Application

This unit describes the skills required to manage the expenditure of public monies for simple procurement of low value/low risk goods and services using contractual arrangements that include simple tendering and requests for quotation. The unit requires analysis and decision making in the procurement process. It includes planning and undertaking procurement, managing contractors and completing contractual arrangements.

This unit applies to those who enter into contracts or go out to tender or manage the procurement but are not procurement professionals. Those undertaking this unit may be developing a request for tender but procurement is not a major part of their role.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would work under minor supervision, while performing routine tasks in familiar contexts.

No licensing, legislative or certification requirements apply to unit at the time of publication.
