PPMRFO201 Monitor and control recovered fibre operations

Release: 1

PPMRFO201 Monitor and control recovered fibre operations

Modification History

Release	Comments
Release 1	This version released with PPM Pulp and Paper Manufacturing Training Package Version 3.0.

Application

This unit of competency describes the skills and knowledge required to monitor and maintain recovered fibre operations, ensure product quality and record and report production data.

The unit applies to production support operators who assist in the recovered fibre operations of a pulp and/or paper manufacturing facility, in undertaking routine monitoring and identifying and solving predictable problems that occur with integrated equipment and continuous operations.

No licensing, legislative, or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Recovered Fibre Operations (RFO)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare to monitor recovered fibre operations	1.1 Check production requirements at start of shift and plan work activities according to workplace health and safety and standard operating procedures 1.2 Identify health and safety hazards and report safety concerns 1.3 Select and fit personal protective equipment according to safety requirements 1.4 Check tools and equipment are operational, and supplies are

	available
2. Monitor and maintain process	2.1 Confirm operational status by visual or physical walk-around inspections and other information 2.2 Maintain process supplies to meet production requirements 2.3 Monitor reject systems and screens and gauges to ensure operations are within specification 2.4 Identify, rectify or report routine variations from specifications 2.5 Monitor and maintain process levels to maintain productivity requirements 2.6 Monitor and maintain water distribution systems according to operating procedures 2.7 Complete routine preventative maintenance according to maintenance schedules
3. Control stock quality	3.1 Monitor and maintain conveyor feeds for consistent delivery 3.2 Sample and test stock quality, and interpret and record results 3.3 Adjust product quality and system operation to rectify out-of-specification stock and maintain productivity requirements
4. Record and report product and process data	4.1 Interpret production data and enter into recording system 4.2 Communicate problems or variations with process, product or equipment to relevant personnel

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	Interpret information in workplace procedures and maintenance schedules
Writing	Complete accurate basic records in the required format
Oral communication	Provide clear basic information about problems or variations with

Skill	Description
	process, products and equipment using clear language and industry terminology
Numeracy	- Interpret basic numerical settings on instruments, gauges and data recording equipment - Record basic numerical data for test results and production outcomes
