Assessment Requirements for NWPNET063 Use digital imaging equipment in the field

Assessment Requirements for NWPNET063 Use digital imaging equipment in the field

Modification History

Release 1. This is the first release of this unit of competency in the NWP National Water Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and include:

- arranging repairs and confirming they have been completed appropriately
- conducting risk assessments
- interpretating data from digital imaging equipment
- reading maps, plans and diagrams
- reporting and communicating infrastructure issues to relevant personnel
- restoring worksite
- securing and identifying the work area whilst undertaking work
- using digital imaging equipment to locate and identify infrastructure issues.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria and include knowledge of:

- digital data storage
- digital imaging equipment capability
- environmental procedures
- hazards, risks and controls specific to work health and safety (WHS) operating procedures
- network cleaning techniques
- network water or wastewater quality hazards
- use and maintenance of relevant equipment
- water or wastewater networks.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the

time of assessment.

Assessment must occur in suitable workplace operational situations. Where this is not appropriate, assessment must occur in suitable simulated workplace operational situations reflecting actual workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- relevant and appropriate materials, tools, facilities, equipment and personal protective equipment (PPE) currently used in industry
- applicable relevant documentation, including workplace procedures, industry standards, equipment specifications, regulations, codes of practice and operation manuals
