**DESCRIPTION:** This unit deals with the skills and knowledge required to calculate the costs of products and services accurately and to present quotations to customers. This unit applies to many sales staff across multiple tourism sectors including travel consultants, reservation sales agents and event co-ordinators or managers. Generally, this unit relates to the provision of quotations for products and services where some costing and pricing has already been undertaken in the product development phase.

| ELEMENT                                           | PERFORMANCE CRITERIA                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |

| <b>1 Calculate costs of products and services</b> | 1.1 Create <b>records</b> to administer the <b>customer's</b> details and requirements<br>1.2 Source and accurately select and interpret product and costing information<br>1.3 If required, negotiate costs with suppliers in accordance with commercial agreements and relationships and level of responsibility held within the enterprise<br>1.4 Calculate commissions or mark up net costs in accordance with enterprise procedures and requirements to determine selling price<br>1.5 Accurately calculate any additional taxes, special fees and other charges<br>1.6 Accurately calculate any required currency conversions<br>1.7 Accurately calculate the final cost to the customer<br>1.8 Check all calculations and keep detailed and legible records of the method of calculation, in accordance with enterprise formats |
| <b>2 Provide quotations to customer</b>           | 2.1 Provide accurate quotations to customers in accordance with enterprise procedures and formats<br>2.2 Offer options with secondary quotations, as appropriate<br>2.3 Ensure that all quotations include accurate details on the following: inclusions and exclusions, payment requirements, general conditions and rules, date of current quote, life/expiry date of quotation<br>2.4 Record all details of the quotation accurately and legible and keep on file in accordance with enterprise procedures                                                                                                                                                                                                                                                                                                                          |
| <b>3 Update and amend quotations</b>              | 3.1 Adjust and update <b>quotations</b> to take account of changed requests or arrangements<br>3.2 Provide the most up-to-date quote to customers and ensure they are aware of the currency of the quote<br>3.3 Record all details of adjusted quotes and keep on file in accordance with enterprise procedures                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |

## Range Statements

The Range Statements provide advice to interpret the scope and context of this unit of competence, allowing for differences between enterprises and workplaces. The Range Statements relate to the unit as a whole and helps facilitate holistic assessment. In addition, the following variables may be present for this particular unit of competency:

| RANGE STATEMENT | CATEGORIES                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |

## Evidence Guide

The Evidence Guide identifies the critical aspects, knowledge and skills to be demonstrated to confirm competence for this unit. This is an integral part of the assessment of competence and should be read in conjunction with the Range Statements.

|                                                      |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |

**DESCRIPTION:** This unit has been developed for the Outdoor Recreation Industry Training Package.

This unit covers the knowledge and skills to use single rope techniques and mechanical advantage systems to perform self-rescue and the rescue of others in uncomplicated single pitch vertical contexts. It does not include the selection or assessment of the anchor.

| ELEMENT                                                          | PERFORMANCE CRITERIA                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |

| <b>1 Ascend and descend a pitch using single rope techniques</b> | 1.1 Select <b>equipment</b> and <b>resources</b> to ascend and descend a rope pitch<br>1.2 Demonstrate use of <b>equipment</b> in accordance with manufacturer's specifications to ensure that design limits are not exceeded<br>1.3 <b>Rig</b> a rope to minimise the <b>effects of rope stretch</b> and <b>significant rub points</b> and to allow for efficient ascent/descent<br>1.4 Establish <b>personal safety systems</b><br>1.5 Ascend a fixed rope in a time efficient manner, demonstrating the ability to <b>tune the single rope technique rig</b> according to requirements<br>1.6 Descend a fixed rope, demonstrating appropriate procedures and techniques<br>1.7 Maintain personal safety whilst performing changeovers from ascending to descending and descending to ascending |
| <b>2 Negotiate simple obstacles to self-rescue</b>               | 2.1 Assess the situation and identify suitable <b>obstacle avoidance/extrication procedures</b><br>2.2 Carry out procedures whilst maintaining adequate personal safety measures                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |
| <b>3 Establish and use mechanical advantage systems</b>          | 3.1 Identify <b>contexts requiring the use of mechanical advantage systems</b><br>3.2 Determine the type of system required after consideration of contextual issues<br>3.3 Establish operational systems to raise and lower a person or <b>equipment</b><br>3.4 Establish the system ensuring the safety of operators, the rescuee and others<br>3.5 Demonstrate use of <b>equipment</b> in a safe and effective manner in the system and in accordance with manufacturer's recommendations to ensure that design limits are not exceeded                                                                                                                                                                                                                                                        |
| <b>4 Perform vertical rescues</b>                                | 4.1 Demonstrate and justify an appropriate rescue <b>relevant techniques to assist abseiler</b> according to a set of given rescue <b>circumstances</b><br>4.2 Demonstrate an escape from a belay<br>4.3 Establish a rescue system efficiently and inform other group members of their role(s)<br>4.4 Construct and demonstrate the use of an improvised <b>harness</b> in a rescue situation<br>4.5 Operate a rescue system, demonstrating lowering and raising procedures to recover a conscious person in a single pitch situation (with assistance)                                                                                                                                                                                                                                           |

## Range Statements

The Range Statements provide advice to interpret the scope and context of this unit of competence, allowing for differences between enterprises and workplaces. The Range Statements relate to the unit as a whole and helps facilitate holistic assessment. In addition, the following variables may be present for this particular unit of competency:

| RANGE STATEMENT                                               | CATEGORIES                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |

## Evidence Guide

The Evidence Guide identifies the critical aspects, knowledge and skills to be demonstrated to confirm competence for this unit. This is an integral part of the assessment of competence and should be read in conjunction with the Range Statements.

|                                                      |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |

| SROVTR002A | PERFORM COMPLEX VERTICAL RESCUES |
| VTR        | Vertical rescue                  |

**DESCRIPTION:** This unit has been developed for the Outdoor Recreation Industry Training Package.

This unit covers the knowledge and skills to rescue self and others in complex single and multi pitch vertical contexts. This unit only addresses specific vertical rescue competencies. It does not address generic competencies such as anchor selection.

| ELEMENT                                         | PERFORMANCE CRITERIA                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |
|-------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>1 Determine appropriate rescue technique</b> | 1.1 Identify immediate <b>hazards</b> to self and others<br>1.2 Assess risks to self and others<br>1.3 Assess the situation in terms of <b>hazards</b> , rescue abilities, degree of urgency, physical and human resources.<br>1.4 Select and co-ordinate a <b>rescue method</b> suitable to the situation<br>1.5 Communicate directions to other members of the group in an appropriate manner<br>1.6 Demonstrate an escape from the belay system whilst maintaining the safety of the participant (where necessary)                                                                                                                                                                                                                                                                                                                                                                                                                              |
| <b>2 Establish rescue system</b>                | 2.1 Identify <b>contexts</b> requiring the use of <b>mechanical advantage systems</b> and determine the type of system required after consideration of contextual issues<br>2.2 Establish operational systems to raise and lower a person or <b>equipment</b> , ensuring the safety of operators, the rescuee and others<br>2.3 Rig ropes efficiently for ascent or descent<br>2.4 Demonstrate use of <b>equipment</b> in a safe and effective manner in the system and in accordance with manufacturers recommendations to ensure that design limits are not exceeded                                                                                                                                                                                                                                                                                                                                                                             |
| <b>3 Perform vertical rescues</b>               | 3.1 Determine possible rescue techniques for individual situations and select the most appropriate technique for the degree of urgency, resources, rescuee status and ability and personal ability<br>3.2 Identify situations requiring approach from above or approach from below and apply correct approach procedures for the particular situation (as required) for <b>complex vertical rescues</b><br>3.3 Establish a rescue system efficiently and inform other group members of their role(s)<br>3.4 Construct and demonstrate the use of an improvised <b>harness</b> in a rescue situation<br>3.5 Operate a rescue system, demonstrating lowering and raising procedures, to recover conscious and unconscious persons in single and multi pitch situations (where relevant) with assistance from others who are unskilled in rescue techniques<br>3.6 Provide assistance to establish and use a system to rescue a person on a stretcher |

## Range Statements

The Range Statements provide advice to interpret the scope and context of this unit of competence, allowing for differences between enterprises and workplaces. The Range Statements relate to the unit as a whole and helps facilitate holistic assessment. In addition, the following variables may be present for this particular unit of competency:

| RANGE STATEMENT                 | CATEGORIES                                                                                                                                                                                                                                                                                                                                                              |

## Evidence Guide

The Evidence Guide identifies the critical aspects, knowledge and skills to be demonstrated to confirm competence for this unit. This is an integral part of the assessment of competence and should be read in conjunction with the Range Statements.

|                                                      |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |

| VTR        | Vertical rescue          |

**DESCRIPTION:** This unit has been developed for the Outdoor Recreation Industry Training Package.

This unit covers the knowledge and skills to instruct learners to achieve competencies in order to participate independently in a vertical rescue activity.

| ELEMENT                                                                        | PERFORMANCE CRITERIA                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |

| <b>1 Plan an instructional session for teaching vertical rescue skills</b>     | 1.1 Identify client needs and assess current competencies of group/individuals in order to determine the aims and objectives of the instructional session<br>1.2 Select a suitable site for the instructional session, based on an assessment of client needs, <b>hazards</b> , abilities and session aims<br>1.3 Plan appropriate instructional activities which will facilitate and enhance the learning process<br>1.4 Determine a suitable <b>sequence</b> of instruction<br>1.5 Access resources to conduct instructional activities, games and drills<br>1.6 Provide relevant pre-activity information to clients<br>1.7 Prepare contingency plans for instructional session to cope with inclement weather and other factors which may affect the ability to conduct the session<br>1.8 Conduct a risk assessment of the instructional activities and location and implement a risk management plan in accordance with the organisation's guidelines and operating procedures |
| <b>2 Select appropriate resources required to teach vertical rescue skills</b> | 2.1 Select and access <b>equipment</b> and <b>other resources</b> suitable for the instructional objectives<br>2.2 Select, fit and adjust <b>equipment</b> (where appropriate) to suit the needs of individual clients<br>2.3 Check all <b>equipment</b> to ensure compliance with occupational health and safety legislation, manufacturer's recommendations and/or operating procedures, and to ensure that it is in good working order<br>2.4 Check contents of first aid and repair kits to ensure their suitability to the location and activity<br>2.5 Arrange, where required, protective and/or safety clothing for each client                                                                                                                                                                                                                                                                                                                                              |
| <b>3 Introduce an instructional vertical rescue session</b>                    | 3.1 Communicate the <b>aim of the instructional session</b> to the clients<br>3.2 Encourage clients to seek clarification, information and feedback<br>3.3 Brief the clients on the safety practices, procedures and behaviour appropriate to the instructional session<br>3.4 Define activity boundaries/training area and/or clearly outline to the clients<br>3.5 Check clothing and footwear of clients for suitability to the session<br>3.6 Provide information on <b>equipment</b> selection, fitting or use where relevant to the instructional session's aims                                                                                                                                                                                                                                                                                                                                                                                                               |
| <b>4 Conduct an instructional vertical rescue session</b>                      | 4.1 Conduct "warm up"/introductory activities (where required) to reduce the risk of injury when client's are participating in physical activities<br>4.2 Monitor individual client's performance in instructional activities<br>4.3 Provide positive encouragement and/or feedback to each client at a suitable time to maintain a positive learning environment<br>4.4 Ensure instructional activity allows for repetition of skills<br>4.5 Evaluate instructional activities for effectiveness and implement modifications when required<br>4.6 Assess risks associated with the conduct of instructional activities constantly and remove, minimise or avoid <b>hazards</b> in accordance with risk management                                                                                                                                                                                                                                                                   |

|                                                                                       |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |
|---------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                                                                                       | <p>plan and instructional objectives.</p> <p>4.7 Monitor <b>equipment</b> usage, behaviour and location of clients in order to review safety</p> <p>4.8 Ensure personal competencies with respect to topics and skills within the instructional session are at a sufficient level to enable correct demonstration of skills, accurate provision of information and to engender the confidence of the client(s)</p> <p>4.9 Demonstrate how personal competencies enable emergency and non-routine situations to be dealt with in accordance with operating procedures</p>                                                                                                                                                                                                                 |
| <b>5 Apply appropriate teaching techniques for a vertical rescue session</b>          | <p>5.1 Communicate instructions and information clearly and concisely</p> <p>5.2 Perform demonstrations for clients (where required) with a high level of technical correctness and accurate description</p> <p>5.3 Break-down complex skills and techniques into component parts and describe with key teaching points</p> <p>5.4 Identify faults in technique and provide a variety of solutions, where relevant, to correct faults</p> <p>5.5 Provide adequate time for practice, following fault correction and feedback</p> <p>5.6 Explain activities, drills or techniques which may improve skills</p>                                                                                                                                                                            |
| <b>6 Teach required knowledge that applies to a vertical rescue activity</b>          | <p>6.1 Teach required knowledge, ethics, codes of behaviour, points of interest or principles relevant to vertical rescue and achievement of competency, in a manner which achieves interest and client understanding</p> <p>6.2 Instruct clients on factors to consider when planning for participation in vertical rescue</p> <p>6.3 Identify minimal impact practices appropriate to vertical rescue, and determine client level of understanding</p> <p>6.4 Outline specific aspects of <b>equipment</b> selection, use and care, to enable the client to achieve competency at the relevant level</p> <p>6.5 Explain communication systems and relevant calls or signals used whilst participating in vertical rescue, and determine client level of understanding in their use</p> |
| <b>7 Teach safety and rescue procedures appropriate to a vertical rescue activity</b> | <p>7.1 Instruct clients in appropriate emergency response procedures and techniques applicable to vertical rescue, and the level of competency required</p> <p>7.2 Explain the principles and practices of group management, in the context of emergency situations</p> <p>7.3 Teach clients industry standard safety practices relevant to vertical rescue</p> <p>7.4 Demonstrate rescue techniques specific to vertical rescue, and provide opportunities for practice</p> <p>7.5 Clarify the use and selection of specific emergency response <b>equipment</b> that should be carried, relevant to the level of competency</p> <p>7.6 Assess client's level of understanding via questioning techniques and/or formal assessment</p>                                                  |
| <b>8 Teach vertical rescue skills</b>                                                 | <p>8.1 Explain and demonstrate key points of technique or skill</p> <p>8.2 Outline the <b>sequence</b> or combination of skill to achieve effective or efficient results</p> <p>8.3 Identify different applications of skill or technique, and where it is applicable/not applicable</p> <p>8.4 Practice skills or techniques and observe clients in order to provide feedback</p> <p>8.5 Assess clients to determine poor or incorrect technique</p> <p>8.6 Provide opportunities for additional practice, where required</p>                                                                                                                                                                                                                                                           |
| <b>9</b>                                                                              | <p>9.1 Inform clients of locations, suitable to their skill level, for participating in</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |

|                                                                           |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |
|---------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Communicate further vertical rescue knowledge</b>                      | vertical rescue<br>9.2 Provide information relevant to the competencies being taught, on the range of <b>equipment</b> and clothing available or required, and factors affecting choice<br>9.3 Inform clients of opportunities to further develop their personal skills and knowledge                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |
| <b>10 Conclude and evaluate the vertical rescue instructional session</b> | 10.1 Allow time for "cooling down" at the end of the session, check <b>equipment</b> for damage and return and store in an appropriate fashion<br>10.2 Determine the level of learning achieved directly through assessment or indirectly from Assessor<br>10.3 Apply feedback from Assessor or assessment to evaluate the effectiveness of the instructional activities, the suitability of the instructional method, the feedback provided to clients and the initial assessment of client's abilities<br>10.4 Evaluate the validity and reliability of assessment/evaluation tools used throughout the session to monitor learning<br>10.5 Determine modifications to activities and delivery method(s), based on evaluations<br>10.6 Evaluate the suitability of <b>other related factors</b> |

## Range Statements

The Range Statements provide advice to interpret the scope and context of this unit of competence, allowing for differences between enterprises and workplaces. The Range Statements relate to the unit as a whole and helps facilitate holistic assessment. In addition, the following variables may be present for this particular unit of competency:

| RANGE STATEMENT                         | CATEGORIES                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |

## Evidence Guide

The Evidence Guide identifies the critical aspects, knowledge and skills to be demonstrated to confirm competence for this unit. This is an integral part of the assessment of competence and should be read in conjunction with the Range Statements.

|                                                      |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |

| <b>Context for assessment</b> | <ul style="list-style-type: none"><li>• For valid and reliable assessment this unit of competency must be assessed in the context of a vertical rescue activity with a range of clients (not peers), on natural surfaces</li><li>• The assessment context should include hazards (as identified in the Range Statements) and environmental conditions consistent with those that may foreseeably exist in the workplace. The assessment should be conducted with adequate risk management and safety processes in place</li><li>• Assessment of this unit of competence will usually include observation of processes and procedures, oral and/or written questioning on required knowledge and skills and consideration of required attitudes</li><li>• Where performance is not directly observed and/or is required to be demonstrated over a "period of time" and/or in a "number of locations", any evidence should be authenticated by colleagues, supervisors, clients or other appropriate persons</li></ul> |

| KEY COMPETENCIES                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |                                 |                            |                             |                                     |                |                |

| WWR        | White water rescue                      |

**DESCRIPTION:** This unit has been developed for the Outdoor Recreation Industry Training Package.

This unit deals with the knowledge and skills to respond safely and appropriately in white water in order to self-rescue.

| ELEMENT                                             | PERFORMANCE CRITERIA                                                                                                                                                                                                                                                                                                                                                                                          |
|-----------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>1 Demonstrate defensive swimming techniques</b>  | 1.1 Identify the potential <b>hazards</b> when swimming in white water<br>1.2 Adopt the correct body position to minimise injury following <b>craft</b> capsize                                                                                                                                                                                                                                               |
| <b>2 Demonstrate aggressive swimming techniques</b> | 2.1 Demonstrate the ability to set a ferry angle in order to reach the bank or eddy<br>2.2 Demonstrate breaking in and out of eddies in order to get to shore<br>2.3 Identify and demonstrate techniques to actively free oneself from river <b>hazards</b> in simulations<br>2.4 Demonstrate the ability to wade across a swift current of mid-thigh depth, alone and using support, in order to self rescue |
| <b>3 Demonstrate craft re-entry</b>                 | 3.1 Identify a variety of different re-entry techniques<br>3.2 Select a method of re-entry after consideration of physical ability, type of <b>craft</b> and <b>situational variances</b>                                                                                                                                                                                                                     |

## Range Statements

The Range Statements provide advice to interpret the scope and context of this unit of competence, allowing for differences between enterprises and workplaces. The Range Statements relate to the unit as a whole and helps facilitate holistic assessment. In addition, the following variables may be present for this particular unit of competency:

| RANGE STATEMENT              | CATEGORIES                                                                                                                                                                                                                                                                              |
|------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Craft</b>                 | [one category] <ul style="list-style-type: none"> <li>• rafts</li> <li>• canoes</li> <li>• kayaks</li> </ul>                                                                                                                                                                            |
| <b>Hazards</b>               | [three categories] <ul style="list-style-type: none"> <li>• stoppers</li> <li>• strainers</li> <li>• holes</li> <li>• rocks</li> <li>• waterfalls</li> <li>• manmade objects</li> <li>• weirs</li> <li>• sieves</li> <li>• undercuts</li> <li>• snags</li> <li>• wire fences</li> </ul> |
| <b>Situational variances</b> | [all categories] <ul style="list-style-type: none"> <li>• depth of water</li> <li>• current</li> <li>• imminent hazards</li> <li>• availability of assistance</li> </ul>                                                                                                                |

## Evidence Guide

The Evidence Guide identifies the critical aspects, knowledge and skills to be demonstrated to confirm competence for this unit. This is an integral part of the assessment of competence and should be read in conjunction with the Range Statements.

|                                                      |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |

| SROWWR002B | PERFORM WHITE WATER RESCUES AND RECOVERIES |
| WWR        | White water rescue                         |

**DESCRIPTION:** This unit has been developed for the Outdoor Recreation Industry Training Package.

This unit covers the knowledge and technical skills required to perform rescues and recoveries in routine, predictable situations in rafting or canoeing/kayaking activities on water up to Grade 3 standard.

| ELEMENT                                                                     | PERFORMANCE CRITERIA                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |
|-----------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>1 Determine appropriate rescue/recovery technique</b>                    | 1.1 Identify immediate <b>hazards</b> to self and others<br>1.2 Assess <b>risks</b> to self and others<br>1.3 Assess the situation in terms of <b>hazards</b> , rescue abilities, degree of urgency, <b>physical</b> and human <b>resources</b><br>1.4 Select a <b>rescue/recovery method</b> suitable to the situation<br>1.5 Communicate rescue/recovery plan to those assisting                                                                                                                                                                                                                                                              |
| <b>2 Demonstrate the necessary skills to perform rescues and recoveries</b> | 2.1 Demonstrate using a reach technique to perform a rescue<br>2.2 Throw resources such as throw bags and rope coils in a manner to reach a swimmer in moving water<br>2.3 Demonstrate towing techniques in moving water<br>2.4 Demonstrate safe contact methods to rescue and transport a swimmer<br>2.5 Demonstrate methods to <b>tether a craft</b> in order to perform a rescue or recovery, where appropriate<br>2.6 Demonstrate a range of <b>methods to release entrapments</b> , suitable to the situations, to release an <b>entrapment</b><br>2.7 Communicate directions to other members of the rescue team in an appropriate manner |
| <b>3 Use mechanical advantage systems to perform rescues/recoveries</b>     | 3.1 Identify <b>situations requiring the use of a mechanical advantage system</b> and establish the type of system required after consideration of <b>contextual issues</b><br>3.2 Establish <b>mechanical advantage systems</b> and use equipment in a safe and effective manner in accordance with manufacturer's specifications to ensure that design limits are not exceeded<br>3.3 Modify, where necessary, the system to increase efficiency<br>3.4 Establish appropriate <b>mechanical advantage systems</b> to perform rescues and recoveries in a range of situations and maintain adequate <b>communication</b> throughout            |

## Range Statements

The Range Statements provide advice to interpret the scope and context of this unit of competence, allowing for differences between enterprises and workplaces. The Range Statements relate to the unit as a whole and helps facilitate holistic assessment. In addition, the following variables may be present for this particular unit of competency:

| RANGE STATEMENT                     | CATEGORIES                                                                                                                                                                                                                                                             |

## Evidence Guide

The Evidence Guide identifies the critical aspects, knowledge and skills to be demonstrated to confirm competence for this unit. This is an integral part of the assessment of competence and should be read in conjunction with the Range Statements.

|                                                      |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |

| SROWWR003B | PERFORM A COMPREHENSIVE RANGE OF WHITE WATER RESCUES AND RECOVERIES |
| WWR        | White water rescue                                                  |

**DESCRIPTION:** This unit has been developed for the Outdoor Recreation Industry Training Package.

This unit deals with the knowledge and technical skills to perform rescues and recoveries in complex and non-predicable situations in rafting and canoeing/kayaking activities on water up to Grade 4 standard.

| ELEMENT                                                                     | PERFORMANCE CRITERIA                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |
|-----------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>1 Determine appropriate rescue/recovery technique</b>                    | 1.1 Identify immediate <b>hazards</b> to self and others<br>1.2 Assess <b>risks</b> to self and others<br>1.3 Assess the situation in terms of <b>hazards</b> , rescue abilities, degree of urgency, human and <b>physical resources</b><br>1.4 Select and coordinate a <b>rescue/recovery method</b> suitable to the situation<br>1.5 Communicate recovery/rescue plan to those assisting                                                                                                                                                                                                                                                                      |
| <b>2 Demonstrate the necessary skills to perform rescues and recoveries</b> | 2.1 Demonstrate using a reaching technique to perform a rescue<br>2.2 Throw <b>resources</b> such as throw bags and rope coils in a manner to reach a swimmer in moving water<br>2.3 Demonstrate towing techniques in moving water<br>2.4 Demonstrate safe contact methods to rescue and transport a swimmer<br>2.5 Demonstrate a variety of methods to <b>tether a craft</b> in order to perform a rescue or recovery, where appropriate<br>2.6 Demonstrate a range of <b>methods to release entrapments</b> , suitable to the situations, to release an entrapment<br>2.7 Communicate directions to other members of the rescue team in an appropriate manner |
| <b>3 Use mechanical advantage systems to perform rescues/recoveries</b>     | 3.1 Identify <b>situations requiring the use of a mechanical advantage system</b> and establish the type of system required after consideration of <b>contextual issues</b><br>3.2 Establish <b>mechanical advantage systems</b> and use equipment in a safe and effective manner in accordance with manufacturer's specifications to ensure that design limits are not exceeded<br>3.3 Modify, where necessary, the system to increase efficiency<br>3.4 Establish appropriate <b>mechanical advantage systems</b> to perform rescues and recoveries in a range of situations and maintain adequate <b>communication</b> throughout                            |

## Range Statements

The Range Statements provide advice to interpret the scope and context of this unit of competence, allowing for differences between enterprises and workplaces. The Range Statements relate to the unit as a whole and helps facilitate holistic assessment. In addition, the following variables may be present for this particular unit of competency:

| RANGE STATEMENT                     | CATEGORIES                                                                                                                                                                                                                                                             |

## Evidence Guide

The Evidence Guide identifies the critical aspects, knowledge and skills to be demonstrated to confirm competence for this unit. This is an integral part of the assessment of competence and should be read in conjunction with the Range Statements.

|                                                      |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |

| SROWWR004A | INSTRUCT WHITE WATER RESCUE |
| WWR        | White water rescue          |

**DESCRIPTION:** This unit has been developed for the Outdoor Recreation Industry Training Package.

This unit covers the knowledge and skills to instruct learners to achieve competencies in order to participate independently, or with minimal supervision, in a white water rescue activity.

| ELEMENT                                                                           | PERFORMANCE CRITERIA                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |

| <b>1 Plan an instructional session for teaching white water rescue skills</b>     | 1.1 Identify client needs and assess current competencies of group/individuals in order to determine the aims and objectives of the instructional session<br>1.2 Select a suitable site for the instructional session, based on an assessment of client needs, <b>hazards</b> , abilities and session aims<br>1.3 Plan appropriate instructional activities which will facilitate and enhance the learning process<br>1.4 Determine a suitable <b>sequence</b> of instruction<br>1.5 Access resources to conduct instructional activities, games and drills<br>1.6 Provide relevant pre-activity information to clients<br>1.7 Prepare contingency plans for instructional session to cope with inclement weather and other factors which may affect the ability to conduct the session<br>1.8 Conduct a risk assessment of the instructional activities and location and implement a risk management plan in accordance with the organisation's guidelines and operating procedures |
| <b>2 Select appropriate resources required to teach white water rescue skills</b> | 2.1 Select and access <b>equipment</b> and <b>other resources</b> suitable for the instructional objectives<br>2.2 Select, fit and adjust <b>equipment</b> (where appropriate) to suit the needs of individual clients<br>2.3 Check all <b>equipment</b> to ensure compliance with occupational health and safety legislation, manufacturer's recommendations and/or operating procedures, and to ensure that it is in good working order<br>2.4 Check contents of first aid and repair kits to ensure their suitability to the location and activity<br>2.5 Arrange, where required, protective and/or safety clothing for each client                                                                                                                                                                                                                                                                                                                                              |
| <b>3 Introduce an instructional white water rescue session</b>                    | 3.1 Communicate the aims of the instructional session to the clients<br>3.2 Encourage clients to seek clarification, information and feedback<br>3.3 Brief the clients on the safety practices, procedures and behaviour appropriate to the instructional session<br>3.4 Define activity boundaries/training area and/or clearly outline to the clients<br>3.5 Check clothing and footwear of clients for suitability to the session<br>3.6 Provide information on <b>equipment</b> selection, fitting or use where relevant to the instructional session's aims                                                                                                                                                                                                                                                                                                                                                                                                                     |
| <b>4 Conduct an instructional white water rescue session</b>                      | 4.1 Conduct "warm up"/introductory activities (where required) to reduce the risk of injury when client's are participating in physical activities<br>4.2 Monitor individual client's performance in instructional activities<br>4.3 Provide positive encouragement and/or feedback to each client at a suitable time to maintain a positive learning environment<br>4.4 Ensure instructional activity allows for repetition of skills<br>4.5 Evaluate instructional activities for effectiveness and implement modifications when required<br>4.6 Assess risks associated with the conduct of instructional activities constantly                                                                                                                                                                                                                                                                                                                                                   |

|                                                                                          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |
|------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                                                                                          | <p>and remove, minimise or avoid <b>hazards</b> in accordance with risk management plan and instructional objectives.</p> <p>4.7 Monitor <b>equipment</b> usage, behaviour and location of clients in order to review safety</p> <p>4.8 Ensure personal competencies with respect to topics and skills within the instructional session are at a sufficient level to enable correct demonstration of skills, accurate provision of information and to engender the confidence of the client(s)</p> <p>4.9 Demonstrate how personal competencies enable emergency and non-routine situations to be dealt with in accordance with operating procedures</p>                                                                                                                                             |
| <b>5 Apply appropriate teaching techniques for a white water rescue session</b>          | <p>5.1 Communicate instructions and information clearly and concisely</p> <p>5.2 Perform demonstrations for clients (where required) with a high level of technical correctness and accurate description</p> <p>5.3 Break-down complex skills and techniques into component parts and describe with key teaching points</p> <p>5.4 Identify faults in technique and provide a variety of solutions, where relevant, to correct faults</p> <p>5.5 Provide adequate time for practice, following fault correction and feedback</p> <p>5.6 Explain activities, drills or techniques which may improve skills</p>                                                                                                                                                                                        |
| <b>6 Teach required knowledge that applies to a white water rescue activity</b>          | <p>6.1 Teach required knowledge, ethics, codes of behaviour, points of interest or principles relevant to white water rescue and achievement of competency, in a manner which achieves interest and client understanding</p> <p>6.2 Instruct clients on factors to consider when planning for participation in white water rescue</p> <p>6.3 Identify minimal impact practices appropriate to white water rescue, and determine client level of understanding</p> <p>6.4 Outline specific aspects of <b>equipment</b> selection, use and care, to enable the client to achieve competency at the relevant level</p> <p>6.5 Explain communication systems and relevant calls or signals used whilst participating in white water rescue, and determine client level of understanding in their use</p> |
| <b>7 Teach safety and rescue procedures appropriate to a white water rescue activity</b> | <p>7.1 Instruct clients in appropriate emergency response procedures and techniques applicable to white water rescue, and the level of competency required</p> <p>7.2 Explain the principles and practices of group management, in the context of emergency situations</p> <p>7.3 Teach clients industry standard safety practices relevant to white water rescue</p> <p>7.4 Demonstrate rescue techniques specific to white water rescue, and provide opportunities for practice</p> <p>7.5 Clarify the use and selection of specific emergency response <b>equipment</b> that should be carried, relevant to the level of competency</p> <p>7.6 Assess client's level of understanding via questioning techniques and/or formal assessment</p>                                                     |
| <b>8 Teach white water rescue skills</b>                                                 | <p>8.1 Explain and demonstrate key points of technique or skill</p> <p>8.2 Outline the <b>sequence</b> or combination of skill to achieve effective or efficient results</p> <p>8.3 Identify different applications of skill or technique, and where it is applicable/not applicable</p> <p>8.4 Practice skills or techniques and observe clients in order to provide feedback</p> <p>8.5 Assess clients to determine poor or incorrect technique</p> <p>8.6 Provide opportunities for additional practice, where required</p>                                                                                                                                                                                                                                                                       |

|                                                                              |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |
|------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>9</b><br><b>Communicate further white water rescue knowledge</b>          | 9.1 Inform clients of locations, suitable to their skill level, for participating in white water rescue<br>9.2 Provide information relevant to the competencies being taught, on the range of <b>equipment</b> and clothing available or required, and factors affecting choice<br>9.3 Inform clients of opportunities to further develop their personal skills and knowledge                                                                                                                                                                                                                                                                                                                                                                                                                     |
| <b>10 Conclude and evaluate the white water rescue instructional session</b> | 10.1 Allow time for "cooling down" at the end of the session, check <b>equipment</b> for damage and return and store in an appropriate fashion<br>10.2 Determine the level of learning achieved directly through assessment or indirectly from Assessor<br>10.3 Apply feedback from Assessor or assessment to evaluate the effectiveness of the instructional activities, the suitability of the instructional method, the feedback provided to clients and the initial assessment of client's abilities<br>10.4 Evaluate the validity and reliability of assessment/evaluation tools used throughout the session to monitor learning<br>10.5 Determine modifications to activities and delivery method(s), based on evaluations<br>10.6 Evaluate the suitability of <b>other related factors</b> |

## Range Statements

The Range Statements provide advice to interpret the scope and context of this unit of competence, allowing for differences between enterprises and workplaces. The Range Statements relate to the unit as a whole and helps facilitate holistic assessment. In addition, the following variables may be present for this particular unit of competency:

| RANGE STATEMENT              | CATEGORIES                                                                                                                                                                                                                                                                                                                                                                                                                       |

## Evidence Guide

The Evidence Guide identifies the critical aspects, knowledge and skills to be demonstrated to confirm competence for this unit. This is an integral part of the assessment of competence and should be read in conjunction with the Range Statements.

|                                                      |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |

**DESCRIPTION:** This unit has been developed for the Outdoor Recreation Industry Training Package.

This unit covers the knowledge and skills required to determine the Rules and regulations applicable to a marine activity and to apply them in the context of that activity.

| ELEMENT                                                                                 | PERFORMANCE CRITERIA                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |
|-----------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>1 Determine relevant rules and regulations</b>                                       | 1.1 Access relevant International <b><i>Regulations for the Prevention of Collision at Sea</i></b> , where appropriate to the <b><i>maritime activity</i></b><br>1.2 Access regulations applying to the use of Inland Waters, where appropriate to the activity<br>1.3 Determine regulations applicable to a particular <b><i>maritime activity</i></b> , craft and location<br>1.4 Source other relevant state/territory or local legislation governing the use of an area for specific activities |
| <b>2 Comply with relevant rules and regulations with respect to a specific activity</b> | 2.1 Recognise situations where Rules must be applied in order to avoid collisions and determine the correct application<br>2.2 Determine minimum <b><i>safety requirements</i></b> for a specific activity, as specified by <b><i>relevant legislation</i></b><br>2.3 Demonstrate compliance with all relevant rules and legislation whilst participating in an activity                                                                                                                            |

## Range Statements

The Range Statements provide advice to interpret the scope and context of this unit of competence, allowing for differences between enterprises and workplaces. The Range Statements relate to the unit as a whole and helps facilitate holistic assessment. In addition, the following variables may be present for this particular unit of competency:

| RANGE STATEMENT                                           | CATEGORIES                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |

## Evidence Guide

The Evidence Guide identifies the critical aspects, knowledge and skills to be demonstrated to confirm competence for this unit. This is an integral part of the assessment of competence and should be read in conjunction with the Range Statements.

| YAC        | Yachting - Ballasted yacht     |

**DESCRIPTION:** This unit has been developed for the Outdoor Recreation Industry Training Package.

This unit covers the knowledge and skills required to become an effective and competent member of the crew on board a ballasted yacht sailing on short passages within sheltered waters with reasonable access to safe anchorages.

| ELEMENT                                      | PERFORMANCE CRITERIA                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |

| <b>1 Handle rope safely</b>                  | 1.1 Identify potential dangers from unsafe practices when handling ropes and implement strategies to ensure safety of self and others<br>1.2 Coil ropes, stow and secure to cleats and single and double bollards<br>1.3 Determine the advantages, disadvantages of different <b>knots</b> and demonstrate appropriate application to the situation                                                                                                                                                                                                                                                                                          |
| <b>2 Use correct nautical terminology</b>    | 2.1 Identify the safety considerations related to the use of correct terminology on board a sailing vessel<br>2.2 Apply correct nautical terms for the craft, rigging, sails, process of sailing and all equipment to ensure accurate communication on board                                                                                                                                                                                                                                                                                                                                                                                 |
| <b>3 Get under way and return to berth</b>   | 3.1 Identify potential dangers associated with unsafe practices when getting under way and returning to <b>berth</b> and minimise through adequate precautions and practices<br>3.2 Identify and demonstrate specific tasks associated with getting under way and berthing when using different types of berth                                                                                                                                                                                                                                                                                                                               |
| <b>4 Set and handle sails</b>                | 4.1 Select sails appropriate to the situation and, where appropriate, perform reefing of sails in accordance with existing conditions and requirements<br>4.2 Set and lower a mainsail and headsail according to <b>standard procedures for setting and de-rigging sails</b><br>4.3 Demonstrate correct and timely communication with other crew to ensure efficient operation with respect to hoisting, setting and lowering<br>4.4 Apply knowledge of procedures and <b>associated components</b><br>4.5 Develop and implement strategies to minimise potential dangers to crew and equipment from incorrect handling of sails and rigging |
| <b>5 Apply sailing theory</b>                | 5.1 Identify and apply the differences between true and apparent wind, and its affect on sailing and steering when trimming sails<br>5.2 Apply knowledge of the points of sailing and how sails work in each situation with reference to wind direction to trim sails to achieve the desired sailing effect<br>5.3 Apply crewing techniques to achieve the various <b>points of sailing</b> efficiently and with appropriate timing with respect to the craft's direction<br>5.4 Maintain an accurate compass course under sail and engine power                                                                                             |
| <b>6 Sail in a safe and courteous manner</b> | 6.1 Apply safe <b>sailing practices and etiquette</b> when sailing, mooring and interacting with others sailors<br>6.2 Apply <b>nautical regulations</b> with respect to efficient lookouts and Collision<br>6.3 Comply with National, State and local legislation with respect to the <b>safety equipment</b> required on board and safety drills and use and maintain <b>safety equipment</b> in accordance with regulations and manufacturer's                                                                                                                                                                                            |

|                                              |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |
|----------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                                              | <p>recommendations</p> <p>6.4 Identify fire hazards on board and implement fire prevention strategies</p> <p>6.5 Apply <b>recovery drill procedures</b> in person-overboard situations</p> <p>6.6 Apply knowledge of weather forecasts and wind observations determine prevailing and future sailing conditions</p> <p>6.7 Maintain adequate levels of personal fitness in order to sail in the prevailing <b>in-shore</b> conditions</p> <p>6.8 Identify specific <b>boat handling requirements</b> of crew on sailing vessels and perform the tasks at each area</p> <p>6.9 Identify differences between crew organisation on different size vessels, and consequent task allocation, and apply to handling a vessel as part of a team approach</p>                                    |
| <b>7 Operate auxiliary engines and craft</b> | <p>7.1 Conduct <b>pre-start and stop checks</b> of craft's engine in accordance with operating procedures and manufacturer's guidelines</p> <p>7.2 Perform starting and stopping procedures in accordance with operating procedures and manufacturer's guidelines</p> <p>7.3 Demonstrate correct use of main <b>engine controls</b> to ensure adequate control of craft</p> <p>7.4 Implement strategies to minimise the risk of ropes fouling with the propeller</p> <p>7.5 Identify dangers associated with the incorrect use of marine heads and demonstrate procedures for the open up/shut down of a marine head</p> <p>7.6 Demonstrate use of a dinghy as a yacht tender, demonstrating safe handling during launching, boarding, loading, rowing, use of outboard and recovery</p> |

## Range Statements

The Range Statements provide advice to interpret the scope and context of this unit of competence, allowing for differences between enterprises and workplaces. The Range Statements relate to the unit as a whole and helps facilitate holistic assessment. In addition, the following variables may be present for this particular unit of competency:

| RANGE STATEMENT                                                        | CATEGORIES                                                                                                                                                                                                                                                                                                          |

## Evidence Guide

The Evidence Guide identifies the critical aspects, knowledge and skills to be demonstrated to confirm competence for this unit. This is an integral part of the assessment of competence and should be read in conjunction with the Range Statements.

|                                                      |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |

| SROYAC003B | SKIPPER A BALLASTED YACHT INSHORE |
|            |                                   |
| YAC        | Yachting - Ballasted yacht        |

**DESCRIPTION:** This unit has been developed for the Outdoor Recreation Industry Training Package.

This unit covers the knowledge and skills required to skipper a ballasted yacht sailing on short passages within sheltered waters with reasonable access to safe anchorages (less than 15 miles from coast).

This unit and its co requisites incorporate aspects from the units of competency required for the achievement of a Certificate of Competency as a Coxswain.

| ELEMENT                                               | PERFORMANCE CRITERIA                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |

| <b>4 Handle craft</b>                                                           | <p>4.1 Demonstrate knowledge of the effects and efficient use of centre of effort, lateral resistance and how the keel or centreplate is used to assist in managing the yacht and reducing leeway</p> <p>4.2 Demonstrate correct and timely communication with crew to ensure efficient operations with respect to hoisting, setting and lowering sails</p> <p>4.3 Demonstrate steering practices <b>in-shore</b> when supervising the hoisting, setting and lowering sails and indicate an understanding of the points of sail and sail setting techniques</p> <p>4.4 Change sails appropriately to suit prevailing conditions</p> <p>4.5 Develop and implement strategies to minimise potential dangers to crew and equipment from incorrect handling of sails and rigging</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |
| <b>5 Sail in a safe and courteous manner</b>                                    | <p>5.1 Apply Safe <b>sailing practices and courtesies</b> when sailing, mooring and interacting with others sailors</p> <p>5.2 Apply International Regulations for the Prevention of Collisions at Sea by self and crew</p> <p>5.3 Comply with National, State and local legislation with respect to the safety equipment required on board and safety drills and ensure <b>safety equipment</b> is stored, used and maintained in accordance with regulations and manufacturer's recommendations</p> <p>5.4 Identify <b>fire hazards</b> on board, implement fire prevention strategies and demonstrate fire fighting procedures</p> <p>5.5 Describe what procedures are followed to ensure that inexperienced crew or passengers are familiar with safety procedures and requirements</p> <p>5.6 Apply <b>recovery drill procedures</b> in person-overboard situations and take correct action as helmsman</p> <p>5.7 Demonstrate the correct use of distress flares and Emergency Position Indicating Radio Beacon and detail situations in which they may be used correctly</p> <p>5.8 Outline the correct procedures to be followed as skipper in the event of a helicopter rescue</p> <p>5.9 Apply knowledge of weather forecast interpretation and use of forecasting aids to determine future sailing conditions</p> |
| <b>6 Navigate in sheltered waters with reasonable access to safe anchorages</b> | <p>6.1 Apply knowledge of navigation principles and techniques to carry out <b>routine navigational duties</b> and prepare navigational plans</p> <p>6.2 Interpret the IALA system of buoyage and other visual aids to navigation</p> <p>6.3 Demonstrate accurate position fixing, taking into account variables and sources of inaccuracies</p> <p>6.4 Identify and apply techniques to apply in restricted visibility, where relevant</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |
| <b>7 Operate and maintain inboard engine</b>                                    | <p>7.1 Conduct complete engine pre start checks and shut down procedures in accordance with operating procedures and manufacturer's guidelines</p> <p>7.2 Start, stop and operate the engine with correct use of controls</p> <p>7.3 Identify and locate serviceable engine parts</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |

## Range Statements

The Range Statements provide advice to interpret the scope and context of this unit of competence, allowing for differences between enterprises and workplaces. The Range Statements relate to the unit as a whole and helps facilitate holistic assessment. In addition, the following variables may be present for this particular unit of competency:

| RANGE STATEMENT                                                | CATEGORIES                                                                                                                                                                                                                                                                                                                                                         |

## Evidence Guide

The Evidence Guide identifies the critical aspects, knowledge and skills to be demonstrated to confirm competence for this unit. This is an integral part of the assessment of competence and should be read in conjunction with the Range Statements.

| SROYAC004B | CREW A BALLASTED YACHT IN EXPOSED COASTAL WATERS |
|            |                                                  |
| YAC        | Yachting - Ballasted yacht                       |

**DESCRIPTION:** This unit has been developed for the Outdoor Recreation Industry Training Package.

This unit covers the knowledge and skills required to become an effective member of the crew on board a ballasted yacht sailing on extended passages in exposed coastal waters.

| ELEMENT                                                              | PERFORMANCE CRITERIA                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |

| <b>1 Apply knowledge of vessel design and maintenance procedures</b> | 1.1 Identify <b>vessel design and construction features</b> in order to determine the factors that affect safety, <b>vessel stability</b> and maintenance requirements<br>1.2 Maintain <b>vessel stability</b> through the implementation of procedures to reduce inadvertent movement of heavy loads and to reduce the amount of free water on decks/bilges and tanks<br>1.3 Apply knowledge of the materials used in hull construction to determine the short and long-term maintenance requirements for particular vessels<br>1.4 Implement general <b>maintenance procedures</b> for a vessel, including maintenance of the hull, rudder and stern gear, standing and running rigging, engine<br>1.5 Identify inherent dangers associated with the conduct of maintenance and safety procedures are sourced and complied with<br>1.6 Apply knowledge of methods to <b>remove vessels from the water</b> and to haul and <b>launch vessels</b> to assist in slipping and launching vessels whilst ensuring vessel protection and safety, personal safety and reducing environmental impact                                                                                                                                                                                                                                                                                                                       |
| <b>2 Comply with relevant rules and regulations</b>                  | 2.1 Identify and implement specific <b>requirements for the commercial operations of a vessel</b> in comparison with those that apply to a pleasure craft<br>2.2 Interpret and apply <b>regulations</b> that apply when making coastal passages                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |
| <b>3 Apply safety procedures and precautions</b>                     | 3.1 Identify the location of <b>safety equipment</b> on board vessel and demonstrate its use and stowage<br>3.2 Identify specific <b>precautions</b> necessary when making a coastal passage in <b>limited visibility</b> and implement specific tasks, as designated by skipper<br>3.3 Implement methods to ensure personal safety in conditions of poor visibility, at night time and during heavy weather in accordance with operating procedures, including the use of life jackets, safety harnesses and lifelines<br>3.4 Demonstrate <b>specific actions</b> to be taken by crew <b>for a person-overboard</b> situation in <b>exposed coastal waters</b> in accordance with operating procedures and skipper's directions<br>3.5 Identify firefighting equipment for different types of fires, its position on the vessel known and take measures to ensure that it is correctly stowed<br>3.6 Identify precautions and design factors that can minimise the likelihood of fire at sea on coastal vessels and implement appropriate procedures in the event of cooking fires, fuel fires and electrical fires<br>3.7 Identify options for dealing with <b>major gear failure</b> and implement procedures in accordance with the skipper's instructions<br>3.8 Respond to <b>distress situations</b> in accordance with operating procedures, demonstrate care and use of emergency/ <b>safety equipment</b> |
| <b>4 Complete crewing obligations</b>                                | 4.1 Complete watch keeping, as part of a roster, in accordance with skipper's requirements<br>4.2 Complete deck and helm work, seamanship and cooking duties as per roster                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |

|                                                         |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |
|---------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                                                         | <p>and the requirements of the current situation, during all conditions, including travel at night and during periods of heavy weather</p> <p>4.3 Identify and apply differences between crew organisation on different size vessels, and consequent task allocation, to handling a vessel as part of a team approach</p> <p>4.4 Identify and demonstrate specific tasks associated with getting under way and berthing when using different types of <b>berth</b></p> <p>4.5 Maintain an accurate compass course under sail and engine power</p> <p>4.6 Operate auxiliary engines and craft in accordance with operating procedures and manufacturer's guidelines</p>                                                                                                                                                             |
| <b>5 Apply sailing theory in exposed coastal waters</b> | <p>5.1 Select sails appropriate to the situation and, where appropriate, perform reefing of sails in accordance with existing conditions and requirements</p> <p>5.2 Set and lower mainsail and headsail according to standard procedures</p> <p>5.3 Apply correct and timely communication with other crew to ensure efficient operations with respect to hoisting, setting and lowering sails</p> <p>5.4 Implement strategies to minimise potential dangers to crew and equipment from incorrect handling of sails and rigging</p> <p>5.5 Apply crewing techniques to achieve the various <b>points of sailing</b> efficiently and with appropriate timing with respect to the craft's direction</p> <p>5.6 Apply knowledge of weather forecasts and wind observations to determine prevailing and future sailing conditions</p> |

## Range Statements

The Range Statements provide advice to interpret the scope and context of this unit of competence, allowing for differences between enterprises and workplaces. The Range Statements relate to the unit as a whole and helps facilitate holistic assessment. In addition, the following variables may be present for this particular unit of competency:

| RANGE STATEMENT               | CATEGORIES                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |

## Evidence Guide

The Evidence Guide identifies the critical aspects, knowledge and skills to be demonstrated to confirm competence for this unit. This is an integral part of the assessment of competence and should be read in conjunction with the Range Statements.

|                                                      |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |

| SROYAC005B | SKIPPER A BALLASTED YACHT IN EXPOSED COASTAL WATERS |
|            |                                                     |
| YAC        | Yachting - Ballasted yacht                          |

**DESCRIPTION:** This unit has been developed for the Outdoor Recreation Industry Training Package.

This unit covers the knowledge and skills required to skipper a ballasted yacht sailing in exposed coastal waters (within 100 miles of the coast).

This unit and its co requisites incorporate aspects from the units of competency required for the achievement of a Certificate of Competency as a USL Master Class V/Skipper III.

| ELEMENT                                                             | PERFORMANCE CRITERIA                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |

| <b>1 Apply knowledge of vessel design and construction features</b> | 1.1 Apply knowledge of <b>vessel design and construction features</b> and the materials used in hull construction to determine factors that affect safety, <b>vessel stability</b> and short and long-term maintenance requirements<br>1.2 Develop and supervise implementation of general <b>maintenance procedures</b> for a including maintenance of the hull, rudder and stern gear, standing and running rigging and engine<br>1.3 Identify Inherent dangers associated with the conduct of maintenance and develop safety procedures<br>1.4 Apply knowledge of methods to <b>remove vessels from the water</b> and to haul and <b>launch vessels</b> to assist in slipping and launching vessels whilst ensuring vessel protection and safety, personal safety and reducing environmental impact<br>1.5 Consider factors that affect safety and vessel stability to develop procedures to reduce inadvertent movement of heavy loads and to reduce the amount of free water on decks/bilges and tanks |
| <b>2 Plan to undertake a voyage in exposed coastal waters</b>       | 2.1 Identify and arrange equipment requirements for passage including requirements for night travel and periods of heavy weather<br>2.2 Plan passage after consideration of navigation and meteorological information<br>2.3 Prepare checklists and timelines for watch keeping, victualling and other crew responsibilities/duties<br>2.4 Conduct pre-sea checks of engine<br>2.5 Check equipment and stores to ensure correct and adequate stowage                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |
| <b>3 Comply with relevant rules and regulations</b>                 | 3.1 Implement specific <b>requirements for the commercial operations of a vessel</b> in comparison with those that apply to a pleasure craft<br>3.2 Interpret and apply <b>regulations</b> that apply when making coastal passage                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |
| <b>4 Apply safety procedures and precautions</b>                    | 4.1 Ensure appropriate <b>safety equipment</b> is securely stowed and crew are trained in its usage<br>4.2 Develop strategies for responding to periods of heavy weather, including consideration of comfort and safety of crew<br>4.3 Implement specific <b>precautions</b> necessary when making a coastal passage in <b>limited visibility</b> after designation of specific tasks to crew<br>4.4 Implement methods to ensure the personal safety of crew in conditions of poor visibility, at night time and during heavy weather in accordance with operating procedures, including the use of life jackets, safety harnesses and lifelines<br>4.5 Develop and document emergency procedures to be undertaken in the event of major damage to hull or equipment, or injury to crew<br>4.6 Develop a priority procedure for <b>specific actions</b> to be taken by crew for a                                                                                                                           |

|                                                                |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |
|----------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                                                                | <p>person - overboard situation in coastal waters for a <b>range of conditions</b> in coastal waters</p> <p>4.7 Identify precautions and design factors that can minimise the likelihood of fire at sea on coastal vessels</p> <p>4.8 Develop and implement appropriate procedures in the event of cooking fires, fuel fires and electrical fires</p> <p>4.9 Identify contingency plans in the event of <b>major gear failure</b> or injury to crew and implement relevant procedures</p> <p>4.10 Design a procedures model to deal with <b>distress situations</b></p> <p>4.11 Ensure the crew are trained in the appropriate response in emergencies, based on the developed strategies, contingency plans and emergency procedure</p>                                                                                                                                                                                                                                                                                                               |
| <b>5 Manage crew during passages on exposed coastal waters</b> | <p>5.1 Apply knowledge of sailing theory and practice to direct crew to set and trim sails to achieve the various points of sailing when required, including during travel at night and, where encountered, during periods of heavy weather</p> <p>5.2 Analyse a range of <b>watch keeping systems</b> and use the most suitable option for the situation</p> <p>5.3 Prepare and implement plans for the delegation of <b>responsibilities and duties</b> of each member of the crew</p> <p>5.4 Identify crew strength and weaknesses in order to optimise performance and efficiency and organise crew in a manner to utilise identified <b>skills</b></p> <p>5.5 Apply knowledge of group dynamics, interpersonal skills and appropriate strategies to develop and maintain a sense of cohesiveness amongst the crew and support for instructions/orders</p> <p>5.6 Recognise the potential for conflict during extended passages</p> <p>5.7 Identify and respond to signs of conflict in order to maintain the crew's ability to work as a team</p> |

## Range Statements

The Range Statements provide advice to interpret the scope and context of this unit of competence, allowing for differences between enterprises and workplaces. The Range Statements relate to the unit as a whole and helps facilitate holistic assessment. In addition, the following variables may be present for this particular unit of competency:

| RANGE STATEMENT               | CATEGORIES                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |

## Evidence Guide

The Evidence Guide identifies the critical aspects, knowledge and skills to be demonstrated to confirm competence for this unit. This is an integral part of the assessment of competence and should be read in conjunction with the Range Statements.

|                                                      |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |

| SROYAC006B | SKIPPER A BALLASTED YACHT IN OCEAN WATERS |
|            |                                           |
| YAC        | Yachting - Ballasted yacht                |

**DESCRIPTION:** This unit has been developed for the Outdoor Recreation Industry Training Package.

This unit covers the knowledge and skills required to skipper a ballasted yacht sailing in ocean waters for extended periods of time.

| ELEMENT                                                        | PERFORMANCE CRITERIA                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |
|----------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>1 Plan to undertake a voyage in open waters</b>             | 1.1 Identify and arrange equipment requirements for the passage including equipment for periods of heavy weather and night travel<br>1.2 Plan passage after consideration of navigation and meteorological information<br>1.3 Prepare checklists and timelines for watch keeping, victualling and other crew responsibilities/duties<br>1.4 Conduct pre-sea checks of engine<br>1.5 Check <b>equipment</b> and stores to ensure correct and adequate stowage                                                                                                                                                                                                   |
| <b>2 Prepare for extended periods of heavy weather</b>         | 2.1 Develop strategies for responding to extended periods of heavy weather including consideration of comfort and safety of crew<br>2.2 Identify contingency plans in the event of damage to hull or equipment or injury to crew<br>2.3 Develop and document emergency procedures to be undertaken in the event of major damage to hull or equipment, or injury to crew<br>2.4 Ensure crew are trained in the appropriate response in emergencies, based on the developed strategies, contingency plans and emergency procedures                                                                                                                               |
| <b>3 Manage crew during an extended passage on open waters</b> | 3.1 Prepare and implement plans for the delegation of responsibilities and duties of each member of the crew<br>3.2 Identify crew strength and weaknesses in order to optimise performance and efficiency and organise crew in a manner to utilise identified <b>skills</b><br>3.3 Apply knowledge of group dynamics, interpersonal skills and appropriate strategies to develop and maintain a sense of cohesiveness amongst the crew and support for instructions/orders<br>3.4 Recognise the potential for conflict during extended passages and<br>3.5 Identify and respond to signs of conflict in order to maintain the crew's ability to work as a team |
| <b>4 Comply with port entry requirements</b>                   | 4.1 Source <b>information for entering foreign ports</b> on requirements that must be complied with<br>4.2 Demonstrate correct communications with port authorities during final approach to foreign ports                                                                                                                                                                                                                                                                                                                                                                                                                                                     |

## Range Statements

The Range Statements provide advice to interpret the scope and context of this unit of competence, allowing for differences between enterprises and workplaces. The Range Statements relate to the unit as a whole and helps facilitate holistic assessment. In addition, the following variables may be present for this particular unit of competency:

| RANGE STATEMENT                               | CATEGORIES                                                                                                                                                                                                                                                                    |

## Evidence Guide

The Evidence Guide identifies the critical aspects, knowledge and skills to be demonstrated to confirm competence for this unit. This is an integral part of the assessment of competence and should be read in conjunction with the Range Statements.

|                                                      |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |

|                                   | <ul style="list-style-type: none"> <li>○ Problem solving and contingency planning</li> <li>○ Celestial navigation</li> <li>○ Weather interpretation</li> </ul>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |
| <b>Resource implications</b>      | <ul style="list-style-type: none"> <li>• Physical resources - assessment of this unit of competency requires access to <ul style="list-style-type: none"> <li>○ real work group situations</li> <li>○ a ballasted yacht</li> <li>○ crew</li> <li>○ areas of ocean</li> <li>○ food and water resources</li> <li>○ personal protective clothing appropriate to location and conditions</li> <li>○ personal flotation device (PFD)</li> <li>○ navigation instruments and charts</li> <li>○ communications equipment</li> </ul> </li> <li>• Human resources - assessment of this unit of competency will require human resources consistent with those outlined in the Assessment Guidelines. That is, assessors (or persons within the assessment team) must <ul style="list-style-type: none"> <li>○ be competent in this unit</li> <li>○ be competent, as a minimum, in the units SRXFAD001A, SRXRIK001A and SRXEMR001A to ensure adequate risk management during the assessment</li> <li>○ be current in their knowledge and understanding of the industry through provision of evidence of professional activity in the relevant area</li> <li>○ have attained the mandatory competency requirements for assessors under the Australian Quality Training Framework (AQTF) as specified in Standard 7.3 of the <i>Standards for Registered Training Organisations</i></li> </ul> </li> </ul> |
| <b>Consistency in performance</b> | <ul style="list-style-type: none"> <li>• Due to issues such as variation in weather conditions, responsibility associated with skippering a vessel and technical knowledge, this unit of competency must be assessed over a minimum of three (3) occasions in order to ensure consistency of performance over a range of weather and sea conditions in different navigation situations with different crew during both day and night sailing. (It is expected that over this period of time the skipper would experience sailing in all weather conditions, including heavy weather, although passages should not deliberately be arranged in heavy weather purely for assessment purposes). This should be combined with logged evidence of sufficient nautical miles sailed and days on board a sailing vessel to satisfy the assessor that the required knowledge and skills have been applied</li> </ul>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |
| <b>Context for assessment</b>     | <ul style="list-style-type: none"> <li>• For valid and reliable assessment this unit of competency must be assessed in the context of a ballasted yacht sailing activity whilst acting as skipper on ocean passages involving a crew</li> <li>• This unit of competency should be assessed through the observation of processes and procedures, oral and/or written questioning on required knowledge and skills and consideration of required attitudes</li> <li>• Where performance is not directly observed and/or is required to be demonstrated over a "period of time" and/or in a "number of locations", any evidence should be authenticated by colleagues, supervisors, clients or other appropriate persons</li> </ul>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |

| YAC        | Yachting - Ballasted yacht                    |

**DESCRIPTION:** This unit has been developed for the Outdoor Recreation Industry Training Package.

This unit covers the knowledge and skills to instruct learners to achieve competencies in order to crew or skipper a ballasted yacht inshore.

| ELEMENT                                                                                             | PERFORMANCE CRITERIA                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |

|                                                                    | 7.6 Assess client's level of understanding via questioning techniques and/or formal assessment                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |
| <b>8 Teach yachting skills (ballasted yacht - inshore)</b>         | 8.1 Explain and demonstrate key points of technique or skill<br>8.2 Outline the <b>sequence</b> or combination of skill to achieve effective or efficient results<br>8.3 Identify different applications of skill or technique, and where it is applicable/not applicable<br>8.4 Practice skills or techniques and observe clients in order to provide feedback<br>8.5 Assess clients to determine poor or incorrect technique<br>8.6 Provide opportunities for additional practice, where required                                                                                                                                                                                                                                                                                                                       |
| <b>9 Communicate further yachting knowledge</b>                    | 9.1 Inform clients of locations, suitable to their skill level, for participating in yachting (ballasted yacht - inshore)<br>9.2 Provide information relevant to the competencies being taught, on the range of <b>equipment</b> and clothing available or required, and factors affecting choice<br>9.3 Inform clients of opportunities to further develop their personal skills and knowledge                                                                                                                                                                                                                                                                                                                                                                                                                           |
| <b>10 Conclude and evaluate the yachting instructional session</b> | 10. Allow time for "cooling down" at the end of the session, check<br>1 <b>equipment</b> for damage and return and store in an appropriate fashion<br>10. Determine the level of learning achieved directly through<br>2 assessment or indirectly from Assessor<br>10. Apply feedback from Assessor or assessment to evaluate the<br>3 effectiveness of the instructional activities, the suitability of the instructional method, the feedback provided to clients and the initial assessment of client's abilities<br>10. Evaluate the validity and reliability of assessment/evaluation tools<br>4 used throughout the session to monitor learning<br>10. Determine modifications to activities and delivery method(s),<br>5 based on evaluations<br>10. Evaluate the suitability of <b>other related factors</b><br>6 |

## Range Statements

The Range Statements provide advice to interpret the scope and context of this unit of competence, allowing for differences between enterprises and workplaces. The Range Statements relate to the unit as a whole and helps facilitate holistic assessment. In addition, the following variables may be present for this particular unit of competency:

| RANGE STATEMENT              | CATEGORIES                                                                                                                                                                                                                                                                                                                                                |

## Evidence Guide

The Evidence Guide identifies the critical aspects, knowledge and skills to be demonstrated to confirm competence for this unit. This is an integral part of the assessment of competence and should be read in conjunction with the Range Statements.

|                                                      |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |

| YAC        | Yachting - Ballasted yacht                     |

**DESCRIPTION:** This unit has been developed for the Outdoor Recreation Industry Training Package.

This unit covers the knowledge and skills to instruct learners to achieve competencies in order to sail ballasted yachts offshore.

| ELEMENT                                                                                              | PERFORMANCE CRITERIA                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |
|------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>1 Plan an instructional session for teaching yachting skills (ballasted yacht - offshore)</b>     | 1.1 Identify client needs and assess current competencies of group/individuals in order to determine the aims and objectives of the instructional session<br>1.2 Select a suitable site for the instructional session, based on an assessment of client needs, <b>hazards</b> , abilities and session aims<br>1.3 Plan appropriate instructional activities which will facilitate and enhance the learning process<br>1.4 Determine a suitable <b>sequence</b> of instruction<br>1.5 Access resources to conduct instructional activities, games and drills<br>1.6 Provide relevant pre-activity information to clients<br>1.7 Prepare contingency plans for instructional session to cope with inclement weather and other factors which may affect the ability to conduct the session<br>1.8 Conduct a risk assessment of the instructional activities and location and implement a risk management plan in accordance with the organisation's guidelines and operating procedures |
| <b>2 Select appropriate resources required to teach yachting skills (ballasted yacht - offshore)</b> | 2.1 Select and access <b>equipment</b> and <b>other resources</b> suitable for the instructional objectives<br>2.2 Select, fit and adjust <b>equipment</b> (where appropriate) to suit the needs of individual clients<br>2.3 Check all <b>equipment</b> to ensure compliance with occupational health and safety legislation, manufacturer's recommendations and/or operating procedures, and to ensure that it is in good working order<br>2.4 Check contents of first aid and repair kits to ensure their suitability to the location and activity<br>2.5 Arrange, where required, protective and/or safety clothing for each client                                                                                                                                                                                                                                                                                                                                              |
| <b>3 Introduce an instructional yachting session (ballasted yacht - offshore)</b>                    | 3.1 Communicate the aims of the instructional session to the clients<br>3.2 Encourage clients to seek clarification, information and feedback<br>3.3 Brief the clients on the safety practices, procedures and behaviour appropriate to the instructional session<br>3.4 Define activity boundaries/training area and/or clearly outline to the clients<br>3.5 Check clothing and footwear of clients for suitability to the session<br>3.6 Provide information on <b>equipment</b> selection, fitting or use where relevant to the instructional session's aims                                                                                                                                                                                                                                                                                                                                                                                                                     |
| <b>4 Conduct an instructional yachting session (ballasted yacht - offshore)</b>                      | 4.1 Conduct "warm up"/introductory activities (where required) to reduce the risk of injury when client's are participating in physical activities<br>4.2 Monitor individual client's performance in instructional activities                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |

|                                                                                                             |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |
|-------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                                                                                                             | <p>4.3 Provide positive encouragement and/or feedback to each client at a suitable time to maintain a positive learning environment</p> <p>4.4 Ensure instructional activity allows for repetition of skills</p> <p>4.5 Evaluate instructional activities for effectiveness and implement modifications when required</p> <p>4.6 Assess risks associated with the conduct of instructional activities constantly and remove, minimise or avoid hazards in accordance with risk management plan and instructional objectives</p> <p>4.7 Monitor <b>equipment</b> usage, behaviour and location of clients in order to review safety</p> <p>4.8 Ensure personal competencies with respect to topics and skills within the instructional session are at a sufficient level to enable correct demonstration of skills, accurate provision of information and to engender the confidence of the client(s)</p> <p>4.9 Demonstrate how personal competencies enable emergency and non-routine situations to be dealt with in accordance with operating procedures</p> |
| <b>5 Apply appropriate teaching techniques for a yachting session (ballasted yacht - offshore)</b>          | <p>5.1 Communicate instructions and information clearly and concisely</p> <p>5.2 Perform demonstrations for clients (where required) with a high level of technical correctness and accurate description</p> <p>5.3 Break-down complex skills and techniques into component parts and describe with key teaching points</p> <p>5.4 Identify faults in technique and provide a variety of solutions, where relevant, to correct faults</p> <p>5.5 Provide adequate time for practice, following fault correction and feedback</p> <p>5.6 Explain activities, drills or techniques which may improve skills</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                  |
| <b>6 Teach required knowledge that applies to a yachting activity (ballasted yacht - offshore)</b>          | <p>6.1 Teach required knowledge, ethics, codes of behaviour, points of interest or principles relevant to yachting (ballasted yacht - offshore) and achievement of competency, in a manner which achieves interest and client understanding</p> <p>6.2 Instruct clients on factors to consider when planning for participation in yachting (ballasted yacht - offshore)</p> <p>6.3 Identify minimal impact practices appropriate to yachting (ballasted yacht - offshore), and determine client level of understanding</p> <p>6.4 Outline specific aspects of <b>equipment</b> selection, use and care, to enable the client to achieve competency at the relevant level</p> <p>6.5 Explain communication systems and relevant calls or signals used whilst participating in yachting (ballasted yacht - offshore), and determine client level of understanding in their use</p>                                                                                                                                                                               |
| <b>7 Teach safety and rescue procedures appropriate to a yachting activity (ballasted yacht - offshore)</b> | <p>7.1 Instruct clients in appropriate emergency response procedures and techniques applicable to yachting (ballasted yacht - offshore), and the level of competency required</p> <p>7.2 Explain the principles and practices of group management, in the context of emergency situations</p> <p>7.3 Teach clients industry standard safety practices relevant to yachting (ballasted yacht - offshore)</p> <p>7.4 Demonstrate rescue techniques specific to yachting (ballasted yacht - offshore), and provide opportunities for practice</p> <p>7.5 Clarify the use and selection of specific emergency response <b>equipment</b> that should be carried, relevant to the level of competency</p> <p>7.6 Assess client's level of understanding via questioning techniques and/or formal assessment</p>                                                                                                                                                                                                                                                      |

|                                                                    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |

|                                                                    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |
| <b>8 Teach yachting skills (ballasted yacht - offshore)</b>        | 8.1 Explain and demonstrate key points of technique or skill<br>8.2 Outline the <b>sequence</b> or combination of skill to achieve effective or efficient results<br>8.3 Identify different applications of skill or technique, and where it is applicable/not applicable<br>8.4 Practice skills or techniques and observe clients in order to provide feedback<br>8.5 Assess clients to determine poor or incorrect technique<br>8.6 Provide opportunities for additional practice, where required                                                                                                                                                                                                                                                                                                                       |
| <b>9 Communicate further yachting knowledge</b>                    | 9.1 Inform clients of locations, suitable to their skill level, for participating in yachting (ballasted yacht - offshore)<br>9.2 Provide information relevant to the competencies being taught, on the range of <b>equipment</b> and clothing available or required, and factors affecting choice<br>9.3 Inform clients of opportunities to further develop their personal skills and knowledge                                                                                                                                                                                                                                                                                                                                                                                                                          |
| <b>10 Conclude and evaluate the yachting instructional session</b> | 10. Allow time for "cooling down" at the end of the session, check<br>1 <b>equipment</b> for damage and return and store in an appropriate fashion<br>10. Determine the level of learning achieved directly through<br>2 assessment or indirectly from Assessor<br>10. Apply feedback from Assessor or assessment to evaluate the<br>3 effectiveness of the instructional activities, the suitability of the instructional method, the feedback provided to clients and the initial assessment of client's abilities<br>10. Evaluate the validity and reliability of assessment/evaluation tools<br>4 used throughout the session to monitor learning<br>10. Determine modifications to activities and delivery method(s),<br>5 based on evaluations<br>10. Evaluate the suitability of <b>other related factors</b><br>6 |

## Range Statements

The Range Statements provide advice to interpret the scope and context of this unit of competence, allowing for differences between enterprises and workplaces. The Range Statements relate to the unit as a whole and helps facilitate holistic assessment. In addition, the following variables may be present for this particular unit of competency:

| RANGE STATEMENT              | CATEGORIES                                                                                                                                                                                                                                                                                                                                                     |

## Evidence Guide

The Evidence Guide identifies the critical aspects, knowledge and skills to be demonstrated to confirm competence for this unit. This is an integral part of the assessment of competence and should be read in conjunction with the Range Statements.

|                                                      |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |

| SROYMC001B | CREW A MOTOR CRUISER INSHORE |
| YMC        | Yachting - Motor cruisers    |

**DESCRIPTION:** This unit has been developed for the Outdoor Recreation Industry Training Package.

This unit covers the knowledge and skills required to become an effective member of the crew on board a motor cruising yacht sailing on short passages within sheltered waters with reasonable access to safe anchorages.

| ELEMENT                                        | PERFORMANCE CRITERIA                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |

| <b>1 Handle rope safely</b>                    | 1.1 Identify potential dangers from unsafe practices when handling ropes and implement strategies to ensure safety of self and others<br>1.2 Coil ropes, stow and secure to cleats and single and double bollards<br>1.3 Determine the advantages, disadvantages of different <b>knots</b> and demonstrate use appropriate to the situation                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |
| <b>2 Use correct nautical terminology</b>      | 2.1 Identify the safety considerations related to the use of correct terminology on board a vessel<br>2.2 Apply the correct nautical terms for the craft and all equipment to ensure accurate communication on board                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |
| <b>3 Get under way and return to berth</b>     | 3.1 Identify and minimise potential dangers associated with unsafe practices when getting under way and returning to <b>berth</b> through adequate precautions and practices<br>3.2 Identify and demonstrate specific tasks associated with getting under way and berthing when using different types of berth                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |
| <b>4 Travel in a safe and courteous manner</b> | 4.1 Apply safe <b>sailing practices and etiquette</b> when motoring, mooring and interacting with others sailors <b>in-shore</b><br>4.2 Apply <b>nautical regulations</b> with respect to efficient lookouts and Collision<br>4.3 Comply with National, State and local legislation with respect to the <b>safety equipment</b> required on board and safety drills<br>4.4 Use and maintain safety equipment in accordance with regulations and manufacturer's recommendations<br>4.5 Identify fire hazards on board and implement fire prevention strategies<br>4.6 Apply <b>recovery drill procedures</b> in 'person' overboard situations<br>4.7 Apply knowledge of weather forecasts and wind observations determine prevailing and future conditions<br>4.8 Maintain an accurate compass course under engine power<br>4.9 Identify specific <b>boat handling requirements</b> of crew on vessels and perform the tasks at each area<br>4.10 Identify and apply differences between crew organisation on different size vessels, and consequent task allocation, to handling a vessel as part of a team approach |
| <b>5 Operate auxiliary engines and craft</b>   | 5.1 Conduct <b>pre-start and stop checks</b> of craft's engine in accordance with operating procedures and manufacturer's guidelines<br>5.2 Perform starting and stopping procedures in accordance with operating procedures and manufacturer's guidelines<br>5.3 Demonstrate correct use of main <b>engine controls</b> to ensure adequate control of craft<br>5.4 Implement strategies to minimise the risk of ropes fouling with the propeller<br>5.5 Identify dangers associated with the incorrect use of marine heads and demonstrate procedures for the open up/shut down of a marine head                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |

|  |                                                                                                                                       |
|--|---------------------------------------------------------------------------------------------------------------------------------------|
|  | 5.6 Demonstrate safe handling during launching, boarding, loading, rowing, use of outboard and recovery of a dinghy as a yacht tender |
|--|---------------------------------------------------------------------------------------------------------------------------------------|

## Range Statements

The Range Statements provide advice to interpret the scope and context of this unit of competence, allowing for differences between enterprises and workplaces. The Range Statements relate to the unit as a whole and helps facilitate holistic assessment. In addition, the following variables may be present for this particular unit of competency:

| RANGE STATEMENT                   | CATEGORIES                                                                                                                                                                                                                                                                                                                                                                                                                |

## Evidence Guide

The Evidence Guide identifies the critical aspects, knowledge and skills to be demonstrated to confirm competence for this unit. This is an integral part of the assessment of competence and should be read in conjunction with the Range Statements.

|                                                      |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |

| SROYMC002B | SKIPPER A MOTOR CRUISER INSHORE |
| YMC        | Yachting - Motor cruisers       |

**DESCRIPTION:** This unit has been developed for the Outdoor Recreation Industry Training Package.

This unit covers the knowledge and skills required to skipper a motor yacht cruising on short passages within sheltered waters with reasonable access to safe anchorages.

This unit and its co requisites incorporate aspects from the units of competency required for the achievement of a Certificate of Competency as a Coxswain.

| ELEMENT                                               | PERFORMANCE CRITERIA                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |
|-------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>1 Handle rope safely</b>                           | 1.1 Implement strategies to ensure safety of self and others when using and handling ropes<br>1.2 Take measures to ensure that ropes are coiled, stowed and secured to cleats and single and double bollards<br>1.3 Apply knowledge of the properties of synthetic ropes to determine the most appropriate rope for each on board situation<br>1.4 Handle warps to ensure efficient mooring<br>1.5 Demonstrate safe and correct use of winches<br>1.6 Determine the advantages, disadvantages of different <b>knots</b> and demonstrate their use appropriate to the situation<br>1.7 Apply knowledge of <b>splicing and whipping</b> to conduct routine maintenance and repair work                                                                                                                                                                                                                                                                                                                                             |
| <b>2 Plan and prepare for passage</b>                 | 2.1 Prepare yacht for passage with adequate supervision/checking of all relevant <b>contextual issues</b> and <b>safety equipment</b><br>2.2 Develop and implement a plan for crew action and delegation of responsibility in a <b>variety of condition and situations</b><br>2.3 Apply knowledge of <b>design and loading factors</b> to ensure the stability of the vessel and crew safety<br>2.4 Secure and stow gear on upper deck and below to minimise loss and/or water damage or injury whilst maintaining proper access within and on the vessel<br>2.5 Implement strategies to ensure the security and safety of passengers and crew on deck and below when the vessel is underway<br>2.6 Plan a short passage, on tidal/estuary waters, taking account of relevant navigational hazards and limitations imposed by the type of boat and the strength of the crew<br>2.7 Develop a victualling list and supervise victualling organisation for the passage<br>2.8 Organise and supervise watches at sea and in harbour |
| <b>3 Get under way and return to berth or mooring</b> | 3.1 Identify potential dangers associated with unsafe practices when getting under way and returning to <b>berth</b> and minimise through adequate precautions, practices and crew supervision<br>3.2 Demonstrate personal boat handling skills <b>in-shore</b> and effective and timely direction to crew to enable the vessel to be safely brought to and from an alongside berth, mooring buoy and anchor under power<br>3.3 Identify and demonstrate specific tasks associated with getting under way and berthing when using different types of <b>berth</b><br>3.4 Identify and apply <b>factors to be considered when accepting and being towed</b><br>3.5 Accept a tow under personal steerage and manoeuvre and steer the vessel                                                                                                                                                                                                                                                                                        |

|                                                                                 |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |

| <b>4 Handle craft</b>                                                           | 4.1 Apply knowledge of the effects and efficient use of centre of effort, lateral resistance and the keel or centreplate to assist in managing the yacht and reducing leeway                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |
| <b>5 Sail in a safe and courteous manner</b>                                    | 5.1 Apply safe <b>sailing practices and courtesies</b> when motoring, mooring and interacting with others sailors<br>5.2 Apply International Regulations for the Prevention of Collisions at Sea by self and crew<br>5.3 Comply with National, State and local legislation with respect to the safety equipment required on board and safety drills is and store, use and maintain safety equipment in accordance with regulations and manufacturer's recommendations<br>5.4 Identify <b>fire hazards</b> on board, implement fire prevention strategies and demonstrate fire fighting procedures<br>5.5 Follow procedures to ensure that inexperienced crew or passengers are familiar with safety procedures, <b>recovery drill procedures</b> and requirements<br>5.6 Apply recovery drill procedures in 'person' overboard situations and correct action as helmsman is taken<br>5.7 Demonstrate the correct use of distress flares and Emergency Position Indicating Radio Beacon (EPIRB) and detail situations in which they may be used<br>5.8 Outline procedures to be followed as skipper in the event of a helicopter rescue<br>5.9 Apply knowledge of weather forecast interpretation and use of forecasting aids to determine future conditions |
| <b>6 Navigate in sheltered waters with reasonable access to safe anchorages</b> | 6.1 Apply knowledge of navigation principles and techniques to carry out <b>routine navigational duties</b> and prepare navigational plans<br>6.2 Interpret the IALA system of buoyage and other visual aids to navigation<br>6.3 Demonstrate accurate position fixing taking into account variables and sources of inaccuracies<br>6.4 Identify and apply techniques to apply in restricted visibility, where relevant                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |
| <b>7 Operate and maintain inboard engine</b>                                    | 7.1 Conduct complete engine pre-start checks and shut down procedures in accordance with operating procedures and manufacturer's guidelines<br>7.2 Start, stop and operate the engine with use of controls<br>7.3 Identify and locate serviceable engine parts and perform periodic maintenance checks on engine and electrical installations<br>7.4 Ensure sufficient engine and electrical tool kits and spares are carried on board and stowed correctly<br>7.5 Knowledge of fuel consumption at different speeds is shown and ensure sufficient fuel is carried for the planned passage                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |

## Range Statements

The Range Statements provide advice to interpret the scope and context of this unit of competence, allowing for differences between enterprises and workplaces. The Range Statements relate to the unit as a whole and helps facilitate holistic assessment. In addition, the following variables may be present for this particular unit of competency:

| RANGE STATEMENT                                                | CATEGORIES                                                                                                                                                                                                                                                                                                                                                         |

## Evidence Guide

The Evidence Guide identifies the critical aspects, knowledge and skills to be demonstrated to confirm competence for this unit. This is an integral part of the assessment of competence and should be read in conjunction with the Range Statements.

| SROYMC003B | CREW A MOTOR CRUISER IN EXPOSED COASTAL WATERS |
| YMC        | Yachting - Motor cruisers                      |

**DESCRIPTION:** This unit has been developed for the Outdoor Recreation Industry Training Package.

This unit covers the knowledge and skills required to become an effective member of the crew on board a motor cruiser sailing on extended passages in exposed coastal waters.

| ELEMENT                                                              | PERFORMANCE CRITERIA                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |
|----------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>1 Apply knowledge of vessel design and maintenance procedures</b> | 1.1 Identify <b>vessel design and construction features</b> in order to determine the factors that affect safety, vessel stability and maintenance requirements<br>1.2 Maintain <b>vessel stability</b> through the implementation of procedures to reduce inadvertent movement of heavy loads and to reduce the amount of free water on decks/bilges and tanks<br>1.3 Apply knowledge of the materials used in hull construction to determine the short and long-term maintenance requirements for particular vessels<br>1.4 Implement general <b>maintenance procedures</b> for a vessel including maintenance of the hull, rudder and stern gear, electrical installations, engine<br>1.5 Identify inherent dangers associated with the conduct of maintenance and source and comply with safety procedures<br>1.6 Apply knowledge of methods to <b>remove vessels from the water</b> and to <b>haul and launch vessels</b> to assist in slipping and launching vessels whilst ensuring vessel protection and safety, personal safety and reducing environmental impact                                                                                                                                                                                                                                                                                                                                                        |
| <b>2 Comply with relevant rules and regulations</b>                  | 2.1 Identify and implement specific <b>requirements for the commercial operations of a vessel</b> in comparison with those that apply to a pleasure craft<br>2.2 Interpret and apply <b>regulations</b> that apply when making coastal passages                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |
| <b>3 Apply safety procedures and precautions</b>                     | 3.1 Identify location of <b>safety equipment</b> on board vessel and demonstrate its correct use and stowage<br>3.2 Identify specific <b>precautions</b> necessary when making a coastal passage in <b>limited visibility</b> and implement specific tasks, as designated by skipper<br>3.3 Implement methods to ensure personal safety in conditions of poor visibility, at night time and during heavy weather in accordance with operating procedures, including the use of life jackets, safety harnesses and lifelines<br>3.4 Demonstrate <b>specific actions for a person-overboard</b> situation to be taken by crew situation in <b>exposed coastal waters</b> in accordance with operating procedures and skipper's directions<br>3.5 Identify firefighting equipment for different types of fires, know its position on the vessel and take measures to ensure that it is correctly stowed<br>3.6 Identify precautions and design factors that can minimise the likelihood of fire at sea on coastal vessels and implement appropriate procedures in the event of cooking fires, fuel fires and electrical fires<br>3.7 Identify options for dealing with <b>major gear failure</b> and implement procedures in accordance with the skipper's instructions<br>3.8 Respond to <b>distress situations</b> in accordance with operating procedures, demonstrate correct care and use of emergency/ <b>safety equipment</b> |
| <b>4 Complete crewing obligations</b>                                | 4.1 Complete watch keeping, as part of a roster, in accordance with skipper's requirements<br>4.2 Complete deck and helm work, seamanship and cooking duties as per roster and the requirements of the current situation, during all conditions, including                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |

|  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |

## Range Statements

The Range Statements provide advice to interpret the scope and context of this unit of competence, allowing for differences between enterprises and workplaces. The Range Statements relate to the unit as a whole and helps facilitate holistic assessment. In addition, the following variables may be present for this particular unit of competency:

| RANGE STATEMENT               | CATEGORIES                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |

## Evidence Guide

The Evidence Guide identifies the critical aspects, knowledge and skills to be demonstrated to confirm competence for this unit. This is an integral part of the assessment of competence and should be read in conjunction with the Range Statements.

| SROYMC004B | SKIPPER A MOTOR CRUISER IN EXPOSED COASTAL WATERS |
| YMC        | Yachting - Motor cruisers                         |

**DESCRIPTION:** This unit has been developed for the Outdoor Recreation Industry Training Package.

This unit covers the knowledge and skills required to skipper a motor yacht cruising in exposed coastal waters.

This unit and its co requisites incorporate aspects from the units of competency required for the achievement of a Certificate of Competency as a USL Master Class V/Skipper III.

| ELEMENT                                                             | PERFORMANCE CRITERIA                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |
|---------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>1 Apply knowledge of vessel design and construction features</b> | 1.1 Apply knowledge of vessel design and construction features and the materials used in hull construction to determine short and long-term maintenance requirements<br>1.2 Develop general <b><i>maintenance procedures</i></b> for a vessel and their implementation supervised, including maintenance of the hull, rudder and stern gear and engine<br>1.3 Identify inherent dangers associated with the conduct of maintenance and develop safety procedures<br>1.4 Apply knowledge of methods to <b><i>remove vessels from the water</i></b> and to haul and <b><i>launch vessels</i></b> to assist in slipping and launching vessels whilst ensuring vessel protection and safety, personal safety and reducing environmental impact<br>1.5 Consider factors that affect safety and vessel stability to develop procedures to reduce inadvertent movement of heavy loads and to reduce the amount of free water on decks/bilges and tanks                              |
| <b>2 Plan to undertake a voyage in exposed coastal waters</b>       | 2.1 Identify and arrange equipment requirements for passage including requirements for night travel and periods of heavy weather<br>2.2 Plan passage after consideration of navigation and meteorological information<br>2.3 Prepare checklists and timelines for watch keeping, victualling and other crew responsibilities/duties<br>2.4 Conduct pre-sea checks of engine<br>2.5 Check equipment and stores to ensure correct and adequate stowage                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |
| <b>3 Comply with relevant rules and regulations</b>                 | 3.1 Implement specific <b><i>requirements for the commercial operations of a vessel</i></b> in comparison with those that apply to a pleasure craft<br>3.2 Interpret and apply <b><i>regulations</i></b> that apply when making coastal passages                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |
| <b>4 Apply safety procedures and precautions</b>                    | 4.1 Stow appropriate <b><i>safety equipment</i></b> and train crew in its usage<br>4.2 Develop strategies for responding to periods of heavy weather, including consideration of comfort and safety of crew<br>4.3 Implement specific <b><i>precautions</i></b> necessary when making a coastal passage in <b><i>limited visibility</i></b> after designation of specific tasks to crew<br>4.4 Implement methods to ensure the personal safety of crew in conditions of poor visibility, at night time and during heavy weather in accordance with operating procedures, including the use of life jackets, safety harnesses and lifelines<br>4.5 Develop and document emergency procedures to be undertaken in the event of major damage to hull or equipment, or injury to crew<br>4.6 Develop a priority procedure for <b><i>specific actions</i></b> to be taken by crew for a person - overboard situation in coastal waters for a <b><i>range of conditions</i></b> in |

|                                                                |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |
|----------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                                                                | <p><b><i>exposed coastal waters</i></b></p> <p>4.7 Identify precautions and design factors that can minimise the likelihood of fire at sea on coastal vessels and develop and implement appropriate procedures in the event of cooking fires, fuel fires and electrical fires</p> <p>4.8 Identify contingency plans in the event of <b><i>major gear failure</i></b> or injury to crew and implement relevant procedures</p> <p>4.9 Design a procedures model to deal with <b><i>distress situations</i></b></p> <p>4.10 Train crew in the appropriate response in emergencies, based on the developed strategies, contingency plans and emergency procedures</p>                                                                                                                                                |
| <b>5 Manage crew during passages on exposed coastal waters</b> | <p>5.1 Analyse a range of <b><i>watch keeping</i></b> systems and use the most suitable option for the situation</p> <p>5.2 Prepare and implement plans for the delegation of <b><i>responsibilities and duties</i></b> of each member of the crew</p> <p>5.3 Identify crew strength and weaknesses in order to optimise performance and efficiency and organise crew in a manner to utilise identified <b><i>skills</i></b></p> <p>5.4 Apply knowledge of group dynamics, interpersonal skills and appropriate strategies to develop and maintain a sense of cohesiveness amongst the crew and support for instructions/orders</p> <p>5.5 Recognise potential for conflict during extended passages and identify and respond to signs of conflict in order to maintain the crew's ability to work as a team</p> |

## Range Statements

The Range Statements provide advice to interpret the scope and context of this unit of competence, allowing for differences between enterprises and workplaces. The Range Statements relate to the unit as a whole and helps facilitate holistic assessment. In addition, the following variables may be present for this particular unit of competency:

| RANGE STATEMENT                           | CATEGORIES                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |

## Evidence Guide

The Evidence Guide identifies the critical aspects, knowledge and skills to be demonstrated to confirm competence for this unit. This is an integral part of the assessment of competence and should be read in conjunction with the Range Statements.

|                                                      |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |

| SROYMC005B | SKIPPER A MOTOR CRUISER IN OCEAN WATERS |
| YMC        | Yachting - Motor cruisers               |

**DESCRIPTION:** This unit has been developed for the Outdoor Recreation Industry Training Package.

This unit covers the knowledge and skills required to skipper a motor yacht cruising in open waters for extended periods of time.

| ELEMENT                                                        | PERFORMANCE CRITERIA                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |
|----------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>1 Plan to undertake a voyage in open waters</b>             | 1.1 Identify and arrange <b>equipment</b> requirements for the passage, including equipment for periods of heavy weather and night travel<br>1.2 Plan passage after consideration of navigation and meteorological information<br>1.3 Prepare checklists and timelines for watch keeping, victualling and other crew responsibilities/duties<br>1.4 Conduct pre-sea checks of engine<br>1.5 Check equipment and stores to ensure correct and adequate stowage                                                                                                                                                                                       |
| <b>2 Prepare for extended periods of heavy weather</b>         | 2.1 Develop strategies for responding to extended periods of heavy weather, including consideration of comfort and safety of crew<br>2.2 Identify contingency plans in the event of damage to hull or equipment or injury to crew<br>2.3 Develop and document emergency procedures to be undertaken in the event of major damage to hull or equipment, or injury to crew<br>2.4 Train crew in the appropriate response in emergencies, based on the developed strategies, contingency plans and emergency procedures                                                                                                                                |
| <b>3 Manage crew during an extended passage on open waters</b> | 3.1 Prepare and implement plans for the delegation of responsibilities and duties of each member of the crew<br>3.2 Identify crew strength and weaknesses in order to optimise performance and efficiency and organise crew in a manner to utilise identified <b>skills</b><br>3.3 Apply knowledge of group dynamics, interpersonal skills and appropriate strategies to develop and maintain a sense of cohesiveness amongst the crew and support for instructions/orders<br>3.4 Recognise potential for conflict during extended passages and identify and respond to signs of conflict in order to maintain the crew's ability to work as a team |
| <b>4 Comply with port entry requirements</b>                   | 4.1 Source <b>information</b> on requirements and procedures that must be complied with <b>when entering foreign ports</b><br>4.2 Demonstrate correct communications with port authorities during final approach to foreign ports                                                                                                                                                                                                                                                                                                                                                                                                                   |

## Range Statements

The Range Statements provide advice to interpret the scope and context of this unit of competence, allowing for differences between enterprises and workplaces. The Range Statements relate to the unit as a whole and helps facilitate holistic assessment. In addition, the following variables may be present for this particular unit of competency:

| RANGE STATEMENT                               | CATEGORIES                                                                                                                                                                                                                                                                    |

## Evidence Guide

The Evidence Guide identifies the critical aspects, knowledge and skills to be demonstrated to confirm competence for this unit. This is an integral part of the assessment of competence and should be read in conjunction with the Range Statements.

|                                                      |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |

| YMC        | Yachting - Motor cruisers                   |

**DESCRIPTION:** This unit has been developed for the Outdoor Recreation Industry Training Package.

This unit covers the knowledge and skills to instruct learners to achieve competencies in order to sail yachts (motor cruisers) inshore.

| ELEMENT                                                                                           | PERFORMANCE CRITERIA                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |

| <b>1 Plan an instructional session for teaching yachting skills (motor cruiser - inshore)</b>     | 1.1 Identify client needs and assess current competencies of group/individuals in order to determine the aims and objectives of the instructional session<br>1.2 Select a suitable site for the instructional session, based on an assessment of client needs, <b>hazards</b> , abilities and session aims<br>1.3 Plan appropriate instructional activities which will facilitate and enhance the learning process<br>1.4 Determine a suitable <b>sequence</b> of instruction<br>1.5 Access resources to conduct instructional activities, games and drills<br>1.6 Provide relevant pre-activity information to clients<br>1.7 Prepare contingency plans for instructional session to cope with inclement weather and other factors which may affect the ability to conduct the session<br>1.8 Conduct a risk assessment of the instructional activities and location and implement a risk management plan in accordance with the organisation's guidelines and operating procedures |
| <b>2 Select appropriate resources required to teach yachting skills (motor cruiser - inshore)</b> | 2.1 Select and access <b>equipment</b> and <b>other resources</b> suitable for the instructional objectives<br>2.2 Select, fit and adjust <b>equipment</b> (where appropriate) to suit the needs of individual clients<br>2.3 Check all <b>equipment</b> to ensure compliance with occupational health and safety legislation, manufacturer's recommendations and/or operating procedures, and to ensure that it is in good working order<br>2.4 Check contents of first aid and repair kits to ensure their suitability to the location and activity<br>2.5 Arrange, where required, protective and/or safety clothing for each client                                                                                                                                                                                                                                                                                                                                              |
| <b>3 Introduce an instructional yachting session (motor cruiser - inshore)</b>                    | 3.1 Communicate the aims of the instructional session to the clients<br>3.2 Encourage clients to seek clarification, information and feedback<br>3.3 Brief the clients on the safety practices, procedures and behaviour appropriate to the instructional session<br>3.4 Define activity boundaries/training area and/or clearly outline to the clients<br>3.5 Check clothing and footwear of clients for suitability to the session<br>3.6 Provide information on <b>equipment</b> selection, fitting or use where relevant to the instructional session's aims                                                                                                                                                                                                                                                                                                                                                                                                                     |
| <b>4 Conduct an instructional yachting session (motor cruiser - inshore)</b>                      | 4.1 Conduct "warm up"/introductory activities (where required) to reduce the risk of injury when client's are participating in physical activities<br>4.2 Monitor individual client's performance in instructional activities<br>4.3 Provide positive encouragement and/or feedback to each client at a suitable time to maintain a positive learning environment<br>4.4 Ensure instructional activity allows for repetition of skills<br>4.5 Evaluate instructional activities for effectiveness and implement modifications when required                                                                                                                                                                                                                                                                                                                                                                                                                                          |

|                                                                                                          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |
|----------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                                                                                                          | <p>4.6 Assess risks associated with the conduct of instructional activities constantly and remove, minimise or avoid hazards in accordance with risk management plan and instructional objectives.</p> <p>4.7 Monitor <b>equipment</b> usage, behaviour and location of clients in order to review safety</p> <p>4.8 Ensure personal competencies with respect to topics and skills within the instructional session are at a sufficient level to enable correct demonstration of skills, accurate provision of information and to engender the confidence of the client(s)</p> <p>4.9 Demonstrate how personal competencies enable emergency and non-routine situations to be dealt with in accordance with operating procedures</p>                                                                                                            |
| <b>5 Apply appropriate teaching techniques for a yachting session (motor cruiser - inshore)</b>          | <p>5.1 Communicate instructions and information clearly and concisely</p> <p>5.2 Perform demonstrations for clients (where required) with a high level of technical correctness and accurate description</p> <p>5.3 Break-down complex skills and techniques into component parts and describe with key teaching points</p> <p>5.4 Identify faults in technique and provide a variety of solutions, where relevant, to correct faults</p> <p>5.5 Provide adequate time for practice, following fault correction and feedback</p> <p>5.6 Explain activities, drills or techniques which may improve skills</p>                                                                                                                                                                                                                                    |
| <b>6 Teach required knowledge that applies to a yachting activity (motor cruiser - inshore)</b>          | <p>6.1 Teach required knowledge, ethics, codes of behaviour, points of interest or principles relevant to motor cruising inshore and achievement of competency, in a manner which achieves interest and client understanding</p> <p>6.2 Instruct clients on factors to consider when planning for participation in yachting (motor cruising - inshore)</p> <p>6.3 Identify minimal impact practices appropriate to yachting (motor cruising - inshore), and determine client level of understanding</p> <p>6.4 Outline specific aspects of <b>equipment</b> selection, use and care, to enable the client to achieve competency at the relevant level</p> <p>6.5 Explain communication systems and relevant calls or signals used whilst participating in motor cruising - inshore, and determine client level of understanding in their use</p> |
| <b>7 Teach safety and rescue procedures appropriate to a yachting activity (motor cruiser - inshore)</b> | <p>7.1 Instruct clients in appropriate emergency response procedures and techniques applicable to yachting (motor cruising - inshore), and the level of competency required</p> <p>7.2 Explain the principles and practices of group management, in the context of emergency situations</p> <p>7.3 Teach clients industry standard safety practices relevant to yachting (motor cruising - inshore)</p> <p>7.4 Demonstrate rescue techniques specific to yachting (motor cruising - inshore), and provide opportunities for practice</p> <p>7.5 Clarify the use and selection of specific emergency response <b>equipment</b> that should be carried, relevant to the level of competency</p> <p>7.6 Assess client's level of understanding via questioning techniques and/or formal assessment</p>                                              |
| <b>8 Teach yachting skills (motor cruiser - inshore)</b>                                                 | <p>8.1 Explain and demonstrate key points of technique or skill</p> <p>8.2 Outline the <b>sequence</b> or combination of skill to achieve effective or efficient results</p> <p>8.3 Identify different applications of skill or technique, and where it is applicable/not applicable</p> <p>8.4 Practice skills or techniques and observe clients in order to provide feedback</p> <p>8.5 Assess clients to determine poor or incorrect technique</p>                                                                                                                                                                                                                                                                                                                                                                                            |

|                                                                    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |
|--------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                                                                    | 8.6 Provide opportunities for additional practice, where required                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |
| <b>9<br/>Communicate further yachting knowledge</b>                | 9.1 Inform clients of locations, suitable to their skill level, for participating in yachting (motor cruising - inshore)<br>9.2 Provide information relevant to the competencies being taught, on the range of <b>equipment</b> and clothing available or required, and factors affecting choice<br>9.3 Inform clients of opportunities to further develop their personal skills and knowledge                                                                                                                                                                                                                                                                                                                                                                                                    |
| <b>10 Conclude and evaluate the yachting instructional session</b> | 10.1 Allow time for "cooling down" at the end of the session, check <b>equipment</b> for damage and return and store in an appropriate fashion<br>10.2 Determine the level of learning achieved directly through assessment or indirectly from Assessor<br>10.3 Apply feedback from Assessor or assessment to evaluate the effectiveness of the instructional activities, the suitability of the instructional method, the feedback provided to clients and the initial assessment of client's abilities<br>10.4 Evaluate the validity and reliability of assessment/evaluation tools used throughout the session to monitor learning<br>10.5 Determine modifications to activities and delivery method(s), based on evaluations<br>10.6 Evaluate the suitability of <b>other related factors</b> |

## Range Statements

The Range Statements provide advice to interpret the scope and context of this unit of competence, allowing for differences between enterprises and workplaces. The Range Statements relate to the unit as a whole and helps facilitate holistic assessment. In addition, the following variables may be present for this particular unit of competency:

| RANGE STATEMENT              | CATEGORIES                                                                                                                                                                                                                                                                                                                                                                    |

## Evidence Guide

The Evidence Guide identifies the critical aspects, knowledge and skills to be demonstrated to confirm competence for this unit. This is an integral part of the assessment of competence and should be read in conjunction with the Range Statements.

|                                                      |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |

| SROYMC007A | INSTRUCT YACHTING (MOTOR CRUISER - OFFSHORE) |
| YMC        | Yachting - Motor cruisers                    |

**DESCRIPTION:** This unit has been developed for the Outdoor Recreation Industry Training Package.

This unit covers the knowledge and skills to instruct learners to achieve competencies in order to sail yachts (motor cruisers) offshore.

| ELEMENT                                                                                            | PERFORMANCE CRITERIA                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |
|----------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>1 Plan an instructional session for teaching yachting skills (motor cruiser - offshore)</b>     | 1.1 Identify client needs and assess current competencies of group/individuals in order to determine the aims and objectives of the instructional session<br>1.2 Select a suitable site for the instructional session, based on an assessment of client needs, <b>hazards</b> , abilities and session aims<br>1.3 Plan appropriate instructional activities which will facilitate and enhance the learning process<br>1.4 Determine a suitable <b>sequence</b> of instruction<br>1.5 Access resources to conduct instructional activities, games and drills<br>1.6 Provide relevant pre-activity information to clients<br>1.7 Prepare contingency plans for instructional session to cope with inclement weather and other factors which may affect the ability to conduct the session<br>1.8 Conduct a risk assessment of the instructional activities and location and implement a risk management plan in accordance with the organisation's guidelines and operating procedures |
| <b>2 Select appropriate resources required to teach yachting skills (motor cruiser - offshore)</b> | 2.1 Select and access <b>equipment</b> and <b>other resources</b> suitable for the instructional objectives<br>2.2 Select, fit and adjust <b>equipment</b> (where appropriate) to suit the needs of individual clients<br>2.3 Check all <b>equipment</b> to ensure compliance with occupational health and safety legislation, manufacturer's recommendations and/or operating procedures, and to ensure that it is in good working order<br>2.4 Check contents of first aid and repair kits to ensure their suitability to the location and activity<br>2.5 Arrange, where required, protective and/or safety clothing for each client                                                                                                                                                                                                                                                                                                                                              |
| <b>3 Introduce an instructional yachting session (motor cruiser - offshore)</b>                    | 3.1 Communicate the aims of the instructional session to the clients<br>3.2 Encourage clients to seek clarification, information and feedback<br>3.3 Brief the clients on the safety practices, procedures and behaviour appropriate to the instructional session<br>3.4 Define activity boundaries/training area and/or clearly outline to the clients<br>3.5 Check clothing and footwear of clients for suitability to the session<br>3.6 Provide information on <b>equipment</b> selection, fitting or use where relevant to the instructional session's aims                                                                                                                                                                                                                                                                                                                                                                                                                     |
| <b>4 Conduct an instructional yachting session (motor cruiser - offshore)</b>                      | 4.1 Conduct "warm up"/introductory activities (where required) to reduce the risk of injury when client's are participating in physical activities<br>4.2 Monitor individual client's performance in instructional activities<br>4.3 Provide positive encouragement and/or feedback to each client at a suitable time to maintain a positive learning environment<br>4.4 Ensure instructional activity allows for repetition of skills<br>4.5 Evaluate instructional activities for effectiveness and implement modifications when required                                                                                                                                                                                                                                                                                                                                                                                                                                          |

|                                                                                                           |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |
|-----------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                                                                                                           | <p>4.6 Assess risks associated with the conduct of instructional activities constantly and remove, minimise or avoid hazards in accordance with risk management plan and instructional objectives.</p> <p>4.7 Monitor <b>equipment</b> usage, behaviour and location of clients in order to review safety</p> <p>4.8 Ensure personal competencies with respect to topics and skills within the instructional session are at a sufficient level to enable correct demonstration of skills, accurate provision of information and to engender the confidence of the client(s)</p> <p>4.9 Demonstrate how personal competencies enable emergency and non - routine situations to be dealt with in accordance with operating procedures</p>                                                                                                              |
| <b>5 Apply appropriate teaching techniques for a yachting session (motor cruiser - offshore)</b>          | <p>5.1 Communicate instructions and information clearly and concisely</p> <p>5.2 Perform demonstrations for clients (where required) with a high level of technical correctness and accurate description</p> <p>5.3 Break-down complex skills and techniques into component parts and describe with key teaching points</p> <p>5.4 Identify faults in technique and provide a variety of solutions, where relevant, to correct faults</p> <p>5.5 Provide adequate time for practice, following fault correction and feedback</p> <p>5.6 Explain activities, drills or techniques which may improve skills</p>                                                                                                                                                                                                                                        |
| <b>6 Teach required knowledge that applies to a yachting activity (motor cruiser - offshore)</b>          | <p>6.1 Teach required knowledge, ethics, codes of behaviour, points of interest or principles relevant to motor cruising offshore and achievement of competency, in a manner which achieves interest and client understanding</p> <p>6.2 Instruct clients on factors to consider when planning for participation in yachting (motor cruising - offshore)</p> <p>6.3 Identify minimal impact practices appropriate to yachting (motor cruising - offshore), and determine client level of understanding</p> <p>6.4 Outline specific aspects of <b>equipment</b> selection, use and care, to enable the client to achieve competency at the relevant level</p> <p>6.5 Explain communication systems and relevant calls or signals used whilst participating in motor cruising - offshore, and determine client level of understanding in their use</p> |
| <b>7 Teach safety and rescue procedures appropriate to a yachting activity (motor cruiser - offshore)</b> | <p>7.1 Instruct clients in appropriate emergency response procedures and techniques applicable to yachting (motor cruising - offshore), and the level of competency required</p> <p>7.2 Explain the principles and practices of group management, in the context of emergency situations</p> <p>7.3 Teach clients industry standard safety practices relevant to yachting (motor cruising - offshore)</p> <p>7.4 Demonstrate rescue techniques specific to yachting (motor cruising - offshore), and provide opportunities for practice</p> <p>7.5 Clarify the use and selection of specific emergency response <b>equipment</b> that should be carried, relevant to the level of competency</p> <p>7.6 Assess client's level of understanding via questioning techniques and/or formal assessment</p>                                               |
| <b>8 Teach yachting skills (motor cruiser - offshore)</b>                                                 | <p>8.1 Explain and demonstrate key points of technique or skill</p> <p>8.2 Outline the <b>sequence</b> or combination of skill to achieve effective or efficient results</p> <p>8.3 Identify different applications of skill or technique, and where it is applicable/not applicable</p> <p>8.4 Practice skills or techniques and observe clients in order to provide feedback</p> <p>8.5 Assess clients to determine poor or incorrect technique</p>                                                                                                                                                                                                                                                                                                                                                                                                |

|                                                                    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |
|--------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                                                                    | 8.6 Provide opportunities for additional practice, where required                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |
| <b>9 Communicate further yachting knowledge</b>                    | 9.1 Inform clients of locations, suitable to their skill level, for participating in yachting (motor cruising - offshore)<br>9.2 Provide information relevant to the competencies being taught, on the range of <b>equipment</b> and clothing available or required, and factors affecting choice<br>9.3 Inform clients of opportunities to further develop their personal skills and knowledge                                                                                                                                                                                                                                                                                                                                                                                                   |
| <b>10 Conclude and evaluate the yachting instructional session</b> | 10.1 Allow time for "cooling down" at the end of the session, check <b>equipment</b> for damage and return and store in an appropriate fashion<br>10.2 Determine the level of learning achieved directly through assessment or indirectly from Assessor<br>10.3 Apply feedback from Assessor or assessment to evaluate the effectiveness of the instructional activities, the suitability of the instructional method, the feedback provided to clients and the initial assessment of client's abilities<br>10.4 Evaluate the validity and reliability of assessment/evaluation tools used throughout the session to monitor learning<br>10.5 Determine modifications to activities and delivery method(s), based on evaluations<br>10.6 Evaluate the suitability of <b>other related factors</b> |

## Range Statements

The Range Statements provide advice to interpret the scope and context of this unit of competence, allowing for differences between enterprises and workplaces. The Range Statements relate to the unit as a whole and helps facilitate holistic assessment. In addition, the following variables may be present for this particular unit of competency:

| RANGE STATEMENT              | CATEGORIES                                                                                                                                                                                                                                                                                                                                                                   |

## Evidence Guide

The Evidence Guide identifies the critical aspects, knowledge and skills to be demonstrated to confirm competence for this unit. This is an integral part of the assessment of competence and should be read in conjunction with the Range Statements.

|                                                      |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |

| SROYSA001B | USE A SAILBOARD IN CONTROLLED CONDITIONS DEMONSTRATING BASIC SKILLS |
| YSA        | Yachting - Windsurfing                                              |

**DESCRIPTION:** This unit has been developed for the Outdoor Recreation Industry Training Package.

This unit covers the knowledge and skills to launch, land and sail a sailboard in light winds (min 3 knots) in enclosed waters and steer on all points of sail, tacking and gybing as required, execute a full self rescue and understand safety issues.

| ELEMENT                                                 | PERFORMANCE CRITERIA                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |
|---------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>1 Select equipment and prepare for participation</b> | 1.1 Source information on weather and wind conditions to enable selection of a location to suit personal skills level<br>1.2 Select clothing suitable for the prevailing and expected conditions<br>1.3 Correctly load and attach, where relevant, rig and board to vehicle for transport                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |
| <b>2 Rig a sailboard</b>                                | 2.1 Identify <b>main parts of the board</b> and <b>main parts of the rig</b><br>2.2 Select sail size appropriate for personal use<br>2.3 Demonstrate rigging of the sailboard, using correct tensions, boom heights and adjustments and tying off loose ends<br>2.4 Carry the rig and board to the launch site separately in a manner to minimise damage and then attached ready for sailing                                                                                                                                                                                                                                                                                                                                                                                                                                             |
| <b>3 Launch and land a sailboard</b>                    | 3.1 Determine <b>wind direction</b> to enable easy launching<br>3.2 Maintain stability whilst the sailboard is launched and landed efficiently in <b>controlled conditions</b><br>3.3 Adopt correct position on the board, with one foot on either side of the mast, evenly spaced and on the centre line<br>3.4 Uphaul the sailboard using a straight back and bent knees<br>3.5 Maintain a stable neutral position                                                                                                                                                                                                                                                                                                                                                                                                                     |
| <b>4 Use basic skills to manoeuvre the sailboard</b>    | 4.1 Identify and apply common <b>wind terminology</b> , to determine the sailing directions, based on current wind direction<br>4.2 Demonstrate moving off on a beam reach (right angles to the wind) by using the crossover technique and the correct stance<br>4.3 Control power by easing the sheet hand<br>4.4 Steer the sailboard by leaning the rig forward over the bow (downwind turn) and backward over the stern (upwind turn) aft in order to turn<br>4.5 Achieve an upwind goal by using tacking and close hauling<br>4.6 Use gybing and broad reaching or running to return downwind<br>4.7 Use knowledge of sailing theory and the combination of above techniques to manoeuvre the sailboard around a triangular course using all <b>basic skills to points of sail</b><br>4.8 Perform emergency stops to avoid collision |
| <b>5 Maintain safety of self and others</b>             | 5.1 Wear and use safety <b>equipment</b> in accordance with state/territory legislation and weather and light conditions<br>5.2 Demonstrate compliance with all relevant <b>"Rules of the Road"</b><br>5.3 Use sailboard within designated/defined areas<br>5.4 Implement strategies to avoid head injury when falling to windward<br>5.5 Identify <b>reasons for self-rescue</b> and complete a full self rescue<br>5.6 Identify <b>alternate rescue strategies</b> if self rescue fails                                                                                                                                                                                                                                                                                                                                                |

|                                                    |                                                                                                                                                                |
|----------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>6 Maintain and repair windsurfing equipment</b> | <b>6.1</b> Return sailboard to storage area or vehicle and stow in a manner to minimise damage<br><b>6.2</b> Identify routine inspection and maintenance tasks |
|----------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------|

## Range Statements

The Range Statements provide advice to interpret the scope and context of this unit of competence, allowing for differences between enterprises and workplaces. The Range Statements relate to the unit as a whole and helps facilitate holistic assessment. In addition, the following variables may be present for this particular unit of competency:

| RANGE STATEMENT                       | CATEGORIES                                                                                                                                                                                                                                                                                             |

## Evidence Guide

The Evidence Guide identifies the critical aspects, knowledge and skills to be demonstrated to confirm competence for this unit. This is an integral part of the assessment of competence and should be read in conjunction with the Range Statements.

|                                                      |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |

That is, assessors (or persons within the assessment team) must               <ul style="list-style-type: none"> <li>○ be competent in the unit SROYSA002B</li> <li>○ be competent, as a minimum, in the units SRXFAD001A, SRXRIK001A and SRXEMR001A to ensure adequate risk management during the assessment</li> <li>○ be current in their knowledge and understanding of the industry through provision of evidence of professional activity in the relevant area</li> <li>○ have attained the mandatory competency requirements for assessors under the Australian Quality Training Framework (AQTF) as specified in Standard 7.3 of the <i>Standards for Registered Training Organisations</i></li> </ul> </li> </ul> |
| <b>Consistency in performance</b> | <ul style="list-style-type: none"> <li>• Due to issues such as demonstrating all the required skills in the specified weather conditions this unit must be assessed over a minimum of a minimum of two (2) different occasions in order to ensure consistency of performance over the Range Statements and contexts</li> </ul>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |
| <b>Context for assessment</b>     | <ul style="list-style-type: none"> <li>• For reliable and accurate assessment this unit must be assessed whilst participating in a windsurfing activity in the specified conditions</li> <li>• Assessment of this unit of competence will usually include observation of processes and procedures, oral and/or written questioning on required knowledge and skills and consideration of required attitudes</li> <li>• Where performance is not directly observed and/or is required to be demonstrated over a "period of time" and/or in a "number of locations", any evidence should be authenticated by colleagues, supervisors, clients or other appropriate persons</li> </ul>                                                                                                                                                                                                                                                                                                                                                                    |

| KEY COMPETENCIES                        |                                 |                            |                             |                                     |                |                |
|-----------------------------------------|---------------------------------|----------------------------|-----------------------------|-------------------------------------|----------------|----------------|
| Collect, Analyse & Organise Information | Communicate Ideas & Information | Plan & Organise Activities | Work with Others & in Teams | Use Mathematical Ideas & Techniques | Solve Problems | Use Technology |
| 1                                       | -                               | 1                          | -                           | 1                                   | 1              | 1              |

These levels do not relate to the Australian Qualifications Framework. They relate to the seven areas of generic competency that underpin effective workplace practices.

The three levels of performance (1, 2 and 3) denote the level of competency required to perform the task:

1. Use routine approaches
  2. Select from routine approaches
  3. Establish new approaches
- **Collecting, analysing and organising information** - Collecting information regarding wind/weather conditions
  - **Communicating ideas and information** - Not applicable
  - **Planning and organising activities** - Planning equipment and clothing to use
  - **Working with teams and others** - Not applicable
  - **Using mathematical ideas and techniques** - Calculating angles to sail relative to the wind
  - **Solving problems** - Dealing with changes in wind strength and direction
  - **Using technology** - Using a drysuit for warmth

Please refer to the Assessment Guidelines for advice on how to use the Key Competencies.

|            |                                                          |

| SROYSA002B | APPLY ENHANCED WINDSURFING SKILLS IN MODERATE CONDITIONS |
| YSA        | Yachting - Windsurfing                                   |

**DESCRIPTION:** This unit has been developed for the Outdoor Recreation Industry Training Package.

This unit covers the knowledge and skills to launch, land and a sailboard (greater than 320cm long with a battened sail) in moderate winds (greater than 8 knots but less than 15 knots) and steer on all points of sail, tacking and gybing as required. This unit fine-tunes and enhances skills, improving efficiency and response to wind gusts and other variables. Self rescue in moderate winds and an understanding of relevant safety issues is expected.

| ELEMENT                                                 | PERFORMANCE CRITERIA                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |
|---------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>1 Select equipment and prepare for participation</b> | 1.1 Identify the relationship between volume and body weight and the limitations of different boards and select a suitable sailboard hull<br>1.2 Use information on weather, wind and tides to determine sailing conditions and select a sail of suitable size<br>1.3 Select clothing suitable for the prevailing and expected conditions<br>1.4 Load rig and board, where relevant, and attached to vehicle for transport                                                                                                                                                                                                                                           |
| <b>2 Rig a sailboard</b>                                | 2.1 Rig the sailboard using correct adjustments of boom and head extensions for personal use in the prevailing conditions<br>2.2 Fine tune the rig using downhaul, outhaul and battens<br>2.3 Tie <b>knots</b> which are useful in the activity of windsurfing, and describe their advantages, disadvantages and applications<br>2.4 Identify the names of all parts of the sail                                                                                                                                                                                                                                                                                     |
| <b>3 Launch and land a sailboard</b>                    | 3.1 Launch and land the sailboard to and from the beach with rig and board connected, and by lifting stern<br>3.2 Demonstrate uphauling in shallow water and putting centreboard down and up whilst sailing<br>3.3 Use knowledge of prevailing conditions to leave and return to shore on the most advantageous tack                                                                                                                                                                                                                                                                                                                                                 |
| <b>4 Use enhanced skills to manoeuvre the sailboard</b> | 4.1 Use body weight and rig to steer the sailboard efficiently<br>4.2 Demonstrate appropriate stance of <b>enhanced skills all points of sail</b> and <b>during manoeuvres</b> allowing response to wind gusts<br>4.3 Adjust centre-board position as required to improve stability<br>4.4 Improve speed through correct sail and board trim<br>4.5 Improve gybing, <b>freestyle tricks</b> and tacking from close haul by using body weight and rig<br>4.6 Use knowledge of sailing theory and a combination of above techniques to manoeuvre around a triangular course with confidence<br>4.7 Perform turning and emergency stops effectively in restricted areas |
| <b>5 Maintain safety of self and others</b>             | 5.1 Wear and use safety <b>equipment</b> in accordance with state and or territory legislation, and weather and light or <b>moderate conditions</b><br>5.2 Demonstrate compliance with all relevant "Rules of the Road"<br>5.3 Use sailboard within designated/defined areas<br>5.4 Complete a competent self rescue in ten <b>knots</b> or more<br>5.5 Demonstrate efficient rescue and towing of another sailor and board upwind<br>5.6 Demonstrate adequate preparation of self, rig and sailboard to allow towing by another sailboard and by a boat<br>5.7 Carry essential <b>spares</b> and apply alternate strategies if self rescue fails                    |

|                                                    |                                                                                                                                                                                                       |
|----------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>6 Maintain and repair windsurfing equipment</b> | <ul style="list-style-type: none"><li>6.1 Return sailboard to storage area or vehicle and stow in a manner to minimise damage</li><li>6.2 Identify routine inspection and maintenance tasks</li></ul> |
|----------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|

## Range Statements

The Range Statements provide advice to interpret the scope and context of this unit of competence, allowing for differences between enterprises and workplaces. The Range Statements relate to the unit as a whole and helps facilitate holistic assessment. In addition, the following variables may be present for this particular unit of competency:

| RANGE STATEMENT                                                    | CATEGORIES                                                                                                                                                                                                                                                                                                                                                 |

## Evidence Guide

The Evidence Guide identifies the critical aspects, knowledge and skills to be demonstrated to confirm competence for this unit. This is an integral part of the assessment of competence and should be read in conjunction with the Range Statements.

|                                                      |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |

| SROYSA003B | USE A SAILBOARD IN STRONGER WINDS |
| YSA        | Yachting - Windsurfing            |

**DESCRIPTION:** This unit has been developed for the Outdoor Recreation Industry Training Package.

This unit covers the knowledge and skills to launch, land and sail a sailboard (greater than 320cm with footstraps and a fully battened sail) in winds of at least 12 knots (planing conditions) on enclosed or open waters. This unit introduces the use of high performance sails, footstraps and the harness and relevant safety issues are covered.

| ELEMENT                                                       | PERFORMANCE CRITERIA                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |
|---------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>1 Select equipment and prepare for participation</b>       | 1.1 Use knowledge of advantages and disadvantages of various <b>types of sails</b> to select a suitable sail for the conditions<br>1.2 Use features of board construction to select the most appropriate board for specified requirements<br>1.3 Consider uses and limitations of shorter boards when selecting a board for use in <b>stronger winds</b> (wave and slalom boards)<br>1.4 Select a suitable <b>types of harness</b> the conditions, <b>types of board</b> and ability<br>1.5 Interpret <b>weather patterns</b> and maps to predict the weather and determine the best location for windsurfing suited to personal level of ability |
| <b>2 Rig a sailboard for use in stronger winds</b>            | 2.1 Rig, de-rig and tune a fully battened sail<br>2.2 Adjust correctly harness lines and footstraps<br>2.3 Set up and wear harness correctly                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |
| <b>3 Launch and land a sailboard in stronger winds</b>        | 3.1 Carry the sailboard and rig fully assembled to and from the launch site<br>3.2 Demonstrate a beach start in <b>stronger winds</b> with control of the board in the shallows<br>3.3 Uphaul the rig in <b>stronger winds</b> whilst maintaining stability                                                                                                                                                                                                                                                                                                                                                                                       |
| <b>4 Apply sailing techniques and stance</b>                  | 4.1 Demonstrate hooking in and out of a harness and adopt correct stance whilst hooked in<br>4.2 Demonstrate correct use of the footstraps, including getting in and out, and correct stance when in use<br>4.3 Adjust the mast track whilst sailing<br>4.4 Sail a triangular course in planing conditions, demonstrating the ability to adopt correct stance and the correct use of harness, footstraps and mast track on different points of sail                                                                                                                                                                                               |
| <b>5 Manoeuvre the sailboard in stronger winds</b>            | 5.1 Maintain speed whilst tacking smoothly in <b>stronger winds</b><br>5.2 Demonstrate gybing with centre board both down and up<br>5.3 Maintain stationary position near a marker in moderate winds<br>5.4 Use knowledge of apparent wind, mast track position, railing the board and rig position to maintain stability and sail efficiently in <b>stronger winds</b><br>5.5 Identify characteristics of <b>freestyle tricks</b>                                                                                                                                                                                                                |
| <b>6 Maintain safety of self and others in stronger winds</b> | 6.1 Wear and use safety <b>equipment</b> in accordance with state/territory legislation and weather and light conditions<br>6.2 Compliance with all relevant "Rules of the Road" is demonstrated whilst sailing<br>6.3 Use and confine sailboard within designated/defined areas<br>6.4 Apply appropriate assessment and emergency response procedures when                                                                                                                                                                                                                                                                                       |

|                                                    |                                                                                                                                                                                                                                                                                                                                                                                                                    |
|----------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                                                    | <p>required</p> <p>6.5 Prepare another sailor for towing upwind in moderate winds by de-rigging their sailboard</p> <p>6.6 Demonstrate self rescue in <b>stronger winds</b> with a fully battened sail</p>                                                                                                                                                                                                         |
| <b>7 Maintain and repair windsurfing equipment</b> | <p>7.1 Return sailboard to storage area and stow in a manner to minimise damage</p> <p>7.2 Perform <b>basic repairs</b> to board and <b>equipment</b> in accordance with operational procedures and/or manufacturer's guidelines</p> <p>7.3 Refer repairs beyond the limit of personal ability to relevant specialists</p> <p>7.4 Demonstrate correct procedures for the cleaning and care of boards and sails</p> |

## Range Statements

The Range Statements provide advice to interpret the scope and context of this unit of competence, allowing for differences between enterprises and workplaces. The Range Statements relate to the unit as a whole and helps facilitate holistic assessment. In addition, the following variables may be present for this particular unit of competency:

| RANGE STATEMENT                 | CATEGORIES                                                                                                                                                                                     |

## Evidence Guide

The Evidence Guide identifies the critical aspects, knowledge and skills to be demonstrated to confirm competence for this unit. This is an integral part of the assessment of competence and should be read in conjunction with the Range Statements.

|                                                      |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |

| SROYSA004B | USE LONG BOARDS IN DIFFICULT CONDITIONS |
| YSA        | Yachting - Windsurfing                  |

**DESCRIPTION:** This unit has been developed for the Outdoor Recreation Industry Training Package.

This unit covers the knowledge and skills to launch, land and sail a longboard (usually greater than 320cm with centreboard and fully battened sail) in planing conditions on open waters.

| ELEMENT                                                             | PERFORMANCE CRITERIA                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |
|---------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>1 Select equipment and prepare for participation</b>             | 1.1 Identify <i>features of board design</i> and <i>features of sail design</i> in order to assist equipment selection<br>1.2 Use information on weather patterns and beach conditions to choose an ideal spot for windsurfing in optimum conditions<br>1.3 Chose clothing and equipment to suit prevailing and anticipated conditions                                                                                                                                                                                                                                                                                                                                                                     |
| <b>2 Rig a sailboard for use in <i>difficult conditions</i></b>     | 2.1 Efficiently rig rotational camber-induced and other high-tech sails efficiently and correctly<br>2.2 Ensure harness line adjustments and rig selection are suitable to the conditions<br>2.3 Demonstrate the ability to adjust the rig for all points of sail and different wind strengths and condition                                                                                                                                                                                                                                                                                                                                                                                               |
| <b>3 Launch and land a sailboard in <i>difficult conditions</i></b> | 3.1 Launch sailboard from a beach start through a shore break in a controlled manner<br>3.2 Demonstrate efficient sailing out through small breaking waves<br>3.3 Carry out the water start in varied conditions<br>3.4 Demonstrate controlled landings with board and rig held aloft, whilst applying correct carrying technique                                                                                                                                                                                                                                                                                                                                                                          |
| <b>4 Manoeuvre the sailboard in <i>difficult conditions</i></b>     | 4.1 Demonstrate refined stance incorporating hands, feet and body position, on all points of sail<br>4.2 Improve steering through luffing up and bearing away with correct mast track and centre-board adjustments<br>4.3 Optimise speed through closing the slot, reducing wetted area and using correct footstraps, mast track and harness<br>4.4 Demonstrate efficient tacking in strong winds and rough seas<br>4.5 Effective use of the carve gybe and non-planing gybe are demonstrated in strong winds and rough seas<br>4.6 Plan and demonstrate a routine of <i>freestyle tricks</i><br>4.7 Demonstrate he ability to sail backwards and manoeuvre in rough conditions around a triangular course |
| <b>5 Maintain safety of self and others</b>                         | 5.1 Wear and use safety equipment in accordance with state/territory legislation and weather and light conditions<br>5.2 Outline emergency action to be taken in the event of broken fins, universal, mast and boom<br>5.3 Apply appropriate strategies to assist others in difficulty including assessment of the situation and seeking help when required<br>5.4 Demonstrate <i>jury rigging</i> for different breakages                                                                                                                                                                                                                                                                                 |
| <b>6 Maintain and repair windsurfing equipment</b>                  | 6.1 Follow manufacturer's guidelines and/or operational procedures in order to maintain high tech equipment<br>6.2 Refer repairs beyond the limit of personal ability, to relevant specialists                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |

## Range Statements

The Range Statements provide advice to interpret the scope and context of this unit of competence, allowing for differences between enterprises and workplaces. The Range Statements relate to the unit as a whole and helps facilitate holistic assessment. In addition, the following variables may be present for this particular unit of competency:

| RANGE STATEMENT                 | CATEGORIES                                                                                                                                                                                                           |

## Evidence Guide

The Evidence Guide identifies the critical aspects, knowledge and skills to be demonstrated to confirm competence for this unit. This is an integral part of the assessment of competence and should be read in conjunction with the Range Statements.

| SROYSA005B | USE SHORT BOARDS IN DIFFICULT CONDITIONS |
| YSA        | Yachting - Windsurfing                   |

**DESCRIPTION:** This unit has been developed for the Outdoor Recreation Industry Training Package.

This unit covers the knowledge and skills to launch, land and sail a wave or slalom board with a fully battened sail and no centreboard in planing conditions on open waters with at least a small wave.

| ELEMENT                                                           | PERFORMANCE CRITERIA                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |
|-------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>1 Select equipment and prepare for participation</b>           | 1.1 Select an appropriate board for the conditions and purpose using knowledge of design features of shorter <b>boards</b> and fins<br>1.2 Interpret weather patterns to determine the implications for the shortboard sailor<br>1.3 Chose an ideal spot for shortboard windsurfing in optimum conditions using knowledge of the affect of wind conditions and swell on surf beaches<br>1.4 Determine the most appropriate sail for the conditions using knowledge of sail design and materials<br>1.5 Select clothing and equipment to suit prevailing and anticipated conditions |
| <b>2 Rig a shortboard for use in difficult conditions</b>         | 2.1 Rig efficiently and correctly rotational camber-induced and other high-tech <b>sails</b><br>2.2 Outline the process for tuning specialist <b>sails</b> to achieve speed, control or manoeuvrability<br>2.3 Demonstrate harness line adjustments and rig selection suitable to the conditions<br>2.4 Demonstrate the ability to adjust the rig for all points of sail and different wind strengths and conditions                                                                                                                                                               |
| <b>3 Launch and land a shortboard in difficult conditions</b>     | 3.1 Launch shortboard from a beach, start through waves and return ashore in a controlled manner<br>3.2 Demonstrate alternative launch methods in strong winds<br>3.3 Demonstrate water starts from varying situations, including in waves, in gusts and clew first<br>3.4 Demonstrate uphauling the shorter board and efficient sailing out through waves                                                                                                                                                                                                                         |
| <b>4 Apply techniques and stance to sail a shortboard in surf</b> | 4.1 Adopt a comfortable stance whilst planing in footstraps<br>4.2 Demonstrate efficient upwind sailing<br>4.3 Demonstrate a variety of techniques to achieve <b>wave jumps and landings</b><br>4.4 Apply techniques for riding on a wave, including the ability to follow the break and avoid the close-out<br>4.5 Demonstrate effective technique to develop speed whilst controlling excessive power<br>4.6 Demonstrate use of waves, rips and currents to enhance sailing technique, speed and stability                                                                       |
| <b>5 Manoeuvre the shortboard in difficult conditions</b>         | 5.1 Demonstrate efficient tacking on a shortboard in strong winds and rough seas<br>5.2 Demonstrate the carve <b>gybe effectively</b> in strong winds and rough seas to enhance manoeuvrability                                                                                                                                                                                                                                                                                                                                                                                    |
| <b>6 Maintain safety of self and others</b>                       | 6.1 Demonstrate how safety equipment is worn/used in accordance with state/territory legislation and weather and light conditions                                                                                                                                                                                                                                                                                                                                                                                                                                                  |

|                                                    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |
|----------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                                                    | <ul style="list-style-type: none"><li>6.2 Demonstrate compliance with rules of right of way in waves</li><li>6.3 Complete a self rescue on a shortboard</li><li>6.4 Outline emergency action to be taken in the event of broken fins, universal, mast and boom</li><li>6.5 Outline the procedures for the rescue of others using a short board</li><li>6.6 Apply appropriate strategies to assist others in difficulty including assessment of the situation and seeking help when required</li><li>6.7 Demonstrate jury rigging for different breakages</li></ul> |
| <b>7 Maintain and repair windsurfing equipment</b> | <ul style="list-style-type: none"><li>7.1 Follow manufacturer's guidelines and/or operational procedures in order to maintain high tech equipment</li><li>7.2 Refer repairs beyond the limit of personal ability to relevant specialists</li></ul>                                                                                                                                                                                                                                                                                                                 |

## Range Statements

The Range Statements provide advice to interpret the scope and context of this unit of competence, allowing for differences between enterprises and workplaces. The Range Statements relate to the unit as a whole and helps facilitate holistic assessment. In addition, the following variables may be present for this particular unit of competency:

| RANGE STATEMENT              | CATEGORIES                                                                                                                                                                                   |

## Evidence Guide

The Evidence Guide identifies the critical aspects, knowledge and skills to be demonstrated to confirm competence for this unit. This is an integral part of the assessment of competence and should be read in conjunction with the Range Statements.

|                                                      |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |

| YSA        | Yachting - Windsurfing |

**DESCRIPTION:** This unit has been developed for the Outdoor Recreation Industry Training Package.

This unit covers the knowledge and skills to instruct learners to achieve competencies in order to participate independently, or with minimal supervision, in a windsurfing activity.

| ELEMENT                                                                    | PERFORMANCE CRITERIA                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |

| <b>1 Plan an instructional session for teaching windsurfing skills</b>     | 1.1 Identify client needs and assess current competencies of group/individuals in order to determine the aims and objectives of the instructional session<br>1.2 Select a suitable site for the instructional session, based on an assessment of client needs, <b>hazards</b> , abilities and session aims<br>1.3 Plan appropriate instructional activities which will facilitate and enhance the learning process<br>1.4 Determine a suitable <b>sequence</b> of instruction<br>1.5 Access resources to conduct instructional activities, games and drills<br>1.6 Provide relevant pre-activity information to clients<br>1.7 Prepare contingency plans for instructional session to cope with inclement weather and other factors which may affect the ability to conduct the session<br>1.8 Conduct a risk assessment of the instructional activities and location and implement a risk management plan in accordance with the organisation's guidelines and operating procedures |
| <b>2 Select appropriate resources required to teach windsurfing skills</b> | 2.1 Select and access <b>equipment</b> and <b>other resources</b> suitable for the instructional objectives<br>2.2 Select, fit and adjust <b>equipment</b> (where appropriate) to suit the needs of individual clients<br>2.3 Check all <b>equipment</b> to ensure compliance with occupational health and safety legislation, manufacturer's recommendations and/or operating procedures, and to ensure that it is in good working order<br>2.4 Check contents of first aid and repair kits to ensure their suitability to the location and activity<br>2.5 Arrange, where required, protective and/or safety clothing for each client                                                                                                                                                                                                                                                                                                                                              |
| <b>3 Introduce an instructional windsurfing session</b>                    | 3.1 Communicate the aims of the instructional session to the clients<br>3.2 Encourage clients to seek clarification, information and feedback<br>3.3 Brief the clients on the safety practices, procedures and behaviour appropriate to the instructional session<br>3.4 Define activity boundaries/training area and/or clearly outline to the clients<br>3.5 Check clothing and footwear of clients for suitability to the session<br>3.6 Provide information on <b>equipment</b> selection, fitting or use where relevant to the instructional session's aims                                                                                                                                                                                                                                                                                                                                                                                                                     |
| <b>4 Conduct an instructional windsurfing session</b>                      | 4.1 Conduct "warm up"/introductory activities (where required) to reduce the risk of injury when client's are participating in physical activities<br>4.2 Monitor individual client's performance in instructional activities<br>4.3 Provide positive encouragement and/or feedback to each client at a suitable time to maintain a positive learning environment<br>4.4 Ensure instructional activity allows for repetition of skills<br>4.5 Evaluate instructional activities for effectiveness and implement modifications when required<br>4.6 Assess risks associated with the conduct of instructional activities constantly and remove, minimise or avoid <b>hazards</b> in accordance with risk management                                                                                                                                                                                                                                                                   |

|                                                                                   |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |
|-----------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                                                                                   | <p>plan and instructional objectives.</p> <p>4.7 Monitor <b>equipment</b> usage, behaviour and location of clients in order to review safety</p> <p>4.8 Ensure personal competencies with respect to topics and skills within the instructional session are at a sufficient level to enable correct demonstration of skills, accurate provision of information and to engender the confidence of the client(s)</p> <p>4.9 Demonstrate how personal competencies enable emergency and non-routine situations to be dealt with in accordance with operating procedures</p>                                                                                                                                                                                                 |
| <b>5 Apply appropriate teaching techniques for a windsurfing session</b>          | <p>5.1 Communicate instructions and information clearly and concisely</p> <p>5.2 Perform demonstrations for clients (where required) with a high level of technical correctness and accurate description</p> <p>5.3 Break-down complex skills and techniques into component parts and describe with key teaching points</p> <p>5.4 Identify faults in technique and provide a variety of solutions, where relevant, to correct faults</p> <p>5.5 Provide adequate time for practice, following fault correction and feedback</p> <p>5.6 Explain activities, drills or techniques which may improve skills</p>                                                                                                                                                            |
| <b>6 Teach required knowledge that applies to a windsurfing activity</b>          | <p>6.1 Teach required knowledge, ethics, codes of behaviour, points of interest or principles relevant to windsurfing and achievement of competency, in a manner which achieves interest and client understanding</p> <p>6.2 Instruct clients on factors to consider when planning for participation in windsurfing</p> <p>6.3 Identify minimal impact practices appropriate to windsurfing, and determine client level of understanding</p> <p>6.4 Outline specific aspects of <b>equipment</b> selection, use and care, to enable the client to achieve competency at the relevant level</p> <p>6.5 Explain communication systems and relevant calls or signals used whilst participating in windsurfing, and determine client level of understanding in their use</p> |
| <b>7 Teach safety and rescue procedures appropriate to a windsurfing activity</b> | <p>7.1 Instruct clients in appropriate emergency response procedures and techniques applicable to windsurfing, and the level of competency required</p> <p>7.2 Explain the principles and practices of group management, in the context of emergency situations</p> <p>7.3 Teach clients industry standard safety practices relevant to windsurfing</p> <p>7.4 Demonstrate rescue techniques specific to windsurfing, and provide opportunities for practice</p> <p>7.5 Clarify the use and selection of specific emergency response <b>equipment</b> that should be carried, relevant to the level of competency</p> <p>7.6 Assess client's level of understanding via questioning techniques and/or formal assessment</p>                                              |
| <b>8 Teach windsurfing skills</b>                                                 | <p>8.1 Explain and demonstrate key points of technique or skill</p> <p>8.2 Outline the <b>sequence</b> or combination of skill to achieve effective or efficient results</p> <p>8.3 Identify different applications of skill or technique, and where it is applicable/not applicable</p> <p>8.4 Practice skills or techniques and observe clients in order to provide feedback</p> <p>8.5 Assess clients to determine poor or incorrect technique</p> <p>8.6 Provide opportunities for additional practice, where required</p>                                                                                                                                                                                                                                           |
| <b>9 Communicate further</b>                                                      | <p>9.1 Inform clients of locations, suitable to their skill level, for participating in windsurfing</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |

|                                                                       |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |
|-----------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| windsurfing knowledge                                                 | <p>9.2 Provide information relevant to the competencies being taught, on the range of <b>equipment</b> and clothing available or required, and factors affecting choice</p> <p>9.3 Inform clients of opportunities to further develop their personal skills and knowledge</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |
| <b>10 Conclude and evaluate the windsurfing instructional session</b> | <p>10.1 Allow time for "cooling down" at the end of the session, check <b>equipment</b> for damage and return and store in an appropriate fashion</p> <p>10.2 Determine the level of learning achieved directly through assessment or indirectly from Assessor</p> <p>10.3 Apply feedback from Assessor or assessment to evaluate the effectiveness of the instructional activities, the suitability of the instructional method, the feedback provided to clients and the initial assessment of client's abilities</p> <p>10.4 Evaluate the validity and reliability of assessment/evaluation tools used throughout the session to monitor learning</p> <p>10.5 Determine modifications to activities and delivery method(s), based on evaluations</p> <p>10.6 Evaluate the suitability of <b>other related factors</b></p> |

## Range Statements

The Range Statements provide advice to interpret the scope and context of this unit of competence, allowing for differences between enterprises and workplaces. The Range Statements relate to the unit as a whole and helps facilitate holistic assessment. In addition, the following variables may be present for this particular unit of competency:

| RANGE STATEMENT              | CATEGORIES                                                                                                                                                                                                                                                                                                       |

## Evidence Guide

The Evidence Guide identifies the critical aspects, knowledge and skills to be demonstrated to confirm competence for this unit. This is an integral part of the assessment of competence and should be read in conjunction with the Range Statements.

|                                                      |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |

| YSB        | Yachting - Small boat                                          |

**DESCRIPTION:** This unit has been developed for the Outdoor Recreation Industry Training Package.

This unit covers the knowledge and skills required to rig and sail a small boat on a marked course in controlled conditions, under supervision.

| ELEMENT                                                             | PERFORMANCE CRITERIA                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |

| <b>1 Select equipment and prepare for participation</b>             | 1.1 Source information on weather and wind conditions to enable selection of a location to suit personal skill level<br>1.2 Select clothing suitable for the prevailing and expected conditions<br>1.3 Identify <b>risks</b> associated with the <b>small boat</b> sailing environment and implement strategies to reduce <b>risks</b><br>1.4 Wear/use safety <b>equipment</b> in accordance with state/territory legislation and weather and light conditions<br>1.5 Identify <b>collision and water traffic regulations</b> relevant to the activity area and recognise other safety signals, such as code flags                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |
| <b>2 Rig and de-rig a small boat</b>                                | 2.1 Apply correct terminology to identify the <b>main parts of a small boat</b><br>2.2 Identify <b>sails</b> , and their component parts<br>2.3 Identify fittings on mast, and boom and use <b>appropriate knots</b> to rig <b>sails</b> , under supervision                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |
| <b>3 Leave and return to beach/launching facility</b>               | 3.1 Determine <b>wind direction</b> to enable safe, easy launching and return<br>3.2 Launch and land the <b>small boat</b> efficiently in calm, <b>controlled conditions</b> whilst maintaining stability, correct direction and <b>speed controlled during launch/return</b><br>3.3 Adopt the correct position on the <b>small boat</b> and secure the centreboard and rudder<br>3.4 Prepare centreboard and rudder for return and raised on return                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |
| <b>4 Sail a marked course in calm conditions using basic skills</b> | 4.1 Recognise and apply <b>primary boat controls</b> , and their effects on boat movement<br>4.2 Identify <b>common terminology with respect to the wind</b> and apply knowledge of wind, wind indicators and directional change in relation to wind to determine the sailing directions, based on current <b>wind direction</b><br>4.3 Apply knowledge of wind awareness, wind indicators and angle of the sail to slow and speed up the <b>small boat</b> using a basic heave to as a reference point<br>4.4 Recognise indicators identifying that the boat is being sailed close hauled to sail the boat to destination directly upwind/to windward<br>4.5 Identify the No-Go Zone perimeters and tack the boat from close-hauled to close-hauled<br>4.6 Recognise indicators identifying that the boat is being sailed on a dead run and gybe the mainsail while the boat remains sailing on a dead run<br>4.7 Identify potential hazards when sailing downwind and gybing and implement strategies to avoid the unexpected gybe<br>4.8 Apply knowledge and awareness of <b>wind direction</b> relative to the boat, sail setting and a combination of techniques to manoeuvre a <b>small boat</b> through tacks and gybes where necessary to sail a small marked course which requires a range of points of sailing, including but not limited to close-hauled reaching and running, to complete the course<br>4.9 Demonstrate compliance with all relevant <b>collision and water traffic</b> |

|                                                  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |
|--------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                                                  | <p><b>regulations</b> and sail the boat within designated/defined areas</p> <p>4.10 Maintain communication with other craft and with other crew members, where appropriate</p>                                                                                                                                                                                                                                                                                                    |
| <b>5 Perform capsize drills</b>                  | <p>5.1 Identify reasons for capsize</p> <p>5.2 Implement, in a capsize situation, strategies to avoid injury</p> <p>5.3 Implement <b>capsize procedures</b> in the event of a capsize including visual means of attracting attention</p> <p>5.4 Demonstrate adequate communication, correct technique and order of events to right a small boat, as part of a team</p>                                                                                                            |
| <b>6 Participate in rescue and towing drills</b> | <p>6.1 Identify reasons for towing a <b>small boat</b> and prepare the boat for towing and handle safely under tow with instructor guidance and <b>towing procedures</b></p> <p>6.2 Release the <b>small boat</b> from tow under instructor guidance</p> <p>6.3 Implement, under direct supervision and instructor guidance, a <b>crew recovery procedures</b> drill demonstrating the procedures to be undertaken in the event of separation of a crew member from the craft</p> |
| <b>7 Handle small boat ashore</b>                | <p>7.1 Carry and stow the <b>small boat</b> in accordance with supervisor's directions</p> <p>7.2 Stow or store <b>equipment</b> in accordance with manufacturer's recommendations and/or supervisor's directions</p>                                                                                                                                                                                                                                                             |

## Range Statements

The Range Statements provide advice to interpret the scope and context of this unit of competence, allowing for differences between enterprises and workplaces. The Range Statements relate to the unit as a whole and helps facilitate holistic assessment. In addition, the following variables may be present for this particular unit of competency:

| RANGE STATEMENT                                    | CATEGORIES                                                                                                                                                                                                                                                                                           |

## Evidence Guide

The Evidence Guide identifies the critical aspects, knowledge and skills to be demonstrated to confirm competence for this unit. This is an integral part of the assessment of competence and should be read in conjunction with the Range Statements.

| SROYSB002B | SAIL A SMALL BOAT IN LIGHT TO MODERATE CONDITIONS USING ENHANCED SKILLS |
| YSB        | Yachting - Small boat                                                   |

**DESCRIPTION:** This unit has been developed for the Outdoor Recreation Industry Training Package.

This unit covers the knowledge and skills required to rig and sail a small boat to best advantage, using a variety of techniques in light to moderate conditions and under minimal guidance.

| ELEMENT                                                                             | PERFORMANCE CRITERIA                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |

## Range Statements

The Range Statements provide advice to interpret the scope and context of this unit of competence, allowing for differences between enterprises and workplaces. The Range Statements relate to the unit as a whole and helps facilitate holistic assessment. In addition, the following variables may be present for this particular unit of competency:

| RANGE STATEMENT                                | CATEGORIES                                                                                                                                                                                                                                                                                                                                 |

## Evidence Guide

The Evidence Guide identifies the critical aspects, knowledge and skills to be demonstrated to confirm competence for this unit. This is an integral part of the assessment of competence and should be read in conjunction with the Range Statements.

| SROYSB003B | SAIL A SMALL BOAT IN MODERATE AND/OR VARIABLE CONDITIONS |
| YSB        | Yachting - Small boat                                    |

**DESCRIPTION:** This unit has been developed for the Outdoor Recreation Industry Training Package.

This unit covers the knowledge and skills required to use a variety of different techniques to sail a small boat in moderate and variable conditions to best advantage.

| ELEMENT                                                             | PERFORMANCE CRITERIA                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |
|---------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>1 Apply knowledge of wind, tides and currents to sailing</b>     | 1.1 Determine probable water conditions, based on current information on weather conditions, wind directions and tide times and water depth<br>1.2 Determine the effect of local water conditions on small boats (eg, dinghies) and sailing conditions<br>1.3 Apply knowledge of <b>wind indicators</b> and signs to anticipate gusts, lulls, lifts and knocks<br>1.4 Describe and apply ways in which variations in wind strength and direction may be used to sailing practice                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |
| <b>2 Handle a small boat in moderate and/or variable conditions</b> | 2.1 Identify <b>factors to consider when sailing a small boat in moderate and/or variable winds</b><br>2.2 Demonstrate the ability to control the speed of the small boat in <b>moderate and/or variable conditions</b> , by using the techniques of heaving to and by backing the mainsail<br>2.3 Identify situations requiring the reduction of sail whilst afloat and lower/raise the sail efficiently on the water, when applicable<br>2.4 Identify situations favouring the use and benefits of roll tacking and roll gybing and demonstrate the techniques in the appropriate conditions<br>2.5 Apply the primary boat controls, balance, sail trim, <b>stopping techniques</b> and steering to sail the boat efficiently in <b>variable conditions</b><br>2.6 Identify and utilise wind shifts when sailing upwind and downwind<br>2.7 Identify and anticipate gusts and lulls<br>2.8 Implement effective boat handling skills and communication when hit by gusts to maintain or enhance speed at all times<br>2.9 Maintain communication with other craft and with other crew members, where appropriate |
| <b>3 Handle a spinnaker in moderate and/or variable conditions</b>  | 3.1 Launch a spinnaker from both the leeward and windward positions<br>3.2 Trim the spinnaker to cater for changes in wind strength and direction to maintain or enhance speed<br>3.3 Steer the boat to maintain or enhance balance and speed according to the fluctuations in the conditions                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |

## Range Statements

The Range Statements provide advice to interpret the scope and context of this unit of competence, allowing for differences between enterprises and workplaces. The Range Statements relate to the unit as a whole and helps facilitate holistic assessment. In addition, the following variables may be present for this particular unit of competency:

| RANGE STATEMENT                                                                             | CATEGORIES                                                                                                                                                                                                                                                                                      |

## Evidence Guide

The Evidence Guide identifies the critical aspects, knowledge and skills to be demonstrated to confirm competence for this unit. This is an integral part of the assessment of competence and should be read in conjunction with the Range Statements.

|                                                      |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |

| SROYSB004A | INSTRUCT YACHTING (SMALL BOATS) |
| YSB        | Yachting - Small boat           |

**DESCRIPTION:** This unit has been developed for the Outdoor Recreation Industry Training Package.

This unit covers the knowledge and skills to instruct learners to achieve competencies in order to participate independently, or with minimal supervision, in a yachting activity (small boats).

| ELEMENT                                                                            | PERFORMANCE CRITERIA                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |

| <b>1 Plan an instructional session for teaching small boat yachting skills</b>     | 1.1 Identify client needs and assess current competencies of group/individuals in order to determine the aims and objectives of the instructional session<br>1.2 Select a suitable site for the instructional session, based on an assessment of client needs, <b>hazards</b> , abilities and session aims<br>1.3 Plan appropriate instructional activities which will facilitate and enhance the learning process<br>1.4 Determine a suitable <b>sequence</b> of instruction<br>1.5 Access resources to conduct instructional activities, games and drills<br>1.6 Provide relevant pre-activity information to clients<br>1.7 Prepare contingency plans for instructional session to cope with inclement weather and other factors which may affect the ability to conduct the session<br>1.8 Conduct a risk assessment of the instructional activities and location and implement a risk management plan in accordance with the organisation's guidelines and operating procedures |
| <b>2 Select appropriate resources required to teach small boat yachting skills</b> | 2.1 Select and access <b>equipment</b> and <b>other resources</b> suitable for the instructional objectives<br>2.2 Select, fit and adjust <b>equipment</b> (where appropriate) to suit the needs of individual clients<br>2.3 Check all <b>equipment</b> to ensure compliance with occupational health and safety legislation, manufacturer's recommendations and/or operating procedures, and to ensure that it is in good working order<br>2.4 Check contents of first aid and repair kits to ensure their suitability to the location and activity<br>2.5 Arrange, where required, protective and/or safety clothing for each client                                                                                                                                                                                                                                                                                                                                              |
| <b>3 Introduce an instructional small boat yachting session</b>                    | 3.1 Communicate the aims of the instructional session to the clients<br>3.2 Encourage clients to seek clarification, information and feedback<br>3.3 Brief the clients on the safety practices, procedures and behaviour appropriate to the instructional session<br>3.4 Define activity boundaries/training area and/or clearly outline to the clients<br>3.5 Check clothing and footwear of clients for suitability to the session<br>3.6 Provide information on <b>equipment</b> selection, fitting or use where relevant to the instructional session's aims                                                                                                                                                                                                                                                                                                                                                                                                                     |
| <b>4 Conduct an instructional small boat yachting session</b>                      | 4.1 Conduct "warm up"/introductory activities (where required) to reduce the risk of injury when client's are participating in physical activities<br>4.2 Monitor individual client's performance in instructional activities<br>4.3 Provide positive encouragement and/or feedback to each client at a suitable time to maintain a positive learning environment<br>4.4 Ensure instructional activity allows for repetition of skills<br>4.5 Evaluate instructional activities for effectiveness and implement modifications when required<br>4.6 Assess risks associated with the conduct of instructional activities constantly                                                                                                                                                                                                                                                                                                                                                   |

|                                                                                           |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |
|-------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                                                                                           | <p>and remove, minimise or avoid <b>hazards</b> in accordance with risk management plan and instructional objectives.</p> <p>4.7 Monitor <b>equipment</b> usage, behaviour and location of clients in order to review safety</p> <p>4.8 Ensure personal competencies with respect to topics and skills within the instructional session are at a sufficient level to enable correct demonstration of skills, accurate provision of information and to engender the confidence of the client(s)</p> <p>4.9 Demonstrate how personal competencies enable emergency and non-routine situations to be dealt with in accordance with operating procedures</p>                                                                                                                                                 |
| <b>5 Apply appropriate teaching techniques for a small boat yachting session</b>          | <p>5.1 Communicate instructions and information clearly and concisely</p> <p>5.2 Perform demonstrations for clients (where required) with a high level of technical correctness and accurate description</p> <p>5.3 Break-down complex skills and techniques into component parts and describe with key teaching points</p> <p>5.4 Identify faults in technique and provide a variety of solutions, where relevant, to correct faults</p> <p>5.5 Provide adequate time for practice, following fault correction and feedback</p> <p>5.6 Explain activities, drills or techniques which may improve skills</p>                                                                                                                                                                                            |
| <b>6 Teach required knowledge that applies to a small boat yachting activity</b>          | <p>6.1 Teach required knowledge, ethics, codes of behaviour, points of interest or principles relevant to small boat yachting and achievement of competency, in a manner which achieves interest and client understanding</p> <p>6.2 Instruct clients on factors to consider when planning for participation in small boat yachting</p> <p>6.3 Identify minimal impact practices appropriate to small boat yachting, and determine client level of understanding</p> <p>6.4 Outline specific aspects of <b>equipment</b> selection, use and care, to enable the client to achieve competency at the relevant level</p> <p>6.5 Explain communication systems and relevant calls or signals used whilst participating in small boat yachting, and determine client level of understanding in their use</p> |
| <b>7 Teach safety and rescue procedures appropriate to a small boat yachting activity</b> | <p>7.1 Instruct clients in appropriate emergency response procedures and techniques applicable to small boat yachting, and the level of competency required</p> <p>7.2 Explain the principles and practices of group management, in the context of emergency situations</p> <p>7.3 Teach clients industry standard safety practices relevant to small boat yachting</p> <p>7.4 Demonstrate rescue techniques specific to small boat yachting, and provide opportunities for practice</p> <p>7.5 Clarify the use and selection of specific emergency response <b>equipment</b> that should be carried, relevant to the level of competency</p> <p>7.6 Assess client's level of understanding via questioning techniques and/or formal assessment</p>                                                      |
| <b>8 Teach small boat yachting skills</b>                                                 | <p>8.1 Explain and demonstrate key points of technique or skill</p> <p>8.2 Outline the <b>sequence</b> or combination of skill to achieve effective or efficient results</p> <p>8.3 Identify different applications of skill or technique, and where it is applicable/not applicable</p> <p>8.4 Practice skills or techniques and observe clients in order to provide feedback</p> <p>8.5 Assess clients to determine poor or incorrect technique</p> <p>8.6 Provide opportunities for additional practice, where required</p>                                                                                                                                                                                                                                                                           |

|                                                                               |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |
|-------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>9</b><br><b>Communicate further small boat yachting knowledge</b>          | 9.1 Inform clients of locations, suitable to their skill level, for participating in small boat yachting<br>9.2 Provide information relevant to the competencies being taught, on the range of <b>equipment</b> and clothing available or required, and factors affecting choice<br>9.3 Inform clients of opportunities to further develop their personal skills and knowledge                                                                                                                                                                                                                                                                                                                                                                                                                    |
| <b>10 Conclude and evaluate the small boat yachting instructional session</b> | 10.1 Allow time for "cooling down" at the end of the session, check <b>equipment</b> for damage and return and store in an appropriate fashion<br>10.2 Determine the level of learning achieved directly through assessment or indirectly from Assessor<br>10.3 Apply feedback from Assessor or assessment to evaluate the effectiveness of the instructional activities, the suitability of the instructional method, the feedback provided to clients and the initial assessment of client's abilities<br>10.4 Evaluate the validity and reliability of assessment/evaluation tools used throughout the session to monitor learning<br>10.5 Determine modifications to activities and delivery method(s), based on evaluations<br>10.6 Evaluate the suitability of <b>other related factors</b> |

## Range Statements

The Range Statements provide advice to interpret the scope and context of this unit of competence, allowing for differences between enterprises and workplaces. The Range Statements relate to the unit as a whole and helps facilitate holistic assessment. In addition, the following variables may be present for this particular unit of competency:

| RANGE STATEMENT              | CATEGORIES                                                                                                                                                                                                                                                                                                                                   |

## Evidence Guide

The Evidence Guide identifies the critical aspects, knowledge and skills to be demonstrated to confirm competence for this unit. This is an integral part of the assessment of competence and should be read in conjunction with the Range Statements.

|                                                      |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |
