PMC60110 Advanced Diploma of Manufactured Mineral Products

Revision Number: 1

PMC60110 Advanced Diploma of Manufactured Mineral Products

Modification History

Not applicable.

Description

This qualification covers the skills and knowledge required to perform advanced technical and para-professional operations within the manufactured mineral products industries.

Job roles/employment outcomes

The Advanced Diploma of Manufactured Mineral Products is intended for process plant technologists or para-professionals who may have worked their way up through the manufactured mineral products certificate qualifications or who have entered the industry at this level, either from another industry or trade occupation.

The process plant technologist will analyse performance and failure in equipment and products and will assist in the development on new and modified products.

Application

This qualification is typically used to develop employees performing a highly technical role that includes an ability to lead others and conduct technical problem solving according to the needs of the work in the manufactured mineral products industries.

People with this qualification may be expected to work in one of the following sectors:

- cement
- precast concrete
- premixed concrete
- clay products
- ceramic products
- float (flat) glass
- glass containers
- refractories
- plaster (both fibrous plaster and plaster boards)
- fibre cement boards
- ground minerals
- abrasive grinding wheels and cutting discs
- other areas.

Training programs for this qualification are suitable to be undertaken as part of a formal training contract with an employer under an Australian Traineeship or Apprenticeship arrangement.

Pathways into the qualification

The Advanced Diploma of Manufactured Mineral Products offers advanced technical training to people who have completed PMC50110 Diploma of Manufactured Mineral Products or other relevant qualifications, or who have significant relevant industry experience without formal qualifications. Credit for this qualification may include units contained within relevant skill sets.

Pathways from the qualification

Further training pathways from this qualification include PMC70110 Vocational Graduate Certificate in Refractories Engineering, MSA60108 Advanced Diploma of Manufacturing Technology, MSA61108 Advanced Diploma of Competitive Manufacturing or other relevant qualifications, including appropriate vocational graduate qualifications.

Additional qualification advice

MSA61108 Advanced Diploma of Competitive Manufacturing is available for team leaders and managers at this level who already possess technical skills and who require additional manufacturing practice skills above those available in this qualification.

Licensing considerations

There are no specific licences that relate to this qualification. However, some units of competency in this qualification may have licensing or regulatory requirements. Local regulations should be checked for details.

Employability Skills Summary

EMPLOYABILITY SKILLS QUALIFICATION SUMMARY

| Employability Skill | Industry/enterprise requirements for this qualification | | |
|---------------------------|--|--|--|
| Communication | initiate communication about multiple subjects and with multiple audiences complete incident, technical and other reports use technical information and manufacturer information collect, analyse and organise information communicate problem solutions, ideas and information use and develop workplace documentation maintain workplace records | | |
| Teamwork | identify and describe own role and role of others work within and lead a team resolve conflicts between team members develop teamwork strategies | | |
| Problem solving | recognise a problem or a potential problem determine problems needing priority action refer problems outside area of responsibility to appropriate person identify and develop appropriate theory base for problem seek information and assistance as required to solve problems solve problems within area of responsibility follow through items initiated until final resolution has occurred identify and isolate faults in equipment use a range of formal problem solving techniques | | |
| Initiative and enterprise | identify the most appropriate process conditions for equipment determine problems needing action develop and recommend required action report problems outside area of responsibility distinguish between causes of faults recommend new and improved ways of doing things | | |
| Planning and organising | prioritise actions to achieve required outcomes plan own work requirements and assist others to plan | | |

| EMPLOYABILITY SKILLS | QUALIFICATION SUMMARY | |
|----------------------|--|--|
| | theirs | |
| | • plan and organise activities and projects | |
| | • identify tasks to achieve team goals | |
| | organise allocation of tasks | |
| | • monitor completion of allocated tasks | |
| | • develop and adjust a production schedule | |
| Self-management | • plan own work requirements | |
| | • operate within appropriate time constraints, work standards and other requirements | |
| | • select, use and improve appropriate equipment, materials, processes and procedures | |
| | • plan to ensure effective production/projects | |
| | select and apply standard procedures | |
| | identify resource requirements | |
| | • recognise limitations and seek timely advice | |
| Learning | ask questions to gain information | |
| | • identify sources of information to expand knowledge and understanding | |
| | lead improvement procedures | |
| | lead the development of continuous improvement strategies | |
| | assist others develop competency | |
| | develop enterprise knowledge | |
| | • identify and address learning gaps in team | |
| Technology | • operate, adjust and optimise the operation of equipment | |
| | develop equipment and process | |
| | • start up and shut down equipment | |
| | • set up equipment | |
| | monitor quality | |
| | • function and operating principles of equipment | |
| | maintain workplace records | |

EMPLOYABILITY SKILLS QUALIFICATION SUMMARY

Packaging Rules

Packaging Rules

To be awarded the Advanced Diploma of Manufactured Mineral Products competency must be achieved in **fifteen** (15) units of competency:

• four (4) core units of competency

• eleven (11) elective units of competency from Groups A and B, chosen as specified below.

Note

Where prerequisite units apply, these must be considered in the total number of units chosen.

Core units of competency

Select all four (4) units of competency from this list.

| Unit code | Title | Prerequisites |
|--------------|--|---------------|
| MSAENV272A | Participate in environmentally sustainable work practices | |
| MSAPMOHS200A | Work safely | |
| MSAPMSUP200A | Achieve work outcomes | |
| MSAPMSUP210A | Process and record information | |

Elective units of competency Group A - Specialist electives

A minimum of two (2) specialist elective units must be chosen from the list below.

| Unit code | Title | Prerequisite unit |
|------------|---|-------------------|
| MSACMT675A | Facilitate the development of a new product | MSACMT452A |
| PMAOPS600C | Modify plant | |
| PMAOPS601A | Debottleneck plant | |
| PMC556031C | Design structural/mechanical components | PMC555031B |

Group B - Other electives

The balance of units, to a maximum of **nine** (9), may be drawn in any combination from:

- units not already chosen from Group A above
- Group B units listed below, with a maximum of seven (7) from Group B2

Group B1

| Unit code | Title | Prerequisites |
|-------------|---|---------------|
| PMAOPS500A | Optimise production systems | |
| PMAOPS501A | Provide operational expertise to a project team | |
| PMAOPS505A | Control the process during abnormal situations | |
| PMAOPS511B | Determine energy transfer loads | |
| PMAOPS512B | Determine mass transfer loads | |
| PMAOPS520C | Manage utilities | |
| PMAOPS521C | Plan plant shutdown | |
| PMAOPS522A | Coordinate plant shutdown | |
| PMBTECH502B | Review and analyse production trials and specify retrials | |
| PMC555030C | Analyse equipment performance | |
| PMC555031B | Choose materials for an application. | |

Group B2

| Unit code | Title | Prerequisites |
|------------|--|---------------|
| LMTGN5004A | Manage installation and commissioning of equipment and systems | |

| Unit code | Title | Prerequisites |
|------------|--|---------------|
| MEM09002B | Interpret technical drawing | |
| MEM09003B | Prepare basic engineering drawing | MEM09002B |
| MSACMC610A | Manage relationships with non-customer external organisations | |
| MSACMC611A | Manage people relationships | |
| MSACMC612A | Manage workplace learning | |
| MSACMT452A | Apply statistics to processes in manufacturing | |
| MSACMT481A | Undertake proactive maintenance analyses | |
| MSACMT482A | Assist in implementing a proactive maintenance strategy | |
| MSACMT640A | Manage 5S system in a manufacturing environment | |
| MSACMT641A | Implement a continuous improvement system | |
| MSACMT650A | Determine and improve process capability | MSACMT452A |
| MSACMT660A | Develop the application of enterprise systems in manufacturing | |
| MSACMT661A | Determine and establish information collection requirements and processes | |

| Unit code | Title | Prerequisites |
|--------------|--|---------------|
| MSACMT670A | Develop and manage sustainable energy practices | |
| MSACMT671A | Develop and manage sustainable environmental practices | |
| MSACMT681A | Develop a proactive maintenance strategy | |
| MSAENV672A | Develop workplace policy and procedures for sustainability | |
| MSAPMOHS503A | Maintain the workplace OHS management system | |
| MSAPMOHS510A | Manage risk | |
| MSAPMOPS401A | Trial new process or product | |
| PMASUP520B | Review procedures to minimise environmental impact of process | |
| PSPPM502B | Manage complex projects | |
| | Up to four (4) relevant units may be chosen from this Training Package, other endorsed Training Packages and accredited courses, where those units are available at Certificate IV, Diploma and Advanced Diploma. | |
