of the assessment of competence and should be read in conjunction with the Range Statements.

|                                                      |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |

| SRF         | Surfing                                   |

**DESCRIPTION:** This unit has been developed for the Outdoor Recreation Industry Training Package.

This unit deals with the knowledge and skills to surf a board or sit on kayak using complex manoeuvres on advanced waves.

| ELEMENT                                | PERFORMANCE CRITERIA                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |
|----------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>1 Plan for the surfing activity</b> | 1.1 Ensure sufficient food and water is available to maintain physiological well-being during activity<br>1.2 Select personal clothing for activity and identify the design/construction features that make it appropriate<br>1.3 Identify an appropriate activity site/location after consideration of <b>statutory and organisational procedures</b> , where applicable, and contextual issues relating to the activity<br>1.4 Access and interpret meteorological data and determine activity plans following consideration of weather information |
| <b>2 Select a suitable venue</b>       | 2.1 Determine criteria affecting the selection of a suitable venue in relation to all <b>contextual issues</b><br>2.2 Select a venue after due consideration of all <b>contextual issues</b>                                                                                                                                                                                                                                                                                                                                                          |
| <b>3 Select suitable equipment</b>     | 3.1 Select the most appropriate <b>craft</b> after consideration of all <b>contextual issues</b><br>3.2 Check <b>craft</b> and other <b>equipment</b> , adjust where necessary and ensure suitability for personal requirements                                                                                                                                                                                                                                                                                                                       |
| <b>4 Enter and exit the water</b>      | 4.1 Select a suitable location for entering the water, based on consideration of <b>contextual issues</b> , council regulations and marked beach zones<br>4.2 Demonstrate various <b>methods of manoeuvring</b> and <b>paddling techniques</b> in rough conditions, avoiding all relevant <b>hazards</b><br>4.3 Demonstrate methods of getting out back in rough conditions, avoiding all relevant <b>hazards</b>                                                                                                                                     |
| <b>5 Catch and ride waves</b>          | 5.1 Utilise waves correctly, with rider reaching end of wave<br>5.2 Demonstrate knowledge of <b>advanced waves</b> and wave mechanics assists use of wave and ensures speed, control, coordination and economy of motion<br>5.3 Demonstrate continuity and fluidity of <b>advanced/complex surfing manoeuvres</b> riding waves<br>5.4 Demonstrate correct use of weight transferral/rotational techniques<br>5.5 Display accuracy in catching waves and responding rapidly and correctly                                                              |

## Range Statements

The Range Statements provide advice to interpret the scope and context of this unit of competence, allowing for differences between enterprises and workplaces. The Range Statements relate to the unit as a whole and helps facilitate holistic assessment. In addition, the following variables may be present for this particular unit of competency:

| RANGE STATEMENT                            | CATEGORIES                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |

## Evidence Guide

The Evidence Guide identifies the critical aspects, knowledge and skills to be demonstrated to confirm competence for this unit. This is an integral part of the assessment of competence and should be read in conjunction with the Range Statements.

|                                                      |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |

|            |                                                                                   |
| SRF        | Surfing                                                                           |

**DESCRIPTION:** This unit has been developed for the Outdoor Recreation Industry Training Package.

This unit deals with the knowledge and skills to perform a comprehensive range of rescues and recoveries in moderate to difficult surf conditions.

| ELEMENT                                                                     | PERFORMANCE CRITERIA                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |
|-----------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>1 Determine the appropriate rescue/recovery technique</b>                | 1.1 Identify immediate <b>hazards</b> to self and others<br>1.2 Assess <b>risks</b> to self and others<br>1.3 Assess the <b>situational variances</b> in terms of hazards, rescue abilities, degree of urgency, <b>physical and human resources</b><br>1.4 Select a <b>rescue/recovery method</b> suitable to the situation                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |
| <b>2 Demonstrate the necessary skills to perform rescues and recoveries</b> | 2.1 Utilise correctly, rescue tubes and rescue <b>craft</b> to perform a rescue and bring a rescuee to shore<br>2.2 Select appropriate approach and contact methods with the rescuee to reduce the possibility of injury or submersion of the rescuer<br>2.3 Demonstrate rescues of conscious and unconscious patients, displaying the ability to support, tow and monitor the patient<br>2.4 Demonstrate adequate carrying techniques to ensure clear airways<br>2.5 Demonstrate deep water resuscitation techniques in accordance with industry standards<br>2.6 Apply relevant signals and signs to communicate with other persons involved in the rescue, where appropriate<br>2.7 Demonstrate the ability to efficiently rescue without the use of equipment in <b>moderate to difficult surf conditions</b><br>2.8 Apply <b>advanced resuscitation techniques</b> to revive distressed and unconscious patients |

## Range Statements

The Range Statements provide advice to interpret the scope and context of this unit of competence, allowing for differences between enterprises and workplaces. The Range Statements relate to the unit as a whole and helps facilitate holistic assessment. In addition, the following variables may be present for this particular unit of competency:

| RANGE STATEMENT                              | CATEGORIES                                                                                                                                                                                                                                                                                                                  |

## Evidence Guide

The Evidence Guide identifies the critical aspects, knowledge and skills to be demonstrated to confirm competence for this unit. This is an integral part of the assessment of competence and should be read in conjunction with the Range Statements.

|                                                      |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |

| SRF         | Surfing                |

**DESCRIPTION:** This unit has been developed for the Outdoor Recreation Industry Training Package.

This unit covers the knowledge and skills required to guide or lead clients during a surfing session not exceeding one days duration.

| ELEMENT                                             | PERFORMANCE CRITERIA                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |
|-----------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>1 Select appropriate equipment for the group</b> | 1.1 Select <b>equipment</b> after consideration of <b>contextual issues</b> and check to ensure that it is in good working condition<br>1.2 Fit and adjust <b>equipment</b> correctly and ensure suitability to the participant and conditions<br>1.3 Assess <b>equipment</b> for safety and suitability for the activity<br>1.4 Check <b>safety and rescue equipment</b> to ensure suitability to group and planned session                                                                                                                                                                                                                                                                                 |
| <b>2 Plan a surfing session for clients</b>         | 2.1 Assess skill level, experience and physical capabilities of each member of the group<br>2.2 Establish attainable group objectives<br>2.3 Select suitable location for session to suit abilities and objectives of the group<br>2.4 Obtain and interpret weather information for local conditions of the session<br>2.5 Obtain permits or permission for access where necessary<br>2.6 Ensure correct leader/client ratios are met<br>2.7 Prepare a checklist for personal equipment as session leader<br>2.8 Determine food and drink requirements for group taking into account contextual issues<br>2.9 Assess, minimise and eliminate risks, where possible whilst forming a risk management plan     |
| <b>3 Brief clients</b>                              | 3.1 Communicate logistical details to clients<br>3.2 Brief group of standard safety procedures<br>3.3 Explain symptoms, treatment and prevention of hypothermia, hyperthermia and dehydration to group to assist in self-monitoring<br>3.4 Outline procedure following an incident to a group member(s)<br>3.5 Establish verbal and non-verbal <b>communication</b> system for use during session and ensure that all clients understand system(s)                                                                                                                                                                                                                                                           |
| <b>4 Maintain physical welfare of group</b>         | 4.1 Apply knowledge of hypothermia, hyperthermia and dehydration to session planning in terms of food and "in-water" times<br>4.2 Assess capabilities of group members prior to commencing<br>4.3 Ensure all clients are properly equipped for the session and conditions including protection from weather conditions eg sunscreen<br>4.4 Monitor individual client's performance and needs<br>4.5 Monitor weather conditions<br>4.6 Evaluate implications of weather signs on session plans<br>4.7 Implement appropriate modifications to session in regard to all variable factors that are monitored<br>4.9 Control the group to maintain a safe enjoyable atmosphere<br>4.10 Apply risk management plan |
| <b>5 Establish effective communication</b>          | 5.1 Communicate clearly objectives and nature of the session to the group<br>5.2 Provide clear and concise direction and advice to group during the session<br>5.3 Ensure that good <b>communication</b> exists between all group members by                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |

|                                                    |                                                                                                                                                                                                                                                                                                           |

| <b>6 Lead a group of surfers safely</b>            | <p>6.1 Monitor appropriate spacing between clients appropriate to conditions</p> <p>6.2 Identify a variety of potential <b>hazards</b></p> <p>6.3 Respond accordingly to any emergency or non-routine situation</p>                                                                                       |
| <b>7 Conduct activity in a professional manner</b> | <p>7.1 Avoid contentious issues in general conversation</p> <p>7.2 Use positive words throughout activity to refer to clients and avoid using negative or disparaging words</p> <p>7.3 Avoid negative statements about own organisation, commercial competitors, public bodies and other individuals</p>  |
| <b>8 Complete post-session responsibilities</b>    | <p>8.1 Notify relevant authority of session completion</p> <p>8.2 Retrieve, inspect, repair and store (or retire) <b>equipment</b> according to procedures</p> <p>8.3 Evaluate, including client feedback, all aspects of session organisation and conduct</p> <p>8.4 Suggest modifications if needed</p> |

## Range Statements

The Range Statements provide advice to interpret the scope and context of this unit of competence, allowing for differences between enterprises and workplaces. The Range Statements relate to the unit as a whole and helps facilitate holistic assessment. In addition, the following variables may be present for this particular unit of competency:

| RANGE STATEMENT   | CATEGORIES                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |

## Evidence Guide

The Evidence Guide identifies the critical aspects, knowledge and skills to be demonstrated to confirm competence for this unit. This is an integral part of the assessment of competence and should be read in conjunction with the Range Statements.

|                                                      |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |

|             |                     |
| SRF         | Surfing             |

**DESCRIPTION:** This unit has been developed for the Outdoor Recreation Industry Training Package.

This unit covers the knowledge and skills required to guide or lead clients on extended surfing trips.

| ELEMENT                                             | PERFORMANCE CRITERIA                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |
|-----------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>1 Select appropriate equipment for the group</b> | 1.1 Select <b>equipment</b> after consideration of <b>contextual issues</b> and check to ensure that it is in good working condition<br>1.2 Fit and adjust <b>equipment</b> correctly and ensure suitability to the participant and conditions<br>1.3 Assess <b>equipment</b> for safety and suitability for the activity<br>1.4 Check <b>safety and rescue equipment</b> to ensure suitability to group and planned trip                                                                                                                                                                                                                                                                       |
| <b>2 Plan a surfing trip for clients</b>            | 2.1 Assess skill level, experience and physical capabilities of each member of the group<br>2.2 Establish attainable group objectives<br>2.3 Select suitable location for trip to suit abilities and objectives of the group<br>2.4 Obtain and interpret weather information for local conditions of the trip<br>2.5 Obtain permits or permission for access where necessary<br>2.6 Ensure correct leader/client ratios are met<br>2.7 Prepare a checklist for personal equipment as trip leader<br>2.8 Determine food and drink requirements for group taking into account contextual issues<br>2.9 Assess, minimise and eliminate risks, where possible whilst forming a risk management plan |
| <b>3 Brief clients</b>                              | 3.1 Communicate logistical details to clients<br>3.2 Brief group of standard safety procedures<br>3.3 Explain symptoms, treatment and prevention of hypothermia, hyperthermia and dehydration to group to assist in self-monitoring<br>3.4 Outline procedure following an incident to a group member(s)<br>3.5 Establish verbal and non-verbal <b>communication</b> system for use during trip and ensure that all clients understand system(s)                                                                                                                                                                                                                                                 |
| <b>4 Maintain physical welfare of group</b>         | 4.1 Apply knowledge of hypothermia, hyperthermia and dehydration to trip planning in terms of food and "in-water" times<br>4.2 Assess capabilities of group members on the day before commencing<br>4.3 Ensure all clients are properly equipped for the trip and conditions<br>4.4 Monitor individual client's performance and needs<br>4.5 Monitor weather conditions<br>4.6 Evaluate implications of weather signs on trip plans<br>4.7 Implement appropriate modifications to trip in regard to all variable factors that are monitored<br>4.9 Control the group to maintain a safe enjoyable atmosphere<br>4.10 Apply risk management plan                                                 |
| <b>5 Establish effective communication</b>          | 5.1 Communicate clearly objectives and nature of the trip to the group<br>5.2 Provide clear and concise direction and advice to group during the trip<br>5.3 Ensure that good <b>communication</b> exists between all group members by encouraging interaction<br>5.4 Encourage feedback and questioning from group members                                                                                                                                                                                                                                                                                                                                                                     |

|                                                                              |                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |
|------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                                                                              | 5.5 Devolve decision making where appropriate<br>5.6 Recognise and resolve conflict situations<br>5.7 Provide positive encouragement and empathy                                                                                                                                                                                                                                                                                                                   |
| <b>6 Lead a group of surfers safely</b>                                      | 6.1 Monitor appropriate spacing between clients appropriate to conditions<br>6.2 Identify a variety of potential <b>hazards</b><br>6.3 Respond accordingly to any emergency or non-routine situation                                                                                                                                                                                                                                                               |
| <b>7 Select and maintain a temporary site using minimal impact practices</b> | 7.1 Select a suitable site with reference to minimal impact on the environment<br>7.2 Arrange shelter appropriate for prevailing weather conditions<br>7.3 Establish site to ensure comfort and safety of the group<br>7.4 Use minimal impact relevant to the local environment during use of the site<br>7.5 Explain relevant minimum impact practices to group and monitor their compliance<br>7.6 Return site to an equal or greater standard on your departure |
| <b>8 Conduct activity in a professional manner</b>                           | 8.1 Avoid contentious issues in general conversation<br>8.2 Use positive words throughout activity to refer to clients and avoid using negative or disparaging words<br>8.3 Avoid negative statements about own organisation, commercial competitors, public bodies and other individuals                                                                                                                                                                          |
| <b>9 Complete post-trip responsibilities</b>                                 | 9.1 Notify relevant authority of trip completion<br>9.2 Retrieve, inspect, repair and store (or retire) <b>equipment</b> according to procedures<br>9.3 Evaluate, including client feedback, all aspects of trip organisation and conduct<br>9.4 Suggest modifications if needed                                                                                                                                                                                   |

## Range Statements

The Range Statements provide advice to interpret the scope and context of this unit of competence, allowing for differences between enterprises and workplaces. The Range Statements relate to the unit as a whole and helps facilitate holistic assessment. In addition, the following variables may be present for this particular unit of competency:

| RANGE STATEMENT   | CATEGORIES                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |

## Evidence Guide

The Evidence Guide identifies the critical aspects, knowledge and skills to be demonstrated to confirm competence for this unit. This is an integral part of the assessment of competence and should be read in conjunction with the Range Statements.

|                                                      |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |

| SRF         | Surfing                                       |

**DESCRIPTION:** This unit has been developed for the Outdoor Recreation Industry Training Package.

This unit covers the knowledge and skills to instruct learners to achieve competencies in order to participate independently, or with minimal supervision, in a basic to intermediate surfing activity.

| ELEMENT                                                                                      | PERFORMANCE CRITERIA                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |

| <b>1 Plan an instructional session for teaching basic to intermediate surfing skills</b>     | 1.1 Identify client needs and assess current competencies of group/individuals in order to determine the aims and objectives of the instructional session<br>1.2 Select a suitable site for the instructional session, based on an assessment of client needs, <b>hazards</b> , abilities and session aims<br>1.3 Plan appropriate instructional activities which will facilitate and enhance the learning process<br>1.4 Determine a suitable <b>sequence</b> of instruction<br>1.5 Access resources to conduct instructional activities, games and drills<br>1.6 Provide relevant pre-activity information to clients<br>1.7 Prepare contingency plans for instructional session to cope with inclement weather and other factors which may affect the ability to conduct the session<br>1.8 Conduct a risk assessment of the instructional activities and location and implement a risk management plan in accordance with the organisation's guidelines and operating procedures |
| <b>2 Select appropriate resources required to teach surfing basic to intermediate skills</b> | 2.1 Select and access <b>equipment</b> and <b>other resources</b> suitable for the instructional objectives<br>2.2 Select, fit and adjust <b>equipment</b> (where appropriate) to suit the needs of individual clients<br>2.3 Check all <b>equipment</b> to ensure compliance with occupational health and safety legislation, manufacturer's recommendations and/or operating procedures, and to ensure that it is in good working order<br>2.4 Check contents of first aid and repair kits to ensure their suitability to the location and activity<br>2.5 Arrange, where required, protective and/or safety clothing for each client                                                                                                                                                                                                                                                                                                                                              |
| <b>3 Introduce an instructional surfing session for basic to intermediate skills</b>         | 3.1 Communicate the aim of the instructional session to the clients<br>3.2 Encourage clients to seek clarification, information and feedback<br>3.3 Brief the clients on the safety practices, procedures and behaviour appropriate to the instructional session<br>3.4 Define activity boundaries/training area and/or clearly outline to the clients<br>3.5 Check clothing and footwear (if required) of clients for suitability to the session<br>3.6 Provide information on <b>equipment</b> selection, fitting or use where relevant to the instructional session's aims                                                                                                                                                                                                                                                                                                                                                                                                        |
| <b>4 Conduct an instructional surfing session for basic to intermediate skills</b>           | 4.1 Conduct "warm up"/introductory activities (where required) to reduce the risk of injury when client's are participating in physical activities<br>4.2 Monitor individual client's performance in instructional activities<br>4.3 Provide positive encouragement and/or feedback to each client at a suitable time to maintain a positive learning environment<br>4.4 Ensure instructional activity allows for repetition of skills<br>4.5 Evaluate instructional activities for effectiveness and implement                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |

|                                                                                                     |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |
|-----------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                                                                                                     | <p>modifications when required</p> <p>4.6 Assess risks associated with the conduct of instructional activities constantly and remove, minimise or avoid hazards in accordance with risk management plan and instructional objectives.</p> <p>4.7 Monitor <b>equipment</b> usage, behaviour and location of clients in order to review safety</p> <p>4.8 Ensure personal competencies with respect to topics and skills within the instructional session are at a sufficient level to enable correct demonstration of skills, accurate provision of information and to engender the confidence of the client(s)</p> <p>4.9 Demonstrate how personal competencies enable emergency and non - routine situations to be dealt with in accordance with operating procedures</p> |
| <b>5 Apply appropriate teaching techniques for a basic to intermediate surfing skills session</b>   | <p>5.1 Communicate instructions and information clearly and concisely</p> <p>5.2 Perform demonstrations for clients (where required) with a high level of technical correctness and accurate description</p> <p>5.3 Break-down complex skills and techniques into component parts and describe with key teaching points</p> <p>5.4 Identify faults in technique and provide a variety of solutions, where relevant, to correct faults</p> <p>5.5 Provide adequate time for practice, following fault correction and feedback</p> <p>5.6 Explain activities, drills or techniques which may improve skills</p>                                                                                                                                                              |
| <b>6 Teach required knowledge that applies to a basic to intermediate surfing activity</b>          | <p>6.1 Teach required knowledge, ethics, codes of behaviour, points of interest or principles relevant to surfing and achievement of competency, in a manner which achieves interest and client understanding</p> <p>6.2 Instruct clients on factors to consider when planning for participation in surfing</p> <p>6.3 Identify minimal impact practices appropriate to surfing, and determine client level of understanding</p> <p>6.4 Outline specific aspects of <b>equipment</b> selection, use and care, to enable the client to achieve competency at the relevant level</p> <p>6.5 Explain communication systems and relevant calls or signals used whilst participating in surfing, and determine client level of understanding in their use</p>                   |
| <b>7 Teach safety and rescue procedures appropriate to a basic to intermediate surfing activity</b> | <p>7.1 Instruct clients in appropriate emergency response procedures and techniques applicable to surfing, and the level of competency required</p> <p>7.2 Explain the principles and practices of group management, in the context of emergency situations</p> <p>7.3 Teach clients industry standard safety practices relevant to surfing</p> <p>7.4 Demonstrate rescue techniques specific to surfing, and provide opportunities for practice</p> <p>7.5 Clarify the use and selection of specific emergency response <b>equipment</b> that should be carried, relevant to the level of competency</p> <p>7.6 Assess client's level of understanding via questioning techniques and/or formal assessment</p>                                                            |
| <b>8 Teach basic to intermediate surfing skills</b>                                                 | <p>8.1 Explain and demonstrate key points of technique or skill</p> <p>8.2 Outline the <b>sequence</b> or combination of skill to achieve effective or efficient results</p> <p>8.3 Identify different applications of skill or technique, and where it is applicable/not applicable</p> <p>8.4 Practice skills or techniques and observe clients in order to provide feedback</p> <p>8.5 Assess clients to determine poor or incorrect technique</p> <p>8.6 Provide opportunities for additional practice, where required</p>                                                                                                                                                                                                                                             |

|                                                                                         |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |
|-----------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                                                                                         |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |
| <b>9<br/>Communicate further surfing knowledge</b>                                      | <p>9.1 Inform clients of locations, suitable to their skill level, for participating in surfing</p> <p>9.2 Provide information relevant to the competencies being taught, on the range of <b>equipment</b> and clothing available or required, and factors affecting choice</p> <p>9.3 Inform clients of opportunities to further develop their personal skills and knowledge</p>                                                                                                                                                                                                                                                                                                                                                                                                            |
| <b>10 Conclude and evaluate the basic to intermediate surfing instructional session</b> | <p>10.1 Allow time for "cooling down" at the end of the session, check <b>equipment</b> for damage and return and store in an appropriate fashion</p> <p>10.2 Determine the level of learning achieved directly through assessment or indirectly from Assessor</p> <p>10.3 Apply feedback from Assessor or assessment to evaluate the effectiveness of the instructional activities, the suitability of the instructional method, the feedback provided to clients and the initial assessment of client's abilities</p> <p>10.4 Evaluate the validity and reliability of assessment/evaluation tools used throughout the session to monitor learning</p> <p>10.5 Determine modifications to activities and delivery</p> <p>10.6 Evaluate the suitability of <b>other related factors</b></p> |

## Range Statements

The Range Statements provide advice to interpret the scope and context of this unit of competence, allowing for differences between enterprises and workplaces. The Range Statements relate to the unit as a whole and helps facilitate holistic assessment. In addition, the following variables may be present for this particular unit of competency:

| RANGE STATEMENT              | CATEGORIES                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |

## Evidence Guide

The Evidence Guide identifies the critical aspects, knowledge and skills to be demonstrated to confirm competence for this unit. This is an integral part of the assessment of competence and should be read in conjunction with the Range Statements.

|                                                      |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |

| SRF        | Surfing                                          |

**DESCRIPTION:** This unit has been developed for the Outdoor Recreation Industry Training Package.

This unit covers the knowledge and skills to instruct learners to achieve competencies in order to participate independently, or with minimal supervision, in an intermediate to advanced surfing activity.

| ELEMENT                                                                                         | PERFORMANCE CRITERIA                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |
|-------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>1 Plan an instructional session for teaching intermediate to advanced surfing skills</b>     | 1.1 Identify client needs and assess current competencies of group/individuals in order to determine the aims and objectives of the instructional session<br>1.2 Select a suitable site for the instructional session, based on an assessment of client needs, <b>hazards</b> , abilities and session aims<br>1.3 Plan appropriate instructional activities which will facilitate and enhance the learning process<br>1.4 Determine a suitable <b>sequence</b> of instruction<br>1.5 Access resources to conduct instructional activities, games and drills<br>1.6 Provide relevant pre-activity information to clients<br>1.7 Prepare contingency plans for instructional session to cope with inclement weather and other factors which may affect the ability to conduct the session<br>1.8 Conduct a risk assessment of the instructional activities and location and implement a risk management plan in accordance with the organisation's guidelines and operating procedures |
| <b>2 Select appropriate resources required to teach surfing intermediate to advanced skills</b> | 2.1 Select and access <b>equipment</b> and <b>other resources</b> suitable for the instructional objectives<br>2.2 Select, fit and adjust <b>equipment</b> (where appropriate) to suit the needs of individual clients<br>2.3 Check all <b>equipment</b> to ensure compliance with occupational health and safety legislation, manufacturer's recommendations and/or operating procedures, and to ensure that it is in good working order<br>2.4 Check contents of first aid and repair kits to ensure their suitability to the location and activity<br>2.5 Arrange, where required, protective and/or safety clothing for each client                                                                                                                                                                                                                                                                                                                                              |
| <b>3 Introduce an instructional surfing session for intermediate to advanced skills</b>         | 3.1 Communicate the aim of the instructional session to the clients<br>3.2 Encourage clients to seek clarification, information and feedback<br>3.3 Brief the clients on the safety practices, procedures and behaviour appropriate to the instructional session<br>3.4 Define activity boundaries/training area and/or clearly outline to the clients<br>3.5 Check clothing and footwear (if required) of clients for suitability to the session<br>3.6 Provide information on <b>equipment</b> selection, fitting or use where relevant to the instructional session's aims                                                                                                                                                                                                                                                                                                                                                                                                        |
| <b>4 Conduct an instructional surfing session for intermediate to advanced skills</b>           | 4.1 Conduct "warm up"/introductory activities (where required) to reduce the risk of injury when client's are participating in physical activities<br>4.2 Monitor individual client's performance in instructional activities<br>4.3 Provide positive encouragement and/or feedback to each client at a suitable time to maintain a positive learning environment                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |

|                                                                                                         |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |

| <p><b>9</b></p> <p><b>Communicate further surfing knowledge</b></p>                               | <p>9.1 Inform clients of locations, suitable to their skill level, for participating in surfing</p> <p>9.2 Provide information relevant to the competencies being taught, on the range of <b>equipment</b> and clothing available or required, and factors affecting choice</p> <p>9.3 Inform clients of opportunities to further develop their personal skills and knowledge</p>                                                                                                                                                                                                                                                                                                                                                                                                                                            |
| <p><b>10 Conclude and evaluate the intermediate to advanced surfing instructional session</b></p> | <p>10.1 Allow time for "cooling down" at the end of the session, check <b>equipment</b> for damage and return and store in an appropriate fashion</p> <p>10.2 Determine the level of learning achieved directly through assessment or indirectly from Assessor</p> <p>10.3 Apply feedback from Assessor or assessment to evaluate the effectiveness of the instructional activities, the suitability of the instructional method, the feedback provided to clients and the initial assessment of client's abilities</p> <p>10.4 Evaluate the validity and reliability of assessment/evaluation tools used throughout the session to monitor learning</p> <p>10.5 Determine modifications to activities and delivery method(s), based on evaluations</p> <p>10.6 Evaluate the suitability of <b>other related factors</b></p> |

## Range Statements

The Range Statements provide advice to interpret the scope and context of this unit of competence, allowing for differences between enterprises and workplaces. The Range Statements relate to the unit as a whole and helps facilitate holistic assessment. In addition, the following variables may be present for this particular unit of competency:

| RANGE STATEMENT              | CATEGORIES                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |

## Evidence Guide

The Evidence Guide identifies the critical aspects, knowledge and skills to be demonstrated to confirm competence for this unit. This is an integral part of the assessment of competence and should be read in conjunction with the Range Statements.

|                                                      |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |

**DESCRIPTION:** This unit has been developed for the Outdoor Recreation Industry Training Package.

This unit deals with the specific knowledge and skills required to select, set up and maintain an off-highway motorcycle for use under the supervision of person(s) of a higher competency. Other related competencies such as riding and trip planning are defined elsewhere.

| ELEMENT                                                           | PERFORMANCE CRITERIA                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |

| <b>1 Select a motorcycle for off-highway riding</b>               | 1.1 Identify <b>sources</b> where information about off-highway motorcycle selection can be gained<br>1.2 Identify off-highway motorcycle options and justify <b>reasons for selecting</b> one motorcycle over another<br>1.3 Select a motorcycle, ensuring that it meets the <b>needs, size and proportions</b> of the rider<br>1.4 Select an appropriate off highway motorcycle dealer                                                                                                                                                                                                                                                                                                                                           |
| <b>2 Set up a motorcycle for off- highway riding</b>              | 2.1 Select and use relevant manual/manufacture's specifications<br>2.2 Identify <b>aspects of setup</b> which affect motorcycle performance and rider efficiency<br>2.3 Make adjustments and set up <b>controls</b> for comfort and user ease after consideration of these aspects<br>2.4 Identify the range of <b>accessories</b> available to improve performance and <b>rider comfort</b> and attach <b>accessories</b> appropriate to budget constraints and motorcycle use<br>2.5 Check and adjust other <b>off-highway motorcycle parts</b> to ensure correct functioning and safety, based on manufacturer's recommendations<br>2.6 Ensure motorcycle condition meets safety requirements and is roadworthy (if applicable) |
| <b>3 Conduct routine maintenance on an off-highway motorcycle</b> | 3.1 Identify scheduled <b>servicing</b> and <b>regular maintenance tasks</b><br>3.2 Correctly identify repair <b>tools and spare parts</b> and carry correct <b>tools and spare parts</b> for in-field repair kit for off highway riding<br>3.3 Identify <b>off-highway motorcycle parts</b> requiring lubrication, and lubricate as required<br>3.4 Conduct <b>regular maintenance tasks</b> as specified by the manufacturer and with reference to the manufacturer's manual<br>3.5 Correct detected faults or refer to specialist repairers, as required<br>3.6 <b>Clean</b> motorcycle to prevent corrosion damage<br>3.7 Demonstrate repair of a puncture                                                                     |

## Range Statements

The Range Statements provide advice to interpret the scope and context of this unit of competence, allowing for differences between enterprises and workplaces. The Range Statements relate to the unit as a whole and helps facilitate holistic assessment. In addition, the following variables may be present for this particular unit of competency:

| RANGE STATEMENT         | CATEGORIES                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |

## Evidence Guide

The Evidence Guide identifies the critical aspects, knowledge and skills to be demonstrated to confirm competence for this unit. This is an integral part of the assessment of competence and should be read in conjunction with the Range Statements.

|                                                      |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |

|            |                                                   |
| TBR        | Trail bike riding                                 |

**DESCRIPTION:** This unit has been developed for the Outdoor Recreation Industry Training Package.

This unit deals with the specific knowledge and skills required to ride an off-highway motorcycle on *tracks and trails* at an introductory level under supervision of person(s) of a higher competency. Motorcycling should be over *gentle to moderate terrain* with some hazards. Other related competencies such as navigation and trip planning are defined elsewhere.

|-------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>1 Plan off-highway motorcycle rides</b>                              | 1.1 Identify food and fluid requirements based on duration of the ride and the principles of nutrition and energy for an <b>off-highway motorcycle</b> ride<br>1.2 Address packing and storage of food and fluids appropriate to <b>off-highway motorcycle</b> riding<br>1.3 Select an appropriate activity site/location/route demonstrating consideration of <b>statutory requirements</b> , where applicable, and <b>contextual issues</b> relating to the activity<br>1.4 Access and interpret meteorological data and determine activity plans following consideration of weather information                                                                                    |
| <b>2 Select and use equipment and apparel</b>                           | 2.1 Select <b>suitable apparel</b> after consideration of <b>contextual issues</b> and check to ensure that it is in good working condition and fitting is correct<br>2.2 Wear <b>suitable apparel</b> which is adequate for all possible weather conditions and reduces the risk of skin abrasions<br>2.3 Identify <b>additional safety apparel</b> and <b>equipment selection</b><br>2.4 Use and maintain <b>other equipment</b> in accordance with manufacturer's specifications<br>2.5 Pack backpack / bum bag to ensure that heavy contents do not affect balance whilst riding and sharp contents are not protruding                                                            |
| <b>3 Perform pre start checks</b>                                       | 3.1 Carry out <b>pre start checks</b> of <b>off-highway motorcycle</b> to manufacturer's specifications and in line with established safety practices<br>3.2 Take action to correct any deficiencies<br>3.3 Fit attachments and loads in accordance with manufacturer's specifications and safe practices to ensure safety and maintenance of balance<br>3.4 Adjust the motorcycle so that controls are set up correctly for personal use<br>3.5 Select suitable transport (where relevant) and load/unload <b>off-highway motorcycle</b> safely<br>3.6 Secure and transport <b>off-highway motorcycle</b> (where relevant) according to manufacturer's instructions                  |
| <b>4 Demonstrate safe and efficient off-highway motorcycling skills</b> | 4.1 Start <b>off-highway motorcycle</b> using recommended technique to maintain safety and stability<br>4.2 Adopt appropriate posture when riding on varying conditions to achieve efficiency and comfort<br>4.3 Demonstrate a degree of balance and confidence and an understanding of weight distribution<br>4.4 Modify technique to account for changes in <b>terrain</b> and apply recommended weight transfer <b>techniques</b> during cornering<br>4.5 Display efficient use of gears across different <b>terrain</b> features using smooth and timely gear changes<br>4.6 Use throttle and clutch control to maintain maximum traction and acceleration in any given situation |

|                                      |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |

## Range Statements

The Range Statements provide advice to interpret the scope and context of this unit of competence, allowing for differences between enterprises and workplaces. The Range Statements relate to the unit as a whole and helps facilitate holistic assessment. In addition, the following variables may be present for this particular unit of competency:

| RANGE STATEMENT                  | CATEGORIES                                                                                                                                                                                                                                                                                                                                                                                                                                                              |

## Evidence Guide

The Evidence Guide identifies the critical aspects, knowledge and skills to be demonstrated to confirm competence for this unit. This is an integral part of the assessment of competence and should be read in conjunction with the Range Statements.

|            |                                                      |
| TBR        | Trail bike riding                                    |

**DESCRIPTION:** This unit has been developed for the Outdoor Recreation Industry Training Package.

This unit deals with the specific knowledge and skills required to ride an off-highway motorcycle on *tracks and trails*. Motorcycling should be over *moderate to difficult terrain* with hazards. Other related competencies such as navigation and trip planning are defined elsewhere.

| ELEMENT                                                                     | PERFORMANCE CRITERIA                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |
|-----------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>1 Plan off-highway motorcycle rides in moderate to difficult terrain</b> | 1.1 Select an appropriate activity site/location/route, <b>track and trail</b> , demonstrating consideration of <b>statutory requirements</b> , where applicable, and <b>contextual issues</b> relating to the activity<br>1.2 Access and interpret meteorological data and determine activity plans following consideration of weather information<br>1.3 Select <b>suitable apparel</b> and <b>additional safety attire</b> after consideration of <b>contextual issues</b> and check to ensure that it is in good working condition and fitting is correct<br>1.4 Secure and transport <b>off-highway motorcycle</b> (where relevant) according to manufacturer's instructions                                                                                                                                                                                                                                                                 |
| <b>2 Demonstrate safe and efficient off-highway motorcycling skills</b>     | 2.1 Carry out <b>pre start checks</b> of <b>off-highway motorcycle</b> to manufacturer's specifications and in line with established safety practices<br>2.2 Adjust the motorcycle so that controls are set up correctly for personal use in <b>moderate to difficult terrain</b><br>2.3 Adopt appropriate posture when riding to achieve efficiency and comfort<br>2.4 Demonstrate a high degree of balance and confidence when riding motorcycle in <b>moderate to difficult terrain</b><br>2.5 Use <b>advanced motorcycling techniques</b> to negotiate a range of terrain types and account for changes in terrain whilst maintaining control of motorcycle at all times<br>2.6 Survey track to identify <b>hazards</b> , assess <b>risk</b> and select the best route<br>2.7 Choose routes/lines to minimise damage to the environment and to provide suitable traction<br>2.8 Demonstrate navigation skills appropriate to the chosen route |
| <b>3 Motorcycle in a safe manner in moderate to difficult terrain</b>       | 3.1 Wear/use statutory safety equipment in accordance with state/territory legislation, weather and light conditions<br>3.2 Identify <b>hazards</b> and minimise <b>risk</b> through use of appropriate strategies<br>3.3 Negotiate <b>obstacles</b> in a safe manner<br>3.4 Take <b>measures</b> to guard personal and group safety<br>3.5 Consider the <b>safety of others</b> whilst riding motorcycle<br>3.6 Demonstrate adequate and efficient methods to communicate with motorists and other motorcycle riders<br>3.7 Apply, where relevant, correct group/bunch riding techniques<br>3.8 Demonstrate compliance with relevant state/territory road legislation<br>3.9 Assemble and carry an adequate in-field repair kit for the activity location                                                                                                                                                                                        |

## Range Statements

The Range Statements provide advice to interpret the scope and context of this unit of competence, allowing for differences between enterprises and workplaces. The Range Statements relate to the unit as a whole and helps facilitate holistic assessment. In addition, the following variables may be present for this particular unit of competency:

| RANGE STATEMENT                         | CATEGORIES                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |

## Evidence Guide

The Evidence Guide identifies the critical aspects, knowledge and skills to be demonstrated to confirm competence for this unit. This is an integral part of the assessment of competence and should be read in conjunction with the Range Statements.

|                                                      |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |

| SROTBR004A | PARTICIPATE IN EXTENDED OFF-HIGHWAY MOTORCYCLE TOURS |
| TBR        | Trail bike riding                                    |

**DESCRIPTION:** This unit has been developed for the Outdoor Recreation Industry Training Package.

This unit deals with the specific knowledge and skills required to participate independently in off-highway motorcycle touring activities for overnight or more extended periods. Other related competencies such as navigation and camp craft are defined elsewhere.

| ELEMENT                                           | PERFORMANCE CRITERIA                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |
|---------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>1 Plan for an off-highway motorcycle tour</b>  | 1.1 Ensure sufficient food and water is carried or is available en route to maintain physiological well-being during the tour<br>1.2 Select personal and protective clothing for the activity and identify the design/construction features that make it appropriate, demonstrating consideration of all possible weather conditions<br>1.3 Select an appropriate <b>route</b> , demonstrating consideration of <b>statutory requirements and organisational procedures</b> (where applicable) and <b>contextual issues</b> relating to the activity<br>1.4 Identify and organise <b>route requirements</b> , including permits and locations for overnight camping or accommodation<br>1.5 Access and interpret meteorological data and determine tour plans following consideration of weather information<br>1.6 Select a motorcycle, ensuring that it meets the needs, size and proportions of the rider as well as the chosen route and terrain |
| <b>2 Conduct pre tour checks</b>                  | 2.1 Perform routine pre-departure <b>checks</b> of off-highway motorcycle and take action to correct any deficiency<br>2.2 Set up controls for comfort and user ease after consideration of the planned <b>route</b> and trip duration<br>2.3 Determine the advantages and disadvantages of different methods of carrying gear and select a method appropriate to the terrain and expected conditions<br>2.4 Identify <b>comfort items</b> to improve ride, after consideration of terrain, weather conditions and <b>route</b> length<br>2.5 Load off-highway motorcycle correctly on to vehicle (where necessary)<br>2.6 Ensure the proposed tour is realistic in terms of the fitness level of the persons participating                                                                                                                                                                                                                          |
| <b>3 Negotiate an off-highway route</b>           | 3.1 Pack and load gear to ensure adverse affects on balance are minimised and gear does not fall off or become loose<br>3.2 Maintain balance and control of the off-highway motorcycle at all times over different terrain types and gradients<br>3.3 Maintain tyre pressure at recommended minimum pressure for conditions and load<br>3.4 Interpret and follow maps accurately<br>3.5 Maintain correct position on the <b>road</b> /track to avoid collisions with vehicles (where applicable) and other recreational users<br>3.6 Pace motorcycling to maintain group cohesion and allow endurance<br>3.7 Adopt group/bunch riding techniques (where appropriate)<br>3.8 Use designated lead and/or tail motorcycles (where appropriate)                                                                                                                                                                                                          |
| <b>4 Demonstrate a high level of riding skill</b> | 4.1 Adopt appropriate posture when riding to achieve efficiency and comfort and reduce repetitive strain over long rides<br>4.2 Modify technique to account for changes in terrain and gradient and apply                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |

|                                                                              |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |

|                                                                              | <p>recommended weight transfer techniques when cornering</p> <p>4.3 Display efficient use of gears across different terrain features, demonstrating smooth and timely gear changes</p> <p>4.5 Demonstrate recommended braking techniques for off-highway conditions</p> <p>4.6 Survey track to identify <b>hazards</b>, assess risk and select the best route</p> <p>4.7 Choose routes/lines to minimise damage to the environment and to provide suitable traction</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |
| <b>5 Tour in a safe manner</b>                                               | <p>5.1 Wear/use statutory <b>safety equipment</b> in accordance with state/territory legislation and weather and light conditions</p> <p>5.2 Identify <b>hazards</b> and minimise <b>risks</b> through use of appropriate strategies</p> <p>5.3 Negotiate <b>obstacles</b> in a safe manner</p> <p>5.4 Take <b>measures</b> to guard personal and group safety</p> <p>5.5 Consider the <b>safety of others</b> whilst off-highway motorcycling</p> <p>5.6 Modify a general first aid kit for off-highway motorcycle touring, and identify potential <b>first aid situations</b></p> <p>5.7 Demonstrate adequate and efficient methods to communicate with other motorcyclists, motorists and other users</p> <p>5.8 Demonstrate compliance with relevant state/territory <b>road</b> and resource management legislation</p> <p>5.9 Develop, and demonstrate a commitment to, a personal conservation ethic for off-highway motorcycle touring</p> <p>5.10 Demonstrate and apply <b>rider etiquette</b></p> |
| <b>6 Conduct off-highway motorcycle maintenance and repairs in the field</b> | <p>6.1 Identify the types of repairs that may be necessary on extended off-highway motorcycle tours and the <b>tools and spare parts</b> required to undertake these repairs in-field</p> <p>6.2 Assemble and carry an extensive in-field repair kit suitable to the activity location and terrain</p> <p>6.3 Conduct routine inspection checks and <b>maintenance</b> as required during the off-highway motorcycle tour and repairs</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |

## Range Statements

The Range Statements provide advice to interpret the scope and context of this unit of competence, allowing for differences between enterprises and workplaces. The Range Statements relate to the unit as a whole and helps facilitate holistic assessment. In addition, the following variables may be present for this particular unit of competency:

| RANGE STATEMENT             | CATEGORIES                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |

## Evidence Guide

The Evidence Guide identifies the critical aspects, knowledge and skills to be demonstrated to confirm competence for this unit. This is an integral part of the assessment of competence and should be read in conjunction with the Range Statements.

|                                                      |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |

**DESCRIPTION:** This unit has been developed for the Outdoor Recreation Industry Training Package.

This unit covers the knowledge and skills required to guide or lead clients on day and/or overnight off-highway motorcycling trips in terrain not exceeding personal skill level.

| ELEMENT                                                    | PERFORMANCE CRITERIA                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |
|------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>1 Select appropriate equipment for the group</b>        | 1.1 Select <b>equipment</b> after consideration of <b>contextual issues</b> and check to ensure that it is in good working condition<br>1.2 Fit and adjust <b>equipment</b> correctly and ensure suitability to the participant and motorcycle<br>1.3 Assess motorcycles for safety and suitability for the activity<br>1.4 Waterproof and pack <b>equipment</b> that is not required on hand and load or fasten in a suitable manner<br>1.5 Check <b>safety and repair equipment</b> to ensure suitability to group and planned trip                                                                                                                                                                                |
| <b>2 Plan an off-highway motorcycling trip for clients</b> | 2.1 Assess skill level, experience and physical capabilities of each member of the group<br>2.2 Establish attainable group objectives<br>2.3 Select suitable location for trip to suit abilities and objectives of the group<br>2.4 Obtain and interpret weather information for local conditions of the trip<br>2.5 Obtain permits or permission for access where necessary<br>2.6 Ensure correct leader/client ratios are met<br>2.7 Prepare a checklist for personal <b>equipment</b> as trip leader<br>2.8 Determine food and drink requirements for group taking into account <b>contextual issues</b><br>2.9 Assess, minimise and eliminate risks, where possible whilst forming a risk management plan        |
| <b>3 Brief clients</b>                                     | 3.1 Communicate logistical details to clients<br>3.2 Brief group of standard safety procedures<br>3.3 Demonstrate correct packing of a <b>motorcycle</b> with gear appropriate to proposed trip<br>3.4 Explain symptoms, treatment and prevention of hypothermia, hyperthermia and dehydration to group to assist in self-monitoring<br>3.5 Outline procedures to be followed should an accident occur<br>3.6 Establish verbal and non-verbal <b>communication</b> system for use during trip and ensure that all clients understand system(s)                                                                                                                                                                       |
| <b>4 Maintain physical welfare of group</b>                | 4.1 Apply knowledge of hypothermia, hyperthermia and dehydration to trip planning in terms of food, clothing, times and distances<br>4.2 Assess capabilities of group members prior to trip commencement<br>4.3 Ensure all clients are properly equipped for the trip and conditions<br>4.4 Monitor individual client's performance and needs<br>4.5 Evaluate off-highway motorcycling pace and conditions<br>4.6 Monitor weather conditions<br>4.7 Evaluate implications of weather signs on trip plans<br>4.8 Implement appropriate modifications to trip in regard to all variable factors that are monitored<br>4.9 Control the group to maintain a safe enjoyable atmosphere<br>4.10 Apply risk management plan |

|                                                                              |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |
|------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                                                                              |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |
| <b>5 Establish effective communication</b>                                   | 5.1 Communicate clearly objectives and nature of the trip to the group<br>5.2 Provide clear and concise direction and advice to group during the trip<br>5.3 Ensure that good <b>communication</b> exists between all group members by encouraging interaction<br>5.4 Encourage feedback and questioning from group members<br>5.5 Devolve decision making where appropriate<br>5.6 Recognise and resolve conflict situations<br>5.7 Provide positive encouragement and empathy                                                                                                                                                                                                                                                                                          |
| <b>6 Lead a group of off-highway motorcycle riders safely</b>                | 6.1 Monitor appropriate spacing between off-highway <b>motorcycle</b> riders appropriate to conditions<br>6.2 Identify a variety of potential hazards<br>6.3 Decide how each <b>hazard</b> can be safely negotiated<br>6.4 Recognise situations where a <b>hazard</b> needs to be scouted<br>6.5 Identify the best lines through hazards taking into consideration the ability of the group and safety issues<br>6.6 Provide guidance of how to negotiate a <b>hazard</b> clearly and concisely to the group<br>6.7 Demonstrate clearly to the group how to negotiate the <b>hazard</b><br>6.8 Manage the movement of the group to maintain the safest situation when negotiating the <b>hazard</b><br>6.9 Respond accordingly to any emergency or non-routine situation |
| <b>7 Select and maintain a temporary site using minimal impact practices</b> | 7.1 Select a suitable site with reference to minimal impact on the environment<br>7.2 Arrange shelter appropriate for prevailing weather conditions<br>7.3 Establish site to ensure comfort and safety of the group<br>7.4 Use minimal impact practices relevant to the local environment during use of the site<br>7.5 Explain relevant minimum impact practices to group and monitor their compliance<br>7.6 Return site to an equal or greater standard on your departure                                                                                                                                                                                                                                                                                             |
| <b>8 Conduct activity in a professional manner</b>                           | 8.1 Avoid contentious issues in general conversation<br>8.2 Use positive words throughout activity to refer to clients and avoid using negative or disparaging words<br>8.3 Avoid negative statements about own organisation, commercial competitors, public bodies and other individuals                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |
| <b>9 Complete post-trip responsibilities</b>                                 | 9.1 Notify relevant authority of trip completion<br>9.2 Retrieve, inspect, repair and store (or retire) <b>equipment</b> according to procedures<br>9.3 Evaluate, including client feedback, all aspects of trip organisation and conduct<br>9.4 Suggest modifications if needed                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |

## Range Statements

The Range Statements provide advice to interpret the scope and context of this unit of competence, allowing for differences between enterprises and workplaces. The Range Statements relate to the unit as a whole and helps facilitate holistic assessment. In addition, the following variables may be present for this particular unit of competency:

| RANGE STATEMENT          | CATEGORIES                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |

## Evidence Guide

The Evidence Guide identifies the critical aspects, knowledge and skills to be demonstrated to confirm competence for this unit. This is an integral part of the assessment of competence and should be read in conjunction with the Range Statements.

| SROTBR006A | INSTRUCT BASIC SKILLS OF OFF-HIGHWAY MOTORCYCLING |
|            |                                                   |
| TBR        | Trail bike riding                                 |

**DESCRIPTION:** This unit has been developed for the Outdoor Recreation Industry Training Package.

This unit covers the knowledge and skills to instruct learners to achieve competencies in order to participate independently, or with minimal supervision, in off-highway motorcycling activities using basic skills.

| ELEMENT                                                                             | PERFORMANCE CRITERIA                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |
|-------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>1 Plan an instructional session for teaching off-highway motorcycling skills</b> | 1.1 Identify client needs and assess current competencies of group/individuals in order to determine the aims and objectives of the instructional session<br>1.2 Select a suitable site for the instructional session, based on an assessment of client needs, <b>hazards</b> , abilities and session aims<br>1.3 Plan appropriate instructional activities which will facilitate and enhance the learning process<br>1.4 Determine a suitable <b>sequence</b> of instruction<br>1.5 Access resources to conduct instructional activities, games and drills<br>1.6 Provide relevant pre-activity information to clients<br>1.7 Prepare contingency plans for instructional session to cope with inclement weather and other factors which may affect the ability to conduct the session<br>1.8 Conduct a risk assessment of the instructional activities and location and implement a risk management plan in accordance with the organisation's guidelines and operating procedures |
| <b>2 Select appropriate resources required to teach off-highway motorcycling</b>    | 2.1 Select and access <b>equipment</b> and <b>other resources</b> suitable for the instructional objectives<br>2.2 Select, fit and adjust <b>equipment</b> (where appropriate) to suit the needs of individual clients<br>2.3 Check all <b>equipment</b> to ensure compliance with occupational health and safety legislation, manufacturer's recommendations and/or operating procedures, and to ensure that it is in good working order<br>2.4 Check contents of first aid and repair kits to ensure their suitability to the location and activity<br>2.5 Arrange, where required, protective and/or safety clothing for each client                                                                                                                                                                                                                                                                                                                                              |
| <b>3 Introduce an instructional session</b>                                         | 3.1 Communicate the aims of the instructional session to the clients<br>3.2 Encourage clients to seek clarification, information and feedback<br>3.3 Brief the clients on the safety practices, procedures and behaviour appropriate to the instructional session<br>3.4 Define activity boundaries/training area and/or clearly outline to the clients<br>3.5 Check clothing and footwear of clients for suitability to the session<br>3.6 Provide information on <b>equipment</b> selection, fitting or use where relevant to the instructional session's aims                                                                                                                                                                                                                                                                                                                                                                                                                     |
| <b>4 Conduct an instructional session</b>                                           | 4.1 Conduct "warm up"/introductory activities (where required) to reduce the risk of injury when client's are participating in physical activities<br>4.2 Monitor individual client's performance in instructional activities<br>4.3 Provide positive encouragement and/or feedback to each client at a suitable time to maintain a positive learning environment<br>4.4 Ensure instructional activity allows for repetition of skills<br>4.5 Evaluate instructional activities for effectiveness and implement modifications when required<br>4.6 Assess risks associated with the conduct of instructional activities constantly                                                                                                                                                                                                                                                                                                                                                   |

|                                                                                        |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |
|----------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                                                                                        | <p>and remove, minimise or avoid <b>hazards</b> in accordance with risk management plan and instructional objectives</p> <p>4.7 Monitor <b>equipment</b> usage, behaviour and location of clients in order to review safety</p> <p>4.8 Ensure personal competencies with respect to topics and skills within the instructional session are at a sufficient level to enable correct demonstration of skills, accurate provision of information and to engender the confidence of the client(s)</p> <p>4.9 Demonstrate how personal competencies enable emergency and non - routine situations to be dealt with in accordance with operating procedures</p>                                                                                                                                                                  |
| <b>5 Apply appropriate teaching techniques for an off-highway motorcycling session</b> | <p>5.1 Communicate instructions and information clearly and concisely</p> <p>5.2 Perform demonstrations for clients (where required) with a high level of technical correctness and accurate description</p> <p>5.3 Break-down complex skills and techniques into component parts and describe with key teaching points</p> <p>5.4 Identify faults in technique and provide a variety of solutions, where relevant, to correct faults</p> <p>5.5 Provide adequate time for practice, following fault correction and feedback</p> <p>5.6 Explain activities, drills or techniques which may improve skills</p>                                                                                                                                                                                                              |
| <b>6 Teach required knowledge that applies to off-highway motorcycling activities</b>  | <p>6.1 Teach required knowledge, rules, ethics, codes of behaviour, points of interest or principles relevant to off-highway motorcycling and achievement of competency, in a manner which achieves interest and client understanding</p> <p>6.2 Instruct clients on factors to consider when planning for participation in off-highway motorcycling</p> <p>6.3 Identify minimal impact practices appropriate to off-highway motorcycling, and determine client level of understanding</p> <p>6.4 Outline specific aspects of <b>equipment</b> selection, use and care, to enable the client to achieve competency at the relevant level</p> <p>6.5 Explain communication systems and relevant signals used whilst participating in off-highway motorcycling, and determine client level of understanding in their use</p> |
| <b>7 Teach safety procedures appropriate to an off-highway motorcycling activity</b>   | <p>7.1 Instruct clients in appropriate emergency response procedures and techniques applicable to off-highway motorcycling, and the level of competency required</p> <p>7.2 Explain the principles and practices of group management, in the context of emergency situations</p> <p>7.3 Teach clients industry standard safety practices relevant to off-highway motorcycling</p> <p>7.4 Clarify the use and selection of specific <b>repair and emergency response equipment</b> that should be carried, relevant to the level of competency</p> <p>7.5 Assess client's level of understanding via questioning techniques and/or formal assessment</p>                                                                                                                                                                    |
| <b>8 Teach off-highway motorcycling skills</b>                                         | <p>8.1 Explain and demonstrate key points of technique or skill</p> <p>8.2 Outline the <b>sequence</b> or combination of skill to achieve effective or efficient results</p> <p>8.3 Identify different applications of skill or technique, and where it is applicable/not applicable</p> <p>8.4 Practice skills or techniques and observe clients in order to provide feedback</p> <p>8.5 Assess clients to determine poor or incorrect technique</p> <p>8.6 Provide opportunities for additional practice, where required</p>                                                                                                                                                                                                                                                                                             |
| <b>9 Communicate further</b>                                                           | <p>9.1 Inform clients of locations, suitable to their skill level, for participating in off-</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |

|                                                                                    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |
|------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>off-highway motorcycling knowledge</b>                                          | <p>highway motorcycling</p> <p>9.2 Provide information relevant to the competencies being taught, on the range of <b>equipment</b> and clothing available or required, and factors affecting choice</p> <p>9.3 Inform clients of opportunities to further develop their personal skills and knowledge</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |
| <b>10 Conclude and evaluate the off-highway motorcycling instructional session</b> | <p>10.1 Allow time for "cooling down" at the end of the session, check <b>equipment</b> for damage and return and store in an appropriate fashion</p> <p>10.2 Determine the level of learning achieved directly through assessment or indirectly from Assessor</p> <p>10.3 Apply feedback from Assessor or assessment to evaluate the effectiveness of the instructional activities, the suitability of the instructional method, the feedback provided to clients and the initial assessment of client's abilities</p> <p>10.4 Evaluate the validity and reliability of assessment/evaluation tools used throughout the session to monitor learning</p> <p>10.5 Determine modifications to activities and delivery method(s), based on evaluations</p> <p>10.6 Evaluate the suitability of <b>other related factors</b></p> |

## Range Statements

The Range Statements provide advice to interpret the scope and context of this unit of competence, allowing for differences between enterprises and workplaces. The Range Statements relate to the unit as a whole and helps facilitate holistic assessment. In addition, the following variables may be present for this particular unit of competency:

| RANGE STATEMENT              | CATEGORIES                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |

## Evidence Guide

The Evidence Guide identifies the critical aspects, knowledge and skills to be demonstrated to confirm competence for this unit. This is an integral part of the assessment of competence and should be read in conjunction with the Range Statements.

| SROTBR007A | INSTRUCT ADVANCED SKILLS OF OFF-HIGHWAY MOTORCYCLING |
| TBR        | Trail bike riding                                    |

**DESCRIPTION:** This unit has been developed for the Outdoor Recreation Industry Training Package.

This unit covers the knowledge and skills to instruct learners to achieve competencies in order to participate independently, or with minimal supervision, in off-highway motorcycling activities requiring advanced skills.

| ELEMENT                                                                                                 | PERFORMANCE CRITERIA                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |

| <b>1 Plan an instructional session for teaching the advanced skills of off-highway motorcycling</b>     | 1.1 Identify client needs and assess current competencies of group/individuals in order to determine the aims and objectives of the instructional session<br>1.2 Select a suitable site for the instructional session, based on an assessment of client needs, <b>hazards</b> , abilities and session aims<br>1.3 Plan appropriate instructional activities which will facilitate and enhance the learning process<br>1.4 Determine a suitable <b>sequence</b> of instruction<br>1.5 Access resources to conduct instructional activities, games and drills<br>1.6 Provide relevant pre-activity information to clients<br>1.7 Prepare contingency plans for instructional session to cope with inclement weather and other factors which may affect the ability to conduct the session<br>1.8 Conduct a risk assessment of the instructional activities and location and implement a risk management plan in accordance with the organisation's guidelines and operating procedures |
| <b>2 Select appropriate resources required to teach the advanced skills of off-highway motorcycling</b> | 2.1 Select and access <b>equipment</b> and <b>other resources</b> suitable for the instructional objectives<br>2.2 Select, fit and adjust <b>equipment</b> (where appropriate) to suit the needs of individual clients<br>2.3 Check all <b>equipment</b> to ensure compliance with occupational health and safety legislation, manufacturer's recommendations and/or operating procedures, and to ensure that it is in good working order<br>2.4 Check contents of first aid and repair kits to ensure their suitability to the location and activity<br>2.5 Arrange, where required, protective and/or safety clothing for each client                                                                                                                                                                                                                                                                                                                                              |
| <b>3 Introduce an instructional session</b>                                                             | 3.1 Communicate the aims of the instructional session to the clients<br>3.2 Encourage clients to seek clarification, information and feedback<br>3.3 Brief the clients on the safety practices, procedures and behaviour appropriate to the instructional session<br>3.4 Define activity boundaries/training area and/or clearly outline to the clients<br>3.5 Check clothing and footwear of clients for suitability to the session<br>3.6 Provide information on <b>equipment</b> selection, fitting or use where relevant to the instructional session's aims                                                                                                                                                                                                                                                                                                                                                                                                                     |
| <b>4 Conduct an instructional session</b>                                                               | 4.1 Conduct "warm up"/introductory activities (where required) to reduce the risk of injury when client's are participating in physical activities<br>4.2 Monitor individual client's performance in instructional activities<br>4.3 Provide positive encouragement and/or feedback to each client at a suitable time to maintain a positive learning environment<br>4.4 Ensure instructional activity allows for repetition of skills<br>4.5 Evaluate instructional activities for effectiveness and implement modifications when required                                                                                                                                                                                                                                                                                                                                                                                                                                          |

|                                                                                                            |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |
|------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                                                                                                            | <p>4.6 Assess risks associated with the conduct of instructional activities constantly and remove, minimise or avoid <b>hazards</b> in accordance with risk management plan and instructional objectives</p> <p>4.7 Monitor <b>equipment</b> usage, behaviour and location of clients in order to review safety</p> <p>4.8 Ensure personal competencies with respect to topics and skills within the instructional session are at a sufficient level to enable correct demonstration of skills, accurate provision of information and to engender the confidence of the client(s)</p> <p>4.9 Demonstrate how personal competencies enable emergency and non-routine situations to be dealt with in accordance with operating procedures</p>                                                                                |
| <b>5 Apply appropriate teaching techniques for an off-highway motorcycling session</b>                     | <p>5.1 Communicate instructions and information clearly and concisely</p> <p>5.2 Perform demonstrations for clients (where required) with a high level of technical correctness and accurate description</p> <p>5.3 Break-down complex skills and techniques into component parts and describe with key teaching points</p> <p>5.4 Identify faults in technique and provide a variety of solutions, where relevant, to correct faults</p> <p>5.5 Provide adequate time for practice, following fault correction and feedback</p> <p>5.6 Explain activities, drills or techniques which may improve skills</p>                                                                                                                                                                                                              |
| <b>6 Teach required knowledge that applies to the advanced skills of off-highway motorcycling</b>          | <p>6.1 Teach required knowledge, rules, ethics, codes of behaviour, points of interest or principles relevant to off-highway motorcycling and achievement of competency, in a manner which achieves interest and client understanding</p> <p>6.2 Instruct clients on factors to consider when planning for participation in off-highway motorcycling</p> <p>6.3 Identify minimal impact practices appropriate to off-highway motorcycling, and determine client level of understanding</p> <p>6.4 Outline specific aspects of <b>equipment</b> selection, use and care, to enable the client to achieve competency at the relevant level</p> <p>6.5 Explain communication systems and relevant signals used whilst participating in off-highway motorcycling, and determine client level of understanding in their use</p> |
| <b>7 Teach safety procedures appropriate to an off-highway motorcycling activity using advanced skills</b> | <p>7.1 Instruct clients in appropriate emergency response procedures and techniques applicable to off-highway motorcycling, and the level of competency required</p> <p>7.2 Explain the principles and practices of group management, in the context of emergency situations</p> <p>7.3 Teach clients industry standard safety practices relevant to off-highway motorcycling</p> <p>7.4 Clarify the use and selection of specific <b>repair and emergency response equipment</b> that should be carried, relevant to the level of competency</p> <p>7.5 Assess client's level of understanding via questioning techniques and/or formal assessment</p>                                                                                                                                                                    |
| <b>8 Teach the advanced skills of off-highway motorcycling</b>                                             | <p>8.1 Explain and demonstrate key points of technique or skill</p> <p>8.2 Outline the <b>sequence</b> or combination of skill to achieve effective or efficient results</p> <p>8.3 Identify different applications of skill or technique, and where it is applicable/not applicable</p> <p>8.4 Practice skills or techniques and observe clients in order to provide feedback</p> <p>8.5 Assess clients to determine poor or incorrect technique</p> <p>8.6 Provide opportunities for additional practice, where required</p>                                                                                                                                                                                                                                                                                             |

|                                                                                    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |
|------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>9 Communicate further off-highway motorcycling knowledge</b>                    | 9.1 Inform clients of locations, suitable to their skill level, for participating in off-highway motorcycling<br>9.2 Provide information relevant to the competencies being taught, on the range of <b>equipment</b> and clothing available or required, and factors affecting choice<br>9.3 Inform clients of opportunities to further develop their personal skills and knowledge                                                                                                                                                                                                                                                                                                                                                                                                               |
| <b>10 Conclude and evaluate the off-highway motorcycling instructional session</b> | 10.1 Allow time for "cooling down" at the end of the session, check <b>equipment</b> for damage and return and store in an appropriate fashion<br>10.2 Determine the level of learning achieved directly through assessment or indirectly from Assessor<br>10.3 Apply feedback from Assessor or assessment to evaluate the effectiveness of the instructional activities, the suitability of the instructional method, the feedback provided to clients and the initial assessment of client's abilities<br>10.4 Evaluate the validity and reliability of assessment/evaluation tools used throughout the session to monitor learning<br>10.5 Determine modifications to activities and delivery method(s), based on evaluations<br>10.6 Evaluate the suitability of <b>other related factors</b> |

## Range Statements

The Range Statements provide advice to interpret the scope and context of this unit of competence, allowing for differences between enterprises and workplaces. The Range Statements relate to the unit as a whole and helps facilitate holistic assessment. In addition, the following variables may be present for this particular unit of competency:

| RANGE STATEMENT                                    | CATEGORIES                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |

## Evidence Guide

The Evidence Guide identifies the critical aspects, knowledge and skills to be demonstrated to confirm competence for this unit. This is an integral part of the assessment of competence and should be read in conjunction with the Range Statements.

|                                           |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |

| TRG              | Tour guiding           |

**DESCRIPTION:** This unit deals with the skills and knowledge which underpin effective performance as a guide. It covers key legal, ethical, safety and professional development issues that must be considered by guides in their day-to-day work. As such it underpins all other guiding units.

This unit underpins all other guiding units and combined training and assessment is appropriate.

This unit could also be assessed or trained as an extension of unit THTTCO01A Develop and update tourism industry knowledge.

| <b>ELEMENT</b>                                                           | <b>PERFORMANCE CRITERIA</b>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |
|--------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>1 Apply knowledge of the guiding sector</b>                           | 1.1 Conduct day-to-day guiding activities in a manner which takes account of the roles and responsibilities of different types of guides<br>1.2 Identify key guide information sources and contacts correctly<br>1.3 Use industry knowledge and guide networks to enhance the quality of guiding services provided to customers                                                                                                                                                                                          |
| <b>2 Guide tours according to legal, ethical and safety requirements</b> | 2.1 Conduct day-to-day guiding activities in accordance with the legal requirements governing the industry<br>2.2 Guide tours according to the general ethics of guiding and the specific ethical considerations for particular contexts<br>2.3 Guide tours according to safety requirements and in a manner which minimises risk to customers and colleagues<br>2.4 Guide tours in a manner that minimises any negative impact on the social or natural environment                                                     |
| <b>3 Develop guiding skills and knowledge</b>                            | 3.1 Identify and use opportunities to update the knowledge and skills required by guides<br>3.2 Identify and access sources of assistance and support for guides when required<br>3.3 Share knowledge with colleagues to enhance the quality of service provided to customers                                                                                                                                                                                                                                            |
| <b>4 Communicate with tourism industry operators in English</b>          | 4.1 Articulate information clearly using industry acceptable language<br>4.2 Achieve mutual understanding and agree on details relevant to guiding activities<br>4.3 Provide accurate information and explanations about customer requirements and any special requests<br>4.4 Communicate according to social, cultural and business requirements<br>4.5 Identify the nature and key facts of operational problems and provide an appropriate solution by consulting and openly communicating with the tourism operator |

## Range Statements

The Range Statements provide advice to interpret the scope and context of this unit of competence, allowing for differences between enterprises and workplaces. The Range Statements relate to the unit as a whole and helps facilitate holistic assessment. In addition, the following variables may be present for this particular unit of competency:

| RANGE STATEMENT                                                                       | CATEGORIES                                                                                                                                                                                                                                                                                                                                                                                                           |

## Evidence Guide

The Evidence Guide identifies the critical aspects, knowledge and skills to be demonstrated to confirm competence for this unit. This is an integral part of the assessment of competence and should be read in conjunction with the Range Statements.

|                                                      |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |

| <b>1 Conduct arrival transfers for visitor groups or individuals</b> | 1.1 Check and note customer arrival information accurately, and implement promptly any action required to deal with alterations in schedule or delays<br>1.2 Confirm transport for the correct time and place with transport supplier<br>1.3 Employ identification techniques which allow customers to locate the guide at the transport terminal<br>1.4 Use available terminal facilities correctly and fully to assist in meeting customers<br>1.5 Write passenger lists accurately and legibly to record arrivals, no-shows and other comments<br>1.6 Establish and monitor arrangements for the transport of baggage from the terminal prior to the arrival of the customer<br>1.7 Use checking procedures to ensure the correct number of baggage pieces is transported<br>1.8 Follow established procedures for lost baggage promptly and correctly                                                                                                                                                               |
| <b>2 Deliver arrival information to visitors</b>                     | 2.1 Greet customers in a manner which encourages positive feelings of goodwill towards the guide, the company, Australia in general and the region<br>2.2 Provide customers with correct and adequate information and advice to introduce them to the local area                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |
| <b>3 Check in groups and individuals at accommodation</b>            | 3.1 Brief customers on accommodation check-in procedures to minimise confusion and time delay on arrival at accommodation venue<br>3.2 Offer customers friendly and efficient assistance to facilitate accommodation check-in<br>3.3 Liaise with accommodation staff during check-in to minimise any communication difficulties between customers and accommodation staff                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |
| <b>4 Conduct departure transfers for groups and individuals</b>      | 4.1 Verify departure details with carriers prior to commencement of transfer, and take action according to a contingency plan if changes in schedule or other problems occur<br>4.2 Organise customers for departure from hotel in a manner which minimises disruption in the hotel lobby<br>4.3 Use passenger lists to accurately check details of all departing passengers<br>4.4 Check baggage prior to departure using procedures that ensure that no items are left behind<br>4.5 Advise customers to check belongings for hotel keys, items left in hotel safety deposit boxes, tickets and passports<br>4.6 Advise customers correctly regarding procedures for departure tax, duty free requirements, outgoing passenger cards and general procedures which apply to the company<br>4.7 Obtain feedback on products and services courteously from customers and relay information accurately to the company<br>4.8 Employ correct procedures to facilitate orderly and efficient check in at transport terminal |

## Range Statements

The Range Statements provide advice to interpret the scope and context of this unit of competence, allowing for differences between enterprises and workplaces. The Range Statements relate to the unit as a whole and helps facilitate holistic assessment. In addition, the following variables may be present for this particular unit of competency:

| RANGE STATEMENT                            | CATEGORIES                                                                                                                                                                                                                                                                                                                                                                                                                                        |

| <b>Context for assessment</b>     | <ul style="list-style-type: none"> <li>• This unit of competency must be assessed in the context of a sport or recreation activity. For valid and reliable assessment the sport or recreation activity should closely replicate the work environment. The environment should be safe with the hazards, circumstances and equipment likely to be encountered in a real workplace</li> <li>• Assessment must ensure <ul style="list-style-type: none"> <li>○ demonstration of skills within fully operational transport terminals and accommodation venues (In major cities this would include international and domestic airports, rail terminal, shipping terminals and coach terminals; in regional areas, only some of these may apply)</li> </ul> </li> <li>• This unit of competency should be assessed through the observation of processes and procedures, oral and/or written questioning on underpinning knowledge and skills and consideration of required attitudes</li> <li>• Where performance is not directly observed and/or is required to be demonstrated over a 'period of time' and/or in a 'number of locations', any evidence should be authenticated by colleagues, supervisors, clients or other appropriate persons</li> <li>• Assessment methods must be chosen to ensure that the conduct of arrival and departure transfers can be practically demonstrated. Methods must include assessment of knowledge as well as assessment of practical skills. The following examples are appropriate for this unit <ul style="list-style-type: none"> <li>○ direct observation of a complete arrival or departure transfer conducted by the candidate</li> <li>○ review of documentation such as passenger lists and baggage checklists used by the candidate</li> <li>○ written or oral questions to assess knowledge of transport terminals, baggage procedures and travel documentation</li> <li>○ review of portfolios of evidence and third party workplace reports of on-the-job performance by the candidate</li> </ul> </li> </ul> |

| KEY COMPETENCIES                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |                                 |                            |                             |                                     |                |                |

**DESCRIPTION:** This unit deals with the skills and knowledge required to research information on Australia for presentation to customers. It includes the requirement for sound general knowledge of Australia and the local region and highlights the need for ongoing research to update and expand the guide's knowledge. The more detailed and specialised skills and knowledge relating to cultural/heritage sites and natural environments are found in other units.

The essential knowledge base for this unit will vary according to local industry needs, and it is vital that any training take account of these. Funding and hours allocated to training must reflect the breadth and depth of knowledge required to meet the specific requirements of local tourism industry employers.

| ELEMENT                                                             | PERFORMANCE CRITERIA                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |

| <b>1 Research information on Australia and the local region</b>     | 1.1 Identify subjects of potential customer interest based on direct contact with customers and consultation with industry colleagues<br>1.2 Identify correctly the key information sources frequently used by guides<br>1.3 Evaluate the credibility and reliability of information sources<br>1.4 Select and use <b>informal and formal research techniques</b> appropriately to access current, accurate and relevant information about Australia and the local region<br>1.5 Obtain information in a culturally appropriate way |
| <b>2 Prepare information for guiding activities</b>                 | 2.1 Create and update accurate <b>personal reference materials</b> using a filing system that allows quick and efficient access<br>2.2 Organise information to reflect the needs of customers and the way in which information may be presented during a guiding activity<br>2.3 Identify themes and messages from research to meet specific customer needs                                                                                                                                                                         |
| <b>3 Update general knowledge of Australia and the local region</b> | 3.1 Identify and use opportunities to maintain the currency of general knowledge about Australia and the local region<br>3.2 Incorporate updated knowledge into guiding activities regularly and in a culturally appropriate way                                                                                                                                                                                                                                                                                                    |

## Range Statements

The Range Statements provide advice to interpret the scope and context of this unit of competence, allowing for differences between enterprises and workplaces. The Range Statements relate to the unit as a whole and helps facilitate holistic assessment. In addition, the following variables may be present for this particular unit of competency:

| RANGE STATEMENT                                                                                 | CATEGORIES                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |

## Evidence Guide

The Evidence Guide identifies the critical aspects, knowledge and skills to be demonstrated to confirm competence for this unit. This is an integral part of the assessment of competence and should be read in conjunction with the Range Statements.

|                                                      |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |

| TRG       | Tour guiding                  |

**DESCRIPTION:** This unit deals with the skills and knowledge required by guides to conduct a tour which includes multiple products, services and sites. It requires the application of significant planning and organisational skills plus the ability to liaise with suppliers and industry colleagues to maximise tour efficiency and customer's service quality.

This unit has linkages to all other guiding units and combined assessment and/or training would be appropriate with those units. Examples include THTFTG05B Lead tour groups and THTFTG11B Manage extended touring programs.

| <b>1 Plan tour operation</b>             | 1.1 Plan operation of the tour in accordance with <b>briefing information or documentation</b> from the tour operator<br>1.2 Identify and assess <b>risks</b> associated with the tour and develop appropriate responses to address these<br>1.3 Make tour preparations to meet specific customer needs<br>1.4 Prioritise and action tasks required for tour preparation and conduct in advance of tour commencement                                                                                                                                                                                                                                                                                                                                               |
| <b>2 Brief and assist customers</b>      | 2.1 Welcome customers to the tour and provide an accurate briefing on <b>tour practicalities and procedures</b><br>2.2 Provide <b>additional information and assistance</b> to customers to enhance enjoyment of the tour                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |
| <b>3 Liaise with industry colleagues</b> | 3.1 Liaise with <b>industry colleagues</b> to achieve smooth operation of the tour<br>3.2 Action requests from industry colleagues promptly and willingly wherever possible<br>3.3 Request assistance politely when required<br>3.4 Make agreements about individual and joint responsibilities during the tour<br>3.5 Make forward confirmations and bookings with suppliers in an accurate and timely manner<br>3.6 Interpret documentation from other organisations correctly and apply appropriately                                                                                                                                                                                                                                                           |
| <b>4 Manage the itinerary</b>            | 4.1 Conduct the tour to schedule and include all features as set down in the itinerary<br>4.2 Advise customers courteously and sensitively about unavoidable changes to itinerary<br>4.3 Re-plan the itinerary promptly when necessary to ensure all purchased inclusions or their equivalents are delivered and disruption to customers is minimised<br>4.4 Advise industry colleagues and suppliers affected by changes promptly and according to company procedures<br>4.5 Maintain contact with those fixing the problem when itinerary delays occur and employ negotiation techniques to minimise time delay and negative impact on customers<br>4.6 Keep customers accurately informed of reasons for delays and the actions being taken to manage the delay |
| <b>5 Deals with unexpected events</b>    | 5.1 Implement contingency plans without delay when unexpected events occur<br>5.2 Assess the situation and select appropriate action promptly<br>5.3 Follow company procedures strictly in the case of accidents or where safety                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |

|                        |                                                                                                                                                                                                                |
|------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                        | <p>of customers or colleagues may be threatened</p> <p>5.4 Identify and access sources of assistance promptly</p> <p>5.5 Amend tour to minimise impact on customer enjoyment</p>                               |
| <b>6 De-brief tour</b> | <p>6.1 Provide accurate and complete tour reports according to enterprise guidelines</p> <p>6.2 Provide accurate customer feedback and other information to the company to assist with future improvements</p> |

## Range Statements

The Range Statements provide advice to interpret the scope and context of this unit of competence, allowing for differences between enterprises and workplaces. The Range Statements relate to the unit as a whole and helps facilitate holistic assessment. In addition, the following variables may be present for this particular unit of competency:

| RANGE STATEMENT                                      | CATEGORIES                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |

## Evidence Guide

The Evidence Guide identifies the critical aspects, knowledge and skills to be demonstrated to confirm competence for this unit. This is an integral part of the assessment of competence and should be read in conjunction with the Range Statements.

| THTFTG05B | LEAD TOUR GROUPS |
|           |                  |
| TRG       | Tour guiding     |

**DESCRIPTION:** This unit deals with the skills and knowledge required to undertake the group co-ordination role played by the guide. It focuses on communication, leadership and conflict resolution skills with particular application to guiding activities. As such it has strong linkages to unit THHGCS03B Deal with conflict situations and some commonalities with unit THHGLE08B Lead and manage people.

This unit has linkages to all other guiding units and combined assessment and/or training would be appropriate especially with units such as THTFTG04B Co-ordinate and operate a tour and THTFTG11B Manage extended touring programs.

| ELEMENT                                       | PERFORMANCE CRITERIA                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |
|-----------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>1 Co-ordinate group movements</b>          | 1.1 Maintain the tour schedule wherever possible through effective communication with the group<br>1.2 Use techniques to promptly attract group attention when required<br>1.3 Advise the group sensitively and accurately about ways in which minimum disruption and disturbance can be caused to: other tour members, host communities, the environment; complete physical group movements in an orderly manner, checking group numbers at appropriate times<br>1.4 Advise customers of appropriate procedures if they become separated from the group<br>1.5 Provide instructions in a manner and pace appropriate to the particular group<br>1.6 Encourage customers to seek clarification of instructions where necessary |
| <b>2 Encourage group morale and goodwill</b>  | 2.1 Use <b>techniques to build group cohesion</b> during the tour<br>2.2 Balance the needs of individuals and the group in the conduct of the tour                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |
| <b>3 Deal with conflicts and difficulties</b> | 3.1 Assess potential for conflict promptly and take appropriate action to prevent and/or resolve the conflict<br>3.2 Take appropriate action to deal with difficult tour members<br>3.3 Respond to <b>conflicts and difficulties</b> in a manner likely to optimise the goodwill and morale of the group<br>3.4 Follow procedures for controlling drug or alcohol-affected customers according to company guidelines and legal requirements                                                                                                                                                                                                                                                                                    |

## Range Statements

The Range Statements provide advice to interpret the scope and context of this unit of competence, allowing for differences between enterprises and workplaces. The Range Statements relate to the unit as a whole and helps facilitate holistic assessment. In addition, the following variables may be present for this particular unit of competency:

| RANGE STATEMENT                           | CATEGORIES                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |

## Evidence Guide

The Evidence Guide identifies the critical aspects, knowledge and skills to be demonstrated to confirm competence for this unit. This is an integral part of the assessment of competence and should be read in conjunction with the Range Statements.

|                                                      |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |

|           |                                                     |
| TRG       | Tour guiding                                        |

**DESCRIPTION:** This unit deals with the skills and knowledge required to prepare and present commentaries and activities to customers. Its main focus is on the need to use effective interpretation and presentation techniques to ensure customer participation and enjoyment across multiple guiding contexts. This unit goes beyond the pure delivery of fully-scripted commentary and requires significant creative input. It has been merged with the previous unit THTFTG09A Present interpretive activities. The unit THTPPD05B Plan and develop interpretive activities is dedicated to the actual development of interpretive activities.

| ELEMENT                                                                   | PERFORMANCE CRITERIA                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |

| <b>1 Prepare commentaries or activities for presentation to customers</b> | 1.1 Select and organise appropriate information to meet the <b>needs of specific customers</b><br>1.2 Select or develop appropriate themes as a basis for <b>commentaries or activities</b><br>1.3 Construct commentaries or activities to maximise the potential for customer enjoyment and learning<br>1.4 Obtain, check and assemble all support materials in advance of the tour or activity                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |
| <b>2 Present commentaries or activities to customers</b>                  | 2.1 Use interpretive and presentation techniques to combine entertainment and learning to enhance the quality of the experiences for the customer<br>2.2 Use language appropriate to the customer group<br>2.3 Present current, accurate and relevant information in a logical order<br>2.4 Present information of appropriate depth and breath for specific customer needs<br>2.5 Present information in a manner which demonstrates cultural and social sensitivity<br>2.6 Use <b>equipment</b> correctly and identify and report any equipment defects promptly                                                                                                                                                                                                                                                                                                       |
| <b>3 Interact with customers</b>                                          | 3.1 Encourage customer participation within safety requirements through effective use of interpretive and presentation techniques<br>3.2 Invite questions and feedback from customers both during and at the conclusion of any activity or commentary<br>3.3 Answer questions courteously and correctly and, if required, involve the whole group by repetition of the questions and delivery of answers audible to all<br>3.4 Offer to supply the answer at a future time or refer the customer to other information sources where the answer to a question is unknown<br>3.5 Maintain communication with appropriate colleagues as required by specific tour or activity circumstances<br>3.6 Implement contingency plans without delay when <b>unexpected events</b> occur and amend presentation format, order or structure to minimise impact on customer enjoyment |

## Range Statements

The Range Statements provide advice to interpret the scope and context of this unit of competence, allowing for differences between enterprises and workplaces. The Range Statements relate to the unit as a whole and helps facilitate holistic assessment. In addition, the following variables may be present for this particular unit of competency:

| RANGE STATEMENT                        | CATEGORIES                                                                                                                                                                                                                                                                                                                                                                                                    |

## Evidence Guide

The Evidence Guide identifies the critical aspects, knowledge and skills to be demonstrated to confirm competence for this unit. This is an integral part of the assessment of competence and should be read in conjunction with the Range Statements.

|                                                      |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |

|           |                                  |
| TRG       | Tour guiding                     |

**DESCRIPTION:** This unit deals with the skills and knowledge required to manage and co-ordinate an extended touring program of more than one day's duration. It applies to those who lead extended tours both within Australia and overseas.

The name of the person who manages extended touring varies according to the industry sector and business, for example tour manager, guide, tour escort.

| ELEMENT                                     | PERFORMANCE CRITERIA                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |
|---------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>1 Manage touring arrangements</b>        | 1.1 Conduct <b>touring program</b> according to the agreed itinerary<br>1.2 Re-confirm <b>operational details</b> progressively throughout the program<br>1.3 <b>Re-organise and adjust touring arrangements</b> when required within the scope of individual responsibility<br>1.4 Make major adjustments within budget according to controlling office guidelines<br>1.5 Make <b>adjustments to touring arrangements</b> in the context of the whole program<br>1.6 Maintain ongoing contact with controlling office and forward supplies as required                                                                                                                                                                                                                                                                                                                                               |
| <b>2 Liaise and negotiate with others</b>   | 2.1 Maximise operational efficiency and customer service level by effective <b>liaison and negotiate</b> with all those who contribute to the operation of the program<br>2.2 Conduct negotiations in a businesslike and professional manner within the relevant cultural context<br>2.3 Conduct negotiations in the context of the entire touring program<br>2.4 Conduct negotiations to take account of the overall relationship between the organisation and the other party<br>2.5 Select communication/negotiation style appropriate to the circumstance<br>2.6 Use negotiation and communication techniques to maximise the chances of an acceptable outcome for all parties<br>2.7 Note and confirm accurately in writing all agreements as required by specific circumstances<br>2.8 Provide relevant information to the controlling office promptly and as required by enterprise guidelines |
| <b>3 Develop and maintain group rapport</b> | 3.1 Develop and maintain a team spirit for the duration of the program<br>3.2 Gain the trust and confidence of the group through the demonstration of professional competence and integrity<br>3.3 Use leadership and communication skills to foster group cohesion<br>3.4 Encourage customer participation and group interaction<br>3.5 Identify and assess potential conflict within the group promptly, and take appropriate action to resolve the issue(s)                                                                                                                                                                                                                                                                                                                                                                                                                                        |
| <b>4 Solve problems which arise on tour</b> | 4.1 Identify and consider <b>problems</b> promptly from both an operational and customer service perspective in the context of the entire touring program<br>4.2 Initiate short-term action to resolve the immediate problem where appropriate<br>4.3 Analyse problems for any long-term commercial impact and assess and action potential solutions<br>4.4 Present a positive image of the organisation and its contracted suppliers at all times<br>4.5 Take responsibility for resolving the problem within the scope of individual                                                                                                                                                                                                                                                                                                                                                                |

|  |                                                                                                                                                                                                                            |
|--|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|  | <p>authority, and consult the controlling office where appropriate</p> <p>4.6 Consult the controlling office as required</p> <p>4.7 Take appropriate follow-up action to monitor the effectiveness of chosen solutions</p> |

## Range Statements

The Range Statements provide advice to interpret the scope and context of this unit of competence, allowing for differences between enterprises and workplaces. The Range Statements relate to the unit as a whole and helps facilitate holistic assessment. In addition, the following variables may be present for this particular unit of competency:

| RANGE STATEMENT                                             | CATEGORIES                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |

## Evidence Guide

The Evidence Guide identifies the critical aspects, knowledge and skills to be demonstrated to confirm competence for this unit. This is an integral part of the assessment of competence and should be read in conjunction with the Range Statements.

|                                                      |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |

| <b>1 Prepare product development plans</b>        | 1.1 Undertake <b>product development</b> within the context of the overall business plan and marketing focus of the enterprise<br>1.2 Identify product development opportunities based on review of the market place and customer needs<br>1.3 Incorporate input from both internal colleagues and external stakeholders in the planning process<br>1.4 Incorporate market research into the planning process<br>1.5 Evaluate the requirements of different customers including those with special needs in planning<br>1.6 Consider issues relating to product life cycles in the planning process<br>1.7 Include budgetary and cash flow planning issues<br>1.8 Assess cost effectiveness and profitability of product development<br>1.9 Incorporate feasibility studies as appropriate<br>1.10 Review external issues that impact on product development in the planning process including: legal and liability issues, environmental considerations, cultural considerations, general industry trends<br>1.11 Consult with all <b>key stakeholders and communities</b> as part of the planning process<br>1.12 Include clear, scheduled courses of action and evaluation criteria within the plan |
| <b>2 Implement product development plans</b>      | 2.1 Communicate the objectives and contents of product development plans in a timely fashion to all appropriate colleagues and customers<br>2.2 Implemented actions according to agreed timeframes<br>2.3 Where appropriate, test new products and services in the marketplace prior to full implementation                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |
| <b>3 Monitor and evaluate product development</b> | 3.1 Monitor product development initiatives in terms of: progress against agreed objectives, schedule and evaluation criteria, response in the marketplace, feedback from the distribution network, feedback from staff, changes in the internal or external environment which may impact on plans, cost effectiveness and profitability<br>3.2 Identify and action changes required in a timely manner<br>3.3 Communicate changes to all relevant colleagues and customers                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |

## Range Statements

The Range Statements provide advice to interpret the scope and context of this unit of competence, allowing for differences between enterprises and workplaces. The Range Statements relate to the unit as a whole and helps facilitate holistic assessment. In addition, the following variables may be present for this particular unit of competency:

| RANGE STATEMENT                          | CATEGORIES                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |

**DESCRIPTION:** This unit deals with the skills and knowledge required to research and package tourism products to meet the needs of particular markets of customers. It builds on the basic skills found in the State/Office Operations units and focuses on the ability to create, tailor and cost packages that may include complex itineraries or a wide range of products. This function would generally be undertaken by a product manager, senior consultant or senior co-ordinator.

| ELEMENT                   | PERFORMANCE CRITERIA                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |

## Range Statements

The Range Statements provide advice to interpret the scope and context of this unit of competence, allowing for differences between enterprises and workplaces. The Range Statements relate to the unit as a whole and helps facilitate holistic assessment. In addition, the following variables may be present for this particular unit of competency:

| RANGE STATEMENT                                                                      | CATEGORIES                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |

## Evidence Guide

The Evidence Guide identifies the critical aspects, knowledge and skills to be demonstrated to confirm competence for this unit. This is an integral part of the assessment of competence and should be read in conjunction with the Range Statements.

**DESCRIPTION:** This unit deals with the skills and knowledge required to undertake the strategic planning of ecologically sustainable tourism operations. Managers in the areas of Operations, Marketing and Product Development or General Management would generally undertake this role.

| ELEMENT                                                                    | PERFORMANCE CRITERIA                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |
|----------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>1 Plan for ecologically sustainable tourism operations</b>              | 1.1 Include an evaluation of the relationship between tourism and the environment in the planning process<br>1.2 Develop strategies to balance ecological sustainability and economic viability<br>1.3 Incorporate the need for a return (economic or social) to the local community<br>1.4 Conduct site evaluations prior to the decisions to commence the operation<br>1.5 Investigate and incorporate <b>methods of managing tourism impacts</b> and protecting vulnerable sites into the planning process<br>1.6 Consult all <b>stakeholders</b> and incorporate their view into the planning process<br>1.7 Take account of all information made available by the planning process in development decisions |
| <b>2 Develop and implement ecologically sustainable tourism operations</b> | 2.1 Establish and integrate best practice environmental standards in the operation<br>2.2 Identify and use appropriate technology for environmental best practice<br>2.3 Develop environmentally-friendly codes of practice for customers and colleagues<br>2.4 Conduct operations according to ecologically sustainable practices and in accordance with eco-tourism codes of practice<br>2.5 Promote environmental awareness within the tourism industry and to customers                                                                                                                                                                                                                                      |
| <b>3 Monitor environmental impact of operations</b>                        | 3.1 Monitor and assess environmental impacts as part of a regular management reviews<br>3.2 Initiate appropriate follow-up action based on assessment of environmental impacts<br>3.3 Develop and implement courses of action and systems to limit negative impacts and damage                                                                                                                                                                                                                                                                                                                                                                                                                                   |

## Range Statements

The Range Statements provide advice to interpret the scope and context of this unit of competence, allowing for differences between enterprises and workplaces. The Range Statements relate to the unit as a whole and helps facilitate holistic assessment. In addition, the following variables may be present for this particular unit of competency:

| RANGE STATEMENT                            | CATEGORIES                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |

## Evidence Guide

The Evidence Guide identifies the critical aspects, knowledge and skills to be demonstrated to confirm competence for this unit. This is an integral part of the assessment of competence and should be read in conjunction with the Range Statements.

|                                                      |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |

**DESCRIPTION:** This unit deals with the skills and knowledge required to plan culturally appropriate tourism operations. The unit applies to all tourism operations and is particularly relevant for operations that involve substantial cultural content, the inclusion of visits to culturally sensitive sites or a high level of interaction between people of different cultures. Managers in the areas of operations, marketing and product development or general management would generally undertake this role.

| ELEMENT                                                                  | PERFORMANCE CRITERIA                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |

| <b>1 Plan for culturally appropriate tourism operations</b>              | 1.1 Identify <b>cultural issues</b> at the commencement of the planning process<br>1.2 Consult individuals and communities in relation to cultural issues which may affect the operation<br>1.3 Consider economic and social impacts in the planning process<br>1.4 Develop strategies to balance economic viability and cultural appropriateness<br>1.5 Consider economic returns to local <b>communities</b><br>1.6 Investigate and develop ways of managing and minimising negative tourism impacts and maximising positive impacts<br>1.7 Take account of all information made available by the planning process including the need for culturally appropriate operations in developing products                                                                                                                                                                                                              |
| <b>2 Develop and implement culturally appropriate tourism operations</b> | 2.1 Develop <b>codes of practice and procedures</b> for customers and colleagues which show respect for cultural values<br>2.2 Conduct operations in accordance with codes of practice<br>2.3 Encourage operational participation of individuals from the appropriate culture<br>2.4 Ensure that all customer activities are culturally appropriate<br>2.5 Share information with customers which is culturally appropriate, accurate and avoids cultural stereotyping<br>2.6 Consider copyright and intellectual property issues<br>2.7 Educate colleagues about other cultures and societies<br>2.8 Encourage culturally appropriate behaviours throughout the organisation and with customers<br>2.9 Promote the need for culturally appropriate behaviour throughout the organisation and with customers<br>2.10 Use promotional and other materials to inform colleagues and customers about cultural issues |
| <b>3 Monitor operations</b>                                              | 3.1 Monitor the standard of operations to ensure culturally appropriate practices are maintained<br>3.2 Conduct regular consultation with individuals and local communities as appropriate<br>3.3 Deal with issues promptly and consider changes to continually improve organisation practices                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |

## Range Statements

The Range Statements provide advice to interpret the scope and context of this unit of competence, allowing for differences between enterprises and workplaces. The Range Statements relate to the unit as a whole and helps facilitate holistic assessment. In addition, the following variables may be present for this particular unit of competency:

| RANGE STATEMENT                                                    | CATEGORIES                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |

## Evidence Guide

The Evidence Guide identifies the critical aspects, knowledge and skills to be demonstrated to confirm competence for this unit. This is an integral part of the assessment of competence and should be read in conjunction with the Range Statements.

|                                                      |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |

**DESCRIPTION:** This unit deals with the skills and knowledge required to access and interpret specific tourism product information. Tourism personnel need to correctly interpret product information to fulfil a range of sales and operational activities such as selling tourism products and issuing documentation. This unit does not cover detailed interpretation of airfare information.

| ELEMENT                                          | PERFORMANCE CRITERIA                                                                                                                                                                                                                                                                                                                                                                                                                                    |
|--------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>1 Identify and access product information</b> | 1.1 Identify and access <b><i>sources of product information</i></b><br>1.2 Select appropriate sources in accordance with enterprise policy, commercial agreements and specific needs<br>1.3 Source <b><i>specific product information</i></b> to meet the particular sales or operational need                                                                                                                                                         |
| <b>2 Interpret product information</b>           | 2.1 Interpret general and/or brochure information and apply this to meet the particular sales or operational need<br>2.2 Interpret <b><i>specific details about the product</i></b> and accurately apply this to meet the particular sales or operational need<br>2.3 Interpret any <b><i>special jargon or specifications</i></b> used in product information and accurately apply this to meet the <b><i>particular sales or operational need</i></b> |

## Range Statements

The Range Statements provide advice to interpret the scope and context of this unit of competence, allowing for differences between enterprises and workplaces. The Range Statements relate to the unit as a whole and helps facilitate holistic assessment. In addition, the following variables may be present for this particular unit of competency:

| RANGE STATEMENT                           | CATEGORIES                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |

## Evidence Guide

The Evidence Guide identifies the critical aspects, knowledge and skills to be demonstrated to confirm competence for this unit. This is an integral part of the assessment of competence and should be read in conjunction with the Range Statements.

|                                                      |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |
