| <ul style="list-style-type: none">• techniques for assessing radiation hazards likely to be encountered in task• techniques for conducting monitoring relevant to task• techniques for control, containment and/or confinement of radiation sources/equipment consistent with capabilities and required in task |
|---|

Evidence Guide

EVIDENCE GUIDE	
<p>The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>Assessment must confirm the ability to:</p> <ul style="list-style-type: none"> • safely conduct assigned tasks involving sealed radiation sources or equipment • monitor radiation levels and contamination • decontaminate people and surfaces • process radiation data and report results • keep accurate, complete and relevant records • initiate appropriate workplace emergency first response. <p>Consistency in performance</p> <p>Competency should be demonstrated by safely completing assigned tasks in a range of contexts, including sites, sealed sources, radiation equipment and complexity.</p>
Context of and specific resources for assessment	<p>Competency should be assessed in the workplace or a simulated workplace environment.</p> <p>Assessment must comply with:</p> <ul style="list-style-type: none"> • local regulations regarding the registration of operators, premises and sources at workplaces where radioactive materials and/or ionising radiation equipment are present • organisation's radiation management plan. <p>Access may be required to:</p> <ul style="list-style-type: none"> • registered premises and sources • supervision by a radiation safety professional • radiation instruments and monitoring equipment • appropriate PPE • organisation's radiation management plan or procedures.
Method of assessment	<p>The following assessment methods are suggested:</p> <ul style="list-style-type: none"> • review of radiation data, results and records generated by the candidate • feedback from peers and supervisor that the candidate consistently applies relevant radiation protection and safety requirements

EVIDENCE GUIDE	
	<ul style="list-style-type: none"> • oral/written tests and calculations involving: <ul style="list-style-type: none"> • radiation terms, principles and quantities • set-up, calibration and basic maintenance of radiation instruments • selection and use of PPE • analysis of case studies and reports of relevant emergency incidents and exercises • observation of the candidate: <ul style="list-style-type: none"> • using, retrieving or containing dummy/actual radiation sources • using radiation equipment and monitoring equipment • undertaking a variety of tasks in a simulated radiation environment. <p>In all cases, practical assessment should be supported by questions to assess underpinning knowledge and those aspects of competency that are difficult to assess directly.</p>
Guidance information for assessment	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:</p> <ul style="list-style-type: none"> • PSPRAD003A Perform basic radiation measurements.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<p><i>Radiation management plans</i> should include details of:</p>	<ul style="list-style-type: none"> • work practices, such as safe working rules and emergency response procedures • roles and responsibilities of personnel • radiation monitoring requirements, including details of how the availability or accessibility requirements for the monitoring equipment are to be achieved • control of an incident involving the source • storage of the source • transport of the source • what to do with the source when it is no longer required, such as sale, transfer or disposal • accountability and records • other requirements that may have a bearing on safety.
<p><i>Hazards</i> may include:</p>	<ul style="list-style-type: none"> • inhalation of radioactive dust or gas • ingestion of radioactive dust or contaminated food or water • unexpected exposure to sealed radiation sources or partially enclosed equipment that emits ionising radiation.
<p><i>Monitoring equipment</i> may include:</p>	<ul style="list-style-type: none"> • radiation instruments and survey meters, such as: <ul style="list-style-type: none"> • air proportional • gas proportional • gas ionisation • Geiger-Muller • ionisation • scintillation • solid state • wipe test equipment.
<p><i>Safe working rules</i> will vary according to the type of source equipment and should include monitoring details, such as:</p>	<ul style="list-style-type: none"> • for example, RPS No. 13 Code of Practice and Safety Guide for Safe Use of Fixed Radiation Gauges (2007), which specifies that working rules should include details of: <ul style="list-style-type: none"> • expected radiation levels around each fixed radiation gauge under the control of the responsible person • tests for non-fixed surface contamination, where

RANGE STATEMENT

	<p>appropriate</p> <ul style="list-style-type: none"> • occasions on which radiation surveys and contamination tests will be carried out • methods for conducting radiation surveys, wipe tests and any other examination required by the code, and for reporting and recording results • information relating to: <ul style="list-style-type: none"> • operation of source or shutter controls • locking of source containers <ul style="list-style-type: none"> • arrangements of locks and safety procedures and equipment for preventing exposure of persons to a radiation beam • arrangements for preventing or minimising occupational and public radiation exposure • methods for ensuring that no part of any person can enter the item of equipment to which the gauge is attached while the gauge is in the 'beam on' condition • licence and registration requirements and conditions of the relevant regulatory authority • special instructions from, or requirements of, the relevant regulatory authority • arrangements for security of a gauge when it is in storage or being transported within the establishment • regular inspection of all equipment, including: <ul style="list-style-type: none"> • source containers or housings • survey meters • personal monitoring devices • labels • markings • notices <ul style="list-style-type: none"> • types and occasions for use of personal monitoring devices • steps to be taken in the event of an emergency • arrangements for the calibration, repair and maintenance of a fixed radiation gauge • instructions concerning the posting of radiation warning signs in the vicinity of the gauge • contact addresses and telephone numbers, including the after-hours emergency number, where relevant, for: <ul style="list-style-type: none"> • responsible person
--	--

RANGE STATEMENT	
	<ul style="list-style-type: none"> • relevant regulatory authority • service provider • provider of the personal monitoring service <ul style="list-style-type: none"> • arrangements for disposal of a radioactive source, x-ray tube or neutron generator tube from a fixed radiation gauge, which need to be in accordance with the requirements of the relevant regulatory authority • where necessary, details of a radiation isolation procedure for the gauge.
<p><i>Radiation protection safety standards, codes and guidelines</i> may include:</p>	<ul style="list-style-type: none"> • Australian Radiation Protection and Nuclear Safety Agency (ARPANSA) radiation protection series publications, such as: <ul style="list-style-type: none"> • RPS No.1 Recommendations for Limiting Exposure to Ionizing Radiation (1995) and National Standard for Limiting Occupational Exposure to Ionizing Radiation (republished 2002) • RPS No.2 Code of Practice for the Safe Transport of Radioactive Material (2008) • RPS No.7 Recommendations for Intervention in Emergency Situations Involving Radiation Exposure (2004) • RPS No.13 Code of Practice and Safety Guide for Safe Use of Fixed Radiation Gauges (2007) • RPS No.5 Code of Practice and Safety Guide for Portable Density/Moisture Gauges Containing Radioactive Sources (2004) • Radiation Health Series produced by the National Health and Medical Research Council (NHMRC): <ul style="list-style-type: none"> • RHS No.31 Code of Practice for the Safe Use of Industrial Radiography Equipment (1989) • RHS No.28 Code of Practice for the Safe Use of Sealed Radioactive Sources in Borehole Logging (1989) • requirements of commonwealth, state and territory legislation, such as Victorian Radiation Act (2005) and Radiation Regulations (2007) and associated licensing requirements • definition of a responsible person.
<p><i>Site</i> may include:</p>	<ul style="list-style-type: none"> • fully enclosed laboratories or specialist facilities with permanent shielding and entrances that are locked/interlocked with alarms or signs • partially enclosed sites, such as an exposure bay or a fixed radiation gauge with shielding, controlled access, alarms or

RANGE STATEMENT	
	<ul style="list-style-type: none"> signs • open sites, such as field locations and processing plants where temporary boundaries, shielding and signage are erected and access is controlled by patrolling personnel.
<i>Pre-use and safety checks</i> may include:	<ul style="list-style-type: none"> • confirmation that no unauthorised people are within boundaries • confirmation that radiation instruments and survey meters are functioning within specifications • inspection of: <ul style="list-style-type: none"> • source containers, housings, shielding, shutters and locks • personal monitoring devices • labels, markings, signage and notices • boundaries, locks and interlocks • confirmation of source position • confirmation of radiation levels in the vicinity of the radiation sealed source equipment.
<i>Site control measures</i> may include:	<ul style="list-style-type: none"> • hierarchy of control measures, including: <ul style="list-style-type: none"> • avoiding exposure, where practicable • isolating sources of radiation where practicable through shielding, containment and remote handling techniques • engineering controls • adopting safe work practices, including work methods which make appropriate use of time, distance and shielding to minimise exposure • using approved PPE where other means of controlling exposure are not practicable • designation of controlled or supervised areas within workplaces with appropriate working rules for each, such as: <ul style="list-style-type: none"> • controlled exposure times • logging of personnel on entry and exit.
<i>Required records</i> may include:	<ul style="list-style-type: none"> • estimates of doses received by employees and members of the public • site radiation measurements • calibration, inspection and maintenance of radiation instruments and equipment • transport of radioactive sources • details of incidents and accidents involving exposure to radiation and the actions taken.

RANGE STATEMENT	
<i>Radiation incidents</i> may include:	<ul style="list-style-type: none"> • exposure of unauthorised personnel entering a controlled area • exposure from an uncontrolled, high hazard radioactive sealed source that: <ul style="list-style-type: none"> • has loss or destruction of shielding • is involved in a transport accident • is lost, missing or stolen • has a malfunction of its shutter or interlocks • has been dropped during removal from its container • has jammed in an unsafe position • exposure from equipment that emits ionising radiation and has: <ul style="list-style-type: none"> • loss or destruction of shielding • malfunction of its shutter or interlocks • exposure from dispersed radioactive material caused by: <ul style="list-style-type: none"> • industrial or laboratory accident resulting in radioactive contamination • dispersion of contaminants following destruction of a high activity sealed source.
<i>Response procedures</i> will include:	<ul style="list-style-type: none"> • instructions for keeping exposures to a minimum, consistent with essential operations through evacuation or otherwise • instructions for notifying the relevant competent authority if required.

Unit Descriptor

Unit descriptor	<p>This unit covers the ability to safely monitor radiation and the exposure of people and environment during radiation-related work activities. This involves identifying information about the work activities to be monitored, using the specified monitoring equipment, and applying safe working rules and monitoring procedures to obtain reliable results.</p> <p>No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.</p>
------------------------	---

Application of the Unit

<p>Application of the unit</p>	<p>This unit of competency applies to personnel working in radiation-related work activities, including:</p> <ul style="list-style-type: none"> • extracting, milling, processing and packing radioactive ores • operating, installing, servicing and calibrating fixed radiation gauges, bore hole logging or industrial radiography equipment, and moisture and density gauges • decontaminating and servicing equipment that has been in contact with radioactive material • XRF and XRD analysis • collecting, preparing and testing samples containing radioactive materials • using radionuclides in a laboratory. <p>The activities may take place:</p> <ul style="list-style-type: none"> • at a mine or plant that processes radioactive ore and minerals • with instruments that emit ionising radiation at geotechnical, construction, mining and manufacturing sites, or analytical and research facilities • in a laboratory or licensed facility that handles radioactive materials • in a nuclear facility. <p>The tasks would be performed under the authority of a responsible person and with the advice of a radiation safety professional, such as a radiation safety officer and in accordance with radiation protection safety standards, codes and guidelines.</p>

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<p>1. Prepare for assigned monitoring tasks.</p>	<p>1.1. Use organisation's <i>radiation management plans</i> to obtain information about the <i>hazards</i> associated with assigned tasks and the <i>monitoring equipment</i> and <i>safe working rules</i> to be used at the site, and refer to <i>radiation protection safety standards, codes and guidelines</i> if necessary.</p> <p>1.2. Liaise with relevant site personnel to arrange access and confirm the nature and likely duration of assigned <i>monitoring tasks</i>.</p> <p>1.3. Perform and record pre-use checks of radiation instruments and tag or replace faulty items as necessary.</p> <p>1.4. Check that <i>personal protective equipment</i> (PPE) and other task-related equipment is fit for purpose.</p> <p>1.5. Stow all radiation instruments and monitoring equipment to ensure safe transport to the site and within the site if required.</p>
<p>2. Obtain reliable monitoring data or samples.</p>	<p>2.1. Apply safe working rules to minimise personal <i>ionising radiation</i> exposure according to relevant radiation protection safety standards, codes and guidelines.</p> <p>2.2. Operate radiation instruments in accordance with radiation management plans and manufacturer specifications.</p> <p>2.3. Conduct regular <i>instrument checks and minor maintenance</i> if required.</p> <p>2.4. Conduct repeat measurements for quality control purposes in accordance with procedures, and identify and report atypical equipment response.</p> <p>2.5. Collect and label environmental samples using specified equipment and procedures to preserve their integrity if required.</p> <p>2.6. Record atypical radiation conditions.</p> <p>2.7. Seek advice to deal with any situation beyond own technical competence.</p>
<p>3. Complete assigned monitoring tasks.</p>	<p>3.1. Check for contamination of equipment.</p> <p>3.2. Re-stow all radiation instruments and monitoring equipment to ensure safe transport from the site and within the site if required.</p> <p>3.3. Record use of PPE and radiation instruments in accordance with radiation management plans.</p>

ELEMENT	PERFORMANCE CRITERIA
	<p>3.4. Before storing PPE, radiation instruments and monitoring equipment, check their condition in accordance with manufacturer's recommendations and radiation management plan.</p> <p>3.5. Store any samples to preserve their integrity, security and traceability in accordance with sampling procedures.</p> <p>3.6. Organise the management of any waste in accordance with organisation's procedures.</p>
<p>4. Analyse monitoring data and report results.</p>	<p>4.1. Record results in accordance with procedures.</p> <p>4.2. Check that recorded outcomes are consistent with expectations.</p> <p>4.3. Compare results with relevant radiation limits and identify and record any significant differences or atypical results.</p> <p>4.4. Identify potential or actual radiation protection issues revealed by the site monitoring tasks.</p> <p>4.5. Identify potential improvements that could be made to monitoring at site.</p> <p>4.6. Maintain <i>required records</i> that are complete, accurate, legible and secure.</p> <p>4.7. Provide site and personal radiation data to authorised personnel if required.</p>
<p>5. Respond to potential or actual radiation incidents.</p>	<p>5.1. Recognise unusual situations, unexpected hazards, and potential or actual emergency <i>radiation incidents</i>.</p> <p>5.2. Inform the responsible person or delegate about the situation, hazard or incident and seek their advice.</p> <p>5.3. Initiate appropriate workplace emergency first response in accordance with instructions, radiation management plans and organisation's <i>response procedures</i>.</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- recognising different types of monitoring equipment, such as air proportional, gas proportional, gas ionisation, Geiger-Muller, scintillation, neutron monitors, solid state, and personal dosimeters (badge and electronic)
- recognising the limitations, restrictions and applicability of these various detector units
- using relevant information sources to locate and interpret information about radiation sources and equipment encountered in job role or duties
- conducting pre-use checks for radiation instruments and monitoring equipment used in job role or duties
- interpreting manuals for radiation monitoring equipment used in job role or duties
- collecting, labelling and preserving occupational and environmental samples if required in job role or duties
- processing and analysing radiation monitoring data
- regularly assessing and reassessing risks and hazards and taking appropriate protective measures
- safely operating radiation instruments and monitoring equipment used in job role or duties to obtain reliable data
- seeking advice and further directions when faced with unforeseen circumstances or situations that may require decisions or response actions beyond technical competence
- using and caring for PPE used in job role

Required knowledge

- terms and concepts, such as ionising radiation, radioactivity, radioactive material, activity, dose, contamination, contamination controls, shielding, half-life, and radionuclide
- types and properties of ionising radiation (e.g. alpha, beta, gamma, neutron, x-ray, and electron), sources and shielding methods
- definitions of radiation quantities, such as exposure, dose, effective dose, dose rate, dose equivalent, and dose limits
- international system (SI) of units for radiation quantities, multiples and sub-multiples
- function of key components and operating principles of radiation instruments and monitoring equipment used in job role
- guidelines and safety procedures for working with radiation sources, based on principles of:
 - reducing exposure time
 - maintaining greatest distance

REQUIRED SKILLS AND KNOWLEDGE

- using as much shielding as possible
- health, safety and workplace emergency response procedures relevant to job role or duties
- techniques and procedures for collecting potentially radioactive samples, if required in job role or duties
- techniques for assessing radiation hazards likely to be encountered in job role or duties
- techniques for conducting monitoring surveys used in job role or duties

Evidence Guide

EVIDENCE GUIDE	
<p>The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>Assessment must confirm the ability to:</p> <ul style="list-style-type: none"> • work safely in a radiation environment • detect ionising radiation and contamination • obtain reliable data and samples to quantify radiation and contamination • process radiation data and report results • keep accurate and complete records relevant to job role or duties. <p>Consistency in performance</p> <p>Competency should be demonstrated by safely undertaking a variety of radiation monitoring tasks involving the use of appropriate radiation monitoring equipment.</p>
Context of and specific resources for assessment	<p>Competency should be assessed in the workplace or a simulated workplace environment.</p> <p>Assessment must comply with:</p> <ul style="list-style-type: none"> • local regulations regarding the registration of operators, premises and sources at workplaces where radioactive materials and/or ionising radiation equipment are present • organisation's radiation management plan • manufacturer's instructions for operating radiation monitoring equipment. <p>Access may be required to:</p> <ul style="list-style-type: none"> • registered premises and sources • supervision by a radiation safety professional • radiation instruments and monitoring equipment • appropriate PPE • radiation management plan or procedures.
Method of assessment	<p>The following assessment methods are suggested:</p> <ul style="list-style-type: none"> • oral/written tests and calculations involving: <ul style="list-style-type: none"> • radiation terms, principles and quantities • set-up, calibration and basic maintenance of radiation

EVIDENCE GUIDE	
	<p>instruments</p> <ul style="list-style-type: none"> • selection and use of PPE • analysis of monitoring case studies and reports • review of radiation data, results and records generated by the candidate • feedback from peers and supervisor that the candidate consistently applies relevant radiation protection and safety requirements • observation of the candidate: <ul style="list-style-type: none"> • using and caring for PPE • using radiation instruments and monitoring equipment • undertaking a variety of tasks in a simulated radiation environment. <p>In all cases, practical assessment should be supported by questions to assess underpinning knowledge and those aspects of competency that are difficult to assess directly.</p>
Guidance information for assessment	

Range Statement

RANGE STATEMENT	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
<p><i>Radiation management plans</i> should include details of:</p>	<ul style="list-style-type: none"> • work practices, such as safe working rules and emergency response procedures • roles and responsibilities of personnel • radiation monitoring requirements • control of an incident involving a source • storage of a source • accountability and records • other requirements that may have a bearing on safety.
<p><i>Hazards</i> may include:</p>	<ul style="list-style-type: none"> • inhalation of radioactive dust or gas • ingestion of radioactive dust or contaminated food or water • unexpected exposure to sealed or unsealed radiation sources or partially enclosed equipment that emits ionising radiation.
<p><i>Monitoring equipment</i> may include:</p>	<ul style="list-style-type: none"> • radiation instruments and survey meters, such as: <ul style="list-style-type: none"> • air proportional (alpha) • gas proportional (alpha, beta) • gas ionisation (gamma) • Geiger-Muller (beta, gamma) • ionisation (beta) • scintillation (alpha, beta, gamma) • solid state (alpha, gamma) • wipe test equipment • sample containers, shovels, augers, buckets, air/water pumps, and stainless steel bailers.
<p><i>Safe working rules</i> will vary according to the type of source equipment and should include monitoring details, such as:</p>	<ul style="list-style-type: none"> • for example, RPS No.13 Code of Practice and Safety Guide for Safe Use of Fixed Radiation Gauges (2007), which specifies that working rules include details of: <ul style="list-style-type: none"> • expected radiation levels around each fixed radiation gauge under the control of the responsible person • tests for non-fixed surface contamination where appropriate • occasions on which radiation surveys and

	<p>contamination tests will be carried out</p> <ul style="list-style-type: none"> • methods for conducting radiation surveys, wipe tests and other examinations required by the code, and for reporting and recording results • types and occasions for use of personal monitoring devices.
<p><i>Radiation protection safety standards, codes and guidelines</i> may include:</p>	<ul style="list-style-type: none"> • Australian Radiation Protection and Nuclear Safety Agency (ARPANSA) radiation protection series publications, such as: <ul style="list-style-type: none"> • RPS No.1 Recommendations for Limiting Exposure to Ionizing Radiation (1995) and National Standard for Limiting Occupational Exposure to Ionizing Radiation (republished 2002) • RPS No.7 Recommendations for Intervention in Emergency Situations Involving Radiation Exposure (2004) • RPS No.6 National Directory for Radiation Protection, (December 2009) • RPS No.9 Code of Practice and Safety Guide for Radiation Protection and Radioactive Waste Management in Mining and Mineral Processing (2005) • RPS No.15 Safety Guide for the Management of Naturally Occurring Radioactive Material (NORM) (2008) • requirements of commonwealth, state and territory radiation protection and safety legislation • definition of a responsible person • Australian standards.
<p><i>Monitoring tasks</i> may include:</p>	<ul style="list-style-type: none"> • observation of personnel conducting work activities in controlled radiation areas • surveys and measurements for: <ul style="list-style-type: none"> • establishing background levels • identifying areas of elevated activity and possible contamination • identifying and quantifying radiation contamination at specified locations • locating discrete radiation sources • assessing integrity of packaging or shielding • determining the effectiveness of decontamination • locating contamination on personnel and equipment • verifying contamination control boundaries • collection of air, water, soil, plant and animal specimens

	to monitor contamination.
Personal protective equipment may include:	<ul style="list-style-type: none"> • gloves, over-boots, safety hats, goggles, face masks, overalls and gowns • respirators or HEPA filter masks.
Ionising radiation may include:	<ul style="list-style-type: none"> • x-rays, electrons, neutrons, gamma rays, beta particles and alpha particles emitted from radioactive materials, including sealed and unsealed sources • neutrons emitted from generator tubes • x-rays generated by industrial radiography equipment, XRF and XRD instruments.
Instrument checks and minor maintenance may include:	<ul style="list-style-type: none"> • battery changes • calibration checks • zero checks.
Required records may include details of:	<ul style="list-style-type: none"> • approvals and authorisations granted by the appropriate authority • specifications of the radiation management plan and monitoring program • estimates of doses received by employees and by members of the public • health records of personnel and individual monitoring data • environmental radiation measurements • calibration, inspection and maintenance of radiation instruments and equipment • transport of radioactive sources • shipment of radioactive ores • radioactive waste disposal • procurement and disposal of radioactive sources • incidents and accidents involving exposure to radiation and corrective measures taken.
Radiation incidents may include:	<ul style="list-style-type: none"> • exposure of unauthorised personnel entering a controlled area • personal exposure above statutory exposure limits and a monitoring result in excess of statutory derived levels of exposure • exposure from an uncontrolled, high hazard radioactive sealed source that: <ul style="list-style-type: none"> • has loss or destruction of shielding • is involved in a transport accident • is lost, missing or stolen • has a malfunction of its shutter or interlocks

	<ul style="list-style-type: none"> • has been dropped during removal from its container • has jammed in an unsafe position • exposure from equipment that emits ionising radiation and has: <ul style="list-style-type: none"> • loss or destruction of shielding • malfunction of its shutter or interlocks • exposure from dispersed radioactive material caused by: <ul style="list-style-type: none"> • leakage or radioactive contamination • industrial or laboratory accident • uncontrolled releases of radioactive materials from a mine site, such as dust or contaminated water • dispersion of contaminants following destruction of a high activity sealed source.
<i>Response procedures</i> will include:	<ul style="list-style-type: none"> • instructions for keeping exposures to a minimum, consistent with essential operations through evacuation or otherwise • instructions for notifying the relevant competent authority if required.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<p>1. Assess radiation protection and safety requirements.</p>	<p>1.1. Review relevant <i>radiation protection and safety legislation, standards, codes and guidelines</i> to confirm radiation protection and safety requirements applicable to a particular site.</p> <p>1.2. Review relevant available records and information about <i>hazards due to radioactive materials, equipment and work activities</i> conducted at the site.</p> <p>1.3. Identify known and potential hazards associated with current and future <i>radiation-related work activities</i>.</p> <p>1.4. Identify appropriate <i>radiation instruments, monitoring equipment</i> and measuring/survey procedures to quantify hazards.</p> <p>1.5. Quantify <i>ionising radiation</i> hazards and anticipated exposure/dose, and compare results with relevant limits.</p> <p>1.6. Review available information about relevant radiation <i>control measures</i>, safety procedures, radiation <i>monitoring programs</i> and personal protective equipment (PPE).</p> <p>1.7. Determine if specific work areas need to be controlled more effectively.</p> <p>1.8. Undertake risk analysis for local site specific to radiation related activity.</p>
<p>2. Develop or revise local radiation management plans.</p>	<p>2.1. Review the local procedures for developing or revising radiation protection policy, procedures and plans.</p> <p>2.2. Identify local compliance against radiation safety requirements, including organisational policy and approach.</p> <p>2.3. Design or amend local <i>radiation management plans</i> to control and monitor all radiation-related work activities to comply with regulator requirements.</p> <p>2.4. Identify possible impacts of new or revised local radiation management plans on relevant organisational policies, procedures and systems, and advise relevant personnel.</p> <p>2.5. Forward draft local radiation management plans for feedback and approval in accordance with organisational and regulator's procedures.</p> <p>2.6. Distribute authorised local radiation management</p>

ELEMENT	PERFORMANCE CRITERIA
	<p>plans to relevant personnel and confirm they understand their roles and responsibilities.</p> <p>2.7.Design key performance indicators for radiation safety performance measurement.</p> <p>2.8.Negotiate targets for radiation safety key performance indicators in line with organisational plan.</p> <p>2.9.Develop and implement quantitative risk management and risk assessment tools for radiation.</p>
<p>3. Ensure local radiation protection and monitoring systems are implemented effectively.</p>	<p>3.1.Design a strategy for implementing the new or revised local radiation management plans that identifies key people, recommended approaches and available resources.</p> <p>3.2.Provide information about radiation protection and monitoring equipment and procedures to relevant personnel and confirm they understand their responsibilities.</p> <p>3.3.Confirm that prescribed radiation signs and safety communication systems, including noticeboards, are maintained in good condition and are readily visible.</p> <p>3.4.Design appropriate audit tools and audit plans.</p> <p>3.5.Conduct audits of radiation protection and monitoring systems, equipment and safety performance in accordance with agreed audit plans.</p> <p>3.6.Analyse audit information to identify non-conformances and opportunities for improvements.</p> <p>3.7.Produce audit reports that clearly define actions required to correct non-conformances.</p> <p>3.8.Record findings, actions and outcomes in accordance with regulator requirements and organisational procedures.</p>
<p>4. Investigate and rectify local safety, quality and non-compliance issues.</p>	<p>4.1.Investigate atypical dose results with reference to radiation safety key performance indicators.</p> <p>4.2.Examine defects or changes in work practices and equipment, and hazards that could increase exposure of personnel or present an environmental risk at local level, and determine appropriate controls.</p> <p>4.3.Analyse instances of potential or actual non-compliance and re-design work practices and procedures to prevent recurrence.</p> <p>4.4.Identify opportunities and strategies to further</p>

ELEMENT	PERFORMANCE CRITERIA
	<p>improve the organisation's radiation protection and monitoring systems.</p> <p>4.5. Implement authorised corrective and preventative actions.</p> <p>4.6. Record recommendations, actions and outcomes in accordance with regulator requirements and organisational procedures.</p>
<p>5. Inform radiation safety officer management or licensee about radiation protection and safety.</p>	<p>5.1. Provide regular status reports, including details of instances of potential or actual non-compliance, or incidents/accidents and the actions taken.</p> <p>5.2. Provide regular information about the adequacy of radiation management plans and protection and monitoring systems, and recommend improvements.</p> <p>5.3. Obtain authorisation for significant equipment purchases.</p> <p>5.4. Obtain authorisation for corrective and preventative actions in accordance with organisational procedures.</p> <p>5.5. Advise the organisation when input from external radiation specialists is required.</p>
<p>6. Promote a radiation safety culture.</p>	<p>6.1. Assess the competency of personnel to safely undertake specific radiation-related work activities and make appropriate recommendations to the responsible person.</p> <p>6.2. Access or develop <i>learning and development</i> programs that meet organisational and regulator requirements.</p> <p>6.3. Deliver, or arrange for the delivery of, training that meets the identified needs of personnel.</p> <p>6.4. Communicate effectively the need to make doses as low as reasonably achievable.</p>
<p>7. Manage information about radiation protection and safety.</p>	<p>7.1. Specify all information that must be recorded and secured and advise relevant personnel.</p> <p>7.2. Control access to records in accordance with organisational procedures.</p> <p>7.3. Provide reports in accordance with regulator requirements and organisational procedures.</p> <p>7.4. Maintain and secure records, and provide advice on improvements to record management.</p>
<p>8. Respond to potential or actual radiation incidents or</p>	<p>8.1. Recognise unusual situations, unexpected hazards, and potential or actual emergency radiation</p>

ELEMENT	PERFORMANCE CRITERIA
accidents.	incidents. 8.2. Inform relevant personnel about the situation, hazard or incident and seek their advice as necessary. 8.3. Assist emergency response personnel to control the situation in accordance with instructions, radiation management plans and organisation's <i>response procedures</i> .

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- using relevant information sources to locate and interpret information about radiation protection and safety legislation, standards, codes and guidelines
- assessing and reassessing risks and hazards and designing appropriate controls
- developing plans, organisational policy and procedures and safe work practices
- initiating audits and inspections of radiation protection and safety systems
- choosing and using appropriate available radiation source equipment and radiation instruments
- interpreting manuals for radiation sources/equipment and radiation instruments used in organisation
- designing, planning and conducting monitoring surveys under direction
- analysing radiation data, and verifying and reporting results
- seeking advice in situations that may require decisions or response actions beyond technical competence
- using plain English to explain radiation protection and safety issues, safe working rules and recommended procedures to other personnel

Required knowledge

- terms and concepts, such as ionising radiation, radioactivity, radioactive material, NORM, contamination, contamination controls, concentration, shielding, half-life, radionuclide, transport index, safe distance, and weighting factor
- types and properties of ionising radiation sources and shielding methods
- definitions of radiation quantities, such as exposure, dose, effective dose, dose rate, dose equivalent, and dose limits
- exposure pathways and protective measures
- signs and symptoms of radiation exposure, radiation health effects, and deterministic and stochastic effects
- international system (SI) of units for radiation quantities
- operating principles and function of key components, and set-up and calibration checks for radiation instruments, dosimeters and equipment used in job role
- detailed requirements of relevant legislation, codes, guidelines and safety procedures for working with radiation sources/equipment used at the organisation's facilities or sites
- health and safety and workplace emergency response procedures for radiation-related work activities in organisation
- types of PPE for personnel working in ionising radiation environments and the recommended selection process
- potential adverse health and performance effects of wearing PPE while working in

REQUIRED SKILLS AND KNOWLEDGE

- potentially hazardous environments
- principles and techniques for decontamination of personnel and equipment
- techniques and procedures for collecting potentially radioactive samples
- techniques for assessing radiation hazards likely to be encountered in organisation
- techniques for conducting contamination surveys
- techniques for control, containment and confinement of radiation sources/equipment encountered by organisation.
- environment, health and safety policy and procedures of the organisation, particularly how different parts of occupational hygiene system are interdependent, such as ventilation, noise, radiation and chemicals
- working knowledge of the business activities and operations conducted at the organisation's sites and the associated radiation risks

Evidence Guide

EVIDENCE GUIDE	
<p>The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
Overview of assessment	
<p>Critical aspects for assessment and evidence required to demonstrate competency in this unit</p>	<p>Assessment must confirm the ability to:</p> <ul style="list-style-type: none"> • establish and maintain a local radiation management plan that meets regulator requirements • monitor radiation-related work activities and take appropriate action to keep workplace exposure as low as reasonably achievable, to keep doses received below the relevant dose limits, and to protect the environment • identify and rectify radiation safety, quality and non-compliance issues • advise management about radiation safety issues • explain radiation protection and safety measures clearly and train personnel • manage radiation protection and safety information in accordance with regulator requirements • coordinate workplace emergency first response. <p>Consistency in performance</p> <p>Competency should be demonstrated by performing radiation safety related components of the day-to-day functions and duties of a radiation awareness officer at a site.</p>
<p>Context of and specific resources for assessment</p>	<p>Competency should be assessed in the workplace or simulated workplace environment.</p> <p>Assessment must comply with:</p> <ul style="list-style-type: none"> • local regulations regarding the registration of operators, premises and sources at workplaces where radioactive materials and/or ionising radiation equipment are present • organisation's radiation management plan. <p>Access is required to:</p> <ul style="list-style-type: none"> • registered premises and sources • supervision by a radiation safety professional • organisation's radiation management plan and related policies and procedures.
Method of assessment	<p>The following assessment methods are suggested:</p>

EVIDENCE GUIDE	
	<ul style="list-style-type: none"> • review of radiation results, records, management plans and reports generated by the candidate • review of radiation safety information developed by the candidate and provided to the work group • feedback from peers, manager, and regulator representative that the candidate is able to coordinate management of radiation safety • oral/written tests and calculations involving: <ul style="list-style-type: none"> • radiation terms, principles and quantities • set-up, calibration and basic maintenance of radiation instruments • selection and use of PPE • analysis of case studies and reports of relevant emergency incidents and exercises • observation of the candidate promoting radiation safety and providing radiation safety information and instruction to other personnel. <p>In all cases, practical assessment should be supported by questions to assess underpinning knowledge and those aspects of competency that are difficult to assess directly.</p>
Guidance information for assessment	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:</p> <ul style="list-style-type: none"> • PSPRAD006A Work safely with radiation-sealed source equipment • PSPRAD007A Monitor radiation.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<p><i>Radiation protection and safety legislation, standards, codes and guidelines</i> may include:</p>	<ul style="list-style-type: none"> • Australian Radiation Protection and Nuclear Safety Act 1998 and amendments 2005 • commonwealth, state and territory radiation control legislation • Australian Radiation Protection and Nuclear Safety Agency (ARPANSA) radiation protection series publications, such as: <ul style="list-style-type: none"> • RPS No.1 Recommendations for Limiting Exposure to Ionizing Radiation (1995) and National Standard for Limiting Occupational Exposure to Ionizing Radiation (republished 2002) • RPS No.7 Recommendations for Intervention in Emergency Situations Involving Radiation Exposure (2004) • RPS No.6 National Directory for Radiation Protection (2004) • RPS No.9 Code of Practice and Safety Guide for Radiation Protection and Radioactive Waste Management in Mining and Mineral Processing (2005) • RPS No.15 Safety Guide for the Management of Naturally Occurring Radioactive Material (NORM) (2008) • requirements of commonwealth, state and territory radiation protection and safety legislation • definition of a responsible person • Australian standards.
<p><i>Hazards due to radioactive materials, equipment and work activities</i> may include:</p>	<ul style="list-style-type: none"> • inhalation of radioactive dust or gas • ingestion of radioactive dust or contaminated food or water • unplanned exposure to sealed or unsealed radiation sources or partially enclosed equipment that emits ionising radiation • handling radioactive materials in a laboratory.

<p><i>Radiation-related work activities</i> may include:</p>	<ul style="list-style-type: none"> • extraction, milling and packing of radioactive ores and minerals • operating, servicing and calibrating fixed radiation gauges, bore hole logging, industrial radiography equipment • operating, servicing and calibrating moisture density gauges • decontaminating equipment that has been in contact with radioactive material • XRF and XRD analysis • using radionuclides in a laboratory • managing wastes • using radiation for quality control in processing systems and factories.
<p><i>Radiation instruments and monitoring equipment</i> may include:</p>	<ul style="list-style-type: none"> • air proportional • gas proportional • gas ionisation • Geiger-Muller • ionisation • scintillation • solid state • wipe test equipment • sample containers, shovels, augers, buckets, air/water pumps, and stainless steel bailers.
<p><i>Ionising radiation</i> may include:</p>	<ul style="list-style-type: none"> • x-rays, electrons, neutrons, gamma rays, beta particles and alpha particles emitted from radioactive materials, including sealed and unsealed sources • x-rays generated by industrial radiography equipment, XRF and XRD instruments.

<p><i>Control measures</i> may include:</p>	<ul style="list-style-type: none"> • hierarchy of controls, including: <ul style="list-style-type: none"> • avoiding exposure, where practicable • isolating sources of radiation where practicable through shielding, containment and remote handling techniques • engineering controls to reduce radiation levels and intakes of radioactive materials in the workplace • adopting safe work practices, including work methods that make use of time, distance and shielding to minimise exposure • using approved PPE where other means of controlling exposure are not practicable or sufficient • designation of controlled areas and supervised areas
--	---

	<ul style="list-style-type: none"> • use of appropriate signs and labels • use of investigation levels of exposure for specific categories of work.
Monitoring programs include:	<ul style="list-style-type: none"> • identification of relevant sources of radiation exposure within a workplace • assessment of the radiation doses received by employees, including determination of parameters that affect the assessed dose, as required by the appropriate authority • assessment of radioactive discharge to, or contamination of, the environment • detection of changes in the circumstances of exposure, as necessary • acquisition of sufficient information on radiation exposure in the workplace to enable optimisation measures to be adopted.
Radiation management plans may include:	<ul style="list-style-type: none"> • plan to keep exposure to radiation in the workplace as low as reasonably achievable and to keep doses received below the relevant dose limits, including: <ul style="list-style-type: none"> • designation of work areas to be controlled, signage and location of protective devices • arrangements for authorising workers to conduct radiation-related activities • procedures for conducting radiation-related tasks and the safe use of radiation equipment • procedures for the security, storage and transport of radioactive materials and waste disposal • procedures for the issue/collection, use and care of personal radiation monitors and PPE • plan for monitoring radiation exposure and for assessing the doses received by exposed employees, including: <ul style="list-style-type: none"> • dosimetry specifications • deployment of survey monitors • methods for conducting required radiation surveys, wipe tests, examinations and for reporting and recording results • arrangements for personal and environmental monitoring • plan for dealing with incidents, accidents and emergencies involving exposure to radiation • plan for the induction and ongoing training of workers, visitors and members of the public as appropriate • plan for the selection, procurement, maintenance, repair

	<p>and disposal of equipment containing radioactive sources</p> <ul style="list-style-type: none"> • audit plan covering such things as: <ul style="list-style-type: none"> • status of specified equipment • use of designated safe work practices • application of specified monitoring procedures • accuracy and completeness of specified records.
<i>Learning and development</i> strategies may include:	<ul style="list-style-type: none"> • face to face training • online or distance learning • mentoring and coaching.
<i>Response procedures</i> will include instructions for:	<ul style="list-style-type: none"> • keeping exposures to a minimum, consistent with essential operations through evacuation or otherwise • notifying relevant competent authority if required.

PSPRAD709A Select, commission and maintain radiation measuring instruments

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	<p>This unit covers the ability to provide sufficient, fully functioning radiation measuring instruments to implement an organisation's radiation management plan and monitoring programs. This involves identifying the need for specific kinds of instruments, determining the suitability of available instruments, procuring and commissioning instruments, checking their serviceability and calibration, performing routine maintenance, training staff to operate instruments correctly, and maintaining relevant records.</p> <p>These tasks would be performed under the authority of a responsible person and in accordance with radiation protection safety standards, codes and guidelines.</p> <p>No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.</p>
------------------------	---

Application of the Unit

Application of the unit	<p>This unit of competency applies to personnel with a radiation safety coordination role. They may work as, or assist, a radiation safety officer working:</p> <ul style="list-style-type: none"> • at a mine or plant that processes radioactive ore and minerals • with instruments that emit ionising radiation at geotechnical, construction, mining and manufacturing sites, or analytical and research facilities • in a laboratory or licensed facility that handles radioactive materials or has radiation-emitting apparatus • in a nuclear facility.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<p>1. Procure suitable instruments.</p>	<p>1.1. Determine types of <i>ionising radiation measuring instruments</i> required by the organisation to <i>monitor hazards</i> associated with current or future <i>radiation-related work activities</i> and refer to <i>radiation protection safety standards, codes and guidelines</i>, if necessary.</p> <p>1.2. Research information about <i>specifications and features of instruments</i> that may be suitable and their suppliers.</p> <p>1.3. Liaise with suppliers and/or conduct tests to compare the stated performance of available instruments against the organisation's specifications.</p> <p>1.4. Seek advice and assistance with evaluating instruments if beyond own technical competence.</p> <p>1.5. Select the most suitable instruments and arrange for their procurement.</p>
<p>2. Commission new instruments.</p>	<p>2.1. Use manufacturer's documentation to develop a thorough understanding of instrument operation, functional test procedures, routine instrument checks and maintenance requirements.</p> <p>2.2. Ensure that the instrument has been calibrated appropriately for its intended use(s).</p> <p>2.3. Conduct component checks and test measurements to confirm instrument performance for intended use(s).</p> <p>2.4. Enter required information about the new instrument into the organisation's information management system.</p> <p>2.5. Develop and document clear procedures for operating, caring for and maintaining the instrument.</p>
<p>3. Train instrument operators.</p>	<p>3.1. Identify the skills and knowledge required to operate the instrument safely and reliably in the workplace and interpret the radiation quantities measured.</p> <p>3.2. Develop appropriate training program for instrument operators using established <i>adult learning principles</i>.</p> <p>3.3. Ensure that each operator can use the instrument competently for the required measurement applications.</p> <p>3.4. Record training outcomes in accordance with</p>

ELEMENT	PERFORMANCE CRITERIA
	<p>regulator requirements and organisational procedures.</p> <p>3.5. Audit operators' use of instruments at regular intervals to ensure their ongoing competence.</p>
<p>4. Maintain instruments fit for purpose.</p>	<p>4.1. Conduct <i>regular instrument checks and minor maintenance</i> in accordance with organisation's <i>radiation management plan</i>.</p> <p>4.2. Check instrument calibration using specified standards and procedures, and record relevant information.</p> <p>4.3. Troubleshoot basic faults and determine whether local repair or maintenance is technically possible and economic.</p> <p>4.4. Arrange for repair or servicing from an accredited agent or other appropriate personnel in accordance with organisation's procedures.</p> <p>4.5. Check instrument's performance after repair or service before approving it for use.</p> <p>4.6. Maintain <i>required records</i> that are complete, accurate, legible and secure.</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- recognising:
 - types of measuring instruments, such as air proportional, gas proportional, gas ionisation, Geiger-Muller (GM), compensated GM, scintillation, neutron monitors, solid state, and personal dosimeters (badge and electronic)
 - advantages and limitations of their use
- locating, interpreting and comparing information about measuring instruments used by organisation
- selecting suitable instruments by analysing factors, such as intended use (fixed/portable, laboratory/field), range of radiation types, intensities and energies, accuracy, sensitivity, response time, robustness, serviceability and limitations
- conducting pre-use and calibration checks, troubleshooting common faults, conducting basic repairs of and maintaining radiation measuring instruments used in job role
- safely operating radiation measuring instruments used in job role to obtain reliable data
- processing and analysing radiation measurement data and applying established corrections
- interpreting manuals and writing operating instructions for radiation measuring instruments used in organisation
- seeking advice and further directions when faced with unforeseen circumstances or situations that may require decisions or response actions beyond technical competence

Required knowledge

- terms and concepts, such as:
 - ionising radiation, radioactivity, radioactive material, activity, dose, contamination, contamination controls, shielding, half-life, and radionuclide
 - operating voltage, accuracy, response time, sensitivity, detection limit, linearity, source-detector geometry and distance corrections, compensation
- types, energies and properties of ionising radiation (e.g. alpha, beta, gamma, neutron, x-ray, electron), sources and shielding methods
- definitions of radiation quantities, such as exposure, dose, tissue weighting factor, effective dose, dose rate, radiation weighting factor, dose equivalent, and dose limits
- international system (SI) of units for radiation quantities, multiples and sub-multiples
- techniques for conducting measurements and monitoring surveys used in organisation

REQUIRED SKILLS AND KNOWLEDGE

- characteristics, capabilities, limitations, function of key components and operating principles of radiation measuring instruments used in organisation
- role and importance of regular calibration and pre-use checks and maintenance
- common instrument faults, troubleshooting, and recommended remedial actions and repairs
- common instrument operator errors
- techniques for assessing radiation hazards likely to be encountered in job role
- guidelines and safety procedures for working with radiation sources, based on principles of:
 - reducing exposure time
 - maintaining greatest distance
 - using as much shielding as possible
- health, safety and workplace emergency response procedures relevant to job role

Evidence Guide

EVIDENCE GUIDE	
<p>The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
Overview of assessment	
<p>Critical aspects for assessment and evidence required to demonstrate competency in this unit</p>	<p>Assessment must confirm the ability to:</p> <ul style="list-style-type: none"> • select radiation measuring instruments that will enable the organisation to successfully implement its radiation management plan • maintain sufficient numbers of fully functioning instruments to satisfy the organisation's predictable requirements • train instrument operators to use radiation measuring instruments safely and reliably • keep accurate and complete records relevant to job role. <p>Consistency in performance</p> <p>Competency should be demonstrated by the candidate selecting, commissioning and maintaining the radiation measuring instruments relevant to his or her job role.</p> <p>Pathway</p> <p>Determining competency for this unit may require checking the candidate's skills against PSPRAD003A Perform basic radiation measurements.</p>
<p>Context of and specific resources for assessment</p>	<p>Competency should be assessed in the workplace or a simulated workplace environment.</p> <p>Assessment must comply with:</p> <ul style="list-style-type: none"> • local regulations regarding the registration of operators, premises and sources at workplaces where radioactive materials and/or ionising radiation equipment are present • organisation's radiation management plan • manufacturer's instructions for operating radiation measuring instruments. <p>Access may be required to:</p> <ul style="list-style-type: none"> • registered premises and sources • supervision by a radiation safety professional

EVIDENCE GUIDE	
	<ul style="list-style-type: none"> • radiation measuring instruments and monitoring equipment • appropriate personal protective equipment • radiation management plan or procedures.
Method of assessment	<p>The following assessment methods are suggested:</p> <ul style="list-style-type: none"> • oral and written tests and calculations involving: <ul style="list-style-type: none"> • radiation quantities • set-up, calibration and basic maintenance of radiation measuring instruments • review of records of instrument selection, use and maintenance generated by the candidate • review of instrument training materials and records generated by the candidate • feedback from peers and supervisor that working instruments are available when required • observation of the candidate checking, using and maintaining radiation measuring instruments. <p>In all cases, practical assessment should be supported by questions to assess underpinning knowledge and those aspects of competency that are difficult to assess directly.</p>
Guidance information for assessment	

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<p><i>Ionising radiation</i> may include:</p>	<ul style="list-style-type: none"> • x-rays, electrons, neutrons, gamma rays, beta particles and alpha particles emitted from radioactive materials, including sealed and unsealed sources • neutrons emitted from generator tubes • x-rays generated by industrial radiography equipment, XRF and XRD instruments.
<p><i>Radiation measuring instruments</i> may involve:</p>	<ul style="list-style-type: none"> • detectors, such as: <ul style="list-style-type: none"> • air proportional (alpha) • gas proportional (alpha, beta) • gas ionisation (gamma) • Geiger-Muller (beta, gamma) • ionisation (beta) • scintillation (alpha, beta, gamma) • solid state (alpha, gamma) • signal conditioning, such as: <ul style="list-style-type: none"> • analogue and digital ratemeters • pulse height, scalers, single/multi channel analysers, and integrators • displays, such as: <ul style="list-style-type: none"> • dose and dose rate • dose equivalent and dose equivalent rate • exposure and exposure rate.
<p>Programs to <i>monitor hazards</i> may include: surveys and measurements for:</p>	<ul style="list-style-type: none"> • establishing background levels • identifying and quantifying radiation near equipment that emits ionising radiation • identifying areas of elevated activity and possible contamination • identifying and quantifying radiation contamination at specified locations • locating discrete radiation sources • assessing integrity of packaging or shielding • determining the effectiveness of decontamination • locating contamination on personnel and equipment

RANGE STATEMENT	
	<ul style="list-style-type: none"> • verifying contamination control boundaries.
<i>Radiation-related work activities</i> may include:	<ul style="list-style-type: none"> • extracting, milling, processing and packing radioactive ores • operating, installing, servicing and calibrating fixed radiation gauges, bore hole logging or industrial radiography equipment, moisture/density gauges • decontaminating and servicing equipment that has been in contact with radioactive material • XRF and XRD analysis • collecting, preparing and testing samples containing radioactive materials • using radionuclides in a laboratory.
<i>Radiation protection safety standards, codes and guidelines</i> may include:	<ul style="list-style-type: none"> • Australian Radiation Protection and Nuclear Safety Agency (ARPANSA) radiation protection series publications, such as: <ul style="list-style-type: none"> • RPS No.1 Recommendations for Limiting Exposure to Ionizing Radiation (1995) and National Standard for Limiting Occupational Exposure to Ionizing Radiation (republished 2002) • RPS No.7 Recommendations for Intervention in Emergency Situations Involving Radiation Exposure (2004) • RPS No.6 National Directory for Radiation Protection (2004) • RPS No.9 Code of Practice and Safety Guide for Radiation Protection and Radioactive Waste Management in Mining and Mineral Processing (2005) • RPS No.15 Safety Guide for the Management of Naturally Occurring Radioactive Material (NORM) (2008) • requirements of commonwealth, state and territory radiation protection and safety legislation • definition of a responsible person • Australian standards.
<i>Specifications and features of instruments</i> may include:	<ul style="list-style-type: none"> • types of measurements to be performed, such as direct, scanning and sampling • radionuclides and radiation energies (KeV, MeV) of interest • detector type, window thickness and density, and probe area • detector sensitivity and detection limits

RANGE STATEMENT	
	<ul style="list-style-type: none"> • response time • estimated uncertainty for each range • single or multi-channel analyser • interfacing with data loggers and computers • power and battery requirements • size and weight • use under environmental conditions, including: <ul style="list-style-type: none"> • thermal and mechanical stress • magnetic and electrostatic fields.
<i>Adult learning principles</i> may include:	<ul style="list-style-type: none"> • explaining aims and objectives of training program • linking learning with everyday work tasks • using a logical sequence of learning activities • presenting new information in manageable chunks • providing opportunities to practise new skills and solve common problems • reinforcing important points • using a range of questions to check understanding • providing regular and constructive feedback.
<i>Regular instrument checks and minor maintenance</i> may include:	<ul style="list-style-type: none"> • cleaning • checking and replacing batteries • checking zero, span and range • using one or more sources of specific radiation type and energy to check calibration and response in each range • assessing need for corrections for differences: <ul style="list-style-type: none"> • in source-detector geometry and/or distance • between calibration and intended field/laboratory use • adjusting calibration if authorised to do so • repairing pinholes in fragile windows • simple fault finding using instrument manual, error codes and recommended remedial actions.
<i>Radiation management plan</i> should include details of:	<ul style="list-style-type: none"> • work practices, such as safe working rules and emergency response procedures • roles and responsibilities of personnel • radiation monitoring requirements • control of an incident involving a source • storage of a source • accountability and records • other requirements that may have a bearing on safety.
<i>Required records</i> may include	<ul style="list-style-type: none"> • purchase records, warranties, and service agreements for instruments

RANGE STATEMENT

details of:

- instrument calibration status
- instrument inspection, faults, servicing and repairs
- instrument use, including operator, time and date, and location
- instrument maintenance schedule and records.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<p>1. Analyse the requirements for a radiation management plan.</p>	<p>1.1. Review relevant <i>radiation protection and safety legislation, standards, codes and guidelines</i> to confirm radiation protection and safety requirements detailed in <i>radiation management plan</i>.</p> <p>1.2. Review relevant, available records and information about <i>hazards due to radioactive materials, equipment and work activities</i> of the organisation.</p> <p>1.3. Identify known and potential hazards associated with current or future <i>radiation-related work activities</i>.</p> <p>1.4. Procure <i>radiation instruments and monitoring equipment</i> and locate measuring or survey procedures to quantify hazards.</p> <p>1.5. <i>Quantify radiation</i> hazards and anticipated exposure/dose, and compare results with relevant limits.</p> <p>1.6. Source information and make recommendations about relevant radiation <i>control measures</i>, safety procedures, radiation <i>monitoring programs</i> and personal protective equipment (PPE).</p> <p>1.7. Undertake organisational risk assessment in relation to <i>ionising radiation</i> safety.</p>
<p>2. Develop and/or revise organisational radiation protection program.</p>	<p>2.1. Identify organisational compliance against radiation safety requirements, including organisational policy and approach, and review organisation's procedures for developing or revising radiation protection policy, procedures and plans.</p> <p>2.2. Identify critical groups potentially affected by radiation practices conducted by whole of organisation, including workers, the public and the environment.</p> <p>2.3. Undertake critical group analysis and <i>cost-benefit analysis</i> component of radiation management plan to identify key performance indicators.</p> <p>2.4. <i>Design or amend radiation management plans</i> to control and monitor radiation-related work activities conducted by the organisation and comply with regulator requirements.</p> <p>2.5. Submit radiation management plans to the responsible person for approval in accordance with organisational procedures and regulator</p>

ELEMENT	PERFORMANCE CRITERIA
	<p>requirements.</p> <p>2.6.Design a strategy for implementing the new/revised organisational radiation management plans that identifies key people, recommended approaches and resources available.</p> <p>2.7.Distribute plans to relevant personnel and confirm they understand their roles and responsibilities.</p> <p>2.8.Identify organisational key performance indicators for radiation safety performance measurement and negotiate targets for these indicators.</p> <p>2.9.Develop and implement quantitative risk management/risk assessment tools for radiation.</p>
<p>3. Ensure organisational radiation protection and monitoring systems are implemented effectively.</p>	<p>3.1.Ensure all personnel understand their roles and responsibilities under the new or revised authorised radiation management plans.</p> <p>3.2.Ensure information about radiation protection and monitoring equipment and procedures is provided to relevant personnel.</p> <p>3.3.Ensure that prescribed radiation signs and safety communication systems, including noticeboards, are maintained in good condition and are readily visible.</p> <p>3.4.Approve appropriate audit plans and audit tools.</p> <p>3.5.Ensure audits of radiation protection and monitoring systems, equipment and safety performance are conducted in accordance with agreed audit plans.</p> <p>3.6.Analyse audit information to identify non-conformances and opportunities for improvements and provide recommendations to the licensee or responsible person on non-compliance and opportunities for improvement.</p> <p>3.7.Ensure all findings, actions and outcomes are documented in accordance with regulator requirements and organisational procedures.</p>
<p>4. Investigate and rectify organisational safety, quality and non-compliance issues.</p>	<p>4.1.Review atypical dose results with reference to radiation safety key performance indicators.</p> <p>4.2.Examine any defect or changes in work practice, equipment or hazards that could increase exposure of personnel or present an environmental risk at organisational or systemic level and determine appropriate controls.</p> <p>4.3.Analyse instances of potential or actual non-compliance and redesign work practices or</p>

ELEMENT	PERFORMANCE CRITERIA
	<p>procedures to prevent recurrence.</p> <p>4.4. Approve and implement changes in work practices to further improve the organisation's radiation protection and monitoring systems.</p> <p>4.5. Maintain records of all actions and outcomes in accordance with regulator requirements and organisational procedures.</p>
<p>5. Inform the licensee about radiation protection and safety.</p>	<p>5.1. Review status reports, including details of instances of potential or actual non-compliance or incidents or accidents and actions taken.</p> <p>5.2. Review information about the adequacy of radiation management plans and protection and monitoring systems, and recommend improvements.</p> <p>5.3. Procure significant equipment purchases.</p> <p>5.4. Authorise corrective and preventative actions in accordance with organisational procedures and regulator requirements.</p> <p>5.5. Engage external radiation specialists as required.</p>
<p>6. Promote a radiation safety culture.</p>	<p>6.1. Implement mechanisms to ensure the competency of personnel to safely undertake specific radiation-related work activities, and make recommendations to the responsible person.</p> <p>6.2. Regularly review organisation's <i>learning and development strategies</i> and needs to ensure they meet organisational and regulator requirements.</p> <p>6.3. Actively promote the need to make doses as low as reasonably achievable consistent with legislation, and organisational policy and procedures.</p>
<p>7. Establish information management systems about radiation protection and safety.</p>	<p>7.1. Specify all information that must be recorded and secured, and advise relevant personnel.</p> <p>7.2. Maintain <i>required records</i> that are complete, accurate and legible and in accordance with inspection and security requirements of appropriate authority.</p> <p>7.3. Control access to records in accordance with organisational procedures.</p> <p>7.4. Provide reports in accordance with regulator requirements and organisational procedures.</p> <p>7.5. Maintain and secure records, and resolve problems in record management promptly.</p> <p>7.6. Regularly review the organisation's training requirements in radiation protection/safety,</p>

ELEMENT	PERFORMANCE CRITERIA
	workplace emergency response and environmental protection, taking into account the needs of <i>stakeholders</i> .
8. Respond to potential or actual radiation incidents or accidents.	8.1. Respond to potential <i>radiation incidents</i> , which may include unusual situations, unexpected hazards, or potential or actual emergency incidents. 8.2. Inform relevant personnel about the situation, hazard or incident. 8.3. Assist emergency response personnel to control the situation in accordance with instructions, radiation management plans and organisation's <i>response procedures</i> .

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- source and analyse new and existing information regarding radiation protection, legislation, standards, codes and guidelines
- review and implement appropriate controls for organisation-wide radiation hazards
- review and implement controls to minimise the risks of radiation hazards for practices within the control of the responsible person
- ensure that the legislative responsibilities of the licensee are fulfilled
- implement radiation safety and related policies, procedures and practices
- ensure that audits occur consistent with organisational policies and procedures
- identify and procure radiation sources and equipment
- review and make recommendations in relation to monitoring surveys and data analysis
- provide advice and authorise reports and make decisions within scope of authority
- communicate effectively using plain English to explain radiation protection and safety issues, safe working rules and recommended procedures to other personnel
- regularly review training needs in radiation protection and safety, workplace emergency response and environmental protection
- undertake research to ensure that the legislative responsibilities of the licensee are fulfilled

Required knowledge

- terms and concepts, such as ionising radiation, radioactivity, radioactive material, NORM, contamination, contamination controls, concentration, shielding, half-life, radionuclide, transport index, safe distance, and weighting factor
- types and properties of ionising radiation sources and shielding methods
- definitions of radiation quantities, such as exposure, dose, effective dose, dose rate, dose equivalent, and dose limits
- exposure pathways and protective measures
- signs and symptoms of radiation exposure, radiation health effects, and deterministic and stochastic effects
- international system (SI) of units for radiation quantities
- function of key components, set-up and calibration checks, and operating principles of radiation instruments, dosimeters and equipment used in job role
- detailed requirements of relevant legislation, codes, guidelines and safety procedures for working with radiation sources/equipment used at the organisation's facilities or sites
- health and safety and workplace emergency response procedures for radiation-related work activities in organisation

REQUIRED SKILLS AND KNOWLEDGE

- types of PPE for personnel working in ionising radiation environments and the recommended selection process
- potential adverse health and performance effects of wearing PPE while working in potentially hazardous environments
- principles and techniques for decontamination of personnel and equipment
- techniques and procedures for collecting potentially radioactive samples
- techniques for assessing radiation hazards likely to be encountered in organisation
- techniques for conducting contamination surveys
- techniques for control, containment and confinement of radiation sources/equipment encountered by organisation.
- environment, health and safety policy and procedures of the organisation, particularly how different parts of occupational hygiene system are interdependent, such as ventilation, noise, radiation and chemicals
- working knowledge of the business activities and operations conducted at the organisation's sites and the associated radiation risks
- critical group analysis, cost-benefit analysis and assessment processes to develop cost effective radiation protection programs
- sources of industry information and information from relevant professional bodies to maintain currency

Evidence Guide

EVIDENCE GUIDE	
<p>The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
<p>Overview of assessment</p>	<p>Competency must be demonstrated by the development and implementation of a radiation management plan to ensure the protection of workers, public and the environment, including an emergency response.</p>
<p>Critical aspects for assessment and evidence required to demonstrate competency in this unit</p>	<p>Assessment must confirm the ability to:</p> <ul style="list-style-type: none"> • establish and maintain an organisation-wide radiation management plan that meets regulator requirements and organisational procedures • monitor radiation-related work activities and take appropriate action to keep workplace exposure as low as reasonably achievable and to keep doses received below the relevant dose limits and to protect the environment • identify and rectify radiation safety, quality and non-compliance issues • advise the licensee about radiation safety issues • explain radiation protection and safety measures clearly and train personnel • manage radiation protection and safety information in accordance with regulator requirements and organisational procedures • coordinate workplace emergency first response. <p>Consistency in performance</p> <p>Competency should be demonstrated by performing radiation safety related components of the day-to-day functions and duties of a radiation safety officer at organisational level.</p>
<p>Context of and specific resources for assessment</p>	<p>Competency should be assessed in the workplace.</p> <p>Assessment must comply with:</p> <ul style="list-style-type: none"> • local regulations regarding the registration of operators, premises and sources at workplaces where radioactive materials and/or ionising radiation equipment are present • organisation's radiation management plan. <p>Access is required to:</p> <ul style="list-style-type: none"> • registered premises and sources • organisation's radiation management plan and related policies

EVIDENCE GUIDE	
	and procedures.
Method of assessment	<p>The following assessment methods are suggested:</p> <ul style="list-style-type: none"> • review of radiation results, records, management plans and reports generated by the candidate • review of radiation safety information developed by the candidate and provided to the work group • feedback from peers, manager and regulator representative that the candidate is able to coordinate management of radiation safety • oral and written tests and calculations involving: <ul style="list-style-type: none"> • radiation terms, principles and quantities • set-up, calibration and basic maintenance of radiation instruments • selection and use of PPE • analysis of case studies and reports of relevant emergency incidents and exercises • observation of the candidate promoting radiation safety and providing radiation safety information and instruction to other personnel. <p>In all cases, practical assessment should be supported by questions to assess underpinning knowledge and those aspects of competency that are difficult to assess directly.</p>
Guidance information for assessment	Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended,

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Radiation protection and safety legislation, standards, codes and guidelines may include:

- Australian Radiation Protection and Nuclear Safety Act 1998 and amendments 2005
- commonwealth, state and territory radiation control legislation
- Australian Radiation Protection and Nuclear Safety Agency (ARPANSA) radiation protection series publications, such as:
 - RPS No.1 Recommendations for Limiting Exposure to Ionizing Radiation (1995) and National Standard for Limiting Occupational Exposure to Ionizing Radiation (republished 2002)
 - RPS No.7 Recommendations for Intervention in Emergency Situations Involving Radiation Exposure (2004)
 - RPS No.6 National Directory for Radiation Protection (2004)
 - RPS No.9 Code of Practice and Safety Guide for Radiation Protection and Radioactive Waste Management in Mining and Mineral Processing (2005)
 - RPS No.15 Safety Guide for the Management of Naturally Occurring Radioactive Material (NORM) (2008)
- requirements of commonwealth, state and territory radiation protection and safety legislation
- definition of a responsible person
- Australian standards.

Radiation management plans may include:

- plan to keep exposure to radiation in the workplace as low as reasonably achievable and to keep doses received below the relevant dose limits, including:
 - designation of work areas to be controlled, and signage and location of protective devices
 - arrangements for authorising workers to conduct radiation-related activities
 - procedures for conducting radiation-related tasks and

RANGE STATEMENT

	<p>the safe use of radiation equipment</p> <ul style="list-style-type: none"> • procedures for the security, storage and transport of radioactive materials and waste disposal • procedures for the issue and collection, use and care of personal radiation monitors and PPE • plan for monitoring radiation exposure and for assessing doses received by exposed employees, including: <ul style="list-style-type: none"> • dosimetry specifications • deployment of survey monitors • methods for conducting required radiation surveys, wipe tests, examinations and for reporting and recording results • arrangements for personal and environmental monitoring • plan for dealing with incidents, accidents and emergencies involving exposure to radiation • plan for the induction and ongoing training of workers, visitors and members of the public as appropriate • plan for the selection, procurement, maintenance, repair and disposal of equipment containing radioactive sources • audit plan covering: <ul style="list-style-type: none"> • status of specified equipment • use of designated safe work practices • application of specified monitoring procedures • accuracy and completeness of specified records.
<p><i>Hazards due to radioactive materials, equipment and work activities</i> may include:</p>	<ul style="list-style-type: none"> • inhalation of radioactive dust or gas • ingestion of radioactive dust or contaminated food or water • unplanned exposure to sealed or unsealed radiation sources or partially enclosed equipment that emits ionising radiation • handling radioactive materials in a laboratory.
<p><i>Radiation-related work activities</i> may include:</p>	<ul style="list-style-type: none"> • extracting, milling, processing and packing radioactive ores and minerals • operating, servicing and calibrating fixed radiation gauges, bore hole logging, and industrial radiography equipment • operating, servicing and calibrating moisture density gauges • decontaminating equipment that has been in contact

RANGE STATEMENT	
	<ul style="list-style-type: none"> with radioactive material • XRF and XRD analysis • using radionuclides in a laboratory • managing wastes • using radiation for quality control in processing systems and factories.
<i>Radiation instruments and monitoring equipment</i> may include:	<ul style="list-style-type: none"> • air proportional • gas proportional • gas ionisation • Geiger-Muller • ionisation • scintillation • solid state • wipe test equipment • sample containers, shovels, augers, buckets, air/water pumps and stainless steel bailers.
<i>Quantifying radiation</i> may include:	<ul style="list-style-type: none"> • dose, effective dose and dose equivalent • dose rate • exposure.
<i>Control measures</i> may include:	<ul style="list-style-type: none"> • hierarchy of controls, including: <ul style="list-style-type: none"> • avoiding exposure, where practicable • isolating sources of radiation where practicable through shielding, containment and remote handling techniques • engineering controls to reduce radiation levels and intakes of radioactive materials in the workplace • adopting safe work practices, including work methods that make use of time, distance and shielding to minimise exposure • using approved PPE where other means of controlling exposure are not practicable or sufficient • designation of controlled areas and supervised areas • use of appropriate signs and labels • use of investigation levels of exposure for specific categories of work.
<i>Monitoring programs</i> include:	<ul style="list-style-type: none"> • identifying relevant sources of radiation exposure within a workplace • assessing radiation doses received by employees, including determining parameters that affect the assessed dose, as required by the appropriate authority • assessing radioactive discharge to, or contamination of,

RANGE STATEMENT	
	<p>the environment</p> <ul style="list-style-type: none"> • detecting changes in the circumstances of exposure, as necessary • acquiring sufficient information on radiation exposure in the workplace to enable optimisation measures to be adopted • critical group analysis, which is a process of assessing the doses to the small set of persons within the larger population most likely to receive the highest doses.
<i>Ionising radiation</i> may include:	<ul style="list-style-type: none"> • x-rays, electrons, neutrons, gamma rays, beta particles and alpha particles emitted from radioactive materials, including sealed and unsealed sources • x-rays generated by industrial radiography equipment, XRF and XRD instruments.
<i>Cost-benefit analysis</i> in the context of radiation safety involves:	<ul style="list-style-type: none"> • process of calculating the health detriment from a radiation practice and assessing such detriment against the costs of improvements or other interventions to reduce such detriment • using analysis to inform expenditure within radiation protection programs.
<i>Designing or amending radiation management plans</i> involves:	<ul style="list-style-type: none"> • identifying potential impacts of new or revised radiation management plans on relevant organisational policies, procedures and systems • advising relevant personnel • describing mitigation strategies to address probable impacts.
<i>Learning and development strategies</i> may include:	<ul style="list-style-type: none"> • face to face training • online or distance learning • mentoring and coaching.
<i>Required records</i> may include:	<ul style="list-style-type: none"> • approvals and authorisations granted by appropriate authority • radiation management plans • results of environmental surveys • doses assessed to have been received by employees who work directly with radiation and by other employees as required by the appropriate authority, including details of monitoring results and of dose calculation methods • details of training courses, participation in learning and development activities, and participation by employees • details of incidents and accidents involving exposure to

<p><i>Ionising radiation</i> may include:</p>	<ul style="list-style-type: none"> • x-rays, electrons, neutrons, gamma rays, beta particles and alpha particles emitted from radioactive materials, including sealed and unsealed sources • x-rays generated by industrial radiography equipment, XRF and XRD instruments.
	<p>radiation and corrective measures taken</p> <ul style="list-style-type: none"> • calibration, inspection and maintenance of radiation instruments and equipment • transport of radioactive sources • shipment of radioactive ores and minerals • procurement and disposal of radioactive sources • personal and environmental monitoring data • inspection and security requirements for records as determined by the appropriate authority.
<p><i>Stakeholders</i> may include:</p>	<ul style="list-style-type: none"> • regulators or inspectors from the relevant competent authority • senior management in organisation • OHS and environmental safety representatives in organisation • production managers • union and employer representatives • workers.
<p><i>Radiation incidents</i> may include:</p>	<ul style="list-style-type: none"> • exposure of unauthorised personnel entering a controlled area • exposure from an uncontrolled, high hazard radioactive sealed source that: <ul style="list-style-type: none"> • has loss or destruction of shielding • is involved in a transport accident • is lost, missing or stolen • has a malfunction of its shutter or interlocks • has been dropped during removal from its container • has jammed in an unsafe position • exposure from equipment that emits ionising radiation and has: <ul style="list-style-type: none"> • loss or destruction of shielding • malfunction of its shutter or interlocks • exposure from dispersed radioactive material caused by: <ul style="list-style-type: none"> • leakage or radioactive contamination • industrial or laboratory accident • uncontrolled releases of radioactive materials from a mine site, such as dust or contaminated water • dispersion of contaminants following destruction of

<i>Ionising radiation</i> may include:	<ul style="list-style-type: none"> • x-rays, electrons, neutrons, gamma rays, beta particles and alpha particles emitted from radioactive materials, including sealed and unsealed sources • x-rays generated by industrial radiography equipment, XRF and XRD instruments.
	a high activity sealed source.
<i>Response procedures</i> will include:	<ul style="list-style-type: none"> • instructions for keeping exposures to a minimum, consistent with essential operations through evacuation or otherwise • instructions for notifying the relevant competent authority if required.

PSPRAIL501A Operate within the regulatory framework for rail safety

Modification History

Not applicable.

Unit Descriptor

Unit descriptor

This unit covers the development and maintenance of up-to-date knowledge of the rail industry and the regulatory framework for rail safety, in order to develop industry relationships and operate effectively within the industry on behalf of the rail safety regulator.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Application of the Unit

Application of the unit

In the workplace, staff members must develop, maintain and apply up-to-date knowledge of the rail industry in order to continually improve services and safety outcomes. They must understand and use rail terminology; develop an understanding of railway infrastructure, railway technologies, railway operations and management, systems engineering and systems interfaces; and apply this in their regulatory roles. Staff members need to identify key participants in the rail industry, their relationships and their duties under rail safety legislation. In addition, they need a good understanding of key concepts and definitions included in the legislation in order to implement regulatory requirements and provide accurate information to industry operators.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

Employability skills This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Where *italicised* text is used, further information is detailed in the required skills and knowledge and/or the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Develop rail industry knowledge	<p>1.1 <i>Rail terminology</i> and <i>elements of railway systems</i> are identified and clarified to ensure knowledge is up-to-date</p> <p>1.2 <i>Railway technologies, infrastructure</i> and interaction relating to the sphere of operation are researched and confirmed as current with experienced, senior or supervisory staff</p> <p>1.3 Key issues relating to railway operations and management, rail safety and <i>systems interfaces</i> are identified and their impact on rail safety regulation is determined in accordance with legislation</p>
2. Maintain currency in rail industry knowledge	<p>2.1 Changes in rail industry operations and technology are monitored over time and their implications for safety regulation are identified and discussed within the work group</p> <p>2.2 Changes in rail safety regulatory requirements are monitored and available information, training and awareness sessions are accessed to maintain knowledge and skill base</p> <p>2.3 Regular contact and <i>information</i> exchange with <i>other rail safety regulatory staff</i> are undertaken to ensure consistent application of regulatory requirements</p>
3. Apply knowledge of rail industry standards	<p>3.1 <i>Rail safety operating principles</i> are identified and confirmed</p> <p>3.2 <i>Applicable current national and international standards</i>, codes and local rules are identified and their relevance to rail safety regulation is confirmed</p> <p>3.3 Requirements of rail industry standards for use by rail transport operators are identified in the context of safety management systems and risk management</p> <p>3.3 <i>Implications</i> of using rail industry standards for rail safety compliance are explained as required, in accordance with industry needs</p>
4. Identify and use key principles underpinning rail safety regulation	<p>4.1 Role, function and purpose of co-regulation in the rail industry are explained in the context of legislation and explanatory memorandum</p> <p>4.2 Role, function and purpose of safety management systems and accreditation are explained in the context of legislation and guidelines</p> <p>4.3 Functions and obligations of <i>duty holders and their general duties</i> are explained in the context of rail safety legislation</p>
5. Establish and maintain rail industry relationships	<p>5.1 <i>Rail industry organisations</i> are identified and formal and informal lines of communications are established and maintained</p> <p>5.2 Trust and confidence are gained and maintained through high</p>

ELEMENT

PERFORMANCE CRITERIA

- standards of ethical practice
- 5.3 Interests and requirements of the regulator are represented and promoted using strategies tailored to the particular industry organisation
- 5.4 Feedback is obtained and used to improve services and regulatory outcomes

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the essential skills and knowledge and their level, required for this unit.

Required skills:

Look for evidence that confirms skills in:

- researching information related to the rail industry and rail safety regulation
- accessing and using rail safety industry standards
- developing and maintaining currency in rail industry knowledge
- communicating with others, involving the explanation of complex information relating to rail safety regulation
- networking and building relationships with a diverse range of rail industry organisations
- self-management to work ethically and in accordance with legislation
- using technology to conduct research, access industry standards, review changing industry information and network with others
- responding to diversity, including gender and disability
- applying environmental and occupational health and safety procedures when using computer technology and when networking in the field with rail industry operators

Required knowledge:

Look for evidence that confirms knowledge and understanding of:

- rail industry and rail industry terminology, including terminology used in technical standards
- changes in rail industry operations and technology with implications for rail safety regulation
- key principles and practices associated with railway operations
- relevance of national and international standards to the rail industry
- rail safety
- key concepts and definitions relating to rail safety regulation
- duty holders and their duties under rail safety legislation
- key participants in the rail industry.

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the unit descriptor, performance criteria, The range statement and the Assessment Guidelines for the Public Sector Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms:

- the knowledge requirements of this unit
- the skill requirements of this unit
- application of employability skills as they relate to this unit
- effective operation within the regulatory framework for rail safety in a range of 3 or more contexts or occasions over time.

Context of and specific resources for assessment

Valid assessment of this unit requires:

- a workplace environment or one that closely resembles normal work practice and replicates the range of conditions likely to be encountered when working within the regulatory framework for rail safety, including coping with difficulties, irregularities and breakdowns in routine

Resources essential for assessment include:

- legislation, guidelines, codes of practice and standards relating to rail safety
- current rail industry terminology and meanings
- organisational procedures, guidelines and protocols for working within the regulatory framework for rail safety
- scenarios and/or case studies to illustrate the range of situations likely to be encountered when working within the regulatory framework for rail safety
- access to relevant systems

Method of assessment

Assessment methods suitable for valid and reliable assessment of this unit must use authenticated evidence from the workplace and/or training courses and may include a combination of two or more of:

- research projects
- simulation or role plays
- case studies and scenarios
- workplace projects
- portfolios
- authenticated evidence from the workplace and/or training courses.

EVIDENCE GUIDE

The assessment environment should not disadvantage the candidate and where the person has a disability the principle of reasonable adjustment should be applied during assessment.

Assessment methods should reflect but not exceed workplace demands, such as literacy, and the needs of particular groups, such as:

- people with disabilities
- people from culturally and linguistically diverse backgrounds
- Aboriginal and Torres Strait Islander people
- women
- young people
- older people
- people in rural and remote locations

Suggested units that may be co-assessed with this unit to increase the efficiency and realism of the assessment process include:

- PSPETHC501B Promote the values and ethos of public service
- PSPGOV504B Undertake research and analysis
- PSPGOV512A Use complex workplace communication strategies
- PSPLEGN501B Promote compliance with legislation in the public sector
- PSPRAIL502A Assess and administer accreditation and registration applications
- PSPRAIL504A Review and promote safety culture
- BSBAUD503B Lead a quality audit.

Guidance information for assessment

For consistency of assessment:

- evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments

Assessing employability skills:

- employability skills are integral to effective performance in the workplace and are broadly consistent across industry sectors
- the way these skills are applied varies between occupations and qualifications due to the different work functions and contexts
- employability skills embedded in this unit of competency should be assessed holistically with other relevant units that make up the skill set or qualification, and in the context of the job role

In practice, operating effectively within the regulatory framework for rail safety overlaps with other generalist or specialist work

EVIDENCE GUIDE

activities, such as undertaking research and analysis, acting ethically, using complex communication strategies, leading quality audits, and assessing and administering accreditation and registration applications. Co-assessment with units of competency addressing these other activities could be considered.

Range Statement

RANGE STATEMENT

The range statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The range statement also provides a focus for assessment. It relates to the unit as a whole. Text in *italics* in the Performance criteria is explained here.

Rail terminology may relate to infrastructure, such as:

- rail, including:
- mass
- rail head
- web
- rail foot
- jointed
- continuously welded: thermit or flashbutt
- fastening (dog spike, pandrol clip and fishplate)
- sleeper plate
- sleeper (timber, concrete or steel)
- ballast
- rack
- formation
- points and crossings (turnouts, crossovers and diamonds)
- curves (circular or transition) and cant
- grades
- track, including deterioration and maintenance, re-sleepering, surfacing and tamping
- substation and feeder system
- electrical overhead (catenary, contact, dropper wire, span wire, centre pole, span pole and building rosette)
- train signalling (fixed or automatic)
- tram signalling
- tram squares
- stations
- depots
- level crossings
- sidings
- rolling stock:
- locomotives
- trains:
- passenger
- freight: container, flat, open, van, hopper and tank

RANGE STATEMENT

- special purpose, including:
- special vehicles
- multi-units
- trailers
- road/rail vehicles
- tram cars
- hi rail
- self-propelled vehicles
- diesel motive units (DMUs)
- historic/heritage rolling stock
- rolling stock systems:
- traction
- braking
- running gear (wheelsets, bogies, couplers and draft gear)
- pantograph
- trolley pole
- rail operations:
- safeworking systems: train control, space interval or block working, running lines, authorisation of movements, fixed and onboard signals, drive on sight operations, staff (token) working, train order working, electronic authority, manual and automatic signalling, indicators
- systems interfaces (outline, wheel/rail, train/signals)
- railway infrastructure
- railway technologies
- railway operations and management
- systems engineering
- systems interfaces
- access arrangements
- safety considerations, such as:
- structural
- design
- performance
- maintenance
- interfaces
- human factors
- crashworthiness
- emergency requirements
- safety management systems for rail transport operators
- rolling stock, including:
- locomotives

Elements of railway systems *may include:*

Railway technologies

RANGE STATEMENT

may include:

- rail cars
- trams
- monorails
- road/rail vehicles
- passenger rolling stock
- freight rolling stock
- special vehicles, multi-units and trailers
- electric motive units (EMUs) and DMUs
- historic/heritage rolling stock
- rolling stock systems
- rail vehicle crashworthiness
- vehicle maintenance
- wheel/rail interface theory and practice
- railway traction and braking
- traction power and distribution
- track and road bed
- signalling

Railway infrastructure
may include:

- track infrastructure, including:
- track systems and geometry
- track beds and components
- points and crossings
- curves and grades
- structures for railways, such as cuttings, embankments, tunnels and bridges
- level crossings
- kinematic envelopes/rolling stock outlines
- gauging
- on-street tram tracks
- electrical infrastructure, including:
- electrification systems, such as overhead live electrical and third rail
- electric traction supply systems, including electromagnetic interference from traction supplies, e.g. electrolysis
- signalling infrastructure, including:
- fixed
- manual and automatic signalling
- basic principles of signalling and train control
- tram signals
- communications for train control
- automatic train protection systems
- train monitoring

RANGE STATEMENT

- trackside warning systems
 - cab-based signalling or train protection systems
- Systems interfaces may include:*
- projects
 - tramway squares
 - electrical systems substations
 - systems engineering and systems integration
 - new works approvals, including identification of issues relating to management of change and material change
 - management of major railway projects
 - infrastructure maintenance systems and possessions planning
 - safeworking and operations, including rules and operating procedures for safeworking on trains
- Information may include:*
- uniform administration guidelines
 - business rules for audits
 - safety notices
 - national audit program information
- Other rail safety regulatory staff may include:*
- colleagues and supervisors
 - inter-jurisdictional regulatory staff
- Rail safety operating principles include:*
- identification and management of risk
 - protection of persons from injury
 - protection of property from damage
 - ensuring that emergencies and incidents are properly managed
 - ensuring that interfaces between different organisations are properly defined and managed
 - track access
 - train separation
- Applicable current national and international standards may include:*
- Rail Industry Safety and Standards Board (RISSB) (formerly Code Management Company [CMC]) codes and standards, e.g. Code of Practice for Health Assessment of Rail Safety Workers Volumes 1 and 2
 - AS4292 series: Railway Safety Management
 - AS/NZS4360 Risk Management and HB436:2004 Risk Management Guidelines
 - AS/NZS/ISO 9000 series: Quality Management Systems
 - AS/NZS15288 Systems engineering - System life cycle processes
 - AS/NZS61508 Functional safety of electrical/electronic/programmable electronic safety-related systems
 - AS/NZS/ISO 19011 Guidelines for Quality and/or

RANGE STATEMENT

- Environmental Management System Auditing
 - AS/NZS3931 Risk Analysis of Technological Systems - Application Guide
 - AS1742.7 Manual of Uniform Traffic Control Devices Part 7: Railway Crossings
 - AS3806 Compliance Programs
 - relevant international standards, such as:
 - European Technical Specifications for Interoperability (TSIs)
 - European Norms (ENs)
 - British Railway Group Standards (RGSs)
- Implications may include:**
- a requirement that rail transport operators demonstrate that use of the appropriate standard or code will mitigate the risk
- Duty holders include:**
- rail transport operators - rail infrastructure managers and/or rolling stock operators
 - contractors
 - designers, manufacturers, suppliers, commissioners, erectors and installers
 - de-commissioners
 - managers of private sidings
 - rail safety workers
- Purpose of general duties is:**
- to provide a concise statement of a duty holder's overall safety responsibilities
- General duties are:**
- broad legal requirements that define the extent and nature of the responsibilities of a duty holder
 - described as general duties to distinguish them from other more specific and detailed legal requirements
 - sometimes referred to as 'general duties of care' or more simply as 'the duty of care'
- Rail industry organisations may include:**
- rail transport operators
 - industry associations
 - unions
 - maintainers
 - suppliers
 - contractors

Unit Sector(s)

Competency field

Competency field Rail Safety Regulation

PSPRAIL502A Assess and administer accreditation and registration applications

Modification History

Not applicable.

Unit Descriptor

Unit descriptor

This unit covers the assessment and administration of applications for accreditation of rail transport operators, exemptions, variations to accreditation, notifications of change and registration of private sidings.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Application of the Unit

Application of the unit

In the workplace, staff members must be able to identify and apply legislative, regulatory and procedural requirements relating to accreditation of rail transport operators and registration of private sidings. They must be able to assess the competency and capacity of rail transport operators to manage risks and explain the requirements of accreditation, exemptions, variations, notifications of change and registration. Staff members also assist applicants to determine if accreditation or variations are required or if they are eligible for exemptions prior to application. They need to provide clear information to applicants to help reduce delays due to incomplete or inadequate applications.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

Employability skills This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Where *italicised* text is used, further information is detailed in the required skills and knowledge and/or the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<p>1. Explain accreditation and registration requirements</p>	<p>1.1 Current and comprehensive information is accessed to clarify legislative, regulatory and procedural requirements for <i>accreditation</i> of rail transport operators, exemptions, <i>variations to accreditation</i>, <i>notifications of change and registration of private sidings</i></p> <p>1.2 <i>Information relating to accreditation</i>, accreditation processes and registration requirements is provided in accordance with legislation, policies and procedures/guidelines</p> <p>1.3 Information relating to possible <i>exemptions</i> is provided in accordance with legislation, policies and procedures/guidelines</p> <p>1.4 Information relating to notification of change requirements is provided in accordance with legislation, policies and procedures/guidelines</p>
<p>2. Receive, assess and determine applications, and review notifications of change</p>	<p>2.1 <i>Application requirements</i> are identified and confirmed for accreditation, exemptions, variations to accreditation, notifications of change or registration of private sidings</p> <p>2.2 <i>Key criteria for granting accreditation</i>, variations to accreditation and issuing notices, and steps for assessment of applications are identified and confirmed, including requirements for liaison with other regulators</p> <p>2.3 Applications and <i>supporting documents</i> are checked for adequacy and completeness in accordance with <i>accreditation</i> or <i>registration requirements</i>, details are verified, and further information is obtained as necessary</p> <p>2.4 Applications are recorded and assessed in accordance with legislative timeframes and procedures/guidelines</p> <p>2.5 Evidence supporting the assessment and decision is clearly documented in accordance with legislative requirements and procedures/guidelines</p>

ELEMENT

PERFORMANCE CRITERIA

3. Issue notices

3.1 Accreditation notices and *schedules* are prepared and issued in accordance with legislation, policies and *business rules*

3.2 *Reasons* for decisions to impose *conditions* on or restrictions to accreditation are provided in accordance with legislation, policies and procedures/guidelines, along with information on applicants' rights for independent review of the decisions

3.3 Frequency of *reviews and reports* for the operator is identified and included in accordance with legislative and policy requirements

3.4 Notices of registration are issued in accordance with legislative and policy requirements

3.5 Annual fees and their due date are specified in accordance with regulatory requirements

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the essential skills and knowledge and their level, required for this unit.

Required skills:

Look for evidence that confirms skills in:

- analysing and assessing complex and formal documents, such as legislation and supporting materials and applying them to the assessment of applications
- researching information related to accreditation or registration requirements
- planning and organising work
- analysing applications and supporting evidence against relevant criteria and using initiative to identify and request additional information if required
- communicating with others, involving the explanation of complex information relating to regulatory requirements
- documenting decisions, writing submissions and recommendations, and preparing notices
- numeracy to confirm accuracy of numerical information
- self-management to work ethically and in accordance with legislation
- using technology to conduct research, make enquiries, review available data, access legislative requirements and record outcomes
- responding to diversity, including gender and disability
- applying environmental and occupational health and safety procedures to administrative work and when dealing with applicants.

Required knowledge:

Look for evidence that confirms knowledge and understanding of:

- legislative, regulatory and procedural requirements for accreditation, exemptions, variations, notifications of change and registration of private sidings
- circumstances under which some or all accreditation requirements may be waived
- safety management systems and rail safety management plans
- confidentiality requirements.

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the unit descriptor, performance criteria, The range statement and the Assessment Guidelines for the Public Sector Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms:

- the knowledge requirements of this unit
- the skill requirements of this unit
- application of employability skills as they relate to this unit
- assessing and administering accreditation in a range of 3 or more contexts or occasions over time.

Context of and specific resources for assessment

Valid assessment of this unit requires:

- a workplace environment or one that closely resembles normal work practice and replicates the range of conditions likely to be encountered when assessing and administering accreditation and registration applications, including coping with difficulties, irregularities and breakdowns in routine

Resources essential for assessment include:

- legislation and standards relating to the accreditation of railway operators and registration of private sidings
- national templates and business rules for accreditation
- organisational procedures/guidelines and protocols relating to the administration of accreditation applications
- scenarios and/or case studies to capture the range of situations likely to be encountered when assessing and administering applications
- access to relevant systems

Method of assessment

Assessment methods suitable for valid and reliable assessment of this unit of competency must use authenticated evidence from the workplace and/or training courses and may include, but are not limited to, a combination of 2 or more of:

- demonstration
- observation
- simulation or role plays
- case studies/scenarios
- workplace projects
- portfolios
- authenticated evidence from the workplace and/or training

EVIDENCE GUIDE

courses

The assessment environment should not disadvantage the candidate and where the person has a disability the principle of reasonable adjustment should be applied during assessment.

Assessment methods should reflect but not exceed workplace demands, such as literacy demands and the needs of particular groups, such as:

- people with disabilities
- people from culturally and linguistically diverse backgrounds
- Aboriginal and Torres Strait Islander people
- women
- young people
- older people
- people in rural and remote locations

Suggested units that may be co-assessed with this unit to increase the efficiency and realism of the assessment process include:

- PSPETHC501B Promote the values and ethos of public service
- PSPGOV512A Use complex workplace communication strategies
- PSPLEGN501B Promote compliance with legislation in the public sector
- PSPPOL502A Advise on organisation policy
- PUAPOL010A Perform administrative duties
- PUAPOL013A Create, maintain and enhance productive working relationships.

Guidance information for assessment

For consistency of assessment:

- evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments

Assessing employability skills:

- employability skills are integral to effective performance in the workplace and are broadly consistent across industry sectors
- the way these skills are applied varies between occupations and qualifications due to the different work functions and contexts
- employability skills embedded in this unit of competency should be assessed holistically with other relevant units that make up the skills set or qualification, and in the context of the job role

EVIDENCE GUIDE

In practice, assessing and administering accreditation and registration applications overlaps with other generalist or specialist work activities, such as acting ethically, using complex communication strategies, advising on organisation policy, performing administrative duties, and maintaining productive working relationships. Co-assessment with units of competency addressing these other activities could be considered

Range Statement

RANGE STATEMENT

The range statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The range statement also provides a focus for assessment. It relates to the unit as a whole. Text in *italics* in the Performance criteria is explained here.

Accreditation:

- ensures that railway operators have the competency, capacity and systems to safely manage their railway operations and is based on the underlying principle of hazard identification and adequate risk management
- is usually granted for an unlimited period of time, however time limits on accreditation may be imposed in some circumstances
- accredited railway operators propose to implement changes to the scope and nature of their railway operations, not covered by their current accreditation

Variations to accreditation apply when:

Notification of change must occur for:

- decisions to design or construct rolling stock or new railway tracks (as soon as is reasonably practicable [ASAIRP])
- introducing a new type of rolling stock into service (28 days prior)
- making changes to a safety critical element of rolling stock (28 days prior)
- introducing a new type of rail infrastructure into service (28 days prior)
- changes to design standards for rail infrastructure or rolling stock (28 days prior)
- deciding to adopt new design standards for rail infrastructure or rolling stock (28 days prior)
- changes to the frequency or procedures for inspection or maintenance of rail infrastructure or rolling stock (28 days prior)
- changes to any safeworking system rule or procedure (28 days prior)
- decision to introduce a new safeworking system rule or procedure (ASAIRP)
- replacing the nominated contact person for regulator queries (ASAIRP)

Registration of private sidings:

- is a simpler process than accreditation
- is required for private sidings that are connected to or have access to the tracks of an accredited rail transport operator
- includes an interface agreement with the accredited operator of

RANGE STATEMENT

- the railway to which their siding connects
- Private sidings:**
- are sidings managed, owned or controlled by one party which are connected to, or have access to, rail infrastructure managed by another party
 - do not include marshalling yards, crossing loops, or passenger or freight terminals
 - do not include a siding, or a siding of a class, prescribed by the regulations not to be a private siding
 - are exempt from accreditation, but may have conditions imposed on their registration
- Information relating to accreditation may include:**
- purpose of accreditation
 - legislative authority for accreditation
 - eligibility for accreditation
 - application requirements
 - exemptions for some or all accreditation requirements
 - variations to accreditation
 - criteria for assessment
 - application fees for accreditation, if applicable
 - conditions attached to existing accreditation
 - right of review/appeal against accreditation decisions
- Exemptions may be granted:**
- for some or all accreditation requirements (Note: this is not an exemption from the need to be accredited)
 - in accordance with legislation
- Application requirements include:**
- name and contact details of the applicant
 - scope and nature of railway operations
 - safety management plan for railway operations
 - whether an applicant is accredited or has applied for accreditation in another state or territory
 - description of operational assets and safeworking systems
 - evidence of the right to manage the infrastructure and/or rolling stock
 - evidence of consultation during development of the safety management system
 - details of contractors
 - endorsement by the applicant's governing body
 - application fee
- Key criteria for granting accreditation include evidence:**
- that the applicant is a rail infrastructure manager or rolling stock operator in relation to the railway operations for which accreditation is sought
 - of competency and capacity to manage risks to safety and implement the proposed safety management system

RANGE STATEMENT

Supporting documents *may include:*

- of financial capacity or public risk insurance arrangements to meet reasonable potential accident liabilities
- of meeting the consultation requirements of the legislation in relation to the safety management system
- of satisfying legislative requirement
- description of the scope and nature of railway operations, including all elements of railway infrastructure and rolling stock
- description of the safety management system, or rail safety management plan and evidence of consultation during development
- details of operational assets and safeworking systems
- evidence of current or previous accreditation
- evidence of accreditation in another state or territory
- endorsement by the applicant's governing body
- evidence of effective management and control of relevant railway infrastructure or rolling stock movements
- details of contractors who will carry out railway operations on behalf of the applicant
- evidence of financial capacity and/or liability insurance arrangements
- details of safety interface agreements

Accreditation requirements *include:*

- safety management system or rail safety management plan that effectively controls the risks associated with carrying out railway operations
- competency and capacity to implement and comply with the safety management system or rail safety management plan
- payment of applicable accreditation fees

Registration requirements *include:*

- systems and procedures to ensure safety
- maintaining a risk register and keeping it up-to-date
- documented procedures for maintenance of rail infrastructure
- compliance with any conditions imposed by the regulator
- interface agreements and coordination plans for interfaces with accredited railways
- maintaining a register of interface coordination plans
- payment of applicable registration fees

Schedules *include:*

- railway operations - rail infrastructure (Schedule 1)
- railway operations - rolling stock (Schedule 2)

Business rules *may include:*

- National Business Rules for Uniform Administration of Accreditation
- national templates for accreditation notices
- use of specified terms to describe railway operations

RANGE STATEMENT

Reasons *may include that conditions are:*

- prescribed by legislation
- imposed to indicate the limits of competency and capacity demonstrated by the accredited person at a local jurisdictional level
- imposed because the programs of work required are judged to be material to the competency and capacity required for the management of risks to safety associated with the subject railway operations
- imposed to indicate the permissions sought by applicant

Conditions *may relate to:*

- intensity of railway operations
- time of operation - daylight, night time or between specific hours
- type of infrastructure being managed, e.g. whether track is electrified
- type of traction to be used in relation to rolling stock
- services or aspects of services, or specific railway operations to be undertaken
- performance of specific safety management initiatives or projects by specified deadlines
- changes to operations

Reviews and reports *include:*

- safety management system reviews conducted annually, or more or less frequently, as determined by the regulator
- regular safety performance reports

Unit Sector(s)

Competency field

Competency field Rail Safety Regulation

PSPRAIL503A Receive and act on industry safety information and intelligence

Modification History

Not applicable.

Unit Descriptor

Unit descriptor

This unit covers the receipt and actioning of occurrence notification reports and annual rail safety reports from railway operators, rail safety investigation reports, and confidential and public reporting of rail safety issues and information.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Application of the Unit

Application of the unit In the workplace, staff members must be able to analyse and categorise industry occurrence notification reports for a range of notifiable occurrences; from serious accidents or incidents causing death or injury to a breach of a safeworking system. They must have a good understanding of both Category A and Category B occurrences as defined in legislation, and use judgment to determine whether further information is required or the scene of the occurrence needs to be attended. When necessary, staff may influence investigation requirements based on their knowledge of regulatory requirements and incidents that have occurred.

Staff must also review annual rail safety reports to determine future compliance or audit action needed and to identify trends; while rail safety investigation reports are analysed to identify the relevance, implications and lessons to be learned for the jurisdiction. In addition, staff members must be able to respond appropriately to confidential or public reporting of rail safety issues and information.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

Employability skills This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Where *italicised* text is used, further information is detailed in the required skills and knowledge and/or the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT

PERFORMANCE CRITERIA

1. Receive and action industry occurrence notification reports

1.1 Reports of *notifiable occurrences* are assessed, information is validated and further information gathered as necessary in accordance with organisational procedures/guidelines

1.2 Occurrences are confirmed as either Category A or Category B in accordance with legislation to ensure validity of data recorded

1.3 Management and *other required organisations* are advised in accordance with organisational protocols and legislative requirements

1.4 Decision to attend scene of occurrence is made and evidence gathered in accordance with standard operating procedures

1.5 Type and scope of investigation are determined in accordance with legislative requirements and procedures/guidelines

1.6 Occurrence notification reports are *acted upon* in accordance with legislation, policies and procedures/guidelines

2. Review and act on annual safety reports

2.1 Annual safety reports are analysed for content and completeness in accordance with regulatory requirements

2.2 Acceptance of reports is recommended or additional information requested in accordance with organisational policies, procedures and guidelines

2.3 Formal acknowledgements are issued in accordance with organisational procedures/guidelines

2.4 Issues for future compliance and/or audit action are identified and reported in accordance with organisational policies, procedures and guidelines

ELEMENT

PERFORMANCE CRITERIA

3. Analyse rail safety investigation reports

3.1 Relevance of rail safety investigation reports to the local jurisdictional context is determined by analysing the incident, context and contributing factors

3.2 Safety actions as a result of investigation reports are monitored and followed up with the involved parties as required

3.3 Lessons to be learned by the wider industry from rail safety investigations are identified and safety advice is provided as required

3.4 Possible implications for legislation, policies and procedures are identified and reported in accordance with organisational requirements

4. Respond to rail safety issues and information reported to the rail safety regulator

4.1 Reports of rail safety issues and information are assessed and where appropriate followed up through investigation of issues, validation of information and obtaining of additional corroborative evidence where necessary

4.2 Where level of authority allows, action is taken in response to reports, or matters are referred to more senior staff for their attention

4.3 Records are maintained of issues, actions taken and further follow-up needed in accordance with organisational procedures/guidelines and legislative requirements

4.4 Matters are closed and reports on action taken are provided in writing to the originator where known, and to organisational personnel in accordance with policies, procedures and guidelines

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the essential skills and knowledge and their level, required for this unit.

Required skills:

Look for evidence that confirms skills in:

- problem solving in order to analyse and validate information relating to rail safety occurrences and issues
- gathering further information related to rail safety occurrences and issues
- explaining complex information about rail safety legislative requirements
- determining type and scope of investigation required
- using initiative to determine possible implications of safety investigation reports for legislation, policies and guidelines
- numeracy to confirm accuracy of numerical information
- written communication to write reports and prepare responses for the public and the organisation
- self-management to work ethically and in accordance with legislation
- using technology to gather information, make enquiries, review available data, access legislative requirements and record outcomes
- responding to diversity, including gender and disability
- applying environmental and occupational health and safety procedures to administrative work and when in the field attending accident/incident scenes.

Required knowledge:

Look for evidence that confirms knowledge and understanding of:

- rail safety legislation relating to occurrence notification, annual safety reports and reporting of issues to the rail safety regulator
- jurisdictional memoranda of understanding (MOUs)
- public sector legislation relating to privacy, freedom of information and whistleblowers in the context of safety reporting
- methods of rail safety investigation
- notification protocols for occurrences
- occurrence notification reporting requirements - ON-S1 national document
- Category A notifiable occurrences
- Category B notifiable occurrences
- procedural requirements for receiving and following up industry safety information and intelligence

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the unit descriptor, performance criteria, The range statement and the Assessment Guidelines for the Public Sector Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms:

- the knowledge requirements of this unit
- the skill requirements of this unit
- application of employability skills as they relate to this unit
- receiving and acting on industry safety information and intelligence in a range of 3 or more contexts or occasions, over time.

Context of and specific resources for assessment

Valid assessment of this unit requires:

- a workplace environment or one that closely resembles normal work practice and replicates the range of conditions likely to be encountered when receiving and acting on industry safety information and intelligence, including coping with difficulties, irregularities and breakdowns in routine

Resources essential for assessment include:

- legislation and standards relating to rail safety information and intelligence
- organisational procedures and protocols relating to receipt and actioning of industry safety information and intelligence
- scenarios and/or case studies to capture the range of situations likely to be encountered when receiving and acting on industry safety information and intelligence
- access to relevant systems

Method of assessment

Assessment methods suitable for valid and reliable assessment of this unit must use authenticated evidence from the workplace and/or training courses and may include, but are not limited to, a combination of 2 or more of:

- demonstration
- observation
- simulation or role plays
- case studies/scenarios
- workplace projects
- portfolios

EVIDENCE GUIDE

- authenticated evidence from the workplace and/or training courses

The assessment environment should not disadvantage the candidate and where the person has a disability the principle of reasonable adjustment should be applied during assessment.

Assessment methods should reflect but not exceed workplace demands, such as literacy, and the needs of particular groups, such as:

- people with disabilities
- people from culturally and linguistically diverse backgrounds
- Aboriginal and Torres Strait Islander people
- women
- young people
- older people
- people in rural and remote locations

Suggested units that may be co-assessed with this unit to increase the efficiency and realism of the assessment process include, but are not limited to:

- PSPETHC501B Promote the values and ethos of public service
- PSPGOV512A Use complex workplace communication strategies
- PSPGOV513A Refine complex workplace documents
- PSPLEGN501B Promote compliance with legislation in the public sector
- PSPRAIL501A Operate within the regulatory framework for rail safety
- PSPWPI501B Evaluate workplace legislative compliance
- PSPWPI503B Investigate possible breaches of workplace legislation

Guidance information for assessment

For consistency of assessment:

- evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments

Assessing employability skills:

- employability skills are integral to effective performance in the workplace and are broadly consistent across industry sectors
- the way these skills are applied varies between occupations and qualifications due to the different work functions and contexts
- employability skills embedded in this unit of competency should be assessed holistically with other relevant units that

EVIDENCE GUIDE

make up the skills set or qualification, and in the context of the job role

In practice, receiving and acting on industry safety information and intelligence overlaps with other generalist or specialist work activities, such as promoting compliance with legislation, acting ethically, using complex communication strategies, writing complex documents, and exercising regulatory powers. Co-assessment with units of competency addressing these other activities could be considered.

Range Statement

RANGE STATEMENT

The range statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The range statement also provides a focus for assessment. It relates to the unit as a whole. Text in *italics* in the Performance criteria is explained here.

Notifiable occurrences

include:

- Category A notifiable occurrences, such as:
 - an accident or incident that has caused death, serious injury or significant property damage
 - a running line derailment
 - a running line collision between rolling stock
 - a collision at a road or pedestrian level crossing between rolling stock and either a road vehicle or a person
 - a fire or explosion on or in rail infrastructure or rolling stock that affects the safety of railway operations or that endangers one or more people
 - a suspected terrorist attack
 - any accident or incident involving significant failure of a safety management system that could have caused death, serious injury or significant property damage
 - any other accident or incident that is likely to generate intense public interest or concern
- Category B notifiable occurrences, such as the following (unless that occurrence is also a Category A notifiable occurrence):
 - a derailment other than a running line derailment
 - any collision involving rolling stock other than those listed under Category A
 - any incident at a road or pedestrian level crossing other than that described under Category A
 - the passing of a stop signal, or signal with no indication, by rolling stock without authority
 - any accident or incident where rolling stock exceeds the limits of authorised movement given in a proceed authority
 - any failure of a signalling or communications system that endangers, or has the potential to endanger, the safe operation of trains or the safety of people, or to cause damage to adjoining property
 - any slip, trip or fall by a person on railway property, or any person being caught in the door of rolling stock
 - any situation where a load affects, or could affect, the safe

RANGE STATEMENT

passage of trains or the safety of people, or cause damage to property

- any accident or incident involving dangerous goods that affects or could affect the safety of railway operations or the safety of people, or cause damage to property
- any breach of a safeworking system or procedure, or the detection of any irregularity or deficiency in such a system or procedure
- the detection of any irregularity in any rail infrastructure (including electrical infrastructure) that could affect the safety of railway operations or the safety of people
- the detection of any irregularity in any rolling stock that could affect train integrity or the safety of people, or cause damage to the rolling stock
- any fire or explosion that causes damage to rail infrastructure or rolling stock, or both, or that causes the disruption or closure of a railway (even if the closure is only a precautionary measure)
- any incident on railway property where a person inflicts, or is alleged to have inflicted, an injury on another person
- a suspected attempt to suicide
- notification that a rail safety worker has returned a blood or urine test for drugs or alcohol that indicates a potential breach of safety requirements
- the infliction of any wilful or unlawful damage to, or the defacement of, any rail infrastructure or rolling stock that could affect the safety of railway operations or the safety of people
- a corridor security incident that affects the safety of railway operations

Other required organisations may include:

Acting upon occurrence notification reports may include:

- Australian Transport Safety Bureau (ATSB)
- occupational health and safety regulators
- independent safety investigators
- establishing investigation arrangements - whether the rail operator or the regulator will undertake the investigation
- making decision on whether to attend
- identifying immediate safety issues and taking action, which may include:
 - issuing statutory notices or safety advice
 - using information hierarchy/notification protocol to determine who needs to be notified immediately
 - classifying and recording reports

Competency field

Competency field Rail Safety Regulation

PSPRAIL504A Review and promote safety culture

Modification History

Not applicable.

Unit Descriptor

Unit descriptor

This unit covers the review of the application of human factors principles, and the review and promotion of safety culture within rail safety activities. The unit applies to rail safety regulatory staff and is not targeted towards experts in human factors and safety culture.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Application of the Unit

Application of the unit

In the workplace, staff members must be able to assess compliance with the human factors and safety culture requirements referred to in legislation, and confirm that organisational policies and practices are consistent with the principles that support the integration of human factors and the development of a positive safety culture. They must be able to assess whether there is evidence of human factors integration and a positive safety culture, provide information on the key elements to which organisations can aspire, and promote the benefits of human factors integration and developing a positive safety culture. A key requirement is tailoring their approach to different organisations in order to achieve the required outcome. Staff must develop a good understanding of human factors concepts and principles to be able to promote their importance and explain the reasons for their inclusion in rail safety requirements for industry. Staff must be able to identify whether human factors requirements have been adequately embedded in an organisation's systems, processes and assets.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

Employability skills This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Where *italicised* text is used, further information is detailed in the required skills and knowledge and/or the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT

PERFORMANCE CRITERIA

1. Explain key principles of human factors relating to rail safety

1.1 Current information on *human factors* is obtained and its applicability to rail safety confirmed in accordance with legislation

1.2 *Aim* of integrating human factors principles and their application to rail safety are explained in accordance with legislation and with regard to the nature and size of organisations

1.3 *Operating principles* that optimise inclusion of a human factors approach to safety are identified and promoted to rail transport operators in accordance with organisational policies, procedures and guidelines

2. Assess application of human factors principles within rail safety activities

2.1 Consideration of human factors concepts in rail safety management is promoted to industry in plain language, to encourage their integration into normal operations

2.2 Integration of human factors within industry safety management systems is identified and acknowledged

2.3 Human factors information is used to cross-check the presence or absence of *particular actions* by rail transport operators that may be relevant to an enquiry or investigation

2.4 Human factors issues are examined equally along with engineering, technical and other factors that may contribute to an occurrence

2.5 Reported findings, safety incident feedback and summaries that include human factors information are clearly expressed in operational terms, to reinforce general understanding within industry

2.6 *Behavioural markers* and *skills* required for safe and effective work performance are identified and their applicability in rail safety work is analysed

ELEMENT

PERFORMANCE CRITERIA

3. Review safety culture within an organisation

- 3.1 Leadership and commitment of senior management to safety are examined to determine whether the basis for developing and maintaining a *positive safety culture* exists
- 3.2 Resources committed to safety activities in relation to the size and complexity of operations are evaluated
- 3.3 Attitudes, behaviours or systems that might be detrimental to safety are identified and noted
- 3.4 Organisational systems, policies and procedures are analysed for their fit with a positive safety culture
- 3.5 Evidence of a *just culture* is explored to determine whether there is acknowledgement of the difference between errors and violations and underlying system deficiencies, and the need to manage this with supporting systems and practices
- 3.6 Standards of conduct and disciplinary processes are analysed for their fit with a just culture as part of a positive safety culture

4. Provide information to promote the development and maintenance of a positive safety culture within an organisation

- 4.1 Information is provided and explained about *key elements* for developing and enhancing a positive safety culture
- 4.2 Information is tailored to the organisational context and provided on strategies to encourage staff to maintain vigilance and anticipate problems and issues before they escalate

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the essential skills and knowledge and their level, required for this unit.

Required skills:

Look for evidence that confirms skills in:

- reading and understanding complex and formal documents, such as literature and guidelines relating to human factors, legislation and related materials
- communicating with others involving the explanation of complex information relating to the methodology, aims and application of a human factors approach to safety and the development and maintenance of a positive safety culture
- researching information related to safety culture and human factors
- explaining how safety culture can be assessed
- reading and analysing organisational documents to identify nature of organisation's safety culture
- assessing safety culture initiatives
- providing information and influencing improvement in safety culture in a supportive way that takes account of current organisational safety culture framework and the size and complexity of organisational operations
- influencing others about the benefits of integrating human factors into rail safety management systems
- problem solving to identify if human factors have been addressed
- self-management to work ethically and in accordance with legislation
- using technology to conduct research, make enquiries, review available data, access legislative requirements and guidelines, review available safety information and record outcomes
- responding to diversity, including gender and disability
- applying environmental and occupational health and safety procedures to on-site meetings when reviewing and promoting safety culture and when in the field attending accident/incident scenes.

Required knowledge:

Look for evidence that confirms knowledge and understanding of:

- legislation and guidelines relating to the development and maintenance of a positive safety culture
- concept and key elements of a positive safety culture
- common safety climate survey tools
- organisational policies, procedures and guidelines relating to provision of information to industry on the development and maintenance of a positive safety culture
- background and guidelines relating to human factors
- principles and application of human factors
- behavioural marker system for rail safety

REQUIRED SKILLS AND KNOWLEDGE

- areas of rail safety regulatory work where human factors apply

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the unit descriptor, performance criteria, The range statement and the Assessment Guidelines for the Public Sector Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms:

- the knowledge requirements of this unit
- the skill requirements of this unit
- application of employability skills as they relate to this unit
- review and promotion of safety culture in a range of 3 or more contexts or occasions, over time

Context of and specific resources for assessment

Valid assessment of this unit requires:

- a workplace environment or one that closely resembles normal work practice and replicates the range of conditions likely to be encountered when reviewing and promoting safety culture, including coping with difficulties, irregularities and breakdowns in routine

Resources essential for assessment include:

- legislation and guidelines relating to the integration of human factors and the development and maintenance of a positive safety culture
- organisational procedures/guidelines and protocols relating to the review and promotion of a safety culture framework in a range of rail organisations
- background information, literature and guidelines relating to human factors
- scenarios and/or case studies to capture the range of situations likely to be encountered when reviewing and promoting safety culture
- access to relevant systems

Method of assessment

Assessment methods suitable for valid and reliable assessment of this unit must use authenticated evidence from the workplace and/or training courses and may include, but are not limited to, a combination of 2 or more of:

- demonstration
- observation
- simulation or role plays
- case studies/scenarios

EVIDENCE GUIDE

- workplace projects
- portfolios
- authenticated evidence from the workplace and/or training courses

The assessment environment should not disadvantage the candidate and where the person has a disability the principle of reasonable adjustment should be applied during assessment.

Assessment methods should reflect but not exceed workplace demands, such as literacy demands and the needs of particular groups, such as:

- people with disabilities
- people from culturally and linguistically diverse backgrounds
- Aboriginal and Torres Strait Islander people
- women
- young people
- older people
- people in rural and remote locations

Suggested units that may be co-assessed with this unit to increase the efficiency and realism of the assessment process include, but are not limited to:

- PSPETHC501B Promote the values and ethos of public service
- PSPGOV507A Undertake negotiations
- PSPGOV512A Use complex workplace communication strategies
- PSPLEGN501B Promote compliance with legislation in the public sector
- PSPRAIL501A Operate within the regulatory framework for rail safety
- PUAPOL013A Create, maintain and enhance productive working relationships

Guidance information for assessment

For consistency of assessment:

- evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments

Assessing employability skills:

- employability skills are integral to effective performance in the workplace and are broadly consistent across industry sectors
- the way these skills are applied varies between occupations and qualifications due to the different work functions and contexts

EVIDENCE GUIDE

- employability skills embedded in this unit of competency should be assessed holistically with other relevant units that make up the skills set or qualification, and in the context of the job role

In practice, reviewing and promoting safety culture overlaps with other generalist or specialist work activities, such as acting ethically, promoting compliance with legislation, using complex workplace communication, operating effectively within the regulatory framework for rail safety, and leading quality audits. Co-assessment with units of competency addressing these other activities could be considered.

Range Statement

RANGE STATEMENT

The range statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The range statement also provides a focus for assessment. It relates to the unit as a whole. Text in *italics* in the Performance criteria is explained here.

Human factors is:

- a multidisciplinary field concerned with optimising the performance of individuals and teams in the workplace
- a domain that considers the relationship of individuals and groups with technology as interdependent, aiming to optimise the relationship so as to improve productivity and reduce error or failure
- an applied science that draws on methods and principles from psychology, other behavioural and social sciences, engineering, ergonomics and physiology
- concerned with the study of people as components of a socio-technical system, i.e. a system made up of hardware, software, physical surroundings, people, procedures, laws and regulations, data and data structures
- concerned with the capabilities and limitations of the individual, as well as the collective role of all people in the system, which includes organisational culture

Aim of a human factors approach is:

- to reduce and mitigate error and improve safety and efficiency through an understanding of human capabilities, limitations and the way people interact with their work environments, including the equipment they use, the rules and procedures they work under, and how they communicate with other people to successfully accomplish a wide range of tasks
- threat and error management at the individual and collective level

Operating principles include:

- valuing people's knowledge, skills and judgment in carrying out their work safely
- recognising human limitations and potential for error
- just treatment when errors are made
- acceptance that organisations are imperfect and will only improve if they are open to feedback and prepared to learn and adapt

Particular actions may include:

- whether questions were asked to clarify understanding
- whether risk was assessed before starting an unusual or difficult task
- whether clear, unambiguous instructions, information and

RANGE STATEMENT

- explanations were given
- whether a proper handover occurred for critical operational tasks
- Behavioural markers** are:
- short, precise statements each describing a single non-technical skill or competency, such as using correct radio protocols and asking questions to clarify understanding
- Skills** may include:
- leadership
 - task management
 - teamwork
 - communication
 - risk management
 - situational awareness
 - decision making
 - emergency management
 - self-management
- Safety culture** is:
- the product of individual and group values, attitudes, perceptions, competencies, and patterns of behaviour that determine the commitment to, and the style and proficiency of, an organisation's health and safety management (Advisory Committee on Safety of Nuclear Installations, Human Factors Study Group: Third Report - Organising for safety, HSE Books 1993)
- Positive safety culture** is characterised by:
- communication founded on mutual trust
 - shared perceptions of the importance of safety
 - confidence in effectiveness of preventive measures
 - shared concern for, commitment to and accountability for safety
 - key elements that include:
 - keeping people informed
 - maintaining vigilance
 - promoting a just culture environment
 - promoting organisational flexibility
 - encouraging willingness to learn
- Just culture** is:
- transparent and establishes clear accountability for actions
 - neither blame free (total immunity for actions) nor punitive (disciplinary responses regardless of whether acts were unintentional or deliberate)
 - one where uncensored reporting of near miss occurrences and worker participation in safety issues is encouraged
 - one which acknowledges human error and the need to manage it by supporting systems and practices that promote learning from past errors or mistakes

RANGE STATEMENT

Key elements *may include:*

- commitment and leadership of senior management
- accountability and responsibility of line management
- importance of open communication about safety matters and of engaging and consulting with staff at all levels and with other stakeholders
- need to proactively seek, analyse and act on information on safety issues across the organisation
- need to provide an environment in which all employees are encouraged to raise safety issues, trusting that they will be fairly treated
- systems and processes designed to assist the organisation to learn from its experience and those of others inside and outside the industry
- processes that permit the organisation to adapt to the unexpected and which empower staff to respond effectively

Unit Sector(s)

Competency field

Competency field Rail Safety Regulation

PSPRAIL505A Review training arrangements

Modification History

Not applicable.

Unit Descriptor

Unit descriptor

This unit covers the review of training and assessment arrangements using a risk management approach linked to the size and complexity of the rail transport operator in order to confirm that the operator adequately addresses the competency requirements of its rail safety workers.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Application of the Unit

Application of the unit

In the workplace, staff members are required to assess the quality of training and assessment programs put in place by rail transport operators to meet their legal obligations under rail safety legislation, and to ensure that each rail safety worker in their railway operations has the competence to carry out that work. The rail transport operator must assess, or cause to be assessed, the competence of the rail safety worker by reference to any applicable qualification and/or units of competency recognised under the Australian Quality Training Framework (AQTF) or to implement other in-house training and assessment processes where no applicable national competencies or qualifications exists. One outcome of assessing rail transport operator training and assessment arrangements may be that regulatory staff make a decision that further expert evaluation/audit is required.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

Employability skills This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Where *italicised* text is used, further information is detailed in the required skills and knowledge and/or the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Confirm planning and preparatory work for competency development of rail safety workers	1.1 Alignment of units of competency to rail safety worker roles, through skills analysis or other methodologies, is verified and completion of occupational competency profiles confirmed
	1.2 Identification of Training Packages, units of competency and/or qualifications applicable to rail safety worker roles is confirmed in accordance with occupational profiles
	1.3 Where national units of competency are unavailable, identification of other training and assessment processes is confirmed in relation to rail safety worker roles
	1.4 Identification of available registered training organisations or other suitable training providers to deliver required training and/or assessment services is confirmed in accordance with unit of competency or qualification requirements
2. Confirm training and assessment arrangements	1.1 <i>Rail safety worker competency plans</i> are assessed to determine the processes and priorities proposed for assessing competence and addressing training needs
	2.1 Rail safety worker training and assessment arrangements are analysed to identify <i>required elements</i> and their alignment to legislative requirements
	2.2 Arrangements with training providers to deliver training and/or assessment services are identified and confirmed as addressing required competency development or recognition
3. Assess training and assessment arrangements	2.3 Communication and interpersonal skills are used to elicit information that confirms arrangements have been put in place
	3.1 Training and assessment records are accessed and compared with the organisation's implementation plan and priorities
3.2 Expertise of trainers and organisations undertaking training and/or assessment for rail transport operators is inspected and confirmed as meeting <i>criteria under the Australian</i>	

ELEMENT

PERFORMANCE CRITERIA

Quality Training Framework

- 3.3 Training and assessment materials are sampled and their links to and likelihood of developing required competencies are confirmed
- 3.4 Where areas of concern are identified, further information is sought to clarify the situation or the need for a formal evaluation by an AQTF auditor is recommended to ensure legislative requirements are met
- 3.2 Feedback is provided to rail transport operators on the adequacy of training and assessment arrangements and any actions needed for improvement or compliance in accordance with policy and legislation

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the essential skills and knowledge and their level, required for this unit.

Required skills:

Look for evidence that confirms skills in:

- researching information related to rail safety worker competency requirements
- using scanning techniques to locate the key requirements in training and assessment materials
- reading complex materials, such as legislation and competency standards
- communicating with others regarding the examination of information relating to training and assessment
- sampling to select sufficient records for analysis
- problem solving to confirm training arrangements and identify actions needed for compliance
- self-management to work ethically and in accordance with legislation
- using technology to conduct research, access legislative requirements and record processes and outcomes
- responding to diversity, including gender and disability
- applying environmental and occupational health and safety procedures to administrative work and when in the field reviewing training arrangements.

Required knowledge:

Look for evidence that confirms knowledge and understanding of:

- legislative, regulatory and procedural requirements for rail safety worker competency development and assessment
- Australian Quality Training Framework
- format of and terminology used in competency standards and training materials
- organisational policies, procedures and guidelines relating to the review of training and assessment arrangements

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the unit descriptor, performance criteria, The range statement and the Assessment Guidelines for the Public Sector Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms:

- the knowledge requirements of this unit
- the skill requirements of this unit
- application of employability skills as they relate to this unit
- review of rail safety worker training arrangements in a range of 3 or more contexts or occasions, over time.

Context of and specific resources for assessment

Valid assessment of this unit requires:

- a workplace environment or one that closely resembles normal work practice and replicates the range of conditions likely to be encountered when reviewing training arrangements, including coping with difficulties, irregularities and breakdowns in routine

Resources essential for assessment include:

- legislation relating to rail safety competency requirements
- organisational procedures/guidelines and protocols relating to review of training arrangements
- AQTF standards and guidelines
- scenarios and/or case studies to capture the range of situations likely to be encountered when reviewing training arrangements
- access to relevant systems

Method of assessment

Assessment methods suitable for valid and reliable assessment of this unit must use authenticated evidence from the workplace and/or training courses and may include, but are not limited to, a combination of 2 or more of:

- demonstration
- observation
- simulation or role plays
- case studies/scenarios
- workplace projects
- portfolios
- authenticated evidence from the workplace and/or training courses

The assessment environment should not disadvantage the candidate

EVIDENCE GUIDE

and where the person has a disability the principle of reasonable adjustment should be applied during assessment

Assessment methods should reflect but not exceed workplace demands, such as literacy demands and the needs of particular groups, such as:

- people with disabilities
- people from culturally and linguistically diverse backgrounds
- Aboriginal and Torres Strait Islander people
- women
- young people
- older people
- people in rural and remote locations

Suggested units that may be co-assessed with this unit to increase the efficiency and realism of the assessment process include, but are not limited to:

- PSPETHC501B Promote the values and ethos of public service
- PSPGOV504B Undertake research and analysis
- PSPGOV512A Use complex workplace communication strategies
- PSPLEGN501B Promote compliance with legislation in the public sector
- PSPRAIL502A Assess and administer accreditation and registration applications
- PSPRAIL503A Receive and act on industry safety information and intelligence
- BSBAUD503B Lead a quality audit.

Guidance information for assessment

For consistency of assessment:

- evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments

Assessing employability skills:

- employability skills are integral to effective performance in the workplace and are broadly consistent across industry sectors
- the way these skills are applied varies between occupations and qualifications due to the different work functions and contexts
- employability skills embedded in this unit of competency should be assessed holistically with other relevant units that make up the skills set or qualification, and in the context of the

EVIDENCE GUIDE

job role

In practice, reviewing training arrangements overlaps with other generalist or specialist work activities, such as undertaking research and analysis, acting ethically, using complex communication strategies, leading quality audits, and assessing and administering accreditation and registration applications. Co-assessment with units of competency addressing these other activities could be considered.

Range Statement

RANGE STATEMENT

The range statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The range statement also provides a focus for assessment. It relates to the unit as a whole. Text in *italics* in the Performance criteria is explained here.

Rail safety worker competency plans *may include:*

- arrangements to maintain the competency of personnel
- identification of applicable Training Packages, qualifications and units of competency
- competency profiles
- skills audits
- training needs analyses
- assessment arrangements
- arrangements for recognition of prior learning and recognition of current competencies
- arrangements for gap training
- record-keeping arrangements

Required elements of rail safety worker training and assessment systems *may include:*

- occupational profiles aligned to competencies
- skills analyses and skills matrices
- competency assessment
- gap analysis to identify training needs
- arrangements for accredited training and assessment
- record-keeping arrangements

Criteria under the Australian Quality Training Framework *may include:*

- meeting the essential standards for registration as a registered training organisation
- scope of registration of the registered training organisation
- required competencies of trainers and assessors

PSPRAIL601A Coordinate audit or inspection programs

Modification History

Not applicable.

Unit Descriptor

Unit descriptor

This unit covers the development and coordination of audit or inspection programs using a risk management approach informed by intelligence and occurrence information.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Application of the Unit

Application of the unit

In the workplace, staff members must be able to plan and coordinate a structured, strategic audit or inspection program consistent with legislative requirements and using a risk management approach to determining the focus, scope, scheduling and frequency of audits or inspections. They must have a good understanding of risk management and audit principles, analytical skills to interpret intelligence and occurrence information from operators, and judgment to assess organisations against risk indicators and make decisions on risk ratings and related audit or inspection requirements.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability skills This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Where *italicised* text is used, further information is detailed in the required skills and knowledge and/or the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare for audit or inspection program	1.1 Requirements for safety audits, random or targeted audits or joint national audits are confirmed
	1.2 <i>Risk indicators</i> to be used for identifying organisations for <i>audit</i> or inspection are confirmed in accordance with organisational policies, procedures and guidelines
	1.3 Information on the current performance of organisations and their operating environment is gathered and analysed
	1.4 Intelligence and occurrence information are analysed against risk indicators and risk ratings are determined in accordance with risk management principles and legislative requirements
	1.5 Data to be used for risk analysis is valid, sufficient, current and verifiable
2. Schedule audits or inspections	2.1 Type, scope and frequency of audits or inspections for rail transport operators are determined in accordance with risk management principles and legislative requirements
	2.2 All elements of the system are audited over a prescribed period, with audit priority assigned to those matters representing greatest risk and those that need to be audited in that period
	2.3 Audit or inspection schedule is prepared, including assigning responsibility for conducting audit or inspection, in accordance with organisational policies, procedures and guidelines
	2.4 Audit or inspection schedule is structured to take into account the impact on the business operations of rail organisations, as far as is reasonably practicable
	2.5 Audit or inspection timetable takes account of the scheduling of national audits, human and other resource requirements

ELEMENT

PERFORMANCE CRITERIA

3. Review audit or inspection program

2.6 Audit program is reviewed and re-prioritised when necessary

3.1 Quality of conducted audits or inspections is evaluated against *specified requirements*, and anomalies and inconsistencies are identified

3.2 *Moderation* processes are used in accordance with organisational policies, procedures and guidelines to ensure a consistent approach to audit or inspection

3.3 Improvements in audit or inspection practices and processes are identified and implemented in accordance with organisational policies, procedures and guidelines

3.4 Analysis of audit or inspection data is undertaken to identify risk issues and trends for the industry or for particular types of industry organisations

3.5 Strategic information on issues and trends is provided to management and other *stakeholders* in accordance with organisational policies, procedures and guidelines

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the essential skills and knowledge and their level, required for this unit.

Required skills:

Look for evidence that confirms skills in:

- applying legislation and guidelines relating to coordination of audits and inspections
- researching information related to special safety audits, random or targeted audits or joint national audits
- analysing intelligence and occurrence information
- determining risk ratings
- planning and organising to prepare for and schedule audit and inspection programs
- communicating with others, involving the explanation of complex information relating to audit and inspection scheduling, using a risk management approach
- numeracy to confirm accuracy of numerical information
- decision making in relation to audit and inspection outcomes
- self-management to work ethically and in accordance with legislation
- using technology to conduct research, make enquiries, review available data, access legislative requirements and prepare schedules
- responding to diversity, including gender and disability
- applying environmental and occupational health and safety procedures to administrative work when preparing, scheduling and reviewing audits and inspections.

Required knowledge:

Look for evidence that confirms knowledge and understanding of:

- rail safety risks presented by different operators
- risk management principles and practices
- moderation processes
- legislative, regulatory and procedural requirements for coordinating audits and inspections

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the unit descriptor, performance criteria, The range statement and the Assessment Guidelines for the Public Sector Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms:

- the knowledge requirements of this unit
- the skill requirements of this unit
- application of employability skills as they relate to this unit
- coordinating audit or inspection programs in a range of 3 or more contexts or occasions, over time

Context of and specific resources for assessment

Valid assessment of this unit requires:

- a workplace environment or one that closely resembles normal work practice and replicates the range of conditions likely to be encountered when coordinating audit or inspection programs, including coping with difficulties, irregularities and breakdowns in routine

Resources essential for assessment include:

- legislation and guidelines relating to coordination of audit or inspection programs, based on a risk management approach
- organisational procedures/guidelines and protocols relating to coordination of audit or inspection programs
- scenarios and/or case studies to capture the range of situations likely to be encountered when coordinating audit or inspection programs
- access to relevant systems

Method of assessment

Assessment methods suitable for valid and reliable assessment of this unit must use authenticated evidence from the workplace and/or training courses and may include, but are not limited to, a combination of 2 or more of:

- demonstration
- observation
- simulation or role plays
- case studies/scenarios
- workplace projects
- portfolios
- authenticated evidence from the workplace and/or training courses

EVIDENCE GUIDE

The assessment environment should not disadvantage the candidate and where the person has a disability the principle of reasonable adjustment should be applied during assessment

Assessment methods should reflect but not exceed workplace demands, such as literacy demands and the needs of particular groups, such as:

- people with disabilities
- people from culturally and linguistically diverse backgrounds
- Aboriginal and Torres Strait Islander people
- women
- young people
- older people
- people in rural and remote locations

Suggested units that may be co-assessed with this unit to increase the efficiency and realism of the assessment process include, but are not limited to:

- PSPETHC601B Maintain and enhance confidence in public service
- PSPGOV602B Establish and maintain strategic networks
- PSPLEGN601B Manage compliance with legislation in the public sector
- PSPMNGT608B Manage risk
- PSPREG601B Manage regulatory compliance
- PSPREG602B Evaluate regulatory compliance
- PSPREG603A Manage and lead inspection and monitoring programs

Guidance information for assessment

For consistency of assessment:

- evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments

Assessing employability skills:

- employability skills are integral to effective performance in the workplace and are broadly consistent across industry sectors
- the way these skills are applied varies between occupations and qualifications due to the different work functions and contexts
- employability skills embedded in this unit of competency

EVIDENCE GUIDE

should be assessed holistically with other relevant units that make up the skills set or qualification, and in the context of the job role

In practice, coordinating audit or inspection programs overlaps with other generalist or specialist work activities, such as acting ethically, managing risk, managing and evaluating regulatory compliance, and managing and leading inspection programs. Co-assessment with units of competency addressing these other activities could be considered.

Range Statement

RANGE STATEMENT

The range statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The range statement also provides a focus for assessment. It relates to the unit as a whole. Text in *italics* in the Performance criteria is explained here.

- Risk indicators** *may be:*
- performance risk indicators, such as compliance history, occurrence notification report data, history of complaints, previous audit results, annual safety reports, whether identified faults have been addressed
 - operational risk indicators, such as scope of operations, high risk activities, period since last audit or inspection, whether all elements of the system have been audited over time, multiple sites, subcontractors, etc.
- Audits:**
- are planned, systematic and documented processes used to assess the extent of compliance with accreditation requirements
 - are conducted in a way that encourages organisations to demonstrate compliance and make improvements
 - provide feedback to support continuous improvement of operations and outcomes
- Specified requirements** *may include:*
- regulator's quality management systems and procedures
 - links to priorities
 - sufficiency and targeting of sampling used
 - checks that previous faults have been rectified
- Moderation:**
- is a process which involves auditors/inspectors discussing and reaching agreement about audit/inspection processes and outcomes in a particular industry or industry sector
 - enables auditors/inspectors to develop a shared understanding of the requirements of the audit/inspection criteria, relevant guidelines, nature of evidence, how evidence is collected and basis on which audit/inspection decisions are made
 - is used to ensure a consistent approach to audit or inspection practices
 - is used to improve reliability of outcomes
- Stakeholders** *may include:*
- senior management
 - government
 - accredited rail organisations
 - contractors
 - industry
 - unions

Unit Descriptor

Unit descriptor

This unit covers the requirements to carry out inspections and monitoring activities in accordance with relevant legislation and regulations, working under guidance. It includes confirming and preparing for inspections and monitoring activities, carrying out inspections and monitoring activities, acting on routine non-compliance and providing reports.

In practice, carrying out inspections and monitoring under guidance may overlap with other public sector work activities such as handling workplace information, communicating, using technology, working in a public sector environment, working safely, etc.

This unit is one of five units in the *Regulatory* Competency field that deal with inspection and monitoring. Related units are:

PSPREG301A Undertake routine inspections and monitoring

PSPREG413A Undertake inspections and monitoring

PSPREG503A Supervise and carry out complex inspections and monitoring

PSPREG603A Manage and lead inspection

This is a new unit of competency, added to the *Regulatory* Competency field of the Training Package in 2004.

Application of the Unit

Employability Skills Information

Employability skills This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements are the essential outcomes of the unit of competency. Together, performance criteria specify the requirements for competent performance. Text in *bold italics* is explained in the Range Statement following.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Confirm and prepare for inspections and monitoring activities	<p>1.1 <i>Tasks</i> are clarified and confirmed with <i>other staff members</i> in accordance with organisational requirements</p> <p>1.2 <i>Procedures</i>, timeframes, resources and equipment requirements are confirmed in accordance with organisational and task requirements</p> <p>1.3 Legislative requirements, risk management practices and occupational health and safety requirements are confirmed with senior staff</p> <p>1.4 Communication strategies and development opportunities to make clients aware of their obligations under relevant <i>legislation</i> are identified with assistance from other staff members</p> <p>1.5 <i>Resources/equipment</i> are obtained and prepared in accordance with organisational and task requirements</p>
2. Carry out inspections and monitoring activities	<p>2.1 <i>Inspections and monitoring</i> activities are carried out under guidance in accordance with organisational and legislative requirements, including occupational health and safety</p> <p>2.2 <i>Risk management</i> strategies are implemented as required in accordance with set procedures and timelines</p> <p>2.3 Resources/equipment are used and maintained in accordance with organisational and task requirements</p>
3. Act on routine non-compliance	<p>3.1 Information/education is provided to achieve client compliance in accordance with organisational guidelines and legislative requirements relating to the seriousness of the possible breach</p> <p>3.2 Further <i>action</i> as a result of failure to achieve compliance is taken in accordance with organisational guidelines and legislative requirements relating to the seriousness of the possible breach</p> <p>3.3 Guidance is obtained to interpret legislation/regulations, and contraventions accompanied by recommended action are reported in accordance with organisational policy and procedures</p> <p>3.4 Serious or complex situations are referred for advice or resolution in accordance with organisational policy and procedures</p> <p>3.5 Assistance is obtained to determine the elements of offences to be prosecuted under relevant legislation, and information/evidence is <i>collected</i> and provided in accordance with legislation, procedures and rules of evidence</p> <p>3.6 When required, court attendance and conduct requirements are fulfilled in compliance with organisational guidelines</p>

ELEMENT

PERFORMANCE CRITERIA

4. Provide reports

4.1 *Records* are maintained in accordance with organisational requirements

4.2 Reports are provided in a timely manner and meet organisational requirements for format and content

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the essential skills and knowledge and their level, required for this unit.

Skill requirements

Look for evidence that confirms skills in:

undertaking observation and analysis

communicating with a diverse range of clients and staff

responding to diversity, including gender and disability

writing reports using standard formats

using computers for word processing and recording of statistical data

operating workplace equipment

applying public sector legislation such as occupational health and safety and environment in the context of inspection and monitoring

Knowledge requirements

Look for evidence that confirms knowledge and understanding of:

enabling legislation and other public sector legislation including occupational health and safety, environment, privacy

organisational policy and procedures

inspection/examination procedures

monitoring procedures

elements of an offence

responses to routine non-compliance

risk management practices

equity and diversity principles

workplace and industry environment

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the Unit descriptor, Performance Criteria, the Range Statement and the Assessment Guidelines for the Public Sector Training Package.

Units to be assessed together

- *Pre-requisite* units that must be achieved prior to this unit: *Nil*
- *Co-requisite* units that must be assessed with this unit: *Nil*
- *Co-assessed units* that may be assessed with this unit to increase the efficiency and realism of the assessment process include, but are not limited to:

PSPGOV201B Work in a public sector environment

PSPGOV202B Use routine workplace communication techniques

PSPGOV203B Deliver a service to clients

PSPGOV204B Access and use resources

PSPGOV206B Handle workplace information

PSPGOV207B Use technology in the workplace

PSPGOV208A Write routine workplace materials

PSPOHS201B Follow workplace safety procedures

Overview of evidence requirements

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms:

- the knowledge requirements of this unit
- the skill requirements of this unit
- application of the Employability Skills as they relate to this unit (see Employability Summaries in Qualifications Framework)
- inspections and monitoring undertaken under guidance in a range of (3 or more) contexts (or occasions, over time)

Resources required to carry out assessment

These resources include:

- legislation, policy, procedures and protocols relating to inspection and monitoring
- case studies and workplace scenarios to capture the range of inspection and monitoring situations likely to be encountered

Where and how to assess evidence

Valid assessment of this unit requires:

- a workplace environment or one that closely resembles normal work practice and replicates the range of conditions likely to be encountered when carrying out inspections and monitoring, including coping with difficulties, irregularities and breakdowns in routine

EVIDENCE GUIDE

- inspections and monitoring undertaken under guidance in a range of (3 or more) contexts (or occasions, over time)

Assessment methods should reflect workplace demands, such as literacy, and the needs of particular groups, such as:

- people with disabilities
- people from culturally and linguistically diverse backgrounds
- Aboriginal and Torres Strait Islander people
- women
- young people
- older people
- people in rural and remote locations

Assessment methods suitable for valid and reliable assessment of this competency may include, but are not limited to, a combination of 2 or more of:

- case studies
- demonstration
- observation
- portfolios
- questioning
- scenarios
- simulation or role plays
- authenticated evidence from the workplace and/or training courses

For consistency of assessment

Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments

Range Statement

RANGE STATEMENT

The Range Statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The Range Statement also provides a focus for assessment. It relates to the unit as a whole. Text in *italics* in the Performance Criteria is explained here.

Tasks may include

- inspections/examinations
- monitoring
- surveillance
- basic audit activities
- other compliance assurance activities

Other staff members may include

- supervisors
- senior policy officers
- senior inspectors
- line managers
- project managers
- program managers
- inspection specialists

Procedures may include

- observation procedures
- recording, such as surveillance forms, databases
- handling procedures
- sampling procedures
- rejection procedures
- storage procedures
- disinfection procedures
- treatment procedures
- work instructions
- organisational guidelines and code of conduct
- incident reporting procedures
- safety procedures
- emergency procedures
- evacuation procedures

Legislation may include

- Commonwealth legislation and regulations, for example:
- Commonwealth Quarantine Act 1908, proclamations and regulations
- Crimes Act 1914 and Criminal Code Act 1995
- Customs Act 1901 and regulations
- Wildlife Protection Act 1982
- Export Control Act 1982

RANGE STATEMENT

- Imported Foods Act 1996
 - Occupational Health and Safety Act 1988
 - State/Territory and Local Government legislation and regulations, such as those relating to:
 - agriculture
 - horticulture
 - conservation and land management
 - fisheries
 - environmental protection
 - building
 - water
 - emergencies
 - international legislation/codes of behaviour
 - inspection equipment
 - maps, plans
 - satellite imagery
 - aerial photographs
 - survey plans
 - spatial data and information
 - cameras
 - personal protective equipment - respirators, gloves, overalls, boots, hearing protection, goggles, masks etc
 - test kit equipment
 - recording equipment
 - measuring equipment
 - storage equipment/facilities
 - entry authority/warrant
 - Global Positioning System (GPS) equipment
 - compass
 - communication equipment
 - computers
 - vehicles - 2 or 4 wheel drive
 - aircraft
 - airfreight
 - animal products
 - animals
 - cargo
 - cereals
 - collection of biological specimens
 - disposal of organic waste
- Resources and equipment may include*
- Inspections and monitoring may relate to*

RANGE STATEMENT

- fresh produce
- goods
- land condition, such as:
- topography
- salinity
- erosion
- weed infestation
- vermin infestation
- fire hazard
- over grazing
- land improvements, such as:
- fences
- buildings
- sporting or playground equipment
- irrigation infrastructure
- sewerage infrastructure
- waterfront occupations
- community structures
- land usage
- leases and other tenures, to ensure compliance with conditions
- licence/permit compliance (eg vegetation clearing)
- live fish
- livestock
- mail
- mineral samples
- passenger baggage
- people
- pests
- plant products
- plants
- premises
- properties
- reserves and their use/s
- survey activities to maintain readiness for district emergency plans
- vector monitoring
- vessels
- monitoring
- treatment
- containment

Risk management strategies may include

RANGE STATEMENT

- control
 - eradication
 - destruction
 - biosecurity strategies
- Routine non-compliance will only include*
- straightforward matters where action is prescribed and other more serious or complex matters are referred to senior staff
- Action on non-compliance may include*
- advice
 - warning
 - formal notification of intent
 - infringement notices
 - on-the-spot fines
 - court prosecution
- Collection of evidence may include*
- observation
 - interviewing
 - seizure
 - sampling
 - specimen collection
 - recording
 - photographing
 - diagrammatic evidence
 - notes
 - maintenance of case files
 - determination of land ownership
- Records may include*
- notes
 - case files
 - statistics
 - forms (application forms, disease notification forms, etc)
 - notices (seizure notice, infringement notice, etc)
 - invoices
 - receipts
 - commercial documentation such as bills of lading, airway bills

Unit Descriptor

Unit descriptor

This unit covers the requirements to conduct generally routine inspections and monitoring in accordance with relevant Acts and regulations. Typically work will be under routine guidance with responsibility for assigned duties. It includes organising inspections and monitoring activities, undertaking routine inspections and monitoring activities, acting on non-compliance and providing reports and information.

In practice, undertaking routine inspections and monitoring may overlap with other generalist or specialist public sector work activities such as organising workplace information, acting ethically, complying with public sector legislation, using resources, working with diversity, working safely, etc.

This unit is one of five units in the *Regulatory* Competency field that deal with inspection and monitoring. Related units are:

PSPREG201A Carry out inspections and monitoring under guidance

PSPREG413A Undertake inspections and monitoring

PSPREG503A Supervise and carry out complex inspections and monitoring

PSPREG603A Manage and lead inspec

This is a new unit of competency, added to the *Regulatory* Competency field of the Training Package in 2004.

Application of the Unit

Employability Skills Information

Employability skills This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements are the essential outcomes of the unit of competency. Together, performance criteria specify the requirements for competent performance. Text in *bold italics* is explained in the Range Statement following.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Organise inspection and monitoring duties	<p>1.1 <i>Activities</i> and responsibilities are identified in accordance with organisational requirements</p> <p>1.2 <i>Procedures</i>, timeframes, <i>resources and equipment</i> requirements are identified in accordance with organisational and task requirements</p> <p>1.3 Resources/equipment are obtained and prepared in accordance with organisational and task requirements</p> <p>1.4 Legislative requirements, risk management practices and occupational health and safety requirements are identified</p> <p>1.5 Communication strategies and development opportunities are identified and tailored to clients' needs, to make them aware of their obligations under relevant <i>legislation</i>, in accordance with organisational policy and procedures</p> <p>1.6 Procedural and information guides are maintained and updated as required</p>
2. Undertake routine inspections and monitoring	<p>2.1 <i>Inspections and monitoring activities</i> are carried out under <i>routine guidance</i> in accordance with organisational and legislative requirements, including occupational health and safety</p> <p>2.2 <i>Risk management practices</i> are implemented as required in accordance with set procedures and timelines</p> <p>2.3 Resources/equipment are used and maintained in accordance with organisational and task requirements</p> <p>2.4 <i>Communication</i> is undertaken with other officers, clients and the public in line with organisational protocols and diversity principles</p>
3. Act on non-compliance	<p>3.1 Information/education is provided to achieve client compliance in accordance with client needs, organisational guidelines, and legislative requirements relating to the seriousness of the possible breach</p> <p>3.2 Further <i>action</i> as a result of failure to achieve compliance is taken in accordance with organisational guidelines and legislative requirements relating to the seriousness of the possible breach</p> <p>3.3 Compliance requirements of legislation/regulations are identified, and contraventions and recommended action are reported in accordance with organisational policy and procedures</p> <p>3.4 Serious or complex situations are referred for advice or resolution in accordance with organisational policy and procedures</p>

ELEMENT

PERFORMANCE CRITERIA

- 3.5 The elements of each offence to be prosecuted under relevant legislation are identified, and information/evidence is *collected* and provided in accordance with legislation, procedures and rules of evidence
- 3.6 When required, court attendance and conduct requirements are fulfilled in compliance with organisational guidelines
- 4. Provide reports and information**
- 4.1 *Records* are maintained and reports provided in accordance with organisational requirements
- 4.2 Inspection documentation is interpreted against relevant legislation and information is provided on policies, procedures and guidelines in accordance with organisational requirements
- 4.3 On-the-job coaching is provided in inspection and monitoring in accordance with organisational requirements

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the essential skills and knowledge and their level, required for this unit.

Skill requirements

Look for evidence that confirms skills in:

undertaking field orientation

undertaking observation and analysis

communicating with a diverse range of clients and staff

responding to diversity, including gender and disability

writing reports using standard formats

using computers for word processing and recording of statistical data

operating workplace equipment and vehicles

applying public sector legislation such as occupational health and safety and environment in the context of inspection and monitoring

Knowledge requirements

Look for evidence that confirms knowledge and understanding of:

public sector legislation including occupational health and safety, environment, privacy etc

organisational policy and procedures

inspection/examination procedures

monitoring procedures

enabling legislation

elements of an offence

responses to non-compliance

equity and diversity principles

workplace and industry environment

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the Unit descriptor, Performance Criteria, the Range Statement and the Assessment Guidelines for the Public Sector Training Package.

Units to be assessed together

- *Pre-requisite* units that must be achieved prior to this unit: *Nil*
- *Co-requisite* units that must be assessed with this unit: *Nil*
- *Co-assessed units* that may be assessed with this unit to increase the efficiency and realism of the assessment process include, but are not limited to:

PSPETHC301B Uphold the values and principles of public service

PSPLEGN301B Comply with legislation in the public sector

PSPGOV301B Work effectively in the organisation

PSPGOV302B Contribute to workgroup activities

PSPGOV305B Access and use resources and financial systems

PSPGOV307B Organise workplace information

PSPGOV308B Work effectively with diversity

PSPGOV312A Use workplace communication strategies

PSPGOV314A Contribute to conflict management

PSPOHS301A Contribute to workplace safety

Overview of evidence requirements

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms:

- the knowledge requirements of this unit
- the skill requirements of this unit
- application of the Employability Skills as they relate to this unit (see Employability Summaries in Qualifications Framework)
- full responsibility for assigned duties when undertaking routine inspections and monitoring in a range of (3 or more) contexts (or occasions, over time)

Resources required to carry out assessment

These resources include:

- legislation, policy, procedures and protocols relating to inspection and monitoring
- access to workplace equipment and vehicles
- case studies and workplace scenarios to capture the range of routine inspection and monitoring situations likely to be encountered

EVIDENCE GUIDE

Where and how to assess evidence

Valid assessment of this unit requires:

- a workplace environment or one that closely resembles normal work practice and replicates the range of conditions likely to be encountered when carrying out routine inspections and monitoring, including coping with difficulties, irregularities and breakdowns in routine
- full responsibility for assigned duties when undertaking routine inspections and monitoring in a range of (3 or more) contexts (or occasions, over time)

Assessment methods should reflect workplace demands, such as literacy, and the needs of particular groups, such as:

- people with disabilities
- people from culturally and linguistically diverse backgrounds
- Aboriginal and Torres Strait Islander people
- women
- young people
- older people
- people in rural and remote locations

Assessment methods suitable for valid and reliable assessment of this competency may include, but are not limited to, a combination of 2 or more of:

- case studies
- demonstration
- observation
- questioning
- scenarios
- simulation or role plays
- authenticated evidence from the workplace and/or training courses

For consistency of assessment

Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments

Range Statement

RANGE STATEMENT

The Range Statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The Range Statement also provides a focus for assessment. It relates to the unit as a whole. Text in *italics* in the Performance Criteria is explained here.

- Activities may include*
- inspections/examinations
 - monitoring
 - surveillance
 - basic audit activities
 - other compliance assurance activities
- Procedures may include*
- observation
 - handling procedures
 - sampling procedures
 - rejection procedures
 - storage procedures
 - disinfection/disinsection procedures
 - treatment procedures
 - organisational guidelines and code of conduct
 - incident reporting procedures
 - safety procedures
 - emergency procedures
 - evacuation procedures
- Resources and equipment may include*
- inspection equipment
 - maps, plans
 - satellite imagery
 - aerial photographs
 - survey plans
 - spatial data and information
 - cameras
 - personal protective equipment - respirators, gloves, overalls, boots, hearing protection, goggles, masks etc
 - test kit equipment
 - recording equipment
 - measuring equipment
 - storage equipment/facilities
 - entry authority/warrant
 - Global Positioning System (GPS) equipment

Legislation may include

- compass
- communication equipment
- computers
- vehicles - 2 or 4 wheel drive
- Commonwealth legislation and regulations, for example:
- Commonwealth Quarantine Act 1908, proclamations and regulations
- Crimes Act 1914 and Criminal Code Act 1995
- Customs Act 1901 and regulations
- Wildlife Protection Act 1982
- Export Control Act 1982
- Imported Foods Act 1996
- Occupational Health and Safety Act 1988
- State/Territory and Local Government legislation and regulations, such as those relating to:
 - agriculture
 - horticulture
 - conservation and land management
 - fisheries
 - environmental protection
 - building
 - water
 - emergencies
 - international legislation/codes of behaviour

Inspections and monitoring activities may relate to

- aircraft
- airfreight
- animal products
- animals
- cargo
- cereals
- collection of biological specimens
- disposal of organic waste
- fresh produce
- goods
- land condition, such as:
 - topography
 - salinity
 - erosion
 - weed infestation
 - vermin infestation
 - fire hazard
 - over grazing

- land improvements, such as:
- fences
- buildings
- sporting or playground equipment
- irrigation infrastructure
- sewerage infrastructure
- waterfront occupations
- community structures
- land usage
- leases and other tenures, to ensure compliance with conditions
- licence/permit compliance (eg vegetation clearing)
- live fish
- livestock
- mail
- mineral samples
- passenger baggage
- people
- pests
- plant products
- plants
- premises
- properties
- reserves and their use/s
- survey activities to maintain readiness for district emergency plans
- vector monitoring
- vessels
- supervisors
- senior policy officers
- senior inspectors
- line managers
- project managers
- program managers
- inspection specialists
- monitoring
- treatment
- containment
- control
- eradication
- destruction
- biosecurity strategies
- advice provided in regard to operational experience to a

Employability skills This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements are the essential outcomes of the unit of competency. Together, performance criteria specify the requirements for competent performance. Text in *bold italics* is explained in the Range Statement following.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Establish regulatory powers	<p>1.1 Current information relating to enabling <i>legislation</i> and regulations is accessed and used to maintain up-to-date knowledge of requirements</p> <p>1.2 Powers provided under the legislation and the boundaries of those powers are confirmed</p> <p>1.3 Compliance requirements of the legislation, related regulations, standards, codes of practice and policy are identified and confirmed</p> <p>1.4 Acts and omissions that comprise non-compliance/offences under the legislation are identified and confirmed</p>
2. Apply enabling legislation	<p>2.1 Circumstances where regulatory powers will be exercised are identified and analysed to determine <i>response/s or measures</i> to apply, in accordance with the legislation and organisational policy and procedures</p> <p>2.2 Circumstances requiring the exercise of regulatory powers that are outside own limits are identified and referral to others is made in accordance with organisational policy and procedures</p> <p>2.3 <i>Risks</i> associated with the exercise of regulatory powers are identified and strategies to manage risks are identified in accordance with the organisation's risk management strategy</p> <p>2.4 Enabling legislation is applied consistent with the boundaries and powers contained therein and organisational policy and procedures</p>
3. Utilise other legislation and standards	<p>3.1 <i>Other legislation</i> and <i>standards</i> which impact on powers are identified and their requirements confirmed</p> <p>3.2 Apparently conflicting legislative directions are resolved or referred in accordance with organisational policy and procedures</p>
4. Work with other organisations	<p>4.1 Organisations that have jurisdictions which may overlap are identified and <i>relationships</i> are established and maintained in accordance with organisational policy and procedures</p> <p>4.2 Organisations available to provide assistance and advice or take referrals are identified and relationships are established for mutual benefit</p> <p>4.3 Organisational protocols and procedures are followed when working with <i>other organisations</i></p> <p>4.4 Compliance matters are referred to other organisations for action when required in accordance with organisational policy and procedures</p> <p>4.5 Lead agency protocols/lines of authority are followed during operations involving more than one organisation</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the essential skills and knowledge and their level, required for this unit.

Skill requirements

Look for evidence that confirms skills in:

undertaking research and analysis

using information technology to access relevant legislation and procedures

reading complex written materials such as legislation, regulations, codes of practice and legal precedents and applying them to work practices

using scanning techniques to locate main ideas in legislation, guidelines and policy documents

engaging in discussion involving exchanges of often complex oral information

communicating with a range of people from diverse backgrounds

responding to diversity, including gender and disability

choosing regulatory responses/measures to fit the circumstances and justifying those responses against legislation, guidelines, policy and regulations

networking, building relationships and working with others

applying occupational health and safety and environment procedures relating to the exercise of regulatory powers

Knowledge requirements

Look for evidence that confirms knowledge and understanding of:

full range of regulatory powers and the limits to those powers

enabling legislation

offences under the legislation

aspects of criminal law, administrative law, industrial law, contract law

statutory time limits

applicable standards

terminology used in legislation and procedures

organisational policies, guidelines and regulations

equity and diversity principles

public sector legislation such as occupational health and safety and environment relating to the exercise of regulatory powers

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the Unit descriptor, Performance Criteria, the Range Statement and the Assessment Guidelines for the Public Sector Training Package.

Units to be assessed together

- *Pre-requisite* units that must be achieved prior to this unit: *Nil*
- *Co-requisite* units that must be assessed with this unit: *Nil*
- *Co-assessed units* that may be assessed with this unit to increase the efficiency and realism of the assessment process include, but are not limited to:

PSPCART401B Carry out court orderly functions

PSPCART402B Manage witnesses

PSPCART403B Handle exhibits and documents tendered

PSPCART404B Serve process

PSPCART405B Handle monies received in satisfaction of warrants or orders

PSPCART406B Compile and use official notes

PSPETHC401A Uphold and support the values and principles of public service

Elements and Performance Criteria Pre-Content

Elements are the essential outcomes of the unit of competency. Together, performance criteria specify the requirements for competent performance. Text in *bold italics* is explained in the Range Statement following.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Advise and assist clients to comply with legislation or standards	<p>1.1 <i>Client</i> needs, expectations, <i>attitudes</i>, and current level of knowledge are confirmed</p> <p>1.2 Risks related to possible confrontations are identified and managed in accordance with organisational risk management and procedures</p> <p>1.3 Advice is provided to clients that is current, timely and meets the specific needs of clients in its range, depth and form of presentation</p> <p>1.4 Feedback is obtained on clients' levels of understanding and additional information or explanation is used to clarify issues if required</p> <p>1.5 <i>Information</i> is provided to promote the benefits of compliance and the consequences of non-compliance</p> <p>1.6 Clients are advised of processes and timelines when interpretation/advice from others is needed for complex matters</p>
2. Implement communication strategies to improve compliance	<p>2.1 <i>Communication strategies</i> are tailored to the audience and the <i>context</i></p> <p>2.2 <i>Presentation standards</i> are applied in accordance with organisational guidelines and the needs of clients</p> <p>2.3 Community rights and responsibilities and avenues for public redress under <i>legislation/standards</i> are highlighted when applicable</p> <p>2.4 Conflict resolution techniques are used if necessary and safety of self and others is protected in accordance with legislation, policy and procedures</p> <p>2.5 Content and presentation of communication strategies are adjusted in response to feedback gathered from a range of clients</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the essential skills and knowledge and their level, required for this unit.

Skill requirements

Look for evidence that confirms skills in:

providing advice and discussion involving exchanges of sometimes complex oral information

working with people - conflict resolution, coaching, problem solving

delivering presentations tailored to the needs of a range of people from diverse backgrounds

responding to diversity, including gender and disability

reading and explaining complex and formal documents such as legislation and their application to clients' situations

using active listening and questioning strategies to clarify understanding

using information technology to access relevant legislation and guidelines

applying occupational health and safety and environment procedures relating to the promotion of client compliance

Knowledge requirements

Look for evidence that confirms knowledge and understanding of:

relevant legislation, standards, policies and legal precedents

consequences of non-compliance

terminology used in legislation and procedures

organisational procedures, guidelines and protocols

delivery approaches to address a range of learning styles

industry knowledge

equity and diversity principles

public sector legislation such as occupational health and safety and environment relating to the promotion of client compliance

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the Unit descriptor, Performance Criteria, the Range Statement and the Assessment Guidelines for the Public Sector Training Package.

Units to be assessed together

- *Pre-requisite* units that must be achieved prior to this unit: *Nil*
- *Co-requisite* units that must be assessed with this unit: *Nil*
- *Co-assessed units* that may be assessed with this unit to increase the efficiency and realism of the assessment process include, but are not limited to:

PSPETHC401A Uphold and support the values and principles of public service

PSPGOV402B Deliver and monitor service to clients

PSPGOV408A Value diversity

PSPGOV422A Apply government processes

PSPLEGN401A Encourage compliance with legislation in the public sector

PSPPOL404A Support policy implementation

PSPREG401C Exercise regulatory powers

PSPREG403B Assess compliance

PSPREG405B Act on non-compliance

Overview of evidence requirements

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms:

- the knowledge requirements of this unit
- the skill requirements of this unit
- application of the Employability Skills as they relate to this unit (see Employability Summaries in Qualifications Framework)
- promotion of client compliance in a range of (3 or more) contexts (or occasions, over time)

Resources required to carry out assessment

These resources include:

- legislation, regulations, policy, guidelines and standards
- public sector values and codes of conduct
- presentation materials and communication techniques to suit diverse audiences
- case studies and workplace scenarios to capture the range of compliance situations likely to be encountered

EVIDENCE GUIDE

Where and how to assess evidence

Valid assessment of this unit requires:

- a workplace environment or one that closely resembles normal work practice and replicates the range of conditions likely to be encountered when promoting client compliance, including coping with difficulties, irregularities and breakdowns in routine
- promotion of client compliance in a range of (3 or more) contexts (or occasions, over time)

Assessment methods should reflect workplace demands, such as literacy, and the needs of particular groups, such as:

- people with disabilities
- people from culturally and linguistically diverse backgrounds
- Aboriginal and Torres Strait Islander people
- women
- young people
- older people
- people in rural and remote locations

Assessment methods suitable for valid and reliable assessment of this competency may include, but are not limited to, a combination of 2 or more of:

- case studies
- portfolios
- projects
- questioning
- scenarios
- simulation or role plays
- authenticated evidence from the workplace and/or training courses

For consistency of assessment

Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments

Range Statement

RANGE STATEMENT

The Range Statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The Range Statement also provides a focus for assessment. It relates to the unit as a whole. Text in *italics* in the Performance Criteria is explained here.

Clients may include

- individuals
- organisations
- general public
- key stakeholders from industry
- industry groups
- unions
- students
- community
- specific interest groups
- other government agencies

Attitude may include

- compliant/willing to comply
- interested
- helpful
- negative
- aggressive
- violent

Information may include

- verbal advice or explanation
- written materials
- brochures
- videos
- electronic media: floppy disk, CD-ROM, email, Internet

Communication strategies may include

- one-to-one
- informal discussion
- telephone call
- small group discussion/presentation
- large group presentation
- written paper-based or electronic presentation
- teleconference

Unit Descriptor

Unit descriptor

This unit covers risk assessment, monitoring of situations/environments/behaviours, and analysis of information to assess compliance with legislation and/or standards. It includes monitoring areas under own jurisdiction, receiving or identifying allegations of non-compliance, and conducting research to determine levels of compliance.

In practice, assessing compliance may overlap with other generalist or specialist public sector work activities such as acting ethically, exercising regulatory powers, promoting compliance, acting on non-compliance, etc.

This unit replaces and is equivalent to PSPREG403A Assess compliance with legislation.

Application of the Unit

Not applicable.

Licensing/Regulatory Information

Pre-Requisites

Not applicable.

Employability Skills Information

Employability skills This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements are the essential outcomes of the unit of competency. Together, performance criteria specify the requirements for competent performance. Text in *bold italics* is explained in the Range Statement following.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Monitor areas under jurisdiction	<p>1.1 <i>Risk assessment</i> analysis is conducted to identify and prioritise areas for <i>monitoring</i> and to identify methodology</p> <p>1.2 Monitoring is conducted in accordance with <i>legislation, policy and procedures</i></p> <p>1.3 Inspections and/or compliance audits are conducted in accordance with organisational policy and procedures</p> <p>1.4 <i>Specialist equipment</i> is utilised when required, in accordance with legislation, policy and procedures</p> <p>1.5 Safety of self and others is protected in accordance with legislation, policy and procedures</p> <p>1.6 Cooperation with <i>other organisations and jurisdictions</i> is facilitated in accordance with organisational policy and procedures</p>
2. Receive or identify allegation of non-compliance	<p>2.1 <i>Referrals</i> relating to non-compliance are recorded in accordance with legislation, policy and procedures</p> <p>2.2 Possible and potential breaches are responded to in a timely manner in accordance with legislation, policy and procedures</p> <p>2.3 Preliminary information is assessed to establish the offence and is validated to confirm the need for action in accordance with organisational policy and procedures</p> <p>2.4 Complainants are handled in accordance with organisational guidelines which may indicate referral to more senior personnel</p>
3. Determine levels of compliance	<p>3.1 Timely consultation is undertaken as necessary to obtain advice on methodology to adopt and prevent gaps occurring in evidence collection</p> <p>3.2 <i>Evidence collection methodology</i> is selected according to the purpose, situation and operational guidelines</p> <p>3.3 Information/samples are collected, analysed and secured in accordance with legislation, policy and procedures</p> <p>3.4 Information/samples are relevant and sufficient for the purpose identified</p> <p>3.5 Assessment is made against the requirements of the legislation and the level of compliance is identified and documented according to legal and organisational requirements</p> <p>3.6 Further action is determined consistent with the level of compliance and is <i>recorded/reported</i> in accordance with legislation, policy and procedures</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the essential skills and knowledge and their level, required for this unit.

Skill requirements

Look for evidence that confirms skills in:

undertaking research, analysis and problem solving in the context of assessing compliance

applying regulations and codes of practice

using information technology for data analysis, recording and reporting

communicating including questioning and negotiating of meaning in sometimes difficult situations

responding to diversity, including gender and disability

reading and applying complex information from legislation

applying public sector legislation such as occupational health and safety and environmental and sustainability procedures in the context of assessing client compliance

Knowledge requirements

Look for evidence that confirms knowledge and understanding of:

legislation, standards, policies and legal precedents

organisational procedures, guidelines and protocols

knowledge of own and others' jurisdictions

risk management in the context of compliance assessment

application of audit tools

research and sampling methodologies

security storage of evidence/information

procedures for recording allegations/complaints

specialist equipment

equal employment opportunity, equity and diversity principles

public sector legislation such as occupational health and safety and environment and sustainability relating to the assessment of client compliance

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the Unit descriptor, Performance Criteria, the Range Statement and the Assessment Guidelines for the Public Sector Training Package.

Units to be assessed together

- *Pre-requisite* units that must be achieved prior to this unit: *Nil*
- *Co-requisite* units that must be assessed with this unit: *Nil*
- *Co-assessed units* that may be assessed with this unit to increase the efficiency and realism of the assessment process include, but are not limited to:

PSPETHC401A Uphold and support the values and principles of public service

PSPGOV408A Value diversity

PSPGOV422A Apply government processes

PSPLEGN401A Encourage compliance with legislation in the public sector

PSPREG401C Exercise regulatory powers

PSPREG402C Promote client compliance

PSPREG405B Act on non-compliance

Overview of evidence requirements

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms:

- the knowledge requirements of this unit
- the skill requirements of this unit
- application of the Employability Skills as they relate to this unit (see Employability Summaries in Qualifications Framework)
- assessment of compliance in a range of (3 or more) contexts (or occasions, over time)

Resources required to carry out assessment

These resources include:

- legislation, regulations, policy, guidelines and standards
- public sector values and codes of conduct
- evidence gathering methodology
- case studies and workplace scenarios to capture the range of situations likely to be encountered when assessing compliance

Where and how to assess evidence

Valid assessment of this unit requires:

- a workplace environment or one that closely resembles normal work practice and replicates the range of conditions likely to be encountered when assessing compliance, including coping with

EVIDENCE GUIDE

difficulties, irregularities and breakdowns in routine

- assessment of compliance in a range of (3 or more) contexts (or occasions, over time)

Assessment methods should reflect workplace demands, such as literacy, and the needs of particular groups, such as:

- people with disabilities
- people from culturally and linguistically diverse backgrounds
- Aboriginal and Torres Strait Islander people
- women
- young people
- older people
- people in rural and remote locations

Assessment methods suitable for valid and reliable assessment of this competency may include, but are not limited to, a combination of 2 or more of:

- case studies
- portfolios
- questioning
- scenarios
- simulation or role plays
- authenticated evidence from the workplace and/or training courses

For consistency of assessment

Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments

Range Statement

RANGE STATEMENT

The Range Statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The Range Statement also provides a focus for assessment. It relates to the unit as a whole. Text in *italics* in the Performance Criteria is explained here.

Employability skills This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements are the essential outcomes of the unit of competency. Together, performance criteria specify the requirements for competent performance. Text in *bold italics* is explained in the Range Statement following.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Initiate preliminary investigation to confirm non-compliance	<p>1.1 Information is assessed in terms of its accuracy and against legislative requirements to confirm likely non-compliance</p> <p>1.2 Information is tested against the legislation to confirm whether the possible breach falls within jurisdiction</p> <p>1.3 Importance/urgency of the matter is assessed and the priority is allocated to enable timely and effective action</p> <p>1.4 Documentation to commence investigation of alleged breach is initiated and meets legislative and organisational requirements</p>
2. Plan investigation	<p>2.1 Objectives of the investigation are determined and <i>resources</i> to conduct the investigation are determined and obtained in accordance with organisational policy and procedures</p> <p>2.2 Risks associated with the investigation are identified and planned for, including sensitivities that might affect the organisation</p> <p>2.3 <i>Methods</i> to achieve the investigation's objectives are selected and authorised in accordance with <i>legislation, policies and guidelines</i></p> <p>2.4 Timelines are identified and tasks prioritised to inform the sequence of activities and provide for future review of the investigation process</p> <p>2.5 Communication and case management requirements are confirmed and initiated in accordance with organisational policy and procedures</p> <p>2.6 Investigation <i>planning</i> and recording is conducted in accordance with legislative requirements and organisational policy and procedures</p>
3. Conduct investigation	<p>3.1 Subjects and suspects involved in the possible breach are identified and details are recorded in accordance with legislative requirements and organisational policy and procedures</p> <p>3.2 Information relevant to the investigation is collected and analysed in accordance with legislative requirements, rules of evidence and organisational policy and procedures</p> <p>3.3 <i>Exhibits</i> are processed and managed in accordance with legislative requirements, rules of evidence and organisational policy and procedures</p> <p>3.4 Likely defences are anticipated and evidence to counter them is included</p> <p>3.5 The need for <i>expert assistance</i> is determined and arranged in accordance with organisational procedures</p>
4. Finalise	<p>4.1 If no breach has occurred or no action is to be taken, documentation includes reasons and justification, and is</p>

ELEMENT

investigation

PERFORMANCE CRITERIA

completed in accordance with organisational policy and procedures

4.2 If breach is confirmed, appropriate, timely *action* is *recommended* within the officer's discretion under the legislation and organisational policy and procedures

4.3 A record of the investigation and consequent recommendations for action are prepared and submitted in accordance with legislative and organisational requirements

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the essential skills and knowledge and their level, required for this unit.

Skill requirements

Look for evidence that confirms skills in:

acting ethically

applying legislation, regulations and codes of practice

using process mapping

undertaking research, analysis and problem solving in the context of investigating non-compliance

reading and applying complex information from legislation

communicating including questioning and negotiating meaning in sometimes difficult situations

responding to diversity, including gender and disability

using planning and time management in the context of investigations

preparing written reports and recommendations requiring accuracy and formal structures and language

using information technology for data analysis, recording and reporting

applying public sector legislation such as occupational health and safety and environmental procedures in the context of investigation

Knowledge requirements

Look for evidence that confirms knowledge and understanding of:

investigation methodology and techniques

rules and types of evidence

storage and continuity of evidence

applicable legislation

aspects of criminal, civil or administrative law

jurisdiction, powers and restrictions to investigate

organisational policy and procedures

cultural awareness

confidentiality and privacy issues

procedures re lines of reporting

report procedures which provide a written and/or electronic audit trail

public sector legislation such as occupational health and safety and environment relating to investigations

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the Unit descriptor, Performance Criteria, the Range Statement and the Assessment Guidelines for the Public Sector Training Package.

Units to be assessed together

- *Pre-requisite* units that must be achieved prior to this unit: *Nil*
- *Co-requisite* units that must be assessed with this unit: *Nil*
- *Co-assessed units* that may be assessed with this unit to increase the efficiency and realism of the assessment process include, but are not limited to:

PSPETHC401A Uphold and support the values and principles of public service

PSPGOV406B Gather and analyse information

PSPGOV408A Value diversity

PSPGOV422A Apply government processes

PSPLEGN401A Encourage compliance with legislation in the public sector

PSPREG401C Exercise regulatory powers

PSPREG407B Produce formal record of interview

PSPREG412A Gather and manage evidence

Overview of evidence requirements

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms:

- the knowledge requirements of this unit
- the skill requirements of this unit
- application of the Employability Skills as they relate to this unit (see Employability Summaries in Qualifications Framework)
- investigation of non-compliance in a range of (3 or more) contexts (or occasions, over time)

Resources required to carry out assessment

These resources include:

- legislation, regulations, policy, guidelines and standards
- public sector values and codes of conduct
- case studies and workplace scenarios to capture the range of investigation situations likely to be encountered

Where and how to assess evidence

Valid assessment of this unit requires:

- a workplace environment or one that closely resembles normal work practice and replicates the range of conditions likely to be encountered when investigating non-compliance, including

EVIDENCE GUIDE

coping with difficulties, irregularities and breakdowns in routine

- investigation of non-compliance in a range of (3 or more) contexts (or occasions, over time)

Assessment methods should reflect workplace demands, such as literacy, and the needs of particular groups, such as:

- people with disabilities
- people from culturally and linguistically diverse backgrounds
- Aboriginal and Torres Strait Islander people
- women

- older people
- people in rural and remote locations

Assessment methods suitable for valid and reliable assessment of this competency may include, but are not limited to, a combination of 2 or more of:

- case studies
- portfolios
- questioning
- scenarios
- authenticated evidence from the workplace and/or training courses

For consistency of assessment

Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments

Range Statement

RANGE STATEMENT

The Range Statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The Range Statement also provides a focus for assessment. It relates to the unit as a whole. Text in *italics* in the Performance Criteria is explained here.

- Resources may include*
- human, physical and financial and may include other agencies, such as:
 - other police organisations
 - National Crime Authority
 - Criminal Justice Commission/s
 - other government departments/agencies
 - non-government agencies such as financial institutions and insurance companies
- Investigation methods may include*
- forensic examination/analysis
 - informants/informers
 - listening devices and other covert surveillance techniques
 - search and search warrants
 - computer interrogation/data retrieval
 - door knocks
 - using other sources of information, such as the media
- Legislation, policies and guidelines may include*
- enabling legislation
 - confidentiality
 - privacy
 - criminal, civil or administrative law
 - contract law
 - equal employment opportunity and anti-discrimination law
 - disciplinary procedures
 - government policy
 - organisational guidelines
 - regulatory standards
 - codes of practice
 - international treaties (equal employment opportunity, world heritage)
- Investigation planning may include*
- objectives
 - methods
 - risks
 - timelines
 - resources

- Exhibits may include*
- activities
 - communication
 - case management
 - evidentiary elements of the offence
 - the individual items of evidence that could be presented to a court and may be required for viewing by:
 - judicial officers
 - prosecutors
 - defence counsel
 - expert and non-expert witnesses
 - those required for audit purposes
- Expert assistance may include*
- advice on/assistance with evidentiary matters
 - audit matters
 - data analysis
 - document examination
 - execution of search warrants
 - fingerprinting
 - forensic
 - handwriting
 - legal advice - director of public prosecutions, government solicitor
 - photography
 - recovery issues
 - scientific or technical matters
 - surveillance
- Recommended action may include*
- measures to control/contain breach
 - warning
 - caution
 - notice
 - fine
 - arrest
 - criminal prosecution
 - civil action
 - debt recovery strategy
 - no action (must specify criteria for use of no action):
 - used where investigation identifies no offence or a relevant defence is raised
 - also used when exercising prosecutorial discretion

Elements and Performance Criteria Pre-Content

Elements are the essential outcomes of the unit of competency. Together, performance criteria specify the requirements for competent performance. Text in *bold italics* is explained in the Range Statement following.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Attend situations where non-compliance is suspected/alleged	<p>1.1 Procedure is followed in accordance with legal requirements and organisational policy and procedures</p> <p>1.2 Personal conduct is maintained in accordance with organisational guidelines and protocols</p> <p>1.3 Safety of self and others is protected in accordance with operational policy and procedures</p> <p>1.4 When <i>assistance</i> is required, requests are timely and in accordance with <i>legislation, policy and procedures</i></p> <p>1.5 Activities and actions are carried out in accordance with legislation, organisational policy and procedures and the rules of evidence</p>
2. Take action on non-compliance	<p>2.1 Mitigating circumstances are considered, where appropriate, in accordance with organisational policy and procedures</p> <p>2.2 <i>Action on non-compliance</i> is selected to match the seriousness of the offence</p> <p>2.3 <i>Clients</i> are informed of the action, justification for it and their rights of appeal in accordance with legislation, organisational policy and procedures</p> <p>2.4 Action is taken in accordance with legal requirements and organisational guidelines</p> <p>2.5 Personal actions/conduct are carried out in accordance with organisational guidelines and protocols and protect the rights and responsibilities of clients</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the essential skills and knowledge and their level, required for this unit.

Skill requirements

Look for evidence that confirms skills in:

- undertaking negotiation and conflict resolution
- applying risk management and self preservation techniques
- using judgment and decision making
- exchanging often complex oral information in a form to suit diverse audiences
- responding to diversity, including gender and disability
- writing requiring accuracy of expression and formality in structure and format
- applying public sector legislation such as occupational health and safety and environmental procedures in the context of actions on non-compliance

Knowledge requirements

Look for evidence that confirms knowledge and understanding of:

- legislation, organisational procedures and guidelines
- organisational parameters for decision making
- range of appropriate actions possible for different offences
- negotiation in the context of achieving compliance
- awareness of social and cultural issues (demographics)
- public sector legislation and standards
- occupational health and safety and environmental considerations to ensure the safety of self and others

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the Unit descriptor, Performance Criteria, the Range Statement and the Assessment Guidelines for the Public Sector Training Package.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Make decision to arrest	<p>1.1 Circumstances are assessed and arrest is determined to be the appropriate response decision in relation to the alleged breach of law</p> <p>1.2 Assessment is carried out to ensure the arrest can be made without endangering self or others in accordance with <i>legislation, organisational policy and procedures</i></p> <p>1.3 When <i>assistance</i> is required, requests are made in a timely manner and in accordance with organisational policy and procedures</p>
2. Perform arrest	<p>2.1 When performing arrest, all <i>legal and administrative requirements</i> are carried out</p> <p>2.2 Conflict de-escalation techniques are used as necessary to avoid force and maintain the safety of self and others</p> <p>2.3 Any arrest, restraint and/or transport actions are conducted in accordance with legislative requirements and organisational policy and procedures</p>
3. Prepare and submit documentation	<p>3.1 <i>Documentation</i> is completed that is accurate, relevant, complete, and is prepared and submitted within the required timeframe, as required by law and organisational policy and procedures</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the essential skills and knowledge and their level, required for this unit.

Skill requirements

Look for evidence that confirms skills in:

- engaging in communication, negotiation and conflict resolution with alleged offenders from diverse backgrounds
- responding to diversity, including gender and disability
- using techniques to protect personal safety including restraint techniques for suspects
- writing, requiring precision of expression and formality of structure and style
- applying public sector legislation, such as occupational health and safety and environmental processes relating to the safety of self and others in the context of making arrests

Knowledge requirements

Look for evidence that confirms knowledge and understanding of:

- offences under the enabling legislation
- legislative powers of arrest and limits of authority
- organisational policy and procedures relating to arrest
- rights of alleged offender
- formal caution
- terminology used in legislation and procedures
- communication and conflict resolution techniques relating to arrest
- equity and diversity principles
- public sector legislation such as occupational health and safety and environment relating to arrests

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the Unit descriptor, Performance Criteria, the Range Statement and the Assessment Guidelines for the Public Sector Training Package.

Range Statement

RANGE STATEMENT

The Range Statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The Range Statement also provides a focus for assessment. It relates to the unit as a whole. Text in *italics* in the Performance Criteria is explained here.

Legislation, policy and procedures may include

- enabling legislation
- State/Territory or Commonwealth policy and procedures
- organisational procedures and processes
- codes of conduct
- equal employment opportunity and anti-discrimination law

Assistance may include

- other officers
- other jurisdictions
- other organisations
- police

Legal and administrative requirements relating to arrest may include

- telling person of the decision to arrest
- identifying self and authority to arrest
- identifying nature of offence, and ensuring alleged offender understands this
- reading the suspect their rights/giving the formal verbal caution
- State/Territory or Commonwealth procedures and guidelines
- organisational procedures/guidelines

Documentation may include:

- recording facts in notebook
- incident report

Unit Descriptor

Unit descriptor

This unit covers the competency to conduct and produce formal records of interview with suspects. It includes preparing for the interview, conducting the interview, and completing the record of interview.

In practice, producing formal records of interview may overlap with other generalist or specialist public sector work activities such as, exercising regulatory powers, acting ethically, complying with public sector legislation, applying government processes, gathering and analysing information, etc.

This unit replaces and is equivalent to PSPREG407A Conduct and record interviews. PSPFRAU404A Conduct formal interviews and take witness statements is also equivalent to this unit.

Application of the Unit

Not applicable.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

Employability skills This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements are the essential outcomes of the unit of competency. Together, performance criteria specify the requirements for competent performance. Text in *bold italics* is explained in the Range Statement following.

Elements and Performance Criteria

ELEMENT

PERFORMANCE CRITERIA

1. Prepare for interview

- 1.1 *Interview plan* is developed in accordance with legislative, ethical and policy requirements
- 1.2 Venue, *equipment* and *personnel* to be involved in/excluded from the interview are determined in accordance with legislative requirements and organisational guidelines
- 1.3 *Exhibits* to be used in the interview are identified and made readily available for reference
- 1.4 *Risks* associated with the interview are assessed and procedures for ensuring the safety of self and others are instigated

2. Conduct and record interview

- 2.1 *Interviewee* is provided with *preliminary advice* and questioned to ensure their understanding of the *interview process* and their *rights*
- 2.2 *Questioning techniques* are used to gather information, and test and confirm its relevance, reliability and sufficiency, prior to concluding the interview
- 2.3 Exhibits are introduced and fully described in accordance with legislative and organisational requirements
- 2.4 Interview is *conducted* and *recorded* in accordance with the rules of evidence, *legislative and organisational requirements* so that outcomes are admissible in evidence
- 2.5 Interview is *concluded* in accordance with legislative requirements, organisational policy and procedures
- 2.6 A true record of interview is produced and *post-interview procedures* are completed in accordance with legislative timeframes and organisational requirements

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the essential skills and knowledge and their level, required for this unit.

Skill requirements

Look for evidence that confirms skills in:

- using interviewing techniques to suit a range of situations and interviewees, and varying style and language structure to suit a range of interviewees
- using techniques to defuse potentially dangerous situations
- engaging in exchanges of sometimes complex oral information
- using a range of communication techniques/methods that includes establishing rapport, reflective listening, probing, reflecting, negotiation, conflict resolution
- engaging in questioning that meets legal requirements for admissibility
- responding to diversity, including gender and disability
- undertaking research, analysis and problem solving
- using judgment, to test the veracity of information and vary questions and interviewing techniques to suit
- preparing interview documentation requiring accuracy of expression and formality in structure and format
- operating technical and electronic equipment, where necessary
- applying public sector standards and legislation such as occupational health and safety and environment in the context of formal interviewing

Knowledge requirements

Look for evidence that confirms knowledge and understanding of:

- enabling and other relevant legislation
- organisational policies and guidelines relating to formal interviews
- interview techniques and points of proof
- rules of evidence and admissibility
- use of caution
- legal and ethical considerations for conducting interviews involving juveniles, Aboriginal and Torres Strait Islander peoples and disciplinary matters
- diversity issues in the context of interviewing suspects, witnesses and others
- procedures for using interpreters
- legal and organisational requirements for documentation
- legal requirements relating to electronic recording equipment
- public sector legislation such as occupational health and safety and environment relating to producing a formal record of interview

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the Unit descriptor, Performance Criteria, the Range Statement and the Assessment Guidelines for the Public Sector Training Package.

Units to be assessed together

- *Pre-requisite* units that must be achieved prior to this unit: *Nil*
- *Co-requisite* units that must be assessed with this unit: *Nil*
- *Co-assessed units* that may be assessed with this unit to increase the efficiency and realism of the assessment process include, but are not limited to:

PSPETHC401A Uphold and support the values and principles of public service

PSPLEGN401A Encourage compliance with legislation in the public sector

PSPGOV408A Value diversity

PSPGOV422A Apply government processes

PSPREG401C Exercise regulatory powers

PSPREG412A Gather and manage evidence

Overview of evidence requirements

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms:

- the knowledge requirements of this unit
- the skill requirements of this unit
- application of the Employability Skills as they relate to this unit (see Employability Summaries in Qualifications Framework)
- formal records of interview produced in a range of (3 or more) contexts (or occasions, over time)

These resources include:

Resources required to carry out assessment

- legislation, policy, procedures and protocols relating to formal records of interview
- case studies and workplace scenarios to capture the range of situations likely to be encountered when conducting formal records of interview

Where and how to assess evidence

Valid assessment of this unit requires:

- a workplace environment or one that closely resembles normal work practice and replicates the range of conditions likely to be encountered when conducting formal records of interview, including coping with difficulties, irregularities and breakdowns in routine

EVIDENCE GUIDE

- conduct of formal records of interview in a range of (3 or more) contexts (or occasions, over time)

Assessment methods should reflect workplace demands, such as literacy, and the needs of particular groups, such as:

- people with disabilities
- people from culturally and linguistically diverse backgrounds
- Aboriginal and Torres Strait Islander people
- women
- young people
- older people
- people in rural and remote locations

Assessment methods suitable for valid and reliable assessment of this competency may include, but are not limited to, a combination of 2 or more of:

- case studies
- demonstration
- observation
- questioning
- scenarios
- simulation or role plays
- authenticated evidence from the workplace and/or training courses

For consistency of assessment

Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments

Range Statement

RANGE STATEMENT

The Range Statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The Range Statement also provides a focus for assessment. It relates to the unit as a whole. Text in *italics* in the Performance Criteria is explained here.

Interview plan may include

- allegation that is clear, unambiguous and concise, covering common proofs such as:
 - time
 - date
 - place
 - jurisdiction
 - identity
 - proofs of an offence, such as:
 - evidence
 - corroboration
 - admissibility
 - elements
 - criminal intent
 - competence (eg age requirements, mental faculty etc)
 - legal presumptions
 - any anticipated or known defences
 - exculpations
 - key questions in sequential order, highlighting main points
 - interview strategies appropriate to the situation and purpose of the interview, such as:
 - direct questioning
 - empathetic questioning
 - investigative interviewing
 - no leading questions
 - no double-barrelled questions
 - no cross-examination
 - safety requirements for interviewer, interviewee and others present
 - rapport building techniques
 - strategies for working with uncooperative interviewees
 - method of recording, and recordkeeping responsibilities
- recording equipment for:
- tape recording

Equipment may include

RANGE STATEMENT

- videotaping
 - electronic equipment
 - computer equipment
 - stationery
- Personnel may include*
- second interviewer
 - legal representatives
 - consular representative
 - senior staff
 - colleagues
 - interpreter
 - Aboriginal support persons
 - independent person
 - family member
 - responsible adult in the case of juveniles
 - special requirements that may apply for:
 - minor
 - disabled
 - age
 - gender
 - ethnicity
 - those needing to be excluded to maintain the integrity of the investigation
- Exhibits may include*
- paper-based and electronic documents, including:
 - maps
 - photographs
 - videotapes
 - physical objects and materials
 - drugs
 - scientific evidence
- Risks may include*
- uncooperative or hostile interviewee
 - aggression
 - violence
 - distressed interviewee
 - diversity issues
- Interviewee may include*
- suspect (who may or may not be under arrest)
 - witness
 - informant
 - informer
 - complainant
 - victim

RANGE STATEMENT

- Preliminary advice may cover*
- experts (such as persons with medical, scientific, legal or other specialist knowledge in the field)
 - interview process
 - interview time limits
 - effect of prior interview/s occurring within previous 48 hours
 - formal caution
 - allegation
 - voluntariness
 - recording requirements
 - tape protocols (for chain of evidence requirements)
 - number of interviewers
 - statutory rights
 - how the information gathered will be used
- Interview process may include*
- purpose
 - format/structure
 - identification and personal details of interviewee
 - roles of interviewers if more than one
 - formal identification of interviewers
 - full description of exhibits even if videotaped
 - recording process, including use of new tapes, to be opened in front of the interviewee
 - use of confirming questions, to obtain/record interviewee agreement regarding conduct of the interview and that the record of interview is accurate
- Rights may include*
- caution
 - legal representation
 - consular representation
 - interpreter
 - silence
 - notification of whereabouts to family/friends
 - opportunity to make a written statement
 - independent adult present (for juveniles)
 - support person present (for Indigenous peoples, intellectually disabled)
 - being treated with dignity and respect during searches and examinations
 - know the purpose and intended use of the interview
 - copy of taped record of interview within a given time
 - copy of transcript of interview within a given time, if applicable
 - sign/not sign statement
- Questioning techniques*
- summarising

RANGE STATEMENT

may include

- re-phrasing
- paraphrasing
- clarifying questions
- open and closed questions
- cognitive interviewing
- using silence
- establishing event lines or time lines
- non-leading questions

Conduct of interview includes

- no threat, promise or inducement
- no unfair representation
- no physical abuse
- no acts of misconduct
- no duress
- no coercion
- adherence to standard operating procedures
- adherence to code/s of conduct and ethical requirements

Recording may include

- audiotaping
- videotaping
- electronic data
- special arrangements, requests and activities not directly related to the interview such as:
 - persons present
 - times for breaks, such as toilet breaks
 - telephone calls
 - refreshments
 - medical attention
 - visitors
 - requests to see superiors
 - meeting all legal and administrative requirements
 - typewritten record of interview
 - hand written record of interview

Legal and organisational requirements may include

- complying with relevant Commonwealth, State/Territory legislation, such as Part 1C of the Crimes Act 1914
- observation of statutory time limits
- special arrangements for minors
- interviewees' legal rights which must be accorded to them throughout the interview
- ensuring suspects or witnesses understand their rights
- interviewee access to legal advice
- interviewee access to consular assistance

RANGE STATEMENT

- union representation at interview
 - presence of advocates for some groups, for example the intellectually disabled
 - special arrangements for the interview of Aboriginal and Torres Strait Islander peoples
 - special arrangements for the interview of people who do not speak English
 - unwrapping new tapes in front of interviewee at commencement of interview
 - implementation of organisation agreements
 - arrangements for written statement when appropriate
 - other jurisdictional requirements
 - asking for a concluding statement
 - confirming that the information given was voluntary
 - agreement on time of conclusion of interview
 - clearly labelling tapes
 - providing a copy of the audio or video tape to the interviewee at the close of the interview or within statutory time limit
 - transcribing the record of interview
 - providing a copy of the transcribed record of interview or statement to the interviewee at the close of the interview or within statutory time limit
 - securing record of interview in accordance with legislative and organisational requirements
 - security classification of information
 - sealing and securing master tape or data
 - securing recording equipment
 - acknowledging, signing and verifying record of interview by interviewee, where appropriate
 - processing/referral of alleged offender
 - completing organisational records/reports/files
- Concluding the interview may include*
- Post-interview procedures may include*

Employability skills This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements are the essential outcomes of the unit of competency. Together, performance criteria specify the requirements for competent performance. Text in *bold italics* is explained in the Range Statement following.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare for search and seizure	<p>1.1 The purpose of the search is identified and powers under legislation, policies and procedures relating to the search are confirmed</p> <p>1.2 Assessment is made of where items/property/evidence might be obtained with and/or without the use of a search/seizure warrant</p> <p>1.3 Authority to search/seize is verified/obtained and intention to search is advised in accordance with legislative requirements and organisational policy and procedures</p> <p>1.4 Operational planning to address the range of requirements for a search/seizure is carried out in accordance with organisational guidelines</p> <p>1.5 Risk assessment is undertaken to ensure the search/seizure can be conducted safely in accordance with organisational guidelines, and risk management strategies are included in operational planning</p> <p>1.6 The need for assistance with the search and/or seizure is identified and organised in accordance with organisational policy and procedures</p>
2. Implement search	<p>2.1 Search is conducted in accordance with legislation, regulations, policies and guidelines</p> <p>2.2 Search is conducted according to standard operating procedures to ensure thorough and systematic process is used</p> <p>2.3 Equipment and/or technology and other resources are used according to organisational guidelines</p> <p>2.4 Where assistance is obtained, the search is undertaken in accordance with lead agency requirements</p> <p>2.5 Records are made of the search process, items/evidence uncovered in the search, and subsequent action</p>
3. Conduct seizure	<p>3.1 Alternatives to seizure are considered and subsequent action is recorded and justified against legislation, policy and regulations</p> <p>3.2 Items/property/evidence and any related information are seized or otherwise dealt with in accordance with legal requirements and standard operating procedures</p> <p>3.3 Items/property/evidence are appraised, seized, recorded and receipted in accordance with organisational procedures, legislative requirements and the rules of evidence</p> <p>3.4 Items/evidence are removed, secured and, if required, disposed of, in accordance with organisational procedures, legislative requirements and the rules of evidence</p> <p>3.5 Safety of self and others is protected in accordance with operational policy and procedures</p>

ELEMENT

PERFORMANCE CRITERIA

- 3.6 Seizure process is conducted in accordance with organisational and legislative requirements and complies with the rules of evidence
- 4. Complete post-search activities**
- 4.1 Outcomes of search and seizure activities are recorded and disseminated to required personnel in accordance with organisational policy and procedures
- 4.2 Where required, follow-up actions are identified, recorded and undertaken
- 4.3 Where required, third party claims to title of seized items/property are dealt with in accordance with legislative requirements and organisational policy and procedures
- 4.4 Damage to property during the search is dealt with in accordance with legislative and procedural guidelines
- 5. Debrief search and seizure**
- 5.1 Feedback on own role in search/seizure is obtained regularly for continuous improvement
- 5.2 Search and seizure outcomes, processes and procedures are evaluated and improvements recommended and actioned
- 5.3 The value of assistance and/or joint operation relationships/teamwork is assessed and improvements are recommended and actioned in accordance with organisational policy and procedures

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the essential skills and knowledge and their level, required for this unit.

Skill requirements

Look for evidence that confirms skills in:

- undertaking analysis and observation
- completing records using formality of language and structure
- exchanging often complex oral information in a form to suit diverse audiences
- responding to diversity, including gender and disability
- applying public sector legislation such as occupational health and safety and environmental procedures in the context of search and seizure

Knowledge requirements

Look for evidence that confirms knowledge and understanding of:

- enabling legislation, regulations and guidelines
- search procedures
- organisational procedures including those dealing with physical evidence or obtaining a warrant, where relevant
- roles of expert/other personnel
- procedures for dealing with physical evidence
- rules of evidence
- use of equipment and resources
- public sector legislation and standards
- occupational health and safety and environmental considerations to ensure the safety of self and others

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the Unit descriptor, Performance Criteria, the Range Statement and the Assessment Guidelines for the Public Sector Training Package.

Units to be assessed together

- *Pre-requisite* units that must be achieved prior to this unit: *Nil*
- *Co-requisite* units that must be assessed with this unit: *Nil*
- *Co-assessed units* that may be assessed with this unit to increase the efficiency and realism of the assessment process include, but are not limited to:

PSPETHC401A Uphold and support the values and principles of public service

PSPGOV408A Value diversity

PSPGOV422A Apply government processes

PSPLEGN401A Encourage compliance with legislation in the public sector

PSPREG401C Exercise regulatory powers

PSPREG403B Assess compliance

PSPREG405B Act on non-compliance

EVIDENCE GUIDE

Overview of evidence requirements

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms:

- the knowledge requirements of this unit
- the skill requirements of this unit
- application of the Employability Skills as they relate to this unit (see Employability Summaries in Qualifications Framework)
- search and seizure conducted in a range of (3 or more) contexts (or occasions, over time)

Resources required to carry out assessment

These resources include:

- legislation, regulations, policy, guidelines and standards related to search and seizure
- public sector values and codes of conduct
- search support resources
- case studies and workplace scenarios to capture the range of situations likely to be encountered when conducting search and seizure activities

Where and how to assess evidence

Valid assessment of this unit requires:

- a workplace environment or one that closely resembles normal work practice and replicates the range of conditions likely to be encountered when conducting search and seizure, including coping with difficulties, irregularities and breakdowns in routine
- search and seizure conducted in a range of (3 or more) contexts (or occasions, over time)

Assessment methods should reflect workplace demands, such as literacy, and the needs of particular groups, such as:

- people with disabilities
- people from culturally and linguistically diverse backgrounds
- Aboriginal and Torres Strait Islander people
- women
- young people
- older people
- people in rural and remote locations

Assessment methods suitable for valid and reliable assessment of this competency may include, but are not limited to, a combination of 2 or more of:

- case studies
- demonstration
- observation

EVIDENCE GUIDE

- questioning
- scenarios
- simulation or role plays
- authenticated evidence from the workplace and/or training courses

For consistency of assessment

Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments

Range Statement

RANGE STATEMENT

The Range Statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The Range Statement also provides a focus for assessment. It relates to the unit as a whole. Text in *italics* in the Performance Criteria is explained here.

- | | |
|---|---|
| <i>Purpose of the search may include</i> | <ul style="list-style-type: none"> • illicit items • goods to be possessed under court order • physical evidence relating to an offence |
| <i>Items may include</i> | <ul style="list-style-type: none"> • personal property, furniture and electrical equipment not excluded from seizure under legislation • documents • financial information • computer equipment • vehicles • illicit items • drugs • plants • wildlife • currency |
| <i>Evidence may include</i> | <ul style="list-style-type: none"> • documents • information/data • paper-based or technology-based documents/information • photographs • video • dangerous goods • wildlife • prohibited substances • illicit items • any assets or property seized under State/Territory or Commonwealth laws enabling the enforcement of penalties, judgments and orders |
| <i>Items/property/evidence might be obtained from</i> | <ul style="list-style-type: none"> • field search - land/sea/air/waterways • premises - private, government or business • vehicles • vessels • aircraft • cargo • cargo containers |

RANGE STATEMENT

- | | |
|--|--|
| <i>Authority to search/seize may include</i> | <ul style="list-style-type: none"> • baggage - accompanied or unaccompanied • warrant already issued • no requirement for search warrant under powers of enabling legislation • affidavit • confirming the legal basis for the search and seizure • appropriate information to ground a warrant • requirement to obtain search/seizure warrant before proceeding • organisational approval/s to undertake search and seizure • completion/submission of organisational documents relating to planned search and seizure • the need for assistance from other agencies/jurisdictions • referrals to other agencies |
| <i>Intention to search may be advised to</i> | <ul style="list-style-type: none"> • supervisor • colleagues • person being searched • owner • occupier • operator • passengers • crew • legal representatives • other organisations or jurisdictions |

RANGE STATEMENT

- organisational policy and guidelines
 - standard operating procedures
 - rules of evidence
 - public sector standards
 - codes of practice
 - privacy legislation
 - rights of individuals and organisations who are subjects of the search
- Thorough and systematic process means search includes*
- contents
 - outside packages, packing and containers
 - consideration of methods of concealment
 - potential hides
 - consideration of contents against information/reasonable grounds that gave rise to the search
 - consideration of the potential for items to be used for information/intelligence
- Equipment and resources may include*
- search support equipment such as:
 - X-ray
 - trace particle detectors (eg Ionscan)
 - forklift scales
 - fibroscope
 - boroscope and buster
 - cameras
 - video cameras
 - tools
 - safety equipment
 - personal protective equipment
 - means to secure evidence/samples/assets seized
 - detector dogs
 - specialist staff
 - photographer/s
- Records may include*
- organisational records
 - receipts
 - notebooks
 - video footage
 - audiotapes
 - photographs
 - contemporaneous notes
- Information may include*
- addresses
 - telephone numbers

RANGE STATEMENT

- email contacts
 - web site addresses
 - record of anything observed at the scene that is not physical evidence, but may later be relevant
- Dealing with items as an alternative to physical seizure may include*
- labelling items for later seizure
 - securing items for later seizure
 - securing the location of items/evidence
 - seizing alternative items to the same value
 - isolating items/locations for safety reasons
 - changing the locks on seized premises
 - sign-posting seized property/vessels
- Legal requirements may include*
- managing chain of continuity of evidence
- Securing items/evidence may include*
- restricting/controlling access
 - security classifying information
 - ensuring continuity of possession of documents and other physical evidence
- Safety equipment may include*
- gas testers
 - personal protective equipment, such as protective suits, masks, gloves, self-contained breathing apparatus
 - communication devices
 - remote location equipment

Elements and Performance Criteria Pre-Content

Elements are the essential outcomes of the unit of competency.

Together, performance criteria specify the requirements for competent performance. Text in *bold italics* is explained in the Range Statement following.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Analyse evidence	<p>1.1 All related information is considered, whether likely to be admissible as evidence, or not</p> <p>1.2 Information is cross-checked to confirm origin, authenticity and reliability, and to anticipate challenge/s that may occur</p> <p>1.3 Gaps and inadequacies are identified and assessed to allow further collection of evidence where possible</p> <p>1.4 Information is handled and stored in accordance with legislative requirements and organisational policy and procedures</p>
2. Prepare and review admissible evidence	<p>2.1 Witness and expert statements are prepared in accordance with legislative requirements and organisational policy and procedures</p> <p>2.2 <i>Evidence</i> is prepared in accordance with legislative requirements and organisational policy and procedures</p> <p>2.3 All evidence is included in the brief that is likely to be admissible by the court</p> <p>2.4 Non-admissible evidence is separated and retained</p> <p>2.5 Similar proofs are identified and reviewed to confirm that evidence is sufficient to proceed to prosecution</p> <p>2.6 Security, recording and continuity of evidence are maintained in accordance with legislative requirements and organisational policy and procedures</p>
3. Develop a brief of evidence	<p>3.1 Brief of evidence is planned and prepared according to <i>standards</i> required by the <i>prosecution</i></p> <p>3.2 All <i>required information</i> is included in the brief and meets all legal requirements</p> <p>3.3 Brief is provided to prosecution and other parties as required by law and organisational requirements</p> <p>3.4 When required, counsel is briefed on the case and any circumstances that may affect the progress and outcomes</p>
4. Coordinate witnesses	<p>4.1 When required, expert witnesses are identified, familiarised with the evidence, and utilised in accordance with organisational policy and procedures</p> <p>4.2 When required, witness summonses are organised in accordance with legal and organisational requirements</p> <p>4.3 Contact is maintained with <i>witnesses</i> to ensure cooperation, communication and attendance at <i>proceedings</i></p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the essential skills and knowledge and their level, required for this unit.

Skill requirements

Look for evidence that confirms skills in:

undertaking analysis and research

undertaking collation and compilation

writing complex documents - reflecting key points of oral statements in written form in witness statements and in the brief of evidence

report writing using formal structures and language

making comparisons and exercising judgment about facts in written materials

communicating with witnesses from diverse backgrounds

responding to diversity, including gender and disability

Knowledge requirements

Look for evidence that confirms knowledge and understanding of:

sections of Evidence Act, Justice Act relating to preparation of a brief of evidence

admissible evidence

burden of proof

court hearing procedures

rules of evidence

requirements of brief of evidence

principles of disclosure

anti-discrimination law

organisational policies, guidelines and regulations

equity and diversity principles

public sector legislation such as occupational health and safety and environment

relating to the preparation of a brief of evidence

Evidence Guide

EVIDENCE GUIDE

PSPREG410B Give evidence

Modification History

Not applicable.

Unit Descriptor

Unit descriptor

This unit covers the requirements of giving evidence in a range of legal proceedings. It includes preparing for proceedings, presenting evidence, and following up outcomes of proceedings.

In practice, giving evidence may overlap with other generalist or specialist public sector work activities such as acting ethically, complying with public sector legislation, applying government processes, working with interpreters, etc.

This unit replaces and is equivalent to *PSPREG410A Give evidence*.

Application of the Unit

Not applicable.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

Employability skills This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements are the essential outcomes of the unit of competency. Together, performance criteria specify the requirements for competent performance. Text in *bold italics* is explained in the Range Statement following.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare for proceedings	<p>1.1 Arrangements for, role and involvement in proceedings are confirmed</p> <p>1.2 Documentation and exhibits are prepared in accordance with legislation, policy and procedures</p> <p>1.3 Any witnesses are supported as required, in accordance with organisational policy and procedures, to attend proceedings and give evidence</p>
2. Present evidence	<p>2.1 Protocols and rules of evidence relevant to the setting and the organisation involved are adhered to throughout proceedings</p> <p>2.2 Feedback from counsel and/or police and comments by deciding authority are noted and incorporated</p> <p>2.3 Evidence is presented in a clear, concise and articulate manner in accordance with organisational standards</p> <p>2.4 Quality and standard of evidence and presentation enhance the reputation and image of the organisation with the public, legal profession and colleagues</p> <p>2.5 Considered expert evidence is provided on request in accordance with the organisation's policy and consistent with qualifications and expertise</p>
3. Follow up outcomes of proceedings	<p>3.1 The outcomes of the proceedings are noted and filed, and reports are completed where required according to organisational requirements</p> <p>3.2 Any required actions are implemented in accordance with organisational policies and procedures</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the essential skills and knowledge and their level, required for this unit.

Skill requirements

Look for evidence that confirms skills in:

presenting evidence clearly and concisely

writing reports

word processing

taking notes

communicating with people from diverse backgrounds

responding to diversity, including gender and disability

making comparisons and exercising judgment about facts in written materials

report writing using formal structures and language

applying public sector standards and legislation such as occupational health and safety and environment in the context of giving evidence

Knowledge requirements

Look for evidence that confirms knowledge and understanding of:

court prosecution processes

common law versus judicial precedent versus legislation

specific powers of the organisation

court/tribunal/commission structures

jurisdiction of each court/tribunal/commission

appeals systems

role of legal personnel in judicial or quasi-judicial systems

procedures and protocols in different judicial or quasi-judicial systems

types of offences

general principles of criminal liability

exemptions and defences

types of evidence admissible in judicial or quasi-judicial systems

legislative requirements of presenting evidence

use of notes in court/tribunal/commission

organisation policies and procedures relating to preparation of documents and evidence and providing expert opinion

public sector legislation such as occupational health and safety and environment relating to the presentation of evidence

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the Unit descriptor, Performance Criteria, the Range Statement and the Assessment Guidelines for the Public Sector Training Package.

Units to be assessed together

- *Pre-requisite* units that must be achieved prior to this unit: *Nil*
- *Co-requisite* units that must be assessed with this unit: *Nil*
- *Co-assessed units* that may be assessed with this unit to increase the efficiency and realism of the assessment process include, but are not limited to:

PSPETHC401A Uphold and support the values and principles of public service

PSPLEGN401A Encourage compliance with legislation in the public sector

PSPGOV408A Value diversity

PSPGOV419A Work with interpreters

PSPGOV422A Apply government processes

PSPREG401C Exercise regulatory powers

Overview of evidence requirements

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms:

- the knowledge requirements of this unit
- the skill requirements of this unit
- application of the Employability Skills as they relate to this unit (see Employability Summaries in Qualifications Framework)
- giving evidence in a range of (3 or more) contexts (or occasions, over time)

Resources required to carry out assessment

These resources include:

- legislation, policy, procedures and protocols relating to presentation of evidence
- case studies and workplace scenarios to capture the range of likely offences for which evidence needs to be presented

Where and how to assess evidence

Valid assessment of this unit requires:

- a workplace environment or one that closely resembles normal work practice and replicates the range of conditions likely to be encountered when giving evidence, including coping with difficulties, irregularities and breakdowns in routine
- giving evidence in a range of (3 or more) contexts (or occasions, over time)

EVIDENCE GUIDE

Assessment methods should reflect workplace demands, such as literacy, and the needs of particular groups, such as:

- people with disabilities
- people from culturally and linguistically diverse backgrounds
- Aboriginal and Torres Strait Islander people
- women
- young people
- older people
- people in rural and remote locations

Assessment methods suitable for valid and reliable assessment of this competency may include, but are not limited to, a combination of 2 or more of:

- case studies
- demonstration
- observation
- questioning
- scenarios
- simulation or role plays
- authenticated evidence from the workplace and/or training courses

For consistency of assessment

Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments

Range Statement

RANGE STATEMENT

The Range Statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The Range Statement also provides a focus for assessment. It relates to the unit as a whole. Text in *italics* in the Performance Criteria is explained here.

- | | |
|---|--|
| <i>Arrangements for, role and involvement may include</i> | <ul style="list-style-type: none"> • confirmation of time, date and location of proceedings • confirmation of evidence required to be presented • working with/briefing legal counsel |
| <i>Proceedings may include</i> | <ul style="list-style-type: none"> • criminal, coronial and civil courts • defence tribunals • industrial relations commissions • State industrial tribunals • workers compensation tribunals • human rights commissions • equal opportunity commissions • land and environment courts • royal commissions • disciplinary hearings • administrative reviews • Parliamentary hearings |

- Protocols may include*
 - complainants
 - rules of court
 - correct mode of address for judges, magistrates and other court users, in and out of court
 - procedures for entering and leaving a courtroom
 - complying with security procedures
 - file handling procedures
 - procedures for handling exhibits
- Rules of evidence include*
 - admissibility
 - contemporaneousness
- Deciding authority may include*
 - magistrate
 - judge
- Evidence may include*
 - different aspects in chief, cross-examination and re-examination
- Standards for giving evidence may include*
 - voice clarity
 - language
 - impartiality
 - respect for people and offices held
 - standards of dress
 - forms of address
- Required action may include*
 - follow-up action with legal authorities
 - re-listing for conciliation conference or arbitration
 - dealing with evidence, which may include disposal
 - preparing agreed orders
 - updating files
 - closing files

Unit Sector(s)

Not applicable.

Competency field

Competency field Regulatory

PSPREG411A Gather information through interviews

Modification History

Not applicable.

Unit Descriptor

Unit descriptor

This unit covers gathering information through interviews that do not result in a formal record of interview in the legal sense. Interviews may be conducted in a range of locations for a range of reasons. They may be overt or covert. The unit includes preparing for the interview, conducting the interview, and reviewing and correlating interview information.

Verbal questioning and other interactions undertaken outside a formal interview structure are not addressed in this unit as these are covered in other communication units in the Training Package, such as *PSPGOV412A Use advanced workplace communication strategies*.

In practice, gathering information through interviews may overlap with other generalist or specialist public sector work activities such as acting ethically, exercising regulatory powers, applying government processes, gathering and analysing information, assessing compliance, receiving and validating information, etc.

This is a new unit of competency, added to the *Regulatory* Competency field of the Training Package in 2004.

Application of the Unit

Not applicable.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

Employability skills This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements are the essential outcomes of the unit of competency. Together, performance criteria specify the requirements for competent performance. Text in *bold italics* is explained in the Range Statement following.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare for interview	<p>1.1 The need for an interview is determined, and the <i>context</i> and <i>requirements</i> are established in accordance with <i>organisational and legislative requirements</i></p> <p>1.2 Interview <i>planning</i> is undertaken to ensure desired outcomes are achieved</p> <p>1.3 Interview arrangements are made in accordance with legislative and organisational requirements</p> <p>1.4 <i>Materials</i> to be used during the interview are prepared as required</p> <p>1.5 Advice is obtained as required on legislative or administrative issues relating to the conduct of the interview</p>
2. Conduct interview	<p>2.1 Commencement of the interview is undertaken following organisational <i>protocols</i> and complies with legislative requirements</p> <p>2.2 Interview is conducted in a planned manner, with the sequence evident to others who may use the outcomes</p> <p>2.3 <i>Questions</i> are selected and used that are relevant, comprehensive, appropriate to the situation and the interviewee and adhere to the rules of evidence</p> <p>2.4 Problem solving skills are used to test, compare and contrast information as it is provided to influence the direction of further questions</p> <p>2.5 Information is <i>recorded</i> in accordance with organisational policy and procedures</p> <p>2.6 Personal conduct is maintained in accordance with legal and organisational requirements and takes account of cultural and ethical issues</p>
3. Review and correlate information	<p>3.1 Information is reviewed and clarified to ensure its relevance and sufficiency prior to concluding the interview</p> <p>3.2 Information is transcribed if necessary and sensitive information is <i>dealt with</i> in accordance with organisational policy and procedures</p> <p>3.3 Detailed analysis is conducted, and incomplete and irregular information is identified and noted or followed up in accordance with the nature of the interview and organisational requirements</p> <p>3.4 Behavioural characteristics of significance to the purpose of the interview are confirmed</p> <p>3.5 <i>Post-interview activities</i> are undertaken as required in accordance with organisational policy and procedures</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the essential skills and knowledge and their level, required for this unit.

Skill requirements

Look for evidence that confirms skills in:

- using interviewing techniques to suit a range of situations and interviewees
- engaging in exchanges of sometimes complex oral information
- varying style and language structure to suit a range of interviewees
- using techniques to deal with difficult interview situations
- using a range of communication techniques that include establishing rapport, listening, probing, reflecting, negotiation, conflict resolution
- responding to diversity, including gender and disability
- using critical analysis, evaluation and deductive reasoning
- using problem solving and decision making related to interviewing
- using judgment, to test the veracity of information and vary questions and interviewing techniques to suit
- preparing interview documentation requiring accuracy of expression and formality in structure and format
- operating technical and electronic equipment, where necessary
- applying public sector standards and legislation such as occupational health and safety and environment in the context of interviewing

Knowledge requirements

Look for evidence that confirms knowledge and understanding of:

- application of legislation to interviewing including privacy, ethics, confidentiality and freedom of information
- organisational policies and guidelines relating to interviews
- questioning techniques
- legal and ethical considerations for conducting interviews
- cultural awareness in the context of interviewing
- procedures for using interpreters
- legal and organisational requirements for documentation
- legal requirements relating to recording of information
- equal employment opportunity, equity and diversity principles
- public sector legislation such as occupational health and safety and environment, relating to interviews

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the Unit descriptor, Performance Criteria, the Range Statement and the Assessment Guidelines for the Public Sector Training Package.

Units to be assessed together

- *Pre-requisite* units that must be achieved prior to this unit: *Nil*
- *Co-requisite* units that must be assessed with this unit: *Nil*
- *Co-assessed units* that may be assessed with this unit to increase the efficiency and realism of the assessment process include, but are not limited to:

PSPETHC401A Uphold and support the values and principles of public service

PSPGOV406B Gather and analyse information

PSPGOV408A Value diversity

PSPGOV422A Apply government processes

PSPLEGN401A Encourage compliance with legislation in the public sector

PSPREG401C Exercise regulatory powers

PSPREG403B Assess compliance

PSPREG415A Receive and validate information

Overview of evidence requirements

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms:

- the knowledge requirements of this unit
- the skill requirements of this unit
- application of the Employability Skills as they relate to this unit (see Employability Summaries in Qualifications Framework)
- information gathered via interviews in a range of (3 or more) contexts (or occasions, over time)

Resources required to carry out assessment

These resources include:

- legislation, policy, procedures and protocols relating to gathering information through interviews
- case studies and workplace scenarios to capture the range of situations likely to be encountered when gathering information through interviews

Where and how to assess evidence

Valid assessment of this unit requires:

- a workplace environment or one that closely resembles normal work practice and replicates the range of conditions likely to be

EVIDENCE GUIDE

encountered when gathering information through interviews, including coping with difficulties, irregularities and breakdowns in routine

- information gathered via interviews in a range of (3 or more) contexts (or occasions, over time)

Assessment methods should reflect workplace demands, such as literacy, and the needs of particular groups, such as:

- people with disabilities
- people from culturally and linguistically diverse backgrounds
- Aboriginal and Torres Strait Islander people
- women
- young people
- older people
- people in rural and remote locations

Assessment methods suitable for valid and reliable assessment of this competency may include, but are not limited to, a combination of 2 or more of:

- case studies
- demonstration
- observation
- portfolios
- questioning
- scenarios
- simulation or role plays
- authenticated evidence from the workplace and/or training courses

For consistency of assessment

Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments

Range Statement

RANGE STATEMENT

The Range Statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The Range Statement also provides a focus for assessment. It relates to the unit as a whole. Text in *italics* in the Performance Criteria is explained here.

Contexts may include

- informal interviews
- interviews against set criteria
- interviews to assess applications
- initial investigation of complaints
- audits
- intelligence gathering
- threat assessment
- security vetting
- overt interviews
- covert interviews, under specific legislative powers

Requirements may include

- interview location/environment:
- office
- designated interview room
- in the field (including overseas)
- private home
- at a client/contractor location
- in other agencies
- timing
- personnel present:
- senior staff
- colleagues
- interpreter
- support persons
- method of recording:
- tape recording
- videotaping
- hand written
- typewritten/word processed
- file notes
- equipment:
- electronic equipment
- recording equipment
- computer equipment

RANGE STATEMENT

Organisational and legislative requirements may include

- availability of interviewee
- organisational policy, procedures and guidelines
- international treaties and protocols
- cross-jurisdictional protocols
- organisation's strategic objectives
- national strategic objectives
- security constraints
- public sector codes of conduct/ethics
- confidentiality requirements
- Commonwealth, State/Territory or Local Government legislation such as:
- Freedom of Information Act 1982
- Privacy Act 1988
- Archives Act
- Crimes Act 1914 and Criminal Code 1995
- Evidence Act
- the organisation's enabling legislation

Interview planning may include

- purpose
- structure
- context
- expectations
- intended/desired outcomes
- criteria for assessment
- risk management considerations
- key questions in sequential order, highlighting main points
- assessing sources of information
- interview strategies appropriate to the situation and purpose of the interview, such as:
- direct questioning
- empathetic questioning
- investigative interviewing
- exclusion of leading questions
- avoidance of cross-examination
- safety requirements for interviewer, interviewee and others present

Materials may include

- paper-based and electronic documents, including:
- maps
- photographs
- videotapes
- physical objects and materials

RANGE STATEMENT

- Commencement protocols may include*
 - audiotapes
 - introductions
 - producing identification/authority
 - explaining the purpose, process and recording requirements
 - confirming confidentiality of information, if appropriate to the interview purpose
- Questioning techniques may include*
 - summarising
 - re-phrasing
 - paraphrasing
 - open and closed questions
 - cognitive interviewing
 - using silence
 - active listening
 - using and recognising body language
 - identifying and overcoming barriers to communication
 - investigative interviewing techniques
- Recording may include*
 - hand written record of interview
 - typewritten record of interview
 - audiotapes
 - videotapes
- Dealing with sensitive information may include*
 - information security procedures
- Post-interview activities may include*
 - interview report
 - interview assessment report
 - informal judgment
 - recommendations with supporting reasons/evidence
 - suggesting solutions to problems encountered during the interview
 - informing stakeholders of outcome of interview
 - providing briefings on outcomes

Employability Skills Information

Employability skills This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements are the essential outcomes of the unit of competency. Together, performance criteria specify the requirements for competent performance. Text in *bold italics* is explained in the Range Statement following.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Plan and activate evidence collection	<p>1.1 <i>Evidence</i> requirements are researched to establish the type and standard of evidence and <i>resources</i> required when the size of investigation and/or type of offence/s require this</p> <p>1.2 Approval to commence investigation is obtained in accordance with organisational policy and procedures</p> <p>1.3 Plan of action is agreed in accordance with organisational policy and procedures, and communication and review processes are established</p> <p>1.4 Evidence recording process is put in place in accordance with organisational guidelines and legislative requirements</p>
2. Identify persons of interest	<p>2.1 Possible witnesses are identified, located and contacted to request that they provide information</p> <p>2.2 Particulars of witness/es are documented according to correct evidentiary procedures</p> <p>2.3 <i>Responsible parties</i> are identified, located and their <i>particulars</i> are recorded in accordance with correct evidentiary procedures</p> <p>2.4 Responsible parties are contacted for interview in accordance with organisational procedures and legislative requirements, and informed of the nature of the investigation, if required by law</p>
3. Collect and store evidence	<p>3.1 <i>Authority to search</i> is obtained/verified, involving other organisations where necessary</p> <p>3.2 Evidence is identified, <i>collected, labelled</i>, recorded and preserved according to exhibit management principles for later use in proceedings</p> <p>3.3 Evidence is <i>managed</i> in accordance with the principles of continuity of possession, <i>legislation and standards</i></p> <p>3.4 Corroboratory evidence is collected, documented and preserved</p> <p>3.5 <i>Expert</i> skills and knowledge are accessed when necessary to further assist staff in areas where they cannot or are not authorised to act</p> <p>3.6 Constant review is implemented during evidence collection to enable gaps and inadequacies to be addressed in accordance with organisational policy and procedures</p>
4. Summarise and report on evidence	<p>4.1 Verbal and written summaries/<i>reports</i> are made in accordance with legislative and organisational requirements</p> <p>4.2 Outcomes of investigation are entered into data management systems according to organisational guidelines</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the essential skills and knowledge and their level, required for this unit.

Skill requirements

Look for evidence that confirms skills in:

organising and problem solving

liaising and negotiating

communicating with people from diverse backgrounds

responding to diversity, including gender and disability

making comparisons and exercising judgment about facts in written materials

report writing using formal structures and language

applying public sector standards and legislation such as occupational health and safety and environment in the context of gathering and managing evidence

Knowledge requirements

Look for evidence that confirms knowledge and understanding of:

rules of evidence relevant to the jurisdiction

evidence legislation relevant to the jurisdiction

legislation which contains the offence/s under investigation

document management systems

exhibit management principles

organisational policies, guidelines and regulations

equal employment opportunity, equity and diversity principles

public sector legislation such as occupational health and safety and environment relating to gathering and management of evidence

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the Unit descriptor, Performance Criteria, the Range Statement and the Assessment Guidelines for the Public Sector Training Package.

Units to be assessed together

- *Pre-requisite* units that must be achieved prior to this unit: *Nil*
- *Co-requisite* units that must be assessed with this unit: *Nil*
- *Co-assessed units* that may be assessed with this unit to increase the efficiency and realism of the assessment process include, but are not limited to:

PSPETHC401A Uphold and support the values and principles of public service

PSPLEGN401A Encourage compliance with legislation in the public sector

PSPGOV422A Apply government processes

PSPREG401C Exercise regulatory powers

PSPREG407B Produce formal record of interview

PSPREG411A Gather information through interviews

Overview of evidence requirements

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms:

- the knowledge requirements of this unit
- the skill requirements of this unit
- application of the Employability Skills as they relate to this unit (see Employability Summaries in Qualifications Framework)
- gathering and management of evidence in a range of (3 or more) contexts (or occasions, over time)

Resources required to carry out assessment

These resources include:

- legislation, policy, procedures and protocols relating to gathering and managing evidence
- case studies and workplace scenarios to capture the range of likely offences for which evidence needs to be gathered and managed

Where and how to assess evidence

Valid assessment of this unit requires:

- a workplace environment or one that closely resembles normal work practice and replicates the range of conditions likely to be encountered when gathering and managing evidence, including coping with difficulties, irregularities and breakdowns in routine

EVIDENCE GUIDE

- gathering and management of evidence in a range of (3 or more) contexts (or occasions, over time)

Assessment methods should reflect workplace demands, such as literacy, and the needs of particular groups, such as:

- people with disabilities
- people from culturally and linguistically diverse backgrounds
- Aboriginal and Torres Strait Islander people
- women
- young people
- older people
- people in rural and remote locations

Assessment methods suitable for valid and reliable assessment of this competency may include, but are not limited to, a combination of 2 or more of:

- case studies
- demonstration
- observation
- questioning
- scenarios
- authenticated evidence from the workplace and/or training courses

For consistency of assessment

Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments

Range Statement

RANGE STATEMENT

The Range Statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The Range Statement also provides a focus for assessment. It relates to the unit as a whole. Text in *italics* in the Performance Criteria is explained here.

- | | |
|---|---|
| <i>Evidence may include</i> | <ul style="list-style-type: none"> • real, oral, computer data or documentary • photographic or video • new evidence which results in reopening an investigation • requirements identified in an evidence guide or evidence matrix |
| <i>Establishing resource requirements may require</i> | <ul style="list-style-type: none"> • an estimate of the costs of gathering evidence |
| <i>Responsible parties may include</i> | <ul style="list-style-type: none"> • suspects • alleged offenders • obligation holders • employers • principal contractors • owners • operators |

Unit Descriptor

Unit descriptor

This unit covers the requirements to undertake both routine and non-routine inspections and monitoring of a more complex or detailed nature, with discretion to determine appropriate action in accordance with relevant Acts and regulations.

Typically work will be under general direction, with full responsibility for delegated duties within a generally defined area. It includes planning and organising inspection and monitoring activities, undertaking inspections, acting on non-compliance and providing reports, information and training.

In practice, undertaking complex inspections and monitoring may overlap with other generalist or specialist work activities such as exercising regulatory powers, using resources, gathering and analysing information, upholding and supporting public service values, working safely, applying government processes, etc.

This unit is one of five units in the *Regulatory Competency* field that deal with inspection and monitoring. Related units are:

PSPREG201A Carry out inspections and monitoring under guidance
PSPREG301A Undertake routine inspections and monitoring
PSPREG503A Supervise and carry out complex inspections and monitoring
PSPREG603A Manage and lead inspection and monitoring programs

This is a new unit of competency, added to the *Regulatory Competency* field of the Training Package in 2004.

Application of the Unit

Elements and Performance Criteria Pre-Content

Elements are the essential outcomes of the unit of competency. Together, performance criteria specify the requirements for competent performance. Text in *bold italics* is explained in the Range Statement following.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Plan and organise inspection and monitoring activities	1.1 Outputs are confirmed and inspection and monitoring <i>activities</i> and responsibilities are determined in accordance with organisational requirements 1.2 <i>Procedures</i> , timeframes, <i>resources and equipment</i> requirements are determined for self and others in accordance with organisational and task requirements 1.3 Resources/equipment are obtained and prepared in accordance with organisational and task requirements 1.4 Legislative requirements, risk management practices and occupational health and safety requirements are determined 1.5 Communication strategies and development opportunities are identified and adjusted to suit a range of clients in making them aware of their obligations under relevant <i>legislation</i> , in accordance with organisational policy and procedures 1.6 Procedural and information guides are reviewed and updated as required
2. Undertake inspections and monitoring	2.1 <i>Inspections and monitoring activities</i> are carried out under <i>general direction</i> in accordance with organisational and legislative requirements including occupational health and safety 2.2 <i>Risk management strategies</i> are developed and implemented as required in accordance with set procedures and timelines 2.3 Resources/equipment are used and maintained in accordance with organisational and task requirements 2.4 When required, operational and technical advice is provided to subordinate officers in accordance with organisational policy and procedures
3. Act on non-compliance	3.1 Information/education is provided to achieve client compliance in accordance with organisational guidelines and legislative requirements relating to the seriousness of the possible breach 3.2 Further <i>action</i> as a result of failure to achieve compliance is taken in accordance with organisational guidelines and legislative requirements relating to the seriousness of the possible breach 3.3 Compliance requirements of legislation/regulations are identified, and contraventions and recommended action are reported in accordance with organisational policy and procedures 3.4 Serious or complex situations are referred for advice or resolution in accordance with organisational policy and procedures

ELEMENT

PERFORMANCE CRITERIA

4. Provide reports, information and training

- 3.5 The elements of each offence to be prosecuted under relevant legislation are identified, and information/evidence is *collected* and provided in accordance with legislation, procedures and rules of evidence
- 3.6 When required, court attendance and conduct requirements are fulfilled in compliance with organisational guidelines
- 4.1 *Records* are maintained and reports are prepared and provided in accordance with organisational requirements
- 4.2 Requirements of relevant legislation are interpreted and information and advice are provided on technical and operational matters
- 4.3 On-the-job inspection/monitoring training is provided in accordance with organisational requirements

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the essential skills and knowledge and their level, required for this unit.

Skill requirements

Look for evidence that confirms skills in:

- undertaking observation and analysis
- communicating with a diverse range of clients and staff
- responding to diversity, including gender and disability
- writing reports using standard formats
- using computers for word processing and manipulation of statistical data
- operating workplace equipment
- applying public sector legislation such as occupational health and safety and environment in the context of inspection and monitoring

Knowledge requirements

Look for evidence that confirms knowledge and understanding of:

- public sector legislation including occupational health and safety, environment, privacy etc
- organisational policy and procedures
- inspection procedures
- monitoring procedures
- enabling legislation
- elements of an offence
- responses to non-compliance
- equity and diversity principles
- workplace and industry environment

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the Unit descriptor, Performance Criteria, the Range Statement and the Assessment Guidelines for the Public Sector Training Package.

Units to be assessed together

- *Pre-requisite* units that must be achieved prior to this unit: *Nil*
- *Co-requisite* units that must be assessed with this unit: *Nil*

Co-assessed units that may be assessed with this unit to increase the efficiency and realism of the assessment process include, but are not limited to:

PSPETHC401A Uphold and support the values and principles of public service

PSPGOV403B Use resources to achieve work unit goals

PSPGOV406B Gather and analyse information

PSPGOV422A Apply government processes

PSPLEGN401A Encourage compliance with legislation in the public sector

PSPOHS401B Implement workplace safety procedures and programs

PSPREG401C Exercise regulatory powers

PSPREG402C Promote client compliance

PSPREG403B Assess compliance

PSPREG405B Act on non-compliance

Overview of evidence requirements

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms:

the knowledge requirements of this unit

the skill requirements of this unit

application of the Employability Skills as they relate to this unit (see Employability Summaries in Qualifications Framework)

performance under general direction with responsibility within a generally defined area for inspections and monitoring undertaken in a range of (3 or more) contexts (or occasions, over time)

Resources required to carry out assessment

These resources include:

legislation, policy, procedures and protocols relating to inspection and monitoring

EVIDENCE GUIDE

case studies and workplace scenarios to capture the range of inspection and monitoring situations likely to be encountered

Where and how to assess evidence

Valid assessment of this unit requires:

- a workplace environment or one that closely resembles normal work practice and replicates the range of conditions likely to be encountered when undertaking inspections and monitoring, including coping with difficulties, irregularities and breakdowns in routine
- performance under general direction with responsibility within a generally defined area for inspections and monitoring undertaken in a range of (3 or more) contexts (or occasions, over time)

Assessment methods should reflect workplace demands, such as literacy, and the needs of particular groups, such as:

people with disabilities

people from culturally and linguistically diverse backgrounds

Aboriginal and Torres Strait Islander people

women

young people

older people

people in rural and remote locations

Assessment methods suitable for valid and reliable assessment of this competency may include, but are not limited to, a combination of 2 or more of:

case studies

demonstration

observation

questioning

scenarios

simulation or role plays

authenticated evidence from the workplace and/or training courses

For consistency of assessment

Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments

Range Statement

RANGE STATEMENT

The Range Statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The Range Statement also provides a focus for assessment. It relates to the unit as a whole. Text in *italics* in the Performance Criteria is explained here.

<i>Activities may include</i>	<ul style="list-style-type: none"> inspections/examinations monitoring surveillance focused and benchmark audit activities remote monitoring other compliance assurance activities
<i>Procedures may include</i>	<ul style="list-style-type: none"> observation handling procedures sampling procedures rejection procedures storage procedures disinfection procedures treatment procedures organisational guidelines and code of conduct incident reporting procedures safety procedures emergency procedures evacuation procedures
<i>Resources and equipment may include</i>	<ul style="list-style-type: none"> inspection equipment personal protective equipment - respirators, gloves, overalls, boots, hearing protection, goggles, masks etc test kit equipment recording equipment storage equipment/facilities entry authority/warrant Global Positioning System (GPS) equipment

RANGE STATEMENT

communication equipment
computers
satellite imagery
aerial photographs
spatial data and information
vehicles - 2 or 4 wheel drive

Legislation may include

Commonwealth legislation and regulations, for example:
Commonwealth Quarantine Act 1908, proclamations and regulations
Crimes Act 1914 and Criminal Code Act 1995
Customs Act 1901 and regulations
Wildlife Protection Act 1982
Export Control Act 1982
Imported Foods Act 1996
Occupational Health and Safety Act 1988
State, Territory and Local Government legislation and regulations, such as those relating to:
agriculture
horticulture
conservation and land management
fisheries
environmental protection
building
water
emergencies
international legislation/codes of behaviour

Inspections and monitoring activities may relate to

aircraft
airfreight
animal products
animals
cargo
cereals

RANGE STATEMENT

collection of biological specimens
disposal of organic waste
fresh produce
goods
land condition, such as:
topography
salinity
erosion
weed infestation
vermin infestation
fire hazard
over grazing
land improvements, such as:
fences
buildings
sporting or playground equipment
irrigation infrastructure
sewerage infrastructure
waterfront occupations
community structures
land usage
leases and other tenures, to ensure compliance with conditions
licence/permit compliance (eg vegetation clearing)
live fish
livestock
mail
mineral samples
passenger baggage
people
pests
plant products
plants

RANGE STATEMENT

	premises
	properties
	reserves and their use/s
	survey activities to maintain readiness for district emergency plans
	vector monitoring
	vessels
<i>General direction may include</i>	supervisors
	senior policy officers
	senior inspectors
	line managers
	project managers
	program managers
	inspection specialists
<i>Risk management strategies may include</i>	monitoring
	treatment
	containment
	control
	eradication
	destruction
	biosecurity strategies
<i>Non-compliance may include</i>	both routine and non-routine matters of a more complex or detailed nature with discretion to determine appropriate action
	referral to senior staff of decisions that are more difficult, or of potential interest to external parties such as the media, public, political parties etc
<i>Action may include</i>	advice
	warning
	formal notification of intent
	infringement notices
	on-the-spot fines
	court prosecution
<i>Collection of evidence</i>	observation

RANGE STATEMENT

may include

interviewing
seizure
sampling
specimen collection
recording
maintenance of case files
determination of land ownership

Records may include

notes
case files
statistics
forms (application forms, disease notification forms, etc)
notices (seizure notice, infringement notice, etc)
invoices
receipts
commercial documentation such as bills of lading, airway bills

Competency field Regulatory

PSPREG414A Conduct surveillance

Modification History

Not applicable.

Unit Descriptor

Unit descriptor

This unit covers the gathering of information through surveillance operations. It includes planning surveillance, carrying out surveillance and completing the surveillance operation.

In practice, conducting surveillance may overlap with other generalist or specialist public sector work activities such as acting ethically, complying with public sector legislation, applying government processes, using resources, gathering and analysing information, etc.

This is a new unit of competency, added to the *Regulatory* Competency field of the Training Package in 2004.

This unit draws on aspects of the Property Services unit, *PRISIS304A Conduct surveillance*. The units are not equivalent.

Application of the Unit

Not applicable.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

Employability skills This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements are the essential outcomes of the unit of competency. Together, performance criteria specify the requirements for competent performance. Text in *bold italics* is explained in the Range Statement following.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Plan surveillance	<p>1.1 The <i>purpose</i> and <i>outcomes</i> of the surveillance are established in consultation with <i>stakeholders</i>, and authority to conduct surveillance is obtained in accordance with organisational policy and procedures</p> <p>1.2 Location and timeframe are determined in accordance with the purpose and outcomes</p> <p>1.3 <i>Resource requirements</i> are determined and arranged in accordance with surveillance plan and budgetary constraints</p> <p>1.4 Requirements for <i>technical specialists</i> are determined and arranged in accordance with organisational procedures</p> <p>1.5 Operation is planned in accordance with organisational guidelines to meet <i>legislative and other requirements</i> and <i>public sector standards</i></p> <p>1.6 Surveillance plan is prepared detailing key activities, roles, responsibilities, risk management and contingency planning, and takes into account covert nature of the operation and security requirements for those involved</p>
2. Carry out surveillance	<p>2.1 Identities of surveillance subject/s are confirmed and the surveillance operation is conducted in accordance with the surveillance plan</p> <p>2.2 Factors affecting achievement of surveillance outcomes are identified promptly and variations to the surveillance plan are authorised to cater for the unexpected</p> <p>2.3 Alternative plans are implemented in cases where operational integrity is threatened or compromised and a report is provided on the reasons and justification for the decision</p> <p>2.4 Surveillance operation is conducted in accordance with legislation, policy and procedures</p> <p>2.5 Personal conduct and manner is maintained in accordance with code of conduct and organisational requirements</p>
3. Complete surveillance operation	<p>3.1 <i>Surveillance information</i> is obtained and documented in accordance with organisational/client requirements and the surveillance plan</p> <p>3.2 Information and other materials are secured and maintained in accordance with legislative and organisational requirements</p> <p>3.3 Equipment, film and audio are stored in accordance with technical requirements and security procedures</p> <p>3.4 Outcomes are presented in the required medium, format, style and structure suitable for review and interpretation to meet organisational requirements</p> <p>3.5 Operational inadequacies in the surveillance process are</p>

ELEMENT

PERFORMANCE CRITERIA

documented and reported to inform future practice in accordance with organisational requirements

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the essential skills and knowledge and their level, required for this unit.

Skill requirements

Look for evidence that confirms skills in:

planning surveillance

undertaking contingency planning

undertaking risk assessment in the context of surveillance

operating technical equipment

using information technology to record information and prepare reports

completing reports using formality of language and structure

exchanging often complex oral information in a form to suit diverse audiences

responding to diversity, including gender and disability

applying public sector legislation such as occupational health and safety and environmental procedures in the context of surveillance

Knowledge requirements

Look for evidence that confirms knowledge and understanding of:

legislation, policies and procedures relating to surveillance

organisational guidelines

international treaties and protocols

cross-jurisdictional protocols

link between surveillance operation, organisational strategic objectives and national strategic objectives

security constraints

public sector legislation and standards

equal employment opportunity, equity and diversity principles

occupational health and safety and environmental considerations to ensure the safety of self and others

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the Unit descriptor, Performance Criteria, the Range Statement and the Assessment Guidelines for the Public Sector Training Package.

Units to be assessed together

- *Pre-requisite* units that must be achieved prior to this unit: *Nil*
- *Co-requisite* units that must be assessed with this unit: *Nil*
- *Co-assessed units* that may be assessed with this unit to increase the efficiency and realism of the assessment process include, but are not limited to:

PSPETHC401A Uphold and support the values and principles of public service

PSPGOV422A Apply government processes

PSPLEGN401A Encourage compliance with legislation in the public sector

PSPGOV403B Use resources to achieve work unit goals

PSPGOV406B Gather and analyse information

PSPREG413A Undertake inspections and monitoring

Overview of evidence requirements

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms:

- the knowledge requirements of this unit
- the skill requirements of this unit
- application of the Employability Skills as they relate to this unit (see Employability Summaries in Qualifications Framework)
- conducting surveillance in a range of (3 or more) contexts (or occasions, over time)

Resources required to carry out assessment

These resources include:

- legislation, policy, procedures and protocols relating to surveillance
- case studies and workplace scenarios to capture the range of situations likely to be encountered when conducting surveillance

Where and how to assess evidence

Valid assessment of this unit requires:

- a workplace environment or one that closely resembles normal work practice and replicates the range of conditions likely to be encountered when conducting surveillance, including coping with difficulties, irregularities and breakdowns in routine
- conducting surveillance in a range of (3 or more) contexts (or

Elements and Performance Criteria Pre-Content

Elements are the essential outcomes of the unit of competency. Together, performance criteria specify the requirements for competent performance. Text in *bold italics* is explained in the Range Statement following.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Receive information	<p>1.1 Required <i>information</i> is identified, requested and/or received in accordance with legislative powers, organisational policy and procedures</p> <p>1.2 Incoming information is checked for gaps, anomalies, deficiencies or discrepancies, and compared with pre-existing information, where relevant</p> <p>1.3 Additional <i>data sources</i> are accessed and information is obtained to fill gaps and compare with information received</p> <p>1.4 Incoming information is receipted if required in accordance with organisational policy and procedures</p>
2. Record information	<p>2.1 Accurate recording of information is carried out in line with organisational procedures, confirming relevant details of source</p> <p>2.2 Records are maintained as accurate, complete and up-to-date and are presented in the required format</p> <p>2.3 Legislative requirements for recording and storage of information are complied with</p> <p>2.4 Procedures for storage and management of confidential and sensitive information are adhered to</p>
3. Verify authenticity of information	<p>3.1 Initial selection of information is completed using preliminary cull to eliminate unreliable data</p> <p>3.2 Information is corroborated and assessed for its integrity, validity and reliability</p> <p>3.3 Validation or corroboration is carried out with existing information as well as information from outside organisations and other sources where relevant</p> <p>3.4 Useful and useable information is extracted, interpreted and organised in a form that is accessible to users</p> <p>3.5 Analysis is conducted in accordance with agreed indicators and assessment is accurate, relevant and complete</p>
4. Recommend/take action as a result of information received	<p>4.1 Outcomes are recorded and reported in accordance with organisational policy and procedures</p> <p>4.2 Actions are recommended or taken as a result of the outcomes</p> <p>4.3 Decision is documented showing reasons for proceeding/not proceeding or taking other action, after discussion with management, where required</p> <p>4.4 Areas or other organisations that may be affected by information received or outcomes, are identified and informed, in accordance with organisational procedures and legislative requirements, to optimise usefulness of information</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the essential skills and knowledge and their level, required for this unit.

Skill requirements

Look for evidence that confirms skills in:

undertaking research and critical analysis

using deductive reasoning and evaluation techniques related to information analysis and corroboration

communicating with a range of diverse clients and staff

responding to diversity, including gender and disability

using problem solving and decision making

using information technology for managing records and files

applying occupational health and safety and environmental procedures in the context of receiving and validating data

Knowledge requirements

Look for evidence that confirms knowledge and understanding of:

public sector legislation, standards and codes of practice

organisational policy, procedures and guidelines

international treaties and protocols where these apply

legislation for freedom of information, privacy, security, occupational health and safety, Crimes Act 1914 and Criminal Code Act 1995

legislation and procedures relating to public interest disclosures, protected disclosures or whistleblowing

indicators for analysis of data

profiles and trends related to activities within the organisation

management of secure information

equity and diversity principles

occupational health and safety and environmental considerations relating to receiving and validating data

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the Unit descriptor, Performance Criteria, the Range Statement and the Assessment Guidelines for the Public Sector Training Package.

Units to be assessed together

- *Pre-requisite* units that must be achieved prior to this unit: *Nil*
- *Co-requisite* units that must be assessed with this unit: *Nil*
- *Co-assessed units* that may be assessed with this unit to increase the efficiency and realism of the assessment process include, but are not limited to:

PSPETHC401A Uphold and support the values and principles of public service

PSPGOV408A Value diversity

PSPGOV422A Apply government processes

PSPLEGN401A Encourage compliance with legislation in the public sector

PSPREG401C Exercise regulatory powers

PSPREG405B Act on non-compliance

PSPFRAU401B Monitor data for indicators of fraud

Overview of evidence requirements

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms:

- the knowledge requirements of this unit
- the skill requirements of this unit
- application of the Employability Skills as they relate to this unit (see Employability Summaries in Qualifications Framework)
- receipt and validation of data in a range of (3 or more) contexts (or occasions, over time)

Resources required to carry out assessment

These resources include:

- legislation, regulations, policy, guidelines and standards relating to receipt and validation of data
- public sector values and codes of conduct
- case studies and workplace scenarios to capture the range of situations likely to be encountered when receiving and validating data

Where and how to assess evidence

Valid assessment of this unit requires:

- a workplace environment or one that closely resembles normal work practice and replicates the range of conditions likely to be

EVIDENCE GUIDE

encountered when receiving and validating data, including coping with difficulties, irregularities and breakdowns in routine

- receipt and validation of data in a range of (3 or more) contexts (or occasions, over time)

Assessment methods should reflect workplace demands, such as literacy, and the needs of particular groups, such as:

- people with disabilities
- people from culturally and linguistically diverse backgrounds
- Aboriginal and Torres Strait Islander people
- women
- young people
- older people
- people in rural and remote locations

Assessment methods suitable for valid and reliable assessment of this competency may include, but are not limited to, a combination of 2 or more of:

- case studies
- portfolios
- projects
- questioning
- scenarios
- simulation or role plays
- authenticated evidence from the workplace and/or training courses

For consistency of assessment

Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments

Range Statement

RANGE STATEMENT

The Range Statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The Range Statement also provides a focus for assessment. It relates to the unit as a whole. Text in *italics* in the Performance Criteria is explained here.

Information may be

- written
- oral
- photographic
- electronic
- classified
- not in the public domain
- financial
- personal:
- academic qualifications/academic transcripts
- birth certificate
- citizenship
- decree nisi/decrece absolute
- deed poll
- discharge certificate
- employment histories
- marriage certificate
- passport
- travel documents
- about clients or staff
- checked for age, compatibility and validity

Data sources may include

- applications
- correspondence
- declarations
- diary entries
- electronic records
- email
- fax records
- files
- graphics
- incident reports
- Internet/intranet
- notes

- personal records
- pager records

Elements and Performance Criteria Pre-Content

Elements are the essential outcomes of the unit of competency. Together, performance criteria specify the requirements for competent performance. Text in *bold italics* is explained in the Range Statement following.

Elements and Performance Criteria

ELEMENT

PERFORMANCE CRITERIA

1. Analyse data

- 1.1 *Analysis* is undertaken dependent upon the nature of the data and intended purpose of the analysis
- 1.2 *Methods of analysis* are selected in accordance with any relevant industry standards, precedents and techniques
- 1.3 Trends are identified and inferences drawn in light of environmental and cultural factors relevant to the particular situation
- 1.4 The chain of reasoning in formulating inferences is made clear to ensure transparency to users of the data
- 1.5 A proactive approach is taken to identify and assess the need for new or changed systems and processes for analysing data to more effectively meet objectives

2. Document outcomes of analysis

- 2.1 Recommended actions are based upon analysis of *data* in the context of the purpose of the analysis and the objectives and priorities of the organisation's strategies and plans
- 2.2 Links between the outcomes proposed as a result of the data analysis and the organisation's strategies are made clear to the intended audience
- 2.3 Timely and relevant reports are completed and disseminated to appropriate staff and management
- 2.4 Results of data analysis are *incorporated* into ongoing review of organisational strategies and plans
- 2.5 Documentation is prepared that is clear, concise and accessible to all relevant staff

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the essential skills and knowledge and their level, required for this unit.

Skill requirements

Look for evidence that confirms skills in:

- undertaking analysis and problem solving
- reading and applying complex information from legislation
- communicating including questioning and negotiating meaning
- responding to diversity, including gender and disability
- undertaking planning and time management in the context of data analysis
- preparing written reports and recommendations requiring accuracy, and formal structures and language
- using information technology for data analysis, recording and reporting
- applying public sector legislation such as occupational health and safety and environmental procedures in the context of data analysis

Knowledge requirements

Look for evidence that confirms knowledge and understanding of:

- methods of analysis
- relevant legislation including privacy and freedom of information legislation, as well as public interest disclosures, protected disclosures or whistleblowing legislation
- agency structure, services and environment
- data collection and management systems
- the range of analytical techniques appropriate for information analysis
- inductive/deductive reasoning processes
- the influence of human factors on data analysis, for example:
 - prejudice and bias
 - personalities in analysis
- construction of sound inductive arguments
- fallacies in reasoning
- how data analysis outcomes can contribute to the review of national strategies/plans
- equity and diversity principles
- public sector legislation such as occupational health and safety and environment relating to investigations

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the Unit descriptor, Performance Criteria, the Range Statement and the Assessment Guidelines for the Public Sector Training Package.

Units to be assessed together

- *Pre-requisite* units that must be achieved prior to this unit: *Nil*
- *Co-requisite* units that must be assessed with this unit: *Nil*
- *Co-assessed units* that may be assessed with this unit to increase the efficiency and realism of the assessment process include, but are not limited to:

PSPETHC401A Uphold and support the values and principles of public service

PSPFRAU401B Monitor data for indicators of fraud

PSPGOV406B Gather and analyse information

PSPGOV408A Value diversity

PSPGOV422A Apply government processes

PSPLEGN401A Encourage compliance with legislation in the public sector

PSPREG401C Exercise regulatory powers

PSPREG412A Gather and manage evidence

Overview of evidence requirements

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms:

- the knowledge requirements of this unit
- the skill requirements of this unit
- application of the Employability Skills as they relate to this unit (see Employability Summaries in Qualifications Framework)
- analysis of data in a range of (3 or more) contexts (or occasions, over time)

Resources required to carry out assessment

These resources include:

- legislation, regulations, policy, guidelines and standards
- public sector values and codes of conduct
- case studies and workplace scenarios to capture the range of data analysis situations likely to be encountered

Where and how to assess evidence

Valid assessment of this unit requires:

- a workplace environment or one that closely resembles normal work practice and replicates the range of conditions likely to be encountered when analysing data, including coping with

EVIDENCE GUIDE

difficulties, irregularities and breakdowns in routine

- analysis of data in a range of (3 or more) contexts (or occasions, over time)

Assessment methods should reflect workplace demands, such as literacy, and the needs of particular groups, such as:

- people with disabilities

Employability Skills Information

Employability skills This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements are the essential outcomes of the unit of competency. Together, performance criteria specify the requirements for competent performance. Text in *bold italics* is explained in the Range Statement following.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Assist in audit planning	1.1 The <i>audit objectives</i> , scope and focus are identified 1.2 Relevant <i>operational and information systems</i> in the audit context are identified 1.3 Audit team roles and key <i>audit techniques</i> are identified 1.4 An <i>audit plan</i> is prepared that meets organisational requirements and the objectives of the audit 1.5 <i>Audit documentation</i> is prepared according to organisational policies and guidelines 1.6 Pre-audit communication is conducted with the client to be audited in accordance with organisational policy and procedures
2. Undertake preliminary activities	2.1 <i>Concepts</i> , systems and reports relevant to the audit are identified 2.2 <i>Analytical checks</i> are performed in accordance with organisational policy and procedures 2.3 <i>Initial assessment</i> is made, and considered to ensure it is appropriate and accurate 2.4 Appropriate and significant controls are identified and control tests are designed 2.5 Risk assessment activities are undertaken to determine <i>risks</i> and risk treatments necessary
3. Undertake audit activity as a member of a team	3.1 <i>Sampling techniques</i> are identified to suit audit requirements and are applied according to established procedures 3.2 <i>Controls</i> are tested and assessed in accordance with the audit plan 3.3 Substantive testing is conducted 3.4 <i>Technology</i> is selected and used in line with audit requirements 3.5 Audit documentation and working papers are prepared according to the established format
4. Deal with audit issues	4.1 Situations requiring specialist input are identified and referred for action 4.2 Situations requiring referral to other areas are identified and referred in a timely manner 4.3 Issues which arise during the audit are dealt with in a <i>professional manner</i> in accordance with organisational policy and procedures
5. Contribute to the reporting and presentation of audit findings	5.1 Audit reports are prepared in the approved format 5.2 Discussions with the client on audit findings are conducted in a professional manner 5.3 Internal reports are prepared in the required style and format

ELEMENT

PERFORMANCE CRITERIA

- 5.4 Final *recommendations on action* are made according to organisational policies and guidelines, and in a timely manner
- 5.5 Responses to audit recommendations are received and the audit is finalised in accordance with organisational policy and procedures
- 5.6 Audit findings are recorded in information management systems in accordance with organisational policy and procedures

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the essential skills and knowledge and their level, required for this unit.

Skill requirements

Look for evidence that confirms skills in:

- identifying problems and solutions
- using decision making using sound judgment
- undertaking research and analysis
- evaluating conflicting requirements
- using negotiation and conflict resolution techniques
- engaging in teamwork
- using a range of techniques communication including interviewing, listening, briefing, de-briefing, presentation (including co-presentations) and intra-team communication
- adjusting communication to suit different audiences
- responding to diversity, including gender and disability
- writing ongoing and final reports, and official correspondence
- using scanning techniques
- reading complex and formal documents such as legislation and accounting and other company documents
- using information technology for preparing written advice and reports requiring precision of expression
- applying occupational health and safety and environmental legislation and procedures in the context of undertaking compliance audits

Knowledge requirements

Look for evidence that confirms knowledge and understanding of:

- knowledge of principal and allied legislation, policies and procedures including aspects of criminal law and administrative law relating to the outcomes of compliance audits
- principles of auditing as detailed in organisational policies
- duties and responsibilities of auditors
- testing procedures and methods of inquiry
- industry knowledge
- requirements for security of documents and information
- procedures for declaring conflicts of interest
- protocols for reporting fraud, corruption and maladministration
- fundamental ethical principles in the handling of documents and information, natural

REQUIRED SKILLS AND KNOWLEDGE

justice, procedural fairness, respect for persons and responsible care
other ethics standards such as professional standards
equal employment opportunity, equity and diversity principles
public sector values/ethics and code of conduct
public sector legislation including occupational health and safety and environment
relating to compliance audits

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the Unit descriptor, Performance Criteria, the Range Statement and the Assessment Guidelines for the Public Sector Training Package.

Units to be assessed together

- *Pre-requisite* units that must be achieved prior to this unit: *Nil*
- *Co-requisite* units that must be assessed with this unit: *Nil*
- *Co-assessed units* that may be assessed with this unit to increase the efficiency and realism of the assessment process include, but are not limited to:

PSPETHC401A Uphold and support the values and principles of public service

PSPGOV408A Value diversity

PSPGOV422A Apply government processes

PSPLEGN401A Encourage compliance with legislation in the public sector

PSPREG401C Exercise regulatory powers

PSPREG402C Promote client compliance

PSPREG405B Act on non-compliance

Overview of evidence requirements

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms:

- the knowledge requirements of this unit
- the skill requirements of this unit
- application of the Employability Skills as they relate to this unit (see Employability Summaries in Qualifications Framework)
- compliance audits undertaken in a range of (3 or more) contexts (or occasions, over time)

Resources required to carry out assessment

These resources include:

- legislation, policy, procedures and protocols relating to compliance audits
- public sector standards and codes of conduct/ethics
- case studies and workplace scenarios to capture the range of situations likely to be encountered when undertaking compliance audits

Where and how to assess evidence

Valid assessment of this unit requires:

- a workplace environment or one that closely resembles normal work practice and replicates the range of conditions likely to be

EVIDENCE GUIDE

encountered when undertaking compliance audits, including coping with difficulties, irregularities and breakdowns in routine

- compliance audits undertaken in a range of (3 or more) contexts (or occasions, over time)

Assessment methods should reflect workplace demands, such as literacy, and the needs of particular groups, such as:

- people with disabilities
- people from culturally and linguistically diverse backgrounds
- Aboriginal and Torres Strait Islander people
- women
- young people
- older people
- people in rural and remote locations

Assessment methods suitable for valid and reliable assessment of this competency may include, but are not limited to, a combination of 2 or more of:

- case studies
- demonstration
- observation
- portfolios
- questioning
- scenarios
- authenticated evidence from the workplace and/or training courses

For consistency of assessment

Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments

Range Statement

RANGE STATEMENT

The Range Statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The Range Statement also provides a focus for assessment. It relates to the unit as a whole. Text in *italics* in the Performance Criteria is explained here.

- | | |
|--|---|
| <i>Audit objectives should include</i> | <ul style="list-style-type: none"> • assessing the level of the client's compliance with legislative requirements • assessing the adequacy/effectiveness of the client's internal controls • structure • helping to improve the auditee's future compliance |
| <i>Operational and information systems may include</i> | <ul style="list-style-type: none"> • file records • audit history records • registry files • sources, records of auditee information • intelligence systems |
| <i>Audit techniques may include</i> | <ul style="list-style-type: none"> • comprehensive • focused • transaction audits • those based on national standards setting body guidelines |
| <i>Audit planning includes</i> | <ul style="list-style-type: none"> • research • objectives • scope • focus • coverage of the audit |
| <i>Relevant audit documentation consists of</i> | <ul style="list-style-type: none"> • working papers • records • documenting the company's systems • control and potential error matrix and audit reporting |
| <i>Concepts may include</i> | <ul style="list-style-type: none"> • accounting concepts • concepts relating to subject of the audit, such as leasehold land condition, contract conditions, lease arrangements, product information, etc |
| <i>Analytical checks may include</i> | <ul style="list-style-type: none"> • trends in costs and payments • trends in quantity/values of products/services • ratio of input to output • contract conditions versus actual practice |

- Initial assessment may include*
- pre-audit research
 - document reviews
 - desk audit activities
- Risks may be*
- low
 - medium
 - high
- Sampling techniques may include*
- substantive testing based on:
 - audit methodology such as Service Providers Audit Methodology (SPAM)
 - sampling methodology such as Dollar Unit Discovery Sampling (DUDS)
 - inspections
- Controls may include*
- control and potential error matrix
 - preliminary control assessment
 - control evaluation using matrices
 - identifying reliance on computer controls
- Relevant technology may include*
- IT software packages such as:
 - TeamMate
 - Flowcharter
 - Feedbak
 - Word
 - Excel
- Professional manner includes*
- using appropriate communication skills
 - protocols and ethical client-centred behaviour that preserves the image of the organisation
- Recommended actions may be one or more of the following*
- sanctions
 - client advice and education
 - leverage
 - industry campaigns
 - referral to another area or organisation
 - take legal action on breach
 - prepare evidence relating to alleged breaches

Elements and Performance Criteria Pre-Content

Elements are the essential outcomes of the unit of competency. Together, performance criteria specify the requirements for competent performance. Text in *bold italics* is explained in the Range Statement following.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Summarise and report on progress of investigation	1.1 Ongoing monitoring of the investigation, changes in direction and resource implications are recorded and reported 1.2 <i>Progress</i> , problems and resource usage are reviewed in accordance with the investigation plan 1.3 Progress reports/ <i>briefings</i> are prepared and disseminated in accordance with organisational requirements 1.4 Records and systems are <i>secured</i> and updated regularly in accordance with organisational policy and procedures
2. Identify and analyse problems	2.1 Problems are recorded and suggestions made for resolving or referring them 2.2 <i>Modifications</i> to the process of investigation are suggested and solutions are implemented where practicable 2.3 Referral of the investigation to another agency is recommended where jurisdiction/resources make this the preferred option under organisational policy and procedures 2.4 If no further action is to be taken on an investigation, reasons and supporting documentation are recorded in accordance with organisational policy and procedures 2.5 If an investigation is terminated, recommendations for referral to another organisation are made if appropriate and are documented for the organisation's information in future similar cases
3. Recommend further action	3.1 Any <i>areas of potential risk</i> identified by/affecting the investigation are notified in accordance with organisational policy and procedures, together with suggestions for early intervention measures 3.2 Suggestions are made regarding further avenues of enquiry 3.3 <i>Follow-up tasks</i> are identified and actioned in accordance with organisational policy and procedures

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the essential skills and knowledge and their level, required for this unit.

Skill requirements

Look for evidence that confirms skills in:

- undertaking analysis and problem-solving
- engaging in exchanges of sometimes complex oral information
- varying style and language during briefings to suit a range of audiences
- responding to diversity, including gender and disability
- writing summaries, briefing papers and reports requiring clarity, accuracy and formality of structure and language
- applying public sector standards and legislation such as occupational health and safety and environment in the context of investigations

Knowledge requirements

Look for evidence that confirms knowledge and understanding of:

- legislation relating to the offences under investigation
- procedures for investigation
- administrative legislation relating to the organisation
- organisational guidelines for reporting and information management
- legal and organisational requirements for documentation
- ethical standards
- equal employment opportunity, equity and diversity principles
- public sector legislation such as occupational health and safety and environment relating to the conduct of investigations

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the Unit descriptor, Performance Criteria, the Range Statement and the Assessment Guidelines for the Public Sector Training Package.

Units to be assessed together

- *Pre-requisite* units that must be achieved prior to this unit: *Nil*

- *Co-assessed units* that may be assessed with this unit to increase the efficiency and realism of the assessment process include, but are not limited to:

PSPETHC401A Uphold and support the values and principles of public service

PSPLEGN401A Encourage compliance with legislation in the public sector

PSPGOV422A Apply government processes

PSPREG401C Exercise regulatory powers

PSPREG404C Investigate non-compliance

PSPREG412A Gather and manage evidence

PSPREG419A Finalise and report on investigations

Overview of evidence requirements

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms:

- the knowledge requirements of this unit
- the skill requirements of this unit
- application of the Employability Skills as they relate to this unit (see Employability Summaries in Qualifications Framework)
- advice on the progress of investigations in a range of (3 or more) contexts (or occasions, over time)

Resources required to carry out assessment

These resources include:

- legislation, policy, procedures and protocols relating to investigations
- case studies and workplace scenarios to capture the range of situations likely to be encountered when advising on the progress of an investigation

Where and how to assess evidence

Valid assessment of this unit requires:

- a workplace environment or one that closely resembles normal work practice and replicates the range of conditions likely to be encountered when advising on the progress of investigations,

EVIDENCE GUIDE

including coping with difficulties, irregularities and breakdowns in routine

- advice on the progress of investigations in a range of (3 or more) contexts (or occasions, over time)

Assessment methods should reflect workplace demands, such as literacy, and the needs of particular groups, such as:

- people with disabilities
- people from culturally and linguistically diverse backgrounds
- Aboriginal and Torres Strait Islander people
- women
- young people
- older people
- people in rural and remote locations

Assessment methods suitable for valid and reliable assessment of this competency may include, but are not limited to, a combination of 2 or more of:

- case studies
- demonstration
- observation
- portfolios
- projects
- questioning
- scenarios
- simulation or role plays
- authenticated evidence from the workplace and/or training courses

For consistency of assessment

Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments

Range Statement

RANGE STATEMENT

The Range Statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. Elements are the essential outcomes of the unit of competency. Together, performance criteria specify the requirements for competent performance. Text in *bold italics* is explained in the Range Statement following.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Assess potential for recovery action	<p>1.1 Information is collected and analysed to determine the potential for recovery action</p> <p>1.2 <i>Assets or proceeds of crime</i> are identified and values are estimated in accordance with organisational policy and procedures</p> <p>1.3 Financial circumstances are reviewed and debt recovery procedures are instigated in accordance with organisational policy and procedures</p> <p>1.4 <i>Liaison</i> is undertaken with respect to recovery action in accordance with legislation, policy and procedures</p> <p>1.5 Approval/decision to proceed with recovery action is obtained/made in accordance with organisational policy and procedures</p>
2. Implement recovery action	<p>2.1 <i>Recovery action</i> is implemented in accordance with legal and organisational requirements</p> <p>2.2 Where relevant, affidavits are sought restraining action</p> <p>2.3 Recovery action is <i>referred</i> for decision and execution in accordance with <i>legislation, organisational policy and procedures</i></p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the essential skills and knowledge and their level, required for this unit.

Skill requirements

Look for evidence that confirms skills in:

- undertaking research and analysis with regard to recovery actions
- engaging in negotiation requiring exchanges of sometimes complex oral information
- determining the value of assets or proceeds of crime and comparing to debt/s and charges raised
- responding to diversity, including gender and disability
- referring recovery action for decision requiring clarity, accuracy and formality of structure and language
- recording of actions/agreements made, in relevant recording systems
- applying public sector standards and legislation such as occupational health and safety and environment relating to recovery actions

Knowledge requirements

Look for evidence that confirms knowledge and understanding of:

- legislation relating recovery actions
- organisational guidelines and procedures for recovery
- legal and organisational requirements for liaison and referral
- ethical standards
- equal employment opportunity, equity and diversity principles
- public sector legislation such as occupational health and safety and environment relating to the recovery actions

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the Unit descriptor, Performance Criteria, the Range Statement and the Assessment Guidelines for the Public Sector Training Package.

PSPREG421A Take custody of and store weapons

Modification History

Not applicable.

Unit Descriptor

Unit descriptor

This unit covers the skills and knowledge to enable officers to correctly and safely take custody of and store firearms and other weapons to ensure compliance with legislation, policy and official directions. It includes handling, securing and maintaining weapons.

In practice, handling and storing weapons may overlap with other generalist or specialist public sector work activities such as acting ethically, exercising regulatory powers, acting on non-compliance, complying with legislation, applying government processes, etc.

This is a new unit of competency, added to the *Regulatory* Competency field of the Training Package in 2004.

Application of the Unit

Not applicable.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

Employability skills This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements are the essential outcomes of the unit of competency. Together, performance criteria specify the requirements for competent performance. Text in *bold italics* is explained in the Range Statement following.

Elements and Performance Criteria

ELEMENT

PERFORMANCE CRITERIA

1. Take custody of weapons

- 1.1 Safe handling, storage and security requirements for *firearms, ammunition and other weapons* are identified and applied
- 1.2 Procedures for making firearms and other weapons safe for processing, transportation or storage are identified and applied
- 1.3 *Personal safety* is maintained in relation to handling firearms and other weapons
- 1.4 *Standing procedures* relating to accidental discharge of firearms and incidents involving other weapons are identified and followed as required
- 1.5 Up-to-date knowledge of procedures for reporting and dealing with injury is maintained and applied
- 1.6 Situations requiring assistance are identified and support is promptly requested in accordance with organisational policy and procedures

2. Secure and maintain weapons

- 2.1 Weapons are secured in accordance with legislation, organisational policy and procedures
- 2.2 Care and storage requirements for firearms, ammunition and other weapons are identified and followed
- 2.3 Weapons are maintained or disposed of in accordance with organisational procedures and legislative requirements
- 2.4 *Reporting and recordkeeping procedures* for firearms, ammunition and other weapons are followed
- 2.5 Procedures for reporting loss, damage or theft of firearms, ammunition or other weapons are identified and followed

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the essential skills and knowledge and their level, required for this unit.

Skill requirements

Look for evidence that confirms skills in:

- rendering safe a variety of weapons and firearm types
- undertaking safe handling, transportation and storage of firearms, ammunition and other weapons
- applying regulations and codes of practice
- reading and applying complex information from legislation and procedures
- using communication to confirm information and requirements and seek assistance
- responding to diversity, including gender and disability
- recording and reporting weapon movement

Knowledge requirements

Look for evidence that confirms knowledge and understanding of:

- a variety of weapons, firearm types and munitions
- requirements for handling firearms and other weapons
- State/Territory and Commonwealth legislation relating to firearms and other weapons
- public sector legislation, standards and codes of conduct
- safety and environmental procedures relating to firearms, ammunition and other weapons
- responsibility as first on the scene for seeking assistance and rendering first aid in the event of incidents causing injury

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the Unit descriptor, Performance Criteria, the Range Statement and the Assessment Guidelines for the Public Sector Training Package.

Units to be assessed together

- *Pre-requisite* units that must be achieved prior to this unit: *Nil*
- *Co-requisite* units that must be assessed with this unit: *Nil*
- *Co-assessed units* that may be assessed with this unit to increase the efficiency and realism of the assessment process include, but are not limited to:

PSPETHC401A Uphold and support the values and principles of public service

PSPGOV422A Apply government processes

PSPLEGN401A Encourage compliance with legislation in the public sector

PSPREG401C Exercise regulatory powers

PSPREG402C Promote client compliance

PSPREG405B Act on non-compliance

Overview of evidence requirements

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms:

- the knowledge requirements of this unit
- the skill requirements of this unit
- application of the Employability Skills as they relate to this unit (see Employability Summaries in Qualifications Framework)
- taking custody and storage of weapons in a range of (3 or more) contexts (or occasions, over time)

Resources required to carry out assessment

These resources include:

- legislation, policy, procedures and protocols relating to handling and storage of weapons
- case studies and workplace scenarios to capture the range of situations likely to be encountered when taking custody and storing of weapons

Where and how to assess evidence

Valid assessment of this unit requires:

- a workplace environment or one that closely resembles normal work practice and replicates the range of conditions likely to be encountered when handling and storing weapons, including coping with difficulties, irregularities and breakdowns in routine

EVIDENCE GUIDE

- taking custody and storage of weapons in a range of (3 or more) contexts (or occasions, over time)

Assessment methods should reflect workplace demands, such as literacy, and the needs of particular groups, such as:

- people with disabilities
- people from culturally and linguistically diverse backgrounds
- Aboriginal and Torres Strait Islander people
- women
- young people
- older people
- people in rural and remote locations

Assessment methods suitable for valid and reliable assessment of this competency may include, but are not limited to, a combination of 2 or more of:

- demonstration
- observation
- questioning
- scenarios
- simulation or role plays
- authenticated evidence from the workplace and/or training courses

For consistency of assessment

Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments

Range Statement

RANGE STATEMENT

The Range Statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The Range Statement also provides a focus for assessment. It relates to the unit as a whole. Text in *italics* in the Performance Criteria is explained here.

- Firearms may include*
- rifles
 - handguns
 - shotguns
 - air firearms
- Ammunition may include*
- centre fire and rim-fire small arms ammunition
 - shotgun cartridges
 - air pellets
- Other weapons may include*
- knives
 - swords
 - bows
 - crossbows
 - batons
 - blowguns and darts
 - box cutters
 - wire cutters
 - scissors
 - spikes
 - syringes
 - skewers
 - improvised weapons
 - explosives and improvised explosive devices (rendered safe)
- Personal safety issues may include*
- where weapons are encountered
 - whether weapons are legal/licensed
 - using safe procedures for unloading firearms
 - the state of firearm readiness in which the firearm is presented for examination
 - knowledge of firearm safety rules
 - the provision or creation of a safe direction in which to conduct firearm safe handling procedures
 - personal protective equipment
- Standing procedures may include*
- first aid treatment for gunshot wounds and other injuries
 - preserving a crime scene in an incident involving the discharge or theft of a firearm, or ammunition

RANGE STATEMENT

*Reporting and
recordkeeping procedures
may include*

- procedures for unloading and making firearms safe
- procedures for transferring weapons or referring their detection to others

Unit Sector(s)

Employability Skills Information

Employability skills This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements are the essential outcomes of the unit of competency. Together, performance criteria specify the requirements for competent performance. Text in *bold italics* is explained in the Range Statement following.

Elements and Performance Criteria

ELEMENT

PERFORMANCE CRITERIA

1. Prepare for prosecution

- 1.1 *Brief* of evidence is reviewed and clarified with the apprehending officer, where necessary, prior to court proceedings
- 1.2 Precedents are identified as relevant
- 1.3 Questions are prepared to address the facts of the brief
- 1.4 Personnel involved are fully briefed in accordance with legal and organisational requirements
- 1.5 Parameters for negotiating out of court are agreed prior to prosecution with authorised organisational personnel

2. Conduct a prosecution

- 2.1 *Evidentiary procedures* are followed and prosecution is conducted according to court processes, *protocols* and organisational instructions
- 2.2 Personal presentation is maintained in accordance with organisational requirements
- 2.3 File endorsements are completed in accordance with legislative and organisational requirements
- 2.4 *Matters* arising from proceedings are followed up/completed in accordance with legislative and organisational requirements
- 2.5 The outcome of the prosecution is reviewed to provide timely input/recommendations for handling future *cases*

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the essential skills and knowledge and their level, required for this unit.

Skill requirements

Look for evidence that confirms skills in:

- making presentations including participating in complex oral exchanges in briefing sessions and in court
- reading complex, lengthy documents to ascertain key elements
- undertaking research to identify precedents
- compiling and putting questions
- responding to diversity, including gender and disability
- applying procedures relating to occupational health and safety and environment in the context of prosecuting duties

Knowledge requirements

Look for evidence that confirms knowledge and understanding of:

- court prosecution process, procedures and protocols
- court conduct
- enabling legislation and offences
- sections of the Evidence Act
- types of evidence
- rules of evidence
- possible defences
- burden of proof
- role of expert witnesses
- hearsay
- equal employment opportunity, equity and diversity principles
- public sector legislation relating to occupational health and safety and environment in the context of conducting prosecutions

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the Unit descriptor, Performance Criteria, the Range Statement and the Assessment Guidelines for the Public Sector Training Package.

Units to be assessed together

- *Pre-requisite* units that must be achieved prior to this unit: *Nil*
- *Co-requisite* units that must be assessed with this unit: *Nil*
- *Co-assessed units* that may be assessed with this unit to increase the efficiency and realism of the assessment process include, but are not limited to:

PSPETHC501B Promote the values and ethos of public service

PSPGOV504B Undertake research and analysis

PSPGOV505A Promote diversity

PSPGOV507A Undertake negotiations

PSPGOV512A Use complex workplace communication strategies

PSPLEGN501B Promote compliance with legislation in the public sector

Overview of evidence requirements

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms:

- the knowledge requirements of this unit
- the skill requirements of this unit
- application of the Employability Skills as they relate to this unit (see Employability Summaries in Qualifications Framework)
- conduct of prosecutions in a range of (3 or more) contexts

Resources required to carry out assessment

These resources include:

- legislation, policy, procedures and protocols relating to prosecution of offences
- the organisation's enabling legislation and offences
- case studies and workplace scenarios to capture the range of prosecution situations likely to be encountered

Where and how to assess evidence

Valid assessment of this unit requires:

- a workplace environment or one that closely resembles normal work practice and replicates the range of conditions likely to be encountered when conducting prosecutions, including coping with difficulties, irregularities and breakdowns in routine
- conduct of prosecutions in a range of (3 or more) contexts

Assessment methods should reflect workplace demands, such as

EVIDENCE GUIDE

literacy, and the needs of particular groups, such as:

- people with disabilities
- people from culturally and linguistically diverse backgrounds
- Aboriginal and Torres Strait Islander people
- women
- young people
- older people
- people in rural and remote locations

Assessment methods suitable for valid and reliable assessment of this competency may include, but are not limited to, a combination of 2 or more of:

- case studies
- demonstration
- observation
- questioning
- scenarios
- simulation or role plays
- authenticated evidence from the workplace and/or training courses

For consistency of assessment

Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments

Range Statement

RANGE STATEMENT

The Range Statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The Range Statement also provides a focus for assessment. It relates to the unit as a whole. Text in *italics* in the Performance Criteria is explained here.

Briefs may include

- evidence records
- investigators' reports
- witness statements
- precedents
- recommended actions

Proceedings may include

- court hearings
- tribunals
- trials

Evidentiary procedures may include

- aspects of evidence in chief, cross-examination and re-examination

Protocols may include

- court proceedings
- standards of dress
- forms of address

Matters arising may include

- completing documentation/reports
- dealing with exhibits
- notifying outcomes
- arranging for witness fees
- appeal proceedings

Cases may include

- ex parte
- plea of guilty
- argued matters

Elements and Performance Criteria Pre-Content

Elements are the essential outcomes of the unit of competency. Together, performance criteria specify the requirements for competent performance. Text in *bold italics* is explained in the Range Statement following.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Plan investigation	<p>1.1 Objectives and desired outcomes of the <i>investigation</i> are identified, documented and communicated to investigation team</p> <p>1.2 Relevant legislation is reviewed and <i>stakeholders</i> are consulted to ensure sound preparation for the investigation</p> <p>1.3 Resource requirements are identified and authorised after considering other organisational needs</p> <p>1.4 Communications strategy is established in consultation with team</p> <p>1.5 Continuous review mechanisms are put in place to monitor the progress of the investigation</p> <p>1.6 <i>Investigation management system</i> is used to develop investigation plan, allocate resources and provide for systematic recording of investigation decisions</p>
2. Prepare for investigation	<p>2.1 An evidence matrix is developed and updated as required</p> <p>2.2 Assessment is made of possible avenues of enquiry</p> <p>2.3 Elements/proofs of the offence are determined and witnesses are identified</p> <p>2.4 Consultation is conducted with other organisations when investigation impacts on their organisation</p> <p>2.5 Potential for recovery action is assessed and liaison occurs with appropriate authorities to determine when recovery action should begin and what is involved</p>
3. Lead and support investigation team	<p>3.1 Personnel are allocated to the investigation based upon their skills, knowledge and abilities in relation to the requirements of the investigation</p> <p>3.2 Specialist resources are located internally and externally to facilitate successful outcome</p> <p>3.3 Administrative support is organised from commencement of investigation</p> <p>3.4 Ongoing advice and support are provided to the team in accordance with the requirements of the investigation</p> <p>3.5 Investigation plan is revised as required in response to <i>contingencies</i> in consultation with investigative team, and incorporating suggestions where practicable</p>
4. Monitor progress of investigation	<p>4.1 Investigation is monitored against the requirements of the continuously updated investigation plan</p> <p>4.2 Evidence collection and handling of witnesses/alleged offenders is monitored to ensure conduct is in accordance with rules of evidence and procedural fairness considerations</p> <p>4.3 Team members are regularly consulted on progress of the</p>

ELEMENT**PERFORMANCE CRITERIA**

investigation in both informal situations and scheduled reviews

- 4.4 Obstacles encountered during the investigation are discussed and solutions found
- 4.5 *Key tasks*, deadlines and timelines are monitored, risks anticipated and extra resources and/or external expertise authorised as required in accordance with the investigation are plan
- 4.6 Requirement for specialists is monitored to ensure their cost-effective use
- 5. Finalise and report on investigation**
- 5.1 Final stage of investigation is supervised to ensure conclusion in court or other body if appropriate
- 5.2 Investigation is finalised within (revised) budget and time restrictions and results are recorded in accordance with legislative and organisational requirements
- 5.3 Administrative/recovery actions are initiated where appropriate
- 5.4 Witnesses, alleged offenders and other persons/organisations affected by the investigation are provided with sufficient information about the outcome
- 5.5 If planned outcome is not achieved, follow-up actions are planned to progress to next stage or to take no further action
- 5.6 Reports are made to management on outcomes relevant to future compliance activities particularly on how organisational procedures assisted or impeded investigation
- 6. Conduct debriefing**
- 6.1 Activities are reviewed against objectives and outcomes of the investigation
- 6.2 Strengths and weaknesses in investigation process are highlighted for future investigations
- 6.3 Precedents and problems are noted for future investigations
- 6.4 Achievements are acknowledged through formal and informal means
- 6.5 *Debriefing report* is prepared in accordance with organisational policy and procedures

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the essential skills and knowledge and their level, required for this unit.

Skill requirements

Look for evidence that confirms skills in:

- managing the ongoing process of the investigation, particularly for compliance with legislative, judicial and agency requirements
- undertaking project management that contributes to achieving stated objectives of the investigation and effective utilization of resources
- managing contracted services and specialist staff where required
- writing reports requiring formal language and structure and precision of expression
- using communication to suit a range of audiences
- conducting complex oral exchanges in briefing sessions and team meetings
- responding to diversity, including gender and disability
- applying procedures relating to occupational health and safety and environment in the context of investigations

Knowledge requirements

Look for evidence that confirms knowledge and understanding of:

- the role of investigations in achieving the organisation's strategic compliance objectives
- Australian Government Investigation Standards (AGIS)
- legislative and jurisdictional requirements
- organisational policy and procedures
- aspects of criminal, civil or administrative law as apply in that jurisdiction, such as:
 - Part 1C of the Crimes Act 1914
 - Judges Rules
 - Anunga Rules (Commonwealth jurisdiction)
- investigation methodology and techniques
- powers and restrictions to investigate
- rules and types of evidence
- report procedures which provide a written and/or electronic audit trail
- confidentiality and privacy issues
- procedures re lines of reporting
- storage of evidence
- equal employment opportunity, equity and diversity principles
- public sector legislation such as occupational health and safety and environment in the context of investigations

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the Unit descriptor, Performance Criteria, the Range Statement and the Assessment Guidelines for the Public Sector Training Package.

Units to be assessed together

- *Pre-requisite* units that must be achieved prior to this unit: *Nil*
- *Co-requisite* units that must be assessed with this unit: *Nil*
- *Co-assessed units* that may be assessed with this unit to increase the efficiency and realism of the assessment process include, but are not limited to:

PSPETHC501B Promote the values and ethos of public service

PSPFRAU502B Anticipate and detect possible fraud activity

PSPGOV503B Coordinate resource allocation and usage

PSPGOV504B Undertake research and analysis

PSPGOV505A Promote diversity

PSPLEGN501B Promote compliance with legislation in the public sector

PSPOHS501A Monitor and maintain workplace safety

Overview of evidence requirements

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms:

- the knowledge requirements of this unit
- the skill requirements of this unit
- application of the Employability Skills as they relate to this unit (see Employability Summaries in Qualifications Framework)
- investigations coordinated in a range of (3 or more) contexts (or occasions, over time)

These resources include:

Resources required to carry out assessment

- legislation, policy, procedures and protocols relating to investigation
- Australian Government Investigation Standards
- the organisation's enabling legislation and offences
- case studies and workplace scenarios to capture the range of investigation situations likely to be encountered

Where and how to assess evidence

Valid assessment of this unit requires:

- a workplace environment or one that closely resembles normal work practice and replicates the range of conditions likely to be encountered when coordinating investigations, including coping

EVIDENCE GUIDE

with difficulties, irregularities and breakdowns in routine

- investigations coordinated in a range of (3 or more) contexts (or occasions, over time)

Assessment methods should reflect workplace demands, such as literacy, and the needs of particular groups, such as:

- people with disabilities
- people from culturally and linguistically diverse backgrounds
- Aboriginal and Torres Strait Islander people
- women
- young people
- older people
- people in rural and remote locations

Assessment methods suitable for valid and reliable assessment of this competency may include, but are not limited to, a combination of 2 or more of:

- case studies
- demonstration
- observation
- portfolios
- questioning
- scenarios
- authenticated evidence from the workplace and/or training courses

For consistency of assessment

Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments

Range Statement

RANGE STATEMENT

The Range Statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The Range Statement also provides a focus for assessment. It relates to the unit as a whole. Text in *italics* in the Performance Criteria is explained here.

Investigations may include

- complete investigations
- joint investigations with other agencies
- parts of investigations carried out in-house
- outsourced investigations
- those referred to other relevant law enforcement agencies (for example police, Independent Commission against Corruption, Criminal Justice Commission)
- formal enquiries that do not proceed to investigation

Stakeholders may include

- law enforcement agencies
- standards setting organisations

Investigation management system allows for

- development of investigation plan
- systematic recording of decisions
- regular review process
- level of financial and human resources required

Contingencies may include

- receipt of new information
- changes in:
 - times
 - budgets
 - plans
 - staff

Key tasks may include

- authorities, powers and limitations on those monitoring the collection and handling of evidence which is vital to the outcome of investigation
- updating information systems and recording

Debriefing report includes

- whether desired result was achieved
- why the investigation succeeded or failed
- aspects to be used/avoided in the future
- details of issues and recommendations

Unit Descriptor

Unit descriptor

This unit covers the requirements to supervise and undertake detailed, complex inspections and monitoring in accordance with relevant Acts and regulations.

Typically work will be at an experienced, unsupervised level with responsibility in a defined area. It includes planning and coordinating of inspection and monitoring programs, supervising and carrying out of complex inspections and monitoring, acting on non-compliance relating to complex inspections and monitoring, and providing reports, information and training.

In practice, supervision and carrying out of complex inspections and monitoring may overlap with other public sector generalist and specialist work activities such as promoting ethical practice and compliance with legislation, coordinating resources, undertaking research and analysis, etc.

This unit is one of five units in the *Regulatory Competency* field that deal with inspection and monitoring. Related units are:

PSPREG201A Carry out inspections and monitoring under guidance

PSPREG301A Undertake routine inspections and monitoring

PSPREG413A Undertake inspections and monitoring

PSPREG603A Manage and lead inspection and monitor

This is a new unit of competency, added to the *Regulatory Competency* field of the Training Package in 2004.

Elements and Performance Criteria Pre-Content

Elements are the essential outcomes of the unit of competency. Together, performance criteria specify the requirements for competent performance. Text in *bold italics* is explained in the Range Statement following.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Plan and coordinate inspection and monitoring programs	<p>1.1 Outputs and performance indicators for defined area of responsibility are identified and inspection and monitoring <i>activities</i> and responsibilities are assigned in accordance with organisational requirements</p> <p>1.2 <i>Procedures, timeframes, resources and equipment</i> requirements for defined area of responsibility are determined in accordance with organisational and task requirements</p> <p>1.3 Required resources/equipment are made available and the access/preparation of these is supervised in accordance with organisational and task requirements</p> <p>1.4 <i>Legislation</i> and regulations are interpreted and input is provided into technical protocols and operational procedures as required</p> <p>1.5 Risk management practices, occupational health and safety and environmental requirements are interpreted and explained to staff as required</p>
2. Supervise and carry out complex inspections and monitoring	<p>2.1 Leadership is provided to deliver agreed outputs in accordance with the organisation's business requirements</p> <p>2.2 <i>Inspections and monitoring</i> activities are planned and supervised, and program performance, resources and expenditure are monitored in accordance with organisational requirements</p> <p>2.3 <i>Compliance programs</i> are planned, implemented and coordinated as required in accordance with set procedures and timelines</p> <p>2.4 Assessments and performance management of inspection/monitoring staff are conducted in accordance with organisational policies and procedures</p> <p>2.5 Complex inspections and monitoring are carried out under general direction and contingencies are dealt with in accordance with organisational policies and procedures</p> <p>2.6 Legislative requirements, risk management practices, occupational health and safety and environmental requirements are applied in accordance with organisational requirements</p>
3. Act on non-compliance relating to complex inspections and monitoring	<p>3.1 Advice is provided on serious or complex matters referred by others, or situations resolved in accordance with organisational policy and procedures</p> <p>3.2 Information/education is provided to achieve client compliance in accordance with organisational guidelines and legislative requirements relating to the seriousness of the possible breach</p> <p>3.3 Further <i>action</i> is taken as a result of the failure to achieve compliance, in accordance with organisational guidelines and</p>

ELEMENT

PERFORMANCE CRITERIA

	legislative requirements relating to the seriousness of the possible breach
	3.4 Contraventions of relevant legislation are reported and recommendations for prosecutions are made in accordance with organisational policy and procedures
	3.5 When required, court attendance and conduct requirements are fulfilled in compliance with organisational guidelines
4 Provide reports, information and training	4.1 <i>Records</i> are maintained and correspondence, submissions and reports are prepared in accordance with organisational requirements
	4.2 Legislation and regulations are interpreted and information and advice are provided on policies, procedures, guidelines, technical and operational matters
	4.3 On-the-job inspection/monitoring training is supervised and provided in accordance with organisational requirements

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the essential skills and knowledge and their level, required for this unit.

Skill requirements

Look for evidence that confirms skills in:

- demonstrating leadership and team management in the context of inspection and monitoring
- undertaking observation and analysis
- communicating with a diverse range of clients and staff
- writing correspondence, submissions and reports, requiring discretion to determine appropriate content and style
- dealing with referrals from other staff on matters that are more difficult, or of potential interest to external parties such as the media, public, political parties etc
- using computers for word processing and manipulation of statistical data
- operating workplace equipment
- responding to diversity, including gender and disability
- applying public sector legislation such as occupational health and safety and environment in the context of complex inspection and monitoring

Knowledge requirements

Look for evidence that confirms knowledge and understanding of:

- public sector legislation including occupational health and safety, environment, privacy etc
- organisational policy and procedures
- inspection procedures
- monitoring procedures
- relevant responses to complex/serious non-compliance
- enabling legislation
- elements of an offence
- equity and diversity principles
- workplace and industry environment

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the Unit descriptor, Performance Criteria, the Range Statement and the Assessment Guidelines for the Public Sector Training Package.

Units to be assessed together

- *Pre-requisite* units that must be achieved prior to this unit: *Nil*
- *Co-requisite* units that must be assessed with this unit: *Nil*
- *Co-assessed units* that may be assessed with this unit to increase the efficiency and realism of the assessment process include, but are not limited to:

PSPETHC501B Promote the values and ethos of public service

PSPGOV503A Coordinate resource allocation and usage

PSPGOV504B Undertake research and analysis

PSPGOV505A Promote diversity

PSPLEGN501B Promote compliance with legislation in the public sector

PSPOHS501A Monitor and maintain workplace safety

Overview of evidence requirements

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms:

- the knowledge requirements of this unit
- the skill requirements of this unit
- application of the Employability Skills as they relate to this unit (see Employability Summaries in Qualifications Framework)
- performance at an experienced, unsupervised level with responsibility for supervision in a defined area for inspections and monitoring undertaken in a range of (3 or more) contexts (or occasions, over time)

Resources required to carry out assessment

These resources include:

- legislation, policy, procedures and protocols relating to inspection and monitoring
- case studies and workplace scenarios to capture the range of complex inspection and monitoring situations likely to be encountered

Where and how to assess evidence

Valid assessment of this unit requires:

- an environment that closely resembles normal work practice and replicates the range of conditions likely to be encountered when supervising and carrying out complex inspections and monitoring, including coping with difficulties, irregularities and

EVIDENCE GUIDE

breakdowns in routine

- performance at an experienced, unsupervised level with responsibility for supervision in a defined area for inspections and monitoring undertaken in a range of (3 or more) contexts (or occasions, over time)

Assessment methods should reflect workplace demands, such as literacy, and the needs of particular target groups, such as:

- people with disabilities
- people from culturally and linguistically diverse backgrounds
- Aboriginal and Torres Strait Islander people
- women
- young people
- older people
- people in rural and remote locations

Assessment methods suitable for valid and reliable assessment of this competency may include, but are not limited to 2 or more of:

- case studies
- demonstration
- observation
- portfolios
- projects
- questioning
- scenarios
- simulation or role plays
- authenticated evidence from the workplace and/or training courses

For consistency of assessment

Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and/or apply the competency in different situations or environments

Range Statement

RANGE STATEMENT

The Range Statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The Range Statement also provides a focus for assessment. It relates to the unit as a whole. Text in *italics* in the Performance Criteria is explained here.

- Activities may include*
- inspections/examinations
 - monitoring
 - surveillance
 - focused and benchmark audit activities
 - remote monitoring
 - other compliance assurance activities
- Procedures may include*
- observation
 - handling procedures
 - sampling procedures
 - rejection procedures
 - storage procedures
 - disinfection procedures
 - treatment procedures
 - organisational guidelines and code of conduct
 - incident reporting procedures
 - safety procedures
 - emergency procedures
 - evacuation procedures
- Resources and equipment may include*
- inspection equipment
 - maps, plans
 - satellite imagery
 - aerial photographs
 - survey plans
 - spatial data and information
 - cameras
 - personal protective equipment - respirators, gloves, overalls, boots, hearing protection, goggles, masks etc
 - test kit equipment
 - recording equipment
 - measuring equipment
 - storage equipment/facilities
 - entry authority/warrant
 - Global Positioning System (GPS) equipment

RANGE STATEMENT

- compass
 - communication equipment
 - computers
 - vehicles - 2 or 4 wheel drive
- Legislation may include*
- Commonwealth legislation and regulations, for example:
 - Commonwealth Quarantine Act 1908, proclamations and regulations
 - Crimes Act 1914 and Criminal Code Act 1995
 - Customs Act 1901 and regulations
 - Wildlife Protection Act 1982
 - Export Control Act 1982
 - Imported Foods Act 1996
 - Occupational Health and Safety Act 1988
 - State/Territory and Local Government legislation and regulations, such as those relating to:
 - agriculture
 - horticulture
 - conservation and land management
 - fisheries
 - environmental protection
 - building
 - water
 - emergencies
 - international legislation/codes of behaviour
- Inspections and monitoring activities may relate to*
- aircraft
 - airfreight
 - animal products
 - animals
 - cargo
 - cereals
 - collection of biological specimens
 - disposal of organic waste
 - fresh produce
 - goods
 - land condition, such as:
 - topography
 - salinity
 - erosion
 - weed infestation
 - vermin infestation

RANGE STATEMENT

- fire hazard
- over grazing
- land improvements, such as:
- fences
- buildings
- sporting or playground equipment
- irrigation infrastructure
- sewerage infrastructure
- waterfront occupations
- community structures
- land usage
- leases and other tenures, to ensure compliance with conditions
- licence/permit compliance (eg vegetation clearing)
- live fish
- livestock
- mail
- mineral samples
- passenger baggage
- people
- pests
- plant products
- plants
- premises
- properties
- reserves and their use/s
- survey activities to maintain readiness for district emergency plans
- vector monitoring
- vessels
- audit
- monitoring
- treatment
- containment
- control
- eradication
- destruction
- both routine and non-routine matters of a more complex or detailed nature, with discretion to determine appropriate action
- referrals from other staff of matters that are more difficult, or of potential interest to external parties such as the media, public, political parties etc

Compliance programs may include

Non-compliance may include

RANGE STATEMENT

Action may include

- advice
- warning
- formal notification of intent
- infringement notices
- on-the-spot fines
- court prosecution

Records may include

- notes
- case files
- statistics
- forms (application forms, disease notification forms, etc)
- notices (seizure notice, infringement notice, etc)
- invoices
- receipts
- commercial documentation such as bills of lading, airway bills

Unit Sector(s)

Competency field

Competency field Regulatory

PSPREG504A Manage plant movement health risk

Modification History

Not applicable.

Unit Descriptor

Unit descriptor

This unit covers assessment of plant movement health risk and the development, implementation and monitoring of strategies to manage that risk.

It includes the specialist knowledge and skills on plants and plant products required by those involved in the inspection, monitoring and certification of plants and plant products moving intrastate and interstate within Australia; the monitoring and controlling of specific plant pests and diseases; and the provision of information on, and facilitation of interstate and international market access.

In practice, managing plant movement health risk may overlap with other public sector generalist and specialist work activities such as promoting ethical practice, compliance with legislation, coordinating risk management, undertaking negotiations, managing conflict, etc.

This is a new unit of competency, added to the *Regulatory* Competency field of the Training Package in 2004.

Application of the Unit

Not applicable.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

Employability skills This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements are the essential outcomes of the unit of competency. Together, performance criteria specify the requirements for competent performance. Text in *bold italics* is explained in the Range Statement following.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Assess and control plant movement health risk	<p>1.1 The health and certification of <i>plants and plant products</i> moving into the country, state or territory are verified as meeting all commonwealth, state or territory requirements</p> <p>1.2 The health of plants and plant products is certified for international, interstate and/or intrastate movement in accordance with certification requirements</p> <p>1.3 Plants and plant products are inspected for pest and disease infestation and necessary <i>treatments</i> are recommended and monitored in accordance with organisational policy and procedures</p> <p>1.4 <i>Clients</i> are provided with timely and accurate information and training on <i>requirements</i> in relation to the movement of plants and plant products</p> <p>1.5 Compliance/accreditation/interstate certification agreements are entered into where appropriate and audited in accordance with organisational policy and procedures</p>
2. Identify potential risks associated with the movement of plants and plant products	<p>2.1 <i>Common risks</i> associated with the interaction of production location, crop and plant pests and diseases are identified</p> <p>2.2 The implications of <i>pre-harvest</i> and <i>post-harvest preventative and disinfection methods</i> for plant and plant product health, human health and the environment are analysed</p> <p>2.3 The implications of <i>packaging types and technologies, storage conditions</i> and <i>production techniques</i> for plant and plant product health are analysed</p>
3. Participate in the development of strategies to manage plant movement health risk	<p>3.1 <i>Statistical information on plants and plant products</i> is accessed and used in the development of risk management strategies</p> <p>3.2 Plant and plant product sector <i>quality standards and principles</i> are identified and applied</p> <p>3.3 Existing <i>strategies</i> to manage plant and plant product movement health risk are reviewed and updated in response to industry developments and needs</p> <p>3.4 New strategies to manage plant and plant product movement health risk are developed where necessary in accordance with organisational policy and procedures</p>
4. Implement strategies to manage plant movement health risk	<p>4.1 Strategies to manage plant and plant product movement health risk are implemented in consultation with relevant industry and government bodies</p> <p>4.2 Information to facilitate compliance with risk management strategies is provided to clients in accordance with their needs in terms of its range, depth and form of presentation</p>

ELEMENT

PERFORMANCE CRITERIA

5. Monitor the outcomes of strategies to manage plant movement health risk

5.1 Processes to monitor the required outcomes of strategies to manage plant and plant product movement health risk are developed in accordance with organisational policy and procedures

5.2 The outcomes of strategies to manage plant and plant product movement health risk are monitored and recommendations made where possible for continuous improvement

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the essential skills and knowledge and their level, required for this unit.

Skill requirements

Look for evidence that confirms skills in:

identifying commonly encountered varieties of fruits, vegetables, field crops, grain products, nursery stock, cut flowers and cut foliage
recognising pest and disease infestation
accessing and using statistical information on plants and plant products
analysing and managing risk related to plant movement health risk
reading complex and formal documents such as legislation, policy and procedures and applying them to work practices
presenting information
adjusting communication to suit different audiences
responding to diversity, including gender and disability
applying public sector legislation such as occupational health and safety and environment in the context of managing plant movement health risk

Knowledge requirements

Look for evidence that confirms knowledge and understanding of:

public sector legislation including occupational health and safety, environment, privacy etc
enabling legislation
organisational policy and procedures
horticultural classifications and families of plants:
pome
stone
solanaceae
curcurbits
crucifers
citrus
berries
cereals
pulses
basic physiology of fruits and vegetables:
photosynthesis
respiration
ripening

REQUIRED SKILLS AND KNOWLEDGE

basic structures of fruits and vegetables

plant and plant products sector:

production location of plants and plant products within Australia and internationally

seasonality of plants and plant products within Australia and internationally

major movement of plants and plant products within Australia and internationally

growers/packers of plants and plant products and their needs

interstate importers and exporters of plants and plant products and their needs

wholesalers of plants and plant products and their needs

retailers of plants and plant products and their needs

transporters of plants and plant products and their needs

treatment providers (eg fumigators) of plants and plant products and their needs

travellers and their needs

human health and environmental effects of disinfestation methods for fruits,
vegetables, field crops, grain products, nursery stock, cut flowers and cut foliage

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the Unit descriptor, Performance Criteria, the Range Statement and the Assessment Guidelines for the Public Sector Training Package.

Units to be assessed together

- *Pre-requisite* units that must be achieved prior to this unit: *Nil*
- *Co-requisite* units that must be assessed with this unit: *Nil*
- *Co-assessed units* that may be assessed with this unit to increase the efficiency and realism of the assessment process include, but are not limited to:

PSPETHC501B Promote the values and ethos of public service

PSPGOV507A Undertake negotiations

PSPGOV508A Manage conflict

PSPGOV511A Provide leadership

PSPGOV512A Use complex workplace communication strategies

PSPGOV514A Facilitate change

PSPGOV517A Coordinate risk management

PSPLEGN501B Promote compliance with legislation in the public sector

PSPOHS501A Monitor and maintain workplace safety

RUHHRT529A Manage weed, pest and disease infestations

Overview of evidence requirements

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms:

- the knowledge requirements of this unit
- the skill requirements of this unit
- application of the Employability Skills as they relate to this unit (see Employability Summaries in Qualifications Framework)
- management of plant movement health risk in a range of (3 or more) contexts (or occasions, over time) relating to plants and plant products that include:
 - fruits
 - vegetables
 - field crops
 - grain products
 - nursery stock, including whole plants and propagating material
 - cut flowers and cut foliage

EVIDENCE GUIDE

Resources required to carry out assessment

These resources include:

- legislation, policy, procedures, protocols and standards relating to inspection and monitoring
- certification requirements
- statistical information
- sample plants and plant products, both healthy and infested
- case studies and workplace scenarios to capture the range of situations likely to be encountered when managing plant movement health risk

Where and how to assess evidence

Valid assessment of this unit requires:

- an environment that closely resembles normal work practice and replicates the range of conditions likely to be encountered when managing plant movement health risk, including coping with difficulties, irregularities and break downs in routine
- management of plant movement health risk in a range of (3 or more) contexts (or occasions, over time) such as those relating to fruits, vegetables, field crops, grain products, nursery stock, cut flowers and cut foliage

Assessment methods should reflect workplace demands, such as literacy, and the needs of particular target groups, such as:

- people with disabilities
- people from culturally and linguistically diverse backgrounds
- Aboriginal and Torres Strait Islander people
- women
- young people
- older people
- people in rural and remote locations

Assessment methods suitable for valid and reliable assessment of this competency may include, but are not limited to 2 or more of:

- case studies
- demonstration
- observation
- portfolios
- projects
- questioning
- scenarios
- simulation or role plays
- authenticated evidence from the workplace and/or training courses

EVIDENCE GUIDE

For consistency of assessment

Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and/or apply the competency in different situations or environments

Range Statement

RANGE STATEMENT

The Range Statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The Range Statement also provides a focus for assessment. It relates to the unit as a whole. Text in *italics* in the Performance Criteria is explained here.

- Plant movement health risk may include:*
- spread of plant pests, diseases and weeds
 - negative impacts on market access for the Australian plant and plant products sectors
 - increased costs of production within the Australian plant and plant products sectors
 - negative environmental and social impacts
- Plants and plant products may include:*
- fruits
 - vegetables
 - field crops
 - grain products
 - nursery stock, including whole plants and propagating material
 - cut flowers and cut foliage
 - seeds
 - tissue culture
- Treatments may include:*
- chemical (insecticides, fungicides, fumigation etc)
 - physical (heat, cold treatment, physical containment or exclusion etc)
 - irradiation
 - surveys
 - inspection and certification
- Clients may include:*
- growers/packers of plants and plant products
 - interstate importers and exporters of plants and plant products
 - wholesalers of plants and plant products
 - retailers of plants and plant products
 - transporters of plants and plant products
 - treatment providers (eg fumigators) of plants and plant products
 - travellers
- Requirements in relation to the movement of plants and plant products include:*
- relevant state and territory government acts and regulations on plants and plant products
 - interstate plant and plant products import requirements
 - relevant pest, disease and weed protocols, procedures and contingency plans
- Common risks may*
- quarantine risks associated with the production location,

RANGE STATEMENT

- include:* pre-harvest and post-harvest treatment and handling, storage, transport and intrastate and interstate movement of plants and plant products
- Pre-harvest preventative and disinfestation methods may include:*
- physical barriers (eg fruit bagging, netting, insect-free glasshouses)
 - biological control
 - use of resistant varieties
 - root stock
 - integrated pest management
 - chemical methods (for non-organics)
- Post-harvest preventative and disinfestation methods may include:*
- physical barriers (eg sealed packages and containers, shrink wrapping, insect-proof cartons, storage facilities)
 - maturity at harvest
 - unbroken skin at harvest
 - cold storage
 - hot water treatment
 - fumigation for non-organics
 - fumigation for organics
 - chemical dips and sprays (for non-organics)
 - irradiation (for non-organics)
- Packaging types and technologies (for fruits, vegetables and cut flowers) may include:*
- main types of packages
 - sulphur pads
 - ethylene absorbers
 - foam padding and other methods of preventing mechanical injuries
 - re-used and recycled packaging
- Storage conditions (for fruits, vegetables and cut flowers) may include:*
- humidity
 - temperature
 - modified atmosphere
 - controlled atmosphere
 - special or specific packaging
 - fumigation and other treatments
 - consideration of storage life
 - consideration of shelf life
 - chilling injury
 - high temperature injury
 - onset of post harvest disorders
- (Basic nursery and cut flower) production techniques may include:*
- propagation
 - watering
 - fertilising

RANGE STATEMENT

- glasshouse cultivation
 - hydroponics
 - re-potting
 - growing media
- Participation in the development of strategies may include:*
- membership of work teams or project teams that review, develop, implement and monitor risk management strategies
 - consultation and liaison with relevant industry and government bodies
- Statistical information on plants and plant products may include:*
- Australian Bureau of Statistics data on plants and plant products production and value
 - Horticulture Australia Limited data on plants and plant products production and value
 - relevant internal organisational data on plants and plant products
- Quality standards and principles may include:*
- accreditation processes for organic fruits, vegetables and grain products
 - Safe Quality Food 2000 and/or equivalent systems
 - Safe Quality Food 1000 for some horticulture produce particularly at grower level
 - Freshcare
 - AS/NZS ISO 9001:2000
 - Government programs to promote 'clean and green' produce
 - Government programs to promote sustainable agriculture
- Strategies to manage plant and plant product movement health risk may include:*
- changes to state and territory government acts and/or regulations on plants and plant products
 - development or alteration of interstate plant and plant products import requirements
 - development or alteration of pest, disease and weed protocols, procedures and contingency plans
 - development or alteration of plant and plant product sector client service, communication, training or compliance programs

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<p>1. Prepare for audit.</p>	<p>1.1. Establish audit scope in accordance with legislative requirements and organisational procedures.</p> <p>1.2. Identify and access activity specialists to support audit as required.</p> <p>1.3. Access and review licensee history.</p> <p>1.4. Access and interpret <i>information appropriate</i> to the audit.</p> <p>1.5. Make arrangements with licensee for a quality or observation audit.</p> <p>1.6. Identify and access <i>test equipment</i>, products and consumables required for the audit.</p> <p>1.7. Ensure required test equipment is fit for purpose in accordance with applicable <i>legislation</i> and organisational procedure.</p> <p>1.8. Plan activities to meet audit objectives and minimise disruption to business operations.</p>
<p>2. Conduct a quality audit.</p>	<p>2.1. Schedule entry meeting to confirm audit scope and objectives.</p> <p>2.2. Confirm operational procedures and assessment methods for the audit with appropriate personnel.</p> <p>2.3. Collect information that is adequate, representative and meets audit requirements.</p> <p>2.4. Use audit methods and techniques to evaluate <i>relevant information</i>.</p> <p>2.5. Review documentation and procedures relating to the licence and associated activities for compliance with regulatory requirements.</p> <p>2.6. Identify and report patterns, trends and areas of risk.</p> <p>2.7. Maintain the rights of the licensee at all times.</p>
<p>3. Conduct a performance audit.</p>	<p>3.1. Identify the scope of the activity being audited and the expected outcomes.</p> <p>3.2. Identify relevant local workplace, health and safety issues and implement appropriate control strategies.</p> <p>3.3. Evaluate the skills and knowledge of authorised person completing the licensed activity.</p> <p>3.4. Inspect result of the licensed activity for compliance with legislative requirements.</p> <p>3.5. Assess performance audit outcomes against expected outcomes.</p>

ELEMENT	PERFORMANCE CRITERIA
	3.6. Maintain the rights of licensee at all times.
4. Analyse and report audit results.	<p>4.1. Examine information, test results and observations against audit objectives and <i>prescribed performance criteria</i>.</p> <p>4.2. Analyse audit data for isolated and systemic quality and performance issues.</p> <p>4.3. Complete inspection documentation, including recommendations for improvement, in accordance with legislative requirements and organisational procedures.</p> <p>4.4. Communicate inspection results within specified time and according to organisational guidelines.</p> <p>4.5. Recommend follow-up actions as appropriate.</p>
5. Act on non-compliance.	<p>5.1. Select applicable <i>remedial</i> or <i>enforcement action</i> for the non-compliance in accordance with legislative requirements, and organisational policy and procedures.</p> <p>5.2. Inform licensee of non-compliance and consequences of failing to have it corrected.</p> <p>5.3. Implement enforcement action in accordance with legislative requirements, and organisational policy and procedures.</p> <p>5.4. Maintain the rights of the licensee at all times.</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- literacy skills to access, read and interpret:
 - complex and formal documents
 - technical data
 - regulatory requirements
 - organisational policies and procedures
- numeracy skills to analyse test results
- initiative and enterprise skills to:
 - identify and resolve potential problems and seek out information
 - apply risk management principles to local workplace OHS issues and control strategies
- self-management skills to:
 - modify activities to cater for variations in workplace contexts and environment
 - demonstrate attention to detail
- technology skills to:
 - select and apply appropriate technology, information systems and procedures
 - use recording, testing and specialised evidence collection equipment
- interpersonal skills to:
 - respond to diversity, including disability and gender
 - relate to people from a range of social, cultural and ethnic backgrounds, and physical and mental abilities
- communication skills to:
 - justify or explain the assessment decision and recommended corrective action
 - listen and question in complex exchanges of oral information
- teamwork skills to work with a variety of professionals
- organisational and planning skills to:
 - implement methodical and systematic approaches
 - prioritise work and coordinate self and others in relation to workplace activities
- time-management skills to:
 - plan for licensee's operation schedules and keep downtime to a minimum and use of travel time effective
 - ensure corrective actions are dealt with in a timely manner

Required knowledge

- auditing systems

REQUIRED SKILLS AND KNOWLEDGE

- risk management principles
- hazards that may exist when conducting an audit and ways of controlling risks involved
- national measurement and OHS legislation
- powers of inspectors
- use of audit/assessment tools
- industry practices and procedures relating to measurement process and verification of measuring instruments
- organisational reporting procedures relating to quality audits
- legal issues and terminology relating to quality audits
- audit methods and techniques
- codes of practice, regulations and standards, such as:
 - ISO 9000:2000 Quality management Systems - Fundamentals and Vocabulary
 - ISO 19011:2003 Guidelines for Quality and/or Environmental Management Systems Auditing
 - AS17025 General requirements for the competence of testing and calibration laboratories
- product and service knowledge relating to measurement process and verification of measuring instruments
- quality principles and techniques relating to measurement process and verification of measuring instruments
- current audit practices

Evidence Guide

EVIDENCE GUIDE	
<p>The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
Overview of assessment	<p>Competency must be demonstrated in the ability to perform quality and performance audits on a range of licensed trade measurement activities.</p>
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>Assessment must confirm the ability to:</p> <ul style="list-style-type: none"> • identify, access and apply test procedures • identify and use suitable reference standards • evaluate and adjust the impact of the operating environment on the performance of the instrument • analyse test results to determine the instrument's suitability for verification (trade use) • identify the scope of a verifier performance audit and assess results with expected outcomes • audit the performance of verifiers of weighing instruments • identify and implement additional inspection strategies for non-instrument related breaches of national measurement legislation • recognise and act on non-compliance • maintain the security and confidentiality of data according to organisational and regulatory requirements • report results in the required formats and expected timeframe.
Context of and specific resources for assessment	<p>This unit of competency is to be assessed in the workplace or a simulated workplace environment.</p> <p>Access may be required to:</p> <ul style="list-style-type: none"> • computer and relevant software and/or organisation information management systems • licence conditions • national measurement legislation • audit procedures.
Method of assessment	<p>The following assessment methods are suggested:</p> <ul style="list-style-type: none"> • questions to assess understanding of relevant procedures, trader obligations and remedial actions • review of weighbridge tickets prepared by the candidate • feedback from supervisors and peers regarding the candidate's ability to conduct weighbridge operations in accordance with

EVIDENCE GUIDE	
	<p>legislative and organisational procedures</p> <ul style="list-style-type: none"> • observation of the candidate conducting a quality and performance audit. <p>In all cases, practical assessment should be supported by questions to assess underpinning knowledge and those aspects of competency which are difficult to assess directly. Questioning techniques should suit the language and literacy levels of the candidate.</p>
Guidance information for assessment	<p>Industry representatives have provided case studies to illustrate the practical application of this unit of competency and to show its relevance in a workplace setting. These can be sourced from the National Measurement Institute.</p>

Range Statement

RANGE STATEMENT	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
<p><i>Appropriate information</i> may include:</p> <p>Note: Where reference is made to information, it is expected the most up-to-date information will be used.</p>	<ul style="list-style-type: none"> • reference standard • certificates of verification • certificates of approval for measuring instruments • test procedures for measuring instruments • organisational test reports • organisational procedures, such as those found in company quality assurance manuals • national measurement legislation • OHS regulations, guidelines and procedures • material data safety sheets (MSDS) • equipment manuals and warranties • supplier catalogues and handbooks.
<p><i>Test equipment</i> may include:</p>	<ul style="list-style-type: none"> • reference standards of measurement • equipment, such as: <ul style="list-style-type: none"> • control instruments • weighing instruments • pumping units • two-way communication • hoses and fittings • rail wagons, trains and tankers • LPG cylinders.
<p><i>Legislation</i> may include:</p>	<ul style="list-style-type: none"> • national measurement legislation • applicable commonwealth, state and territory OHS legislation.
<p><i>Relevant information</i> may include:</p>	<ul style="list-style-type: none"> • test reports • safety procedures • history of equipment calibration and test results.
<p><i>Prescribed performance criteria</i> for instruments may include:</p>	<ul style="list-style-type: none"> • criteria described in national measurement legislation • certificates of approval • national test procedure • organisational policy and procedures.
<p><i>Remedial action</i> may</p>	<ul style="list-style-type: none"> • rectification advice.

RANGE STATEMENT	
include:	
<i>Enforcement action</i> may include:	<ul style="list-style-type: none"> • formal warnings • infringement notices • formal undertakings • injunctions • prosecution • varying, suspending or cancelling a licence.

PSPREG601B Manage regulatory compliance

Modification History

Not applicable.

Unit Descriptor

Unit descriptor

This unit covers management of regulatory compliance - a management role with responsibility for regulatory officers who enforce and promote compliance with legislation. It includes interpreting and advising on enabling and related legislation; developing and implementing strategies to promote long-term voluntary compliance and develop a culture of compliance in the community; and providing strategic advice on compliance matters.

In practice, managing regulatory compliance may overlap with other public sector work activities such as managing ethical behaviour; managing diversity, risk, resources; persuading and influencing opinion, etc.

This unit replaces and is equivalent to *PSPREG601A Manage regulatory compliance*.

Application of the Unit

Not applicable.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

Employability skills This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements are the essential outcomes of the unit of competency. Together, performance criteria specify the requirements for competent performance. Text in *bold italics* is explained in the Range Statement following.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Interpret and advise on enabling and related legislation	<p>1.1 Non-routine or <i>complex matters</i> related to enabling and related <i>legislation</i> are resolved or referred in accordance with organisational procedures</p> <p>1.2 Advice is provided to clients and staff that is timely, consistent and constructive, and within level of authority</p> <p>1.3 Feedback is obtained on client level of understanding, and additional information or explanation is provided to clarify issues</p> <p>1.4 Staff understanding of legislation and procedures is monitored and action to address professional development needs is timely and in accordance with organisational procedures</p>
2. Develop and implement compliance strategies	<p>2.1 <i>Strategies</i> and <i>measures</i> to influence long-term voluntary compliance are identified and implemented to suit the audience and the context</p> <p>2.2 Information that is current and promotes the benefits of compliance is provided to clients</p> <p>2.3 Strategies are developed in accordance with government and organisational policy and practice</p> <p>2.4 Information and strategies are adjusted in response to feedback gathered from a range of stakeholders</p>
3. Provide strategic advice on compliance matters	<p>3.1 Client/government information requirements are confirmed</p> <p>3.2 Advice is provided based on current information and meets the specific needs of clients in its range, depth and form of presentation</p> <p>3.3 Presentation standards are maintained in accordance with organisational guidelines</p> <p>3.4 Feedback is obtained on how well the advice/information suits its purpose and audience, and is used to recommend further action</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the essential skills and knowledge and their level, required for this unit.

Skill requirements

Look for evidence that confirms skills in:

undertaking planning and information analysis

engaging in mentoring and coaching

interpreting complex written materials

preparing written reports requiring formal structure and language

providing oral advice to a range of audiences requiring adaptation of style and language

using active listening and questioning to confirm understanding

responding to diversity, including gender and disability

applying occupational health and safety and environment legislation in the context of regulatory compliance management

Knowledge requirements

Look for evidence that confirms knowledge and understanding of:

enabling legislation

aspects of common law

strategic management of regulatory compliance

equal employment opportunity, equity and diversity principles

organisational reporting procedures

public sector policy and legislation including occupational health and safety and environment relating to the management of regulatory compliance

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the Unit descriptor, Performance Criteria, the Range Statement and the Assessment Guidelines for the Public Sector Training Package.

Units to be assessed together

- *Pre-requisite* units that must be achieved prior to this unit: *Nil*
- *Co-requisite* units that must be assessed with this unit: *Nil*
- *Co-assessed units* that may be assessed with this unit to increase the efficiency and realism of the assessment process include, but are not limited to:

PSPETHC601B Maintain and enhance confidence in public service

PSPGOV601B Apply government systems

PSPLEGN601B Manage compliance with legislation in the public sector

PSPMNGT602B Manage resources

PSPMNGT605B Manage diversity

PSPMNGT608B Manage risk

PSPPOL603A Manage policy implementation

PSPREG602B Evaluate regulatory compliance

Overview of evidence requirements

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms:

- the knowledge requirements of this unit
- the skill requirements of this unit
- application of the Employability Skills as they relate to this unit (see Employability Summaries in Qualifications Framework)
- management of regulatory compliance in a range of (3 or more) contexts (or occasions over time)

These resources include:

Resources required to carry out assessment

- legislation, policy, procedures and protocols relating to regulatory compliance in the public sector
- enabling legislation
- relevant aspects of common law
- case studies and workplace scenarios to capture the range of situations likely to be encountered when managing regulatory compliance

Where and how to assess evidence

Valid assessment of this unit requires:

- a workplace environment or one that closely resembles normal

EVIDENCE GUIDE

work practice and replicates the range of conditions likely to be encountered when managing regulatory compliance, including coping with difficulties, irregularities and breakdowns in routine

- management of regulatory compliance in a range of (3 or more) contexts (or occasions over time)

Assessment methods should reflect workplace demands, such as literacy, and the needs of particular groups, such as:

- people with disabilities
- people from culturally and linguistically diverse backgrounds
- Aboriginal and Torres Strait Islander people
- women
- young people
- older people
- people in rural and remote locations

Assessment methods suitable for valid and reliable assessment of this competency may include, but are not limited to, a combination of 2 or more of:

- case studies
- portfolios
- projects
- questioning
- scenarios
- authenticated evidence from the workplace and/or training courses

For consistency of assessment

Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments

Range Statement

RANGE STATEMENT

The Range Statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The Range Statement also provides a focus for assessment. It relates to the unit as a whole. Text in *italics* in the Performance Criteria is explained here.

Complex matters may include

- conflicting legislation
- unclear or ambiguous guidelines
- use of legal precedents
- regional or national issues
- issues not previously encountered
- 'red herring' issues

Legislation may include

- enabling legislation, such as that dealing with:
- audit, customs and excise, quarantine, fisheries, agriculture, land management, conservation, coastal management, environmental protection, environment, insurance, legal administration (sheriffs, young offenders), workers compensation, occupational safety and health, workplace relations
- public sector management, financial management
- auditor general
- planning, construction, transport, energy, mining, resource management, communications
- family services, employment, equal employment opportunity and anti-discrimination
- aspects of common law
- contract law
- administrative law
- equal employment opportunity and anti-discrimination law

Strategies may include

- public education campaigns
- culture change programs
- redesign of organisational documents
- incentive programs
- web site
- help desk
- staff training
- policy changes
- awareness-raising consultations with client groups

Measures may include

- evaluation criteria against strategic goals/targets/required policy outcomes
- quantitative, such as:
- reported injuries/deaths, workers compensation claims and premiums (workplace safety)
- illegal imports (customs)
- exotic diseases (quarantine)
- amount of land affected by salinity (land management)
- qualitative, such as:
- client satisfaction (relevant to all regulatory areas)

PSPREG602B Evaluate regulatory compliance

Modification History

Not applicable.

Unit Descriptor

Unit descriptor

This unit covers evaluation of compliance outcomes, and review of regulatory policies, procedures and legislation to improve compliance outcomes. This is typically performed by a manager with responsibility for regulatory officers who enforce and promote compliance with the organisation's enabling legislation (such as customs, quarantine, workplace safety, equal employment opportunity, agriculture, environmental protection, etc). It includes developing compliance measures/targets, evaluating the extent of compliance, reviewing procedures and guidelines to improve compliance, and contributing to new legislation or the review of existing legislation.

In practice, evaluation of regulatory compliance may overlap with other public sector work activities such as managing ethical behaviour and compliance with public sector legislation, managing diversity, risk, resources, etc.

This unit replaces and is equivalent to *PSPREG602A Evaluate regulatory compliance*.

Application of the Unit

Employability Skills Information

Employability skills This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements are the essential outcomes of the unit of competency. Together, performance criteria specify the requirements for competent performance. Text in *bold italics* is explained in the Range Statement following.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Develop compliance measures/targets	1.1 Compliance <i>measures</i> are developed that are valid, reliable, sufficient and both time and cost effective 1.2 Realistic measures/targets are developed underpinned by current information
2. Evaluate extent of compliance	2.1 Analysis of compliance data is valid and conclusions are unbiased and supported by evidence 2.2 Interpretation of comparative data over time is valid and reliable and outcomes are recorded in accordance with <i>legislative and policy</i> requirements 2.3 Compliance outcomes are reported in accordance with organisational and legislative requirements
3. Review procedures and guidelines to improve compliance	3.1 A variety of sources of information representing the breadth of possible <i>stakeholders</i> is drawn on to ensure review is comprehensive 3.2 Possible reasons for not meeting targets/performance indicators are identified and recommendations are made to improve long-term voluntary compliance 3.3 Adjustments of strategies and plans are made to address review recommendations in accordance with government policy requirements and resource constraints
4. Contribute to new legislation or review of existing legislation	4.1 Input is provided that supports government policy directions and relies on current information with supporting reasons and data analysis 4.2 Resource implications of legislative recommendations are made within government policy requirements

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the essential skills and knowledge and their level, required for this unit.

Skill requirements

Look for evidence that confirms skills in:

- undertaking information analysis
- interpreting complex written and numerical materials
- preparing written reporting requiring formal structure and language
- responding to diversity, including gender and disability
- applying occupational health and safety and environment legislation in the context of regulatory compliance

Knowledge requirements

Look for evidence that confirms knowledge and understanding of:

- enabling legislation
- government policies
- principles of evaluation
- equal employment opportunity, equity and diversity principles
- public sector policy and legislation including occupational health and safety and environment relating to the evaluation of regulatory compliance

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the Unit descriptor, Performance Criteria, the Range Statement and the Assessment Guidelines for the Public Sector Training Package.

Units to be assessed together

- *Pre-requisite* units that must be achieved prior to this unit: *Nil*
- *Co-requisite* units that must be assessed with this unit: *Nil*
- *Co-assessed units* that may be assessed with this unit to increase the efficiency and realism of the assessment process include, but are not limited to:

PSPETHC601B Maintain and enhance confidence in public service

PSPGOV601B Apply government systems

PSPLEGN601B Manage compliance with legislation in the public sector

PSPMNGT602B Manage resources

PSPMNGT605B Manage diversity

PSPMNGT608B Manage risk

PSPMNGT611A Manage evaluations

PSPPOL603A Manage policy implementation

PSPREG601B Manage regulatory compliance

Overview of evidence requirements

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms:

- the knowledge requirements of this unit
- the skill requirements of this unit
- application of the Employability Skills as they relate to this unit (see Employability Summaries in Qualifications Framework)
- evaluation of regulatory compliance in a range of (2 or more) contexts (or occasions, over time)

Resources required to carry out assessment

These resources include:

- legislation, policy, procedures and protocols relating to regulatory compliance in the public sector
- relevant aspects of common law
- case studies and workplace scenarios to capture the range of situations likely to be encountered when evaluating regulatory compliance

Where and how to

Valid assessment of this unit requires:

EVIDENCE GUIDE

assess evidence

- a workplace environment or one that closely resembles normal work practice and replicates the range of conditions likely to be encountered when evaluating regulatory compliance, including coping with difficulties, irregularities and breakdowns in routine

PSPREG603A Manage and lead inspection and monitoring programs

Modification History

Not applicable.

Unit Descriptor

Unit descriptor

This unit covers the requirements to manage and lead inspection and monitoring activities in accordance with relevant Acts and regulations.

Typically work is at an experienced, self-directed level with responsibility for outputs and quality improvement. It includes determining inspection and monitoring program requirements, managing and leading inspection and monitoring programs, and managing reporting systems, information and training.

In practice, managing and leading inspection and monitoring programs may overlap with other generalist or specialist public sector workplace activities such as managing compliance with legislation, managing diversity, managing risk, networking, implementing policy, managing client service, managing resources, etc.

This unit is one of five units in the *Regulatory* Competency field that deal with inspection and monitoring. Related units are:

PSPREG201A Carry out inspections and monitoring under guidance

PSPREG301A Undertake routine inspections and monitoring

PSPREG413A Undertake inspections and monitoring

PSPREG503A Supervise and carry out complex inspection

This is a new unit of competency, added to the *Regulatory* Competency field of the Training Package in 2004.

Application of the Unit

Elements and Performance Criteria Pre-Content

Elements are the essential outcomes of the unit of competency. Together, performance criteria specify the requirements for competent performance. Text in *bold italics* is explained in the Range Statement following.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Determine inspection and monitoring program requirements	1.1 Outputs and performance indicators for programs, and <i>inspection and monitoring</i> responsibilities are determined in accordance with organisational requirements 1.2 Strategic, operational, technical, financial and administrative requirements are determined in accordance with organisational and task requirements 1.3 Operational and procedural assessments are undertaken in accordance with organisational policy and procedures and recommendations are made for quality improvement 1.4 <i>Legislation</i> and regulations are interpreted and recommendations are made on related policies and procedures 1.5 Risk management practices, occupational health and safety and environmental requirements are interpreted and explained to staff in accordance with their needs
2. Manage and lead inspection and monitoring programs	2.1 Leadership is provided and <i>individuals</i> are assisted to deliver agreed outputs in accordance with the organisation's business requirements 2.2 <i>Inspection and monitoring</i> programs are managed and program performance, resources and expenditure are supervised in accordance with organisational requirements 2.3 Policy and procedures are developed for dealing with non-compliance through information, development/extension activities and prosecution in accordance with organisational requirements 2.4 <i>Compliance programs</i> are managed as required in accordance with set procedures and timelines 2.5 Implementation of the performance management system for inspection/monitoring staff is managed in accordance with organisational policies and procedures 2.6 Legislative requirements, risk management practices, occupational health and safety and environmental procedures are enforced in accordance with organisational requirements
3. Manage reporting systems, information and training	3.1 <i>Records</i> management and reporting systems are managed in accordance with organisational policy and performance indicators 3.2 <i>High-level correspondence and advice</i> , submissions and reports are prepared in accordance with organisational requirements 3.3 Evidence is prepared in accordance with organisational policy and procedures for legal action under relevant legislation 3.4 Inspection/monitoring training is monitored and initiatives to improve staff performance are developed and implemented in

ELEMENT

PERFORMANCE CRITERIA

accordance with organisational requirements

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the essential skills and knowledge and their level, required for this unit.

Skill requirements

Look for evidence that confirms skills in:

- demonstrating leadership and performance management in the context of inspection and monitoring
- undertaking risk management and problem solving
- communicating with a diverse range of clients and staff
- responding to diversity, including gender and disability
- writing reports, submissions and Ministerial correspondence, requiring discretion and judgment to determine content and style audience approach
- dealing with referrals from other staff on matters that are more difficult, or of potential interest to external parties such as the media, public, political parties etc
- using computers for word processing and records management
- applying public sector legislation such as occupational health and safety and environment in the context of inspection and monitoring

Knowledge requirements

Look for evidence that confirms knowledge and understanding of:

- interpretation, application, evaluation and review of enabling legislation and regulations
- performance and procedural assessment strategies
- performance indicators
- organisational policy and procedures
- inspection procedures
- monitoring procedures
- responses to complex/serious non-compliance
- elements of an offence
- rules of evidence
- equity and diversity principles
- workplace and industry environment
- public sector legislation including occupational health and safety, environment, privacy etc

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the Unit descriptor, Performance Criteria, the Range Statement and the Assessment Guidelines for the Public Sector Training Package.

Units to be assessed together

- *Pre-requisite* units that must be achieved prior to this unit: *Nil*
- *Co-requisite* units that must be assessed with this unit: *Nil*
- *Co-assessed units* that may be assessed with this unit to increase the efficiency and realism of the assessment process include, but are not limited to:

PSPETHC601B Maintain and enhance confidence in public service

PSPLEGN601B Manage compliance with legislation in the public sector

PSPGOV602B Establish and maintain strategic networks

PSPMNGT602B Manage resources

PSPMNGT605B Manage diversity

PSPMNGT606B Manage quality client service

PSPMNGT608B Manage risk

PSPPOL603A Manage policy implementation

PSPREG601B Manage regulatory compliance

PSPREG602B Evaluate regulatory compliance

Overview of evidence requirements

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms:

- the knowledge requirements of this unit
- the skill requirements of this unit
- application of the Employability Skills as they relate to this unit (see Employability Summaries in Qualifications Framework)
- performance at an experienced, self-directed level in managing and leading inspection and monitoring programs undertaken in a range of (3 or more) contexts (or occasions, over time)

Resources required to carry out assessment

These resources include:

- legislation, policy, procedures and protocols relating to inspection and monitoring
- case studies and workplace scenarios to capture the range of situations likely to be encountered when managing and leading inspection and monitoring programs

EVIDENCE GUIDE

Where and how to assess evidence

Valid assessment of this unit requires:

- a workplace environment or one that closely resembles normal work practice and replicates the range of conditions likely to be encountered when managing and leading inspection and monitoring programs, including coping with difficulties, irregularities and breakdowns in routine
- performance at an experienced, self-directed level in managing and leading inspection and monitoring programs undertaken in a range of (3 or more) contexts (or occasions, over time)

Assessment methods should reflect workplace demands, such as literacy, and the needs of particular groups, such as:

- people with disabilities
- people from culturally and linguistically diverse backgrounds
- Aboriginal and Torres Strait Islander people
- women
- young people
- older people
- people in rural and remote locations

Assessment methods suitable for valid and reliable assessment of this competency may include, but are not limited to, a combination of 2 or more of:

- case studies
- portfolios
- questioning
- scenarios
- authenticated evidence from the workplace and/or training courses

For consistency of assessment

Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments

Range Statement

RANGE STATEMENT

The Range Statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The Range Statement also provides a focus for assessment. It relates to the unit as a whole. Text in *italics* in the Performance Criteria is explained here.

Inspection and monitoring may include

- inspections/examinations
- monitoring
- surveillance
- audits
- remote monitoring
- other compliance assurance activities

Legislation may include

- Commonwealth legislation and regulations, for example:
- Commonwealth Quarantine Act 1908, proclamations and regulations
- Crimes Act 1914 and Criminal Code Act 1995
- Customs Act 1901 and regulations
- Wildlife Protection Act 1982
- Export Control Act 1982
- Imported Foods Act 1996
- Occupational Health and Safety Act 1988
- State, Territory and Local Government legislation and regulations, such as those relating to:
 - agriculture
 - horticulture
 - conservation and land management
 - fisheries
 - environmental protection
 - building
 - water
 - emergencies
- international legislation/codes of behaviour

Individuals may include

- inspection/monitoring staff
- other supervised staff
- contract workers
- consultants
- service providers
- super-ordinates
- clients

RANGE STATEMENT

Inspection and monitoring activities may relate to

- members of the industry
- members of the public
- personnel from other government departments
- aircraft
- airfreight
- animal products
- animals
- cargo
- cereals
- collection of biological specimens
- disposal of organic waste
- fresh produce
- goods
- land condition, such as:
 - topography
 - salinity
 - erosion
 - weed infestation
 - vermin infestation
 - fire hazard
 - over grazing
- land improvements, such as:
 - fences
 - buildings
 - sporting or playground equipment
 - irrigation infrastructure
 - sewerage infrastructure
 - waterfront occupations
 - community structures
 - land usage
- leases and other tenures, to ensure compliance with conditions
- licence/permit compliance (eg vegetation clearing)
- live fish
- livestock
- mail
- mineral samples
- passenger baggage
- people
- pests
- plant products

RANGE STATEMENT

- plants
 - premises
 - properties
 - reserves and their use/s
 - survey activities to maintain readiness for district emergency plans
 - vector monitoring
 - vessels
 - audit
 - monitoring
 - treatment
 - containment
 - control
 - eradication
 - destruction
- Compliance programs may include*
- notes
 - case files
 - statistics
 - forms (application forms, disease notification forms)
 - notices (seizure notice, infringement notice)
 - invoices
 - receipts
- Records may include*
- input to policy reviews
 - input to legislation/regulations
 - support to senior management
 - Ministerials
- High-level correspondence and advice may include*

PSPREG701A Manage investigations program

Modification History

Not applicable.

Unit Descriptor

Unit descriptor

This unit covers management of an organisation's investigations program where investigations may be conducted internally, externally or referred to other law enforcement agencies. It includes articulating and authorising an investigations strategy, evaluating investigation processes and the outcomes of investigations, handling complaints, authorising investigations, changing the strategic direction of investigations, and building links at policy level with other organisations and policy makers.

In practice, managing investigations may overlap with other generalist or specialist public sector workplace activities such as managing compliance with legislation, managing diversity, managing risk, networking, implementing policy, managing client service, directing project activities, managing resources, etc.

This unit replaces and is equivalent to PSPFRAU604A Manage fraud investigations program.

Application of the Unit

Not applicable.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

Employability skills This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements are the essential outcomes of the unit of competency. Together, performance criteria specify the requirements for competent performance. Text in *bold italics* is explained in the Range Statement following.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Articulate and authorise investigations strategy	<p>1.1 Investigations strategy is linked to objectives of the organisation's overall compliance strategy</p> <p>1.2 Strategy is used to communicate the roles of staff in investigations including their functions, responsibilities and rights</p> <p>1.3 Policy and procedures are developed to enable staff to conduct successful investigations and meet organisational objectives</p> <p>1.4 Guidelines are developed to assist decision making on whether particular investigations should be conducted in-house or <i>through other avenues</i></p> <p>1.5 Documented organisational procedures for handling investigations are included in guidelines</p> <p>1.6 Staff training and maintenance of standards are addressed in the development of the guidelines</p>
2. Evaluate process of investigations	<p>2.1 Scheduled times for evaluation and review are established in accordance with organisational policy and procedures</p> <p>2.2 Consultation, review and development processes are developed and communicated in accordance with organisational policy and procedures</p> <p>2.3 Quality assurance review programs are established to ensure the integrity of policy and procedures is maintained or enhanced</p> <p>2.4 Data from performance measures is used to validate investigation processes against best practice, noting areas where improvements are needed as part of quality implementation</p> <p>2.5 Recommendations to improve organisational <i>guidelines</i> are compared with legislative and judicial standards, to improve consistency with external benchmarks</p> <p>2.6 Statutory reporting obligations are managed in accordance with organisational policy and procedures</p>
3. Evaluate outcomes of investigations	<p>3.1 Resolution rate of investigations, reasons for lack of resolution and time taken to complete investigations are reported on and analysed for improvement</p> <p>3.2 Strategic directions are amended where necessary to improve the rate of investigation resolution and the time taken for investigations to be completed</p>
4. Handle complaints	<p>4.1 Strategies are established to handle a range of situations that may impact on the reputation of the organisation</p> <p>4.2 Policy and procedures are implemented to facilitate the timely reporting to senior management of potentially serious situations</p>
5. Authorise	<p>5.1 Authority levels are determined to reflect structure and</p>

ELEMENT	PERFORMANCE CRITERIA
investigations	<p>reporting lines within the organisation, jurisdictional and legislative requirements</p> <p>5.2 Decisions regarding the allocation of investigative tasks to internal or external investigation personnel are based on organisational guidelines</p> <p>5.3 Any request for authorisation by senior management is accompanied by sufficient information to facilitate effective and timely decision making</p>
6. Change strategic direction of investigations	<p>6.1 Broader policy directives are balanced with needs and demands within the organisation</p> <p>6.2 Any exemptions to established policy are authorised after full consideration of impact on the organisation, legal ramifications and reasons for exemption</p>
7. Build links at policy level with other organisations and policy makers	<p>7.1 Opportunities for liaison with other investigations managers are used to extend knowledge and improve links within the profession</p> <p>7.2 Staff are encouraged to build relationships with peers in other organisations</p> <p>7.3 Opportunities are taken to promote the organisation and the investigations profession with policy makers and the public</p> <p>7.4 Relationships with other key law enforcement agencies and standards setting organisations are established and maintained</p> <p>7.5 Relationships with other relevant stakeholders are established and maintained</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the essential skills and knowledge and their level, required for this unit.

Skill requirements

Look for evidence that confirms skills in:

managing projects

managing systems and processes for effective investigation processes and outcomes

liaising and managing investigations with outside agencies where, for example, investigations are conducted jointly or referred to a police service or contracted to an outside body

undertaking analysis and problem solving, especially when dealing with complaints

using a range of communication styles to suit different audiences and purposes

responding to diversity, including gender and disability

applying occupational health and safety and environmental procedures in the context of investigation management

Knowledge requirements

Look for evidence that confirms knowledge and understanding of:

agency investigation/compliance strategy

agency structure and core business

investigation techniques

an understanding of the relationship of the investigation strategy to the agency's overall strategy and jurisdictional policy and legislative requirements

relevant legislation and policy covering the conduct of investigations, as well as the procedural and offence provisions of specific legislation

legislative reporting requirements to standards setting organisations

public sector legislation relating to investigations management including anti-discrimination and diversity legislation, occupational health and safety and environment

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the Unit descriptor, Performance Criteria, the Range Statement and the Assessment Guidelines for the Public Sector Training Package.

Units to be assessed together

- *Pre-requisite* units that must be achieved prior to this unit: *Nil*
- *Co-requisite* units that must be assessed with this unit: *Nil*
- *Co-assessed units* that may be assessed with this unit to increase the efficiency and realism of the assessment process include, but are not limited to:

PSPETHC701A Lead and influence ethical practice in the public sector

PSPHR703A Provide leadership in strategic human resource management

PSPMNGT701B Provide strategic direction

PSPMNGT702A Influence and shape diversity management

PSPMNGT703A Lead and influence change

PSPMNGT704A Undertake enterprise risk management

Overview of evidence requirements

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms:

- the knowledge requirements of this unit
- the skill requirements of this unit
- application of the Employability Skills as they relate to this unit (see Employability Summaries in Qualifications Framework)
- managing investigations programs relating to a range of (3 or more) contexts

Resources required to carry out assessment

These resources include:

- the organisation's enabling legislation, policy and procedures that provide investigation powers
- investigation guidelines and standards
- public sector values and codes of conduct
- case studies and workplace scenarios to capture the range of situations likely to be encountered when managing investigations programs

Where and how to assess evidence

Valid assessment of this unit requires:

- a workplace environment or one that closely resembles normal work practice and replicates the range of conditions likely to be encountered when managing investigations programs, including

EVIDENCE GUIDE

coping with difficulties, irregularities and breakdowns in routine

- managing investigations programs relating to a range of (3 or more) contexts

Assessment methods should reflect workplace demands, such as literacy, and the needs of particular groups, such as:

- people with disabilities
- people from culturally and linguistically diverse backgrounds
- Aboriginal and Torres Strait Islander people
- women
- young people
- older people
- people in rural and remote locations

Assessment methods suitable for valid and reliable assessment of this competency may include, but are not limited to, a combination of 2 or more of:

- case studies
- portfolios
- questioning
- scenarios
- authenticated evidence from the workplace and/or training courses

For consistency of assessment

Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments

Range Statement

RANGE STATEMENT

The Range Statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The Range Statement also provides a focus for assessment. It relates to the unit as a whole. Text in *italics* in the Performance Criteria is explained here.

- Other avenues for conducting investigations may include*
- joint operations
 - referral to other agencies
 - private investigators
- Guidelines may include*
- those produced by standards setting organisations relevant to the jurisdiction

Unit Sector(s)

Competency field

Competency field Regulatory

PSPREV401A Identify and apply statute law

Modification History

Not applicable.

Unit Descriptor

Unit descriptor

This unit covers the identification of statute law and how it applies to a range of situations affecting customers.

In practice, applying statute law overlaps with other generalist or specialist work activities, such as acting ethically; undertaking legislative decision making; dealing with legal entities, relationships and property; assessing applications for grants, subsidies and rebates; and delivering client service. Co-assessment with units of competency addressing these other activities could be considered.

Application of the Unit

Application of the unit

In the workplace, staff must be able to identify and apply the statute law applicable to a range of situations affecting customers. Staff may develop a good understanding of the way laws are created, enacted, amended and interpreted within parliament and the courts in order to apply them to their work.

Knowing the structure and purpose of the different components of an Act allows staff to navigate efficiently to find the specific information they require. In complex situations they must be able to use explanatory statements to determine the intent of parliament with regard to the interpretation of particular statutes. The principles governing the interpretation of statutes are important, as are the use of precedents, rulings, Commissioner's practices and the relevant Interpretation Act.

Licensing/Regulatory Information

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Where *italicised* text is used, further information is detailed in the required skills and knowledge and/or the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT

PERFORMANCE CRITERIA

ELEMENT

PERFORMANCE CRITERIA

1. Identify applicable statute law

- 1.1 *Principal rules* governing the interpretation of statutes are applied.
- 1.2 Statutes are analysed to identify *components* applicable to the *situation* at hand.

2. Apply statute law

- 2.1 Information on the creation, amendment and interpretation of laws is used to assist in identifying applicable bills, Acts and subordinate legislation.
- 2.2 Interpretation Act is used in accordance with its purpose.
- 2.3 Statutes are interpreted and applied in accordance with precedents, *rulings* and *Commissioner's practices*.
- 2.4 *Explanatory statements* are used to assist in determining the intent of Parliament when interpreting complex statutes that apply to particular situations.
- 2.5 Reference is made to relevant case law and other *extraneous material* as required.
- 2.6 Records that cite applicable statute law are completed using *commonly accepted practices* and *abbreviations* in accordance with organisational policy and procedures.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the essential skills and knowledge and their level, required for this unit.

Required skills:

Look for evidence that confirms skills in:

- searching for and identifying applicable statute laws, rulings, precedents and Commissioner's practices
- reading, analysing and interpreting complex, formal documents, such as legislation, regulations, explanatory statements, rulings and Commissioner's practices and applying them to work situations
- recording references to statutes using commonly accepted practices and abbreviations
- communicating with others involving exchanges of complex oral and written information
- responding to diversity, including gender and disability
- using technology to access applicable statutes and record outcomes
- applying environmental, sustainability and occupational health and safety procedures to administrative and IT-related work.

Required knowledge:

Look for evidence that confirms knowledge and understanding of:

- law-making processes in Australia
- structure and components of an Act
- primary and secondary sources of law
- principal rules governing the interpretation of statute law
- the doctrine of precedent
- purpose and use of Interpretation Act
- abbreviations and commonly accepted practices used in citing statute law.

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the unit descriptor, performance criteria, The range statement and the Assessment Guidelines for the Public Sector Training Package.

EVIDENCE GUIDE

Units to be assessed together

Co-assessed units that may be assessed with this unit to increase the efficiency and realism of the assessment process include:

- PSPETHC401A Uphold and support the values and principles of public service
- PSPREV402A Undertake legislative decision making
- PSPREV403A Manage information on legal entities, relationships and property
- PSPREV405A Assess applications for grants, subsidies and rebates
- PSPGOV402B Deliver and monitor service to clients.

Overview of evidence requirements

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms:

- knowledge requirements of this unit
- skill requirements of this unit
- application of employability skills as they relate to this unit.

Resources required to carry out assessment

Resources essential for assessment include:

- government legislation, regulations, rulings, Commissioner's practices and other applicable case law
- organisational procedures and protocols relating to the application of statute law
- scenarios and case studies to capture the range of situations likely to be encountered when applying statute law
- access to relevant systems.

Where and how to assess evidence

Valid assessment of this unit requires:

- a workplace environment or one that closely resembles normal work practice and replicates the range of conditions likely to be encountered when applying statute law, including coping with difficulties, irregularities and breakdowns in routine
- applying statute law in a range of three or more contexts or occasions, over time.

Assessment methods should reflect but not exceed workplace demands, such as literacy, and the needs of individuals who might be disadvantaged.

Assessment methods suitable for valid and reliable assessment of this unit must use authenticated evidence from the workplace and/or training courses and may include a combination of two or more of:

- workplace projects
- simulation or role plays

EVIDENCE GUIDE

- case studies and scenarios
- observation.
- portfolios.

The assessment environment should not disadvantage the candidate and where the person has a disability the principle of reasonable adjustment should be applied during assessment.

For consistency of assessment

Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments.

Range Statement

RANGE STATEMENT

The range statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The range statement also provides a focus for assessment. It relates to the unit as a whole. Text in *italics* in the Performance criteria is explained here.

RANGE STATEMENT

Components of statutes may include

- long and short titles
- commencement date
- end date
- preambles
- definitions
- head notes and headings
- parts
- divisions
- chapters
- sections
- subsections
- paragraphs
- subparagraphs
- historical notes
- clause notes
- editorial and explanatory notes
- schedules
- statutory regulations
- amendment information
- amending Acts
- version or reprint number
- nexus

Situations may include

- assessment of applications for grants, subsidies or rebates
- assessment of tax liability
- issue and enforcement of fines
- legislative decision making
- providing customers with information and assistance

Principal rules may include

- literal
- golden
- mischief
- spirit (intent) of the legislation

Interpretation Act

- will be the relevant legislation in the applicant's jurisdiction and will be the Commonwealth Act or the state or territory Act

Rulings may include

- revenue rulings
- tax rulings
- public rulings
- circulars
- Commissioner's determinations

Commissioner's practices

- practices designated by Commissioner of Revenue or Australian Taxation Commissioner

RANGE STATEMENT*may include*

- Commissioner's Guidelines and Circulars
- Practice Directions
- public guidelines
- public practices
- Treasurer's directions
- business rules
- circulars
- operating policies
- technical and procedural instructions

*Explanatory statements
may include*

- explanatory memoranda
- clause notes
- explanatory notes

*Extraneous materials
may include*

- rulings
- published practices
- circulars
- revenue circulars
- public rulings
- case transcripts
- regulations
- precedent databases
- technical and procedural instructions
- operating policies and procedures
- internal procedures
- forms and brochures
- fact sheets
- organisational alerts
- training materials
- readings in Parliament
- subordinate legislation
- disallowable and notifiable instruments
- legislation register
- other relevant legislation

*Commonly accepted
practices use*

- consecutive numbering for sections of an Act - no brackets
- consecutive numbering in brackets for subsections
- lower case alphabetical order in brackets for paragraphs
- consecutive numbering using lower case Roman numerals in brackets for subparagraphs

*Abbreviations may
include*

- sec., s. and s for section
- subsec., ss. and ss for subsection
- para for paragraph

Competency field

Competency field Revenue Administration

PSPREV402A Undertake legislative decision making

Modification History

Not applicable.

Unit Descriptor

Unit descriptor

This unit covers the application of a legislative decision making process to make and justify legislatively-based decisions.

In practice, undertaking legislative decision making overlaps with other generalist or specialist work activities, such as acting ethically; applying statute law; dealing with legal entities, relationships and property; assessing applications for grants, subsidies or rebates; and delivering client service.

Co-assessment with units of competency addressing these other activities could be considered.

Application of the Unit

Application of the unit

In the workplace, staff are required to undertake legislative decision making that is consistent, defensible and well documented to provide grounds for assessment where decisions are subject to review and where disputes may arise. Typically, the decision making process is, or will become, integrated into work practices as a normal way of working when legislative decisions need to be made, even when those decisions do not require formal documentation.

Staff must be able to use a legislative decision making process to undertake required research and make and record decisions that meet the public sector's requirements for consistency and legislative defensibility.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

Elements and Performance Criteria Pre-Content

Elements are the essential outcomes of the unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Where *italicised* text is used, further information is detailed in the required skills and knowledge and/or the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT

PERFORMANCE CRITERIA

ELEMENT**PERFORMANCE CRITERIA****1. Identify requirements for legislative decision making**

- 1.1 Purpose and key elements of legislative decision making process are identified and clarified to ensure its consistent application in accordance with organisational and legislative requirements.
- 1.2 Record-keeping procedures relating to legislative decision making are identified in accordance with organisational procedures and legislative requirements.

2. Complete required research

- 2.1 Situation or event requiring a decision is identified and clearly outlined in accordance with organisational and legislative requirements.
- 2.2 Applicable statute law is determined and sections of the Acts that link to the decision are identified and recorded.
- 2.3 Relevant case law and other *extraneous material* are identified.
- 2.4 *Evidence* to support situation or event is recorded and analysed with respect to applicable law.
- 2.5 Conclusions are drawn as to whether required facts have been established by available evidence and are recorded.
- 2.6 Statute law is applied using precedents, *rulings*, *Commissioner's practices*, internal advice, other legislation and advice from senior and specialist staff when required.

3. Carry out the decision making phase

- 3.1 Delegation to make the decision is confirmed or decision is referred according to organisational delegation protocols.
- 3.2 Based on research outcomes and established facts, decision is made and supported by explanation and justification.
- 3.3 Decision is documented in accordance with organisational and legislative requirements.
- 3.4 *Actions* as a result of the decision are carried out and recorded in accordance with organisational and legislative requirements.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the essential skills and knowledge and their level, required for this unit.

Required skills:

Look for evidence that confirms skills in:

- researching information and establishing relevant facts
- identifying and interpreting applicable statute law
- navigating complex and formal documents, such as legislation and related materials to use in legislative decision making
- analysing evidence to ensure it supports the situation or event being considered
- communicating with others involving exchanges of complex oral and written information
- using technology to conduct research, make enquiries, review available data, access legislative requirements and record outcomes
- responding to diversity, including gender and disability, when requesting information or notifying decisions
- applying environmental and occupational health and safety procedures to administrative work and when dealing with customers.

Required knowledge:

Look for evidence that confirms knowledge and understanding of:

- purpose and key elements of a legislative decision making process
- components and structure of statutes
- interpretation of statutes
- use of precedents, rulings and Commissioner's practices
- exercise of delegations in relation to undertaking legislative decision making.

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the unit descriptor, performance criteria, The range statement and the Assessment Guidelines for the Public Sector Training Package.

EVIDENCE GUIDE

Units to be assessed together

Co-assessed units that may be assessed with this unit to increase the efficiency and realism of the assessment process include:

- PSPETHC401A Uphold and support the values and principles of public service
- PSPREV401A Identify and apply statute law
- PSPREV403A Manage information on legal entities, relationships and property
- PSPREV405A Assess applications for grants, subsidies and rebates
- PSPGOV402B Deliver and monitor service to clients.

Overview of evidence requirements

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms:

- knowledge requirements of this unit
- skill requirements of this unit
- application of employability skills as they relate to this unit.

Resources required to carry out assessment

Resources essential for assessment include:

- legislative decision making process
- government legislation, regulations, rulings, Commissioner's practices and other applicable case law relating to legislative decision making
- organisational procedures and protocols relating to legislative decision making
- scenarios and case studies to capture the range of situations likely to be encountered when undertaking legislative decision making
- access to relevant systems.

Valid assessment of this unit requires:

Where and how to assess evidence

- a workplace environment or one that closely resembles normal work practice and replicates the range of conditions likely to be encountered when undertaking legislative decision making, including coping with difficulties, irregularities and breakdowns in routine
- undertaking legislative decision making in a range of three or more contexts or occasions, over time.

Assessment methods should reflect but not exceed workplace demands, such as literacy, and the needs of individuals who might be disadvantaged.

Assessment methods suitable for valid and reliable assessment of this unit must use authenticated evidence from the workplace and/or training courses and may include a combination of two or

EVIDENCE GUIDE

more of:

- workplace projects
- simulation or role plays
- case studies and scenarios
- portfolios.

The assessment environment should not disadvantage the candidate and where the person has a disability the principle of reasonable adjustment should be applied during assessment.

For consistency of assessment

Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments.

Range Statement

RANGE STATEMENT

The range statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The range statement also provides a focus for assessment. It relates to the unit as a whole. Text in *italics* in the Performance criteria is explained here.

RANGE STATEMENT

Extraneous material may include

- published practices
- circulars
- revenue circulars
- public rulings
- case transcripts
- regulations
- judicial decisions
- precedent databases
- technical and procedural instructions
- operating policies and procedures
- internal procedures
- forms and brochures
- fact sheets
- organisational alerts
- training materials
- readings in Parliament
- subordinate legislation
- disallowable and notifiable instruments
- legislation register
- other relevant legislation

Evidence may include

- documents received from the customer to support the situation or event, for example:
- stamp duties:
- offer and acceptance documents
- property purchase applications or offers
- contracts
- mortgage documents
- deeds
- trust deeds
- notices of acquisition
- certificates of title
- court orders
- statutory declarations
- financial statements
- minutes of directors' meetings
- written communication, e.g. forms, letters or emails
- payroll tax:
- financial statements
- written communication, e.g. forms, letters or emails
- trust documents

RANGE STATEMENT

- partnership agreements
 - employment contracts
 - details of share ownership
 - group structure documents
 - constitutions
 - minutes of director's meetings
 - land tax:
 - written communication, e.g. forms, letters or emails
 - tax enquiries
 - evidence of usage
 - certificates of title
 - constitutions
 - notices of acquisition
 - valuation details
 - evidence of ownership (e.g. trust deeds)
 - publications gazetted
 - First Home Owner Grant:
 - offer and acceptance documents
 - property purchase applications or offers
 - contracts
 - certificates of title
 - financial statements
 - written correspondence, e.g. letters, forms or emails
 - applicant identification documents
 - evidence of residence
 - fines:
 - statement of financial circumstances
 - medical reports
 - statutory declarations
 - written correspondence
 - resident or nationality status
 - proof of employment
 - tickets or receipts
 - revenue rulings
 - tax rulings
 - public rulings
 - circulars
 - Commissioner's determinations
- Rulings may include***
- practices designated by Commissioner of Revenue or Australian Taxation Commissioner
- Commissioner's practices may include***

RANGE STATEMENT

- Commissioner's Guidelines and Circulars
 - practice directions
 - public guidelines
 - public practices
 - Treasurer's directions
 - business rules
 - circulars
 - operating policies
 - technical and procedural instructions
- Actions may include*
- notification to the customer of the decision, including reasons for the decision and any rights of review
 - issue or withdrawal of assessments
 - documents embossed or stamped
 - referral to another area for further information or advice
 - request for more information

Unit Descriptor

Unit descriptor

This unit covers the application of the legal principles that apply to legal entities, relationships and property.

In practice, dealing with legal entity, relationship and property issues overlaps with other generalist or specialist work activities, such as acting ethically; undertaking legislative decision making; assessing applications for grants, subsidies or rebates; and delivering client service. Co-assessment with units of competency addressing these other activities could be considered.

Application of the Unit

Application of the unit

In the workplace, staff typically develop sound knowledge of the legal principles that apply to legal entities, relationships and property. They use this knowledge to map the property/assets and interrelationships of legal entities in order to make and justify decisions on liability and compliance.

They must be able to determine the legal entities involved in transactions, identify legal relationships and responsibilities, and determine ownership of property and assets and the interrelationships between property and asset owners.

Licensing/Regulatory Information

Elements and Performance Criteria Pre-Content

Elements are the essential outcomes of the unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Where *italicised* text is used, further information is detailed in the required skills and knowledge and/or the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT

PERFORMANCE CRITERIA

ELEMENT	PERFORMANCE CRITERIA
1. Determine legal entities	<p>1.1 Types of <i>legal entities</i> are identified and <i>features</i> of each confirmed.</p> <p>1.2 <i>Transactions</i> are analysed to determine the legal entities involved.</p> <p>1.3 Liabilities of legal entities are determined in accordance with the particular transactions.</p>
2. Identify and apply information relating to legal relationships	<p>2.1 Formation, type and nature of the <i>legal relationships</i> involved in transactions are identified.</p> <p>2.2 Interrelationships involved in transactions are mapped to guide decision making.</p> <p>2.3 Legal responsibilities of particular relationships are identified in accordance with the particular transactions.</p> <p>2.4 Decisions are made and liabilities determined in accordance with the interrelationships and responsibilities determined.</p>
3. Identify and apply information relating to property and assets of legal entities	<p>3.1 Nature and <i>legal types of property</i>, and the principles relating to them are clarified.</p> <p>3.2 Principles relating to real and personal property, leases, licences and assignment of property are used to map the property and assets of legal entities.</p> <p>3.3 Value of property and nature of <i>ownership</i> are identified.</p> <p>3.4 Mortgages, easements, memorials, restrictive covenants and other relevant documents are identified and analysed for their effect on property ownership.</p> <p>3.5 Property and assets of legal entities are mapped and their interrelationships examined and recorded.</p> <p>3.6 Decisions are made and liabilities determined in accordance with the property and assets of, and relationships between, the legal entities.</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the essential skills and knowledge and their level, required for this unit.

Required skills:

Look for evidence that confirms skills in:

- reading and analysing complex and formal documents, such as contracts, legislation and related materials, to assist in decision making
- explaining differences between different legal entities and impact of those differences on the determination of a tax or duty liability
- communicating with others involving exchanges of complex information when determining legal entities, relationships and property ownership
- using technology to conduct research, make enquiries, review available data, access legislative requirements and record outcomes
- responding to diversity, including gender and disability
- applying environmental and occupational health and safety procedures to administrative work and when dealing with customers.

Required knowledge:

Look for evidence that confirms knowledge and understanding of:

- general features and underlying principles of legal entities and legal relationships
- fundamental nature of property and principles relating to personal or real property, leases, licences and assignment of property
- mortgages, easements, charges, memorials and restrictive covenants
- sources of property law
- features of a partnership
- business processes.

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the unit descriptor, performance criteria, The range statement and the Assessment Guidelines for the Public Sector Training Package.

EVIDENCE GUIDE

Units to be assessed together

Co-assessed units that may be assessed with this unit to increase the efficiency and realism of the assessment process include:

- PSPETHC401A Uphold and support the values and principles of public service
- PSPREV401A Identify and apply statute law
- PSPREV402A Undertake legislative decision making
- PSPREV405A Assess applications for grants, subsidies and rebates
- PSPGOV402B Deliver and monitor service to clients.

Overview of evidence requirements

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms:

- knowledge requirements of this unit
- skill requirements of this unit
- application of employability skills as they relate to this unit.

Resources required to carry out assessment

These resources include:

- examples of legal entity, relationship and property issues
- government legislation, regulations, rulings, Commissioner's practices and other applicable case law that refer to legal entity, relationship and property issues
- organisational procedures and protocols
- scenarios and case studies to capture the range of situations likely to be encountered when dealing with legal entity, relationship and property issues
- access to relevant systems.

Where and how to assess evidence

Valid assessment of this unit requires:

- a workplace environment or one that closely resembles normal work practice and replicates the range of conditions likely to be encountered when legal entities, relationships and property, including coping with ambiguity, difficulties, irregularities and breakdowns in routine
- dealing with legal entities, relationships and property issues in a range of three or more contexts or occasions, over time.

Assessment methods should reflect but not exceed workplace demands, such as literacy, and the needs of individuals who might be disadvantaged.

Assessment methods suitable for valid and reliable assessment of this unit must use authenticated evidence from the workplace and/or training courses and may include a combination of two or more of:

EVIDENCE GUIDE

- case studies and scenarios
- portfolios
- questioning
- simulation or role plays.

The assessment environment should not disadvantage the candidate and where the person has a disability the principle of reasonable adjustment should be applied during assessment.

For consistency of assessment

Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments.

Range Statement

RANGE STATEMENT

The range statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The range statement also provides a focus for assessment. It relates to the unit as a whole. Text in *italics* in the Performance criteria is explained here.

RANGE STATEMENT

Legal entities may include

- the Crown
- corporations
- trustees
- incorporated associations
- cooperatives

Features of legal entities may include

- natural persons:
- ownership of property
- liabilities
- directors
- shares
- bankruptcy
- role of executors and trustees
- minors
- corporations:
- nature
- types
- governing bodies
- process of formation
- liabilities
- receivership
- voluntary and involuntary wind-up

Transactions may include

- purchases and sales of personal and real property
- voluntary dispositions
- transfers of real estate
- transfers of businesses
- transfers of statutory licences
- creation and dissolution of partnerships
- creation and variation to trust deeds
- financial transactions
- charges and discharges
- settlement undertakings
- payment of wages
- leases

Legal relationships may include

- partnerships
- joint ventures
- associations
- trusts
- agencies
- sole traders
- employers and employees

RANGE STATEMENT

- franchisors and franchisees
 - principals and contractors
 - lessors and lessees
 - subsidiaries
 - insolvency practitioners
- Legal types of property may include*
- real property
 - personal property
 - leasehold land
 - freehold land
 - Crown land
 - statutory licences
 - intellectual property
 - goodwill
- Ownership may include*
- as an individual
 - as a corporation
 - as a beneficiary
 - as trustee
 - as joint tenant
 - as tenant in common
 - as lessee
 - as partner
 - legal, beneficial and equitable ownership
 - life tenancy
 - under a Crown lease

Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT

PERFORMANCE CRITERIA

ELEMENT

PERFORMANCE CRITERIA

1. Identify key features of contracts

- 1.1 Contracts are analysed and parties involved in each contract are identified.
- 1.2 Legal nature and *elements of contracts*, terms and obligations are identified in accordance with contract law.
- 1.3 *Conditions, warranties and contingencies* identified in the contract are differentiated.
- 1.4 Circumstances and consequences of terminating contracts are identified.
- 1.5 If contractual rights have been assigned, assignment is confirmed as valid in accordance with applicable legal principles.

2. Assess contracts for eligibility and liability

- 2.1 Contracts are analysed in accordance with criteria using a legislative decision making process.
- 2.2 Eligibility or liability of contracts is confirmed or denied in accordance with applicable statute law and case law.
- 2.3 Decisions are made and notified to customers in accordance with organisational policy and procedures.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the essential skills and knowledge and their level, required for this unit.

Required skills:

Look for evidence that confirms skills in:

- reading and analysing complex and formal documents, such as contracts, legislation and related materials and applying them to work situations
- communicating with others involving exchanges of complex information when gathering information and notifying customers of decisions relating to obligations that have arisen in relation to contracts
- using technology to conduct research, make enquiries, review available data, access legislative requirements and record outcomes
- responding to diversity, including gender and disability, when dealing with customers
- applying environmental and occupational health and safety procedures to administrative work and when dealing with customers.

Required knowledge:

Look for evidence that confirms knowledge and understanding of:

- sources of contract law
- rules of construction of contracts
- privacy doctrine of contracts
- what may constitute a breach of contract
- termination of contract, e.g. by consent, by frustration, etc.
- legislative decision making process
- principles applicable to assignment of contractual rights
- confidentiality provisions.

They allow for different work requirements, work practices and knowledge. The range statement also provides a focus for assessment. It relates to the unit as a whole. Text in *italics* in the Performance criteria is explained here.

RANGE STATEMENT

Elements of a contract include

- parameters of agreement
- consideration
- intention to create legal relations
- impartiality

Conditions are

- important contractual terms in a contract where a breach deprives the innocent party of substantially the whole intended benefit from the contract, and allows the party to terminate the contract and sue for damages

Warranties are

- less important terms in a contract where a breach will not deprive the innocent party of substantially the whole intended benefit from the contract, and will only entitle the innocent party to sue for damages

Contingencies are

- obligations that are conditional upon the happening of a prescribed event

Where *italicised* text is used, further information is detailed in the required skills and knowledge and/or the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT **PERFORMANCE CRITERIA**

ELEMENT**PERFORMANCE CRITERIA****1. Explain grant, subsidy and rebate requirements**

- 1.1 Current and comprehensive information is accessed to clarify legislative, regulatory and procedural requirements of *grants, subsidies and rebates*.
- 1.2 Purpose and *key features* of each grant, subsidy or rebate are explained, tailoring communication to suit diverse customer needs.
- 1.3 Complex enquiries are deferred if necessary until information can be clarified, confirmed or referred to senior or specialist staff in accordance with organisational requirements.
- 1.4 Applicants are informed of any legal requirements and reasons for subjecting applications to compliance investigations, and penalties under legislation for providing false or misleading information or for subsequently failing to meet conditions specified for grant, subsidy or rebate.

2. Check grant, subsidy and rebate applications and supporting evidence

- 2.1 Applications are checked to ensure approved forms are used and required information has been provided in accordance with organisational and legislative requirements.
- 2.2 *Supporting evidence* is sighted and copies of original documents are made and certified, in accordance with organisational policy and procedures, tailoring communication to suit diverse customer needs.

3. Assess eligibility

- 3.1 *Eligibility* is explained in accordance with grant, subsidy or rebate legislation and regulations.
- 3.2 Eligibility for grant, subsidy or rebate is confirmed in accordance with organisational procedures.
- 3.3 Where eligibility is not confirmed, reasons are clearly explained and applicants' rights to review or lodge an objection are outlined in accordance with legislation and regulations.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the essential skills and knowledge and their level, required for this unit.

Required skills:

Look for evidence that confirms skills in:

- navigating complex and formal documents, such as legislation, judicial decisions, rulings, Commissioner's practices and related materials and applying them to assessment of applications
- researching information related to grants, subsidies and rebates
- analysing information against eligibility criteria
- communicating with others involving the explanation of complex information relating to applicant and transaction eligibility (this may involve accessing interpreter services if necessary)
- numeracy to confirm accuracy of applications
- using technology to conduct research, make enquiries, review available data, access legislative requirements and record outcomes
- responding to diversity, including gender and disability
- applying environmental, sustainability and occupational health and safety procedures to administrative work and when dealing with customers.

Required knowledge:

Look for evidence that confirms knowledge and understanding of:

- purpose and key features of grants, subsidies and rebates
- applicant eligibility criteria
- transaction eligibility criteria
- legislative decision making process
- confidentiality provisions.

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the unit descriptor, performance criteria, The range statement and the Assessment Guidelines for the Public Sector Training Package.

EVIDENCE GUIDE

Units to be assessed together

Co-assessed units that may be assessed with this unit to increase the efficiency and realism of the assessment process include:

- PSPETHC401A Uphold and support the values and principles of public service
- PSPGOV422A Apply government processes
- PSPGOV412A Use advanced workplace communication strategies
- PSPGOV402B Deliver and monitor service to clients
- PSPGOV406B Gather and analyse information.

Overview of evidence requirements

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms:

- knowledge requirements of this unit
- skill requirements of this unit
- application of employability skills as they relate to this unit.

The assessment environment should not disadvantage the candidate and where the person has a disability the principle of reasonable adjustment should be applied during assessment.

Resources required to carry out assessment

These resources include:

- government legislation, regulations, rulings, Commissioner's practices and other applicable case law relating to grants, subsidies and rebates
- organisational procedures and protocols relating to government grants, subsidies and rebates
- legislative decision making process
- scenarios and case studies to capture the range of situations likely to be encountered when assessing applications for grants, subsidies and rebates
- access to relevant systems.

Where and how to assess evidence

Valid assessment of this unit requires:

- a workplace environment or one that closely resembles normal work practice and replicates the range of conditions likely to be encountered when assessing applications for grants, subsidies and rebates, including coping with difficulties, irregularities and breakdowns in routine
- assessment of applications for grants, subsidies and rebates in a range of three or more contexts or occasions, over time.

Assessment methods should reflect but not exceed workplace demands, such as literacy, and the needs of individuals who might be disadvantaged.

EVIDENCE GUIDE

Assessment methods suitable for valid and reliable assessment of this unit must use authenticated evidence from the workplace and/or training courses and may include a combination of two or more of:

- workplace projects
- simulation or role plays
- case studies and scenarios
- observation
- portfolios.

The assessment environment should not disadvantage the candidate and where the person has a disability the principle of reasonable adjustment should be applied during assessment.

For consistency of assessment

Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments.

Range Statement

RANGE STATEMENT

The range statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The range statement also provides a focus for assessment. It relates to the unit as a whole. Text in *italics* in the Performance criteria is explained here.

RANGE STATEMENT

Grants, subsidies and rebates may include

- First Home Owner Grant
- First Home Owner Concession
- First Home Owner Bonus
- principal place of residence rebate
- various fuel subsidies
- thermo-regulatory dysfunction subsidy
- life support equipment subsidy
- public swimming pool subsidy
- pensioner rebates
- payroll tax subsidies and rebates, e.g. trainee and apprenticeship schemes
- first home owner duty concession on vacant land
- pensioner and first home buyer duty concessions
- water and sewerage rebates
- general duty concession schemes
- other government grants, e.g. building, childcare and arts
- stamp duty loans
- IT grants
- inner city rebates
- ex-serviceperson's concession

Key features may include

- eligibility criteria
- amount of grant, subsidy or rebate
- commencement and end dates
- whether grant, subsidy or rebate is means tested
- whether other grants, subsidies and rebates may be accessed in conjunction
- limits and constraints
- timing of payment
- deferment of payment
- licensing requirements
- record-keeping requirements

Supporting evidence may include

- application forms
- proof of identity:
- birth certificates
- passports
- permanent resident visa or special category visa
- transaction contracts
- evidence of usage
- proof of occupancy
- evidence of current address

RANGE STATEMENT

Eligibility may include

- completion of transaction
- for First Home Owner Grant applicants:
 - 18 years of age or over
 - at least one applicant is an Australian citizen or permanent resident
 - no previous receipt of a grant or subsidy in any other state or territory
 - ownership restrictions
 - compliance with grant, subsidy or rebate conditions, e.g. use of property
 - exercise of Commissioner's discretionary powers regarding use and occupation of property
 - restrictions in relation to receiving additional rebates or concessions
- for First Home Owner Grant transactions:
 - contract to purchase established or new home
 - contract to build a new home
 - construction of a new home by an owner builder
 - contract to purchase a new home off-the-plan
- for duty concessions:
 - consideration
 - purchase date
- for stamp duty loans:
 - consideration
- for inner city rebates:
 - new home unit in inner city
 - first transfer on new residential home unit
 - home unit size restriction
 - location restriction
- for ex-serviceperson's concession:
 - transferee must be:
 - a prescribed person
 - never claimed exemption before
 - must have served in one of the wars specified
 - exemption applies regardless of whether person is still serving at time of claiming exemption
 - prescribed person includes a widow of the deceased
- for payroll tax trainee wages rebate scheme:
 - trainees or apprentices who commence approved contract of training before a prescribed birthday
 - employer payroll obligations up-to-date

RANGE STATEMENT

- maximum rebate set at a fixed percentage of payroll tax on wages paid or payable in the rebate period
- applications use approved form and are lodged within prescribed time period
- for payroll tax exporters rebate scheme:
- taxpayer must be involved in producing value-added goods which are produced or processed in their final form in the location specified
- restricted to private sector producers
- for other subsidies and rebates:
- commencement and completion dates
- exceptions
- restrictions, i.e. ineligible transactions
- conditions
- usage
- record-keeping requirements

Competency field

Competency field Revenue Administration

PSPREV406A Evaluate returns-based taxes

Modification History

Not applicable.

Unit Descriptor

Unit descriptor

This unit covers the evaluation of returns-based taxes.

In practice, evaluating returns-based taxes overlaps with other generalist or specialist work activities, such as acting ethically, applying government processes, communicating, delivering client service, and gathering and analysing information.

Co-assessment with units of competency addressing these other activities could be considered.

Application of the Unit

Application of the unit

In the workplace, staff maintain currency in their knowledge of applicable legislation, regulations, rulings and Commissioner's practices that provide guidance on returns-based taxes. They must have a good understanding of the purpose, scope and key features of returns-based taxes. They must be able to assess returns and deal with enquiries and complaints relating to liabilities and penalties generated for late or incorrect returns. They must also identify situations where further investigation may be required and complete the formal processes for this to occur.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

Employability skills This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements are the essential outcomes of the unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Where *italicised* text is used, further information is detailed in the required skills and knowledge and/or the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT

PERFORMANCE CRITERIA

ELEMENT	PERFORMANCE CRITERIA
1. Confirm key features of returns-based taxes	<p>1.1 Current and comprehensive information is accessed and used to maintain knowledge and expertise in returns-based taxation matters and to ensure consistency of application.</p> <p>1.2 Purpose and scope of <i>returns-based taxes</i> are clarified in accordance with applicable legislation, regulations, <i>rulings</i> and <i>Commissioner's practices</i>.</p> <p>1.3 Registration, cancellation and maintenance of customer data are confirmed in accordance with organisational procedures and legal requirements.</p>
2. Process enquiries relating to returns-based taxes	<p>2.1 <i>Taxable items/elements, liability, exemptions</i> and <i>rebates</i> or relief are explained, tailoring communication to suit diverse customer needs.</p> <p>2.2 Taxable thresholds and current rates of taxation are identified and communicated to customers in accordance with legislation, regulations, rulings and Commissioner's practices.</p> <p>2.3 Requirements for lodgement of returns and payment of taxes are explained in accordance with legislative and procedural requirements and customer needs.</p> <p>2.4 Complex enquiries are deferred if necessary until information can be clarified, confirmed or referred to senior and specialist staff in accordance with organisational requirements.</p> <p>2.5. Clear, concise and accurate information is provided to customers to enable them to understand their tax obligations.</p>
3. Assess returns	<p>3.1 Where returns and payment are confirmed as correct, returns are dealt with in accordance with organisational procedures.</p> <p>3.2 Where <i>problems with payments</i> are identified, returns are checked for clerical or other errors and associated penalties are confirmed or remitted in accordance with legislation, regulations, rulings and Commissioner's practices.</p> <p>3.3 For returns requiring further investigation, formal <i>records</i> are obtained and completed and the matter is referred for further action in accordance with organisational procedures and legal requirements.</p> <p>3.4 Where over-payments are received, refunds are processed in accordance with organisational procedures.</p>
4. Deal with complaints	<p>4.1 Complaints by taxpayers are dealt with and decisions recorded and notified in accordance with legislation, regulations and organisational procedures.</p> <p>4.2 If taxpayers are dissatisfied with the decision, their rights to have the decision reviewed are explained in accordance with</p>

ELEMENT

PERFORMANCE CRITERIA

organisational procedures and legal requirements.
4.3 Complaints relating to deficiencies in operational systems are dealt with in accordance with organisational procedures.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the essential skills and knowledge and their level, required for this unit.

Required skills:

Look for evidence that confirms skills in:

- navigating complex and formal documents, such as legislation, judicial decisions, rulings, Commissioner's practices and related materials and applying them to the assessment of returns-based taxes
- researching and maintaining information related to returns-based taxes
- identifying clerical, numerical and other errors
- communicating with others involving exchanges of complex information relating to returns-based taxes
- dealing with complaints and difficult customers
- providing clear information to customers about their obligations and tax liabilities
- using technology to conduct research, make enquiries, review available data, access legislative requirements and record outcomes
- responding to diversity, including gender and disability, when dealing with enquiries or complaints (this may involve accessing interpreter services if necessary)
- applying environmental and occupational health and safety procedures to administrative work and when dealing with customers.

Required knowledge:

Look for evidence that confirms knowledge and understanding of:

- legislation, regulations, rulings and Commissioner's practices relating to returns-based taxes
- taxable items/elements, liability, deductions or exemptions under the legislation
- taxable thresholds for returns-based tax and the application of sliding scales
- legislative decision making process
- confidentiality provisions.

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the unit descriptor, performance criteria, The range statement and the Assessment Guidelines for the Public Sector Training Package.

EVIDENCE GUIDE

Units to be assessed together

Range Statement

RANGE STATEMENT

The range statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The range statement also provides a focus for assessment. It relates to the unit as a whole. Text in *italics* in the Performance criteria is explained here.

RANGE STATEMENT

Returns-based taxes may include

- payroll tax
- income tax
- fringe benefits tax
- goods and services tax
- gambling tax
- racing and gaming taxes
- utilities network facilities tax
- transfer duty
- insurance stamp duty
- motor vehicle stamp duty
- parking space levy
- health insurance levy
- cottage conveyances
- taxation equivalent returns
- mineral royalties
- petroleum royalties
- mortgage duty

Rulings may include

- revenue rulings
- tax rulings
- public rulings
- circulars
- Commissioner's determinations

Commissioner's practices may include

- practices designated by Commissioner of Revenue or Australian Taxation Commissioner
- Commissioner's Guidelines and Circulars
- practice directions
- public guidelines
- public practices
- Treasurer's directions
- business rules
- circulars
- operating policies
- technical and procedural instructions

Taxable items/elements may include

- wages, salaries and allowances
- superannuation
- fringe benefits
- capital gains
- trust, partnership and company income
- termination payments
- insurance premiums

RANGE STATEMENT

- dutiable value of motor vehicles
- taxable car park spaces
- specified taxable benefits
- subcontractors
- employment agents
- when a threshold is exceeded
- when criteria are met
- annually
- periodically
- exempt organisations listed in the Act
- particular categories, e.g. of employees (for payroll tax)
- apprentices, trainees, employees absent in the Defence Force, injured employees
- charitable organisations
- exporters
- trainees
- non-payment
- under-payment
- over-payment
- late payment
- completed legislative decision making records
- financial statements
- payroll records
- motor vehicle change of ownership records
- insurance premium records
- payment summaries
- annual reconciliations
- wages records
- Australian Securities and Investments Commission (ASIC) records
- trust deeds
- dutiable instruments
- signed agreements

PSPREV407A Determine land tax liability

Modification History

Not applicable.

Unit Descriptor

Unit descriptor

This unit covers assessment of liability and determination of land tax.

In practice, determining land tax liability overlaps with other generalist or specialist work activities, such as acting ethically, applying government processes, communicating, delivering client service, and gathering and analysing information.

Co-assessment with units of competency addressing these other activities could be considered.

Application of the Unit

Application of the unit

In the workplace, staff typically assess liability for land tax, applying criteria, exemptions and any concessions, rebates or relief contained in legislation, regulations, rulings and Commissioner's practices. They require knowledge of land ownership and usage requirements and the ability to apply tax-free thresholds and sliding scales of tax rates to determine land tax. In addition, they must deal with complaints and enquiries, providing information and explanation of both the assessment and any further action customers may take if dissatisfied with the decision.

Licensing/Regulatory Information

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the essential skills and knowledge and their level, required for this unit.

Required skills:

Look for evidence that confirms skills in:

- interpreting complex legislation, judicial decisions, rulings, Commissioner's practices and related materials and applying them to land tax situations
- researching data sources and information related to land tax requirements
- interpreting land title searches
- numeracy to confirm accuracy of land tax assessments
- communicating with others involving exchanges of complex information relating to land tax liability and exemptions
- dealing with complaints and difficult customers
- using technology to locate land tax requirements, conduct research, make enquiries, review available data, access legislative requirements, issue assessments and record outcomes
- responding to diversity, including gender and disability, in the context of dealing with land tax requirements (this may involve accessing interpreter services if necessary)
- applying environmental and occupational health and safety procedures to administrative work and when dealing with customers.

Required knowledge:

Look for evidence that confirms knowledge and understanding of:

- legislation, regulations, rulings and Commissioner's practices relating to land tax
- valuations
- land ownership, characteristics and usage requirements
- tax-free thresholds for land tax and the application of sliding scales of tax rates
- liability criteria, exemptions and rebates or relief for land tax
- legislative decision making process
- confidentiality provisions.

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the unit descriptor, performance criteria, The range statement and the Assessment Guidelines for the Public Sector Training Package.

EVIDENCE GUIDE

Units to be assessed together

Co-assessed units that may be assessed with this unit to increase the efficiency and realism of the assessment process include:

- PSPETHC401A Uphold and support the values and principles of public service
- PSPGOV422A Apply government processes
- PSPGOV412A Use advanced workplace communication strategies
- PSPGOV402B Deliver and monitor service to clients
- PSPGOV406B Gather and analyse information.

Overview of evidence requirements

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms:

- knowledge requirements of this unit
- skill requirements of this unit
- application of employability skills as they relate to this unit.

The assessment environment should not disadvantage the candidate and where the person has a disability the principle of reasonable adjustment should be applied during assessment.

Resources required to carry out assessment

These resources include:

- government legislation, regulations, rulings, Commissioner's practices and other applicable case law relating to land tax
- organisational procedures and protocols relating to land tax
- legislative decision making process
- scenarios and case studies to capture the range of situations likely to be encountered when determining land tax liability
- access to relevant systems.

Where and how to assess evidence

Valid assessment of this unit requires:

- a workplace environment or one that closely resembles normal work practice and replicates the range of conditions likely to be encountered when determining land tax liability, including coping with difficulties, irregularities and breakdowns in routine
- determination of land tax liability in a range of three or more contexts or occasions, over time.

Assessment methods should reflect but not exceed workplace demands, such as literacy, and the needs of individuals who might be disadvantaged.

Assessment methods suitable for valid and reliable assessment of this unit must use authenticated evidence from the workplace and/or training courses and may include a combination of two or

more of:

- workplace projects
- simulation or role plays
- case studies and scenarios
- observation
- portfolios.

The assessment environment should not disadvantage the candidate and where the person has a disability the principle of reasonable adjustment should be applied during assessment.

For consistency of assessment

Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments.

Range Statement

RANGE STATEMENT

The range statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The range statement also provides a focus for assessment. It relates to the unit as a whole. Text in *italics* in the Performance criteria is explained here.

Type of land may include

- vacant land
- land with improvements, e.g. buildings
- residential land
- commercial land
- approved subdivision lots
- rental properties
- primary production land
- Crown land
- land leased from government
- conservation land
- heritage land
- native title land
- heritage listed land
- flood liable land
- strata title
- strata leasehold
- company title lots deemed strata
- air space and water lots
- walkways
- tunnels

Usage of land may include

- as primary or secondary residences
- as principal places of residence
- partially used as principal place of residence, e.g. shop/flat of owner
- residences not used by owners as usual place of residence
- secondary residences, such as holiday homes and hobby farms
- as future principal places of residence
- single and multi-unit dwellings
- home units
- commercial usage
- retirement villages, rest homes or nursing homes
- hospitals
- as investment properties, e.g. rentals and leases
- primary production
- as mining tenements
- educational or religious purposes
- community use
- by non-profit bodies
- for low-cost accommodation, e.g. boarding house, caravan park or camping ground
- time share
- home unit companies

- building unit plans/group title plans
 - vacant land (no usage)
- Ownership may include***
- corporation
 - the Crown
 - trustee
 - lessee
 - shareholder in a home unit company
 - shack site
 - absentee
- Rulings may include***
- revenue rulings
 - tax rulings
 - public rulings
 - circulars
 - Commissioner's determinations
- Commissioner's practices may include***
- practices designated by Commissioner of Revenue or Australian Taxation Commissioner
 - Commissioner's Guidelines and Circulars
 - practice directions
 - public guidelines
 - public practices
 - Treasurer's directions
 - business rules
 - circulars
 - operating policies
 - technical and procedural instructions
- Date of liability is***
- recorded in legislation and regulations
 - as specified in relevant Act for tax levied in respect to ownership of land for applicable taxing period
- Value of land may include***
- site value as the basis for land tax
 - valuation data from appropriate authority, such as Valuer General or municipal council
- Exemptions, concessions, rebates or relief may include***
- residential - owner's primary or principal place of residence
 - newly constructed or refurbished private residences (limited to two years)
 - newly purchased residences intended to become new principal places of residence
 - vacant land where future principal place of residence is being or will be constructed
 - contiguous principal places of residence
 - primary production
 - Crown land

- owned by a trust and used by a disabled beneficiary
- owned by an individual and used by a disabled person related to the owner
- owned by a religious body and used for religious purposes
- owned by an educational body and used for education purposes
- used for a public or religious hospital
- owned by public charitable or benevolent institutions and non-profit organisations
- owned by public charitable or benevolent institutions and non-profit organisations and used under the terms of their constitution
- used for a retirement village
- used for supported residential facilities
- used as a caravan park or camping ground
- held under an approved conservation covenant/environmentally protected land
- owned by a war widow
- owned by a beneficiary of a deceased estate
- developers constructing residences
- sporting bodies, e.g. racing clubs and sports fields
- public open space
- port authorities
- concessions for pensioners

Competency field

Competency field Revenue Administration

PSPREV408A Determine stamp duties

Modification History

Not applicable.

Unit Descriptor

Unit descriptor

This unit covers the determination of stamp duties imposed on various documents ('instruments') and transactions.

In practice, determining stamp duties overlaps with other generalist or specialist work activities, such as acting ethically, applying government processes, communicating, delivering client service, and gathering and analysing information.

Co-assessment with units of competency addressing these other activities could be considered.

Application of the Unit

Application of the unit

In the workplace, staff maintain an up-to-date knowledge of the range of legislation, regulations, rulings and Commissioner's practices relating to stamp duties. They typically apply liability and eligibility criteria, exemptions, concessions, and the different rates that apply to a range of instruments and transactions, such as transfers, agreements to purchase real estate, business assets and other business properties. In assessing stamp duties, staff must apply general principles from the legislation that assist them to navigate the complexity of the stamp duties regime.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
----------------	-----------------------------

ELEMENT

Elements are the essential outcomes of the unit of competency.

1. Identify legislative, regulatory and procedural requirements relating to stamp duties

2. Assess stamp duties

3. Assess and process enquiries and complaints

PERFORMANCE CRITERIA

Performance criteria describe the required performance needed to demonstrate achievement of the element. Where *italicised* text is used, further information is detailed in the required skills and knowledge and/or the range statement. Assessment of performance is to be consistent with the evidence guide.

- 1.1 Up-to-date knowledge is maintained of the range of legislation, regulations, rulings, *Commissioner's practices* and organisational procedures relating to *instruments and transactions* that generally attract *duties*.
- 1.2 Rates and thresholds that apply to calculation of stamp duties are located and confirmed as current, relative to the liability date.
- 1.3 Eligibility and liability criteria related to stamp duties are identified and confirmed in accordance with legislation, regulations, rulings and Commissioner's practices to ensure consistency of interpretation and application.
- 1.4 Exemptions and concessions related to instruments, transactions or organisations are identified and confirmed in accordance with legislation, regulations, rulings and Commissioner's practices.
- 2.1 Instruments and transactions liable for duty are identified in accordance with the legislation.
- 2.2 Instruments and transactions exempt from duty or eligible for concessions are identified in accordance with legislation and explained to customers in accordance with their requests.
- 2.3 *General principles* affecting stamp duties are implemented to ensure correct duty is applied.
- 2.4 Parties liable to pay duty are identified and date of liability is confirmed in accordance with legislation, regulations, rulings and Commissioner's practices.
- 2.5 Lodgement and due dates are confirmed and any interest or penalties incurred for late lodgement or payment are applied in accordance with legislation, regulations, rulings and Commissioner's practices.
- 2.6 Rates of duty are applied, assessment is confirmed and decision is recorded in accordance with legislation, regulations, *rulings* and Commissioner's practices.
- 3.1 Enquiries and complaints by taxpayers are dealt with, and decisions recorded and notified in accordance with legislation, regulations and organisational procedures.
- 3.2 If taxpayers are dissatisfied with the decision, their rights to have the decision reviewed are explained in accordance with

ELEMENT

PERFORMANCE CRITERIA

legislation and organisational procedures.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the essential skills and knowledge and their level, required for this unit.

Required skills:

Look for evidence that confirms skills in:

- interpreting complex legislation, judicial decisions, rulings, Commissioner's practices and related materials and applying them to stamp duty determinations
- researching information related to stamp duties
- literacy to interpret and explain legal language
- numeracy to confirm accuracy of duties applied to various instruments and transactions
- communicating with others involving exchanges of complex information relating to stamp duties
- using technology to conduct research, make enquiries, review available data, access legislative requirements and record outcomes
- responding to diversity, including gender and disability
- applying environmental and occupational health and safety procedures to administrative work and when dealing with customers.

Required knowledge:

Look for evidence that confirms knowledge and understanding of:

- range of legislation, regulations, rulings and Commissioner's practices relating to stamp duty requirements
- general principles from legislation that assist in ascertaining nature of instruments and transactions and how the stamp duty regime is to be applied
- legislative changes and why they occur
- legislative decision making process
- confidentiality provisions.

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the unit descriptor, performance criteria, The range statement and the Assessment Guidelines for the Public Sector Training Package.

EVIDENCE GUIDE

Units to be assessed together

Co-assessed units that may be assessed with this unit to increase the efficiency and realism of the assessment process include:

- PSPETHC401A Uphold and support the values and principles of public service
- PSPGOV422A Apply government processes
- PSPGOV412A Use advanced workplace communication strategies
- PSPGOV402B Deliver and monitor service to clients
- PSPGOV406B Gather and analyse information.

Overview of evidence requirements

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms:

- knowledge requirements of this unit
- skill requirements of this unit
- application of employability skills as they relate to this unit.

The assessment environment should not disadvantage the candidate and where the person has a disability the principle of reasonable adjustment should be applied during assessment.

Resources required to carry out assessment

These resources include:

- government legislation, regulations, rulings, Commissioner's practices and other applicable case law relating to stamp duties
- organisational procedures and protocols relating to stamp duties
- legislative decision making process
- scenarios and case studies to capture the range of situations likely to be encountered when determining stamp duties
- access to relevant systems.

Where and how to assess evidence

Valid assessment of this unit requires:

- a workplace environment or one that closely resembles normal work practice and replicates the range of conditions likely to be encountered when determining stamp duties, including coping with difficulties, irregularities and breakdowns in routine
- determination of stamp duties relating to a range of three or more contexts or occasions, over time.

Assessment methods should reflect but not exceed workplace demands, such as literacy, and the needs of individuals who might be disadvantaged.

Assessment methods suitable for valid and reliable assessment of this unit must use authenticated evidence from the workplace and/or training courses and may include a combination of two or more of:

EVIDENCE GUIDE

- workplace projects
- simulation or role plays
- case studies and scenarios
- observation
- portfolios.

The assessment environment should not disadvantage the candidate and where the person has a disability the principle of reasonable adjustment should be applied during assessment.

For consistency of assessment

Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments.

Range Statement

RANGE STATEMENT

The range statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The range statement also provides a focus for assessment. It relates to the unit as a whole. Text in *italics* in the Performance criteria is explained here.

RANGE STATEMENT

- Commissioner's practices may include*
- practices designated by Commissioner of Revenue or Australian Taxation Commissioner
 - Commissioner's Guidelines and Circulars
 - practice directions
 - public guidelines
 - public practices
 - Treasurer's directions
 - business rules
 - circulars
 - operating policies
 - technical and procedural instructions
- Instruments and transactions may include*
- conveyances
 - transfers
 - leases
 - assignment of leases
 - licences
 - transfer of licences
 - insurance policies
 - sales of real and other property
 - sale of businesses
 - surrenders
 - mortgages and charges over property
 - multi-jurisdictional mortgages
 - trust deeds, partnership agreements and related dealings
 - motor vehicle registrations and transfers
 - statutory declarations
 - any other document that relates to transfer of a property (e.g. receipt)
- Duties may be levied on*
- contracts and agreements
 - land transactions
 - other property transactions
 - transfers
 - insurance
 - motor vehicles
 - statutory licences
 - partnerships and trust acquisitions
- General principles may include*
- assessment of substance rather than form of an instrument
 - contingency principle which allows tax to be levied on contingencies that have not yet occurred
 - leading and principal object rule

RANGE STATEMENT

Rulings may include

- several distinct matters principle
- aggregation of values or considerations to overcome contract splitting to reduce duty payable
- determining of value of property
- nomination of agent
- revenue rulings
- tax rulings
- public rulings
- circulars
- Commissioner's determinations

Unit Sector(s)

Competency field

Competency field Revenue Administration

PSPREV409A Administer levies, fines and other taxes

Modification History

Not applicable.

Unit Descriptor

Unit descriptor

This unit covers the knowledge and skills to administer levies, fines and other taxes.

In practice, administering levies, fines and other taxes overlaps with other generalist or specialist work activities, such as acting ethically, applying government processes, communicating, and gathering and analysing information. Co-assessment with units of competency addressing these other activities could be considered.

Application of the Unit

Application of the unit

In the workplace, staff typically confirm and evaluate situations where levies, fines and other taxes apply; apply criteria and exemptions contained in legislation, regulations, rulings and Commissioner's practices; and evaluate requests for exemptions, concessions, remissions and reductions if applicable.

Staff require a sound knowledge of the legislative requirements related to levies, fines and other taxes and the skill to apply rates (sliding scale or otherwise) or penalties to determine amounts payable. In addition, they must deal with complaints and enquiries, providing information and explanation of both the assessment and any further action customers may take if dissatisfied with the decision.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

Employability skills This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements are the essential outcomes of the unit of competency. Performance criteria describe the required performance needed to demonstrate achievement of the element. Where *italicised* text is used, further information is detailed in the required skills and knowledge and/or the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
----------------	-----------------------------

ELEMENT**PERFORMANCE CRITERIA****1. Assess liability for payment of levies, fines and other taxes**

- 1.1 Situations that attract imposition of *levies, fines and other taxes* are identified and confirmed in accordance with legislation, regulations, *rulings* and *Commissioner's practices*.
- 1.2 *Exemptions* are identified or confirmed in accordance with legislation, regulations, *rulings* and Commissioner's practices.
- 1.3 Situations are identified where concessions, or remission of or reduction in liability may apply.
- 1.4 Facts applicable to situation are confirmed and evaluated.
- 1.5 Criteria for assessing liability are identified and applied in accordance with legislation, regulations, *rulings* and Commissioner's practices.

2. Determine amount payable

- 2.1 Information and schedules are located and consulted to determine rate, penalty or interest applicable.
- 2.2 Exemptions, *remissions or reductions* are applied in accordance with legislation, regulations, *rulings*, Commissioner's practices and relevant case law.
- 2.3 Applicable rates are applied in accordance with legislation and regulations, to confirm assessments of liability.
- 2.4 *Documentary requirements* are completed in accordance with legislation and organisational procedures.

3. Deal with enquiries and complaints

- 3.1 Enquiries are dealt with in accordance with organisational procedures.
- 3.2 Payment options, due dates and record-keeping requirements are explained, tailoring communication to suit diverse customer needs.
- 3.3 *Complaints* are dealt with and decisions recorded and notified in accordance with legislation, regulations and organisational procedures.
- 3.4 If customers are dissatisfied with a decision, their rights to have decision reviewed are explained in accordance with organisational procedures.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the essential skills and knowledge and their level, required for this unit.

Required skills:

Look for evidence that confirms skills in:

- navigating complex legislation, judicial decisions, rulings, Commissioner's practices and related materials and applying them to situations relating to levies, fines and other taxes
- researching information related to application of levies, fines and other taxes
- numeracy to confirm accuracy of assessments
- communicating with others involving exchanges of complex information relating to liability, exemptions, remissions and reductions
- dealing with complaints and difficult customers
- using technology to locate requirements and schedules, conduct research, make enquiries, review available data, access legislative requirements and record outcomes
- responding to diversity, including gender and disability, in the context of dealing with requirements of levies, fines and other taxes (this may involve accessing interpreter services if necessary)
- applying environmental, sustainability and occupational health and safety procedures to administrative work and when dealing with customers

Required knowledge:

Look for evidence that confirms knowledge and understanding of:

- legislation, regulations, rulings and Commissioner's practices relating to levies, fines and other taxes
- situations where levies, fines and other taxes apply
- liability, exemptions, remissions and reductions relevant to different levies, fines and other taxes
- application of sliding scales or other structures of rates for levies, fines and other taxes
- legislative decision making process
- confidentiality provisions

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the unit descriptor, performance criteria, The range statement and the Assessment Guidelines for the Public Sector Training Package.

EVIDENCE GUIDE

Units to be assessed together

Co-assessed units that may be assessed with this unit to increase the efficiency and realism of the assessment process include:

- PSPETHC401A Uphold and support the values and principles of public service
- PSPGOV402B Deliver and monitor service to clients
- PSPGOV422A Apply government processes
- PSPGOV412A Use advanced workplace communication strategies
- PSPGOV406B Gather and analyse information.

Overview of evidence requirements

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms:

- knowledge requirements of this unit
- skill requirements of this unit
- application of employability skills as they relate to this unit.

The assessment environment should not disadvantage the candidate and where the person has a disability the principle of reasonable adjustment should be applied during assessment.

Resources required to carry out assessment

These resources include:

- government legislation, regulations, rulings, Commissioner's practices and other applicable case law relating to levies, fines and other taxes
- organisational procedures and protocols relating to levies, fines and other taxes
- scenarios and case studies to capture the range of situations likely to be encountered when administering levies, fines and other taxes
- access to relevant systems.

Where and how to assess evidence

Valid assessment of this unit requires:

- a workplace environment or one that closely resembles normal work practice and replicates the range of conditions likely to be encountered when administering levies, fines and other taxes, including coping with difficulties, irregularities and breakdowns in routine
- administration of levies, fines and other taxes relating to a range of three or more contexts or occasions, over time.

Assessment methods should reflect but not exceed workplace demands, such as literacy, and the needs of individuals who might be disadvantaged.

Assessment methods suitable for valid and reliable assessment of

EVIDENCE GUIDE

this unit must use authenticated evidence from the workplace and/or training courses and may include a combination of two or more of:

- workplace projects
- simulation or role plays
- case studies and scenarios
- observation
- portfolios.

The assessment environment should not disadvantage the candidate and where the person has a disability the principle of reasonable adjustment should be applied during assessment.

For consistency of assessment

Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments.

Range Statement

RANGE STATEMENT

The range statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The range statement also provides a focus for assessment. It relates to the unit as a whole. Text in *italics* in the Performance criteria is explained here.

RANGE STATEMENT***Levies, fines and other taxes may include***

- community ambulance cover levy
- fire services levy
- emergency services levy
- fire and emergency services levy
- health insurance levy
- Medicare levy
- agricultural protection scheme
- parking space levy
- metropolitan regional improvement tax
- city centre marketing and improvement levy
- fuel subsidies
- speeding fines
- red light camera fines
- parking fines
- council infringement fines
- court imposed fines

Rulings may include

- revenue rulings
- tax rulings
- public rulings
- circulars
- Commissioner's determinations

Commissioner's practices may include

- practices designated by Commissioner of Revenue or Australian Taxation Commissioner
- Commissioner's Guidelines and Circulars
- practice directions
- public guidelines
- public practices
- Treasurer's directions
- business rules
- circulars
- operating policies
- technical and procedural instructions

Exemptions may include

- threshold exemptions
- pensioner exemptions
- farming shed exemptions
- pump exemptions
- exemptions under retail parking levy

Remissions or reductions may include

- land usage
- regional area
- single farming enterprise

RANGE STATEMENT

- contiguous land
 - concessions
 - business rules
 - reasonable care
 - matters beyond control of customer
 - first offence applications
 - driving offences
 - government remissions
 - record keeping
 - report writing
 - correspondence
 - approved forms
 - required supporting documentation
 - photographic evidence
 - speed and traffic light cameras
 - imaging of returns and correspondence
 - formal notices of service to produce (for court proceedings)
 - objections, e.g. those relating to community ambulance levy
- Documentary requirements may include*
- Complaints may include*

PSPSCI201A Contribute to the provision of scientific technical support

Modification History

Not applicable.

Unit Descriptor

Unit descriptor

This unit covers the provision of technical support in a scientific/research environment, working under direct guidance and contributing to routine technical duties such as experimental, survey, sampling and/or analytical tasks. It includes confirming and preparing for technical tasks, contributing to the collection of information and recording data.

In practice, the contribution of technical support overlaps with other generalist or specialist work activities such as acting ethically, communicating, delivering client service, accessing and using resources, handling information, working safely etc.

This is a new unit of competency, added to the *Government Science&Technology* Competency field of the Training Package in 2004.

Application of the Unit

Employability Skills Information

Employability skills This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements are the essential outcomes of the unit of competency. Together, performance criteria specify the requirements for competent performance. Text in *bold italics* is explained in the Range Statement following.

Elements and Performance Criteria

ELEMENT

PERFORMANCE CRITERIA

1. Confirm and prepare for technical tasks

- 1.1 *Technical tasks* are clarified and confirmed with *other staff members* in accordance with organisational requirements
- 1.2 *Processes, resources, timelines and equipment* requirements are confirmed in accordance with organisational and task requirements
- 1.3 Risk management practices, occupational health and safety, environmental and *other legislative requirements* relating to the work are investigated and confirmed
- 1.4 Resources and equipment are obtained and prepared in accordance with organisational and task requirements

2. Contribute to the collection of information

- 2.1 Technical tasks are carried out under supervision in accordance with organisational requirements
- 2.2 Information is collected in accordance with set processes and timelines
- 2.3 Resources and equipment are used and maintained in accordance with organisational and task requirements
- 2.4 Risk management practices, occupational health and safety, environmental and other legislative requirements are followed in accordance with organisational requirements

3. Record data

- 3.1 Data is recorded in accordance with organisational and task requirements
- 3.2 Data records are maintained in accordance with organisational requirements

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the essential skills and knowledge and their level, required for this unit.

Skill requirements

Look for evidence that confirms skills in:

working with mathematical data

observing and reporting

using a range of communication styles to suit different audiences and purposes

responding to diversity, including gender and disability

reading formal documents such as legislation and workplace instructions and applying them in the workplace

using technology for word processing and data management

operating machinery and experimental equipment

applying occupational health and safety and environmental requirements related to working in a scientific/technological research environment

Knowledge requirements

Look for evidence that confirms knowledge and understanding of:

legislation, regulations, policies, procedures and guidelines relating to the provision of scientific technical support

basic experimental procedures and scientific methods

the scientific/technological area (broad understanding)

organisational code of practice

standard operating procedures and/or work instructions

working with others in a scientific/technical environment

occupational health and safety, environmental protection and other public sector legislation

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the Unit descriptor, Performance Criteria, the Range Statement and the Assessment Guidelines for the Public Sector Training Package.

Units to be assessed together

- *Pre-requisite* units that must be achieved prior to this unit: *Nil*
- *Co-requisite* units that must be assessed with this unit: *Nil*
- *Co-assessed units* that may be assessed with this unit to increase the efficiency and realism of the assessment process include, but are not limited to:

PSPGOV201B Work in a public sector environment

PSPGOV202B Use routine workplace communication techniques

PSPGOV203B Deliver a service to clients

PSPGOV204B Access and use resources

PSPGOV206B Handle workplace information

PSPOHS201B Follow workplace safety procedures

Overview of evidence requirements

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms:

- the knowledge requirements of this unit
- the skill requirements of this unit
- application of the Employability Skills as they relate to this unit (see Employability Summaries in Qualifications Framework)
- contribution to routine scientific technical duties in a range of (3 or more) contexts such as experimental, survey, sampling and/or analytical tasks (or occasions over time)

Resources required to carry out assessment

These resources include:

- legislation, procedures, guidelines and protocols
- operating procedures/work instructions
- industry standards
- scientific/technological equipment and machinery related to the research environment
- personal protective equipment
- case studies and workplace scenarios to capture the range of situations likely to be encountered when contributing to the provision of scientific technical support

Where and how to assess evidence

Valid assessment of this unit requires:

- a workplace environment or one that closely resembles normal

EVIDENCE GUIDE

work practice and replicates the range of conditions likely to be encountered when contributing to the provision of scientific technical support, including coping with difficulties, irregularities and breakdowns in routine

- contribution to routine scientific technical duties in a range of (3 or more) contexts such as experimental, survey, sampling and/or analytical tasks (or occasions over time)

Assessment methods should reflect workplace demands, such as literacy, and the needs of particular groups, such as:

- people with disabilities
- people from culturally and linguistically diverse backgrounds
- Aboriginal and Torres Strait Islander people
- women
- young people
- older people
- people in rural and remote locations

Assessment methods suitable for valid and reliable assessment of this competency may include, but are not limited to, a combination of 2 or more of:

- case studies
- demonstration
- observation
- portfolios
- projects
- questioning
- scenarios
- simulation or role plays
- authenticated evidence from the workplace and/or training courses

For consistency of assessment

Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments

Elements and Performance Criteria Pre-Content

Elements are the essential outcomes of the unit of competency. Together, performance criteria specify the requirements for competent performance. Text in *bold italics* is explained in the Range Statement following.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Confirm extension objectives and methodologies	<p>1.1 Extension <i>objectives</i> are clarified and confirmed with <i>other staff members</i> in accordance with organisational and client needs</p> <p>1.2 <i>Client target groups</i> are identified and <i>extension methodology</i> is selected in accordance with objectives, information to be disseminated and client needs/preferences</p> <p>1.3 Issues relating to intellectual property are identified and handled in accordance with organisational requirements</p>
2. Prepare for extension activities	<p>2.1 Industry knowledge is accessed to assist in client decision making and to support the implementation of improved practices</p> <p>2.2 <i>Risks</i> are identified and risk management strategies are confirmed and applied in consultation with other staff members</p> <p>2.3 Resources are confirmed, materials prepared and extension activities organised in accordance with project <i>responsibilities</i> and organisational policy and procedures</p>
3. Provide information to support change	<p>3.1 Information and <i>advice</i> are provided in accordance with organisational requirements, in a form and <i>medium</i> suited to clients</p> <p>3.2 <i>Presentation standards</i> are maintained in accordance with organisational guidelines and information is tailored to client needs in terms of concepts, language and format</p> <p>3.3 Clients are assisted in planning the introduction of change and <i>client resistance</i> is responded to in accordance with organisational policy and procedures</p> <p>3.4 Feedback is obtained from clients, issues are clarified and further information is provided in response to client needs</p>
4. Monitor and evaluate extension outcomes	<p>4.1 Change processes are monitored and contingencies are handled in accordance with organisational policy and procedures</p> <p>4.2 Outcomes are monitored and <i>evaluated</i> against extension objectives, and processes and materials are revised to address identified problems</p> <p>4.3 Modifications are made and implemented in accordance with organisational requirements for continuous improvement</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the essential skills and knowledge and their level, required for this unit.

Skill requirements

Look for evidence that confirms skills in:

using facilitation and presentation strategies/methods

using a range of communication styles to suit different audiences and purposes

responding to diversity, including gender and disability

using problem solving to overcome resistance and develop professional relationships of trust

reading and interpreting scientific research information, and designing materials using different media for different audiences

applying information management in the context of extension activities

using technology for materials preparation and monitoring outcomes

applying occupational health and safety and environmental requirements related to working in a scientific/technological research environment

Knowledge requirements

Look for evidence that confirms knowledge and understanding of:

legislation, regulations, policies, procedures and guidelines relating to the workplace

basic extension methodology

principles of change management

participatory processes in the context of extension activities

group dynamics and group processes

community development principles

research principles and methodology

evaluation processes relating to extension outcomes

the scientific/technological area (broad understanding)

specialist area of expertise

public sector standards and organisational code of practice as they relate to work in a scientific research/technological environment

occupational health and safety, environmental protection and other public sector legislation

Overview of evidence requirements

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms:

- the knowledge requirements of this unit
- the skill requirements of this unit
- application of the Employability Skills as they relate to this unit (see Employability Summaries in Qualifications Framework)
- outcomes from a range of (3 or more) extension activities such as oral communication and presentation, assisting with field days, preparation of materials

Resources required to carry out assessment

These resources include:

- legislation, procedures, guidelines and protocols
- industry information
- risk management strategies for extension work
- case studies and workplace scenarios to capture a range of different extension experiences

Where and how to assess evidence

Valid assessment of this unit requires:

- a workplace environment or one that closely resembles normal work practice and replicates the range of conditions likely to be encountered when supporting innovation and change through extension, including coping with difficulties, irregularities and breakdowns in routine

EVIDENCE GUIDE

- outcomes from a range of (3 or more) extension activities (or occasions over time) such as oral communication and presentation, assisting with field days, preparation of materials

Assessment methods should reflect workplace demands, such as literacy, and the needs of particular groups, such as:

- people with disabilities
- people from culturally and linguistically diverse backgrounds
- Aboriginal and Torres Strait Islander people
- women
- young people
- older people
- people in rural and remote locations

Assessment methods suitable for valid and reliable assessment of this competency may include, but are not limited to, a combination of 2 or more of:

- case studies
- demonstration
- observation
- portfolios
- projects
- questioning
- scenarios
- simulation or role plays
- authenticated evidence from the workplace and/or training courses

For consistency of assessment

Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments

Range Statement

RANGE STATEMENT

The Range Statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The Range Statement also provides a focus for assessment. It relates to the unit as a whole. Text in *italics* in the Performance Criteria is explained here.

PSPSCI303A Undertake scientific/technological research

Modification History

Not applicable.

Unit Descriptor

Unit descriptor

This unit covers the conduct of scientific or technological research under general direction with immediate guidance regarding methods and specific objectives. It includes confirming the research issue, employing a selected research methodology, carrying out the research and delivering the results.

In practice, undertaking scientific/technological research overlaps with other generalist or specialist work activities such as working effectively, acting ethically, using resources, organising information, working safely etc.

This is a new unit of competency, added to the *Government Science&Technology* Competency field of the Training Package in 2004.

Application of the Unit

Not applicable.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

Employability skills This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements are the essential outcomes of the unit of competency. Together, performance criteria specify the requirements for competent performance. Text in *bold italics* is explained in the Range Statement following.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Confirm research issue	<p>1.1 Issue to be researched is confirmed and clarified with <i>other researcher/s</i> as relevant to the industry and the organisation's objectives</p> <p>1.2 Issues relating to intellectual property are identified and handled in accordance with organisational requirements</p> <p>1.3 <i>Current</i> and published information relevant to the research issue is located and analysed</p>
2. Employ selected research methodology	<p>2.1 <i>Research method/s</i> and objectives are selected in consultation with other researcher/s in accordance with organisational policy and resource requirements</p> <p>2.2 Hypothesis is established and confirmed with other researcher/s as plausible, relevant and of benefit</p> <p>2.3 Tasks, risk management strategies and <i>analytical techniques</i> are confirmed in consultation with other researcher/s</p> <p>2.4 Research methodology is recorded in accordance with organisational requirements</p>
3. Carry out research	<p>3.1 <i>Resources</i> to conduct the research are <i>sourced</i> in accordance with organisational policy and procedures</p> <p>3.2 Tasks are scheduled and carried out under general guidance in accordance with research methodology</p> <p>3.3 Research is monitored and data is collected and analysed in accordance with research plan</p> <p>3.4 Research results are discussed with other researcher/s and <i>documented</i> in accordance with organisational requirements</p> <p>3.5 Research report/s are prepared within specified timeframes in accordance with organisational requirements</p> <p>3.6 Reports are written clearly and concisely in styles suited to scientific and/or lay audiences in accordance with organisational requirements</p>
4. Deliver research results	<p>4.1 Research results are <i>provided</i> to the organisation, to the scientific community and/or to the industry in accordance with organisational policy and procedures</p> <p>4.2 Intellectual property is protected in accordance with organisational requirements</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the essential skills and knowledge and their level, required for this unit.

Skill requirements

Look for evidence that confirms skills in:

carrying out research

using problem solving techniques

using technology for data input, analysis and preparation of reports

interpreting and preparing reports containing scientific research information using a range of communication styles to suit different audiences and purposes

responding to diversity, including gender and disability

presenting research results tailored to different audiences such as local industry/scientific audience

applying occupational health and safety and environmental requirements to working in a scientific/technological research environment

Knowledge requirements

Look for evidence that confirms knowledge and understanding of:

a range of applicable research methodologies

scientific process

statistics (working knowledge)

specialist area of expertise

reporting requirements for scientific/technological research, requiring precision of expression and using a range of communication styles to suit different audiences and purposes

public sector standards, legislation and organisational code of practice as they relate to work in a scientific research/technological environment

public sector legislation including environmental and occupational health and safety requirements relating to scientific/technological research

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the Unit descriptor, Performance Criteria, the Range Statement and the Assessment Guidelines for the Public Sector Training Package.

Units to be assessed together

- *Pre-requisite* units that must be achieved prior to this unit: *Nil*
- *Co-requisite* units that must be assessed with this unit: *Nil*
- *Co-assessed units* that may be assessed with this unit to increase the efficiency and realism of the assessment process include, but are not limited to:

PSPETHC301B Uphold the values and principles of public service

PSPGOV301B Work effectively in the organisation

PSPGOV302B Contribute to workgroup activities

PSPGOV307B Organise workplace information

PSPLEGN301B Comply with legislation in the public sector

PSPOHS301A Contribute to workplace safety

Overview of evidence requirements

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms:

- the knowledge requirements of this unit
- the skill requirements of this unit
- application of the Employability Skills as they relate to this unit (see Employability Summaries in Qualifications Framework)
- scientific/technological research conducted in a range of (3 or more) contexts (or occasions, over time)

Resources required to carry out assessment

These resources include:

- legislation, procedures, guidelines and protocols
- research guidelines and methodologies relating to scientific/technological research
- industry information
- risk management strategies relating to scientific/technological research
- case studies and workplace scenarios to capture a range of different research situations

Where and how to assess evidence

Valid assessment of this unit requires:

- a workplace environment or one that closely resembles normal work practice and replicates the range of conditions likely to be encountered when undertaking scientific/technological research,

EVIDENCE GUIDE

including coping with difficulties, irregularities and breakdowns in routine

- scientific/technological research conducted in a range of (3 or more) contexts (or occasions, over time)

Assessment methods should reflect workplace demands, such as literacy, and the needs of particular groups, such as:

- people with disabilities
- people from culturally and linguistically diverse backgrounds
- Aboriginal and Torres Strait Islander people
- women
- young people
- older people
- people in rural and remote locations

Assessment methods suitable for valid and reliable assessment of this competency may include, but are not limited to, a combination of 2 or more of:

- demonstration
- observation
- portfolios
- projects
- questioning
- authenticated evidence from the workplace and/or training courses

For consistency of assessment

Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments

Range Statement

RANGE STATEMENT

The Range Statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The Range Statement also provides a focus for assessment. It relates to the unit as a whole. Employability skills This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements are the essential outcomes of the unit of competency. Together, performance criteria specify the requirements for competent performance. Text in *bold italics* is explained in the Range Statement following.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Plan and organise technical duties	<p>1.1 Outputs for defined area of responsibility are confirmed and <i>technical duties</i> and responsibilities are identified in accordance with organisational requirements</p> <p>1.2 <i>Processes, resources, timelines</i> and <i>equipment</i> requirements are determined and technical duties are planned in accordance with organisational and task requirements</p> <p>1.3 Risk management practices, occupational health and safety, environmental and <i>other legislative requirements</i> are determined</p> <p>1.4 Resources and equipment are obtained and prepared in accordance with organisational and task requirements</p>
2. Collect and record information	<p>2.1 Technical duties are carried out under general direction in accordance with organisational requirements</p> <p>2.2 Information is collected and recorded in accordance with planned processes and timelines</p> <p>2.3 Resources and equipment are used and maintained in accordance with organisational and task requirements</p> <p>2.4 Risk management practices, occupational health and safety, environmental and other legislative requirements are followed in accordance with organisational requirements</p>
3. Compile and report data	<p>3.1 Data is compiled and records are maintained in accordance with organisational requirements</p> <p>3.2 Data is manipulated and <i>irregularities</i> are dealt with in accordance with organisational and task requirements</p> <p>3.3 Reports are prepared in accordance with organisational and task requirements</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the essential skills and knowledge and their level, required for this unit.

Skill requirements

Look for evidence that confirms skills in:

analysing/manipulating mathematical data

observing and reporting

using a range of communication styles to suit different audiences and purposes

responding to diversity, including gender and disability

reading formal documents such as legislation and instructions and applying them in the workplace

writing technical reports requiring precision of expression

using technology for word processing and data management

operating machinery and experimental equipment

applying occupational health and safety and environmental requirements related to working in a scientific/technological research environment

Knowledge requirements

Look for evidence that confirms knowledge and understanding of:

experimental procedures and scientific methods

analytical techniques/simple statistical analysis

the scientific/technological area (broad understanding)

legislation, public sector standards and organisational code of practice as they relate to work in a scientific research/technical environment

standard operating procedures and/or work instructions

working with others in a scientific/technical environment

occupational health and safety, environmental protection and other public sector legislation

technical support work relevant to specialist area

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the Unit descriptor, Performance Criteria, the Range Statement and the Assessment Guidelines for the Public Sector Training Package.

Units to be assessed together

- *Pre-requisite* units that must be achieved prior to this unit: *Nil*
- *Co-requisite* units that must be assessed with this unit: *Nil*
- *Co-assessed units* that may be assessed with this unit to increase the efficiency and realism of the assessment process include, but are not limited to:

PSPETHC401A Uphold and support the values and principles of public service

PSPGOV402B Deliver and monitor service to clients

PSPGOV403B Use resources to achieve work unit goals

PSPGOV406B Gather and analyse information

PSPGOV422A Apply government processes

PSPLEGN401A Encourage compliance with legislation in the public sector

Overview of evidence requirements

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms:

- the knowledge requirements of this unit
- the skill requirements of this unit
- application of the Employability Skills as they relate to this unit (see Employability Summaries in Qualifications Framework)
- provision of scientific technical support under general direction with responsibility within a generally defined area, in a range of (3 or more) contexts such as experimental, survey, sampling and/or analytical tasks (or occasions, over time)

These resources include:

Resources required to carry out assessment

- legislation, procedures, guidelines and protocols
- operating procedures/work instructions
- industry standards
- scientific/technological equipment and machinery related to the research environment
- personal protective equipment
- case studies and workplace scenarios to capture the range of situations likely to be encountered when providing scientific technical support

EVIDENCE GUIDE

Where and how to assess evidence

Valid assessment of this unit requires:

- a workplace environment or one that closely resembles normal work practice and replicates the range of conditions likely to be encountered when providing scientific technical support, including coping with difficulties, irregularities and breakdowns in routine
- provision of scientific technical support under general direction with responsibility within a generally defined area, in a range of (3 or more) contexts such as experimental, survey, sampling and/or analytical tasks (or occasions over time)

Assessment methods should reflect workplace demands, such as literacy, and the needs of particular groups, such as:

- people with disabilities
- people from culturally and linguistically diverse backgrounds
- Aboriginal and Torres Strait Islander people
- women
- young people
- older people
- people in rural and remote locations

Assessment methods suitable for valid and reliable assessment of this competency may include, but are not limited to, a combination of 2 or more of:

- case studies
- demonstration
- observation
- portfolios
- projects
- questioning
- scenarios
- simulation or role plays
- authenticated evidence from the workplace and/or training courses

For consistency of assessment

Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments

Range Statement

RANGE STATEMENT

The Range Statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The Range Statement also provides a focus for assessment. It relates to the unit as a whole. Text in italics in the Performance Criteria is explained here.

Technical duties may include

- surveys
- sampling
- experiments
- trials
- tests
- assays
- surveillance
- collecting specimens
- inspections
- identification of plants or animals
- identification of pests
- operation, calibration and maintenance of experimental equipment
- diagnostic processes
- producing specimen images

Processes may include

- experimental processes
- observation
- field trials

Resources may include

- design specifications
- technical manuals
- componentry
- radioactive samples
- specimens
- plants
- seeds
- chemicals
- personal protective equipment

Equipment may include

- prototypes
- test rigs
- tools
- diagnostic instruments
- laboratory equipment
- experimental equipment

RANGE STATEMENT

- farm equipment
 - quarantine or protection requirements
 - copyright and intellectual property legislation
 - Australian standards
 - checking source information
 - checking data input
 - repeating tests/trial measurements
 - referring problem to other staff
- Other legislative requirements may include*
- Irregularities may be dealt with by*

Elements and Performance Criteria Pre-Content

Elements are the essential outcomes of the unit of competency. Together, performance criteria specify the requirements for competent performance. Text in *bold italics* is explained in the Range Statement following.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Identify extension objectives and methodologies	<p>1.1 Required extension outcomes are identified in accordance with organisational requirements</p> <p>1.2 Extension <i>objectives</i> are identified to meet organisational outcomes and client needs</p> <p>1.3 <i>Client target groups</i> are identified and research information is analysed to determine how it may best be used to facilitate change in the target groups</p> <p>1.4 <i>Dissemination</i> methodology, techniques and strategies are determined in accordance with type of research information and client needs/preferences</p> <p>1.5 Issues relating to intellectual property are identified and handled in accordance with organisational requirements</p>
2. Prepare for extension work	<p>2.1 Industry knowledge is developed to facilitate client decision making and the implementation of improved practices</p> <p>2.2 <i>Risks</i> are determined and risk management strategies are identified and applied in accordance with organisational policy and procedures</p> <p>2.3 Resources are <i>obtained</i> and managed, and extension materials and activities are developed in accordance with program <i>responsibilities</i> and organisational requirements</p>
3. Promote change through information and advice	<p>3.1 Information and <i>advice</i> are provided in accordance with organisational requirements, in a form and <i>medium</i> that clients can apply</p> <p>3.2 <i>Presentation standards</i> are maintained in accordance with organisational guidelines and information and advice are provided that are relevant, accurate and tailored to client needs in terms of concepts, language and format</p> <p>3.3 Clients are assisted to implement change and <i>resistance to change</i> is handled in accordance with organisational policy and procedures</p> <p>3.4 Feedback from clients is used to identify problems and new issues and further information/advice is provided in response to client needs</p>
4. Monitor and evaluate adoption of change	<p>4.1 Implementation of change is monitored and contingencies are managed in accordance with organisational policy and procedures</p> <p>4.2 Outcomes are evaluated and reported against extension objectives and project outputs, and extension processes are modified to address identified problems in response to client feedback</p> <p>4.3 Changes to extension programs are implemented and monitored</p>

ELEMENT

PERFORMANCE CRITERIA

in accordance with organisational requirements for continuous improvement

4.4 Outcomes with implications for organisational policy are identified and contributions are made to policy development in accordance with organisational requirements

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the essential skills and knowledge and their level, required for this unit.

Skill requirements

Look for evidence that confirms skills in:

- identifying extension objectives
- determining dissemination strategies
- obtaining and managing extension resources
- identifying the implications for organisational policy development of changes to extension programs
- using facilitation and presentation strategies/methods
- using a range of communication styles to suit different audiences and purposes
- responding to diversity, including gender and disability
- using problem solving to overcome resistance and develop professional relationships of trust
- reading and interpreting scientific research information, and designing materials using different media for different audiences
- applying information management in the context of extension activities
- using technology for materials preparation and monitoring outcomes
- applying occupational health and safety and environmental requirements related to working in a scientific/technological research environment

Knowledge requirements

Look for evidence that confirms knowledge and understanding of:

- the industry
- extension methodology
- principles of change management
- participatory processes in the context of extension activities
- group dynamics and group processes
- community development principles
- research principles and methodology
- evaluation processes relating to extension outcomes
- the scientific/technological area (broad understanding)
- specialist knowledge relating to area of expertise
- legislation, public sector standards and organisational code of practice as they relate to work in a scientific research/technological environment
- occupational health and safety, environmental protection and other public sector legislation

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the Unit descriptor, Performance Criteria, the Range Statement and the Assessment Guidelines for the Public Sector Training Package.

Units to be assessed together

- *Pre-requisite* units that must be achieved prior to this unit: *Nil*
- *Co-requisite* units that must be assessed with this unit: *Nil*
- *Co-assessed units* that may be assessed with this unit to increase the efficiency and realism of the assessment process include, but are not limited to:

PSPETHC401A Uphold and support the values and principles of public service

PSPGOV402B Deliver and monitor service to clients

PSPGOV403B Use resources to achieve work unit goals

PSPGOV406B Gather and analyse information

PSPGOV422A Apply government processes

PSPOHS401B Implement workplace safety procedures and programs

Overview of evidence requirements

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms:

- the knowledge requirements of this unit
- the skill requirements of this unit
- application of the Employability Skills as they relate to this unit (see Employability Summaries in Qualifications Framework)
- outcomes from a range of (3 or more) extension such as oral communication and presentation, organising field days, materials development

Resources required to carry out assessment

These resources include:

- legislation, procedures, guidelines and protocols
- industry information
- risk management strategies for extension work
- case studies and workplace scenarios to capture a range of different extension experiences

Where and how to assess evidence

Valid assessment of this unit requires:

- a workplace environment or one that closely resembles normal work practice and replicates the range of conditions likely to be encountered when promoting innovation and change through extension activities, including coping with difficulties,

EVIDENCE GUIDE

irregularities and breakdowns in routine

- outcomes from a range of (3 or more) extension activities such as oral communication and presentation, organising field days, materials development

Assessment methods should reflect workplace demands, such as literacy, and the needs of particular groups, such as:

- people with disabilities
- people from culturally and linguistically diverse backgrounds
- Aboriginal and Torres Strait Islander people
- women
- young people
- older people
- people in rural and remote locations

Assessment methods suitable for valid and reliable assessment of this competency may include, but are not limited to, a combination of 2 or more of:

- case studies
- demonstration
- observation
- portfolios
- projects
- questioning
- scenarios
- simulation or role plays
- authenticated evidence from the workplace and/or training courses

For consistency of assessment

Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments

Elements and Performance Criteria Pre-Content

Elements are the essential outcomes of the unit of competency. Together, performance criteria specify the requirements for competent performance. Text in *bold italics* is explained in the Range Statement following.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Identify research issue	<p>1.1 Industry analysis and consultation are used to identify likely research issues in accordance with organisational policy and procedures</p> <p>1.2 Issue to be researched that is relevant to the industry and to the organisation's objectives is identified</p> <p>1.3 Issues relating to intellectual property are identified and handled in accordance with organisational requirements</p> <p>1.4 <i>Current</i> and published information relevant to the research issue is identified and analysed</p>
2. Identify research methodology	<p>2.1 Objectives are established in consultation with other researcher/s in accordance with organisational policy and resource requirements</p> <p>2.2 A range of <i>research method/s</i> and <i>analytical techniques</i> is considered and the methodology and techniques are chosen that best enable objectives to be met</p> <p>2.3 Hypothesis is determined and is plausible, relevant and of benefit</p> <p>2.4 Risk management strategies, activities and tasks are determined in accordance with the requirements of the research methodology</p> <p>2.5 Hypothesis and methodology are recorded in accordance with organisational requirements</p>
3. Organise and carry out research	<p>3.1 <i>Resources</i> to conduct the research are <i>acquired</i> in accordance with organisational policy and procedures</p> <p>3.2 Tasks are scheduled and carried out in accordance with research methodology</p> <p>3.3 Research is monitored, data is collected and analysed and contingencies are dealt with in accordance with research requirements</p> <p>3.4 Research results are <i>documented</i> and report/s are prepared within specified timeframes in accordance with organisational requirements</p> <p>3.5 Reports are written clearly and concisely in styles suited to scientific and/or lay audiences in accordance with organisational requirements</p>
4. Communicate research results	<p>4.1 Research results are <i>communicated</i> to the organisation, to the scientific community and/or the industry via publications and presentations in accordance with organisational policy and procedures</p> <p>4.2 Intellectual property is protected in accordance with</p>

ELEMENT	PERFORMANCE CRITERIA
	organisational requirements

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the essential skills and knowledge and their level, required for this unit.

Skill requirements

Look for evidence that confirms skills in:

- carrying out research
- using problem solving in the context of scientific/technological research
- using technology for data input, analysis and preparation of reports
- interpreting and preparing reports containing scientific/technological research information using a range of communication styles to suit different audiences and purposes
- responding to diversity, including gender and disability
- presenting research results tailored to different audiences such as regional industry/scientific audience
- applying occupational health and safety and environmental requirements to working in a scientific/technological research environment

Knowledge requirements

Look for evidence that confirms knowledge and understanding of:

- research methodologies
- scientific process
- statistics (working knowledge)
- specialist area of expertise
- the industry
- reporting requirements for scientific research, requiring precision of expression and using a range of communication styles to suit different audiences and purposes
- legislation, public sector standards and organisational code of practice as they relate to work in a scientific research/technological environment
- public sector legislation including environmental and occupational health and safety requirements relating to scientific/technological research

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the Unit descriptor, Performance Criteria, the Range Statement and the Assessment Guidelines for the Public Sector Training Package.

Units to be assessed together

- *Pre-requisite* units that must be achieved prior to this unit: *Nil*
- *Co-requisite* units that must be assessed with this unit: *Nil*
- *Co-assessed units* that may be assessed with this unit to increase the efficiency and realism of the assessment process include, but are not limited to:

PSPETHC401A Uphold and support the values and principles of public service

PSPGOV402B Deliver and monitor service to clients

PSPGOV403B Use resources to achieve work unit goals

PSPGOV406B Gather and analyse information

PSPGOV422A Apply government processes

PSPOHS401B Implement workplace safety procedures and programs

Overview of evidence requirements

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms:

- the knowledge requirements of this unit
- the skill requirements of this unit
- application of the Employability Skills as they relate to this unit (see Employability Summaries in Qualifications Framework)
- scientific/technological research organised and undertaken in a range of (3 or more) contexts (or occasions, over time)

Resources required to carry out assessment

These resources include:

- legislation, procedures, guidelines and protocols
- research guidelines and methodologies relating to scientific/technological research
- industry information
- risk management strategies relating to scientific/technological research
- case studies and workplace scenarios to capture a range of different research situations

Where and how to assess evidence

Valid assessment of this unit requires:

- a workplace environment or one that closely resembles normal

EVIDENCE GUIDE

work practice and replicates the range of conditions likely to be encountered when organising and undertaking scientific/technological research, including coping with difficulties, irregularities and breakdowns in routine

- scientific/technological research undertaken in a range of (3 or more) contexts (or occasions, over time)
- evidence of research conducted and report/s and/or articles published locally
- evidence of research presentation/s for regional industry/scientific audience

Assessment methods should reflect workplace demands, such as literacy, and the needs of particular groups, such as:

- people with disabilities
- people from culturally and linguistically diverse backgrounds
- Aboriginal and Torres Strait Islander people
- women
- young people
- older people
- people in rural and remote locations

Assessment methods suitable for valid and reliable assessment of this competency may include, but are not limited to, a combination of 2 or more of:

- demonstration
- observation
- portfolios
- projects
- questioning
- authenticated evidence from the workplace and/or training courses

For consistency of assessment

Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments

Range Statement

RANGE STATEMENT

The Range Statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The Range Statement also provides a focus for assessment. It relates to the unit as a whole. Text in *italics* in the Performance Criteria is explained here.

Competency field Government Science&Technology

PSPSCI501A Provide high-level scientific technical support

Modification History

Not applicable.

Unit Descriptor

Unit descriptor

This unit covers the provision of high-level technical support at an experienced, unsupervised level with responsibility in a defined technical area for experimental, survey, sampling and/or analytical functions. It includes determining and organising high-level technical duties, obtaining and recording information, and assessing and reporting data.

In practice, the provision of high-level scientific technical support overlaps with other generalist or specialist work activities such as acting ethically, providing leadership, coordinating resources, gathering and analysing information, working safely etc.

This is a new unit of competency, added to the *Government Science&Technology* Competency field of the Training Package in 2004.

Application of the Unit

Not applicable.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

Employability skills This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements are the essential outcomes of the unit of competency. Together, performance criteria specify the requirements for competent performance. Text in *bold italics* is explained in the Range Statement following.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Determine and organise high-level technical duties	<p>1.1 Outputs for defined technical area are confirmed and <i>technical duties</i> and responsibilities are determined in accordance with organisational requirements</p> <p>1.2 <i>Processes, resources, timelines</i> and <i>equipment</i> requirements are determined and technical duties are organised in accordance with organisational and task requirements</p> <p>1.3 Risk management strategies, occupational health and safety, environmental and <i>other legislative requirements</i> are determined and explained to junior staff as necessary</p> <p>1.4 Resources and equipment are organised and their preparation is supervised in accordance with organisational and task requirements</p>
2. Obtain and record information	<p>2.1 Technical and supervisory duties are carried out independently in accordance with organisational requirements</p> <p>2.2 Technical leadership is provided and <i>individuals</i> are influenced to meet required outputs in accordance with organisational requirements</p> <p>2.3 Collection and recording of information are carried out and/or supervised in accordance with planned processes and timelines</p> <p>2.4 Information is monitored and contingencies are dealt with in accordance with organisational and task requirements</p> <p>2.5 Resources and equipment are used and maintained in accordance with organisational and task requirements</p> <p>2.6 Risk management strategies, occupational health and safety, environmental and other legislative requirements are followed in accordance with organisational requirements</p>
3. Assess and report data	<p>3.1 Data input and records maintenance are monitored in accordance with organisational requirements</p> <p>3.2 Data is manipulated, results are assessed and <i>irregularities</i> dealt with in accordance with organisational and task requirements</p> <p>3.3 Reports are prepared and presented in accordance with organisational and task requirements</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the essential skills and knowledge and their level, required for this unit.

Skill requirements

Look for evidence that confirms skills in:

technical leadership to influence others to meet required outputs
using a range of communication styles to suit different audiences and purposes
responding to diversity, including gender and disability
reading formal documents such as legislation and instructions and applying them in the workplace
analysing/manipulating mathematical data and problem solving
using technology for word processing and data management
writing technical reports requiring precision of expression
operating machinery and experimental equipment
applying occupational health and safety and environmental requirements related to working in a scientific/technological research environment

Knowledge requirements

Look for evidence that confirms knowledge and understanding of:

experimental procedures and scientific methods
analytical techniques/statistical analysis
the scientific area (broad understanding)
legislation, public sector standards and organisational code of practice as they relate to work in a scientific research/technical environment
standard operating procedures and/or work instructions
leadership of others in a scientific/technical environment
occupational health and safety, environmental protection and other public sector legislation
technical support work relevant to specialist area (well-developed knowledge)

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the Unit descriptor, Performance Criteria, the Range Statement and the Assessment Guidelines for the Public Sector Training Package.

Units to be assessed together

- *Pre-requisite* units that must be achieved prior to this unit: *Nil*
- *Co-requisite* units that must be assessed with this unit: *Nil*
- *Co-assessed units* that may be assessed with this unit to increase the efficiency and realism of the assessment process include, but are not limited to:

PSPETHC501B Promote the values and ethos of public service

PSPGOV503B Coordinate resource allocation and usage

PSPGOV504B Undertake research and analysis

PSPGOV511A Provide leadership

PSPLEGN501B Promote compliance with legislation in the public sector

PSPOHS501A Monitor and maintain workplace safety

Overview of evidence requirements

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms:

- the knowledge requirements of this unit
- the skill requirements of this unit
- application of the Employability Skills as they relate to this unit (see Employability Summaries in Qualifications Framework)
- provision of high-level scientific technical support at an experienced, unsupervised level with responsibility in a defined technical area, in a range of (3 or more) contexts such as experimental, survey, sampling and/or analytical tasks (or occasions, over time)

Resources required to carry out assessment

These resources include:

- legislation, procedures, guidelines and protocols
- operating procedures/work instructions
- industry standards
- scientific/technological equipment and machinery related to the research environment
- personal protective equipment
- case studies and workplace scenarios to capture the range of situations likely to be encountered when providing high-level scientific technical support

EVIDENCE GUIDE

Where and how to assess evidence

Valid assessment of this unit requires:

- a workplace environment or one that closely resembles normal work practice and replicates the range of conditions likely to be encountered when providing high-level scientific technical support, including coping with difficulties, irregularities and breakdowns in routine
- provision of high-level scientific technical support at an experienced, unsupervised level with responsibility in a defined technical area, in a range of (3 or more) contexts such as experimental, survey, sampling and/or analytical tasks (or occasions, over time)

Assessment methods should reflect workplace demands, such as literacy, and the needs of particular groups, such as:

- people with disabilities
- people from culturally and linguistically diverse backgrounds
- Aboriginal and Torres Strait Islander people
- women
- young people
- older people
- people in rural and remote locations

Assessment methods suitable for valid and reliable assessment of this competency may include, but are not limited to, a combination of 2 or more of:

- case studies
- demonstration
- observation
- portfolios
- projects
- questioning
- scenarios
- authenticated evidence from the workplace and/or training courses

For consistency of assessment

Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments

Range Statement

RANGE STATEMENT

The Range Statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The Range Statement also provides a focus for assessment. It relates to the unit as a whole. Text in *italics* in the Performance Criteria is explained here.

Technical duties may include

- surveys
- sampling
- experiments
- trials
- tests
- assays
- surveillance
- collecting specimens
- inspections
- identification of plants or animals
- identification of pests
- operation, calibration and maintenance of experimental equipment
- diagnostic processes
- producing specimen images

Processes may include

- experimental processes
- observation
- field trials

Resources may include

- design specifications
- technical manuals
- componentry
- radioactive samples
- specimens
- plants
- seeds
- chemicals
- personal protective equipment

Equipment may include

- prototypes
- test rigs
- tools
- diagnostic instruments
- laboratory equipment
- experimental equipment

RANGE STATEMENT

- farm equipment
 - quarantine or protection requirements
 - copyright and intellectual property legislation
 - Australian standards
 - other technical staff
 - supervised staff
 - contract workers
 - super-ordinates
 - research officers
 - farmers
 - problem solving
 - checking source information
 - checking data input
 - repeating tests/trial measurements
 - referring problem to other staff
- Other legislative requirements may include*
- Individuals may include*
- Irregularities may be dealt with by*

Unit Sector(s)

Competency field

Competency field Government Science&Technology

PSPSCI502A Facilitate innovation and change through extension

Modification History

Not applicable.

Unit Descriptor

Unit descriptor

This unit covers extension work at a broadly recognised level requiring considerable initiative and independent judgment within generally directed strategic programs. It includes determining extension objectives and methodologies, preparing for extension work, facilitating innovation and change, and monitoring and evaluating the adoption of innovation and change.

In practice, the facilitation of innovation and change through extension work overlaps with other generalist or specialist work activities such as acting ethically, providing leadership, coordinating resources, gathering and analysing information, working safely etc.

This is a new unit of competency, added to the *Government Science&Technology* Competency field of the Training Package in 2004.

Application of the Unit

Employability Skills Information

Employability skills This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements are the essential outcomes of the unit of competency. Together, performance criteria specify the requirements for competent performance. Text in *bold italics* is explained in the Range Statement following.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Determine extension objectives and methodologies	<p>1.1 Required program outcomes are identified in accordance with organisational requirements</p> <p>1.2 Extension <i>objectives</i> are determined to meet organisational outcomes and client needs</p> <p>1.3 Leadership is provided to extension colleagues to influence and motivate their work in line with organisational requirements</p> <p>1.4 Research data is generated and interpreted, <i>client target groups</i> are identified and information is tailored for different target groups</p> <p>1.5 <i>Dissemination</i> methodology, techniques and strategies are evaluated and modified in accordance with type of research information and client needs/preferences</p> <p>1.6 Issues relating to intellectual property are identified and managed in accordance with organisational requirements</p>
2. Prepare for extension work	<p>2.1 Industry networks are fostered and used to maintain and apply <i>industry knowledge</i> to encourage client decision making and the implementation of improved practices</p> <p>2.2 <i>Change management</i> approaches are developed in accordance with organisational policy and practices to assist clients to find their own solutions and to implement change</p> <p>2.3 <i>Risks</i> are identified and risk management strategies are determined and applied in accordance with change management strategies and organisational requirements</p> <p>2.4 Resources are <i>acquired</i> and managed and an extension strategy is developed in accordance with program <i>responsibilities</i>, extension objectives and organisational requirements</p>
3. Facilitate innovation and change	<p>3.1 Information strategy is implemented and improvements are recommended to clients in accordance with organisational requirements</p> <p>3.2 Feedback from clients is used to identify problems and new issues, and further information/<i>advice</i> is provided in response to client needs</p> <p>3.3 Change management strategies are implemented, and solutions to problems are negotiated in accordance with organisational requirements</p> <p>3.4 <i>Resistance to change</i> is identified and strategies are modified to address resistance in accordance with organisational requirements</p>
4. Monitor and evaluate adoption of	<p>4.1 Change management strategies are monitored, results are analysed and contingencies managed in accordance with organisational requirements</p>

ELEMENT

PERFORMANCE CRITERIA

innovation and change

- 4.2 Outcomes are evaluated and reported against extension objectives and required program outcomes, and recommendations are made for modification of future strategies
- 4.3 Revised strategies are implemented and evaluated in accordance with organisational requirements for continuous improvement
- 4.4 Outcomes with implications for organisational policy are identified and policy development is influenced in accordance with organisational requirements

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the essential skills and knowledge and their level, required for this unit.

Skill requirements

Look for evidence that confirms skills in:

- demonstrating leadership in the context of extension work
- using facilitation and presentation strategies/methods
- using a range of communication styles to suit different audiences and purposes
- responding to diversity, including gender and disability
- using problem solving to overcome resistance and develop professional relationships of trust
- reading and interpreting scientific research information, and designing materials using different media for different audiences
- applying information management strategies
- using technology for materials preparation and monitoring outcomes
- applying occupational health and safety and environmental requirements related to working in a scientific/technological research environment

Knowledge requirements

Look for evidence that confirms knowledge and understanding of:

- the industry (well-developed)
- advanced extension methodology
- principles of change management
- participatory processes in the context of extension activities
- group dynamics and group processes
- community development principles
- research principles and methodology
- evaluation processes relating to extension outcomes
- the scientific area (broad understanding)
- specialist area of expertise
- legislation, public sector standards and organisational code of practice as they relate to work in a scientific research/technological environment
- occupational health and safety, environmental protection and other public sector legislation

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the Unit descriptor, Performance Criteria, the Range Statement and the Assessment Guidelines for the Public Sector Training Package.

Units to be assessed together

- *Pre-requisite* units that must be achieved prior to this unit: *Nil*
- *Co-requisite* units that must be assessed with this unit: *Nil*
- *Co-assessed units* that may be assessed with this unit to increase the efficiency and realism of the assessment process include, but are not limited to:

PSPETHC501B Promote the values and ethos of public service

PSPGOV503B Coordinate resource allocation and usage

PSPGOV504B Undertake research and analysis

PSPGOV511A Provide leadership

PSPLEGN501B Promote compliance with legislation in the public sector

PSPOHS501A Monitor and maintain workplace safety

Overview of evidence requirements

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms:

- the knowledge requirements of this unit
- the skill requirements of this unit
- application of the Employability Skills as they relate to this unit (see Employability Summaries in Qualifications Framework)
- outcomes of a range of (3 or more) extension activities such as high-level oral communication/negotiation and presentation, conducting field days, materials development to effect change at both individual and regional level (or outcomes over time of a single long-term extension activity)

Resources required to carry out assessment

These resources include:

- legislation, procedures, guidelines and protocols
- industry information
- risk management strategies for extension work
- case studies and workplace scenarios to capture a range of different extension experiences

Where and how to assess evidence

Valid assessment of this unit requires:

- a workplace environment or one that closely resembles normal work practice and replicates the range of conditions likely to be encountered when facilitating innovation and change through

EVIDENCE GUIDE

extension, including coping with difficulties, irregularities and breakdowns in routine

- outcomes of a range of (3 or more) extension activities such as high-level oral communication/negotiation and presentation, conducting field days, materials development to effect change at both individual and regional level (or outcomes over time of a single long-term extension activity)

Assessment methods should reflect workplace demands, such as literacy, and the needs of particular groups, such as:

- people with disabilities
- people from culturally and linguistically diverse backgrounds
- Aboriginal and Torres Strait Islander people
- women
- young people
- older people
- people in rural and remote locations

Assessment methods suitable for valid and reliable assessment of this competency may include, but are not limited to, a combination of 2 or more of:

- case studies
- demonstration
- observation
- portfolios
- projects
- questioning
- scenarios
- simulation or role plays
- authenticated evidence from the workplace and/or training courses

For consistency of assessment

Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments

Range Statement

RANGE STATEMENT

The Range Statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The Range Statement also provides a focus for assessment. It relates to the unit as a whole. Text in *italics* in the Performance Criteria is explained here.

- | | |
|--|---|
| <i>Objectives</i> | <ul style="list-style-type: none"> • will typically relate to strategic industry development in a particular region/sector |
| <i>Client target groups may include</i> | <ul style="list-style-type: none"> • industry and community groups • Local, State or Commonwealth government organisations • general public • farmers • agri-business |
| <i>Dissemination may include</i> | <ul style="list-style-type: none"> • one-on-one discussion • telephone • on-site consultation • field days • field excursions • group processes • seminars • lectures • demonstrations • reports • journals • publications • publicity/media campaigns |

Employability Skills Information

Employability skills This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements are the essential outcomes of the unit of competency. Together, performance criteria specify the requirements for competent performance. Text in *bold italics* is explained in the Range Statement following.

Elements and Performance Criteria

ELEMENT

PERFORMANCE CRITERIA

1. Frame research question

- 1.1 Industry experience, industry analysis and consultation are used to identify viable research questions in accordance with organisational policy and procedures
- 1.2 Consultation with possible funding bodies is undertaken to identify issues which may attract external funding
- 1.3 Research question is framed to capture key issue/s, is clearly formulated and accompanied by supporting information
- 1.4 Question to be researched is shown to be of benefit to the industry and relevant to the organisation's objectives and timeframes
- 1.5 Issues relating to intellectual property are identified and managed in accordance with organisational requirements
- 1.6 Research and professional networks are used to identify *current* information relevant to the research question, and both published and unpublished materials are assessed and analysed for relevant information

2. Develop research methodology

- 2.1 Objectives are determined that represent logical and effective aspects of the question to be researched and meet organisational and funding requirements
- 2.2 *Research method/s* and *analytical techniques* are analysed and the methodology and techniques selected are those that best enable objectives to be met in accordance with organisational policy and funding requirements
- 2.3 Hypothesis is formulated and is plausible, relevant and of benefit
- 2.4 Risk management strategies are determined and activities laid out methodically in accordance with the requirements of the research methodology
- 2.5 Hypothesis, methodology, supporting information and activities are recorded in accordance with organisational and/or funding body requirements

3. Undertake and manage research

- 3.1 *Resources* to conduct the research are *attracted* in accordance with organisational policy and procedures
- 3.2 Tasks are scheduled, assigned and carried out in accordance with research methodology
- 3.3 Research performance is monitored, data is analysed and interpreted and contingencies are dealt with in accordance with research requirements
- 3.4 Research results are determined and *documented* in accordance with organisational requirements
- 3.5 Research report/s are prepared within specified timeframes in

ELEMENT**PERFORMANCE CRITERIA****4. Disseminate research results**

- accordance with organisational and/or funding body requirements
- 3.6 Reports are written clearly and concisely in styles suited to scientific and/or lay audiences in accordance with organisational requirements
- 4.1 Research results are *disseminated* within the organisation, to any external funding body, the scientific community and/or the industry via publications and presentations in accordance with organisational policy and procedures
- 4.2 Intellectual property is protected in accordance with organisational and/or funding body requirements

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the essential skills and knowledge and their level, required for this unit.

Skill requirements

Look for evidence that confirms skills in:

carrying out research

using problem solving techniques

working in and facilitating teams

using technology for data input, analysis and preparation of reports

interpreting and preparing reports containing scientific research information using a range of communication styles to suit different audiences and purposes

responding to diversity, including gender and disability

presenting research results tailored to different audiences such as regional industry/scientific audience

applying occupational health and safety and environmental requirements to working in a scientific/technological research environment

Knowledge requirements

Look for evidence that confirms knowledge and understanding of:

research methodologies

scientific process

statistics (working knowledge)

the use of sophisticated statistical models

specialist area of expertise

the industry

possible sources of external funding

reporting requirements for scientific research, requiring precision of expression and using a range of communication styles to suit different audiences and purposes

legislation, public sector standards and organisational code of practice as they relate to work in a scientific research/technological environment

public sector legislation including environmental and occupational health and safety requirements relating to scientific/technological research

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the Unit descriptor, Performance Criteria, the Range Statement and the Assessment Guidelines for the Public Sector Training Package.

Units to be assessed together

- *Pre-requisite* units that must be achieved prior to this unit: *Nil*
- *Co-requisite* units that must be assessed with this unit: *Nil*
- *Co-assessed units* that may be assessed with this unit to increase the efficiency and realism of the assessment process include, but are not limited to:

PSPETHC501B Promote the values and ethos of public service

PSPGOV503B Coordinate resource allocation and usage

PSPGOV504B Undertake research and analysis

PSPGOV511A Provide leadership

PSPLEGN501B Promote compliance with legislation in the public sector

PSPOHS501A Monitor and maintain workplace safety

Overview of evidence requirements

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms:

- the knowledge requirements of this unit
- the skill requirements of this unit
- application of the Employability Skills as they relate to this unit (see Employability Summaries in Qualifications Framework)
- scientific/technological research developed and undertaken in a range of (3 or more) contexts (or occasions, over time)

Resources required to carry out assessment

These resources include:

- legislation, procedures, guidelines and protocols
- research guidelines and methodologies relating to scientific/technological research
- industry information
- risk management strategies relating to scientific/technological research
- case studies and workplace scenarios to capture a range of different research situations

Where and how to assess evidence

Valid assessment of this unit requires:

- a workplace environment or one that closely resembles normal work practice and replicates the range of conditions likely to be

EVIDENCE GUIDE

encountered when developing and undertaking scientific/technological research, including coping with difficulties, irregularities and breakdowns in routine

- scientific/technological research developed and undertaken in a range of (3 or more) contexts (or occasions, over time)
- evidence of published research report/s and/or articles that merit peer recognition
- evidence of research presentation/s for statewide industry/scientific audience

Assessment methods should reflect workplace demands, such as literacy, and the needs of particular groups, such as:

- people with disabilities
- people from culturally and linguistically diverse backgrounds
- Aboriginal and Torres Strait Islander people
- women
- young people
- older people
- people in rural and remote locations

Assessment methods suitable for valid and reliable assessment of this competency may include, but are not limited to, a combination of 2 or more of:

- case studies
- demonstration
- observation
- portfolios
- projects
- questioning
- scenarios
- authenticated evidence from the workplace and/or training courses

For consistency of assessment

Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments

Range Statement

RANGE STATEMENT

The Range Statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The Range Statement also provides a focus for assessment. It relates to the unit as a whole. Text in *italics* in the Performance Criteria is explained here.

Competency field Government Science&Technology

PSPSCI601A Manage the provision of high-level scientific technical support

Modification History

Not applicable.

Unit Descriptor

Unit descriptor

This unit covers the provision of high-level technical support within a broad area of expertise at an experienced, self-directed level with responsibility for experimental, survey, sampling and/or analytical functions. It includes determining and managing high-level technical duties, managing the collection and recording of information, and analysing and reporting data.

In practice, management of high-level scientific technical support overlaps with other generalist or specialist work activities such as acting ethically, applying government systems, providing leadership, managing resources, managing risk, managing workplace safety etc.

This is a new unit of competency, added to the *Government Science&Technology* Competency field of the Training Package in 2004.

Application of the Unit

Not applicable.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

Employability skills This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements are the essential outcomes of the unit of competency. Together, performance criteria specify the requirements for competent performance. Text in *bold italics* is explained in the Range Statement following.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Determine and manage high-level technical duties	<p>1.1 Outputs are determined within a broad area of technical expertise and <i>technical duties</i> and responsibilities are determined in accordance with organisational requirements</p> <p>1.2 <i>Processes, resources, timelines</i> and <i>equipment</i> requirements are determined and technical duties are organised and managed in accordance with organisational and task requirements</p> <p>1.3 Risk management strategies, occupational health and safety, environmental and <i>other legislative requirements</i> are determined and explained to other staff as necessary, in a manner suited to their needs and levels of understanding and experience</p> <p>1.4 The organisation and preparation of resources and equipment are managed in accordance with organisational and task requirements</p>
2. Manage the collection and recording of information	<p>2.1 Technical leadership is provided and <i>individuals</i> are influenced to meet required outputs in accordance with organisational requirements</p> <p>2.2 Technical and management duties are carried out independently in accordance with organisational requirements</p> <p>2.3 Collection and recording of information are managed in accordance with identified processes and timelines</p> <p>2.4 Information is monitored and contingencies are dealt with in accordance with organisational and task requirements</p> <p>2.5 The use and maintenance of resources and equipment are managed in accordance with organisational and task requirements</p> <p>2.6 Risk management strategies, occupational health and safety, environmental and other legislative requirements are enforced in accordance with organisational requirements</p>
3. Analyse and report data	<p>3.1 Data input and records maintenance are monitored in accordance with organisational requirements</p> <p>3.2 Data is analysed and <i>irregularities</i> are dealt with in accordance with organisational and task requirements</p> <p>3.3 Technical reports and <i>high-level correspondence</i> are prepared and presented in accordance with organisational and task requirements</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the essential skills and knowledge and their level, required for this unit.

Skill requirements

Look for evidence that confirms skills in:

technical leadership to influence others to meet required outputs
using a range of communication styles to suit different audiences and purposes
responding to diversity, including gender and disability
reading formal documents such as legislation and instructions and applying them in the workplace
analysing/manipulating mathematical data and problem solving
using technology for word processing and data management
writing technical reports and ministerial correspondence requiring precision of expression
operating machinery and experimental equipment
applying occupational health and safety and environmental requirements related to working in a scientific/technological research environment

Knowledge requirements

Look for evidence that confirms knowledge and understanding of:

experimental procedures and scientific methods
analytical techniques/statistical analysis
the scientific area (broad understanding)
legislation, public sector standards and organisational code of practice as they relate to work in a scientific research/technical environment
standard operating procedures and/or work instructions
leadership of others in a scientific/technical environment
occupational health and safety, environmental protection and other public sector legislation
technical support work relevant to specialist area (extensive knowledge)

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the Unit descriptor, Performance Criteria, the Range Statement and the Assessment Guidelines for the Public Sector Training Package.

Units to be assessed together

- *Pre-requisite* units that must be achieved prior to this unit: *Nil*
- *Co-requisite* units that must be assessed with this unit: *Nil*
- *Co-assessed units* that may be assessed with this unit to increase the efficiency and realism of the assessment process include, but are not limited to:

PSPETHC601B Maintain and enhance confidence in public service

PSPGOV601B Apply government systems

PSPLEGN601B Manage compliance with legislation in the public sector

PSPMNGT602B Manage resources

PSPMNGT608B Manage risk

PSPOHS602A Manage workplace safety

Overview of evidence requirements

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms:

- the knowledge requirements of this unit
- the skill requirements of this unit
- application of the Employability Skills as they relate to this unit (see Employability Summaries in Qualifications Framework)
- management of the provision of high-level scientific technical support within a broad area of expertise at an experienced, self-directed level, in a range of (3 or more) contexts such as experimental, survey, sampling and/or analytical tasks (or occasions, over time)

Resources required to carry out assessment

These resources include:

- legislation, procedures, guidelines and protocols
- operating procedures/work instructions
- industry standards
- scientific/technological equipment and machinery related to the research environment
- personal protective equipment
- case studies and workplace scenarios to capture the range of situations likely to be encountered when managing the provision of high-level scientific technical support

EVIDENCE GUIDE

Where and how to assess evidence

Valid assessment of this unit requires:

- a workplace environment or one that closely resembles normal work practice and replicates the range of conditions likely to be encountered when managing the provision of high-level scientific technical support, including coping with difficulties, irregularities and breakdowns in routine
- management of the provision of high-level scientific technical support within a broad area of expertise at an experienced, self-directed level, in a range of (3 or more) contexts such as experimental, survey, sampling and/or analytical tasks (or occasions, over time)

Assessment methods should reflect workplace demands, such as literacy, and the needs of particular groups, such as:

- people with disabilities
- people from culturally and linguistically diverse backgrounds
- Aboriginal and Torres Strait Islander people
- women
- young people
- older people
- people in rural and remote locations

Assessment methods suitable for valid and reliable assessment of this competency may include, but are not limited to, a combination of 2 or more of:

- demonstration
- observation
- portfolios
- projects
- questioning
- authenticated evidence from the workplace and/or training courses

For consistency of assessment

Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments

Range Statement

RANGE STATEMENT

The Range Statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The Range Statement also provides a focus for assessment. It relates to the unit as a whole. Text in *italics* in the Performance Criteria is explained here.

Technical duties may include

- surveys
- sampling
- experiments
- trials
- tests
- assays
- surveillance
- collecting specimens
- inspections
- identification of plants or animals
- identification of pests
- operation, calibration and maintenance of experimental equipment
- diagnostic processes
- producing specimen images

Processes may include

- experimental processes
- observation
- field trials

Resources may include

- design specifications
- technical manuals
- componentry
- radioactive samples
- specimens
- plants
- seeds
- chemicals
- personal protective equipment

- Equipment may include*
- prototypes
 - test rigs
 - tools
 - diagnostic instruments
 - laboratory equipment
 - experimental equipment
 - farm equipment
- Other legislative requirements may include*
- quarantine or protection requirements
 - copyright and intellectual property legislation
 - Australian standards
- Individuals may include*
- other technical staff
 - supervised staff
 - contract workers
 - super-ordinates
 - research officers
 - farmers
- Irregularities may be dealt with by*
- problem solving
 - checking source information
 - checking data input
 - repeating tests/trial measurements
 - referring problem to other staff
- High-level correspondence may include*
- ministerials
 - briefing notes
 - discussion papers

Elements and Performance Criteria Pre-Content

Elements are the essential outcomes of the unit of competency. Together, performance criteria specify the requirements for competent performance. Text in *bold italics* is explained in the Range Statement following.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Investigate extension issues and methodologies	<p>1.1 Extension issues are investigated in relation to required program outcomes in accordance with organisational requirements</p> <p>1.2 Extension <i>objectives</i> are developed to further organisational outcomes and client needs</p> <p>1.3 Leadership is provided to extension colleagues, decisions are influenced and directions are monitored and changed in accordance with emerging requirements</p> <p>1.4 The characteristics of <i>client target groups</i> are identified and interpretation of research information is adapted for different target groups</p> <p>1.5 <i>Dissemination</i> methodology, techniques and strategies are developed and used in accordance with the type of research information and client needs/preferences</p> <p>1.6 Issues relating to intellectual property are identified and exploited in accordance with organisational requirements</p>
2. Prepare for innovation and change management	<p>2.1 Strategic industry alliances and networks are built and used to develop and apply <i>industry knowledge</i> to influence client decision making and practices</p> <p>2.2 The industry sector is analysed in relation to size, economic impact, and political importance in order to determine risks, and manage <i>resistance to change</i> and other contingencies</p> <p>2.3 <i>Change management</i> strategies are developed in accordance with organisational policy and practices to strategically influence the industry sector</p> <p>2.4 <i>Risks</i> are determined and risk management strategies are developed and applied in accordance with change management strategies and organisational requirements</p> <p>2.5 Resources are <i>attracted</i> and managed, and a communication/marketing strategy is developed in accordance with program <i>responsibilities</i>, extension objectives and organisational requirements</p>
3. Influence innovation and change	<p>3.1 Clients are influenced in accordance with organisational requirements to seek innovative solutions and to manage change</p> <p>3.2 Resistance to change is analysed and managed in accordance with organisational requirements</p> <p>3.3 Local and regional extension services are designed and implemented in accordance with organisational requirements, and <i>extension methods</i> are set to meet organisational guidelines and the needs of clients</p> <p>3.4 Communication/marketing strategy is implemented and information/<i>advice</i> is monitored to ensure it is relevant, accurate</p>

ELEMENT

PERFORMANCE CRITERIA

- and tailored to client needs in terms of concepts, language and format
- 3.5 Client problems are negotiated and resolved, and new issues are identified and documented for further research in accordance with organisational requirements
- 4. Monitor and evaluate adoption of innovation and change**
- 4.1 Adoption of innovation and change is evaluated and strategies are recommended to improve future outcomes
- 4.2 Outcomes are evaluated and reported against extension objectives and required organisational outcomes in accordance with organisational requirements
- 4.3 Revised strategies are implemented and evaluated, and contingencies are managed in accordance with organisational requirements for continuous improvement
- 4.4 Outcomes with political/policy implications are identified and contributions are made to policy development in accordance with organisational requirements

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the essential skills and knowledge and their level, required for this unit.

Skill requirements

Look for evidence that confirms skills in:

- investigating extension issues
- exploiting intellectual property rights
- building strategic alliances
- attracting resources and designing extension activities at local and regional level.
- demonstrating leadership in the context of extension work
- using facilitation and presentation strategies/methods
- using a range of communication styles to suit different audiences and purposes
- responding to diversity, including gender and disability
- using problem solving to overcome resistance and develop professional relationships of trust
- reading and interpreting scientific research information, and designing materials using different media for different audiences
- applying information management in the context of extension activities
- using technology for materials preparation and monitoring outcomes
- applying occupational health and safety and environmental requirements related to working in a scientific/technological research environment

Knowledge requirements

Look for evidence that confirms knowledge and understanding of:

- the industry (extensive knowledge)
- advanced extension methodology
- principles of change management
- participatory processes in the context of extension activities
- group dynamics and group processes
- community development principles
- research principles and methodology
- evaluation processes relating to extension outcomes
- the scientific area (broad understanding)
- specialist area of expertise
- legislation, public sector standards and organisational code of practice as they relate to work in a scientific research/technological environment
- occupational health and safety, environmental protection and other public sector legislation

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the Unit descriptor, Performance Criteria, the Range Statement and the Assessment Guidelines for the Public Sector Training Package.

Units to be assessed together

- *Pre-requisite* units that must be achieved prior to this unit: *Nil*
- *Co-requisite* units that must be assessed with this unit: *Nil*
- *Co-assessed units* that may be assessed with this unit to increase the efficiency and realism of the assessment process include, but are not limited to:

PSPETHC601B Maintain and enhance confidence in public service

PSPGOV601B Apply government systems

PSPLEGN601B Manage compliance with legislation in the public sector

PSPMNGT602B Manage resources

PSPMNGT608B Manage risk

PSPOHS602A Manage workplace safety

Overview of evidence requirements

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms:

- the knowledge requirements of this unit
- the skill requirements of this unit
- innovation and change influenced at both individual and industry level through a range of (3 or more) complex extension activities in strategically important areas (or a range of outcomes from a single complex long-term extension project)

Resources required to carry out assessment

These resources include:

- legislation, procedures, guidelines and protocols
- industry information
- risk management strategies for extension work
- case studies and workplace scenarios to capture a range of different extension experiences

Where and how to assess evidence

Valid assessment of this unit requires:

- a workplace environment or one that closely resembles normal work practice and replicates the range of conditions likely to be encountered when influencing innovation and change through extension, including coping with difficulties, irregularities and breakdowns in routine
- innovation and change influenced at both individual and

EVIDENCE GUIDE

industry level through a range of (3 or more) complex extension activities in strategically important areas (or a range of outcomes from a single complex long-term extension project)

Assessment methods should reflect workplace demands, such as literacy, and the needs of particular groups, such as:

- people with disabilities
- people from culturally and linguistically diverse backgrounds
- Aboriginal and Torres Strait Islander people
- women
- young people
- older people
- people in rural and remote locations

Assessment methods suitable for valid and reliable assessment of this competency may include, but are not limited to, a combination of 2 or more of:

- case studies
- portfolios
- projects
- questioning
- scenarios
- authenticated evidence from the workplace and/or training courses

For consistency of assessment

Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments

Range Statement

RANGE STATEMENT

The Range Statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The Range Statement also provides a focus for assessment. It relates to the unit as a whole. Text in *italics* in the Performance Criteria is explained here.

Elements and Performance Criteria Pre-Content

Elements are the essential outcomes of the unit of competency. Together, performance criteria specify the requirements for competent performance. Text in *bold italics* is explained in the Range Statement following.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Formulate research question	<p>1.1 Ongoing professional development and networking with industry, external funding bodies and professional networks are used to identify issues for investigation</p> <p>1.2 Industry experience and industry analysis are used to formulate innovative research question/s in accordance with organisational policy and procedures</p> <p>1.3 Research question is formulated that is logical, defensible and dissects key elements of the issue to be investigated</p> <p>1.4 Question to be researched is shown to be of strategic importance to the industry and to the organisation's objectives and timeframes</p> <p>1.5 Issues relating to intellectual property are identified and exploited in accordance with organisational requirements</p> <p>1.6 Research and professional networks are contributed to and used to access <i>current</i> information relevant to the research question, and both current and published information is assessed and relevant information is extracted</p>
2. Devise research methodology	<p>2.1 Innovations in research methods, objectives and/or the formulation of a hypothesis are evolved that will enhance the conduct of the research and meet organisational and funding requirements</p> <p>2.2 Hypothesis is determined that is testable, relevant and of benefit, and research methods are developed appropriate to the hypothesis</p> <p>2.3 Risk management strategies and <i>resource needs</i> are identified and specified in accordance with organisational and/or funding body requirements</p> <p>2.4 Funding applications are prepared and submitted as required in accordance with organisational and/or funding body requirements</p> <p>2.5 Documentation/recordkeeping is completed in accordance with organisational and/or funding body requirements</p>
3. Conduct and manage research	<p>3.1 External funding is attracted and managed in accordance with organisational policy and procedures</p> <p>3.2 Leadership is provided and research team is influenced/managed to meet research objectives</p> <p>3.3 Performance and outputs are monitored and change/s in direction are instigated in accordance with the research methodology and organisational requirements</p> <p>3.4 Collaboration across locations and organisations is facilitated to meet research objectives and timeframes</p>

ELEMENT**PERFORMANCE CRITERIA**

- 3.5 Research results are analysed, *documented* and report/s are prepared in accordance with the research methodology, organisational and funding body requirements
- 3.6 Communication style is adapted to write for both scientific and lay audiences and to translate results to applied situations
- 4. Publish and present research results**
- 4.1 Research papers are published and results are *disseminated* widely both internally and externally to the organisation in accordance with organisational policy and procedures
- 4.2 Research is presented at seminars and scientific conferences, nationally or internationally in accordance with organisational requirements
- 4.3 Intellectual property is protected in accordance with organisational and funding body requirements
- 4.4 National reputation is built through publication and presentation of research papers and networking nationally or internationally

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the essential skills and knowledge and their level, required for this unit.

Skill requirements

Look for evidence that confirms skills in:

- carrying out research
- using problem solving techniques
- managing people and teams
- influencing and negotiating
- using a range of communication styles to suit different audiences and purposes
- using technology for data input, analysis and preparation of reports
- interpreting and preparing reports containing scientific research information using a range of communication styles to suit different audiences and purposes
- responding to diversity, including gender and disability
- presenting research results tailored to different audiences such as a national regional industry/scientific audience
- applying occupational health and safety and environmental requirements to working in a scientific/technological research environment

Knowledge requirements

Look for evidence that confirms knowledge and understanding of:

- research methodologies
- scientific process
- statistics (working knowledge)
- the use of sophisticated statistical models
- specialist area of expertise
- the industry
- national networks
- external funding sources
- reporting requirements for scientific research, requiring precision of expression
- legislation, public sector standards and organisational code of practice as they relate to work in a scientific research/technological environment
- public sector legislation including environmental and occupational health and safety requirements relating to scientific/technological research

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the Unit descriptor, Performance Criteria, the Range Statement and the Assessment Guidelines for the Public Sector Training Package.

Units to be assessed together

- *Pre-requisite* units that must be achieved prior to this unit: *Nil*
- *Co-requisite* units that must be assessed with this unit: *Nil*
- *Co-assessed units* that may be assessed with this unit to increase the efficiency and realism of the assessment process include, but are not limited to:

PSPETHC601B Maintain and enhance confidence in public service

PSPGOV601B Apply government systems

PSPGOV602B Establish and maintain strategic networks

PSPMNGT602B Manage resources

PSPMNGT604B Manage change

PSPMNGT608B Manage risk

PSPOHS602A Manage workplace safety

Overview of evidence requirements

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms:

- the knowledge requirements of this unit
- the skill requirements of this unit
- application of the Employability Skills as they relate to this unit (see Employability Summaries in Qualifications Framework)
- scientific/technological research initiated and conducted in a range of (3 or more) contexts (or occasions, over time)
- published research papers and articles for scientific and lay audiences that receive national recognition
- research presentations for national scientific and industry audiences

Resources required to carry out assessment

These resources include:

- legislation, procedures, guidelines and protocols
- research guidelines and methodologies relating to scientific/technological research
- industry information
- risk management strategies relating to scientific/technological research
- case studies and workplace scenarios to capture a range of different research situations

EVIDENCE GUIDE

Where and how to assess evidence

Valid assessment of this unit requires:

- a workplace environment or one that closely resembles normal work practice and replicates the range of conditions likely to be encountered when initiating and conducting scientific/technological research, including coping with difficulties, irregularities and breakdowns in routine
- research initiated and conducted in a range of (3 or more) contexts (or occasions, over time)
- evidence of published research papers and articles for scientific and lay audiences that receive national recognition
- evidence of research presentations for national scientific and industry audiences

Assessment methods should reflect workplace demands, such as literacy, and the needs of particular groups, such as:

- people with disabilities
- people from culturally and linguistically diverse backgrounds
- Aboriginal and Torres Strait Islander people
- women
- young people
- older people
- people in rural and remote locations

Assessment methods suitable for valid and reliable assessment of this competency may include, but are not limited to, a combination of 2 or more of:

- case studies
- demonstration
- observation
- portfolios
- projects
- questioning
- authenticated evidence from the workplace and/or training courses

For consistency of assessment

Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments

Range Statement

RANGE STATEMENT

The Range Statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The Range Statement also provides a focus for assessment. It relates to the unit as a whole. Elements and Performance Criteria Pre-Content

Elements are the essential outcomes of the unit of competency. Together, performance criteria specify the requirements for competent performance. Text in *bold italics* is explained in the Range Statement following.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Design extension initiatives	<p>1.1 Extension issues are identified and analysed and extension initiatives are developed to address required organisational outcomes</p> <p>1.2 Extension <i>objectives</i> are developed to make a significant contribution to the industry in accordance with organisational and client needs</p> <p>1.3 Leadership is provided to extension colleagues, decisions are influenced and directions are monitored and changed in accordance with emerging requirements</p> <p>1.4 The capacity and capability of <i>client target groups</i> to accept information and change are determined, and extension methodology is developed to influence them in accordance with organisational requirements</p> <p>1.5 Issues relating to intellectual property are identified and exploited in accordance with organisational requirements</p>
2. Prepare for innovation and change management	<p>2.1 Extensive industry experience, collaboration with national and international networks and <i>cutting edge professional expertise</i> are used to influence client decision making and industry practices</p> <p>2.2 Industry, economic and political analyses are conducted to strategically manage risk, <i>resistance to change</i> and other contingencies in accordance with program <i>responsibilities</i>, extension objectives and organisational requirements</p> <p>2.3 Leadership is provided in the development of innovative <i>change management</i> strategies that will make a significant contribution to the implementation of improved decision making and industry practice</p> <p>2.4 <i>Risks</i> are determined and risk management strategies are developed and implemented in accordance with change management strategies and organisational requirements</p> <p>2.5 Investment is attracted for significant extension programs and is managed in accordance with organisational and funding body requirements</p>
3. Create innovation and change	<p>3.1 Leadership is provided to influence the adoption of innovation and change, and to manage contingencies in areas of strategic importance or significant economic impact</p> <p>3.2 Expert <i>advice</i> is provided on the basis of specialised knowledge of problem identification and problem solving processes and techniques relating to information and technology transfer</p> <p>3.3 Extension campaigns are implemented and managed at state and regional level in accordance with organisational priorities</p>

|--|--|
| 4. Monitor and evaluate adoption of innovation and change | 3.4 Industry problems are identified and analysed, solutions are negotiated and issues requiring further research are identified and actioned in accordance with organisational requirements |
| | 4.1 Adoption of innovation and change is evaluated and strategies are developed and implemented to improve future outcomes |
| | 4.2 Outcomes are evaluated and reported against extension objectives and required organisational outcomes in accordance with organisational requirements |
| | 4.3 Outcomes with political/policy implications are identified and advice and policy development is influenced in accordance with organisational requirements |

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the essential skills and knowledge and their level, required for this unit.

Skill requirements

Look for evidence that confirms skills in:

- demonstrating strategic leadership in the context of extension work
- using facilitation and presentation strategies
- applying information management in the context of extension activities
- using a range of communication styles to suit different audiences and purposes
- responding to diversity, including gender and disability
- using problem solving to overcome resistance and develop professional relationships of trust
- reading and interpreting scientific research information, designing materials using different media for different audiences, and influencing innovation and change
- problem solving
- using technology for materials preparation and monitoring outcomes
- applying occupational health and safety and environmental requirements related to working in a scientific/technological research environment

Knowledge requirements

Look for evidence that confirms knowledge and understanding of:

- local, national and international industry (extensive knowledge and experience)
- advanced extension methodology
- principles of change management
- participatory processes in the context of extension activities
- group dynamics and group processes
- community development principles
- research principles and methodology
- evaluation processes relating to extension outcomes
- national and international innovation in extension methodology and practices
- the scientific area (broad understanding)
- specialist area of expertise
- legislation, public sector standards and organisational code of practice as they relate to work in a scientific research/technological environment
- occupational health and safety, environmental protection and other public sector legislation

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the Unit descriptor, Performance Criteria, the Range Statement and the Assessment Guidelines for the Public Sector Training Package.

Units to be assessed together

- *Pre-requisite units* that must be achieved prior to this unit: *Nil*
- *Co-requisite units* that must be assessed with this unit: *Nil*
- *Co-assessed units* that may be assessed with this unit to increase the efficiency and realism of the assessment process include, but are not limited to:

PSPETHC701A Lead and influence ethical practice in the public sector

PSPMNGT701B Provide strategic direction

PSPMNGT702A Influence and shape diversity management

PSPMNGT703A Lead and influence change

PSPPOL701A Influence strategic policy

Overview of evidence requirements

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms:

- the knowledge requirements of this unit
- the skill requirements of this unit
- application of the Employability Skills as they relate to this unit (see Employability Summaries in Qualifications Framework)
- demonstration of leadership across a range of (3 or more) complex extension activities of state/national/international significance effecting change at whole of industry level (or occasions, over time)

Resources required to carry out assessment

These resources include:

- legislation, procedures, guidelines and protocols
- industry information at state, national and international level
- risk management strategies for extension work
- case studies and workplace scenarios to capture a range of complex extension experiences

Where and how to assess evidence

Valid assessment of this unit requires:

- a workplace environment or one that closely resembles normal work practice and replicates the range of conditions likely to be encountered when creating innovation and change through extension, including coping with difficulties, irregularities and breakdowns in routine

EVIDENCE GUIDE

- demonstration of leadership across a range of (3 or more) complex extension activities of state/national/international significance effecting change at whole of industry level (or occasions, over time)

Assessment methods should reflect workplace demands, such as literacy, and the needs of particular groups, such as:

- people with disabilities
- people from culturally and linguistically diverse backgrounds
- Aboriginal and Torres Strait Islander people
- women
- young people
- older people
- people in rural and remote locations

Assessment methods suitable for valid and reliable assessment of this competency may include, but are not limited to, a combination of 2 or more of:

- case studies
- portfolios
- projects
- questioning
- authenticated evidence from the workplace and/or training courses

For consistency of assessment

Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments

Range Statement

RANGE STATEMENT

The Range Statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The Range Statement also provides a focus for assessment. It relates to the unit as a whole. Text in *italics* in the Performance Criteria is explained here.

<i>Objectives</i>	<ul style="list-style-type: none"> • will typically relate to entire large industries of significant economic impact such as wool, wheat industries
<i>Client target groups may include</i>	<ul style="list-style-type: none"> • industry and community groups • Local, State or Commonwealth government organisations • general public • farmers • agri-business
<i>Demonstration of cutting edge professional expertise may occur through</i>	<ul style="list-style-type: none"> • seminars • lectures • demonstrations • reports • published material in international journals • publications • publicity/media campaigns • published material in peer reviewed publications • policy change
<i>Resistance to change may be</i>	<ul style="list-style-type: none"> • extreme, where sustained exceptional performance is required to effect change
<i>Responsibilities may include</i>	<ul style="list-style-type: none"> • industry development on a whole of (large) industry basis such as wool, wheat industries • influence on new or emerging industries of significant economic impact • dealing with situations where risks are extreme • dealing with extreme resistance to change • dealing with politically sensitive issues
<i>Change management may include</i>	<ul style="list-style-type: none"> • major contribution to influencing change at state/national/international level
<i>Risks</i>	<ul style="list-style-type: none"> • may be extreme for the agency/industry sector • may entail significant opportunity lost if innovation/change is not effected
<i>Advice may include</i>	<ul style="list-style-type: none"> • aspects of industry: • productivity

RANGE STATEMENT

- efficiency
- environmental sustainability
- crop
- livestock
- pasture production
- marketing
- feed, food and fibre processing
- soil conservation
- water conservation
- irrigation
- drainage
- farm management
- group management advice
- community development advice
- strategic planning advice
- and may relate to deeper systems issues that may need to change

Competency field Government Science&Technology

PSPSCI702A Initiate and lead sophisticated scientific/technological research

Modification History

Not applicable.

Unit Descriptor

Unit descriptor

This unit covers the conduct of sophisticated scientific/technological research at a level meriting international recognition requiring exceptional initiative and judgment in initiating, resourcing and leading projects. It includes initiating the research, designing the research methodology, leading and managing the research, and publishing and promoting the research results.

In practice, initiating and leading sophisticated scientific/technological research overlaps with other generalist or specialist work activities such as influencing ethical practice, influencing strategic policy, undertaking strategic risk management, leading change management etc.

This is a new unit of competency, added to the *Government Science&Technology* Competency field of the Training Package in 2004.

Application of the Unit

Not applicable.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

Employability skills This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements are the essential outcomes of the unit of competency. Together, performance criteria specify the requirements for competent performance. Text in *bold italics* is explained in the Range Statement following.

Elements and Performance Criteria

ELEMENT

PERFORMANCE CRITERIA

1. Initiate research

- 1.1 Cutting edge professional expertise, liaison and collaboration with international networks and extensive industry experience are used to identify areas for targeting research
- 1.2 *Research* is initiated that will make a significant contribution to the body of scientific knowledge in the area, to the industry and to the organisation's strategic objectives
- 1.3 Intellectual property issues relating to the research are exploited in accordance with organisational requirements
- 1.4 Research is initiated that is innovative, logically formulated and draws on national and international research in progress, in addition to both published and *unpublished* research

2. Design research methodology

- 2.1 Innovations are incorporated in research design and hypothesis testing
- 2.2 Research colleagues are identified, and functions and activities are negotiated and planned in accordance with the research methodology
- 2.3 A communication strategy is developed to manage input and cooperation between team members in accordance with the research methodology
- 2.4 Risk management strategies and *resource needs* are determined and specified in accordance with organisational and/or funding body requirements
- 2.5 Funding applications are prepared and submitted in accordance with organisational and/or funding body requirements
- 2.6 Documentation/recordkeeping is completed in accordance with organisational and/or funding body requirements

3. Lead and manage research

- 3.1 Funding is attracted for significant research projects and managed in accordance with organisational and funding body requirements
- 3.2 Scientific leadership is provided to research colleagues, decisions are influenced and research direction is monitored and changed in accordance with emerging requirements
- 3.3 Collaboration across locations and organisations is managed to focus the research and meet objectives, timeframes and budgetary requirements
- 3.4 Resources are managed in accordance with research budget, organisational and funding body requirements
- 3.5 Research is *documented* and outcomes are delivered to the funding body and the organisation in accordance with research plan, timeframes and budget
- 3.6 Research reports are prepared that are clear, concise, targeted to

ELEMENT**PERFORMANCE CRITERIA**

a range of audiences and are delivered on time in accordance with organisational and funding body requirements

4. Publish and promote research results

- 4.1 Research papers are published and results are *promoted* widely internally and externally to the organisation in accordance with organisational policy and procedures
- 4.2 Research is presented at seminars and scientific conferences, both nationally and internationally in accordance with organisational requirements
- 4.3 Intellectual property is protected in accordance with organisational and funding body requirements
- 4.4 International reputation is built through publication and presentation of research papers and networking both nationally and internationally

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the essential skills and knowledge and their level, required for this unit.

Skill requirements

Look for evidence that confirms skills in:

carrying out research

using problem solving techniques

managing people and teams

influencing and negotiating

using technology for data input, analysis and preparation of reports

interpreting and preparing reports containing scientific research information using a range of communication styles to suit different audiences and purposes

responding to diversity, including gender and disability

presenting research results tailored to different audiences such as an international industry/scientific audience

applying occupational health and safety and environmental requirements to scientific/technological research environments

Knowledge requirements

Look for evidence that confirms knowledge and understanding of:

research methodologies

scientific process

statistics (working knowledge)

the use of sophisticated statistical models

specialist area of expertise

the industry

international and national networks

external funding sources

reporting requirements for scientific research, requiring precision of expression and using a range of communication styles to suit different audiences and purposes

legislation, public sector standards and organisational code of practice as they relate to work in a scientific research/technological environment

public sector legislation including environmental and occupational health and safety requirements relating to scientific/technological research

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the Unit descriptor, Performance Criteria, the Range Statement and the Assessment Guidelines for the Public Sector Training Package.

Units to be assessed together

- *Pre-requisite* units that must be achieved prior to this unit: *Nil*
- *Co-requisite* units that must be assessed with this unit: *Nil*
- *Co-assessed units* that may be assessed with this unit to increase the efficiency and realism of the assessment process include, but are not limited to:

PSPETHC701A Lead and influence ethical practice in the public sector

PSPMNGT701B Provide strategic direction

PSPMNGT703A Lead and influence change

PSPMNGT704A Undertake enterprise risk management

PSPPOL701A Influence strategic policy

Overview of evidence requirements

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms:

- the knowledge requirements of this unit
- the skill requirements of this unit
- application of the Employability Skills as they relate to this unit (see Employability Summaries in Qualifications Framework)
- leadership in sophisticated scientific/technological research initiated and lead in a range of (2 or more) contexts (or occasions, over time)
- published research papers and articles for scientific and lay audiences that receive international recognition
- research presentations for international scientific and industry audiences

Resources required to carry out assessment

These resources include:

- legislation, procedures, guidelines and protocols
- research guidelines and methodologies relating to scientific/technological research
- industry information
- risk management strategies relating to scientific/technological research
- case studies and workplace scenarios to capture a range of different sophisticated research situations

EVIDENCE GUIDE

Where and how to assess evidence

Valid assessment of this unit requires:

- a workplace environment or one that closely resembles normal work practice and replicates the range of conditions likely to be encountered when initiating and leading scientific/technological research, including coping with difficulties, irregularities and breakdowns in routine
- leadership in sophisticated scientific/technological research initiated and lead in a range of (2 or more) contexts (or occasions, over time)
- evidence of published research papers and articles for scientific and lay audiences that receive international recognition
- evidence of research presentations for international scientific and industry audiences

Assessment methods should reflect workplace demands, such as literacy, and the needs of particular groups, such as:

- people with disabilities
- people from culturally and linguistically diverse backgrounds
- Aboriginal and Torres Strait Islander people
- women
- young people
- older people
- people in rural and remote locations

Assessment methods suitable for valid and reliable assessment of this competency may include, but are not limited to, a combination of 2 or more of:

- case studies
- portfolios
- projects
- questioning
- authenticated evidence from the workplace and/or training courses

For consistency of assessment

Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments

Range Statement

RANGE STATEMENT

The Range Statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The Range Statement also provides a focus for assessment. It relates to the unit as a whole. Elements and Performance Criteria Pre-Content

Elements are the essential outcomes of the unit of competency. Together, performance criteria specify the requirements for competent performance. Text in *bold italics* is explained in the Range Statement following.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Protect assets from security threats	<p>1.1 <i>Assets</i> are stored and accessed in accordance with organisational policies, procedures and guidelines</p> <p>1.2 Assets are regularly checked to ensure security</p> <p>1.3 Suspicious activity is investigated and dealt with in accordance with organisational policy and procedures</p> <p>1.4 <i>Expert advice</i> is obtained as required in accordance with organisational policy and procedures</p>
2. Implement access restrictions	<p>2.1 Access is <i>restricted</i> to authorised personnel</p> <p>2.2 Potential threats are identified</p> <p>2.3 Breaches are identified and reported to appropriate personnel in accordance with organisational policy and procedures</p> <p>2.4 Action is taken to deal with a breach in accordance with legislation, policy and guidelines</p>
3. Advise third parties of security requirements	<p>3.1 The needs, expectations, attitudes, and current level of knowledge of <i>third parties</i> are confirmed</p> <p>3.2 Risks related to possible confrontations are identified and managed in accordance with organisational risk management and procedures</p> <p>3.3 Third parties are advised of the organisation's security requirements</p> <p>3.4 Advice is provided that is current, timely and meets the specific needs of the parties in its range, depth and form of presentation</p> <p>3.5 Feedback is obtained on the party's level of understanding, and additional information or explanation is used to clarify requirements if needed</p>
4. Minimise security risk	<p>4.1 Changes in circumstance are identified and reported to appropriate personnel in accordance with organisational policy and procedures</p> <p>4.2 Documentation is completed in accordance with organisational policies, procedures and guidelines</p> <p>4.3 <i>Actions</i> are taken to reduce the likelihood of breaches reoccurring in accordance with the organisation's security plan</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the essential skills and knowledge and their level, required for this unit.

Skill requirements

Look for evidence that confirms skills in:

- applying legislation, regulations and policies relating to government security management
- applying analysis and problem solving
- tailoring communication to the needs of a diverse range of people inside and outside the organisation
- completing documentation and writing reports requiring attention to detail, and formality of language and structure
- responding to diversity, including gender and disability
- applying procedures relating to occupational health and safety and environment in the context of government security management

Knowledge requirements

Look for evidence that confirms knowledge and understanding of:

- legislation, regulations, policies, procedures and guidelines relating to government security management
- standards for management of classified information and assets
- available sources of expert advice
- international protocols and treaties impacting on government security management
- equal employment opportunity, equity and diversity principles
- public sector legislation such as occupational health and safety and environment in the context of government security management

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the Unit descriptor, Performance Criteria, the Range Statement and the Assessment Guidelines for the Public Sector Training Package.

Units to be assessed together

- *Pre-requisite* units that must be achieved prior to this unit: *Nil*

Elements and Performance Criteria Pre-Content

Elements are the essential outcomes of the unit of competency. Together, performance criteria specify the requirements for competent performance. Text in *bold italics* is explained in the Range Statement following.

Elements and Performance Criteria

ELEMENT

PERFORMANCE CRITERIA

1. Assess and advise on security incidents

- 1.1 *Security incidents* are identified in accordance with legislation, government security policy and guidelines
- 1.2 Response is provided in accordance with organisational policy and procedures, incident management plan and reflects seriousness of the incident
- 1.3 *Preliminary assessment* is conducted that considers the nature of the breach, level of risk and likely consequences
- 1.4 Initial advice regarding the incident is given to *relevant personnel* in a timely fashion
- 1.5 Complete and accurate *records* relating to the incident are maintained, based on information collected in a timely fashion

2. Plan incident response

- 2.1 Evidence is identified and collected in accordance with legislation, organisational policy and procedures
- 2.2 Evidence is assessed to determine risk factors
- 2.3 Action is recommended which is appropriate to the level of seriousness of the incident
- 2.4 Any changes required in security policy as a result of the incident are identified and documented
- 2.5 Appropriate agencies are advised of the incident in accordance with legislation, government security policy and procedures
- 2.6 A final report is prepared that incorporates background to the incident, action taken, interview statements, outcomes, summary of findings and recommended action

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the essential skills and knowledge and their level, required for this unit.

Skill requirements

Look for evidence that confirms skills in:

- applying legislation, regulations and policies relating to government security management
- undertaking research, analysis (including trend analysis) and problem solving
- using effective communication, including interviewing tailored to a diverse stakeholder group
- responding to diversity, including gender and disability
- planning, carrying out and guiding an investigation
- recording evidence in accordance with legislation and public sector standards
- writing reports and recommendations requiring formality of language and structure, and accurate and objective content
- applying procedures relating to occupational health and safety and environment in the context of government security incident management

Knowledge requirements

Look for evidence that confirms knowledge and understanding of:

- legislation, regulations, policies, procedures and guidelines relating to government security management
- organisation's security plan
- Crimes Act 1914 and Criminal Code 1985
- powers inferred to investigate security incidents, including limitations
- referral procedures and appropriate agencies
- intelligence and analytical process
- conduct of administrative, security or criminal investigations
- equal employment opportunity, equity and diversity principles
- public sector legislation such as privacy, security, occupational health and safety and environment in the context of government security management

ELEMENT	PERFORMANCE CRITERIA
1. Prepare for security awareness presentation	<p>1.1 Objectives are determined for the <i>presentation</i> that reflect the identified needs of the participants, are achievable and stated in terms of outcomes</p> <p>1.2 Presentation methods are selected to suit identified outcomes, participants' needs and availability of equipment and resources</p> <p>1.3 Provision is made for participants to contribute to the session, based on their experience</p> <p>1.4 Content of materials to be used is validated by experience before use, where possible</p> <p>1.5 Examples of incidents and results of non-compliance are included in presentation materials</p> <p>1.6 Methods are identified and <i>information</i> is prepared to suit the specified objectives of the session, the needs of the participants and the size and location of the group</p>
2. Deliver session on security awareness	<p>2.1 Session is structured to facilitate the creation of opportunities for discussion of broad conceptual, ethical and legal issues surrounding government security management</p> <p>2.2 Objectives of the session, structure of the activities and other details are explained to participants to suit their level of understanding and experience, and feedback is elicited</p> <p>2.3 Materials and presentation techniques are used and adapted to the particular audience and are effective and interesting</p> <p>2.4 Materials are presented in such a way as to establish a positive response in the organisation and its clients regarding security management</p> <p>2.5 Case studies are used for illustrative purposes where possible, and address urgency and levels of risk in security management</p> <p>2.6 Models of excellence in government security management are highlighted</p>
3. Review security awareness session outcomes	<p>3.1 Participants are encouraged to provide feedback on all aspects of the security awareness sessions</p> <p>3.2 Suitability of the approach, the content and outcomes are reviewed as a guide for further activities</p> <p>3.3 Own performance is reviewed against objectives and in response to participants' responses and comments</p> <p>3.4 Advice is provided to appropriate people regarding possible future activities or amendments to organisational awareness strategy and programs, including identification of high risk areas for security management</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the essential skills and knowledge and their level, required for this unit.

Skill requirements

Look for evidence that confirms skills in:

- making presentations to provide security awareness sessions aimed at improving security management skills and raising the level of security alertness of less experienced members of staff
- tailoring sessions to the needs of adult learners
- explaining complex concepts and formal documents such as legislation, standards and codes of conduct
- using a range of communication styles to suit different audiences and purposes
- responding to diversity, including gender and disability
- mentoring culturally and linguistically diverse staff to maximise security awareness
- designing/having input into awareness sessions delivered by specialists
- incorporating feedback from attendees into future session design and delivery
- applying occupational health and safety and environmental procedures in the context of delivering security awareness sessions

Knowledge requirements

Look for evidence that confirms knowledge and understanding of:

- legislation, policies, guidelines and processes relating to government security management
- international treaties and protocols
- cross-jurisdictional protocols
- organisational structure and core business
- the organisation's strategic objectives related to security management
- national strategic objectives relating to government security management
- the link between ongoing information/awareness sessions and effective security management
- audience requirements
- adult learning principles
- security constraints
- public sector values and codes of conduct
- anti-discrimination and diversity legislation
- legislation, policies and procedures relating to presentations including occupational health and safety and environment

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the Unit descriptor, Performance Criteria, the Range Statement and the Assessment Guidelines for the Public Sector Training Package.

Units to be assessed together

- *Pre-requisite* units that must be achieved prior to this unit: *Nil*
- *Co-requisite* units that must be assessed with this unit: *Nil*
- *Co-assessed units* that may be assessed with this unit to increase the efficiency and realism of the assessment process include, but are not limited to:

PSPETHC301B Uphold the values and principles of public service

PSPLEGN301B Comply with legislation in the public sector

PSPGOV302B Contribute to workgroup activities

PSPGOV307B Organise workplace information

PSPSEC301A Secure government assets

PSPSEC302A Respond to government security incidents

PSPSEC304A Undertake information technology security audits

Overview of evidence requirements

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms:

- the knowledge requirements of this unit
- the skill requirements of this unit
- application of the Employability Skills as they relate to this unit (see Employability Summaries in Qualifications Framework)
- presentation of security awareness sessions in a range of (3 or more) contexts

Resources required to carry out assessment

These resources include:

- government security management guidelines
- government security management standards

Security Guidelines for Australian Government IT Systems (ACSI 33)

- Commonwealth Protective Security Manual
- public sector values and codes of conduct
- legislation, procedures and protocols relating to security management
- case studies and workplace scenarios to capture the range of security situations likely to be encountered when preparing for and conducting security awareness sessions

EVIDENCE GUIDE

Where and how to assess evidence

Valid assessment of this unit requires:

- a workplace environment or one that closely resembles normal work practice and replicates the range of conditions likely to be encountered when conducting security awareness sessions, including coping with difficulties, irregularities and breakdowns in routine
- presentation of security awareness sessions in a range of (3 or more) contexts

Assessment methods should reflect workplace demands, such as literacy, and the needs of particular groups, such as:

- people with disabilities
- people from culturally and linguistically diverse backgrounds
- Aboriginal and Torres Strait Islander people
- women
- young people
- older people
- people in rural and remote locations

Assessment methods suitable for valid and reliable assessment of this competency may include, but are not limited to, a combination of 2 or more of:

- case studies
- demonstration
- observation
- portfolios
- questioning
- simulation or role plays
- authenticated evidence from the workplace and/or training courses, such as session plans and evaluations

For consistency of assessment

Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments

Range Statement

RANGE STATEMENT

The Range Statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The Range Statement also provides a focus for assessment. It relates to the unit as a whole. Text in *italics* in the Performance Criteria is explained here.

- Security awareness presentation may include*
- formal presentations
 - briefings
 - addressing special interest groups or community groups
 - part of a broader induction program for agency staff
 - explaining procedures and guidelines
 - on-the-job coaching
- Information may include*
- instructions
 - guidelines
 - case briefings
 - research outcomes
 - outcomes of analysis

PSPSEC304A Undertake information technology security audits

Modification History

Not applicable.

Unit Descriptor

Unit descriptor

This unit covers security audits of information systems and architecture in accordance with the organisation's security plan and jurisdictional standards for government information security. It includes planning and conducting the information technology security audit and reporting on security findings.

In practice, undertaking information technology security audits may overlap with other generalist or specialist public sector work activities such as acting ethically, complying with legislation, working effectively, organising information, etc.

This is a new unit of competency, added to the *Government Security Management* Competency field of the Training Package in 2004.

Application of the Unit

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

Employability skills This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements are the essential outcomes of the unit of competency. Together, performance criteria specify the requirements for competent performance. Text in *bold italics* is explained in the Range Statement following.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Plan security audit	1.1 The scope and objectives of the audit are identified 1.2 An audit plan is prepared that meets organisational requirements and the objectives of the audit 1.3 The organisation's <i>information systems</i> to be included in the audit are identified in the audit plan 1.4 Appropriate <i>personnel</i> are advised of the audit plan and its requirements 1.5 Possible sources of <i>security risk</i> are identified and prioritised 1.6 Audit checklist is prepared in accordance with organisational policy and procedures
2. Conduct security audit	2.1 Systems, procedures, records and documents are identified and analysed 2.2 Audit is conducted in accordance with the audit plan 2.3 Audit activities are recorded in accordance with the checklist and organisational requirements 2.4 Situations requiring <i>specialist input</i> are identified and referred for action 2.5 Situations requiring referral to <i>other areas</i> are identified and referred in a timely manner
3. Report on security findings	3.1 Audit records are maintained in accordance with legislation, policy and procedures 3.2 Audit <i>report</i> is prepared in accordance with organisational requirements and audit objectives 3.3 Background and scope of the audit, outcomes and recommendations are included in the report 3.4 Report is written in a language and style to suit the audience and meets organisational requirements for accuracy and timeliness 3.5 Recommendations are supported by evidence, and written as actions with responsible person/s identified for implementation

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the essential skills and knowledge and their level, required for this unit.

Skill requirements

Look for evidence that confirms skills in:

- applying legislation, regulations and policies relating to information technology security audits and government security management
- gathering, analysing and recording data
- using computer technology to undertake security audits
- managing risk in the context of government security management
- engaging in discussion involving complex exchanges of oral information
- responding to diversity, including gender and disability
- using written communication, including ongoing and final reporting
- reading complex and formal documents such as legislation and other documents
- using information technology for preparing written recommendations and reports requiring formality of language and style
- applying procedures relating to occupational health and safety and environment in the context of information technology security audits

Knowledge requirements

Look for evidence that confirms knowledge and understanding of:

- legislation, regulations, policies, procedures and guidelines relating to information technology security audits
- operational knowledge of policies and procedures in regard to use of information technology systems
- organisation's security plan
- information technology systems and architecture
- use and maintenance of hardware and software systems
- solutions to problems/breakdowns
- operation of equipment
- Australian Audit Standards
- aspects of criminal law and administrative law relating to the outcomes of compliance audits
- protocols for reporting fraud, corruption, maladministration and security breaches
- fundamental ethical principles in the handling of documents and information, natural justice, procedural fairness, respect for persons and responsible care
- equal employment opportunity, equity and diversity principles
- public sector legislation such as occupational health and safety and environment in the

REQUIRED SKILLS AND KNOWLEDGE

context of security audits

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the Unit descriptor, Performance Criteria, the Range Statement and the Assessment Guidelines for the Public Sector Training Package.

Units to be assessed together

- *Pre-requisite* units that must be achieved prior to this unit: *Nil*
- *Co-requisite* units that must be assessed with this unit: *Nil*
- *Co-assessed units* that may be assessed with this unit to increase the efficiency and realism of the assessment process include, but are not limited to:

PSPETHC301B Uphold the values and principles of public service

PSPGOV301B Work effectively in the organisation

PSPGOV302B Contribute to workgroup activities

PSPGOV307B Organise workplace information

PSPLEGN301B Comply with legislation in the public sector

PSPOHS301A Contribute to workplace safety

PSPSEC301A Secure government assets

PSPSEC302A Respond to government security incidents

PSPSEC303A Conduct security awareness sessions

Overview of evidence requirements

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms:

- the knowledge requirements of this unit
- the skill requirements of this unit
- application of the Employability Skills as they relate to this unit (see Employability Summaries in Qualifications Framework)
- information technology security audits undertaken in a range of (3 or more) contexts (or occasions, over time)

Resources required to carry out assessment

These resources include:

- legislation, policy, procedures and protocols relating to information technology security audits
- Security Guidelines for Australian Government IT Systems (ACSI 33)
- Commonwealth Protective Security Manual
- case studies and workplace scenarios to capture the range of situations likely to be encountered when undertaking information technology security audits

EVIDENCE GUIDE

Where and how to assess evidence

Valid assessment of this unit requires:

- a workplace environment or one that closely resembles normal work practice and replicates the range of conditions likely to be encountered when undertaking information technology security audits, including coping with difficulties, irregularities and breakdowns in routine
- information technology security audits undertaken in a range of (3 or more) contexts (or occasions, over time)

Assessment methods should reflect workplace demands, such as literacy, and the needs of particular groups, such as:

- people with disabilities
- people from culturally and linguistically diverse backgrounds
- Aboriginal and Torres Strait Islander people
- women
- young people
- older people
- people in rural and remote locations

- case studies
- demonstration
- observation
- portfolios
- questioning
- scenarios
- simulation or role plays
- authenticated evidence from the workplace and/or training courses

For consistency of assessment

Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments

Range Statement

RANGE STATEMENT

The Range Statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The Range Statement also provides a focus for assessment. It relates to the unit as a whole. Text in *italics* in the Performance Criteria is explained here.

Information systems may include

- architecture
- audio-visual systems
- communications equipment
- hardware
- Internet
- intranet
- laptops
- pagers
- personal computers
- scanning equipment
- software
- systems

Information systems may be

- centrally based
- location based
- stand-alone
- networked

Appropriate personnel may include

- supervisors
- managers
- employees
- contractors

Security risk may include

- technical
- actual events
- political circumstances
- human behaviour
- environmental
- conflict
- terrorism
- internal
- external
- local
- national
- international

RANGE STATEMENT

Specialist input may include

- agency security adviser/s
- specialist agencies such as:
 - Australian Security Intelligence Organisation
 - Department of Foreign Affairs and Trade
 - Australian Public Service Commission
 - Defence Signals Directorate
 - Australian Federal Police
 - Attorney-General's Department
 - Australian National Audit Office
 - office of Privacy Commissioner

Other areas may include

- fraud investigation area
- compliance area
- other organisations such as police, other law enforcement or investigation agencies
- senior management

Report may be

- written
- oral
- electronic

Competency field

Competency field Government Security Management

PSPSEC401A Undertake government security risk analysis

Modification History

Not applicable.

Unit Descriptor

Unit descriptor

This unit covers work at an operational level, to analyse risk against the organisation's security plan. It includes establishing the security risk context; identifying, analysing and evaluating risk against the organisation's security plan; and compiling of a security risk register. Depending on the size of the organisation, work may be in a discrete area such as information technology or across all areas within the organisation.

Implementation of risk treatment options and countermeasures are not included. This is covered in the unit *PSPSEC402A Implement security risk treatments*.

In practice, undertaking government security risk analysis may overlap with other generalist or specialist public sector work activities such as working ethically, complying with legislation, applying government processes, gathering and analysing information, exercising regulatory powers, etc.

This is a new unit of competency, added to the *Government Security Management* Competency field of the Training Package in 2004.

Application of the Unit

Elements and Performance Criteria Pre-Content

Elements are the essential outcomes of the unit of competency. Together, performance criteria specify the requirements for competent performance. Text in *bold italics* is explained in the Range Statement following.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Establish security risk context	<p>1.1 <i>Strategic and organisational contexts</i> are confirmed in accordance with the organisation's security plan</p> <p>1.2 <i>Stakeholders</i> are identified and their expectations and input are gathered in accordance with <i>legislation, policy and procedures</i></p> <p>1.3 <i>Security risk criteria</i> are identified from the security plan and confirmed as current and relevant</p> <p>1.4 Information and resources are obtained to conduct the risk analysis in accordance with organisational policy and procedures</p>
2. Identify security risk	<p>2.1 <i>Sources</i> of security risk are identified and recorded in accordance with organisational policy and procedures</p> <p>2.2 Risks are identified using a <i>specified methodology or tools</i> in accordance with the security plan</p> <p>2.3 Sources of risk are identified from the perspective of all stakeholders</p> <p>2.4 Stakeholders are consulted during the risk identification process to finalise a list of risks</p>
3. Analyse security risk	<p>3.1 <i>Threat assessments</i>, current <i>exposure</i> and current security arrangements are identified in accordance with the security plan to estimate the <i>likelihood</i> of each risk event occurring</p> <p>3.2 Potential <i>consequences</i> of each risk are determined in accordance with the security plan, including <i>critical lead time for recovery</i></p> <p>3.3 <i>Risk ratings</i> are determined, documented and communicated in accordance with the security plan and organisational standards</p> <p>3.4 A rationale for each risk rating is included in accordance with organisational requirements</p>
4. Evaluate security risk	<p>4.1 Risks are assessed against the organisation's security risk criteria</p> <p>4.2 Risks are prioritised for treatment in accordance with the security plan</p> <p>4.3 Risks are monitored in accordance with the security plan until treatment measures have been implemented</p>
5. Compile security risk register	<p>5.1 A <i>security risk register</i> is developed that records identified risks, their nature and source</p> <p>5.2 The consequences and likelihood of risks, and the adequacy of existing controls are identified in the register</p> <p>5.3 Risk ratings are recorded for identified risks in accordance with organisational procedures</p> <p>5.4 The security risk register is compiled to meet organisational</p>

ELEMENT

PERFORMANCE CRITERIA

standards for content, format and presentation and reflects changes in circumstances

5.5 Risk register is referred to management for decision on which risks will be accepted and which will require treatment

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the essential skills and knowledge and their level, required for this unit.

Skill requirements

Look for evidence that confirms skills in:

- applying legislation, regulations and policies relating to government security management
- reading and analysing the organisation's security plan
- researching and critically analysing the operational environment and drawing conclusions
- using effective communication with diverse stakeholders involving listening, questioning, paraphrasing, clarifying, summarizing
- responding to diversity, including gender and disability
- writing reports requiring formality of language and structure
- using computer technology to gather and analyse information, and prepare reports
- representing mathematical information in a range of formats to suit the information and the purpose
- applying procedures relating to occupational health and safety and environment in the context of government security management

Knowledge requirements

Look for evidence that confirms knowledge and understanding of:

- legislation, regulations, policies, procedures and guidelines relating to government security management such as:
 - occupational health and safety
 - public service Acts
 - Crimes Act 1914 and Criminal Code 1985
 - Freedom of Information Act 1982
 - Privacy Act 1988
 - fraud control policy
 - protective security policy
 - Security Guidelines for Australian Government IT Systems (ACSI 33)
 - Commonwealth Protective Security Manual
- risk analysis terminology and techniques
- the organisation's security plan
- the organisation's assets and security environment
- Australian standards, quality assurance and certification requirements
- AS/NZS 4360:1999

REQUIRED SKILLS AND KNOWLEDGE

public sector legislation such as equal employment opportunity, and equity and diversity principles applied in the context of government security management

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the Unit descriptor, Performance Criteria, the Range Statement and the Assessment Guidelines for the Public Sector Training Package.

Units to be assessed together

- *Pre-requisite* units that must be achieved prior to this unit: *Nil*
- *Co-requisite* units that must be assessed with this unit: *Nil*
- *Co-assessed units* that may be assessed with this unit to increase the efficiency and realism of the assessment process include, but are not limited to:

PSPETHC401A Uphold and support the values and principles of public service

PSPGOV406B Gather and analyse information

PSPGOV422A Apply government processes

PSPLEGN401A Encourage compliance with legislation in the public sector

PSPREG401C Exercise regulatory powers

Overview of evidence requirements

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms:

- the knowledge requirements of this unit
- the skill requirements of this unit
- application of the Employability Skills as they relate to this unit (see Employability Summaries in Qualifications Framework)
- government security risk analysis in a range of (3 or more) contexts (or occasions, over time)

Resources required to carry out assessment

These resources include:

- legislation, policy, procedures and protocols relating to government security management
- organisational standards and documentation
- tools and methods used in the organisation for security risk analysis
- case studies and workplace scenarios to capture the range of situations likely to be encountered when undertaking government security risk analysis

Where and how to assess evidence

Valid assessment of this unit requires:

- a workplace environment or one that closely resembles normal work practice and replicates the range of conditions likely to be encountered when undertaking government security risk

EVIDENCE GUIDE

analysis, including coping with difficulties, irregularities and breakdowns in routine

- government security risk analysis in a range of (3 or more) contexts (or occasions, over time)

Assessment methods should reflect workplace demands, such as literacy, and the needs of particular groups, such as:

- people with disabilities
- people from culturally and linguistically diverse backgrounds
- Aboriginal and Torres Strait Islander people
- women
- young people
- older people
- people in rural and remote locations

Assessment methods suitable for valid and reliable assessment of this competency may include, but are not limited to, a combination of 2 or more of:

- case studies
- portfolios
- projects
- questioning
- scenarios
- simulation or role plays
- authenticated evidence from the workplace and/or training courses, such as security risk register

For consistency of assessment

Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments

Range Statement

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the essential skills and knowledge and their level, required for this unit.

Skill requirements

Look for evidence that confirms skills in:

- applying legislation, regulations and policies relating to government security management
- reading and analysing the organisation's security plan
- observing and critically analysing the application of security risk treatments in an operational environment
- engaging in communication with diverse stakeholders involving listening, questioning, paraphrasing, clarifying, summarising
- responding to diversity, including gender and disability
- writing reports requiring formality of language and structure
- using computer technology to gather and analyse information, and prepare reports
- representing mathematical information in a range of formats to suit the information and the purpose
- applying procedures relating to occupational health and safety and environment in the context of government security management

Knowledge requirements

Look for evidence that confirms knowledge and understanding of:

- legislation, regulations, policies, procedures and guidelines relating to government security management such as:
 - occupational health and safety
 - public service acts
 - Crimes Act 1914 and Criminal Code 1985
 - Freedom of Information Act 1982
 - Privacy Act 1988
 - fraud control policy
 - protective security policy
 - Security Guidelines for Australian Government IT Systems (ACSI 33)
 - Commonwealth Protective Security Manual
- risk analysis terminology and techniques
- the organisation's security plan
- the organisation's assets and security environment
- Australian standards, quality assurance and certification requirements

REQUIRED SKILLS AND KNOWLEDGE

AS/NZS 4360:1999

public sector legislation such as equal employment opportunity, and equity and diversity principles applied in the context of government security management

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the Unit descriptor, Performance Criteria, the Range Statement and the Assessment Guidelines for the Public Sector Training Package.

Units to be assessed together

- *Pre-requisite* units that must be achieved prior to this unit: *Nil*
- *Co-requisite* units that must be assessed with this unit: *Nil*
- *Co-assessed units* that may be assessed with this unit to increase the efficiency and realism of the assessment process include, but are not limited to:

PSPETHC401A Uphold and support the values and principles of public service

PSPGOV406B Gather and analyse information

PSPGOV422A Apply government processes

PSPLEGN401A Encourage compliance with legislation in the public sector

PSPREG401C Exercise regulatory powers

Overview of evidence requirements

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms:

- the knowledge requirements of this unit
- the skill requirements of this unit
- application of the Employability Skills as they relate to this unit (see Employability Summaries in Qualifications Framework)
- implementation of security risk treatments in a range of (3 or more) contexts (or occasions, over time)

Resources required to carry out assessment

These resources include:

- legislation, policy, procedures and protocols relating to the implementation of security risk treatments
- organisational standards and documentation
- case studies and workplace scenarios to capture the range of situations likely to be encountered when implementing security risk treatments

Where and how to assess evidence

Valid assessment of this unit requires:

- a workplace environment or one that closely resembles normal work practice and replicates the range of conditions likely to be encountered when implementing security risk treatments, including coping with difficulties, irregularities and breakdowns in routine

EVIDENCE GUIDE

- implementation of security risk treatments in a range of (3 or more) contexts (or occasions, over time)

Assessment methods should reflect workplace demands, such as literacy, and the needs of particular groups, such as:

- people with disabilities
- people from culturally and linguistically diverse backgrounds
- Aboriginal and Torres Strait Islander people
- women
- young people
- older people
- people in rural and remote locations

Assessment methods suitable for valid and reliable assessment of this competency may include, but are not limited to, a combination of 2 or more of:

- case studies
- portfolios
- questioning
- scenarios
- authenticated evidence from the workplace and/or training courses, such as a risk management plan

For consistency of assessment

Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments

Range Statement

RANGE STATEMENT

The Range Statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The Range Statement also provides a focus for assessment. It relates to the unit as a whole. Text in *italics* in the Performance Criteria is explained here.

- | | |
|---|--|
| <i>Risk may be to</i> | <ul style="list-style-type: none"> • personnel • information • property • reputation |
| <i>Acceptable risks are</i> | <ul style="list-style-type: none"> • those which an organisation has determined have the least potential for harm |
| <i>Unacceptable risks are</i> | <ul style="list-style-type: none"> • those which an organisation has determined have the most potential for harm |

Unit Descriptor

Unit descriptor

This unit covers interpretation of organisational data in the light of the organisation's security policy to identify the need for changed procedures, the development of the procedures and provision of advice. It includes interpreting security policy and legislation, analysing security-related data, developing procedures, and providing advice on government security matters.

In practice, developing and advising on government security procedures may overlap with other generalist or specialist public sector work activities such as working ethically, complying with legislation, applying government processes, gathering and analysing information, exercising regulatory powers, etc.

This is a new unit of competency, added to the *Government Security Management* Competency field of the Training Package in 2004.

Application of the Unit

Elements and Performance Criteria Pre-Content

Elements are the essential outcomes of the unit of competency. Together, performance criteria specify the requirements for competent performance. Text in *bold italics* is explained in the Range Statement following.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Interpret security policy and legislation	<p>1.1 <i>Legislation</i> impacting on security policy and procedures is identified and analysed</p> <p>1.2 The organisation's security policy is analysed in relation to risk identification, security management and security incidents</p> <p>1.3 Policy intent is confirmed and existing procedures impacted by the policy are identified and reviewed for consistency with the policy</p>
2. Analyse security-related data	<p>2.1 <i>Data</i> is collected in a timely fashion in accordance with organisational policy and procedures</p> <p>2.2 Data is analysed and its integrity confirmed</p> <p>2.3 Outcomes and trends are identified that need to be addressed through security procedures</p> <p>2.4 Any changes in organisational circumstances are determined and related security procedures are identified</p>
3. Develop procedures	<p>3.1 Intended audience/s for <i>procedures</i> are identified and structure, language style and format are determined in accordance with organisational requirements</p> <p>3.2 Security procedures are developed to reflect <i>changes</i> in circumstances</p> <p>3.3 Procedures are developed in consultation with security plan developer/s, end users and organisational approval personnel</p> <p>3.4 Procedures are structured to take account of workplace diversity and meet organisational requirements</p> <p>3.5 Procedures are submitted and approved in accordance with organisational policy and procedures</p>
4. Provide advice on government security matters	<p>4.1 Information and <i>advice</i> on security procedures and related legislation, regulations, standards and guidelines are provided in accordance with organisational procedures</p> <p>4.2 Current organisational policies and directions are reflected in advice provided</p> <p>4.3 Intended use and consequences of advice are considered, and advice is communicated in a manner that addresses the requirements of <i>stakeholders</i></p> <p>4.4 Any documentation provided is checked to ensure it supports the information and advice given</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the essential skills and knowledge and their level, required for this unit.

Skill requirements

Look for evidence that confirms skills in:

- applying legislation, regulations and policies relating to government security management
- undertaking research and analysis
- communicating with a diverse range of stakeholders
- working with others and in teams
- using computer technology
- writing security procedures to suit intended audiences
- responding to diversity, including gender and disability
- applying procedures relating to occupational health and safety and environment in the context of government security management

Knowledge requirements

Look for evidence that confirms knowledge and understanding of:

- legislation, regulations, policies, procedures and guidelines relating to government security management
- organisational policy, procedures and guidelines
- legislation relating to government operations, privacy, occupational health and safety Crimes Act 1914 and Criminal Code 1985
- the organisation's security plan
- equal employment opportunity, equity and diversity principles
- public sector legislation such as occupational health and safety and environment in the context of government security management

Evidence Guide

- case studies
- portfolios
- projects
- questioning
- scenarios
- simulation or role plays
- authenticated evidence from the workplace and/or training courses, such as procedures documentation

For consistency of assessment

Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments

Range Statement

RANGE STATEMENT

The Range Statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The Range Statement also provides a focus for assessment. It relates to the unit as a whole. Text in *italics* in the Performance Criteria is explained here.

Legislation may include

- Commonwealth and State/Territory Acts and regulations

Data may include

- security records
- incident reports
- security risk management plans
- files
- email
- Internet/intranet
- electronic records
- video images
- graphics
- notes
- diary entries
- telephone messages
- pager records
- fax records

Procedures may be

- agency specific
- area specific
- relating to specific activities or practices

Changes may be caused by

- restructure
- changes to legal risks
- changes in strategic direction
- changes to legislation and whole of government policies
- major shift in business or corporate goals or plans
- key projects

Advice may be

- formal
- informal
- briefing
- awareness session
- preventative
- post incident
- written
- oral

Elements and Performance Criteria Pre-Content

Elements are the essential outcomes of the unit of competency. Together, performance criteria specify the requirements for competent performance. Text in *bold italics* is explained in the Range Statement following.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
----------------	-----------------------------

ELEMENT**PERFORMANCE CRITERIA****1. Collect, analyse and evaluate personal information**

- 1.1 *Information* is collected from the subject to be assessed in accordance with the purpose of the *security assessment*
- 1.2 Where gaps, anomalies, deficiencies or discrepancies exist in the information provided, additional information is obtained in accordance with organisational policy and procedures
- 1.3 Information is *corroborated* in accordance with organisational policy and procedures and *assessed* for its validity and reliability
- 1.4 Analysis is conducted in accordance with general suitability indicators in accordance with *legislation and security standards*
- 1.5 Data is extracted and interpreted and outcomes are recorded in accordance with organisational policy and procedures
- 1.6 Assessment process is conducted with care and sensitivity to assist subjects to deal with its discriminatory and intrusive nature

2. Make recommendations on security assessment outcomes

- 2.1 *Recommendations* are formulated consistent with the information obtained
- 2.2 Recommendations are consistent with organisational guidelines and security standards
- 2.3 Recommendations are conveyed in accordance with organisational guidelines
- 2.4 Where recommendations are negative, the right to seek a review of the decision is confirmed with the requester of the security assessment and the subject, where appropriate, in accordance with organisational policy and procedures
- 2.5 Improvements to procedures are recommended as required as part of the cycle of continuous improvement

3. Record and report on personnel security assessments

- 3.1 Accurate, *complete*, up-to-date records are presented in the required format
- 3.2 *Reports* are prepared that are clear, fair and objective and use language suited to the purpose of the report and organisational requirements
- 3.3 Reports are presented in the required format
- 3.4 Urgency and levels of risk are addressed in reports
- 3.5 Procedures for storage and management of confidential and sensitive information are adhered to

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the essential skills and knowledge and their level, required for this unit.

Skill requirements

Look for evidence that confirms skills in:

- applying legislation, regulations and policies relating to personnel security assessments
- undertaking critical analysis, evaluation and deductive reasoning
- applying problem solving and decision making
- corroborating information
- organising information in a logical manner
- writing reports and recommendations
- using computer technology
- managing files
- responding to diversity, including gender and disability
- applying procedures relating to occupational health and safety and environment in the context of personnel security assessments

Knowledge requirements

Look for evidence that confirms knowledge and understanding of:

- legislation, regulations, policies, procedures and guidelines relating to government security management such as:
 - occupational health and safety
 - public service Acts
 - Crimes Act 1914 and Criminal Code 1985
 - Freedom of Information Act 1982
 - Privacy Act 1988
 - fraud control policy
 - protective security policy
 - Commonwealth Protective Security Manual
 - general suitability indicators
 - international treaties and protocols
 - formats for different types of reports
 - risk assessment
 - management of secure information
- equal employment opportunity, equity and diversity principles
- public sector legislation such as occupational health and safety and environment in the

REQUIRED SKILLS AND KNOWLEDGE

context of personnel security assessments

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the Unit descriptor, Performance Criteria, the Range Statement and the Assessment Guidelines for the Public Sector Training Package.

Elements and Performance Criteria Pre-Content

Elements are the essential outcomes of the unit of competency.

Together, performance criteria specify the requirements for competent performance. Text in *bold italics* is explained in the Range Statement following.

Elements and Performance Criteria

ELEMENT

PERFORMANCE CRITERIA

1. Receive security classified information

- 1.1 *Security classified information is received* and checked to ensure transmission protocols have been adhered to
- 1.2 Action is taken in accordance with security policy and procedures where protocols have not been adhered to
- 1.3 Security classified information is recorded in accordance with organisational policy and procedures

2. Deal with security classified information

- 2.1 Security classified information is *reviewed* to ensure classification meets the organisation's security policy for protection of information
- 2.2 Aggregated security classified information is reviewed to ensure that it is classified in accordance with security requirements
- 2.3 Classification requirement is checked to ensure it is warranted, and the level of protection is assigned in accordance with the consequences that might result from the compromise of the information's confidentiality, integrity and availability
- 2.4 Originators of information who classify documents are contacted to discuss re-classification or de-classification where necessary
- 2.5 Security classified information is *transmitted* in accordance with organisational security policy and procedures
- 2.6 *Expert advice* is obtained as required in accordance with organisational policy and procedures

3. Maintain security classified information

- 3.1 Security classified information is *secured* in accordance with organisational policy and procedures
- 3.2 Security classified information is *accounted for* in accordance with organisational policy and procedures
- 3.3 Security classified information is *disposed of* in accordance with organisational policy and procedures

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the essential skills and knowledge and their level, required for this unit.

Skill requirements

Look for evidence that confirms skills in:

- applying legislation, regulations and policies relating to government security management
- applying security classification systems
- using analysis and problem solving
- tailoring communication to the needs of a diverse range of people inside and outside the organisation who classify, transmit or advise on security classified information
- responding to diversity, including gender and disability
- undertaking recordkeeping requiring attention to detail, and adherence to standards
- applying procedures relating to occupational health and safety and environment in the context of government security management

Knowledge requirements

Look for evidence that confirms knowledge and understanding of:

- legislation, regulations, policies, procedures and guidelines relating to government security management
- standards for management of security classified information
- classification system for national security and non-national security information
- procedures for confirming initial security classifications
- international protocols and treaties impacting on government security management
- available sources of expert advice
- equal employment opportunity, equity and diversity principles
- public sector legislation such as occupational health and safety and environment in the context of government security management

Unit descriptor

This unit covers the requirements to provide a range of security briefings. It includes determining the need for security briefings, organising and conducting briefings.

In practice, provision of government security briefings may overlap with other generalist or specialist public sector work activities such as acting ethically, complying with legislation, applying government processes, gathering and analysing information, analysing data, using resources, etc.

This is a new unit of competency, added to the *Government Security Management* Competency field of the Training Package in 2004.

Application of the Unit

Not applicable.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

Employability skills This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements are the essential outcomes of the unit of competency. Together, performance criteria specify the requirements for competent performance. Text in *bold italics* is explained in the Range Statement following.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Organise security briefing	<p>1.1 The <i>need</i> for a <i>security briefing</i> and related <i>methodology</i> are determined in accordance with individual, organisational and legislative requirements</p> <p>1.2 Briefing purpose, level, structure and content are determined in accordance with organisational policy and procedures</p> <p>1.3 Materials and any personnel to be involved in the briefing are determined and organised</p> <p>1.4 A <i>plan</i> is prepared to support delivery of the briefing in accordance with organisational requirements</p>
2. Conduct security briefing	<p>2.1 The purpose and structure of the briefing are outlined to participants in accordance with the briefing plan</p> <p>2.2 Active participation from participants in the briefing is sought, encouraged and valued</p> <p>2.3 Organisational and legislated government security requirements are conveyed to participants using language and examples suited to their levels of understanding and diverse needs</p> <p>2.4 Understanding of security requirements and the consequences of non-compliance with security requirements is checked and further information is provided for clarification as necessary</p> <p>2.5 Briefing is conducted in accordance with organisational policy and procedures</p> <p>2.6 Where required, a record/report of the briefing is prepared and submitted in accordance with organisational policy and procedures</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the essential skills and knowledge and their level, required for this unit.

Skill requirements

Look for evidence that confirms skills in:

- applying legislation, regulations and policies relating to government security management
- preparing briefing plans
- communicating one-on-one and in a group with a diverse range of participants
- tailoring communication to suit the purpose and formality of the briefing and the level of experience and diverse needs of the audiences
- managing group processes
- providing feedback and encouraging contributions/active participation from participants
- responding to diversity, including gender and disability
- applying procedures relating to occupational health and safety and environment in the context of government security management

Knowledge requirements

Look for evidence that confirms knowledge and understanding of:

- legislation, regulations, policies, procedures and guidelines relating to government security management
- organisational guidelines and procedures for briefings and debriefings
- requirements of incident-related briefings/debriefings
- equal employment opportunity, equity and diversity principles
- public sector legislation such as occupational health and safety and environment in the context of government security briefings

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the Unit descriptor, Performance Criteria, the Range Statement and the Assessment Guidelines for the Public Sector Training Package.

Units to be assessed together

- *Pre-requisite* units that must be achieved prior to this unit: *Nil*
- *Co-requisite* units that must be assessed with this unit: *Nil*
- *Co-assessed units* that may be assessed with this unit to increase the efficiency and realism of the assessment process include, but are not limited to:

PSPETHC401A Uphold and support the values and principles of public service

PSPGOV402B Deliver and monitor service to clients

PSPLEGN401A Encourage compliance with legislation in the public sector

PSPREG411A Gather information through interviews

PSPREG416A Conduct data analysis

PSPSEC401A Undertake government security risk analysis

PSPSEC402A Implement security risk treatments

PSPSEC403A Develop and advise on government security procedures

PSPSEC404A Conduct personnel security assessments

PSPSEC405A Handle security classified information

EVIDENCE GUIDE

Overview of evidence requirements

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms:

- the knowledge requirements of this unit
- the skill requirements of this unit
- application of the Employability Skills as they relate to this unit (see Employability Summaries in Qualifications Framework)
- provision of government security briefings in a range of (3 or more) contexts (or occasions, over time)

Resources required to carry out assessment

These resources include:

- legislation, policy, procedures and protocols relating to the provision of government security briefings
- case studies and workplace scenarios to capture the range of situations likely to be encountered when providing government security briefings

Where and how to assess evidence

Valid assessment of this unit requires:

- a workplace environment or one that closely resembles normal work practice and replicates the range of conditions likely to be encountered when providing government security briefings, including coping with difficulties, irregularities and breakdowns in routine
- provision of government security briefings in a range of (3 or more) contexts (or occasions, over time)

Assessment methods should reflect workplace demands, such as literacy, and the needs of particular groups, such as:

- people with disabilities
- people from culturally and linguistically diverse backgrounds
- Aboriginal and Torres Strait Islander people
- women
- young people
- older people
- people in rural and remote locations

Assessment methods suitable for valid and reliable assessment of this competency may include, but are not limited to, a combination of 2 or more of:

- demonstration
- observation
- portfolios
- questioning
- scenarios

EVIDENCE GUIDE

- simulation or role plays
- authenticated evidence from the workplace and/or training courses such as briefing plans

For consistency of assessment

Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments

Range Statement

RANGE STATEMENT

The Range Statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The Range Statement also provides a focus for assessment. It relates to the unit as a whole. Text in *italics* in the Performance Criteria is explained here.

- Need for briefing may be determined by*
- organisational policy
 - change in circumstances
 - security incident/s
- Security briefing may be*
- ad hoc
 - incident related
 - on induction
 - on initial clearance
 - on revalidation
 - on clearance upgrade
 - on clearance downgrade
 - overseas
 - high risk
 - a debriefing
- Methodology may include*
- facilitator-led
 - collaborative
 - problem-based
 - descriptive
 - illustrative
 - formality of language and structure
- Briefing plan may include*
- purpose
 - subject matter
 - timing
 - location
 - participant/s
 - methodology

Unit Descriptor

Unit descriptor

This unit covers assessment of government security risks. It includes establishing the risk context, gathering and analysing information, identifying and analysing risks, and assessing and prioritising risks to underpin development of a security plan, which is covered in unit *PSPSEC502A Develop security risk management plans*.

In practice, assessment of security risks may overlap with other generalist or specialist public sector work activities such as acting ethically, promoting compliance with legislation, developing client services, undertaking research and analysis, etc.

This is a new unit of competency, added to the *Government Security Management* Competency field of the Training Package in 2004.

Application of the Unit

Not applicable.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

Employability skills This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements are the essential outcomes of the unit of competency. Together, performance criteria specify the requirements for competent performance. Text in *bold italics* is explained in the Range Statement following.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Establish security risk context	<p>1.1 The scope of the risk assessment and its <i>strategic</i> and <i>organisational context</i> are identified in accordance with organisational requirements</p> <p>1.2 <i>Legislation, policies, procedures and guidelines</i> related to security risk management are identified and complied with</p> <p>1.3 <i>Stakeholders</i> are identified and their expectations and input are obtained in accordance with organisational policy and procedures</p> <p>1.4 <i>Security risk criteria</i> are identified in accordance with the organisation's security policy, <i>jurisdictional policies and legislation</i></p> <p>1.5 A risk assessment <i>plan</i> is developed in accordance with organisational priorities, and endorsement is obtained</p>
2. Gather and analyse information	<p>2.1 Sources of <i>information</i> are identified and information is gathered in accordance with organisational policy and procedures</p> <p>2.2 Internal information including historical information is reviewed</p> <p>2.3 New information from internal/external sources is aggregated</p> <p>2.4 Information is contextualised to the organisational context</p> <p>2.5 Gaps in information are identified and addressed</p>
3. Identify security risks	<p>3.1 <i>Sources</i> of threat to the organisation's <i>resources</i> and functions are identified, and <i>threats/potential threats</i> are determined in accordance with organisational policy and procedures</p> <p>3.2 <i>Threat assessment</i> is conducted against organisational policies, procedures and guidelines</p> <p>3.3 Access to, availability of and procedures relating to resources/areas are analysed to determine risk <i>exposure</i></p> <p>3.4 Risks are assessed using <i>risk assessment techniques</i> to suit the type and level of risk in accordance with organisational policy and procedures</p> <p>3.5 Risk potential is determined and risks are documented in accordance with organisational requirements</p>
4. Analyse security risks	<p>4.1 Potential <i>consequences</i> of risks/threats are analysed in light of potential damage to agency, including <i>critical lead time for recovery</i></p> <p>4.2 Analysis techniques are used in accordance with organisational policy and procedures</p> <p>4.3 Intent, capability and opportunity for each risk/threat to occur are assessed</p>

ELEMENT

PERFORMANCE CRITERIA

- 4.4 Using all known information, *likelihood* of risks/threats occurring is assessed
- 4.5 Current security countermeasures/treatment options are analysed to determine areas of vulnerability
- 4.6 *Risk ratings* are determined and documented in agreed *format* using all known information
- 5. Assess and prioritise security risks**
- 5.1 Stakeholders are consulted about acceptable/unacceptable risk levels
- 5.2 *Acceptable/unacceptable* levels of risk are documented
- 5.3 Identified risks are compared with security risk criteria to determine whether they are acceptable/unacceptable
- 5.4 Identified risks are prioritised in accordance with security criteria
- 5.5 Risks are documented in priority order in accordance with organisational policies, procedures and guidelines
- 5.6 *Residual* risks are determined and documented in accordance with organisational policies, procedures and guidelines

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the essential skills and knowledge and their level, required for this unit.

Skill requirements

Look for evidence that confirms skills in:

- applying legislation, regulations and policies relating to security risk management
- undertaking risk assessment
- reading and analysing the complex information in standards, legislation and security plans
- researching and analysing the operational environment and drawing conclusions
- applying critical analysis, evaluation and deductive reasoning
- using problem solving and decision making
- using creative thinking
- communicating with diverse stakeholders involving interviewing, listening, questioning, paraphrasing, clarifying, summarizing
- responding to diversity, including gender and disability
- writing reports requiring formality of language and structure
- using computer technology to gather and analyse information, and prepare reports
- using computer modelling
- using numerical, graphical and statistical information
- representing mathematical information in a range of formats to suit the information and the purpose
- responding to diversity, including gender and disability
- applying procedures relating to occupational health and safety and environment in the context of security risk management

Knowledge requirements

Look for evidence that confirms knowledge and understanding of:

- legislation, regulations, policies, procedures and guidelines relating to security risk management such as:
 - occupational health and safety
 - public service Acts
 - Crimes Act 1914 and Criminal Code 1985
 - Freedom of Information Act 1982
 - Privacy Act 1988
 - fraud control policy
 - protective security policy
 - Security Guidelines for Australian Government IT Systems (ACSI 33)

REQUIRED SKILLS AND KNOWLEDGE

Commonwealth Protective Security Manual

risk assessment techniques/processes

information handling

qualitative and quantitative analysis techniques

incident reports and statistics

asset holdings and recording mechanisms

Australian standards, quality assurance and certification requirements

international treaties and protocols

cross-jurisdictional protocols

organisation's strategic objectives

national strategic objectives

requirements of user groups

equal employment opportunity, equity and diversity principles

public sector legislation such as occupational health and safety and environment in the context of security risk assessment

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the Unit descriptor, Performance Criteria, the Range Statement and the Assessment Guidelines for the Public Sector Training Package.

Units to be assessed together

- *Pre-requisite* units that must be achieved prior to this unit: *Nil*
- *Co-requisite* units that must be assessed with this unit: *Nil*
- *Co-assessed units* that may be assessed with this unit to increase the efficiency and realism of the assessment process include, but are not limited to:

PSPETHC501B Promote the values and ethos of public service

PSPGOV502B Develop client services

PSPGOV504B Undertake research and analysis

PSPLEGN501B Promote compliance with legislation in the public sector

PSPSEC502A Develop security risk management plans

PSPSEC503A Implement and monitor security risk management plans

Overview of evidence requirements

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms:

- the knowledge requirements of this unit
- the skill requirements of this unit
- application of the Employability Skills as they relate to this unit (see Employability Summaries in Qualifications Framework)
- assessment of security risks in a range of (3 or more) contexts (or occasions, over time)

Resources required to carry out assessment

These resources include:

- legislation, policy, procedures and protocols relating to the assessment of security risk
- Security Guidelines for Australian Government IT Systems (ACSI 33)
- Commonwealth Protective Security Manual
- case studies and workplace scenarios to capture the range of situations likely to be encountered when assessing security risks

Where and how to assess evidence

Valid assessment of this unit requires:

- a workplace environment or one that closely resembles normal work practice and replicates the range of conditions likely to be encountered when assessing security risks, including coping

EVIDENCE GUIDE

with difficulties, irregularities and breakdowns in routine

- assessment of security risks in a range of (3 or more) contexts (or occasions, over time)

Assessment methods should reflect workplace demands, such as literacy, and the needs of particular groups, such as:

- people with disabilities
- people from culturally and linguistically diverse backgrounds
- Aboriginal and Torres Strait Islander people
- women
- young people
- older people
- people in rural and remote locations

Assessment methods suitable for valid and reliable assessment of this competency may include, but are not limited to, a combination of 2 or more of:

- case studies
- portfolios
- questioning
- scenarios
- simulation or role plays
- authenticated evidence from the workplace and/or training courses, such as risk assessment plan

For consistency of assessment

Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments

Range Statement

RANGE STATEMENT

The Range Statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The Range Statement also provides a focus for assessment. It relates to the unit as a whole. Text in *italics* in the Performance Criteria is explained here.

- | | |
|--|---|
| <i>Strategic context may include</i> | <ul style="list-style-type: none"> • the relationship between the organisation and the environment in which it operates • the organisation's functions: <ul style="list-style-type: none"> • political • operational • financial • social • legal • commercial • the various stakeholders and clients |
| <i>Organisational context may include</i> | <ul style="list-style-type: none"> • the organisation, how it is organised, and its capabilities • any official resources, including physical areas and assets, that are vital to the operation of the organisation • key operational elements of the organisation • any major projects |
| <i>Legislation, policies procedures and guidelines may include</i> | <ul style="list-style-type: none"> • Commonwealth and State/Territory legislation relating to security • national and international codes of practice and standards • the organisation's policies and practices • jurisdictional policies • codes of conduct/codes of ethics • Australian and New Zealand standards - Risk management AS/NZS 4360:1999 • Security Guidelines for Australian Government IT Systems (ACSI 33) • Commonwealth Protective Security Manual |
| <i>Stakeholders may include</i> | <ul style="list-style-type: none"> • supervisors • managers • other areas within the organisation • other organisations • government • third parties |
| <i>Security risk criteria may</i> | <ul style="list-style-type: none"> • vital functions and capabilities |

RANGE STATEMENT

- | | |
|--|---|
| <i>concern</i> | <ul style="list-style-type: none"> • the expectations of stakeholders and clients • the personal security of employees and clients • general expectations about confidentiality • the availability of the organisation's official resources |
| <i>Jurisdictional policies and legislation relating to risk criteria cover</i> | <ul style="list-style-type: none"> • expectations about the care and confidentiality of official information reflected in legislation such as Public Service Act 1999, Crimes Act 1914 and Criminal Code 1985 • the availability of official information to the public (Freedom of Information Act 1982) • expectations about the collection, use and care of personal information (the Privacy Act 1988) • expectations about the well-being and personal security of staff (Occupational Health and Safety [Commonwealth Employment] Act 1991) • the measures and procedures agencies must adopt to protect official resources from fraud (Commonwealth fraud control policy) • the expectation that there will be a Commonwealth-wide system for providing appropriate protection to security classified information (Commonwealth protective security policy) |
| <i>Risk assessment plan will include</i> | <ul style="list-style-type: none"> • the strategic and organisational context of the agency (or organisation, area or project under review) • the scope and objectives of the review • information and resources required to complete the review • the security risk criteria |
| <i>Information may be</i> | <ul style="list-style-type: none"> • hardcopy • audio-visual • electronic |
| <i>Sources of threat may include</i> | <ul style="list-style-type: none"> • people • systems • environmental • financial • natural • conflict • terrorism • political circumstances • internal • external • local • national • international |

RANGE STATEMENT

- Resources may be*
- agency owned
 - contractor owned
 - hired
 - leased
 - owned by third parties
- Threats/potential threats may be*
- internal
 - external
 - national
 - international
 - real
 - perceived
 - to:
 - people
 - property
 - information
 - reputation
 - criminal
 - terrorist
 - from foreign intelligence services
 - from commercial/industrial competitors
 - from malicious people
- Threat assessment*
- is used to provide information about people and events that may pose a risk to a particular resource or function
 - evaluates and discusses the likelihood of a threat being realised
 - determines the potential of a threat to actually cause harm
- Risk exposure is*
- a measure of how open a resource is to harm, or
 - the potential of a resource to attract harm
- Risk assessment techniques may include*
- qualitative and/or semi-quantitative and/or quantitative
 - brainstorming
 - focus groups
 - expert judgment
 - strengths, weaknesses, opportunities and threats (SWOT) analysis
 - analysis of risk registers
 - examination of available data such as audit results, incident reports
 - nomogram
 - risk matrix
 - scenario analysis
 - business continuity planning

RANGE STATEMENT

<i>Consequences may include</i>	<ul style="list-style-type: none"> • degree of harm • who would be affected and how • how much disruption would occur • damage to: <ul style="list-style-type: none"> • the organisation • other organisations • government • third parties • critical lead time for recovery
<i>Critical lead time for recovery is</i>	<ul style="list-style-type: none"> • the period of time a function is compromised • critical if the function is vital to the organisation
<i>Likelihood of risk may be determined through analysis of</i>	<ul style="list-style-type: none"> • current controls to deter, detect or prevent harm • effectiveness of current controls • level of exposure • threat assessment • determination of threat source/s • competence/capability of threat source/s • opportunity for threat to occur
<i>Risk ratings may include</i>	<ul style="list-style-type: none"> • severe • high • major • significant • moderate • low • trivial
<i>Format for risk documentation may include</i>	<ul style="list-style-type: none"> • matrix • table • graphs • graphics • computer modelling
<i>Acceptable risks are</i>	<ul style="list-style-type: none"> • those which an organisation has determined have the least potential for harm
<i>Unacceptable risks are</i>	<ul style="list-style-type: none"> • those which an organisation has determined have the most potential for harm
<i>Residual risks are</i>	<ul style="list-style-type: none"> • those which cannot be treated but still need to be documented

Elements and Performance Criteria Pre-Content

Elements are the essential outcomes of the unit of competency. Together, performance criteria specify the requirements for competent performance. Text in *bold italics* is explained in the Range Statement following.

Elements and Performance Criteria

ELEMENT

PERFORMANCE CRITERIA

1. Identify countermeasures

- 1.1 Documented *risks/threats* are reviewed and management decisions on *acceptable* and *unacceptable* risks are confirmed
- 1.2 *Treatment options/countermeasures* are determined that are consistent with organisational policies, procedures and guidelines to reduce the *likelihood* of occurrence or the *consequences* of the risk, or both
- 1.3 Treatments include *continuity plans*, where appropriate, in accordance with organisational policy and procedures
- 1.4 Treatments match the *level* and type of risk and the importance of the function or resource
- 1.5 A *cost-benefit analysis* is conducted to determine cost-effective countermeasures
- 1.6 *Stakeholders* are consulted on the cost-benefit analysis, and countermeasures are determined and submitted for decision/prioritising in accordance with organisational policy and procedures

2. Develop security plan

- 2.1 Security plan is prepared in accordance with organisational policy and procedures
- 2.2 The plan contains explanatory information on the importance of security and the organisation's security objectives in achieving corporate and business objectives
- 2.3 The plan summarises *threat assessments* undertaken, current *exposure* and current protective security arrangements
- 2.4 The plan outlines security strategies for implementation of countermeasures, monitoring and evaluation
- 2.5 The plan includes a timetable and security budget for implementation of countermeasures including how they will be implemented and by whom
- 2.6 Security plan is submitted for approval and communicated to stakeholders in accordance with organisational policy and procedures

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the essential skills and knowledge and their level, required for this unit.

Skill requirements

Look for evidence that confirms skills in:

- applying legislation, regulations and policies relating to security risk management plans
- using evaluation and deductive reasoning
- undertaking problem solving and decision making
- using communication with diverse stakeholders involving presentation, listening, questioning, paraphrasing, clarifying, summarising
- reading and analysing the complex information in standards, legislation and security plans
- writing reports requiring formality of language and structure
- using computer technology to gather and analyse information, and prepare reports
- using numerical, graphical and statistical information
- representing mathematical information in a range of formats to suit the information and the purpose
- responding to diversity, including gender and disability
- applying procedures relating to occupational health and safety and environment in the context of developing security risk management plans

Knowledge requirements

Look for evidence that confirms knowledge and understanding of:

- legislation, regulations, policies, procedures and guidelines relating to security risk management such as:
 - occupational health and safety
 - public service acts
 - Crimes Act 1914 and Criminal Code 1985
 - Freedom of Information Act 1982
 - Privacy Act 1988
 - fraud control policy
 - protective security policy
 - Security Guidelines for Australian Government IT Systems (ACSI 33)
 - Commonwealth Protective Security Manual
 - Australian standards, quality assurance and certification requirements
 - international treaties and protocols
 - cross-jurisdictional protocols

REQUIRED SKILLS AND KNOWLEDGE

organisation's strategic objectives

national strategic objectives

formats for different types of reports

cost-benefit analysis techniques

equal employment opportunity, equity and diversity principles

public sector legislation such as occupational health and safety and environment in the
context of security risk assessment

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the Unit descriptor, Performance Criteria, the Range Statement and the Assessment Guidelines for the Public Sector Training Package.

Units to be assessed together

- *Pre-requisite* units that must be achieved prior to this unit: *Nil*
- *Co-requisite* units that must be assessed with this unit: *Nil*
- *Co-assessed units* that may be assessed with this unit to increase the efficiency and realism of the assessment process include, but are not limited to:

PSPETHC501B Promote the values and ethos of public service

PSPGOV502B Develop client services

PSPGOV504B Undertake research and analysis

PSPLEGN501B Promote compliance with legislation in the public sector

PSPSEC501A Assess security risks

PSPSEC503A Implement and monitor security risk management plans

Overview of evidence requirements

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms:

- the knowledge requirements of this unit
- the skill requirements of this unit
- application of the Employability Skills as they relate to this unit (see Employability Summaries in Qualifications Framework)
- security risk management plans developed in a range of (2 or more) contexts (or occasions, over time)

Resources required to carry out assessment

These resources include:

- legislation, policy, procedures and protocols relating to security risk management plans
- Security Guidelines for Australian Government IT Systems (ACSI 33)
- Commonwealth Protective Security Manual
- case studies and workplace scenarios to capture the range of situations likely to be encountered when developing security risk management plans

EVIDENCE GUIDE

Where and how to assess evidence

Valid assessment of this unit requires:

- a workplace environment or one that closely resembles normal work practice and replicates the range of conditions likely to be encountered when developing security risk management plans, including coping with difficulties, irregularities and breakdowns in routine
- security risk management plans developed in a range of (2 or more) contexts (or occasions, over time)

Assessment methods should reflect workplace demands, such as literacy, and the needs of particular groups, such as:

- people with disabilities
- people from culturally and linguistically diverse backgrounds
- Aboriginal and Torres Strait Islander people
- women
- young people
- older people
- people in rural and remote locations

Assessment methods suitable for valid and reliable assessment of this competency may include, but are not limited to, a combination of 2 or more of:

- case studies
- portfolios
- questioning
- scenarios
- simulation or role plays
- authenticated evidence from the workplace and/or training courses, such as security risk management plan

For consistency of assessment

Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments

Range Statement

RANGE STATEMENT

The Range Statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The Range Statement also provides a focus for assessment. It relates to the unit as a whole. Text in *italics* in the Performance Criteria is explained here.

- Risks/threats may be*
- internal
 - external
 - national
 - international
 - real
 - perceived
 - to:
 - people
 - property
 - information
 - reputation
 - criminal
 - terrorist
 - from foreign intelligence services
 - from commercial/industrial competitors
 - from malicious people
- Risk review includes*
- consideration of current and historical information
- Acceptable risks are*
- those which an organisation has determined have the least potential for harm
- Unacceptable risks are*
- those which an organisation has determined have the most potential for harm
- Treatment options may include*
- addition of security measures
 - reduction of security measures
 - avoiding the risk through change of practice
 - acceptance of residual risk
 - minimisation of harm through response mechanisms
 - accepting the risk
- Countermeasures may include*
- revision of agency security plan
 - upgrade of existing security
 - installation of new security measures
 - technical controls

- Unacceptable risks are*
- those which an organisation has determined have the most potential for harm
 - training
 - personnel-oriented
 - information-oriented
 - property-oriented
 - reputation-oriented
- Likelihood of risk may be determined through analysis of*
- current controls to deter, detect or prevent harm
 - effectiveness of current controls
 - level of exposure
 - threat assessment
 - determination of threat source/s
 - competence/capability of threat source/s
 - opportunity for threat to occur
- Consequences may include*
- degree of harm
 - who would be affected and how
 - how much disruption would occur
 - damage to:
 - the organisation
 - other organisations
 - government
 - third parties
 - critical lead time for recovery:
 - the period of time a function is compromised
 - critical if the function is vital to the organisation
- Continuity plans*
- may lessen the adverse consequences of risk
 - provide a set of planned procedures that enable organisations to continue or recover services to the government and the public with minimal disruption over a given period, irrespective of the source of the disruption
- Level of risk may be*
- severe
 - high
 - major
 - significant
 - moderate
 - low
 - trivial
- Cost-benefit analysis may be against*
- existing requirements
 - future requirements
 - forecast requirements

- Continuity plans*
- may lessen the adverse consequences of risk
 - provide a set of planned procedures that enable organisations to continue or recover services to the government and the public with minimal disruption over a given period, irrespective of the source of the disruption
- Stakeholders may include*
- supervisors
 - managers
 - other areas within the organisation
 - other organisations
 - government
 - third parties
 - workgroup
- Threat assessment*
- is used to provide information about people and events that may pose a threat to a particular resource or function
 - evaluates and discusses the likelihood of a threat being realised
 - determines the potential of a threat to actually cause harm
- Risk exposure is*
- a measure of how open a resource is to harm, or
 - the potential of a resource to attract harm

Employability Skills Information

Employability skills This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements are the essential outcomes of the unit of competency. Together, performance criteria specify the requirements for competent performance. Text in *bold italics* is explained in the Range Statement following.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Implement security plan	<p>1.1 <i>Security risks</i> are treated/<i>countermeasures</i> are implemented in accordance with the security plan</p> <p>1.2 Security plan is implemented to meet timeframe and budgetary requirements</p> <p>1.3 Countermeasures are implemented in compliance with <i>legal requirements, government and organisational policy</i></p> <p>1.4 <i>Residual risks</i> are documented and monitored</p>
2. Monitor the risk environment	<p>2.1 <i>Strategies</i> to monitor the risk environment are determined and documented</p> <p>2.2 Security risks, and the <i>type/s</i> and <i>source/s</i> of threats are monitored to detect changing circumstances that may alter risk management priorities</p> <p>2.3 <i>Monitoring</i> is conducted on a regular basis in accordance with organisational policy and procedures</p> <p>2.4 Changes to the organisation are monitored to identify circumstances where re-examination of the security environment becomes necessary</p> <p>2.5 Results of monitoring are documented and acted on</p>
3. Evaluate security plan	<p>3.1 <i>Risk treatments</i> are monitored to gauge whether they are being implemented properly and fully</p> <p>3.2 Treatments are evaluated against the objectives of the security plan to ensure they remain effective and/or necessary</p> <p>3.3 Feedback is obtained from <i>stakeholders</i> on the adequacy and need for current security measures affecting their work area</p> <p>3.4 Weaknesses in the security plan are identified and addressed in accordance with organisational policy and procedures</p> <p>3.5 Security plan is reviewed on an on-going basis, as a result of incidents, breaches, and changes in circumstances</p> <p>3.6 Security plan is updated in accordance with organisational policies, procedures and guidelines to reflect current circumstances</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the essential skills and knowledge and their level, required for this unit.

Skill requirements

Look for evidence that confirms skills in:

- applying legislation, regulations and policies relating to security risk management
- auditing in the context of security risk management
- communicating with diverse stakeholders involving interviewing, negotiating, conflict resolution, listening, questioning, paraphrasing, clarifying, summarizing
- reading and analysing the complex information in standards, legislation and security plans
- writing reports requiring formality of language and structure
- using computer technology to gather and analyse information, and prepare reports
- using numerical, graphical and statistical information
- undertaking statistical analysis
- responding to diversity, including gender and disability
- applying procedures relating to occupational health and safety and environment in the context of implementing and monitoring security risk management plans

Knowledge requirements

Look for evidence that confirms knowledge and understanding of:

- legislation, regulations, policies, procedures and guidelines relating to security risk management such as:
 - occupational health and safety
 - public service Acts
 - Crimes Act 1914 and Criminal Code 1985
 - Freedom of Information Act 1982
 - Privacy Act 1988
 - fraud control policy
 - protective security policy
 - Security Guidelines for Australian Government IT Systems (ACSI 33)
 - Commonwealth Protective Security Manual
 - Australian standards, quality assurance and certification requirements
 - security plan
 - organisation's strategic objectives
 - national strategic objectives
 - security constraints
 - equal employment opportunity, equity and diversity principles

REQUIRED SKILLS AND KNOWLEDGE

public sector legislation such as occupational health and safety and environment in the context of implementation and monitoring of security risk management plans

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the Unit descriptor, Performance Criteria, the Range Statement and the Assessment Guidelines for the Public Sector Training Package.

Units to be assessed together

- *Pre-requisite* units that must be achieved prior to this unit: *Nil*
- *Co-requisite* units that must be assessed with this unit: *Nil*
- *Co-assessed units* that may be assessed with this unit to increase the efficiency and realism of the assessment process include, but are not limited to:

PSPETHC501B Promote the values and ethos of public service

PSPGOV502B Develop client services

PSPGOV504B Undertake research and analysis

PSPLEGN501B Promote compliance with legislation in the public sector

PSPSEC501A Assess security risks

PSPSEC502A Develop security risk management plans

Overview of evidence requirements

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms:

- the knowledge requirements of this unit
- the skill requirements of this unit
- application of the Employability Skills as they relate to this unit (see Employability Summaries in Qualifications Framework)
- security risk management plans implemented and monitored in a range of (2 or more) contexts (or occasions, over time)

Resources required to carry out assessment

These resources include:

- legislation, policy, procedures and protocols relating to security risk management plans
- Security Guidelines for Australian Government IT Systems (ACSI 33)
- Commonwealth Protective Security Manual
- case studies and workplace scenarios to capture the range of situations likely to be encountered when implementing and monitoring security risk management plans

Where and how to assess evidence

Valid assessment of this unit requires:

- a workplace environment or one that closely resembles normal work practice and replicates the range of conditions likely to be encountered when implementing and monitoring security risk

EVIDENCE GUIDE

management plans, including coping with difficulties, irregularities and breakdowns in routine

- security risk management plans implemented and monitored in a range of (2 or more) contexts (or occasions, over time)

Assessment methods should reflect workplace demands, such as literacy, and the needs of particular groups, such as:

- people with disabilities
- people from culturally and linguistically diverse backgrounds
- Aboriginal and Torres Strait Islander people
- women
- young people
- older people
- people in rural and remote locations

Assessment methods suitable for valid and reliable assessment of this competency may include, but are not limited to, a combination of 2 or more of:

- case studies
- portfolios
- questioning
- scenarios
- authenticated evidence from the workplace and/or training courses, such as a reviewed security plan

For consistency of assessment

Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and/or apply the competency in different situations or environments

Range Statement

RANGE STATEMENT

The Range Statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The Range Statement also provides a focus for assessment. It relates to the unit as a whole. Text in *italics* in the Performance Criteria is explained here.

- Security risks may include*
- internal
 - external
 - national
 - international
 - real
 - perceived
 - to:
 - people
 - property
 - information
 - reputation
 - criminal
 - terrorist
 - from foreign intelligence services
 - from commercial/industrial competitors
 - from malicious people
- Countermeasures may include*
- revision of agency security plan
 - upgrade of existing security
 - installation of new security measures
 - technical controls
 - training
 - personnel-oriented
 - information-oriented
 - property-oriented
 - reputation-oriented
- Legal requirements, government and organisational policy may include*
- Commonwealth and State/Territory legislation including equal employment opportunity, occupational health and safety, privacy and anti-discrimination law
 - access and equity
 - ethics and accountability
 - national and international codes of practice and standards
 - the organisation's policies and practices
 - government policy

RANGE STATEMENT

- codes of conduct/codes of ethics
 - Australian and New Zealand standards - Risk management AS/NZS 4360:1999
 - Security Guidelines for Australian Government IT Systems (ACSI 33)
 - Commonwealth Protective Security Manual
- Residual risks are*
- those that cannot be treated
- Strategies may include*
- audits
 - incident reporting mechanisms
 - technical controls
 - systems
 - rosters
 - access controls
 - training
- Type of risk may include*
- severe
 - high
 - major
 - significant
 - moderate
 - low
 - trivial
- Sources of threats may include*
- technical
 - actual events
 - political circumstances
 - human behaviour
 - environmental
 - conflict
 - terrorism
 - internal
 - external
 - local
 - national
 - international
- Monitoring may include*
- regular checking
 - critical observation
 - regular recording
 - information, such as threat assessments, from senior management
 - reports from business units on current security measures
 - identification of changes over time such as:

RANGE STATEMENT

- Risk treatments may include*
- notification of major changes to business or corporate goals or plans
 - notification of key projects
 - addition of security measures
 - reduction of security measures
 - avoiding the risk through change of practice
 - acceptance of residual risk
 - minimisation of harm through response mechanisms
 - accepting the risk
- Stakeholders may include*
- supervisors
 - managers
 - other areas within the organisation
 - other organisations
 - government
 - third parties
 - external contractors

PSPSEC504A Coordinate protective security

Modification History

Not applicable.

Unit Descriptor

Unit descriptor

This unit covers the requirements for those with day-to-day responsibility for performance of an organisation's protective security function. It includes providing advice and support to others, monitoring and coordinating security, and liaising with specialist security services.

In practice, coordination of protective security may overlap with other generalist or specialist public sector work activities such as acting ethically, promoting compliance with legislation, developing client services, assessing security risk, communicating security awareness, etc.

This is a new unit of competency, added to the *Government Security Management* Competency field of the Training Package in 2004.

Application of the Unit

Not applicable.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

Employability skills This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements are the essential outcomes of the unit of competency. Together, performance criteria specify the requirements for competent performance. Text in *bold italics* is explained in the Range Statement following.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Provide security advice and support	<p>1.1 Assistance is provided to management to analyse the security environment and plan to counter potential <i>threats</i></p> <p>1.2 Advice is provided to management on <i>physical</i> and <i>procedural</i> security measures in accordance with organisational circumstances</p> <p>1.3 Assistance is provided in the development of the organisation's security policy and procedures in consultation with management and staff</p> <p>1.4 Promotion as the first point of contact for security concerns and queries is undertaken within the organisation in accordance with organisational requirements</p> <p>1.5 Advice is provided on <i>security matters</i> in accordance with legislation and security <i>standards</i></p>
2. Coordinate and monitor security	<p>2.1 Protective security arrangements are developed and implemented in conjunction with senior management to create and maintain a secure environment for official information and resources</p> <p>2.2 Devolved security measures are coordinated/overseen to ensure organisational standards are maintained in a cost-effective and consistent way</p> <p>2.3 The organisation's security procedures and systems are monitored in an ongoing manner and audited as required in accordance with the organisation's security policy and plan</p> <p>2.4 Monitoring is undertaken to ensure that employees and contractors are aware of their security responsibilities and obligations, and recommendations are prepared/actions are taken to address any gaps</p> <p>2.5 <i>Security incident</i> reports are reviewed and the implications are assessed for security risk, security procedures and security awareness training</p>
3. Access security specialists	<p>3.1 Contact between the organisation and external <i>security authorities/organisations</i> is coordinated in accordance with organisational policy and procedures</p> <p>3.2 Specialist security organisations are contacted for advice, technical assistance, learning and development to ensure compliance with jurisdictional and organisational security policies, procedures and standards</p> <p>3.3 Security incidents and <i>other security issues</i> are reported/referred to government security authorities in accordance with legislation and security standards</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the essential skills and knowledge and their level, required for this unit.

Skill requirements

Look for evidence that confirms skills in:

applying legislation, regulations and policies relating to the coordination of protective security

reading and analysing complex documents such as legislation, regulations and standards in the context of protective security

researching and critically analysing the operational environment and drawing conclusions

using communication with diverse stakeholders involving listening, questioning, paraphrasing, clarifying and summarising, to provide advice and support

responding to diversity, including gender and disability

writing reports and recommendations requiring formality of language and structure

using computer technology to gather and analyse information, and prepare reports

applying procedures relating to occupational health and safety and environment in the context of protective security coordination

Knowledge requirements

Look for evidence that confirms knowledge and understanding of:

legislation, regulations, policies, procedures and guidelines relating to government security management such as:

occupational health and safety

public service Acts

Crimes Act 1914 and Criminal Code 1985

Freedom of Information Act 1982

Privacy Act 1988

fraud control policy

protective security policy

the organisation's functions, assets and security environment

Australian standards, quality assurance and certification requirements

Australian standard - Risk management AS/NZS 4360:1999

equal employment opportunity, equity and diversity principles

public sector legislation such as occupational health and safety and environment in the context of coordinating protective security

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the Unit descriptor, Performance Criteria, the Range Statement and the Assessment Guidelines for the Public Sector Training Package.

Units to be assessed together

- *Pre-requisite* units that must be achieved prior to this unit: *Nil*
- *Co-requisite* units that must be assessed with this unit: *Nil*
- *Co-assessed units* that may be assessed with this unit to increase the efficiency and realism of the assessment process include, but are not limited to:

PSPETHC501B Promote the values and ethos of public service

PSPGOV502B Develop client services

PSPLEGN501B Promote compliance with legislation in the public sector

PSPSEC501A Assess security risks

PSPSEC502A Develop security risk management plans

PSPSEC503A Implement and monitor security risk management plans

PSPSEC505A Protect security classified information

PSPSEC506A Communicate security awareness

Overview of evidence requirements

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms:

- the knowledge requirements of this unit
- the skill requirements of this unit
- application of the Employability Skills as they relate to this unit (see Employability Summaries in Qualifications Framework)
- coordination of protective security in a range of (3 or more) contexts (or occasions, over time)

Resources required to carry out assessment

These resources include:

- legislation, policy, procedures and protocols relating to coordination of protective security
- case studies and workplace scenarios to capture the range of situations likely to be encountered when coordinating protective security

Where and how to assess evidence

Valid assessment of this unit requires:

- a workplace environment or one that closely resembles normal work practice and replicates the range of conditions likely to be

EVIDENCE GUIDE

encountered when coordinating protective security, including coping with difficulties, irregularities and breakdowns in routine

- coordination of protective security in a range of (3 or more) contexts (or occasions, over time)

Assessment methods should reflect workplace demands, such as literacy, and the needs of particular groups, such as:

- people with disabilities
- people from culturally and linguistically diverse backgrounds
- Aboriginal and Torres Strait Islander people
- women
- young people
- older people
- people in rural and remote locations

Assessment methods suitable for valid and reliable assessment of this competency may include, but are not limited to, a combination of 2 or more of:

- case studies
- portfolios
- questioning
- scenarios
- authenticated evidence from the workplace and/or training courses

For consistency of assessment

Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments

Range Statement

RANGE STATEMENT

The Range Statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The Range Statement also provides a focus for assessment. It relates to the unit as a whole. Text in *italics* in the Performance Criteria is explained here.

Threats may be

- real or perceived
- criminal
- terrorist
- from foreign intelligence services
- from commercial/industrial competitors
- from malicious people
- to:
- personnel
- information
- property
- reputation

Physical security measures may include

- storage arrangements
- access control
- barriers and alarms

Procedural security measures may include

- use
- classification
- labelling
- handling
- transmission
- restricted access

Security matters may include

- security incidents
- personnel vetting
- home-based work
- conference security
- classification of information
- security clearances

Protective security standards may include those in

- fraud control policy
- protective security policy
- public service codes of conduct/ethics
- legislation/regulations, such as:
- public service Acts
- Crimes Act 1914 and Criminal Code 1985

RANGE STATEMENT

- Freedom of Information Act 1982
 - Privacy Act 1988
- Security incidents may be*
- breaches
 - violations
 - contact
 - approach
 - intentional
 - unintentional
 - deliberate
- Security authorities/organisations may include*
- organisations contracted to provide security services
 - government authorities/organisations with a security mandate
- Other security issues may include*
- briefings for people preparing to serve overseas
 - national security clearances
 - security incidents
 - security investigations

They allow for different work requirements, work practices and knowledge. The Range Statement also provides a focus for assessment. It relates to the unit as a whole. Text in *italics* in the Performance Criteria is explained here.

Information may be

- hard copy
- electronic
- audio-visual
- photographic
- encrypted
- national security information
- non-national security information
- classified by third parties

Standards may include those referred to in

- public service Acts
- protective security policy
- fraud control policy
- Crimes Act 1914 and Criminal Code 1985
- Freedom of Information Act 1982
- Privacy Act 1988
- occupational health and safety legislation
- Australian standards such as Risk management AS/NZS 4360:1999
- Security Guidelines for Australian Government IT Systems (ACSI 33)
- Commonwealth Protective Security Manual

Other security measures may include

- correct filing
- clean desk
- quitting all electronic systems and networks
- checking environment including:
 - desks
 - whiteboards
 - waste bins
 - computer drives
 - containers
 - cabinets
 - safes
 - vaults
 - windows

Elements and Performance Criteria Pre-Content

Elements are the essential outcomes of the unit of competency. Together, performance criteria specify the requirements for competent performance. Text in *bold italics* is explained in the Range Statement following.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Plan security awareness activities	<p>1.1 <i>Need</i> for activities is determined, taking into account identified client needs and feedback from clients and staff, and priorities are identified in the organisation's security plan</p> <p>1.2 Ideas for new or improved activities are initiated, gathered and assessed, taking into account the human, financial and physical resources required</p> <p>1.3 Approval for <i>security awareness activities</i> is obtained in accordance with organisational guidelines</p>
2. Design security awareness activities	<p>2.1 Individuals and groups are targeted, and formal and informal networks are established and used regularly as communication channels</p> <p>2.2 Precedents in security management are incorporated into security awareness activities</p> <p>2.3 Effective awareness/information presentations are implemented where required</p> <p>2.4 Security awareness activities are linked in an integrated and cohesive manner with organisational ethical and security management standards and guidelines, codes of conduct and include related aspects of corporate policy</p> <p>2.5 Security awareness activities are based on a knowledge of the organisation's corporate objectives, core business, the culture of the organisation and a knowledge of the organisation's client base</p>
3. Promote government security management	<p>3.1 Incidents and effects of non-compliance are publicised in accordance with organisational requirements</p> <p>3.2 <i>Information</i> to promote government security management is provided in line with audience needs</p>
4. Develop and nurture cooperative client relationships	<p>4.1 Expectations of clients and contractors are established and documented</p> <p>4.2 Opportunities for establishing contacts and <i>networks</i> with external and internal clients are anticipated in consultation with work colleagues and managers</p> <p>4.3 Changes in organisational focus are monitored for effects on organisation-client relationships and action is taken to inform clients of changes in accordance with organisational policy and procedures</p> <p>4.4 Feedback on organisational activities is obtained and reported within the organisation in accordance with policy and procedures</p> <p>4.5 Organisation's security management philosophy, policy and</p>

ELEMENT

PERFORMANCE CRITERIA

- procedures are imparted in a way which facilitates *stakeholder* understanding
- 4.6 Where required, clients are advised when and how they should modify their practices to meet organisational standards
- 5. Conduct security management activities**
- 5.1 Security management activities are planned and are feasible within existing resource and time constraints
- 5.2 Intended outcomes are identified and are based on realistic expectations of the target audience
- 5.3 Activities are varied, refined and adapted as indicated by audience response or by changes in the organisation's security strategy and procedures
- 5.4 Adult learning techniques are utilised
- 5.5 Security awareness information is linked with codes of conduct and ethical and security management guidelines of the organisation, together with its broader corporate goals
- 6. Evaluate success of awareness raising activities**
- 6.1 Security awareness activities are assessed against predetermined objectives
- 6.2 Results of evaluation are documented and used as the basis for planning future activities
- 6.3 Opportunities for new security awareness activities are identified and acted on as required
- 6.4 Evidence, if any, is obtained of a *decrease* in the level of security breaches as a result of activities

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the essential skills and knowledge and their level, required for this unit.

Skill requirements

Look for evidence that confirms skills in:

making presentations

designing security management activities

developing and maintaining client relationships

tailoring sessions to the needs of adult learners and a variety of audiences

explaining complex concepts and formal documents such as legislation, standards and codes of conduct

using a range of communication styles to suit different audiences and purposes

responding to diversity, including gender and disability

applying occupational health and safety and environmental procedures in the context of conducting security management activities

Knowledge requirements

Look for evidence that confirms knowledge and understanding of:

agency structure and core business activities

security and how it relates to the specific functions and activities of the organisation, together with an understanding of ethical standards required by the organisation of its staff and contractors and suppliers

national strategic objectives relating to government security management

jurisdictional security requirements and strategic objectives

cross-jurisdictional protocols

international treaties and protocols

the organisation's security risk management methodology

security risk factors in the organisation

identified instances of security breaches

adult learning principles

audience requirements

anti-discrimination and diversity legislation

legislation, policies and procedures relating to conduct of security management activities including occupational health and safety and environment

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the Unit descriptor, Performance Criteria, the Range Statement and the Assessment Guidelines for the Public Sector Training Package.

Units to be assessed together

- *Pre-requisite* units that must be achieved prior to this unit: *Nil*
- *Co-requisite* units that must be assessed with this unit: *Nil*
- *Co-assessed units* that may be assessed with this unit to increase the efficiency and realism of the assessment process include, but are not limited to:

PSPETHC501B Promote the values and ethos of public service

PSPGOV502B Develop client services

PSPGOV505A Promote diversity

PSPGOV511A Provide leadership

PSPLEGN501B Promote compliance with legislation in the public sector

PSPSEC504A Coordinate protective security

PSPSEC505A Protect security classified information

Overview of evidence requirements

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms:

- the knowledge requirements of this unit
- the skill requirements of this unit
- application of the Employability Skills as they relate to this unit (see Employability Summaries in Qualifications Framework)
- communication of security awareness in a range of (3 or more) contexts

Resources required to carry out assessment

These resources include:

- legislation, policy and procedures relating to government security management
- activities for minimising security breaches
- security guidelines
- government security management standards
- public sector values and codes of conduct
- case studies and workplace scenarios to capture the range of situations likely to be encountered when communicating security awareness

Valid assessment of this unit requires:

EVIDENCE GUIDE

Where and how to assess evidence

- a workplace environment or one that closely resembles normal work practice and replicates the range of conditions likely to be encountered when communicating security awareness, including coping with difficulties, irregularities and breakdowns in routine
- communication of security awareness in a range of (3 or more) contexts

Assessment methods should reflect workplace demands, such as literacy, and the needs of particular groups, such as:

- people with disabilities
- people from culturally and linguistically diverse backgrounds
- Aboriginal and Torres Strait Islander people
- women
- young people
- older people
- people in rural and remote locations

Assessment methods suitable for valid and reliable assessment of this competency may include, but are not limited to, a combination of 2 or more of:

- case studies
- portfolios
- projects
- questioning
- scenarios
- authenticated evidence from the workplace and/or training courses, such as session plans, evaluation and feedback documentation

For consistency of assessment

Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments

Range Statement

RANGE STATEMENT

The Range Statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The Range Statement also provides a focus for assessment. It relates to the unit as a whole. Text in *italics* in the Performance Criteria is explained here.

PSPSEC601A Define information systems framework

Modification History

Not applicable.

Unit Descriptor

Unit descriptor

This unit covers the process of identifying and establishing the information system security framework for an organisation or a business unit at functional level.

It includes establishing the organisational context, determining principal areas of risk, determining information system requirements, establishing and obtaining approval for the framework.

In practice, defining an information systems framework may overlap with other generalist or specialist public sector work activities such as managing compliance with legislation and ethics requirements, managing risk, networking, implementing policy, managing change, etc.

This unit has been adapted from *BSBRKG601A Define recordkeeping framework* from the Business Services Training Package. The units are not equivalent.

This is a new unit of competency, added to the *Government Security Management* Competency field of the Training Package in 2004.

Application of the Unit

Not applicable.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

Employability skills This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements are the essential outcomes of the unit of competency. Together, performance criteria specify the requirements for competent performance. Text in *bold italics* is explained in the Range Statement following.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Establish the organisational context	<p>1.1 <i>Legislative and regulatory requirements</i> for the organisation are identified and documented in accordance with organisational policy and procedures</p> <p>1.2 Legislation is analysed for any security implications for information management, and the outcomes are documented</p> <p>1.3 The organisation's purpose and function are reviewed for compliance requirements</p> <p>1.4 The <i>broad social context</i> in which the organisation operates is analysed to determine community expectations</p>
2. Determine the principal areas of risk requiring information strategy	<p>2.1 Existing risk analyses for organisation's functions are reviewed and updated</p> <p>2.2 <i>Regulatory requirements</i> and legal liabilities are reviewed and documented for their impact on the information systems framework</p> <p>2.3 Risks and liabilities to be managed by information systems are determined and documented informing the development of the framework</p>
3. Determine the information system requirements for each business function	<p>3.1 Risks, liabilities and regulatory requirements are determined and analysed against each business function</p> <p>3.2 The determined requirements for each business function are documented and communicated as evidence to be captured as records</p> <p>3.3 Information system specifications are formulated from the evidence requirements in accordance with the organisation's technologies, standards and protocols</p> <p>3.4 Information security requirements are determined for each business function</p> <p>3.5 <i>Specifications for information systems security</i> measures are determined consistent with government guidelines and standards</p>
4. Establish information systems framework for organisation	<p>4.1 Overview of responsibilities for information management within the organisation is developed and communicated</p> <p>4.2 <i>Responsibilities</i> and authorities in relation to regulatory requirements are defined in accordance with jurisdictional and organisational standards</p> <p>4.3 Information management responsibilities and rights for each business function are defined</p> <p>4.4 Identified risks and liabilities managed by information systems are integrated with the definition of responsibilities for each function</p>

ELEMENT

PERFORMANCE CRITERIA

- 4.5 Levels of accountability and responsibility within the framework are defined, assigned and documented for each function
- 4.6 Security procedures for information systems are formulated and documented
- 5. Obtain approval for framework**
- 5.1 The completed and documented framework of areas of risk, regulatory requirements, records specifications, security requirements and information management responsibilities are communicated to the *appropriate person(s)* for review and endorsement
- 5.2 A review process is established and appropriate persons are charged with *maintaining* the currency of the organisation's information systems framework

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the essential skills and knowledge and their level, required for this unit.

Skill requirements

Look for evidence that confirms skills in:

- applying legislation, regulations and policies relating to government information systems security
- analysing process functions and problems
- preparing, compiling and writing complex documents and reports
- communicating complex relationships and processes effectively to users and management
- documenting complex relationships and processes
- identifying and viewing component parts as integral elements of the whole system
- using tools and techniques to solve problems
- analysing and interpreting legal, regulatory and security requirements and organisation policies and procedures
- analysing and synthesizing documentation, verbally delivered information, and observed behaviours
- consulting with stakeholders to elicit relevant information for analysis
- responding to diversity, including gender and disability
- applying procedures relating to occupational health and safety and environment in the context of government information systems security

Knowledge requirements

Look for evidence that confirms knowledge and understanding of:

- legislation, regulations, policies, procedures and guidelines relating to government information system security
- sources of information about jurisdictional requirements for information systems
- functions and structures in the organisation
- policies and strategies that apply across the jurisdiction
- information management principles and processes
- information security requirements
- equal employment opportunity, equity and diversity principles
- public sector legislation such as occupational health and safety and environment in the context of government information systems security

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the Unit descriptor, Performance Criteria, the Range Statement and the Assessment Guidelines for the Public Sector Training Package.

Units to be assessed together

- *Pre-requisite* units that must be achieved prior to this unit: *Nil*
- *Co-requisite* units that must be assessed with this unit: *Nil*
- *Co-assessed units* that may be assessed with this unit to increase the efficiency and realism of the assessment process include, but are not limited to:

PSPETHC601B Maintain and enhance confidence in public service

PSPGOV601B Apply government systems

PSPGOV602B Establish and maintain strategic networks

PSPLEGN601B Manage compliance with legislation in the public sector

PSPMNGT604B Manage change

PSPMNGT608B Manage risk

PSPPOL603A Manage policy implementation

PSPSEC602A Manage security awareness

Overview of evidence requirements

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms:

- the knowledge requirements of this unit
- the skill requirements of this unit
- application of the Employability Skills as they relate to this unit (see Employability Summaries in Qualifications Framework)
- information systems frameworks defined (or re-defined) in a range of (3 or more) contexts (or occasions, over time)

Resources required to carry out assessment

These resources include:

- legislation, policy, procedures and protocols relating to information systems frameworks
- case studies and workplace scenarios to capture the range of situations likely to be encountered when defining information systems frameworks

Where and how to assess evidence

Valid assessment of this unit requires:

- a workplace environment or one that closely resembles normal work practice and replicates the range of conditions likely to be encountered when defining information systems frameworks,

EVIDENCE GUIDE

including coping with difficulties, irregularities and breakdowns in routine

- information systems frameworks defined (or re-defined) in a range of (3 or more) contexts (or occasions, over time)

Assessment methods should reflect workplace demands, such as literacy, and the needs of particular groups, such as:

- people with disabilities
- people from culturally and linguistically diverse backgrounds
- Aboriginal and Torres Strait Islander people
- women
- young people
- older people
- people in rural and remote locations

Assessment methods suitable for valid and reliable assessment of this competency may include, but are not limited to, a combination of 2 or more of:

- portfolios
- questioning
- scenarios
- authenticated evidence from the workplace and/or training courses, such as risk management plan, organisational flowchart

For consistency of assessment

Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments

Range Statement

RANGE STATEMENT

The Range Statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The Range Statement also provides a focus for assessment. It relates to the unit as a whole. Text in *italics* in the Performance Criteria is explained here.

Standards that apply may include

- protective security standards in Commonwealth Protective Security Manual
- fraud control standards
- Security Guidelines for Australian Government IT Systems (ACSI 33)
- AS/NZS 4390.2 Australian Standard in Records Management Part 2, Clause 5
- ISO DIS 15489 - Draft International Standard on Records Management
- AS 3674 - Storage of Microfilm (of all types for various purposes)
- AS 1203 Microfilming of Engineering Documents
- AS 2840 Microfilming Newspapers for Archival Purposes
- AS 4003 Permanent Paper

Legislative and regulatory requirements may include

- income tax
- superannuation
- goods and services tax
- occupational health and safety
- industrial relations
- freedom of information
- privacy
- statutory access

Analysis of the broad legal and social context of an organisation may identify

- the legal framework which regulates an organisation's operations
- the internal and external stakeholders whose interests must be taken into account
- the social and ethical standards the community expects it should meet
- codes of ethics, codes of professional conduct

Regulatory requirements may be documented in

- codes of practice
- regulations or rules
- technical standards
- international or national standards

RANGE STATEMENT

Specifications for information systems security may include

- standard level of protection
- enhanced level of protection
- certification and accreditation of information technology and telecommunications systems
- information technology audit trails
- logical access controls

Responsibilities may be assigned to

- business unit managers or organisational groupings responsible for discrete functions, processes or projects which generate information
- individual employees who carry out the business activities which create information
- managers who may be responsible for establishing overall policy and procedures based on organisational requirements, standards and compliances
- system administrators who may be responsible for the reliability and continuing operation of systems which generate records

Appropriate person for approvals may be

- senior manager for each business function
- agency security adviser
- management team
- reference body appointed by management

Maintenance of the framework includes

- responsibility for ensuring the maintenance of adequate security measures for information systems and their data

Competency field

Competency field Government Security Management

PSPSEC602A Manage security awareness

Modification History

Not applicable.

Unit Descriptor

Unit descriptor

This unit covers activities required in promoting and disseminating the organisation's approach to security management internally and to external clients and the broader community. It includes disseminating the security strategy, championing security awareness and marketing security management both inside and outside the organisation.

In practice, managing security awareness may overlap with other generalist or specialist public sector workplace activities such as managing compliance with legislation and ethics requirements, managing risk, networking, implementing policy, managing change, etc.

This is a new unit of competency, added to the *Government Security Management* Competency field of the Training Package in 2004.

Application of the Unit

Not applicable.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

Employability skills This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements are the essential outcomes of the unit of competency. Together, performance criteria specify the requirements for competent performance. Text in *bold italics* is explained in the Range Statement following.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Disseminate security policy	<p>1.1 Profile of security management is raised to highest level to indicate its key focus in the organisation</p> <p>1.2 Security standards for the organisation are articulated in a manner suited to the level and experience of staff</p> <p>1.3 Ways in which the security policy and plan contribute to the achievement of organisational corporate goals are articulated</p> <p>1.4 Roles and responsibilities of key people in the organisation regarding implementation of security measures are articulated</p> <p>1.5 Dissemination methods take account of various audiences and <i>information</i> is presented in a way that meets particular audience needs</p>
2. Champion security awareness	<p>2.1 Leadership and motivation are provided in highlighting the role of security processes as integral to effective management practices</p> <p>2.2 Methods underpinning the championing of security awareness are based on an in-depth understanding of the organisation's culture and structure, and the nature of both internal and external clients</p> <p>2.3 A positive tone is set in the organisation regarding security through engendering trust and confidence in security measures</p> <p>2.4 Guidelines for the establishment of formal and informal networks are established to nurture cooperative and ethical client relationships</p>
3. Market security management inside and outside the organisation	<p>3.1 Potential activities to promote security and its importance to the overall objectives of the organisation are identified and assessed in relation to the security policy and plan in place</p> <p>3.2 Implementation is coordinated with management and key <i>stakeholders</i> who play a role in implementation</p> <p>3.3 Shared ownership of security processes is encouraged through ongoing consultation and information sharing</p> <p>3.4 Promotion activities are organised to raise stakeholder awareness of both the ethical and financial aspects of security and to facilitate endorsement of the concept and practice of security management</p> <p>3.5 <i>Trends</i> are monitored in order to ensure currency in the organisation's security measures</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the essential skills and knowledge and their level, required for this unit.

Skill requirements

Look for evidence that confirms skills in:

applying leadership

synthesising and articulating broader policy issues

using a range of communication, negotiation and presentation styles to suit different audiences and purposes

responding to diversity, including gender and disability

applying occupational health and safety and environmental procedures in the context of managing security awareness

Knowledge requirements

Look for evidence that confirms knowledge and understanding of:

corporate plan and strategic directions of the organisation

structure and core business activities of the organisation

organisation's security policy and plans

external expectations placed on the organisation by external stakeholders such as government

the incorporation of constraints imposed by the culture of the organisation and operational factors into security management issues and practices

organisational change practices

public sector legislation, policies and procedures including anti-discrimination and diversity legislation, occupational health and safety, and environment in the context of security management

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the Unit descriptor, Performance Criteria, the Range Statement and the Assessment Guidelines for the Public Sector Training Package.

Units to be assessed together

- *Pre-requisite* units that must be achieved prior to this unit: *Nil*
- *Co-requisite* units that must be assessed with this unit: *Nil*
- *Co-assessed units* that may be assessed with this unit to increase the efficiency and realism of the assessment process include, but are not limited to:

PSPETHC601B Maintain and enhance confidence in public service

PSPGOV601B Apply government systems

PSPGOV602B Establish and maintain strategic networks

PSPLEGN601B Manage compliance with legislation in the public sector

PSPMNGT604B Manage change

PSPMNGT608B Manage risk

PSPPOL603A Manage policy implementation

PSPSEC601A Define information systems framework

Overview of evidence requirements

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms:

- the knowledge requirements of this unit
- the skill requirements of this unit
- application of the Employability Skills as they relate to this unit (see Employability Summaries in Qualifications Framework)
- management of security awareness in a range of (3 or more) contexts (or occasions, over time)

Resources required to carry out assessment

These resources include:

- legislation, policy and procedures relating to government security management
- security guidelines and standards
- public sector values and codes of conduct
- case studies and workplace scenarios to capture the range of security awareness situations likely to be encountered

Where and how to assess evidence

Valid assessment of this unit requires:

- a workplace environment or one that closely resembles normal work practice and replicates the range of conditions likely to be

EVIDENCE GUIDE

encountered when managing security awareness, including coping with difficulties, irregularities and breakdowns in routine

- management of security awareness in a range of (3 or more) contexts (or occasions, over time)

Assessment methods should reflect workplace demands, such as literacy, and the needs of particular groups, such as:

- people with disabilities
- people from culturally and linguistically diverse backgrounds
- Aboriginal and Torres Strait Islander people
- women
- young people
- older people
- people in rural and remote locations

Assessment methods suitable for valid and reliable assessment of this competency may include, but are not limited to, a combination of 2 or more of:

- case studies
- portfolios
- questioning
- scenarios
- authenticated evidence from the workplace and/or training courses

For consistency of assessment

Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments

Range Statement

RANGE STATEMENT

The Range Statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The Range Statement also provides a focus for assessment. It relates to the unit as a whole. Text in *italics* in the Performance Criteria is explained here.

- Information may include*
- instructions
 - guidelines
 - case briefings
 - research outcomes
 - outcomes of analyses
- Stakeholders may include*
- relevant government Ministers
 - agency staff and senior management
 - agency clients
 - contractors and consultants
 - suppliers and customers
 - industry associations
 - other agencies with a mandate for security management
 - law enforcement agencies
 - prosecution agencies
 - internal/external audit
- Trends are monitored through*
- research of national and international material
 - surveys
 - data matching
 - internal and external networks
 - information on security breaches
 - aggregated national data relating to government security

Unit Sector(s)

Competency field Government Security Management

PSPSOHS401A Contribute to the implementation of a systematic approach to managing OHS

Modification History

Not applicable.

Unit Descriptor

Unit descriptor

This unit covers outcomes required to effectively contribute to the application of a systematic approach to managing OHS to ensure that the workplace is, as far as practicable, safe and without risks to the health of employees and others.

In practice, contributing to the implementation of a systematic approach to managing OHS may overlap with other generalist or specialist public sector work activities such as acting ethically, using communication strategies, encouraging compliance with legislation, supporting policy implementation, etc.

Application of the Unit

Application of the unit

This unit applies to individuals with supervisory responsibilities for implementing and monitoring the organisation's OHS policies, procedures and programs in a work area. It includes contributing to the implementation of developed strategies, systems and plans, as well as recognising the need for expert advice.

The unit may apply both in a work unit of a large organisation or in a small to medium enterprise.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

Employability skills This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Where *italicised* text is used, further information is detailed in the required skills and knowledge and/or the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT

PERFORMANCE CRITERIA

ELEMENT	PERFORMANCE CRITERIA
1. Contribute to the implementation of information and data systems	<p>1.1 <i>Requirements for record keeping</i> are identified and addressed.</p> <p>1.2 <i>Sources of OHS information and data</i> are identified, accessed and evaluated for application in the workplace.</p> <p>1.3 Actions are taken to ensure that records are accurately completed, collected and stored.</p> <p>1.4 Information and data is provided to managers and stakeholders in a readily understood format.</p>
2. Contribute to the implementation of OHS strategies, systems and plans	<p>2.1 OHS priorities are determined in consultation with appropriate managers and in line with other <i>consultative arrangements</i> in the workplace.</p> <p>2.2 <i>OHS action plans</i> are developed taking account of priorities.</p> <p>2.3 OHS training needs are identified and documented.</p> <p>2.4 Action plans are monitored for achievement, and updated as required.</p> <p>2.5 Input is sought from <i>OHS specialists</i> and <i>technical advisors</i> if required.</p>
3. Support integration of OHS within the overall management approach	<p>3.1 <i>Other functional areas</i> that impact on OHS are identified.</p> <p>3.2 Strategies for addressing these impacts are implemented.</p>
4. Identify OHS implications of proposed changes to the workplace and provide advice to control risks	<p>4.1 <i>Proposed changes to the workplace</i> are evaluated for OHS implications.</p> <p>4.2 Resulting hazards are identified and potential risks assessed</p> <p>4.3 Appropriate advice to control risks is provided and actioned as appropriate.</p>
5. Support integration of OHS within the overall management approach	<p>5.1 Changes to relevant legislation are identified and evaluated for implications for managing OHS.</p> <p>5.2 Changes to relevant standards or industry practice are identified and evaluated for implications for managing OHS.</p> <p>5.3 Sources of information and data are monitored for impact on hazards, risks and the management of OHS.</p> <p>5.4 Appropriate advice is provided to address impact of change.</p>
6. Evaluate effectiveness of the approach to managing OHS	<p>6.1 Sources of external and internal OHS information and data are accessed as part of evaluation.</p> <p>6.2 The need for any external input to evaluation is identified and actioned as appropriate</p> <p>6.3 <i>Stakeholders</i> are consulted for input to the evaluation.</p> <p>6.4 Areas for improvement are identified, documented and</p>

ELEMENT

PERFORMANCE CRITERIA

actioned.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the essential skills and knowledge and their level, required for this unit.

Required skills:

Look for evidence that confirms skills in:

- relating to people from a range of social, cultural and ethnic backgrounds and physical and mental abilities
- communicating effectively with personnel at all levels of the organisation, OHS specialists and, as required, emergency service personnel
- preparing brief summary reports for a range of target groups including OHS committee, OHS representatives, managers and supervisors
- applying continuous improvement and action planning processes
- managing own tasks within a time frame
- employing consultation and negotiation skills, particularly in relation to developing plans and implementing and monitoring designated actions
- contributing to the assessment of the resources needed to systematically manage OHS and where appropriate access resources
- participating in the OHS performance of the organisation
- analysing relevant workplace information and data, making observations including of workplace tasks and interactions between people, their activities, equipment, environment and systems
- carrying out simple arithmetical calculations (eg % change), producing graphs of workplace data to identify trends and recognising the limitations of data
- using basic computer and information technology skills to access internal and external information and data on OHS
- dealing with conflict and contestability
- identifying and developing links between different activity areas in the workplace.

Required knowledge:

Look for evidence that confirms knowledge and understanding of:

- roles and responsibilities under OHS legislation of employees supervisors, contractors, designers, etc
- legislative requirements for OHS information and data and consultation
- roles and responsibilities in relation to communication and consultation for OHS committees, OHS representatives, line management, employees and inspectors
- requirements for record keeping that addresses OHS, privacy and other relevant legislation
- requirements for reporting under OHS and other relevant legislation including obligations for notification and reporting of incidents
- State/Territory/Commonwealth OHS legislation (Acts, regulations, codes of practice, associated standards and guidance material) including prescriptive and performance approaches and links to other relevant legislation such as industrial relations, equal employment opportunity, workers compensation, rehabilitation etc

REQUIRED SKILLS AND KNOWLEDGE

- concept of the use of tools such as positive performance indicators (PPIs) in assessment of OHS performance
- hierarchy of control and considerations for choosing between different control measures, such as possible inadequacies of particular control measures
- principles and practices of systematic approaches to managing OHS
- internal and external sources of OHS information and data
- benefits and limitations and use a range of communication strategies and tools appropriate to the workplace
- how the characteristics and composition of the workforce impact on risk and the systematic approach to managing OHS, e.g.:
 - labour market changes
 - structure and organisation of workforce - part-time, casual and contract workers, shift rosters, geographical location
 - language, literacy and numeracy
 - communication skills
 - cultural background/workplace diversity
 - gender
 - workers with special needs
- knowledge of organisational OHS policies and procedures
- nature of workplace processes (including work flow, planning and control) and hazards relevant to the particular workplace
- key personnel, including identifying 'change agents', within workplace management structure
- formal and informal communication and consultation processes and key personnel related to communication
- language, literacy and cultural profile of the work group
- organisational culture as it impacts on the workgroup
- public policy basis of OHS

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the unit descriptor, performance criteria, The range statement and the Assessment Guidelines for the Public Sector Training Package.

Units to be assessed together

Co-assessed units that may be assessed with this unit to increase the efficiency and realism of the assessment process include:

- PSPETHC401A Uphold and support the values and principles of public service
- PSPGOV412A Use advanced workplace communication strategies
- PSPGOV422A Apply government processes
- PSPLEGN401A Encourage compliance with legislation in the public sector
- PSPPOL404A Support policy implementation
- PSPSOHS402A Contribute to the implementation of the OHS consultation process
- PSPSOHS404A Contribute to the implementation of strategies to control OHS risk
- PSPSOHS405A Contribute to the implementation of emergency procedures.

Overview of evidence requirements

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms:

- knowledge requirements of this unit
- skill requirements of this unit
- application of employability skills as they relate to this unit.

Resources required to carry out assessment

Resources essential for assessment include:

- legislation, policy, procedures and protocols relating to OHS management
- case studies and workplace scenarios to capture the range of situations likely to be encountered when contributing to the implementation of systematic approaches to managing OHS.

Where and how to assess evidence

Valid assessment of this unit requires:

- a workplace environment or one that closely resembles normal work practice and replicates the range of conditions likely to be encountered when contributing to the implementation of systematic approaches to managing OHS, including coping with difficulties, irregularities and breakdowns in routine
- contribution to the implementation of systematic approaches to

EVIDENCE GUIDE

managing OHS in a range of 3 or more contexts or occasions, over time.

Assessment methods should reflect but not exceed workplace demands, such as literacy, and the needs of individuals who might be disadvantaged.

Assessment methods suitable for valid and reliable assessment of this unit must use authenticated evidence from the workplace and/or training courses and may include a combination of two or more of:

- workplace projects
- simulation or role plays
- case studies and scenarios
- observation.
- portfolios.

The assessment environment should not disadvantage the candidate and where the person has a disability the principle of reasonable adjustment should be applied during assessment.

For consistency of assessment

Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments.

Range Statement

RANGE STATEMENT

The range statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The range statement also provides a focus for assessment. It relates to the unit as a whole. Text in *italics* in the Performance criteria is explained here.

Requirements for record keeping may be defined in

- OHS legislation and regulations governing reporting of incidents and maintenance of records related to specific hazards, including chemical registers and material safety data sheets (MSDSs)

Sources of OHS information and data may include

- privacy legislation
- organisational procedures
- OHS and other relevant legislation
- employees
- OHS specialists
- consultants
- government departments/agencies including OHS authorities and organisations such as the National Occupational Health and Safety Commission (NOHSC)
- newspapers and journals, trade/industry publications
- industry networks and associations
- technical data
- manufacturers' manuals and specifications

Consultative arrangements may include

- OHS and other consultative and planning committees
- health and safety and other employee representatives
- employee and supervisor involvement in OHS activities, such as inspections and audits
- procedures for reporting hazards, and raising and addressing OHS issues
- employee and workgroup meetings

OHS action plans refer to

- documented plans developed within the workplace to implement OHS management, which include allocated responsibilities and time frames
- OHS performance indicators for the organisation or enterprise circulars

OHS specialists may be internal or external and include

- ergonomists
- occupational hygienists
- health professionals
- injury management advisors

RANGE STATEMENT

Technical advisors may include

- engineers (such as design, acoustic, safety, mechanical and civil)
- legal practitioners
- workplace trainers and assessors
- maintenance and trades people

Other functional areas refer to

- parts of the organisation or grouped responsibilities:
- human resources, personnel management/industrial relations (IR)
- purchasing procurement and contracting
- logistics
- engineering and maintenance
- information, data and records management
- finance and auditing
- environmental management
- quality management

Proposed changes to the workplace may include

- plant and equipment purchases
- material purchases
- changes to work processes and systems
- changes to work environment
- changes to work practices and conditions
- changes to management practices
- organisational restructure
- introduction of contracting arrangements or other changes to work organisation
- introduction of new and emerging technology
- other labour market changes

Stakeholders may include

- managers
- supervisors
- health and safety and other employee representatives
- OHS committees
- employees
- the community

Unit Sector(s)

Competency field

Competency field Specialist Occupational Health&Safety

PSPSOHS402A Contribute to the implementation of the OHS consultation process

Modification History

Not applicable.

Unit Descriptor

Unit descriptor

This unit covers the outcomes required to effectively contribute to the promotion of consultative arrangements in the workplace by communicating, influencing and consulting as part of a systematic approach to managing OHS. The unit addresses the formal and informal processes of ensuring people in the organisation are informed about OHS and have opportunities to effectively participate in OHS processes.

In practice, contributing to the implementation of the OHS consultation process may overlap with other generalist or specialist public sector work activities such as acting ethically, using communication strategies, delivering client services, supporting policy implementation, etc..

Application of the Unit

Application of the unit

This unit applies to individuals with supervisory responsibilities for implementing and monitoring the organisation's OHS policies, procedures, programs in a work area. It addresses the formal and informal processes of ensuring people in the organisation are informed about OHS and have opportunities to effectively participate in OHS processes.

This unit will involve working with individuals and working with groups.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

Employability skills This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements are the essential outcomes of the unit of competency. Performance criteria describe the required performance needed to demonstrate achievement of the element. Where *italicised* text is used, further information is detailed in the required skills and knowledge and/or the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Contribute to procedures as individuals or as part of a group to raise OHS issues or request information and data	1.1 <i>Strategies and tools</i> for individuals or groups to raise OHS issues or request information and data are identified. 1.2 Procedures for individuals and groups to raise OHS issues or request information and data are implemented and communicated to <i>stakeholders</i> and <i>interested parties</i> . 1.3 <i>Barriers</i> to individuals or groups seeking OHS information and data or raising issues are identified. 1.4 Recommendations are made to address any identified barriers.

ELEMENT	PERFORMANCE CRITERIA
<p>2. Contribute to procedures for communicating OHS information and data</p>	<p>2.1 Needs for <i>OHS information and data</i>, communication and consultation, including relevant <i>legislative requirements</i>, are identified with stakeholders.</p> <p>2.2 Information and data about OHS is provided to key personnel on a regular basis, in a readily accessible manner and appropriate to the target group.</p> <p>2.3 Formal and informal <i>communication processes</i> are used to provide information and data about OHS.</p> <p>2.4 Any barriers to individuals or groups gaining information and data about OHS are identified.</p> <p>2.5 Recommendations are made to address any identified barriers.</p>
<p>3. Communicate OHS information, data and advice effectively to influence management decision making and action</p>	<p>3.1 Timely and appropriate OHS information and data and advice are provided to stakeholder groups and individuals.</p> <p>3.2 OHS-related contributions in the form of ideas, information and solutions are made to influence management decision making and action.</p> <p>3.3 Awareness of the organisation's cultural and industrial environment is used when dealing with OHS issues.</p>
<p>4. Contribute to maintaining consultative arrangements</p>	<p>4.1 Support and advice are provided to those involved in <i>OHS consultative arrangements</i>.</p> <p>4.2 The OHS issue resolution process is supported to facilitate timely and equitable resolution of OHS issues.</p> <p>4.3 OHS consultative processes are facilitated to meet legislative and workplace requirements.</p> <p>4.4 The effectiveness of OHS consultation and participative arrangements is monitored.</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the essential skills and knowledge and their level, required for this unit.

Required skills:

Look for evidence that confirms skills in:

- relating to people from a range of social, cultural and ethnic backgrounds and physical and mental abilities
- communicating effectively with personnel at all levels of the organisation, OHS specialists and, as required, emergency service personnel
- preparing brief summary reports for a range of target groups including OHS committee, OHS representatives, managers and supervisors
- managing own tasks within a time frame
- employing consultation and negotiation skills, particularly in relation to developing plans and implementing and monitoring designated actions
- contributing to the assessment of the resources needed to systematically manage OHS and where appropriate access resources
- analysing relevant workplace information and data, making observations including of workplace tasks and interactions between people, their activities, equipment, environment and systems
- using a range of communication media
- conducting effective formal and informal meetings
- using language and literacy skills appropriate to the workgroup and the task
- dealing with conflict and contestability
- identifying and developing links between different activity areas in the workplace.

Required knowledge:

Look for evidence that confirms knowledge and understanding of:

- legislative requirements for OHS information and data and consultation
- roles and responsibilities in relation to communication and consultation for OHS committees, OHS representatives, line management, employees and inspectors
- requirements for record keeping that addresses OHS, privacy and other relevant legislation
- requirements for reporting under OHS and other relevant legislation including obligations for notification and reporting of incidents
- State/Territory/Commonwealth OHS legislation (Acts, regulations, codes of practice, associated standards and guidance material) including prescriptive and performance approaches and links to other relevant legislation such as industrial relations, equal employment opportunity, workers compensation, rehabilitation etc
- internal and external sources of OHS information and data
- benefits and limitations and use a range of communication strategies and tools appropriate to the workplace

REQUIRED SKILLS AND KNOWLEDGE

- how the characteristics and composition of the workforce impact on risk and the systematic approach to managing OHS eg
- labour market changes
- structure and organisation of workforce - part-time, casual and contract workers, shift rosters, geographical location
- language, literacy and numeracy
- communication skills
- cultural background/workplace diversity
- gender
- workers with special needs
- principles of effective meetings including agendas, action planning, chair/secretarial duties, minutes and action items
- knowledge of organisational OHS policies and procedures
- key personnel, including identifying 'change agents', within workplace management structure
- formal and informal communication and consultation processes and key personnel related to communication
- language, literacy and cultural profile of the work group
- organisational culture as it impacts on the workgroup
- public policy basis of OHS.

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the unit descriptor, performance criteria, The range statement and the Assessment Guidelines for the Public Sector Training Package.

Units to be assessed together	<p>Co-assessed units that may be assessed with this unit to increase the efficiency and realism of the assessment process include:</p> <ul style="list-style-type: none"> • PSPETHC401A Uphold and support the values and principles of public service • PSPGOV402B Deliver and monitor service to clients • PSPGOV412A Use advanced workplace communication strategies • PSPGOV422A Apply government processes • PSPPOL404A Support policy implementation • PSPSOHS401A Contribute to the implementation of a systematic approach to managing OHS • PSPSOHS404A Contribute to the implementation of strategies to control OHS risk • PSPSOHS407A Ensure compliance with OHS and other relevant laws.
Overview of evidence requirements	<p>In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms:</p> <ul style="list-style-type: none"> • knowledge requirements of this unit • skill requirements of this unit • application of employability skills as they relate to this unit.
Resources required to carry out assessment	<p>Resources essential for assessment include:</p> <ul style="list-style-type: none"> • legislation, policy, procedures and protocols relating to OHS consultation processes • case studies and workplace scenarios to capture the range of situations likely to be encountered when contributing to the implementation of OHS consultation processes. <p>Valid assessment of this unit requires:</p>
Where and how to assess evidence	<ul style="list-style-type: none"> • a workplace environment or one that closely resembles normal work practice and replicates the range of conditions likely to be encountered when contributing to the implementation of OHS consultation processes, including coping with difficulties, irregularities and breakdowns in routine • contribution to the implementation of OHS consultation in a range of three or more contexts or occasions, over time.

EVIDENCE GUIDE

Assessment methods should reflect but not exceed workplace demands, such as literacy, and the needs of individuals who might be disadvantaged.

Assessment methods suitable for valid and reliable assessment of this unit must use authenticated evidence from the workplace and/or training courses and may include a combination of two or more of:

- workplace projects
- simulation or role plays
- case studies and scenarios
- portfolios.

The assessment environment should not disadvantage the candidate and where the person has a disability the principle of reasonable adjustment should be applied during assessment.

For consistency of assessment

Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments.

Range Statement

RANGE STATEMENT

The range statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The range statement also provides a focus for assessment. It relates to the unit as a whole. Text in *italics* in the Performance criteria is explained here.

- Strategies and tools may include***
- OHS committees
 - meetings with health and safety and employee representatives
 - employee meetings
 - input to safety audits, hazard identification and risk assessment processes
 - hazard alerts
 - surveys, checklists
 - tool box meetings
 - intranet or email systems
 - suggestion boxes and processes
 - informal discussions with team members
- Stakeholders may include***
- managers
 - supervisors
 - health and safety and other employee representatives
 - OHS committees
 - employees
- Interested parties may include***
- contractors
 - visitors
 - clients
 - community
- Barriers may include***
- language
 - literacy and numeracy
 - special needs of employees
 - shift work and rostering arrangements
 - contractual arrangements
 - timing of information provision
 - workplace organisational structures (eg geographic, hierarchical)
 - workplace culture related to OHS
- Information and data about OHS may include***
- OHS legislation, codes of practice and guidelines
 - OHS consultation and participation processes
 - rights and responsibilities
 - hazards that exist in the workplace

RANGE STATEMENT

- risk assessments
- risk control strategies
- workplace OHS policies and procedures
- safe work procedures
- access to training information and data
- manufacturers' manuals and specifications
- OHS legislation, regulations and codes of practice
- workplace equity, diversity and privacy legislation
- freedom of information (FOI) legislation
- group and individual meetings
- interviews
- notice boards
- signs, posters and brochures
- emails, letters, minutes, memos, reports
- photographs, maps and plans
- audio-visual media eg video
- newsletters
- OHS and other consultative and planning committees
- health and safety representatives and other employee representatives
- employee and supervisor involvement in OHS activities such as inspections and audits
- procedures for reporting hazards, and raising and addressing OHS issues
- employee and workgroup meetings

Legislative requirements may include

Communication processes may include

OHS consultative arrangements may include

PSPSOHS403A Identify hazards and assess OHS risks

Modification History

Not applicable.

Unit Descriptor

Unit descriptor

This unit covers the knowledge, processes and techniques necessary to identify hazards and assess risks using developed processes and tools. The unit is a companion unit to *PSPSOHS404A Contribute to the implementation of strategies to control OHS risk*, and they will usually be co-presented and co-assessed.

In practice, identifying hazards and assessing OHS risks may overlap with other generalist or specialist public sector work activities such as acting ethically, using communication strategies, gathering and analysing information, delivering client services, supporting policy implementation, etc.

Application of the Unit

Application of the unit

This unit applies to individuals with supervisory responsibilities for managing OHS in the workplace who identify hazards and assess risks using developed processes and tools.

The unit also introduces basic incident analysis as an important skill underlying incident investigation which is addressed in greater complexity in PSPSOHS508A Participate in the investigation of incidents.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

Employability skills This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements are the essential outcomes of the unit of competency. Performance criteria describe the required performance needed to demonstrate achievement of the element. Where *italicised* text is used, further information is detailed in the required skills and knowledge and/or the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Investigate incidents for prevention	1.1 <i>Appropriate techniques</i> to investigate <i>incidents</i> are selected and used. 1.2 <i>Actions and events</i> leading up to an incident, during the incident and through the post incident management phase are constructed. 1.3 Incident is analysed to identify the <i>hazard</i> . 1.4 Incident is analysed to identify intervention points to prevent re-occurrence.
2. Access existing sources of information and data to identify hazards	2.1 <i>Workplace sources of information and data</i> are reviewed to access information and data and assist in identifying hazards. 2.2 <i>External sources of information and data</i> are accessed as required. 2.3 Input is sought from <i>stakeholders, key personnel</i> and <i>OHS specialists</i> .
3. Conduct hazard identification	3.1 Formal and informal <i>techniques/tools</i> are sourced to identify hazards. 3.2 A suitable technique/tool is selected and modified as appropriate to identify hazards. 3.3 Hazard identification technique/tool(s) are reviewed in consultation with workers in the area, and OHS specialists if required, to ensure it is suitably comprehensive. 3.4 Technique/tool(s) and other appropriate <i>hazard identification procedures</i> are utilised to identify hazards. 3.5 Employees and their representatives have an opportunity to participate in workplace hazard identification.
4. Assess risk	4.1 A <i>risk assessment tool</i> is selected and used to identify key factors contributing to <i>risk</i> . 4.2 Workplace sources of information and data are applied to evaluate the effectiveness of risk controls. 4.3 Risks are prioritised considering the severity and likelihood of the consequences. 4.4 Stakeholders and key personnel are involved in risk assessment. 4.5 The method of risk assessment is documented.
5. Participate in implementation process	5.1 A <i>hazard register</i> is maintained relevant to the workplace. 5.2 The <i>level of authority</i> within the organisation to address the risk/s is identified. 5.3 Outcomes of hazard identification and risk assessments are documented and communicated to key personnel and stakeholders.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the essential skills and knowledge and their level, required for this unit.

Required skills:

Look for evidence that confirms skills in:

- relating to people from a range of social, cultural and ethnic backgrounds and physical and mental abilities
- communicating effectively with personnel at all levels of the organisation, OHS specialists and, as required, emergency service personnel
- managing own tasks within a time frame
- analysing relevant workplace information and data, making observations including of workplace tasks and interactions between people, their activities, equipment, environment and systems
- using basic computer and information technology skills to access internal and external information and data on OHS
- paying attention to detail when making observations and recording outcomes
- identifying and developing links between different activity areas in the workplace.

Required knowledge:

Look for evidence that confirms knowledge and understanding of:

- roles and responsibilities under OHS legislation of employees supervisors, contractors, designers, etc
- legislative requirements for OHS information and data and consultation
- requirements for record keeping that addresses OHS, privacy and other relevant legislation
- State/Territory/Commonwealth OHS legislation (Acts, regulations, codes of practice, associated standards and guidance material) including prescriptive and performance approaches and links to other relevant legislation such as industrial relations, equal employment opportunity, workers compensation, rehabilitation etc
- difference between hazard and risk
- risk as a measure of uncertainty and the factors that affect risk
- requirements under hazard specific OHS legislation and codes of practice
- basic principles of incident causation and injury processes
- characteristics, mode of action and units of measurement of major hazard types
- basic physiology relevant to understanding mode of action of physical, biological and chemical agents on the body and how they produce discomfort or harm
- hierarchy of control and considerations for choosing between different control measures, such as possible inadequacies of particular control measures
- types of hazard identification tools, including JSA
- limitations of generic hazard and risk checklists and risk ranking processes

REQUIRED SKILLS AND KNOWLEDGE

- principles and practices of systematic approaches to managing OHS
 - internal and external sources of OHS information and data
 - how the characteristics and composition of the workforce impact on risk and the systematic approach to managing OHS eg
 - labour market changes
 - structure and organisation of workforce - part-time, casual and contract workers, shift rosters, geographical location
 - language, literacy and numeracy
 - communication skills
 - cultural background/workplace diversity
 - gender
 - workers with special needs
 - knowledge of organisational OHS policies and procedures
 - nature of workplace processes (including work flow, planning and control) and hazards relevant to the particular workplace
 - key personnel, including identifying 'change agents', within workplace management structure
 - formal and informal communication and consultation processes and key personnel related to communication
 - language, literacy and cultural profile of the work group
- organisational culture as it impacts on the workgroup.

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the unit descriptor, performance criteria, The range statement and the Assessment Guidelines for the Public Sector Training Package.

Units to be assessed together	<p>Co-assessed units that may be assessed with this unit to increase the efficiency and realism of the assessment process include:</p> <ul style="list-style-type: none"> • PSPETHC401A Uphold and support the values and principles of public service • PSPGOV402B Deliver and monitor service to clients • PSPGOV406B Gather and analyse information • PSPGOV412A Use advanced workplace communication strategies • PSPGOV422A Apply government processes • PSPPOL404A Support policy implementation • PSPSOHS401A Contribute to the implementation of a systematic approach to managing OHS • PSPSOHS404A Contribute to the implementation of strategies to control OHS risk • PSPSOHS407A Ensure compliance with OHS and other relevant laws.
Overview of evidence requirements	<p>In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms:</p> <ul style="list-style-type: none"> • knowledge requirements of this unit • skill requirements of this unit • application of employability skills as they relate to this unit.

range of three or more contexts or occasions, over time.

Assessment methods should reflect but not exceed workplace demands, such as literacy, and the needs of individuals who might be disadvantaged.

Assessment methods suitable for valid and reliable assessment of this unit must use authenticated evidence from the workplace and/or training courses and may include a combination of two or more of:

- case studies and scenarios
- portfolios
- questioning
- simulation or role plays.

The assessment environment should not disadvantage the candidate and where the person has a disability the principle of reasonable adjustment should be applied during assessment.

For consistency of assessment

Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments.

Range Statement

RANGE STATEMENT

The range statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The range statement also provides a focus for assessment. It relates to the unit as a whole. Text in *italics* in the Performance criteria is explained here.

- Appropriate techniques may include***
- interviews
 - simulations
 - examination of relevant information and data
 - inspections
 - timeline of actions and events
 - use of accident models
- An incident is***
- an event resulting in or having a potential for injury, ill health, damage or loss
- Actions and events***
- include all actions and events that may have contributed to the occurrence or severity of the incident
 - may be extended back for a short time or up to several years to identify design decisions that contributed to the incident occurring
 - include facts about the incident itself including such things as systems, people, tools, equipment, materials, fixtures, the time and nature of the injury, etc
- A hazard is***
- a source or a situation with a potential for harm in terms of human injury or ill-health, damage to property, damage to the environment, or a combination of these
- Workplace sources of information and data may include***
- hazard, incident and investigation reports
 - workplace inspections
 - incident investigations
 - minutes of meetings
 - reports
 - audits
 - material safety data sheets (MSDSs) and registers
 - legislation, standards, manufacturers' manuals and specifications available at the workplace
- External sources of information and data may include***
- regulatory authorities (for other relevant legislation ie Acts, regulations, codes of practice)
 - other Australian standards
 - industry bodies
 - employer groups
 - unions

RANGE STATEMENT

- OHS specialists
 - OHS professional bodies
 - websites, journals and newsletters
 - other manufacturers' manuals and specifications
- Stakeholders may include*
- managers
 - supervisors
 - health and safety and other employee representatives
 - OHS committees
 - employees
 - the community
- Key personnel may include*
- managers from other areas
 - people involved in OHS decision making or who are impacted by decisions
- OHS specialists may be internal or external and include*
- ergonomists
 - occupational hygienists
 - health professionals
 - injury management advisors
- Techniques and tools may include*
- workplace processes such as 'walk throughs', surveys and inspections
 - interviews
 - hazard identification procedures based on checklists
 - material safety data sheets (MSDS)
 - body mapping
 - those that are:
 - scheduled or unscheduled
 - undertaken by individuals or small groups
 - internally or externally developed
 - customised to the particular industry and workplace
 - reviewed on an ongoing basis to ensure they allow for emerging issues
- Hazard identification procedures may include*
- job and work system analysis (JSA)
 - reviews of:
 - OHS records
 - hazard and incident reports
 - investigations
 - registers of hazardous substances and dangerous goods
 - plant and equipment maintenance records
 - identification of employee concerns, such as through a hazard reporting system
 - input of managers, OHS representatives, OHS committee and

RANGE STATEMENT

- Risk is*
- others through consultative processes
 - the chance of something occurring that will result in injury or damage
 - measured in terms of consequences (injury or damage) and likelihood of the consequence
- Risk assessment tools may include*
- checklists, matrix nomograms and other aids that may be included in codes of practice, standards, guidelines or other relevant documentation
- Hazard register includes*
- a list of hazards
 - their location
 - a range of possible scenarios or circumstances under which they may cause injury or damage
 - the results of the risk analysis related to the hazards
- Level of authority*
- is commensurate with the actions required to address the risk

Pre-Requisites

Not applicable.

Employability Skills Information

Employability skills This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements are the essential outcomes of the unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Where *italicised* text is used, further information is detailed in the required skills and knowledge and/or the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Develop options for risk control	<p>1.1 <i>Hazard registers</i>, outcomes of incident investigations and risk assessments are reviewed to identify <i>hazards</i> requiring control action.</p> <p>1.2 Knowledge of OHS legislation and standards is applied to develop a range of options to control specific <i>risks</i> in the workplace.</p> <p>1.3 The <i>hierarchy of control</i> is applied when developing risk control options.</p> <p>1.4 Input is sought from <i>stakeholders</i> and <i>key personnel</i>.</p> <p>1.5 Advice is sought from <i>OHS specialists</i> and <i>technical advisors</i> where required.</p>
2. Select appropriate options(s) to control risks and liability	<p>2.1 Outcomes of risk assessments are reviewed to inform the process of selecting options to control risks.</p> <p>2.2 Appropriate interventions when selecting risk controls are prioritised.</p> <p>2.3 Potential <i>factors that may limit effectiveness of controls</i> are identified.</p> <p>2.4 Workplace stakeholders are consulted and involved in selection of appropriate control options.</p> <p>2.5 Recommendations for risk control are communicated to stakeholders.</p>
3. Contribute to implementation of controls	<p>3.1 Appropriate authority and relevant resources to implement controls are sought.</p> <p>3.2 <i>Actions required to achieve change</i> are identified and documented.</p> <p>3.3 Workplace stakeholders are consulted and involved in implementation of change.</p> <p>3.4 Advice is provided on the fitting, use, maintenance and storage of <i>personal protective equipment</i>.</p>
4. Contribute to monitoring and evaluation of effectiveness of controls	<p>4.1 Extent of change as a consequence of new controls is monitored and evaluated in consultation with stakeholders.</p> <p>4.2 Compliance with new procedures is monitored and documented.</p> <p>4.3 <i>Workplace sources of information and data</i> are accessed to evaluate effectiveness of risk controls and to check for new hazards introduced as a result of controls.</p> <p>4.4 Areas for further improvement are identified in consultation with stakeholders and actioned as appropriate.</p> <p>4.5 An improvement plan is developed and documented.</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the essential skills and knowledge and their level, required for this unit.

Required skills:

Look for evidence that confirms skills in:

- relating to people from a range of social, cultural and ethnic backgrounds and physical and mental abilities
- communicating effectively with personnel at all levels of the organisation, OHS specialists and, as required, emergency service personnel
- preparing reports for a range of target groups including OHS committee, OHS representatives, managers and supervisors
- managing own tasks within a time frame
- using consultation and negotiation skills, particularly in relation to developing plans and implementing and monitoring designated actions
- contributing to the assessment of resources needed to systematically manage OHS and where appropriate, accessing resources
- analysing relevant workplace information and data, making observations including of workplace tasks and interactions between people, their activities, equipment, environment and systems
- using basic computer and information technology skills to access internal and external information and data on OHS
- identifying and developing links between different activity areas in the workplace.

Required knowledge:

Look for evidence that confirms knowledge and understanding of:

- roles and responsibilities under OHS legislation of employees supervisors, contractors, designers, etc
- legislative requirements for OHS information and data and consultation
- requirements for record keeping that addresses OHS, privacy and other relevant legislation
- State/Territory/Commonwealth OHS legislation (Acts, regulations, codes of practice, associated standards and guidance material) including prescriptive and performance approaches and links to other relevant legislation such as industrial relations, equal employment opportunity, workers compensation, rehabilitation etc
- difference between hazard and risk
- risk as a measure of uncertainty and the factors that affect risk
- requirements under hazard specific OHS legislation and codes of practice
- basic principles of incident causation and injury processes
- characteristics, mode of action and units of measurement of major hazard types
- hierarchy of control and considerations for choosing between different control measures, such as possible inadequacies of particular control measures
- standard industry controls for a range of hazards

REQUIRED SKILLS AND KNOWLEDGE

- requirements for individual fitting, use, maintenance and storage of a range of PPE items
 - limitations of generic hazard and risk checklists and risk ranking processes
 - principles and practices of systematic approaches to managing OHS
 - internal and external sources of OHS information and data
 - how the characteristics and composition of the workforce impact on risk and the systematic approach to managing OHS eg
 - labour market changes
 - structure and organisation of workforce - part-time, casual and contract workers, shift rosters, geographical location
 - language, literacy and numeracy
 - communication skills
 - cultural background/workplace diversity
 - gender
 - workers with special needs
 - knowledge of organisational OHS policies and procedures
 - nature of workplace processes (including work flow, planning and control) and hazards relevant to the particular workplace
 - key personnel, including identifying 'change agents', within workplace management structure
 - formal and informal communication and consultation processes and key personnel related to communication
 - language, literacy and cultural profile of the work group
- organisational culture as it impacts on the workgroup.

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the unit descriptor, performance criteria, The range statement and the Assessment Guidelines for the Public Sector Training Package.

Units to be assessed together

Co-assessed units that may be assessed with this unit to increase the efficiency and realism of the assessment process include:

- PSPETHC401A Uphold and support the values and principles of public service
- PSPGOV402B Deliver and monitor service to clients
- PSPGOV406B Gather and analyse information
- PSPGOV412A Use advanced workplace communication strategies
- PSPGOV422A Apply government processes
- PSPPOL404A Support policy implementation
- PSPSOHS401A Contribute to the implementation of a systematic approach to managing OHS
- PSPSOHS403A Identify hazards and assess OHS risks
- PSPSOHS407A Ensure compliance with OHS and other relevant laws.

Overview of evidence requirements

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms:

- knowledge requirements of this unit
- skill requirements of this unit
- application of employability skills as they relate to this unit.

The assessment environment should not disadvantage the candidate and where the person has a disability the principle of reasonable adjustment should be applied during assessment.

These resources include:

Resources required to carry out assessment

- legislation, policy, procedures and protocols relating to the implementation of strategies to control OHS risk
- case studies and workplace scenarios to capture the range of situations likely to be encountered when contributing to the implementation of strategies to control OHS risk.

Where and how to assess evidence

Valid assessment of this unit requires:

- a workplace environment or one that closely resembles normal work practice and replicates the range of conditions likely to be encountered when contributing to the implementation of strategies to control OHS risk, including coping with

EVIDENCE GUIDE

difficulties, irregularities and breakdowns in routine

- contribution to the implementation of strategies to control OHS risk in a range of three or more contexts or occasions, over time.

Assessment methods should reflect but not exceed workplace demands, such as literacy, and the needs of individuals who might be disadvantaged.

Assessment methods suitable for valid and reliable assessment of this unit must use authenticated evidence from the workplace and/or training courses and may include a combination of two or more of:

- workplace projects
- simulation or role plays
- case studies and scenarios
- portfolios.

The assessment environment should not disadvantage the candidate and where the person has a disability the principle of reasonable adjustment should be applied during assessment.

For consistency of assessment

Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments.

Range Statement

RANGE STATEMENT

The range statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The range statement also provides a focus for assessment. It relates to the unit as a whole. Text in *italics* in the Performance criteria is explained here.

- Hazard register includes***
- a list of hazards
 - their location
 - a range of possible scenarios or circumstances under which they may cause injury or damage
 - the results of the risk analysis related to the hazards
- A hazard is***
- a source or a situation with a potential for harm in terms of human injury or ill-health, damage to property, damage to the environment, or a combination of these
- Risk is***
- the chance of something occurring that will result in injury or damage
 - measured in terms of consequences (injury or damage) and likelihood of the consequence
- Hierarchy of control means developing risk controls within the following priority order***
- eliminate hazards
 - and where this is not practicable, minimise risk by:
 - substitution
 - isolating hazard from personnel
 - using engineering controls
 - using administrative controls (eg procedures, training)
 - using personal protective equipment (PPE)
- Stakeholders may include***
- managers
 - supervisors
 - health and safety and other employee representatives
 - OHS committees
 - employees
- Key personnel may include***
- managers from other areas
 - people involved in OHS decision making or who are impacted by decisions
- OHS specialists may be internal or external and may include***
- ergonomists
 - occupational hygienists
 - health professionals
 - injury management advisors
- Technical advisors may***
- engineers (design, acoustic, safety, mechanical, civil)
 - legal practitioners

RANGE STATEMENT

include

- workplace trainers and assessors
- maintenance and trades people

Factors that may limit effectiveness of controls may include

- language
- shift work and rostering arrangements
- literacy and numeracy
- workplace organisational structures (eg geographic, hierarchical)
- cultural diversity
- training required
- workplace culture related to OHS, including commitment by managers and supervisors and compliance with procedures and training

Actions required to achieve change may include

- development of new procedures or revision of existing procedures
- purchase of equipment or modification of equipment
- training

Personal protective equipment is

- equipment designed to be worn by a person to provide protection from hazards, and may include:
- head protection
- face and eye protection
- respiratory protection
- hearing protection
- hand protection
- clothing and footwear

Workplace sources of information and data may include

- hazard and incident reports
- workplace inspections
- incident investigations
- minutes of meetings
- reports
- audits
- material safety data sheets (MSDSs) and registers
- OHS legislation
- Australian standards
- manufacturers' manuals and specifications

Unit Sector(s)

Not applicable.

Competency field

Competency field Specialist Occupational Health&Safety

PSPSOHS405A Contribute to the implementation of emergency procedures

Modification History

Not applicable.

Unit Descriptor

Unit descriptor

This unit covers the knowledge, processes and techniques necessary to contribute to the implementation of procedures for responding to emergencies.

In practice, contributing to the implementation of emergency procedures may overlap with other generalist or specialist public sector work activities such as acting ethically, using communication strategies, gathering and analysing information, delivering client services, supporting policy implementation, etc..

Application of the Unit

Application of the unit

This unit applies to individuals with supervisory responsibilities for managing OHS in the workplace who contribute to the procedures for responding to emergencies. This unit assumes that expert advice will be available in identifying potential emergencies and in formulating the response plans.

As the unit focuses on implementation of procedures already developed for short term emergency responses, it is less complex than PSPSOHS508A Participate in the investigation of incidents,, which has greater scope both in situations addressed and the timeframe for action.

Contributions to the actions to control OHS risks are covered in PSPSOHS404A Contribute to the implementation of strategies to control OHS risk.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

Employability skills This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements are the essential outcomes of the unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Where *italicised* text is used, further information is detailed in the required skills and knowledge and/or the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Identify potential emergencies	1.1 A knowledge of OHS <i>hazards</i> and <i>standards</i> is applied to identify causes of potential <i>emergencies</i> . 1.2 Input of <i>stakeholders</i> is sought in identifying potential emergencies. 1.3 Appropriate <i>specialist advisors</i> and <i>emergency agencies</i> are identified and liaised with to identify causes of potential emergencies. 1.4 A <i>risk register</i> is developed to identify potential emergencies and their causes.
2. Identify options for initial response	2.1 Major types of emergencies are categorised. 2.2 Actions required to contain or limit potential emergencies are identified. 2.3 Actions required to limit effect on personnel, property and the environment are identified. 2.4 Requirements for liaison with emergency agencies are identified. 2.5 Actions to be taken during emergencies are prioritised.
3. Plan initial response procedures	3.1 <i>Resources</i> available and required for immediate response are identified. 3.2 <i>Emergency equipment</i> is checked to ensure serviceability, accessibility, cleanliness and correct location. 3.3 Actions required for a number of major types of emergency are documented, taking account of standards, current industry practice, specialist advice and input by emergency agencies. 3.4 Training needs and appropriate providers are identified.
4. Implement initial response procedures	4.1 Actions for initial response are documented and displayed. 4.2 Own role in emergency response is known and implemented.
5. Contribute to post event activities	5.1 Other personnel in <i>second response phase</i> are identified and supported. 5.2 Contributions are made to debriefing processes, specialist advice and input by emergency agencies.
6. Monitor emergency response and address deficiencies	6.1 Responses to emergencies are monitored for efficiency and timeliness in consultation with stakeholders and, as appropriate, specialist advisors and agencies. 6.2 Results of monitoring are documented and promptly and appropriately reported to managers and key personnel.

ELEMENT

PERFORMANCE CRITERIA

6.3 Areas for improvement in response are identified and recommendations made for improvement.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the essential skills and knowledge and their level, required for this unit.

Required skills:

Look for evidence that confirms skills in:

- relating to people from a range of social, cultural and ethnic backgrounds and physical and mental abilities
- communicating effectively with personnel at all levels of the organisation, OHS specialists and, as required, emergency service personnel
- managing own tasks within a time frame
- analysing relevant workplace information and data, making observations including of workplace tasks and interactions between people, their activities, equipment, environment and systems
- using basic computer and information technology skills to access internal and external information and data on OHS
- issuing instructions in an authoritative manner during unusual circumstances.

Required knowledge:

Look for evidence that confirms knowledge and understanding of:

- State/Territory/Commonwealth OHS legislation (Acts, regulations, codes of practice, associated standards and guidance material) including prescriptive and performance approaches and links to other relevant legislation such as industrial relations, equal employment opportunity, workers compensation, rehabilitation etc
- internal and external sources of OHS information and data
- how the characteristics and composition of the workforce impact on risk and the systematic approach to managing OHS eg
- labour market changes
- structure and organisation of workforce - part-time, casual and contract workers, shift rosters, geographical location
- language, literacy and numeracy
- communication skills
- cultural background/workplace diversity
- gender
- workers with special needs
- the role, responsibility and authority of emergency response personnel
- the principles of building compartmentation including identification and role of smoke and fire doors
- emergency alerting systems, signals and instructions typically used in workplaces
- emergency response processes typically used in workplaces, including roles and responsibilities

REQUIRED SKILLS AND KNOWLEDGE

- priorities and limitations of workplace response to emergencies
- hazards and precautions during an emergency, including during an evacuation
- situations when evacuation is required and when evacuation is inappropriate, including circumstances where evacuation processes may need to be modified
- principles and priorities for evacuation, including checking and accounting procedures
- circumstances or actions that may block, damage or inhibit function or use of emergency equipment
- information needs of emergency response agencies at the time of reporting an emergency, arrival of response and during management of emergency
- method of use, including hazards and limitations, of relevant emergency equipment, including communication equipment
- principles of effective liaison with emergency service personnel including ensuring that there is no interference or hindrance to their action
- knowledge of organisational OHS policies and procedures
- nature of workplace processes (including work flow, planning and control) and hazards relevant to the particular workplace
- key personnel, including identifying 'change agents', within workplace management structure
- formal and informal communication and consultation processes and key personnel related to communication
- language, literacy and cultural profile of the work group
- organisational emergency procedures, including various roles of the workplace emergency personnel
- essential actions of self/other key personnel in emergency
- location of emergency procedures, equipment and evacuation assembly areas.

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the unit descriptor, performance criteria, The range statement and the Assessment Guidelines for the Public Sector Training Package.

Units to be assessed together Co-assessed units that may be assessed with this unit to increase the efficiency and realism of the assessment process include:

- PSPETHC401A Uphold and support the values and principles of public service
- PSPGOV402B Deliver and monitor service to clients
- PSPGOV406B Gather and analyse information
- PSPGOV412A Use advanced workplace communication strategies
- PSPGOV422A Apply government processes
- PSPPOL404A Support policy implementation
- PSPSOHS401A Contribute to the implementation of a systematic approach to managing OHS
- PSPSOHS407A Ensure compliance with OHS and other relevant laws.

Overview of evidence requirements In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms:

- knowledge requirements of this unit
- skill requirements of this unit
- application of employability skills as they relate to this unit.

The assessment environment should not disadvantage the candidate and where the person has a disability the principle of reasonable adjustment should be applied during assessment.

Resources required to carry out assessment These resources include:

- legislation, policy, procedures and protocols relating to the implementation of emergency procedures
- case studies and workplace scenarios to capture the range of situations likely to be encountered when contributing to the implementation of emergency procedures.

Where and how to assess evidence Valid assessment of this unit requires:

- a workplace environment or one that closely resembles normal work practice and replicates the range of conditions likely to be encountered when contributing to the implementation of emergency procedures, including coping with difficulties, irregularities and breakdowns in routine

EVIDENCE GUIDE

- contribution to the implementation of emergency procedures in a range of three or more contexts or occasions, over time.

Assessment methods should reflect but not exceed workplace demands, such as literacy, and the needs of individuals who might be disadvantaged.

Assessment methods suitable for valid and reliable assessment of this unit must use authenticated evidence from the workplace and/or training courses and may include a combination of two or more of:

- workplace projects
- simulation or role plays
- case studies and scenarios
- observation
- portfolios.

The assessment environment should not disadvantage the candidate and where the person has a disability the principle of reasonable adjustment should be applied during assessment.

For consistency of assessment

Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments.

Range Statement

RANGE STATEMENT

The range statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The range statement also provides a focus for assessment. It relates to the unit as a whole. Text in *italics* in the Performance criteria is explained here.

- A hazard is*
 - a source or a situation with a potential for harm in terms of human injury or ill-health, damage to property, damage to the environment, or a combination of these
- Standards may include*
 - international, Australian and industry-specific standards
- Emergencies may include*
 - serious injury events
 - emergencies requiring evacuation
 - fires and explosions
 - hazardous substance and chemical spills
 - explosion and bomb alerts
 - security emergencies, such as armed robberies, intruders and disturbed persons
 - internal emergencies, such as loss of power or water supply and structural collapse
 - external emergencies and natural disasters, such as flood, storm and traffic accident impacting on the organisation
- Stakeholders may include*
 - managers
 - supervisors
 - health and safety and other employee representatives
 - OHS committee
 - employees
 - the community
- Specialist advisors may include*
 - internal or external advisors in safety, chemicals, engineering, security and emergency response
- Emergency agencies may include*
 - fire, police, ambulance, government departments, hazardous materials response teams (Hazmat) and OHS authorities
- A risk register contains*
 - list of hazards
 - their location
 - a range of possible scenarios or circumstances under which an emergency could occur, including natural disasters
 - the outcomes of any risk assessment or risk ranking
- Resources may include*
 - emergency response personnel and equipment
 - first aid personnel and equipment

RANGE STATEMENT

Emergency equipment may include

- emergency services personnel
- fire extinguishers and equipment
- communication equipment
- evacuation alarms
- evacuation equipment, especially that for disabled persons
- torches
- clothing items such as coloured hats and vests

Second response phase is after the emergency service(s) attend and may include

- first aid
- containment of personnel in evacuation area
- support/counselling of personnel involved or affected
- actions required if building cannot be re-occupied

Unit Sector(s)

Competency field

Competency field Specialist Occupational Health&Safety

PSPSOHS406A Use equipment to conduct workplace monitoring

Modification History

Not applicable.

Unit Descriptor

Unit descriptor

This unit covers use of equipment to contribute to the monitoring of agents and/or conditions in the workplace including, but not limited to noise, vibration, light, fibres, dusts, fumes, mists, heat and humidity, radiation, and biological agents such as insects, mites and bacteria.

The unit focuses on the knowledge, processes and techniques necessary to accurately use a range of measuring devices to contribute to the monitoring of agents and/or conditions in the workplace as an integral part of identifying hazards, assessing risk and monitoring the effectiveness of controls.

In practice, using equipment to conduct workplace monitoring may overlap with other generalist or specialist public sector work activities such as acting ethically, using communication strategies, gathering and analysing information, using resources, supporting policy implementation, etc.

Application of the Unit

Application of the unit

This unit applies to individuals who contribute to the monitoring of agents and/or conditions in the workplace by using a range of measuring devices to identify hazards, assess risk and monitor the effectiveness of risk controls.

Measurement of ergonomic factors and their impact on the human body has been excluded from this unit. This unit does not extend to interpreting results and developing control measures based on the outcomes of the monitoring as this is addressed in PSPSOHS404A. Contribute to the implementation of strategies to control OHS risk.

Licensing/Regulatory Information

Elements and Performance Criteria Pre-Content

Elements are the essential outcomes of the unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Where *italicised* text is used, further information is detailed in the required skills and knowledge and/or the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Select measuring device/s	1.1 <i>Agent and/or condition</i> to be measured is identified through consultation with workplace and affected parties. 1.2 <i>Characteristics</i> of agent and/or condition are identified. 1.3 Area where measurements are to be taken are <i>defined</i> . 1.4 Types of appropriate measuring equipment are identified. 1.5 Measuring equipment appropriate to the agent and/or condition, the environment, the activities being carried out and level of risk is selected. 1.6 Limits of own expertise and available equipment are recognised and expert advice and equipment sought as appropriate.
2. Prepare to collect workplace information and data	2.1 Any <i>regulatory requirements and/or standards</i> that impact on the measuring process are identified. 2.2 A <i>sampling process</i> is defined. 2.3 Arrangements are made with the workplace to collect <i>information and data</i> including advising those involved in workplace activities of any requirements. 2.4 Sampling plan is defined after inspecting area and in consultation with employees and affected parties regarding the nature of the problem. 2.5 <i>Operability of equipment</i> is checked.
3. Use devices to collect workplace information and data	3.1 Monitoring equipment is selected and calibrated, and appropriate scale selected. 3.2 Equipment is used and maintained correctly to accurately collect information and data. 3.3 Own OHS is addressed while collecting information and data. 3.4 Information and data is collected and readings recorded, utilising professional evaluation and advice as appropriate. 3.5 Equipment is dismantled, cleaned and parts or equipment disposed of in accordance with environmental requirements. 3.6 Equipment is stored correctly or made ready for re-use as appropriate.
4. Document and evaluate results of monitoring	4.1 Results are interpreted and evaluated against a recognised standard, and documented. 4.2 Report addresses any regulatory requirements and considers <i>purpose of report</i> and the <i>target audience</i> . 4.3 <i>Required information and data</i> is presented clearly and logically. 4.4 Results and records are retained and stored in a format that enables them to be readily retrieved in accordance with

ELEMENT

PERFORMANCE CRITERIA

regulatory requirements and/or standards.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the essential skills and knowledge and their level, required for this unit.

Required skills:

Look for evidence that confirms skills in:

- preparing reports for a range of target groups including OHS committee, OHS representatives, managers and supervisors
- managing own tasks within a time frame
- contributing to the assessment of the resources needed to systematically manage OHS and where appropriate access resources
- analysing relevant workplace information and data, making observations including of workplace tasks and interactions between people, their activities, equipment, environment and systems
- carrying out simple arithmetical calculations (eg % change) produce graphs of workplace data to identify trends and recognise limitations of data
- using language and literacy skills appropriate to the workgroup and the task
- using basic computer and information technology skills to access internal and external information and data on OHS
- using basic measuring equipment, including reading scales and dials applicable to selected hazards
- interpreting results from workplace measurements
- maintaining equipment used for workplace monitoring.

Required knowledge:

Look for evidence that confirms knowledge and understanding of:

- requirements for recordkeeping that addresses OHS, privacy and other relevant legislation
- requirements for reporting under OHS and other relevant legislation including obligations for notification and reporting of incidents
- State/Territory/Commonwealth OHS legislation (Acts, regulations, codes of practice, associated standards and guidance material) including prescriptive and performance approaches and links to other relevant legislation such as industrial relations, equal employment opportunity, workers compensation, rehabilitation etc
- requirements under hazard specific OHS legislation and codes of practice
- characteristics, mode of action and units of measurement of major hazard types
- basic physiology relevant to understanding mode of action of physical, biological and chemical agents on the body and how they produce discomfort or harm
- requirements for individual fitting, use, maintenance and storage of a range of PPE items
- environmental conditions that impact measurements
- sampling techniques and developing valid sampling process

REQUIRED SKILLS AND KNOWLEDGE

- mathematical knowledge of units of measurement, logarithmic scales, decimals and order of magnitude relevant to making and interpreting measurements and measurement error
- nature of workplace processes (including work flow, planning and control) and hazards relevant to the particular workplace
- exposure standards, their limitations and their practical use
- types of and techniques for correct use of intrinsically safe measuring and monitoring equipment including calibration, adjustment and maintenance, alarms and limitations on use and output
- requirements for work permits/written authorities when conducting workplace monitoring activities.

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the unit descriptor, performance criteria, The range statement and the Assessment Guidelines for the Public Sector Training Package.

Units to be assessed together Co-assessed units that may be assessed with this unit to increase the efficiency and realism of the assessment process include:

- PSPETHC401A Uphold and support the values and principles of public service
- PSPGOV402B Deliver and monitor service to clients
- PSPGOV406B Gather and analyse information
- PSPGOV412A Use advanced workplace communication strategies
- PSPGOV422A Apply government processes
- PSPPOL404A Support policy implementation
- PSPSOHS401A Contribute to the implementation of a systematic approach to managing OHS
- PSPSOHS404A Contribute to the implementation of strategies to control OHS risk
- PSPSOHS407A Ensure compliance with OHS and other relevant laws.

Overview of evidence requirements In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms:

- knowledge requirements of this unit
- skill requirements of this unit
- application of employability skills as they relate to this unit.

The assessment environment should not disadvantage the candidate and where the person has a disability the principle of reasonable adjustment should be applied during assessment.

Resources required to carry out assessment These resources include:

- legislation, policy, procedures and protocols relating to the use of equipment to conduct workplace monitoring
- monitoring equipment
- case studies and workplace scenarios to capture the range of situations likely to be encountered when using equipment to conduct workplace monitoring.

Where and how to assess evidence Valid assessment of this unit requires:

- a workplace environment or one that closely resembles normal work practice and replicates the range of conditions likely to be

EVIDENCE GUIDE

encountered when using equipment to conduct workplace monitoring, including coping with difficulties, irregularities and breakdowns in routine

- use of equipment to conduct workplace monitoring in a range of 3 or more contexts or occasions, over time ie use of equipment appropriate to monitoring for at least three different agents and/or conditions in the workplace such as noise, vibration, light, fibres, dusts, fumes, mists, heat and humidity, radiation, and biological agents such as insects, mites and bacteria.

Assessment methods should reflect but not exceed workplace demands, such as literacy, and the needs of individuals who might be disadvantaged.

Assessment methods suitable for valid and reliable assessment of this unit must use authenticated evidence from the workplace and/or training courses and may include a combination of two or more of:

- workplace projects
- simulation or role plays
- case studies and scenarios
- observation
- portfolios.

The assessment environment should not disadvantage the candidate and where the person has a disability the principle of reasonable adjustment should be applied during assessment.

For consistency of assessment

Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments.

Range Statement

RANGE STATEMENT

The range statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The range statement also provides a focus for assessment. It relates to the unit as a whole. Text in *italics* in the Performance criteria is explained here.

The agent and/or condition is

- the real or potential hazard to be monitored and may include, but not be limited to:
- noise
- vibration
- light
- radiation (ionising, non-ionising, laser)
- fibres, dusts, particulates
- fumes, mists, gases, vapours
- heat and humidity
- electricity
- biological agents such as insects, mites and bacteria

Characteristics of the agent and/or condition may include

- the way it behaves in the environment, including over distance and time
- how it is absorbed into the body
- how it affects specific parts of the body, such as extent of damage to tissue and/or effects such as additive, antagonistic, synergism and potentiation
- dose factors relating to concentration and time
- location

Definition of the area where measurements are to be collected includes

- physical features of equipment, such as emitting sources
- area/space available
- tasks/activities being undertaken
- number of persons occupying area
- movements of people and equipment
- other factors that may impact on the sampling or data collection processes

Regulatory requirements and/or standards may include

- state/territory/Commonwealth OHS legislation, regulations and codes of practice, including those relating to specific hazards
- exposure standards for atmospheric contaminants in occupational environments
- material safety data sheets (MSDSs)
- guidance material such as guidance notes, guides, fact sheets, model regulations and technical reports that provide practical guidance and direction for hazard control

RANGE STATEMENT

- Australian and international standards, such as those produced by Standards Australia and National Occupational Health and Safety Commission (NOHSC)
 - biological exposure indices
- A sampling process includes consideration of some or all of the following*
- size of the workforce (ie individual worker or group(s) of workers)
 - the process, substance or hazard event likely to be causing the ill health or symptoms
 - the type of exposure
 - other practical and financial considerations
- Information and data collected should include*
- readouts/measurements taken
 - sampling method (eg grab, longitudinal, continuous)
 - locations where information and data was collected
 - date, time and duration of collection
 - specifications of equipment used
 - conditions such as activities and number of people present when measurements were made
- Operability of equipment checks include*
- battery serviceability checks
 - availability of appropriate attachments, leads, filters etc
 - check and function tests
 - NATA tested and certified, with certificate of currency as appropriate
- Purpose of report may include*
- legal compliance
 - hazard identification
 - risk assessment
 - as a basis for design of improved and/or new control measures
- Target audience may include*
- OHS or environmental regulatory bodies
 - management
 - OHS committee or OHS representatives
 - OHS professionals
 - designers and engineers
- Required information and data may include*
- agent/condition being monitored and key issues associated with the agent/condition
 - target audience for report
 - where, when and why measurements were taken
 - sampling process:
 - how measurements were taken
 - specifications of equipment used
 - locations where samples were taken
 - conditions at time of sampling, including whether the sampling period represented normal operating conditions

RANGE STATEMENT

- table of results
- interpretation and discussion of results
- evaluation of results with reference to appropriate standards

Unit Sector(s)

Competency field

Competency field Specialist Occupational Health&Safety

PSPSOHS501A Participate in the coordination and maintenance of a systematic approach to managing OHS

Modification History

Not applicable.

Unit Descriptor

Unit descriptor

This unit covers the actions necessary to participate in the coordination and maintenance of the OHS program, taking account of the responsibilities for managing OHS.

It includes strategies, policies and procedures necessary to systematically manage OHS and its evaluation to ensure that the workplace is, as far as practicable, safe and without risks to the health of employees and others.

In practice, participation in the coordination and maintenance of a systematic approach to managing OHS may overlap with other generalist or specialist public sector work activities such as promoting ethical practice, using complex communication strategies, undertaking research and analysis, coordinating resource usage, promoting compliance with legislation, etc.

Application of the Unit

Application of the unit

This unit applies to individuals with managerial responsibility for coordinating and maintaining an OHS program. It involves identifying the need for change, planning and implementing strategies, integrating OHS within other functional areas, and some evaluation of the OHS management function.

The unit may be undertaken in the context of an OHS management system (OHSMS) or other systematic approaches to managing OHS.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

Employability skills This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements are the essential outcomes of the unit of competency. Performance criteria describe the required performance needed to demonstrate achievement of the element. Where *italicised* text is used, further information is detailed in the required skills and knowledge and/or the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Contribute to the strategic planning process	<p>1.1 Steps are taken to ensure that managers at all levels are aware of their OHS responsibilities and the role of OHS in the overall management approach.</p> <p>1.2 OHS needs and priorities are determined in consultation with relevant managers and other workplace <i>stakeholders</i> and <i>key personnel</i>.</p> <p>1.3 Recommendations are made for inclusion of OHS performance (including <i>positive performance indicators</i>) in the organisation's business plan.</p>
2. Participate in the development of an OHS plan	<p>2.1 Potential <i>motivators</i> amongst stakeholders together with potential <i>barriers to the implementation of a systematic approach to managing OHS</i> are identified.</p> <p>2.2 An <i>OHS plan</i> is developed, in consultation with workplace stakeholders, based on agreed priorities and with measurable outcomes.</p> <p>2.3 <i>Resources</i> required for implementation of the OHS plan are identified.</p> <p>2.4 Action plans with relevant responsibilities and time lines are developed.</p> <p>2.5 Action plans are communicated to key personnel.</p>
3. Support the implementation of the systematic approach to managing OHS	<p>3.1 Knowledge of OHS management and OHS disciplines is applied, in consultation with stakeholders, <i>OHSspecialists</i> and <i>technical advisors</i>, to the development of <i>policies and procedures</i>.</p> <p>3.2 Support is provided to managers to meet OHS responsibilities and for the implementation of action plans.</p> <p>3.3 Strategies are developed to effectively integrate OHS within <i>other functional areas and management systems</i> that impact on the management of OHS.</p> <p>3.4 OHS training needs are identified and recommendations for delivery formulated.</p>
4. Provide advice to key personnel and stakeholders	<p>4.1 Objective advice is provided in an <i>ethical</i> and non-discriminating manner.</p> <p>4.2 Situations are identified where OHS specialists may be required.</p>
5. Participate in monitoring OHS	<p>5.1 Implications for the management of OHS and <i>proposed changes to the workplace</i> are identified in consultation with stakeholders.</p> <p>5.2 Implications for the management of OHS, <i>external changes</i> and changes to available information and data are identified in</p>

ELEMENT

PERFORMANCE CRITERIA

- consultation with stakeholders.
- 5.3 *Sources of workplace information and data* are accessed as part of regular monitoring of OHS.
- 5.4 Achievement against action plans is monitored and plans updated as appropriate.
- 5.5 Action is taken to update systematic approaches to managing OHS, taking into account proposed changes.
6. **Participate in reviewing the management of OHS**
- 6.1 The effectiveness of systematic approaches to managing OHS is reviewed regularly.
- 6.2 Frequency, method and scope of review is determined in consultation with stakeholders.
- 6.3 Stakeholders have input to the review.
- 6.4 Targets for improvement in the management of OHS are identified and recommendations made for improvement.
- 6.5 Improvement strategies arising from the review are communicated to appropriate levels of authority through planning, documentation and implementation.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the essential skills and knowledge and their level, required for this unit.

Required skills:

Look for evidence that confirms skills in:

- relating to people from a range of social, cultural and ethnic backgrounds and physical and mental abilities
- communicating effectively with personnel at all levels of organisation and OHS specialists and, as required, emergency service personnel
- preparing more detailed reports for a range of target groups including OHS committee, OHS representatives, managers and supervisors
- applying continuous improvement and action planning processes
- contributing to the strategic OHS performance of the organisation
- employing project management skills to achieve change
- managing own tasks within time frame
- using consultation and negotiation skills, particularly in relation to developing plans and implementing and monitoring designated actions
- contributing to the assessment of the resources needed to systematically manage OHS and, where appropriate, access resources
- analysing relevant workplace information and data, and make observations including of workplace tasks and interactions between people, their activities, equipment, environment and systems
- carrying out simple arithmetical calculations (eg % change), and produce graphs of workplace information and data to identify trends and recognise limitations
- interpreting information and data to identify areas for improvement
- conducting effective formal and informal meetings
- using basic computer and information technology skills to access internal and external information and data on OHS.

Required knowledge:

Look for evidence that confirms knowledge and understanding of:

- roles and responsibilities under OHS legislation of employees, including supervisors and contractors
- legislative requirements for OHS information and data, and consultation
- roles and responsibilities in relation to communication and consultation for OHS committees, OHS representatives, line management, employees and inspectors
- requirements for recordkeeping that addresses OHS, privacy and other legislation
- state/territory/Commonwealth OHS legislation (Acts, regulations, codes of practice, associated standards and guidance material) including prescriptive and performance approaches and links to other relevant legislation such as industrial relations, equal employment opportunity, workers compensation, rehabilitation etc
- structure and forms of legislation including regulations, codes of practice, associated

REQUIRED SKILLS AND KNOWLEDGE

- standards and guidance material
- difference between common law and statutory law
- concept of common law duty of care
- facilitation of the use of tools such as positive performance indicators (PPIs) in assessment of OHS performance
- nature of information and data that provides valid and reliable results on performance of OHS management processes (including positive indicators, such as number of safety audits conducted)
- requirements for reporting under OHS and other relevant legislation including notification and reporting of incidents
- hierarchy of control and considerations for choosing between different control measures, such as possible inadequacies of particular control measures
- principles and practices of systematic approaches to managing OHS
- other function areas that impact on the management of OHS
- auditing methods and techniques
- how the characteristics and composition of the workforce impact on risk and the systematic approach to managing OHS eg
 - labour market changes
 - structure and organisation of workforce eg part-time, casual and contract workers, shift rosters, geographical location
 - language, literacy and numeracy
 - communication skills
 - cultural background/workplace diversity
 - gender
 - workers with special needs
- basic knowledge of organisational behaviour and culture as it impacts on OHS and on change
- ethics related to professional practice
- professional liability in relation to providing advice
- knowledge of organisational OHS policies and procedures
- nature of workplace processes (including work flow, planning and control) and hazards relevant to the particular workplace
- key personnel, including identifying 'change agents', within workplace management structure
- formal and informal communication and consultation processes and key personnel related to communication
- language, literacy and cultural profile of the workgroup
- organisational culture as it impacts on the workgroup.

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the unit descriptor, performance criteria, The range statement and the Assessment Guidelines for the Public Sector Training Package.

Units to be assessed together

Co-assessed units that may be assessed with this unit to increase the efficiency and realism of the assessment process include:

- PSPETHC501B Promote the values and ethos of public service
- PSPGOV512A Use complex workplace communication strategies
- PSPLEGN501B Promote compliance with legislation in the public sector
- PSPSOHS502A Participate in the management of the OHS information and data systems
- PSPSOHS503A Assist in the design and development of OHS participative arrangements.

Overview of evidence requirements

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms:

- knowledge requirements of this unit
- skill requirements of this unit
- application of employability skills as they relate to this unit.

The assessment environment should not disadvantage the candidate and where the person has a disability the principle of reasonable adjustment should be applied during assessment.

Resources required to carry out assessment

These resources include:

- legislation, policy, procedures and protocols relating to the coordination and maintenance of a systematic approach to managing OHS
- workplace documentation, case studies and workplace scenarios to capture the range of situations likely to be encountered when participating in the coordination and maintenance of a systematic approach to managing OHS.

Valid assessment of this unit requires:

Where and how to assess evidence

- a workplace environment or one that closely resembles normal work practice and replicates the range of conditions likely to be encountered when participating in the coordination and maintenance of a systematic approach to managing OHS, including coping with difficulties, irregularities and breakdowns in routine

EVIDENCE GUIDE

- participation in the coordination and maintenance of a systematic approach to managing OHS in a range of three or more contexts or occasions, over time.

Assessment methods should reflect but not exceed workplace demands, such as literacy, and the needs of individuals who might be disadvantaged.

Assessment methods suitable for valid and reliable assessment of this unit must use authenticated evidence from the workplace and/or training courses and may include a combination of two or more of:

- workplace projects
- simulation or role plays
- case studies and scenarios
- observation
- portfolios.

The assessment environment should not disadvantage the candidate and where the person has a disability the principle of reasonable adjustment should be applied during assessment.

For consistency of assessment

Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments.

Range Statement

RANGE STATEMENT

The range statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The range statement also provides a focus for assessment. It relates to the unit as a whole. Text in *italics* in the Performance criteria is explained here.

- Stakeholders may include***
- managers
 - supervisors
 - health and safety and other employee representatives
 - employees
 - OHS committees
- Key personnel may include***
- managers from other areas
 - people involved in OHS decision making or who are likely to be impacted by decisions relating to OHS
- Positive performance indicators are***
- a means of focusing on assessing how successfully a workplace is performing through measuring OHS processes
- Motivators include***
- factors that make stakeholders likely to adopt OHS processes
- A systemic approach to managing OHS involves***
- comprehensive processes that are combined in a methodical and ordered manner to minimise the risk of injury or ill health in the workplace
 - processes of planning, allocation of resources, communication and consultation, hazard management, record keeping and reporting, training and competency, and review and evaluation for ongoing improvement
- Barriers to implementation of a systematic approach to managing OHS may include***
- barriers to communication, such as language/literacy
 - workplace culture issues, such as management commitment, supervisors' approach to compliance and acceptance of the priority of safety
 - diversity of workers
 - structural factors, such as multiple locations, shift work and supervisory arrangements
- OHS plan is***
- is a document that is usually developed annually but may be developed for a shorter or longer period and reviewed regularly, and
 - has OHS performance indicators (ie objectives and targets that are achievable and practical) reflecting systematic approaches to managing OHS
- Resources may include***
- financial requirement for implementation
 - personnel, including time allocation

RANGE STATEMENT

- equipment
 - specialised resources
 - access to other resources such as:
 - OHS publications
 - OHS internal sites
 - industry-specific information
- OHS specialists may be internal or external and include***
- ergonomists
 - occupational hygienists
 - occupational health professionals
 - injury management advisors
- Technical advisors may include***
- engineers (such as design, acoustic, safety, mechanical and civil)
 - legal practitioners
 - workplace assessors and trainers
 - maintenance and trades persons
- Policies and procedures may include***
- is a document that is usually developed annually but may be developed for a shorter or longer period and reviewed regularly, and
 - has OHS performance indicators (ie objectives and targets that are achievable and practical) reflecting systematic approaches to managing OHS
- Other functional areas and management systems may include***
- strategic planning
 - purchasing, procurement and contracting
 - logistics
 - human resource, industrial relations and personnel management including payroll
 - engineering and maintenance
 - information, data and records management
 - finance and auditing
 - environmental management
 - quality management
- Ethical advice means that***
- the OHS practitioner provides objective advice with the prime aim of reduction of workplace injury and ill health
- Proposed changes to the workplace may include***
- design of workplace
 - design or purchase of new plant or equipment
 - materials purchases
 - changes to work processes, work systems, work organisation, work practices and conditions
 - changes to management practices
- External changes may***
- changes to legislation
 - new information and data available on OHS

RANGE STATEMENT

include

Sources of workplace information and data may include

- hazard, incident and investigation reports
- workplace inspections
- minutes of meetings
- reports - including those of external consultants
- audits
- questionnaire information and data
- material safety data sheets (MSDSs) and registers

Unit Descriptor

Unit descriptor

This unit covers participation in the provision of technical and legal information and data necessary to ensure that management and other stakeholders are informed about OHS and the effectiveness of the management of OHS.

It includes accessing and providing OHS information; collecting, collating and analysing data; and ensuring that this information and data is distributed throughout the workplace. It also addresses the legislative requirements for reporting and notification of OHS matters.

In practice, participation in the management of OHS information and data systems may overlap with other generalist or specialist public sector work activities such as promoting ethical practice, using complex communication strategies, undertaking research and analysis, coordinating resource usage, promoting compliance with legislation, etc.

Application of the Unit

Application of the unit

This unit applies to individuals with managerial responsibility for providing technical and legal information and data necessary to ensure that management and other stakeholders are informed about OHS and the effectiveness of the management of OHS

It includes accessing and providing OHS information; collecting, collating and analysing data; and ensuring that this information and data is distributed throughout the workplace. It also addresses the legislative requirements for reporting and notification of OHS matters.

Licensing/Regulatory Information

Elements and Performance Criteria Pre-Content

Elements are the essential outcomes of the unit of competency. Performance criteria describe the required performance needed to demonstrate achievement of the element. Where *italicised* text is used, further information is detailed in the required skills and knowledge and/or the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Access sources of OHS information and data	<p>1.1 <i>Sources of OHS information and data</i> are identified, accessed and reviewed regularly.</p> <p>1.2 Information and data is critically evaluated to ensure its accuracy, currency and relevance.</p> <p>1.3 <i>Appropriate formats</i> for information and data storage and retrieval are determined.</p>
2. Assist in the application of policies and procedures for collection of workplace information, data and records	<p>2.1 Managers and <i>key personnel</i> are informed of <i>legal requirements</i> for information and data collection and record keeping.</p> <p>2.2 OHS records are kept using <i>appropriate tools</i>.</p> <p>2.3 Workplace information and data is collected according to <i>established procedures</i>.</p> <p>2.4 Procedures for information and data collection, record keeping, amendments to legislation, and distribution of records are reviewed regularly to ensure their usability and relevance.</p>
3. Assist in maintaining an information and data management system that enables retrieval and distribution of OHS information and data	<p>3.1 Recommendations are made for storage of OHS information and data in a manner that makes it accessible to <i>stakeholders</i> and key personnel.</p> <p>3.2 OHS information, data and records are accurately entered, and stored <i>ethically</i>.</p> <p>3.3 Purposes and appropriate uses of OHS information and data are identified for meaningful outcomes.</p> <p>3.4 <i>Legislated reporting requirements</i> to external bodies are met accurately and within time limits.</p> <p>3.5 Training needs relevant to the management of the information and data system for appropriate personnel are regularly assessed and actioned as appropriate.</p> <p>3.6 Information and data management system is regularly evaluated to ensure its ease of use and relevance to the OHS needs of the organisation.</p>
4. Assist in the application of policies and procedures for collection of workplace information, data and records	<p>4.1 <i>Information and data collected</i> is evaluated for validity and reliability.</p> <p>4.2 <i>Analytical techniques</i> appropriate for evaluation of OHS performance (including <i>positive performance indicators</i>) and identification of areas for improvement are identified.</p> <p>4.3 Analytical techniques are applied appropriately and accurately.</p> <p>4.4 OHS information and data analysis processes are reviewed regularly, in consultation with stakeholders, to ensure organisational and legislative requirements.</p>
5. Communicate OHS information and	<p>5.1 Outcomes of information and data analysis are appropriately formatted taking account of the <i>target audience</i>.</p>

ELEMENT

PERFORMANCE CRITERIA

- | | |
|--|--|
| <p>results of data analysis to stakeholders and external bodies</p> | <p>5.2 OHS information and data is disseminated to managers, key personnel and stakeholders taking account of legal and ethical requirements.</p> <p>5.3 OHS information and data is communicated objectively and feedback sought.</p> <p>5.4 Recommendations are made for improvement in prevention strategies based upon information accessed and data analysis.</p> |
| <p>6. Communicate the effectiveness of OHS information and data systems through monitoring and evaluation</p> | <p>6.1 The effectiveness of the OHS information and data system is reviewed regularly.</p> <p>6.2 Frequency, method and scope of review is determined in consultation with stakeholders.</p> <p>6.3 Stakeholders are enabled to have input to review.</p> <p>6.4 Areas for improvement in the OHS information and data system are identified and recommendations made for improvement.</p> <p>6.5 Improvement strategies arising from the review are communicated to appropriate levels of authority through planning, documentation and implementation.</p> |

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the essential skills and knowledge and their level, required for this unit.

Required skills:

Look for evidence that confirms skills in:

- relating to people from a range of social, cultural and ethnic backgrounds and physical and mental abilities
- preparing more detailed reports for a range of target groups including OHS committee, OHS representatives, managers and supervisors
- applying continuous improvement and action planning processes
- contributing to the strategic OHS performance of the organisation
- employing project management skills to achieve change
- managing own tasks within time frame
- using consultation and negotiation skills, particularly in relation to developing plans and implementing and monitoring designated actions
- contributing to the assessment of the resources needed to systematically manage OHS and, where appropriate, access resources
- analysing relevant workplace information and data, and make observations including of workplace tasks and interactions between people, their activities, equipment, environment and systems
- carrying out simple arithmetical calculations (eg % change), and produce graphs of workplace information and data to identify trends and recognise limitations
- using electronic systems to enter workplace information and data and produce effective graphical representations
- using a range of communication media
- using language and literacy skills appropriate to the workgroup and the task
- using basic computer and information technology skills to access internal and external information and data on OHS.

Required knowledge:

Look for evidence that confirms knowledge and understanding of:

- legislative requirements for OHS information and data, and consultation
- roles and responsibilities in relation to communication and consultation for OHS committees, OHS representatives, line management, employees and inspectors
- requirements for recordkeeping that addresses OHS, privacy and other legislation
- state/territory/Commonwealth OHS legislation (Acts, regulations, codes of practice, associated standards and guidance material) including prescriptive and performance approaches and links to other relevant legislation such as industrial relations, equal employment opportunity, workers compensation, rehabilitation etc
- structure and forms of legislation including regulations, codes of practice, associated standards and guidance material

REQUIRED SKILLS AND KNOWLEDGE

- difference between common law and statutory law
- concept of common law duty of care
- methods of providing evidence of compliance with OHS legislation
- facilitation of the use of tools such as positive performance indicators (PPIs) in assessment of OHS performance
- nature of information and data that provides valid and reliable results on performance of OHS management processes (including positive indicators, such as number of safety audits conducted)
- methods of collecting reliable information and data, commonly encountered problems in collection and strategies for overcoming such problems
- requirements for reporting under OHS and other relevant legislation including notification and reporting of incidents
- internal and external sources of OHS information and data
- auditing methods and techniques
- how the characteristics and composition of the workforce impact on risk and the systematic approach to managing OHS eg
 - labour market changes
 - structure and organisation of workforce eg part-time, casual and contract workers, shift rosters, geographical location
 - language, literacy and numeracy
 - communication skills
 - cultural background/workplace diversity
 - gender
 - workers with special needs
- ethics related to professional practice
- professional liability in relation to providing advice
- knowledge of organisational OHS policies and procedures
- key personnel, including identifying 'change agents', within workplace management structure
- language, literacy and cultural profile of the workgroup
- organisational culture as it impacts on the workgroup.

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the unit descriptor, performance criteria, The range statement and the Assessment Guidelines for the Public Sector Training Package.

Units to be assessed together

Co-assessed units that may be assessed with this unit to increase the efficiency and realism of the assessment process include:

PSPETHC501B Promote the values and ethos of public service

PSPGOV512A Use complex workplace communication strategies

PSPLEGN501B Promote compliance with legislation in the public sector

PSPSOHS501A Participate in the coordination and maintenance of a systematic approach to managing OHS

- PSPSOHS503A Assist in the design and development of OHS participative arrangements.

Overview of evidence requirements

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms:

- knowledge requirements of this unit
- skill requirements of this unit
- application of employability skills as they relate to this unit.

The assessment environment should not disadvantage the candidate and where the person has a disability the principle of reasonable adjustment should be applied during assessment.

Resources required to carry out assessment

These resources include:

- legislation, policy, procedures and protocols relating to management of OHS information and data systems
- workplace documentation, case studies and workplace scenarios to capture the range of situations likely to be encountered when participating in the management of OHS information and data systems.

Where and how to assess evidence

Valid assessment of this unit requires:

- a workplace environment or one that closely resembles normal work practice and replicates the range of conditions likely to be encountered when participating in the management of OHS information and data systems, including coping with difficulties, irregularities and breakdowns in routine
- participation in the management of OHS information and data systems in a range of three or more contexts or occasions, over

EVIDENCE GUIDE

time.

Assessment methods should reflect but not exceed workplace demands, such as literacy, and the needs of individuals who might be disadvantaged.

Assessment methods suitable for valid and reliable assessment of this unit must use authenticated evidence from the workplace and/or training courses and may include a combination of two or more of:

- workplace projects
- simulation or role plays
- case studies and scenarios
- observation
- portfolios.

The assessment environment should not disadvantage the candidate and where the person has a disability the principle of reasonable adjustment should be applied during assessment.

For consistency of assessment

Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments.

Range Statement

RANGE STATEMENT

The range statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The range statement also provides a focus for assessment. It relates to the unit as a whole. Text in *italics* in the Performance criteria is explained here.

Sources of OHS information and data may include

- external sources such as:
 - OHS legislation and codes of practice
 - Australian and industry standards
 - Australian Bureau of Statistics (ABS)
 - OHS authorities
 - unions and industry bodies
 - OHS professional bodies
 - internet, journals, magazines
 - technical information and data
 - research literature
 - manufacturers' manuals and specifications
 - National Occupational Health and Safety Commission (NOHSC)
- internal sources such as:
 - OHS policies and procedures
 - work instructions
 - job and work system analysis (JSAs)
 - risk assessments (past and present)
 - material safety data sheets (MSDSs) and registers
 - manufacturers' manuals
 - organisational data such as insurance records, incident investigation, enforcement notices and actions, workers compensation data, OHS performance indicators, audits etc
 - safety handbooks
 - employee information papers, brochures, notes, newsletters
 - OHS reports including, workplace inspections, hazard and incident reports, technical reports, consultations and observations

Appropriate formats may be

- electronic or paper-based
- available through an intranet or CD-ROM
- recognised records and data management systems

Key personnel may include

- managers from other areas
- people involved in OHS decision making or who are affected

RANGE STATEMENT

- by OHS decisions
- Legal requirements may include*
- legislation, regulations and standards governing:
 - reporting of incidents
 - records for monitoring and exposure to specific hazards
 - privacy and confidentiality of personal records
 - workplace equity
 - workers compensation
- Appropriate tools may be*
- electronic systems
 - paper-based systems
 - and may include:
 - registers
 - graphical representations
 - performance monitoring charts and checklists
 - handbooks
- Established procedures may include*
- legislation and codes of practice
 - OHS management systems
 - relevant workers compensation processes
 - organisational policies and procedures including accident and incident recording system
 - recognised industry standards
 - manufacturers' recommendations, and maintenance and servicing schedules
 - contract and tender documentation
 - formal and/or informal procedures
- Stakeholders may include*
- management
 - supervisors
 - employees
 - OHS committees
 - health and safety and other employee representatives
- Ethical requirements for OHS records storage include*
- privacy, as appropriate
 - confidentiality
 - ensuring access to personal records, within legislative requirements
 - commercial in confidence information as appropriate
- Legislated reporting requirements include*
- serious injury and serious incident reporting to OHS authorities
- Information and data collected may include*
- data relating to implementation of OHS plans and processes
 - OHS performance indicators
 - hazard registers

RANGE STATEMENT

- incident data including injury and disease
 - MSDSs and registers
 - risk assessments
 - job safety analyses
 - OHS policies and procedures
- Analytical techniques may include*
- basic statistical tests such as means, standard deviation and percentage change
- Positive performance indicators are*
- a means of focusing on assessing how successfully a workplace is performing through measuring OHS processes
- Target audience may include*
- internal stakeholders, including the board of management, managers, OHS committees, supervisors, employees (and their families), contractors, visitors and others on site
 - external stakeholders, including customers, shareholders, local community (directly or via the media), representatives of special interest groups and agencies, insurance agencies, OHS regulators and other relevant statutory bodies

Unit Descriptor

Unit descriptor

This unit covers identifying participative needs and designing, developing and reviewing formal and informal processes to enable people to participate in OHS decision making. This process will result in stakeholders having real opportunities to participate in OHS processes.

In practice, assisting in the design and development of OHS participative arrangements may overlap with other generalist or specialist public sector work activities such as promoting ethical practice, using complex communication strategies, undertaking research and analysis, coordinating resource usage, promoting compliance with legislation, etc.

Application of the Unit

Application of the unit

This unit applies to individuals with managerial responsibility for identifying, designing, developing and reviewing formal and informal processes to enable people to participate in OHS decision making. The unit also addresses influencing others from an OHS perspective and takes account of the responsibilities for managing OHS.

The requirements outlined in this unit to assist the design, development and review of OHS participative processes are underpinned by those in PSPSOHS402A Contribute to the implementation of the OHS consultation process.

Licensing/Regulatory Information

Employability skills This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements are the essential outcomes of the unit of competency. Performance criteria describe the required performance needed to demonstrate achievement of the element. Where *italicised* text is used, further information is detailed in the required skills and knowledge and/or the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
----------------	-----------------------------

ELEMENT

PERFORMANCE CRITERIA

- 1. Identify the need for OHS participative arrangements**
 - 1.1 OHS legislation is reviewed to identify legal requirements for *participative arrangements*.
 - 1.2 *Factors that may impact on the design of the participative arrangements* are identified.
 - 1.3 Organisational policies and procedures are reviewed to identify requirements and opportunities for OHS consultation and communication.
 - 1.4 Effectiveness of existing workplace arrangements for OHS consultation and communication are reviewed in consultation with *stakeholders*.
 - 1.5 Information and consultation requirements for specific roles and groups are defined in consultation with stakeholders and *key personnel*.
- 2. Assist in the design of participative arrangements**
 - 2.1 Processes for providing required OHS information and data are designed in consultation with stakeholders.
 - 2.2 Processes to enable individuals and groups to be consulted regarding workplace OHS issues and to have input to OHS decision making are designed in consultation with stakeholders.
 - 2.3 *Training needs* to enable effective participation are identified and documented.
 - 2.4 Recommendations for participative arrangements are reviewed, in consultation with stakeholders, to ensure they meet legislative requirements and are realistic, practical and acceptable in the workplace.
- 3. Assist in developing participative arrangements**
 - 3.1 Policies and procedures for participative arrangements are developed.
 - 3.2 Key personnel in the introduction and maintenance of the participative arrangements are identified.
 - 3.3 Strategies for the delivery of training are developed.
 - 3.4 *Resources* necessary to introduce and maintain the participative arrangements are identified and documented.
- 4. Participate in supporting the implementation of participative arrangements**
 - 4.1 Priorities for action are determined in consultation with stakeholders.
 - 4.2 Action plans are developed with allocated responsibilities and time lines.
 - 4.3 Advice and support is provided to key personnel.
 - 4.4 Implementation is monitored, in consultation with stakeholders, to ensure that participatory arrangements are effective in providing information and data to all groups and providing opportunity for participation in OHS decision making.
 - 4.5 Recommendations are made for adjustment to the implementation as required.

ELEMENT

PERFORMANCE CRITERIA

- 5. Participate in evaluating the design and development of participative arrangements**
- 5.1 The *evaluation protocol* is designed in consultation with stakeholders.
 - 5.2 A plan is developed for collection of *information and data*.
 - 5.3 Information and data is analysed and evaluated.
 - 5.4 Recommendations are made for improvement in the participatory arrangements as a result of the evaluation findings.
 - 5.5 A report is provided to stakeholders and key personnel on the outcomes of the evaluation and the recommendations for further development and improvement.
 - 5.6 Feedback is obtained from stakeholders and an action plan developed for ongoing improvements.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the essential skills and knowledge and their level, required for this unit.

Required skills:

Look for evidence that confirms skills in:

- relating to people from a range of social, cultural and ethnic backgrounds and physical and mental abilities
- communicating effectively with personnel at all levels of organisation and OHS specialists and, as required, emergency service personnel
- preparing more detailed reports for a range of target groups including OHS committee, OHS representatives, managers and supervisors
- applying continuous improvement and action planning processes
- employing project management skills to achieve change
- managing own tasks within time frame
- using consultation and negotiation skills, particularly in relation to developing plans and implementing and monitoring designated actions
- using a range of communication media
- conducting effective formal and informal meetings
- using language and literacy skills appropriate to the workgroup and the task
- undertaking basic research to access relevant information and data.

Required knowledge:

Look for evidence that confirms knowledge and understanding of:

- legislative requirements for OHS information and data, and consultation
- rights of OHS inspectors
- roles and responsibilities in relation to communication and consultation for OHS committees, OHS representatives, line management, employees and inspectors
- state/territory/Commonwealth OHS legislation (Acts, regulations, codes of practice, associated standards and guidance material) including prescriptive and performance approaches and links to other relevant legislation such as industrial relations, equal employment opportunity, workers compensation, rehabilitation etc
- structure and forms of legislation including regulations, codes of practice, associated standards and guidance material
- difference between common law and statutory law
- concept of common law duty of care
- methods of providing evidence of compliance with OHS legislation
- internal and external sources of OHS information and data
- how the characteristics and composition of the workforce impact on risk and the systematic approach to managing OHS eg
- labour market changes

REQUIRED SKILLS AND KNOWLEDGE

- structure and organisation of workforce eg part-time, casual and contract workers, shift rosters, geographical location
- language, literacy and numeracy
- communication skills
- cultural background/workplace diversity
- gender
- workers with special needs
- benefits, limitations and use of a range of communication strategies and tools appropriate to the workplace
- ethics related to professional practice
- professional liability in relation to providing advice
- principles of effective meetings including agendas, action planning, chair and secretarial duties, minutes and action items
- knowledge of organisational OHS policies and procedures
- key personnel, including identifying 'change agents', within workplace management structure
- formal and informal communication and consultation processes and key personnel related to communication
- language, literacy and cultural profile of the workgroup
- organisational culture as it impacts on the workgroup.

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the unit descriptor, performance criteria, The range statement and the Assessment Guidelines for the Public Sector Training Package.

Units to be assessed together

Co-assessed units that may be assessed with this unit to increase the efficiency and realism of the assessment process include:

PSPETHC501B Promote the values and ethos of public service

PSPGOV512A Use complex workplace communication strategies

PSPLEGN501B Promote compliance with legislation in the public sector

PSPSOHS501A Participate in the coordination and maintenance of a systematic approach to managing OHS

- PSPSOHS502A Participate in the management of the OHS information and data systems.

Overview of evidence requirements

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms:

- knowledge requirements of this unit
- skill requirements of this unit
- application of employability skills as they relate to this unit.

The assessment environment should not disadvantage the candidate and where the person has a disability the principle of reasonable adjustment should be applied during assessment.

Resources required to carry out assessment

These resources include:

- legislation, policy, procedures and protocols relating to the design and development of OHS participative arrangements
- workplace documentation, case studies and workplace scenarios to capture the range of situations likely to be encountered when assisting in the design and development of OHS participative arrangements.

Where and how to assess evidence

Valid assessment of this unit requires:

- a workplace environment or one that closely resembles normal work practice and replicates the range of conditions likely to be encountered when assisting in the design and development of OHS participative arrangements, including coping with difficulties, irregularities and breakdowns in routine
- assistance in the design and development of OHS participative arrangements in a range of three or more contexts or occasions,

EVIDENCE GUIDE

over time.

Assessment methods should reflect but not exceed workplace demands, such as literacy, and the needs of individuals who might be disadvantaged.

Assessment methods suitable for valid and reliable assessment of this unit must use authenticated evidence from the workplace and/or training courses and may include a combination of two or more of:

- workplace projects
- simulation or role plays
- case studies and scenarios
- observation
- portfolios.

The assessment environment should not disadvantage the candidate and where the person has a disability the principle of reasonable adjustment should be applied during assessment.

For consistency of assessment

Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments.

Range Statement

RANGE STATEMENT

The range statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The range statement also provides a focus for assessment. It relates to the unit as a whole. Text in *italics* in the Performance criteria is explained here.

Participative arrangements

- are designed so that stakeholders are able to be involved in decision making that affects their health and safety. Participatory processes may include:
- OHS and other consultative/planning committees
- health and safety and other representatives
- employee and supervisor involvement in OHS activities, such as inspections and audits
- procedures for reporting hazards, and raising and addressing OHS issues
- OHS included in management, staff and employee meetings

Factors that may impact on the design of participative arrangements include

- language
- shift work and rostering arrangements
- timing of information and data provision
- literacy and numeracy levels
- workers with special needs
- workplace organisational structures (for example, size of organisation, geographic, hierarchical)
- cultural diversity
- management approach
- workplace culture and approach to OHS by managers, supervisors and employees

Stakeholders may include

- managers
- supervisors
- employees
- health and safety and other employee representatives
- OHS committees

Key personnel may include

- managers from other areas
- people involved in OHS decision making or who are affected by OHS decisions

Training needs should be defined for

- managers
- supervisors
- health and safety representatives
- OHS committees

RANGE STATEMENT

- Resources may include*
 - other key personnel
 - employees generally
 - financial requirements for implementation
 - personnel including time allocation
 - equipment
 - access to sources of information and data, such as OHS journals, web sites and guidance material to circulate to stakeholders and key personnel
- Evaluation protocol includes*
 - criteria for evaluation, how the criteria will be measured, how the information and data will be collected, time period for collection of information and data
- Information and data for evaluating participation arrangements may include*
 - feedback from individuals and representatives, minutes of meetings, questionnaires, workshops and OHS management audits

Unit Sector(s)

Not applicable.

Competency field

Competency field Specialist Occupational Health&Safety

PSPSOHS504A Apply principles of OHS risk management

Modification History

Not applicable.

Unit Descriptor

Unit descriptor

This unit covers the knowledge and skills required to provide a systematic approach to hazard identification, risk assessment and risk control, with the emphasis on elimination or, where this is not possible, minimisation of risk. It also includes conceptual models for understanding the nature of hazards.

In practice, applying the principles of OHS risk management may overlap with other generalist or specialist public sector work activities such as promoting ethical practice, using complex communication strategies, undertaking research and analysis, coordinating resource usage, promoting compliance with legislation, etc.

Application of the Unit

Application of the unit

This unit applies to individuals with managerial responsibility for providing a systematic approach to hazard identification, risk assessment and risk control, with the emphasis on elimination or, where this is not possible, minimisation of risk. It also includes conceptual models for understanding the nature of hazards.

In practice, applying the principles of OHS risk management may overlap with other generalist or specialist public sector work activities such as promoting ethical practice, using complex communication strategies, undertaking research and analysis, coordinating resource usage, promoting compliance with legislation, etc.

The unit provides the basis for the hazard-specific competencies PSPSOHS505A Manage hazards in the work environment and PSPSOHS506A Monitor and facilitate the management of hazards associated with plant.

The unit is underpinned by the units of competency PSPSOHS403A Identify hazards and assess OHS risks, and PSPSOHS404A Contribute to the implementation of strategies to control OHS risk.

A more advanced approach to risk assessment, which identifies the separate elements of risk analysis and risk evaluation, is provided in unit PSPSOHS603A Analyse and evaluate OHS risk.

Licensing/Regulatory Information

Employability Skills Information

Employability skills This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Where *italicised* text is used, further information is detailed in the required skills and knowledge and/or the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Access external sources of information and data to identify hazards	1.1 <i>External sources of information and data</i> are accessed to assist in identifying <i>hazards</i> . 1.2 <i>Workplace sources of information and data</i> are reviewed to access and assist in identification of hazards. 1.3 Input is sought from <i>stakeholders, key personnel</i> and <i>OHS specialists</i> . 1.4 Formal and informal research is conducted to ensure currency with <i>workplace issues</i> .
2. Analyse the work environment to identify hazards	2.1 <i>Occasions when action for hazard identification is required</i> are defined, documented and communicated. 2.2 <i>Tools</i> are sourced to assist in the analysis of identified hazards. 2.3 <i>Task demands</i> and <i>task environment</i> are examined for impact on the person to identify situations with a potential for injury or ill health. 2.4 Workforce structure, organisation of work and work relationships are examined to identify situations with a potential for injury or ill health. 2.5 Work environment is examined for <i>agents</i> with a potential for injury or ill health. 2.6 Input is sought from stakeholders to clarify and confirm issues.
3. Assess risk associated with a hazard	3.1 <i>Factors contributing to risk</i> are identified. 3.2 Current risk controls for each hazard are identified. 3.3 Adequacy of current controls (if any) is evaluated taking account of <i>relevant standards</i> and knowledge. 3.4 Discrepancies between current controls and required <i>quality of control</i> are identified. 3.5 Hazards requiring further control action are <i>prioritised</i> . 3.6 Method and outcomes of <i>risk assessment</i> are documented.
4. Control risk associated with a hazard	4.1 A range of control options is developed in consultation with stakeholders and taking account of the outcomes of the risk assessment and the <i>hierarchy of control</i> . 4.2 Potential <i>factors impacting on the effectiveness of controls</i> are identified 4.3 Advice is sought from OHS specialists and key personnel if required. 4.4 Appropriate authority and relevant resources to initiate and maintain controls are identified and sought. 4.5 Actions required to achieve change are identified and

ELEMENT	PERFORMANCE CRITERIA
	documented.
	4.6 Extent of change and reduction in risk as a result of controls is analysed.
5. Maintain hazard identification and risk control processes	<p>5.1 A <i>risk register</i> is established and maintained relevant to the workplace.</p> <p>5.2 Risk management procedures are documented and communicated as appropriate to stakeholders and key personnel.</p> <p>5.3 Outcomes of risk management processes are documented and communicated to stakeholders and key personnel as appropriate.</p> <p>5.4 Stakeholders and operational staff are involved in the risk management processes.</p> <p>5.5 Situations are identified where OHS specialists may be required.</p>
6. Monitor and review risk management processes	<p>6.1 The effectiveness of the risk management processes is reviewed regularly.</p> <p>6.2 Frequency, method and scope of review are determined in consultation with workplace stakeholders and key personnel.</p> <p>6.3 Stakeholders and key personnel have input to the review.</p> <p>6.4 Areas for improvement in the risk management processes are identified and recommendations made.</p> <p>6.5 Action plans, including allocated responsibilities and time frames, are prepared for implementation.</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the essential skills and knowledge and their level, required for this unit.

Required skills:

Look for evidence that confirms skills in:

- relating to people from a range of social, cultural and ethnic backgrounds and physical and mental abilities
- communicating effectively with personnel at all levels of organisation and OHS specialists and, as required, emergency service personnel
- preparing more detailed reports for a range of target groups including OHS committee, OHS representatives, managers and supervisors
- managing own tasks within time frame
- using consultation and negotiation skills, particularly in relation to developing plans and implementing and monitoring designated actions
- contributing to the assessment of the resources needed to systematically manage OHS and, where appropriate, access resources
- analysing relevant workplace information and data, and make observations including of workplace tasks and interactions between people, their activities, equipment, environment and systems
- carrying out simple arithmetical calculations (eg % change), and produce graphs of workplace information and data to identify trends and recognise limitations
- interpreting information and data to identify areas for improvement
- using language and literacy skills appropriate to the workgroup and the task
- using basic computer and information technology skills to access internal and external information and data on OHS
- undertaking basic research to access relevant information and data
- paying attention to detail when making observations and recording outcomes.

Required knowledge:

Look for evidence that confirms knowledge and understanding of:

- roles and responsibilities under OHS legislation of employees, including supervisors and contractors
- legislative requirements for OHS information and data, and consultation
- state/territory/Commonwealth OHS legislation (Acts, regulations, codes of practice, associated standards and guidance material) including prescriptive and performance approaches and links to other relevant legislation such as industrial relations, equal employment opportunity, workers compensation, rehabilitation etc
- structure and forms of legislation including regulations, codes of practice, associated standards and guidance material
- concept of common law duty of care
- methods of providing evidence of compliance with OHS legislation

REQUIRED SKILLS AND KNOWLEDGE

- difference between hazard and risk
- risk as a measure of uncertainty and the factors that affect risk
- requirements under hazard specific OHS legislation and codes of practice
- basic principles of incident causation and injury processes
- characteristics, mode of action and units measurement of major hazard types
- basic physiology relevant to understanding mode of action of physical, biological and chemical agents on the body and how they produce harm
- hierarchy of control and considerations for choosing between different control measures, such as possible inadequacies of particular control measures
- standard industry controls for a range of hazards
- types of hazard identification tools, including JSA
- limitations of generic hazard and risk checklists and risk ranking processes
- principles and practices of systematic approaches to managing OHS
- other function areas that impact on the management of OHS
- internal and external sources of OHS information and data
- how the characteristics and composition of the workforce impact on risk and the systematic approach to managing OHS eg
 - labour market changes
 - structure and organisation of workforce eg part-time, casual and contract workers, shift rosters, geographical location
 - language, literacy and numeracy
 - communication skills
 - cultural background/workplace diversity
 - gender
 - workers with special needs
- benefits, limitations and use of a range of communication strategies and tools appropriate to the workplace
- basic knowledge of organisational behaviour and culture as it impacts on OHS and on change
- ethics related to professional practice
- professional liability in relation to providing advice
- knowledge of organisational OHS policies and procedures
- nature of workplace processes (including work flow, planning and control) and hazards relevant to the particular workplace
- language, literacy and cultural profile of the workgroup
- organisational culture as it impacts on the workgroup.

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the unit descriptor, performance criteria, The range statement and the Assessment Guidelines for the Public Sector Training Package.

Units to be assessed together

Co-assessed units that may be assessed with this unit to increase the efficiency and realism of the assessment process include:

- PSPETHC501B Promote the values and ethos of public service
- PSPGOV512A Use complex workplace communication strategies
- PSPLEGN501B Promote compliance with legislation in the public sector
- PSPSOHS505A Manage hazards in the work environment
- PSPSOHS506A Monitor and facilitate the management of hazards associated with plant.

Overview of evidence requirements

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms:

- knowledge requirements of this unit
- skill requirements of this unit
- application of employability skills as they relate to this unit.

Resources required to carry out assessment

Resources essential for assessment include:

- legislation, policy, procedures and protocols relating to the application of principles of OHS risk management
- workplace documentation, case studies and workplace scenarios to capture the range of situations likely to be encountered when applying the principles of OHS risk management.

Where and how to assess evidence

Valid assessment of this unit requires:

- a workplace environment or one that closely resembles normal work practice and replicates the range of conditions likely to be encountered when applying the principles of OHS risk management, including coping with difficulties, irregularities and breakdowns in routine
- application of the principles of OHS risk management in a range of 3 or more contexts or occasions, over time.

Assessment methods should reflect but not exceed workplace demands, such as literacy, and the needs of individuals who might be disadvantaged.

Assessment methods suitable for valid and reliable assessment of this unit must use authenticated evidence from the workplace

EVIDENCE GUIDE

and/or training courses and may include a combination of two or more of:

- workplace projects
- simulation or role plays
- case studies and scenarios
- observation.
- portfolios.

The assessment environment should not disadvantage the candidate and where the person has a disability the principle of reasonable adjustment should be applied during assessment.

For consistency of assessment

Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments.

Range Statement

RANGE STATEMENT

The range statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The range statement also provides a focus for assessment. It relates to the unit as a whole. Text in *italics* in the Performance criteria is explained here.

External sources of information and data may include

- OHS regulatory authorities
- industry bodies
- employer groups
- unions
- OHS specialists
- legislation, codes of practice and standards
- databases such as national and state injury data and National Industrial Chemicals Notification and Assessment Scheme (NICNAS)
- journals and web sites
- manufacturers' manual and specifications

A hazard is

- a source or a situation with a potential for harm in terms of human injury or ill-health, damage to property, damage to the environment, or a combination of these

Workplace sources of information and data may include

- employees
- OHS representatives
- hazard, incident and investigation reports
- workplace inspections
- minutes of meetings
- reports
- audits
- material safety data sheets (MSDSs)
- manufacturers' manuals and specifications

Stakeholders include

- managers
- supervisors
- health and safety and other employee representatives
- OHS committees
- employees

Key personnel may include

- managers from other areas
- people involved in OHS decision making or who are affected by OHS decisions

OHS specialists may be

- ergonomists

internal or external and include

- engineers
- occupational hygienists
- toxicologists
- organisational psychologists
- workplace injury and return to work advisors

Workplace issues may include

- changes in work practice
- changes in equipment, including technology
- changes in work organisation, including contracting, hire arrangements, casualisation, supervisory arrangements, outworkers, rosters, shift work, work hours and work relations
- changes to legislation and standards
- outcomes of court rulings
- new knowledge on hazards
- changes in social, political or community environment

Occasions when action for hazard identification is required include

- at design or pre-purchase of buildings, equipment and materials
- commissioning or pre-implementation of new processes or practices
- new forms of work and organisation of work
- before changes are made to workplace, equipment, work processes or work arrangements
- planning major tasks or activities, such as equipment shutdowns
- following an incident report
- when new knowledge becomes available
- at regular intervals during normal operations
- prior to disposal of equipment, buildings or materials

Tools may include

- job safety analysis (JSA)
- audits
- cause and effect diagrams
- surveys

Task demands may include

- required precision or accuracy
- machine pacing or time pressure to complete a task
- physical or physiological demands
- arousal and alertness
- repetitive nature of task

Task environment may include

- lighting
- noise
- air quality
- thermal

Agents may be

- chemical
- physical
- biological

- Risk is**
- ergonomic
 - psychosocial
 - the chance of something occurring that will result in injury or damage
 - measured in terms of consequences (injury or damage) and likelihood of the consequence
- Factors contributing to risk may include those associated with**
- equipment
 - work environment
 - work organisation
 - task
 - the individual/operator
 - frequency and duration of exposure
 - number of people exposed/ involved
- Relevant standards may include**
- legislation
 - codes of practice
 - Australian and industry standards
 - current practice in the industry
 - current knowledge related to the specific hazard and controls
- Quality of control refers to**
- the level and reliability of the control compared with the level of risk
- Prioritisation may be done using**
- standard ranking tools
 - specially designed tools
 - other recognised processes
- Risk assessment includes identification of**
- factors contributing to risk
 - current controls and their adequacy
 - discrepancy between current control and required standard
 - prioritisation or ranking of a number of risks, where appropriate
- Hierarchy of control means developing risk controls within the following priority order**
- eliminate hazards
 - and where this is not practicable, minimise risk by:
 - substitution
 - isolating the hazard from personnel
 - using engineering controls
 - using administrative controls (eg procedures, training)
 - using personal protective equipment (PPE)
- Factors impacting on the effectiveness of controls may include**
- language
 - shift work and rostering arrangements
 - literacy and numeracy levels
 - workplace organisational structures (size of organisation, geographic, hierarchical)
 - cultural diversity

A risk register may include all of the following

- training required
- workplace culture related to OHS including commitment by managers and supervisors and compliance with procedures and training
- a list of hazards, their location and people exposed
- a range of possible scenarios or circumstances under which the hazards may cause injury or damage
- the results of the risk analysis related to the hazards
- possible control measures and dates for implementation

Unit Descriptor

Unit descriptor

This unit covers the outcomes required to identify hazards and assess and control risks in the work environment. It focuses on the knowledge, processes and techniques necessary to control specific hazards in the work environment.

Application of the Unit

Application of the unit

Hazards may include noise, light, radiation, hazardous substances, dangerous goods, dusts and fibres, gravity (falls from heights), thermal environment, ergonomic hazards, manual handling, biological or psychosocial hazards or hazards arising from work organisation.

In practice, managing hazards in the work environment may overlap with other generalist or specialist public sector work activities such as promoting ethical practice, using complex communication strategies, undertaking research and analysis, coordinating resource usage, promoting compliance with legislation, etc.

Where the use of monitoring equipment is appropriate, useful underpinning skills are provided in unit PSPSOHS406A Use equipment to conduct workplace monitoring.

This unit differs from PSPSOHS504A Apply principles of OHS risk management, which takes a generic approach to risk management and provides underpinning knowledge and skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Where *italicised* text is used, further information is detailed in the required skills and knowledge and/or the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<p>1. Access sources of information and data and the work environment to identify hazardous tasks or conditions</p>	<p>1.1 <i>External sources of information and data</i> are accessed to assist in identifying hazardous tasks or conditions for the selected <i>hazard</i>.</p> <p>1.2 <i>Workplace sources of information and data</i> are reviewed to assist in identification of hazardous tasks or conditions for the selected hazard.</p> <p>1.3 <i>Appropriate tools</i> are used in identifying hazardous tasks or conditions for the selected hazard.</p> <p>1.4 Workplace inspections are conducted, in consultation with stakeholders, using appropriate tools.</p> <p>1.5 Input is sought from <i>stakeholders, key personnel</i> and <i>OHS specialists</i> if required.</p>
<p>2. Analyse the work environment to assess the risk</p>	<p>2.1 <i>Equipment</i> and <i>strategies</i> required for basic workplace measurement and monitoring of the selected hazard are identified and used as appropriate.</p> <p>2.2 Results of workplace measurements are interpreted in accordance with <i>recognised standards</i>.</p> <p>2.3 Input is sought from stakeholders to clarify and confirm issues related to the selected hazard.</p> <p>2.4 Results of workplace measurements and interpretations are reported to stakeholders in a format easily understandable by the target group.</p> <p>2.5 <i>Risk</i> associated with identified hazards in the work environment is assessed in consultation with stakeholders and taking account of effectiveness of existing controls.</p> <p>2.6 Hazardous tasks or conditions requiring control action are identified and prioritised in consultation with stakeholders and taking account of recognised standards.</p> <p>2.7 <i>Risk register</i> is established and updated as appropriate.</p>
<p>3. Control risk associated with hazard</p>	<p>3.1 Information and data on control options for the specific hazard is sought from external sources.</p> <p>3.2 Information and data on control options for the specific hazard is sought from stakeholders and key personnel.</p> <p>3.3 A range of control options is developed and advised in consultation with stakeholders and key personnel by applying the <i>hierarchy of control</i>, noting that <i>personal protective equipment</i> is regarded as the least satisfactory control measure.</p> <p>3.4 <i>Factors with a potential to impact on the effectiveness of controls</i> are identified.</p> <p>3.5 Control strategy for the selected hazard is developed in</p>

ELEMENT

PERFORMANCE CRITERIA

- consultation with stakeholders.
- 3.6 Outcomes of hazard identification, workplace monitoring and analysis and the resultant control strategy are communicated to stakeholders and key personnel for action as appropriate.
- 4. Monitor and review effectiveness of control strategy**
- 4.1 Effectiveness of control strategy is regularly reviewed.
- 4.2 Frequency, method and scope of review is determined in consultation with workplace stakeholders and workplace procedures.
- 4.3 Input to review is obtained from stakeholders.
- 4.4 Areas for improvement in the control of the selected hazard are identified and recommendations made for improvement.
- 5. Apply professional practice**
- 5.1 Collection of information and data, reporting of outcomes and maintenance of records are managed in an *ethical manner*.
- 5.2 Situations are identified where OHS specialists may be required.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the essential skills and knowledge and their level, required for this unit.

Required skills:

Look for evidence that confirms skills in:

- relating to people from a range of social, cultural and ethnic backgrounds and physical and mental abilities
- communicating effectively with personnel at all levels of organisation and OHS specialists and, as required, emergency service personnel
- preparing more detailed reports for a range of target groups including OHS committee, OHS representatives, managers and supervisors
- managing own tasks within time frame
- using consultation and negotiation skills, particularly in relation to developing plans and implementing and monitoring designated actions
- contributing to the assessment of the resources needed to systematically manage OHS and, where appropriate, access resources
- analysing relevant workplace information and data, and make observations including of workplace tasks and interactions between people, their activities, equipment, environment and systems
- carrying out simple arithmetical calculations (eg % change), and produce graphs of workplace information and data to identify trends and recognise limitations
- interpreting information and data to identify areas for improvement
- using language and literacy skills appropriate to the workgroup and the task
- using basic computer and information technology skills to access internal and external information and data on OHS
- using basic measuring equipment including reading scales and dials applicable to selected hazards
- interpreting results from workplace measurements
- paying attention to detail when making observations and recording outcomes.

Required knowledge:

Look for evidence that confirms knowledge and understanding of:

- roles and responsibilities under OHS legislation of employees, including supervisors and contractors
- legislative requirements for OHS information and data, and consultation
- state/territory/Commonwealth OHS legislation (Acts, regulations, codes of practice, associated standards and guidance material) including prescriptive and performance approaches and links to other relevant legislation such as industrial relations, equal employment opportunity, workers compensation, rehabilitation etc
- structure and forms of legislation including regulations, codes of practice, associated standards and guidance material
- concept of common law duty of care

REQUIRED SKILLS AND KNOWLEDGE

- methods of providing evidence of compliance with OHS legislation
- difference between hazard and risk
- risk as a measure of uncertainty and the factors that affect risk
- requirements under hazard specific OHS legislation and codes of practice
- basic principles of incident causation and injury processes
- characteristics, mode of action and units measurement of major hazard types
- basic physiology relevant to understanding mode of action of physical, biological and chemical agents on the body and how they produce harm
- basic physiology related to temperature control of the human body, hazards or working in hot environments, and appropriate controls
- principles of human behaviour and response to interactions with human, physical and task environment to identify psychosocial hazards
- hierarchy of control and considerations for choosing between different control measures, such as possible inadequacies of particular control measures
- standard industry controls for a range of hazards
- types of hazard identification tools, including JSA
- limitations of generic hazard and risk checklists and risk ranking processes
- principles and practices of systematic approaches to managing OHS
- other function areas that impact on the management of OHS
- internal and external sources of OHS information and data
- how the characteristics and composition of the workforce impact on risk and the systematic approach to managing OHS eg
 - labour market changes
 - structure and organisation of workforce eg part-time, casual and contract workers, shift rosters, geographical location
 - language, literacy and numeracy
 - communication skills
 - cultural background/workplace diversity
 - gender
 - workers with special needs
- benefits, limitations and use of a range of communication strategies and tools appropriate to the workplace
- basic knowledge of organisational behaviour and culture as it impacts on OHS and on change
- ethics related to professional practice
- professional liability in relation to providing advice
- knowledge of organisational OHS policies and procedures
- nature of workplace processes (including work flow, planning and control) and hazards relevant to the particular workplace
- sources of occupational disease and their prevention
- basic knowledge of toxicology of hazardous materials and potential health effects in the workplace

REQUIRED SKILLS AND KNOWLEDGE

- language, literacy and cultural profile of the workgroup
- organisational culture as it impacts on the workgroup

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the unit descriptor, performance criteria, The range statement and the Assessment Guidelines for the Public Sector Training Package.

Units to be assessed together

Co-assessed units that may be assessed with this unit to increase the efficiency and realism of the assessment process include:

- PSPETHC501B Promote the values and ethos of public service
- PSPGOV512A Use complex workplace communication strategies
- PSPLEGN501B Promote compliance with legislation in the public sector
- PSPSOHS504A Apply principles of OHS risk management
- PSPSOHS506A Monitor and facilitate the management of hazards associated with plant.

Overview of evidence requirements

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms:

- knowledge requirements of this unit
- skill requirements of this unit
- application of employability skills as they relate to this unit.

Resources required to carry out assessment

Resources essential for assessment include:

- legislation, policy, procedures and protocols relating to management of hazards in the work environment
- workplace documentation, case studies and workplace scenarios to capture the range of situations likely to be encountered when managing hazards in the work environment.

Where and how to assess evidence

Valid assessment of this unit requires:

- a workplace environment or one that closely resembles normal work practice and replicates the range of conditions likely to be encountered when managing hazards in the work environment, including coping with difficulties, irregularities and breakdowns in routine
- management of hazards in the work environment in a range of 3 or more contexts or occasions, over time, and across at least 4 of the major hazard groups.

Assessment methods should reflect but not exceed workplace demands, such as literacy, and the needs of individuals who might be disadvantaged.

Assessment methods suitable for valid and reliable assessment of

EVIDENCE GUIDE

this unit must use authenticated evidence from the workplace and/or training courses and may include a combination of two or more of:

- workplace projects
- simulation or role plays
- case studies and scenarios
- observation.
- portfolios.

The assessment environment should not disadvantage the candidate and where the person has a disability the principle of reasonable adjustment should be applied during assessment.

For consistency of assessment

Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments.

Range Statement

RANGE STATEMENT

The range statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The range statement also provides a focus for assessment. It relates to the unit as a whole. Text in *italics* in the Performance criteria is explained here.

External sources of information and data may include

- OHS regulatory authorities
- National Occupational Health and Safety Commission (NOHSC)
- industry bodies
- employer groups
- unions
- OHS specialists
- legislation, codes of practice and standards
- databases such as national and state injury data and NICNAS (National Industrial Chemicals Notification and Assessment Scheme)
- journals and web sites
- manufacturers' manual and specifications

A hazard is

- a source or a situation with a potential for harm in terms of injury or ill-health, damage to property, damage to the environment, or a combination of these

Workplace sources of information and data may include

- employees
- OHS representatives
- hazard, incident and investigation reports
- workplace inspections
- minutes of meetings
- reports and audits
- material safety data sheets (MSDSs)

Appropriate tools may include

- checklists produced as part of codes of practice
- photographs
- notes or drawings
- tools developed for a specific work environment, situations or hazard
- tools provided by external sources or advisors

Stakeholders include

- managers
- supervisors
- health and safety and other employee representatives
- OHS committees

RANGE STATEMENT

- Key personnel include**

 - employees
 - managers in related areas
 - people involved in OHS decision making or who are or are affected by OHS decisions
- OHS specialists may be internal or external and include**

 - ergonomists
 - engineers
 - occupational hygienists
 - toxicologists
 - organisational psychologists
 - workplace injury and return to work advisors
- Equipment may include**

 - basic instrumentation such as sound level meters, light meters, goniometer, simple gas sampling devices and temperature and humidity measuring devices
- Strategies may include**

 - questionnaire, interview, focus group
- Recognised standards may include**

 - OHS regulations
 - national and industry standards
 - codes of practice
 - exposure standards
 - guidance notes
- Risk is**

 - the chance of something happening that will result in injury or damage
 - measured in terms of consequences (injury or damage) and likelihood of the consequence
- A risk register covers**

 - a list of hazards, their location and people exposed
 - a range of possible scenarios or circumstances under which these hazards may cause injury or damage
 - the results of the risk assessment
 - and may include possible control measures and dates for implementation
- Hierarchy of control means developing risk controls within the following priority order**

 - eliminate hazards
 - and where this is not practicable, minimise risk by:
 - substitution
 - isolating the hazard from personnel
 - using engineering controls
 - using administrative controls (eg procedures, training)
 - using personal protective equipment (PPE)
- Personal protective equipment (PPE) is**

 - equipment designed to be worn by a person to provide protection from hazards, and may include:

Risk is

- the chance of something happening that will result in injury or damage
- measured in terms of consequences (injury or damage) and likelihood of the consequence
- head protection
- face and eye protection
- respiratory protection
- hearing protection
- hand protection
- clothing and footwear

Factors with a potential to impact on effectiveness of controls may include

- language
- shift work and rostering arrangements
- literacy and numeracy levels
- workplace organisational structures (size of organisation, geographic, hierarchical)
- cultural diversity
- training required
- workplace culture related to OHS including commitment by managers and supervisors and compliance with procedures and training

Ethical manner includes attention to

- confidentiality
- privacy as appropriate
- commercial in confidence information and data as appropriate
- own currency of knowledge

Specialist Occupational Health&Safety

PSPSOHS506A Monitor and facilitate the management of hazards associated with plant

Modification History

Not applicable.

Unit Descriptor

Unit descriptor

This unit covers the outcomes required to effectively identify hazards, and assess and control risks associated with plant and equipment, including mobile plant, machinery, electrical equipment, pressure vessels and plant affecting public safety. It has been designed to be consistent with the National Standard for Plant [NOHSC: 1010 (1994)].

In practice, monitoring and facilitating the management of hazards associated with plant may overlap with other generalist or specialist public sector work activities such as promoting ethical practice, using complex communication strategies, undertaking research and analysis, coordinating resource usage, promoting compliance with legislation, etc.

Application of the Unit

Application of the unit This unit applies to individuals with managerial responsibility for applying a systematic approach to monitoring the identification of hazards and assessing risk arising from the use of plant, and systems of work associated with plant. The focus is on eliminating the hazard or, where this is not possible, minimising risks to health and safety arising from plant.

The unit includes regulatory requirements for design, manufacture, testing, installation, commissioning, use, repair, alteration, dismantling, storage and disposal of plant. Identification and elimination of OHS hazards at the design stage guides the selection and implementation of appropriate OHS risk controls throughout the life cycle of plant or equipment.

Unit PSPSOHS504A Apply principles of OHS risk management, covers a generic approach to risk management and should be utilised as underpinning knowledge for this unit.

While hazards associated with plant may include noise, chemicals and ergonomic hazards, these are specifically addressed under unit PSPSOHS505A Manage hazards in the work environment.

Licensing/Regulatory Information

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Where *italicised* text is used, further information is detailed in the required skills and knowledge and/or the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<p>1. Identify hazards arising from the use of plant and associated systems of work</p>	<p>1.1 <i>Sources of information, data and advice on plant and equipment hazards</i> are accessed to assist in identifying hazards associated with plant.</p> <p>1.2 <i>Hazards</i> in the design, manufacture, registration, supply, installation, commissioning, use, maintenance, testing, dismantling, storage and disposal of plant and <i>systems of work associated with plant</i> are identified.</p> <p>1.3 Work environment, tasks and circumstances that may lead to hazardous situations or exacerbate risk associated with use of plant and equipment are identified and analysed.</p> <p>1.4 Appropriate <i>specialist advisors, stakeholders</i>, relevant <i>key personnel</i> and other parties are identified and consulted in the process of hazard identification.</p> <p>1.5 Appropriate procedures for <i>recording and reporting</i> on hazards associated with plant are established, reported and reviewed as part of the systematic approach to managing OHS.</p>
<p>2. Analyse OHS risk associated with plant</p>	<p>2.1 The method of <i>risk assessment</i> is determined in consultation with operators and stakeholders and, if required, specialist advisors.</p> <p>2.2 Risks associated with identified hazards arising from plant are assessed in consultation with operators and stakeholders, taking into account the effectiveness of existing controls.</p> <p>2.3 <i>Risk registers</i> are developed and regularly updated for items of plant and associated equipment.</p> <p>2.4 Risks requiring further control action are identified.</p>
<p>3. Control risks associated with plant hazards</p>	<p>3.1 Information, data and advice on risk control options for plant and machinery hazards are sourced.</p> <p>3.2 Operators and stakeholders and key personnel are involved in the development of controls.</p> <p>3.3 Measures for ensuring the health and safety of persons accessing, using and/or maintaining plant are adopted and controlled by applying the <i>hierarchy of control</i>.</p> <p>3.4 Controls for risks associated with plant, including <i>access, egress, dangerous parts, guarding, operational controls, emergency stops and warning devices, registration and design of plant, and certification of operators</i> are applied.</p> <p>3.5 Workplace monitoring processes to eliminate or control risks are properly used and maintained.</p> <p>3.6 Regular and appropriate reporting to stakeholders is undertaken.</p>

ELEMENT	PERFORMANCE CRITERIA
<p>4. Identify and recommend controls for hazards associated with maintenance activities and continued safe use of plant and equipment</p>	<p>4.1 Stakeholders and key personnel are involved in the development of controls.</p> <p>4.2 Circumstances are identified where <i>permit to work procedures</i> or <i>certification</i> are required to assist in ensuring a safe working environment.</p> <p>4.3 Permit to work procedures or certification are responded to and monitored in liaison with relevant key personnel to assist in ensuring a safe working environment.</p> <p>4.4 <i>Isolation procedures</i> are implemented and monitored in liaison with relevant key personnel to ensure continued safety of maintenance and <i>other personnel</i>.</p> <p>4.5 Purchasing procedures include actions to address OHS implications of plant and equipment purchase.</p> <p>4.6 Maintenance procedures are developed, documented and communicated to ensure plant and equipment are in a safe condition for use.</p> <p>4.7 Action is taken to ensure that any <i>modifications to plant or equipment</i> are safe and suitable for the task, appropriately documented and work practices modified as required for safe operation.</p> <p>4.8 Maintenance systems are monitored and evaluated for effectiveness, suitability and accuracy in ensuring safe operation of plant and equipment, and action taken as appropriate.</p>
<p>5. Identify and advise on licensing and certification issues associated with plant and equipment</p>	<p>5.1 Types of plant (including plant design) requiring <i>registration</i> and tasks requiring <i>operator licensing and/or certification</i> are identified in accordance with legislative requirements.</p> <p>5.2 <i>OHS requirements</i> to meet plant registration, operator licensing and certification, and other legal requirements are documented and communicated to managers and relevant key personnel.</p> <p>5.3 <i>Training requirements</i> to meet <i>licensing, certification, registration</i> and <i>other legal requirements</i> are documented and communicated to managers and key personnel.</p> <p>5.4 Training needs are analysed to ensure information, instruction and training prior to commencement of work on new plant and equipment and new operating methods.</p> <p>5.5 Compliance with regulatory requirements for operator licensing, registration and certification in the workplace is monitored and reported.</p> <p>5.6 Appropriate records for statutory and specialist plant and associated operator competencies are identified, documented and maintained.</p>

ELEMENT

PERFORMANCE CRITERIA

6. Review and evaluate risk control measures for plant

- 6.1 Effectiveness of control measures are reviewed and risk assessments conducted as appropriate.
- 6.2 Outcomes of OHS risk assessments are compared with criteria to identify risks requiring further risk control and risks deemed *as low as reasonably achievable (ALARA)*.
- 6.3 Stakeholders, key personnel, operators and appropriate specialist advisors, are involved in developing relevant risk control plans for plant.
- 6.4 *Appropriate records* are maintained for the operating life of the plant.
- 6.5 Improvements arising from the review process are recommended or implemented with appropriate key personnel including manufacturers.
- 6.6 The system of managing OHS is reviewed to ensure plant safety.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the essential skills and knowledge and their level, required for this unit.

Required skills:

Look for evidence that confirms skills in:

- relating to people from a range of social, cultural and ethnic backgrounds and physical and mental abilities
- communicating effectively with personnel at all levels of organisation and OHS specialists and, as required, emergency service personnel
- preparing more detailed reports for a range of target groups including OHS committee, OHS representatives, managers and supervisors
- employing project management skills to achieve change
- managing own tasks within time frame
- using consultation and negotiation skills, particularly in relation to developing plans and implementing and monitoring designated actions
- contributing to the assessment of the resources needed to systematically manage OHS and, where appropriate, access resources
- analysing relevant workplace information and data, and make observations including of workplace tasks and interactions between people, their activities, equipment, environment and systems
- carrying out simple arithmetical calculations (eg % change), and produce graphs of workplace information and data to identify trends and recognise limitations
- interpreting information and data to identify areas for improvement
- using language and literacy skills appropriate to the workgroup and the task
- using basic computer and information technology skills to access internal and external information and data on OHS
- paying attention to detail when making observations and recording outcomes.

Required knowledge:

Look for evidence that confirms knowledge and understanding of:

- roles and responsibilities under OHS legislation of employees, including supervisors and contractors
- legislative requirements for OHS information and data, and consultation
- requirements for record keeping that addresses OHS, privacy and other legislation
- state/territory/Commonwealth OHS legislation (Acts, regulations, codes of practice, associated standards and guidance material) including prescriptive and performance approaches and links to other relevant legislation such as industrial relations, equal employment opportunity, workers compensation, rehabilitation etc
- structure and forms of legislation including regulations, codes of practice, associated standards and guidance material

REQUIRED SKILLS AND KNOWLEDGE

- concept of common law duty of care
- methods of providing evidence of compliance with OHS legislation
- difference between hazard and risk
- risk as a measure of uncertainty and the factors that affect risk
- basic principles of incident causation and injury processes
- hierarchy of control and considerations for choosing between different control measures, such as possible inadequacies of particular control measures
- principles and practices of systematic approaches to managing OHS
- other function areas that impact on the management of OHS
- internal and external sources of OHS information and data
- how the characteristics and composition of the workforce impact on risk and the systematic approach to managing OHS eg
 - labour market changes
 - structure and organisation of workforce eg part-time, casual and contract workers, shift rosters, geographical location
 - language, literacy and numeracy
 - communication skills
 - cultural background/workplace diversity
 - gender
 - workers with special needs
- Plant specific knowledge:
 - roles and responsibilities of employers, employees, supervisors, contractors, designers, etc under OHS legislation
 - specific requirements under National Plant and Certification Standards and associated guidance material (such as [NOHSC: 1010])
 - concepts of hazards arising from plant and systems of work associated with plant
 - hazards associated with mobile/fixed plant equipment and risk control strategies
 - basic physics of fluids under pressure and pressure vessels, and the behaviour of pressurised fluid when pressure is released
 - strategies for guarding moving parts in machinery, human factors related to machine guarding, safe design principles, features and limitations
 - knowledge of industry practices related to permit to work and isolation and tag out systems
 - registration requirements of plant, licensing and certification competencies
 - basic knowledge of organisational behaviour and culture as it impacts on OHS and on change
 - ethics related to professional practice
 - professional liability in relation to providing advice
 - knowledge of organisational OHS policies and procedures
 - nature of workplace processes (including work flow, planning and control) and hazards relevant to the particular workplace
 - language, literacy and cultural profile of the workgroup
 - organisational culture as it impacts on the workgroup.

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the unit descriptor, performance criteria, The range statement and the Assessment Guidelines for the Public Sector Training Package.

Units to be assessed together

Co-assessed units that may be assessed with this unit to increase the efficiency and realism of the assessment process include:

- PSPETHC501B Promote the values and ethos of public service
- PSPGOV512A Use complex workplace communication strategies
- PSPLEGN501B Promote compliance with legislation in the public sector
- PSPSOHS504A Apply principles of OHS risk management
- PSPSOHS505A Manage hazards in the work environment.

Overview of evidence requirements

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms:

- knowledge requirements of this unit
- skill requirements of this unit
- application of employability skills as they relate to this unit.

Resources required to carry out assessment

Resources essential for assessment include:

- legislation, policy, procedures and protocols relating to the management of hazards associated with plant
- workplace documentation, case studies and workplace scenarios to capture the range of situations likely to be encountered when monitoring and facilitating the management of hazards associated with plant.

Where and how to assess evidence

Valid assessment of this unit requires:

- a workplace environment or one that closely resembles normal work practice and replicates the range of conditions likely to be encountered when monitoring and facilitating the management of hazards associated with plant, including coping with difficulties, irregularities and breakdowns in routine
- monitoring and facilitation of hazard management associated with plant in a range of 3 or more contexts or occasions, over time.

Assessment methods should reflect but not exceed workplace demands, such as literacy, and the needs of individuals who might be disadvantaged.

Assessment methods suitable for valid and reliable assessment of

EVIDENCE GUIDE

this unit must use authenticated evidence from the workplace and/or training courses and may include a combination of two or more of:

- workplace projects
- simulation or role plays
- case studies and scenarios
- observation.
- portfolios.

The assessment environment should not disadvantage the candidate and where the person has a disability the principle of reasonable adjustment should be applied during assessment.

For consistency of assessment

Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments.

Range Statement

RANGE STATEMENT

The range statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The range statement also provides a focus for assessment. It relates to the unit as a whole. Text in *italics* in the Performance criteria is explained here.

Plant (as defined in National Standard for Plant) may include

- any machinery, equipment (including scaffolding), appliance, implement or tool and any other component, fitting or accessory
- fixed and or specified plant as related to Commonwealth, state and territory OHS legislation
- mobile plant and load shifting equipment
- pressure equipment such as boilers, pressure vessels and pressure piping
- electrical installation and plant such as wiring, accessories, fittings, consuming devices, control and protective gear, converters and generators

Sources of information, data and advice on plant and equipment hazards may include

- relevant Commonwealth, state or territory OHS legislation, regulations, associated standards and codes of practice
- Australian standards
- National Plant and Certification Standards and associated guidance material
- National Occupational Health and Safety Commission (NOHSC)
- state and territory OHS regulatory bodies
- professional associations such as Institute of Engineers Australia, Design Institute of Australia, Building Design Professionals
- employer groups, unions and industry bodies
- OHS professionals including those working in safety engineering, occupational hygiene, occupational health, injury management, toxicology, ergonomics and epidemiology
- manufacturers' manuals and specifications
- employees and operators
- hazard, incident and investigation reports
- workplace inspections
- minutes of meetings
- reports
- audits
- questionnaires and surveys

A hazard is defined as

- a source or a situation with a potential for harm in terms of

RANGE STATEMENT

- human injury or ill health, damage to property, damage to the environment, or a combination of these
- Systems of work associated with plant may be described in***
- organisation policies and procedures addressing areas, such as operations, maintenance, purchasing
 - management systems, such as fleet management, procurement, design and quality assurance
 - manufacturers' operations manuals
 - standard operating procedures
 - documents describing how tasks, projects, inspections, jobs and processes are to be undertaken
- Specialist advisors may be internal or external and include***
- ergonomists
 - occupational hygienists
 - engineers (such as design, acoustic, safety, mechanical, maintenance)
 - injury management personnel
 - manufacturers
 - designers
 - suppliers and distributors
- Stakeholders may include***
- managers
 - employees
 - supervisors
 - health and safety and other employee representatives
 - OHS committees
- Key personnel may include***
- maintenance and trade persons
 - workplace trainers and assessors
 - managers
 - supervisors
 - users/operators
 - OHS representatives
- Recording and reporting procedures may include***
- policies and procedures underpinning systems of management, particularly OHS
 - purchasing and contracting procedures
 - standard operating procedures
 - job and task statements
 - documents describing how tasks, projects, inspections, jobs and processes are to be undertaken
 - job safety analysis worksheets
 - risk assessments
 - plant and equipment registers
 - maintenance and service logs, sheets, cards, diaries
 - quality system documentation

RANGE STATEMENT

- Risk is***
- the chance of something happening that will result in injury or damage
 - measured in terms of consequences (injury or damage) and likelihood of the consequence
- Risk assessment includes identification of***
- factors contributing to risk
 - current controls and their adequacy
 - any discrepancy between current controls and required standard and quality of control
 - prioritisation or ranking of risk where appropriate
- A risk register may be an internal or external document customised for the workplace and include***
- a list of hazards, their location and people exposed
 - a range of possible scenarios or circumstances under which the hazards may cause injury or damage
 - the results of risk assessments
 - and may include possible control measures and proposed dates for implementation
- Hierarchy of control means developing risk controls within the following priority order***
- eliminate hazards
 - and where this is not practicable, minimise risk by:
 - substitution
 - isolating the hazard from personnel
 - using engineering controls
 - using administrative controls (eg procedures, training)
 - using personal protective equipment (PPE)
- Access and egress to plant must allow for***
- access to parts of plant which require cleaning and maintenance
 - access/egress to operator's workstation for normal and emergency conditions
 - may include systems to enable safe access and egress such as:
 - emergency lighting
 - safety doors
 - alarm systems
- Dangerous parts***
- are potential contact or entrapment points to which the operator may be exposed during:
 - operation
 - examination
 - lubrication
 - adjustment
 - maintenance
- Guarding may include***
- permanently fixed physical barriers where no access of any part of a person is required
 - interlocking physical barriers where access to dangerous areas is required during operation
 - physical barriers securely fixed by means of fasteners or

RANGE STATEMENT

- devices
- presence-sensing safeguarding systems
 - be suitability identified
 - have nature and function clearly indicated
 - be readily and conveniently located
 - be guarded to prevent unintentional activation
 - be capable of locking in 'off' position to enable disconnection of all motive power and forces
 - be of 'fail safe' type
- Operational controls must***
- prominently, clearly and durably marked
 - coloured red (push buttons, bars or handles)
 - unable to be affected by electrical or electronic circuit malfunction
 - fitted where risk assessment identifies a need
 - relevant state and territory jurisdictional requirements
- Emergency stops and warning devices must be***
- Registration and design of plant may include***
- Operator certification is***
- the process by which a certificate to use or operate industrial equipment is issued by a certifying authority
- Permit to work procedures or certification are defined as written authority documents that may***
- include approval to undertake work and activities including tests, measurements and monitoring such as hot work permits for welding and cutting in hazardous environments, and confined space entry
 - be authorised by a responsible or designated person directly in control of the work
 - certify appropriate precautions and controls to be followed
 - incorporate checklists, conditions and actions such as the frequency and duration of the work and atmospheric tests
 - follow recognised industry standard recording practices
- Isolation procedures, known also as lock-out and tag-out, is a safety device system and may***
- include devices such as isolating switches, locks, safety bars, shields, full pressure blanks, spectacle blanks to lock controls - especially moving parts, equipment, systems or devices with stored energy - to an 'off' position while a worker is in a vulnerable position such as:
 - performing maintenance on rotating equipment, and electrical and hydraulic systems
 - locking switches with keys needed to open the lock
 - be used in conjunction with a danger tag system that promotes greater safety consciousness amongst the workforce for all situations in which danger to persons could arise from:
 - the operation of machinery, plant or equipment
 - the flow of steam, electricity, gases or liquids

RANGE STATEMENT

- the use of faulty or unsafe plant and equipment
 - include multiple locking systems and involve written authorisation by a competent person
- Other personnel may include*
- visitors
 - public
 - general community
 - other employees and contractors
- Modifications to plant and equipment may include*
- changes to physical specification of plant, parts or associated tools
 - changes in specification of raw material or plant operating materials, such as lubricants
 - changes to work processes and systems
 - introduction of contractual arrangements
 - introduction of new and emerging technology
- Registration means*
- the administrative process by which a certifying authority requires an organisation or industry to register plant, machinery and equipment
- Operator licensing and/or certification means*
- any form of regulation that restricts entry to an occupation or a profession to those who meet competency related requirements stipulated by a regulatory authority. (This includes any physical or implied licence, registration, certification, approval or permit that is required by a person in order to gain employment/self employment)
- OHS requirements related to plant may include*
- OHS obligations and responsibilities to provide safe equipment
 - OHS consultation and participation
 - systematic hazard identification, risk analysis and evaluation, and risk control
 - compliance licensing and certification competencies for operators applicable to state and/or territory legislation
 - documentation requirements relating to plant
 - OHS training and information
 - purchasing/procurement policy and procedures
 - OHS policies and procedures
 - safe work procedures
 - task observation
 - safe behaviour and defensive driving practices
 - emergency preparedness
 - incident investigation
- Training requirements should be defined for*
- person(s) undertaking supervised and/or accredited training towards assessment for a particular certificate
 - persons requiring training for safe use of plant or equipment

RANGE STATEMENT

- Licensing, certification and registration requirements may be defined in***
- relevant national and Australian standards
 - state and territory OHS legislation and codes of practice
 - licensing and certification requirements applicable to state and/or territory legislation including OHS, dangerous goods, hazardous substances, mining and petrochemical
- Other legal requirements include***
- relevant state or territory transport regulations
- As low as reasonably achievable (ALARA) means***
- a basic concept where risks are kept as low as is reasonably achievable
- Appropriate records include***
- compliance with legislative requirements
 - risk assessments
 - noise and vibration analysis
 - maintenance and modification records

Unit Sector(s)

Competency field

Competency field Specialist Occupational Health&Safety

PSPSOHS507A Facilitate the application of principles of occupational health to control OHS risk

Modification History

Not applicable.

Unit Descriptor

Unit descriptor

This unit covers application of principles of occupational health and implementation of strategies to control OHS risk.

In practice, facilitating the application of principles of occupational health to control OHS risk may overlap with other generalist or specialist public sector work activities such as promoting ethical practice, using complex communication strategies, undertaking research and analysis, coordinating resource usage, promoting compliance with legislation, etc.

Application of the Unit

Application of the unit

This unit applies to individuals with managerial responsibility for managing OHS risk in the workplace to consider the impact of agents in the workplace on the health of workers, and the physical and psychosocial effects to workers' health arising from work organisation and work processes. It includes contributing to the implementation of developed strategies, systems and plans, as well as recognising the need for expert advice.

It includes identifying occupational health hazards, seeking solutions and interventions to bring about change in the workplace, and facilitating risk assessment and controls to reduce exposure to the effects of hazardous materials and hazardous conditions in the workplace.

Hazards of both short-term and long-term latency, including those hazards that impact on health are covered in PSPSOHS505A Manage hazards in the work environment.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

Employability skills This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Where *italicised* text is used, further information is detailed in the required skills and knowledge and/or the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Identify the potential for adverse effects on health from agents in the workplace	<p>1.1 <i>External sources of information and data</i> are accessed to assist in identifying <i>agents</i> in the workplace with a potential to adversely affect health.</p> <p>1.2 <i>Workplace sources of information and data</i> are reviewed to access information to assist in identifying agents in the workplace with a potential to adversely affect health.</p> <p>1.3 The role of individual difference in susceptibility to occupational disease or injury is considered in identifying adverse effects on health.</p> <p>1.4 Situations are identified where <i>health professionals</i> may be required.</p>
2. Identify the potential for adverse effects on health related to the interaction of the work environment, work systems and people	<p>2.1 Knowledge of sources of occupational disease and injury are applied to analyse <i>job characteristics and nature of work</i> and the <i>context of work</i> to identify situations with a potential for physical or psychological harm to employees.</p> <p>2.2 Workplace and <i>internal sources of information and data</i> are accessed, taking account of privacy requirements, to assist in identifying situations with a potential for physical or psychological harm to employees.</p> <p>2.3 The role of individual differences in susceptibility is considered in assessing the potential scope and impact of situations with adverse effects on health.</p>
3. Facilitate the control of risks to health in the workplace	<p>3.1 The <i>hierarchy of control</i> is applied to control risks to occupational health.</p> <p>3.2 Workplace policies, procedures and schedules are examined to minimise situations with a potential to adversely cause physical or psychological harm.</p> <p>3.3 <i>Organisational communication processes</i> are examined to maximise clarity of roles and employee involvement.</p>
4. Participate in the development of strategies to communicate occupational health information and data	<p>4.1 <i>Target groups</i> for advice are researched and identified.</p> <p>4.2 Health effects that may result from work and working environment are interpreted and discussed with <i>stakeholders</i></p> <p>4.3 Communication strategies are implemented in accordance with <i>legal and ethical requirements</i>.</p> <p>4.4 The effectiveness of health communication processes is evaluated and monitored.</p>
5. Monitor and facilitate occupational health, education training	<p>5.1 The need for health information and data, and training is identified in consultation with workplace stakeholders.</p> <p>5.2 Personnel including health professionals and <i>resources</i> to deliver the occupational health training are identified.</p>

ELEMENT

PERFORMANCE CRITERIA

- 5.3 Roles and responsibilities for delivery of training are identified and allocated.
- 5.4 Health information and data, and education is provided to managers and workers in a manner that facilitates understanding and uptake.
- 6. Review and evaluate the occupational health program**
- 6.1 Outcomes of occupational health programs evaluated through *the evaluation plan*.
- 6.2 The overall impact of the occupational health program is evaluated and documented.
- 6.3 Recommendations are made for future programs as a result of the evaluation.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the essential skills and knowledge and their level, required for this unit.

Required skills:

Look for evidence that confirms skills in:

- relating to people from a range of social, cultural and ethnic backgrounds and physical and mental abilities
- communicating effectively with personnel at all levels of organisation and OHS specialists and, as required, emergency service personnel
- preparing more detailed reports for a range of target groups including OHS committee, OHS representatives, managers and supervisors
- applying continuous improvement and action planning processes
- managing own tasks within time frame
- using consultation and negotiation skills, particularly in relation to developing plans and implementing and monitoring designated actions
- contributing to the assessment of the resources needed to systematically manage OHS and, where appropriate, access resources
- analysing relevant workplace information and data, and make observations including of workplace tasks and interactions between people, their activities, equipment, environment and systems
- carrying out simple arithmetical calculations (eg % change), and produce graphs of workplace information and data to identify trends and recognise limitations
- using language and literacy skills appropriate to the workgroup and the task
- using basic computer and information technology skills to access internal and external information and data on OHS.

Required knowledge:

Look for evidence that confirms knowledge and understanding of:

- structure and forms of legislation including regulations, codes of practice, associated standards and guidance material
- methods of providing evidence of compliance with OHS legislation
- requirements under hazard specific OHS legislation and codes of practice
- hierarchy of control and considerations for choosing between different control measures, such as possible inadequacies of particular control measures
- internal and external sources of OHS information and data
- how the characteristics and composition of the workforce impact on risk and the systematic approach to managing OHS eg
 - labour market changes
- structure and organisation of workforce eg part-time, casual and contract workers, shift rosters, geographical location
- language, literacy and numeracy

REQUIRED SKILLS AND KNOWLEDGE

- communication skills
- cultural background/workplace diversity
- gender
- workers with special needs
- basic knowledge of organisational behaviour and culture as it impacts on OHS and on change
- ethics related to professional practice
- knowledge of organisational OHS policies and procedures
- nature of workplace processes (including work flow, planning and control) and hazards relevant to the particular workplace
- sources of occupational disease and their prevention
- basic knowledge of toxicology of hazardous materials and potential health effects in the workplace
- key personnel, including identifying 'change agents', within workplace management structure
- formal and informal communication and consultation processes and key personnel related to communication
- language, literacy and cultural profile of the workgroup
- organisational culture as it impacts on the workgroup

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the unit descriptor, performance criteria, The range statement and the Assessment Guidelines for the Public Sector Training Package.

Units to be assessed together Co-assessed units that may be assessed with this unit to increase the efficiency and realism of the assessment process include:

- PSPETHC501B Promote the values and ethos of public service
- PSPGOV512A Use complex workplace communication strategies
- PSPLEGN501B Promote compliance with legislation in the public sector
- PSPSOHS501A Participate in the coordination and maintenance of a systematic approach to managing OHS
- PSPSOHS504A Apply principles of OHS risk management.

Overview of evidence requirements In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms:

- knowledge requirements of this unit
- skill requirements of this unit
- application of employability skills as they relate to this unit.

Resources required to carry out assessment Resources essential for assessment include:

- legislation, policy, procedures and protocols relating to the control of OHS risk
- workplace documentation, case studies and workplace scenarios to capture the range of situations likely to be encountered when facilitating the application of principles of occupational health to control OHS risk.

Where and how to assess evidence Valid assessment of this unit requires:

- a workplace environment or one that closely resembles normal work practice and replicates the range of conditions likely to be encountered when facilitating the application of principles of occupational health to control OHS risk, including coping with difficulties, irregularities and breakdowns in routine
- facilitating the application of principles of occupational health to control OHS risk in a range of 3 or more contexts or occasions, over time.

Assessment methods should reflect but not exceed workplace demands, such as literacy, and the needs of individuals who might be disadvantaged.

EVIDENCE GUIDE

Assessment methods suitable for valid and reliable assessment of this unit must use authenticated evidence from the workplace and/or training courses and may include a combination of two or more of:

- workplace projects
- simulation or role plays
- case studies and scenarios
- observation.
- portfolios.

The assessment environment should not disadvantage the candidate and where the person has a disability the principle of reasonable adjustment should be applied during assessment.

For consistency of assessment

Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments.

Range Statement

RANGE STATEMENT

The range statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The range statement also provides a focus for assessment. It relates to the unit as a whole. Text in italics in the Performance criteria is explained here.

External sources of information and data may include

- OHS regulatory authorities
- National Occupational Health and Safety Commission (NOHSC)
- industry bodies
- employer groups
- unions
- OHS specialists
- legislation, codes of practice, associated standards and guidance material
- databases such as national and state injury data, NICNAS (National Industrial Chemicals Notification and Assessment Scheme)
- journals and web sites
- manufacturers' manuals and specifications

Agents may be

- chemical
- physical
- biological
- ergonomic
- psychosocial

Workplace sources of information and data may include

- employees
- hazard, incident and investigation reports
- written and verbal complaints
- minutes of meetings
- reports
- audits
- material safety data sheets (MSDSs)
- questionnaires

Health professionals may include

- occupational health physicians
- general practitioners
- occupational health nurses
- health educators

Job characteristics and nature of work may

- workplace processes and the hazards they produce
- toxicology of hazardous materials

RANGE STATEMENT

include

- health effects of physical hazards in the workplace such as noise, vibration, thermal extremes
- effectiveness of different control strategies
- relative costs of implementation of appropriate control strategies
- job demands such as high physical, mental or emotional demands; lack of variety; short work cycle; workload
- work load and scheduling issues such as pace; shift work, inflexible work schedules; unpredictable, long or unsocial hours
- participation in decision making and control of workload
- adequacy of or faulty equipment

Context of work may include

- organisational factors such as communication; levels of support for problem solving and personal development; changing employment patterns; and definition of organisational objectives
- interpersonal relationships at work, including with supervisors and peers
- role ambiguity, role conflict, role responsibilities
- career issues including promotion, job security and skills

Internal sources of information and data may include

- human resource, industrial relations, personnel management and staff
- occupational health and employee assistance staff
- supervisors
- managers
- OHS and employee representatives

Hierarchy of control means developing risk controls within the following priority order

- eliminate hazards
- and where this is not practicable, minimise risk by:
 - substitution
 - isolating the hazard from personnel
 - using engineering controls
 - using administrative controls (eg procedures, training)
 - using personal protective equipment (PPE)

Organisational communication processes may include

- formal and informal communication processes
- training
- position descriptions and performance appraisal processes

Target groups identification includes

- characteristics such as, but not limited to:
 - size of workforce, group, team etc
 - location
 - variability of roles, responsibilities etc
 - language and literacy
 - cultural background

RANGE STATEMENT

- characteristics influencing communication strategies, such as access to information and data and empowerment
- Stakeholders may include*
- employees
 - managers
 - health and safety and other employee representatives
 - OHS committees
 - families of employees
 - local community
- Ethical requirements may include*
- confidentiality
 - privacy
 - equity
 - workplace diversity
- Resources may include*
- physical
 - financial
- The evaluation plan may include*
- appropriate communication strategies for the workplace
 - training content
 - training availability including delivery schedule
 - identification of relevant target groups
 - impact on workforce
 - impact on improvements to the workplace as a result of interventions

Unit Descriptor

Unit descriptor

This unit covers participation in the planning, conduct and reporting of investigations of incidents which have resulted in, or have a potential to result in, injury or damage. Situations may range from relatively minor through to major incidents.

In practice, participating in the investigation of incidents may overlap with other generalist or specialist public sector work activities such as promoting ethical practice, using complex communication strategies, undertaking research and analysis, coordinating resource usage, promoting compliance with legislation, etc.

Application of the Unit

Application of the unit This unit applies to individuals with managerial responsibility for occupational health and safety (OHS) who are required to participate in the investigation of incidents for prevention.

It includes conducting an initial assessment of the situation, establishing the scope and legal parameters of the investigation, conducting a systematic analysis to identify underlying causes and actions for prevention and reporting on the outcomes of the investigation.

The unit applies to both straightforward investigations as well as formal investigations of complex situations. Where the investigation is of a complex situation or the application of the skills and knowledge is in a larger organisation, procedures for incident investigation will exist. In smaller organisations there may not be existing investigation procedures and external OHS expertise should be accessed where required.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

Employability skills This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Where *italicised* text is used, further information is detailed in the required skills and knowledge and/or the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Facilitate initial assessment of situation	1.1 Area is checked to ensure that it is safe and arrangements have been made to meet initial needs of those involved in the incident. 1.2 Integrity of the site and personnel is established and maintained in accordance with legal requirements and to ensure objectivity of information collected. 1.3 Statutory and legal obligations are identified and, if required, <i>relevant government agencies</i> advised. 1.4 <i>Key persons within the organisation</i> are notified. 1.5 Factors affecting the <i>complexity</i> of the investigation are determined and notified. 1.6 <i>Stakeholders and interested parties</i> are identified and notified as appropriate.
2. Participate in the establishment of an investigation processes	2.1 Organisational policies and procedures for incident investigation are accessed and known. 2.2 <i>Investigation team</i> is convened appropriate to the level of the investigation. 2.3 Scope of the investigation is defined taking account of legislative requirements. 2.4 Involvement of interested parties is facilitated in accordance with legislative requirements. 2.5 Resources required to conduct the investigation, including the need for expert advice (if required), are identified and sourced. 2.6 <i>Barriers to investigation</i> are identified and addressed. 2.7 Action plans and time lines are developed by the investigation team.
3. Collect information and data for analysis	3.1 Sources of information and data are identified and accessed. 3.2 Incident site, equipment and other evidence involved is inspected. 3.3 Gathering of information and data by others is facilitated. 3.4 Statements, photographs, measurements and documentary evidence are taken and recorded, taking account of objectivity, confidentiality and legal implications. 3.5 Site, evidence and all necessary documentation is appropriately secured. 3.6 Members of investigation team are appropriately involved.
4. Analyse information and data gathered to identify immediate	4.1 <i>Conceptual basis for the analysis</i> is identified and understood by the investigation team.

ELEMENT	PERFORMANCE CRITERIA
and underlying causes and practical prevention measures	<p>4.2 <i>Time line of events</i> leading up to incident is constructed.</p> <p>4.3 <i>Causative event/s</i> is researched.</p> <p>4.4 <i>Conditions and circumstances</i> that contributed to the causative event are identified.</p> <p>4.5 Intervention points on the time line for prevention are identified.</p> <p>4.6 Strategies to prevent the re-occurrence of the incident are identified.</p>
5. Compile investigation report	<p>5.1 Results of analysis are documented in a format to suit the required <i>target audiences</i> and legal requirements.</p> <p>5.2 Report is phrased in objective terms and cites evidence and reasons for conclusions.</p> <p>5.3 Report includes recommendations for prevention.</p> <p>5.4 Following appropriate authorisation, relevant information and data is disseminated to key personnel, stakeholders and external agencies as appropriate.</p> <p>5.5 Findings from the report are used to develop further prevention strategies.</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the essential skills and knowledge and their level, required for this unit.

Required skills:

Look for evidence that confirms skills in:

- relating to people from a range of social, cultural and ethnic backgrounds and physical and mental abilities
- communicating effectively with personnel at all levels of organisation and OHS specialists and, as required, emergency service personnel
- preparing legally defensible reports for a range of target groups including OHS committee, OHS representatives, managers and supervisors
- managing own tasks within time frame
- using consultation and negotiation skills, particularly in relation to developing plans and implementing and monitoring designated actions
- analysing relevant workplace information and data, and make observations including of workplace tasks and interactions between people, their activities, equipment, environment and systems
- using language and literacy skills appropriate to the workgroup and the task
- using basic computer and information technology skills to access internal and external information and data on OHS
- paying attention to detail when making observations and recording outcomes.

Required knowledge:

Look for evidence that confirms knowledge and understanding of:

- roles and responsibilities under OHS legislation of employees, including supervisors and contractors
- legislative requirements for OHS information and data, and consultation
- rights of OHS inspectors
- requirements for record keeping that addresses OHS, privacy and other legislation
- state/territory/Commonwealth OHS legislation (Acts, regulations, codes of practice, associated standards and guidance material) including prescriptive and performance approaches and links to other relevant legislation such as industrial relations, equal employment opportunity, workers compensation, rehabilitation etc
- structure and forms of legislation including regulations, codes of practice, associated standards and guidance material
- concept of common law duty of care
- methods of providing evidence of compliance with OHS legislation
- principles and practices of continuity and validity of evidence retention for potential legal action
- requirements for reporting under OHS and other relevant legislation including notification

REQUIRED SKILLS AND KNOWLEDGE

and reporting of incidents

- requirements under hazard specific OHS legislation and codes of practice
- basic principles of incident causation and injury processes
- characteristics, mode of action and units measurement of major hazard types
- hierarchy of control and considerations for choosing between different control measures, such as possible inadequacies of particular control measures
- standard industry controls for a range of hazards
- principles and practices of systematic approaches to managing OHS
- other function areas that impact on the management of OHS
- internal and external sources of OHS information and data
- how the characteristics and composition of the workforce impact on risk and the systematic approach to managing OHS eg
 - labour market changes
 - structure and organisation of workforce eg part-time, casual and contract workers, shift rosters, geographical location
 - language, literacy and numeracy
 - communication skills
 - cultural background/workplace diversity
 - gender
 - workers with special needs
- ethics related to professional practice
- knowledge of organisational OHS policies and procedures
- nature of workplace processes (including work flow, planning and control) and hazards relevant to the particular workplace
- formal and informal communication and consultation processes and key personnel related to communication
- language, literacy and cultural profile of the workgroup
- organisational culture as it impacts on the workgroup

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the unit descriptor, performance criteria, The range statement and the Assessment Guidelines for the Public Sector Training Package.

Units to be assessed together Co-assessed units that may be assessed with this unit to increase the efficiency and realism of the assessment process include:

- PSPETHC501B Promote the values and ethos of public service
- PSPGOV512A Use complex workplace communication strategies
- PSPLEGN501B Promote compliance with legislation in the public sector
- PSPSOHS504A Apply principles of OHS risk management
- PSPSOHS505A Manage hazards in the work environment
- PSPSOHS506A Monitor and facilitate the management of hazards associated with plant.

Overview of evidence requirements In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms:

- knowledge requirements of this unit
- skill requirements of this unit
- application of employability skills as they relate to this unit.

Resources required to carry out assessment Resources essential for assessment include:

- legislation, policy, procedures and protocols relating to the investigation of incidents
- workplace documentation, case studies and workplace scenarios to capture the range of situations likely to be encountered when participating in the investigation of incidents.

Where and how to assess evidence Valid assessment of this unit requires:

- a workplace environment or one that closely resembles normal work practice and replicates the range of conditions likely to be encountered when participating in the investigation of incidents, including coping with difficulties, irregularities and breakdowns in routine
- participation in the investigation of incidents in a range of 3 or more contexts or occasions, over time.

Assessment methods should reflect but not exceed workplace demands, such as literacy, and the needs of individuals who might be disadvantaged.

Assessment methods suitable for valid and reliable assessment of

EVIDENCE GUIDE

this unit must use authenticated evidence from the workplace and/or training courses and may include a combination of two or more of:

- workplace projects
- simulation or role plays
- case studies and scenarios
- observation.
- portfolios.

The assessment environment should not disadvantage the candidate and where the person has a disability the principle of reasonable adjustment should be applied during assessment.

For consistency of assessment

Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments.

Range Statement

RANGE STATEMENT

The range statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The range statement also provides a focus for assessment. It relates to the unit as a whole. Text in *italics* in the Performance criteria is explained here.

- Relevant government agencies may include***
- OHS authorities
 - environment protection agencies
 - police and other emergency services
- Key persons within the organisation may include***
- senior management
 - OHS specialists within organisation
 - organisational legal advisor
 - union or staff association representatives
 - workgroup members
 - supervisors
 - personnel involved in incident/situation
 - employee assistance personnel
 - external specialist personnel and contractors
- Complexity may be affected by***
- legal implications arising from the incident or post incident related matters
 - involvement of external agencies
 - language competencies of parties involved
 - technical implications
 - seriousness of injury or other outcomes
 - conflict of interest issues
 - existence of secondary hazards
 - administrative implications
 - level of public or political interest
 - international conventions
 - number of other parties, including sub-contractors
- Stakeholders and interested parties may include***
- community
 - the organisation's board or advisory council
 - coroner
 - government agencies, including OHS and emergency service agencies
 - managers
 - insurance companies
 - employees and family members

- politicians
- workgroup members and people who may be exposed to similar situations
- unions
- employers
- designers
- manufacturers
- suppliers and distributors
- persons in control of workplaces
- sub-contractors
- importers
- installers
- media

Investigation team should include persons

- familiar with the task and the work environment
- responsible for performance standards within the work environment (eg supervisor)
- with OHS expertise
- in OHS representative role
- in authority in organisation such as company/organisational legal advisor and technical experts as required
- Note: that different roles may be performed by the one person, especially in smaller organisations

Barriers to investigation may include

- changes to incident scene
- length of time from when incident occurred/first identified
- management and employee attitude including desire to protect self and others
- political and community stakeholder sensitivity
- time limits imposed
- limited resources available
- legal restrictions or limitations (temporary, short-term or long-term)
- geographical location and/or accessibility
- economic implications
- condition of witnesses
- cultural issues
- language
- availability of research data and analysis or testing equipment
- availability of technical design information and data relevant to the investigation
- lack of records

Conceptual basis for the analysis should

- emphasise analysis of the systems in place at the time of the incident
- focus on the 'why' and 'how' rather than the 'what'

- encourage an open minded, objective approach
 - not focus on individual behaviour or fault
 - extend back in time as far as required and not just focus on immediate events
- Time line of events should***
- A causative event is***
- the key event that resulted in the particular outcome/s of injury or damage
- Condition is***
- a permanent situation such as type of equipment, work practice, design of work environment
- Circumstance is***
- a short-term situation that is relatively unusual, such as a storm or when a key person is absent
- Target audiences for the report/s may include:***
- board of management
 - senior managers
 - OHS committee
 - external agencies
 - police or coroner

Competency field Specialist Occupational Health&Safety

PSPSOHS601A Develop a systematic approach to managing OHS

Modification History

Not applicable.

Unit Descriptor

Unit descriptor

This unit covers the knowledge and skills required to effectively design and develop a systematic approach to managing OHS for a specific workplace to ensure it is, as far as practicable, safe and without risks to the health of employees and others. This includes the systems, documentation, strategies and plans necessary to manage OHS and its evaluation in the workplace and may include development and implementation of an OHS Management System (OHSMS).

In practice, developing a systematic approach to managing OHS may overlap with other generalist or specialist public sector work activities such as promoting ethical practice, applying government systems, influencing opinion, fostering leadership, managing resources, managing compliance with legislation, etc.

Application of the Unit

Application of the unit

This unit applies to individuals who are required to effectively design and develop a systematic approach to managing OHS for a specific workplace to ensure it is, as far as practicable, safe and without risks to the health of employees and others.

It includes analysing the workplace to clarify needs, selecting an appropriate standard, developing systematic approaches and associated documentation, and planning, supporting and monitoring the systematic approach.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

Employability skills This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Where *italicised* text is used, further information is detailed in the required skills and knowledge and/or the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Analyse the workplace to identify needs	1.1 <i>External motivators</i> for development of <i>systematic approaches to managing OHS</i> are identified in consultation with managers and other <i>stakeholders</i> . 1.2 <i>Internal motivators</i> for development of systematic approaches to managing OHS are identified. 1.3 <i>Workplace factors</i> that may impact on the design and development of systematic approaches to managing OHS are identified.
2. Design integrated approaches to managing OHS	2.1 <i>Relevant standards</i> , codes of practice and guidance material that provide a basis for systematic approaches to managing OHS are reviewed, in consultation with managers and other <i>stakeholders</i> . 2.2 <i>Elements of systematic approaches to managing OHS</i> are defined to suit the workplace in consultation with stakeholders. 2.3 Elements are evaluated for compliance with <i>legal obligations</i> . 2.4 Situations are identified where <i>OHS specialists</i> and <i>technical advisors</i> may be required.
3. Plan and develop integrated approaches to managing OHS	3.1 <i>Policies and procedures</i> are developed to support systematic approaches to managing OHS, taking account of workplace factors. 3.2 Links with <i>other functional areas and management systems</i> are identified and incorporated. 3.3 Relevant roles and responsibilities are identified and allocated. 3.4 Training needs for the introduction and ongoing maintenance of systematic approaches to managing OHS are identified and documented. 3.5 <i>Resources</i> necessary to introduce and maintain systematic approaches to managing OHS are identified and documented. 3.6 A strategic implementation plan is developed to manage OHS.
4. Support planning and implementation of integrated approaches to managing OHS	4.1 Priorities for action are determined in consultation with managers and employee representatives. 4.2 Action plans are developed with allocated responsibilities and time lines. 4.3 Advice and support are provided to managers and other <i>key personnel</i> . 4.4 Implementation is monitored, in consultation with

ELEMENT

PERFORMANCE CRITERIA

- stakeholders, to ensure practicality, compatibility with other management systems and management practices, and acceptance of systematic approaches and support of programs by all levels of the organisation.
- 4.5 Regular reports and feedback including recommendations for adjustment in the implementation are provided to key personnel.
- 5. Evaluate the design and development of integrated approaches to managing OHS**
- 5.1 The *evaluation protocol* is designed in consultation with stakeholders.
- 5.2 A plan is developed for collection of *information and data*.
- 5.3 Information and data is analysed and evaluated
- 5.4 Recommendations are made for improvement in the systematic management of OHS as a result of the evaluation findings.
- 5.5 A report is provided to management on the outcomes of the evaluation and the recommendations for further development and improvement.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the essential skills and knowledge and their level, required for this unit.

Required skills:

Look for evidence that confirms skills in:

- relating to people from a range of social, cultural and ethnic backgrounds and physical and mental abilities
- communicating effectively with personnel at all levels of organisation and OHS specialists and, as required, emergency service personnel
- preparing reports for a range of target groups including OHS committee, OHS representatives, managers, supervisors and other stakeholders
- advanced written communication including development of policies and procedures, plans
- applying continuous improvement and action planning processes
- contributing effectively to the strategic OHS performance of the organisation
- achieving change using project management processes
- managing own tasks within time frame
- using consultation and negotiation skills, particularly in relation to developing plans and implementing and monitoring designated actions
- contributing to the assessment of the resources needed to systematically manage OHS and, where appropriate, access resources
- interpreting information and data to identify areas for improvement
- conducting effective formal and informal meetings
- using information and data gathering techniques such as brainstorming, polling, interviews
- using language and literacy skills appropriate to the workgroup and the task
- using computer and information technology skills to access internal and external information and data on OHS.

Required knowledge:

Look for evidence that confirms knowledge and understanding of:

- roles and responsibilities under OHS legislation of employees including supervisors, contractors, OHS inspectors etc
- principles of duty of care including concepts of causation, foreseeability, preventability
- legislative requirements for OHS information and data, and consultation
- roles and responsibilities in relation to communication and consultation for OHS committees, OHS representatives, line management, employees and inspectors
- state/territory/Commonwealth OHS legislation (Acts, regulations, codes of practice, associated standards and guidance material) including prescriptive and performance approaches and links to other relevant legislation such as industrial relations, equal employment opportunity, workers compensation, rehabilitation etc
- structure and forms of legislation including regulations, codes of practice, associated standards and guidance material

REQUIRED SKILLS AND KNOWLEDGE

- difference between common law and statutory law
- concept of common law duty of care
- requirements for recordkeeping that address OHS, privacy and other relevant legislation
- nature and use of information and data that provides valid and reliable results on performance of OHS management processes (including positive performance indicators (PPIs) and limitations of other types of measures
- development of tools such as PPIs in assessment of OHS performance
- requirements for reporting under OHS and other relevant legislation including notification and reporting of incidents
- principles of incident causation and injury processes
- hierarchy of control and considerations for choosing between different control measures, such as possible inadequacies of particular control measures
- principles and practices of a systematic approach to managing OHS
- requirements of OHS and standards related to systematically managing OHS
- other function areas that impact on the management of OHS
- internal and external sources of OHS information and data
- how the characteristics and composition of the workforce impact on risk and the systematic approach to managing OHS eg
 - labour market changes
 - structure and organisation of workforce eg part-time, casual and contract workers, shift rosters, geographical location
 - language, literacy and numeracy
 - communication skills
 - cultural background/workplace diversity
 - gender
 - workers with special needs
- organisational behaviour and culture as it impacts on OHS and on change
- ethics related to professional practice
- methods of providing evidence of compliance with OHS legislation
- professional liability in relation to providing advice
- principles of effective meetings including agendas, action planning, chair and secretarial duties, minutes and action items
- organisational OHS policies and procedures
- nature of workplace processes (including work flow, planning and control) and hazards relevant to the particular workplace
- key personnel, including identifying 'change agents', within workplace management structure
- formal and informal communication and consultation processes and key personnel related to communication
- language, literacy and cultural profile of the work group
- organisational culture as it impacts on the workgroup

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the unit descriptor, performance criteria, The range statement and the Assessment Guidelines for the Public Sector Training Package.

Units to be assessed together

Co-assessed units that may be assessed with this unit to increase the efficiency and realism of the assessment process include:

- PSPETHC601B Maintain and enhance confidence in public service
- PSPGOV605A Persuade and influence opinion
- PSPLEGN601B Manage compliance with legislation in the public sector
- PSPSOHS602A Develop OHS information and data analysis and reporting and recording processes
- PSPSOHS608A Conduct an OHS audit.

Overview of evidence requirements

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms:

- knowledge requirements of this unit
- skill requirements of this unit
- application of employability skills as they relate to this unit.

Resources required to carry out assessment

Resources essential for assessment include:

- legislation, policy, procedures and protocols relating to the development of a systematic approach to managing OHS
- workplace documentation, case studies and workplace scenarios to capture the range of situations likely to be encountered when developing a systematic approach to managing OHS.

Where and how to assess evidence

Valid assessment of this unit requires:

- a workplace environment or one that closely resembles normal work practice and replicates the range of conditions likely to be encountered when developing a systematic approach to managing OHS, including coping with difficulties, irregularities and breakdowns in routine
- development of a systematic approach to managing OHS in a range of 2 or more contexts or occasions, over time., including examples of development activities to suit a specific organisational context across at least 4 areas of an OHS system.

Assessment methods should reflect but not exceed workplace demands, such as literacy, and the needs of individuals who might be disadvantaged.

EVIDENCE GUIDE

Assessment methods suitable for valid and reliable assessment of this unit must use authenticated evidence from the workplace and/or training courses and may include a combination of two or more of:

- workplace projects
- simulation or role plays
- case studies and scenarios
- observation.
- portfolios.

The assessment environment should not disadvantage the candidate and where the person has a disability the principle of reasonable adjustment should be applied during assessment.

For consistency of assessment

Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments.

Range Statement

RANGE STATEMENT

The range statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The range statement also provides a focus for assessment. It relates to the unit as a whole. Text in *italics* in the Performance criteria is explained here.

- External motivators may include***
- legal obligations
 - customer/contract demand
 - corporate image/reputation
- A systematic approach to managing OHS***
- is part of the organisation's overall management system that covers developing, implementing, reviewing and maintaining the activities for managing OHS
 - is not a commercial package or folders on the shelf
 - may involve use of OHS management systems developed in the workplace to meet the OHS situation in that particular workplace
- Internal motivators may include***
- injury and illness prevention (ethical)
 - industrial relations
 - financial
- Workplace factors may include***
- whether certification is required
 - organisational structure
 - management commitment
 - management style, and OHS knowledge and skills of organisation
 - workplace culture, including industrial relations and safety culture
 - consultation and communication processes
 - other management systems requiring interface or integration with systematic approaches to managing OHS
 - resources available
 - nature of hazards and level of risk
 - staff profile including language, literacy and numeracy, cultural diversity and special needs for employees
- Relevant standards may include***
- Australian standards
 - standards developed by OHS authorities
 - industry standards
- Stakeholders may include***
- managers
 - supervisors
 - employees

RANGE STATEMENT

- health and safety and other employee representatives
 - OHS committees
- Elements of systematic approaches to managing OHS are*
- a list of key requirements or major principles that are combined in a methodical and ordered manner to minimise the risk of injury or ill health in the workplace, and may include for example:
 - processes of OHS planning
 - allocation of resources
 - communication and consultation
 - hazard management
 - record keeping and reporting
 - training and competency
 - review and evaluation for ongoing improvement of OHS
- Legal obligations include those under legislation relating to*
- OHS
 - equity
 - workplace diversity
 - privacy
 - freedom of information
 - trade practices
 - industrial relations
- OHS specialists may be internal or external and include*
- ergonomists
 - occupational hygienists
 - injury management advisors
 - health professionals
- Technical advisors may include*
- legal practitioners
 - engineers (such as design, acoustic, safety, mechanical, civil)
 - workplace trainers and assessors
 - maintenance and trade persons
- Policies and procedures may include*
- policies and procedures underpinning OHS
 - purchasing and contracting procedures
 - documents describing how tasks, projects, inspections, jobs and processes are to be undertaken
 - standard operating procedures
 - job/task statements
 - quality system documentation
- Other functional areas and management systems may include*
- strategic planning
 - purchasing, procurement and contracting
 - logistics
 - human resource, industrial relations and personnel management, including payroll

RANGE STATEMENT

- engineering and maintenance
 - information, data and records management
 - finance and auditing
 - environmental management
 - quality management
- Resources may include*
- financial requirements
 - personnel, including time allocation
 - equipment
 - specialised resources
- Key personnel are*
- those people who have a key role in OHS including managers, supervisors, OHS representatives and other functional areas
- Evaluation protocol includes*
- criteria for evaluation
 - how the criteria will be measured
 - how the information and data will be collected
 - time period for collection of information and data
- Information and data may include*
- minutes of meetings
 - workplace inspections
 - feedback from questionnaires
 - workshops
 - audit reports

Unit Sector(s)

Competency field

Competency field Specialist Occupational Health&Safety

PSPSOHS602A Develop OHS information and data analysis and reporting and recording processes

Modification History

Not applicable.

Unit Descriptor

Unit descriptor

This unit covers the design and development of a system for managing the collection, analysis and dissemination of OHS information and data, statistics and records.

In practice, developing OHS information and data analysis, reporting and recording processes may overlap with other generalist or specialist public sector work activities such as promoting ethical practice, applying government systems, influencing opinion, fostering leadership, managing resources, managing compliance with legislation, etc.

Application of the Unit

Application of the unit

The unit applies to the design and development of a formal OHS management system or other systematic approaches to managing OHS.

The information and data system covers analysing workplace information and data in a systematic manner to ensure effective measurement and evaluation of OHS performance with the objective of improving the management of OHS. This includes informing management and other stakeholders about OHS performance and meeting legislative requirements regarding the use, distribution and maintenance of records under relevant statutory provisions.

This unit covers system design and development and is therefore more complex than PSPSOHS502A Participate in the management of the OHS information and data systems, which addresses the management of an already developed OHS information and data system.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Where *italicised* text is used, further information is detailed in the required skills and knowledge and/or the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Identify requirements for OHS information and data	<p>1.1 <i>Relevant legislation and standards</i> are reviewed to identify obligations relevant to OHS information and data.</p> <p>1.2 Policies and procedures are accessed to identify requirements for OHS information and data.</p> <p>1.3 Priorities for OHS information and data collection and management are determined in consultation with relevant <i>stakeholders</i>.</p> <p>1.4 <i>Workplace factors</i> that may impact on the design and development of OHS information and data processes are identified.</p> <p>1.5 Recommendations are made for appropriate indicators of OHS performance.</p> <p>1.6 Requirements for OHS information and data are drafted in consultation with relevant stakeholders.</p>
2. Make recommendations for the design of the OHS information and data processes	<p>2.1 Relevant <i>sources and types of OHS information and data</i> are identified and accessed.</p> <p>2.2 <i>Formats</i> for, and availability of, databases are investigated to identify the most appropriate format.</p> <p>2.3 Legal and <i>ethical requirements</i> are addressed in recommendations.</p> <p>2.4 Limits of own professional expertise are recognised and advice is sought from <i>relevant specialists</i> as required.</p> <p>2.5 Specifications are prepared for the OHS information and data processes.</p>
3. Develop the OHS information and data, and reporting and recording processes	<p>3.1 <i>Tools</i> for recording and collating information and data are identified and accessed or developed, recognising the limitations of information and data and measurement indices, and controlling for potential biases.</p> <p>3.2 Links with <i>other functional areas and management systems</i> to ensure comprehensive information and data collection are identified and facilitated.</p> <p>3.3 Relevant roles and responsibilities are identified and allocated.</p> <p>3.4 Policies, procedures and tools are developed for the collection, collation and recording of workplace OHS information and data, taking account of workplace factors and system requirements.</p> <p>3.5 Training needs for collection, collation and analysis of OHS information and data are identified and documented.</p> <p>3.6 <i>Resources</i> necessary for the collection, collation, recording, analysis and distribution of OHS information and data are</p>

ELEMENT

PERFORMANCE CRITERIA

- identified.
- 4. Record and analyse information and data to monitor OHS performance and evaluate methods of prevention**
- 4.1 *Descriptive and analytical techniques* for systematic evaluation of OHS performance monitoring (including *positive performance indicators*) and areas for improvement are identified and applied.
 - 4.2 *Information and data* is accessed and applied to determine potential associations between workplace hazards and their adverse effects on exposed workers.
 - 4.3 Information and data is recorded to assist identification of patterns of occupational injury and disease within particular areas.
 - 4.4 Information and data collection, recording, analysis and application are managed ethically.
 - 4.5 OHS information and data is critically evaluated to ensure accuracy, reliability, relevance and *validity*.
 - 4.6 Outcomes of information and data analysis are appropriately formatted and disseminated, considering the target audience and legal and ethical requirements.
 - 4.7 Appropriate strategies for improvement are identified, and recommendations are formulated as a consequence of information and data analysis.
- 5. Monitor and evaluate the effectiveness of information and data collection and analysis processes**
- 5.1 OHS information and data collection, recording, analysis and application processes are regularly reviewed to ensure relevance to the needs of the organisation in managing OHS and compliance with legislative requirements.
 - 5.2 Frequency, method and scope of review are determined in consultation with stakeholders.
 - 5.3 Recommendations are made for improvement to OHS information and data processes as required.
 - 5.4 Improvement strategies arising from the review are implemented.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the essential skills and knowledge and their level, required for this unit.

Required skills:

Look for evidence that confirms skills in:

- relating to people from a range of social, cultural and ethnic backgrounds and physical and mental abilities
- communicating effectively with personnel at all levels of organisation and OHS specialists and, as required, emergency service personnel
- preparing reports for a range of target groups including OHS committee, OHS representatives, managers, supervisors and other stakeholders
- advanced written communication including development of policies and procedures, plans
- applying continuous improvement and action planning processes
- contributing effectively to the strategic OHS performance of the organisation
- achieving change using project management processes
- managing own tasks within time frame
- using consultation and negotiation skills, particularly in relation to developing plans and implementing and monitoring designated actions
- contributing to the assessment of the resources needed to systematically manage OHS and, where appropriate, access resources
- analysing relevant workplace information and data, make observations including of workplace tasks and interactions between people, their activities, equipment, environment and systems
- carrying out simple arithmetical calculations (eg % change), and producing graphs of workplace information and data to identify trends and recognise limitations of information and data
- carrying out simple statistical analysis eg mean, standard deviation, regression
- using electronic information and data systems to enter workplace information and data and produce effective graphical representations
- interpreting information and data to identify areas for improvement
- conducting effective formal and informal meetings
- using information and data gathering techniques such as brainstorming, polling, interviews
- using language and literacy skills appropriate to the workgroup and the task
- using computer and information technology skills to access internal and external information and data on OHS
- paying attention to detail when making observations and recording outcomes.

Required knowledge:

Look for evidence that confirms knowledge and understanding of:

- roles and responsibilities under OHS legislation of employees including supervisors, contractors, OHS inspectors etc

REQUIRED SKILLS AND KNOWLEDGE

- principles of duty of care including concepts of causation, foreseeability, preventability
- legislative requirements for OHS information and data, and consultation
- roles and responsibilities in relation to communication and consultation for OHS committees, OHS representatives, line management, employees and inspectors
- state/territory/Commonwealth OHS legislation (Acts, regulations, codes of practice, associated standards and guidance material) including prescriptive and performance approaches and links to other relevant legislation such as industrial relations, equal employment opportunity, workers compensation, rehabilitation etc
- structure and forms of legislation including regulations, codes of practice, associated standards and guidance material
- difference between common law and statutory law
- concept of common law duty of care
- requirements for recordkeeping that address OHS, privacy and other relevant legislation
- requirements of effective records management systems including collection, filing, retention, retrieval, archiving and disposal
- standards related to OHS information and data, statistics and records management including requirements for information and data under elements of systematically managing OHS
- examples of OHS information and data management systems and tools
- nature and use of information and data that provides valid and reliable results on performance of OHS management processes (including positive performance indicators (PPIs) and limitations of other types of measures
- development of tools such as PPIs in assessment of OHS performance
- methods of collecting reliable information and data, commonly encountered problems in collection, and strategies for overcoming such problems
- principles and practices of continuity and validity of evidence retention for potential legal action
- requirements for reporting under OHS and other relevant legislation including notification and reporting of incidents
- principles and practices of a systematic approach to managing OHS
- requirements of OHS and standards related to systematically managing OHS
- other function areas that impact on the management of OHS
- internal and external sources of OHS information and data
- how the characteristics and composition of the workforce impact on risk and the systematic approach to managing OHS eg
 - labour market changes
 - structure and organisation of workforce eg part-time, casual and contract workers, shift rosters, geographical location
 - language, literacy and numeracy
 - communication skills
 - cultural background/workplace diversity
 - gender

REQUIRED SKILLS AND KNOWLEDGE

- workers with special needs
- ethics related to professional practice
- organisational OHS policies and procedures
- key personnel, including identifying 'change agents', within workplace management structure
- formal and informal communication and consultation processes and key personnel related to communication
- language, literacy and cultural profile of the work group
- organisational culture as it impacts on the workgroup

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the unit descriptor, performance criteria, The range statement and the Assessment Guidelines for the Public Sector Training Package.

Units to be assessed together

Co-assessed units that may be assessed with this unit to increase the efficiency and realism of the assessment process include:

- PSPETHC601B Maintain and enhance confidence in public service
- PSPGOV605A Persuade and influence opinion
- PSPLEGN601B Manage compliance with legislation in the public sector
- PSPSOHS601A Develop a systematic approach to managing OHS
- PSPSOHS608A Conduct an OHS audit.

Overview of evidence requirements

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms:

- knowledge requirements of this unit
- skill requirements of this unit
- application of employability skills as they relate to this unit.

Resources required to carry out assessment

Resources essential for assessment include:

- legislation, policy, procedures and protocols relating to the development of OHS information and data analysis and reporting and recording processes
- workplace documentation, case studies and workplace scenarios to capture the range of situations likely to be encountered when developing OHS information and data analysis and reporting and recording processes.

Where and how to assess evidence

Valid assessment of this unit requires:

- a workplace environment or one that closely resembles normal work practice and replicates the range of conditions likely to be encountered when developing OHS information and data analysis and reporting and recording processes, including coping with difficulties, irregularities and breakdowns in routine
- development of OHS information and data analysis and reporting and recording processes in a range of 2 or more contexts or occasions, over time, with at least 2 examples provided under controlled conditions to demonstrate understanding of basic statistical processes as well as the ability

EVIDENCE GUIDE

to use software to carry out statistical analysis.

Assessment methods should reflect but not exceed workplace demands, such as literacy, and the needs of individuals who might be disadvantaged.

Assessment methods suitable for valid and reliable assessment of this unit must use authenticated evidence from the workplace and/or training courses and may include a combination of two or more of:

- workplace projects
- simulation or role plays
- case studies and scenarios
- observation.
- portfolios.

The assessment environment should not disadvantage the candidate and where the person has a disability the principle of reasonable adjustment should be applied during assessment.

For consistency of assessment

Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments.

Range Statement

RANGE STATEMENT

The range statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The range statement also provides a focus for assessment. It relates to the unit as a whole. Text in *italics* in the Performance criteria is explained here.

- Relevant legislation may include***
- OHS, including serious injury and incident reporting
 - workers compensation
 - equity and workplace diversity
 - privacy
 - freedom of information
 - trade practices
- Standards may include***
- standards developed by OHS authorities
 - National Occupational Health and Safety Commission (NOHSC) standards
 - international, Australian or industry standards
- Stakeholders may include***
- management
 - supervisors
 - employees
 - OHS committees
 - health and safety and other employee representatives
- Workplace factors may include***
- size of organisation and industry type
 - organisational structure
 - management commitment
 - management style and OHS knowledge and skills of organisation
 - workplace culture, including industrial relations and safety culture
 - other management systems requiring interface or integration with the information and data processes for OHS
 - resources available
 - nature of hazards and level of risk
 - staff profile including language, literacy and numeracy, cultural diversity
 - required level of security for OHS system, including prevention of theft and fraud; access security; prevention of interruption of services; inadvertent release of material; and information and data destruction, corruption and alteration
- Relevant sources of OHS***
- external sources such as:

***information and data
may include***

- OHS legislation, codes of practice and guidance material
- Australian and industry standards
- Australian Bureau of Statistics (ABS)
- OHS authorities
- unions and industry bodies
- OHS professional bodies
- internet, journals and magazines
- technical information and data
- research literature
- manufacturers' manuals and specifications
- National Occupational Health and Safety Commission (NOHSC)
- internal sources such as:
 - employees
 - OHS policies and procedures
 - work instructions, job and work system analysis (JSAs)
 - risk assessments (past and present)
 - material safety data sheets (MSDSs) and registers
 - manufacturers' manuals
 - OHS positive performance indicators
 - insurance and incident investigation records
 - workers compensation data
 - safety handbooks
 - employee information papers, brochures, notes and newsletters
- OHS reports including, workplace inspections, hazard and incident reports, technical reports, consultations and observations

***Types of OHS
information and data
may include***

- risk management records
- OHS positive performance indicators
- incident reports, including reports on near misses, hits, incidents, injuries, first aid reports, illness, disease and dangerous occurrences
- enforcement notices and actions
- lost time reports and summaries
- sickness absence records
- workers' individual histories of exposure to specific substances, such as lead, asbestos, benzene and vinyl chloride
- medical records, including results of medical tests
- results of workplace environmental monitoring such as occupational, industrial hygiene monitoring, health screening and surveillance
- rehabilitation information, including case management
- workers compensation records

- performance appraisal and training records, including instruction and supervision logs, diaries and workbooks
- certification, registration and licensing
- reports for committees
- reports from OHS consultants
- research results
- rectification action reports and plans, inspections, plant maintenance and servicing records, and records of plant stoppages
- correspondence with agencies
- reports of proposed changes that may affect OHS
- safety manuals for plant and tools
- workplace procedure manuals
- registers, such as hazards, risk, hazardous substances, Dangerous Goods, MSDSs, confined spaces
- results of tests, measurements and analyses, for example noise and air
- risk assessments
- training records, including records of competencies to operate plant, and records of load shifting equipment and tools, such as EWP and explosive powered tools
- occupational health information and data
- ergonomic information and data, such as job and task analysis
- electronic information and data management systems, where system refers to computer software, hardware, users and other elements
- paper-based systems such as cards, files, registers and spreadsheets
- privacy
- confidentiality
- access to personal records
- ergonomists
- occupational hygienists
- health professionals
- legal practitioners
- injury management advisors
- emergency services personnel who may need to access hazardous substances and dangerous goods information and data
- medical and first aid personnel who may need to access relevant medical records and hazardous substances information and data
- information and data technology and database management support

Formats may include

Ethical requirements may include

Relevant specialists may include in-house and external OHS personnel such as

Tools may be electronic or paper-based and may include

- registers
- software for information and data recording and analysis
- performance monitoring charts and checklists
- handbooks
- available system of backup/archiving/storage/disposal

Other functional areas and management systems may include

- strategic planning
- purchasing, procurement and contracting
- logistics
- human resource, industrial relations and personnel management including payroll
- engineering and maintenance
- information, data and records management
- finance and auditing
- environmental management
- quality management

Resources include

- financial requirements
- personnel, including time allocation
- equipment
- specialised resources, such as electronic information and data management system, communications media and information/data technology equipment

Descriptive and analytical techniques may include

- statistical tests and methods such as:
- mean, standard deviation, regression analysis and percentage change
- making comparisons using basic tests of significance
- broad analytical studies to determine estimates of risk

Positive performance indicators are

- a means of focusing on assessing how successfully a workplace is performing through measuring OHS processes

Information and data may include

- organisational information and data
- industry information and data
- epidemiological studies such as:
- descriptive studies examining who, what, where, when, why - distribution and frequency
- analytical studies attempting to analyse cause or determinants of disease by testing a hypothesis
- experimental or intervention approaches such as clinical and community trials
- evaluation of particular occupational health programs

Validity is

- a reflection of the true state of a test result and includes tests for systematic distortions such as:
- information/data bias

- observational bias
- selection bias
- confounding bias
- recall bias

PSPSOHS603A Analyse and evaluate OHS risk

Modification History

Not applicable.

Unit Descriptor

Unit descriptor

This unit covers the outcomes required to conduct a formal risk assessment comprising analysis and evaluation of OHS risk. It has been designed to be consistent with Australian Standard AS/NZS 4360: Risk Management (1999), or as revised.

In practice, analysing and evaluating OHS risk may overlap with other generalist or specialist public sector work activities such as promoting ethical practice, applying government systems, influencing opinion, fostering leadership, managing resources, managing compliance with legislation, etc.

Application of the Unit

Application of the unit

This unit addresses the knowledge, processes and techniques necessary to analyse and evaluate OHS risk as part of the risk management process.

OHS risk analysis involves defining the range of consequences, assessing the effectiveness of existing controls and deciding the likelihood of each consequence - and combining these in some way to obtain a level of risk. Risk evaluation is the comparison of pre-established criteria for tolerance and the subsequent ranking of risks requiring control.

The situation to be analysed and evaluated may involve a single task or a process comprising a series of tasks.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

Employability skills This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Where *italicised* text is used, further information is detailed in the required skills and knowledge and/or the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Define parameters of the OHS risk study	1.1 Information and data on the <i>hazard</i> identification process and the <i>context</i> of the OHS <i>risk</i> are accessed. 1.2 The <i>scope of the OHS risk study</i> is established. 1.3 The activity to be analysed is divided into logical and manageable elements. 1.4 The <i>method of OHS risk analysis</i> is defined and documented.
2. Analyse the OHS risk of a task or process	2.1 The nature of the hazard including the process of injury or damage is clarified. 2.2 The need for further information such as <i>monitoring activities</i> is identified. 2.3 <i>Information and data about the OHS risk</i> are communicated to <i>stakeholders</i> . 2.4 A range of stakeholders is consulted and involved in the analysis. 2.5 Existing <i>controls</i> are identified and their <i>effectiveness</i> evaluated, taking account of <i>relevant standards</i> . 2.6 Specific scenarios to be considered are determined. 2.7 From the various scenarios possible <i>consequences</i> and the <i>likelihood</i> of their occurrence are determined. 2.8 Steps are undertaken to ensure <i>comprehensive analysis of information, data and techniques</i> . 2.9 The OHS risks are <i>ranked</i> in order of level of risk. 2.10 <i>OHS specialist advisers</i> are consulted if required.
3. Evaluate OHS risk of a task or process	3.1 Relevant legislation, codes of practice and standards are accessed and referenced. 3.2 Stakeholders are consulted in determining criteria for OHS <i>risk evaluation</i> . 3.3 Outcomes of OHS risk analysis are compared with <i>criteria</i> to identify risks requiring further risk control and risks deemed as low as reasonably achievable. 3.4 Process and outcomes of <i>analysis and evaluation</i> are <i>documented</i> in a manner that is accessible and facilitates understanding by the stakeholders. 3.5 Documentation of outcomes includes explanation of the legal ramifications of decision making based on risk prioritisation.

Required Skills and Knowledge

This section describes the essential skills and knowledge and their level, required for this unit.

Required skills:

Look for evidence that confirms skills in:

- relating to people from a range of social, cultural and ethnic backgrounds and physical and mental abilities
- communicating effectively with personnel at all levels of organisation and OHS specialists and, as required, emergency service personnel
- preparing reports for a range of target groups including OHS committee, OHS representatives, managers, supervisors and other stakeholders
- applying continuous improvement and action planning processes
- managing own tasks within time frame
- using consultation and negotiation skills, particularly in relation to developing plans and implementing and monitoring designated actions
- contributing to the assessment of the resources needed to systematically manage OHS and, where appropriate, access resources
- analysing relevant workplace information and data, make observations including of workplace tasks and interactions between people, their activities, equipment, environment and systems
- carrying out simple arithmetical calculations (eg % change), and producing graphs of workplace information and data to identify trends and recognise limitations of information and data
- using a range of communication media
- conducting effective formal and informal meetings
- using language and literacy skills appropriate to the workgroup and the task
- using computer and information technology skills to access internal and external information and data on OHS
- undertaking basic research to access relevant information and data

paying attention to detail when making observations and recording outcomes.

Required knowledge:

Look for evidence that confirms knowledge and understanding of:

- roles and responsibilities under OHS legislation of employees including supervisors, contractors, OHS inspectors etc
- principles of duty of care including concepts of causation, foreseeability, preventability
- legislative requirements for OHS information and data, and consultation
- roles and responsibilities in relation to communication and consultation for OHS committees, OHS representatives, line management, employees and inspectors
- state/territory/Commonwealth OHS legislation (Acts, regulations, codes of practice, associated standards and guidance material) including prescriptive and performance

approaches and links to other relevant legislation such as industrial relations, equal employment opportunity, workers compensation, rehabilitation etc

- structure and forms of legislation including regulations, codes of practice, associated standards and guidance material
- difference between hazard and risk
- risk as a measure of uncertainty and the factors that affect risk
- principles of incident causation and injury processes
- principles of human behaviour and response to interactions with human, physical and task environment to identify psychosocial hazards
- knowledge of a range of risk analysis/assessment techniques and tools and the application and limitations of those techniques and tools
- standard industry controls for a range of hazards
- types of hazard identification tools including JSA
- limitations of generic hazard and risk checklists and risk ranking processes
- pertinent sections of relevant Australian and other standards such as AS/NZS 4360: Risk management, National Standard for the Storage and Handling
- requirements for control of work permits/written authorities in workplace monitoring activities
- principles and practices of a systematic approach to managing OHS
- range of risk analysis/assessment techniques and tools and their application and limitations
- requirements of OHS and standards related to systematically managing OHS
- other function areas that impact on the management of OHS
- internal and external sources of OHS information and data
- how the characteristics and composition of the workforce impact on risk and the systematic approach to managing OHS eg
 - labour market changes
 - structure and organisation of workforce eg part-time, casual and contract workers, shift rosters, geographical location
 - language, literacy and numeracy
 - communication skills
 - cultural background/workplace diversity
 - gender
 - workers with special needs
- benefits, limitations and use of a range of communication strategies and tools appropriate to the workplace
- organisational behaviour and culture as it impacts on OHS and on change
- ethics related to professional practice
- organisational OHS policies and procedures
- nature of workplace processes (including work flow, planning and control) and hazards relevant to the particular workplace
- sources of occupational disease and their prevention
- knowledge of toxicology of hazardous materials and potential health effects in the

workplace

- formal and informal communication and consultation processes and key personnel related to communication
- language, literacy and cultural profile of the work group
- organisational culture as it impacts on the workgroup

Evidence Guide

▪

▪

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the unit descriptor, performance criteria, The range statement and the Assessment Guidelines for the Public Sector Training Package.

Units to be assessed together

Co-assessed units that may be assessed with this unit to increase the efficiency and realism of the assessment process include:

- PSPETHC601B Maintain and enhance confidence in public service
- PSPGOV605A Persuade and influence opinion
- PSPLEGN601B Manage compliance with legislation in the public sector
- PSPSOHS604A Apply ergonomic principles to control OHS risk
- PSPSOHS605A Apply occupational hygiene principles to control OHS risk.

Overview of evidence requirements

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms:

- knowledge requirements of this unit
- skill requirements of this unit
- application of employability skills as they relate to this unit.

Resources required to carry out assessment

Resources essential for assessment include:

- legislation, policy, procedures and protocols relating to the analysis and evaluation of OHS risk
- workplace documentation, case studies and workplace scenarios to capture the range of situations likely to be encountered when analysing and evaluating OHS risk.

Where and how to assess evidence

Valid assessment of this unit requires:

- a workplace environment or one that closely resembles normal work practice and replicates the range of conditions likely to be encountered when analysing and evaluating OHS risk, including coping with difficulties, irregularities and breakdowns in routine
- analysis and evaluation of OHS risk in a range of 3 or more contexts or occasions, over time.

Assessment methods should reflect but not exceed workplace demands, such as literacy, and the needs of individuals who might be disadvantaged.

Assessment methods suitable for valid and reliable assessment of this unit must use authenticated evidence from the workplace and/or training courses and may include a combination of two or

▪

more of:

- workplace projects
- simulation or role plays
- case studies and scenarios
- observation.
- portfolios.

The assessment environment should not disadvantage the candidate and where the person has a disability the principle of reasonable adjustment should be applied during assessment.

For consistency of assessment

Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments.

Range Statement

• RANGE STATEMENT

The range statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The range statement also provides a focus for assessment. It relates to the unit as a whole. Text in *italics* in the Performance criteria is explained here.

Unit Descriptor

Unit descriptor

This unit covers the outcomes required to apply ergonomic knowledge, principles and techniques to control OHS risk.

In practice, applying ergonomic principles to control OHS risk may overlap with other generalist or specialist public sector work activities such as promoting ethical practice, applying government systems, influencing opinion, fostering leadership, managing resources, managing compliance with legislation, etc.

Application of the Unit

Application of the unit

The unit addresses the principles, processes and techniques of ergonomics including the study of the interaction between people, the equipment they use and their general environment. The unit focuses on aspects of work design and work planning such as work layout, work flow, skills, individual variations and environmental factors.

Underpinning knowledge and skills for this unit are addressed in PSPSOHS504A Apply principles of OHS risk management and PSPSOHS505A Manage hazards in the work environment, and include a knowledge of systematic approaches to OHS.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Where *italicised* text is used, further information is detailed in the required skills and knowledge and/or the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<p>1. Assess the degree of match between people and their activities, equipment, environment and systems</p>	<p>1.1 The extent of human variability in the organisation is identified.</p> <p>1.2 Demands placed on people in the organisation by their activities, equipment, environment and systems are determined.</p> <p>1.3 People's capacity to interact optimally with their activities, equipment, environment and systems is determined.</p> <p>1.4 The match between people and their activities, equipment, environment and systems is determined.</p> <p>1.5 <i>Specialist advisers</i> and relevant <i>stakeholders</i> are identified for <i>sources of information and data</i>, and consulted during the assessment process.</p>
<p>2. Design ergonomic interventions to enhance the match between people and their activities, equipment, environment and systems</p>	<p>2.1 <i>Ergonomic interventions</i> in the design process to optimise the match between people and their activities, equipment, environment and systems are identified.</p> <p>2.2 The work environment is designed to optimise the match between people, their activities, equipment, environment and systems.</p> <p>2.3 <i>Tools and databases</i> are used to assess tasks and designs to minimise risk.</p> <p>2.4 Recommendations are made to optimise the integration of controls and displays into the decision making processes within the work system.</p>
<p>3. Implement ergonomic interventions to enhance the match between people and their activities, equipment, environment and systems</p>	<p>3.1 Advice is provided on the impact of <i>legislation, codes of practice and standards</i> on the selection and implementation of ergonomic interventions.</p> <p>3.2 <i>Key personnel</i>, stakeholders and users are consulted when developing, selecting and implementing ergonomic interventions.</p> <p>3.3 Links are made with <i>other functional areas and management systems</i>.</p> <p>3.4 Implementation of the agreed intervention is facilitated.</p> <p>3.5 Training needs are identified and documented.</p> <p>3.6 <i>Resources</i> necessary to introduce and maintain the agreed interventions are identified and documented.</p> <p>3.7 The outcomes of ergonomic assessments and interventions are reported to key personnel and stakeholders.</p>
<p>4. Evaluate ergonomic interventions</p>	<p>4.1 Quality and outcomes of ergonomic interventions are evaluated in consultation with stakeholders and users.</p> <p>4.2 Modification of interventions is facilitated as required as a</p>

ELEMENT

PERFORMANCE CRITERIA

result of the evaluation findings.
4.3 Recommendations are made regarding future interventions as a result of the evaluation.

Required Skills and Knowledge

This section describes the essential skills and knowledge and their level, required for this unit.

Required skills:

Look for evidence that confirms skills in:

- relating to people from a range of social, cultural and ethnic backgrounds and physical and mental abilities
- communicating effectively with personnel at all levels of organisation and OHS specialists and, as required, emergency service personnel
- preparing reports for a range of target groups including OHS committee, OHS representatives, managers, supervisors and other stakeholders
- applying continuous improvement and action planning processes
- achieving change using project management processes
- managing own tasks within time frame
- using consultation and negotiation skills, particularly in relation to developing plans and implementing and monitoring designated actions
- contributing to the assessment of the resources needed to systematically manage OHS and, where appropriate, access resources
- analysing relevant workplace information and data, make observations including of workplace tasks and interactions between people, their activities, equipment, environment and systems
- carrying out simple arithmetical calculations (eg % change), and producing graphs of workplace information and data to identify trends and recognise limitations of information and data
- interpreting information and data to identify areas for improvement
- using a range of communication media
- conducting effective formal and informal meetings
- using language and literacy skills appropriate to the workgroup and the task
- using computer and information technology skills to access internal and external information and data on OHS
- undertaking basic research to access relevant information and data
- using anthropometric tables effectively

paying attention to detail when making observations and recording outcomes.

Required knowledge:

Look for evidence that confirms knowledge and understanding of:

- roles and responsibilities under OHS legislation of employees including supervisors, contractors, OHS inspectors etc
- principles of duty of care including concepts of causation, foreseeability, preventability
- legislative requirements for OHS information and data, and consultation
- difference between hazard and risk

- risk as a measure of uncertainty and the factors that affect risk
- requirements under hazard-specific OHS legislation and codes of practice
- characteristics, mode of action and units of measurement of major hazard types
- physiology and functional anatomy relevant to identifying and controlling ergonomic hazards
- human error and implications for design of equipment, work practices and controlling ergonomic hazards
- the basics of anthropometry and biomechanics
- basic human cognitive and perceptual capabilities relevant to the design of human/machine interfaces
- risk factors for manual handling injury and risk assessment techniques for manual handling
- principles of human behaviour and response to interactions with human, physical and task environment to identify psychosocial hazards
- direct and indirect influences that impact on OHS and the environment in the design of product/s
- interdependent relationships between ergonomics and workplace stressors such as psychosocial factors, occupational violence, shiftwork, repetitive work, awkward postures, lighting, thermal environment and work layout
- hierarchy of control and considerations for choosing between different control measures, such as possible inadequacies of particular control measures
- standard industry controls for a range of hazards
- strategies for minimising risk through application of ergonomic design and engineering, work layout, work processes, work organisation
- types of hazard identification tools including JSA
- limitations of generic hazard and risk checklists and risk ranking processes
- pertinent sections of relevant Australian and other standards such as AS/NZS 4360: Risk management, National Standard for the Storage and Handling
- principles and practices of a systematic approach to managing OHS
- other function areas that impact on the management of OHS
- internal and external sources of OHS information and data
- how the characteristics and composition of the workforce impact on risk and the systematic approach to managing OHS eg
 - labour market changes
 - structure and organisation of workforce eg part-time, casual and contract workers, shift rosters, geographical location
 - language, literacy and numeracy
 - communication skills
 - cultural background/workplace diversity
 - gender
 - workers with special needs
- organisational behaviour and culture as it impacts on OHS and on change
- ethics related to professional practice

- organisational OHS policies and procedures
- nature of workplace processes (including work flow, planning and control) and hazards relevant to the particular workplace
- key personnel, including identifying 'change agents', within workplace management structure
- formal and informal communication and consultation processes and key personnel related to communication
- language, literacy and cultural profile of the work group
- organisational culture as it impacts on the workgroup.

Evidence Guide

-

▪

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the unit descriptor, performance criteria, The range statement and the Assessment Guidelines for the Public Sector Training Package.

Units to be assessed together

Co-assessed units that may be assessed with this unit to increase the efficiency and realism of the assessment process include:

- PSPETHC601B Maintain and enhance confidence in public service
- PSPGOV605A Persuade and influence opinion
- PSPLEGN601B Manage compliance with legislation in the public sector
- PSPSOHS601A Develop a systematic approach to managing OHS
- PSPSOHS603A Analyse and evaluate OHS risk
- PSPSOHS605A Apply occupational hygiene principles to control OHS risk
- PSPSOHS607A Advise on application of safe design principles to control OHS risk.

Overview of evidence requirements

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms:

- knowledge requirements of this unit
- skill requirements of this unit
- application of employability skills as they relate to this unit.

Resources required to carry out assessment

Resources essential for assessment include:

- legislation, policy, procedures and protocols relating to the application of ergonomic principles to control OHS risk
- workplace documentation, case studies and workplace scenarios to capture the range of situations likely to be encountered when applying ergonomic principles to control OHS risk to control OHS risk.

Where and how to assess evidence

Valid assessment of this unit requires:

- a workplace environment or one that closely resembles normal work practice and replicates the range of conditions likely to be encountered when applying ergonomic principles to control OHS risk, including coping with difficulties, irregularities and breakdowns in routine
- application of ergonomic principles to control OHS risk in a range of 3 or more contexts or occasions, over time.

Assessment methods should reflect but not exceed workplace demands, such as literacy, and the needs of individuals who might

▪

be disadvantaged.

Assessment methods suitable for valid and reliable assessment of this unit must use authenticated evidence from the workplace and/or training courses and may include a combination of two or more of:

- workplace projects
- simulation or role plays
- case studies and scenarios
- observation.
- portfolios.

The assessment environment should not disadvantage the candidate and where the person has a disability the principle of reasonable adjustment should be applied during assessment.

For consistency of assessment

Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments.

Range Statement

• RANGE STATEMENT

The range statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The range statement also provides a focus for assessment. It relates to the unit as a whole. Text in *italics* in the Performance criteria is explained here.

Specialists advisors may include

- specialist ergonomists
- occupational hygienists
- engineers (such as design, acoustic, safety, mechanical, civil)
- health professionals
- legal practitioners
- designers
- manufacturers and suppliers

Stakeholders may include

- managers
- supervisors
- employees
- health and safety and other employee representatives
- OHS committees

Sources of information and data may include

- external sources such as:
 - state and territory OHS regulatory bodies
 - National Occupational Health and Safety Commission (NOHSC)
 - relevant state or territory OHS legislation and codes of practice
 - international and Australian standards
 - National Plant and Certification Standards and associated guidance material
 - professional associations such as Ergonomics Society of Australia, Safety Institute of Australia, Institute of Engineers Australia, Design Institute of Australia and Building Design Professionals
 - employer groups, unions and industry bodies
 - OHS professionals, including those involved in safety engineering, occupational hygiene, occupational health, injury management, toxicology, ergonomics and epidemiology
- internal sources such as:
 - manufacturers' manuals and specifications
 - purchasing, contract and tendering procedures
 - hazard, incident and investigation reports
 - enforcement notices and actions
 - workplace inspections

• **RANGE STATEMENT**

- minutes of meetings
 - reports
 - audits, questionnaires and surveys
 - job and task statements
 - documents describing how tasks, projects, inspections, jobs and processes are undertaken
 - employees
 - design of tools
 - design of workplaces
 - design of products
 - design of equipment
 - design of work systems, processes or organisation including work flow, planning and control
 - job design
 - development of new decision making processes
 - new forms and organisations of work
 - engineering models
 - Australian and international standards
 - Australian and international anthropometric databases
 - current Commonwealth and relevant state/territory OHS legislation, regulations, codes of practice, associated standards and guidance material
 - workers compensation
 - privacy legislation
 - contract law
 - trade practices
 - criminal law
 - common law
 - industrial relations law
 - equal employment opportunity and anti-discrimination law
 - Australian and international standards
 - managers involved in OHS decision making or who may be impacted by decisions
 - strategic planning
 - purchasing, procurement and contracting
 - logistics
 - human resource, industrial relations and personnel management including payroll
 - engineering and maintenance
 - information and records management
 - finance and auditing
- Ergonomics interventions may include*
- Tools and databases may include but are not limited to*
- Legislation, codes of practice and standards may include*
- Key personnel include*
- Other functional areas and management systems may include*

• **RANGE STATEMENT**

- environmental management
- quality management
- Resources may include*
 - financial requirements
 - personnel, including time allocation
 - equipment
 - specialised resources such as electronic management systems, communications media and information/data technology equipment

PSPSOHS605A Apply occupational hygiene principles to control OHS risk

Modification History

Not applicable.

Unit Descriptor

Unit descriptor

This unit covers application of occupational hygiene knowledge and the techniques to control OHS risk arising from health hazards at work.

In practice, applying occupational hygiene principles to control OHS risk may overlap with other generalist or specialist public sector work activities such as promoting ethical practice, applying government systems, influencing opinion, fostering leadership, managing resources, managing compliance with legislation, etc.

Application of the Unit

Application of the unit

This unit provides for the requirement to control OHS risk arising from health hazards at work through the identification and assessment of the real or potential occurrence of chemical, physical or biological agents and other workplace stressors (including their interactions) that may affect the health or wellbeing of workers or others, and the recommendations for controls of such hazards.

Underpinning knowledge and skills for this unit are addressed in PSPSOHS504A Apply principles of OHS risk management, and PSPSOHS505A Manage hazards in the work environment, and include a knowledge of systematic approaches to managing OHS. Other useful skills that support this unit are addressed in PSPSOHS406A Use equipment to conduct workplace monitoring.

Licensing/Regulatory Information

Pre-Requisites

Not applicable.

Employability Skills Information

Employability skills This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Where *italicised* text is used, further information is detailed in the required skills and knowledge and/or the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Identify health hazards that may result from features of the workplace or working environment	1.1 <i>Workplace factors</i> that may affect the health of workers are identified. 1.2 Health <i>hazards</i> that may result from work processes, work operations, equipment and work procedures are identified. 1.3 Possible routes of entry to the body and consequent effects on the body are identified for different workplace factors. 1.4 Situations are identified where <i>OHS specialists</i> and <i>other advisers</i> may be required.
2. Analyse the risks of worker exposure to potentially harmful agents and factors	2.1 <i>Sources of exposure</i> and <i>related factors</i> to potentially harmful agents and factors in work processes and methods are determined. 2.2 Equipment, sampling plan and techniques for assessing the exposure to selected agents and factors within a workplace are identified. 2.3 Monitoring and sampling results to provide an assessment of exposure are interpreted and evaluated. 2.4 <i>Exposure standards</i> are utilised in the assessment of risks. 2.5 Workplace measurements, interpretations and recommendations are reported to stakeholders in a suitable format for target group.
3. Design risk control strategies and advise on implementation	3.1 The <i>hierarchy of control</i> is applied to design risk control strategies, noting that <i>personal protective equipment</i> is regarded as the least satisfactory control measure. 3.2 Inadequacies in existing control measures are identified and remedial advice is provided. 3.3 Effective consultation and collaboration is undertaken with organisation, affected employees and others when developing, selecting and implementing risk control measures. 3.4 <i>External sources of information and data</i> and specialist advisers are accessed as required on nature of health hazard, level of risk, and risk control options.
4. Monitor and evaluate control strategies to minimise workplace exposures	4.1 Quality and outcomes of interventions are monitored and evaluated regularly in consultation with stakeholders and relevant employees. 4.2 Modifications to interventions are facilitated including consultations, as required, as a result of findings of regular evaluation and monitoring. 4.3 <i>Training needs</i> are identified in consultation with workplace stakeholders, documented and arranged if required.

ELEMENT

PERFORMANCE CRITERIA

4.4 Recommendations are made regarding future interventions as a result of evaluation and monitoring.

Required Skills and Knowledge

This section describes the essential skills and knowledge and their level, required for this unit.

Required skills:

Look for evidence that confirms skills in:

- relating to people from a range of social, cultural and ethnic backgrounds and physical and mental abilities
- communicating effectively with personnel at all levels of organisation and OHS specialists and, as required, emergency service personnel
- preparing reports for a range of target groups including OHS committee, OHS representatives, managers, supervisors and other stakeholders
- applying continuous improvement and action planning processes
- achieving change using project management processes
- managing own tasks within time frame
- using consultation and negotiation skills, particularly in relation to developing plans and implementing and monitoring designated actions
- contributing to the assessment of the resources needed to systematically manage OHS and, where appropriate, access resources
- analysing relevant workplace information and data, make observations including of workplace tasks and interactions between people, their activities, equipment, environment and systems
- carrying out simple arithmetical calculations (eg % change), and producing graphs of workplace information and data to identify trends and recognise limitations of information and data
- using electronic information and data systems to enter workplace information and data and produce effective graphical representations
- interpreting information and data to identify areas for improvement
- using a range of communication media
- conducting effective formal and informal meetings
- using language and literacy skills appropriate to the workgroup and the task
- using computer and information technology skills to access internal and external information and data on OHS
- undertaking basic research to access relevant information and data
- using measuring equipment including reading scales and dials applicable to selected hazards
- interpreting results from workplace measurements

paying attention to detail when making observations and recording outcomes.

Required knowledge:

Look for evidence that confirms knowledge and understanding of:

- roles and responsibilities under OHS legislation of employees including supervisors,

contractors, OHS inspectors etc

- principles of duty of care including concepts of causation, foreseeability, preventability
- legislative requirements for OHS information and data, and consultation
- roles and responsibilities in relation to communication and consultation for OHS committees, OHS representatives, line management, employees and inspectors
- difference between hazard and risk
- risk as a measure of uncertainty and the factors that affect risk
- requirements under hazard-specific OHS legislation and codes of practice
- characteristics, mode of action and units of measurement of major hazard types
- characteristics of sound and vibration, units of noise, sound pressure levels, noise dose and process of hearing loss
- different categories of chemicals such as dangerous goods, hazardous substances, poisons, carcinogens etc
- types of hazardous dusts and fibres, hazardous environments and the possible explosion and ill health outcomes from exposure to dusts, particulates etc
- the effect of electricity on the body and the difference in action of fuses/circuit breakers and residual current devices
- difference between ionising and non-ionising radiation and the principles of decay, the effect of radiation on the body
- physiology relevant to understanding mode of action of physical, biological and chemical agents on the body and how they produce harm
- physiology related to temperature control of the human body, hazards of working in hot environments, and appropriate controls
- direct and indirect influences that impact on OHS and the environment in the design of product/s
- hierarchy of control and considerations for choosing between different control measures, such as possible inadequacies of particular control measures
- standard industry controls for a range of hazards
- the role of control programs for microbiological hazards such as vaccination, local ventilation, decontamination
- requirements for individual fitting, use, maintenance and storage of a range of PPE items
- requirements for selection and limitations of use of a range of PPE items
- types of hazard identification tools including JSA
- limitations of generic hazard and risk checklists and risk ranking processes
- pertinent sections of relevant Australian and other standards such as AS/NZS 4360: Risk management, National Standard for the Storage and Handling
- types of measurement and monitoring equipment, including intrinsically safe equipment, calibration requirements and principles of how the equipment takes the measurement and limitations in use
- requirements for control of work permits/written authorities in workplace monitoring activities
- mathematical knowledge of units of measurement, logarithmic scales, decimals and order of magnitude relevant to making and interpreting measurements

- exposure standards, their limitations and their practical use
- sampling methodologies, application and related statistical measures
- principles and practices of a systematic approach to managing OHS
- other function areas that impact on the management of OHS
- internal and external sources of OHS information and data
- how the characteristics and composition of the workforce impact on risk and the systematic approach to managing OHS eg
 - labour market changes
 - structure and organisation of workforce eg part-time, casual and contract workers, shift rosters, geographical location
 - language, literacy and numeracy
 - communication skills
 - cultural background/workplace diversity
 - gender
 - workers with special needs
- organisational behaviour and culture as it impacts on OHS and on change
- ethics related to professional practice
- organisational OHS policies and procedures
- nature of workplace processes (including work flow, planning and control) and hazards relevant to the particular workplace
- sources of occupational disease and their prevention
- knowledge of toxicology of hazardous materials and potential health effects in the workplace
- key personnel, including identifying 'change agents', within workplace management structure
- formal and informal communication and consultation processes and key personnel related to communication
- language, literacy and cultural profile of the work group
- organisational culture as it impacts on the workgroup.

Evidence Guide

-

▪

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the unit descriptor, performance criteria, The range statement and the Assessment Guidelines for the Public Sector Training Package.

Units to be assessed together

Co-assessed units that may be assessed with this unit to increase the efficiency and realism of the assessment process include:

- PSPETHC601B Maintain and enhance confidence in public service
- PSPGOV605A Persuade and influence opinion
- PSPLEGN601B Manage compliance with legislation in the public sector
- PSPSOHS601A Develop a systematic approach to managing OHS
- PSPSOHS603A Analyse and evaluate OHS risk
- PSPSOHS604A Apply ergonomic principles to control OHS risk.

Overview of evidence requirements

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms:

- knowledge requirements of this unit
- skill requirements of this unit
- application of employability skills as they relate to this unit.

Resources required to carry out assessment

Resources essential for assessment include:

- legislation, policy, procedures and protocols relating to the application of occupational hygiene principles to control OHS risk
- workplace documentation, case studies and workplace scenarios to capture the range of situations likely to be encountered when applying occupational hygiene principles to control OHS risk.

Where and how to assess evidence

Valid assessment of this unit requires:

- a workplace environment or one that closely resembles normal work practice and replicates the range of conditions likely to be encountered when applying occupational hygiene principles to control OHS risk, including coping with difficulties, irregularities and breakdowns in routine
- application of occupational hygiene principles to control OHS risk in a range of 3 or more contexts or occasions, over time.

Assessment methods should reflect but not exceed workplace demands, such as literacy, and the needs of individuals who might be disadvantaged.

Assessment methods suitable for valid and reliable assessment of

▪

this unit must use authenticated evidence from the workplace and/or training courses and may include a combination of two or more of:

- workplace projects
- simulation or role plays
- case studies and scenarios
- observation.
- portfolios.

The assessment environment should not disadvantage the candidate and where the person has a disability the principle of reasonable adjustment should be applied during assessment.

For consistency of assessment

Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments.

Range Statement

• RANGE STATEMENT

The range statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The range statement also provides a focus for assessment. It relates to the unit as a whole. Text in *italics* in the Performance criteria is explained here.

Workplace factors may include

- chemical agents such as:
 - solids, liquids, gases, hazardous or non hazardous substances and toxins, vapours, dusts, mists, fibres
 - chemical hazards occurring through airborne exposure and through skin contact
 - other chemical contaminants arising through direct use or as by-product contaminants
- physical agents such as:
 - noise, vibration, pressure, light, thermal
 - ionising and non-ionising radiation
- biological agents such as:
 - viruses
 - bacteria
 - zoonoses
 - animals
 - animal products
 - plants and plant products
 - allergens that may induce asthma, dermatitis etc
- ergonomic factors such as:
 - body position in relation to use of equipment or controls/awkward postures
 - harmful repetitive work
- psychosocial factors such as:
 - exposure to harmful/psychological stress at work such as work demand, environment

A hazard is

- a source or situation with a potential for harm in terms of human injury or ill health, damage to property or the environment, or a combination of these

OHS specialists may include

- specialist occupational hygienists
- ergonomists
- internal and external OHS professionals
- occupational health advisers
- allied health
- toxicologists

• **RANGE STATEMENT**

- injury management and return to work advisers
- Other advisers may include*
- equipment manufacturers and suppliers
 - substance manufacturers, importers and suppliers
 - engineers (ventilation, mechanical, chemical, electrical)
- Sources of exposure may include*
- substances/products created or generated by work processes, for example fume, carbon monoxide and dust
 - noise etc produced by plant and machinery
 - working with animals and animal products
 - needle stick exposures
 - occupationally related contact
- Related factors may include*
- synergistic/potential effects (increased effect of multiple exposures) compared with antagonistic effects (lessening effects of two or more substances than the effect of each in isolation)
 - dose related impacts
- Exposure standards are*
- established concentrations of substances that are given as guidance in assessing the risk of exposure
 - may be state, national and/or international publications
- Hierarchy of control means developing risk controls within the following priority order*
- eliminate hazards
 - and where this is not practicable, minimise risk by:
 - substitution
 - isolating the hazard from personnel
 - using engineering controls
 - using administrative controls (eg procedures, training)
 - using personal protective equipment (PPE)
- External sources of information and data include*
- state and territory OHS regulatory bodies
 - National Occupational Health and Safety Commission (NOHSC)
 - Australian standards, national codes of practice, guidance notes
 - engineers
 - external OHS professionals and specialists
 - Commonwealth Scientific and Industrial Research Organisation (CSIRO)
 - National Health and Medical Research Council (NHMRC)
 - union and employer associations
 - academic institutions, centres of research and libraries
 - Workplace Exposure Standards (WES)
 - material safety data sheets (MSDSs)
 - American Conference of Governmental Industrial Hygienists (ACGIH)

Other advisers may include

- equipment manufacturers and suppliers
- substance manufacturers, importers and suppliers
- engineers (ventilation, mechanical, chemical, electrical)
- OHS professional associations
- databases such as NICNAS (National Industrial Chemicals Notification and Assessment Scheme)
- manufacturers' manuals and specifications

Training needs may include

- legislative requirements
- risks associated with specific tasks
- methods of minimising exposure
- interpretation of information and data contained in material safety data sheets (MSDS), technical documents or brochures about substances, tools, equipment and plant
- workplace housekeeping
- personal hygiene
- maintenance of equipment, tools and plant to ensure effective performance of control systems
- requirements for health monitoring of use of certain workplace hazardous substances such as lead
- correct selection, use, servicing, storage and disposal of PPE

Unit Sector(s)

Competency field

Competency field Specialist Occupational Health&Safety

PSPSOHS606A Develop and implement crisis management processes

Modification History

Not applicable.

Unit Descriptor

Unit descriptor

This unit covers the outcomes required to develop and implement the planning and management to prevent or mitigate the OHS outcomes of a crisis, where a 'crisis' is defined as an event with a potentially high consequence outcome in terms of personal injury or damage. The focus is on the development of management processes including emergency assessments, plans and preparation, analysis, monitoring, training and post incident support.

In practice, developing and implementing crisis management processes may overlap with other generalist or specialist public sector work activities such as promoting ethical practice, applying government systems, influencing opinion, fostering leadership, managing resources, managing compliance with legislation, etc.

Application of the Unit

Application of the unit

This unit addresses the knowledge, processes and techniques necessary for developing and implementing crisis planning where a 'crisis' is defined as an event with a potentially high consequence outcome in terms of personal injury or damage.

Emergency preparedness and management is an important part of crisis management in that it addresses the elements of technical and tactical response. Crisis management involves a number of steps including threat analysis, crisis planning and crisis containment.

Useful underpinning knowledge and skills for the OHS practitioner that support this unit are addressed in units PPSOHS404A Contribute to the implementation of strategies to control OHS risk, PPSOHS405A Contribute to the implementation of emergency procedures, and PPSOHS504A Apply principles of OHS risk management.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

Employability skills This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Where *italicised* text is used, further information is detailed in the required skills and knowledge and/or the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Identify sources of risk	1.1 The <i>organisational context</i> for <i>crisis</i> management is established. 1.2 The <i>environment</i> is investigated to identify <i>sources of risk</i> , <i>elements at risk</i> and <i>vulnerability</i> . 1.3 Relevant key personnel, appropriate <i>specialist advisers</i> and <i>emergency response agencies</i> are identified and consulted in the identification of sources of risk. 1.4 An <i>emergency sources of risk register</i> is developed.
2. Analyse and evaluate sources of risk	2.1 <i>Sources of information and data</i> on risk and vulnerability are accessed within the context of existing control measures to <i>characterise</i> the risk. 2.2 Appropriate specialist advisers and agencies are identified and consulted in the analysis and evaluation of sources of risk. 2.3 Risks are evaluated and prioritised for action.
3. Advise on requirements for crisis management	3.1 <i>Crisis management plan</i> is developed and <i>documented</i> . 3.2 Equipment needs are identified and documented. 3.3 Emergency communication requirements and processes for internal and external <i>stakeholders</i> and <i>resources</i> are identified and documented. 3.4 Liaison and communication processes with emergency response agencies and other external stakeholders are identified and documented. 3.5 <i>Training needs</i> are identified and documented.
4. Monitor and report on the effectiveness of crisis management	4.1 Crisis management is regularly <i>audited and reviewed</i> and actions are developed and implemented. 4.2 Emergency response equipment is routinely checked for currency and functionality. 4.3 Status of crisis management, including emergency response processes, is reported to management on a regular basis.
5. Participate in the emergency control organisation	5.1 The <i>emergency control organisation</i> is structured and acts to minimise consequences. 5.2 Own role in the emergency control organisation is known and implemented during an emergency. 5.3 Appropriate liaison is undertaken with internal personnel and external agencies.
6. Advise and support key personnel in the post	6.1 Recovery phase procedures focus on minimising consequences to the people involved, the environment and the organisation.

ELEMENT

**response/recovery
phase to minimise
consequences**

PERFORMANCE CRITERIA

6.2 *External support and resource services* are identified and accessed as appropriate to assist recovery phase.

6.3 Debriefing is conducted including key personnel and external agencies as appropriate.

6.4 Debriefing process identifies areas requiring further attention.

6.5 Appropriate *reports* are disseminated internally and to relevant external agencies.

Required Skills and Knowledge

This section describes the essential skills and knowledge and their level, required for this unit.

Required skills:

Look for evidence that confirms skills in:

- relating to people from a range of social, cultural and ethnic backgrounds and physical and mental abilities
- communicating effectively with personnel at all levels of organisation and OHS specialists and, as required, emergency service personnel
- preparing reports for a range of target groups including OHS committee, OHS representatives, managers, supervisors and other stakeholders
- applying continuous improvement and action planning processes
- achieving change using project management processes
- managing own tasks within time frame
- using consultation and negotiation skills, particularly in relation to developing plans and implementing and monitoring designated actions
- contributing to the assessment of the resources needed to systematically manage OHS and, where appropriate, access resources
- analysing and evaluating a range of information and data formats including graphs, maps, matrices, technical reports
- interpreting information and data to identify areas for improvement
- using a range of communication media
- conducting effective formal and informal meetings
- using information and data gathering techniques such as brainstorming, polling, interviews
- using language and literacy skills appropriate to the workgroup and the task
- using computer and information technology skills to access internal and external information and data on OHS

issuing instructions in an authoritative manner during unusual circumstances.

Required knowledge:

Look for evidence that confirms knowledge and understanding of:

- roles and responsibilities under OHS legislation of employees including supervisors, contractors, OHS inspectors etc
- principles of duty of care including concepts of causation, foreseeability, preventability
- legislative requirements for OHS information and data, and consultation
- roles and responsibilities in relation to communication and consultation for OHS committees, OHS representatives, line management, employees and inspectors
- types of measurement and monitoring equipment, including intrinsically safe equipment, calibration requirements and principles of how the equipment takes the measurement and limitations in use
- how the characteristics and composition of the workforce impact on risk and the systematic

approach to managing OHS eg

- labour market changes
- structure and organisation of workforce eg part-time, casual and contract workers, shift rosters, geographical location
- language, literacy and numeracy
- communication skills
- cultural background/workplace diversity
- gender
- workers with special needs
- organisational behaviour and culture as it impacts on OHS and on change
- ethics related to professional practice
- principles of effective meetings including agendas, action planning, chair and secretarial duties, minutes and action items
- emergency-specific requirements under relevant legislation, codes of practice and standards including hazardous substances, dangerous goods and environment protection
- elements of a comprehensive crisis management program (Prevention, Preparedness, Response and Recovery, PPRR)
- relevant state and national emergency response structures eg Hazmat
- role, responsibility and authority of emergency response personnel
- principles of building compartmentation eg identification and role of smoke and fire doors
- emergency alerting systems, signals and instructions typically used in workplaces
- examples of emergency response processes typically used in workplaces including roles and responsibilities
- priorities and limitations of workplace response to emergencies
- hazards and precautions during an emergency including during an evacuation
- situations when evacuation is required and when evacuation is inappropriate, including circumstances where evacuation processes may need to be modified
- principles and priorities for evacuation including checking and accounting procedures
- circumstances or actions that may block, damage or inhibit function or use of emergency equipment
- information and data needs of emergency response agencies at time of reporting emergency, arrival of response and during management of emergency
- method of use, including hazards and limitations, of relevant emergency equipment including communication equipment
- principles of effective liaison with emergency service personnel including ensuring that there is no interference or hindrance to their action
- organisational OHS policies and procedures
- nature of workplace processes (including work flow, planning and control) and hazards relevant to the particular workplace
- key personnel, including identifying 'change agents', within workplace management structure
- formal and informal communication and consultation processes and key personnel related

to communication

- language, literacy and cultural profile of the work group
- organisational culture as it impacts on the workgroup
- organisational emergency procedures including various roles of the workplace emergency personnel
- essential actions of self and other key personnel in an emergency

Evidence Guide

▪

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the unit descriptor, performance criteria, The range statement and the Assessment Guidelines for the Public Sector Training Package.

▪

Units to be assessed together

Co-assessed units that may be assessed with this unit to increase the efficiency and realism of the assessment process include:

- PSPETHC601B Maintain and enhance confidence in public service
- PSPGOV605A Persuade and influence opinion
- PSPLEGN601B Manage compliance with legislation in the public sector
- PSPMNGT608B Manage risk
- PPSOHS603A Analyse and evaluate OHS risk

Overview of evidence requirements

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms:

- knowledge requirements of this unit
- skill requirements of this unit
- application of employability skills as they relate to this unit.

Resources required to carry out assessment

Resources essential for assessment include:

- legislation, policy, procedures and protocols relating to the development and implementation of crisis management processes
- workplace documentation, case studies and workplace scenarios to capture the range of situations likely to be encountered when developing and implementing crisis management processes.

Where and how to assess evidence

Valid assessment of this unit requires:

- a workplace environment or one that closely resembles normal work practice and replicates the range of conditions likely to be encountered when developing and implementing crisis management processes, including coping with difficulties, irregularities and breakdowns in routine
- development and implementation of crisis management processes in a range of 3 or more contexts or occasions, over time.

Assessment methods should reflect but not exceed workplace demands, such as literacy, and the needs of individuals who might be disadvantaged.

Assessment methods suitable for valid and reliable assessment of this unit must use authenticated evidence from the workplace and/or training courses and may include a combination of two or more of:

- workplace projects
- simulation or role plays
- case studies and scenarios

▪

- observation.
- portfolios.

The assessment environment should not disadvantage the candidate and where the person has a disability the principle of reasonable adjustment should be applied during assessment.

For consistency of assessment

Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments.

Range Statement

• RANGE STATEMENT

The range statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The range statement also provides a focus for assessment. It relates to the unit as a whole. Text in *italics* in the Performance criteria is explained here.

Organisational context may include

- legislation under which the organisation operates
- arrangements or industry/community partnerships
- hazards to which the organisation is exposed
- operating environment which may be influenced by political, industrial or other internal or external factors

Crises may include

- serious injury events
- emergencies requiring evacuation
- fires and explosions
- hazardous substance spills
- explosion and bomb scares
- security emergencies such as armed robberies, intruders and disturbed persons
- internal emergencies such as loss of power or water supply
- external emergencies such as flood, storm and traffic accident impacting on organisation

Environment may include

- conditions or influences that are part of, surround or interact with the organisation. It includes:
 - built environment (buildings and other assets)
 - physical environment (natural environment including topography, water bodies and vegetation)
 - social environment (including people interactions, internal and external politics, economic and culture)

Sources of risk have been termed 'hazards' in other units but the language of emergency management uses 'sources of risk' to indicate a broader application and may include

- natural hazards and or disasters
- technological hazards (failure of technology)
- biological hazards
- civil/political hazards including civil/political unrest, terrorism, sabotage, civil unrest and hostage
- management activities and controls including deficiencies in areas of non-compliance with internal management systems, legislation, and agreements/contracts

Elements at risk may be anything valued by the organisation and may include

- people
- assets
- environment
- commercial reputation and goodwill

• **RANGE STATEMENT**

- Vulnerability is*

 - quality of life
 - the degree of susceptibility and resilience of the organisation and the environment to the risk. It is influenced by the characteristics of the organisation in terms of its capacity to anticipate, cope with and recover from the crisis
- Specialist advisers may*

 - include advisers in emergency management, evacuation, fire, security and safety
 - use advanced techniques such as Hazard and Operability Studies (HazOp), Management Oversight and Risk Tree (MORT), computer modelling and scenario analysis
- Emergency response agencies may include*

 - fire, police, ambulance, State Emergency Services (SES), government departments, and OHS authorities
- An emergency sources of risk register should include*

 - comprehensive list of events or conditions to be evaluated, their location, together with a range of possible scenarios or circumstances under which a crisis may occur
 - crisis risk management documentation such as risk assessments
- Sources of information and data may include*

 - inspection and incident records
 - enforcement notices and actions
 - organisational records and files
 - research literature
 - international and national standards, codes of practice and guidelines
 - material safety data sheets (MSDSs)
 - specialist advisers
- Characteristics of risk may include*

 - significant features of the sources of risk such as:
 - likelihood
 - intensity
 - speed of onset
 - duration
 - area affected
 - perceptions of severity
 - impact, taking account of the coping capacity of the organisation
- Crisis management plan is a flexible document that can cope with a broad range of crisis types*

 - is approved at the highest levels of the organisation
 - focuses on management control
 - identifies responsibilities for decision making
 - details communication and support processes
 - addresses arrangements with any contractors or shared tenancy
 - integrates the emergency response plans as well as recovery
 - incorporates dealing with external agencies and support
 - addresses planning for recovery before crisis occurs

• **RANGE STATEMENT**

- Documentation for crisis management plan may include**
- policy, emergency response structure, initial response instructions for various roles/areas, responsibility and authority of individual roles, warning systems, training requirements, resource inventory for response and recovery, program review and monitoring processes; and
 - crisis risk management documentation, such as risk management team lists, communications strategies, identification of issues, risk assessments/evaluations, vulnerability profiles, risk registers and treatment strategies
- Stakeholders may include**
- internal stakeholders such as the board of management, managers, employees (and their families), contractors, visitors and others on site
 - external stakeholders such as local community (directly or via the media), representatives of special interest groups, insurance agencies, OHS regulators, local government and other relevant statutory bodies
- Resources may include**
- personnel and equipment
 - community support agencies
- Training needs should**
- specifically address the needs of each role within the crisis management team as well as all levels of the organisation
 - address knowledge requirements as well as practical application and include workshops, desktop exercises and full scale exercises

Competency field Specialist Occupational Health&Safety

PSPSOHS607A Advise on application of safe design principles to control OHS risk

Modification History

Not applicable.

Unit Descriptor

Unit descriptor

This unit covers the knowledge and skills required of the occupational health and safety (OHS) practitioner to advise on applying safe design principles to control OHS risk during a product's life cycle.

In practice, advising on the application of safe design principles to control OHS risk may overlap with other generalist or specialist public sector work activities such as promoting ethical practice, applying government systems, influencing opinion, fostering leadership, managing resources, managing compliance with legislation, etc.

Application of the Unit

Application of the unit

The central feature of safe design is the application of relevant information and data about human capabilities and behaviour to the design of objects, facilities, procedures and environments that people use.

Units PSPSOHS504A Apply principles of OHS risk management, and PSPSOHS505A Manage hazards in the work environment, provide useful underpinning knowledge and skills for this unit. Knowledge of systematic approaches to managing OHS also underpins this unit.

Licensing/Regulatory Information

Employability Skills Information

Employability skills This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Where *italicised* text is used, further information is detailed in the required skills and knowledge and/or the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<p>1. Advise on the OHS requirements of the design process</p>	<p>1.1 Organisation <i>decision makers</i> are made aware of their responsibility for the safety of downstream users and beneficiaries.</p> <p>1.2 Decision makers are advised of their obligation under law to <i>design</i> and supply a safe designed product by eliminating OHS <i>hazards</i> and controlling for <i>residual OHS risk</i>.</p> <p>1.3 OHS is promoted within the design requirements and includes an overall risk evaluation of the designed product's life cycle.</p> <p>1.4 The most current knowledge of OHS principles, materials, technology and systems is sourced and made available for application in the design of the product.</p> <p>1.5 Required education and training to enable decision makers to have the necessary skills and knowledge to identify and eliminate OHS hazards, and to control OHS risk in the design phase, is identified and made available.</p> <p>1.6 Relevant <i>sources of information and data</i> are identified and accessed, in particular equipment users.</p> <p>1.7 Potential users of the equipment are consulted during the design phase.</p> <p>1.8 Situations are identified where <i>specialist advisers</i> may be required.</p>
<p>2. Develop a systematic hazard identification and OHS risk evaluation system for safe design</p>	<p>2.1 OHS hazards are identified and associated <i>risks</i> are <i>analysed</i> across the <i>life cycle</i> of the designed product.</p> <p>2.2 A systematic analysis of the <i>likelihood</i> and <i>consequences</i> of injury or illness arising from exposure to identified OHS hazards guides the selection and implementation of the most appropriate OHS risk controls for the designed product.</p> <p>2.3 Hazard identification and risk analysis includes potential alterations to the designed product during its life.</p> <p>2.4 Decision making during the <i>OHS risk evaluation</i> process is <i>documented</i> and made accessible to all parties.</p> <p>2.5 A residual <i>risk register</i> is established, recording OHS hazards not eliminated in the design together with possible control strategies, and distributed to those involved in the downstream or subsequent life cycle stages.</p> <p>2.6 The design is monitored as it evolves to identify potential new OHS hazards and to manage risks if they become evident.</p>
<p>3. Advise on principles</p>	<p>3.1 Design to minimise risk is based on the <i>hierarchy of control</i>.</p> <p>3.2 The designed product includes <i>fail-to-safe action</i> to minimise</p>

ELEMENT	PERFORMANCE CRITERIA
of OHS risk control	the impact of possible failure or defect.
4. Advise on consultation processes between people involved in the life cycle of the designed product	<p>4.1 Decision makers are advised to consider the range of people who will use or interact with the designed product.</p> <p>4.2 Consultation between all <i>parties</i> is arranged during the concept and detailed design phases to identify and eliminate OHS hazards and minimise risk.</p> <p>4.3 Residual OHS risk in the designed product is communicated appropriately to those who will use or interact with the designed product throughout its life cycle.</p>
5. Advise on contractual arrangements and procurement systems to minimise 'purchased' OHS risk	<p>5.1 Decision makers involved in <i>purchasing and contractual arrangements</i> are advised to include a requirement to eliminate OHS hazards, minimise OHS risks, and provide information and data on residual OHS risk.</p> <p>5.2 The <i>design brief or draft specifications</i> include an agreement to carry out a <i>Safe Design</i> approach.</p>

Required Skills and Knowledge

This section describes the essential skills and knowledge and their level, required for this unit.

Required skills:

Look for evidence that confirms skills in:

- relating to people from a range of social, cultural and ethnic backgrounds and physical and mental abilities
- communicating effectively with personnel at all levels of organisation and OHS specialists and, as required, emergency service personnel
- preparing reports for a range of target groups including OHS committee, OHS representatives, managers, supervisors and other stakeholders
- achieving change using project management processes
- managing own tasks within time frame
- using consultation and negotiation skills, particularly in relation to developing plans and implementing and monitoring designated actions
- contributing to the assessment of the resources needed to systematically manage OHS and, where appropriate, access resources
- analysing relevant workplace information and data, make observations including of workplace tasks and interactions between people, their activities, equipment, environment and systems
- using a range of communication media
- conducting effective formal and informal meetings
- using information and data gathering techniques such as brainstorming, polling, interviews
- using language and literacy skills appropriate to the workgroup and the task
- using computer and information technology skills to access internal and external information and data on OHS
- undertaking basic research to access relevant information and data

paying attention to detail when making observations and recording outcomes.

Required knowledge:

Look for evidence that confirms knowledge and understanding of:

- roles and responsibilities under OHS legislation of employees including supervisors, contractors, OHS inspectors etc
- responsibilities of designers etc under OHS legislation
- principles of duty of care including concepts of causation, foreseeability, preventability
- legislative requirements for OHS information and data, and consultation
- difference between hazard and risk
- risk as a measure of uncertainty and the factors that affect risk
- requirements under hazard-specific OHS legislation and codes of practice

- principles of incident causation and injury processes
- human error and implications for design of equipment, work practices and controlling ergonomic hazards
- the basics of anthropometry and biomechanics
- basic human cognitive and perceptual capabilities relevant to the design of human/machine interfaces
- risk factors for manual handling injury and risk assessment techniques for manual handling
- principles of human behaviour and response to interactions with human, physical and task environment to identify psychosocial hazards
- direct and indirect influences that impact on OHS and the environment in the design of product/s
- interdependent relationships between ergonomics and workplace stressors such as psychosocial factors, occupational violence, shiftwork, repetitive work, awkward postures, lighting, thermal
- hierarchy of control and considerations for choosing between different control measures, such as possible inadequacies of particular control measures
- knowledge of a range of risk analysis/assessment techniques and tools and the application and limitations of those techniques and tools
- standard industry controls for a range of hazards
- strategies for minimising risk through application of ergonomic design and engineering, work layout, work processes, work organisation
- types of hazard identification tools including JSA
- pertinent sections of relevant Australian and other standards such as AS/NZS 4360: Risk management, National Standard for the Storage and Handling Workplace Dangerous Goods [NOHSC: 1015] and National Standard for Manual Handling [NOHSC: 1001]
- principles and practices of a systematic approach to managing OHS
- range of risk analysis/assessment techniques and tools and their application and limitations
- internal and external sources of OHS information and data
- how the characteristics and composition of the workforce impact on risk and the systematic approach to managing OHS eg
 - labour market changes
 - structure and organisation of workforce eg part-time, casual and contract workers, shift rosters, geographical location
 - language, literacy and numeracy
 - communication skills
 - cultural background/workplace diversity
 - gender
 - workers with special needs
- organisational behaviour and culture as it impacts on OHS and on change
- ethics related to professional practice
- professional liability in relation to providing advice
- key personnel, including identifying 'change agents', within workplace management structure

- formal and informal communication and consultation processes and key personnel related to communication.

Evidence Guide

▪

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the unit descriptor, performance criteria, The range statement and the Assessment Guidelines for the Public Sector Training Package.

▪

Units to be assessed together

Co-assessed units that may be assessed with this unit to increase the efficiency and realism of the assessment process include:

- PSPETHC601B Maintain and enhance confidence in public service
- PSPGOV605A Persuade and influence opinion
- PSPLEGN601B Manage compliance with legislation in the public sector
- PSPMNGT608B Manage risk
- PSPSOHS603A Analyse and evaluate OHS risk
- PSPSOHS604A Apply ergonomic principles to control OHS risk.

Overview of evidence requirements

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms:

- knowledge requirements of this unit
- skill requirements of this unit
- application of employability skills as they relate to this unit.

Resources required to carry out assessment

Resources essential for assessment include:

- legislation, policy, procedures and protocols relating to the application of safe design principles to control OHS risk
- workplace documentation, case studies and workplace scenarios to capture the range of situations likely to be encountered when advising on the application of safe design principles to control OHS risk.

Where and how to assess evidence

Valid assessment of this unit requires:

- a workplace environment or one that closely resembles normal work practice and replicates the range of conditions likely to be encountered when advising on the application of safe design principles to control OHS risk, including coping with difficulties, irregularities and breakdowns in routine
- provision of advice on the application of safe design principles in a range of 3 or more contexts or occasions, over time.

Assessment methods should reflect but not exceed workplace demands, such as literacy, and the needs of individuals who might be disadvantaged.

Assessment methods suitable for valid and reliable assessment of this unit must use authenticated evidence from the workplace and/or training courses and may include a combination of two or more of:

- workplace projects
- simulation or role plays

▪

- case studies and scenarios
- observation.
- portfolios.

The assessment environment should not disadvantage the candidate and where the person has a disability the principle of reasonable adjustment should be applied during assessment.

For consistency of assessment

Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments.

Range Statement

• RANGE STATEMENT

The range statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The range statement also provides a focus for assessment. It relates to the unit as a whole. Text in *italics* in the Performance criteria is explained here.

- Decision makers may include***
- any party with influence over the specifications of the designed product including but not limited to the designer, client or commissioning agent, financier, manufacturer, supplier, purchaser, installer, user, insurer, importer, erector, maintainer and regulator, and employees of these agents
- Design***
- is the process of bringing together innovation, aesthetics and functionality to plan and create a product, process or system to meet the artistic, industrial or performance requirement of an individual or group; and
 - involves a series of activities where an idea is conceived, shaped, developed, produced and then acted upon to produce a designed product; and
 - includes any subsequent alteration of a designed product such as redesign or retrofit
- A hazard is***
- a source or situation with a potential for harm in terms of human injury or ill health, damage to property or the environment, or a combination of these
- Residual OHS risk is***
- that risk that is unable to be designed out of the product
- Sources of information and data may include***
- international and Australian standards, codes of practice and guidance material
 - industry advisory bodies
 - government and other advisory bodies such as CSIRO, National Health and Medical Research Council, National Occupational Health and Safety Commission (NOHSC), Australian Consumers Association
 - Commonwealth, state and territory OHS and other regulatory bodies
 - research literature
 - NOHSC National Standard for Manual Handling, code of practice and associated guidance material
 - Australian and international anthropometric databases
 - professional associations such as Ergonomics Society of Australia, Institute of Engineers Australia, Safety Institute of Australia
 - employer groups and unions

- Specialist advisers may include***
- engineers (such as design, acoustic, safety, mechanical, chemical, civil)
 - architects, interior designers and builders
 - design professionals
 - drafts people, quantity surveyors and surveyors
 - building surveyors and certifiers
 - occupational hygienists
 - specialist ergonomists
 - health professionals
 - legal practitioners
 - insurers
 - technical professionals
 - maintenance and trades personnel
 - manufacturers
 - suppliers and distributors
 - workplace trainers and assessors
- Risk is***
- the chance of something happening that will result in injury or damage
 - measured in terms of consequences (injury or damage) and likelihood of the consequence
- Risk analysis involves***
- defining the range of consequences
 - assessing the effectiveness of existing controls
 - deciding the likelihood of each consequence
 - combining these in some way to obtain a level of risk
- Life cycle of the product includes***
- design, construction/manufacture, supply/installation, use, maintenance/servicing, decommissioning/dismantling and disposal
 - life cycle cost considerations may also include environmental clean up and redesign/retrofit
- Likelihood refers to***
- the probability of an event occurring
- Consequence refers to***
- the injury or damage outcome of an event which may be expressed quantitatively or qualitatively; it should include an estimate of cost of injury or ill health
- OHS risk evaluation involves***
- comparison of risk with pre-established criteria for tolerance (or as low as reasonably achievable) and the subsequent ranking of risks requiring control
- Documentation of risk evaluation should include***
- methods used
 - groups involved/consulted
 - description of consequences and their likelihood
 - information and data used in estimates
 - assumptions

A risk register is

- effectiveness of existing controls
- uncertainty in analysis
- factors affecting level of risk
- further information and data, and investigation required
- a list of the risks including:
- scenarios or circumstances under which damage or injury may occur
- possible consequences or outcomes in terms of injury or damage
- an indication of the likelihood of the consequence/s occurring

Hierarchy of control means developing risk controls within the following priority order

- eliminate the hazard
- and where this is not practicable, minimise risk by:
- substitution
- isolating the hazard from personnel
- using engineering controls
- using administrative controls (eg procedures, training)
- using personal protective equipment (PPE)

Fail-to-safe action ensures

- that if there is a failure or defect in the product or another factor such as loss of power, then the product is left in a safe condition

Parties for consultation may include

- user
- manufacturer
- designer
- builder
- importer
- supplier and/or distributor
- installer
- maintenance agencies
- contractors
- commissioning agent
- disposer

Purchasing and contractual arrangements may include

- specifications
- statement of work
- supplier pre-qualification
- tender documentation
- purchase order

Design brief or draft specifications may include

- form or outline of document for design brief
- instructions
- technical requirements or specifications for a designed product, structure, item, systems or process

Safe Design is

- a design process that eliminates hazards or minimises potential risk to health and safety by involving decision makers, and considers OHS risks throughout the life cycle of the designed product
- a Safe Design approach will generate a design option that eliminates OHS hazards or minimises the risks to those that make the product and those that use it

Competency field Specialist Occupational Health&Safety

PSPSOHS608A Conduct an OHS audit

Modification History

Not applicable.

Unit Descriptor

Unit descriptor

This unit covers conduct of an internal or external OHS audit that may or may not be part of certification against a recognised benchmark.

In practice, conducting an OHS audit may overlap with other generalist or specialist public sector work activities such as promoting ethical practice, applying government systems, influencing opinion, fostering leadership, managing resources, managing compliance with legislation, etc.

Application of the Unit

Application of the unit

It includes developing an audit plan and tools to gather OHS information and data, ensuring client/management liaison and briefing, arranging access to information, setting up entry and exit meetings, and coordinating evaluation/audit and audit team against time lines and the submission of reports.

The unit applies to the auditing of systematic approaches to managing OHS, which may or may not be formalised as part of an OHS management system, and can apply to internal or external benchmarks. The scope and benchmark criteria for the audit will be agreed before the commencement of OHS information and data gathering and may address all areas of the organisation or an identified function, business or geographical area.

OHS audits may be conducted by an individual or by a team and may be concurrent with other management system audits or conducted as a stand-alone exercise.

This unit does not cover the evaluation that is an integral part of an OHS audit as this is addressed in unit PSPSOHS609A Evaluate an organisation's OHS performance. People having responsibility for an OHS audit will require both these units.

Licensing/Regulatory Information

Pre-Requisites

Not applicable.

Employability Skills Information

Employability skills This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Where *italicised* text is used, further information is detailed in the required skills and knowledge and/or the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Plan an OHS audit	1.1 The scope, objectives and <i>benchmarks</i> of the audit are defined. 1.2 <i>Relevant documentation</i> such as preliminary material on the operation of the organisation is identified and obtained. 1.3 <i>Resources</i> required to conduct the audit are identified and arranged. 1.4 Timing, schedule and responsibilities for the audit are assigned.
2. Develop an OHS audit plan	2.1 Nature of <i>information and data collected</i> provides valid and reliable evidence of the <i>systematic approach to managing OHS</i> and risk controls within the context of the organisation. 2.2 Sources of evidence include <i>key personnel and stakeholders</i> . 2.3 Information and data collection strategies address issues of security, confidentiality, impartiality and equity. 2.4 Information and data collection strategies include opportunities for corroborating evidence. 2.5 The <i>audit plan</i> is developed, documented and submitted to client. 2.6 The audit plan is modified as a result of client input and to adapt to contingencies.
3. Develop an OHS audit tool	3.1 <i>Audit tool(s)</i> accurately reflect the criteria of the benchmark, nature of risks and identified relevant information and data types. 3.2 Audit tools focus on evaluation of performance of the OHS management processes. 3.3 Audit tools can be used with consistent outcomes by all members of the audit team. 3.4 Audit tools enable collection of evidence in a timely and efficient manner. 3.5 Audit tools are modified as a result of preliminary trial/s.
4. Gather information, data and OHS records	4.1 A broad range of workplace personnel are consulted during evidence gathering activities throughout the audit. 4.2 Types and sources of evidence gathered are compared with the audit plan, and reasons for discrepancies are identified. 4.3 <i>Alternative methods</i> are identified and utilised when evidence is not forthcoming, using planned methods. 4.4 Information and data reliability is checked with a number of sources.
5. Undertake OHS audit	5.1 <i>Preliminary evaluation</i> is undertaken.

ELEMENT**activities****PERFORMANCE CRITERIA**

- 5.2 Audit plan is re-submitted to client for comment as appropriate.
- 5.3 Issues concerning the audit plan are negotiated with the client and documents amended where required.
- 5.4 Initial meetings and worksite familiarisation are undertaken.
- 5.5 Progress of the audit plan is monitored with the client and/or audit team members to ensure resources are being used as planned, and that the audit objectives and audit time lines are being achieved.
- 5.6 Records of evidence and findings are progressively documented in an appropriate format and retained.
- 5.7 Hazards identified during the audit are reported promptly to the appropriate person/s, including supervisor and/or person in control of the workplace.
- 5.8 Own health and safety is addressed during the audit in accordance with organisational requirements and standards for safe work practices.
- 5.9 Information and data collection and evaluation activities comply with legal requirements and are carried out ethically.
- 5.10 Exit meetings with key personnel and stakeholders are undertaken as appropriate.
6. **Report on the outcomes of the OHS audit**
- 6.1 Summary audit findings and recommendations are presented to the clients at the *closing meeting*, after consultation with key personnel and stakeholders.
- 6.2 Results of the evaluation are compared against the audit criteria.
- 6.3 *Objective evidence* is presented with clear and concise findings, including benefits to be achieved by adoption of the audit report recommendations.
- 6.4 Where challenges to the report are anticipated, further explanations to promote acceptance are prepared.
- 6.5 Corrective action and *follow-up processes* are recommended to the client.

Required Skills and Knowledge

This section describes the essential skills and knowledge and their level, required for this unit.

Required skills:

Look for evidence that confirms skills in:

- relating to people from a range of social, cultural and ethnic backgrounds and physical and mental abilities
- communicating effectively with personnel at all levels of organisation and OHS specialists and, as required, emergency service personnel
- advanced written communication including development of policies and procedures, plans
- applying continuous improvement and action planning processes
- achieving change using project management processes
- managing own tasks within time frame
- using consultation and negotiation skills, particularly in relation to developing plans and implementing and monitoring designated actions
- contributing to the assessment of the resources needed to systematically manage OHS and, where appropriate, access resources
- using language and literacy skills appropriate to the workgroup and the task
- using computer and information technology skills to access internal and external information and data on OHS

paying attention to detail when making observations and recording outcomes.

Required knowledge:

Look for evidence that confirms knowledge and understanding of:

- roles and responsibilities under OHS legislation of employees including supervisors, contractors, OHS inspectors etc
- legislative requirements for OHS information and data, and consultation
- state/territory/Commonwealth OHS legislation (Acts, regulations, codes of practice, associated standards and guidance material) including prescriptive and performance approaches and links to other relevant legislation such as industrial relations, equal employment opportunity, workers compensation, rehabilitation etc
- structure and forms of legislation including regulations, codes of practice, associated standards and guidance material
- difference between common law and statutory law
- concept of common law duty of care
- requirements for recordkeeping that address OHS, privacy and other relevant legislation
- standards related to OHS information and data, statistics and records management including requirements for information and data under elements of systematically managing OHS
- nature and use of information and data that provides valid and reliable results on

performance of OHS management processes (including positive performance indicators (PPIs) and limitations of other types of measures

- development of tools such as PPIs in assessment of OHS performance
- methods of collecting reliable information and data, commonly encountered problems in collection, and strategies for overcoming such problems
- requirements under hazard-specific OHS legislation and codes of practice
- principles of incident causation and injury processes
- hierarchy of control and considerations for choosing between different control measures, such as possible inadequacies of particular control measures
- standard industry controls for a range of hazards
- limitations of generic hazard and risk checklists and risk ranking processes
- sampling methodologies, application and related statistical measures
- principles and practices of a systematic approach to managing OHS
- requirements of OHS and standards related to systematically managing OHS
- other function areas that impact on the management of OHS
- internal and external sources of OHS information and data
- how the characteristics and composition of the workforce impact on risk and the systematic approach to managing OHS eg
 - labour market changes
 - structure and organisation of workforce eg part-time, casual and contract workers, shift rosters, geographical location
 - language, literacy and numeracy
 - communication skills
 - cultural background/workplace diversity
 - gender
 - workers with special needs
- auditing methods and techniques
- benefits, limitations and use of a range of communication strategies and tools appropriate to the workplace
- organisational behaviour and culture as it impacts on OHS and on change
- ethics related to professional practice
- methods of providing evidence of compliance with OHS legislation
- professional liability in relation to providing advice
- principles of effective meetings including agendas, action planning, chair and secretarial duties, minutes and action items
- nature of workplace processes (including work flow, planning and control) and hazards relevant to the particular workplace
- formal and informal communication and consultation processes and key personnel related to communication
- language, literacy and cultural profile of the work group.

Evidence Guide

-

▪

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the unit descriptor, performance criteria, The range statement and the Assessment Guidelines for the Public Sector Training Package.

Units to be assessed together

Co-assessed units that may be assessed with this unit to increase the efficiency and realism of the assessment process include:

- PSPETHC601B Maintain and enhance confidence in public service
- PSPGOV605A Persuade and influence opinion
- PSPLEGN601B Manage compliance with legislation in the public sector
- PSPMNGT602B Manage resources
- PSPMNGT611A Manage evaluations
- PSPSOHS609A Evaluate an organisation's OHS performance

Overview of evidence requirements

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms:

- knowledge requirements of this unit
- skill requirements of this unit
- application of employability skills as they relate to this unit.

Resources required to carry out assessment

Resources essential for assessment include:

- legislation, policy, procedures and protocols relating to OHS audits
- workplace documentation, case studies and workplace scenarios to capture the range of situations likely to be encountered when conducting an OHS audit.

Where and how to assess evidence

Valid assessment of this unit requires:

- a workplace environment or one that closely resembles normal work practice and replicates the range of conditions likely to be encountered when conducting an OHS audit, including coping with difficulties, irregularities and breakdowns in routine
- conduct of OHS audits in a range of 3 or more contexts or occasions, over time, with at least 1 audit having a broad scope.

Assessment methods should reflect but not exceed workplace demands, such as literacy, and the needs of individuals who might be disadvantaged.

Assessment methods suitable for valid and reliable assessment of this unit must use authenticated evidence from the workplace and/or training courses and may include a combination of two or more of:

▪

- workplace projects
- simulation or role plays
- case studies and scenarios
- observation.
- portfolios.

The assessment environment should not disadvantage the candidate and where the person has a disability the principle of reasonable adjustment should be applied during assessment.

For consistency of assessment

Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments.

Range Statement

• RANGE STATEMENT

The range statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The range statement also provides a focus for assessment. It relates to the unit as a whole. Text in *italics* in the Performance criteria is explained here.

- Benchmarks may include***
- Australian or international standards
 - standards developed by OHS authorities
 - industry standards
 - standards developed internally by the organisation or by commercial organisations
- Relevant documentation may include***
- OHS legislation, codes of practice and guidance material
 - industry standards
 - organisational documents
- Resources may include***
- specialist personnel
 - equipment
- Information and data collected may be in hard copy or electronic and may include***
- management system documentation including policies and procedures, position descriptions and duty statements
 - operational documentation including completed forms, schedules, checklists, log books, minutes of meetings, action plans, maintenance reports and health surveillance records
 - claims, legal reports, complaints, hazard logs and incident and injury reports, enforcement notices and actions
 - reports and management reviews
 - previous management system reports and industry risk profiles
 - interviews with management, supervisors, work groups, employees and other parties across a range of levels and roles including health and safety representatives, OHS committee members and design personnel and contractors, where appropriate
 - observations in the workplace, work operations and records
 - training materials and records
 - for surveillance audits, information and data should include changes since last audit such as new equipment, processes, products, substances or projects
- A systemic approach to managing OHS involves***
- a comprehensive set of processes that are combined in a methodical and ordered manner to minimise the risk of injury or ill health in the workplace; and for example may include:
 - processes of OHS planning
 - allocation of resources
 - communication and consultation

- hazard management
- record keeping and reporting
- training and competency
- and review and evaluation for ongoing OHS improvement

Key personnel and stakeholders may include

- management, persons in control of the workplace, supervisors
- employees and other parties across a range of levels and roles including health and safety representatives, OHS committee members, design personnel and, where appropriate, contractors
- customers/clients

Audit plan includes

- scope of audit
- personnel involved
- time lines
- meetings to be scheduled, people to be interviewed
- locations to be inspected
- information and data required to be on hand
- sampling methodology including statistical measures

Audit tools

- are the instruments for collecting evidence and conducting the analysis and evaluation (they are not the same as the audit criteria or benchmarks) and may be:
- developed specifically for the purpose
- adapted from existing tools
- purchased or accessed from existing tools

and include:

- performance checklists
- sets of questions to be asked
- descriptions of required characteristics to be checked
- limitations for and instructions for use

Alternative methods may involve

- interviewing
- alternate sampling methodologies
- discussion groups
- surveys
- observation
- alternative information and data
- modified audit checklists
- how evidence deficiencies will be addressed

Preliminary evaluation may include

- off-site consultations
- reviews of relevant organisational documentation, information and data

Audit closing meetings are

- usually conducted within an agreed period after the client has viewed the written report

Objective evidence may be defined as

- information and data obtained through observation, measurement, tests or other means

Follow-up processes usually comprise

- an agreed meeting date with the client organisation, following sufficient time for implementation of corrective actions; and may include:
- checks of the rigour of original audit findings
- verification of effectiveness of recommendations and control action/s, particularly in correction of non-compliance/s
- provision of new non-conformance report/s if required

Specialist Occupational Health&Safety

PSPSOHS609A Evaluate an organisation's OHS performance

Modification History

Not applicable.

Unit Descriptor

Unit descriptor

This unit covers the outcomes required to make judgments as a consequence of an OHS audit and to evaluate an organisation's arrangements for identifying hazards, assessing and controlling risks, and monitoring and improving the effectiveness of the management of OHS and compliance against agreed benchmarks.

In practice, evaluating an organisation's OHS performance may overlap with other generalist or specialist public sector work activities such as promoting ethical practice, applying government systems, influencing opinion, fostering leadership, managing resources, managing compliance with legislation, etc.

Application of the Unit

Application of the unit

The unit focuses on evaluation of the effectiveness of an organisation's management of OHS. Aspects of the integration with other organisational management systems, the appropriateness of participative arrangements and OHS improvements are some components of the evaluation. The scope may cover OHS performance measures and outcomes, strategies, policies, programs, procedures and the organisation's resources.

This unit applies to the auditing of systematic approaches to managing OHS, which may or may not be formalised as part of an OHS management system, and can apply to internal or external benchmarks. The scope and benchmark criteria for the OHS audit will be agreed before the commencement of information and data gathering, and may address all areas of the organisation or an identified function, business or geographical area.

This unit is a companion unit to PSPSOHS608A Conduct an OHS audit, which together address the knowledge and skills required to conduct an OHS audit and to evaluate an organisation's OHS performance. People with overall responsibility for OHS audit will require both units.

Employability skills This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Where *italicised* text is used, further information is detailed in the required skills and knowledge and/or the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<p>1. Evaluate effectiveness of systematic approaches to identifying OHS hazards</p>	<p>1.1 Workplace <i>hazard</i> identification activities being undertaken are identified and compared with organisational policies and procedures.</p> <p>1.2 Products, processes and systems are examined to determine whether <i>hazards of long latency and low frequency/high consequence</i> are included and minimised.</p> <p>1.3 Products, processes and systems are examined to determine whether <i>risks to persons other than employees</i> are identified and minimised.</p> <p>1.4 <i>Organisational factors</i> that impact on OHS are identified.</p> <p>1.5 Outcomes of the evidence gathering are reviewed with <i>specialist personnel</i>, if required.</p>
<p>2. Evaluate the effectiveness of systematic approaches to OHS risk management</p>	<p>2.1 Appropriateness of the organisation's risk assessment tool/s and processes are evaluated.</p> <p>2.2 Outcomes of the risk assessment process are assessed for validity, reliability and inclusion of all major OHS risks, in particular demonstrated use of risk assessment methods in the organisation.</p> <p>2.3 Risk controls are evaluated for suitability and effectiveness in relation to the organisation's systematic management of OHS.</p>
<p>3. Evaluate the effectiveness of systematic OHS monitoring processes</p>	<p>3.1 The scope of organisational processes to monitor the implementation and status of systematic approaches to managing OHS is evaluated.</p> <p>3.2 The quality of information and data obtained from the monitoring processes is evaluated.</p> <p>3.3 The managerial level of response to the issues raised in the monitoring process is evaluated in relation to the level of risk.</p>
<p>4. Assess whether the OHS management approaches have produced improved performance</p>	<p>4.1 Performance indicators (including <i>positive performance indicators</i>) are evaluated to determine whether they provide a true, reliable and timely measure of the effectiveness of the OHS management approaches to reducing OHS risk.</p> <p>4.2 Reported performance is compared with evidence gathered, and differences are documented.</p> <p>4.3 Outcomes of evaluation of performance are documented in a clear and objective manner.</p>
<p>5. Assess and advise on organisational OHS compliance against</p>	<p>5.1 Systematic analysis is undertaken to identify areas of OHS compliance and non-compliance with <i>benchmarks</i>.</p> <p>5.2 Advice on the impact of legislation and standards on the</p>

ELEMENT

agreed benchmarks

PERFORMANCE CRITERIA

selection, suitability and implementation of a range of OHS performance interventions is provided.

5.3 Outcomes of evaluation of compliance are documented and reported to *key personnel and stakeholders*.

Required Skills and Knowledge

This section describes the essential skills and knowledge and their level, required for this unit.

Required skills:

Look for evidence that confirms skills in:

- relating to people from a range of social, cultural and ethnic backgrounds and physical and mental abilities
- communicating effectively with personnel at all levels of organisation and OHS specialists and, as required, emergency service personnel
- preparing reports for a range of target groups including OHS committee, OHS representatives, managers, supervisors and other stakeholders
- contributing effectively to the strategic OHS performance of the organisation
- managing own tasks within time frame
- using consultation and negotiation skills, particularly in relation to developing plans and implementing and monitoring designated actions
- analysing relevant workplace information and data, make observations including of workplace tasks and interactions between people, their activities, equipment, environment and systems
- analysing and evaluating a range of information and data carrying out simple statistical analysis eg mean, standard deviation, regression formats including graphs, maps, matrices, technical reports
- using electronic information and data systems to enter workplace information and data and produce effective graphical representations
- interpreting information and data to identify areas for improvement
- using a range of communication media
- conducting effective formal and informal meetings
- using information and data gathering techniques such as brainstorming, polling, interviews
- using language and literacy skills appropriate to the workgroup and the task
- using computer and information technology skills to access internal and external information and data on OHS

paying attention to detail when making observations and recording outcomes.

Required knowledge:

Look for evidence that confirms knowledge and understanding of:

- roles and responsibilities under OHS legislation of employees including supervisors, contractors, OHS inspectors etc
- responsibilities of designers etc under OHS legislation
- principles of duty of care including concepts of causation, foreseeability, preventability
- legislative requirements for OHS information and data, and consultation
- roles and responsibilities in relation to communication and consultation for OHS committees, OHS representatives, line management, employees and inspectors

- state/territory/Commonwealth OHS legislation (Acts, regulations, codes of practice, associated standards and guidance material) including prescriptive and performance approaches and links to other relevant legislation such as industrial relations, equal employment opportunity, workers compensation, rehabilitation etc
- structure and forms of legislation including regulations, codes of practice, associated standards and guidance material
- difference between common law and statutory law
- concept of common law duty of care
- requirements for recordkeeping that address OHS, privacy and other relevant legislation
- standards related to OHS information and data, statistics and records management including requirements for information and data under elements of systematically managing OHS
- nature and use of information and data that provides valid and reliable results on performance of OHS management processes (including positive performance indicators (PPIs) and limitations of other types of measures
- development of tools such as PPIs in assessment of OHS performance
- methods of collecting reliable information and data, commonly encountered problems in collection, and strategies for overcoming such problems
- requirements for reporting under OHS and other relevant legislation including notification and reporting of incidents
- difference between hazard and risk
- risk as a measure of uncertainty and the factors that affect risk
- requirements under hazard-specific OHS legislation and codes of practice
- principles of incident causation and injury processes
- characteristics, mode of action and units of measurement of major hazard types
- principles of human behaviour and response to interactions with human, physical and task environment to identify psychosocial hazards
- hierarchy of control and considerations for choosing between different control measures, such as possible inadequacies of particular control measures
- knowledge of a range of risk analysis/assessment techniques and tools and the application and limitations of those techniques and tools
- standard industry controls for a range of hazards
- types of hazard identification tools including JSA
- limitations of generic hazard and risk checklists and risk ranking processes
- sampling methodologies, application and related statistical measures
- principles and practices of a systematic approach to managing OHS
- range of risk analysis/assessment techniques and tools and their application and limitations
- requirements of OHS and standards related to systematically managing OHS
- other function areas that impact on the management of OHS
- internal and external sources of OHS information and data
- how the characteristics and composition of the workforce impact on risk and the systematic approach to managing OHS eg
- labour market changes

- structure and organisation of workforce eg part-time, casual and contract workers, shift rosters, geographical location
- language, literacy and numeracy
- communication skills
- cultural background/workplace diversity
- gender
- workers with special needs
- auditing methods and techniques
- benefits, limitations and use of a range of communication strategies and tools appropriate to the workplace
- organisational behaviour and culture as it impacts on OHS and on change
- ethics related to professional practice
- methods of providing evidence of compliance with OHS legislation
- professional liability in relation to providing advice
- principles of effective meetings including agendas, action planning, chair and secretarial duties, minutes and action items
- organisational OHS policies and procedures
- nature of workplace processes (including work flow, planning and control) and hazards relevant to the particular workplace
- formal and informal communication and consultation processes and key personnel related to communication
- language, literacy and cultural profile of the work group
- organisational culture as it impacts on the workgroup.

Evidence Guide

-

▪

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the unit descriptor, performance criteria, The range statement and the Assessment Guidelines for the Public Sector Training Package.

Units to be assessed together

Co-assessed units that may be assessed with this unit to increase the efficiency and realism of the assessment process include:

- PSPETHC601B Maintain and enhance confidence in public service
- PSPGOV605A Persuade and influence opinion
- PSPLEGN601B Manage compliance with legislation in the public sector
- PSPMNGT602B Manage resources
- PSPMNGT611A Manage evaluations
- PPSOHS608A Conduct an OHS audit.

Overview of evidence requirements

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms:

- knowledge requirements of this unit
- skill requirements of this unit
- application of employability skills as they relate to this unit.

Resources required to carry out assessment

Resources essential for assessment include:

- legislation, policy, procedures and protocols relating to evaluation of organisational OHS performance
- workplace documentation, case studies and workplace scenarios to capture the range of situations likely to be encountered when evaluating an organisation's OHS performance.

Where and how to assess evidence

Valid assessment of this unit requires:

- a workplace environment or one that closely resembles normal work practice and replicates the range of conditions likely to be encountered when evaluating an organisation's OHS performance, including coping with difficulties, irregularities and breakdowns in routine
- evaluation of an organisation's OHS performance in a range of 3 or more contexts or occasions, over time, with at least 1 evaluation of broad scope.

Assessment methods should reflect but not exceed workplace demands, such as literacy, and the needs of individuals who might be disadvantaged.

Assessment methods suitable for valid and reliable assessment of this unit must use authenticated evidence from the workplace and/or training courses and may include a combination of two or

▪

more of:

- workplace projects
- simulation or role plays
- case studies and scenarios
- observation.
- portfolios.

The assessment environment should not disadvantage the candidate and where the person has a disability the principle of reasonable adjustment should be applied during assessment.

For consistency of assessment

Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments.

Range Statement

• RANGE STATEMENT

The range statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The range statement also provides a focus for assessment. It relates to the unit as a whole. Text in *italics* in the Performance criteria is explained here.

- A *hazard* is
 - a source or situation with a potential for harm in terms of human injury or ill health, damage to property or the environment, or a combination of these
- Hazards of long latency* include
 - conditions, illnesses and other health risks that result from longer term exposure to specific triggers such as chemicals, noise, radiation and psychosocial factors
- Low frequency/high consequence hazards* are
 - high impact events that occur rarely such as explosions, fires and building collapses but may result in very serious injury, death or multiple death situations
- A *risk* is
 - the chance of something occurring that will result in injury or damage
 - measured in terms of consequences (injury or damage) and likelihood of the consequence
- Persons other than employees* may include
 - neighbourhood or local community members
 - contractors
 - visitors to premises
 - customers/clients
- Organisational factors* may include
 - geographical spread of sites
 - roster and shift arrangements
 - supervision structure
 - participatory arrangements
 - authority and reporting structure
 - workforce structure such as labour hire, contractors, part-time and casual workers
 - cultural diversity
 - workplace culture including industrial relations and safety culture
 - other management systems requiring interface or integration with management of OHS
 - nature of hazards and level of risk
- Specialist personnel* may include
 - external consultants specialising in specific areas of OHS such as safety engineering, ergonomics, hygiene, toxicology, psychology, occupational health
 - specialist staff within government agencies offering assistance

• **RANGE STATEMENT**

- Positive performance indicators* are
- in specialist or problem areas within OHS
 - a means of focusing on assessing how successfully a workplace is performing through measuring OHS processes
- Benchmarks* may include
- specific legislation
 - OHS management system standards
 - industry specific standards
 - organisation's business plan
- Key personnel and stakeholders* may include
- boards of management and shareholders
 - management, persons in control of the workplace, supervisors
 - employees and other parties across a range of levels and roles including health and safety representatives and OHS committee members
 - customers/clients

Employability Skills Information

Employability skills	This unit contains employability skills.
-----------------------------	--

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Collect and assess assignment information.	<p>1.1. Clarify the <i>scope of assignments</i> with clients, including languages, <i>terms and conditions</i>, and any specific requirements.</p> <p>1.2. Analyse background information for details of the nature and conditions of assignments.</p> <p>1.3. Provide information to clients on terms, conditions and conventions to reach an <i>agreed approach</i>.</p> <p>1.4. Identify <i>performance expectations</i> and <i>their implications for undertaking the assignment</i>.</p>
2. Assess ability to complete assignment.	<p>2.1. Evaluate <i>personal competence</i> and <i>preparedness</i> to satisfy assignment requirements and areas for negotiation with clients.</p> <p>2.2. Identify and assess <i>limits and responsibility, and their implications</i>.</p> <p>2.3. Seek advice to inform decision-making process.</p>
3. Respond to assignment proposal.	<p>3.1. Review and <i>maintain a record</i> of decision-making process.</p> <p>3.2. Advise client or agency of decision to accept or decline the assignment in a professional and timely manner.</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- analytical skills to assess personal competence to meet task requirements
- communication skills to discuss translating or interpreting process, outcomes and potential difficulties
- interpersonal skills to:
 - relate to people from a range of social, cultural and ethnic backgrounds and with a range of levels of communication
 - seek advice to inform assessment of assignment
 - make clients aware of translating and interpreting protocols and expectations
 - convey decision to accept or decline assignment in a professional and timely manner
- language skills to negotiate about cross-cultural expectations
- language and literacy skills to read client-provided information and establish its key features
- numeracy skills to calculate costs and contract fees
- negotiation skills to clarify client requirements, performance expectations, agreement terms and conditions, and agreed approach, and to reach a mutually accepted agreement
- problem-solving skills to address areas of skill needs, logistics and potential ethical issues
- research skills to gather information to assist in negotiating assignments.

Required knowledge

- personal safety and welfare issues related to specific assignments and potential risks
- professional procedures, ethical practices and business standards applicable to negotiating an assignment
- roles and responsibilities of translators and interpreters and their associated skills
- relevant code of ethics
- source and target languages to determine scope and expectations of the project
- tools and equipment relevant to project.

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Critical aspects for assessment and evidence required to demonstrate competency in this unit

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms the ability to clarify required approach to assignments with a range of clients to reach agreement on terms and conditions. This includes:

- analysing information about the nature and scope of assignment
- negotiating agreed approach and conditions with clients
- undertaking risk analysis and identifying and addressing concerns
- establishing preparedness and personal competence to successfully complete assignment
- accepting and declining assignments within required timeframe
- *maintaining a record of* agreements and preparation outcomes for future reference.

Context of and specific resources for assessment

Assessment of this unit of competency will make use of scenarios, case studies, experiences and, where possible, examples of interactions with colleagues and clients which illustrate issues of negotiating assignments.

Resources for assessment include:

- a range of clients and environments where assignments are clarified, negotiated, accepted and declined
- assignment and contractual documentation
- business records
- relevant codes of practice.

Assessment should be gathered to demonstrate negotiated agreements with a range of different client requirements and conditions and with examples of both accepting and declining assignments. Evidence may include examples of formal and informal contracts, and should also include evidence of decision making where there are ethical,

EVIDENCE GUIDE

	business and professional issues influencing decisions.
--	---

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Scope of assignments
may include:

- source and target languages
- stakeholders
- preparation of supporting resources
- required equipment and tools, including software
- responsibilities of role
- confidentiality
- client awareness of professional terms, conditions and expectations
- environmental issues such as sight lines, lighting and seating position
- for interpreting:
 - topic, purpose and nature of assignment
 - setting, and mode of interpreting appropriate to setting
 - parties involved and relevant social and cultural requirements
 - date, time and location
 - duration
- for translating:
 - assignment schedule, including stage deadlines
 - field, subject and topic
 - previous translations and translators
 - volume of material to be translated
 - type of technology to be used and who will provide
 - type of text and its end use
 - application of assignment-specific style guide conventions
 - translation memory tools.

Terms and conditions
may include:

- assignment timeframe
- financial arrangements, such as:
 - costings

	<ul style="list-style-type: none"> • expense reimbursement • invoicing and schedule of payment • necessary arrangements for travel and accommodation • contract conditions, including variation and termination procedures.
<i>Agreed approach</i> may include:	<ul style="list-style-type: none"> • increased client awareness and acknowledgement of the role of the practitioner • addressing potential misunderstandings • clarifying expectations • determining alternative strategies with client where assignment is accepted • conditions applying to known requirements exceeding personal competence • for interpreting: <ul style="list-style-type: none"> • chuchotage, consecutive or simultaneous interpreting mode • team or collaborative interpreting • for translating: <ul style="list-style-type: none"> • translating as part of a team • translating alone.
<i>Performance expectations</i> may include:	<ul style="list-style-type: none"> • background resources for preparation • privacy and confidentiality agreements • culture-specific requirements • limits, responsibilities and risks associated with role • attesting to work • client glossaries • equipment and technology • acknowledgement of professional standards and codes of practice • for interpreting: <ul style="list-style-type: none"> • sight translation • setting and register • physical parameters relating to such things as: <ul style="list-style-type: none"> • background noise • sight lines and visibility • voice projection <ul style="list-style-type: none"> • transcribing • type of interpreting service • for translating: <ul style="list-style-type: none"> • formatting or text-processing requirements

	<ul style="list-style-type: none"> • style guides • presenting non-text components • required timeframe for completed translation.
<i>Personal competence</i> may include:	<ul style="list-style-type: none"> • ability to meet performance expectations of required languages, including passive and active facility • familiarity with context, topic and terminology • mastery of register appropriate to audience and setting • previous relevant experience • relevant social, cultural or kinship factors.

<i>Preparedness</i> may relate to:	<ul style="list-style-type: none"> • checking required equipment and software • developing familiarity with topic and subject matter • identifying conflict of interest • identifying relevant social, cultural or kinship factors • for translating: <ul style="list-style-type: none"> • checking formatting or text-processing requirements.
<i>Limits and responsibility</i> may include:	<ul style="list-style-type: none"> • health and safety concerns • legal and accountability issues • potential conflict of interest • personal competence and risks of miscommunication • duty of care.
<i>Maintain a record</i> may include:	<ul style="list-style-type: none"> • client and assignment details • formal and informal contracts • exchange of communication on: <ul style="list-style-type: none"> • agreed duties • assignment conditions • assignment requirements • explanation of why the assignment cannot be undertaken.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<p>1. Analyse assignment information for planning purposes.</p>	<p>1.1. Confirm <i>scope and nature of assignments</i>, identify stakeholders and determine <i>other relevant factors</i>.</p> <p>1.2. Obtain and analyse assignment documentation and related <i>background material</i> according to standard protocols.</p> <p>1.3. Select and obtain <i>tools and equipment</i> and identify and analyse up-to-date, relevant and comprehensive <i>resources</i>.</p> <p>1.4. Consider assignment requirements and familiarity with topic and other relevant factors to determine planning needs.</p> <p>1.5. Identify and resolve <i>factors that may affect assignment outcomes</i>.</p>
<p>2. Establish familiarity with topic and context.</p>	<p>2.1. Analyse assignment requirements and build on existing knowledge.</p> <p>2.2. Identify <i>areas requiring further research</i> and seek additional information.</p> <p>2.3. Access and develop assignment-specific resources.</p> <p>2.4. Identify and resolve problems, and seek assistance from client or <i>peer network</i> where necessary.</p>
<p>3. Develop work plan.</p>	<p>3.1. Identify objectives with measurable targets according to assignment requirements.</p> <p>3.2. Explore innovative and flexible options for achieving objectives.</p> <p>3.3. Reflect OHS requirements when determining realistic time commitments and allocations.</p> <p>3.4. Collaborate as required in planning process to ensure mutual agreement.</p>
<p>4. Review and evaluate work plan.</p>	<p>4.1. Review preparation to confirm that it addresses assignment requirements, and resolve outstanding issues.</p> <p>4.2. Discuss preparation and plan with appropriate persons and incorporate their feedback.</p> <p>4.3. Consider and implement adjustments to improve process and outcomes of future preparation.</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- interpersonal skills to:
 - confirm assignment requirements with clients and colleagues
 - interact with a wide range of people from culturally and linguistically diverse backgrounds
 - seek assistance from clients, specialist advisers and peers
- language skills to analyse the demands of assignments
- literacy skills to:
 - comprehend and use a range of information sources
 - read and note resources for future reference
 - update and manage glossaries
- organisational skills to manage an effective work environment and resources
- research skills to:
 - identify suitable resources and update specialist and non-specialist knowledge
 - select and make critical use of precedents and reference material
 - make efficient use of print, electronic and human resources
 - prepare bilingual glossaries
- self-management skills to plan personal priorities and daily tasks for maximum efficiency of work time and to undertake preparation within required assignment timeframe
- technology skills to:
 - make efficient use of electronic resources
 - select and use resources, techniques and equipment, including office equipment and information and communications technology.

Required knowledge

- key sources of required information to inform the assignment preparation
- professional procedures and guidelines, ethical practices and business standards applicable to preparation
- conditions that require team or relay interpreting
- source and target languages to meet performance expectations
- subject, specialist area and culture-specific knowledge relevant to topic
- tools and equipment relevant to assignment
- code of ethics, codes of professional practice
- commercial software used in assignments and office management
- file and information management procedures, including process for storing,

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Critical aspects for assessment and evidence required to demonstrate competency in this unit

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms the candidate's ability to demonstrate a planned approach to undertaking assignments aimed at achieving effective outcomes. This includes:

- identifying and analysing assignment requirements and associated reference material and the need for additional information
- planning and organising activities within required timeframe and appropriate to type and complexity of translating and interpreting assignment to ensure effective outcomes
- critically evaluating preparation for adequacy and appropriateness.

Context of and specific resources for assessment

Assessment of this unit of competency will make use of scenarios, case studies, experiences and, where possible, examples of interactions with colleagues and clients which illustrate the preparation required for a range of different assignments.

Resources for assessment include:

- a range of clients and environments where preparation for assignments requires problem solving, research, critical analysis and familiarity with assignment and contractual requirements
- a range of suitable resources and their sources
- relevant codes of practice
- technical and routine equipment and resources.

Evidence for assessment should be gathered to demonstrate preparation for a range of different client requirements and conditions and with examples of a range of degrees of preparation determined by the demands of the assignment. Evidence may include examples of comprehensive

EVIDENCE GUIDE	
	preparation as well as for quick and immediate preparation in a very short timeframe. Examples should also include evidence of decision making where there are ethical, business and professional issues influencing planning decisions.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<p><i>Scope and nature of assignment</i> may include:</p>	<ul style="list-style-type: none"> • desired outcomes • required timeframe • source and target languages • context, subject and topic • any specific requirements • specialist terminology and required contextual knowledge • for interpreting: <ul style="list-style-type: none"> • purpose of interpreting and subject matter • setting and mode of interpreting appropriate to setting • sight translation of documents during interpreting • positioning requirements • for translating: <ul style="list-style-type: none"> • assignment schedule, including volume of material and stage deadlines • assignment-specific style guide conventions • end use of text • recording requirements • translation memory tools.
<p><i>Other relevant factors</i> may include:</p>	<ul style="list-style-type: none"> • access to specialist advisers • background reference material • tools and equipment required and available, including software • confidentiality or access requirements, such as police clearances • need for team or relay interpreting • translators or interpreters previously involved • for interpreting, participants': <ul style="list-style-type: none"> • cultural background • gender • languages spoken

	<ul style="list-style-type: none"> • religion.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Develop knowledge of ethical and professional issues.	<p>1.1. Use reliable sources of information to ensure that knowledge of ethical practice and professional issues is current, comprehensive and relevant.</p> <p>1.2. Maintain productive professional relationships and networks to facilitate awareness of current issues.</p> <p>1.3. Analyse applicable codes of ethics and conduct and their relationship to work practices.</p>
2. Apply ethical standards to professional practices.	<p>2.1. Reflect on and evaluate <i>ethical practices</i> in work assignments.</p> <p>2.2. Identify and examine <i>factors</i> that impact on professional and ethical decision making.</p> <p>2.3. Apply <i>codes of ethics and conduct and standards of professional practice</i> to develop strategies for dealing with possible dilemmas.</p> <p>2.4. Promote ethical standards and practice with clients, colleagues and others.</p>
3. Evaluate professional practices and knowledge related to ethical practice.	<p>3.1. Monitor and <i>review practice in relation to standards of ethics and conduct</i>.</p> <p>3.2. Seek advice and feedback on performance to improve ethical practice.</p> <p>3.3. Participate in professional development activities and networks to address identified needs in current ethical practice.</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- communication skills to:
 - participate in professional networks and exchange professional opinions
 - express and seek advice on professional issues and dilemmas
- interpersonal skills to:
 - apply cultural and linguistic protocols to a range of work situations
 - develop and use contacts and networks to enhance professional knowledge
 - maintain appropriate standards of behaviour and presentation in all work situations
 - demonstrate confidence and assertiveness when necessary
- language skills to understand and apply protocols in work performance
- literacy skills to read and apply industry codes and standards
- analytical skills to:
 - develop broad knowledge and skills required to make professional judgments
 - evaluate and adjust work plans to exercise informed professional judgment
- research skills to identify and use professional resources, associations and networks
- technology skills to:
 - order and maintain professional resources
 - conduct research and maintain communication with e-networks
 - use relevant equipment
- self-evaluation skills to:
 - identify gaps in skills and knowledge and in professional experience and confidence
 - identify personal development needs to meet professional and business objectives.

Required knowledge

- industry standards of professional behaviour and presentation relating to practice
- networks relevant to own professional practice
- professional techniques, strategies and responsibilities of translators and interpreters
- types and sources of professional resources
- situations posing dilemmas and their implications for professional judgment and decisions
- relevant professional codes of ethics and conduct.

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms the candidate's ability to evaluate ethical and professional issues and apply them to work practices in a diverse range of general environments. This includes:

- applying codes of ethics and professional standards to practice, including situations involving:
 - potential conflict of interest
 - conflict between client requirements and industry standards
 - differences in expectations caused by cultural requirements
 - dilemmas caused by tensions between personal and professional standards of practice and values
- reflecting on practice and participating in professional development activities and networks to address identified needs.
- maintaining knowledge of ethical and professional issues and requirements

Context of and specific resources for assessment

Assessment of this unit of competency will make use of scenarios, case studies, experiences and, where possible, examples of interactions with colleagues and clients that illustrate issues of professional judgments and ethical decision making.

Resources for assessment include:

- relevant codes of ethics, professional standards and professional and business procedures
- professional associations, networks and peer support activities
- performance reviews and practice reflection
- professional development and networking activities
- feedback from clients, agencies and employers

Evidence for assessment should be gathered to demonstrate a range of experiences with applying codes and standards to maintain ethical practice in different requirements and

EVIDENCE GUIDE	
	conditions and with examples of both accepting and declining assignments based on ethical action. Evidence may include examples of negotiations with client expectations, using the resources of professional associations or employers, and should also include evidence of decision making where there are ethical, business and professional issues influencing decisions.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Ethical practices may include:

- acknowledging and respecting the attitudes and beliefs of others
- separating professional and personal activities and interests
- demonstrating effective interpersonal communication skills
- maintaining informed ethical practice in the face of opposition, conflict, professional challenges and limited resources
- modelling high standards of behaviour and presentation
- offering and accepting advice as feedback on performance and for guidance and recommendations
- acknowledging and working within scope of personal competence
- keeping to commitments
- meeting performance requirements, including:
 - adequate preparation, personal presentation and time management
 - cooperating with colleagues in team and relay interpreting
 - responsibility to communication.

Factors may include:

- potential conflict of interest
- obligations of duty of care
- responsibility to communication
- expectations of different parties.

Review practice may include:

- ongoing education and training
- self-evaluation
- participating in networking opportunities.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<p>1. Model high standards of performance.</p>	<p>1.1. Model appropriate <i>professional techniques and strategies</i> for effective performance.</p> <p>1.2. Reflect individual responsibilities and accountabilities in personal work goals and plans in accordance with <i>organisational and legal requirements</i>.</p> <p>1.3. Promote practitioner's role with clients, colleagues and the public.</p>
<p>2. Determine personal development needs.</p>	<p>2.1. Assess personal skills and knowledge against industry competencies and other relevant benchmarks to determine development needs and priorities.</p> <p>2.2. Use <i>feedback</i> from colleagues and clients to identify personal learning needs and areas of professional development.</p> <p>2.3. Identify future career options and career development pathways.</p> <p>2.4. Seek advice on personal development needs from <i>relevant personnel</i>.</p>
<p>3. Participate in professional development activities.</p>	<p>3.1. Identify and pursue <i>development opportunities</i> suitable to personal learning style to support continuous learning and maintain <i>currency of professional practice</i>.</p> <p>3.2. Participate in <i>professional networks</i> to support continuous learning and to maintain professional practice.</p> <p>3.3. Maintain regular communication with relevant networks, organisations and individuals.</p>
<p>4. Reflect on and evaluate professional practice.</p>	<p>4.1. Research developments and trends impacting on professional practice and integrate these into work performance.</p> <p>4.2. Use feedback from colleagues and clients to identify and introduce improvements into work performance.</p> <p>4.3. Identify and apply innovative and responsive approaches for improving professional practice.</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- self-evaluation skills to:
 - identify gaps in skills or knowledge
 - obtain competencies to meet current and future professional requirements
- communication skills to:
 - participate in professional networks
 - consult with colleagues and clients
- interpersonal skills to:
 - participate in industry events and activities
 - build professional relationships
- time management skills to:
 - organise professional development activities
 - analyse and identify career options
 - create a balance between work, study, personal and recreation activities.

Required knowledge

- client expectations and requirements, including NAATI accreditation
- personal and professional goals and objectives
- processes, procedures and opportunities relating to professional development
- range of continuous improvement techniques and processes and their application
- types and availability of professional development activities and opportunities.

Evidence Guide

PSPTIS505A Translate general purpose texts from English to LOTE

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	This unit describes the outcomes, skills and knowledge required to translate general purpose texts from English to another language. The unit requires the ability to convey the purpose and use of the source information in functionally equivalent translated texts. It requires sound subject and context knowledge of the material being translated in order to produce translations that are accurate and appropriate for the context, target audience and end use.
------------------------	---

Application of the Unit

Application of the unit	This unit applies to translations of general purpose texts where the languages and concepts are accessible to the general public and where there are likely to be limited equivalence problems and limited requirement for research on the subject beyond client resources. The purpose of translating is to convey information written in plain language to a limited and known audience.
--------------------------------	--

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

Employability skills	This unit contains employability skills.
-----------------------------	--

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Analyse general-purpose source texts.	<p>1.1. Receive and manage <i>source texts</i> according to client requirements and conditions and confirm that it is complete and legible.</p> <p>1.2. Review personal skills and experience required to undertake assignment and meet client requirements.</p> <p>1.3. Identify areas of content and language requiring additional research and gather <i>reference material</i> in suitable format and timeframe.</p> <p>1.4. Identify suitable <i>tools and equipment</i> to aid in translation.</p> <p>1.5. <i>Analyse source texts</i> and apply knowledge of subject and context and experience in related texts to determine key elements and potential translation problems.</p> <p>1.6. <i>Restructure</i> source texts to clarify meaning and discuss issues arising with clients.</p> <p>1.7. <i>Choose approach to translation suitable to target audience and purpose of translation.</i></p>
2. Translate English source texts to draft texts in LOTE.	<p>2.1. Research and apply established translation precedents and information from <i>resources to ensure consistent outcomes.</i></p> <p>2.2. Analyse and adapt cultural and linguistic content of source texts as appropriate for document end use.</p> <p>2.3. Identify areas requiring further research or assistance and seek and incorporate additional information.</p> <p>2.4. Produce draft translations of source texts that are <i>accurate</i>, coherent, and <i>appropriate</i> for document end use and assignment requirements.</p> <p>2.5. Record translation decisions and justification in glossary.</p>
3. Check draft translations.	<p>3.1. Critically evaluate consistency, accuracy and functional equivalence of translated text.</p> <p>3.2. Identify and correct errors, distortions and unsupported translation decisions.</p> <p>3.3. Use tools and equipment to <i>check translations, refine and improve target texts</i> and manage and correct errors.</p>
4. Revise translations.	<p>4.1. Assess and incorporate advice from checking translator and subject advisers.</p> <p>4.2. Discuss and resolve outstanding issues with appropriate persons.</p>

	4.3.Undertake further revision until target text is functionally equivalent to source text.
5. Finalise and evaluate translations.	<p>5.1.Use technology to format translated texts according to agreed specifications and end use requirements, and liaise with clients where required.</p> <p>5.2.Proofread formatted texts using standard methods to annotate proof corrections.</p> <p>5.3.Certify translation as required using <i>standard methods</i>.</p> <p>5.4.Return final version of translated text and <i>supporting documentation</i> to clients according to agreed procedures and within suitable timeframe.</p> <p>5.5.Discuss issues and solutions with colleagues and advisers and explore process improvement strategies.</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- analytical skills to:
 - analyse the requirements of assignments in terms of personal skills and capability
 - identify and resolve translation difficulties in general purpose English source texts
 - interpret and apply quality assurance parameters
 - interpret and apply style guides, glossaries and reference material
- communication skills to:
 - consult effectively with clients and colleagues
 - discuss and resolve agreed processes and translating requirements with clients
 - liaise with colleagues to obtain independent quality control and discuss and agree on recommended changes
 - seek assistance from field or subject advisors and peer help groups
- language skills to produce accurate and coherent translated general purpose texts in LOTE, including use of:
 - consistent register and style appropriate to end use
 - correct and idiomatic collocation, lexis and syntax
 - current and consistent vocabulary, including foreign loan words
 - factual correctness, including at the level of tense, gender and singular or plural
 - plain language
 - punctuation, including paragraphing
 - spelling appropriate to audience
 - textual devices that create cohesion and coherence
- literacy skills to:
 - analyse source texts written in plain language and dealing with concepts accessible to the general public
 - assess and use subject information
 - read and apply instructions concerning client needs and end user requirements
 - record translation decisions and justification in glossaries
 - proofread target texts
- organisational skills to:
 - access and return documentation according to client requirements
 - build, use and manage assignment-specific glossaries
- problem-solving skills to address discrepancies in the English language that affect

REQUIRED SKILLS AND KNOWLEDGE

transfer to LOTE

- research skills to:
 - identify translation precedents relevant to assignment
 - make critical use of reference material and resources
 - undertake further research in response to challenges encountered in translation
- self-management skills to:
 - organise and use tools and equipment suitable to task
 - ensure suitable work environment, including adequate light, physical comfort and ergonomic work practices
 - meet time and contract commitments
- technology skills to:
 - use office equipment and information and communications technology for translating, formatting, proofreading and file management purposes
 - develop templates for non-narrative target texts
 - format target texts
- time management skills to ensure source texts are translated, checked, revised, formatted, proofread and returned within required timeframes.
- translating skills to translate general purpose English texts into functionally equivalent LOTE texts, including:
 - adaptation
 - contrastive analysis of meaning and language
 - equivalence at the level of discourse, pragmatics, syntax and word
 - grammatical function transposition
 - localisation
 - text manipulation to clarify meaning

Required knowledge

- certification procedures, including underpinning legal and ethical principles
- customs, cultures and socio-political systems and their terminology relevant to assignments
- discourse analysis techniques
- document, file and information management practices and procedures
- awareness of competency and limitations in work role, responsibility and professional abilities
- OHS practices and procedures specific to the demands of translating
- privacy and confidentiality requirements
- professional procedures and guidelines, ethical practices and business standards applicable to assignments
- purpose and implications of translation
- source language required to analyse and restructure text to clarify meaning

REQUIRED SKILLS AND KNOWLEDGE

- target language required to produce a functionally equivalent translation that is accurate, coherent and appropriate to end use
- research methodologies and sources of reference material suitable to translating assignments
- subject, specialist area and culture-specific knowledge relevant to subject of assignments
- tools and equipment relevant to assignments, including relevant conventional technologies
- translating theories and techniques relevant to assignments, including principles of:
 - formal and dynamic translation
 - literal and free translation
 - form based and meaning-based translation
 - direct and oblique translation.

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms the ability to translate a general-purpose text from English to a LOTE, conveying the purpose and use of the source information in a functionally equivalent translated text. This includes:

- applying language and translating skills required to convey the purpose and use of source texts where there are limited equivalence problems, plain language and concepts accessible to the general public.
- using a range of techniques to produce a translation that is accurate and appropriate for the context, target audience and end use
- applying sound subject and context knowledge of the material being translated and a broad general knowledge during the translation process
- using relevant language and research skills and the ability to critically apply resources, including glossaries
- checking and correcting content and formatting of translated text for consistency and accuracy through the exercise of revision and proofreading
- using a range of word processing and document management technology to produce a target text in required format and within suitable and agreed timeframe
- incorporating revised content and feedback from clients, checking translator and appropriate advisers
- certifying translations using standard methods.

Context of and specific resources for assessment

Evidence for assessment of this unit of competency will make use of scenarios, case studies, translation copy, assignment experiences and, where possible, examples of interactions with colleagues and clients which illustrate a range of skills and strategies for translating general purpose texts from English to LOTE.

Resources for assessment include:

- a range of narrative and non-narrative general purpose English texts and their translated LOTE texts

EVIDENCE GUIDE	
	<ul style="list-style-type: none"> • examples of critical use of resources such as glossaries and dictionaries, written and memorised • client feedback and product evaluations • sources of content information and research • part and fully completed translated <p>general purpose texts in a range of content and subject areas</p> <ul style="list-style-type: none"> • translated texts which have addressed cultural and limited equivalence issues • texts which require further research on content, language and presentation • evidence of checking, revising, formatting and proofreading. • certified translations.
	<p>While the content and scenarios may be simulated, evidence for assessment should reflect the conditions of real assignments in translating a range of narrative and non-narrative texts presenting limited equivalence problems and requiring limited research.</p>

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

- General-purpose *source texts* may include:
- documents which are in general use by the wider community such as:
 - product labels and user information
 - public journal and reference documents
 - other narrative texts, including newspapers, magazines, posters and brochures
 - internal and public newsletters
 - information provided in plain language to the general public in texts related to:
 - medical
 - legal
 - welfare
 - transport
 - housing
 - education
 - community services
 - product or service publications and advice
 - general reports and correspondence
 - non-narrative texts such as transportation schedules and transcripts of personal and general information such as:
 - educational and academic records
 - licences
 - immigration documents
 - births, deaths and marriage records
 - employment records and CV.
- Reference material* may include:
- contextual information, including general information relating to personal and community support systems
 - bilingual and monolingual dictionaries and glossaries
 - parallel texts
 - style guides or manuals
 - presentation, document lay out and graphics
 - thesaurus

RANGE STATEMENT

	<ul style="list-style-type: none"> • topic and assignment-specific references.
<i>Tools and equipment</i> may include:	<ul style="list-style-type: none"> • dictionaries and glossaries, including: <ul style="list-style-type: none"> • bilingual and monolingual • electronic and hard copy • hardware, including: <ul style="list-style-type: none"> • computers • printers • scanners • templates • tools and equipment including: <ul style="list-style-type: none"> • internet • voice-operated keyboards • video recording and editing equipment.
<i>Analysing source text</i> may include:	<ul style="list-style-type: none"> • key elements, including: <ul style="list-style-type: none"> • context • regional, specialist and technical aspects • style • topic • meaning in context • punctuation • purpose • semantic structure • syntactic problems • transfer problems • writing conventions • non-text elements • research and clarification.
<i>Restructured</i> text may address:	<ul style="list-style-type: none"> • anomalies in terminology • ambiguity and confused references • cultural sensitivities and equivalence issues • lexical, linguistic or structural deficiencies.
<i>Resources</i> may include	<ul style="list-style-type: none"> • human resources, such as: <ul style="list-style-type: none"> • field or subject experts • peer help groups and opposite language colleagues • reference material • examples of previously translated texts and presentations.
<i>Appropriate</i> may	<ul style="list-style-type: none"> • adaptation

RANGE STATEMENT	
include:	<ul style="list-style-type: none"> • extract and certification • localised text • register and style appropriate to audience and purpose of translation • suitable orthography and punctuation, including paragraphing • suitable vocabulary
<i>Standard methods of certification may include:</i>	<ul style="list-style-type: none"> • applying translator authority to translation according to legal, organisational and professional requirements, such as: <ul style="list-style-type: none"> • across pages • inserted header or footer text • on every page of source and target text • using signature or initials • using such things as: <ul style="list-style-type: none"> • affidavits • NAATI stamp • separate statement • statutory declarations.
<i>Supporting documentation may include:</i>	<ul style="list-style-type: none"> • background information • legal instruments certifying translated text, such as: <ul style="list-style-type: none"> • affidavits • statutory declarations • source text • updated assignment-specific glossary. •

Unit Descriptor

<p>Unit descriptor</p>	<p>This unit describes the outcomes, skills and knowledge required to interpret from a source language to a target language in general dialogue settings, preserving the communicative intent of the source language. The unit requires the ability to use a range of techniques to assist in the message transfer process and to address problems in delivery.</p> <p>An interpreter in the dialogue setting is required to interpret between two languages in both directions. In a general setting the content is usually broad and routine, the content or complexity of the situation can usually be predicted and planned for, and there are opportunities for error correction. There are typically only two participants and the physical elements of the setting permit the interpreter to manage the discourse to ensure that utterances are suitable for retention and recall.</p>
-------------------------------	---

Application of the Unit

<p>Application of the unit</p>	<p>This unit applies to interpreters working in consecutive and Auslan simultaneous modes, either alone, collaboratively, in tandem or as part of a team. Miscommunication that may occur in this setting is readily managed through consultation and preparation.</p>
---------------------------------------	--

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

Employability skills	This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENTS	SELECTION CRITERIA
<p>1. Receive and analyse source message.</p>	<p>1.1 Establish dialogue <i>protocols</i> with participants in a professional manner to facilitate communication dynamics and outcomes, and provide clarification where required.</p> <p>1.2 Attend actively to source utterance, and identify and address <i>factors affecting communication flow</i>.</p> <p>1.3 Determine <i>linguistic, non-linguistic</i> and <i>structural elements</i> of discourse, and identify and address factors affecting meaning.</p> <p>1.4 Identify and <i>address issues of understanding or recall</i> in a manner that does not compromise <i>effective delivery</i>.</p>
<p>2. Transfer message to target language.</p>	<p>2.1 Transfer <i>communicative intent of</i> utterance into target language using <i>techniques</i> to ensure <i>impartial delivery</i>.</p> <p>2.2 Identify and address <i>issues in message transfer</i> promptly and according to established <i>techniques</i>.</p> <p>2.3 Maintain flow of communication and <i>manage discourse</i> in a professional and culturally appropriate manner.</p> <p>2.4 Monitor interpreting process to identify when it is necessary to seek assistance or withdraw from assignment.</p>
<p>3. Evaluate interpreting performance.</p>	<p>3.1 Evaluate performance in line with <i>issues</i> encountered, assignment requirements and code of ethics.</p> <p>3.2 Determine <i>personal impact</i> of assignment and identify need for debriefing and counselling.</p> <p>3.3 Implement strategies to improve future work practices.</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- communication skills to:
 - confirm understanding, and seek clarification or repetition of source message
 - transfer messages effectively from source to target languages
- interpersonal skills to:
 - ensure behaviour and presentation are appropriate to dialogue setting and cultural conventions
 - interact with people from a range of social, cultural and ethnic backgrounds and with a range of communication needs
 - work with others who may not understand interpreting process
- interpreting skills to achieve competent message transfer, including to:
 - adapt embedded cultural concepts for correct transfer
 - conceptualise and express general and predictable information in target language, maintaining impartiality
 - include non-verbal clues in message transfer
 - manage problems of equivalence
 - reproduce factually and linguistically accurate content
 - use basic strategies to retain and recall messages
 - use technical, language and basic discourse management skills to ensure cohesive and faithful delivery of messages
- language skills to achieve competent performance
 - application of correct structures, grammar and syntax to achieve coherent delivery
 - clear pronunciation
 - correct use of common idiom, collocations and slang
 - recognition and use of a range of general and context-specific registers
 - recognition of common metaphors and similes and implied meaning
 - vocabulary based on general knowledge and specific to context
- literacy skills to prepare required background material and resources
- organisational skills to:
 - arrange work environment suitably
 - prepare and administer resources and documentation relating to assignments
- problem-solving skills to:
 - address issues in delivery
 - change conditions to enhance communication flow

REQUIRED SKILLS AND KNOWLEDGE

- manage discourse confidently
- research skills to source background information relevant to assignment
- self-management skills to:
 - apply code of practice and legislative requirements to work processes
 - mentally order information for message transfer
 - interpret in a professional and impartial manner
 - seek debriefing and support where required
 - withdraw from assignment when necessary
-

Required knowledge

- broad general subject and context knowledge, including of community domains
- broad general knowledge of cultures and societies of both English and LOTE participants
- relevant codes of ethics
- concepts of meaning-based message transfer
- communication techniques that facilitate interpreting process
- cultural knowledge, including cross-cultural perspective of communication and behaviour to:
 - determine cultural concepts and cues embedded in language
 - transfer cultural concepts without compromising communicative intent of source
- feedback and debriefing techniques
- legal requirements, professional procedures and guidelines, ethical practices and business standards relating to interpreters, including:
 - confidentiality requirements
 - privacy legislation
 - professional indemnity
 - mandatory reporting
 - duty of care
 - conflict of interest disclosure
 - impartiality
- limitations of work role, responsibility and professional abilities
- modes of interpreting
- OHS and risk management principles and practices to ensure own physical safety and comfort
- research methods to source subject and context knowledge relevant to assignment
- source and target languages to achieve competent message transfer
- basic strategies to assist retention of information and recall of source messages.

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms the ability to interpret from a source language to a target language in general dialogue settings, preserving the communicative intent of the source language, including:

- applying interpreting and English and LOTE skills required to achieve competent message transfer and competent performance
- using strategies and techniques to effectively deliver and preserve the communicative intent and maintain impartiality
- using interpersonal and communication skills to interpret in a professional manner appropriate to participants and conditions
- using basic memory retention strategies
- recognising and resolving transfer problems and correcting transfer errors
- applying knowledge of the language, conventions, culture and protocols of a range of general and predictable subjects and contexts.

Context of and specific resources for assessment

Evidence for assessment of this unit of competency will make use of scenarios, case studies, experiences and, where possible, examples of interactions with colleagues and clients which illustrate a range of skills and strategies for interpreting in general dialogue settings.

Resources for assessment include:

- opportunities to observe and question candidate in a range of interpreting assignments and contexts
- examples of personal glossaries and memory aid resources
- examples of documentation of client requirements and conditions
- examples of debriefing and self-evaluation opportunities taken by candidate.

The context for assessment might include simulations of general dialogue settings, and ideally will include observations conducted in real interpreting settings. Evidence

EVIDENCE GUIDE	
	for assessment should be gathered to demonstrate a range of experiences in interpreting in general dialogue settings in several community domains.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<p><i>Protocols</i> may include:</p>	<ul style="list-style-type: none"> • effecting introductions • briefing participants • explaining purpose and process, including pausing utterance when at own limits of recall • confirming confidentiality of information • requesting participant details, such as names and titles • setting and organisational protocols specific to client and interpreting requirements.
<p><i>Attend actively</i> may include:</p>	<ul style="list-style-type: none"> • maintaining concentration and focus • applying subject and context knowledge to anticipate purpose of discourse • identifying strategy being used to develop ideas • deconstructing: <ul style="list-style-type: none"> • complex syntax • dense lexical content • formal register • applying strategies to support retention and recall, including: <ul style="list-style-type: none"> • reviewing records and recollection of message • recording key information • noting verbal and non-verbal cues • seeking repetition and clarification • close observation of speakers.
<p><i>Factors affecting communication flow</i> may include:</p>	<ul style="list-style-type: none"> • physical adjustments required, such as: <ul style="list-style-type: none"> • adjusting position and seating in regard to listener or speaker • adjusting lighting and ventilation, and visual and ambient noise • immediate emotional, psychological, developmental, physical, or other states or attributes of participants • factors affecting meaning, such as: <ul style="list-style-type: none"> • colloquial language

RANGE STATEMENT	
	<ul style="list-style-type: none"> • idiosyncratic language use • cultural concepts • humour • paralinguistic elements • register • direct speech (first person), reported speech (third person).
<i>Linguistic elements and non linguistic elements</i> may include:	<ul style="list-style-type: none"> • colloquial and idiomatic language • idiosyncratic language use • ellipsis • register • vocabulary based on general knowledge • voluntary and involuntary pragmatic features of speech, such as: <ul style="list-style-type: none"> • inflection and tone • nuance and intensity of feeling • stress and pitch • voluntary and involuntary prosodic features of speech, such as: <ul style="list-style-type: none"> • hesitation • pauses and silence • rhythm • body language • eye contact • facial expressions • gestures and posture
<i>Structural elements</i> may include:	<ul style="list-style-type: none"> • cultural cues • language cues necessary for following conversation, interrupting or interjecting • interpersonal elements • turning points in an argument • turn taking.
<i>Addressing issues of understanding or recall</i> may include:	<ul style="list-style-type: none"> • confirming understanding • checking communicative links • managing cultural and interpersonal dynamics • referring to dictionaries or glossaries • retaining and recalling utterances of sufficient length to ensure delivery is accurate and cohesive • seeking clarification or repetition.

RANGE STATEMENT	
<p><i>Effective delivery</i> may include:</p>	<p>delivery that is appropriate to participants, including:</p> <ul style="list-style-type: none"> • language that suits participants • conveying message • culturally appropriate verbal and non-verbal behaviour • paraphrasing unfamiliar vocabulary, idiom and abstract concepts • shortening lengthy utterances • speaking slower than normal rate of speech • clear pronunciation and delivery • appropriate register • reflecting dialogue and appropriate to setting • self-monitoring of performance, including self-correction • timely delivery.
<p><i>Communicative intent</i> may include:</p>	<ul style="list-style-type: none"> • checking for understanding in Auslan and Indigenous languages • choosing between literal transfer and the communicative intent of idiomatic expressions • colloquial language • deconstructing complex syntax, dense lexical content and formal register • exercising judgement of embedded cultural concepts • identifying and using common idiomatic expressions • identifying and using loan words or signs • incorporating implied meaning in message transfer • informal and spoken register in the active voice • maintaining logical sequence of source utterance • paraphrasing unfamiliar vocabulary, idiom and concepts • recognising and conveying implied meaning • recognising common metaphors and similes • reflecting speaker characteristics • syntactic simplicity • terminology appropriate to context • transferring cultural cues, such as laughter and euphemism • using correct common collocations • using general standard of expression, style and register • verbalising non-verbal source language elements

RANGE STATEMENT	
<i>Techniques may include:</i>	<ul style="list-style-type: none"> • continuing to interpret while searching references • correcting own errors in a timely manner • delivering in direct, not reported speech • keeping all parties informed • paraphrasing • preserving self references • repeating complex instructions • seeking repetition rather than explanation.
<i>Issues in message transfer may include:</i>	<ul style="list-style-type: none"> • transfer errors such as omissions, additions or changes that occur as a result of: <ul style="list-style-type: none"> • misinterpreting, or not transferring sensitively • jargon • cross-cultural differences • lack of common context • transfer problems, include: <ul style="list-style-type: none"> • elliptic, fragmentary or ambiguous source utterances • lack of equivalents • need for paraphrasing • unknown terms.
<i>Managing discourse may include:</i>	<ul style="list-style-type: none"> • clarifying terminology and message elements • directing speakers on length, pace and form of spoken delivery • explaining exchanges between interpreter and one party to the other party • using strategies to pause utterance at limits of recall.

<i>Issues may include:</i>	<ul style="list-style-type: none"> • assignment requirements • personal preparation • personal competency • maintaining impartiality • code of ethics • necessity to withdraw • requirement for team or relay interpreting
<i>Personal impact may include:</i>	<ul style="list-style-type: none"> • performance stress • occupational health and safety • factors affecting interpreter impartiality • factors affecting interpreter personal safety or comfort, including: <ul style="list-style-type: none"> • cultural or societal dilemmas

<i>Issues</i> may include:	<ul style="list-style-type: none"> • assignment requirements • personal preparation • personal competency • maintaining impartiality • code of ethics • necessity to withdraw • requirement for team or relay interpreting
	<ul style="list-style-type: none"> • adversarial dialogues • stressful interpreting situations • trauma and tragedy.

PSPTIS507A Manage discourses in general settings

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	This unit describes the outcomes, skills and knowledge required to manage the physical setting and pace of discourses in general settings. It requires knowledge of the nature and structure of general interpersonal and institutional dynamics and the ability to recognise personal and professional limitations and seek assistance from appropriate persons. The content of the general setting is usually broad and routine, and there are few or two parties involved.
------------------------	---

Application of the Unit

Application of the unit	This unit applies to interpreting in a range of general settings for a variety of purposes, where the interpreter has physical and visual access to participants and can take action to direct participants and manage communication flow.
--------------------------------	--

Licensing/Regulatory Information

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Plan discourse.	1.1. Establish assignment <i>requirements</i> with clients to identify <i>planning</i> and <i>resource</i> needs. 1.2. <i>Arrange work environment</i> to assist performance and ensure safe, comfortable and effective discourse settings. 1.3. Identify <i>factors that may compromise interpreter effectiveness</i> , and make <i>adjustments</i> where possible.
2. Reach agreement with participants on process.	2.1. Confirm <i>relationships between and with participants</i> according to established protocols and practices. 2.2. Negotiate mutual agreement on roles, purpose and process of discourse suitable for the situation and participants and identify <i>areas requiring further research</i> . 2.3. Apply interpreting <i>protocols</i> in a professional manner and seek and provide clarification where required.
3. Manage flow of communication.	3.1. Assess participant <i>attributes</i> and use appropriate <i>communication style</i> . 3.2. Identify and address <i>factors affecting communication flow</i> . 3.3. Advise speakers on length, pace and form of delivery in a professional and courteous manner.
4. Monitor progress of discourse.	4.1. Identify and address problems in message transfer promptly to effectively transfer messages. 4.2. Monitor and facilitate interactions to ensure effective and equitable turn taking. 4.3. Identify communication challenges arising from cross-cultural and participant attributes, and use appropriate <i>strategies</i> to address them. 4.4. Identify personal and professional limitations in managing discourses and take necessary steps to accommodate these limitations. 4.5. Seek assistance from <i>appropriate persons</i> in <i>challenging situations</i> to manage discourse breakdown and restore communication. 4.6. Ensure conduct complies with professional standards and code of ethics.
5. Evaluate discourse	5.1. Seek and analyse feedback on discourse

ELEMENT	PERFORMANCE CRITERIA
management.	<p>management from <i>appropriate persons</i> and evaluate effectiveness of performance to reflect code of ethics.</p> <p>5.2. Take advice on issues and solutions and explore strategies to improve practice.</p>

p

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- communication skills to:
 - identify and plan for assignment requirements
 - commence discourses according to established protocols
 - manage communication flow in a sensitive and effective manner
- discourse management skills to:
 - accommodate communication styles and preferences in discourse management
 - analyse discourse settings and communication preferences, and adapt style accordingly
- initiative and enterprise skills to adapt to new and varied assignment situations
- interpersonal skills to:
 - interact with people from a range of social, cultural and ethnic backgrounds and with a range of communication needs
 - confirm assignment requirements and difficulties with clients and colleagues
 - seek assistance from clients, specialist advisers and peers
 - interact with a range of participants with confidence and cultural sensitivity
- language skills to achieve competent performance given setting of discourses
- literacy skills to prepare required background material and resources
- organisational skills to identify and prepare work environment
- problem-solving skills to:
 - assess barriers to effective communication and negotiate solutions
 - change conditions to enhance message transfer and interpreter comfort and safety
 - maintain effective communication flow in challenging situations
- self-management skills to:
 - apply code of conduct and legislative requirements to work processes

REQUIRED SKILLS AND KNOWLEDGE

- deflect pressure from other parties to perform duties other than interpreting
- evaluate performance according to client expectations
- behave professionally in all situations, including in emergencies and with time pressures
- identify personal and professional limitations in managing discourse
- seek debriefing and support where required
- technology skills to use a range of technical and electronic equipment, where necessary.

Required knowledge

- communication techniques that facilitate communication flow and discourse management
- culture-specific knowledge to:
 - arrange work environment
 - confirm relationships between and with parties
 - identify factors affecting communication flow
- strategies and techniques for working with people with special communication needs
- language structure, dialects and idioms in source and target languages
- discourse management issues, strategies and techniques
- relevant codes of ethics
- legal requirements, professional procedures and guidelines, ethical practices and business standards relating to assignment, including:
 - confidentiality requirements
 - privacy legislation
- limitations of work role, responsibility and professional abilities
- nature and structure of interpersonal, institutional and meeting dynamics
- OHS and risk management practices and procedures relevant to nature of assignment
- professional support networks, including peer help groups and mentors
- source and target languages to achieve competent performance given setting of discourses.

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms the candidate's ability to manage the physical setting and pace of discourses in general settings. This includes:

- identifying and analysing assignment requirements and resources and the need for additional information
- planning in order to anticipate factors that may impact interpreting in general discourse settings.
- Supporting parties to understand and reaching agreement with parties on the interpreting process.
- Directing participants in a respectful and professional manner to maximise communication flow.
- Identifying communication challenges from cross-cultural and participant attributes and using appropriate strategies to address them.
- Identifying personal and professional limitations and challenging situations and seeking assistance to address them.
- complying with professional standards and codes.
- reflecting on practice and using opportunities to improve practice.
-

Context of and specific resources for assessment

Evidence for assessment of this unit of competency will make use of scenarios, case studies, experiences and, where possible, examples of interactions with colleagues and clients which illustrate a range of skills and strategies for managing discourses in general settings.

Resources for assessment include:

- a range of clients and environments where preparation for assignments requires familiarity with assignment to plan and identify resource needs
- discourses which require general and routine concepts, including community and cultural protocols and familiar procedures
- settings which allow a range of capacity to influence meeting processes and communication flow

EVIDENCE GUIDE

- discourses which include parties with a range of experience with interpreting and its protocols and conventions.
- observations and questioning of candidates interpreting in settings which require a range of techniques to address issues affecting communication flow.

Evidence for assessment should be gathered to demonstrate a range of experiences in managing discourses in general settings. Evidence could include examples of negotiations with client and participant expectations, using the resources of professional associations or employers, and should also include evidence of decision making where there are high levels of risk in ethical, business and professional issues influencing decisions.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<p><i>Requirements</i> may include:</p>	<ul style="list-style-type: none"> • discourse participants and languages spoken • discourse location or environment • familiarity with the content, subjects and expectations • familiarity with topic and context • work conditions, such as: <ul style="list-style-type: none"> • continuous hours to be worked • need for tandem or team or collaborative interpreting • required breaks • timing of discourse.
<p><i>Planning</i> may include for:</p>	<ul style="list-style-type: none"> • purpose • context and subject • expectations and intended or desired outcomes • culturally appropriate behaviour and presentation • target language delivery • risk management considerations • safety requirements for interpreter
<p><i>Arranging work environment</i> may include:</p>	<ul style="list-style-type: none"> • clear lines of sight • adequate lighting and ventilation • acceptable visual and noise levels • comfort and safety • participant positioning appropriate to: <ul style="list-style-type: none"> • cultural and religious backgrounds • recording of assignment • party movements and dynamics • setting • visually impaired participants.
<p><i>Resources</i> may include:</p>	<ul style="list-style-type: none"> • background information • forms or paperwork • reference material, including dictionaries and glossaries • tools and equipment • supporting documentation to assist message transfer,

RANGE STATEMENT	
	such as diagrams, maps and photographs.
<i>Factors that may compromise interpreter effectiveness</i> may include:	<ul style="list-style-type: none"> • impeded lines of sight • inadequate lighting and ventilation • physical barriers to discourse management • persons other than participants present (e.g. family or observers) • visual and ambient noise.
<i>Adjustments</i> may include:	<ul style="list-style-type: none"> • addressing OHS concerns • adjusting position and setting in regard to listener or speaker as changing circumstances require • positioning self in a culturally appropriate manner • maximising access to hands-free telephone • remaining unobtrusive when not required to interpret. • using professional judgement to decide when adjustment isn't possible, and to use alternative strategies, such as withdrawal from assignment
<i>Relationships between and with participants</i> may include:	<ul style="list-style-type: none"> • details of discourse, such as: <ul style="list-style-type: none"> • first time meeting or one in a series of meetings • government service provider with public client • service provider with private client • interests in relation to purpose of discourse • personal details of participants, including religious and ethnic backgrounds • family and kinship connection • cultural protocols and conventions • introductions • primary and secondary participants • professional agents and their roles • the role and expectations of the interpreter
<i>Protocols</i> to commence discourse may include:	<ul style="list-style-type: none"> • effecting introductions • briefing participants • explaining purpose, process and recording requirements • confirming confidentiality of information, if appropriate to discourse • requesting participant details, such as names and titles.
<i>Attributes</i> may include:	<ul style="list-style-type: none"> • attitudes to: <ul style="list-style-type: none"> • communication needs of all parties • ethnicity • authority • disclosure

RANGE STATEMENT	
	<ul style="list-style-type: none"> • conflict • speaking or signing style and expression, including 'Australianised' language other than English • educational level • intellectual and physical capabilities • dialect • language proficiency, including pronunciation and vocabulary.
<i>Communication style</i> may include:	<ul style="list-style-type: none"> • language version or dialect • register • regular checking of understanding, particularly in Auslan and Indigenous dialogues.
<i>Factors affecting communication flow</i> may include:	<ul style="list-style-type: none"> • ethnic, political and religious affiliations or kinship • real or perceived direct or indirect conflicts of interest • stressful or confrontational situations • interpreter: <ul style="list-style-type: none"> • personal presentation • degree of familiarity with specific procedures • performance stress • personal beliefs, feelings and customs • personal competence.
<i>Strategies</i> may include:	<ul style="list-style-type: none"> • adjusting register • impartial interpreting of indicators of misunderstanding • explaining exchanges between interpreter and individual parties • selecting appropriate moment and method to communicate challenges • cross-cultural and interpersonal bridging.
<i>Challenging situations</i> may include:	<ul style="list-style-type: none"> • attempts to manipulate or influence interpreter • cross-cultural communication challenges, relating to: <ul style="list-style-type: none"> • culture-specific attitudes and behaviour • cultural conflicts, such as aboriginal country boundaries • different communication styles and preferences • challenging characteristics of participants, such as: <ul style="list-style-type: none"> • age • physical or mental disability • emotional or psychological state of participants (eg traumatisation, anger, fear)

RANGE STATEMENT	
	<ul style="list-style-type: none"> • lack of cooperation and resistance to process • discourse setting, including: <ul style="list-style-type: none"> • confined space • physical barriers to sight or sound • diverse expectations of participants • local variations in pronunciation, expression and vocabulary • type of discourse, such as: <ul style="list-style-type: none"> • emotionally charged discourses in crises, accidents or emergencies • conflict between participants.
<i>Appropriate persons</i> may include:	<ul style="list-style-type: none"> • chair of meeting • discourse participants • interpreting team colleague • mentoring interpreter. • booking agency

PSPTIS508A Analyse texts to be translated (LOTE)

Modification History

Not applicable.

Unit Descriptor

Unit descriptor This unit describes the outcomes required to read and analyse a written message in a source language for the purpose of later transfer to a target language, identifying the context, purpose and intent of the author and key linguistic, cultural, societal and situational elements to be conveyed in the future language transfer process.

Application of the Unit

Application of the unit This unit applies to all translating assignments.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

Employability skills This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Identify translating requirements and expectations of audience.	<p>1.1 Identify source language, including register and style.</p> <p>1.2 Identify source, context and purpose of <i>text</i>, determining specific requirements and regional or specialist aspects.</p> <p>1.3 Identify audience for translated text and confirm that translation requirements and expectations match those of client.</p> <p>1.4 Identify salutations and other source language conventions not to be translated literally.</p> <p>1.5 Confirm and review <i>resources</i> to aid in understanding specialist or technical language.</p>
2 Analyse language of source text.	<p>2.1 Apply subject and context knowledge to translation task, sourcing further assistance where required.</p> <p>2.2 Analyse <i>language</i> and <i>writing conventions</i>, determining use of terminology and language and using <i>techniques</i> to address <i>difficulties identified</i>.</p> <p>2.3 Identify social and cultural issues and plan solutions relevant to translation task.</p> <p>2.4 Recognise idiomatic and metaphorical expressions and foreign loan words in source language.</p> <p>2.5 Build, use and maintain assignment-specific <i>glossary</i>.</p>
3 Analyse grammar and cohesion of source text.	<p>3.1 Analyse function of source language punctuation.</p> <p>3.2 Determine semantic and syntactic structure.</p> <p>3.3 Paraphrase text to check plausibility of comprehension.</p>
4 Resolve difficulties.	<p>4.1 Identify deficient source language text and discuss with client.</p> <p>4.2 Suggest solutions and reformulate text as agreed for effective translation.</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- language skills analyse source text for meaning, including:
 - cause and effect relationships
 - cohesive and substitution devices
 - function of words and grammatical elements
 - idioms and idiomatic expressions
 - metaphor and simile
 - parsing sentences
 - punctuation
 - register and style
 -
- literacy skills to:
 - assess and use information
 - interpret terminology and jargon
 - read and record information
- problem-solving skills to:
 - address problems in *source text*
- research skills to:
 - identify background information relevant to assignment
 - make preparations to ensure effective and efficient translations
- technical skills to:
 - select and apply appropriate resources, techniques and equipment
- technological skills to use office equipment and information and communications technology (ICT) for translating purposes.

Required knowledge

- cultural knowledge, including cross-cultural perspective to:
 - determine cultural concepts embedded in language
 - identify inherent cultural and socio-cultural concepts
- file and information management techniques
- language structure, dialects and idioms in source language
- professional procedures, ethical practices and business standards
- subject specialist area and culture-specific knowledge relevant to topic of translation.

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms the ability to read and analyse a written message in a source language for the purpose of later transfer to a target language including:

- building, using and maintaining an assignment-specific glossary
- identifying the context, purpose and intent of the author
- identifying the key linguistic, cultural, societal and situational elements to be conveyed
- analysing language and writing conventions
- using a range of techniques and resources to address and resolve difficulties identified
- paraphrasing text to check plausibility of comprehension
- using technology to source and review appropriate information and reference material.

Context of and specific resources for assessment Evidence for assessment of this unit of competency will make use of scenarios, case studies, experiences and, where possible, examples of interactions with colleagues and clients which illustrate a range of skills and strategies for analysing texts for translation.

Resources for assessment include:

- a range of source texts and their paraphrased target texts
- individual language resources such as glossaries and dictionaries, written and in memory.
- sources of content information and research.
- examples of part and fully completed translated texts
- examples of complex texts in a limited range of content and subject areas
- examples of simple texts in a range of content and subject areas
- examples of source texts which present a range of cultural and equivalence issues.
- examples of source texts which require further research on content, language and presentation.

While the content and scenarios may be simulated, evidence

EVIDENCE GUIDE

for assessment should reflect the conditions of real assignments in reading and analysing a range of texts presenting varying equivalence problems and requiring a range of research.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

- Resources*** may include:
- translating technology
 - dictionaries
 - glossaries
 - internet sites
 - content and subject specialists
- Language*** may include:
- idiomatic expressions in source language
 - specialist vocabulary, expressions and concepts
 - non-equivalence
 - technical terminology
 - idiosyncratic language, slang, jargon.
- Writing conventions*** include:
- abbreviations
 - acronyms
 - punctuation
 - symbols.
- Techniques*** may include:
- optical character readers
 - scanning and enlargement.
- Difficulties identified*** may include:
- concepts specific to culture or locale
 - deciphering idiosyncratic source language
 - deciphering illegible handwriting or stamps
 - linguistically complex language
 - proper nouns and their localisation
 - translation precedents
- Glossary*** includes:
- key vocabulary list
 - terminology bank
 - record of translation decisions.

PSPTIS509A Interpret in general monologue settings (LOTE)

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	<p>This unit describes the outcomes, skills and knowledge required to interpret from a source language to a target language in general monologue settings, preserving the communicative intent of the source language. The unit requires the ability to use a range of techniques to assist in the message transfer process and address problems in delivery. An interpreter in the monologue setting is required to interpret in one language direction, from source to target. The speech to an audience that characterises the monologue setting typically requires the interpreter to apply public speaking or presentation skills. In a general setting the content or complexity of the situation can usually be predicted or planned for, and there are limited opportunities for error correction. There are typically only a few participants and the physical elements of the setting permit the interpreter limited scope to manage the discourse to ensure that utterances are suitable for retention and recall.</p>
------------------------	---

Application of the Unit

Application of the unit	<p>This unit applies to interpreters working in consecutive and Auslan simultaneous modes, either alone, collaboratively in tandem, relay or as part of a team. Miscommunication that may occur in this setting is readily managed through consultation and preparation.</p>
--------------------------------	--

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

Employability skills	This unit contains employability skills.
-----------------------------	--

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Receive and analyse source message.	<p>1.1 Confirm that setting, context, parties and expectations are consistent with client <i>requirements, assignment agreement and interpreting protocols</i>.</p> <p>1.2 <i>Attend actively</i> to source utterance, applying strategies to support retention and recall and adjusting physical position to optimise sound reception and visual cues.</p> <p>1.3 Apply subject and context knowledge to anticipate purpose and intent of source and strategies used to develop ideas.</p> <p>1.4 Identify and record <i>key information</i> using mnemonic strategies.</p> <p>1.5 Identify relationships between <i>linguistic and non-linguistic elements</i>, and analyse cultural and other factors affecting meaning.</p> <p>1.6 Identify limits to addressing problems of understanding or recall and <i>confirm understanding</i> where appropriate in a manner that does not compromise <i>effective delivery</i>.</p>
2. Transfer message to target language.	<p>2.1 Recall information from notes and other mnemonic devices.</p> <p>2.2 Use rhetorical techniques to transfer the <i>communicative intent</i> into the target language in a timely manner appropriate to audience and setting, and <i>reflecting speaker's characteristics</i>.</p> <p>2.3 Recognise and address <i>issues in message transfer</i> associated with the setting, language and concepts.</p> <p>2.4 <u>Monitor interpreting process to identify when it is necessary to seek assistance or withdraw from assignment</u></p>
3. Evaluate interpreting performance.	<p>3.1 Evaluate performance in line with issues encountered, assignment requirements and code of ethics.</p> <p>3.2 Determine <i>personal impact</i> of assignment and identify need for debriefing.</p> <p>3.3 Consider process improvement strategies.</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- communication skills to:
 - confirm understanding of source message
 - transfer messages effectively from source to target languages
 - use rhetorical techniques to transfer communicative intent in a timely manner.
- interpersonal skills to:
 - ensure behaviour and presentation are appropriate to monologue setting and cultural conventions
 - interact with people from a range of social, cultural and ethnic backgrounds and with a range of communication needs
 - work with parties with a range of experience and awareness of interpreting protocols and expectations
- interpreting skills to achieve competent message transfer, including to:
 - adapt embedded cultural concepts for correct transfer
 - conceptualise and express general and predictable information in target language, maintaining impartiality
 - include non-verbal cues in message transfer
 - manage problems of equivalence
 - reproduce factually and linguistically accurate content
 - use basic strategies to retain and recall messages
 - produce decipherable notes of key information
 - use technical, language, research and basic public speaking skills to ensure cohesive and faithful delivery of messages
- language skills to achieve competent performance:
 - application of correct structures, grammar and syntax to achieve coherent delivery
 - clear pronunciation
 - correct use of common idiom, collocations and slang
 - recognition and use of a range of general and context-specific registers
 - recognition of common metaphors and similes and implied meaning
 - vocabulary based on general knowledge and specific to context
-
- literacy skills to prepare required background material and resources
- organisational skills to:
 - arrange work environment suitably

REQUIRED SKILLS AND KNOWLEDGE

- prepare and administer resources and documentation relating to assignment
- complete required preparation
- problem-solving skills to address problems in delivery
- research skills to source background information relevant to assignment
- self-management skills to:
 - mentally order information for message transfer
 - use mnemonic strategies to recall information
 - interpret in a professional and impartial manner
 - withdraw from assignment where necessary.

Required knowledge

- broad general knowledge of cultures and societies of both English and LOTE participants
- broad general subject and context knowledge, including of community domains
- relevant codes of ethics
- concepts of meaning-based message transfer
- communication techniques that facilitate interpreting process
- cultural knowledge, including cross-cultural perspective of communication and behaviour to:
 - determine cultural concepts and cues embedded in language
 - transfer cultural concepts without compromising communicative intent of target message
 - use culturally appropriate message delivery
- feedback and debriefing techniques
- legal requirements, professional procedures and guidelines, ethical practices and business standards relating to interpreters, including:
 - privacy and confidentiality requirements
 - duty of care
 - impartiality
- limitations of work role, responsibility and professional abilities
- OHS and risk management principles and practices to ensure own physical safety and comfort
- research methods to source subject and context knowledge relevant to assignment
- source and target languages to achieve competent message transfer
- basic strategies to assist retention of information and recall of source messages

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms the ability to interpret from a source language to a target language in general monologue settings, preserving the communicative intent of the source language, including:

- applying interpreting and English and LOTE skills required to achieve competent message transfer and competent performance
- using strategies and techniques to effectively deliver and preserve the communicative intent and maintain impartiality
- using interpersonal and communication skills to interpret in a professional manner appropriate to speaker and audience
- using effective rhetorical techniques and methods to reflect the intention of the source
- applying knowledge of the language, conventions, culture and protocols of a range of general and predictable subjects and contexts
- drawing on research, general knowledge and information relevant to the subject
- using basic memory retention strategies
- recognising and resolving transfer problems and transfer errors to assist delivery.

Context of and specific resources for assessment

Evidence for assessment of this unit of competency will make use of scenarios, case studies, experiences and, where possible, examples of interactions with colleagues and clients which illustrate a range of skills and strategies for interpreting in general monologue settings.

Resources for assessment include:

- opportunities to observe and question candidate interpreting in a range of general monologue settings
 - examples of personal glossaries and memory aid resources
 - examples of documentation of client requirements and conditions
 - examples of debriefing and self-evaluation

EVIDENCE GUIDE	
	<p>opportunities taken by candidate.</p> <ul style="list-style-type: none">• . <p>The context for assessment might include simulations of general monologue settings, and ideally will include observations conducted in real interpreting settings. Evidence for assessment should be gathered to demonstrate a range of experiences in interpreting in general monologue settings in a range of fields in the community and business domains.</p>

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<p><i>Requirements</i> may include:</p>	<ul style="list-style-type: none"> • source and target languages • location or environment • required equipment and resources • work conditions, such as: <ul style="list-style-type: none"> • continuous hours to be worked • need for tandem, team or relay interpreting • required breaks • sight lines and visibility • timing of monologue • using public speaking aids and equipment • purpose • context and subject • expectations and intended or desired outcomes • target language delivery • risk management considerations • briefings • research and preparation, including identifying sources of information.
<p><i>Protocols</i> may include:</p>	<ul style="list-style-type: none"> • briefing participants • explaining purpose and process, including: <ul style="list-style-type: none"> • pausing utterance when at own limits of recall • rotating interpreting when team interpreting, according to industry standards and situation' • information management appropriate to monologue • requesting party details, such as names and titles • professional and operational protocols for presentations.
<p><i>Attend actively</i> may include:</p>	<ul style="list-style-type: none"> • applying strategies to support retention and recall, including recording key information • maintaining concentration and focus • seeking repetition and clarification • note speakers gestures, facial expressions and body language

RANGE STATEMENT	
	<ul style="list-style-type: none"> • applying subject and context knowledge to anticipate purpose of discourse • deconstructing <ul style="list-style-type: none"> • complex syntax • lexically dense content • formal register • identifying strategy being used to develop ideas • noting verbal and non-verbal cues.
<i>Linguistic and non-linguistic elements may include:</i>	<ul style="list-style-type: none"> • colloquial and idiomatic language • idiosyncratic language use • discourse markers • ellipsis • register • vocabulary based on general knowledge • voluntary and involuntary pragmatic features of speech, such as: <ul style="list-style-type: none"> • inflection and tone • nuance and intensity of feeling • stress and pitch • voluntary and involuntary prosodic features of speech, such as: <ul style="list-style-type: none"> • hesitation • pauses and silence • rhythm • body language • eye contact • facial expressions • gestures and posture
<i>Key information</i> may include:	<ul style="list-style-type: none"> • basic facts, including: <ul style="list-style-type: none"> • numbers, dates and times • personal details, such as names, titles and addresses • key content words.
<i>Confirming understanding</i> may include:	<ul style="list-style-type: none"> • checking communicative links • referring to dictionaries or glossaries • seeking clarification • retaining and recalling utterances of sufficient length to ensure delivery is accurate and coherent.
<i>Effective delivery</i> may be:	<ul style="list-style-type: none"> • accurate and cohesive • appropriate to discourse, including:

RANGE STATEMENT	
	<ul style="list-style-type: none"> • language that suits audience • culturally appropriate verbal and non-verbal behaviour • deconstructing complex syntax, high lexical density and formal register • paraphrasing unfamiliar vocabulary, idiom and abstract concepts • shortening lengthy utterances • slower than normal rate of speech • appropriate to setting • timely
<i>Communicative intent may include:</i>	<ul style="list-style-type: none"> • choosing between literal transfer and the communicative intent of idiomatic expressions • deconstructing complex syntax, dense lexical content and formal register • exercising judgement of embedded cultural concepts • identifying and using common idiomatic expressions • identifying and using loan words or signs • incorporating implied meaning in message transfer • informal and spoken register in the active voice • maintaining logical sequence of source utterance • paraphrasing unfamiliar vocabulary, idiom and concepts • recognising and conveying implied meaning • recognising common metaphors and similes • reflecting speaker characteristics • syntactic simplicity • terminology appropriate to context • transferring cultural cues, such as laughter and euphemism • using correct common collocations • using general standard of expression, style and register • verbalising non-verbal source language elements
<i>Reflecting speaker's characteristics may include:</i>	<ul style="list-style-type: none"> • using appropriate language to maintain affect • verbalising non-verbal source language components • using similar rhetorical and public speaking techniques • reflecting speaker's prosodic features in target language • maintaining impartiality.
<i>Issues in message transfer may include:</i>	<ul style="list-style-type: none"> • transfer errors such as omissions, additions or changes that occur as a result of: <ul style="list-style-type: none"> • misinterpreting, or not transferring sensitively

RANGE STATEMENT	
	<ul style="list-style-type: none"> • jargon • cross-cultural differences • lack of common context • transfer problems, include: <ul style="list-style-type: none"> • elliptic, fragmentary or ambiguous source utterances • lack of equivalents • need for paraphrasing • unknown terms. •
<i>Personal impact</i> may include:	<ul style="list-style-type: none"> • performance stress • factors affecting interpreter impartiality • occupational health and safety • factors affecting interpreter personal safety or comfort, including: <ul style="list-style-type: none"> • cultural or societal dilemmas • stressful interpreting situations.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<p>1. Analyse source messages.</p>	<p>1.1. <i>Attend</i> to source messages and make <i>adjustments</i> to assist concentration and comprehension.</p> <p>1.2. Analyse discourse and speaker's strategies to predict discourse direction.</p> <p>1.3. Determine <i>key information</i> and <i>relationships</i> between <i>linguistic and non-linguistic</i> elements in the messages.</p> <p>1.4. Identify <i>factors affecting the meaning</i> of the messages.</p> <p>1.5. Identify <i>structural elements of discourse</i>.</p> <p>1.6. Use effective <i>strategies</i> to support message retention and recollection.</p>
<p>2. Recall source messages.</p>	<p>2.1. Use a range of <i>encoding strategies</i> to retain and ensure the accuracy of information.</p> <p>2.2. Manage discourse to ensure the quality and reliability of recall.</p> <p>2.3. Review key information and relationships in source messages.</p> <p>2.4. Analyse notes for usefulness in recollection of messages.</p> <p>2.5. Resolve problems of understanding and recall and seek <i>clarification</i> in a sensitive manner.</p>
<p>3. Reproduce source messages.</p>	<p>3.1. Retrieve message in a timely manner.</p> <p>3.2. Reproduce message accurately, maintaining its logical sequence and communicative intent.</p> <p>3.3. Use a range of techniques to track reproduced information.</p> <p>3.4. Assess effectiveness of strategies used.</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- analytical skills to analyse source message for key information
- communication skills to receive and deliver information through oral, written and visual means
- language skills to:
 - apply linguistic, semantic and pragmatic strategies to address structural elements of discourse
 - reproduce information using a range of strategies, maintaining register and logical sequence of source message
 - assist retention of information and recall of source message
- literacy skills to:
 - research background information
 - produce notes of key information
- problem-solving skills to:
 - analyse and adapt conditions to enhance message reception and recall
 - manage the discourse
- self-management skills to:
 - focus on message meaning and communication intent
 - select and apply strategies to assist message recall
- technology skills to select and use information and communication technology equipment to record and recall information.

Required knowledge

- characteristics of communication
- general and special purpose subject and context
- linguistic features, including register appropriate to setting, and forms and variations of language
- techniques to assist recall
- linguistic and non-linguistic elements of messages

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms the candidate's ability to analyse the meaning of a source language message, apply strategies to support retention and recall and to ensure the quality and reliability of reproduced messages. This includes:

- analysing a range of general and specialist source messages and determining important aspects of language, content, context and intention
- identifying a range of strategies and options to address challenges of:
 - accurately conveying message intent
 - timing
 - language
 - register
 - presentation characteristics
 - idiosyncrasies
- selecting, applying and justifying a range of techniques and options to maintain information recall and reproduction and overcome problems in language, meaning and presentation.
- reproducing a range of messages accurately.

Context of and specific resources for assessment

Assessment of this unit of competency will make use of scenarios, case studies, experiences and, where possible, examples of interactions with colleagues and clients which illustrate a range of skills and strategies for reproducing source messages.

Resources for assessment include:

- opportunities to observe candidate in a variety of subjects, settings and cultural contexts to observe candidate
- opportunities to demonstrate analysis and recall of messages in a range of realistic scenarios
- third party reports on effectiveness and accuracy of the candidate's recall and reproduction of messages

EVIDENCE GUIDE	
	<ul style="list-style-type: none">• explanations of recall and reproduction issues and judgements made. <p>Assessment should ideally be conducted in real interpreting assignments, but this competency may also be effectively assessed in realistic scenarios using a range of content and contexts. This unit may be assessed in conjunction with other interpreting units.</p>

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<i>Attend</i> involves:	<ul style="list-style-type: none"> • maintaining concentration and focus • closely observing and noting gestures, body language and facial expressions • noting key information.
<i>Key information</i> includes:	<ul style="list-style-type: none"> • terms and concepts related to a specialist subject or context • key content words and ideas and facts, including numbers, dates and times • personal details, such as titles and addresses • proper nouns and names • purpose of message • series of specific details, such as lists • technical terms.
<i>Relationships</i> may be indicated by:	<ul style="list-style-type: none"> • cohesion of meaning within a message • collocation • gesture • implied meaning • register.
<i>Linguistic and non-linguistic</i> elements include:	<ul style="list-style-type: none"> • non-verbal components of message, including: <ul style="list-style-type: none"> • body language and eye contact • facial expressions • gestures and posture • verbal components of message • voluntary and involuntary features of speech, such as: <ul style="list-style-type: none"> • inflection and tone • nuance and intensity of feeling • stress and pitch • types of language • voluntary and involuntary prosodic features of speech, such as: <ul style="list-style-type: none"> • hesitation • pauses and silence

RANGE STATEMENT	
	<ul style="list-style-type: none"> • rhythm.
<i>Factors affecting meaning</i> of messages may include:	<ul style="list-style-type: none"> • colloquial language • jargon • ambiguity • cultural concepts • humour • paralinguistic elements • register.
<i>Structural elements of discourse</i> include:	<ul style="list-style-type: none"> • interpersonal elements • language cues necessary for following conversation • interrupting or interjecting • turning points in an argument • turn-taking.
<i>Strategies</i> may include:	<ul style="list-style-type: none"> • abbreviations • chunking • recording key information, such as <ul style="list-style-type: none"> • numbers • single words and phrases • note taking: • logical (visual) order • lines to indicate end of an idea • symbols • characters • mathematical symbols • pictures for concepts • unambiguous abbreviations.
<i>Encoding strategies</i> may include:	<ul style="list-style-type: none"> • creating a mind map • visualising information • creating symbols • reflecting concepts and ideas, not words.
<i>Clarification</i> may be necessary for:	<ul style="list-style-type: none"> • ambiguous meaning • message delivered too quickly • words, expressions or intent not understood • idiosyncratic language use and speech • non-standard language variety used.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<p>1. Conduct negotiations in different languages.</p>	<p>1.1. Establish rapport by using appropriate courtesy protocols, identifying common ground and observing social, cultural and business conventions of the specific language.</p> <p>1.2. Provide explanations, information and supporting details about specific products or services.</p> <p>1.3. Use a range of language functions to conduct <i>negotiations</i>, including introducing formal talk, using turn-taking skills, and agreeing and disagreeing tentatively.</p> <p>1.4. Use prosodic features, gestures and body language effectively.</p> <p>1.5. Exchange and agree to information, including details of personnel, dates, quantities, products and services.</p> <p>1.6. Support negotiations by using any relevant visuals, graphics and other approaches in keeping with the requirements of particular subjects or cultural contexts.</p>
<p>2. Deliver presentations in different languages.</p>	<p>2.1. Deliver <i>presentations</i> in a style relevant to the purpose and objectives, audience characteristics, occasion and venue.</p> <p>2.2. Present information in a logical and concise manner using sequencing and linguistic linking.</p> <p>2.3. Support presentations with <i>public speaking</i> techniques.</p>
<p>3. Participate in social and cultural activities.</p>	<p>3.1. Use language and language functions appropriate to given <i>social and cultural activities</i>.</p> <p>3.2. Adapt and modify communication strategies and language functions according to the situation and client requirements.</p>
<p>4. Provide summaries of complex communication.</p>	<p>4.1. Provide <i>summaries</i> of the purpose and meaning of the original utterance.</p> <p>4.2. Use communication strategies and language functions that support immediate and unhindered communication.</p> <p>4.3. Make appropriate comments between parties to check and clarify meaning.</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- communication skills to use language functions such as presenting, questioning and negotiating, and a sufficiently comprehensive vocabulary to conduct a range of communication in a specific language in a particular context
- analytical skills to:
 - providing summaries that support immediate and unhindered communication
 - interpersonal skills to:
 - using appropriate oral expression and vocabulary to conduct negotiations, make presentations and participate in varied social and cultural activities
- problem solving skills to:
 - apply problem solving and conflict resolution techniques to communication
 - use cross-cultural communication skills in relation to the language being assessed and the associated culture, in order to undertake the full range of social and cultural activities.

Required knowledge

- comprehensive technical vocabulary required to support specific context of communication
- standard procedures specific to communication in a particular context
- key information and information sources in relation to operations and functions in a particular language and cultural context
- key information and standard procedures specific to negotiating in a particular social and cultural context
- applications of social, business and cultural conventions specific to the language being assessed, including:
 - social conventions and consistent use of forms of address
 - customs, protocols and taboos
 - dialect, idiom, colloquialisms and language conventions.

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms the candidate's ability to conduct complex, creative, routine and non-routine spoken or signed communication to meet the language and communication needs of translating and interpreting. This includes:

- interacting, establishing and maintaining rapport with in a range of subject and cultural contexts, in the language being assessed.
- using a range of language functions appropriate to negotiating, conducting presentations, and participating in social and cultural activities according to the needs of particular social and cultural contexts and settings
- using a range of extended non-verbal communication skills effectively, as well as verbal skills such as narrative and descriptive statements
- using repetition, clarification and paraphrasing techniques to clarify requirements, address problems and conflict, and reassure others.

Context of and specific resources for assessment

Assessment of this unit of competency must ensure the opportunity and resources to provide examples of activities that show the candidate:

- making presentations, presenting commentary and facilitating communication between parties engaged in complex issues while using the language being assessed
- using relevant and current communication materials, resources and equipment, such as dictionaries, glossaries, researched information, subject and cultural information, presentation equipment and microphones for media and audience presentations.

Assessment may make use of scenarios, case studies, previous experiences and, where possible, examples of interactions with colleagues and clients which illustrate a range of skills and strategies for demonstrating proficiency in languages.

EVIDENCE GUIDE

A range of assessment methods should be used to assess the candidate's practical skills and knowledge. The following examples are appropriate for this unit:

- oral testing of conversational language use
- direct observation of the candidate communicating and interacting in the language being assessed
- role-play activities that simulate language use and communication in a range of subject and cultural contexts
- written and oral questioning or interview to test knowledge of the functions of the language, culture, social and cultural conventions and cross-cultural communication requirements
- review of portfolios of evidence and third-party reports of professional performance by the candidate.
-

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<p><i>Negotiations</i> may be conducted in the context of:</p>	<ul style="list-style-type: none"> • meeting and event activities and venues • tour and guiding services • accommodation • international business • finance and marketing activities • business arrangements involving contracts and assignments • government and community services • legal services • media and publishing • immigration • education and children's services • commercial contracts and ventures • health and welfare services.
<p><i>Presentations</i> may include:</p>	<ul style="list-style-type: none"> • arguments • persuasion • debates • narratives • reports • factual information • creative productions.
<p><i>Public speaking techniques</i> may include:</p>	<ul style="list-style-type: none"> • audience engagement • humour • irony • word play • voice projection and intonation • placement and movement • timing • non-verbal gestures and communication • audience participation • demonstrations and visual aids.
<p><i>Social and cultural</i></p>	<ul style="list-style-type: none"> • formal and informal meetings

RANGE STATEMENT	
<i>activities</i> may include:	<ul style="list-style-type: none"> • interacting with a range of people from different: <ul style="list-style-type: none"> • values and cultures • age groups • social status • introductions and invitations • ceremonies and celebrations • personal and family relationships and obligations • business and financial meetings.
<i>Summaries</i> may include:	<ul style="list-style-type: none"> • factual and personal information • cultural references and conventions • literary conventions • instructions and arrangements • information about meetings, events, tours and places of interest • information about products, services, facilities, options, advice and treatment.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<p>1. Read and analyse documents in different languages</p>	<p>1.1. Read and fully <i>analysed documents</i>.</p> <p>1.2. Correctly comprehend any accompanying visual and graphic material.</p> <p>1.3. Correctly identify the culturally specific meaning contained in documents.</p>
<p>2. Provide informal written texts.</p>	<p>2.1. Capture and accurately convey nuances of meaning, in <i>written texts and summaries</i>.</p> <p>2.2. Convey ideas accurately taking into consideration cultural differences and idiolects.</p> <p>2.3. Provide any required additional explanation or comments to clarify meaning, especially about culturally specific details.</p> <p>2.4. Recognise <i>documents requiring professional translation</i> and arrange for assistance if required.</p>
<p>3. Write professional and commercial documents in different languages.</p>	<p>3.1. Produce written documents according to recognised conventions, standards and formats.</p> <p>3.2. Ensure the content of written documents is appropriate to audience and purpose.</p> <p>3.3. Develop ideas in appropriate depth to meet the requirements of the particular subject and cultural contexts.</p> <p>3.4. Tailor language to meet requirements of the target document or situation.</p> <p>3.5. Observe social and cultural conventions.</p> <p>3.6. Write documents with minimal errors so that intended meaning is clearly conveyed to the reader.</p> <p>3.7. Use standard communication and information management technology.</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- literacy skills to allow understanding and accurate interpretation of information which may include some complex ideas and concepts
- analytic skills to determine culturally specific meaning in documents
- problem solving skills to:
 - identify and address nuances of language and cultural understanding
 - identify and advise on documents requiring professional translations
- language skills to write documents that are:
 - clear and display fluent expression of information and ideas
 - appropriately structured and use language that is tailored to a range of workplace situations
- cross-cultural communication skills related to written documents.

Required knowledge

- standard formats and protocols for a range of typical documents appropriate to the purpose and particular language
- cultural understanding in specific contexts
- social, professional, literary and cultural conventions in a range of written documents specific to the language being assessed.

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms the candidate's ability to be effective and fluent in written communicating in at least two different languages. This includes:

- reading and writing a typical range of documents required to fulfill a range of general communication purposes in different subjects and cultural contexts in the range statement
- accurate applications of a range of personal, professional and commercial documents and professional writing
- preparing written documents with clear and fluent expression of information and ideas, correct structure and appropriate style and tone for the audience and cultural context (rare linguistic errors may occur).

Context of and specific resources for assessment

Assessment of this unit of competency will make use of scenarios, case studies, experiences and, where possible, examples of interactions with colleagues and clients which illustrate a range of skills and strategies for demonstrating proficiency in written languages.

Resources for assessment include:

- production of a range of written texts in the language being assessed, including general texts from those nominated in the range statement.
- preparing written texts under assignment conditions, resources and time constraints
- use of relevant and current communication equipment, such as computers, faxes and email facilities
- use of relevant and current materials, resources and equipment, such as dictionaries, glossaries,

EVIDENCE GUIDE

researched information, technical information, presentation equipment and microphones for media and audience presentations.

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- written testing
- written and oral questioning or interview to test the candidate's ability to read and interpret documents written in two languages including English
- review of samples of written communications prepared by the candidate
- written and oral questioning or interview to test knowledge of the culture, social and cultural conventions and cross-cultural communication requirements associated with the language
- written and oral questioning or interview to test linguistic knowledge, generic structure and other specific language features, such as vocabulary, grammar and sentence structure
- review of portfolios of evidence and third-party reports.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<i>Analyse may include:</i>	<ul style="list-style-type: none"> • information and details • ideas (both explicit and implied) • technical information • written language conventions • vocabulary • grammar and syntax • writer requirements.
<i>Documents may include:</i>	<ul style="list-style-type: none"> • government, medical, legal and educational • brochures and promotional material • notes, written requests and information • schedules and itineraries • formal letters • reservation and booking information • meeting agendas • commercial, business, professional and academic reports • manuals and instructions • internet information • poetry, literature.
<i>Written texts and summaries may include:</i>	<ul style="list-style-type: none"> • factual and personal information • instructions and arrangements • information about meetings, events, tours, places of interest and special facilities • information about products, services, facilities, options, advice and costs • publications • media extracts.
<i>Documents requiring professional translation may include:</i>	<ul style="list-style-type: none"> • proposals, submissions and tenders • contractual documents • official records: <ul style="list-style-type: none"> • immigration

	<ul style="list-style-type: none">• welfare• education• employment• health• personal and family• professional documents.

PSPTIS513A Translate general purpose texts from LOTE to English

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	This unit describes the outcomes, skills and knowledge required to translate general purpose texts from another language to English. The unit requires the ability to convey the purpose and use of the source information in functionally equivalent translated texts. It requires sound subject and context knowledge of the material being translated in order to produce translations that are accurate and appropriate for the context, target audience and end use. The language and concepts described in this unit are accessible to the general public.
------------------------	--

Application of the Unit

Application of the unit	This unit applies to translations of general purpose texts where the language and concepts are accessible to the general public and where there are likely to be limited equivalence problems and limited requirement for research on the subject beyond client resources. The purpose of translating is to convey information written in plain language to a limited and known audience
--------------------------------	--

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<p>1. Analyse LOTE general-purpose source texts.</p>	<p>1.1 Receive and manage <i>source texts</i> according to client requirements and conditions and confirm that it is complete and legible.</p> <p>1.2 Review personal skills and experience required to undertake assignment and meet client requirements.</p> <p>1.3 Identify areas of content and language requiring additional research and gather <i>reference material</i> in suitable format and timeframe.</p> <p>1.4 Identify suitable <i>tools and equipment</i> to aid in translation.</p> <p>1.5 <i>Analyse source texts</i> and apply knowledge of subject and context and experience in related texts to determine key elements and potential translation quality issues.</p> <p>1.6 <i>Restructure</i> source texts to clarify meaning and discuss issues arising with clients.</p> <p>1.7 <i>Choose approach to translation suitable to target audience and purpose of translation.</i></p>
<p>2 Translate LOTE texts to English texts.</p>	<p>2.1 Research and apply established translation precedents and information from <i>resources to ensure consistent outcomes.</i></p> <p>2.2 Analyse and adapt cultural and linguistic content of source texts as appropriate for document end use.</p> <p>2.3 Identify areas requiring further research or assistance and seek and incorporate additional information.</p> <p>2.4 Produce draft translations of source texts that are accurate, coherent, and <i>appropriate</i> for document end use and assignment requirements.</p> <p>2.5 Record translation decisions and justification in glossary.</p>
<p>3 Check draft translations.</p>	<p>3.1 Critically evaluate consistency, accuracy and functional equivalence of translated text.</p> <p>3.2 Identify and correct errors, distortions and unsupported translation decisions.</p> <p>3.3 Use tools and equipment to <i>check translations, refine and improve target texts</i> and manage and correct errors.</p>
<p>4 Revise translations.</p>	<p>4.1 Assess and incorporate advice from checking translator and subject advisers.</p> <p>4.2 Discuss and resolve outstanding issues with</p>

ELEMENT	PERFORMANCE CRITERIA
	<p>appropriate persons.</p> <p>4.3 Undertake further revision until target text is functionally equivalent to source text.</p>
<p>5 Finalise and evaluate general-purpose translations.</p>	<p>5.1 Use technology to format translated texts according to agreed specifications and end use requirements, and liaise with clients where required.</p> <p>5.2 Proofread formatted texts using standard methods to annotate proof corrections.</p> <p>5.3 Certify translation as required using <i>standard methods</i>.</p> <p>5.4 Return final version of translated text and <i>supporting documentation</i> to clients according to agreed procedures and within suitable timeframe.</p> <p>5.5 Discuss issues and solutions with colleagues and subject advisors and explore process improvement strategies.</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- analytical skills to:
 - analyse the requirements of assignments in terms of personal skills and capability
 - identify and resolve translation difficulties in general purpose LOTE source texts
 - interpret and apply quality assurance parameters
 - interpret and apply style guides, glossaries and reference material
- communication skills to:
 - consult effectively with clients and colleagues
 - discuss and resolve agreed processes and translating requirements with clients
 - liaise with colleagues to obtain independent quality control and discuss and agree on recommended changes
 - seek assistance from field or subject advisors and peer help groups
- language skills to produce accurate and coherent translated general purpose texts in English, including use of:
 - consistent register and style appropriate to end use
 - correct and idiomatic collocation, lexis and syntax
 - current and consistent vocabulary, including foreign loan words
 - factual correctness, including at the level of tense, gender and singular or plural
 - plain language
 - punctuation, including paragraphing
 - spelling appropriate to audience
 - textual devices that create cohesion and coherence
- literacy skills to:
 - analyse source texts written in plain language and dealing with concepts accessible to the general public
 - assess and use subject information
 - read and apply instructions concerning client needs and end user requirements
 - record translation decisions and justification in glossaries
 - proofread target texts
- organisational skills to:
 - access and return documentation according to client requirements
 - build, use and manage assignment-specific glossaries
- problem-solving skills to address discrepancies in the LOTE that affect transfer to

REQUIRED SKILLS AND KNOWLEDGE

English

- research skills to:
 - identify translation precedents relevant to assignment
 - make critical use of reference material and resources
 - undertake further research in response to challenges encountered in translation
- self-management skills to:
 - organise and use tools and equipment suitable to task
 - ensure suitable work environment, including adequate light, physical comfort and ergonomic work practices
 - meet time and contract commitments
- technology skills to:
 - use office equipment and information and communications technology for translating, formatting, proofreading and file management purposes
 - develop templates for non-narrative target texts
 - format target texts
- time management skills to ensure source texts are translated, checked, revised, formatted, proofread and returned within required timeframes
- translating skills to translate general purpose LOTE texts into functionally equivalent English texts, including:
 - adaptation
 - contrastive analysis of meaning and language
 - equivalence at the level of discourse, pragmatics, syntax and word
 - grammatical function transposition
 - localisation.

Required knowledge

- certification procedures, including underpinning legal and ethical principles
- customs, cultures and socio-political systems and their terminology relevant to assignments
- discourse analysis techniques
- document, file and information management practices and procedures
- awareness of competency and limitations in work role, responsibility and professional abilities
- privacy and confidentiality requirements
- professional procedures and guidelines, ethical practices and business standards applicable to assignments
- purpose and implications of translation
- source language required to analyse and restructure text to clarify meaning
- target language required to produce a functionally equivalent translation that is accurate, coherent and appropriate to end use

REQUIRED SKILLS AND KNOWLEDGE

- research methodologies and sources of reference material suitable to translating assignments
- subject, specialist area and culture-specific knowledge relevant to subject of assignments
- tools and equipment relevant to assignments, including relevant conventional technologies
- translating theories and techniques relevant to assignments, including principles of:
 - formal and dynamic translation
 - literal and free translation
 - form based and meaning-based translation
 - direct and oblique translation.

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms the ability to translate a general-purpose text from LOTE to English, conveying the purpose and use of the source information in a functionally equivalent translated text. This includes:

- applying language and translating skills required to convey the purpose and use of source texts where there are limited equivalence problems
- using a range of techniques to produce a translation that is accurate and appropriate for the context, target audience and end use
- applying sound subject and context knowledge of the material being translated and a broad general knowledge during the translation process
- using relevant language and research skills and the ability to critically apply resources, including glossaries
- checking and correcting content and formatting of translated text for consistency and accuracy through the exercise of revision and proofreading
- of using a range of word processing and document management technology to produce a target text in required format and within suitable and agreed timeframe
- incorporating revised content and feedback from clients, checking translator and appropriate advisers
- certifying translations using standard methods.

Context of and specific resources for assessment

- Evidence for assessment of this unit of competency will make use of scenarios, case studies, translation copy, assignment experiences and, where possible, examples of interactions with colleagues and clients which illustrate a range of skills and strategies for translating general purpose texts from LOTE to English.

Resources for assessment include:

- a range of narrative and non-narrative general purpose LOTE texts and their translated English texts
- examples of critical use of resources such as glossaries and dictionaries, written and memorised.
- client feedback and product evaluations

EVIDENCE GUIDE	
	<ul style="list-style-type: none"> • sources of content information and research. • part and fully completed translated <p>general purpose texts in a range of content and subject areas</p> <ul style="list-style-type: none"> • translated texts which have addressed cultural and limited equivalence issues. • texts which require further research on content, language and presentation • evidence of checking, revising, formatting and proofreading. • certified translations.
	<p>While the content and scenarios may be simulated, evidence for assessment should reflect the conditions of real assignments in translating a range of narrative and non-narrative texts presenting limited equivalence problems and requiring limited research.</p>

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<p>General-purpose <i>source texts</i> may include:</p>	<ul style="list-style-type: none"> • documents which are in general use by the wider community such as: <ul style="list-style-type: none"> • product labels and user information • public journal and reference documents • other narrative texts, including newspapers, magazines, posters and brochures • internal and public newsletters • information provided in plain English to the general public in texts related to: <ul style="list-style-type: none"> • medical • legal • welfare • transport • housing • education • community services • product or service publications and advice • general reports and correspondence • non-narrative texts such as transportation schedules and transcripts of personal and general information such as: <ul style="list-style-type: none"> • educational and academic records • licences • immigration documents • births, deaths and marriage records • employment records and CV.
<p><i>Reference material</i> may include:</p>	<ul style="list-style-type: none"> • contextual information, including general information relating to personal and community support systems • bilingual and monolingual dictionaries and glossaries • parallel texts • style guides or manuals • presentation, document lay out and graphics • thesaurus

RANGE STATEMENT	
	<ul style="list-style-type: none"> • topic and assignment-specific references.
<i>Tools and equipment</i> may include:	<ul style="list-style-type: none"> • dictionaries and glossaries, including: <ul style="list-style-type: none"> • bilingual and monolingual • electronic and hard copy • hardware, including: <ul style="list-style-type: none"> • computers • printers • scanners • templates • tools and equipment including: <ul style="list-style-type: none"> • internet • voice-operated keyboards • video recording and editing equipment.
<i>Analysing source text</i> may include:	<ul style="list-style-type: none"> • key elements, including: <ul style="list-style-type: none"> • context • regional, specialist and technical aspects • style • topic • meaning in context • punctuation • purpose • semantic structure • syntactic problems • transfer problems • writing conventions • non-text elements • research and clarification.
<i>Restructured</i> text may address:	<ul style="list-style-type: none"> • anomalies in terminology • ambiguity and confused references • cultural sensitivities and equivalence issues • lexical, linguistic or structural deficiencies.
<i>Resources</i> may include	<ul style="list-style-type: none"> • human resources, such as: <ul style="list-style-type: none"> • field or subject experts • peer help groups and opposite language colleagues • reference material • examples of previously translated texts and presentations.
<i>Appropriate</i> may	<ul style="list-style-type: none"> • adaptation

RANGE STATEMENT	
include:	<ul style="list-style-type: none"> • extract and certification • localised text • register and style appropriate to audience and purpose of translation • suitable orthography and punctuation, including paragraphing • suitable vocabulary •
<i>Standard methods of certification may include:</i>	<ul style="list-style-type: none"> • applying translator authority to translation according to legal, organisational and professional requirements, such as: <ul style="list-style-type: none"> • across pages • inserted header or footer text • on every page of source and target text • using signature or initials • using such things as: <ul style="list-style-type: none"> • affidavits • NAATI stamp • separate statement • statutory declarations.
<i>Supporting documentation may include:</i>	<ul style="list-style-type: none"> • background information • legal instruments certifying translated text, such as: <ul style="list-style-type: none"> • affidavits • statutory declarations • source text • updated assignment-specific glossary.

Unit Descriptor

Unit descriptor	<p>This unit describes the outcomes, skills and knowledge required to translate special purpose texts from English to another language. The unit requires the ability to convey the purpose and use of the source information in functionally equivalent translated texts. It requires sound conceptual understanding of the material being translated and its context in order to produce translations that are accurate and appropriate for the context, target audience and end use. The language transfer process described in this unit requires high-order language skills and the ability to apply specialist resources and subject specific glossaries, including specialist bilingual glossaries.</p>
------------------------	--

Application of the Unit

Application of the unit	<p>This unit applies to translations of special purpose texts where the subject of the text has its own specific terminology and where there may be significant equivalence problems and the need to undertake extensive research and translate complex language and concepts. The purpose of translating is to convey information written using specific terminology for a specific audience.</p>

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<p>1. Analyse special purpose source texts</p>	<p>1.1 Receive and manage <i>source texts</i> according to client requirements and conditions and confirm that it is complete and legible.</p> <p>1.2 Review personal skills and experience required to undertake assignments and meet client requirements.</p> <p>1.3 Identify complex areas of content and language requiring additional research and gather <i>reference material</i> in suitable format and timeframe.</p> <p>1.4 Identify suitable <i>tools and equipment</i> to aid in translation.</p> <p>1.5 <i>Analyse source texts</i> and apply knowledge of subject and context and experiences in related texts to determine key elements and potential translation quality issues.</p> <p>1.6 <i>Restructure</i> source text to clarify meaning and discuss issues arising with clients.</p> <p>1.7 Choose approach to translation suitable to target audience and purpose of translation.</p>
<p>2 Translate English source texts to draft texts in LOTE.</p>	<p>2.1 Research and apply established translation precedents and information from <i>resources to ensure consistent outcomes</i>.</p> <p>2.2 Analyse and adapt cultural and linguistic content of source texts as appropriate for document end use.</p> <p>2.3 Identify areas requiring further research or assistance and seek and incorporate additional information.</p> <p>2.4 Produce draft translations of source texts that are accurate, coherent, and <i>appropriate</i> for document end use and assignment requirements.</p> <p>2.5 Record translation decisions and justification in glossary.</p>
<p>3 Check draft translations.</p>	<p>3.1 Critically evaluate subject-specific terminology and concepts, consistency, accuracy and functional equivalence of translated text.</p> <p>3.2 Identify and correct errors, distortions and unsupported translation decisions.</p> <p>3.3 Use tools and equipment to check translations, refine and improve target texts and manage and correct errors.</p>
<p>4 Revise translations.</p>	<p>4.1 Assess and incorporate advice from checking translator and subject experts.</p>

ELEMENT	PERFORMANCE CRITERIA
	<p>4.2 Discuss and resolve outstanding issues with appropriate persons.</p> <p>4.3 Undertake further revision until target text is functionally equivalent to source text.</p>
<p>5 Finalise and evaluate translations.</p>	<p>5.1 Use technology to format translated texts according to agreed specifications and end use requirements, and liaise with client where required.</p> <p>5.2 Proofread formatted texts using standard methods to annotate proof corrections.</p> <p>5.3 Return final version of translated texts and <i>supporting documentation</i> to clients according to agreed procedures and within suitable timeframe.</p> <p>5.4 Discuss issues and solutions with colleagues and advisers and explore process improvement strategies.</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- analytical skills to:
 - analyse the requirements of assignments in terms of personal skills and capability
 - identify and resolve translation issues and difficulties in special purpose English source texts
 - interpret and apply quality assurance parameters to translation methods and presentation
 - interpret and apply style guides, specialised reference material, including glossaries
 - research and synthesise relevant subject-specific information
- communication skills to:
 - consult effectively with clients and colleagues
 - discuss and resolve agreed processes and translating requirements with clients
 - seek assistance from field or topic experts and peer help groups
 - liaise with colleagues to obtain independent quality control and discuss and agree upon recommended changes
- language skills to meet complex demands producing accurate and coherent translated special-purpose texts in LOTE, including use of:
 - consistent use of wide range of registers and styles appropriate to end use
 - correct and idiomatic collocation, lexis and syntax
 - current and consistent specialist vocabulary, including foreign loan words
 - factual correctness, including at the level of tense, gender and singular or plural
 - complex language
 - punctuation, including paragraphing
 - spelling appropriate to audience
 - textual devices that create cohesion and coherence
- learning skills to expand technical capabilities in specialised fields
- literacy skills to:
 - analyse source texts written using specific terminology and complex language or dealing with complex concepts
 - assess and use subject information
 - read and translate at a level to cope with a range of specialised genres and technical language or to translate in a single complex and specialised subject area
 - research complex and detailed information from a range of high level, technical

REQUIRED SKILLS AND KNOWLEDGE

- and conceptual sources
 - record translation decisions and justification in glossaries
 - proofread target texts
- organisational skills to:
 - access and return documentation according to client requirements
 - apply strategies for efficient client services
 - build, use and manage assignment-specific glossaries
- problem-solving skills to:
 - address discrepancies in English that affect transfer to LOTE
 - manage conflicting and inconsistent client objectives
 - identify strategies to educate clients in translation protocols and expectations
- research skills to:
 - identify translation precedents relevant to assignments
 - make critical use of reference material
 - source and use specialised resources
 - undertake advanced research in response to challenges encountered in translation
- self-management skills to:
 - develop specialised capabilities in response to work experiences and demands
 - ensure suitable work environment, including adequate light, physical comfort and ergonomic work practices
 - meet time and contract commitments
 - organise and use tools and equipment suitable to task
- technology skills to:
 - use office equipment and information and communications technology for translating, formatting, proofreading and file management purposes
 - for Auslan/English translations the ability to use video recording, viewing and editing equipment
 - format target texts
- time management skills to ensure source texts are translated, checked, revised, formatted, proofread and returned within required timeframes
- advanced translating skills to translate special purpose English texts into functionally equivalent LOTE texts, including:
 - adaptation
 - contrastive analysis of meaning and language
 - equivalence at the level of discourse, pragmatics, syntax and word
 - grammatical function transposition
 - localisation

REQUIRED SKILLS AND KNOWLEDGE

- text manipulation to clarify meaning.

Required knowledge

- awareness of competency and limitations in work role, responsibility and professional abilities
- discourse analysis techniques
- professional procedures and guidelines, ethical practices and business standards applicable to assignments
- advanced research methodologies and sources of reference material suitable to translating assignments
- extensive and high level subject, specialist area and culture-specific knowledge relevant to subject of assignments
- high-order target language required to produce a functionally equivalent translation that is accurate, coherent and appropriate to end use
- tools and equipment relevant to assignments, including relevant conventional and translation-specific technologies, such as computer assisted translation (CAT) software
- document and editing conventions such as proofreading, copy editing, footnoting, indices, tables and graphs, graphics, captions and presentation for publication
- source language required to analyse and restructure complex source text to clarify meaning, including:
 - cause and effect relationships
 - cohesive and substitution devices
 - function of words and grammatical elements
 - idioms and idiomatic expressions
 - metaphor and simile
 - parsing sentences
 - punctuation
 - register and style
- translating theories relevant to assignments, including principles of:
 - formal and dynamic translation
 - literal and free translation
 - form based and meaning-based translation
 - direct and oblique translation
- thorough and comprehensive English and LOTE specialist field systems, conventions and subject dimensions
- document, file and information management practices and procedures relevant to assignments and product context
- OHS practices and procedures specific to the demands of translating
- privacy and confidentiality requirements
- purpose and implications of translation

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms the ability to translate a special-purpose text from English to another language, conveying the purpose and use of the source information in a functionally equivalent translated text. This includes:

- applying high-order language and translating skills required to convey the purpose and use of source texts where there are significant equivalence problems and complex language and concepts
- using a range of advanced techniques to produce a translation that is accurate and appropriate for the context, target audience and end use
- applying sound conceptual understanding of the specialist material being translated and its context
- using high-order language and advanced research skills and the ability to critically apply specialist resources and subject-specific glossaries, including specialist bilingual glossaries.
- checking and correcting content and formatting of translated text for consistency and accuracy and compliance with editing and publishing conventions through the exercise of revision and proofreading
- consulting checking translator and appropriate advisers and incorporating feedback into processes and products
- using a range of word processing and document management technology to produce a target text in required format and within suitable and agreed timeframe
- explaining and defending translation choices in a professional manner.

Context of and specific resources for assessment

Evidence for assessment of this unit of competency will make use of scenarios, case studies, translation copy, assignment experiences and, where possible, examples of interactions with colleagues and clients which illustrate a range of skills and strategies for translating special purpose texts from English to LOTE.

Resources for assessment include:

EVIDENCE GUIDE	
	<ul style="list-style-type: none"> • a range of specialist English texts and their translated LOTE texts demonstrating different purpose, audience, document production, text and language complexity and extent of resources consulted • contracts and client conditions for a range of assignments • examples of critical use of resources from the range statement • examples of use of style guides, procedures for editing and publication. • opportunity to observe and question the candidate translating a functionally equivalent text, according to required assignment requirements, format and within agreed timeframe • examples of a range of complex research resources and strategies • evidence of checking, revising, formatting and proofreading.
	<p>While the content and scenarios may be simulated, evidence for assessment should reflect the conditions of real assignments in translating a range of texts presenting significant equivalence problems and the need to undertake extensive research and translate complex language and concepts.</p>

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<p>Special purpose <i>source texts</i> may include:</p>	<ul style="list-style-type: none"> • material with its own specific terminology, such as: <ul style="list-style-type: none"> • academic papers • commercial correspondence and official reports • instructional texts, such as technical and educational materials and guides • complex legal, medical, financial or scientific texts and reports • licensing and patent material • complex product or service manuals, user guides and information • technical texts containing field-specific information or terminology • specialised and detailed texts for limited, specific audiences.
<p><i>Reference material</i> may include:</p>	<ul style="list-style-type: none"> • contextual and specialist information, including: <ul style="list-style-type: none"> • specialist information relating to topic and specialised area of translation • wider background and supplementary information to enhance application of contexts • the internet, specialist websites • bilingual and monolingual dictionaries and glossaries • parallel texts • style guides or manuals • thesaurus • customised and client provided assignment-specific references.
<p><i>Tools and equipment</i> may include:</p>	<ul style="list-style-type: none"> • dictionaries and glossaries, including: <ul style="list-style-type: none"> • bilingual and monolingual • electronic and hard copy • assignment, client and topic-specific • hardware, including: <ul style="list-style-type: none"> • computers

RANGE STATEMENT	
	<ul style="list-style-type: none"> • printers • scanners • tools and equipment including: <ul style="list-style-type: none"> • translation memory software • voice-operated keyboards • internet web sites • video recording, viewing and editing equipment • virtual networking or collaboration media, such as e-forums and internet communication.
<i>Analysing source texts</i> may include:	<ul style="list-style-type: none"> • key elements, including: <ul style="list-style-type: none"> • context • regional, specialist and technical aspects • style • topic • specialist vocabulary, language conventions and terminology • meaning in context • layout and design • punctuation • purpose • semantic structure • syntactic problems • transfer problems • writing conventions • non-text elements • research and clarification.
<i>Restructured</i> text may address:	<ul style="list-style-type: none"> • anomalies in terminology • ambiguity and confused references • cultural sensitivities and equivalence issues • lexical, linguistic or structural deficiencies.
<i>Resources</i> may include	<ul style="list-style-type: none"> • human resources, such as: <ul style="list-style-type: none"> • field or topic experts • peer help groups and opposite language colleagues • reference material • examples of previously translated material.

PSPTIS602A Quality assure translations

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	<p>This unit describes the outcomes, skills and knowledge required to check and proof the translated text of another translator. Quality assurance should ensure that content is accurate, complete and correctly targeted to its intended end use, but should not infringe on the original translator's preferred writing style or altering the meaning of the source text. The unit requires the language and analytical skills to identify translation difficulties and transfer errors, and the research skills to source information that will clarify content issues. The unit also requires the interpersonal skills to collaborate with original translators in producing final versions of translated texts. Specialist subject knowledge and technical skills will inform the work undertaken in this unit.</p> <p>Certain employment conditions, roles and assignments will require translators and interpreters to have NAATI accreditation.</p>
------------------------	--

Application of the Unit

Application of the unit	<p>This unit applies to translators who undertake a range of quality assurance checks of a translated text for original translators, clients or commissioning service providers.</p>
--------------------------------	--

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Prerequisite units	
---------------------------	--

Employability Skills Information

Employability skills	This unit contains employability skills.
-----------------------------	--

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<p>1. Prepare to quality assure translation.</p>	<p>1.1. Identify and confirm <i>work requirements</i>, <i>performance expectations</i> and <i>end use of text</i>.</p> <p>1.2. Obtain and review source and translated text files and associated documentation and determine personal competence and willingness to undertake assignment.</p> <p>1.3. Obtain resources and select and prepare <i>tools and equipment</i>.</p>
<p>2. Compare translated text to source text.</p>	<p>2.1. Analyse source text and identify subject and <i>key elements</i>.</p> <p>2.2. Compare translated text to source text for accuracy, fidelity and appropriateness to end use, and identify and resolve translation difficulties and transfer errors.</p> <p>2.3. Check coherence of translation to ensure logical structure.</p> <p>2.4. Undertake further research and seek assistance from <i>appropriate persons</i> where required, and record findings and decisions in glossary, citing sources.</p>
<p>3. Propose amendments to translation.</p>	<p>3.1. Discuss proposed corrections to text with appropriate persons according to established procedures and code of ethics.</p> <p>3.2. Provide advice to the original translator within level of expertise and in response to questions.</p> <p>3.3. Make revisions to text using an agreed process and ensure amendments are visible and queries resolved.</p> <p>3.4. Annotate text where necessary and give clear instructions to desktop publisher where required.</p> <p>3.5. Evaluate translation fitness for purpose and resolve outstanding issues.</p>
<p>4. Submit quality assured translation.</p>	<p>4.1. Provide checked translation to client in line with <i>agreed arrangements</i> and confirm that it meets client requirements.</p> <p>4.2. Retain copy of checked translation and associated documentation for future reference, according to privacy and business protocols.</p> <p>4.3. Seek feedback from relevant persons and explore process improvement strategies</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- analytical skills to:
 - evaluate accuracy, consistency and equivalence of translations
 - interpret and apply quality assurance parameters while checking translations
 - interpret and apply style and procedural guides, glossaries and reference material
- communication skills to:
 - consult effectively with clients and colleagues
 - establish agreed processes and outcomes with clients
 - impart knowledge through verbal and written means
- interpersonal skills to:
 - facilitate change for greater integrity of translations
 - interact with a wide range of people from culturally and linguistically diverse backgrounds
 - negotiate and confirm work requirements, performance expectations and agreed approach
 - provide advice and present options and consequences in a sensitive manner
- language skills of the opposite language of the original translator to:
 - check translated text
 - identify and resolve translation difficulties
- learning skills to extend knowledge of topic and terminology where required
- literacy skills to:
 - read and apply instructions concerning work requirements
 - use workplace information, including assignment style guides and glossaries
- organisational skills to prepare and administer documentation, including implementing version control procedures
- problem-solving skills to:
 - address discrepancies between source text and translated text
 - consider solutions to translation problems
 - respond to client expectations
- research skills to:
 - make critical use of references
 - source information to assist in quality assurance task
- self-management skills to:
 - ensure suitable work environment, including adequate ambient light, own

REQUIRED SKILLS AND KNOWLEDGE

- physical comfort and ergonomic work practices
- prepare and use assignment-specific checklist
- prepare resources, tools and equipment suitable to task
- remain objective and impartial throughout process
- teamwork skills to collaborate with original translator in producing final version of translated texts
- technical skills to:
 - apply linguistic, cultural, general and subject knowledge to task
 - select and use suitable resources, techniques and equipment
- technology skills to:
 - use communications technology for translation, recording, file management, version control and tracking purposes
 - for Auslan, use video recording, reviewing and editing equipment
- time management skills to ensure translated text is checked and returned within required timeframes.

Required knowledge

- business requirements related to recording information and administering files
- communication techniques to ensure:
 - productive collaboration with original translators
 - understanding of client needs, agreed approach and end user requirements
- limitations of work role, responsibility and professional abilities
- privacy and confidentiality requirements
- professional procedures, ethical practices and business standards
- quality assurance parameters relevant to task
- translating theories and techniques, including principles of:
 - formal/dynamic translation
 - literal/free translation
 - form-based/meaning-based translation
 - direct/oblique translation
- research methods to source information that will clarify content issues
- source and target languages to meet target text requirements
- subject, specialist area and culture-specific knowledge relevant to topic of translation
- tools and equipment relevant to task.

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms the ability to check and improve the translated text of another translator, including:

- ensuring that content is accurate, complete and correctly targeted to its intended end use
- retaining the original translator's preferred writing style and the meaning of the source text
- undertaking preparations needed for an effective quality assurance process
- analysing translated texts to ensure they meet established requirements
- liaising with original translator and other appropriate persons
- providing and seeking advice in a sensitive manner and within level of personal expertise
- using technology to prepare and submit final product within suitable timeframe and according to established agreement.

Context of and specific resources for assessment

Assessment of this unit of competency will make use of scenarios, case studies, experiences and, where possible, examples of interactions with colleagues and clients which illustrate a range of skills and strategies for quality assuring translations.

Resources for assessment include:

- range and representative sample of original translated text and revised text
- examples of assignment contracts, conditions and documentation
- examples of translator and client feedback
- opportunities to observe and question the quality assurance process
- opportunities to observe the use of and outcomes from translating technology.

EVIDENCE GUIDE	
	This competency is ideally assessed on the basis of evidence provided by professional assignments, but may also be assessed using a range of documents which simulate realistic assignments.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<p><i>Work requirements</i> may include:</p>	<ul style="list-style-type: none"> • size and nature of assignment • timeline and key deliverables, including reporting requirements • formatting or text processing requirements • certification requirements • confidentiality requirements • style and content requirements • use of client glossary.
<p><i>Performance expectations</i> may include:</p>	<ul style="list-style-type: none"> • procedures and protocols for checking and annotating translation • process for collaborating with original translator, including contact person for clarification or assistance.
<p><i>End use of text</i> may include:</p>	<ul style="list-style-type: none"> • certification • publication • special-purpose text.
<p><i>Checklist</i> may include:</p>	<ul style="list-style-type: none"> • items relating to written or verbal client brief or procedural guide • minimum task requirements • technical, subject and language-specific requirements.
<p><i>Tools and equipment</i> may include:</p>	<ul style="list-style-type: none"> • computer and relevant software, including virtual networking or collaboration media • translating technology • electronic and hard copy dictionaries and glossaries, including specialist glossaries • video recording, reviewing and editing equipment • optical character readers • procedural guides • style guides or manuals • thesaurus • voice-operated keyboard.
<p><i>Key elements</i> may include:</p>	<ul style="list-style-type: none"> • linguistic, cultural and situational elements • context • purpose

RANGE STATEMENT	
	<ul style="list-style-type: none"> • register • style • source.
Need to <i>clarify issues</i> may arise from:	<ul style="list-style-type: none"> • cultural issues and concepts • linguistics • syntactic structure and grammatical ambiguities • terminology.
<i>Appropriate persons</i> may include:	<ul style="list-style-type: none"> • client or commissioning service provider • content or language specialists • identified contacts for task • original translator.
<i>Agreed arrangements</i> may include:	<ul style="list-style-type: none"> • checked text with revisions accepted • checked text with amendments visible • required format and layout • required timeframe.

PSPTIS603A Apply codes and standards to professional judgement

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	This unit describes the outcomes, skills and knowledge required to ensure that translators and interpreters apply current and relevant standards of professional and ethical behaviour in complex settings. The unit requires knowledge of professional codes of ethics and the on-going development and maintenance of professional judgement. It requires the ability to consider a wide range of professional issues and to reflect on and continuously develop a highly informed approach to practice.
------------------------	--

Application of the Unit

Application of the unit	This unit applies to translators and interpreters, in particular those whose work requires them to promote and monitor codes of practice and ethical standards for translating and interpreting.
--------------------------------	--

Licensing/Regulatory Information

Not applicable.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<p>1. Research ethical and professional issues.</p>	<p>1.1. Maintain detailed knowledge of ethical and professional practice and issues using reliable sources of information.</p> <p>1.2. Maintain productive professional relationships to facilitate awareness of current issues.</p> <p>1.3. Monitor and analyse trends to anticipate developments and directions in the field.</p> <p>1.4. Research industry discussion of professional ethical codes applied to the practitioner role.</p>
<p>2. Develop professional practices and knowledge.</p>	<p>2.1. Analyse applicable codes of ethics and conduct and their relationship to work practices and the exercise of professional judgement.</p> <p>2.2. Integrate <i>developments and trends</i> impacting on professional practice into work performance.</p> <p>2.3. Identify <i>current approaches</i> for maintaining and improving professional judgement and development.</p>
<p>3. Apply professional standards, knowledge and judgment to practice.</p>	<p>3.1. Reflect on and evaluate <i>professional practices</i> in work goals and plans.</p> <p>3.2. Apply and <i>promote ethical standards</i>, codes and practices with clients, colleagues and others.</p> <p>3.3. Identify and examine <i>factors</i> that impact on professional and ethical decision making and exercise <i>professional judgement</i> in choosing resolution strategies.</p> <p>3.4. Collaborate constructively in professional relationships to enhance own practice and the provision of peer support.</p> <p>3.5. Apply standards of ethical practice when contributing to professional debates, forums and providing feedback to colleagues.</p> <p>3.6. Regularly evaluate quality and success of professional judgement in meeting planned, professional and career outcomes.</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- communication skills to:
 - participate in professional networks
 - exchange professional opinions and advice
 - express professional issues, dilemmas, and judgments in a constructive manner
- initiative and enterprise skills to:
 - evaluate professional practice to maintain and improve performance
 - understand and adapt to performance contexts and needs
- interpersonal skills to:
 - demonstrate confidence and assertiveness when necessary
 - apply cultural and linguistic protocols in the exercise of professional judgment
 - develop and use contacts and networks to enhance professional knowledge
- literacy skills to read and apply industry codes and standards
- problem-solving skills to:
 - address ethical dilemmas
 - analyse and anticipate professional trends and directions
- analytical skills to:
 - develop broad skills and knowledge required to make professional judgements
 - evaluate, adjust and develop awareness of the implications and impact of professional judgment and ethical decision making
- research skills to identify and use a broad range of professional resources, associations and networks
- self-management skills to:
 - routinely reflect on judgments and decisions
 - model high standards of professional judgment
- technology skills to:
 - order and maintain professional resources
 - conduct research and maintain communication with e-networks
 - use relevant equipment
- self-evaluation skills to:
 - identify gaps in skills and knowledge and in professional experience and confidence
 - identify personal development needs to meet professional and business objectives.

Required knowledge

REQUIRED SKILLS AND KNOWLEDGE

- industry standards of professional behaviour and presentation relating to practice
- policy, cultural, technological and economic trends impacting on translating and interpreting
- networks relevant to own professional practice
- professional techniques, strategies and responsibilities of translators and interpreters
- types and sources of professional resources
- ethical issues and their implications for professional judgement and decision making
- relevant professional codes of ethics and conduct.

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms the candidate's ability to critically evaluate professional judgment issues and apply them to work practices in a diverse range of environments. This includes:

- researching and analysing ethical and professional practice issues
- maintaining knowledge of ethical and professional issues
- applying critical professional judgement to achieve ethical and strategic work outcomes
- applying ethical codes and standards to practice, including in situations where there are:
 - potential conflicts of interest
 - conflict between client requirements and industry standards
 - tensions between personal and client or colleague values
 - differences in expectations caused by cultural influences
 - dilemmas caused by tensions between personal and professional standards of practice and values
- reflecting on practice and justifying judgements and decisions
- maintaining and developing effective professional relationships and networks.

Context of and specific resources for assessment

Assessment of this unit of competency will make use of scenarios, case studies, experiences and, where possible, examples of interactions with colleagues and clients that illustrate issues of professional judgements and ethical decision making.

Resources for assessment include:

- relevant professional codes, standards and professional and business procedures
- feedback from clients, agencies and employers
- professional networks and peer support activities

EVIDENCE GUIDE

- performance reviews and practice reflection
- professional development activities.

This competency is ideally assessed on the basis of evidence provided by professional assignments, but may also be assessed using a range of scenarios which simulate realistic assignments and experiences. This unit may be assessed in conjunction with other translating and interpreting assignments.

Range Statement

RANGE STATEMENT	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
<p><i>Developments and trends</i> may include:</p>	<ul style="list-style-type: none"> • legislative or regulatory changes • new developments, directions or trends in translating and interpreting • policy changes in relation to language services • positions taken by professional associations.
<p><i>Innovative approaches</i> may include:</p>	<ul style="list-style-type: none"> • assignment review and maintenance • networking • ongoing education and training • self-evaluation • strategic or business planning.
<p><i>Professional practices</i> may include:</p>	<ul style="list-style-type: none"> • respecting the attitudes and beliefs of others • separating professional and personal activities and interests • maintaining ethical practice in the face of opposition, conflict, professional challenges and limited resources • modelling high standards of behaviour and presentation • offering and accepting advice such as feedback, guidance and recommendations • acknowledging and working within scope of personal competence • meeting performance requirements, including: <ul style="list-style-type: none"> • adequate preparation, personal presentation and time management • responsibility to communication • cooperating with colleagues • making informed ethical decisions in accordance with relevant codes of ethics and conduct.
<p><i>Promoting ethical standards</i> may include:</p>	<ul style="list-style-type: none"> • demonstrating probity in all areas of responsibility • modelling professional codes of conduct • communicating and modelling new and revised policy directions in translating and interpreting • supporting colleagues in ethical conduct.

RANGE STATEMENT	
<i>Factors</i> may include:	<ul style="list-style-type: none"> • potential conflict of interest • obligations of duty of care • responsibility to communication • expectations of different parties.
<i>Professional judgement</i> may include:	<ul style="list-style-type: none"> • interpreting professional standards and codes of ethics • applying standards and codes in a range of professional and intercultural contexts.

PSPTIS604A Translate multimedia source material

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	This unit describes the outcomes, skills and knowledge required to translate into another language audio and audiovisual source language tapes and scripts so that they may be narrated or re-voiced in a target language, or be used as subtitles or captioning to a video source text. The unit requires a high level of comprehension of the audiovisual source language, the ability to work between two different languages in spoken and written form, and the ability to reflect the register of the source in the target language
------------------------	---

Application of the Unit

Application of the unit	This unit applies to a range of translating assignments where target language translations will be used for media, promotion, and public information purposes requiring functional equivalence; and for entertainment and dramatic material where adaptation to audience may take precedence over fidelity to source.
--------------------------------	---

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

Employability skills	This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare to translate	<p>1.1 Confirm assignment requirements and prepare suitable <i>tools and equipment</i>.</p> <p>1.2 Attend to source content and identify topic and <i>key elements</i>.</p> <p>1.3 Identify technical problems and <i>mark up</i> source script where relevant.</p> <p>1.4 Analyse and address technical or transfer <i>issues</i> through negotiation with clients and technical advisers.</p> <p>1.5 Develop and extend glossary and make critical use of other reference material to identify meaning in context.</p> <p>1.6 Choose approach to translation suitable to target audience and purpose of the text.</p>
2. Draft translation	<p>2.1 Research and apply established translation precedents, making critical use of reference material, and identify need for additional resources and information.</p> <p>2.2 Research facts and cultural and situational references where necessary and analyse and adapt cultural and linguistic content as appropriate.</p> <p>2.3 Produce draft translations of source texts that are accurate, coherent, and appropriate for context, target audience and end use.</p> <p>2.4 Record translation decisions and justification in glossary.</p>
3. Adapt draft translation to requirements	<p>3.1 Review translation with reference to time code and vision, and <i>match to timing</i>.</p> <p>3.2 <i>Adapt to image and audio delivery applying conventions to maintain narrative flow</i>.</p> <p>3.3 Ensure that translation is <i>fit for purpose</i>.</p>
4. Check draft translation	<p>4.1 Check accuracy and coherence of draft translation, and identify and correct errors manually and using computer-based tools.</p> <p>4.2 Confirm consistency of register, style and terminology of target translation and evaluate functional equivalence and fidelity as appropriate to target audience.</p> <p>4.3 Collaborate with <i>appropriate advisers</i> to obtain independent quality control and incorporate</p>

ELEMENT	PERFORMANCE CRITERIA
	recommended changes.
5 Finalise translation	5.1 Use technology to format translation according to agreed specifications and end use requirements. 5.2 Proofread translation and produce final version according to client requirements and within suitable timeframe. 5.3 Discuss issues and solutions with relevant persons and explore process improvement strategies.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- analytical skills to analyse own work practices and evaluate process outcomes critically
- communication skills to identify and confirm requirements with client and collaborate with colleagues and advisors
- language skills to comprehend audiovisual source and meet target text requirements given the need to write for spoken or signed delivery, including:
 - adjusting syntax to match words to screen image
 - attending to natural semantic order
 - presenting information linearly
 - placing subject and verb in close proximity
 - re-casting relative clauses as separate sentences
 - using short sentences
- literacy skills to:
 - mark up source language script
 - read and follow instructions
 - record translation decisions and justification in glossary
 - research cultural and linguistic content
- numeracy skills to:
 - match translated text to timing of audio and visual source material
 - translate script with reference to time codes
- problem-solving skills to:
 - address technical problems
 - develop strategies for addressing translation issues and transfer problems
- research skills to:
 - develop and extend glossary and other reference material
 - identify translation precedents relevant to assignments
 - make critical use of reference material
 - undertake advanced research into cultural and situational references
- self-management skills to:
 - ensure suitable work environment, including adequate light, physical comfort and ergonomic work practices
 - organise and use tools and equipment suitable to task
- teamwork skills to:
 - liaise with colleagues to obtain independent quality control

REQUIRED SKILLS AND KNOWLEDGE

- discuss and agree upon recommended changes
- technical skills to:
 - adapt translation to visual and audio delivery of source text
 - translate with reference to time code and images
- technology skills to:
 - use audio-visual equipment
 - use information and communications technology to translate audio/visual source language
- advanced translating skills to translate source texts into functionally equivalent target texts, including:
 - adaptation
 - contrastive analysis of meaning and language
 - equivalence at the level of discourse, pragmatics, syntax and word
 - grammatical function transposition
 - localisation.

Required knowledge

- advanced research methodologies and sources of reference material suitable to translating assignments
- censorship rules
- subject and assignment protocols and conventions
- purpose and implications of translation
- mark-up protocols
- narration and re-voicing techniques, limitations and protocols
- OHS practices and procedures relevant to assignment
- processes for recording data and administering records
- professional procedures and guidelines, ethical practices and business standards applicable to assignment
- high-order comprehension of spoken source language
- high-order target language to meet spoken register target text requirements
- sources of reference material suitable to translating assignment
- subtitling conventions
- techniques for adapting cultural and linguistic content
- techniques for matching translation to images or sound
- tools and equipment required to translate for audio tapes, broadcasting and subtitling.

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms the ability to translate audio and audiovisual source language tapes and scripts so that they may be narrated or re-voiced in a target language, or be used as subtitles or captioning to a video source text. This includes:

- negotiating client and assignment requirements and issues associated with media sources and technology
- identifying purposes, end product, quality mechanisms, and expectations
- using specialist equipment, resources and glossaries
- drafting and reviewing translations to reflect the purpose and conditions of the end use
- maintaining consistency of register, style and terminology of target text and evaluate functional equivalence and fidelity as appropriate to purpose and target audience
- analysing and adapting cultural and linguistic content as appropriate to purpose and target audience
- matching to timing and adapting to image and audio delivery to maintain narrative flow
- collaborating with clients, advisers and technical support
- using high-order language skills, including the ability to code switch between spoken and written language, and to translate into spoken register.

Context of and specific resources for assessment

Evidence for assessment of this unit of competency will make use of scenarios, case studies, experiences and, where possible, examples of interactions with colleagues and clients which illustrate a range of skills and strategies for translating multimedia source material.

Resources for assessment include:

- examples of a range of texts produced from audiovisual sources
- observation of candidate translating from audiovisual sources in real and simulated settings using appropriate available technology
- scenarios which provide examples of:

EVIDENCE GUIDE

- a range of different client purpose, conditions and requirements
- practical and technical issues and problems and how they are addressed.

This competency will ideally be assessed in a multimedia environment with access to suitable equipment and technology reflecting current practice. While the content and scenarios may be simulated, evidence should reflect the conditions of real assignments in translating a range of multimedia source material for both scripts and sub-titles or captions.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<p><i>Tools and equipment</i> may include:</p>	<ul style="list-style-type: none"> • computer with scripting software • media player • video recording, reviewing and editing equipment • monitor • offline medium • script template • stop watch • time code device.
<p><i>Key elements</i> may include:</p>	<ul style="list-style-type: none"> • context • purpose • register.
<p>Source script is <i>marked up</i> to:</p>	<ul style="list-style-type: none"> • note in and out times for narration and other speech • note in and out times for supers, credits and other on-screen text • note technical problems • number paragraphs and cues.
<p><i>Issues</i> may include:</p>	<ul style="list-style-type: none"> • quality of audio/visual source • censorship issues • client expectations • language such as jargon, dialect and idiomatic expression • allocation of time and resources • technical support • familiarity with technology • copyright • transfer issues • for Auslan target texts linguistic factors: <ul style="list-style-type: none"> • sign articulation in a 2D medium • appropriate non-manual and prosodic features • cohesion • welfare and safety issues.
<p><i>Matching to time</i> may</p>	<ul style="list-style-type: none"> • may involve contacting author or client for suggestions

RANGE STATEMENT	
include:	and: <ul style="list-style-type: none"> • condensing length of text to fit in and out times • lengthening text with adjectives • matching text to frames.
<i>Adapting to image and audio delivery</i> may include:	<ul style="list-style-type: none"> • applying relevant subtitling conventions • reading target text aloud • using appropriate strategies to ensure that target language responds to demands of vision and audio delivery: <ul style="list-style-type: none"> • adjusting syntax in order to match words to screen image • attending to natural semantic order • keeping sentences short and simple • placing most important word at end of sentence • placing subject and verb in close proximity • presenting information linearly • re-casting relative clauses as separate sentences.
<i>Fit for purpose</i> may include:	<ul style="list-style-type: none"> • narration • re-voicing • supers, credits and on-screen text • for Auslan/English interpreter incorporate through picture-in-picture.
<i>Appropriate advisers</i> may include:	<ul style="list-style-type: none"> • client • editor • checking translator • specialist expert.

PSPTIS605A Interpret in complex dialogue settings (LOTE)

Modification History

Not applicable.

Unit Descriptor

<p>Unit descriptor</p>	<p>This unit describes the outcomes, skills and knowledge required to interpret from a source language to a target language in complex dialogue settings, preserving the communicative intent of the source language. The unit requires the ability to use a range of techniques to assist in the message transfer process and to address problems in delivery.</p> <p>An interpreter in the dialogue setting is required to interpret between two languages in both directions. A complex setting may involve specialised subjects requiring a high level of subject knowledge, or intense assignment-specific preparation. Interpreting in this setting typically requires high levels of accuracy and accountability. The content of communication may not easily be predicted or planned for, and there are limited opportunities for error correction. The physical elements of the setting or number of parties involved limit the interpreter from managing the discourse. The complex dialogue setting may create additional demands in managing the discourse. It may require interpreters to switch modes in a challenging environment where there is a range of participant interests and personal welfare and safety issues that need to be considered.</p>
-------------------------------	---

Application of the Unit

<p>Application of the unit</p>	<p>This unit applies to interpreters working in consecutive and Auslan simultaneous modes, either alone, collaboratively in tandem, relay or as part of a team. Miscommunication that may occur in this setting may be managed through consultation and intense preparation.</p>
---------------------------------------	--

Licensing/Regulatory Information

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Receive and analyse source message.	<p>1.1 Establish dialogue <i>protocols</i> with participants in a professional manner, to facilitate communication dynamics and outcomes, and provide clarification where required.</p> <p>1.2 <i>Attend actively</i> to source utterance, and identify and address factors affecting communication flow.</p> <p>1.3 Determine <i>linguistic and non-linguistic elements and structure and complexities of discourse</i>, and identify and address factors affecting meaning.</p> <p>1.4 Identify and address <i>issues of understanding or recall</i> in a manner that does not compromise <i>effective delivery</i>.</p>
2 Transfer message to target language.	<p>2.1 Transfer <i>communicative intent</i> of utterance into target language using <i>techniques</i> to ensure impartial delivery.</p> <p>2.2 Identify and address <i>issues in message transfer</i> promptly and according to established techniques.</p> <p>2.3 Maintain flow of communication and <i>manage discourse</i> in a professionally and culturally appropriate manner.</p> <p>2.4 Identify <i>circumstances</i> requiring a switch in interpreting mode and <i>manage mode switch</i>.</p> <p>2.5 Monitor interpreting process to identify when it is necessary to seek assistance or withdraw from assignment.</p>
3 Evaluate interpreting performance.	<p>3.1 Evaluate performance in line with <i>issues</i> encountered, assignment requirements and code of ethics.</p> <p>3.2 Determine <i>personal impact</i> of assignment and identify need for debriefing and counselling.</p> <p>3.3 Implement strategies to improve future work practices.</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- discourse management skills to:
 - manage presence of more than two discourse participants and turn-taking
 - apply and switch interpreting modes suitable to setting and discourse requirements
- interpersonal skills to:
 - ensure behaviour and presentation are appropriate to dialogue setting and cultural conventions
 - interact with people from a range of social, cultural and ethnic backgrounds and with a range of communication needs
 - work with others who may not understand interpreting process
 - collaborate with professional teams and content and setting specialists
- interpreting skills to achieve competent message transfer, including to:
 - conceptualise and express complex and specific information in target language, maintaining impartiality
 - include non-verbal cues in message transfer
 - interpret implied information and setting-specific terminology
 - manage sociolinguistic issues
 - reflect voluntary and involuntary pragmatic and prosodic features of an utterance
 - reproduce factual and linguistic content with a high degree of accuracy
 - solve problems of equivalence
 - transfer cultural cues embedded in a message
 - use technical, language and discourse management skills to ensure cohesive and faithful delivery of messages
- language skills to achieve competent performance:
 - broad range of specialised and context-specific registers
 - complex implied meaning
 - colloquial language and regional differences
 - educated native speaker proficiency in first language
 - language structure, dialects and idioms in source and target languages
 - near native speaker proficiency in second language
 - special and context-specific terminology
- literacy skills to:
 - prepare required background material and resources on subject and context
 - produce records of key information, for self and others when team or tandem

REQUIRED SKILLS AND KNOWLEDGE

- interpreting
- organisational skills to:
 - arrange work environment suitably
 - prepare and administer resources and documentation relating to assignment
 - problem-solving skills to:
 - address factors that may compromise effective performance
 - change conditions to enhance communication flow
 - research skills to source specialised information specific to assignment
 - self-management skills to:
 - apply code of practice and legislative requirements to work processes
 - mentally order information for message transfer
 - interpret in a professional and impartial manner
 - seek debriefing and support where required
 - technology skills to use office equipment and information and communications technology where necessary

Required knowledge

- in depth knowledge of cultures and societies of both English and LOTE participant
- specialised subject and context knowledge relevant to assignment
- broad general subject and context knowledge, including of:
 - community, business and diplomatic domains
 - systems and institutions in Australia, different language communities, countries and relevant terminology
- relevant codes of ethics
- concepts of form based and meaning-based message transfer
- communication techniques that facilitate interpreting process
- cultural knowledge, including cross-cultural perspective of communication and behaviour to:
 - determine cultural concepts and cues embedded in language
 - transfer cultural concepts without compromising communicative intent of source utterances
 - use culturally appropriate message delivery
- feedback and debriefing techniques
- legal requirements, professional procedures and guidelines, ethical practices and business standards relating to interpreters, including:
 - confidentiality requirements
 - privacy legislation
 - requirements for evidence in justice system

REQUIRED SKILLS AND KNOWLEDGE

- limitations of work role, responsibility and professional abilities
- modes of interpreting and techniques for managing mode switches
- OHS and risk management principles and practices to ensure own physical safety and comfort
- research methods to undertake intense assignment-specific preparation
- near native or educated native fluency in source and target languages to achieve competent performance
- advanced strategies to assist retention of information and recall of source messages
- theories which have influenced current interpreting practice, in particular:
 - effort model
 - form based vs meaning based translation
 - principles of note taking.

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms the ability to interpret from a source language to a target language in complex dialogue settings, preserving the communicative intent of the source language, including:

- applying interpreting and LOTE and English language skills required to achieve competent message transfer and performance
- applying educated native speaker language proficiency in the first and near native speaker language proficiency in the second language.
- using a range of strategies and techniques to effectively deliver and preserve the communicative intent and maintain impartiality
- using interpersonal and communication skills to interpret in a professional manner appropriate to participants and under challenging conditions
- using advanced memory retention strategies
- managing the discourse to identify and address complicated group dynamics and barriers to effective communication outcomes
- applying knowledge of the language, conventions, culture and protocols of a range of specialised subjects and contexts
- identifying circumstances requiring a switch in interpreting mode and managing mode switch
- reflecting strategies to improve work practices.

Context of and specific resources for assessment

Evidence for assessment of this unit of competency will make use of scenarios, case studies, experiences and, where possible, examples of interactions with colleagues and clients which illustrate a range of skills and strategies for interpreting in complex dialogue settings.

Resources for assessment include:

- opportunities to observe and question candidates interpreting in meetings which require a range of communication and presentation techniques
- formal structured meetings with high client

EVIDENCE GUIDE

accountability (legal, commercial, diplomatic, government, professional services) for outcomes

- meetings which require specialised and technical terminology and complex conceptual matters, including formal protocols and prescriptive procedures
- settings which allow a range of capacity to influence meeting processes and communication flow
- meetings which include parties with a range of experience with interpreting and its protocols and conventions.
- examples of professional development strategies to improve practice.

The context for assessment might include simulations of general dialogue settings, and ideally will include observations conducted in real interpreting settings. Evidence for assessment should be gathered to demonstrate a range of experiences interpreting in complex dialogue settings in a range of sectors in the community, business and diplomatic domains.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<p><i>Protocols</i> may include:</p>	<ul style="list-style-type: none"> • effecting introductions • briefing participants • explaining purpose and process, including: <ul style="list-style-type: none"> • pausing utterance when at own limits of recall • rotating interpreting when team interpreting, according to industry standards and situation • information management appropriate to dialogue • requesting participant details, such as names and titles • professional and operational protocols in specific systems such as: <ul style="list-style-type: none"> • health • government • diplomatic • welfare • immigration • education • justice • business.
<p><i>Attend actively</i> may include:</p>	<ul style="list-style-type: none"> • applying specialised subject and context knowledge to anticipate purpose of discourse and strategy being used to develop ideas • deconstructing <ul style="list-style-type: none"> • complex syntax • lexically dense content • formal register • applying strategies to support retention and recall, including: <ul style="list-style-type: none"> • reviewing records and recollection of message • recording key information, such as: • key content words and concepts • key facts, including numbers, dates and times • personal details, such as names, titles and addresses

RANGE STATEMENT	
	<ul style="list-style-type: none"> • linguistic and conceptual relationships • technical terms • maintaining concentration and focus • maximising retention and recall • noting verbal and non-verbal cues • seeking repetition and clarification • noting speakers' facial expressions, gestures and body language.
	<ul style="list-style-type: none"> •
<p><i>Factors affecting communication flow</i> may include:</p>	<ul style="list-style-type: none"> • physical adjustments required, such as: <ul style="list-style-type: none"> • adjusting position and seating in regard to listener or speaker • adjusting lighting and ventilation, and visual and ambient noise • immediate emotional, psychological, developmental, physical, or other states or attributes of participants • demands and protocols of assignment, including: <ul style="list-style-type: none"> • status and relationships of participants • formality of environment • complexity of cultural and interpersonal dynamics • fluidity of dialogue • predictability of discourse content • direct speech (first person), reported speech (third person).
<p><i>Linguistic and non-linguistic elements</i> may include:</p>	<ul style="list-style-type: none"> • colloquial and idiomatic language and regional differences • humour • ellipsis • register, including: <ul style="list-style-type: none"> • language of professionals in different fields • formal and informal • spoken and written • gender-specific and honorific language • terminology appropriate to given contexts • impersonal forms • specialised and context-specific vocabulary • voluntary and involuntary pragmatic features of speech, such as: <ul style="list-style-type: none"> • inflection and tone

RANGE STATEMENT	
	<ul style="list-style-type: none"> • nuance and intensity of feeling • stress and pitch • types of language • voluntary and involuntary prosodic features of speech, such as: <ul style="list-style-type: none"> • hesitation • pauses and silence • rhythm • discourse markers • body language • eye contact • facial expressions • gestures and posture.
<i>Structure and complexities of discourse</i> may include:	<ul style="list-style-type: none"> • structural elements: <ul style="list-style-type: none"> • cultural cues • discourse markers • language cues necessary for following conversation, interrupting or interjecting • interpersonal elements • turning points in an argument • turn taking • complexities <ul style="list-style-type: none"> • alternatives • contradictions • double meaning • hidden meaning • sociolinguistics.
<i>Addressing issues of understanding or recall</i> may include:	<ul style="list-style-type: none"> • confirming understanding • checking communicative links • managing cultural and interpersonal dynamics • referring to dictionaries or glossaries • retaining and recalling utterances of sufficient length to ensure delivery is accurate and cohesive • seeking clarification or repetition
<i>Effective delivery</i> may include:	<ul style="list-style-type: none"> • delivery that is appropriate to participants, including: <ul style="list-style-type: none"> • language faithful to the source that is: <ul style="list-style-type: none"> • long and syntactically complex • uses complex expression, style and register • maintaining eye contact, except where not culturally

RANGE STATEMENT	
	<p>appropriate</p> <ul style="list-style-type: none"> • native or near-native pronunciation • rephrasing and paraphrasing • speaking slower than normal rate of speech • mode switch • reflecting dialogue and appropriate to setting • self-monitoring of performance, including self-correction • timely delivery
<i>Communicative intent</i> may include:	<ul style="list-style-type: none"> • addressing regional differences • checking for understanding in Auslan and Indigenous languages • exercising cultural judgement in relation to reformulation • identifying and using a wide range of idiomatic expressions • identifying and using loan words or signs • incorporating implied meaning in message transfer • maintaining logical sequence of source utterance • paraphrasing to transfer concepts where there is no equivalence • reflecting speaker characteristics, including affect, demeanour and lucidity • reflecting syntactic complexity and lexical density • transferring cultural cues, such as laughter and euphemisms • transferring the communicative intent of idioms and idiomatic expressions • transferring the communicative intent of metaphors and similes • using complex standard of expression, style and register • using terminology appropriate to context, field and profession • verbalising non-verbal source language components.
<i>Techniques</i> may include:	<ul style="list-style-type: none"> • continuing to interpret while searching references • correcting own errors in a timely manner • delivering in direct, not reported speech • keeping all parties informed • paraphrasing • preserving self references • repeating complex instructions

RANGE STATEMENT	
	<ul style="list-style-type: none"> • seeking repetition rather than explanation.
<i>Issues in message transfer may include:</i>	<ul style="list-style-type: none"> • transfer errors such as omissions, additions or changes that occur as a result of: <ul style="list-style-type: none"> • complicated group dynamics • cross-cultural differences • jargon • lack of common context • misinterpreting, or not transferring sensitively • transfer problems: <ul style="list-style-type: none"> • elliptic, fragmentary or ambiguous source utterances • lack of equivalents • need for paraphrasing • unknown terms.
<i>Managing discourse may include:</i>	<ul style="list-style-type: none"> • using strategies to pause utterance at limits of recall • directing speakers on length, pace and form of spoken delivery • clarifying terminology and message components • explaining exchanges between interpreter and one party to the other parties • identifying optimum portions in speech for interpreter to start interpreting • managing interruptions by different speakers • managing presence of more than two participants in discourse and turn-taking • maintaining culturally appropriate behaviour.
<i>Issues may include:</i>	<ul style="list-style-type: none"> • assignment requirements • code of ethics • complicated group dynamics • maintaining impartiality • necessity to withdraw • personal presentation • personal competency • requirement for team or relay interpreting.
<i>Circumstances may include:</i>	<ul style="list-style-type: none"> • communication dynamics • time constraints • nature of discourse setting (e.g. court, health, education).
<i>Managing mode switch may include:</i>	<ul style="list-style-type: none"> • maintaining appropriate position in relationship to participants • deciding what to interpret, such as full, summary or

RANGE STATEMENT	
	explanation of gist <ul style="list-style-type: none"> • identifying key points • using strategies to identify speakers • effective managing turn-taking and changing mode as needed.
<i>Personal impact</i> may include:	<ul style="list-style-type: none"> • performance stress • factors affecting interpreter impartiality • factors affecting interpreter personal safety or comfort, including: <ul style="list-style-type: none"> • cultural or societal dilemmas • adversarial dialogues • stressful interpreting situations.

PSPTIS606A Interpret in complex monologue settings (LOTE)

Modification History

Not applicable.

Unit Descriptor

<p>Unit descriptor</p>	<p>This unit describes the outcomes, skills and knowledge required to interpret from a source language to a target language in complex monologue settings, preserving the communicative intent of the source language. The unit requires the ability to use a range of techniques to assist in the message transfer process and to address problems in delivery. An interpreter in the monologue setting is required to interpret in one language direction, from source to target. A complex setting involves specialised subjects requiring a high level of subject knowledge, or intense assignment-specific preparation. The speech to an audience that characterises the monologue setting typically requires the interpreter to use effective public speaking or presentation skills. A complex setting may involve specialised subjects requiring a high level of subject knowledge, or intense assignment specific preparation. Interpreting in this setting typically requires high levels of accuracy and accountability.</p> <p>The content of communication may be provided in advance in a written report or presentation, or it may not be easily predicted or planned for, and there are unlikely to be opportunities for error correction. The physical elements of the setting may prevent the interpreter from managing the discourse.</p> <p>.</p>
-------------------------------	---

Application of the Unit

Application of the unit	This unit applies to interpreters working in consecutive and Auslan simultaneous modes, either alone, collaboratively in tandem, relay or as part of a team. Miscommunication that may occur in this setting may be managed through prior consultation and intense preparation.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Receive and analyse source message.	<p>1.1 Confirm that setting, context, parties and expectations are consistent with client requirements, assignment agreement and interpreting protocols.</p> <p>1.2 Attend actively to source utterance, applying strategies to support retention and recall and adjusting physical position to optimise sound reception and visual cues.</p> <p>1.3 Apply detailed knowledge of specialised subject and context to anticipate purpose and intent of source and strategies used to develop ideas.</p> <p>1.4 Identify and record key information using a range of effective mnemonic strategies.</p> <p>1.5 Determine and record relationships between complex linguistic and non-linguistic elements and analyse factors affecting meaning.</p> <p>1.6 Identify complexities, key concepts and explicit and embedded cultural concepts.</p> <p>1.7 Identify transfer issues and implement strategies to address problems of understanding or recall, and confirm understanding where appropriate in an impartial manner that does not compromise effective delivery.</p>
2 Transfer message to target language.	<p>2.1 Recall information from notes and other mnemonic devices.</p> <p>2.2 Use a range of rhetorical techniques to transfer the communicative intent into the target language in a timely manner appropriate to audience and setting, and reflecting speaker's characteristics..</p> <p>2.3 Recognise and address issues in message transfer associated with the complexities of the setting, language and concepts.</p> <p>2.4 Monitor interpreting process to identify when it is necessary to seek assistance or withdraw from assignment.</p>
3 Evaluate interpreting performance.	<p>3.1 Evaluate performance in line with issues encountered, assignment requirements and code of ethics.</p> <p>3.2 Determine personal impact of assignment and identify need for debriefing.</p>

ELEMENT	PERFORMANCE CRITERIA
	3.3 Consider process improvement strategies.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- communication skills to:
 - confirm understanding of complex source message
 - transfer complex messages effectively from source to target languages
 - use a range of advanced rhetorical techniques to transfer communicative intent in a timely manner
- interpersonal skills to:
 - ensure behaviour and presentation are appropriate to monologue setting and cultural conventions
 - interact with people from a range of social, cultural and ethnic backgrounds and with a range of communication needs
 - work with parties with a range of experience and awareness of interpreting protocols and expectations
 - work with parties with high levels of authority and control
- interpreting skills to achieve competent message transfer, including to:
 - conceptualise and express complex and specialised information in target language
 - include non-verbal cues in message transfer
 - interpret implied information and setting-specific terminology
 - manage sociolinguistic issues
 - reflect voluntary and involuntary pragmatic and prosodic features of utterances
 - reproduce factual and linguistic content with a high degree of accuracy
 - solve problems of equivalence
 - transfer cultural cues embedded in a message
 - use a range of advanced strategies to retain and recall messages
 - produce decipherable records of key information, for self and others when team or tandem interpreting
 - use advanced technical, language, research and rhetorical skills to ensure cohesive and faithful delivery of messages
- language skills to achieve competent performance:
 - broad range of specialised and context-specific registers
 - complex implied meaning
 - colloquial language and regional differences
 - educated native speaker proficiency in first language
 - language structure, dialects and idioms in source and target languages
 - near native speaker proficiency in second language

REQUIRED SKILLS AND KNOWLEDGE

- special and context-specific terminology
- effective communication in a range of complex environmental, linguistic, political, intellectual and group dynamic settings and with parties with significant authority and accountability
- literacy skills to:
 - analyse sources of complex information and concepts
 - prepare required background material and resources on subject and context
 - produce records of key information, for self and others when team or tandem interpreting
- organisational skills to:
 - arrange work environment suitably
 - prepare and administer resources and documentation relating to assignment
 - complete intense preparation
- problem-solving skills to address factors that may compromise effective performance
- research skills to source specialised information specific to assignment
- self-management skills to:
 - use advanced mnemonic strategies to recall information
 - interpret in a professional and impartial manner
 - seek debriefing and support where required
 - mentally order information for message transfer

Required knowledge

- in depth knowledge of cultures and societies of both English and LOTE participants
- specialised subject and context knowledge relevant to assignment
- broad general subject and context knowledge, including of:
 - community, business and diplomatic domains
 - systems and institutions in Australia, different languages communities, countries and relevant terminology
- relevant codes of ethics
- concepts of form based and meaning-based message transfer
- communication techniques that facilitate interpreting process
- cultural knowledge, including cross-cultural perspective of communication and behaviour to:
 - determine cultural concepts and cues embedded in language
 - transfer cultural concepts without compromising communicative intent
- feedback and debriefing techniques
- legal requirements, professional procedures and guidelines, ethical practices and business standards relating to interpreters, including:

REQUIRED SKILLS AND KNOWLEDGE

- confidentiality requirements
- privacy legislation
- requirements for evidence in justice system
- limitations of work role, responsibility and professional abilities
- OHS and risk management principles and practises to ensure own physical safety and comfort
- research methods to undertake intense assignment-specific preparation
- near native or educated native fluency in source and target languages to achieve competent performance
- advanced strategies to assist retention of information and recall of source messages
- theories which have influenced current interpreting practice, in particular:
 - effort model
 - form based vs meaning-based translation
 - principles of note taking

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms the ability to interpret from a source language to a target language in complex monologue settings, preserving the communicative intent of the source language, including:

- applying interpreting and English and LOTE skills required to achieve competent message transfer and competent performance
- applying educated native speaker language proficiency in the first and near native speaker language proficiency in the second language
- using a range of strategies and techniques to effectively deliver and preserve the communicative intent and maintain impartiality
- using a range of advanced rhetorical and public speaking techniques to convey the presentation style of the source
- using interpersonal and communication skills to interpret in a professional manner appropriate to speaker and audience
- applying knowledge of the language, conventions, culture and protocols of a range of specialised subjects and contexts
- using advanced memory retention strategies
- recognising and resolving transfer problems and transfer errors.

Evidence for assessment of this unit of competency will make use of scenarios, case studies, experiences and, where possible, examples of interactions with colleagues and clients which illustrate a range of skills and strategies for interpreting in complex monologue settings.

Resources for assessment include:

- opportunities to observe and question candidates interpreting in a range of monologue settings with demanding subject and circumstances and with high expectations for accuracy and conveying the presentation style and intent of the speaker
- examples of planning to interpret requiring thorough

	<p>research of subject and context</p> <ul style="list-style-type: none">• examples of using a range of rhetorical styles and public speaking aids and equipment• examples of using a range of memory retention techniques and error correction strategies. <p>The context for assessment might include simulations of complex monologue settings, and ideally will include observations conducted in real interpreting settings. Evidence for assessment should be gathered to demonstrate a range of experiences in interpreting in complex monologue settings in a range of sectors in the community, business and diplomatic domains.</p>

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Requirements may include:

- source and target languages
- location or environment, such as:
 - in the field
 - public venue
 - at client or contractor location
 - in other agencies
- required equipment and resources
- work conditions, such as:
 - continuous hours to be worked
 - need for tandem, team or relay interpreting
 - required breaks
 - sight lines and visibility
 - timing of monologue
 - using public speaking aids and equipment
 - purpose
- context and subject
- expectations and intended or desired outcomes
- target language delivery
- briefings
- risk management considerations
- research and preparation, including identifying sources of information.

Protocols may include:

- briefing participants
- explaining purpose and process, including:
 - pausing utterance when at own limits of recall
 - rotating interpreting when team interpreting, according to industry standards and situation
- information management appropriate to monologue
- requesting party details, such as names and titles
- professional and operational protocols for presentations and negotiations in specific systems such as:
 - conferences

RANGE STATEMENT	
	<ul style="list-style-type: none"> • business • government • diplomatic • academic • international relations • arts and performance.
<i>Attend actively</i> may include:	<ul style="list-style-type: none"> • recording key information using advanced mnemonic strategies • applying specialised subject and context knowledge to anticipate purpose of discourse and strategy being used to develop ideas • deconstructing <ul style="list-style-type: none"> • complex syntax • lexically dense content • formal register • maintaining concentration and focus • maximising retention and recall • seeking repetition and clarification • noting speakers' facial expressions, gestures and body language • noting verbal and non-verbal cues.
<i>Key information</i> may include:	<ul style="list-style-type: none"> • key content words • key concepts • key facts, including numbers, dates and times • personal details, such as names, titles and addresses • linguistic and conceptual relationships • technical terms.
<i>Linguistic and non-linguistic elements</i> may include:	<ul style="list-style-type: none"> • colloquial and idiomatic language and regional differences • humour • ellipsis • register, including: <ul style="list-style-type: none"> • language of professionals in different fields • formal and informal • spoken and written • gender-specific and honorific language • terminology appropriate to given contexts • impersonal forms • specialised and context-specific vocabulary

RANGE STATEMENT	
	<ul style="list-style-type: none"> • voluntary and involuntary pragmatic features of speech, such as: <ul style="list-style-type: none"> • inflection and tone • nuance and intensity of feeling • stress and pitch • types of language • voluntary and involuntary prosodic features of speech, such as: <ul style="list-style-type: none"> • hesitation • pauses and silence • rhythm • discourse markers • body language • eye contact • facial expressions • gestures and posture. •
<i>Confirming understanding</i> may include:	<ul style="list-style-type: none"> • checking communicative links • referring to dictionaries or glossaries • seeking clarification.
<i>Effective delivery</i> may include:	<ul style="list-style-type: none"> • accurate and cohesive • appropriate to discourse, including: <ul style="list-style-type: none"> • culturally appropriate verbal and non-verbal behaviour • reproducing: • complex syntax, high lexical density and formal register • vocabulary, idiom and abstract concepts • lengthy utterances • appropriate to setting • self-monitoring of performance, including self-correction • timely.
<i>Communicative intent</i> may include:	<ul style="list-style-type: none"> • addressing regional differences • exercising cultural judgement in relation to reformulation • identifying and using a wide range of idiomatic expressions • identifying and using loan words or signs • incorporating implied meaning in message transfer

RANGE STATEMENT	
	<ul style="list-style-type: none"> • maintaining logical sequence of source utterance • paraphrasing to transfer concepts where there is no equivalence • reflecting speaker characteristics, including affect, demeanour and lucidity • reflecting syntactic complexity and lexical density • transferring cultural cues, such as laughter and euphemisms • transferring the communicative intent of idioms and idiomatic expressions • transferring the communicative intent of metaphors and similes • using complex standard of expression, style and register • using terminology appropriate to context, field and profession • verbalising non-verbal source language components.
<i>Reflecting speaker's characteristics</i> may include:	<ul style="list-style-type: none"> • using appropriate language to maintain affect • verbalising non-verbal source language components • using similar rhetorical and public speaking techniques • reflecting speaker's prosodic features in target language • maintaining impartiality.
<i>Personal impact</i> may include:	<ul style="list-style-type: none"> • performance stress • factors affecting interpreter impartiality • factors affecting interpreter personal safety or comfort, including: <ul style="list-style-type: none"> • cultural or societal dilemmas • stressful interpreting situations.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Clarify assignment requirements.	1.1 Identify and confirm assignment requirements with client, including <i>conditions of engagement, physical work environment</i> and performance expectations. 1.2 Confirm <i>attributes of team</i> , physical work environment and performance expectations with other team members. 1.3 Negotiate agreed approach to achieve best quality and safest outcomes.
2 Prepare as a team.	2.1 Consult as a team to obtain background materials and establish <i>interpreting process</i> . 2.2 Analyse physical work environment and collaborate on required adjustments. 2.3 Seek briefing to assess <i>linguistic requirements</i> and address <i>technical concerns</i> . 2.4 Introduce team to discourse participants and explain role and process of interpreting.
3 Undertake team assignment.	3.1 Implement agreed interpreting process and monitor time. 3.2 Rotate interpreting according to industry standards and in line with situation and <i>established techniques</i> . 3.3 Provide <i>appropriate support</i> to other team members. 3.4 Monitor other team members' delivery, and <i>prompt</i> and <i>feed</i> in an <i>appropriate manner</i> to facilitate and enhance colleague and team performance. 3.5 Accept prompts and feeds in a manner that does not compromise delivery.
4 Evaluate team performance.	4.1 Discuss performance with team members in a confidential setting and in a professional and constructive manner, and evaluate problems encountered and effectiveness of assignment in line with client requirements. 4.2 Consider and implement adjustments to improve future process and outcomes.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- discourse management skills to:
 - switch with team colleague in a manner that does not interrupt communication
- interpersonal skills to:
 - negotiate conditions of engagement with clients
 - reach agreement with team members on the conditions and requirements of assignments
 - interact with colleagues in a supportive and collaborative manner
 - work effectively with colleagues to achieve effective outcomes
- literacy skills to:
 - prepare required background material and resources on subject and context in an agreed and consistent format
 - produce records of key information, for self and others in team or tandem interpreting
- organisational skills to
- prepare and administer resources and documentation relating to assignment
- apply codes of practice and other legislative requirements to work processes
- problem-solving skills to:
 - intervene in matters of occupational health and safety to maintain integrity of output
 - address factors that may compromise effective performance working in teams
 - change conditions to enhance communication flow
- research skills to collaborate with team members in sourcing and sharing information specific to assignment
- self-management skills to:
 - mentally order information for message transfer
 - interpret in a professional manner
 - seek debriefing and support where required
- technology skills to use office equipment and information and communications technology for team interpreting purposes.

Required knowledge

- professional techniques and protocols for team rotation
- relevant codes of ethics
- communication techniques that facilitate interpreting process in team
- team feedback and evaluation techniques

REQUIRED SKILLS AND KNOWLEDGE

- language structure, dialects and idioms in source and target languages
- legal requirements, professional procedures and guidelines, ethical practices relating to interpreters, including confidentiality and privacy requirements
- limitations of work role, responsibility and professional abilities within team relationship and dynamics
- modes of interpreting and techniques for managing mode switches
- OHS and risk management principles and practices to ensure team physical safety and comfort
- research methods to collaboratively undertake intense assignment-specific preparation
- strategies to assist retention of information and recall of source messages in a consistent manner.

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Critical aspects for assessment and evidence required to demonstrate competency in this unit

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms the ability to interpret in collaboration with one or more other interpreters as part of an interpreting team or in relay, observing each other's work and providing practical support to achieve effective communication. This includes:

- applying professional and industry standards for team interpreting
- maintaining occupational health and safety standards
- negotiating agreement on terms and conditions of assignment with team colleagues
- collaborating with team members on research, language requirements and actual work setting
- applying agreed techniques for rotating with team
- monitoring and supporting team members
- using constructive feedback in evaluation of team members' performance.

Context of and specific resources for assessment

Evidence for assessment of this unit of competency will make use of scenarios, case studies, experiences and, where possible, examples of interactions with colleagues and clients which illustrate a range of skills and strategies for interpreting as part of a team.

Resources for assessment include:

- a range of occasions for observation of candidate interpreting in teams
- research material demonstrating evidence of team collaboration
- information from team feedback and evaluation

Evidence will be provided from a range of real or simulated team interpreting assignments and from questioning in real and scenario settings.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<p><i>Conditions of engagement</i> may include:</p>	<ul style="list-style-type: none"> • attributes of team assembled for assignment, including: <ul style="list-style-type: none"> • size • experience • gender • skills set • preparation required, including: <ul style="list-style-type: none"> • past and current documentation • existing glossaries • rehearsals • briefing and evaluation requirements • administrative details, such as: <ul style="list-style-type: none"> • remuneration • accommodation • travel • working conditions, such as: <ul style="list-style-type: none"> • breaks • interpreting modes.
<p><i>Physical work environment</i> may include:</p>	<ul style="list-style-type: none"> • seating, positioning and other logistical arrangements • environmental factors, such as: <ul style="list-style-type: none"> • amplification • lighting and visibility • ventilation.
<p><i>Attributes of team</i> may include:</p>	<ul style="list-style-type: none"> • compatible skill levels • relay interpreter • tandem interpreter • unqualified relay person • familiarity with subject matter • language direction • potential conflicts of interest.
<p><i>Interpreting process</i> may include:</p>	<ul style="list-style-type: none"> • role definitions and sharing, including: <ul style="list-style-type: none"> • sharing prior knowledge and precedents

RANGE STATEMENT	
	<ul style="list-style-type: none"> • skills matching • role of lead interpreter, with responsibility to: <ul style="list-style-type: none"> • obtain and allocate papers and background material • arbitrate conditions of engagement and OHS issues • assume overall responsibility for team performance • methodology, including: <ul style="list-style-type: none"> • allocation of interpreters to speaker or signer • allocating times for each interpreter • contingencies • language direction • support processes, such as prompting techniques and cues • agreeing signs and expressions or terminology • monitor colleague interpreter delivery, and step in as necessary • mentoring • briefing and evaluation.
<i>Linguistic requirements</i> may include:	<ul style="list-style-type: none"> • dialectic characteristics of individual discourse participants • confirming and clarifying terms • discussing roles • content level of discourse • idiosyncratic language use • environmental constraints.
<i>Technical concerns</i> may include:	<ul style="list-style-type: none"> • method of delivery • audio-visual (AV) media • environmental issues • seating and positioning arrangements • timing of breaks • impact of support technology and processes • line of sight • need for relay
<i>Established techniques</i> for rotating interpreters may include:	<ul style="list-style-type: none"> • giving and receiving cues for role switch • switching roles at scheduled and unscheduled times • switching roles in a manner that does not compromise delivery.
<i>Appropriate support</i> may include:	<ul style="list-style-type: none"> • remaining actively aware of discourse • filling in during breaks • signalling when support is needed

RANGE STATEMENT	
	<ul style="list-style-type: none"> • watching for cues • providing feedback during assignment breaks • keeping records that are meaningful to colleagues • explaining switching and prompting to parties • handing over to other interpreter after prescribed length of time • alerting other interpreter to be listening or watching, ready to switch • pausing discussion to brief incoming interpreter • prompting colleague to support your interpreting, i.e. taking and using a prompt, and advising style of prompting you prefer • ensuring colleague comfort.
<i>Prompting</i> may occur in the event of:	<ul style="list-style-type: none"> • omissions • transfer errors • comprehension failure • vocabulary, acronyms and jargon • name signs • numbers or dates • proper nouns • speaker deviating from text • colleague fatigue or distress.
<i>Feed</i> may include:	<ul style="list-style-type: none"> • identifying ambient noise • missed signs or words • spatial cues • tracking written support material.
<i>Appropriate manner</i> may include:	<ul style="list-style-type: none"> • keeping records of information for colleagues • looking up dictionaries or glossaries • pointing to reference texts or diagrams • searching the internet • signing to colleagues.

Competency field	Interpreting
------------------	--------------

PSPTIS608A Interpret through communication media

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	This unit describes the outcomes required to use technology to support interpreting in visual or physical isolation. The unit addresses awareness of the technology available for interpreting situations, the potential impact of the technology on the interpreting assignment and its outcomes and the management skills required to adjust delivery to take account of the constraints and advantages of the technology.
------------------------	--

Application of the Unit

Application of the unit	This unit applies to all consecutive and simultaneous interpreting in dialogue settings and may have applications for interpreting for people in remote, interstate and international locations via telephone, video conferencing, call centre or conference call, internet modes of delivery and TTY.
--------------------------------	--

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

Employability skills	This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare environment and participants.	<p>1.1 Prepare <i>resources</i> appropriate to <i>communication medium</i> and make necessary <i>environmental adjustments</i>.</p> <p>1.2 Consult technical support staff to establish equipment conditions and access to become familiar with specific technology.</p> <p>1.3 Undertake <i>technical management</i> and confirm the process and purpose of the assignment.</p> <p>1.4 Seek <i>information about people and context</i> and identify issues which may affect the process or outcomes and take <i>necessary action</i> to address problems.</p>
2. Adapt delivery to equipment.	<p>2.1 Effect introductions and confirm process of interpreting by telephone or video link and relevant roles and conditions.</p> <p>2.2 Adjust volume and position of equipment for audibility or visibility and adjust delivery to be heard or seen.</p> <p>2.3 Identify and use <i>terms of address</i> appropriate to the medium.</p> <p>2.4 Identify physical challenges posed by the communication medium and make recommendations to address them.</p> <p>2.5 Act assertively to address technological problems.</p>
3. Manage discourse.	<p>3.1 Adapt delivery to physical requirements and constraints of the technology.</p> <p>3.2 Use open strategies to manage communication flow in a culturally appropriate manner</p> <p>3.3 Use a range of strategies to adjust and adapt to rapidly changing subjects and context matters, dialects and regional variations and register. Take notes to support retention and recall and seek clarification or repetition when necessary.</p> <p>3.4 Use overt strategies to manage communication breakdown.</p> <p>3.5 Monitor occupational health and safety issues arising from using communication equipment and take preventative action.</p>
4. Evaluate delivery	<p>4.1 Evaluate appropriateness of technology chosen.</p> <p>4.2 Evaluate own adaptation of delivery to the</p>

ELEMENT	PERFORMANCE CRITERIA
	technology.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- analytical skills to:
 - assess the suitability of the medium and adapt for specific assignments
 - identify and address limitations in technology and the impact on interpreting
- communication skills to:
 - negotiate technology and communication requirements with clients
 - discuss and resolve OHS issues, including breaks, seating, physical and vicarious trauma
 - inform and educate parties on interpreting protocols and expectations related to using technology and distance media
 - advise of equipment or transmission failure and request remedies
- initiative and enterprise skills to adapt practices to communication media and seek assistance to address problems
- language skills to:
 - achieve effective message transfer and performance given the applications of communication media
 - adapt to language variations, dialects and register
 - project voice and speak or sign fluently and clearly
- learning skills to expand capabilities in new communications media
- literacy skills to:
 - access and use information and instructions related to communication media
 - research information on communication media and its limitations and advantages
- organisational skills to:
 - optimise the benefits of communications media for remotely located parties
 - meet professional obligations and assignment undertakings
- problem-solving skills to:
 - develop strategies for addressing limitations of communications media
 - manage communication breakdown, including withdrawal from assignment
- self-management skills to:
 - ensure suitable work environment, including adequate light, physical comfort and ergonomic work practices
 - undertake skills development in the use of communication media for interpreting

REQUIRED SKILLS AND KNOWLEDGE

- | |
|---|
| <ul style="list-style-type: none">• technical skills to use communication media effectively• discourse management skills to ensure that communication is effective and meets clients' needs. |
|---|

Required knowledge

- | |
|---|
| <ul style="list-style-type: none">• suitability and limitations of communications media and applications for interpreting• OHS practices and procedures in relation to using communication equipment• source and target languages to the level required for assignments using communication media• area and culture-specific knowledge relevant to subject and client context of assignment• tools and equipment relevant to assignments using communications media |
|---|

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms the ability to use technology to support interpreting in visual or physical isolation, including:

- collaborating with clients and technical experts to ensure effective use of the technology
- familiarity with the range of technology available and techniques for their use
- identifying and addressing technical needs and problems
- sourcing relevant assignment-specific information
- adjusting delivery to take account of the constraints and advantages of the technology
- using a range of strategies and resources to facilitate communication flow and support retention
- adapting delivery to a range of assignment challenges

Context of and specific resources for assessment

Evidence for assessment of this unit of competency will make use of scenarios, case studies, experiences and, where possible, examples of interactions with colleagues and clients which illustrate a range of skills and strategies for using communication media to support interpreting.

Resources for assessment include:

- a range of assignments or scenarios demonstrating the use of communications technology
- using a variety of equipment and communications technology
- examples of preparation in a range of subject and cultural contexts
-

In addition to practical skills demonstration in a simulated interpreting situation, evidence for assessment may be gathered to demonstrate a range of experiences in interpreting using communication media. Evidence could include examples of negotiations with clients and participant expectations..

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<i>Resources may include:</i>	<ul style="list-style-type: none"> • note-taking tools • glossaries • dictionaries • information and references about parties and communication purpose
<i>Communication medium may include:</i>	<ul style="list-style-type: none"> • standard telephone • dual handset phone • hands free phone • TTY • conference phone • video equipment for video link • microphone • internet connections and relevant software • wireless microphones and headsets
<i>Environmental adjustments may refer to:</i>	<ul style="list-style-type: none"> • noise and visual distractions • privacy and potential interruptions • conference call conditions • call-waiting • checking availability and working condition of required equipment • seating and positioning • comfort and safety issues • visual aids and additional resources and information.
<i>Technical management may include:</i>	<ul style="list-style-type: none"> • <i>checking operation and condition of equipment</i> • <i>ensuring familiarity with equipment operating instructions</i> • <i>accessing technical support</i> • <i>anticipating and managing equipment breakdown</i> • <i>requesting alternative equipment or physical space.</i>
<i>Information about people and context may include:</i>	<ul style="list-style-type: none"> • purpose of assignment and client requirements • parties involved and present • names, gender, age, titles of parties

RANGE STATEMENT	
	<ul style="list-style-type: none"> • location of parties • time at locations • physical aspects and relevant conditions at locations • need for visual references • special communication needs of parties • nature of assignment and related issues
<i>Necessary action may include:</i>	<ul style="list-style-type: none"> • access to reference material • adjusting issues of audibility, visibility and ambient noise • choice of direct and indirect speech • clarification of protocols • clarifications relating to remote locations • clarifying roles • direct questions to parties • directions on use of handsets • asserting control of discourse • managing lack of visual contact

PSPTIS609A Prepare translated transcripts

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	<p>This unit describes the outcomes, skills and knowledge required to translate transcripts of audiovisual recordings from source language into target language <i>accurately and appropriately</i> for context and end use. It requires understanding of the purpose and potential use of the information, a high level of comprehension of spoken language and the context in which it is spoken, the ability to translate into the same register, and the ability to work between speaking and writing. The translator may be required to collaborate with others involved in the process.</p>
------------------------	---

Application of the Unit

Application of the unit	<p>This unit applies to translators who prepare transcripts and translations of the transcripts for various purposes, particularly surveillance and investigation leading to legal proceedings. Those undertaking this work may be required to testify in court regarding the accuracy and fidelity of the translated transcript.</p>
--------------------------------	---

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

Employability skills	This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare for audiovisual transcription.	1.1 Confirm <i>client requirements</i> including protocols and procedures and their implications for personal capacity to undertake the assignment. 1.2 Check <i>resources and equipment</i> and address problems through agreed processes. 1.3 Review <i>source material</i> to confirm context and identify and address <i>issues arising</i> .
2. Prepare transcripts of source material	2.1 Attend actively to <i>material</i> to familiarise with speakers and context. 2.2 Record notes in target language. 2.3 Apply strategies to address problems of understanding. 2.4 Prepare summaries of source material in the required language. 2.5 Collaborate with team members providing explanations and clarification. 2.6 Attend to source material and prepare transcripts, applying conventions, including time codes.
3. Draft translation of transcripts of source material.	3.1 Analyse and identify translation difficulties in source material, seeking assistance if required. 3.2 Develop and extend glossary and make critical use of other reference material to identify meaning in context. 3.3 Identify areas requiring further research and seek required information or <i>specialist advice</i> . 3.4 Prepare draft translation of transcripts into target language <i>accurately and appropriately</i> for context and end use. 3.5 Refer to and update assignment-specific glossaries.
4. Check draft translations of transcripts.	4.1 Check translations for consistency, accuracy and fitness for purpose, and identify and correct errors manually and using computer-based tools. 4.2 Collaborate with appropriate advisers to obtain independent quality control and incorporate changes to identified translation errors.
5. Finalise translation.	5.1 Use technology to format translation according to agreed specifications and end use requirements. 5.2 Proofread translation and finalise according to assignment requirements.

ELEMENT	PERFORMANCE CRITERIA
	<p>5.3 Complete <i>necessary supporting documentation</i> according to client requirements.</p> <p>5.4 Return source material according to agreed procedures and within suitable timeframe.</p> <p>5.5 Consider and implement adjustments to improve process and outcomes of future translations of transcripts.</p>
6 Maintain safe record keeping practices	<p>6.1 Keep assignment related documentation in a safe place.</p> <p>6.2 Retrieve documentation as required.</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- communication skills to:
 - interpret and confirm assignment briefing
 - collaborate with others involved in the process
 - identify hidden and implied meaning of words
- high-order language skills to:
 - analyse spoken language for meaning
 - analyse coded language for meaning
 - reproduce accurate and faithful transcripts of spoken language
 - translate in register of source material
 - switch between listening and writing
- keyboarding skills to produce transcripts at required speed
- language skills to:
 - identify speaker's voice and roles in different settings
 - interpret intonation and stress
 - translate transcripts with required accuracy
- learning skills to undertake research on unfamiliar topics
- literacy skills to:
 - produce transcripts with correct spelling, grammar, syntax and punctuation
 - proofread translations
 - read and apply client requirements relating to translated transcripts of audiovisual recordings, including style guides
- numeracy skills to:
 - assign time codes and note duration of pauses
 - translate transcripts with reference to time codes
- organisational skills to:
 - prepare certification of translation and meet obligations
 - prepare translations according to established style and presentation standards
 - satisfy administrative requirements for translations and other support documentation
- self-management skills to:
 - check resources and equipment and address problems
 - ensure suitable work environment, including adequate light, physical comfort and ergonomic work practices
 - work effectively with recordings and meet required deadlines

REQUIRED SKILLS AND KNOWLEDGE

- problem-solving skills to:
 - analyse and resolve translation difficulties and transfer errors
 - address technical problems
 - respond to client requirements
- research skills to:
 - develop and extend glossary and other reference material
 - identify translation precedents relevant to assignments
 - make critical use of reference material
 - undertake advanced research into cultural and situational references
- teamwork skills to:
 - liaise with colleagues and advisers to obtain independent quality control
 - discuss and agree upon issues and recommended changes
- technology skills to select and use a range of resources and equipment, including information and communications technology
- advanced translating skills to translate source texts into accurate and faithful target texts, including:
 - contrastive analysis of meaning and language
 - equivalence at the level of discourse, pragmatics, syntax and word
 - grammatical function transposition.

Required knowledge

- translating conventions and style rules related to transcripts of source language
- time code conventions
- advanced and specialised word processing software functions
- high-order comprehension of spoken source language
- high-order target language to meet spoken register target text requirements
- transcription techniques and principles
- limitations of work role, responsibility and professional abilities
- OHS practices and procedures relevant to assignment
- professional procedures and guidelines, ethical practices and business standards applicable to task, including:
 - confidentiality requirements
 - legal requirements and policies relating to producing translated transcripts of audiovisual source recordings in specific client contexts
 - protocols for seeking specialist advice in regard to draft transcripts
- purpose and potential use of a range of transcript translations
- rules of evidence
- range of resources, tools and equipment appropriate to transcription and translation task
- specialist terminology related to the assignment context

REQUIRED SKILLS AND KNOWLEDGE

- | |
|--|
| <ul style="list-style-type: none">• translation certification requirements.• secure file management and record keeping. |
|--|

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms the ability to translate transcripts of audiovisual recordings from *source language* into target language *accurately and appropriately* for context and end use including:

- checking and confirming client requirements, protocols, procedures and resources.
- addressing identified issues and problems, including technical and transfer issues
- using current technology, resources and glossaries
- providing summaries as required
- preparing transcripts of source language material applying conventions, including time codes
- ensuring translation is accurate and appropriate for end use and finalised according to assignment requirements
- using high-order language skills, including the ability to code switch between spoken and written language, and to translate into spoken register
- maintaining safe record keeping practices
- cooperating with a team.

Context of and specific resources for assessment

Evidence for assessment of this unit of competency will make use of scenarios, case studies, experiences and, where possible, examples of interactions with colleagues and clients which illustrate a range of skills and strategies for translating transcripts.

Resources for assessment include:

- observation of candidate translating from audiovisual sources in a range of real and simulated settings
- examples of a range of different translations produced from audiovisual sources
- examples of applying appropriate conventions to create source language transcript
- examples of using a range of specialist resources and glossaries
- examples of revised drafts of translations

EVIDENCE GUIDE

- scenarios which provide examples of:
 - a range of different client requirements
 - consultation with advisers and references
 - issues and problems and how they are addressed
 - team work.

Evidence for assessment should be gathered to demonstrate a range of experiences in preparing translated transcripts. This competency will ideally be assessed in an environment with access to suitable equipment and technology reflecting current practice. While the content and scenarios may be simulated, evidence should reflect the conditions of real assignments in translating transcripts for a range of purposes.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<i>Client requirements</i> may include:	<ul style="list-style-type: none"> • context • specialist terms • glossaries • style guides, both internal and external • subject and content of interest to client for translation • presentation of transcript • timeframe.
<i>Resources and equipment</i> may include:	<ul style="list-style-type: none"> • customised playback devices • headphones • foot pedal • secure facility when translating telephone intercepts or listening devices • audio or visual tapes or digital files.
<i>Source material</i> may include:	<ul style="list-style-type: none"> • one or more participants • more than one conversation • dialects and idiosyncratic language • ambient noise • audiovisual material • mixture of languages.
<i>Issues</i> may include:	<ul style="list-style-type: none"> • quality of audiovisual source • coded messages • high level of stress and long working hours • ethical issues, such as impartiality • welfare and safety issues.
<i>Material</i> may include:	<ul style="list-style-type: none"> • court transcripts • legal testimony • oral history tapes • focus groups tapes • interviews • telephone • intercepted and listening device audio materials • criminal investigation evidence.

RANGE STATEMENT	
<i>Translate transcripts</i> may include:	<ul style="list-style-type: none"> • applying agreed conventions according to style guide • identifying portions of interest in the transcript using time codes • identifying speakers and noting duration of pauses against time codes.
<i>Accurately and appropriately</i> may include:	<ul style="list-style-type: none"> • citing names and technical terms correctly • ensuring consistent translation choices • faithful to source • translating in register of language used by speakers • using chosen translation approach • using conventions appropriate to transcription task, such as citation of time codes and pauses • using techniques to produce translation that is free from distortion with required accuracy.
<i>Specialist advice</i> may include:	<ul style="list-style-type: none"> • other language colleagues • review by case officers or supervisors • other translators and interpreters working on the same job.
<i>Necessary supporting documentation</i> may include:	<ul style="list-style-type: none"> • certification of translation that attests to: <ul style="list-style-type: none"> • having done the translation • being qualified to do so.

PSPTIS610A Manage complex discourse settings

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	<p>This unit describes the outcomes, skills and knowledge required to manage the physical setting and communication dynamics of discourses in complex settings. It requires knowledge of the nature and structure of complex interpersonal, institutional and meeting dynamics and the ability to apply effective solutions to challenges that arise during the discourse. The unit includes planning the discourse, managing the communication flow, and reviewing and evaluating the discourse management process.</p> <p>The complex setting may create additional demands in managing the discourse. The physical elements of the setting or number of parties involved can challenge the capacity of the interpreter to manage the discourse.</p>
------------------------	--

Application of the Unit

Application of the unit	<p>This unit applies to interpreters working in a range of complex settings for a variety of purposes, where the interpreter has physical, visual or audio access to participants and can take limited or very subtle action to direct participants and manage communication flow.</p>

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Plan discourse.	<p>1.1. Establish assignment context and requirements with client to plan to achieve desired outcomes.</p> <p>1.2. Arrange work environment to facilitate effective performance and ensure safe, comfortable and effective discourse.</p> <p>1.3. Prepare required resources taking into consideration the complexities of the content and context.</p> <p>1.4. Identify factors that may compromise interpreter effectiveness, and make adjustments where possible.</p>
2. Reach agreement with participants on process.	<p>2.1. Confirm relationships between and with participants and participant expectations of discourse according to established protocols and practices.</p> <p>2.2. Negotiate mutual agreement on purpose and process of discourse appropriate to situation and participants.</p> <p>2.3. Follow interpreting protocols in a professional manner and seek and provide clarification where required.</p>
3. Manage flow of communication.	<p>3.1. Analyse discourse setting and communication preferences of participants and select and use appropriate interpreting mode.</p> <p>3.2. Assess participant attributes and select and use communication styles effective in complex discourse settings.</p> <p>3.3. Identify and address factors affecting communication flow according to established techniques.</p> <p>3.4. Direct speakers on length, pace and form of delivery in a professional and courteous manner.</p> <p>3.5. Adapt strategies to the requirements of equipment and technology.</p>
4. Monitor progress of discourse.	<p>4.1. Identify and address problems in message transfer promptly and according to established techniques.</p> <p>4.2. Monitor and influence complex interactions to ensure effective and equitable turn taking.</p> <p>4.3. Identify communication challenges arising from cross-cultural settings and participant relationships and attributes, and use effective strategies to address them.</p>

ELEMENT	PERFORMANCE CRITERIA
	<p>4.4. Maintain effective communication in <i>challenging situations</i>, and seek assistance where required from appropriate persons to manage discourse breakdown and restore communication.</p> <p>4.5. Ensure conduct complies with professional standards and code of ethics.</p>
5. Evaluate discourse management.	<p>5.1. Seek and analyse feedback on discourse management from <i>appropriate persons</i> and evaluate effectiveness of performance to reflect code of ethics.</p> <p>5.2. Take advice on issues and solutions and explore process improvement strategies.</p> <p>5.3. Consider and implement adjustments to improve process and outcomes of future assignments.</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- communication skills to:
 - identify and plan for complex assignment requirements
 - commence discourses in complex settings according to established protocols
 - manage communication flow in a confident, sensitive and effective manner
- discourse management skills to:
 - accommodate communication styles and preferences in complex discourses
 - analyse discourse settings and communication preferences, and adapt style accordingly
- initiative and enterprise skills to adapt to new, varied and volatile assignment situations
- interpersonal skills to:
 - interact with people from a range of social, cultural and ethnic backgrounds and with a range of communication needs
 - manage a diverse range of participants while remaining assertive and culturally sensitive
 - confirm assignment requirements and difficulties with clients and colleagues
 - seek assistance from clients, specialist advisors and peers
- language skills to achieve competent performance in a complex and demanding setting
- literacy skills to prepare required background material and resources
- organisational skills to identify and prepare work environment
- problem-solving skills to:
 - assess barriers to effective communication in complex settings and devise solutions
 - change conditions to enhance message transfer and interpreter comfort and safety
 - maintain effective communication flow in challenging situations
 - vary style and language structure to suit a range of participants and situations
- self-management skills to:
 - apply code of conduct and legislative requirements to work processes
 - deflect pressure from other parties to perform duties other than interpreting
 - behave appropriately in all situations, including emergency situations or those with time pressures
 - identify personal and professional limitations in managing discourse
 - seek debriefing and support where required

REQUIRED SKILLS AND KNOWLEDGE

- technology skills to use a range of technical and electronic equipment, where necessary.

Required knowledge

- communication techniques that facilitate communication flow and discourse management
- culture-specific knowledge to:
 - manage communication flow with diverse discourse participants
 - work with people with a disability and special communication needs
- feedback and debriefing techniques
- relevant codes of ethics and professional conduct
- legal requirements, professional procedures and guidelines, ethical practices and business standards relating to assignment,
- limitations of work role, responsibility and professional abilities
- modes of interpreting and their appropriateness and implications for complex settings
- nature and structure of complex interpersonal, institutional and meeting dynamics
- OHS and risk management practices and procedures relevant to nature of assignments
- professional support networks, including peer help groups and mentors
- research methods
- source and target languages to achieve competent performance in complex settings.

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms the candidate's ability to manage the physical setting and communication dynamics of discourses in complex settings. This includes:

- anticipating the need to manage participants and communication flow in a complex discourse setting
- using discourse management strategies to maximise communication flow in a range of complex situations and to maximise communication flow
- supporting parties to understand the interpreting process
- managing challenging situations, participants and personal responses in a respectful and professional manner
- applying a range of effective discourse management strategies and techniques
- managing communication problems with technology
- complying with professional standards and codes
- reflecting on practice and using opportunities to improve practice.

Context of and specific resources for assessment

Assessment of this unit of competency will make use of scenarios, case studies, experiences and, where possible, examples of interactions with colleagues and clients which illustrate a range of skills and strategies for managing discourses in complex settings.

Resources for assessment include:

- a range of formal structured meetings with high client accountability (legal, commercial, diplomatic, government, professional services) for outcomes
- a range of meetings that require specialised and technical terminology and complex conceptual matters, including formal protocols and prescriptive procedures
- settings that allow a range of capacity to influence meeting processes and communication flow
- meetings that include parties with a range of experience

EVIDENCE GUIDE

with interpreting and its protocols and conventions.

- observations and questioning of candidates interpreting in meetings that require a range of communication and presentation techniques to address complex participant dynamics.
- examples of professional development strategies to improve process

Evidence for assessment should be gathered to demonstrate a range of experiences in managing discourses in complex settings. Evidence may include examples of negotiations with client and participant expectations, using the resources of professional associations or employers, and should also include evidence of decision making where there are high levels of risk in ethical, business and professional issues influencing decisions.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<p><i>Requirements</i> may include:</p>	<ul style="list-style-type: none"> • discourse participants and languages spoken • discourse location or environment • discourse type, such as: <ul style="list-style-type: none"> • court sessions and cross-examinations • institutional settings • professional consultations • official interviews such as: <ul style="list-style-type: none"> • police • immigration • security • Centrelink • government <ul style="list-style-type: none"> • personnel present • required equipment and resources • work conditions, such as: <ul style="list-style-type: none"> • continuous hours to be worked • need for tandem team or relay interpreting • required breaks • timing of discourse.
<p><i>Planning</i> may include:</p>	<ul style="list-style-type: none"> • purpose • context and subject • expectations and intended or desired outcomes • culturally appropriate behaviour and presentation • target language delivery • risk management considerations • sources of information • interpreting strategies appropriate to discourse • safety requirements for interpreter •
<p><i>Arranging work environment</i> may</p>	<ul style="list-style-type: none"> • clear lines of sight • adequate lighting and ventilation

RANGE STATEMENT	
include:	<ul style="list-style-type: none"> • acceptable noise levels • visual access • comfort and safety • participant positioning appropriate to: <ul style="list-style-type: none"> • cultural and religious backgrounds • recording of assignment • party movements and dynamics • setting • participants with disabilities or special needs.
<i>Resources</i> may include:	<ul style="list-style-type: none"> • background information • forms or paperwork • reference material, including dictionaries and glossaries • tools and equipment, such as stationery and batteries • supporting documentation to assist message transfer, such as maps and photographs.
<i>Factors that may compromise interpreter effectiveness</i> may include:	<ul style="list-style-type: none"> • faulty audio or video equipment • impeded lines of sight • inadequate lighting and ventilation • persons other than participants present (e.g. family or observers) • visual access and ambient noise.
<i>Adjustments</i> may include:	<ul style="list-style-type: none"> • addressing OHS concerns • adjusting position and environment in regard to listener or speaker as changing circumstances require • positioning self in a culturally appropriate manner • maximising access to hands-free telephone • remaining unobtrusive when not required to interpret.
<i>Relationships between participants</i> may include:	<ul style="list-style-type: none"> • details of discourse, such as: <ul style="list-style-type: none"> • first time meeting or one in a series of meetings • government service provider with public client • service provider with private client • interests in relation to purpose of discourse • personal details of participants, including religious and ethnic backgrounds and family connection.
<i>Protocols</i> to commence discourse may include:	<ul style="list-style-type: none"> • effecting introductions • briefing participants • explaining purpose, process and recording requirements • confirming confidentiality of information, if appropriate to discourse

RANGE STATEMENT	
	<ul style="list-style-type: none"> requesting participant details, such as names and titles.
<i>Attributes</i> may include:	<ul style="list-style-type: none"> attitudes to such things as authority, disclosure or conflict speaking or signing style and expression, including 'Australianised' language other than English (LOTE) educational level intellectual and physical capabilities language dialect language proficiency, including pronunciation and vocabulary.
<i>Communication style</i> may include:	<ul style="list-style-type: none"> language version or dialect register idiosyncratic language use need for relay interpreter regular checking of understanding, particularly in Auslan and Indigenous dialogues.
<i>Factors affecting communication flow</i> may include:	<ul style="list-style-type: none"> ethnic, political and religious affiliations or kinship real or perceived direct or indirect conflicts of interest stressful or confrontational situations interpreter attributes: <ul style="list-style-type: none"> demeanour or appearance familiarity with specific procedures performance stress personal beliefs, feelings and customs task being beyond competence.
<i>Equipment and technology</i> may include:	<ul style="list-style-type: none"> communication equipment and media technology, such as: <ul style="list-style-type: none"> microphone and recording equipment remote interaction telephone or video link wireless headset.
<i>Strategies</i> to address cross-cultural communication challenges may include:	<ul style="list-style-type: none"> adjusting register impartial interpreting of indicators of misunderstanding explaining exchanges between interpreter and individual parties selecting appropriate moment and method to communicate challenges need for relay interpreter cross-cultural bridging.

RANGE STATEMENT

Challenging situations
may include:

- attempts to manipulate or influence interpreter
- cross-cultural communication challenges, relating to:
 - culture-specific attitudes and behaviour
 - cultural conflicts, such as Aboriginal country boundaries
 - different communication styles and preferences
- challenging characteristics of participants, such as:
 - physical or intellectual disability
 - emotional or psychological state
 - lack of cooperation and resistance to process
- discourse setting, including:
 - confined space
 - physical barriers to sight or sound
- diverse expectations of participants
- local variations in pronunciation, expression and vocabulary
- idiosyncratic language use
- type of discourse, such as:
 - emotionally charged discourses in accidents or emergencies
 - conflict between participants.

Appropriate persons
may include:

- chair of meeting
- discourse participant in authority
- booking agency
- interpreting team colleague
- mentoring interpreter.

Interpreting

Competency field

Competency field	Translating and Interpreting
------------------	------------------------------

Co-requisite units

Co-requisite units	
--------------------	--

PSPTIS611A Translate special purpose texts from LOTE to English

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	This unit describes the outcomes, skills and knowledge required to translate special purpose texts from another language to English. The unit requires the ability to convey the purpose and use of the source information in functionally equivalent translated texts. It requires sound conceptual understanding of the specialist material being translated and its context in order to produce translations that are accurate and appropriate for the context, target audience and end use. The language transfer process described in this unit requires high-order language skills and the ability to apply specialist resources and subject specific glossaries, including specialist bilingual glossaries.
------------------------	--

Application of the Unit

Application of the unit	This unit applies to translations of special purpose texts where the subject of the text has its own specific terminology and where there may be significant equivalence problems and the need to undertake extensive research and translate complex language and concepts. The purpose of translating is to convey information written using specific terminology for a specific audience.
--------------------------------	---

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

Employability skills	This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<p>1. Analyse special purpose source texts.</p>	<p>1.1 Receive and manage <i>source texts</i> according to client requirements and conditions and confirm that it is complete and legible.</p> <p>1.2 Review personal skills and experience required to undertake assignments and meet client requirements.</p> <p>1.3 Identify complex areas of content and language requiring additional research and gather <i>reference material</i> in suitable format and timeframe.</p> <p>1.4 Identify suitable <i>tools and equipment</i> to aid in translation.</p> <p>1.5 <i>Analyse source texts</i> and apply knowledge of subject and context and experiences in related texts to determine key elements and potential translation quality issues.</p> <p>1.6 Restructure source texts to clarify meaning and address issues arising with clients.</p> <p>1.7 Choose approach to translation suitable to target audience and purpose of translation.</p>
<p>2 Translate LOTE source texts to draft texts in English.</p>	<p>2.1 Research and apply established translation precedents and information from <i>resources aimed to ensure consistent outcomes</i>.</p> <p>2.2 Analyse and adapt cultural and linguistic content of source texts as appropriate for document end use.</p> <p>2.3 Identify areas requiring further research or assistance and seek and incorporate additional information.</p> <p>2.4 Produce draft translations of source texts that are accurate, coherent, and <i>appropriate</i> for document end use and assignment requirements.</p> <p>2.5 Record translation decisions and justification in glossary.</p>
<p>3 Check draft translations.</p>	<p>3.1 Critically evaluate subject-specific terminology and concepts, consistency, accuracy and functional equivalence of translated text.</p> <p>3.2 Identify and correct errors, distortions and unsupported translation decisions.</p> <p>3.3 Use tools and equipment to check translations, refine and improve target texts and manage and correct errors.</p>
<p>4 Revise translations.</p>	<p>4.1 Assess and incorporate advice from checking translator and subject experts.</p>

ELEMENT	PERFORMANCE CRITERIA
	<p>4.2 Discuss and resolve outstanding issues with appropriate persons.</p> <p>4.3 Undertake further revision until target text is functionally equivalent to source text.</p>
<p>5 Finalise and evaluate translations.</p>	<p>5.1 Use technology to format translated texts according to agreed specifications and end use requirements, and liaise with clients where required.</p> <p>5.2 Proofread formatted texts using standard methods to annotate proof corrections.</p> <p>5.3 Return final version of translated texts and <i>supporting documentation</i> to clients according to agreed procedures and within suitable timeframe.</p> <p>5.4 Discuss issues and solutions with colleagues and advisers and explore process improvement strategies.</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- analytical skills to:
 - analyse the requirements of assignments in terms of personal skills and capability
 - identify and resolve translation issues and difficulties in special purpose LOTE source texts
 - interpret and apply quality assurance parameters to translation methods and presentation
 - interpret and apply style guides, specialised reference material, including glossaries
 - research and synthesise relevant subject -specific information
- communication skills to:
 - consult effectively with clients and colleagues
 - discuss and resolve agreed processes and translating requirements with clients
 - seek assistance from field or topic experts and peer help groups
 - liaise with colleagues to obtain independent quality control and discuss and agree upon recommended changes
- language skills to meet complex demands producing accurate and coherent translated special-purpose texts in English, including use of:
 - consistent use of wide range of registers and styles appropriate to end use
 - correct and idiomatic collocation, lexis and syntax
 - current and consistent specialist vocabulary, including foreign loan words
 - factual correctness, including at the level of tense, gender and singular or plural
 - complex language
 - punctuation, including paragraphing
 - spelling appropriate to audience
 - textual devices that create cohesion and coherence
- learning skills to expand technical capabilities in specialised fields
- literacy skills to:
 - analyse source texts written using specific terminology and complex language or dealing with complex concepts
 - assess and use subject information
 - read and translate at a level to cope with a range of specialised genres and technical language or to translate in a single complex and specialised subject area
 - research complex and detailed information from a range of high level, technical

REQUIRED SKILLS AND KNOWLEDGE

- and conceptual sources
- record translation decisions and justification in glossaries
- proofread target texts
- organisational skills to:
 - access and return documentation according to client requirements
 - apply strategies for efficient client services
 - build, use and manage assignment-specific glossaries
- problem-solving skills to:
 - address discrepancies in other language that affect transfer to English
 - manage conflicting and inconsistent client objectives
 - identify strategies to educate clients in translation protocols and expectations
- research skills to:
 - identify translation precedents relevant to assignments
 - make critical use of reference material
 - source and use specialised resources
 - undertake advanced research in response to challenges encountered in translation
- self-management skills to:
 - develop specialised capabilities in response to work experiences and demands
 - ensure suitable work environment, including adequate light, physical comfort and ergonomic work practices
 - meet time and contract commitments
 - organise and use tools and equipment suitable to task
- technology skills to:
 - use office equipment and information and communications technology for translating, formatting, proofreading and file management purposes
 - for Auslan/English translations the ability to use video recording, viewing and editing equipment
 - format target texts
- time management skills to ensure source texts are translated, checked, revised, formatted, proofread and returned within required timeframes
- advanced translating skills to translate special purpose LOTE texts into functionally equivalent English texts, including:
 - adaptation
 - contrastive analysis of meaning and language
 - equivalence at the level of discourse, pragmatics, syntax and word
 - grammatical function transposition
 - localisation

REQUIRED SKILLS AND KNOWLEDGE

- text manipulation to clarify meaning.

Required knowledge

- awareness of competency and limitations in work role, responsibility and professional abilities
- discourse analysis techniques
- professional procedures and guidelines, ethical practices and business standards applicable to assignments
- advanced research methodologies and sources of reference material suitable to translating assignments
- extensive and high level subject, specialist area and culture-specific knowledge relevant to subject of assignments
- high-order target language required to produce a functionally equivalent translation that is accurate, coherent and appropriate to end use
- tools and equipment relevant to assignments, including relevant conventional and translation-specific technologies, such as computer assisted translation (CAT) software
- document and editing conventions such as proofreading, copy editing, footnoting, indices, tables and graphs, graphics, captions and presentation for publication
- source language required to analyse and restructure complex source text to clarify meaning, including:
 - cause and effect relationships
 - cohesive and substitution devices
 - function of words and grammatical elements
 - idioms and idiomatic expressions
 - metaphor and simile
 - parsing sentences
 - punctuation
 - register and style
- translating theories relevant to assignments, including principles of:
 - formal and dynamic translation
 - literal and free translation
 - form based and meaning-based translation
 - direct and oblique translation
- thorough and comprehensive English and LOTE specialist field systems, conventions and subject dimensions
- document, file and information management practices and procedures relevant to assignments and product context
- OHS practices and procedures specific to the demands of translating
- privacy and confidentiality requirements
- purpose and implications of translation

REQUIRED SKILLS AND KNOWLEDGE

- | |

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms the ability to translate special-purpose texts from another language to English, conveying the purpose and use of the source information in a functionally equivalent translated text. This includes:

- applying high-order language and translating skills required to convey the purpose and use of source texts where there are significant equivalence problems and complex language and concepts
- using a range of advanced techniques to produce a translation that is accurate and appropriate for the context, target audience and end use
- applying sound conceptual understanding of the specialist material being translated and its context
- using high-order language and advanced research skills and the ability to critically apply specialist resources and subject-specific glossaries, including specialist bilingual glossaries.
- checking and correcting content and formatting of translated text for consistency and accuracy and compliance with editing and publishing conventions through the exercise of revision and proofreading
- consulting checking translator and appropriate advisers and incorporating feedback into processes and products
- using a wide range of word processing and document management technology to produce a target text in required format and within suitable and agreed timeframe
- explaining and defending translation choices in a professional manner.

Context of and specific resources for assessment

Evidence for assessment of this unit of competency will make use of scenarios, case studies, translation copy, assignment experiences and, where possible, examples of interactions with colleagues and clients which illustrate a range of skills and strategies for translating special purpose texts from LOTE to English.

Resources for assessment include:

EVIDENCE GUIDE	
	<ul style="list-style-type: none"> • a range of specialist LOTE texts and their translated English texts demonstrating different purpose, audience, document production, text and language complexity and extent of resources consulted • contracts and client conditions for a range of assignments • examples of critical use of resources from the range statement • examples of use of style guides, procedures for editing and publication. • opportunity to observe and question the candidate translating a functionally equivalent text, according to required client requirements, format and within agreed timeframe • examples of a range of complex research resources and strategies • evidence of checking, revising, editing and formatting.
	<p>While the content and scenarios may be simulated, evidence for assessment should reflect the conditions of real assignments in translating a range of texts presenting significant equivalence problems and the need to undertake extensive research and translate complex language and concepts.</p>

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<p>Special purpose <i>source texts</i> may include:</p>	<ul style="list-style-type: none"> • material with its own specific terminology, such as: <ul style="list-style-type: none"> • academic papers • commercial correspondence and official reports • instructional texts, such as technical and educational materials and guides • complex legal, medical, financial or scientific texts and reports • licensing and patent material • complex product or service manuals, user guides and information • technical texts containing field-specific information or terminology • specialised and detailed texts for limited, specific audiences.
<p><i>Reference material</i> may include:</p>	<ul style="list-style-type: none"> • contextual and specialist information, including: <ul style="list-style-type: none"> • specialist information relating to topic and specialised area of translation • wider background and supplementary information to enhance application of contexts • the internet, specialist websites • bilingual and monolingual dictionaries and glossaries • parallel texts • style guides or manuals • thesaurus • customised and client provided assignment-specific references.
<p><i>Tools and equipment</i> may include:</p>	<ul style="list-style-type: none"> • dictionaries and glossaries, including: <ul style="list-style-type: none"> • bilingual and monolingual • electronic and hard copy • assignment, client and topic-specific • hardware, including: <ul style="list-style-type: none"> • computers

RANGE STATEMENT	
	<ul style="list-style-type: none"> • printers • scanners • tools and equipment, including: <ul style="list-style-type: none"> • translation memory software • voice-operated keyboards • internet web sites • video recording, viewing and editing equipment • virtual networking or collaboration media, such as e-forums and internet communication.
<i>Analysing source texts</i> may include:	<ul style="list-style-type: none"> • key elements, including: <ul style="list-style-type: none"> • context • regional, specialist and technical aspects • style • topic • specialist vocabulary, language conventions and terminology • meaning in context • layout and design • punctuation • purpose • semantic structure • syntactic problems • transfer problems • writing conventions • non-text elements • research and clarification.
<i>Restructured</i> text may address:	<ul style="list-style-type: none"> • anomalies in terminology • ambiguity and confused references • cultural sensitivities and equivalence issues • lexical, linguistic or structural deficiencies.
<i>Resources</i> may include	<ul style="list-style-type: none"> • human resources, such as: <ul style="list-style-type: none"> • field or topic experts • peer help groups and opposite language colleagues • reference material • examples of previously translated material.
<i>Appropriate</i> may include:	<ul style="list-style-type: none"> • adaptation • level of complexity • localised text • register and style appropriate to audience and purpose

RANGE STATEMENT	
	of translation <ul style="list-style-type: none"> • specialised genres • suitable orthography and punctuation, including paragraphing • suitable vocabulary, including technical language • .
<i>Supporting documentation</i> may include:	<ul style="list-style-type: none"> • background information • source text • updated assignment-specific glossary.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<p>1. Prepare to use translation technology.</p>	<p>1.1 Check translation <i>technology</i> and confirm familiarity and useability with <i>reference material</i>, its suitability for the assignment and address issues and limitations.</p> <p>1.2 Negotiate use of translation technology based on client's requirements and <i>resources</i> and the <i>implications</i> for the source text and assignment conditions.</p> <p>1.3 Confirm currency and version of equipment and upgrade if required.</p> <p>1.4 Consider and select client agreed consistent applications of terminology and identify and address <i>special requirements</i>, potential translation difficulties and transfer errors associated with the use of translation technology.</p> <p>1.5 Confirm shared access to glossary and <i>supporting documentation</i> with client.</p>
<p>2. Translate source text to draft target text using translation technology.</p>	<p>2.1 Use translation technology appropriate to the translation task.</p> <p>2.2 Manage the technology's translation assets such as memory, glossary and search functions as applicable, to optimise productivity and efficiency.</p> <p>2.3 Identify the benefits of consistent and rapid applications to achieve the client's purpose.</p> <p>2.4 Use translation technology to respond to mismatches and gaps in vocabulary and expressions and monitor adjustments to glossary and translation memory.</p> <p>2.5 Use translation technology to produce a draft translation of source text that is factually accurate and appropriate for assignment requirements.</p>
<p>3. Manually check draft translation.</p>	<p>3.1 Critically evaluate translation of terminology and concepts achieved by using technology.</p> <p>3.2 Discuss and resolve outstanding difficulties with technology with client or specialist colleagues and undertake further applications if required.</p>
<p>4. Evaluate use of translation technology.</p>	<p>4.1 Complete required <i>special requirements</i> and <i>supporting documentation</i> according to available applications of technology.</p> <p>4.2 Submit target text to appropriate persons and retain copies of documentation and glossary for future reference, according to confidentiality, legal and</p>

ELEMENT	PERFORMANCE CRITERIA
	business requirements. 4.3 Discuss issues concerning the use of technology and solutions with relevant persons and explore improvement strategies.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- analytical skills to:
 - assess the suitability of translation technology for specific assignments
 - identify and address limitations in translation technology
- communication skills to:
 - negotiate technology issues with clients
 - identify and confirm translation process and outcomes with client
 - inform and educate clients on translation protocols and expectations related to translation technology
- initiative and enterprise skills to:
 - adapt practices to translation technology
 - seek assistance for requirements beyond personal competence and experience
 - identify personal skill gaps and undertake professional development in specific applications.
- language skills to meet source and target text requirements, given the applications of the translation technology
- learning skills to expand technical capabilities in new software and applications
- literacy skills to:
 - assess and use technical information and instructions related to translation software
 - research information on translation equipment, software and applications
 - optimise the efficiencies of program glossaries
- organisational skills to:
 - optimise the benefits of translation software to access, complete and return documentation according to client document management administration procedures
 - build, use and manage assignment-specific glossaries available in programs
 - meet professional obligations
- problem-solving skills to:
 - develop strategies for addressing the limitations and skills development associated with using translation technology
- self-management skills to:
 - adapt to the timeframes and productivity benefits of translation technology
 - ensure suitable work environment, including adequate ambient light, own physical comfort and ergonomic work practices
- technical skills to:

REQUIRED SKILLS AND KNOWLEDGE

- use computer programs to streamline and speed translation tasks
- use a range of computer translating, research, search and editing tools and equipment
- for Auslan/English translations, the ability to use video recording, viewing and editing equipment
- time management skills to ensure source texts are translated, formatted, proofread and returned within required timeframes.

Required knowledge

- suitability and limitations of commercial software and applications for translating and editing
- electronic file and information management protocols and procedures
- awareness of skill needs and skill development opportunities
- OHS practices and procedures relevant to using translation technology
- professional procedures and guidelines, ethical practices and business standards applicable to assignment
- computer research and search programs, applications and methods
- for Auslan/English translations, knowledge of appropriate translation technology
- tools and equipment relevant to assignment, including developing technologies, such as computer assisted translation software.

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms the ability to use commercial translation technologies designed to streamline and speed translation tasks. This will include:

- analysing the benefits, suitability and limitations of translation technology to text and task
- applying specialised translation technology knowledge to the translation process
- critically evaluating translation achieved by using technology and resolving outstanding difficulties
- proofreading texts and checking formatting of translated text for accurate applications of translation technology
- discussing issues concerning the use of technology in translation and exploring improvement strategies.
- .

Context of and specific resources for assessment

- range of examples of source texts translated using examples of current translation technology
- observation and questioning of candidates using:
 - suitable translating technology
 - a range of computer research applications
 - for Auslan/English translations using video recording and editing equipment
 - supporting computer applications such as printers and communication programs.

Evidence will be based on the applications of translation technology currently available and able to be readily accessed by the candidate.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<p><i>Technology</i> may include:</p>	<ul style="list-style-type: none"> • appropriate CAT tool, versions and compatibility and applications • electronic dictionaries and glossaries, including: • hardware, including: <ul style="list-style-type: none"> • computers • printers • scanners • productivity tools, including: <ul style="list-style-type: none"> • translation memory software • voice-activated keyboards • video recording, viewing and editing equipment • virtual networking or collaboration media, such as e-forums and Skype.
<p><i>Reference material</i> may include:</p>	<ul style="list-style-type: none"> • program user guide and help facility • translation technology reviews in specialist and professional publications • client requirements and specifications • style guides or manuals • technical experts • topic, specialised area and assignment-specific references.
<p><i>Resources</i> may include</p>	<ul style="list-style-type: none"> • human resources, such as: <ul style="list-style-type: none"> • content and technical experts • peer help groups and opposite language colleagues • reference material.
<p><i>Implications</i> may apply to:</p>	<ul style="list-style-type: none"> • level of complexity • localised text • specialised genres • suitable orthography and punctuation, including paragraphing • consistent use of suitable vocabulary, including technical language

RANGE STATEMENT	
	<ul style="list-style-type: none"> • non-text material •
<i>Special requirements</i> may include:	<ul style="list-style-type: none"> • applying codes, such as numbers or letters to source • matching source and target pagination • formatting translation to facilitate ready cross-referencing against source • use of client-supplied translation memory.
	<ul style="list-style-type: none"> •
<i>Supporting documentation</i> may include:	<ul style="list-style-type: none"> • background information • source documents • updated assignment-specific glossary • updated translation memory.

Unit Sector(s)

Competency field

Competency field	Translating
-------------------------	-------------

PSPTIS613A Sight translate (LOTE)

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	This unit describes the outcomes, skills and knowledge required to produce a sight translation of a written source text into a different spoken or signed target language with a high degree of accuracy. It requires a high level of comprehension of written language and its structure, the ability to work between two languages in spoken and written form, and the ability to reflect the register of the written source text in the target language.
------------------------	---

Application of the Unit

Application of the unit	This unit applies to short texts sight translated as an adjunct to interpreting in any mode and setting, or to support consecutive or simultaneous interpreting. Sight translation involves verbal or signed reproduction in a target language of a written source text in its entirety.
--------------------------------	--

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

Employability skills	This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Analyse text.	<p>1.1 Confirm <i>purpose</i> for which sight translation is required and advise on <i>appropriateness</i> of sight translation.</p> <p>1.2 Determine <i>key features of text</i> and confirm <i>ability to read</i> and comprehend the text.</p> <p>1.3 Identify and discuss <i>potential translation problems</i> and confirm ability to sight-translate and time needed.</p> <p>1.4 Identify <i>information in context</i> and establish overall comprehension.</p> <p>1.5 <i>Analyse text</i>, referring to available <i>resources</i> and seeking further assistance where required.</p>
2 Translate source text into target language.	<p>2.1 <i>Plan</i> sight translation, marking up text where appropriate and solving translation problems.</p> <p>2.2 Transfer semantic segments of source text to target language in an accurate and coherent manner.</p> <p>2.3 Scan text ahead while translating, avoiding rephrasing and ensuring delivery is consistent and <i>appropriate</i> for setting and mode of interpreting.</p>
3 Evaluate sight translation.	<p>3.1 Analyse performance to reflect task purpose and requirements.</p> <p>3.2 Identify strengths and weaknesses of process to inform subsequent work.</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- communication skills to:
 - advise on appropriateness of sight translation
 - discuss translation problems
 - seek assistance where required
 - achieve appropriate delivery
- interpersonal skills to:
 - remain assertive and confident
 - be clear about problems and time requirements
- interpreting skills to:
 - conceptualise and express complex information in target language
 - reproduce factual and linguistic content with a high degree of accuracy
 - solve problems of equivalence
 - use technical, language and rhetorical skills to ensure cohesive and faithful delivery of messages
- language skills in target language to achieve competent performance, including:
 - educated native or near native speaker proficiency in target language
 - written and context-specific registers
 - context-specific terminology
 - appropriate delivery
- literacy skills in source language to:
 - achieve high-order comprehension of text
 - analyse source text, including punctuation, elements of grammar and sentence structure
 - identify key features of source text
 - scan text ahead while orally translating.
- organisational skills to:
 - complete task within available timeframe
 - plan sight translation
 - organise required resources
- problem-solving skills to:
 - resolve translation problems
 - select translation options suitable to text
- research skills to seek information or clarification of text using reference material
- self-management skills to:

REQUIRED SKILLS AND KNOWLEDGE

- identify personal and professional ability to undertake sight translation
- evaluate own performance
- mentally order information for message transfer

Required knowledge

- circumstances in which and texts for which sight translation is appropriate
- legal, cultural and language reasons relevant to determining whether to sight translate text
- professional procedures and guidelines relating to assignment including:
 - ethical practices
 - business standards
 - creating legally binding documents
 - good clinical practice and informed consent
 - privacy and confidentiality requirements
- limitations of work role, responsibility and professional abilities
- research methods to access and use reference material
- source and target languages to achieve competent performance
- structure and nature of different types of text for different purposes
-
- techniques to identify information in context, including:
 - skimming text
 - reading aloud
 - highlighting key information and relationships
 - identifying information at paragraph level
 - analysing accompanying visual and graphic material.

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms the ability to sight translate a written source text in its entirety into a different spoken or signed language with a high degree of accuracy, including:

- comprehending written language and its structure
- assessing appropriateness of sight translation and potential translation problems and recommending alternatives
- reading and analysing source text and planning sight translation
- using strategies to clarify unknown terms and unclear expression
- reflecting the written register of the source text
- using appropriate delivery to sight translate written text

Context of and specific resources for assessment

Evidence for assessment of this unit of competency will make use of scenarios, case studies, experiences and, where possible, examples of interactions with colleagues and clients which illustrate a range of skills and strategies to sight translate.

Resources for assessment include:

- examples of a range of texts used for sight translation
- opportunities to observe candidate demonstrating sight translation of a range of texts
- third party reports on examples of sight translation
- scenarios which use a range of different texts and contexts for sight translation.
-

Evidence for assessment should be gathered to demonstrate a range of experiences in sight translating a variety of texts in LOTE and English.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<i>Purpose may include:</i>	<ul style="list-style-type: none"> • confirmation of information in text • supporting documentation for a dialogue • speech notes or supplementary notes for a monologue.
<i>Sight translation may be inappropriate for:</i>	<ul style="list-style-type: none"> • legal reasons, such as legally binding text • texts leading to informed decisions • technical reasons, such as: <ul style="list-style-type: none"> • lengthy text • lexical density • syntactic complexity.
<i>Key features of text may include:</i>	<ul style="list-style-type: none"> • source language • source, context and function of text • register and style of text • specific requirements, including regional and specialist aspects.
<i>Ability to read may be affected by:</i>	<ul style="list-style-type: none"> • language of source text • legibility of text • for character-based languages, within scope of own literacy • for different forms of written language, within scope of own competency.
<i>Potential translation problems:</i>	<ul style="list-style-type: none"> • may include: <ul style="list-style-type: none"> • contextual understanding • legibility • terminology • appropriateness • availability of resources • competence of interpreter • text ambiguities • may be addressed by: <ul style="list-style-type: none"> • sourcing and reviewing appropriate resources to aid understanding of specialist or technical language • advising that for technical or legal reasons text must

RANGE STATEMENT	
	<p>be submitted to a translator</p> <ul style="list-style-type: none"> • advising that text will have to be read aloud and interpreter will interpret oral rendition of text.
<i>Information in context may include:</i>	<ul style="list-style-type: none"> • accompanying visual and graphic material • basic facts • context, purpose and topic • cultural, social and situational elements significant in translation task • intent of writer • nature of text
<i>Analysing text may include:</i>	<ul style="list-style-type: none"> • <i>applying subject and context knowledge</i> • <i>elements of grammar</i> • <i>function of source language punctuation</i> • <i>register and style</i> • <i>sentence structure</i> • <i>significant words, expressions and sentences</i>
<i>Planning sight translation may include:</i>	<ul style="list-style-type: none"> • <i>highlighting important points</i> • <i>noting translation of significant words, expressions and sentences</i> • <i>using arrows or numbers placed at sub-segment boundaries</i> • <i>silent or vocal practice</i>
<i>Appropriate delivery may relate to:</i>	<ul style="list-style-type: none"> • clarity and fluency • <i>coherence</i> • <i>cultural appropriateness</i> • factual and linguistic accuracy • register • speed • <i>timeliness</i> • tone • <i>volume and voice projection.</i>

Competency field

Competency field	Interpreting
------------------	--------------

PSPTIS614A Apply theories to translating and interpreting work practices

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	This unit describes the outcomes, skills and knowledge required to research, analyse and apply a range of approaches to translating and interpreting based on the history, development and progress of relevant theories and their application to work assignment and practice.
------------------------	---

Application of the Unit

Application of the unit	The application of translating and interpreting theory is an essential component of interpreting and translating practice in the workplace at a professional level, leading to a vocational outcome in assignments which require justification and critiquing of work undertaken. While the primary purpose of the unit is vocational, it will enhance the opportunities for all practitioners who complete the unit to articulate into higher education as well.
--------------------------------	---

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

Employability skills	This unit of competency contains employability skills.
-----------------------------	--

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<p>1. Research the practice and theory of translating and interpreting.</p>	<p>1.1. Analyse the <i>concept of translation</i> and its relevance to the study of translating.</p> <p>1.2. Research <i>key developments</i> and <i>key influences</i> in the history and theory of translating and interpreting</p> <p>1.3. Analyse the impact of theory on current translating and interpreting practice.</p> <p>1.4. Identify <i>key issues</i> in contemporary study and practice of translating and interpreting</p>
<p>2. Identify the role of the translator.</p>	<p>2.1. Analyse the cultural and political agenda of translation.</p> <p>2.2. Analyse the <i>position and positionality</i> of the translator.</p> <p>2.3. Identify the influence of the publishing industry on the translator.</p> <p>2.4. Analyse the impact of the <i>new media</i>, localization and globalisation on translation.</p> <p>2.5. Identify new directions for translation.</p>
<p>3. Critique translations</p>	<p>3.1. Analyse aspects which have to be translated / interpreted for work assignments</p> <p>3.2. Determine the relevance and application of particular theories to work assignments</p> <p>3.3. Classify and explain the <i>procedures</i> adopted to clients, colleagues and agencies</p> <p>3.4. Analyse and <i>constructively report</i> on procedures, translations and interpretations</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- Communication with clients, colleagues and allied professionals including:
 - classifying and explaining the procedures adopted
 - providing reports on a translation or interpretation
- Problem solving including:
 - determining the relevance and conditions of application of particular theories to a range of work assignments
 - analysing and reporting on examples of the work of others
- Analysis of abstract concepts and their application to work requirements
- Research on relevant principles, theories and studies applicable to analysing and justifying work assignment requirements.
- Planning work assignments, conditions and client requirements in an efficient and professional manner.
- Technology used for both research and workplace and assignment conditions.
- Self management to select and apply relevant theories to specific work assignments.

Required knowledge

- The range of theories which have influenced translating practice
- Current translating and interpreting practice
- Discourse and register analysis
- Principles of localisation and globalisation

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms the ability to research, analyse and apply a range of approaches to translating and interpreting based on the history, development and progress of relevant theories and their application to practice including:

- researching translation theory and its development and influence on current practice
- discussing the role of the translator and new directions for translation
- analysing aspects which have to be translated / interpreted for a range of specific work assignments
- determining the relevance and application of particular theories to work assignments
- explaining the relevance of new media in translating and interpreting
- classifying, explaining and defending translation procedures, translations and interpretations
-

Context of and specific resources for assessment

Where possible assessment should be based on demonstrating the application of relevant theories on real examples of work assignments and situations. Where this is not possible, work-like scenarios and examples should be the basis of assessment for a minority of applications.

Assessment should be conducted on evidence from a range of work and client settings, conditions and requirements reflecting the reasonable expectations for a working practitioner.

Assessment should be based not only on knowledge of a range of theories, but on evidence of the applicability of a theory to particular work assignments, and the impact of the theory on the examples of practice.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Concept of translation may include:

- the nature of linguistic meaning and equivalence
- cross-linguistic differences
-

Key developments may include:

- pre-modernist translation theory
- direct translation, oblique translation and transpositions
- translation shifts
- the science of translating
- early translation theory
- formal and dynamic equivalence
- the principle of equivalent response
- semantic and communicative approaches
- contemporary theory
- functional categories
- functional theories
- text-type analysis
- skopos theory
- translatorial action
- consecutive interpreting
- the effort model
- note-taking
- the interpreting approach
-

Key issues may include:

- translation quality assessment
- text and pragmatic level analysis
- semiotic level of context and discourse
- criticisms of discourse and register analysis

Principle influences may include:

- Prominent practitioners and theoreticians, e.g.
- James Holmes
 - George Steiner
 - Roman Jakobson
 - Vinay and Darbelnet

RANGE STATEMENT	
	<ul style="list-style-type: none"> • Catford • Nida • Newmark • Gentzler • Buhler • Munday • Reiss • Vermeer • Holtz-Manttari • House • Gile • JF Rozan • Seleskovitch and Lederer • Newmark • Hatim and Mason and the Hallidayan model • Pym. <p>Translator and Interpreter training</p> <p>Expansion of international for a, e.g.</p> <ul style="list-style-type: none"> • UN • International tribunals • International criminal courts • International commissions
<i>Contemporary theory</i> may include:	<ul style="list-style-type: none"> • communicative/functional approaches • linguistic approaches • psycho-linguistic/cognitive approaches • polysystems theory • philosophical theories • general translation theory • partial translation theories
<i>Position and positionality</i> may include:	<ul style="list-style-type: none"> • political agendas in international relations • community interpreting •
<i>The new media</i> may include:	<ul style="list-style-type: none"> • digital, computerized, networked information and communication technologies • search engines • data bases • distribution platforms • virtual communities • audiovisual

RANGE STATEMENT

Constructive reporting
may include:

- checking a translation or interpreting assignment by another practitioner
- defending a translation or interpreting assignment called into question in a court or tribunal setting
- explaining translating or interpreting decisions
- preparing a report on a colleague's work

Competency field

Competency field	
-------------------------	--

PSPTRAN401A Inspect vehicles

Modification History

Not applicable.

Unit Descriptor

Unit descriptor

This unit covers inspection of vehicles to determine the significance of any vehicle defects relative to the safety risk they present on the road. It includes intercepting a vehicle in a safe manner, verifying the identity of the driver and/or responsible operator, visually inspecting the vehicle for compliance, and acting on non-compliance including recording the inspection results of the vehicle.

In practice, visual inspection of vehicles may overlap with other generalist or specialist public sector work activities such as acting ethically, complying with legislation, exercising regulatory powers, assessing compliance with legislation, gathering and analysing information, etc.

This is a new unit of competency, added to the *Road Transport Compliance* Competency field of the Training Package in 2004.

Application of the Unit

Not applicable.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

Employability skills This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements are the essential outcomes of the unit of competency. Together, performance criteria specify the requirements for competent performance. Text in *bold italics* is explained in the Range Statement following.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Intercept vehicle in a safe manner	<p>1.1 All interceptions and procedures are planned with co-workers to ensure compliance with legislation, codes of practice, organisational procedures and standards</p> <p>1.2 A safe <i>location</i> is selected in accordance with organisational policy and workplace health and safety requirements</p> <p>1.3 Clear and appropriate signals are given to the driver of the target vehicle to stop the vehicle</p> <p>1.4 Agency policy requirements for intercepting a vehicle are complied with</p> <p>1.5 Occupational health and safety requirements are followed to prevent injury or damage</p>
2. Verify identity of driver and/or responsible operator	<p>2.1 Driver is requested to produce identification</p> <p>2.2 Details of identification are recorded in accordance with legislation, policy and procedures</p> <p>2.3 Details of driver and/or responsible operator are verified with relevant authorities</p>
3. Inspect vehicle for safety compliance	<p>3.1 <i>Inspection</i> is undertaken in accordance with organisational requirements</p> <p>3.2 <i>Communication</i> is maintained with <i>relevant personnel</i> to ensure safe, efficient and complete inspection</p> <p>3.3 Inspection is conducted in accordance with occupational health and <i>safety</i> and other organisational policies and procedures</p>
4. Act on non-compliance	<p>4.1 <i>Vehicle</i> defects are identified and recorded in accordance with organisational policies and procedures</p> <p>4.2 Minor problems are reported as part of the inspection and, where appropriate, the vehicle operator is requested to rectify without a penalty being issued</p> <p>4.3 Detected faults dangerous to other road users are <i>recorded</i> on defect notice and the vehicle is ordered off the road immediately by an officer with the appropriate authority</p> <p>4.4 Necessary records/paperwork are completed in accordance with legal and organisational requirements</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the essential skills and knowledge and their level, required for this unit.

Skill requirements

Look for evidence that confirms skills in:

- using effective communication including questioning and negotiating in sometimes difficult situations
- responding to diversity, including gender and disability
- reading and applying complex information from legislation, policy and regulations
- working as part of a team
- interpreting and following instructions
- operating electronic communications equipment
- implementing contingency plans for unplanned events in cooperation with others
- undertaking assessment of motor vehicle and trailer defects
- applying public sector legislation such as occupational health and safety and environmental and sustainability procedures in the context of road transport inspection

Knowledge requirements

Look for evidence that confirms knowledge and understanding of:

- safe working systems and requirements
- organisational policies and procedures
- occupational health and safety legislation, codes of practice, policies and procedures
- environmental and sustainability requirements
- relevant standards and codes of practice for manual handling as applicable
- documentation relating to safety inspection
- standards and specifications for all items requiring inspection
- code of practice and conditions for the carriage of dangerous goods
- contingency management processes for unplanned events

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the Unit descriptor, Performance Criteria, the Range Statement and the Assessment Guidelines for the Public Sector Training Package.

Units to be assessed together

- *Pre-requisite* units that must be achieved prior to this unit: *Nil*
- *Co-requisite* units that must be assessed with this unit: *Nil*
- *Co-assessed units* that may be assessed with this unit to increase the efficiency and realism of the assessment process include, but are not limited to:

PSPETHC401A Uphold and support the values and principles of public service

PSPGOV422A Apply government processes

PSPLEGN401A Encourage compliance with legislation in the public sector

PSPREG401C Exercise regulatory powers

PSPREG402C Promote client compliance

PSPREG403B Assess compliance

PSPREG405B Act on non-compliance

Overview of evidence requirements

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms:

- the knowledge requirements of this unit
- the skill requirements of this unit
- application of the Employability Skills as they relate to this unit (see Employability Summaries in Qualifications Framework)
- vehicle inspections in a range of (3 or more) contexts (or occasions, over time)

Resources required to carry out assessment

These resources include:

- legislation, policy, procedures and protocols relating to vehicle inspection
- case studies and workplace scenarios to capture the range of situations likely to be encountered when inspecting vehicles

Where and how to assess evidence

Valid assessment of this unit requires:

- a workplace environment or one that closely resembles normal work practice and replicates the range of conditions likely to be encountered when inspecting vehicles, including coping with difficulties, irregularities and breakdowns in routine

EVIDENCE GUIDE

- vehicle inspections in a range of (3 or more) contexts (or occasions, over time)

Assessment methods should reflect workplace demands, such as literacy, and the needs of particular groups, such as:

- people with disabilities
- people from culturally and linguistically diverse backgrounds
- Aboriginal and Torres Strait Islander people
- women
- young people
- older people
- people in rural and remote locations

Assessment methods suitable for valid and reliable assessment of this competency may include, but are not limited to, a combination of 2 or more of:

- case studies
- demonstration
- observation
- questioning
- scenarios
- simulation or role plays
- authenticated evidence from the workplace and/or training courses

For consistency of assessment

Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments

Range Statement

RANGE STATEMENT

The Range Statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The Range Statement also provides a focus for assessment. It relates to the unit as a whole. Text in *italics* in the Performance Criteria is explained here.

- Locations may include*
- roadside locations - urban and regional, including high volume city locations
 - operator's premises
 - interception sites
 - vehicle inspection centres
- Inspections may be*
- undertaken on all types of vehicles
 - carried out alone or in conjunction with other personnel
 - undertaken in full range of diverse conditions
 - conducted with reference to *Administrative Guide for Assessment of Defective Vehicles*
 - cover items such as:
 - air and/or electrical components
 - body and ancillary components
 - brakes
 - chassis and trailing items (hoses etc)
 - draw gear
 - exhaust and noise level
 - ground clearance
 - load securing devices (chains, ropes, pins etc)
 - locking and securing devices
 - oil leaks
 - out-of-gauge fifth wheel conditions
 - steering and suspensions
 - vehicle modifications
 - wheels and tyres
- Communication methods may include*
- verbal
 - line-of-sight signals
 - radio
 - mobile telephone
- Relevant personnel may include*
- senior transport inspector
 - authorised/other accredited officers/inspectors
 - relevant compliance managers
 - other operational personnel

RANGE STATEMENT

Safety and protective equipment may include

- vehicle driver
- high visibility clothing
- gloves
- sunscreen
- sunglasses
- safety glasses
- safety headwear
- approved footwear
- portable radios, if applicable
- hand-held lamps or torches
- safety devices
- hearing protection
- loaded or unloaded during inspection

Vehicles may be

Records and documentation may include

- defect notice books
- inspection reports
- departmental requirements
- repair order books
- transport instructions
- incident reports
- safeworking forms or instructions
- mechanical condition advice forms
- National Heavy Vehicle Accreditation Scheme (NHVAS) interception books
- Penalty Infringement & Notices
- Traffic Infringement Notices
- formal cautions

Elements and Performance Criteria Pre-Content

Elements are the essential outcomes of the unit of competency. Together, performance criteria specify the requirements for competent performance. Text in *bold italics* is explained in the Range Statement following.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Check compliance equipment	1.1 <i>Equipment</i> is checked in accordance with organisational policies and procedures and manufacturers' specifications 1.2 Equipment is accurately calibrated where required to meet legal requirements
2. Stop target vehicle	2.1 A safe location is selected at which to stop the driver of the target vehicle 2.2 Clear and appropriate signals are given to the driver of the target vehicle to stop the vehicle 2.3 The driver is stopped in accordance with organisational requirements for conducting roadside interceptions 2.4 Relevant occupational health and safety requirements are followed
3. Assess compliance with regulatory requirements	3.1 Regulatory details/records are verified and data interpreted 3.2 Compliance with conditions of the authorisation and/or any exemptions is assessed and any non-compliance is identified 3.3 Compliance equipment is operated in accordance with organisational requirements and manufacturers' guidelines 3.4 Any non-compliance is identified in accordance with regulatory requirements
4. Check vehicle for mass and dimension compliance	4.1 Vehicle documentation/dockets to identify mass details are examined 4.2 Weigh bridge and/or portable scales are operated in accordance with organisational policies and procedures and manufacturers' specifications 4.3 Organisational requirements for conducting mass compliance checks are complied with 4.4 Measuring equipment is operated in accordance with standard operating procedures for conducting dimension compliance checks 4.5 Any offences are identified in accordance with legislation and regulations
5. Check vehicle load restraints	5.1 Vehicle load restraints are checked to ensure vehicle complies with standards 5.2 Organisational requirements for conducting load restraint compliance checks are complied with 5.3 Non-conformance is identified in accordance with the standards
6. Act on non-compliance	6.1 Negotiation is undertaken to achieve compliance if possible/legally acceptable in accordance with organisational policy and procedures

ELEMENT

PERFORMANCE CRITERIA

- 6.2 Operators/responsible parties are informed of the *action*, justification for it and any rights of appeal in accordance with legal requirements and organisational procedures
- 6.3 Necessary records/paperwork are completed in accordance with legal and operational requirements

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

Units to be assessed together

- *Pre-requisite* units that must be achieved prior to this unit: *Nil*
- *Co-requisite* units that must be assessed with this unit: *Nil*
- *Co-assessed units* that may be assessed with this unit to increase the efficiency and realism of the assessment process include, but are not limited to:

PSPETHC401A Uphold and support the values and principles of public service

PSPGOV422A Apply government processes

PSPLEGN401A Encourage compliance with legislation in the public sector

PSPREG401C Exercise regulatory powers

PSPREG402C Promote client compliance

PSPREG403B Assess compliance

PSPREG405B Act on non-compliance

Overview of evidence requirements

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms:

- the knowledge requirements of this unit
- the skill requirements of this unit
- application of the Employability Skills as they relate to this unit (see Employability Summaries in Qualifications Framework)
- assessment of vehicle compliance in a range of (3 or more) contexts (or occasions, over time)

Resources required to carry out assessment

These resources include:

- legislation, policy, procedures and protocols relating to assessment of vehicle compliance
- case studies and workplace scenarios to capture the range of situations likely to be encountered when assessing vehicle compliance

Where and how to assess evidence

Valid assessment of this unit requires:

- a workplace environment or one that closely resembles normal work practice and replicates the range of conditions likely to be encountered when assessing vehicle compliance, including

EVIDENCE GUIDE

coping with difficulties, irregularities and breakdowns in routine

- assessment of vehicle compliance in a range of (3 or more) contexts (or occasions, over time)

Assessment methods should reflect workplace demands, such as literacy, and the needs of particular groups, such as:

- people with disabilities
- people from culturally and linguistically diverse backgrounds
- Aboriginal and Torres Strait Islander people
- women
- young people
- older people
- people in rural and remote locations

Assessment methods suitable for valid and reliable assessment of this competency may include, but are not limited to, a combination of 2 or more of:

- case studies
- demonstration
- observation
- questioning
- scenarios
- authenticated evidence from the workplace and/or training courses

For consistency of assessment

Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments

Range Statement

RANGE STATEMENT

The Range Statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The Range Statement also provides a focus for assessment. It relates to the unit as a whole. Text in *italics* in the Performance Criteria is explained here.

Equipment may include

- cameras
- computers
- length measurement devices
- portable scales/weighing devices
- radar
- radios
- intelligent transport technology

Action on non-compliance may include

- caution/warning
- infringement notices/sanctions/penalties
- defect notice
- offence report
- issuing directions (ie returning to statutory limits)

Unit Sector(s)

Not applicable.

Competency field Road Transport Compliance

PSPTRAN404A Conduct detailed vehicle examination

Modification History

Not applicable.

Unit Descriptor

Unit descriptor

This unit covers conducting and documenting vehicle examinations and confirming of vehicle compliance and serviceability/safety, undertaken at an authorised inspection location. It includes preparing for and conducting a detailed inspection, determining correct dimensions/configurations, recording and reviewing inspection findings, and reporting and acting on the findings.

In practice, conducting detailed vehicle examinations may overlap with other generalist or specialist public sector work activities such as promoting ethical practice and compliance with legislation, coordinating resources, undertaking research and analysis, etc.

This is a new unit of competency, added to the *Road Transport Compliance* Competency field of the Training Package in 2004.

Application of the Unit

Not applicable.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

Employability skills This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements are the essential outcomes of the unit of competency. Together, performance criteria specify the requirements for competent performance. Text in *bold italics* is explained in the Range Statement following.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare for detailed inspection	1.1 Type of <i>inspection</i> is identified 1.2 Situation is assessed with regard to personal safety and the safety of others in accordance with organisational requirements 1.3 Boundaries of the inspection are identified and confirmed with relevant personnel 1.4 Materials and <i>equipment</i> required to conduct the inspection are checked and prepared 1.5 Information is accessed and interpreted from relevant sources to enable the inspection to conform to specified standards and procedures
2. Conduct detailed inspection	2.1 <i>Vehicle inspection</i> is carried out using approved methods and equipment, taking into consideration the specifications and tolerances relative to the vehicle 2.2 Mechanical components are identified and inspected 2.3 Vehicle components are measured accurately 2.4 Occupational health and safety legislation, codes of practice, policies and procedures are observed during the examination
3. Determine correct dimensions/ configurations	3.1 Relevant guidelines are referenced when necessary 3.2 Information is interpreted and procedures are followed in accordance with guidelines
4. Record and review inspection findings	4.1 Required documentation and evidence are obtained, completed and kept in accordance with organisational policies and procedures 4.2 When appropriate, consultations with <i>stakeholders</i> are conducted to verify accuracy and validity of findings 4.3 Findings are assessed for non-compliance
5. Report and act on findings	5.1 Inspection findings are reported to <i>relevant person/s</i> in accordance with organisational policy and procedures 5.2 Supporting information and explanations are provided as required 5.3 <i>Documentation and records</i> are prepared and filed in accordance with the organisation's requirements 5.4 Issues arising from the inspection which require further action are identified, reported and acted on, in accordance with organisational policy and procedures

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the essential skills and knowledge and their level, required for this unit.

Skill requirements

Look for evidence that confirms skills in:

- using effective communication including interviewing, questioning, negotiation and non-verbal communication with a diverse range of people
- responding to diversity, including gender and disability
- undertaking analysis and observation
- working as part of a team
- using information technology for preparing findings and writing reports
- using detailed inspection methodologies, including safe work practices
- using equipment and technology
- applying public sector legislation such as occupational health and safety and environmental procedures in the context of detailed vehicle examination

Knowledge requirements

Look for evidence that confirms knowledge and understanding of:

- organisational policies and procedures
- National Road Transport Commission guidelines
- vehicle components and procedures
- legislation and regulations, including Australian Design Rules
- powers of transport inspector under jurisdictional legislation
- functions and roles of other professionals
- principles of risk management
- occupational health and safety in the context of detailed vehicle examinations

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the Unit descriptor, Performance Criteria, the Range Statement and the Assessment Guidelines for the Public Sector Training Package.

Units to be assessed together

- *Pre-requisite* units that must be achieved prior to this unit: *Nil*
- *Co-requisite* units that must be assessed with this unit: *Nil*
- *Co-assessed units* that may be assessed with this unit to increase the efficiency and realism of the assessment process include, but are not limited to:

PSPETHC401A Uphold and support the values and principles of public service

PSPGOV406B Gather and analyse information

PSPGOV408A Value diversity

PSPLEGN401A Encourage compliance with legislation in the public sector

PSPOHS401B Implement workplace safety procedures and programs

PSPREG401C Exercise regulatory powers

PSPREG402C Promote client compliance

PSPREG403B Assess compliance

PSPREG405B Act on non-compliance

Overview of evidence requirements

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms:

- the knowledge requirements of this unit
- the skill requirements of this unit
- application of the Employability Skills as they relate to this unit (see Employability Summaries in Qualifications Framework)
- detailed vehicle examinations conducted in a range of (3 or more) contexts (or occasions, over time)

Resources required to carry out assessment

These resources include:

- legislation, policy, procedures and protocols relating to detailed vehicle examinations
- case studies and workplace scenarios to capture the range of situations likely to be encountered when conducting detailed vehicle examinations

Where and how to

Valid assessment of this unit requires:

EVIDENCE GUIDE

assess evidence

- a workplace environment or one that closely resembles normal work practice and replicates the range of conditions likely to be encountered when conducting detailed vehicle examinations, including coping with difficulties, irregularities and breakdowns in routine
- detailed vehicle examinations conducted in a range of (3 or more) contexts (or occasions, over time)

Assessment methods should reflect workplace demands, such as literacy, and the needs of particular groups, such as:

- people with disabilities
- people from culturally and linguistically diverse backgrounds
- Aboriginal and Torres Strait Islander people
- women
- young people
- older people
- people in rural and remote locations

Assessment methods suitable for valid and reliable assessment of this competency may include, but are not limited to, a combination of 2 or more of:

- case studies
- demonstration
- observation
- questioning
- scenarios
- simulation or role plays
- authenticated evidence from the workplace and/or training courses

For consistency of assessment

Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments

Range Statement

RANGE STATEMENT

The Range Statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The Range Statement also provides a focus for assessment. It relates to the unit as a whole. Text in *italics* in the Performance Criteria is explained here.

Employability Skills Information

Employability skills	This unit contains employability skills.
-----------------------------	--

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<p>1. Validate weighbridge operations.</p>	<p>1.1. Weighbridge, computer and recording systems are checked for <i>operational status</i>.</p> <p>1.2. Weighbridge accuracy is validated in accordance with <i>relevant legislation, codes and regulations</i>, organisational procedures and manufacturer instructions.</p> <p>1.3. Inspection and testing records are maintained in accordance with statutory requirements, organisational policy and industry guidelines.</p> <p>1.4. <i>Faults and discrepancies in weighbridge operation</i> are identified and corrective action initiated according to organisational procedures.</p> <p>1.5. <i>Environmental factors likely to affect weighing accuracy</i> are identified and corrected.</p>
<p>2. Weigh vehicles.</p>	<p>2.1. <i>Vehicles</i> likely to exceed weighbridge capacity and dimensions are directed away from weighbridge.</p> <p>2.2. Weighbridge is correctly set to zero before commencing a weighing.</p> <p>2.3. Vehicles are directed onto weighbridge platform and weight is determined in accordance with legislative requirements and <i>organisational procedures</i>.</p> <p>2.4. Vehicle weight, vehicle registration and load description are entered into organisational recording system.</p> <p>2.5. <i>Areas of dispute</i> are resolved or forwarded for further action according to organisational procedures.</p>
<p>3. Conduct axle or end-and-end measurements.</p>	<p>3.1. Assess suitability of weighbridge and approach for axle or end-and-end measurements.</p> <p>3.2. Axle or end-and-end measurements are completed in accordance with statutory requirements.</p>
<p>4. Complete weighbridge operations.</p>	<p>4.1. Complete and issue weighbridge ticket in accordance with statutory requirements and organisational procedures.</p> <p>4.2. Incomplete weighbridge tickets are cancelled in accordance with statutory requirements.</p> <p>4.3. Weighbridge systems, including equipment, computer and recording arrangements, are secured and made ready for next shift.</p> <p>4.4. Record of operations is maintained and filed</p>

ELEMENT	PERFORMANCE CRITERIA
	according to workplace procedures and statutory requirements.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- communication skills to communicate effectively with others when conducting weighbridge operations
- literacy skills to:
 - read and interpret operational instructions, procedures and information relating to weighbridge operations
 - complete documentation
- numeracy skills to undertake required measurements
- organisational and planning skills to:
 - follow operational instructions and prioritise work
 - set up and maintain weighbridge equipment
 - identify, select and use weighbridge equipment
 - monitor performance of weighbridge equipment
- technology skills to operate electronic communication equipment to required protocol
- teamwork skills to work collaboratively with others when conducting weighbridge operations
- interpersonal skills to adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others
- initiative and enterprise skills to apply precautions and required action to minimise, control or eliminate hazards that may exist during the conduct of weighbridge operations
- planning and organising skills to monitor work activities in terms of planned schedule
- problem-solving skills to:
 - modify activities depending on differing operational contingencies, risk situations and environments
 - operate and adapt to differences in equipment according to standard operating procedures
 - promptly report or rectify identified problems, errors or malfunctions that may occur when conducting weighbridge operations
- self-management skills to:
 - work systematically with required attention to detail without injury to self or others, or damage to goods or equipment
 - select and use required personal protective equipment according to industry and OHS standards

REQUIRED SKILLS AND KNOWLEDGE

Required knowledge

- regulations relevant to the operation of weighbridges, including national measurement legislation
- relevant OHS and environmental protection procedures and guidelines
- workplace policies and procedures for weighbridge operations
- problems that may occur when conducting weighbridge operations and appropriate action that can be taken to resolve the problems
- equipment applications, capacities, configurations, safety hazards and control mechanisms
- records and documentation requirements for weighbridge operations
- classification procedures
- despatch procedures
- calculation method in both metric and imperial systems for determining net mass, and end-and-end and axle measurements of a vehicle
- correct weighing procedures, including statutory and workplace requirements
- emergency response procedures
- site layout
- procedures for completing axle or end-and-end measurements

Evidence Guide

EVIDENCE GUIDE	
<p>The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
Overview of assessment	<p>Competency must be demonstrated in the ability to consistently maintain and operate a weighbridge in accordance with legislative requirements.</p>
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>Assessment must confirm the ability to:</p> <ul style="list-style-type: none"> • prepare a weighbridge for operation • weigh loaded and unloaded vehicles • determine the net weight from gross and tare measurements • complete axle and end-and-end measurements • complete statutory documents.
Context of and specific resources for assessment	<p>This unit of competency is to be assessed in the workplace or a simulated workplace environment.</p> <p>Access may be required to:</p> <ul style="list-style-type: none"> • weighbridge • computer and relevant software and/or organisation information management system • public weighbridge licence conditions • national measurement legislation.
Method of assessment	<p>The following assessment methods are suggested:</p> <ul style="list-style-type: none"> • questions to assess understanding of relevant procedures, trader obligations and remedial actions • review of weighbridge tickets prepared by the candidate • feedback from supervisors and peers regarding the candidate's ability to conduct weighbridge operations in accordance with legislative and organisational procedures. <p>In all cases, practical assessment should be supported by questions to assess underpinning knowledge and those aspects of competency which are difficult to assess directly. Questioning techniques should suit the language and literacy levels of the candidate.</p>
Guidance information for assessment	<p>Industry representatives have provided case studies to illustrate the practical application of this unit of competency and to show its relevance in a workplace setting. These can be sourced from the National Measurement Institute.</p>

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<p><i>Operational status</i> may include:</p>	<ul style="list-style-type: none"> • weighbridge indicator being on zero with no load on the platform • platform being clean • area under platform being clean and without accumulation of water or debris • remote indicator, summing indicator and printer indications coinciding with primary indicator(s).
<p><i>Relevant legislation, codes and regulations</i> may include:</p>	<ul style="list-style-type: none"> • national measurement legislation • relevant codes and regulations pertaining to weighbridge operations • traffic Acts and road transport mass and loading regulations • Australian Dangerous Goods (ADG) codes and regulations pertaining to storing and handling dangerous goods and hazardous materials • relevant state or territory OHS legislation • relevant state or territory environmental protection legislation • relevant Australian and international standards and certification requirements • workplace relations regulations, including anti-discrimination, equal employment opportunity and affirmative action legislation • workers compensation regulations.
<p><i>Faults and discrepancies in weighbridge operation</i> may include:</p>	<ul style="list-style-type: none"> • weighbridge cannot be zeroed with no load on the load receptor • remote indicator, summing indicator or printing device continues to indicate a weight when the primary indicator is outside its weighing range • indications varying, depending on where the vehicle is placed on the platform • indications on the weighbridge not corresponding to another weighbridge in close proximity when weighing the same vehicle.

RANGE STATEMENT	
<i>Environmental factors likely to affect weighing accuracy</i> may include:	<ul style="list-style-type: none"> • wind, rain and snow • debris from vehicles being deposited on the platform when moving onto the weighbridge • application of vehicle brakes or air suspension when conducting axle and end-and-end measurements • electrical or radio interference • movement of external fixtures against weighbridge platform.
<i>Vehicles</i> may include:	<ul style="list-style-type: none"> • trucks • cars • articulated road vehicles • heavy machinery • trailers • wagons.
<i>Organisational procedures</i> may include:	<ul style="list-style-type: none"> • weighbridge operation manuals • manufacturer specifications and instructions for the operation of weighbridge equipment • Australian and international standards, criteria and certification requirements • codes of practice, including the National Standards for Manual Handling and the industry safety code • relevant regulations, including the ADG code • OHS procedures • quality assurance procedures.
<i>Areas of dispute</i> may include:	<ul style="list-style-type: none"> • overloaded vehicle • over-dimension vehicle • uncoupling trailers, etc. to complete weighing • end-and-end measurements • axle measurements • refusal to issue a mass ticket when legislative requirements are not met.

PSPTRAN501A Provide specialist vehicle technical advice

Modification History

Not applicable.

Unit Descriptor

Unit descriptor

This unit covers detailed technical inspections and specialist vehicle technical advice for situations that may include court proceedings, coronial inquiries, police and other agencies. It includes conducting a detailed technical inspection, interpreting the inspection data to inform an opinion, conducting technical research on inspection data, and formulating and providing an expert opinion on the results.

In practice, providing specialist vehicle technical advice may overlap with other generalist or specialist public sector work activities such as promoting ethical practice and compliance with legislation, coordinating resources, undertaking research and analysis, etc.

This is a new unit of competency, added to the *Road Transport Compliance* Competency field of the Training Package in 2004.

Application of the Unit

Not applicable.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

Employability skills This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements are the essential outcomes of the unit of competency. Together, performance criteria specify the requirements for competent performance. Text in *bold italics* is explained in the Range Statement following.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Conduct a detailed vehicle inspection	<p>1.1 Suitable location for detailed <i>vehicle</i> examination is confirmed and other relevant personnel are notified</p> <p>1.2 Materials and <i>equipment</i> required to conduct the vehicle <i>examination</i> are prepared</p> <p>1.3 Other relevant motor vehicle documentation is accessed and reviewed to establish key information on the vehicle under examination</p> <p>1.4 Vehicle identity is verified</p> <p>1.5 All relevant vehicle structure and components are examined and tested as necessary</p> <p>1.6 Occupational health and safety requirements applicable to the examination are applied</p> <p>1.7 Vehicle irregularities are recorded in accordance with legislative requirements and standard procedures</p>
2. Interpret examination data	<p>2.1 All relevant data/ information is gathered, recorded and confirmed</p> <p>2.2 All relevant information is interpreted and analysed to assist in the identification of the issue/s</p>
3. Undertake technical research	<p>3.1 Relevant standards and specifications are identified and accessed</p> <p>3.2 Research is undertaken on all the information gathered relevant to the examination</p> <p>3.3 Advice is sought to clarify any unclear findings in accordance with organisational policy and procedures</p> <p>3.4 Research findings are reported and presented in appropriate language, style and format to suit the intended audience</p> <p>3.5 Supporting information and explanations are provided as required</p>
4. Form and provide an opinion	<p>4.1 Options related to the provision of advice are identified and evaluated</p> <p>4.2 An opinion is formed that is logical, reasoned and defensible, and documented in accordance with legislation, policy and procedures</p> <p>4.3 When appropriate, opinions on actions to be taken are offered</p> <p>4.4 A comprehensive report supporting the opinions is provided</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the essential skills and knowledge and their level, required for this unit.

Skill requirements

Look for evidence that confirms skills in:

- assessing vehicle standards
- using diagnostic techniques
- researching, interpreting and analysing information and data
- writing complex reports
- using personal computer, Internet, word processing and databases for research, analysis and interpretation
- using effective communication including presentation, and listening skills
- responding to diversity, including gender and disability
- tailoring information to suit the needs of diverse audiences
- applying public sector legislation such as occupational health and safety and environmental procedures in the context of providing specialist vehicle technical advice

Knowledge requirements

Look for evidence that confirms knowledge and understanding of:

- specialist technical area
- State/Territory and Commonwealth legislation and regulations
- Australian Design Rules (ADRs), Australian Vehicle Standards Rules (AVSR), modification codes, vehicle standards, manufacturers' standards
- chain of evidence provisions
- codes of practice
- written off vehicle register (WOVR)
- occupational health and safety relating to the provision of specialist vehicle technical advice
- contingency management - process for unplanned events
- court protocols

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the Unit descriptor, Performance Criteria, the Range Statement and the Assessment Guidelines for the Public Sector Training Package.

Units to be assessed together

- *Pre-requisite* units that must be achieved prior to this unit: *Nil*
- *Co-requisite* units that must be assessed with this unit: *Nil*
- *Co-assessed units* that may be assessed with this unit to increase the efficiency and realism of the assessment process include, but are not limited to:

PSPETHC501B Promote the values and ethos of public service

PSPGOV504B Undertake research and analysis

PSPGOV507A Undertake negotiations

PSPGOV508A Manage conflict

PSPLEGN501B Promote compliance with legislation in the public sector

PSPOHS501A Monitor and maintain workplace safety

Overview of evidence requirements

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms:

- the knowledge requirements of this unit
- the skill requirements of this unit
- application of the Employability Skills as they relate to this unit (see Employability Summaries in Qualifications Framework)
- provision of specialist vehicle technical advice in a range of (3 or more) contexts (or occasions, over time)

Resources required to carry out assessment

These resources include:

- legislation, policy, procedures and protocols relating to specialist vehicle technical advice
- case studies and workplace scenarios to capture the range of situations likely to be encountered when providing specialist vehicle technical advice

Where and how to assess evidence

Valid assessment of this unit requires:

- a workplace environment or one that closely resembles normal work practice and replicates the range of conditions likely to be encountered when providing specialist vehicle technical advice, including coping with difficulties, irregularities and breakdowns in routine
- provision of specialist vehicle technical advice in a range of (3

EVIDENCE GUIDE

or more) contexts (or occasions, over time)

Assessment methods should reflect workplace demands, such as literacy, and the needs of particular groups, such as:

- people with disabilities
- people from culturally and linguistically diverse backgrounds
- Aboriginal and Torres Strait Islander people
- women
- young people
- older people
- people in rural and remote locations

Assessment methods suitable for valid and reliable assessment of this competency may include, but are not limited to, a combination of 2 or more of:

- case studies
- questioning
- scenarios
- simulation or role plays
- authenticated evidence from the workplace and/or training courses

For consistency of assessment

Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments

Range Statement

RANGE STATEMENT

The Range Statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The Range Statement also provides a focus for assessment. It relates to the unit as a whole. Text in *italics* in the Performance Criteria is explained here.

Competency field Road Transport Compliance

PSPWPI501B Evaluate workplace legislative compliance

Modification History

Not applicable.

Unit Descriptor

Unit descriptor

This unit covers the competency to determine compliance, breaches and risks to workers or the work environment. This includes acting to minimise risks to workers, the public and/or the work environment and to record non-compliance. It includes identifying issues relevant to the organisation's jurisdiction, assessing workplaces for non-compliance, advising on control measures and implementing compliance activities.

In practice, evaluating workplace legislative compliance may overlap with other generalist or specialist public sector work activities such as acting ethically, complying with legislation, developing client service, providing leadership, conducting evaluations, etc.

This unit replaces and is equivalent to PSPWPI501A Evaluate workplace legislative compliance.

Application of the Unit

Not applicable.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

Employability skills This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements are the essential outcomes of the unit of competency. Together, performance criteria specify the requirements for competent performance. Text in *bold italics* is explained in the Range Statement following.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Identify issues relevant to the organisation's jurisdiction	1.1 Jurisdictional boundaries and powers are confirmed
	1.2 Identification of <i>defined areas</i> is carried out in accordance with organisational requirements
	1.3 <i>Issues</i> relating to workers, work environment and/or public are identified
2. Assess workplace for non-compliance	2.1 Issues relating to workers, public and/or work environment are assessed and prioritised against legislative requirements and in line with the organisation's policies and procedures
	2.2 Non-compliance/possible breaches are identified, assessed and recorded in accordance with legislative and organisational requirements
	2.3 Any issues beyond own level of competence are identified and referred to the <i>appropriate sources</i> for follow-up action
3. Advise on control measures	3.1 A range of <i>control measures</i> is identified in accordance with organisational policies and procedures having regard to current standards
	3.2 A practicable solution to achieve compliance in accordance with legislative requirements is determined
4. Implement compliance activity	4.1 <i>Compliance activity</i> is implemented in accordance with organisational policy and procedures
	4.2 Effectiveness of selected compliance activity is evaluated and reported/documented in accordance with organisational policy and procedures

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the essential skills and knowledge and their level, required for this unit.

Skill requirements

Look for evidence that confirms skills in:

- engaging in communication to provide advice on legislation relevant to compliance, using complex exchanges of oral information
- interpreting, analysing and explaining complex and formal documents such as legislation and its application to clients' situations
- using mediation/negotiation
- undertaking conflict/dispute resolution
- using analysis to interpret test results
- using equipment and technology

Knowledge requirements

Look for evidence that confirms knowledge and understanding of:

- principal legislation such as occupational health and safety, workers compensation, injury management and workplace relations
- performance standard in the legislation
- impact of hazards/issues on persons
- strengths and weaknesses of possible control measures and the reasons for choosing practicable solution
- industry practices where applicable, such as awards and enterprise agreements
- organisational policies and procedures related to compliance activities
- principles of risk management, including hierarchy of controls
- technical features associated with hazards and potential risks as these relate to jurisdictional issues

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the Unit descriptor, Performance Criteria, the Range Statement and the Assessment Guidelines for the Public Sector Training Package.

Units to be assessed together

- *Pre-requisite* units that must be achieved prior to this unit: *Nil*
- *Co-requisite* units that must be assessed with this unit: *Nil*
- *Co-assessed units* that may be assessed with this unit to increase the efficiency and realism of the assessment process include, but are not limited to:

PSPETHC501B Promote the values and ethos of public service

PSPGOV505A Promote diversity

PSPGOV507A Undertake negotiations

PSPGOV508A Manage conflict

PSPGOV509A Conduct evaluations

PSPGOV511A Provide leadership

PSPGOV512A Use complex workplace communication strategies

PSPGOV514A Facilitate change

PSPGOV515A Develop and use political nous

PSPGOV516A Develop and use emotional intelligence

PSPGOV517A Coordinate risk management

PSPGOV518A Benchmark performance

PSPOHS501A Monitor and maintain workplace safety

PSPWPI502B Facilitate improvement in workplace legislative performance

Overview of evidence requirements

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms:

- the knowledge requirements of this unit
- the skill requirements of this unit
- application of the Employability Skills as they relate to this unit (see Employability Summaries in Qualifications Framework)
- evaluation of workplace legislative compliance in a range of (3 or more) contexts (or occasions, over time)

Resources required to carry out assessment

These resources include:

- legislation, policy, procedures and protocols relating to

EVIDENCE GUIDE

Where and how to assess evidence

workplace legislative compliance

- case studies and workplace scenarios to capture the range of situations likely to be encountered when evaluating workplace legislative compliance

Valid assessment of this unit requires:

- a workplace environment or one that closely resembles normal work practice and replicates the range of conditions likely to be encountered when evaluating workplace legislative compliance, including coping with difficulties, irregularities and breakdowns in routine
- evaluation of workplace legislative compliance in a range of (3 or more) contexts (or occasions, over time)

Assessment methods should reflect workplace demands, such as literacy, and the needs of particular groups, such as:

- people with disabilities
- people from culturally and linguistically diverse backgrounds
- Aboriginal and Torres Strait Islander people
- women
- young people
- older people
- people in rural and remote locations

Assessment methods suitable for valid and reliable assessment of this competency may include, but are not limited to, a combination of 2 or more of:

- case studies
- portfolios
- questioning
- scenarios
- simulation or role plays
- authenticated evidence from the workplace and/or training courses

For consistency of assessment

Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments

Range Statement

RANGE STATEMENT

The Range Statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The Range Statement also provides a focus for assessment. It relates to the unit as a whole. Text in *italics* in the Performance Criteria is explained here.

Defined areas may include

- construction sites
- factories
- offices
- rural industries
- mines and quarries
- any other area as defined under the organisation's legislation

Issues may include

- plant
- manual handling/ergonomics
- noise
- hazardous substances
- dangerous goods
- workplace relations
- workers compensation
- injury management/rehabilitation
- work environment such as heat, confined spaces
- hazardous processes and work systems
- other work environment issues defined by the organisation's legislation
- policies and procedures
- electrical safety
- occupational health
- occupational health and safety management systems

Appropriate sources to refer to may include

- consultants
- other inspectors/officers
- technical experts
- manufacturers, suppliers and designers
- technical standards
- scientific standards
- other jurisdictions
- other organisations
- supervisors/managers

Control measures for occupational health and

- elimination
- substitution

RANGE STATEMENT

safety may include

- isolation
- engineering controls
- administrative controls
- personal protective equipment

Control measures for workplace relations may include

- assessment
- identification
- application
- enforcement

Compliance activity may include

- provision of advice/directions/instructions
- issue of notices such as improvement, prohibition, infringement/penalty, seizure notices
- initiation of prosecution proceedings

Unit Descriptor

Unit descriptor

This unit covers the competency to facilitate the introduction, management and evaluation of change in the work environment to improve workplace occupational health and safety and/or workers compensation and/or injury management and/or workplace relations. It includes facilitating the development and implementation of workplace improvement strategies, and reviewing the effectiveness of workplace improvements.

In practice, facilitating improvement in workplace legislative performance may overlap with other generalist or specialist public sector work activities such as acting ethically, complying with legislation, developing client service, providing leadership, undertaking research, conducting evaluations, etc.

This unit replaces and is equivalent to PSPWPI502A Facilitate improvement in workplace legislative performance.

Application of the Unit

Not applicable.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Employability Skills Information

Employability skills This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements are the essential outcomes of the unit of competency. Together, performance criteria specify the requirements for competent performance. Text in *bold italics* is explained in the Range Statement following.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Facilitate the development of workplace improvement strategies	1.1 <i>Stakeholders</i> are identified and consulted when facilitating workplace improvements
	1.2 <i>Future trends</i> and <i>stakeholder needs</i> are identified consistent with the organisation's priorities
	1.3 <i>Processes</i> for improving <i>workplace legislative compliance</i> are facilitated in collaboration with stakeholders
2. Facilitate implementation of workplace improvements	2.1 Advice is provided to stakeholders on the requirements for effective workplace improvements in line with organisational policy and procedures
	2.2 Guidance and support are provided to assist implementation of workplace improvements in accordance with organisational policy and procedures
3. Review effectiveness of workplace improvements	3.1 The <i>mechanisms</i> for monitoring workplace improvements are evaluated with stakeholders
	3.2 The outcomes of monitoring and evaluation are communicated to internal and/or external stakeholders
	3.3 Impact of workplace improvement strategies on stakeholders is monitored and evaluated and results are reflected in future improvement activities

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the essential skills and knowledge and their level, required for this unit.

Skill requirements

Look for evidence that confirms skills in:

- applying risk management principles
- undertaking research and analysis
- communicating and influencing in order to facilitate change in the workplace
- coaching
- problem solving
- responding to diversity, including gender and disability
- reading and explaining complex and formal documents, such as legislation and their application to clients' situations
- providing advice and participating in discussions involving complex exchanges of oral information

Knowledge requirements

Look for evidence that confirms knowledge and understanding of:

- occupational health and safety and/or workers compensation and/or injury management and/or workplace relations legislation, policies and requirements
- risk management principles
- change management processes

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the Unit descriptor, Performance Criteria, the Range Statement and the Assessment Guidelines for the Public Sector Training Package.

Units to be assessed together

- *Pre-requisite* units that must be achieved prior to this unit: *Nil*
- *Co-requisite* units that must be assessed with this unit: *Nil*
- *Co-assessed units* that may be assessed with this unit to increase the efficiency and realism of the assessment process include, but are not limited to:

PSPETHC501B Promote the values and ethos of public service

PSPGOV502B Develop client services

PSPGOV504B Undertake research and analysis

PSPGOV507A Undertake negotiations

PSPGOV508A Manage conflict

PSPGOV509A Conduct evaluations

PSPGOV511A Provide leadership

PSPGOV512A Use complex workplace communication strategies

PSPGOV514A Facilitate change

PSPGOV516A Develop and use emotional intelligence

PSPGOV517A Coordinate risk management

PSPGOV518A Benchmark performance

PSPWPI501B Evaluate workplace legislative compliance

Overview of evidence requirements

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms:

- the knowledge requirements of this unit
- the skill requirements of this unit
- application of the Employability Skills as they relate to this unit (see Employability Summaries in Qualifications Framework)
- facilitation of improvement in workplace legislative performance in a range of (3 or more) contexts (or occasions, over time)

Resources required to carry out assessment

These resources include:

- legislation, policy, procedures and protocols relating to workplace legislative performance
- case studies and workplace scenarios to capture the range of

EVIDENCE GUIDE

situations likely to be encountered when facilitating improvement in workplace legislative performance

Where and how to assess evidence

Valid assessment of this unit requires:

- a workplace environment or one that closely resembles normal work practice and replicates the range of conditions likely to be encountered when facilitating improvement in workplace legislative performance, including coping with difficulties, irregularities and breakdowns in routine
- facilitation of improvement in workplace legislative performance in a range of (3 or more) contexts (or occasions, over time)

Assessment methods should reflect workplace demands, such as literacy, and the needs of particular groups, such as:

- people with disabilities
- people from culturally and linguistically diverse backgrounds
- Aboriginal and Torres Strait Islander people
- women
- young people
- older people
- people in rural and remote locations

Assessment methods suitable for valid and reliable assessment of this competency may include, but are not limited to, a combination of 2 or more of:

- case studies
- portfolios
- questioning
- scenarios
- simulation or role plays
- authenticated evidence from the workplace and/or training courses

For consistency of assessment

Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments

Range Statement

RANGE STATEMENT

The Range Statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The Range Statement also provides a focus for assessment. It relates to the unit as a whole. Text in *italics* in the Performance Criteria is explained here.

Stakeholders may include

- external:
- employers
- employees
- government
- contractors
- manufacturers
- installers, suppliers and designers, importers
- erectors
- owner/occupiers, employer associations
- employee associations
- person in control of site
- community
- insurers
- internal:
- managers
- specialist staff
- supervisors
- other inspectors/officers
- support staff

Future trends may be influenced by

- implementation of new work practices
- government initiatives
- budgetary reform
- organisational restructure
- technology transfer to the workplace
- emerging issues
- research and development changes
- legislative changes, staffing changes
- review of workplace performance relating to occupational health and safety and/or workers compensation and/or injury management and/or workplace relations
- changes in the workplace

Stakeholder needs may include

- management of specific workplace risks
- meeting business goals and objectives

RANGE STATEMENT

- Processes for improvement may include*
- compliance with legislative requirements
 - education and information
 - enforcement
 - advice
 - encouragement and support
 - practicable solutions
- Workplace legislative compliance may include*
- occupational health and safety and/or workers compensation and/or injury management and/or workplace relations performance
- Mechanisms for monitoring workplace improvements may include*
- performance indicators
 - productivity effectiveness measures
 - follow-up visits
 - level of compliance with notices
 - government statistics
 - perception standards
 - industry feedback
 - progress reports

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Conduct initial assessment of situation.	1.1. <i>Type of investigation or situation</i> is identified. 1.2. Situations are <i>assessed</i> with regard to personal safety and the safety of others, and <i>safeguards</i> are put in place. 1.3. <i>Persons are contacted</i> according to organisational policies and procedures. 1.4. Integrity of situation is established and maintained according to organisational policy and procedures.
2. Initiate and conduct investigations.	2.1. Directions/instructions are issued to persons involved according to organisational policy and procedures. 2.2. <i>Resources</i> required for the investigation are identified and accessed. 2.3. Investigations are conducted according to organisational policy and procedures.
3. Examine the situation.	3.1. <i>Details of the situation</i> and all those involved in possible breach are recorded in line with organisational policies and procedures. 3.2. Potential <i>evidence</i> is located, <i>collected, packaged, recorded</i> , labelled and stored to ensure <i>preservation of integrity of evidence</i> and for further examination in line with the rules of evidence and organisational policy and procedures. 3.3. If no breach has occurred or no action is to be taken, the reasons and justification are documented according to organisational policy and procedures. 3.4. If breach is confirmed, appropriate and timely action is recommended within the officer's discretion according to legislation and organisational policy and procedures. 3.5. Record of evidence is maintained in accordance with legislative requirements and organisational policy and procedures.
4. Identify potential witnesses and record initial statements.	4.1. Potential witnesses are identified and their <i>details</i> recorded. 4.2. Statements are taken and recorded according to organisational policies and procedures.
5. Assess investigation material and gathered	5.1. Information and evidence gathered are reviewed against legislation and other relevant material according to organisational policies and procedures.

ELEMENT	PERFORMANCE CRITERIA
information.	<p>5.2.Information and evidence gathered are evaluated and weighted for relevance and strength of proof.</p> <p>5.3.Further proofs are identified, prioritised and scheduled for action.</p> <p>5.4.Further evidence is obtained when required.</p>
6. Conduct formal interviews.	<p>6.1.Interview is conducted according to legal requirements and organisational policy and procedures.</p> <p>6.2.Information is reviewed and clarified to ensure its relevance and sufficiency prior to concluding the interview.</p> <p>6.3.Record of interview is completed that meets legal and organisational requirements.</p>
7. Complete investigation report.	<p>7.1.Report is compiled according to organisational policies and procedures.</p> <p>7.2.Report is forwarded to appropriate personnel for review and action according to organisational policies and procedures.</p> <p>7.3.Additional information and evidence identified from review are gathered and compiled in report.</p> <p>7.4.Final report is forwarded through <i>appropriate channels</i> for processing.</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- literacy skills to:
 - undertake legal research
 - record statements
- analytical skills to evaluate information in investigating breaches
- self-management skills to:
 - apply principles of natural justice and procedural fairness
 - apply legislative requirements and organisational policies and procedures in all investigations
 - apply risk management principles to investigative procedures, including personal safety
- communication skills to use a range of communication methods and strategies, including:
 - negotiation
 - dealing with conflicting information
 - dealing with conflict
 - interviewing and questioning
- observation and analysis skills to ensure due consideration of information and evidence
- planning and organising skills to ensure the coordinated and thorough investigation of possible breaches of workplace legislation
- decision-making to reflect deliberation of the evidence and the risk assessment

Required knowledge

- federal and state workplace legislative framework applying to workplace inspections, including legislation relating to OHS and workplace relations
- risk management principles relating to personal and workplace safety
- common law principles applying to inspection of workplaces
- powers of workplace inspectors under jurisdictional legislation
- functions and roles of other professionals and experts who may be called in to advise on possible breaches or to act as witnesses
- organisational investigation procedures
- rules of evidence and evidence management

Evidence Guide

EVIDENCE GUIDE	
<p>The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
Overview of assessment	
<p>Critical aspects for assessment and evidence required to demonstrate competency in this unit</p>	<p>Assessment must confirm the ability to:</p> <ul style="list-style-type: none"> • undertake comprehensive planning of investigative responses • conduct detailed examination of potential or reported breaches • prepare resources required to conduct investigations • carry out a range of information-gathering activities to substantiate recommendations • prepare reports on a range of breaches. <p>Consistency in performance</p> <p>Competency should be demonstrated by undertaking a range of relevant investigations.</p>
<p>Context of and specific resources for assessment</p>	<p>Assessment must comply with:</p> <ul style="list-style-type: none"> • organisational investigation-management procedures and relevant health and safety procedures • applicable legislation, regulations and codes. <p>Access may be required to:</p> <ul style="list-style-type: none"> • a workplace environment or one that closely resembles normal work practice and replicates the range of conditions likely to be encountered when investigating possible breaches of workplace legislation, including coping with difficulties, irregularities and breakdowns in routine • legislation, policy, procedures and protocols relating to the investigation of possible breaches of workplace legislation • case studies and workplace scenarios to capture the range of situations likely to be encountered when investigating possible breaches of workplace legislation.
<p>Guidance information for assessment</p>	<p>The following assessment methods are suggested:</p> <ul style="list-style-type: none"> • oral questioning about the legislative framework, risk management principles, common law principles, powers of inspectors under jurisdictional legislation, functions and roles of other professionals and experts, legislative requirements, organisational investigations procedures, rules of evidence and evidence management • observation of the candidate undertaking a variety of assigned

EVIDENCE GUIDE

investigation tasks in a workplace environment or one that closely resembles normal work practice

- feedback from peers and/or supervisor that the candidate consistently applies relevant procedures
- documentary evidence of a range of previous and current investigations with, where a team has been involved, identification of the specific contribution of the individual being assessed.

In all cases, practical assessment should be supported by questions to assess underpinning knowledge and those aspects of competency that are difficult to assess directly. Questioning techniques should suit the language and literacy levels of the candidate.

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:

- PSPETHC501B Promote the values and ethos of public service
- PSPGOV502B Develop client services
- PSPGOV503B Coordinate resource allocation and usage
- PSPGOV504B Undertake research and analysis
- PSPGOV512A Use complex workplace communication strategies
- PSPGOV517A Coordinate risk management
- PSPWPI501B Evaluate workplace legislative compliance.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Type of investigation or situation may include:

- non-compliance with legislation
- workplace fatality
- injury or incident
- dangerous occurrence
- workplace relations issues
- workers compensation issues
- complaints
- public safety
- workplace illnesses
- change to targeted campaigns
- safety of workers and public.

Assessment of matters affecting incident situation and investigation may include:

- preservation of life or property
- prevailing weather, which may require additional resources to preserve and protect incident situation
- climatic conditions
- human interference
- language barriers
- right of entry and access
- minimisation of business disruption
- dangerous or unpleasant conditions, such as:
 - hazards
 - injured or deceased persons
- stressed or traumatised individuals
- cultural issues
- union issues.

Safeguards may include:

- clear brief as to who has access to situations
- physical barriers
- entry limited to essential personnel
- delegation of authority to control entry
- record of all persons who enter/leave the situation and reasons

	<ul style="list-style-type: none"> • personal protective equipment • following procedures to work in pairs • trauma counselling.
<i>Persons contacted</i> may include:	<ul style="list-style-type: none"> • technical and scientific experts • legal experts • witnesses • victims • union representatives • workplace relations officers • employers and employees • police and emergency services • human resources staff • media • coroners • employee representatives • OHS committee • company representatives • management • health and safety representatives • health and safety officers • relevant government departments.
<i>Resources</i> may include:	<ul style="list-style-type: none"> • technical and scientific experts • experienced investigators • research database • legal information • legal request • subpoena • advice sheets • legislative framework • equipment, such as: <ul style="list-style-type: none"> • camera • sample kits • other organisations.
<i>Details of the situation</i> may include:	<ul style="list-style-type: none"> • time, date and location • jurisdiction • sequence of events • possible causes • people involved • property involved • victims • witnesses

	<ul style="list-style-type: none"> • damage, including damage to property • injury • historical information • injury to persons • physical details of situation • evidence • organisation personnel and non-employees involved • other organisations involved • current status of investigation • action taken to date • adjoining properties and activities.
<i>Evidence</i> may be:	<ul style="list-style-type: none"> • physical, such as: <ul style="list-style-type: none"> • plant • containers • fibres • samples • tool marks • chemical and biological • identifying numbers • record books • dangerous goods and hazardous substances • documentary, such as: <ul style="list-style-type: none"> • witness statements • employer or employee documentation • safety management records • workplace agreements • employment contracts • company records, including: <ul style="list-style-type: none"> • attendance records • maintenance records • time and wage records • training records <ul style="list-style-type: none"> • industrial instruments • union documents • government records • expert reports • work method statements • standard operating procedures • log books • contracts

	<ul style="list-style-type: none"> • policy documents • workers compensation claims information • register of injuries • first aid treatment book.
Methods of evidence <i>collection</i> may include:	<ul style="list-style-type: none"> • recording interviews • formal legal request for documentation • subpoena • photographing/videoing • photocopying documentation • requisitioning documentation • using items in sampling kit • appropriate environmental monitoring.
Methods of <i>packaging</i> evidence may include:	<ul style="list-style-type: none"> • metal and plastic containers • plastic bags • paper bags • glass vials • items in sample kit.
Evidence may be <i>recorded</i> by:	<ul style="list-style-type: none"> • receipts • photocopying and certifying 'true copy' • photography • audio and visual recording • using notebook • identifying samples • seizing property logs.
<i>Preservation of integrity of evidence</i> may involve:	<ul style="list-style-type: none"> • controlling site access and egress • covering evidence • recording chain of evidence handling • removing evidence to ensure its protection.
Relevant <i>details</i> from potential witnesses include:	<ul style="list-style-type: none"> • name • age • contact details • roles and responsibilities • qualifications • details of organisation's operating procedures • workplace and training practices • information about the situation.
<i>Appropriate channels</i> may include:	<ul style="list-style-type: none"> • Coroner's Court • other relevant state or federal court or tribunal • special investigation units • arbitration • state or territory Industrial Relations Commission

	<ul style="list-style-type: none"> • departments of public prosecution • internal review committees/units and management • legal units • Crown Law • prosecuting authorities.

PSPWPI601B Improve compliance through industry partnerships

Modification History

Not applicable.

Unit Descriptor

Unit descriptor

This unit covers the competency to establish and maintain effective industry partnerships to improve workplace occupational health and safety and/or workers compensation and/or injury management and/or workplace relations performance, achieve legislative compliance and educate and assist stakeholders to improve workplaces. It includes identifying industry partners, undertaking partnership activities, and monitoring and reviewing partnering activities.

In practice, improving compliance through industry partnerships may overlap with other generalist or specialist public sector work activities such as acting ethically, complying with legislation, applying government systems, managing change, managing diversity, etc.

This unit replaces and is equivalent to PSPWPI601A Improve compliance through industry partnerships.

Application of the Unit

Employability Skills Information

Employability skills This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements are the essential outcomes of the unit of competency. Together, performance criteria specify the requirements for competent performance. Text in *bold italics* is explained in the Range Statement following.

Elements and Performance Criteria

ELEMENT

PERFORMANCE CRITERIA

1. Identify industry partners

- 1.1 Options for industry partnerships are evaluated in terms of likely effectiveness, and *potential partners* are determined in accordance with organisational policy and procedures
- 1.2 Communication is established with partner/s to explore viability of partnership
- 1.3 Nature and duration of partnership is negotiated and established
- 1.4 Respective *roles and activities of partnership* are defined and agreed upon within organisational guidelines

2. Undertake partnership activities

- 2.1 Plan for cooperative partnering is developed and agreed
- 2.2 *Options and specific proposals* for improving performance in *workplace legislative compliance* are developed and incorporated
- 2.3 Options/proposals are implemented in accordance with partnering plan and organisational guidelines

3. Monitor and review partnering activities

- 3.1 Effectiveness of partnering activities is evaluated
- 3.2 Evaluation results are used to modify outcomes of joint activities
- 3.3 Value and effectiveness and outcomes of partnering arrangements are communicated to *internal* and *external* clients

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the essential skills and knowledge and their level, required for this unit.

Skill requirements

Look for evidence that confirms skills in:

- applying legislative requirements and organisational policies and procedures in all investigations
- applying risk management principles
- using a range of communication methods and strategies, including negotiation, dealing with conflicting information
- applying observation and analysis
- engaging in team work
- planning and organising
- interviewing and questioning
- recording statements

Knowledge requirements

Look for evidence that confirms knowledge and understanding of:

- risk management principles
- powers of inspectors under jurisdictional legislation
- functions and roles of other professionals and experts
- legislative requirements
- organisational investigations procedures

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the Unit descriptor, Performance Criteria, the Range Statement and the Assessment Guidelines for the Public Sector Training Package.

Units to be assessed together

- *Pre-requisite* units that must be achieved prior to this unit: *Nil*
- *Co-requisite* units that must be assessed with this unit: *Nil*
- *Co-assessed units* that may be assessed with this unit to increase the efficiency and realism of the assessment process include, but are not limited to:

PSPETHC601B Maintain and enhance confidence in public service

PSPGOV602B Establish and maintain strategic networks

PSPGOV604A Foster leadership and innovation

PSPGOV605A Persuade and influence opinion

PSPMNGT604B Manage change

PSPMNGT608B Manage risk

PSPMNGT609B Formulate business strategies

PSPMNGT613A Develop partnering arrangements

PSPWPI604B Represent and promote the organisation

Overview of evidence requirements

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms:

- the knowledge requirements of this unit
- the skill requirements of this unit
- application of the Employability Skills as they relate to this unit (see Employability Summaries in Qualifications Framework)
- development of industry partnerships to improve compliance in a range of (3 or more) contexts (or occasions, over time)

Resources required to carry out assessment

These resources include:

- legislation, policy, procedures and protocols relating to workplace legislative compliance
- case studies and workplace scenarios to capture the range of situations likely to be encountered when improving compliance through industry partnerships

Where and how to assess evidence

Valid assessment of this unit requires:

- a workplace environment or one that closely resembles normal work practice and replicates the range of conditions likely to be encountered when improving compliance through industry

EVIDENCE GUIDE

partnerships, including coping with difficulties, irregularities and breakdowns in routine

- development of industry partnerships to improve compliance in a range of (3 or more) contexts (or occasions, over time)

Assessment methods should reflect workplace demands, such as literacy, and the needs of particular groups, such as:

- people with disabilities
- people from culturally and linguistically diverse backgrounds
- Aboriginal and Torres Strait Islander people
- women
- young people
- older people
- people in rural and remote locations

Assessment methods suitable for valid and reliable assessment of this competency may include, but are not limited to, a combination of 2 or more of:

- case studies
- portfolios
- projects
- questioning
- scenarios
- authenticated evidence from the workplace and/or training courses

For consistency of assessment

Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments

Range Statement

RANGE STATEMENT

The Range Statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The Range Statement also provides a focus for assessment. It relates to the unit as a whole. Text in *italics* in the Performance Criteria is explained here.

Unit Descriptor

Unit descriptor

This unit covers the competency to research, plan and conduct investigations of occupational health and safety and/or workers compensation and/or injury management and/or workplace relations matters which may be complex and/or have potential to attract a high level of community interest. It includes researching the scope of the investigation, determining investigation issues, planning and conducting the investigation, analysing information gathered during the investigation and compiling a report.

In practice, investigating complex issues may overlap with other generalist or specialist public sector work activities such as acting ethically, complying with legislation, applying government systems, managing resources, managing risk, etc.

This unit replaces and is equivalent to *PSPWPI602A Investigate complex issues*.

Application of the Unit

Not applicable.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

Employability skills This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements are the essential outcomes of the unit of competency. Together, performance criteria specify the requirements for competent performance. Text in *bold italics* is explained in the Range Statement following.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Research the scope of the investigation	<p>1.1 Research on industry/enterprise or issue to determine degree of <i>complexity</i> is conducted initially and throughout the investigation</p> <p>1.2 Inter-organisation relationships are identified to determine jurisdiction</p> <p>1.3 The scope of the investigation is determined in accordance with research data, and planning and implementation of the investigation are congruent with this scope</p>
2. Determine investigation issues	<p>2.1 Major investigation issues and stakeholders are identified</p> <p>2.2 <i>Barriers</i> to investigation are identified and solutions are implemented</p> <p>2.3 Potential for <i>external interest</i> or involvement is determined and dealt with in accordance with organisational policy and procedures</p>
3. Plan and conduct investigation	<p>3.1 Steps required to conduct the investigation are determined</p> <p>3.2 Resources required to conduct the investigation are identified and obtained</p> <p>3.3 The investigation timeframe is established in accordance with the organisation's guidelines</p> <p>3.4 Investigation is conducted in accordance with the organisation's policy and procedures</p>
4. Analyse information gathered during the investigation	<p>4.1 Information is analysed to identify relevant issues, inter-relationships, trends and potential impact on <i>stakeholders</i> and on similar industries</p> <p>4.2 Findings of the analysis are determined and documented in accordance with the organisation's policy and procedures</p>
5. Compile report	<p>5.1 Results of analysis of information are reported according to the organisation's policy and procedures</p> <p>5.2 The findings from analysing information are used to provide advice or develop policies or solutions which meet client needs or organisation requirements</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the essential skills and knowledge and their level, required for this unit.

Skill requirements

Look for evidence that confirms skills in:

- conducting investigations relating to legislative compliance
- acting ethically and professionally
- comprehending complex written information
- writing reports and recommendations requiring precision of expression
- planning
- providing justification for scope and congruency decisions, and estimating impact on similar industries
- using communication and conflict/dispute resolution
- applying time management, planning, process mapping and decision making
- adapting to changing circumstances and making decisions

Knowledge requirements

Look for evidence that confirms knowledge and understanding of:

- principal legislation such as occupational health and safety, workers compensation, injury management and workplace relations
- performance standard in the legislation
- impact of hazards/issues on persons
- industry practices where applicable such as awards and enterprise agreements
- organisational policies and procedures related to compliance activities
- principles of risk management including hierarchy of controls
- technical features associated with hazards and potential risks as these relate to jurisdictional issues
- investigation methodology and techniques
- investigation management tools
- basic understanding of the Australian legal system
- aspects of civil, criminal, administrative law and jurisdictions
- organisational policy and procedures
- powers and restrictions to investigate
- rules of evidence, types of evidence
- reporting procedures which provide a written and/or electronic audit trail
- confidentiality and privacy issues
- procedures relating to lines of reporting

REQUIRED SKILLS AND KNOWLEDGE

storage of evidence

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the Unit descriptor, Performance Criteria, the Range Statement and the Assessment Guidelines for the Public Sector Training Package.

Units to be assessed together

- *Pre-requisite* units that must be achieved prior to this unit: *Nil*
- *Co-requisite* units that must be assessed with this unit: *Nil*
- *Co-assessed units* that may be assessed with this unit to increase the efficiency and realism of the assessment process include, but are not limited to:

PSPETHC601B Maintain and enhance confidence in public service

PSPGOV601B Apply government systems

PSPMNGT602B Manage resources

PSPMNGT605B Manage diversity

PSPMNGT608B Manage risk

PSPMNGT611A Manage evaluations

PSPWPI601B Improve compliance through industry partnerships

Overview of evidence requirements

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms:

- the knowledge requirements of this unit
- the skill requirements of this unit
- application of the Employability Skills as they relate to this unit (see Employability Summaries in Qualifications Framework)
- investigation of complex issues in a range of (3 or more) contexts (or occasions, over time)

Resources required to carry out assessment

These resources include:

- legislation, policy, procedures and protocols relating to the investigation of complex issues in workplace legislative compliance
- case studies and workplace scenarios to capture the range of situations likely to be encountered when investigating complex issues

Where and how to assess evidence

Valid assessment of this unit requires:

- a workplace environment or one that closely resembles normal work practice and replicates the range of conditions likely to be encountered when investigating complex issues, including coping with difficulties, irregularities and breakdowns in

EVIDENCE GUIDE

routine

- investigation of complex issues in a range of (3 or more) contexts (or occasions, over time)

Assessment methods should reflect workplace demands, such as literacy, and the needs of particular groups, such as:

- people with disabilities
- people from culturally and linguistically diverse backgrounds
- Aboriginal and Torres Strait Islander people
- women
- young people
- older people
- people in rural and remote locations

Assessment methods suitable for valid and reliable assessment of this competency may include, but are not limited to, a combination of 2 or more of:

- case studies
- portfolios
- projects
- questioning
- scenarios
- authenticated evidence from the workplace and/or training courses

For consistency of assessment

Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments

Range Statement

RANGE STATEMENT

The Range Statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The Range Statement also provides a focus for assessment. It relates to the unit as a whole. Text in *italics* in the Performance Criteria is explained here.

- Complexity may include*
- technical, legal, social
 - administrative
 - size - where the number of offences may be a factor in managing the investigation
 - involvement of other jurisdictions or other systems
 - level of public or political interest
 - international legislation
 - number of parties involved
- Barriers may be*
- political and community - stakeholder sensitivity
 - resources
 - geographical location
 - economic implication
 - cultural
 - language
 - availability of research data
 - availability of technical design information relevant to the investigation
- External interests may be*
- media
 - political
 - union
 - community
 - international/national industry
 - enterprise
 - academic
 - government organisations
- Stakeholders may include*
- community
 - the organisation's board
 - advisory council
 - Coroner
 - government organisations
 - managers
 - family members
 - politicians

RANGE STATEMENT

- peers
- union
- Commissioner
- employers
- designers
- manufacturers
- suppliers
- importers
- installers

Elements and Performance Criteria Pre-Content

Elements are the essential outcomes of the unit of competency. Together, performance criteria specify the requirements for competent performance. Text in *bold italics* is explained in the Range Statement following.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Identify issues	<p>1.1 The <i>environment</i> is monitored to determine <i>emerging issues</i></p> <p>1.2 Formal and informal <i>research</i> is conducted to identify emerging issues</p> <p>1.3 Issues are clarified and confirmed with <i>stakeholders</i> in accordance with legislation and organisational policy and procedures</p>
2. Assess potential impact	<p>2.1 The scope and magnitude of the impact are estimated and recorded</p> <p>2.2 The nature and consequence of the potential impact are determined and used to develop a response strategy</p>
3. Develop a response strategy	<p>3.1 <i>Response options</i> are identified and prioritised in accordance with legislation and organisational policy and procedures</p> <p>3.2 A response strategy is chosen that best addresses the impact in consultation with industry stakeholders</p> <p>3.3 Performance measures to evaluate the effectiveness of the chosen response strategy are established</p> <p>3.4 The chosen response strategy is implemented</p>
4. Evaluate effectiveness of the response	<p>4.1 An <i>evaluation plan</i> is developed and documented</p> <p>4.2 The response strategy is evaluated against the predetermined performance measures</p> <p>4.3 The response strategy is modified on the basis of the evaluation if required</p> <p>4.4 The results of the evaluation are communicated to relevant stakeholders</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the essential skills and knowledge and their level, required for this unit.

Skill requirements

Look for evidence that confirms skills in:

conducting research and analysis

conducting evaluations

communicating with a range of audiences, requiring adaptation of style and language

questioning to confirm understanding

interpreting complex information

preparing written reports requiring formal structure and language

responding to diversity, including isability and gender

using computers

Knowledge requirements

Look for evidence that confirms knowledge and understanding of:

occupational health and safety, workers compensation, injury management and/or
workplace relations legislation

evaluation procedures

organisational policy and procedures

industry standards

codes of practice

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the Unit descriptor, Performance Criteria, the Range Statement and the Assessment Guidelines for the Public Sector Training Package.

Units to be assessed together

- *Pre-requisite* units that must be achieved prior to this unit: *Nil*
- *Co-requisite* units that must be assessed with this unit: *Nil*
- *Co-assessed units* that may be assessed with this unit to increase the efficiency and realism of the assessment process include, but are not limited to:

PSPETHC601B Maintain and enhance confidence in public service

Assessment methods suitable for valid and reliable assessment of this competency may include, but are not limited to, a combination of 2 or more of:

- case studies
- portfolios
- projects
- questioning
- scenarios
- simulation or role plays
- authenticated evidence from the workplace and/or training courses

For consistency of assessment

Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments

Range Statement

RANGE STATEMENT

The Range Statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The Range Statement also provides a focus for assessment. It relates to the unit as a whole. Text in *italics* in the Performance Criteria is explained here.

Environments may include

- industry
- workplace
- political
- social
- international
- national
- statewide
- community

Emerging issues may include

- changes in work practices
- industry developments
- changes in work hire arrangements
- technological change
- political imperatives
- accident and incident data
- community concerns
- legislative changes
- emergency incidents
- court rulings

Research may include

- methods
- work practices
- resources required
- statistical analysis
- industry networks
- observations
- operational experience
- information exchange
- industry reference groups

Stakeholders may include

- community
- the organisation's board
- advisory council
- government organisations
- managers
- politicians

RANGE STATEMENT

Elements and Performance Criteria Pre-Content

Elements are the essential outcomes of the unit of competency. Together, performance criteria specify the requirements for competent performance. Text in *bold italics* is explained in the Range Statement following.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Represent the organisation	<p>1.1 A professional image of the organisation is <i>promoted</i> in accordance with the organisation's policy and procedures</p> <p>1.2 Information on issues, policies and practices is adapted for different audiences in terms of its range, depth and form of presentation, and is communicated orally and in writing</p> <p>1.3 Advice is developed and provided within the area of responsibility in accordance with organisational policy and procedures</p> <p>1.4 Feedback is obtained on clients' levels of understanding and additional information or explanation is used to clarify issues if required</p>
2. Use communication strategies to achieve desired outcomes	<p>2.1 <i>Communication strategies</i> are tailored to the audience and the context</p> <p>2.2 Communication strategies and content are adjusted in response to feedback from clients</p> <p>2.3 When additional personnel are needed to assist with a strategy, they are briefed on the expected outcomes and their role/responsibilities in achieving them</p> <p>2.4 Clients are advised of processes and timelines for receiving information when issues are referred to others for interpretation/advice on complex matters</p>
3. Build and maintain networks and relationships	<p>3.1 Time is allocated to establish and maintain <i>networks</i> and work relationships</p> <p>3.2 Information, key people and networks are identified and accessed to assist in achieving work outcomes</p> <p>3.3 Communication channels are established/maintained and information and ideas are exchanged to provide benefits for clients and the organisation</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

Elements and Performance Criteria Pre-Content

Elements are the essential outcomes of the unit of competency. Together, performance criteria specify the requirements for competent performance. Text in *bold italics* is explained in the Range Statement following.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Plan, organise and undertake audit	<p>1.1 The <i>resources</i> required to <i>conduct</i> the <i>audit</i> are identified and obtained</p> <p>1.2 The <i>relevant parties</i> are consulted and informed of <i>audit plans</i> in accordance with the organisation's policy and procedures</p> <p>1.3 The environment is assessed for personal safety</p> <p>1.4 The environment is assessed to ensure that it permits the audit to be fair, valid and reliable</p> <p>1.5 The audit arrangements and requirements are explained to the persons involved in the audit and to the relevant parties, and their understanding of the purpose and processes is confirmed</p> <p>1.6 <i>Documents</i> are sighted and all other evidence specified in the <i>audit procedure</i> is gathered in accordance with the organisation's policy and procedures and confidentiality is maintained</p>
2. Evaluate audit results	<p>2.1 <i>Evidence</i> gathered is evaluated for reliability, validity, authenticity, sufficiency, currency, and consistency in the achievement of the specific standards</p> <p>2.2 The <i>assessment</i> decision is made in accordance with the purpose and objectives of the audit</p> <p>2.3 Guidance is sought if in doubt, from a more experienced auditor/s</p>
3. Record audit results	<p>3.1 The audit results are recorded and processed in accordance with organisational auditing procedures</p> <p>3.2 Access to the audit records is provided only to authorised personnel</p> <p>3.3 Confidentiality of the audit outcome is maintained</p>
4. Provide advice on audit results	<p>4.1 Audit results are discussed and confirmed with the persons involved in the audit</p> <p>4.2 Feedback including advice on corrective action/s required is given to persons involved in the audit</p> <p>4.3 Any audit decision that may be disputed is reported in accordance with the organisation's policy and procedures</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the essential skills and knowledge and their level, required for this unit.

Skill requirements

Look for evidence that confirms skills in:

- applying risk management principles
- working with a variety of professionals
- paying attention to detail
- implementing methodical and systematic approach
- using recording, testing and specialised evidence collection equipment
- auditing systems
- justifying/explaining the assessment decision and recommended corrective action
- using communication involving complex exchanges of oral information, reading and analysing complex and formal documents
- responding to diversity, including disability and gender

Knowledge requirements

Look for evidence that confirms knowledge and understanding of:

- risk management principles
- legislation, codes, standards
- management systems
- powers of inspector, jurisdiction
- use of audit/assessment tools
- industry practices and procedures
- quality management principles
- organisational auditing procedures
- management system principles

Evidence Guide

EVIDENCE GUIDE

Range Statement

RANGE STATEMENT

The Range Statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The Range Statement also provides a focus for assessment. It relates to the unit as a whole. Text in *italics* in the Performance Criteria is explained here.

Resources required to conduct the audit may include

- financial, such as:
 - budget allocations
 - travelling/subsistence allowances
 - motor vehicle hire
- physical, such as:
 - motor vehicles
 - measuring equipment
 - photographic equipment
 - computer equipment
 - office location
 - personal protective equipment
 - telephone equipment
 - stationery
 - documentation (eg standards)
 - electronic recording equipment
 - office communication equipment

Audits may be conducted by

- an auditor working on his/her own
- a team comprising subject technical knowledge expert/s and a lead auditor
- an auditor working in conjunction with an experienced auditor, trainer and/or supervisor

Audit may include

- assessment
- examination/test
- structured inspection of workplaces to validate management systems
- national/state or other relevant assessment instruments
- results of internal and external monitoring

Relevant parties may include

- the auditors
- key members/representatives of the organisation being audited
- nominated contact person/s
- managers concerned with the unit/section being audited
- audit manager
- audit team leader

RANGE STATEMENT

- audit team members
 - project manager
 - employer association
 - employee association
 - community groups
 - industrial commission
 - insurance companies
 - employer
 - employee
 - principal contractor
- Audit plan may address*
- the scope, purpose and objectives of the audit
 - competency of auditor/s
 - recordkeeping and processing arrangements
 - evaluation and review mechanisms
 - quality assurance methods
 - legislation
 - codes of practice
 - standards
 - guidance materials
 - benchmarks
- Documents may include*
- electronic databases
 - videos
 - intra/internet sites
 - training/learning programs
 - photographs
 - written information
- Audit procedure may specify*
- recording procedure
 - audit methods used
 - evidence required
 - location
 - timing of audit
- Evidence may include*
- documented instruction relating to the performance of tasks
 - sets of oral/written/computer-based questions
 - checklists
 - logbooks
 - working guides
 - manuals
 - technical reports
 - standard operating procedures/work method statements
 - policies and procedures

RANGE STATEMENT

Assessment methods may include

- employer/employee records
- contractor records
- third party records
- use of technology
- outcome of interviews
- outcome of focus groups
- direct observation of performance
- practical tasks
- written/oral/computer-based questioning
- consideration of third party reports
- consideration of authenticated prior achievements
- use of measuring and testing equipment
- combination of methods
- statistical data relating to safety and health injury/disease and/or workplace relations

Unit Descriptor

Unit descriptor

This unit covers the competency to participate as an individual or as a team member in the development and revision of legislation, regulations, policy, procedures, standards, codes of practice and guidance material. It includes providing guidance to stakeholders, participating in development and evaluation activities, and communicating progress and outcomes to stakeholders.

In practice, contributing to the development and revision of legislation and related documents may overlap with other generalist or specialist public sector work activities such as acting ethically, complying with legislation, applying government systems, managing change, managing diversity, developing policy, providing policy advice etc.

This unit replaces and is equivalent to PSPWPI606A Contribute to the development and revision of legislation and related documents.

Application of the Unit

Not applicable.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

Employability skills This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements are the essential outcomes of the unit of competency. Together, performance criteria specify the requirements for competent performance. Text in *bold italics* is explained in the Range Statement following.

Elements and Performance Criteria

ELEMENT

PERFORMANCE CRITERIA

1. Provide guidance to stakeholders

- 1.1 Information and advice on the relevant acts, regulations, policies, procedures, codes of practice, standards and guidelines is provided in accordance with organisational policy and procedures
- 1.2 Documentation is provided that supports the information and advice given
- 1.3 Advice on organisational policy is communicated in a manner that addresses the requirements of *stakeholders* and reflects consideration of all *relevant issues*

2. Participate in development and evaluation activities

- 2.1 Work is completed to evaluate the effectiveness of relevant *legislation*, policies, procedures, codes of practice and standards in accordance with organisational requirements
- 2.2 Trends are identified, analysed and communicated to stakeholders to be used as input in the development and revision of legislation, policies, procedures, codes of practice and standards
- 2.3 Organisational policy development and revision activities are undertaken in accordance with organisational requirements

3. Communicate progress and outcomes to stakeholders

- 3.1 Progress *report/s* are provided to relevant stakeholders in accordance with agreed timelines
- 3.2 Comments are collected, analysed and communicated to others involved in the development and revision processes
- 3.3 Final report and recommendations are communicated to relevant stakeholders for action and/or implementation in accordance with organisational requirements

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the essential skills and knowledge and their level, required for this unit.

Skill requirements

Look for evidence that confirms skills in:

- using a range of communication methods including advice and discussion involving complex exchanges of oral information
- adjusting communication strategies to meet the needs of different target audiences
- reading and explaining complex and formal documents such as legislation, regulations, policy etc
- providing explanation of why/how the supporting documents support advice given
- responding to diversity, including disability and gender
- applying analysis methods and technique
- undertaking negotiation and conflict resolution
- working in/with a team

Knowledge requirements

Look for evidence that confirms knowledge and understanding of:

- occupational health and safety legislation
- workers compensation legislation
- injury management legislation
- workplace relations legislation
- industry
- technical
- organisational structure
- organisational policy and procedures

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the Unit descriptor, Performance Criteria, the Range Statement and the Assessment Guidelines for the Public Sector Training Package.

Units to be assessed together

- *Pre-requisite* units that must be achieved prior to this unit: *Nil*
- *Co-requisite* units that must be assessed with this unit: *Nil*
- *Co-assessed units* that may be assessed with this unit to increase the efficiency and realism of the assessment process include, but are not limited to:

PSPETHC601B Maintain and enhance confidence in public service

PSPGOV601B Apply government systems

PSPGOV605A Persuade and influence opinion

PSPGOV606A Prepare high-level/sensitive written materials

PSPLEGN601B Manage compliance with legislation in the public sector

PSPMNGT609B Formulate business strategies

PSPPOL601A Develop public policy

PSPPOL602A Provide policy advice

Overview of evidence requirements

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms:

- the knowledge requirements of this unit
- the skill requirements of this unit
- application of the Employability Skills as they relate to this unit (see Employability Summaries in Qualifications Framework)
- contribution to the development/revision of legislation and related documents in a range of (3 or more) contexts (or occasions, over time)

Resources required to carry out assessment

These resources include:

- legislation, policy, procedures and protocols relating to workplace legislative compliance
- case studies and workplace scenarios to capture the range of situations likely to be encountered when contributing to the development and revision of legislation and related documents

Where and how to assess evidence

Valid assessment of this unit requires:

- a workplace environment or one that closely resembles normal work practice and replicates the range of conditions likely to be

EVIDENCE GUIDE

encountered when contributing to the development and revision of legislation and related documents, including coping with difficulties, irregularities and breakdowns in routine

- contribution to the development/revision of legislation and related documents in a range of (3 or more) contexts (or occasions, over time)

Assessment methods should reflect workplace demands, such as literacy, and the needs of particular groups, such as:

- people with disabilities
- people from culturally and linguistically diverse backgrounds
- Aboriginal and Torres Strait Islander people
- women
- young people
- older people
- people in rural and remote locations

Assessment methods suitable for valid and reliable assessment of this competency may include, but are not limited to, a combination of 2 or more of:

- case studies
- portfolios
- projects
- questioning
- scenarios
- simulation or role plays
- authenticated evidence from the workplace and/or training courses

For consistency of assessment

Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments

Range Statement

RANGE STATEMENT

The Range Statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The Range Statement also provides a focus for assessment. It relates to the unit as a whole. Text in *italics* in the Performance Criteria is explained here.

- Stakeholders may include*
- organisational staff
 - unions
 - Minister
 - other government departments
 - employer organisation
 - ministerial and other advisory councils
 - advisory boards
 - organisational board of management
 - management
 - industry
 - community
 - non-government organisations
 - safety committees
 - health and safety representatives
- Relevant issues may include*
- government policy
 - community expectations
 - workplace relations processes
- Legislation and policy may also include*
- procedures
 - industry standards
 - codes of practice
 - guidance notes
- Reports may be*
- formal
 - informal
 - written
 - verbal

Employability Skills Information

Employability skills	This unit contains employability skills.
-----------------------------	--

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<p>1. Prepare for processing incoming workplace relations queries.</p>	<p>1.1. Workstation is ergonomically adjusted to comply with health and safety requirements.</p> <p>1.2. Features and operation of <i>information and communication technology and systems</i> are identified and understood.</p> <p>1.3. Scripts or call guides are located, reviewed to identify variations, and practised as necessary.</p> <p>1.4. <i>Key performance indicators</i> are identified and understood.</p> <p>1.5. Recording and reporting requirements are identified and understood.</p>
<p>2. Process incoming workplace relations telephone queries.</p>	<p>2.1. Incoming calls are answered using appropriate <i>telephone techniques</i> according to <i>workplace procedures</i>.</p> <p>2.2. Call details required for organisational records are obtained and noted according to workplace procedures.</p> <p>2.3. Abusive or aggressive calls are referred or terminated according to workplace procedures.</p> <p>2.4. Calls requiring referral are placed on hold and transferred according to workplace procedures.</p> <p>2.5. Calls are finalised and details recorded according to workplace procedures.</p> <p>2.6. Calls and recording requirements are managed to ensure performance targets are met.</p>
<p>3. Process incoming written workplace relations enquiries.</p>	<p>3.1. Incoming <i>correspondence</i> is acknowledged and details of timeframe for response are given according to workplace procedures.</p> <p>3.2. Written correspondence details required for organisational records are obtained and noted according to workplace procedures.</p> <p>3.3. Written correspondence requiring referrals are forwarded and details of transfer sent to the enquirer.</p> <p>3.4. Written correspondence is finalised and details are recorded according to workplace procedures.</p> <p>3.5. Correspondence and recording requirements are managed to ensure key performance indicators are met.</p>
<p>4. Complete records and generate system</p>	<p>4.1. Records are checked to ensure that relevant details are included.</p>

ELEMENT	PERFORMANCE CRITERIA
reports.	4.2.Periodic system reports are generated and processed according to workplace requirements. 4.3.Manual records are created during information and communications systems down time and transferred to appropriate software system as soon as possible.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- interpersonal skills to:
 - provide effective customer service
 - relate to people from diverse backgrounds and with diverse needs
- language and literacy skills to:
 - read, interpret and apply workplace procedures and guidelines, including scripts and call guides
 - communicate clearly both verbally and in writing
 - complete required records and reports
- telephone techniques to:
 - handle enquiries using an appropriate manner and tone
 - select appropriate language with reference to enquirers' cultural or disability needs
 - transfer and refer callers
 - deal with abusive and aggressive callers in an appropriate manner
- customer service skills
- self-management skills to apply workplace procedures and policies in relation to handling workplace relations queries
- time-management skills to:
 - efficiently address enquiries
 - facilitate management of enquiry queue
- technology skills to:
 - use communication technology and systems
 - transfer manual records to client-management software system
- communication skills to:
 - provide effective customer service
 - apply relevant client-management procedures when processing enquiries

Required knowledge

- workplace policies and procedures, including OHS requirements and ergonomics
- features and operation of information and communications technology and systems
- electronic and manual recording and reporting systems and procedures
- appropriate use of resources

Evidence Guide

EVIDENCE GUIDE	
<p>The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
Overview of assessment	
<p>Critical aspects for assessment and evidence required to demonstrate competency in this unit</p>	<p>Assessment must confirm the ability to:</p> <ul style="list-style-type: none"> • apply ergonomic and health and safety principles to the set-up and use of workstation and equipment • operate telephony and client-management software systems effectively • apply relevant client-management procedures to process enquiries to the required quality and productivity standards • apply procedures for referral and escalation of enquiries • produce system records and reports to the required standards. <p>Consistency in performance</p> <p>Competency should be demonstrated by processing a range of enquiries, including both written and verbal enquiries.</p>
<p>Context of and specific resources for assessment</p>	<p>Assessment must comply with:</p> <ul style="list-style-type: none"> • organisational client-management and health and safety procedures • applicable regulations and codes. <p>Access may be required to:</p> <ul style="list-style-type: none"> • a simulated work environment • organisational policies and procedures • workplace relations information.
<p>Guidance information for assessment</p>	<p>The following assessment methods are suggested:</p> <ul style="list-style-type: none"> • oral questioning about features and use of telephony and relevant client-management software • observation of candidate processing a range of incoming enquiries in various formats, including at least two of the following: phone calls, emails, letters (by fax or mail), and online enquiries • feedback from peers and/or supervisor that the candidate consistently applies relevant workplace procedures • review of records completed by candidate or reports of performance. <p>In all cases, practical assessment should be supported by questions</p>

EVIDENCE GUIDE	
	to assess underpinning knowledge and those aspects of competency that are difficult to assess directly. Questioning techniques should suit the language and literacy levels of the candidate.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<p><i>Information and communication technology and systems</i> may include:</p>	<ul style="list-style-type: none"> • telephony • proprietary client-management software • fax • email • webinar • online forums • specialised computer programs • contact centre management systems • online learning.
<p><i>Key performance indicators</i> may include:</p>	<ul style="list-style-type: none"> • number of calls answered • wait time • call time • after call time (record completion) • quality of response and outcome.
<p><i>Telephone techniques</i> may include:</p>	<ul style="list-style-type: none"> • call answering timeframe • standard greetings and introductions • hold and transfer protocols • call back protocols • call finalisation protocols.
<p><i>Workplace procedures</i> may include those relating to:</p>	<ul style="list-style-type: none"> • OHS • code of conduct • conflict of interest • recording and reporting • use of resources • privacy and privacy disclaimers • referrals.
<p><i>Correspondence</i> may include:</p>	<ul style="list-style-type: none"> • emails • faxed letters • mailed letters • online queries.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<p>1. Prepare to respond to workplace relations enquiries.</p>	<p>1.1. <i>Scope of authority</i> to give information and advice is identified and interpreted.</p> <p>1.2. Understanding of role and responsibilities is confirmed with relevant manager.</p> <p>1.3. Frequently asked questions are identified and standard responses noted.</p> <p>1.4. Procedures for enquiries falling outside scope of authority are identified and interpreted.</p> <p>1.5. Information sources are identified and different types of information are located and reviewed to facilitate timely retrieval.</p>
<p>2. Clarify the details of enquiries.</p>	<p>2.1. Nature of <i>workplace relations enquiry</i> is established by listening and paraphrasing according to <i>workplace procedures</i>.</p> <p>2.2. Details of enquiry are elicited using appropriate questioning techniques.</p> <p>2.3. <i>Communication</i> with clients is managed according to workplace procedures.</p> <p>2.4. Potential conflict of interest is identified and where conflict exists, the issue is referred according to workplace procedures.</p>
<p>3. Provide relevant information.</p>	<p>3.1. <i>Workplace relations information</i> is researched and confirmed as relevant to enquiry.</p> <p>3.2. Workplace relations information is relayed in a clear, concise manner appropriate to enquirer's needs.</p> <p>3.3. Client enquiries arising from relayed information are answered within scope of authority.</p> <p>3.4. Complex queries and difficult calls are referred to appropriate persons according to workplace procedures.</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- interpersonal skills to:
 - provide effective customer service
 - relate to people from diverse backgrounds and with diverse needs
- teamwork skills to:
 - ensure consistent responses and timely escalation of issues
 - develop skills and knowledge in responding to enquiries
- time-management skills to:
 - efficiently address enquiries
 - facilitate management of enquiry queue
- communication skills, including:
 - telephone techniques
 - active listening
 - paraphrasing
 - questioning skills
 - ability to adapt communication style to suit audience
 - substituting technical jargon with plain English
 - assertive communication
 - conflict resolution
- language and literacy skills to:
 - identify frequently asked questions and apply standard responses
 - access standard information from enquirer and clarify enquiry
 - locate, research and interpret workplace relations information
 - write and report
- technology skills to operate information and communications technology and software systems
- learning skills to stay abreast of workplace relations legislative changes and outcomes from court related matters
- self-management skills to recognise problems or issues
- problem-solving skills to deal with enquirers with sometimes complex queries
- planning and organising skills to:
 - keep records
 - manage files
 - plan and prioritise work

REQUIRED SKILLS AND KNOWLEDGE

Required knowledge

- workplace policies and procedures, including scope of authority of own role
- workplace relations framework
- relevant federal, state or territory, and local legislation relating to:
 - workplace relations
 - OHS
 - human rights and equal employment opportunity
 - privacy
- workplace relations information and issues, including:
 - types of employment
 - rights, roles and responsibilities of parties in an employment relationship
 - conditions and entitlements
 - transitional arrangements
 - union issues
 - factors indicating compliance, non-compliance and breach of workplace relations legislation
- features and operation of information and communications technology and systems
- electronic and manual recording and reporting systems and procedures

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<p>1. Develop workplace relations knowledge.</p>	<p>1.1. Current and historical information on workplace relations framework and legislation is sourced, reviewed, interpreted and confirmed.</p> <p>1.2. Changes to workplace relations framework and legislation are <i>monitored</i>, interpreted and applied.</p> <p>1.3. Personal knowledge gaps are identified and appropriate training or information is sought in consultation with relevant manager.</p> <p>1.4. Complex issues are referred to senior staff and reviewed to develop knowledge.</p>
<p>2. Develop enquiry response capability.</p>	<p>2.1. Roles and responsibilities of various <i>stakeholders</i> in workplace relations matters are identified and confirmed with colleagues and relevant managers.</p> <p>2.2. Common concerns and issues of various stakeholders in workplace relations matters, and past resolution details, are researched and interpreted to inform response to enquiries.</p> <p>2.3. Difficulties in providing information are resolved promptly or referred to appropriate persons according to organisational policies.</p> <p>2.4. Strategies for effective communication with <i>diverse enquirers</i> are researched, validated and implemented.</p>
<p>3. Interpret and communicate workplace relations information.</p>	<p>3.1. Clients and colleagues are assisted to interpret the legislative requirements of workplace relations framework.</p> <p>3.2. Compliance with workplace relations is promoted with relevant colleagues, stakeholders and groups.</p>
<p>4. Produce and monitor required records and reports.</p>	<p>4.1. Enquiry records are completed, checked for accuracy and reviewed to identify trends and information gaps.</p> <p>4.2. Records of referred enquiries are monitored to ensure resolution is achieved.</p> <p>4.3. System reports are produced according to workplace requirements.</p>
<p>5. Contribute to improvements in information provision.</p>	<p>5.1. Call trends are discussed with colleagues and relevant managers and response options are considered and applied.</p> <p>5.2. Appropriate persons are notified of gaps in information resources.</p>

ELEMENT	PERFORMANCE CRITERIA
	5.3.Call management strategies are shared with colleagues and relevant managers, and suggestions for improvement are suggested, solicited and incorporated into work processes.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- language and literacy skills to:
 - research and study complex documents
 - produce and review records and reports
 - participate in and contribute to team meetings
 - manage files
- self-management skills to:
 - assess own capabilities to adequately respond to enquiries
 - identify own learning and knowledge gaps
- learning skills to seek and implement continuous improvement in response capability
- interpersonal skills to use a range of strategies to communicate effectively with *diverse enquirers*
- teamwork skills to contribute to team discussions on process improvement
- planning and organisational skills to:
 - plan and prioritise work
 - handle queries efficiently
 - determine when it is appropriate to escalate response
- problem-solving skills to recognise problems or issues

Required knowledge

- workplace policies and procedures in relation to context of information being sought
- workplace relations framework
- relevant federal, state or territory, and local legislation relating to:
 - workplace relations
 - OHS
 - human rights and equal employment opportunity
 - privacy
- workplace relations information and issues, including:
 - types of employment
 - rights, roles and responsibilities of parties in an employment relationship
 - anti-discrimination
 - conditions and entitlements
 - transitional arrangements

Evidence Guide

EVIDENCE GUIDE	
<p>The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
Overview of assessment	
<p>Critical aspects for assessment and evidence required to demonstrate competency in this unit</p>	<p>Assessment must confirm the ability to:</p> <ul style="list-style-type: none"> • locate, interpret and apply relevant workplace relations information • communicate workplace relations information effectively to diverse stakeholders • identify gaps in personal knowledge and access information to improve understanding • monitor changes to workplace relations information • contribute to process improvements. <p>Consistency in performance</p> <p>Competency should be demonstrated by participation in a range of activities to improve personal and organisational ability to provide appropriate workplace relations information effectively to diverse stakeholders.</p>
<p>Context of and specific resources for assessment</p>	<p>Assessment must comply with:</p> <ul style="list-style-type: none"> • organisational client management and health and safety procedures • applicable regulations and codes. <p>Access may be required to:</p> <ul style="list-style-type: none"> • a simulated work environment • organisational policies and procedures • workplace relations information.
<p>Guidance information for assessment</p>	<p>The following assessment methods are suggested:</p> <ul style="list-style-type: none"> • oral questioning about location of workplace relations information, identification of knowledge gaps, activities undertaken to improve knowledge and ability, and strategies for monitoring changes in workplace relations information • observation of the candidate participating in team meetings and contributing to process improvement • feedback from peers and/or supervisor that the candidate consistently seeks to improve the provision of workplace relations information

EVIDENCE GUIDE	
	<ul style="list-style-type: none">• review of records completed by candidate or reports of performance. <p>In all cases, practical assessment should be supported by questions to assess underpinning knowledge and those aspects of competency that are difficult to assess directly. Questioning techniques should suit the language and literacy levels of the candidate.</p>

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Monitoring workplace relations information may involve:

- participation in team meetings
- regular review of staff bulletins, memos and emails
- subscription to and review of:
 - relevant publications
 - internet news services
 - relevant website updates
- research into current trends and issues.

Stakeholders may include:

- employees
- employers
- trainees and apprentices
- employee representatives
- employer representatives
- union representatives.

Diverse enquirers may include:

- union members, representatives and officials
- employer associations
- employment agencies
- trainees and apprentices
- young people
- people with a first language other than English
- human resource and legal professionals
- bargaining agents
- students
- vulnerable people or their guardians
- people with disabilities
- employers
- employees.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<p>1. Analyse and clarify complex workplace relations issues.</p>	<p>1.1. <i>Complex workplace relations issues</i> are reviewed to identify relevant <i>stakeholders</i> and potential conflict of interest, and where conflict exists the issue is referred according to workplace procedures.</p> <p>1.2. Recorded details of complex workplace relations issues are identified, and advice given and action taken to date are reviewed.</p> <p>1.3. Internally escalated issues are clarified with relevant personnel.</p> <p>1.4. Client and relevant stakeholders are contacted according to workplace procedures to clarify and expand on details of complex issues.</p> <p>1.5. Clear definition of the issue, and the <i>nature and extent of information</i> required to assist with its resolution, are discussed and agreed with relevant stakeholders.</p>
<p>2. Research information applicable to complex issues.</p>	<p>2.1. Historical organisational records of similar or related issues are researched and information applicable to current issue is analysed and recorded.</p> <p>2.2. <i>Relevant legal documentation</i> is researched and application to current issue is analysed and recorded.</p> <p>2.3. Expert legal advice on aspects of complex issues is sought according to workplace procedures.</p> <p>2.4. Information is evaluated, integrated and recorded to form the factual and impartial basis of advice to be given.</p> <p>2.5. Nature and extent of advice are checked against agreed scope.</p> <p>2.6. Validation of advice is sought from colleagues, relevant manager or expert according to workplace procedures.</p>
<p>3. Provide advice and information.</p>	<p>3.1. Validated advice is incorporated into records and reports according to client requirements and workplace procedures.</p> <p>3.2. Queries relating to advice are responded to promptly and effectively.</p> <p>3.3. Researched information is documented and shared with colleagues according to workplace requirements.</p> <p>3.4. System records and reports are completed and processed according to workplace requirements.</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- language and literacy skills to:
 - communicate impartially and diplomatically with diverse stakeholders, including conducting open discussions and using appropriate questioning techniques
 - read, interpret and communicate historic records, case law, legislation, regulations, policies, procedures and guidelines relating to workplace relations
 - prepare records, written reports and correspondence containing information that is impartial, validated, accurate and complete
- time-management skills to plan and prioritise work
- interpersonal and teamwork skills to:
 - work as a member of a team
 - consult and provide advice
- planning and organising skills to administer and manage records and files

Required knowledge

- historical records and legal information relevant to particular workplace relations issues
- workplace relations framework
- workplace relations legislation at federal and state levels, including conditions and entitlements
- roles and responsibilities of stakeholders, including employers, employees, unions and advisory bodies
- organisational policies and procedures

Evidence Guide

EVIDENCE GUIDE	
<p>The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>Assessment must confirm the ability to:</p> <ul style="list-style-type: none"> • analyse complex workplace relations issues • research legislation, including common and case law, to identify appropriate and accurate responses • seek expert legal advice as required • communicate complex workplace relations information in plain English to diverse stakeholders. <p>Consistency in performance</p> <p>Competency should be demonstrated by providing advice on a range of complex workplace relations enquiries involving:</p> <ul style="list-style-type: none"> • a variety of types of industrial instruments • a range of issues regarding conditions and entitlements • diverse enquirers.
Context of and specific resources for assessment	<p>Assessment must comply with:</p> <ul style="list-style-type: none"> • organisational client management and health and safety procedures • applicable regulations and codes. <p>Access may be required to:</p> <ul style="list-style-type: none"> • a simulated work environment • organisational policies and procedures • workplace relations information.
Guidance information for assessment	<p>The following assessment methods are suggested:</p> <ul style="list-style-type: none"> • oral questioning about: <ul style="list-style-type: none"> • workplace relations information sources • case law applicable to complex workplace relations enquiries • range of expert advice available • examples of complex workplace relations issues • observation of the candidate providing advice on a range of complex workplace relations issues to diverse enquirers • feedback from peers and/or supervisor that the candidate consistently applies relevant workplace procedures

EVIDENCE GUIDE

- review of records completed by candidate or reports of performance.

In all cases, practical assessment should be supported by questions to assess underpinning knowledge and those aspects of competency that are difficult to assess directly. Questioning techniques should suit the language and literacy levels of the candidate.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Complex workplace relations issues may relate to:

- making, varying or terminating a workplace agreement
- operational and notification requirements
- award coverage
- wage rates
- conditions and entitlements of employment
- incorrect record keeping
- unfair or unlawful termination
- discrimination
- OHS
- working conditions
- redundancy
- training
- superannuation.

Stakeholders may include:

- employees
- employers
- trainees and apprentices
- employee representatives
- employer representatives
- union representatives
- employer associations.

Nature and extent of information may include:

- proof of identity
- business name
- employer association
- constitutional corporation
- industry
- duties and occupations
- business pre and post-reform
- parties involved.

Relevant legal documentation may include:

- case law and historical information
- legislation, codes and standards relevant to the workplace, such as:
 - Workplace Relations Act 1996

<p><i>Nature and extent of information</i> may include:</p>	<ul style="list-style-type: none"> • proof of identity • business name • employer association • constitutional corporation • industry • duties and occupations • business pre and post-reform • parties involved.
	<ul style="list-style-type: none"> • workplace relations regulations • Fair Work Act 2009 • Independent Contractors Act 2006 • other relevant federal, state or territory, and local legislation relating to: • OHS • human rights and equal employment opportunity • industrial relations • superannuation • workers compensation • long service leave <ul style="list-style-type: none"> • relevant industry codes of practice • note: legislation, codes and standards are subject to change and current relevant versions should be researched • relevant awards, employment contracts or industrial instruments, such as: <ul style="list-style-type: none"> • employee collective agreement (ECA) • union collective agreement (UCA) • employee greenfield agreement (EGA) • union greenfield agreement (UGA) • Australian workplace agreement(AWA) • individual transitional employment agreement (ITEA) • enterprise bargaining agreement (EBAs) • multiple business agreement (MBA) • common law contract (CLC) • notional agreement preserving state award (NAPSA) • preserved state agreement (PSA) • enterprise agreement • multi enterprise agreement • single enterprise agreement • greenfields agreement • federal award

<i>Nature and extent of information</i> may include:	<ul style="list-style-type: none"> • proof of identity • business name • employer association • constitutional corporation • industry • duties and occupations • business pre and post-reform • parties involved.
	<ul style="list-style-type: none"> • state award • contract for award-free employees.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<p>1. Assess compliance of workplace conditions and entitlements with workplace relations legislation.</p>	<p>1.1. Current, relevant <i>workplace relations legislation and guidance information</i> are accessed and interpreted.</p> <p>1.2. <i>Workplace conditions and entitlements</i> are evaluated and factors that may constitute non-compliance with workplace relations legislation are identified.</p> <p>1.3. Information that will assist in the assessment of a potential or possible breach is gathered and recorded as necessary.</p> <p>1.4. Potential or possible breaches of legislation and possible outcomes and courses of action are identified and referred to appropriate persons for timely action.</p> <p>1.5. Assessment of potential or possible breach is recorded and reported according to organisational and legislative requirements.</p>
<p>2. Review non-compliant workplace conditions and entitlements and propose resolution strategies.</p>	<p>2.1. Information that assists in the assessment of non-compliance is gathered from <i>advisory materials, stakeholders</i> and <i>workplace documents</i> and recorded according to organisational policies and procedures.</p> <p>2.2. Information is reviewed and compared to workplace relations legislative requirements to assess non-compliance.</p> <p>2.3. Urgency of non-compliance resolution is assessed and priority allocated to enable timely and effective action.</p> <p>2.4. Strategies for resolving non-compliant factors of workplace conditions and entitlements are suggested or sought from appropriate persons.</p> <p>2.5. Participation in and contribution to resolution of non-compliance is made according to organisational procedures.</p> <p>2.6. Records and reports are completed and processed according to organisational and legislative requirements.</p>
<p>3. Contribute to compliance with workplace relations legislation.</p>	<p>3.1. Compliance requirements of workplace relations legislation are communicated to relevant persons to confirm understanding and ensure consistency of interpretation and application.</p>

ELEMENT	PERFORMANCE CRITERIA
	3.2.Potential consequences of non-compliance with workplace relations legislation are conveyed using language and examples suited to individual needs. 3.3.Practices that may contribute to non-compliance are identified and addressed.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- language and literacy skills to:
 - read, interpret and communicate legislation, regulations, policies, procedures and guidelines relating to workplace relations
 - prepare reports and correspondence containing information that is impartial, validated, accurate and complete
 - communicate impartially and diplomatically with diverse stakeholders, including conducting open discussions and using appropriate questioning techniques
- time-management skills to plan and prioritise work
- interpersonal and teamwork skills to:
 - work as a member of a team
 - consult and provide advice
- organising and planning skills to administer and manage records and files

Required knowledge

- workplace relations framework
- workplace relations legislation, including conditions and entitlements
- relevant support organisations
- common and case law
- strategies for encouraging compliance, such as:
 - advice sheets and checklists
 - transparency of workplace arrangements
- roles and responsibilities of stakeholders, including employers, employees, legal representatives, unions, advisory bodies and other government agencies
- procedures and protocols for reporting non-compliance with workplace relations legislation
- consequences of non-compliance with workplace relations legislation
- organisational policies and procedures relating to managing compliance with workplace relations legislation

Evidence Guide

EVIDENCE GUIDE	
<p>The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>Assessment must confirm the ability to:</p> <ul style="list-style-type: none"> • interpret and communicate workplace relations information to diverse stakeholders • identify and assess potential breaches of workplace relations legislation • research specific details of workplace relations legislation • participate in resolution of workplace relations non-compliance issues. <p>Consistency in performance</p> <p>Competency should be demonstrated by managing, or providing consultation to the management, on a range of workplace relations non-compliance issues in a variety of contexts.</p>
Context of and specific resources for assessment	<p>Assessment must comply with:</p> <ul style="list-style-type: none"> • organisational client management and health and safety procedures • applicable regulations and codes. <p>Access may be required to:</p> <ul style="list-style-type: none"> • a simulated work environment • organisational policies and procedures • workplace relations information.
Guidance information for assessment	<p>The following assessment methods are suggested:</p> <ul style="list-style-type: none"> • oral questioning about: <ul style="list-style-type: none"> • conditions and entitlements • types of industrial instruments • common non-compliance issues and strategies for resolution • observation of the candidate assessing a variety of non-compliance issues and proposing options for resolution • feedback from peers and/or supervisor that the candidate consistently applies relevant workplace procedures • review of records completed by candidate or reports of performance.

EVIDENCE GUIDE	
	In all cases, practical assessment should be supported by questions to assess underpinning knowledge and those aspects of competency that are difficult to assess directly. Questioning techniques should suit the language and literacy levels of the candidate.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Workplace relations legislation and guidance information may include:

- legislation, codes and standards relevant to the workplace, such as:
 - Workplace Relations Act 1996
 - workplace relations regulations
 - Fair Work Act 2009
 - Independent Contractors Act 2006
 - other relevant federal, state or territory, and local legislation relating to:
- OHS
- human rights and equal employment opportunity
- industrial relations
- immigration
- superannuation
- workers compensation
- long service leave
 - relevant industry codes of practice
 - note: legislation, codes and standards are subject to change and current relevant versions should be researched
- relevant awards, employment contracts or industrial instruments, such as:
 - employee collective agreement (ECA)
 - union collective agreement (UCA)
 - employee greenfield agreement (EGA)
 - union greenfield agreement (UGA)
 - Australian workplace agreement (AWA)
 - individual transitional employment agreement (ITEA)
 - enterprise bargaining agreement (EBAs)
 - multiple business agreement (MBA)
 - common law contract (CLC)
 - enterprise agreement
 - single enterprise agreement

RANGE STATEMENT	
	<ul style="list-style-type: none"> • multi enterprise agreement • notional agreement preserving state award (NAPSA) • preserved state agreement (PSA) • greenfields agreement • federal award • state award • contract for award-free employees.
<i>Workplace conditions and entitlements</i> may include:	<ul style="list-style-type: none"> • maximum weekly hours of work • leave, including: <ul style="list-style-type: none"> • annual leave • parental leave and related entitlements • personal/carer's leave and compassionate leave • community service leave • long service leave • requests for flexible working arrangements • public holidays • notice of termination and redundancy pay • minimum wages • any other conditions or entitlements contained in industrial instruments, legislation or employment contracts.
<i>Advisory materials</i> may be sourced from:	<ul style="list-style-type: none"> • organisational knowledge sources, such as computer databases • training manuals and modules • appropriate websites.
<i>Stakeholders</i> may include:	<ul style="list-style-type: none"> • employees • employers • interested third parties • trainees and apprentices • employee representatives • employer representatives • union representatives • employer associations • government departments.
<i>Workplace documents</i> may include:	<ul style="list-style-type: none"> • contracts • knowledge articles • written advice • memos

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<p>1. Identify and clarify the nature of workplace disputes.</p>	<p>1.1. Potential and actual <i>workplace disputes</i> are identified, or reported disputes noted, and resolution procedures initiated according to workplace procedures.</p> <p>1.2. Facts and issues surrounding dispute are established through separate consultations with each disputing party and appropriate organisational research.</p> <p>1.3. Relevant information is documented, collated and disseminated to the disputing parties and other appropriate persons according to <i>organisational and legislative requirements</i>.</p>
<p>2. Select and explain dispute-resolution procedures.</p>	<p>2.1. <i>Dispute-resolution procedures</i> are analysed, explained to and discussed with relevant parties.</p> <p>2.2. Dispute-resolution procedures and objectives are negotiated with relevant parties and decisions are verified and documented.</p> <p>2.3. Roles and responsibilities of parties in the dispute-resolution process are determined and explained to participants.</p> <p>2.4. Dispute-resolution procedures are scheduled and initiated according to organisational and legislative requirements.</p> <p>2.5. Dispute-resolution procedures conducted by either statutory agencies or external dispute-resolution providers are analysed and explained.</p> <p>2.6. Referrals to statutory agencies or external dispute-resolution providers are made, as necessary, according to workplace procedures.</p>
<p>3. Implement dispute-resolution procedures.</p>	<p>3.1. Appropriate conduct of disputing parties during dispute-resolution procedures is explained and confirmed as understood.</p> <p>3.2. <i>Communication strategies</i> are employed during the resolution process to ensure timely progress and promote positive outcomes.</p> <p>3.3. Negotiation between parties is facilitated and supported to encourage agreement to a course of action.</p> <p>3.4. Agreed courses of action are clarified, documented and validated by all parties or reasons for failure to agree are documented and dispute-resolution procedures are closed.</p>

ELEMENT	PERFORMANCE CRITERIA
	3.5. Unresolved disputes are referred to appropriate tribunal or person according to organisational and legislative requirements.
4. Report on and evaluate resolution procedures.	4.1. Outcomes of dispute-resolution procedures are reported to relevant parties according to organisational and legislative requirements. 4.2. Outcomes are compared to objectives and any issues preventing satisfactory resolution are reviewed. 4.3. Strategies for improving the effectiveness of dispute-resolution procedures are discussed with relevant parties and reported according to organisational procedures.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- conflict-management skills to manage negotiations between opposing parties
- self-management skills to:
 - remain impartial and objective
 - apply information and protocols in the context of workplace relations dispute-resolution procedures
 - apply procedures relating to OHS in the context of workplace communication
- analytical skills to:
 - analyse problems
 - clarify the nature of a workplace dispute and identify appropriate resolution procedures
- interpersonal and communication skills to facilitate complex discussions and negotiations in potentially contentious situations
- language and literacy skills to:
 - research complex documents
 - communicate complex ideas and information
 - record and report on processes and outcomes

Required knowledge

- workplace relations framework
- workplace relations legislation, including conditions and entitlements
- common and case law
- roles and responsibilities of stakeholders, including employers, employees, legal representatives, unions, advisory bodies and other government agencies
- workplace policies and procedures in relation to the application of dispute-resolution procedures
- conflict resolution techniques
- legal rights and responsibilities of the parties involved in the workplace dispute

Evidence Guide

EVIDENCE GUIDE	
<p>The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
Overview of assessment	<p>Competency must be demonstrated by the application of dispute resolution procedures</p>
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>Assessment must confirm the ability to:</p> <ul style="list-style-type: none"> • analyse workplace disputes • apply dispute-resolution procedures from initiation to closure • apply appropriate communication strategies to facilitate resolution • interpret and communicate workplace relations information • evaluate processes and contribute to process improvement. <p>Consistency in performance</p> <p>Competency should be demonstrated by the application of a range of dispute-resolution procedures to different disputes involving various types of industrial instruments and a range of conditions and entitlement issues.</p>
Context of and specific resources for assessment	<p>Assessment must comply with:</p> <ul style="list-style-type: none"> • organisational client management and health and safety procedures • applicable regulations and codes. <p>Access may be required to:</p> <ul style="list-style-type: none"> • a simulated work environment • organisational policies and procedures • workplace relations information.
Guidance information for assessment	<p>The following assessment methods are suggested:</p> <ul style="list-style-type: none"> • questioning about types and application of dispute-resolution procedures and the processes involved in each • observation of the candidate applying workplace relations dispute-resolution procedures in a variety of contexts • feedback from peers and/or supervisor that the candidate consistently applies relevant workplace procedures • review of records completed by candidate or reports of performance. <p>In all cases, practical assessment should be supported by questions to</p>

EVIDENCE GUIDE	
	assess underpinning knowledge and those aspects of competency that are difficult to assess directly. Questioning techniques should suit the language and literacy levels of the candidate.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Workplace disputes may include:

- any disagreement in industrial relations between relevant stakeholders regarding such things as:
 - wages
 - conditions of employment
 - employee entitlements
 - termination of employment
 - industrial action
 - enforcement and compliance with workplace laws
 - coercion and duress
 - OHS.

Organisational and legislative requirements may include:

- OHS procedures
- dispute-resolution procedures
- legislation, codes and standards relevant to the workplace, such as:
 - Workplace Relations Act 1996
 - workplace relations regulations
 - Fair Work Act 2009
 - Independent Contractors Act 2006
 - other relevant federal, state or territory, and local legislation relating to:
- OHS
- human rights and equal employment opportunity
- industrial relations
- immigration
- superannuation
- workers compensation
- long service leave
 - relevant industry codes of practice
 - note: legislation, codes and standards are subject to change and current relevant versions should be researched
- relevant awards, employment contracts or industrial

RANGE STATEMENT	
	<p>instruments, such as:</p> <ul style="list-style-type: none"> • employee collective agreement (ECA) • union collective agreement (UCA) • employee greenfield agreement (EGA) • union greenfield agreement (UGA) • Australian workplace agreement(AWA) • individual transitional employment agreement (ITEA) • enterprise bargaining agreement (EBAs) • enterprise agreement • single enterprise agreement • multi enterprise agreement • notional agreement preserving state award (NAPSA) • preserved state agreement (PSA) • common law contract (CLC) • federal award • state award • contract for award-free employees.
<i>Dispute-resolution procedures</i> may include:	<ul style="list-style-type: none"> • conferencing • mediation • assisted negotiation • assisted voluntary resolution (AVR) • neutral evaluation • case appraisal • conciliation • arbitration • services or procedures specified in the regulations.
<i>Communication strategies</i> may include:	<ul style="list-style-type: none"> • active listening • negotiating • dealing with conflicting information • paraphrasing • questioning skills • adapting communication style to suit audience • substituting technical jargon with plain English • assertive communication • using conflict resolution strategies.
