# **Assessment Requirements for PMBTECH402 Set advanced or complex dies**

**Release: 1**

# Assessment Requirements for PMBTECH402 Set advanced or complex dies

## Modification History

Release 1. Supersedes and is equivalent to PMBTECH402B Set advanced or complex dies

## Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria and demonstrate the ability to:

- read and interpret technical and product specifications, instruments/control panels and data
- plan and prepare for die changeover
- remove, clean and store die according to procedures
- place, attach and adjust die to specifications
- make hydraulic, pneumatic and electrical connections as required
- set machine conditions for new die
- monitor key variables, including:
  - alignment and fitting to patterns
  - stability during production
  - fine adjustments of die movements to optimise production
  - die temperature control
  - die component stroke
  - clamping force
  - speeds
  - pressure
  - sequencing
  - interlocks
  - machine pressure, sequencing and interlocks
- check the installation and operation of new die to identify conformance and/or non-conformance to specifications
- make adjustments to settings and equipment operation to rectify variations in equipment operation or product quality
- identify hazards and apply relevant hazard controls
- distinguish between causes of problems, such as:
  - operational problems
  - instrument failure/malfunction
  - hydraulic failure/malfunction
  - pneumatic failure/malfunction
  - electrical failure/malfunction

- mechanical failure/malfunction
- wrong readings
- wrong dies
- wrongly set die
- worn or damaged die
- non-optimum process conditions
- incorrect material type or poor quality
- equipment design deficiencies
- resolve non-routine problems

communicate effectively with team/work group and supervisors complete workplace records.

## Knowledge Evidence

Must provide evidence that demonstrates knowledge relevant to their job sufficient to fulfil their job role, including knowledge of:

- types and features of advanced/complex dies, including
  - sliding blocks or cores actuated by skew pins or cams
  - baffled, spiral, tube, and heat pipe cooling systems
  - rising cores
  - internally actuated unscrewing systems
  - external power and control sources,
  - externally actuated sliding blocks, cores and unscrewing systems
  - safety interlocks
- die setting procedures for advanced/complex dies
- verification procedures for advanced/complex dies
- impact of incorrect or faulty fitting
- settings and adjustments of equipment, machine components and ancillary equipment in fine tuning dies
- routine and non-routine problems that may arise, the range of possible causes and appropriate actions
- organisation procedures relevant to the work environment/job role
- hierarchy of control
- hazards that may arise in the job/work environment and:
  - their possible causes
  - potential consequences
  - appropriate risk controls.

## Assessment Conditions

- The unit should be assessed holistically and the judgement of competence shall be based on a holistic assessment of the evidence.

- The collection of performance evidence is best done from a report and/or folio of evidence drawn from:
  - a single project which provides sufficient evidence of the requirements of all the elements and performance criteria
  - multiple smaller projects which together provide sufficient evidence of the requirements of all the elements and performance criteria.
- A third-party report, or similar, may be needed to testify to the work done by the individual, particularly when the project has been done as part of a project team.
- Assessment should use a real project in an operational workplace. Where this is not possible or where personal safety or environmental damage are limiting factors assessment must occur using a sufficiently rigorous simulated environment that reflects realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment in a simulated environment should use evidence collected from demonstration of skills and one or more of:
  - walk-throughs
  - pilot plant operation
  - industry-based case studies/scenarios
  - 'what ifs'.
- Knowledge evidence may be collected concurrently with performance evidence or through an independent process, such as workbooks, written assessments or interviews.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.
- The regulatory framework will be reflected in workplace policies and procedures and is not required to be independently assessed.
- Foundation skills are integral to competent performance of the unit and should not be assessed separately.
- Assessors must satisfy the assessor competency requirements that are in place at the time of the assessment as set by the VET regulator.
- In addition the assessor or anyone acting in subject matter expert role in assessment shall demonstrate both technical competency and currency. If the assessor cannot demonstrate technical competency and currency they shall assess with a subject matter expert who does meet these requirements.
- Technical competence can be demonstrated through one or more of:
  - relevant VET or other qualification/Statement of Attainment
  - appropriate workplace experience undertaking the type of work being assessed under routine and non-routine conditions
  - appropriate workplace experience supervising/evaluating the type of work being assessed under routine and non-routine conditions
- Currency can be demonstrated through one or more of:

- being currently employed undertaking the type of work being assessed
- being employed by the organisation undertaking the type of work being assessed and having maintained currency in accordance with that organisation's policies and procedures
- having consulted/had contact with an organisation undertaking the type of work being assessed within the last twelve months, the consultation/contact being related to assessment
- conducting on the job training/assessments of the type of work being assessed
- being an active member of a relevant professional body and participating in activities relevant to the assessment of this type of work.
