Assessment Requirements for PPMPUL202 Store and distribute pulped product

Release: 1

Assessment Requirements for PPMPUL202 Store and distribute pulped product

Modification History

Release	Comments
Release 1	This version released with PPM Pulp and Paper Manufacturing Training Package Version 3.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has safely transferred and stored at least two of the following pulped products, in approved configurations in storage locations, on at least two occasions:

- bleached or unbleached pulp
- fluff pulp
- crumbed pulp
- baled, rolled or sheet pulp
- slushed pulp.

In completing the above, there must also be evidence that the individual has, on each occasion:

- provided clear signals of operation using required signal system during handling and transfer operations
- completed clear and accurate labels and inventory control records for stored product.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- pulping plant layout
- overview of pulping plant processes
- typical work flow processes for transferring pulped products to and from designated storage areas
- typical workplace hazards present during transfer operations, and methods of minimising risks
- capacity of transfer equipment in relation to dimensions and weight
- methods to load transfer equipment to ensure stability of load and equipment

- key features of signal systems used for transfer processes, including:
 - hand signals
 - whistles
 - sirens
 - loud speaker announcements
 - two-way radios
- typical industry chain of command for communicating signals during transfer processes
- storage layout and categories for:
 - raw materials
 - finished pulped products
- inventory labelling and recording systems
- workplace procedures relevant to distributing and storing pulped product:
 - standard operating procedures
 - workplace health and safety, with particular emphasis on use of personal protective equipment
 - communication reporting lines
 - recording and reporting inventory, transfer processes, product and equipment faults.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in a pulp and/or paper manufacturing facility or an environment that accurately reflects performance in a workplace
- resources, equipment and materials:
 - load shifting equipment
 - communication equipment used to signal operation of transfer equipment
 - personal protective equipment suitable for distributing and storing pulped product
 - commercial raw materials and pulped product for transfer as specified in performance evidence
 - proforma or recording system recording inventory, transfer process, product and equipment faults
- specifications:
 - workplace and standard operating procedures relating to distributing and storing pulped product, including health and safety, risks and hazards identification, plant isolation, quality, housekeeping and environmental requirements.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.
