PPMHRF203 Unload recovered fibre

Release: 1

PPMHRF203 Unload recovered fibre

Modification History

Release	Comments
Release 1	This version released with PPM Pulp and Paper Manufacturing Training Package Version 3.0.

Application

This unit of competency describes the skills and knowledge required to unload, grade, sort and store recovered fibre stock for pulp production.

The unit applies to production support operators who carry out routine tasks in unloading and sorting recovered fibre stock for a pulp and/or paper manufacturing facility. Recovered fibre includes post-consumer and post-industrial paper material, de-inked pulp and internal broke.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Handling and Preparing Recovered Fibre for Pulp Production (HRF)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare to unload and store recovered fibre	1.1 Identify and confirm received recovered fibre stock to be unloaded against production documentation 1.2 Plan and sequence work tasks according to workplace procedures and workplace health and safety requirements 1.3 Identify health and safety hazards and report safety concerns 1.4 Select and fit required personal protective equipment for the task 1.5 Select required shifting equipment according to load

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	characteristics 1.6 Prepare and maintain unloading and storage areas according to housekeeping and environmental requirements
2. Unload, sort and stack recovered fibre	2.1 Unload recovered fibre according to load characteristics and safe work practices 2.2 Move recovered fibre to appropriate stacking locations consistent with type, quality and stock rotation requirements 2.3 Construct stacks to provide stability and minimise problems 2.4 Make provision for decks, storage bays and access for lifting equipment when storing
3. Store product	3.1 Carry, raise and set down load according to workplace procedures and health and safety requirements 3.2 Store load according to stock location requirements 3.3 Complete inventory records documentation according to workplace requirements

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	Interpret information from workplace documentation and procedures
Writing	Complete forms and records accurately and legibly using industry terminology
Oral communication	Communicate clearly with work colleagues and other personnel on site
Numeracy	- Estimate volume and weight of product - Interpret numerical data on instruments, gauges and data recording equipment

Unit Mapping Information

Code and title current version	Code and title previous version	Comments	Equivalence status
PPMHRF203 Unload recovered fibre	PPMHWP270 Unload waste paper	Changes to unit title, unit sector code, elements, performance criteria, foundation skills, performance evidence and knowledge evidence Assessment conditions updated	Not equivalent
