- holding/suspense accounts
- tax related
- claims

Systems controls:

protect against the corruption of payee name,
address and/or bank account details

Payment documentation/facilities may include:

invoices
confirmation of receipt
stop payments
payment requests
delivery dockets
cheque cancellations
batch records
periodic approvals
authorisation slips
signature verifications

Industry and legislative requirements may cover:

Australian Accounting Standards
relevant Insurance Act
industry codes of practice
Consumer Credit legislation
Privacy Act
Taxation Act
Australian Securities and Investments
Commission (ASIC) Code
Trade Practices Act
Stamp Duties Act
occupational health and safety (OH&S) acts
and guidelines

INTRODUCTION

Unit Descriptor	This unit describes the functions involved in processing financial journal entries. This unit replaces FNBFIN65A.
Application of the Unit	This unit requires the application of skills and knowledge required to process journal entries according to organisational, industry and legislative requirements. The unit can be applied to all sectors of the financial services sector where the entering of journal entries is required. The unit has application to any job function where accounting or bookkeeping is an aspect of the job function.
Unit Sector	No sector assigned

ELEMENT

PERFORMANCE CRITERIA

1. Check and verify supporting documentation	1.1 Supporting documentation is examined to establish accuracy and completeness 1.2 Supporting documentation is examined to ensure authorisation by appropriate level
2. Prepare journal	2.1 Journal is accurate, complete and prepared within company timelines
3. Authorise journal	3.1 Journal is authorised in accordance with company policy and procedure
4. Enter data into system	4.1 Data is entered into system accurately and in accordance with company input standards 4.2 Transaction is correctly allocated to system and account 4.3 Related systems are updated to maintain integrity of relationships between financial systems 4.4 Data entry is undertaken in accordance with relevant health and safety requirements

5. Check journal processing report
- 5.1 Where appropriate, processing report is examined for accuracy and reconciled in accordance with relevant company policy and procedures, accounting principles and practices
 - 5.2 Entries requiring alteration are identified and adjusting entries processed accurately in accordance with company policy and procedures
6. File documentation
- 6.1 Documentation is filed promptly and in accordance with company policy and procedures, industry and legislative requirements
 - 6.2 Filed documentation is easily accessible and traceable

REQUIRED SKILLS AND KNOWLEDGE

This describes the essential skills and knowledge and their level, required for this unit.

Knowledge requirements include:

- company policy and procedures
- knowledge or awareness of relevant acts and regulations
- legal systems and procedures
- industry codes of practice
- computer systems
- procedure writing

Skills requirements include:

- computerised spreadsheet and database
- data analysis and interpretation
- evaluative and general analytical skills
- negotiation and interpersonal skills

RANGE STATEMENT

The Range Statement relates to the unit of competency as a whole. It allows for different work environments and situations that will affect performance.

The following variables may be present with training and assessment depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts. If bold italicised text is shown in Performance Criteria, details of the text are provided in the Range Statement.

Supporting documentation may include information that supports the transaction such as:

- suspense reports
- reconciliations

Accurate and complete may mean:

- meaningful notation
- effective date specified
- correct allocation
- balanced transaction

Company policy and procedures may include:

- operations manuals
- internal control guidelines
- computer system documentation

Input standards may include:

- speed requirements

Industry and legislative requirements may cover:

- Australian Accounting Standards
- relevant Insurance Act
- Consumer Credit legislation
- Privacy Act
- Taxation Act
- industry codes of practice
- Australian Securities and Investments Commission (ASIC) Code
- Trade Practices Act
- Stamp Duties Act
- occupational health and safety (OH&S) acts and guidelines

EVIDENCE STATEMENT

Assessment of performance requirements in the unit should be undertaken in an industry context. The Evidence Guide identifies the critical aspects, knowledge and skills to be demonstrated to confirm competency for the unit. Competency is demonstrated by performance of all stated criteria including the Range of Variables applicable to the workplace.

Overview of assessment requirements	<p>To achieve competency in this unit, a person must be able to demonstrate:</p> <ul style="list-style-type: none">• knowledge of organisational policies and procedures for processing journal entries• knowledge of industry and legislative requirements for processing journal entries• ability to check and verify supporting documentation• ability to prepare journals ability to authorise journals• ability to enter data into organisational accounting systems• ability to check journal processing reports• ability to file documentation
Evidence required for demonstration of consistent performance:	<ul style="list-style-type: none">• Competence in this unit must be assessed over a period of time in order to ensure consistency of performance over the Range of Variables and contexts applicable to the work environment.
Delivery/relationship to other units:	<ul style="list-style-type: none">• This unit may be assessed on its own or it may be assessed with other units that cover related skills and knowledge.• Evidence is most relevant when provided through an integrated activity which combines the elements of competency for the unit, or a cluster of units of competency.
Method of assessment:	<ul style="list-style-type: none">• For valid and reliable assessment of this unit, evidence must be gathered through a range of methods to indicate consistent performance.• Assessment of this unit of competence will usually include observation of processes and procedures, oral and/or written questioning on underpinning knowledge and skills and other methods as required.
Context of assessment:	<ul style="list-style-type: none">• Assessment of performance requirements in this unit should be undertaken within the financial services industry context and should cover aspects of personal/financial responsibility

and accountability.

- Aspects of competency, including the attainment of relevant knowledge and skills, may be assessed in a relevant workplace, a closely simulated work environment, or other appropriate means that clearly meet industry competency requirements.

Resources required for assessment:

- Unless otherwise specified, there are no significant resource implications for assessment of this unit, apart from access to a relevant workplace or closely simulated office environment and the use of a range of office equipment, technology and consumables. These may include standard commercial computer hardware, software, telephones, facsimiles, and other relevant office equipment.

KEY COMPETENCY LEVELS

The seven key competencies represent generic skills considered for effective work participation. The numbering against each of the key competencies indicates the performance level required in this unit.

Performance Level 1 - at this level, the candidate is required to undertake tasks effectively.

Performance Level 2 - at this level, the candidate is required to manage tasks. Performance

Level 3 - at this level, the candidate is required to use concepts for evaluating and reshaping

Key Competency Level Example of Application

Communicating ideas and information	2	Communication of ideas and information will be applied through the integrity of journal entries recorded into the organisational accounting system.
Collecting analysing and organising information	3	Verifying journal entry information will require information and documentation to be collected, analysed and organised.
Planning and organising activities	2	Activities for filing journal documentation and information will be filed in accordance with organisational policies and procedures.
Working with others and in teams	2	The process of both verifying journal entries and the process of altering journal entries according to organisational policies and procedures will require the involvement of other colleagues, thus requiring the application of teamwork.
Using mathematical ideas and techniques	3	Mathematical ideas and techniques will be applied during the verification phase where journal entries, payment amounts are checked against supporting documentation and authority limits.
Solving problems	3	The process of checking journal processing reports for discrepancies and errors will require problem solving skills to be applied.
Using technology	2	Technology will be applied through the utilisation of computers, organisational accounting software systems, office equipment and telecommunication devices.

INTRODUCTION

Unit Descriptor	<p>This unit describes the functions involved in reconciling and monitoring a financial accounts receivable system.</p> <p>This unit replaces FNBFIN66A</p>
Application of the Unit	<p>This unit requires the application of skills and knowledge required to reconcile and monitor accounts receivables. The unit encompasses reviewing accounts receivable processes, identifying bad and doubtful debts, reviewing compliance terms and conditions, planning a recovery action and preparing reports and filing documentation.</p> <p>This unit may be applied to a range of financial services sectors and can be utilised by job positions with an accounts receivable function.</p>
Unit Sector	No sector assigned

ELEMENT

PERFORMANCE CRITERIA

- | | |
|---------------------------------------|--|
| 1. Review accounts receivable process | <p>1.1 Receipts entered into accounts receivable system are checked for accuracy, consistency and thoroughness</p> <p>1.2 Incorrect entries are identified and accurately recorded according to type and source of receipt</p> <p>1.3 Discrepancies between monies owed and monies paid are identified and investigated according to company policy and established procedures</p> <p>1.4 Receipts entered into accounts receivable system are amended according to established procedures</p> |
| 2. Identify bad and doubtful debts | <p>2.1 Debtor's ledger is regularly reviewed in accordance with company policy and guidelines to identify outstanding monies</p> <p>2.2 Further information required is sought from relevant sources</p> <p>2.3 Bad or doubtful debt status is verified through liaison with debtors</p> <p>2.4 Reporting procedures and appropriate documentation for bad and doubtful debts is completed in accordance with company policy and guidelines</p> |
| 3. Review compliance | <p>3.1 Clients in default of trading terms are correctly identified</p> |

- with terms and conditions
- according to company operating procedures
- 3.2 Clients in default are contacted promptly and courteously to make satisfactory arrangements to pay monies outstanding
- 3.3 Monies owing that constitute breaches of company credit policy are actioned in accordance with company policy and procedures
4. Plan recovery action
- 4.1 Previous activities and communication with clients are thoroughly reviewed to establish adequacy of follow-up procedures, and whether all usual company recovery avenues have been exhausted
- 4.2 Plans to pursue debt recovery or to initiate legal action are developed in accordance with company policy and guidelines
- 4.3 Measures to collect monies are completed within company guidelines and timelines
5. Prepare reports and file documentation
- 5.1 Reports are prepared which document accounts receivable debt recovery type, cause and recovery plan
- 5.2 Reports are distributed to supervisors, managers and other relevant parties
- 5.3 Documentation is filed promptly in accordance with company policy and procedures

REQUIRED SKILLS AND KNOWLEDGE

This describes the essential skills and knowledge and their level, required for this unit.

- Knowledge requirements include:
- company policy, guidelines and procedures
 - information technology and communication systems
 - industry compliance requirements
 - industry codes of practice
 - knowledge or awareness of legal systems and procedures and relevant acts or regulations

- Skills requirements include:
- computing, including spreadsheets and databases
 - literacy and numeracy skills
 - analytical skills
 - attention to detail
 - interpersonal and customer relations

- telephone skills
- letter writing
- report writing
- record keeping

RANGE STATEMENT

The Range Statement relates to the unit of competency as a whole. It allows for different work environments and situations that will affect performance.

The following variables may be present with training and assessment depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts. If bold italicised text is shown in Performance Criteria, details of the text are provided in the Range Statement.

Receipts may include:

- cheques (personal, bank)
- credit cards (direct, mail, telephone)
- postal order
- bankers orders
- cash
- direct debits
- direct drawing
- cash journal entry

Discrepancies between monies owed and monies paid may occur as a result of:

- part payments
- under payments
- deduction of brokers/agents commissions
- key stroke errors
- over payments
- termination of policies
- incorrect account allocation
- system errors

Bad or doubtful debts are identified through:

- dishonoured cheques
- Australian Securities and Investments Commission (ASIC) action
- banks foregoing overdrafts
- closure of business
- notices of administration
- returned mail
- letters from solicitors/accountants
- sheriff notices/advertisements
- utilities being cut off
- gazette listings

Clients may include:

- policy holders

- agents
 - customers
 - solicitors
 - brokers
 - intermediaries
 - accountants
- Company policy, procedures and guidelines may include:
- overall company goals and objectives
 - internal control guidelines
 - trading terms and credit limits
 - suspension of credit facilities
 - operations manuals
 - computer system documentation
 - legal obligations
- Recovery action and measures to collect monies may include:
- liaison with clients
 - letters of notice
 - advice to supervisors/managers/legal officers
 - return of goods
 - legal action
 - plaint
 - dunning letters
 - letters of demand without prejudice
 - third party intervention
 - summons
 - write-offs
- Reports may be periodic or on demand, manual or computer generated, and may include:
- consumer statements
 - statistical/financial or management reports
 - user reports
 - legislative requirements

EVIDENCE GUIDE

Assessment of performance requirements in the unit should be undertaken in an industry context. The Evidence Guide identifies the critical aspects, knowledge and skills to be demonstrated to confirm competency for the unit. Competency is demonstrated by performance of all stated criteria including the Range of Variables applicable to the workplace.

Overview of assessment requirements	<p>To achieve competency in this unit, a person must be able to demonstrate:</p> <ul style="list-style-type: none">• knowledge of company policies and procedures for monitoring accounts receivable• knowledge of industry compliance requirements• knowledge of relevant legislation• ability to review accounts receivable process• ability to identify bad and doubtful debts• ability to review compliance with terms and conditions• ability to plan recovery actions• ability to prepare reports and file documentation
Evidence required for demonstration of consistent performance:	<ul style="list-style-type: none">• Competence in this unit must be assessed over a period of time in order to ensure consistency of performance over the Range of Variables and contexts applicable to the work environment.
Delivery/relationship to other units:	<ul style="list-style-type: none">• This unit may be assessed on its own or it may be assessed with other units that cover related skills and knowledge.• Evidence is most relevant when provided through an integrated activity which combines the elements of competency for the unit, or a cluster of units of competency.
Method of assessment:	<ul style="list-style-type: none">• For valid and reliable assessment of this unit, evidence must be gathered through a range of methods to indicate consistent performance.• Assessment of this unit of competence will usually include observation of processes and procedures, oral and/or written questioning on underpinning knowledge and skills and other methods as required.
Context of assessment:	<ul style="list-style-type: none">• Assessment of performance requirements in this unit should be undertaken within the financial services industry context and should cover aspects of personal/financial responsibility and accountability.• Aspects of competency, including the attainment of relevant

knowledge and skills, may be assessed in a relevant workplace, a closely simulated work environment, or other appropriate means that clearly meet industry competency requirements.

Resources required for assessment:

- Unless otherwise specified, there are no significant resource implications for assessment of this unit, apart from access to a relevant workplace or closely simulated office environment and the use of a range of office equipment, technology and consumables. These may include standard commercial computer hardware, software, telephones, facsimiles, and other relevant office equipment.

KEY COMPETENCY LEVELS

The seven key competencies represent generic skills considered for effective work participation. The numbering against each of the key competencies indicates the performance level required in this unit.

Performance Level 1 - at this level, the candidate is required to undertake tasks effectively.

Performance Level 2 - at this level, the candidate is required to manage tasks. Performance

Level 3 - at this level, the candidate is required to use concepts for evaluating and reshaping

Key Competency	Performance Level	Example of Application
Communicating ideas and information	3	The process of obtaining additional information and clarification on debts to determine if they should be classified as a doubtful or bad debt will require the communication and liaison with other team members and debtors.
Collecting analysing and organising information	3	During the recovery action phase previous activities and communication with clients will be reviewed and followed-up, and then reviewed and organised to determine which course of action will be taken.
Planning and organising activities	2	The process of identifying possible and doubtful debts will be completed in accordance with company policy and guidelines. The process of planning the recovery of debts will be planned in accordance with legal advice and company policies.
Working with others and in teams	2	The process of seeking further information to determine if a debt can be classified as a doubtful debt or bad debt will require teamwork with other colleagues and debtors.
Using mathematical ideas and techniques	3	The process of calculating and determining if an outstanding debt is a bad or doubtful debt will require the application of mathematical ideas and techniques.
Solving problems	3	Reviewing the debtor's ledgers in accordance with company guidelines to identify outstanding monies, as bad or doubtful debts, will require the application of problem solving skills.
Using technology	2	Technology can be applied through the utilisation of computers, organisational accounting software

		systems and telecommunication devices.

INTRODUCTION

Unit Descriptor	<p>This unit describes the functions involved in evaluating and authorising payment requests.</p> <p>This unit replaces FNBFIN62A.</p>
Application of the Unit	<p>This unit requires the application of skills and knowledge required to evaluate and authorise payment requests.</p> <p>The unit encompasses verifying validity and accuracy of payment requests, preparing payment documentation and authorising payments.</p> <p>The unit has application to those job functions that have responsibility of evaluating and authorising payment requests.</p> <p>The unit has application across the wider financial services sector ranging from the insurance sector, retail banking sector and credit unions etc.</p>
Unit Sector	No sector assigned

ELEMENT

PERFORMANCE CRITERIA

1. Verify validity and accuracy of payment request	<p>1.1 Payment requests are matched to order or other supporting information to ensure validity of payment and to comply with internal control requirements</p> <p>1.2 Supporting documentation is checked to ensure it is correct and complete</p> <p>1.3 Authorisation of request is confirmed in accordance with company policy and procedures</p> <p>1.4 Discrepancies are followed up without delay</p> <p>1.5 Confirmation of goods and/or services supply is obtained where required to validate request for payment</p>
2. Prepare payment documentation	<p>2.1 All payments are coded and allocated to accounts accurately</p> <p>2.2 All payments are matched against invoice or other relevant documentation</p> <p>2.3 All documentation is completed in accordance with company policy and procedures</p>

3. Authorise payment
- 3.1 All payments are authorised accurately and according to company policy and procedures
 - 3.2 Funds are not released prior to authorisation of payment in accordance with company procedures
 - 3.3 Payment authorisations are within relevant authority levels and follow relevant company policy and procedures and industry and legislative requirements

REQUIRED SKILLS AND KNOWLEDGE

This describes the essential skills and knowledge and their level, required for this unit.

Knowledge requirements include:

- company policy and procedures
- knowledge or awareness of relevant acts and regulations
- legal systems and procedures
- industry codes of practice
- computer systems
- procedure writing

Skills requirements include:

- computerised spreadsheet and database
- data analysis and interpretation
- evaluative and general analytical skills
- negotiation and interpersonal skills

RANGE STATEMENT

The Range Statement relates to the unit of competency as a whole. It allows for different work environments and situations that will affect performance.

The following variables may be present with training and assessment depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts. If bold italicised text is shown in Performance Criteria, details of the text are provided in the Range Statement.

Payment requests may be:

- claims
- commissions
- return of premium and reinsurance premium
- management expenses
- periodic payments
- sundry expenses

Supporting documentation may include:

- invoice
- cheque requisitions

Coded and allocated to accounts may include:

- company or system chart of accounts
- cost centres
- product or service allocation

Company policy and procedures may include:

- operations manuals
- internal control guidelines
- computer system documentation

Industry and legislative requirements may cover:

- Australian Accounting Standards
- relevant Insurance Act
- Consumer Credit legislation
- Privacy Act
- Taxation Act
- industry code of practice
- Australian Securities and Investments Commission (ASIC) Code
- Trade Practices Act
- Stamp Duties Act

Performance Level 1 - at this level, the candidate is required to undertake tasks effectively.

Performance Level 2 - at this level, the candidate is required to manage tasks. Performance

Level 3 - at this level, the candidate is required to use concepts for evaluating and reshaping tasks.

Key Competency	Performance Level	Example of Application
Communicating ideas and information	2	Communication of ideas and information during the authorisation of payment requests will be made in writing. Payment request information is verified and then authorisation is granted.
Collecting analysing and organising information	3	The process of verifying and validating payment requests will required information to be collected, such as invoices and cheque requisitions, this information will be analysed in order to support the validity of the payment.
Planning and organising activities	2	Payment request activities are planned and organised according to organisational policies and industry and legislative requirements.
Working with others and in teams	2	The process of confirming authorisation requests and following up discrepancies will require teamwork with other departments and team members.
Using mathematical ideas and techniques	3	The process of preparing payment documentation and matching amounts against invoiced amounts will require the application of mathematical ideas and techniques.
Solving problems	2	The process of following up discrepancies prior to authorising payment will require the application of problem solving skills.
Using technology	2	The use of technology will be applied through the utilisation of computers, organisational accounting and payment software systems and telecommunication devices.

FNSICGEN501B Produce research reports and make presentations

Unit Descriptor

This unit covers the skills and knowledge required for producing workplace research reports and presenting these reports to appropriate personnel.

This unit covers the skills and knowledge required for producing workplace research reports and presenting these reports to appropriate personnel.

Application of the Unit

This unit requires the application of the skills and knowledge needed to collect information on which the report is based, the organisation and analysis of the material collected and the ability to write the report using effective and appropriate language, make recommendations based on the information collected and present the results.

The unit has application across all sectors of the financial services industry. The unit does not apply to computer generated reports that do not require individual research. Computer generated reports may be used to contribute to the wider research activity described in this unit.

Elements and Performance Criteria

Elements and Performance Criteria

Element	Performance Criteria
1 Clarify the purpose of the report	<p>1.1 The purpose of the report is clarified with the person requesting the report</p> <p>1.2 The audience for the report is determined</p> <p>1.3 The scope of the report is determined and time allowed for the research and production of the report are discussed and established</p> <p>1.4 Format, style and deadline for delivery of the report are agreed</p>
2 Collect information	<p>2.1 Sources of information are identified and strategies for obtaining the information established</p> <p>2.2 Information is collected from a range of sources using appropriate techniques</p> <p>2.3 Accurate records of information and sources are maintained</p>

- 3 Analyse research findings
 - 3.1 Data is analysed and interpreted
 - 3.2 Accuracy and completeness of information is checked
 - 3.3 Key issues for further research or discussion are identified
 - 3.4 Conclusions and recommendations are developed
- 4 Report on research findings
 - 4.1 Information on which the conclusions are based is organised in a clear and logical format in line within report writing conventions
 - 4.2 Draft report is prepared for discussion and review
 - 4.3 Draft report is edited in light of comments and is presented to appropriate personnel
 - 4.4 Deadlines for provision of materials are met
- 5 Make presentations
 - 5.1 Presentations are relevant and appropriately researched
 - 5.2 Sources of information are acknowledged
 - 5.3 Presentations are clear and sequential and delivered within a predetermined time, using appropriate **methods and equipment** to enhance the presentation
 - 5.4 Questions from the audience are responded to in a manner consistent with organisation standards

Required Skills and Knowledge

REQUIRED KNOWLEDGE&SKILLS

Knowledge requirements include:

research techniques
conventions of report writing
presentation approaches and principles

Skills requirements include:

time management skills
research skills
organisation and analysis skills
communication skills
ability to organise materials and to write clearly and logically
presentation skills

Evidence Guide

EVIDENCE GUIDE

Assessment of performance requirements in the unit should be undertaken in an industry context. The Evidence Guide identifies the critical aspects, knowledge and skills to be demonstrated to confirm competency for the unit. Competency is demonstrated by performance of all stated criteria including the Range Statement applicable to the workplace.

Overview of assessment requirements

To achieve competency in this unit, a person must be able to demonstrate:

the ability to carry out all phases of the report writing process from defining the purpose and scope, collecting and analysing the information and producing the final product and presenting the results in a formal situation

Critical aspects of evidence

Evidence required for demonstration of consistent performance:

Competence in this unit must be assessed over a period of time in order to ensure consistency of performance over the Range Statement and contexts applicable to the work environment.

Delivery/relationship to other units:

This unit may be assessed on its own or it may be assessed with other units that cover related skills and knowledge.

Evidence is most relevant when provided through an integrated activity which combines the elements of competency for the unit, or a cluster of units of competency.

Assessment requirements

Method of assessment:

For valid and reliable assessment of this unit, evidence should be gathered through a range of methods to indicate consistent performance.

Assessment of this unit of competence will usually include observation of processes and procedures, oral and/or written questioning on underpinning knowledge and skills and other methods as required.

Context of assessment:

This unit may be assessed in the workplace, in an educational institution or in a combination of these two settings.

Resources required for assessment:

Assessment of this unit of competence requires access to company documents and information systems, research tools such as computers and libraries, and access to relevant personnel as required by the topic of the report.

Range Statement

The Range Statement relates to the unit of competency as a whole. It allows for different work environments and situations that will affect performance.

The following variables may be present with training and assessment depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts. If **bold italicised** text is shown in Performance Criteria, details of the text are provided in the Range Statement.

Purpose may include:

statements to investors
statistical reports
reports to management
contributions to annual reports
reports covering legislative requirements
reports to investors

Audience may include:	management shareholders consumers government bodies customers
Scope of the report may include:	limited scope or more global as defined in discussion with person requiring the report
Format, style may include:	formal or informal following report writing conventions summary report or more detailed acknowledgement of sources
Range of sources may be:	company documents and databases Australian Bureau of Standards (ABS) data libraries internet industry and professional organisations
Appropriate techniques may include:	library research Internet searching accessing company data discussions with experts (internal, external)
Methods and equipment may include:	data projector (power point presentation) overhead transparencies slides sets of notes exhibits

Elements and Performance Criteria

Elements and Performance Criteria

Element	Performance Criteria
1 Identify business and industry issues that require policy and procedure documentation	1.1 Issues are identified based on information on business processes, industry indicators and statutory and legislative requirements
	1.2 Vulnerable areas are identified to enable the impact of financial loss and non-compliance to be assessed
	1.3 New activities are evaluated to gauge the impact on policy and procedures
	1.4 Existing activities are monitored to establish their impact on policy and procedures
2 Research requirements for policy and operating procedures	2.1 Research is conducted thoroughly, including if necessary seeking advice from external legal personnel and consultants, to ensure that all statutory and legal obligations are met
	2.2 All relevant company personnel are consulted as appropriate to compile a clear picture of policy needs and perspectives
	2.3 Issues for policy and procedures are ranked in order of priority relative to business performance and compliance requirements
3 Formulate and document policy and procedures	3.1 Policy documentation is written in plain English, without unnecessary jargon and documented in an objective manner
	3.2 Verification of policy and procedures is thoroughly completed with company staff to ensure quality of

outcomes against established needs

- 4 Implement policy and procedures
 - 4.1 Policy documents are disseminated to all relevant staff in **an appropriate form**
 - 4.2 Relevant training is provided to ensure consistent implementation of new or amended policy and procedures
 - 4.3 Timetable is established to ensure policy and procedures are implemented in an orderly and coordinated way
- 5 Monitor and review compliance with policy statement and operating procedures
 - 5.1 Processes are established for regular monitoring of policy and procedures to ensure company and industry requirements are met
 - 5.2 Policy is monitored against Key Performance Indicators (KPIs) and company targets to evaluate currency and ongoing validity in terms of agreed company policy needs
 - 5.3 Required changes are implemented following comprehensive **testing** in a programmed way to ensure expected outcome is delivered

Required Skills and Knowledge

REQUIRED KNOWLEDGE&SKILLS

Knowledge requirements include:

existing company policy and procedures
knowledge or awareness of relevant acts and regulations
legal systems and procedures
industry best practice
industry codes of practice
computer systems
procedure writing

Skills requirements include:

organisational skills
research skills
basic administration methods
negotiation skills
writing
strong interpersonal skills

Evidence Guide

EVIDENCE GUIDE

Assessment of performance requirements in the unit should be undertaken in an industry context. The Evidence Guide identifies the critical aspects, knowledge and skills to be demonstrated to confirm competency for the unit. Competency is demonstrated by performance of all stated criteria including the Range Statement applicable to the workplace.

Overview of assessment requirements

To achieve competency in this unit, a person must be able to demonstrate:

a comprehensive understanding and ability to implement company policy

sound policy and procedures development skills

ability to identify lack of compliance and areas of mismanagement

strong communication skills to clarify and disseminate information

Critical aspects of evidence

Evidence required for demonstration of consistent performance:

Competence in this unit must be assessed over a period of time to ensure consistency of performance over the Range Statement and contexts applicable to the work environment.

Delivery/assessment relationship to other units:

This unit may be assessed on its own or it may be assessed with other units that cover related skills and knowledge.

Evidence is most relevant when provided through an integrated activity that combines the elements of competency for the unit, or a cluster of units of competency.

Assessment requirements

Method of assessment:

For valid and reliable assessment of this unit, evidence should be gathered through a range of methods to indicate consistent performance.

Assessment of this unit of competency will usually include observation of processes and procedures, oral and/or written questioning on underpinning knowledge and skills and other methods as required.

Context of assessment:

Assessment of performance requirements in this unit should be undertaken within the financial services industry context.

Aspects of competency, including the attainment of relevant knowledge and skills, may be assessed in a relevant workplace, a closely simulated work environment, or other appropriate means that clearly meet industry competency requirements.

Resources required for assessment:

Unless otherwise specified, there are no significant resource implications for assessment of this unit, apart from access to a relevant workplace or closely simulated office environment and the use of a range of office equipment, technology and consumables. These may include standard commercial computer hardware, software, telephones, facsimiles, and other relevant office equipment.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that will affect performance.

The following variables may be present with training and assessment depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts. If **bold italicised** text is shown in Performance Criteria, details of the text are provided in the Range Statement.

Industry indicators may include, **but are not limited to:**

changing trading conditions
new methods and equipment available
changing trading and paying habits of customers
changing legislation governing business
economic, statistical and other information obtained from external bodies including industry bodies

Statutory and legislative requirements may cover:

Australian Accounting Standards
relevant Insurance Act
Consumer Credit legislation
industry codes of practice
Australian Securities and Companies Code
Trade Practices Act
Privacy Act
Credit Act/Code
Fair Trading Act
Companies and Securities Code
Partnership Act
Corporations Law
Magistrate's Court Act
Small Debts Court Act or equivalent
Evidence Reproduction Act or equivalent
Bills of Sale and Other Instruments Act
Cheques and Payment Orders Act
equal opportunities
Criminal Act
Sales Tax Legislation
appropriate Sections of the Taxation Act

	Stamp Duties Act
	Sales of Goods Act
	relevant occupational health and safety (OH&S) Act
Policy and procedures may cover:	overall company goals and objectives
	operating procedures
	operations manuals
	computer system documentation
	internal control guidelines
	legal obligations and framework
	information on liaison, information dissemination and marketing
	trading terms
	training, development and supervision of staff
	procedure and guidelines for daily functions such as maintenance of files
	gathering and evaluation of information
Methods by which personnel are Consulted may include, but are not limited to:	personal interviews
	written surveys
	informal or formal meetings
	feedback received via email or fax
An appropriate form may include, but is not limited to:	schedules
	manuals
	training materials
	administrative guidelines
Testing can include:	running current system and new/changed system in parallel for a defined period

Unit Sector(s)

Not applicable.

Relationship to other units

This unit replaces FNSICORG506A.

This unit replaces FNSICORG506A.

Modification History

Not Available

INTRODUCTION

Unit Descriptor	This unit describes those functions associated with the maintenance of accounting systems, including the general ledger. This unit replaces FNARFS27A and FNBFIN64A.
Prerequisite Unit(s)	FNSICACC301A Administer accounts payable FNSICORG301A Administer fixed asset register FNSRETA310A Maintain main bank account FNSRETA309A Balance cash holdings
Application of the Unit	This unit requires the application of general accounting knowledge and reporting skills. It may be applied within the accounts or back office section of most financial institutions.
Unit Sector	No sector assigned

ELEMENT

PERFORMANCE CRITERIA

1. Reconcile general ledger accounts	<p>1.1 General ledger is reconciled accurately and regularly to subsidiary ledgers as determined by organisation's policies and procedures</p> <p>1.2 Outstanding items on reconciliation are resolved and corrections are made to the relevant accounts to ensure the integrity of the financial systems</p> <p>1.3 Bank accounts are reconciled and suspense accounts are cleared to ensure reliability of the general ledger</p> <p>1.4 Completed reconciliation is authorised by appropriate personnel according to organisation's policies and procedures</p>
2. Reconcile general ledger to related systems	<p>2.1 Related system entries are processed promptly</p> <p>2.2 Interfaces from related systems are reconciled accurately in accordance with organisation's policies and procedures</p> <p>2.3 Validity and accuracy of related systems is verified to maintain integrity of accounting systems</p>
3. Back-up systems	3.1 System back-up follows organisation schedule precisely

- 3.2 Back-ups are verified and stored in accessible location to protect integrity of system information and in accordance with audit and security requirements
4. Monitor and review integrity of financial systems
- 4.1 Processes are established to regularly monitor financial systems to ensure reliability, integrity and compliance with relevant regulations
- 4.2 Variations from organisation's policies and procedures are identified and assessed to determine impact on financial system and actions required
- 4.3 User feedback is encouraged and reviewed to determine impact on financial system and actions required
5. Update systems for management requirements and regulations
- 5.1 Estimates of costs associated with changes are made in order to assess cost effectiveness
- 5.2 System updates are tested to ensure they reflect changed requirements
- 5.3 Update is comprehensive and maintains integrity of accounting systems
- 5.4 Changes are applied consistently to all affected systems to ensure report information remains valid
- 5.5 Changed or updated documentation is circulated without delay to ensure all relevant parties are fully informed of variations

REQUIRED SKILLS AND KNOWLEDGE

This describes the essential skills and knowledge and their level, required for this unit.

- Knowledge requirements include:
- accounting principles and practices
 - use of financial spreadsheets
 - systems knowledge and familiarity
 - introductory knowledge of the finance industry, accounting principles, business communication, business law and business accounting
 - knowledge of working environment
 - information technology
- Skills requirements include:
- accounting and financial management skills
 - skills in using financial spreadsheets

- reporting skills
- system back-up skills
- financial modelling skills
- written and verbal communication skills
- analytical skills
- problem solving skills
- numeracy skills
- planning and organising skills
- monitoring skills

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that will affect performance.

The following variables may be present with training and assessment depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts. If bold italicised text is shown in Performance Criteria, details of the text are provided in the Range Statement.

EVIDENCE GUIDE

Assessment of performance requirements in the unit should be undertaken in an industry context. The Evidence Guide identifies the critical aspects, knowledge and skills to be demonstrated to confirm competency for the unit. Competency is demonstrated by performance of all stated criteria including the Range of Variables applicable to the workplace.

Overview of assessment requirements	<p>To achieve competency in this unit, a person must be able to demonstrate:</p> <ul style="list-style-type: none">• thorough checking of reconciliation items with related system entries detailed knowledge of relevant legislation• comprehensive knowledge of accounting procedures and practices• sound communication skills in liaising with departmental managers and creditors/ suppliers• thorough understanding of bank account reconciliation process• ability to back-up and update financial systems• ability to use relevant data entry and office equipment•
Evidence required for demonstration of consistent performance:	<ul style="list-style-type: none">• Assessment of performance requirements in the unit should be undertaken in an industry context. Competency is demonstrated by performance of all stated criteria according to the Range of Variables applicable to the workplace.
Delivery/assessment relationship to other units:	<ul style="list-style-type: none">• This unit should be assessed after competency has been demonstrated in units:<ul style="list-style-type: none">• FNSRETA309A Balance cash holdings• FNSRETA310A Maintain main bank account• FNSICORG301A Administer fixed asset register• FNSICACC301A Administer accounts payable.
Method of assessment:	<ul style="list-style-type: none">• For valid and reliable assessment of this unit, evidence should be gathered through a range of methods to indicate consistent performance.• Assessment of this unit of competence will usually include observation of processes and procedures, oral and/or written questioning on underpinning knowledge and skills and other methods as required.

- Context of assessment:
- This unit may be assessed in the workplace or in a simulated environment.
- Resources required for assessment:
- Assessment of this unit of competence requires access to company policies and practices, relevant IT systems and the databases of the financial services company.

KEY COMPETENCY LEVELS

The seven key competencies represent generic skills considered for effective work participation. The numbering against each of the key competencies indicates the performance level required in this unit.

Performance Level 1 - at this level, the candidate is required to undertake tasks effectively.
 Performance Level 2 - at this level, the candidate is required to manage tasks.
 Performance Level 3 - at this level, the candidate is required to use concepts for evaluating and reshaping tasks.

Key Competency	Performance Level	Example of Application
Communicating ideas and information	3	Liaising with management and other relevant personnel as appropriate will require the ability to communicate ideas and information.
Collecting analysing and organising information	2	Collecting and assessing user feedback will require information to be collected, analysed and organised.
Planning and organising activities	3	Establishing processes to regularly monitor financial systems and completing all associated tasks in accordance with relevant procedures will require activities to be planned and organised.
Working with others and in teams	2	Establishing processes to monitor financial systems may require the ability to work in and across teams.
Using mathematical ideas and techniques	3	Reconciling bank, general ledger and suspense accounts, calculating and rectifying errors and estimating costs associated with changes will require the use of mathematical ideas and techniques.
Solving problems	3	Resolving outstanding items, correcting relevant accounts and identifying and resolving discrepancies will require problem solving skills.
Using technology	3	Conducting system back-ups and verifying the validity and accuracy of financial systems will require the ability to use technology.

INTRODUCTION

Unit Descriptor	This unit describes the outcomes required to carry out the routine maintenance of both engine and electrically operated hand-held chainsaws This unit replaces FPIC2007A Maintain chainsaws
Application of the Unit	This unit supports the attainment of skills and knowledge required for competent workplace performance in forest and forest products operations of all sizes. The unit applies to a forest environment and involves application of skills and knowledge at a production worker level. These skills and knowledge are to be used within the scope of the person's job and authority
Unit Sector	Common Technical

ELEMENT

PERFORMANCE CRITERIA

- | | |
|--|--|
| 1. Plan and prepare | <p>1.1 Applicable Occupational Health and Safety (OHS), legislative and organisational requirements relevant to the maintenance of chainsaws are identified and complied with</p> <p>1.2 Suitable personal protective equipment and/or clothing is selected, used and maintained</p> <p>1.3 Work order is reviewed and clarified with appropriate personnel</p> <p>1.4 Tools, equipment and materials are selected appropriate to work requirements and checked for operational effectiveness in accordance with manufacturer's recommendations</p> <p>1.5 Potential and existing risks and hazards in the work area are identified and controlled</p> |
| 2. Clean and check chainsaw components | <p>2.1 Routine checks and maintenance procedures are conducted in accordance with manufacturer's recommendations</p> <p>2.2 Chainsaw and chainsaw body are cleaned, inspected and condition determined</p> <p>2.3 Air filter and spark plug are removed, cleaned, checked and replaced or reinserted</p> <p>2.4 Chain is checked for wear and condition, and sharpened, adjusted</p> |

- or replaced as required
- 2.5 Serviced chainsaw components are reassembled and checked for operational effectiveness
3. Complete maintenance
- 3.1 Records and reports are accurately completed, processed and maintained in accordance with workplace procedures
 - 3.2 Chainsaw faults, malfunctions or irregular operation are identified, tagged and reported for repair
 - 3.3 Malfunctions, faults, wear or damage to tools and equipment are reported for repair or replacement
 - 3.4 Tools and equipment are cleaned, maintained and stored in accordance with manufacturer's recommendations and workplace procedures
 - 3.5 Work area is cleared and waste materials disposed of or recycled in accordance with organisational environmental policies and procedures

REQUIRED SKILLS AND KNOWLEDGE

This describes the essential skills and knowledge and their level, required for this unit.

- Required skills include:
- comply with legislation, regulations, standards, codes of practice and established safe practices and procedures for maintaining chainsaws
 - review and accurately identify work requirements
 - use and maintain relevant tools, machinery and equipment
 - identify problems and equipment faults and demonstrate appropriate response procedures
 - use appropriate communication and interpersonal techniques with colleagues and others
 - conduct and complete routine maintenance procedures
 - read and interpret maintenance plans and specifications
 - accurately locate, record and report information

- Required knowledge and understanding includes:
- basic knowledge and understanding of applicable Commonwealth, State or Territory legislation, regulations, standards and codes of practice relevant to the full range of processes for maintaining chainsaws
 - organisational and site standards, requirements, policies and procedures for maintaining chainsaws
 - established communication channels and protocols
 - environmental protection requirements, including the safe disposal of waste material
 - principles of cultural diversity and access and equity
 - problem identification and resolution
 - types of tools and equipment and procedures for their use, operation and maintenance
 - types, functions, specifications and operational principles of chainsaws
 - chainsaw routine maintenance procedures
 - common fault finding techniques
 - hazards and risks when maintaining chainsaws
 - appropriate mathematical procedures for estimating and measuring, including calculating time to complete tasks
 - procedures for recording and reporting workplace records and information

RANGE STATEMENT

The Range Statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording in the Performance Criteria is detailed below

OHS requirements are to be in accordance with Commonwealth, State or Territory legislation and regulations, and organisational safety policies and procedures. Requirements may include:

- the use of personal protective equipment and clothing
- safety equipment
- first aid equipment
- fire fighting equipment
- hazard and risk control
- elimination of hazardous materials and substances
- safe forest practices including required actions relating to forest fire
- manual handling including shifting, lifting and carrying

Legislative requirements are to be in accordance with applicable legislation from all levels of government that affect organisational operation. Requirements may include:

- award and enterprise agreements
- industrial relations
- Australian Standards
- confidentiality and privacy
- OHS
- the environment
- equal opportunity
- anti-discrimination
- relevant industry codes of practice
- duty of care
- and heritage and traditional land owner issues

Organisational requirements

- may include legal, organisational and site guidelines, policies and procedures relating to own role and responsibility, quality assurance, procedural manuals, quality and continuous improvement processes and standards, OHS, emergency and evacuation, ethical standards, recording and reporting, access and equity principles and practices, equipment use, maintenance and storage, environmental management (waste disposal, recycling and re-use guidelines)

- Chainsaws
 - may be engine or electrically operated hand-held
- Appropriate personnel
 - may include supervisors, clients, colleagues, line management
- Hazards
 - may include exposure to loud noise and exhaust fumes, mechanical vibration, vibration injury, hazardous substances (fuel), cuts and hot surfaces
- Routine checks and maintenance procedures
 - may include pre-start checks, inspections of chainsaw body, checking or replacement of worn chain and/or sprocket, chain guards and chain sprockets, checks of air filters and spark plugs, checks and adjustments of chain tension, oil and fuel, replacement of worn or faulty parts, assessment of saw sharpness, cutter bar, starter cord inspection and replacement, basic cleaning, exhaust system for fire safety
- Chain checks
 - may include checks and adjustments to chain (loosening/removal of guards/bards to provide access to adjustment, adjustment of tension, replacement of guards/bars), replacement of worn chain/depth gauges (each tooth of chain is checked for condition, replacement of worn sprockets/chain), sharpening of chain (chain is sharpened using grinder or hand filing methods)
- Records and reports
 - may detail maintenance outcomes, faults, malfunctions and damage, hazards and incidents
 - may be manual, using a computer-based system or another appropriate organisational communication system

EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for this Training Package

Overview of Assessment	<ul style="list-style-type: none">• A person who demonstrates competency in this unit must be able to provide evidence that they can carry out safely and efficiently a routine maintenance service and adjustment of chainsaws
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<ul style="list-style-type: none">• Comply with applicable Commonwealth, State or Territory legislative and regulatory requirements and codes of practice, including OHS, environmental and organisational policies and procedures, relevant to maintaining chainsaws• Conduct efficient routine maintenance and adjustment procedures of chainsaws• Select and use appropriate tools, equipment and materials• Identify and diagnose chainsaw faults, malfunctions or irregular operation• Maintain effective communication with others in the workplace
Context of and specific resources for assessment	<ul style="list-style-type: none">• Competency is to be assessed in the workplace or realistically simulated workplace• Assessment is to occur under standard and authorised work practices, safety requirements and environmental constraints• Assessment of essential underpinning knowledge, other than confirmatory questions, will usually be conducted in an off-site context• Assessment is to comply with relevant regulatory or Australian Standards requirements• The following resources should be made available:<ul style="list-style-type: none">• workplace location or simulated workplace• materials and equipment relevant to maintaining chainsaws• specifications and work instructions
Method of assessment	<ul style="list-style-type: none">• Assessment must satisfy the endorsed Assessment Guidelines of the FPI05 Training Package• Assessment methods must confirm consistency and accuracy of performance (over time and in a range of workplace relevant contexts) together with application of underpinning knowledge• Assessment must be by direct observation of tasks, with questioning on underpinning knowledge and it must also reinforce the integration of key competencies• Assessment methods must confirm the ability to access and

correctly interpret and apply the essential underpinning knowledge

- Assessment may be applied under project-related conditions (real or simulated) and require evidence of process
- Assessment must confirm a reasonable inference that competency is able not only to be satisfied under the particular circumstance, but is able to be transferred to other circumstances
- Assessment may be in conjunction with assessment of other units of competency
- The assessment environment should not disadvantage the candidate
- Assessment practices should take into account any relevant language or cultural issues related to Aboriginality, gender or language backgrounds other than English
- Where the participant has a disability, reasonable adjustment may be applied during assessment
- Language and literacy demands of the assessment task should not be higher than those of the work role

KEY COMPETENCY LEVELS

The seven key competencies represent generic skills considered necessary for effective participation by an individual in the workplace. Performance Level 1 at this level, the candidate is required to undertake tasks effectively. Performance Level 2 at this level, the candidate is required to manage tasks. Performance Level 3 at this level, the candidate is required to use concepts for evaluating and reshaping tasks.

Key Competency	Performance Level	Example of Application
Communicating ideas and information	1	By communicating in simple language to confirm work requirements, convey information and requests to colleagues, and report and record work outcomes
Collecting analysing and organising information	1	By collecting, organising and understanding information required to undertake the maintenance of chainsaws
Planning and organising activities	1	By organising work activities in the correct sequence and complete within designated timeframes
Working with others and in teams	1	By using effective communication and interpersonal techniques with colleagues and others to maximise confidence, satisfaction and productivity in the workplace
Using mathematical ideas and techniques	1	By calculating time to complete tasks and estimating tools, equipment and material requirements
Solving problems	1	By establishing safe and effective work processes which anticipate likely problems to avoid wastage and downtime
Using technology	1	By selecting and using business equipment/technology to prepare and maintain

		workplace documentation

Assessment of performance is to be consistent with the Evidence Guide

Elements and Performance Criteria

Elements and Performance Criteria

Element	Performance Criteria
1 Prepare for operation	<p>1.1 Applicable Occupational Health and Safety (OHS), legislative and organisational requirements relevant to cross cutting materials with a hand-held chainsaw are identified and complied with</p> <p>1.2 Work order is reviewed and clarified with appropriate personnel</p> <p>1.3 Equipment is selected appropriate to work requirements and checked for operational effectiveness in accordance with manufacturer's recommendations and site procedures</p> <p>1.4 Chainsaw operations are identified for safe working conditions and planned in accordance with site procedures and environmental protection measures</p> <p>1.5 Communication with others is established and maintained in accordance with OHS requirements and site procedures</p>
2 Cross cut material	<p>2.1 Work area is prepared, checked and cleared in accordance with OHS requirements and site procedures</p> <p>2.2 Material is cut within site standard tolerances for length and angle relative to centre line in</p>

- accordance with OHS requirements
- 2.3 Material is visually assessed for defects in accordance with site standards
 - 2.4 **Cutting techniques** maximise volume and quality of recovery in accordance with work order and industry standard lengths
 - 2.5 Chainsaw is operated in accordance with OHS and site procedures, and manufacturer's recommendations
 - 2.6 **Problems** are identified and reported in accordance with site procedures
- 3 Maintain chainsaw
- 3.1 Chainsaw is cleaned, maintained and stored in accordance with manufacturer's recommendations and site procedures
 - 3.2 Cutting rate is compared with that anticipated from knowledge of saw, size, species and condition of material
 - 3.3 Blunt or damaged saws are identified and dealt with according to site procedures and manufacturer's recommendations
 - 3.4 Production and quality **records and reports** are processed in accordance with site procedures and organisational requirements

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit

Required skills include:

comply with legislation, regulations, standards, codes of practice and established safe practices and procedures for using a hand-held chainsaw

review and accurately identify work requirements

use and maintain relevant tools, machinery and equipment

safely and efficiently use a hand-held chainsaw and carry out lock-out procedures

use appropriate methods to cross cut materials with a hand-held chainsaw

effectively maximise volume and quality recovery

identify defects and problems and demonstrate appropriate response procedures

use effective communication and interpersonal techniques with colleagues and others

accurately identify blunt or damaged saws

accurately locate, record and report information

Required knowledge and understanding includes:

basic knowledge and understanding of applicable Commonwealth, State or Territory licensing, legislative, regulatory or certification requirements and codes of practice relevant to the full range of processes for cross cutting materials with a hand-held chainsaw

organisational and site standards, requirements, policies and procedures for cross cutting materials with a hand-held chainsaw

use appropriate communication and interpersonal techniques with colleagues and others

environmental protection requirements, including the safe disposal of waste material

established communication channels and protocols

industry standard length dimensions

operating and maintenance requirements of a hand-held chainsaw

effects of defects on recovery

common industry terminology

principles of cultural diversity and access and equity

appropriate mathematical procedures for estimating and measuring, including calculating time to complete tasks

procedures for the recording and reporting of workplace documentation and information

KEYCOMPETENCIES

The seven key competencies represent generic skills considered necessary for effective participation by an individual in the workplace Performance Level 1 - at this level, the candidate is required to undertake tasks effectively Performance Level 2 - at this level, the candidate is required to manage tasks Performance Level 3 - at this level, the candidate is required to use concepts for evaluating and reshaping task

Key Competency	Example of Application	Performance Level
How are ideas and information communicated?	By completing all required records and documentation	1
How can information be collected, analysed and organised?	By reviewing, confirming with appropriate personnel, and clarifying work order requirements	1
How are activities planned and organised?	By planning and preparing for chainsaw operations	2
How is team work used?	By communicating with other personnel	1
How are mathematical ideas and techniques used?	By cutting material to industry standard lengths	1
How are problem solving skills applied?	By monitoring and maintaining safe working conditions for chainsaw operations	1
How is the use of technology applied?	By maintaining equipment	1

Evidence Guide

The Evidence Guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for this Training Packag

Overview of assessment

A person who demonstrates competency in this unit must be able to provide evidence that they can use a hand-held chainsaw while demonstrating the correct procedures for cross cutting materials in accordance with organisational guidelines

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Compliance with applicable Commonwealth, State or Territory legislative and regulatory requirements and codes of practice, including OHS, environmental and organisational policies and procedures, relevant to cross cutting materials with a hand-held chainsaw

Compliance with applicable licensing or certification requirements

Communicate effectively and work safely with others in the work area

Safely cross cut material using a hand-held chainsaw maximising volume and quality of recovery

Conduct efficient routine maintenance and adjustment procedures required of a hand-held chainsaw

Identify faults, malfunctions or irregular operation of hand-held chainsaw and report for corrective action

Context of and specific resources for assessment

Competency is to be assessed in the workplace or realistically simulated workplace

Assessment is to occur under standard and authorised work practices, safety requirements and environmental constraints

Assessment of essential underpinning knowledge, other than confirmatory questions, will usually be conducted in an off-site context

Assessment is to comply with relevant regulatory or Australian Standards

requirements

The following resources should be made available:

workplace location or simulated workplace materials and equipment relevant to cross cutting materials with a hand-held chainsaw specifications and work instructions

Method of assessment

Assessment must satisfy the endorsed Assessment Guidelines of the FPI05 Training Package

Assessment methods must confirm consistency and accuracy of performance (over time and in a range of workplace relevant contexts) together with application of underpinning knowledge

Assessment must be by direct observation of tasks, with questioning on underpinning knowledge and it must also reinforce the integration of key competencies

Assessment methods must confirm the ability to access and correctly interpret and apply the essential underpinning knowledge

Assessment may be applied under project-related conditions (real or simulated) and require evidence of process

Assessment must confirm a reasonable inference that competency is able not only to be satisfied under the particular circumstance, but is able to be transferred to other circumstances

Assessment may be in conjunction with assessment of other units of competency

The assessment environment should not disadvantage the candidate

Assessment practices should take into account any relevant language or cultural issues related to Aboriginality, gender or language backgrounds other than English

Where the participant has a disability, reasonable adjustment may be applied during assessment

Language and literacy demands of the assessment task should not be higher than those of the work role

Range Statement

RANGE STATEMENT

The Range Statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording in the Performance Criteria is detailed below

OHS requirements are to be in accordance with Commonwealth, State or Territory legislation and regulations, and organisational safety policies and procedures. Requirements may include:

the use of personal protective equipment and clothing
 safety equipment
 first aid equipment
 fire fighting equipment
 hazard and risk control
 elimination of hazardous materials and substances
 awareness of danger zone for kickback
 manual handling including shifting, lifting and carrying

Legislative requirements are to be in accordance with applicable legislation from all levels of government that affect organisational operation. Requirements may include:

award and enterprise agreements
 industrial relations
 Australian Standards
 confidentiality and privacy
 OHS
 the environment
 equal opportunity
 anti-discrimination
 relevant industry codes of practice
 duty of care

Organisational requirements

may include legal, organisational and site guidelines, policies and procedures relating to own role and responsibility, quality assurance, procedural manuals, quality and continuous improvement processes and standards, OHS, emergency and evacuation, ethical standards, recording and reporting, access and equity principles and practices, equipment use, maintenance and storage, environmental management (waste disposal, recycling and re-use guidelines)

Material	<p>is cut on a relatively level and clear surface and not under forest conditions</p> <p>may include logs, packs of timber and individual pieces of timber</p>
Work order	<p>is to include information and instructions relevant to cross cutting operations including processing location details and materials to be cross cut. Information may also include environmental requirements, site plan and environmental features</p>
Appropriate personnel	<p>may include supervisors, clients, colleagues, and line management</p>
Environmental protection measures	<p>may include noise, fumes in enclosed spaces and waste</p>
Communication	<p>may include verbal and non-verbal language, constructive feedback, active listening, questioning to clarify and confirm understanding, use of positive, confident and cooperative language, use of language and concepts appropriate to individual social and cultural differences, control of tone of voice and body language</p>
Cleared	<p>may relate to clearing the work area of off-cuts and shorts, ensuring saw clearance around material, depositing off-cuts, shorts and debris in recognised areas, clearing surfaces of debris likely to cause saw damage in the cutting area</p>
Cutting techniques	<p>may relate to cutting positions, work order requirements, industry standard lengths, cutting patterns, maximising volume and quality of recovery requirements, cutting procedures checking to ensure saw clearance around the material which minimise capping and splitting of material, maximise volume and quality of recovery securing the section on each side of the planned cut</p>
Problems	<p>may relate to performance of chainsaw, defects in material, communication, hazards and risks at the work site, capping and splitting of material, danger zone for</p>

kickback

Records and reports

may include tally sheets, quality sheets/forms, production sheets and downtime sheets

may be manual, using a computer-based system or another appropriate organisational communication system

Unit Descriptor

This unit specifies the outcomes required to navigate in forest areas in situations where difficult environmental conditions and poor visibility are likely to occur. The unit includes interpretation and use of maps and other navigation aids

This unit specifies the outcomes required to navigate in forest areas in situations where difficult environmental conditions and poor visibility are likely to occur. The unit includes interpretation and use of maps and other navigation aids

Application of the Unit

This unit supports the attainment of skills and knowledge required for competent workplace performance in forest and forest products operations of all sizes. The unit applies to a forest environment and involves application of skills and knowledge at a production worker level. These skills and knowledge are to be used within the scope of the persons job and authority

This unit supports the attainment of skills and knowledge required for competent workplace performance in forest and forest products operations of all sizes. Elements and Performance Criteria

Elements and Performance Criteria

Element	Performance Criteria
1 Prepare for navigation	<p>1.1 Applicable Occupational Health and Safety (OHS), legislative and organisational requirements relevant to navigation are specified and complied with</p> <p>1.2 Information is gathered and relevant factors identified and checked with appropriate personnel</p> <p>1.3 Suitable maps, equipment and navigation aids are selected and checked for accuracy, currency and operational effectiveness in accordance with manufacturer's recommendations</p> <p>1.4 Faults or errors in maps and equipment are detected and corrected</p> <p>1.5 Communication with others is established and maintained in accordance with OHS requirements</p>
2 Plan the route	<p>2.1 Route is planned in accordance with assignment instructions and OHS requirements</p> <p>2.2 Maps are examined to identify relevant symbols and information and navigation data</p> <p>2.3 Emergency or contingency exit routes are planned</p> <p>2.4 Limitations in planning are specified and assistance sought in accordance with organisational</p>

requirements

- 3 Conduct navigation
 - 3.1 Navigation is undertaken in accordance with planned route and schedule
 - 3.2 Maps are correctly orientated to **surroundings** in accordance with planned route
 - 3.3 Equipment and navigation aids are used in accordance with manufacturer's recommendations
 - 3.4 Alternative routes are navigated to bypass **obstacles** and improve efficiency of route or course

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit

Required skills include:

comply with legislation, regulations, standards, codes of practice and established safe practices and procedures for navigating in forest areas

review and accurately identify work requirements

use and maintain relevant tools and equipment

identify problems and equipment faults and demonstrate appropriate response procedures

use appropriate communication and interpersonal techniques and methods with colleagues and others

accurately calculate bearings using maps and compass correctly

accurately interpret maps, charts, distances, relevant symbols, map meaning and line types

accurately estimate resource and equipment requirements

effectively solve problems and bypass obstacles

accurately locate own position on a map

Required knowledge and understanding includes:

basic knowledge and understanding of applicable Commonwealth, State or Territory legislation, regulations, standards and codes of practice relevant to the full range of processes for navigating in forest areas

organisational and site standards, requirements, policies and procedures for navigation

principles of cultural diversity and access and equity

environmental protection requirements, including the safe disposal of waste material

established communication channels and protocols

problem identification and resolution
 types of tools and equipment and procedures for their safe use, operation and maintenance
 types of maps, charts and scales and their uses
 representation of topographic features on maps and plans
 common scales used on maps and plans
 features and use of a compass and factors that affect their accuracy
 advantages and disadvantages of different map and chart types and sources of error
 techniques for estimating distance travelled within a particular activity context
 procedures for the recording, reporting and maintenance of workplace records and information
 appropriate mathematical procedures for estimating and measuring, including calculating time to complete tasks

KEYCOMPETENCIES

The seven key competencies represent generic skills considered necessary for effective participation by an individual in the workplace Performance Level 1 - at this level, the candidate is required to undertake tasks effectively Performance Level 2 - at this level, the candidate is required to manage tasks Performance Level 3 - at this level, the candidate is required to use concepts for evaluating and reshaping task

Key Competency	Example of Application	Performance Level
How are ideas and information communicated?	By communicating in simple language to confirm work requirements, convey information and requests to colleagues, and report and record outcomes of navigation	1
How can information be collected, analysed and organised?	By collecting, organising and understanding information from maps and plans	1
How are activities planned	By organising work activities	1

and organised?	in the correct sequence for navigation to be completed within the designated timeframes	
How is team work used?	By using effective communication and interpersonal techniques with colleagues and others to maximise confidence and safety	1
How are mathematical ideas and techniques used?	By calculating time to complete tasks and estimating distances, resource and equipment requirements	1
How are problem solving skills applied?	By planning safe and effective navigation routes which anticipate likely obstacles and hazards	1
How is the use of technology applied?	By selecting and using equipment to ensure safe and effective navigation in forest areas	1

Evidence Guide

The Evidence Guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for this Training Packag

Overview of assessment

A person who demonstrates competency in this unit must be able to provide evidence that they can navigate in forest areas demonstrating the correct orientation and use of maps, plans and compass.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Comply with applicable Commonwealth, State or Territory legislative and regulatory requirements and codes of practice, including OHS, environmental and organisational policies and procedures, relevant to navigating in forest areas

Communicate effectively and work safely with others in the work area

Effectively select, interpret, and apply maps and other relevant information in written, diagrammatic and oral form

Accurately use maps, compass and navigation aids to navigate in forest areas confirming factors affecting the use of navigation equipment

Plan and conduct an efficient navigation effectively bypassing obstacles within designated timeframes

Context of and specific resources for assessment

Competency is to be assessed in the workplace or realistically simulated workplace

Assessment is to occur under standard and authorised work practices, safety requirements and environmental constraints

Assessment of essential underpinning knowledge, other than confirmatory questions, will usually be conducted in an off-site context

Assessment is to comply with relevant regulatory or Australian Standards requirements

The following resources should be made

available:

workplace location or simulated workplace

materials and equipment relevant to navigation

specifications and work instructions

Method of assessment

Assessment must satisfy the endorsed Assessment Guidelines of the FPI05 Training Package

Assessment methods must confirm consistency and accuracy of performance (over time and in a range of workplace relevant contexts) together with application of underpinning knowledge

Assessment must be by direct observation of tasks, with questioning on underpinning knowledge and it must also reinforce the integration of key competencies

Assessment methods must confirm the ability to access and correctly interpret and apply the essential underpinning knowledge

Assessment may be applied under project-related conditions (real or simulated) and require evidence of process

Assessment must confirm a reasonable inference that competency is able not only to be satisfied under the particular circumstance, but is able to be transferred to other circumstances

Assessment may be in conjunction with assessment of other units of competency

The assessment environment should not disadvantage the candidate

Assessment practices should take into account any relevant language or cultural issues related to Aboriginality, gender or language backgrounds other than English

Where the participant has a disability, reasonable adjustment may be applied during assessment

Language and literacy demands of the assessment task should not be higher than

those of the work role

Range Statement

RANGE STATEMENT

The Range Statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording in the Performance Criteria is detailed below

OHS requirements are to be in accordance with Commonwealth, State or Territory legislation and regulations, and organisational safety policies and procedures. Requirements may include:

the use of personal protective equipment and clothing
 safety equipment
 first aid equipment
 fire fighting equipment
 hazard and risk control
 elimination of hazardous materials and substances
 safe forest practices including required actions relating to forest fire

Legislative requirements are to be in accordance with applicable legislation from all levels of government that affect organisational operation. Requirements may include:

award and enterprise agreements
 industrial relations
 Australian Standards
 confidentiality and privacy
 OHS
 the environment
 equal opportunity
 anti-discrimination
 relevant industry codes of practice
 duty of care
 heritage and traditional land owner issues

Organisational requirements

may include legal, organisational and site guidelines, policies and procedures relating to own role and responsibility, quality assurance, procedural manuals, quality and continuous improvement processes and standards, OHS, emergency and evacuation, ethical standards, recording and reporting, access and equity principles and practices, equipment use, maintenance and storage, environmental management (waste disposal, recycling and re-use guidelines)

Information	may relate to local inhabitants, type of terrain or features of the route, access and exit routes, natural protection or shelter, land management and legislative requirements, guide books
Relevant factors	may relate to types of terrain and gradient, weather conditions, obstacles, hazards and access to required resources and facilities, distance, estimated travelling time and magnetic bearings
Appropriate personnel	may include supervisors, clients, colleagues, line management
Maps	may include cadastral and topographic maps, charts, guide books, aerial photographs, sketches and cave maps, and diagrams
Equipment	may include compass, track and survey markers, beacons, personal protective equipment and clothing, GPS units
Navigation aids	may include track and creek junctions and crossings, survey markers, beacons, track markers, paths, signs, arrows, compass and man-made objects or features
Symbols and information	may include grid lines and numbers, contour lines, scale, map legend, topographic features, markers and beacons, water depth
Navigation data	may include grid reference points, distances, estimated travelling times, height gain/loss, gradient, identifiable features and exit routes
Communication	may include verbal and non-verbal language, constructive feedback, active listening, questioning to clarify and confirm understanding, use of positive, confident and cooperative language, use of language and concepts appropriate to individual social and cultural differences, control of tone of voice and body language
Limitations	may relate to job role and responsibilities, own competency level, industry requirements, own understanding of risk identification processes, own interpretation

of maps, legislation, regulations and procedures, complying with OHS requirements, legal responsibilities

Surroundings

may include ground or terrain, bodies of water, beacons and markers, natural formations, landmarks and man-made features

Obstacles

may include thick vegetation, drops and climbs, marshes and bogs, fog, rivers, lakes and dams, tides, hazards (such as rocks)

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Identify and analyse documentation needs	1.1. Consult with the <i>client</i> to identify documentation <i>requirements</i> 1.2. Interpret and evaluate documentation <i>requirements</i> and confirm details with the <i>client</i> 1.3. Investigate industry and <i>documentation standards</i> for requirements 1.4. Define and document the scope of work to be produced 1.5. Consult with the <i>client</i> to validate and confirm the scope of work
2. Design documentation	2.1. Identify information <i>requirements</i> with reference to layout and document structure 2.2. Create document templates and style guides consistent with information <i>requirements</i> 2.3. Conduct a review of the <i>system</i> in order to understand its functionality 2.4. Extract content that meets information <i>requirements</i> in accordance with relevant copyright restrictions 2.5. Develop the structure of the <i>technical documentation</i> giving focus to the flow of information, style, tone and <i>content</i> format 2.6. Validate the <i>technical documentation</i> structure with the <i>client</i>
3. Develop documentation	3.1. Write <i>technical documentation</i> based on the template and scope of work using the information gathered 3.2. Translate technical terminology into plain English where appropriate 3.3. Apply <i>content</i> format and style in accordance with relevant <i>documentation standards</i> and templates
4. Evaluate and edit documentation	4.1. Submit technical documentation to <i>appropriate person</i> for review 4.2. Gather and analyse feedback 4.3. Incorporate alterations into the <i>technical documentation</i> 4.4. Edit the <i>technical documentation</i> for technical and grammatical accuracy
5. Prepare documentation for	5.1. Check that the completed <i>technical documentation</i> meets client <i>requirements</i> and scope of work

ELEMENT	PERFORMANCE CRITERIA
publication	5.2. Submit the technical documentation to <i>appropriate person</i> for approval 5.3. Prepare the <i>technical documentation</i> for publication and distribution utilising appropriate <i>channels</i>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- The use of word processing software and multimedia authoring tools
- Identifying target audiences
- Analysing audience needs
- Identifying relevant content
- Determining appropriate content, formats and styles
- Writing content

Required knowledge

- Content features, such as clarity and readability
- Instructional design principles
- Functions and features of templates and style guides
- Document design, web design and usability

Evidence Guide

EVIDENCE GUIDE	
<p>The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>Evidence of the following is essential:</p> <ul style="list-style-type: none"> Assessment must confirm the ability to create technical documentation that meets business requirements, caters for a diverse readership, is clear to the target audience and easy to navigate <p>To demonstrate competency in this unit the person will require access to:</p> <ul style="list-style-type: none"> Technical specifications Documentation standards
Context of and specific resources for assessment	<p>Technical documentation provides a record of the functionality and processing of a system, program, network or application. The technical documentation should document how the system, program, network or application is structured, how it works and changes that have been made to it.</p> <p>The breadth, depth and complexity of knowledge and skills in this competency would cover a broad range of varied activities or application in a wider variety of contexts most of which are complex and non-routine. Leadership and guidance would be involved when organising activities of self and others as well as contributing to technical solutions of a non-routine or contingency nature.</p> <p>Assessment must ensure:</p> <ul style="list-style-type: none"> Performance of a broad range of skilled applications including the requirement to evaluate and analyse current practices, develop new criteria and procedures for performing current practices and provision of some leadership and guidance to others in the application and planning of the skills would be

EVIDENCE GUIDE	
	<p>characteristic.</p> <ul style="list-style-type: none"> • Applications may involve responsibility for, and limited organisation of, others.
Method of assessment	<p>The purpose of this unit is to define the standard of performance to be achieved in the workplace. In undertaking training and assessment activities related to this unit, consideration should be given to the implementation of appropriate diversity and accessibility practices in order to accommodate people who may have special needs. Additional guidance on these and related matters is provided in ICA05 Section 1.</p> <ul style="list-style-type: none"> • Competency in this unit should be assessed using summative assessment to ensure consistency of performance in a range of contexts. This unit can be assessed either in the workplace or in a simulated environment. However, simulated activities must closely reflect the workplace to enable full demonstration of competency. • Assessment will usually include observation of real or simulated work processes and procedures and/or performance in a project context as well as questioning on underpinning knowledge and skills. The questioning of team members, supervisors, subordinates, peers and clients where appropriate may provide valuable input to the assessment process. The interdependence of units for assessment purposes may vary with the particular project or scenario.
Guidance information for assessment	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:</p> <ul style="list-style-type: none"> • ICAA4041C Determine and confirm client business expectations and needs • ICAW4027B Relate to clients on a business level <p>An individual demonstrating this competency would be</p>

EVIDENCE GUIDE

	<p>able to:</p> <ul style="list-style-type: none"> • Demonstrate understanding of a broad knowledge base incorporating some theoretical concepts • Apply solutions to a defined range of unpredictable problems • Identify and apply skill and knowledge areas to a wide variety of contexts, with depth in some areas • Identify, analyse and evaluate information from a variety of sources • Take responsibility for own outputs in relation to specified quality standards • Take limited responsibility for the quantity and quality of the output of others • Maintain knowledge of industry products and services
--	---

Range Statement**RANGE STATEMENT**

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<i>Client</i> may include but is not limited to:	<ul style="list-style-type: none"> • internal departments • external organisations • individual people • internal employees
<i>Requirements</i> may be in reference to:	<ul style="list-style-type: none"> • business • system • application • organisational policies • network • people in the organisation
<i>System</i> may include but is not limited to:	<ul style="list-style-type: none"> • network • application • software

RANGE STATEMENT	
	<ul style="list-style-type: none"> • business • computers • financial system • management system • information system
<i>Technical documentation</i> may include:	<ul style="list-style-type: none"> • system or project specifications • system design • system functionality • reports • help references • technical manuals • operational procedures • training materials • self-paced tutorials • on-line help • user guides • brochures
<i>Appropriate person</i> may include:	<ul style="list-style-type: none"> • supervisor • teacher • authorised business representative • client
<i>Channels</i> may include:	<ul style="list-style-type: none"> • text • audio • animation and graphics provided through books • manuals • CD-ROMs • DVDs • computer-based tutorials • help screens • the world wide web
<i>Content</i> may include information and interactive features, such as:	<ul style="list-style-type: none"> • product information • company information • copyright and disclaimer notices • site map • frequently asked questions • what's new • customer-specific information • customer only information • error messages • instructions

RANGE STATEMENT	
	<ul style="list-style-type: none"> • feedback mechanisms • reference pages • forms • background articles • ratings/rankings/testimonials/quotes from reviews • hyperlink titles
<i>Documentation standards</i>	<ul style="list-style-type: none"> • May include but are not limited to policy relating to sign-off, storage, distribution, revision. • May include ISO/IEC/AS standards, organisational standards, audit trails, naming conventions, version control, project management templates and report writing principles (for further information refer to the Standards Australia website at: www.standards.com.au)

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Determine function of operating systems	1.1. Identify and demonstrate understanding of the purposes of the <i>operating system</i> 1.2. Distinguish between batch system, real-time system, multi-tasking system 1.3. Identify and demonstrate understanding of the basic functions of <i>operating system</i> , including file system, memory management, process scheduling 1.4. Identify and demonstrate management of virtual memory
2. Obtain operating system	2.1. Contact <i>operating system</i> vendors to obtain technical specifications and system requirements 2.2. Document adjustment recommendations and provide to <i>appropriate person</i> 2.3. Determine and apply knowledge of licensing, hardware and security requirements
3. Install, configure and optimise operating system	3.1. Install, configure and test the <i>operating system software</i> in accordance with installation procedures and <i>organisational requirements</i> 3.2. Optimise the system to meet <i>organisational requirements</i> 3.3. Document the system according to <i>organisational requirements</i> 3.4. Install the <i>operating system</i> with minimal disruption to <i>client</i> or users
4. Provide instruction to meet new software requirements	4.1. Provide one-to-one instruction about changes to the <i>client</i> or users as required 4.2. Obtain <i>client</i> evaluation about new system to ensure requirements are met, using appropriate <i>feedback mechanism</i>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

REQUIRED SKILLS AND KNOWLEDGE

- Problem solving skills for a defined range of predictable problems
- Plain English literacy and communication skills in relation to analysis, evaluation and presentation of information
- Report writing skills for business, requiring depth in some areas, analysis and evaluation of information in a defined range of areas
- Strong interpersonal skills for team work and responsible workplace interactions
- Software installation and configuration
- Questioning and active listening for conveying and clarifying information
- Literacy skills in regard to interpretation of technical computer installation manuals
- Use of diagnostic tools

Required knowledge

- Organisational and technical systems
- Detailed knowledge of the system's current functionality
- Functions and features of operating systems used by the organisation
- Set-up and configuration procedures
- Current industry-accepted hardware and software products, with broad knowledge of general features and capabilities and detailed knowledge in some areas
- Software packages supported by the organisation
- Prerequisites for system software installation
- Vendor specifications and requirements for installation
- Broad knowledge of incorporating systems software
- Broad general knowledge of systems diagnostic software

Evidence Guide

EVIDENCE GUIDE	
<p>The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>Evidence of the following is essential:</p> <ul style="list-style-type: none"> Assessment must confirm the ability to install and improve system performance with minimum disruption to clients. <p>To demonstrate competency in this unit the person will require access to:</p> <ul style="list-style-type: none"> Personal computer/workstation <p>Operating System software and technical documentation</p>
Context of and specific resources for assessment	<p>The breadth, depth and complexity of knowledge and skills in this competency would cover selecting, adapting and transferring skills and knowledge to new environments and providing technical advice and some leadership in resolution of specified problems. This would be applied across a range of roles in a variety of contexts with some complexity in the extent and choice of options available.</p> <p>Assessment must ensure:</p> <ul style="list-style-type: none"> Performance of a defined range of skilled operations, usually within a range of broader related activities involving known routines, methods and procedures, where some discretion and judgement is required in the selection of equipment, services or contingency measures and within known time constraints would be characteristic. Applications may involve some responsibility for others. Participation in teams including group or team coordination may be involved.
Method of assessment	<p>The purpose of this unit is to define the standard of performance to be achieved in the workplace. In</p>

EVIDENCE GUIDE

	<p>undertaking training and assessment activities related to this unit, consideration should be given to the implementation of appropriate diversity and accessibility practices in order to accommodate people who may have special needs. Additional guidance on these and related matters is provided in ICA05 Section 1.</p> <ul style="list-style-type: none"> • Competency in this unit should be assessed using summative assessment to ensure consistency of performance in a range of contexts. This unit can be assessed either in the workplace or in a simulated environment. However, simulated activities must closely reflect the workplace to enable full demonstration of competency. • Assessment will usually include observation of real or simulated work processes and procedures and/or performance in a project context as well as questioning on underpinning knowledge and skills. The questioning of team members, supervisors, subordinates, peers and clients where appropriate may provide valuable input to the assessment process. Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Determine system changes required	1.1. Determine and record the required changes to <i>system</i> 1.2. Ensure that documentary evidence exists to support changes and evaluate changes required 1.3. Complete all <i>documentation</i> required in accordance with maintenance methodologies 1.4. Clarify and confirm the nature of the changes with the <i>client</i> 1.5. Obtain technical data from reliable sources and request other resources that may be required to complete the changes
2. Carry out system changes	2.1. Plan the procedure to effect intended changes 2.2. Confer with colleagues and <i>users</i> involved in the proposed changes and agree a mutually acceptable timeline and method of <i>implementation</i> 2.3. Copy initialisation or configuration files prior to <i>implementation</i> 2.4. Create a roll-back path in the event of failure 2.5. Ensure that changes required in <i>software</i> are made according to project or <i>organisational guidelines</i> 2.6. Test and verify that the changes have been made according to implementation guides and <i>organisational standards</i>
3. Present changes to client	3.1. Demonstrate changes to the <i>client</i> and explain the impact of these changes 3.2. Work towards making these changes acceptable to the <i>client</i> if changes are rejected, or making further modifications if required 3.3. Update <i>documentation</i> and repositories in accordance with standards and update modifications made to the change management system
4. Perform handover to client's operational	4.1. Update <i>documentation</i> and <i>client</i> procedures to reflect changes made 4.2. Secure sign off of acceptance documents by client 4.3. Facilitate handover of modified system to client's operational area

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- System software installation and configuration
- Problem solving skills for a defined range of unpredictable problems
- Plain English literacy and communication skills in relation to analysis, evaluation and presentation of information
- Report writing skills for business requiring depth in some areas, analysis and evaluation of information in a defined range of areas
- Change management skills in relation to maintaining the continuity of IT operations and business functions
- Risk analysis skills in relation to reviewing change procedures
- Basic training needs analysis skills
- Basic programming skills

Required knowledge

- Broad knowledge of vendor software services
- Broad knowledge of emerging standards for data and voice communications
- Current industry-accepted hardware and software products, with basic knowledge of general features and capabilities and detailed knowledge in some areas
- Broad general knowledge of the client business domain
- Detailed knowledge of the system's current functionality
- Basic knowledge incorporating some change control procedures
- Detailed knowledge of the system under modification, including policies and procedures of the organisation
- Business scheduling requirements

Evidence Guide

EVIDENCE GUIDE	
<p>The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
Overview of assessment	
<p>Critical aspects for assessment and evidence required to demonstrate competency in this unit</p>	<p>Evidence of the following is essential:</p> <ul style="list-style-type: none"> • Assessment must confirm the ability to implement changes to the system with minimum disruption to the system and client users. All changes are to be documented. • Whilst this competency is primarily about software implementation, a competent individual needs to demonstrate effective planning and communication skills to ensure client agreement to changes and minimisation of disruption to the business. <p>To demonstrate competency in this unit the following resources will be needed:</p> <ul style="list-style-type: none"> • Technical specifications and documentation • Organisational requirements • Live system
<p>Context of and specific resources for assessment</p>	<p>The breadth, depth and complexity of knowledge and skills in this competency would cover selecting, adapting and transferring skills and knowledge to new environments and providing technical advice and some leadership in resolution of specified problems. This would be applied across a range of roles in a variety of contexts with some complexity in the extent and choice of options available.</p> <p>Assessment must ensure:</p> <ul style="list-style-type: none"> • Performance of a defined range of skilled operations, usually within a range of broader related activities involving known routines, methods and procedures, where some discretion and judgement is required in the selection of equipment, services or contingency measures and within known time constraints would be characteristic.

EVIDENCE GUIDE	
	<ul style="list-style-type: none"> • Applications may involve some responsibility for others. Participation in teams including group or team coordination may be involved. • It may include participation in teams, including those concerned with software changes and planning. Group or team coordination may be involved.
Method of assessment	<p>The purpose of this unit is to define the standard of performance to be achieved in the workplace. In undertaking training and assessment activities related to this unit, consideration should be given to the implementation of appropriate diversity and accessibility practices in order to accommodate people who may have special needs. Additional guidance on these and related matters is provided in ICA05 Section 1.</p> <ul style="list-style-type: none"> • Competency in this unit should be assessed using summative assessment to ensure consistency of performance in a range of contexts. This unit can be assessed either in the workplace or in a simulated environment. However, simulated activities must closely reflect the workplace to enable full demonstration of competency. • Assessment will usually include observation of real or simulated work processes and procedures and/or performance in a project context as well as questioning on underpinning knowledge and skills. The questioning of team members, supervisors, subordinates, peers and clients where appropriate may provide valuable input to the assessment process.
Guidance information for assessment	<p>The interdependence of units for assessment purposes may vary with the particular project or scenario. Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:</p> <ul style="list-style-type: none"> • ICAI4029C Install network hardware to a network • ICAS3034B Determine and action network problems • ICAS3121B Administer network peripherals

EVIDENCE GUIDE

An individual demonstrating this competency would be able to:

- Demonstrate some relevant theoretical knowledge
- Apply a range of well-developed skills
- Apply known solutions to a variety of predictable problems
- Perform processes that require a range of well-developed skills where some discretion and judgement is required
- Interpret available information, using discretion and judgement
- Take responsibility for own outputs in work and learning
- Take limited responsibility for the output of others
- Maintain knowledge of industry products and services

Additionally, an individual demonstrating this competency would be able to:

- Demonstrate broad knowledge of theoretical concepts, with substantial depth in some areas
- Analyse and plan approaches to technical problems and management requirements
- Transfer and apply theoretical concepts and technical or creative skills to a range of situations
- Evaluate information in relation to implementing software changes
- Take responsibility for outputs in relation to broad quantity and quality parameters

Range Statement**RANGE STATEMENT**

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work

RANGE STATEMENT	
situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.	
<i>System</i> may include but is not limited to:	<ul style="list-style-type: none"> • network • application • software • business • computers • mobile equipment • financial system • management system • information system
<i>Documentation</i> for version control may follow:	<ul style="list-style-type: none"> • ISO/IEC/AS standards • audit trails • naming standards • version control • project management templates and report writing • maintaining equipment inventory • client training • satisfaction reports
<i>Organisational guidelines</i> may include but are not limited to:	<ul style="list-style-type: none"> • personal use of emails and internet access • content of emails • making voice or video calls • downloading information and accessing particular websites • opening mail with attachments • virus risk • dispute resolution • document procedures and templates • communication methods • financial control mechanisms
<i>Client</i> may include but is not limited to:	<ul style="list-style-type: none"> • internal departments • external organisations • customers • individual people • internal employees
<i>User</i> may include:	<ul style="list-style-type: none"> • a person within a department • a department within the organisation • a third party

RANGE STATEMENT	
<i>Implementation</i> may include:	<ul style="list-style-type: none"> • implementing the entire system • formulating methods for standby operations or contingency plans
<i>Software</i> may include but is not limited to:	<ul style="list-style-type: none"> • commercial software applications • organisation-specific software, packaged software, in-house or customised software
<i>Organisational standards</i> may include:	<ul style="list-style-type: none"> • formal procedures that must be adhered to, such as check points and sign-offs with documented procedures and templates • implementation of financial control mechanisms; communication with stakeholders • dispute resolution and modification procedures • processes for determining size and cost

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Determine software requirements	1.1. Identify, clarify and organise <i>software requirements</i> following specified guidelines 1.2. Evaluate <i>requirements</i> in line with existing <i>application, operating system, organisational guidelines</i> , corporate purchasing, licensing arrangements and budget
2. Obtain software	2.1. Contact relevant vendors to obtain technical specifications for required <i>software</i> 2.2. Assess the options and provide recommendations to <i>appropriate person</i> for final analysis 2.3. Determine and record relevant licensing <i>requirements</i> and security issues
3. Install software	3.1. Develop plans, with prioritised tasks and contingency arrangements, for the installation of the selected <i>software</i> to <i>network</i> and networked <i>computers</i> with minimum disruption to <i>client</i> , including the management of existing data 3.2. Install and configure the <i>software</i> in accordance with installation procedures, <i>organisational guidelines</i> and plans 3.3. Test the installed <i>software</i> and system for error-free performance, identifying and resolving problems 3.4. Document the installation and configuration process according to <i>organisational guidelines</i> 3.5. Store the software licences and manuals according to <i>organisational guidelines</i>
4. Determine and provide instruction and support	4.1. Identify and document the <i>client</i> instruction <i>requirements</i> 4.2. Undertake one-to-one instruction with the client or user in a manner suitable to the audience 4.3. Refer group training requirements to the <i>appropriate person</i> 4.4. Gather and evaluate <i>client</i> and user feedback to ensure training and support <i>requirements</i> are met

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- Using software packages
- Configuring services on networked computers
- Solving problems related to installation of software
- Evaluation and report writing skills
- Literacy in general and technical workplace documentation
- Solving network problems related to installation of software

Required knowledge

- Detailed knowledge of the system's current functionality
- Broad general knowledge of organisational contracting procedures and responsibilities
- Broad knowledge of organisational security procedures
- Broad knowledge of network linkages
- Detailed general knowledge of relevant configuration procedures
- Broad knowledge of the operating system, with detailed knowledge in some areas
- Broad knowledge of current industry-accepted network protocols
- Broad knowledge of current industry-accepted network hardware and software products

Evidence Guide

EVIDENCE GUIDE	
<p>The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>Evidence of the following is essential:</p> <ul style="list-style-type: none"> • Assessment must confirm the ability to ascertain and meet client requirements for installation and upgrade of software. • Assessment must confirm the ability to plan, manage and support the installation of software to networked computers and to sustain network performance according to organisational and technical specifications. Installation and upgrade of software must be across a variety of situations and include unexpected contingencies. <p>To demonstrate competency in this unit the person will require access to:</p> <ul style="list-style-type: none"> • Software to be installed • Networked computers • Organisational guidelines • Live network
Context of and specific resources for assessment	<p>Installing networked software can be complex particularly for specialist areas, such as Linux Terminal Services. Configuration files need to be closely checked for compliance with hardware (e.g. monitors and printers) and other system software. The effective management and support of the software installation process are critical project management tasks in the context of ensuring minimal client disruption and the need for continuing network operation in a business context.</p> <p>The breadth, depth and complexity of knowledge and skills in this competency would cover a broad range of varied activities or application in a wider variety of contexts most of which are complex and non-routine. Leadership and guidance would be involved when</p>

EVIDENCE GUIDE	
	<p>organising activities of self and others as well as contributing to technical solutions of a non-routine or contingency nature.</p> <p>Assessment must ensure:</p> <ul style="list-style-type: none"> • Performance of a broad range of skilled applications including the requirement to evaluate and analyse current practices, develop new criteria and procedures for performing current practices and provision of some leadership and guidance to others in the application and planning of the skills would be characteristic. • Applications may involve responsibility for, and limited organisation of, others.
Method of assessment	<p>The purpose of this unit is to define the standard of performance to be achieved in the workplace. In undertaking training and assessment activities related to this unit, consideration should be given to the implementation of appropriate diversity and accessibility practices in order to accommodate people who may have special needs. Additional guidance on these and related matters is provided in ICA05 Section 1.</p> <ul style="list-style-type: none"> • Competency in this unit should be assessed using summative assessment to ensure consistency of performance in a range of contexts. This unit can be assessed either in the workplace or in a simulated environment. However, simulated activities must closely reflect the workplace to enable full demonstration of competency. • Assessment will usually include observation of real or simulated work processes and procedures and/or performance in a project context as well as questioning on underpinning knowledge and skills. The questioning of team members, supervisors, subordinates, peers and clients where appropriate may provide valuable input to the assessment process. The interdependence of units for assessment purposes may vary with the particular project or

EVIDENCE GUIDE	
	scenario.
Guidance information for assessment	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:</p> <ul style="list-style-type: none"> • ICAA4041C Determine and confirm client business expectations and needs • ICAD4043B Develop and present a feasibility report • ICAS4023B Provide one-to-one instruction • ICAS4127B Support system software • ICAS4108B Complete database back-up and recovery <p>An individual demonstrating this competency would be able to:</p> <ul style="list-style-type: none"> • Demonstrate understanding of a broad knowledge base incorporating some theoretical concepts • Apply solutions to a defined range of unpredictable problems • Identify and apply skill and knowledge areas to a wide variety of contexts, with depth in some areas • Identify, analyse and evaluate information from a variety of sources • Take responsibility for own outputs in relation to specified quality standards • Take limited responsibility for the quantity and quality of the output of others • Maintain knowledge of industry products and services

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

RANGE STATEMENT	
<i>Software</i> may include but is not limited to:	<ul style="list-style-type: none"> commercial software applications; organisation-specific software; word processing, spreadsheet, database, graphic, mail, communication packages and presentation functionalities; nature of licence
<i>Requirements</i> may be in reference to:	<ul style="list-style-type: none"> business system application network people in the organisation
<i>Application</i>	<ul style="list-style-type: none"> May include but is not limited to commercial software applications; organisation-specific software; word processing, spreadsheet, database, graphic, communication packages; and presentation functionalities. May include presentation applications contained in: Microsoft Office, Lotus Suite, Claris Works, Star Office or other similar applications
<i>Operating System</i> may include but is not limited to:	<ul style="list-style-type: none"> Linux 6.0 or above Windows 98 or above Apple OS 8 or above <p>Note: The use of operating system in this unit is in the context of the pre-existing system and may therefore not be current industry version. Preference is for Linux 7.0 or above, Windows 2000 or above, Apple OS X or above.</p>
<i>Appropriate person</i> may include:	<ul style="list-style-type: none"> supervisor teacher authorised business representative client
<i>Network</i> may include but is not limited to:	<ul style="list-style-type: none"> large and small LANs WANs the internet the use of the PSTN for dial-up modems only private lines data voice
<i>Computer</i> may include:	<ul style="list-style-type: none"> laptops workstations

RANGE STATEMENT	
	<ul style="list-style-type: none"> • servers • other devices

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Record security access	1.1. Obtain <i>client</i> access requirements and clearance levels according to <i>organisational requirements</i> 1.2. Issue computer or network user account and password details to <i>client</i> 1.3. Provide security documentation and access to <i>client</i> 1.4. Record user account and security access details to maintain system integrity and assist later auditing
2. Record software licences	2.1. Determine what licensed <i>software</i> is used within the organisation 2.2. Maintain <i>records</i> of licence number and location 2.3. Check personal computers and network for illegal <i>software</i> 2.4. Report illegal <i>software</i> to <i>appropriate person</i>
3. Carry out system backup	3.1. Create or review <i>organisational</i> back-up schedule 3.2. Complete file back-ups according to the schedule 3.3. Label and store back-ups according to <i>organisational requirements</i> 3.4. Maintain <i>records</i> of back-ups
4. Restore system backup	4.1. Determine and test restore procedures according to <i>organisational guidelines</i> 4.2. Complete a restore under supervision of an <i>appropriate person</i> 4.3. Record completed restore according to <i>organisational guidelines</i>
5. Apply security access controls	5.1. Document security access as per clearance guidelines set by management 5.2. Maintain a security access register in line with <i>organisational guidelines</i> to record which <i>client</i> or groups have access to which resources 5.3. Identify the security controls on the file system provided by the <i>operating system</i> 5.4. Apply effective access control on files and directories

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- Plain English literacy and communication skills in relation to presentation of information
- Basic diagnostic skills in relation to system administration
- Questioning and active listening for clarifying instructions
- Basic analytical skills
- Problem solving skills
- Inventory recording

Required knowledge

- General knowledge of software copyright responsibilities
- Detailed knowledge of organisational security procedures
- Broad knowledge of operating systems used by the organisation
- Current industry-accepted hardware and software products, with broad knowledge of general features and capabilities and detailed knowledge in some areas
- Detailed knowledge of back-up procedures
- Detailed knowledge of the system's current functionality
- General knowledge of system performance
- Broad knowledge of maintenance procedures
- Broad knowledge of diagnostic tools

Evidence Guide

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Analyse client support issues	1.1. Check for new problems logged by <i>client</i> 1.2. Check previous logs for similar problems or requests from <i>client</i> 1.3. Investigate and document the support issues affecting the <i>client</i> 1.4. Notify client of the results of <i>investigation</i> and provide <i>advice and support</i> on findings 1.5. Obtain <i>client</i> feedback and make changes
2. Provide advice on software, hardware or network	2.1. Confirm software, hardware or network requirements with <i>client</i> 2.2. Investigate and document a <i>solution</i> 2.3. Document additional requirements discovered in the investigation and refer them to the <i>client</i> 2.4. Obtain approval from the <i>client</i> to implement the <i>solution</i> 2.5. Investigate and document the amount of technical support the <i>client</i> may require 2.6. Discuss and agree the level of technical support identified with the <i>client</i> 2.7. Arrange a time with the <i>client</i> when support will take place 2.8. Provide technical support as part of group or one-to-one instruction to the <i>client</i> 2.9. Provide manuals and help <i>documentation</i> to the <i>client</i>
3. Obtain client feedback	3.1. Create an appropriate evaluation or feedback form or other mechanism to gather feedback about the <i>solution</i> and support provided 3.2. Provide <i>client</i> with instructions on how to complete the form or use other means of providing feedback 3.3. Distribute the evaluation or feedback to the <i>client</i> 3.4. Review the feedback from the <i>client</i> to identify areas for improvement

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- Writing macros and templates
- One-to-one instruction
- Client needs assessment methods
- Interpretation of technical manuals
- Verbal and non-verbal communication skills for conveying and clarifying complex information
- Customer service skills in a range of contexts at various levels

Required knowledge

- Operating systems supported by the organisation
- Advanced features and functions of software
- Information sources
- Contract and service agreements with vendors
- Operating systems functions and basic features
- Hardware and software supported by the organisation
- Features of different types of hardware
- Security and network guidelines and procedures
- Available in-house and vendor support

Evidence Guide

EVIDENCE GUIDE	
<p>The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>Evidence of the following is essential:</p> <ul style="list-style-type: none"> • Assessment must confirm the ability to convey comprehensive technical information to clients in a clear, concise and coherent manner. Assessment must confirm the ability to access technical manuals and help documentation and to convey this information to the client in a concise and jargon-free manner. Information conveyed enhances client efficiency. <p>To demonstrate competency in this unit the learner will require access to:</p> <ul style="list-style-type: none"> • Peers and supervisors for obtaining information • Software, hardware and networks • Helpdesk repository
Context of and specific resources for assessment	<p>The breadth, depth and complexity of knowledge and skills in this competency would cover selecting, adapting and transferring skills and knowledge to new environments and providing technical advice and some leadership in resolution of specified problems. This would be applied across a range of roles in a variety of contexts with some complexity in the extent and choice of options available.</p> <p>Assessment must ensure:</p> <ul style="list-style-type: none"> • Performance of a defined range of skilled operations, usually within a range of broader related activities involving known routines, methods and procedures, where some discretion and judgement is required in the selection of equipment, services or contingency measures and within known time constraints would be characteristic. • Applications may involve some responsibility for

EVIDENCE GUIDE	
	<p>others. Participation in teams including group or team coordination may be involved.</p>
Method of assessment	<p>The purpose of this unit is to define the standard of performance to be achieved in the workplace. In undertaking training and assessment activities related to this unit, consideration should be given to the implementation of appropriate diversity and accessibility practices in order to accommodate people who may have special needs. Additional guidance on these and related matters is provided in ICA05 Section 1.</p> <ul style="list-style-type: none"> • Competency in this unit should be assessed using summative assessment to ensure consistency of performance in a range of contexts. This unit can be assessed either in the workplace or in a simulated environment. However, simulated activities must closely reflect the workplace to enable full demonstration of competency. • Assessment will usually include observation of real or simulated work processes and procedures and/or performance in a project context as well as questioning on underpinning knowledge and skills. The questioning of team members, supervisors, subordinates, peers and clients where appropriate may provide valuable input to the assessment process. The interdependence of units for assessment purposes may vary with the particular project or scenario.
Guidance information for assessment	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended.</p> <p>An individual demonstrating this competency would be able to:</p> <ul style="list-style-type: none"> • Demonstrate some relevant theoretical knowledge • Apply a range of well-developed skills • Apply known solutions to a variety of predictable problems • Perform processes that require a range of well-developed skills where some discretion and judgement is required

EVIDENCE GUIDE	
	<ul style="list-style-type: none"> • Interpret available information, using discretion and judgement • Take responsibility for own outputs in work and learning • Take limited responsibility for the output of others • Maintain knowledge of industry products and services

Range Statement

RANGE STATEMENT	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
<p><i>Client</i> may include but is not limited to:</p>	<ul style="list-style-type: none"> • internal departments • external organisations • individual people • employees
<p><i>Advice and support</i> may include:</p>	<ul style="list-style-type: none"> • provision of client documentation • manuals • one-to-one training • identification of training need for referral to supervisor • documentation from vendor • advice on software supported by the organisation, including but not limited to use of macros, statistical functions of spreadsheets, creation of templates, generation of a complex report on a database, password and log-on procedure • advice on hardware supported by the organisation, including but not limited to printers, laptops, notebooks, CD-ROM, screens, disk drives, reconfiguration of settings, operation of scanners

RANGE STATEMENT	
<i>Documentation</i> may include:	<ul style="list-style-type: none"> • a collection of records that describe the structure, purpose, operation, maintenance and data requirements for a computer program, operating system or hardware device
<i>Investigation</i> may include:	<ul style="list-style-type: none"> • on-site examination • questions and answers • active listening to clients and colleagues • contacting vendor or maintenance organisations • reviewing technical advice about the organisation
<i>Solution</i> may include but is not limited to:	<ul style="list-style-type: none"> • new hardware • hardware upgrades • new software • software upgrades • user training • implementing a new system

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<p>1. Determine and undertake required equipment maintenance</p>	<p>1.1.Examine and review specified <i>equipment</i> and <i>maintenance</i> procedures, in order to determine those procedures that can be handled internally</p> <p>1.2.Organise and undertake internal <i>maintenance</i>, as specified in the <i>maintenance</i> procedures</p> <p>1.3.Report problems promptly to <i>appropriate person</i></p>
<p>2. Diagnose and repair faults</p>	<p>2.1.Assess an existing problem situation and identify the main problem area</p> <p>2.2.Test the suspected faulty <i>equipment</i> or <i>software</i> for possible failures or performance degradation, utilising available technology</p> <p>2.3.Organise and analyse the test results</p> <p>2.4.Review and analyse historical fault data for information of relevance to existing faults</p> <p>2.5.Develop plans, with prioritised tasks and contingency arrangements, for the repair or replacement of faulty <i>equipment</i> or <i>software</i>, with minimum disruption to client</p> <p>2.6.Liaise with <i>appropriate person</i> to obtain approval for the plans</p> <p>2.7.Obtain necessary <i>components</i> and repair the <i>equipment</i> or <i>software</i> in a timely, organised manner, following <i>OH&S standards</i></p>
<p>3. Update documentation and make recommendations for future maintenance</p>	<p>3.1.Record <i>maintenance</i> and fault data and equipment modifications, in accordance with organisational standards</p> <p>3.2.Identify and report instances where preventative measures are needed</p> <p>3.3.Review and update maintenance and fault data and report outcomes periodically to <i>appropriate person</i></p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

REQUIRED SKILLS AND KNOWLEDGE

- Risk analysis of maintenance procedures
- Reading and interpretation of technical manuals
- Technical diagnostic skills
- Problem solving skills for a defined range of unpredictable problems
- Language, literacy and communication skills necessary to process and present verbal and written information
- Analysis and evaluation of information in a defined range of areas
- Record keeping skills

Required knowledge

- Broad knowledge of equipment and software maintenance practices
- Familiarity with current industry-accepted hardware and software testing and diagnostic tools, with the ability to utilise them effectively
- Relevant service-level agreements (SLAs) in order to determine the conditions of the SLA cover
- Knowledge of the client warranty claims, repair or replacement procedures
- Detailed knowledge of the system's current functionality
- Broad knowledge of quality assurance practices
- Operation and purpose of specified equipment
- Operation of technical diagnostic tools
- Detailed knowledge of help desk response level escalation procedures

Evidence Guide

EVIDENCE GUIDE	
<p>The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>Evidence of the following is essential:</p> <ul style="list-style-type: none"> Assessment must confirm the ability to undertake maintenance according to maintenance procedures, resolve a defined range of equipment and software problems, and maintain accurate records according to organisational guidelines. <p>To demonstrate competency in this unit the learner will require access to:</p> <ul style="list-style-type: none"> Technical environment with a variety of operational equipment and software Technical manuals and tools Maintenance procedures Equipment and/or software
Context of and specific resources for assessment	<p>Maintaining equipment and software in good order relates to house-keeping within the organisation. The outcomes from maintaining software and equipment in sound working order are reliability and stability for end users, consistency of performance and less down time.</p> <p>The breadth, depth and complexity of knowledge and skills in this competency would cover selecting, adapting and transferring skills and knowledge to new environments and providing technical advice and some leadership in resolution of specified problems. This would be applied across a range of roles in a variety of contexts with some complexity in the extent and choice of options available.</p> <p>Assessment must ensure:</p> <ul style="list-style-type: none"> Performance of a defined range of skilled operations, usually within a range of broader related activities involving known routines, methods and procedures,

EVIDENCE GUIDE	
	<p>where some discretion and judgement is required in the section of equipment, services or contingency measures and within known time constraints would be characteristic.</p> <ul style="list-style-type: none"> • Applications may involve some responsibility for others. Participation in teams including group or team coordination may be involved.
Method of assessment	<p>The purpose of this unit is to define the standard of performance to be achieved in the workplace. In undertaking training and assessment activities related to this unit, consideration should be given to the implementation of appropriate diversity and accessibility practices in order to accommodate people who may have special needs. Additional guidance on these and related matters is provided in ICA05 Section 1.</p> <ul style="list-style-type: none"> • Competency in this unit should be assessed using summative assessment to ensure consistency of performance in a range of contexts. This unit can be assessed either in the workplace or in a simulated environment. However, simulated activities must closely reflect the workplace to enable full demonstration of competency. • Assessment will usually include observation of real or simulated work processes and procedures and/or performance in a project context as well as questioning on underpinning knowledge and skills. The questioning of team members, supervisors, subordinates, peers and clients where appropriate may provide valuable input to the assessment process. The interdependence of units for assessment purposes may vary with the particular project or scenario.
Guidance information for assessment	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:</p> <ul style="list-style-type: none"> • ICAT3025B Run standard diagnostic tests • ICAS3034B Determine and action network problems • ICAI3021B Connect internal hardware components

EVIDENCE GUIDE	
	<ul style="list-style-type: none"> • ICAU3019B Migrate to new technology <p>An individual demonstrating this competency would be able to:</p> <ul style="list-style-type: none"> • Demonstrate some relevant theoretical knowledge • Apply a range of well-developed skills • Apply known solutions to a variety of predictable problems • Perform processes that require a range of well-developed skills where some discretion and judgement is required • Interpret available information, using discretion and judgement • Take responsibility for own outputs in work and learning • Take limited responsibility for the output of others • Maintain knowledge of industry products and services

Range Statement

RANGE STATEMENT	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
<i>Appropriate person</i> may include:	<ul style="list-style-type: none"> • supervisor • teacher • authorised business representative • client
<i>Hardware</i> may include but is not limited to:	<ul style="list-style-type: none"> • workstations • personal computers • modems or other connectivity devices • networks • DSL modems • remote sites

RANGE STATEMENT	
	<ul style="list-style-type: none"> • servers
<i>Equipment</i> may include but is not limited to:	<ul style="list-style-type: none"> • workstations • personal computers • modems or other connectivity devices • printers • DSL modems • hard drives • monitors • switches • hubs • personal digital assistant (PDA) • other peripheral devices
<i>Software</i> may include but is not limited to:	<ul style="list-style-type: none"> • commercial, in-house, packaged or customised software
<i>Client</i> may include but is not limited to:	<ul style="list-style-type: none"> • internal departments • external organisations • individual people • employees
<i>Components</i> may include:	<ul style="list-style-type: none"> • motherboards • CMOS battery • central processing unit (CPU) • CD and DVD drives • interface cards • drives • fax/modem cards • RAM upgrades • CPU upgrades
<i>Maintenance</i> may include:	<ul style="list-style-type: none"> • on-site response • remote diagnostics • return to depot
<i>OH&S standards</i> may include:	<ul style="list-style-type: none"> • correct posture • lighting • type of desk • type of monitor • style of chair • typing position • repetitive strain injury prevention • ventilation • light position

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Review database architecture	1.1. Identify the <i>architecture</i> of a <i>database</i> file system and consequently, determine the most appropriate methods for <i>back-up</i> and recovery 1.2. Identify and examine risks and failure scenarios that are likely or possible
2. Determine backup methods appropriate to database requirements	2.1. Evaluate a range of <i>back-up</i> and restoration methods based on organisational and security <i>standards</i> and on the assessment of likely or possible failure scenarios 2.2. Complete full off-line <i>back-ups</i> according to organisational and security <i>standards</i> with minimal down time 2.3. Complete on-line file <i>back-ups</i> as determined by organisational and security <i>standards</i> and with minimal down time 2.4. Employ disk mirroring and redundant array of inexpensive disks (RAID) hard disk configurations to keep copies of files 2.5. Arrange off-site copies of <i>back-up</i> files
3. Establish recovery points and disaster recovery procedures	3.1. Determine <i>database</i> recovery points based on the <i>back-up</i> arrangements according to <i>organisational guidelines</i> 3.2. Test the restore process in order to ensure that the <i>database</i> can be restored to a given recovery point, with minimal down time 3.3. Complete the restoration of the <i>database</i> to the point of failure, without loss of committed transactions
4. Create and deploy standby database	4.1. Create or set up a standby <i>database</i> to meet <i>organisational guidelines</i> 4.2. Implement standby <i>database</i> to support critical business functions 4.3. Prepare <i>documentation</i> for standby <i>database</i>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

REQUIRED SKILLS AND KNOWLEDGE**Required skills**

- Analysis skills in relation to non-routine work processes
- Project planning skills in relation to set benchmarks and identified scope
- Report writing skills for business requiring depth in some areas, analysis and evaluation of information in a defined range of areas
- Problem solving skills in non-routine work processes
- Open file back-up procedures and restore operations
- Research skills for identifying, analysing and evaluating broad features of a particular business domain and best practice in back-up and recovery strategies

Required knowledge

- General knowledge of structured query language
- Detailed knowledge of database administration
- Basic knowledge of tuning methodologies
- General knowledge of the principles of databases
- Broad knowledge of diagnostic tools
- Detailed knowledge of back-up and recovery methods
- Detailed knowledge of database security

Evidence Guide

EVIDENCE GUIDE	
<p>The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>Evidence of the following is essential:</p> <ul style="list-style-type: none"> • Assessment must confirm the ability to implement back-up and recovery procedures, with minimum disruption to the business and if necessary, to introduce contingency plans. <p>To demonstrate competency in this unit the learner will require access to:</p> <ul style="list-style-type: none"> • Documentation standards • Back-up and recovery policies • Database package with data • Server and networked PC on which to conduct back-up and recovery procedures
Context of and specific resources for assessment	<p>Modern business practice requires organisations to implement efficient and effective methods of capturing, storing and retrieving business-critical information and data. The security and back-up of data repositories is of critical importance to most organisations.</p> <p>Organisational databases are no longer static repositories of information rather they are dynamic, interactive and frequently 'live'. Client and customer access to on-line information can occur at any time and a key capability of any database system is the successful back-up in an efficient and timely manner without disruption or loss of data.</p> <p>This unit addresses these three major elements in maintaining the integrity of an electronic database system - through creating periodic 'snapshot' back-ups of the open data files and then restoring them to working order.</p>

EVIDENCE GUIDE	
	<p>The breadth, depth and complexity of knowledge and skills in this competency would cover a broad range of varied activities or application in a wider variety of contexts most of which are complex and non-routine. Leadership and guidance would be involved when organising activities of self and others as well as contributing to technical solutions of a non-routine or contingency nature.</p> <p>Assessment of this unit of competency will usually include observation of the back-up and restore procedures, including the planning and the carrying out of the back-up and restore procedures, from determining what would be the best time to back up, to back up media, to the actual restore processes, including the use of particular tools or systems.</p> <p>Performance that involves evaluating and analysing current practices, to develop new criteria and procedures for performing current practices and for provision of some leadership and guidance to others, in the application of these skills.</p> <p>Assessment must ensure:</p> <ul style="list-style-type: none"> • Performance of a broad range of skilled applications including the requirement to evaluate and analyse current practices, develop new criteria and procedures for performing current practices and provision of some leadership and guidance to others in the application and planning of the skills would be characteristic. • Applications may involve responsibility for, and limited organisation of, others
Method of assessment	<p>The purpose of this unit is to define the standard of performance to be achieved in the workplace. In undertaking training and assessment activities related to this unit, consideration should be given to the implementation of appropriate diversity and accessibility practices in order to accommodate people who may have special needs. Additional guidance on these and related</p>

EVIDENCE GUIDE	
	<p>matters is provided in ICA05 Section 1.</p> <ul style="list-style-type: none"> • Competency in this unit should be assessed using summative assessment to ensure consistency of performance in a range of contexts. This unit can be assessed either in the workplace or in a simulated environment. However, simulated activities must closely reflect the workplace to enable full demonstration of competency. • Assessment will usually include observation of real or simulated work processes and procedures and/or performance in a project context as well as questioning on underpinning knowledge and skills. The questioning of team members, supervisors, subordinates, peers and clients where appropriate may provide valuable input to the assessment process. The interdependence of units for assessment purposes may vary with the particular project or scenario.
<p>Guidance information for assessment</p>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:</p> <ul style="list-style-type: none"> • ICAB4060B Identify physical database requirements • ICAB4061B Monitor physical database implementation • ICAB4136B Use structured query language to create database structures and manipulate data • ICAS4113C Identify and resolve common database performance problems • ICAS4114B Implement maintenance procedures • ICAS4125B Monitor and administer a database • ICAS4127B Support system software <p>An individual demonstrating this competency would be able to:</p> <ul style="list-style-type: none"> • Demonstrate broad knowledge of database concepts • Identify and apply skill and knowledge areas to open file back-up procedures and restore operations

EVIDENCE GUIDE	
	<p>Additionally, an individual demonstrating this competency would be able to:</p> <ul style="list-style-type: none"> • Demonstrate understanding of a broad knowledge base incorporating some theoretical concepts • Apply solutions to a defined range of unpredictable problems • Identify and apply skill and knowledge areas to a wide variety of contexts, with depth in some areas • Identify, analyse and evaluate information from a variety of sources • Take responsibility for own outputs in relation to specified quality standards • Take limited responsibility for the quantity and quality of the output of others • Maintain knowledge of industry products and services

Range Statement

RANGE STATEMENT	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
<p><i>Architecture</i> may include but is not limited to:</p>	<ul style="list-style-type: none"> • Operating system: Novell NetWare 5 or above or any operating system that has multi-user ability, Linux, Mac OS, Windows 2000 or above • Database software: Oracle, Sybase, Microsoft SQL server, Ingres, DB2, Informix, mSQL, MySQL, SQL server • Configuration: small memory model, large memory model, requests per second
<p><i>Database</i> may include but are not limited to:</p>	<ul style="list-style-type: none"> • relational databases • object-relational databases • proprietary databases • commercial off the shelf (COTS) database

Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Diagnose problems	1.1. Determine appropriate database performance <i>diagnostic tool</i> to use based on organisational <i>database</i> requirements and vendor recommendations 1.2. Run <i>diagnostic tool</i> to identify issues causing degradation of database <i>performance</i> 1.3. Determine and record where inappropriate use of <i>database</i> and temporary table spaces occurs 1.4. Carry out appropriate fixes based on diagnostic results
2. Configure database	2.1. Adopt a distributed files <i>architecture</i> to minimise I/O (input/output) contention 2.2. Ensure that <i>database</i> back-up procedures are appropriate for method of data storage 2.3. Reconfigure rollback segments 2.4. Configure the <i>database and</i> test its <i>performance</i>
3. Tune database	3.1. Track the module <i>performance</i> according to specifications 3.2. Monitor and tune the efficiency of <i>structured query language</i> , as required 3.3. Monitor and measure the <i>performance</i> of shared pool, blocks and buffers 3.4. Detect, identify and resolve contentions that may arise in the real-time operation of the <i>database</i> 3.5. Reconfigure the <i>database</i> according to specifications

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- Analysis capability in relation to normal routine and non-routine work processes
- Project planning skills in relation to set benchmarks and identified scope
- Report writing skills for business, requiring depth in some areas, analysis and evaluation of information in a defined range of areas
- Problem solving skills in non-routine work processes

REQUIRED SKILLS AND KNOWLEDGE**Required knowledge**

- Broad knowledge of SQL
- Detailed knowledge of database administration
- Detailed knowledge of tuning methodologies
- General knowledge of the principles of database design
- Detailed knowledge of diagnostic tools

Evidence Guide

EVIDENCE GUIDE	
<p>The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>Evidence of the following is essential:</p> <ul style="list-style-type: none"> • Assessment must confirm the ability to correctly identify and solve common database problems to improve database performance. <p>To demonstrate competency in this unit the following resources will be needed:</p> <ul style="list-style-type: none"> • Diagnostic tools • Database operating on a network
Context of and specific resources for assessment	<p>Resolving database issues can be complex and take considerable time. The core role in this competency is to take part in common database performance problem solving.</p> <p>All database applications can be performance enhanced with special care and code optimisations.</p> <p>This unit should be flexible enough to allow for the creation of specialised database programs that are poor in performance so that problem solving processes can be applied.</p> <p>There are many open source database offerings that may provide a suitable code base from which to work.</p> <p>The breadth, depth and complexity of knowledge and skills in this competency would cover a broad range of varied activities or application in a wider variety of contexts most of which are complex and non-routine. Leadership and guidance would be involved when organising activities of self and others as well as contributing to technical solutions of a non-routine or</p>

EVIDENCE GUIDE	
	<p>contingency nature.</p> <p>Assessment must ensure:</p> <ul style="list-style-type: none"> • Performance of a broad range of skilled applications including the requirement to evaluate and analyse current practices, develop new criteria and procedures for performing current practices and provision of some leadership and guidance to others in the application and planning of the skills would be characteristic. • Applications may involve responsibility for, and limited organisation of, others.
Method of assessment	<p>The purpose of this unit is to define the standard of performance to be achieved in the workplace. In undertaking training and assessment activities related to this unit, consideration should be given to the implementation of appropriate diversity and accessibility practices in order to accommodate people who may have special needs. Additional guidance on these and related matters is provided in ICA05 Section 1.</p> <ul style="list-style-type: none"> • Competency in this unit should to be assessed using summative assessment to ensure consistency of performance in a range of contexts. This unit can be assessed either in the workplace or in a simulated environment. However, simulated activities must closely reflect the workplace to enable full demonstration of competency. • Assessment will usually include observation of real or simulated work processes and procedures and/or performance in a project context as well as questioning on underpinning knowledge and skills. The questioning of team members, supervisors, subordinates, peers and clients where appropriate may provide valuable input to the assessment process.
Guidance information for assessment	<p>The interdependence of units for assessment purposes may vary with the particular project or scenario. Holistic assessment with other units relevant to the industry</p>

EVIDENCE GUIDE

	<p>sector, workplace and job role is recommended, for example:</p> <ul style="list-style-type: none"> • ICAB4060B Identify physical database requirements • ICAB4061B Monitor physical database implementation • ICAB4136B Use structured query language to create database structures and manipulate • ICAS4108B Complete database back-up and recovery • ICAS4125B Monitor and administer a database <p>An individual demonstrating this competency would be able to:</p> <ul style="list-style-type: none"> • Determine performance benchmarks from a database code structure • Apply solutions to improve database performance • Interpret available information and request clarification where needed • Take responsibility for outputs in work and learning situations <p>Additionally, an individual demonstrating this competency would be able to:</p> <ul style="list-style-type: none"> • Demonstrate understanding of a broad knowledge base incorporating some theoretical concepts • Apply solutions to a defined range of unpredictable problems • Identify and apply skill and knowledge areas to a wide variety of contexts, with depth in some areas • Identify, analyse and evaluate information from a variety of sources • Take responsibility for own outputs in relation to specified quality standards • Take limited responsibility for the quantity and quality of the output of others • Maintain knowledge of industry products and services
--	---

Range Statement

RANGE STATEMENT	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
<p><i>Diagnostic tools</i> may include:</p>	<ul style="list-style-type: none"> • software applications external to the database server • the server software or may be inbuilt to the server software
<p><i>Database</i> may include but is not limited to:</p>	<ul style="list-style-type: none"> • relational databases • object-relational databases • proprietary databases • commercial off the shelf (COTS) database packages
<p><i>Architecture</i> may include but is not limited to:</p>	<ul style="list-style-type: none"> • Operating system: Novell NetWare 5 or above or any operating system that has multi-user ability, Linux, Mac OS, Windows 2000 or above • Database software: Oracle, Sybase, Microsoft SQL server, Ingres, DB2, Informix, mSQL, MySQL, SQL server • Configuration: small memory model, large memory model, requests per second
<p><i>Performance</i> may include but is not limited to:</p>	<ul style="list-style-type: none"> • improvements to response time • simultaneous access • latch contention • record or table locking • compacting database files • repairing the database • splitting database files • archiving old records • creating indexes • preventing events causing waits
<p><i>Structured Query Language</i> may include:</p>	<ul style="list-style-type: none"> • proprietary extensions: AS/NZS 3968.0:1994 Information technology - database languages - SQL - definition of data structures and basic operations

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<p>1. Determine best practices for equipment and software maintenance</p>	<p>1.1. Identify equipment and software that is to be maintained and implement processes to ensure future acquisitions of equipment and software are identified</p> <p>1.2. Identify vendor documentation, peer organisations or research information detailing best practices in equipment and software maintenance to improve system performance and reliability</p> <p>1.3. Develop recommended maintenance and operations guidelines for equipment and software maintenance based on the above research</p> <p>1.4. Obtain requirements from user in the area of equipment maintenance and reliability</p> <p>1.5. Document procedures for maintenance based upon best practices</p>
<p>2. Identify resources to provide equipment and software maintenance</p>	<p>2.1. Identify and record the level of support that can be provided by in-house resources</p> <p>2.2. Identify and record the support to be supplied by external or third-party organisations</p> <p>2.3. Develop or update service-level agreement with internal user and third-party suppliers</p>
<p>3. Revise practices, where appropriate</p>	<p>3.1. Monitor and review maintenance operation</p> <p>3.2. Identify problem areas including failures to meet service-level agreements, and consider changes to maintenance procedures</p> <p>3.3. Assess changes in consultation with user, support staff and third party suppliers</p> <p>3.4. Design and implement improvements to maintenance procedures</p>

Required Skills and Knowledge

<p>REQUIRED SKILLS AND KNOWLEDGE</p> <p>This section describes the skills and knowledge required for this unit.</p>
<p>Required skills</p>
<ul style="list-style-type: none"> • Problem solving skills for a defined range of unpredictable problems involving participation in the development of strategic initiatives

REQUIRED SKILLS AND KNOWLEDGE

- Plain English literacy and communication skills in relation to analysis, evaluation and presentation of information
- Teamwork skills involve the contribution to solutions and goals of a non-routine or contingency nature
- Negotiation skills in relation to other team members and applied to a defined range of predictable problems
- Report writing skills for business requiring depth in some areas, analysis and evaluation of information in a defined range of areas
- Change management skills in relation to maintaining the continuity of IT operations and business functions
- Customer service skills
- Skills in handling difficult clients
- Conflict resolution skills
- Risk analysis skills
- Low-level training needs analysis skills
- Low-level programming skills

Required knowledge

- Broad understanding of help desk and maintenance practices
- Current industry-standard hardware and software products, with broad knowledge of general features and capabilities and detailed knowledge in some areas
- Broad knowledge of the role of stakeholders and the degree of stakeholder involvement
- Broad knowledge of the client business domain
- Detailed knowledge of the system's current functionality
- Broad knowledge of quality assurance practices
- One or more change management tools
- Broad knowledge of system performance
- Broad knowledge of maintenance procedures
- Business scheduling requirements
- Broad knowledge of diagnostic tools

Evidence Guide

EVIDENCE GUIDE	
<p>The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>Evidence of the following is essential:</p> <ul style="list-style-type: none"> Assessment must confirm the ability to set up efficient and responsive maintenance procedures to keep equipment and software operating. <p>To demonstrate competency in this unit the learner will require access to:</p> <ul style="list-style-type: none"> Technical environment with a variety of operational equipment Technical manuals and tools
Context of and specific resources for assessment	<p>The breadth, depth and complexity of knowledge and skills in this competency would cover a broad range of varied activities or application in a wider variety of contexts most of which are complex and non-routine. Leadership and guidance would be involved when organising activities of self and others as well as contributing to technical solutions of a non-routine or contingency nature.</p> <p>Assessment must ensure:</p> <ul style="list-style-type: none"> Performance of a broad range of skilled applications including the requirement to evaluate and analyse current practices, develop new criteria and procedures for performing current practices and provision of some leadership and guidance to others in the application and planning of the skills would be characteristic. Applications may involve responsibility for, and limited organisation of, others.
Method of assessment	<p>The purpose of this unit is to define the standard of performance to be achieved in the workplace. In undertaking training and assessment activities related to</p>

EVIDENCE GUIDE	
	<p>this unit, consideration should be given to the implementation of appropriate diversity and accessibility practices in order to accommodate people who may have special needs. Additional guidance on these and related matters is provided in ICA05 Section 1.</p> <ul style="list-style-type: none"> • Competency in this unit should be assessed using summative assessment to ensure consistency of performance in a range of contexts. This unit can be assessed either in the workplace or in a simulated environment. However, simulated activities must closely reflect the workplace to enable full demonstration of competency. • Assessment will usually include observation of real or simulated work processes and procedures and/or performance in a project context as well as questioning on underpinning knowledge and skills. The questioning of team members, supervisors, subordinates, peers and clients where appropriate may provide valuable input to the assessment process. The interdependence of units for assessment purposes may vary with the particular project or scenario.
<p>Guidance information for assessment</p>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:</p> <ul style="list-style-type: none"> • ICAA4041C Determine and confirm client business expectations and needs • ICAS4116B Undertake capacity planning <p>An individual demonstrating this competency would be able to:</p> <ul style="list-style-type: none"> • Demonstrate understanding of a broad knowledge base incorporating some theoretical concepts • Apply solutions to a defined range of unpredictable problems • Identify and apply skill and knowledge areas to a wide variety of contexts, with depth in some areas • Identify, analyse and evaluate information from a variety of sources

EVIDENCE GUIDE	
	<ul style="list-style-type: none"> • Take responsibility for own outputs in relation to specified quality standards • Take limited responsibility for the quantity and quality of the output of others • Maintain knowledge of industry products and services

Range Statement

RANGE STATEMENT	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
Equipment may include but is not limited to:	<ul style="list-style-type: none"> • workstations • personal computers • modems and other connectivity devices • printers • DSL modems • hard drives • monitors • switches • hubs • personal digital assistants • other peripheral devices
Software may include but is not limited to:	<ul style="list-style-type: none"> • commercial, in-house, packaged or customised software
Documentation may follow:	<ul style="list-style-type: none"> • ISO/IEC/AS standards • audit trails • naming standards • version control • project management templates and report writing • maintaining equipment inventory • client training

RANGE STATEMENT	
	<ul style="list-style-type: none"> • satisfaction reports
<i>Requirements</i> may be in reference to:	<ul style="list-style-type: none"> • business • system • application • network • people in the organisation
<i>User</i> may include:	<ul style="list-style-type: none"> • a person within a department • a department within the organisation • a third party
<i>Service-level agreement</i> may exist for:	<ul style="list-style-type: none"> • many different infrastructure services, including communications carriers, ISPs, ASPs and SLAs for vendor products, workload and performance considerations, expectations regarding servicing, penalties, charge back to business units
<i>Best practices</i> may include:	<ul style="list-style-type: none"> • schedule of maintenance • user recommended activities • technical specialist activities • identification and supply of parts • repair of parts

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Start up a database	1.1. Configure system for <i>database</i> start-up 1.2. Monitor <i>database</i> start-up and operation for irregularities
2. Manage database	2.1. Take action to ensure that a data dictionary has been compiled and that data structures are in place 2.2. Maintain data integrity constraints according to <i>business requirements</i> 2.3. Create and design indexes and multiple-field keys according to <i>business requirements</i> 2.4. Monitor the locking options chosen for the <i>database</i> 2.5. Confirm that recent back-ups of the <i>database</i> have been stored and that back-ups can be retrieved as a full working copy 2.6. Monitor the data storage space for ongoing viability and resize as needed 2.7. Update data according to <i>organisational guidelines</i>
3. Manage database access	3.1. Allocate or remove access privileges according to user status 3.2. Monitor <i>network server</i> log-in log file for illegal log-in attempts or for security breaches 3.3. Manage <i>system</i> resources in the context of <i>database</i> administration

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE
This section describes the skills and knowledge required for this unit.
Required skills
<ul style="list-style-type: none"> • Analysis skills in relation to working database processes • Report writing skills for business • Database management skills requiring depth in some areas • Analysis and evaluation of information relating to database performance • Problem solving skills in database processes • Research skills for identifying, analysing and evaluating features of a particular database

REQUIRED SKILLS AND KNOWLEDGE**Required knowledge**

- General knowledge of structured query language (SQL)
- General knowledge of database administration
- Detailed knowledge of tuning methodologies
- General knowledge of the principles of databases
- Detailed knowledge of database management tools
- Detailed knowledge of back-up and recovery methodologies
- Detailed knowledge of database security

Evidence Guide

EVIDENCE GUIDE	
<p>The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>Evidence of the following is essential:</p> <ul style="list-style-type: none"> Assessment must confirm the ability to consistently manage and administer a database. <p>To demonstrate competency in this unit the learner will require access to:</p> <ul style="list-style-type: none"> A live database, preferably on a LAN on which there is a server that offers log-in functionality
Context of and specific resources for assessment	<p>Databases offer shared collections of logically related data, designed to meet the information needs of multiple users. These stores of data describe entities and the relationships between the entities and are generally supported by a database management system which is the software mechanism for managing the data.</p> <p>Databases are in place for most organisations and provide the fundamental underpinnings for online facilities required for data provision and data retrieval. The effective management and administration of databases are of critical importance to businesses which rely on accurate and up to date information availability.</p> <p>Applications involve responsibility for database administration.</p> <p>The breadth, depth and complexity of knowledge and skills in this competency would cover a broad range of varied activities or application in a wider variety of contexts most of which are complex and non-routine. Leadership and guidance would be involved when organising activities of self and others as well as contributing to technical solutions of a non-routine or contingency nature.</p>

EVIDENCE GUIDE	
	<p>Assessment must ensure:</p> <ul style="list-style-type: none"> • Performance of a broad range of skilled applications including the requirement to evaluate and analyse current practices, develop new criteria and procedures for performing current practices and provision of some leadership and guidance to others in the application and planning of the skills would be characteristic. • Applications may involve responsibility for, and limited organisation of, others.
Method of assessment	<p>The purpose of this unit is to define the standard of performance to be achieved in the workplace. In undertaking training and assessment activities related to this unit, consideration should be given to the implementation of appropriate diversity and accessibility practices in order to accommodate people who may have special needs. Additional guidance on these and related matters is provided in ICA05 Section 1.</p> <ul style="list-style-type: none"> • Competency in this unit should be assessed using summative assessment to ensure consistency of performance in a range of contexts. This unit can be assessed either in the workplace or in a simulated environment. However, simulated activities must closely reflect the workplace to enable full demonstration of competency. • Assessment will usually include observation of real or simulated work processes and procedures and/or performance in a project context as well as questioning on underpinning knowledge and skills. The questioning of team members, supervisors, subordinates, peers and clients where appropriate may provide valuable input to the assessment process. The interdependence of units for assessment purposes may vary with the particular project or scenario.
Guidance information for assessment	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended,</p>

EVIDENCE GUIDE

for example:

- ICAB4060B Identify physical database requirements
- ICAB4061B Monitor physical database implementation
- ICAS4108B Complete database back-up and recovery
- ICAS4113C Identify and resolve common database performance problems
- ICAS4114B Implement maintenance procedures

An individual demonstrating this competency would be able to:

- Demonstrate skills in administering a database
- Monitor data and provide solutions to a defined range of unpredictable problems
- Identify and apply skills and knowledge related to database problems
- Identify, analyse and evaluate information from a variety of sources
- Take limited responsibility for the administration of a database

Additionally, an individual demonstrating this competency would be able to:

- Demonstrate understanding of a broad knowledge base incorporating some theoretical concepts
- Apply solutions to a defined range of unpredictable problems
- Identify and apply skill and knowledge areas to a wide variety of contexts, with depth in some areas
- Identify, analyse and evaluate information from a variety of sources
- Take responsibility for own outputs in relation to specified quality standards
- Take limited responsibility for the quantity and quality of the output of others
- Maintain knowledge of industry products and services

Range Statement

RANGE STATEMENT	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
<p>Database may include but is not limited to:</p>	<ul style="list-style-type: none"> • relational databases • object-relational databases • proprietary databases • commercial off the shelf (COTS) database packages such as Oracle, PostgreSQL, Sybase, Microsoft SQL server, Microsoft Access, Ingres, DB2, DB4, Informix, mSQL, MySQL, SQL server
<p>Business requirements may include:</p>	<ul style="list-style-type: none"> • customer • supplier • payroll • inventory • tax requirements

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Maintain system software	1.1. Evaluate system effectiveness against organisational requirements and benchmarks, to determine if maintenance activities should be commenced 1.2. Use system utilisation, file and disk structure, performance reports and files to identify peak periods and possible performance problems 1.3. Monitor system data levels to determine whether system performance is consistent with predetermined standards 1.4. Troubleshoot the system , if required, with appropriate system tools 1.5. Monitor and retune the system , where applicable, to improve performance
2. Set up and manage the system files	2.1. Evaluate system requirements and monitor the appropriateness of file and folder structures 2.2. Use the appropriate administration and tools to create file and folder structures 2.3. Set security, access and sharing of file system to meet requirements 2.4. Identify the virus protection requirements of the network in line with policies and organisational requirements 2.5. Scan the system for viruses and remove detected viruses 2.6. Test the file system to ensure that appropriate access is available to the user groups 2.7. Ensure log-on scripts and custom written utilities and programs conform to organisational guidelines for simple programming constructs 2.8. Document the file system created in accordance with organisational guidelines
3. Monitor and manage system usage and security	3.1. Monitor user access against user access levels 3.2. Review security requirements for user and data to be stored on network 3.3. Determine risks that data is exposed to, and formulate appropriate prevention and recovery processes 3.4. Implement a system to provide back-up and to restore services in the event of a disaster 3.5. Document disaster recovery procedures

ELEMENT	PERFORMANCE CRITERIA
4. Carry out system backup	4.1. Confirm the back-up schedule meets <i>organisational requirements</i> 4.2. Ensure <i>system</i> back-ups are completed according to organisational, scheduling and <i>system requirements</i> 4.3. Ensure that a secure off-site location for the storage of back-up media is provided and used 4.4. Ensure <i>system</i> back-ups are recorded according to <i>organisational requirements</i>
5. Restore system backup	5.1. Ensure <i>system</i> restores are completed when required for <i>system</i> recovery or testing according to <i>organisational guidelines</i> 5.2. Optimise the restored <i>system</i> according to <i>organisational requirements</i> 5.3. Ensure <i>system</i> restores are documented according to <i>organisational requirements</i>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- Managing system support
- Analysis skills in relation to routine and non-routine work processes
- Report writing skills for business requiring depth in some areas, analysis, and evaluation of information in a defined range of areas
- Problem solving skills in non-routine work processes
- Plain English literacy and communication skills in relation to dealing with users and team members

Required knowledge

- Detailed understanding of using system software and system tools
- Broad knowledge of vendor products and trends in product development
- Broad general knowledge of the client business domain
- Broad knowledge of quality assurance practices
- Broad general knowledge of change management systems
- Broad knowledge of OH&S requirements in relation to work safety, environmental factors and ergonomic considerations

Evidence Guide

EVIDENCE GUIDE	
<p>The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>Evidence of the following is essential:</p> <ul style="list-style-type: none"> • Assessment must confirm the ability to monitor and maintain system software performance according to vendor and organisational benchmarks utilising a wide range of features and system tools. <p>To demonstrate competency in this unit the learner will require access to:</p> <ul style="list-style-type: none"> • Organisational performance benchmarks • Live system • Client user requirements
Context of and specific resources for assessment	<p>Breadth, depth and complexity of knowledge and skills would prepare a person to perform a range of tasks necessary in supporting systems software.</p> <p>Operations must be undertaken in accordance with organisational policies and procedures.</p> <p>Managing the system software should be done under competent supervision where there is a clearly defined range of contexts for ensuring minimal disruption of services to the organisation.</p> <p>The breadth, depth and complexity of knowledge and skills in this competency would cover a broad range of varied activities or application in a wider variety of contexts most of which are complex and non-routine. Leadership and guidance would be involved when organising activities of self and others as well as contributing to technical solutions of a non-routine or contingency nature.</p>

EVIDENCE GUIDE	
	<p>Assessment must ensure:</p> <ul style="list-style-type: none"> • Performance of a broad range of skilled applications including the requirement to evaluate and analyse current practices, develop new criteria and procedures for performing current practices and provision of some leadership and guidance to others in the application and planning of the skills would be characteristic. • Applications may involve responsibility for, and limited organisation of, others.
Method of assessment	<p>The purpose of this unit is to define the standard of performance to be achieved in the workplace. In undertaking training and assessment activities related to this unit, consideration should be given to the implementation of appropriate diversity and accessibility practices in order to accommodate people who may have special needs. Additional guidance on these and related matters is provided in ICA05 Section 1.</p> <ul style="list-style-type: none"> • Competency in this unit should be assessed using summative assessment to ensure consistency of performance in a range of contexts. <p>1. Determine the user support issue</p>	<p>1.1. Determine the eligibility status of the individual experiencing the <i>user support</i> difficulty against <i>organisational guidelines</i> for <i>user support</i> services</p> <p>1.2. Clarify the <i>user support</i> difficulty or change request with <i>client</i>, using active listening and questioning techniques where possible</p> <p>1.3. Confirm the nature of the <i>user support</i> difficulty or change request with <i>client</i>, using technical language that is understandable by the <i>client</i></p>
<p>2. Identify the hardware or software being used by the customer/client</p>	<p>2.1. Identify the <i>software, hardware</i>, network connection or <i>application</i>, being used by the <i>client</i></p> <p>2.2. Identify the outcome the <i>client</i> is trying to achieve and the stage of the process they have reached, using active listening and questioning techniques</p> <p>2.3. Step the <i>client</i> back to the beginning of the process using plain English</p> <p>2.4. Walk the <i>client</i> through the process in a clear and logical manner</p>
<p>3. Confirm resolution of user support issue</p>	<p>3.1. Determine, describe and eliminate factors that may have created the <i>user support</i> issue or that may permit it to recur</p> <p>3.2. 'Walk'/talk the <i>client</i> successfully through a complete recovery and resolution process for the issue or change request where required</p> <p>3.3. Provide sufficient instruction to the <i>client</i> to enable effective handling and resolution of the issue, if it recurs</p> <p>3.4. Offer the <i>client</i> the next level escalation of the process if a resolution or change request is not possible under current circumstances, and explain costs involved</p>
<p>4. Maintain communication link</p>	<p>4.1. Confirm resolution of difficulty with <i>client</i> in accordance with client service policy</p> <p>4.2. Confirm <i>client</i> satisfaction with the current service in accordance with <i>client</i> service policy</p> <p>4.3. Inform <i>client</i> of additional support or services available, in accordance with the organisation's <i>client</i> service policy</p> <p>4.4. Provide the <i>client</i> with additional information related to products and services offered by the organisation, as required by the organisation's sales</p>

ELEMENT	PERFORMANCE CRITERIA
	promotion requirements 4.5. Complete the <i>client</i> contact records in accordance with the <i>client</i> service requirements

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- Up-selling skills, with some discretion and judgement required
- Customer service skills in relation to communicating on product and service matters with potential customers
- Using systems for recording and accessing information
- Active listening skills for identifying client problems and identifying where in the process the problem has occurred
- Ability to interpret user manuals, for the purpose of resolving client problems and guiding clients through manuals

Required knowledge

- Customer service policies
- How to apply escalation procedures in a clearly defined range of contexts
- User support policies of limited complexity related to known or commonly-used options
- OH&S procedures related to the work environment and organisational requirements

Evidence Guide

EVIDENCE GUIDE	
<p>The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>Evidence of the following is essential:</p> <ul style="list-style-type: none"> • Assessment must confirm the ability to successfully resolve first-level user support difficulties remotely, while demonstrating customer service skills. <p>To demonstrate competency in this unit the following resources will be needed:</p> <ul style="list-style-type: none"> • Customer service policies • User support policies • Escalation procedures • Communications hardware (e.g. telephone hook-up) for dealing with clients remotely
Context of and specific resources for assessment	<p>The operation of remote help desk support is an increasingly important aspect of service provision within an overall client support framework as even internal clients are often no longer co-located with technical support resources. In the interests of business efficiency, many vendor and commercial support resources have been located centrally and consequently are remote from their client base.</p> <p>The rapid expansion of information technology into small businesses and domestic environments has also increased the importance of IT product and service providers providing effective and plain English first-level support and subsequent problem escalation options for an increasing diverse client base.</p> <p>Clients of IT service providers are partners in the support process and the application of this competency requires some degree of client instruction to enable handling of subsequent and similar issues or to understand the need for escalation to higher order support.</p>

EVIDENCE GUIDE	
	<p>This competency is sufficiently flexible to allow for creativity in support options in relation to the specialised needs of clients.</p> <p>The scope and complexity of knowledge and skills is dependent on the tasks undertaken as part of providing service support.</p> <p>The breadth, depth and complexity of knowledge and skills in this competency would cover a broad range of varied activities or application in a wider variety of contexts most of which are complex and non-routine. Leadership and guidance would be involved when organising activities of self and others as well as contributing to technical solutions of a non-routine or contingency nature.</p> <p>Assessment must ensure:</p> <ul style="list-style-type: none"> • Performance of a broad range of skilled applications including the requirement to evaluate and analyse current practices, develop new criteria and procedures for performing current practices and provision of some leadership and guidance to others in the application and planning of the skills would be characteristic. • Applications may involve responsibility for, and limited organisation of, others.
Method of assessment	<p>The purpose of this unit is to define the standard of performance to be achieved in the workplace. In undertaking training and assessment activities related to this unit, consideration should be given to the implementation of appropriate diversity and accessibility practices in order to accommodate people who may have special needs. Additional guidance on these and related matters is provided in ICA05 Section 1.</p> <ul style="list-style-type: none"> • Competency in this unit should be assessed using summative assessment to ensure consistency of

EVIDENCE GUIDE	
	<p>performance in a range of contexts. This unit can be assessed either in the workplace or in a simulated environment. However, simulated activities must closely reflect the workplace to enable full demonstration of competency.</p> <ul style="list-style-type: none"> • Assessment will usually include observation of real or simulated work processes and procedures and/or performance in a project context as well as questioning on underpinning knowledge and skills. The questioning of team members, supervisors, subordinates, peers and clients where appropriate may provide valuable input to the assessment process.
<p>Guidance information for assessment</p>	<p>The interdependence of units for assessment purposes may vary with the particular project or scenario. Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:</p> <ul style="list-style-type: none"> • ICAS4022B Determine client computing problems and action • ICAS4107B Rectify system faults on a live system • ICAS4114B Implement maintenance procedures • ICAS4119B Monitor and administer systems security • ICAS4127B Support system software • ICAW4027B Relate to clients on a business level <p>An individual demonstrating this competency would be able to:</p> <ul style="list-style-type: none"> • Relate to client needs • Provide logical answers in line with policies and procedures • Take into consideration cultural needs • Manage time and priorities by quickly assessing the level of support needed and then directing the problem resolution accordingly • Determine level of priority of the help desk issue • Apply solutions to a variety of predictable end-user problems • Interpret available information and use appropriate interview techniques to request clarification where

EVIDENCE GUIDE	
	<p>needed</p> <ul style="list-style-type: none"> • Maintain knowledge of industry products and services <p>Additionally, an individual demonstrating this competency would be able to:</p> <ul style="list-style-type: none"> • Demonstrate understanding of a broad knowledge base incorporating some theoretical concepts • Apply solutions to a defined range of unpredictable problems • Identify and apply skill and knowledge areas to a wide variety of contexts, with depth in some areas • Identify, analyse and evaluate information from a variety of sources • Take responsibility for own outputs in relation to specified quality standards • Take limited responsibility for the quantity and quality of the output of others

Range Statement

RANGE STATEMENT	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
<i>User support</i> may include:	<ul style="list-style-type: none"> • customer contact centre by phone • email • real-time website support • other real-time support structures
<i>Organisational guidelines</i> may include but are not limited to:	<ul style="list-style-type: none"> • personal use of emails and internet access • mobile equipment • content of emails • downloading information and accessing particular websites • opening mail with attachments

RANGE STATEMENT	
	<ul style="list-style-type: none"> • virus risk • dispute resolution • document procedures and templates • communication methods • financial control mechanisms
<i>Client</i> may include but is not limited to:	<ul style="list-style-type: none"> • internal departments • external organisations • individual people • employees
<i>Application</i> may include:	<ul style="list-style-type: none"> • database programs • data and voice integration • word processors • email programs • internet browsers • system browsers • spreadsheets
<i>Hardware</i> may include but is not limited to:	<ul style="list-style-type: none"> • workstations • personal computers • modems or other connectivity devices • networks • wireless connections • DSL modems • remote sites • servers
<i>Software</i> may include but is not limited to:	<ul style="list-style-type: none"> • commercial, in-house, packaged or customised software

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<p>1. Benchmark website performance</p>	<p>1.1. Review <i>client</i> performance expectations from <i>specifications</i> and <i>business requirements</i></p> <p>1.2. Test administration and maintenance <i>requirements</i> against <i>specifications</i> and <i>business requirements</i></p> <p>1.3. Establish performance benchmarks from <i>specifications</i> and <i>business requirements</i></p> <p>1.4. Ensure performance benchmarks are tested</p> <p>1.5. Record measured performance benchmarks against <i>specifications</i></p>
<p>2. Track website performance</p>	<p>2.1. Measure actual website performance against performance benchmarks in key areas and record outcomes</p> <p>2.2. Establish procedures and policies for maintaining stability of actions and processes related to the website</p> <p>2.3. Identify faults or suggest improvements to the website</p> <p>2.4. Implement improvements according to <i>business requirements</i> and in line with <i>policies</i> and procedures</p> <p>2.5. Establish automatic fault reporting procedures and processes</p> <p>2.6. Monitor and maintain website security measures</p> <p>2.7. Implement administration and maintenance schedules</p> <p>2.8. Establish preventative maintenance and administration indicators and ensure an alert <i>system</i> is enabled</p> <p>2.9. Track user activities and make changes to <i>policies</i> or procedures, depending on findings</p>
<p>3. Tune performance</p>	<p>3.1. Compare actual website performance against benchmarks over an appropriate period and make changes based on inconsistencies</p> <p>3.2. Record performance inconsistencies and incorporate learning into revised <i>policies</i> and procedures</p> <p>3.3. Use diagnostic and <i>software</i> tools to identify and correct website faults</p> <p>3.4. Plan and action preventative maintenance on a regular basis, to ensure continuous and consistent performance of website</p>

ELEMENT	PERFORMANCE CRITERIA
	3.5. Complete and record fault correction and maintenance reports
4. Initiate and monitor performance improvement	4.1. Establish a mechanism for capturing <i>client</i> initiatives to assist in identifying maintenance or administration process performance problems 4.2. Review security tools and procedures and conduct improvements where necessary 4.3. Document and implement maintenance schedules 4.4. Review maintenance and administration <i>documentation</i> in line with <i>policies</i> and procedures, in order to identify areas for performance improvement 4.5. Update the website on a regular basis, including information, links, multi-media links and back-end <i>software</i> 4.6. Provide a timely and appropriate response to <i>client</i> to provide improvement or maintenance suggestions

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- Website development
- Website analysis
- Technical test design
- Test implementation
- Test evaluation
- Evaluation feedback
- Evaluation analysis
- Fault diagnosis
- Fault correction
- Implementing administration and maintenance schedules

Required knowledge

- Website architecture
- Basic website security

REQUIRED SKILLS AND KNOWLEDGE

- Basic workload (web traffic) metrics
- Basic business process design
- Customer and business liaison

Evidence Guide

EVIDENCE GUIDE	
<p>The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
Overview of assessment	
<p>Critical aspects for assessment and evidence required to demonstrate competency in this unit</p>	<p>Evidence of the following is essential:</p> <ul style="list-style-type: none"> • Assessment must confirm the ability to develop and maintain actual website performance against benchmarks, to ensure that the website meets specifications. • Where performance criteria are not met, faults must be identified and appropriate remedial action taken. • Assessment must verify the ability to implement scheduled and non-scheduled maintenance and to effectively monitor and tune website performance. <p>To demonstrate competency in this unit the learner will require access to:</p> <ul style="list-style-type: none"> • Web servers and websites • Technical requirements • Web traffic diagnostic tools, including timing tools to gauge website response times
<p>Context of and specific resources for assessment</p>	<p>The effective and efficient operation of an organisation's website is of critical importance when business transactions are conducted online. Additionally, a website provides a 'new window' into an organisation and as such provides existing and potential clients with an indication of organisational credibility, effectiveness and efficiency.</p> <p>The rapid growth in the use of websites as the primary media for client interaction, places considerable strategic and operational importance on activities around effective website monitoring and performance.</p> <p>Testing the website under different conditions of load is essential to understanding how it behaves from the client's perspective. Thus, testing tools should include some way of simulating traffic from numerous users.</p>

EVIDENCE GUIDE	
	<p>Breadth, depth and complexity of knowledge and skills would prepare a person to perform basic skills in managing website performance.</p> <p>Operations must be in accordance with organisational policies and procedures.</p> <p>Managing the performance of a website should be done under competent supervision where there is a clearly defined range of contexts for ensuring that ongoing demands on the site are met.</p> <p>The breadth, depth and complexity of knowledge and skills in this competency would cover a broad range of varied activities or application in a wider variety of contexts most of which are complex and non-routine. Leadership and guidance would be involved when organising activities of self and others as well as contributing to technical solutions of a non-routine or contingency nature.</p> <p>Assessment must ensure:</p> <ul style="list-style-type: none"> • Performance of a broad range of skilled applications including the requirement to evaluate and analyse current practices, develop new criteria and procedures for performing current practices and provision of some leadership and guidance to others in the application and planning of the skills would be characteristic. • Applications may involve responsibility for, and limited organisation of, others.
Method of assessment	<p>The purpose of this unit is to define the standard of performance to be achieved in the workplace. In undertaking training and assessment activities related to this unit, consideration should be given to the implementation of appropriate diversity and accessibility practices in order to accommodate people who may have special needs. Additional guidance on these and related matters is provided in ICA05 Section 1.</p>

EVIDENCE GUIDE	
	<ul style="list-style-type: none"> • Competency in this unit should be assessed using summative assessment to ensure consistency of performance in a range of contexts. This unit can be assessed either in the workplace or in a simulated environment. However, simulated activities must closely reflect the workplace to enable full demonstration of competency. • Assessment will usually include observation of real or simulated work processes and procedures and/or performance in a project context as well as questioning on underpinning knowledge and skills. Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Operate system diagnostics	1.1.Run the system diagnostic program according to specification 1.2.Modify the system configuration as indicated by the diagnostic program 1.3.Carry out <i>preventative maintenance</i> in line with <i>organisational guidelines</i>
2. Scan system for viruses	2.1.Scan the system to check and maintain virus protection 2.2.Report identified viruses to an <i>appropriate person</i> 2.3.Remove virus infections found by the scan using software tools and/or procedures or by restoring back-ups 2.4.Document relevant symptom and removal information

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- Problem solving skills for a defined range of predictable problems
- Literacy skills in regard to interpretation of computer manuals
- Plain English literacy and communication skills in relation to analysis, evaluation and presentation of information
- Use of diagnostic tools

Required knowledge

- Configuration procedures
- Back-up procedures
- Organisational security procedures
- Diagnostic software/hardware
- Hardware maintenance
- Security procedures

Evidence Guide

EVIDENCE GUIDE	
<p>The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>Evidence of the following is essential:</p> <ul style="list-style-type: none"> • Assessment must confirm the ability to conduct diagnostic tests on a range of platforms according to preventative maintenance and diagnostic policy, and to correctly identify the root causes of the problems. <p>To demonstrate competency in this unit the person will require access to:</p> <ul style="list-style-type: none"> • Security guidelines • Back-up procedures • Diagnostic software
Context of and specific resources for assessment	<p>Demonstrating competence in basic diagnostic testing will include knowledge by recall in a narrow range of areas; demonstrating basic practical skills, such as the use of relevant tools; perform a sequence of routine tasks given clear direction; and receive and pass on messages/information.</p> <p>Demonstration of these competence would involve:</p> <ul style="list-style-type: none"> • Demonstration of basic testing and adherence to operational procedures • Applying knowledge solutions to a limited range of unpredictable problems • Performing a range of diagnostic tasks where suspected breakdowns or irregularities of performance have appeared • Assessing and recording information from varied sources <p>The breadth, depth and complexity of knowledge and skills in this competency would cover selecting, adapting and transferring skills and knowledge to new environments and providing technical advice and some</p>

EVIDENCE GUIDE	
	<p>leadership in resolution of specified problems. This would be applied across a range of roles in a variety of contexts with some complexity in the extent and choice of options available.</p> <p>Assessment must ensure:</p> <ul style="list-style-type: none"> • Performance of a defined range of skilled operations, usually within a range of broader related activities involving known routines, methods and procedures, where some discretion and judgement is required in the selection of equipment, services or contingency measures and within known time constraints would be characteristic. • Applications may involve some responsibility for others. Participation in teams including group or team coordination may be involved.
Method of assessment	<p>The purpose of this unit is to define the standard of performance to be achieved in the workplace. In undertaking training and assessment activities related to this unit, consideration should be given to the implementation of appropriate diversity and accessibility practices in order to accommodate people who may have special needs. Additional guidance on these and related matters is provided in ICA05 Section 1.</p> <ul style="list-style-type: none"> • Competency in this unit should be assessed using summative assessment to ensure consistency of performance in a range of contexts. This unit can be assessed either in the workplace or in a simulated environment. However, simulated activities must closely reflect the workplace to enable full demonstration of competency. • Assessment will usually include observation of real or simulated work processes and procedures and/or performance in a project context as well as questioning on underpinning knowledge and skills. The questioning of team members, supervisors, subordinates, peers and clients where appropriate may provide valuable input to the assessment process. The interdependence of units for assessment

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Use appropriate software	1.1. Select <i>software</i> appropriate to perform activity 1.2. Use <i>software</i> to produce required outcome using a range of features related to the activities 1.3. Save documents in appropriate directories/folders
2. Access, retrieve and manipulate data	2.1. Select and access <i>files</i> 2.2. Amend and save <i>files</i> according to requirements 2.3. Produce documents and <i>files</i> that meet organisational needs 2.4. Save <i>files</i> in appropriate directories/folders 2.5. Exit <i>software</i> correctly without loss of <i>data</i>
3. Access and use help functions within each application	3.1. Identify the help resources available for basic difficulties with the <i>software</i> 3.2. Access user help documentation and other resources for basic difficulties with the <i>software</i>
4. Use keyboard and equipment	4.1. Follow <i>OH&S</i> standards and regulations to avoid injury or illness 4.2. Use wrist rests and document holders where appropriate 4.3. Use monitor anti-glare and radiation reduction screens where appropriate 4.4. Ensure user <i>equipment</i> is maintained and free from defects that could cause injury

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- Basic analysis of desktop layout, monitor and chair positioning, keyboard techniques and use of the mouse
- Basic problem solving in application management and help function usage
- Reading and writing at a level where basic workplace documents are understood
- Clear and precise communication with team members and supervisors
- Interpretation of user manuals

REQUIRED SKILLS AND KNOWLEDGE**Required knowledge**

- OH&S principles and responsibilities
- Basic understanding of system usage
- Basic technical terminology in relation to reading help files and responding to system help prompts
- Personal computer access and log-on procedures

Evidence Guide

EVIDENCE GUIDE	
<p>The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>Evidence of the following is essential:</p> <ul style="list-style-type: none"> Assessment must confirm the ability to produce several workplace documents utilising a minimum of three different computing packages. Learner will demonstrate the use of a wide range of features from each package. <p>To demonstrate competency in this unit the person will require access to:</p> <ul style="list-style-type: none"> Personal computer Basic software Documents or information containing data suitable for use with computing packages
Context of and specific resources for assessment	<p>This unit brings together a range of basic computer skills and knowledge consistent with general expectations around computer usage in the workplace.</p> <p>The breadth, depth and complexity of knowledge and skills in this competency would prepare a person to perform in a range of varied activities or knowledge applications where there is a clearly defined range of contexts in which the choice of actions required is usually clear. There would generally be limited complexity in the range of operations to be applied.</p> <p>Assessment must ensure:</p> <ul style="list-style-type: none"> Performance of a prescribed range of functions involving known routines and procedures and some accountability for the quality of outcomes would be characteristic. Applications may include some complex or non-routine activities involving individual

EVIDENCE GUIDE	
	responsibility or autonomy and/or collaboration with others as part of a group or team.
Method of assessment	<p>The purpose of this unit is to define the standard of performance to be achieved in the workplace. In undertaking training and assessment activities related to this unit, consideration should be given to the implementation of appropriate diversity and accessibility practices in order to accommodate people who may have special needs. Additional guidance on these and related matters is provided in ICA05 Section 1.</p> <ul style="list-style-type: none"> • Competency in this unit should be assessed using summative assessment to ensure consistency of performance in a range of contexts. This unit can be assessed either in the workplace or in a simulated environment. However, simulated activities must closely reflect the workplace to enable full demonstration of competency. • Assessment will usually include observation of real or simulated work processes and procedures and/or performance in a project context as well as questioning on underpinning knowledge and skills. The questioning of team members, supervisors, subordinates, peers and clients where appropriate may provide valuable input to the assessment process. The interdependence of units for assessment purposes may vary with the particular project or scenario.
Guidance information for assessment	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:</p> <ul style="list-style-type: none"> • ICAU2005B Operate computer hardware • ICAU2231B Use computer operating system • ICAD2003B Receive and process oral and written communication • ICAI2015B Install software applications • ICAW2001B Work effectively in an IT environment <p>An individual demonstrating this competency would be able to:</p>

EVIDENCE GUIDE

- Demonstrate basic operational knowledge in a moderate range of areas
- Apply a defined range of skills
- Apply known solutions to a limited range of predictable problems
- Perform a range of tasks where choice between a limited range of options is required
- Assess and record information from varied sources
- Communicate with team members to clarify job requirements
- Take limited responsibility for own outputs in work and learning
- Maintain knowledge of industry products and services

Demonstration of these competencies would involve:

- Using appropriate software
- Opening, amending and saving files and documents according to organisational requirements
- Using help manuals and on-line help when appropriate
- Applying OH&S procedures
- Demonstrating basic operational knowledge in a moderate range of areas
- Performing a range of tasks where choice between a limited range of options is required
- Assessing and recording information from varied sources

Range Statement**RANGE STATEMENT**

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

RANGE STATEMENT	
<i>Software</i> may include but is not limited to:	<ul style="list-style-type: none"> • commercial software applications • organisation-specific software • It is expected that a word processing application, Database Application and Spreadsheet application will be chosen in preference to other types of applications
<i>Files</i> may include but is not limited to:	<ul style="list-style-type: none"> • html pages • pdf files • text files • pictures • music • email messages
<i>Data</i> may include:	<ul style="list-style-type: none"> • text • images • graphics • screenshots • icons added to the document
<i>Equipment</i> may include but is not limited to:	<ul style="list-style-type: none"> • workstations • personal computers • modems and other connectivity devices • printers • hard drives • DSL modems • monitors • switches • hubs • personal digital assistant (PDA) • other peripheral devices
<i>OH&S</i> may include:	<ul style="list-style-type: none"> • correct posture • lighting • type of desk • type of monitor • style of chair • typing position • repetitive strain injury prevention • ventilation • light position • length of time in front of computer

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Apply existing knowledge and techniques to technology and transfer	1.1. Identify situations where existing knowledge can be used as the basis for developing new skills 1.2. Acquire and use new or upgraded <i>technology skills</i> to enhance learning 1.3. Identify, classify and use new or upgraded <i>equipment</i> where appropriate, for the benefit of the organisation
2. Apply functions of technology to assist in solving organisational problems	2.1. Conduct testing of new or upgraded <i>equipment</i> 2.2. Apply features of new or upgraded <i>equipment</i> and <i>software</i> within the organisation 2.3. Use features and functions of new or upgraded equipment 2.4. Access and use <i>sources of information</i> relating to new or upgraded <i>equipment</i>
3. Evaluate new or upgraded technology performance	3.1. Evaluate new or upgraded <i>equipment</i> for performance, usability and <i>against OH&S standards</i> 3.2. Determine <i>environmental considerations</i> from new or upgraded equipment 3.3. Seek <i>feedback</i> from users, where appropriate

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE
This section describes the skills and knowledge required for this unit.
Required skills
<ul style="list-style-type: none"> • Research skills for identifying broad features of new technologies • Ability to assist in the decision making process • Literacy skills in regard to interpretation of technical manuals • Ability to solve known problems in a variety of situations and locations • General analytical skills in relation to known problems
Required knowledge
<ul style="list-style-type: none"> • Broad awareness of current technology trends and directions in IT (e.g. software, hardware, services, new developments, new protocols) • Broad knowledge of vendor product directions

REQUIRED SKILLS AND KNOWLEDGE

- Ability to locate appropriate sources of information regarding IT and new technologies
- Current industry hardware and software products, with broad knowledge of general features and capabilities
- Information gathering techniques

Evidence Guide

EVIDENCE GUIDE	
<p>The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>Evidence of the following is essential:</p> <ul style="list-style-type: none"> Competency must confirm the ability to transfer the application of existing skills and knowledge to new technology. <p>To demonstrate competency in this unit the person will require access to:</p> <ul style="list-style-type: none"> Workplace or simulated workplace Documented organisational requirements
Context of and specific resources for assessment	<p>The rationale behind this unit emphasises the importance of constantly reviewing work processes, skills and techniques in order to ensure that the quality of the entire business process is maintained at the highest level possible through the appropriate application of new technology. To this end, the person is typically engaged in on-going review and research in order to discover and apply new technology or techniques to improve aspects of the organisation's activities.</p> <p>The breadth, depth and complexity of knowledge and skills in this competency would cover selecting, adapting and transferring skills and knowledge to new environments and providing technical advice and some leadership in resolution of specified problems. This would be applied across a range of roles in a variety of contexts with some complexity in the extent and choice of options available.</p> <p>Assessment must ensure:</p> <ul style="list-style-type: none"> Performance of a defined range of skilled operations, usually within a range of broader related activities involving known routines, methods and procedures, where some discretion and judgement is required in the selection of equipment, services or contingency

Range Statement**RANGE STATEMENT**

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Equipment may include but is not limited to:

- workstations
- personal computers
- modems and other connectivity devices
- printers
- hard drives
- DSL modems
- monitors
- switches
- hubs
- personal digital assistant (PDA)
- other peripheral devices

Applications

- May include but are not limited to commercial software applications; organisation-specific software; word processing, spreadsheet, database, graphic, communication packages and presentation functionalities.
- May include presentation applications contained in: Microsoft Office, Lotus Suite,

RANGE STATEMENT	
	Clarix Works, Star Office or other similar applications.
<i>Technology skills</i> - new skills can include but are not limited to:	<ul style="list-style-type: none"> • Hardware • PCs • networks • storage • communications equipment
<i>Feedback</i> may include:	<ul style="list-style-type: none"> • surveys • questionnaires • interviews • meetings
<i>Software</i> may include but are not limited to:	<ul style="list-style-type: none"> • user-based software for new business processes • customer relationship management • integrated services (e.g. banking and financial services)
<i>Sources of information</i> may include but is not limited to:	<ul style="list-style-type: none"> • documents • test pages • web pages • appliances software and technical connections guidance and other outputs supplied by vendors and manufacturers
<i>OH&S standards</i>	<ul style="list-style-type: none"> • May include correct posture, lighting, type of desk, type of monitor, style of chair, typing position, repetitive strain injury prevention, ventilation, light position, correct lifting method, and length of time in front of computer. • May also include physical safety considerations such as general electrical safety and cabling, power supply and leads as they apply to computer and peripheral installations.
<i>Environmental Considerations</i> may include but is not limited to:	<ul style="list-style-type: none"> • recycling • safe disposal of packaging (e.g. cardboard, polystyrene, paper, plastic) • correct disposal of redundant hardware (e.g. motherboards, hard drives, circuit boards) by an authorised body

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Manipulate data	1.1. Employ advanced features of <i>applications</i> in the preparation and presentation of data 1.2. Efficiently transfer data between <i>applications</i> , linking and embedding related data files as required 1.3. Create and employ <i>objects</i> , macros and templates for routine activities 1.4. Use shortcuts and features to increase personal productivity
2. Access and use support resources	2.1. Solve routine problems using support resources 2.2. Use on-line help to overcome difficulties with <i>applications</i> 2.3. Solve problems with manuals and training booklets 2.4. Access and apply technical support for <i>system</i> problems, utilising troubleshooting results and alert messages

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- Basic analysis skills in relation to normal routine work processes
- Detailed skills in using applications features
- Basic skills in interpreting technical information
- Problem solving skills in known areas during normal routine work processes
- Plain English literacy and communication skills in relation to dealing with clients and team members

Required knowledge

- Basic understanding of operating systems software and system tools
- Broad knowledge of vendor product directions
- Broad knowledge of vendor applications and their features

Evidence Guide

EVIDENCE GUIDE	
<p>The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>Evidence of the following is essential:</p> <ul style="list-style-type: none"> Assessment must confirm the ability to use at least three computer applications to their full capacity employing all advanced features and import/export capacities for efficiency and productivity purposes, using at least two industry-recognised application packages. <p>To demonstrate competency in this unit the person will require access to:</p> <ul style="list-style-type: none"> Personal computer Documents or information containing data suitable for use with multiple computing packages
Context of and specific resources for assessment	<p>The use of advanced features of computer applications is increasing as workplaces recognise the full potential and functionality of contemporary commercial applications. Individuals demonstrating this competency would be considered user experts or advanced users and would be capable of tutoring colleagues in the use of commercial applications.</p> <p>The breadth, depth and complexity of knowledge and skills in this competency would cover selecting, adapting and transferring skills and knowledge to new environments and providing technical advice and some leadership in resolution of specified problems. This would be applied across a range of roles in a variety of contexts with some complexity in the extent and choice of options available.</p> <p>Assessment must ensure:</p> <ul style="list-style-type: none"> Performance of a defined range of skilled operations, usually within a range of broader related activities involving known routines, methods and procedures,

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance Criteria describe the required performance needed to demonstrate achievement of the Element. Where italicised text is used, further information is detailed in the Required Knowledge and Skills and/or Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements describe the essential outcomes of a unit of competency.

Performance Criteria describe the required performance needed to demonstrate achievement of the Element. Where italicised text is used, further information is detailed in the Required Knowledge and Skills and/or Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

Elements and Performance Criteria

Element	Performance Criteria
1 Assess digital camera qualities	1.1 Camera software compatibility with hardware system is assessed and the appropriate software is selected for the job
	1.2 Pixel resolution of the camera is matched to the required quality and resolution of outcome
	1.3 The RAM capacity of the camera is checked to be appropriate to the number of images required to be captured
	1.4 Shutter speed, focal lengths and camera feature modes (eg flash, scrollage, icon menu, close-up, wide angle and telephoto capacity) are assessed suitable for the quality and use of photographic images required
	1.5 Lithium batteries are handled and stored according to OHS requirements
2 Set up for image capture	2.1 Camera is set up for image composition according to job specifications
	2.2 Lighting is arranged according to job specifications
	2.3 Light intensity is set for the correct exposure

- 3 **Preview image**
 - 3.1 Tone curves are adjusted according to job specifications
 - 3.2 The neutral balance of the image is arranged and adjusted
 - 3.3 Adjustments to image composition and exposure are made

- 4 **Photograph and upload a digital image**
 - 4.1 The digital camera is loaded and operated according to manufacturer's specifications appropriate to the quality of image to be photographed
 - 4.2 The computer card interface/disk is uploaded onto the relevant computer and the image saved on hard disk
 - 4.3 Photographic image files are created and stored on the computer according to software procedures
 - 4.4 Photographic images are enhanced, cropped and altered electronically to deliver the required image
 - 4.5 Photographic images are checked for fitness of purpose and conformance to the job brief
 - 4.6 Photographic images are assessed fit for the relevant delivery mode (eg print, CD-ROM) and delivered appropriately

Required Skills and Knowledge

Required Knowledge and Skills

The following knowledge must be assessed as part of this unit:

Using a digital camera

What is meant by pixel resolution and how does this affect the resolution of the image?

Why is the RAM capacity of a digital camera relevant?

Why are shutter speed and focal lengths important to check when capturing a digital image?

What are the safety requirements for handling and storing lithium batteries?

Uploading and processing digital images using a computer

How is the data uploaded to a computer from the computer card interface/disk?

What is the process for filing and creating photographic image files on the computer?

What is required to enhance, crop and alter photographic images electronically?

What considerations need to be made to assess a digital photograph suitable for a newspaper, glossy brochure and CD-ROM?

Information sources

What manuals, safety and other documentation are relevant to this task and where are they kept?

What information is included in these documents?

What other sources of information are available?

The following skills must be assessed as part of this unit:

OHS in relation to operating machinery such as safely switching off machinery before cleaning is started

Communication of ideas and information by consulting with supervisors over the processing of digital images

Collecting, analysing and organising information by assessing the suitability of shutter speed, focal lengths and camera feature modes (eg flash, scrollage, icon menu, close-up, wide angle and telephoto capacity) for the photographic image required

Planning and organising activities by planning and coordinating digital image capture sessions

Teamwork when maintaining the production process in association with others

Mathematical ideas and techniques by choosing the correct shutter speed and focal length to capture digital images

Problem-solving skills applied by identifying and correcting problems of image quality

Use of technology applied by using digital camera technology

Evidence Guide

The Evidence Guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Knowledge and Skills, the Range Statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the following is essential:

The photographed image meets the quality and look/ feel requirements of the brief. The digital camera functions are used to capture the required image

The underlying skills of capturing a digital image using a digital camera should be transferable across the associated sectors of the printing industry

Demonstrate an ability to find and use information relevant to the task from a variety of information sources

Assess the capacity of, and operate, a digital camera to upload and process THREE digital images using industry hardware and software to deliver a designated quality of image outcome

Evidence for assessment may be gathered from assessment of the unit of competency alone or through an integrated assessment activity

Context of and specific resources for assessment

Assessment must ensure:

assessment may take place on the job, off the job or a combination of these. Off the job assessment must be undertaken in a closely simulated workplace environment

digital cameras, lighting

Method of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

direct questioning combined with review of portfolios of evidence and third party workplace reports of on-the-job performance by the candidate.

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended.

Range Statement

The Range Statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Italicised wording in the Performance Criteria is detailed below.

Degree of autonomy

A digital photographic image is processed in the workplace in consultation with the supervisor to ensure that correct skills and procedures are used

Types of systems

Digital cameras used in the pre-press sector and associated sectors with which a pre-press organisation may be required to work

Lighting

Direct (main) fill in lighting/fill reflector

LGAGOVA301B Assist customers with rate enquiries

Modification History

Not applicable.

Unit Descriptor

Unit Descriptor

This unit covers assisting individual and community stakeholders with rate enquiries. The unit outlines the steps involved in assisting customers with rate enquiries, including responding to requests, providing information and making adjustments where appropriate. The unit is suitable for customer service operators who deal directly with customers regarding rate enquiries.

Application of the Unit

Application of the Unit

This unit supports the attainment of skills and knowledge required for competent workplace performance in councils of all sizes. Knowledge of the legislation and regulations within which councils must operate is essential. The unique nature of councils, as a tier of government directed by elected members and reflecting the needs of local communities, must be appropriately reflected.

Licensing/Regulatory Information

Evidence Guide

EVIDENCE GUIDE

Overview of assessment requirements	A person who demonstrates competency in this unit will be able to perform the outcomes described in the Elements to the required performance level detailed in the Performance Criteria. The knowledge and skill requirements described in the Range Statement must also be demonstrated. For example, knowledge of the legislative framework and safe work practices that underpin the performance of the unit are also required to be demonstrated.
Critical aspects of evidence to be considered	<p>The demonstrated ability to:</p> <ul style="list-style-type: none"> • provide prompt and effective service to external and internal clients • correct identified errors or enter changes promptly • explain statutory or council requirements clearly • adjust supplementary notices • process and reconcile journal adjustments.
Context of assessment	<p>Competency is demonstrated by performance of all stated criteria, with particular attention to the critical aspects of evidence and the knowledge and skills elaborated in the Evidence Guide, and within the scope of the Range Statement.</p> <p>Assessment must take account of the endorsed Assessment Guidelines in the Local Government Training Package.</p> <p>Assessment of performance requirements in this unit should be undertaken in an actual workplace or simulated environment.</p> <p>Assessment should reinforce the integration of the key competencies for the particular AQF level. Refer to the key competency levels at the end of this unit.</p>
Relationship to other units (prerequisite or co-requisite units)	<p>Prerequisite units: nil.</p> <p>Co-requisite units: nil.</p>
Method of assessment	<p>The following assessment methods are suggested:</p> <ul style="list-style-type: none"> • observation of the learner performing a range of workplace tasks over sufficient time to demonstrate handling of a range of contingencies • written and/or oral questioning to assess knowledge and understanding • completion of workplace documentation • third-party reports from experienced practitioners • completion of self-paced learning materials including

EVIDENCE GUIDE

Evidence required for demonstration of consistent performance

personal reflection and feedback from trainer, coach or supervisor.

Evidence should be collected over a set period of time that is sufficient to include dealings with an appropriate range and variety of situations.

Resource implications

The learner and trainer should have access to appropriate documentation and resources normally used in the workplace including access to a workplace or simulated case study that encompasses resources such as:

- examples of council policies governing rate procedures and guidelines
- relevant databases
- records management systems.

Range Statement

RANGE STATEMENT

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Clients may include:	<ul style="list-style-type: none"> • rate payers • solicitors • police • statutory agents.
Special charges may include:	<ul style="list-style-type: none"> • special benefits provided to special groups, such as library, sporting centre or preschool groups.
Enquiries may include:	<ul style="list-style-type: none"> • name of owner • account payment • address • arrears • rate amount • debt recovery.
Requests may include:	<ul style="list-style-type: none"> • anything that conforms to council purpose, including planning, health notices, community services and resident services.
Other council personnel may include:	<ul style="list-style-type: none"> • customer service counter or rates counter personnel • special rates enquiry personnel • agency personnel.
Council policy may include:	<ul style="list-style-type: none"> • customer service • rates procedures and guidelines • complaint handling • record information system.

Co-requisite Unit/s

MSATMINS301A Inspect a range of simple measures

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	This unit of competency covers the ability to apply National Test Procedures to determine whether simple measures are suitable for trade use. The unit also involves auditing the performance of verifiers who have previously tested and marked simple measures for trade use.
------------------------	---

Application of the Unit

Application of the unit	<p>This unit of competency is applicable to trade measurement inspectors appointed under national measurement legislation who may inspect a wide range of simple measures as part of their allocated duties. Simple measures such as trade masses, length measures and volume measures are used in a wide variety of commerce including retail, hospitality, pharmaceuticals and laboratory services.</p> <p>Industry representatives have provided case studies to illustrate the practical application of this unit of competency and to show its relevance in a workplace setting. These are found at the end of this unit of competency under the section 'This competency in practice'.</p>

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare for inspection	1.1. Identify and evaluate the type of simple measure to be inspected 1.2. Access and review any history of previous inspections at trader's premises 1.3. Access and correctly interpret appropriate documentation required for the inspection 1.4. Identify and access test equipment, products and consumables required for the inspection 1.5. Ensure specified test equipment is fit for purpose in accordance with applicable legislation and organisational procedures 1.6. Store and transport test equipment in accordance with organisational procedures and industry best practice 1.7. Identify workplace health and safety issues relevant to the inspection
2. Initiate inspection	2.1. Identify the site controller, explain the purpose of the inspection and produce formal identification, if required 2.2. Identify relevant site health and safety issues and implement appropriate control strategies 2.3. Conduct a preliminary evaluation of the site's trading practices and prioritise activities to maximise inspection outcomes 2.4. Identify trade measuring instruments and plan inspection to minimise disruption to the public and trader
3. Evaluate simple measure performance	3.1. Evaluate whether the operating environment will impact on simple measure performance 3.2. Modify the operating environment or implement alternative arrangements to ensure reliable test conditions as necessary 3.3. Identify the maximum permissible errors for the simple measure from the legislative requirements 3.4. Use test equipment safely in accordance with applicable legislation and organisational procedures 3.5. Check simple measure for compliance with the appropriate Certificates of Approval 3.6. Inspect the simple measure in accordance with relevant National Test Procedure and appropriate

ELEMENT	PERFORMANCE CRITERIA
	<p>National Measurement Institute policy</p> <p>3.7. Evaluate results against prescribed performance criteria and determine if the simple measure is suitable for trade use in accordance with legislative requirements</p>
4. Conduct a verifier performance audit	<p>4.1. Identify the scope of the verifier audit</p> <p>4.2. Identify the expected outcomes of the verifier audit</p> <p>4.3. Assess the verifier's performance against the expected outcome</p> <p>4.4. Analyse any variances from the expected outcomes to identify any isolated or systemic problem</p>
5. Analyse and report inspection results	<p>5.1. Analyse inspection data for unacceptable performance trends</p> <p>5.2. Display the inspection result on the simple measure in accordance with legislative requirements</p> <p>5.3. Use test reports to present inspection results in the required format</p> <p>5.4. Complete inspection documentation in accordance with legislative requirements and organisational procedures</p> <p>5.5. Communicate inspection results within the specified time and in accordance with organisational guidelines</p> <p>5.6. Recommend follow-up actions as appropriate</p>
6. Act on non-compliance	<p>6.1. Select applicable enforcement action for the non-compliance in accordance with legislative requirements, organisational policy and procedures</p> <p>6.2. Inform traders of non-compliances and consequences of failing to have them corrected</p> <p>6.3. Implement enforcement action in accordance with legislative requirements, organisational policy and procedures</p> <p>6.4. Maintain the rights of the trader at all times</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- accessing, interpreting and applying a range of documents for the inspection of simple measures including:
 - national measurement legislation
 - routine National Test Procedures
 - Certificates of Approval
 - National Measurement Institute inspection policy
 - Australian Standards
- accessing and interpreting Certificates of Verification for a limited range of reference standards
- use routine communication and negotiation skills to:
 - explain the purpose of inspection
 - inform traders of non-compliances and consequences of failing to rectify them
 - explain procedures and inspection outcomes to traders, verifiers and managers
- accessing, transporting, setting up, validating, using and maintaining a limited range of test equipment and reference standards
- identifying and evaluating environmental impacts on performance of a range of simple measures
- conducting tests and recording results with close attention to detail and accuracy
- performing calculations involving fractions, decimals, ratios, proportions and percentages
- using scientific notation, correct units and the correct number of significant figures
- analysing performance results over a single or limited range of operating conditions
- identifying non-compliances with national measurement legislation relating to simple measure or verifier performance and initiate appropriate enforcement action including warning, infringement notice, undertaking, injunction and prosecution
- identifying potential trading practice non-compliance with national measurement legislation and initiating an appropriate inspection strategy
- planning routine tasks
- developing/implementing an efficient inspection strategy that has a limited impact on others
- demonstrating professionalism and maintaining the rights of the trader at all times
- solving routine/expected problems
- working safely

Required knowledge

REQUIRED SKILLS AND KNOWLEDGE

- general chemical and physical principles and concepts including:
 - weight, mass, gravity and density
 - temperature effects and coefficients of expansion
- basic knowledge of the operating procedures across a limited range of environments including laboratories, retail and manufacturing
- knowledge of metrological terms and terminology specific to simple measures such as:
 - maximum permissible errors
 - traceability
 - error of measurement
 - error of indication
- national measurement legislation applicable to simple measures
- detailed knowledge of National Test Procedures and operating procedures for equipment and reference standards used in job role including:
 - purpose of test
 - test conditions and possible environmental impacts on performance of simple measure
 - key preparation/measurement steps in test method
 - calculation steps to give results in appropriate units and precision
 - maximum permissible errors for simple measures under inspection
- procedures for completing inspection documentation
- organisational policy and procedures for inspecting simple measures

Evidence Guide

EVIDENCE GUIDE	
<p>The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
<p>Overview of assessment</p>	<p>Competency must be demonstrated in the ability to perform consistently at the required standard for any class of simple measures listed in the Range Statement.</p>
<p>Critical aspects for assessment and evidence required to demonstrate competency in this unit</p>	<p>Assessors should ensure that candidates can:</p> <ul style="list-style-type: none"> • identify, access and apply test procedures • identify and use suitable reference standards • evaluate and adjust the impact of the operating environment on the performance of simple measures • analyse test results to determine the simple measure's suitability for verification (trade use) • identify the scope of a verifier performance audit and assess results with expected outcomes • audit the performance of verifiers of simple measures • identify and implement additional inspection strategies for non-instrument related breaches of national measurement legislation • recognise and act on non-compliance • maintain the security and confidentiality of data in accordance with organisational and regulatory requirements • report results in the required formats and expected timeframe.
<p>Context of and specific resources for assessment</p>	<p>This unit of competency is to be assessed in the workplace or simulated workplace environment.</p> <p>This unit of competency may be assessed with:</p> <ul style="list-style-type: none"> • MSATMREF301A Use and maintain reference standards. <p>Resources may include:</p> <ul style="list-style-type: none"> • simple measures, test equipment and reference standards • computer and relevant software and/or organisation information management system • Certificates of Approval for simple measures • relevant legislative and organisational procedures.

EVIDENCE GUIDE	
Method of assessment	<p>The following assessment methods are suggested:</p> <ul style="list-style-type: none"> • questions to assess understanding of relevant procedures, licensing requirements, trader obligations and remedial actions • review of inspection reports and verifier performance audit reports prepared by the candidate • feedback from supervisors and peers regarding the candidate's ability to verify the performance of simple measures in accordance with legislative and organisational procedures • observation of the candidate conducting an inspection. <p>In all cases, practical assessment should be supported by questions to assess underpinning knowledge and those aspects of competency which are difficult to assess directly. Questioning techniques should suit the language and literacy levels of the candidate.</p>
This competency in practice	<p>Industry representatives have provided the case studies below to illustrate the practical application of this unit of competency and to show its relevance in a workplace setting.</p> <p>An inspector makes an unannounced visit to a manufacturer's premises that packages turpentine, linseed oil, kerosene and methylated spirits. His/her visit identifies that a 5L verified conical measure is being used for trade to check the volume of pre-packaged articles. He/she visually inspects the measure for compliance with the relevant Certificate of Approval and checks the existing certifying marks. The verifier notices that the volume measure is dented. He/she then tests the accuracy of the measure using a suitable 5L reference standard and finds it to be outside the maximum permissible error. He/she notifies the manager of this non-compliance and advises that any further use of this measure will result in enforcement action. On returning to their office, the inspector reports the need to inspect the premises and market place for inaccurate pre-packaged items manufactured by the company.</p>

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<p>Appropriate documentation</p>	<p>Where reference is made to documentation, it is expected the latest version will be used.</p> <p>Appropriate documentation may include:</p> <ul style="list-style-type: none"> • reference standards • Certificates of Verification • Certificates of Approval for simple measures • test procedures for verifying simple measures • organisational test reports • organisational procedures e.g. company quality assurance manual • National Measurement Act • occupational health and safety (OHS) regulations, guidelines and procedures and material safety data sheets (MSDS) • equipment manuals and warranty, supplier catalogues, and handbooks • National Measurement Institute policy • Australian Standards
<p>Certificates of Approval</p>	<p>Certificates of Approval may include:</p> <ul style="list-style-type: none"> • any Certificate issued by the Chief Metrologist under Regulation 60 of the National Measurement Regulations approving the pattern of a simple measure as being suitable for trade
<p>Test equipment</p>	<p>Test equipment may include:</p> <ul style="list-style-type: none"> • reference standards of measurement • equipment other than reference standards of measurement such as weighing instruments, strikes and funnels
<p>Legislation</p>	<p>Legislation may include:</p> <ul style="list-style-type: none"> • national measurement legislation

RANGE STATEMENT	
	<ul style="list-style-type: none"> • applicable Commonwealth, state and territory OHS legislation
National Test Procedures for simple measures	<p>National Test Procedures for simple measures may include:</p> <ul style="list-style-type: none"> • length measures • alcoholic beverage measures • lubricating oil measures • graduated measures • pharmaceutical measures • trade masses • any other test procedure prescribed by the National Measurement Institute
OHS and environmental management requirements	<p>OHS and environmental management requirements refers to:</p> <ul style="list-style-type: none"> • all operations must comply with enterprise OHS and environmental management requirements, which may be imposed through state/territory or Federal legislation. These requirements must not be compromised at any time • all operations assume the potentially hazardous nature of samples and require standard precautions to be applied • where relevant, users should access and apply current industry understanding of infection control issued by the National Health and Medical Research Council and State and Territory Departments of Health
Operating environmental impacts	<p>Operating environment impacts may include:</p> <ul style="list-style-type: none"> • vibration • wind • heat • dust • electromagnetic interference • out of level
Records	<p>Records may include:</p> <ul style="list-style-type: none"> • test reports • safety procedures • a history of equipment calibration and test results

RANGE STATEMENT**Simple measures**

Inspectors may be required to test and mark any of the classes of simple measures from the following list.

Simple measures may include:

- length measures
- alcoholic beverage measures
- lubricating oil measures
- graduated measures
- pharmaceutical measures
- trade masses
- any other simple measure prescribed by the National Measurement Institute

MSATMINS302A Inspect a range of simple measuring instruments

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	This unit of competency covers the ability to apply National Test Procedures to determine whether a range of simple measuring instruments are suitable for trade use. The unit also involves auditing the performance of verifiers who have previously tested and marked simple measuring instruments for trade use.
------------------------	--

Application of the Unit

Application of the unit	<p>This unit of competency is applicable to trade measurement inspectors appointed under national measurement legislation who may inspect a wide range of simple measuring instruments as part of their allocated duties. Simple measuring instruments are used in a very wide range of commerce. For example, dip sticks are used to measure bulk petroleum products and beverages, dimensional measuring instruments are used to measure the cubic measurements of packages for freight and length/area instruments are used to accurately measure a wide range of articles sold by reference to those measurements.</p> <p>Industry representatives have provided case studies to illustrate the practical application of this unit of competency and to show its relevance in a workplace setting. These are found at the end of this unit of competency under the section 'This competency in practice'.</p>

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare for inspection	1.1. Identify and evaluate the type of instrument to be inspected 1.2. Access and review any history of previous inspections at trader's premises 1.3. Access and correctly interpret appropriate documentation required for the inspection 1.4. Identify and access test equipment, products and consumables required for the inspection 1.5. Ensure specified test equipment is fit for purpose in accordance with applicable legislation and organisational procedures 1.6. Store and transport test equipment in accordance with organisational procedures and industry best practice 1.7. Identify workplace health and safety issues relevant to the inspection
2. Initiate inspection	2.1. Identify the site controller, explain the purpose of the inspection and produce formal identification, if required 2.2. Identify relevant site health and safety issues and implement appropriate control strategies 2.3. Conduct a preliminary evaluation of the site's trading practices and prioritise activities to maximise inspection outcomes 2.4. Identify trade measuring instruments and plan inspection to minimise disruption to the public and trader 2.5. Identify locations for product return or disposal, if applicable
3. Evaluate simple measuring instrument performance	3.1. Evaluate whether the operating environment will impact on the instrument performance 3.2. Modify the operating environment or implement alternative arrangements to ensure reliable test conditions as necessary 3.3. Identify the maximum permissible errors for the instrument from the legislative requirements 3.4. Use test equipment safely in accordance with applicable legislation and organisational procedures 3.5. Check instrument for compliance with the appropriate Certificates of Approval

ELEMENT	PERFORMANCE CRITERIA
	<p>3.6. Inspect the instrument in accordance with relevant National Test Procedure and appropriate National Measurement Institute policy</p> <p>3.7. Evaluate results against prescribed performance criteria and determine if the instrument is suitable for trade use in accordance with legislative requirements</p>
4. Conduct a verifier performance audit	<p>4.1. Identify the scope of the verifier audit</p> <p>4.2. Identify the expected outcomes of the verifier audit</p> <p>4.3. Assess the verifier's performance against the expected outcome</p> <p>4.4. Analyse any variances from the expected outcomes to identify isolated or systemic problems</p>
5. Analyse and report inspection results	<p>5.1. Analyse inspection data for unacceptable performance trends</p> <p>5.2. Display the inspection result on the instrument in accordance with legislative requirements</p> <p>5.3. Use test reports to present inspection results in the required format</p> <p>5.4. Complete inspection documentation in accordance with legislative requirements and organisational procedures</p> <p>5.5. Communicate inspection results within the specified time and in accordance with organisational guidelines</p> <p>5.6. Recommend follow-up actions as appropriate.</p>
6. Act on non-compliance	<p>6.1. Select applicable enforcement action for the non-compliance in accordance with legislative requirements, organisational policy and procedures</p> <p>6.2. Inform traders of non-compliances and consequences of failing to have them corrected</p> <p>6.3. Implement enforcement action in accordance with legislative requirements, organisational policy and procedures</p> <p>6.4. Maintain the rights of the trader at all times</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- accessing, interpreting and applying a range of documents for the inspection of simple measuring instruments including:
 - national measurement legislation
 - routine National Test Procedures
 - Certificates of Approval
 - National Measurement Institute inspection policy
 - Australian Standards
- accessing and interpreting Certificates of Verification for a limited range of reference standards
- use routine communication and negotiation skills to:
 - explain the purpose of inspection
 - inform traders of non-compliances and consequences of failing to rectify them
 - explain procedures and inspection outcomes to traders, verifiers and managers
- accessing, transporting, setting up, validating, using and maintaining a limited range of test equipment and reference standards
- identifying and evaluating environmental impacts on performance of a range of simple measuring instruments
- conducting tests and recording results with close attention to detail and accuracy
- performing calculations involving fractions, decimals, ratios, proportions and percentages
- using correct units and the correct number of significant figures
- analysing performance results over a single or limited range of operating conditions
- identifying non-compliances with national measurement legislation relating to instrument or verifier performance and initiate appropriate enforcement action including warning, infringement notice, undertaking, injunction and prosecution
- identifying potential trading practice non-compliance with national measurement legislation and initiating an appropriate inspection strategy
- planning routine tasks
- developing/implementing an efficient inspection strategy that has a limited impact on others
- demonstrating professionalism and maintaining the rights of the trader at all times
- solving routine/expected problems
- working safely

Required knowledge

REQUIRED SKILLS AND KNOWLEDGE

- general chemical and physical principles and concepts including:
 - weight, mass, gravity and density
 - temperature effects and coefficients of expansion
- basic knowledge of the operating procedures across a limited range of environments including laboratories, retail, industrial and farming
- knowledge of metrological terms and terminology specific to simple measuring instruments such as maximum permissible errors and traceability
- national measurement legislation applicable to simple measuring instruments
- detailed knowledge of National Test Procedures and operating procedures for equipment and reference standards used in job role including:
 - purpose of test
 - test conditions and possible environmental impacts on performance of the instrument
 - key preparation/measurement steps in test method
 - calculation steps to give results in appropriate units and precision
 - maximum permissible errors for simple measuring instruments under inspection
- procedures for completing inspection documentation
- organisational policy and procedures for inspecting simple measuring instruments

Evidence Guide

EVIDENCE GUIDE	
<p>The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
<p>Overview of assessment</p>	<p>Competency must be demonstrated in the ability to perform consistently at the required standard for any class of simple measuring instruments listed in the Range Statement.</p>
<p>Critical aspects for assessment and evidence required to demonstrate competency in this unit</p>	<p>Assessors should ensure that candidates can:</p> <ul style="list-style-type: none"> • identify, access and apply test procedures • identify and use suitable reference standards • evaluate and adjust the impact of the operating environment on the performance of the instrument • analyse test results to determine the instrument's suitability for verification (trade use) • identify the scope of a verifier performance audit and assess results with expected outcomes • audit the performance of verifiers of simple measuring instruments • identify and implement additional inspection strategies for non-instrument related breaches of national measurement legislation • recognise and act on non-compliance • maintain the security and confidentiality of data in accordance with organisational and regulatory requirements • report results in the required formats and expected timeframe.
<p>Context of and specific resources for assessment</p>	<p>This unit of competency is to be assessed in the workplace or simulated workplace environment.</p> <p>This unit of competency may be assessed with:</p> <ul style="list-style-type: none"> • MSATMREF301A Use and maintain reference standards. <p>Resources may include:</p> <ul style="list-style-type: none"> • simple measuring instruments, test equipment and reference standards • computer and relevant software and/or organisation information management system • Certificates of Approval for instruments

EVIDENCE GUIDE	
	<ul style="list-style-type: none"> • relevant legislative and organisational procedures.
Method of assessment	<p>The following assessment methods are suggested:</p> <ul style="list-style-type: none"> • questions to assess understanding of relevant procedures, licensing requirements, trader obligations and remedial actions • review of inspection reports and verifier performance audit reports prepared by the candidate • feedback from supervisors and peers regarding the candidate's ability to verify the performance of instruments in accordance with legislative and organisational procedures • observation of the candidate conducting an inspection. <p>In all cases, practical assessment should be supported by questions to assess underpinning knowledge and those aspects of competency which are difficult to assess directly. Questioning techniques should suit the language and literacy levels of the candidate.</p>
This competency in practice	<p>Industry representatives have provided the case studies below to illustrate the practical application of this unit of competency and to show its relevance in a workplace setting.</p> <p>An inspector has been allocated the task of verifying an area measuring instrument at a tannery. In preparation for his/her visit, the inspector accesses the organisation's database to establish the instrument type, site contact details and any previous history for the instrument or trader. The inspector assembles the test equipment required for the inspection. All reference standards are inspected for damage and validity against their certificate prior to them being stowed with the other equipment safely in the vehicle. On arrival at the tannery, the inspector introduces him/herself to the manager and explains the purpose of the visit and the process involved. During this discussion, the inspector explains that he/she will inspect the area measuring instrument for compliance with its Certificate of Approval, assess the operating environment for factors that may impact on its performance and conduct visual and performance tests in accordance with the National Test Procedure. If the instrument complies with these requirements it will be</p>

EVIDENCE GUIDE

marked as being acceptable for trade use. During the subsequent inspection, the area instrument is found to have a capacity greater than what is stated in the Certificate of Approval and the instrument's performance exceeds the maximum permissible error stated in the national measurement regulations. Consequently, the inspector removes the previous verification mark from the instrument and issues the trader with a warning that the instrument cannot be used for trade until it has been corrected and verified again. Before leaving the premises, the inspector provides the trader with some options for rectifying the non-compliances and gives the manager an opportunity to ask any questions about trade measurement activities.

Range Statement

RANGE STATEMENT	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
<p>Prescribed performance criteria for instruments</p>	<p>Prescribed performance criteria for instruments may include:</p> <ul style="list-style-type: none"> • design is in accordance with the appropriate Certificates of Approval • performance meets the criteria described in the Certificates of Approval, National Test Procedure, legislation and National Measurement Institute policy
<p>Appropriate documentation</p>	<p>Where reference is made to documentation, it is expected the latest version will be used.</p> <p>Appropriate documentation may include:</p> <ul style="list-style-type: none"> • Certificates of Verification • Certificates of Approval for simple measuring instruments • test procedures for verifying simple measuring instruments • organisational test reports • organisational procedures • National Measurement Act • occupational health and safety (OHS) regulations, guidelines and procedures and material safety data sheets (MSDS) • equipment manuals and warranty, supplier catalogues and handbooks • National Measurement Institute policy • Australian Standards
<p>Certificates of Approval</p>	<p>Certificates of Approval may include:</p> <ul style="list-style-type: none"> • the Certificate issued under national measurement legislation approving the pattern of a simple measuring instrument as being suitable for trade
<p>Enforcement action</p>	<p>Enforcement action may include:</p>

RANGE STATEMENT	
	<ul style="list-style-type: none"> • formal warnings • infringement notice • formal undertaking • injunction • prosecution
Test equipment	<p>Test equipment may include:</p> <ul style="list-style-type: none"> • reference standards of measurement • equipment other than reference standards of measurement e.g. weighing instrument, funnels, manifolds, hoses, water meters, roman levels, tramells and beakers
Legislation	<p>Legislation may include:</p> <ul style="list-style-type: none"> • national measurement legislation • applicable Commonwealth, state and territory OHS legislation

Inspect the instrument in accordance with relevant National Test Procedure and appropriate National

ELEMENT	PERFORMANCE CRITERIA
	<p>Measurement Institute policy</p> <p>3.7. Evaluate results against prescribed performance criteria and determine if the instrument is suitable for trade use in accordance with legislative requirements</p>
4. Conduct a verifier performance audit	<p>4.1. Identify the scope of the verifier audit</p> <p>4.2. Identify the expected outcomes of the verifier audit</p> <p>4.3. Assess the verifier's performance against the expected outcome</p> <p>4.4. Analyse any variances from the expected outcomes to identify isolated or systemic problems</p>
5. Analyse and report inspection results	<p>5.1. Analyse inspection data for unacceptable performance trends</p> <p>5.2. Display the inspection result on the instrument in accordance with legislative requirements</p> <p>5.3. Use test reports to present inspection results in the required format</p> <p>5.4. Complete inspection documentation in accordance with legislative requirements and organisational procedures</p> <p>5.5. Communicate inspection results within the specified time and in accordance with organisational guidelines</p> <p>5.6. Recommend follow-up actions as appropriate.</p>
6. Act on non-compliance	<p>6.1. Select applicable enforcement action for the non-compliance in accordance with legislative requirements, organisational policy and procedures</p> <p>6.2. Inform traders of non-compliances and consequences of failing to have them corrected</p> <p>6.3. Implement enforcement action in accordance with legislative requirements, organisational policy and procedures</p> <p>6.4. Maintain the rights of the trader at all times</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- accessing, interpreting and applying a range of documents for the inspection of weighing instruments including:
 - national measurement legislation
 - routine National Test Procedures
 - Certificates of Approval
 - National Measurement Institute inspection policy
 - national and international design rules
 - pattern approval documents
- accessing and interpreting Certificates of Verification for a range of reference standards
- performing inspections over durations of up to one day in routine environments
- using advanced communication and negotiation skills to:
 - explain the purpose of inspection
 - inform traders of non-compliances and consequences of failing to rectify them
 - access external equipment and resources to complete the inspection
 - explain inspection procedures and outcomes to traders, verifiers and managers
- accessing, transporting, setting up, validating, using and maintaining a range of test equipment and reference standards
- identifying and evaluating environmental impacts on performance of a range of weighing instruments
- conducting tests and recording results with close attention to detail and accuracy
- performing calculations involving:
 - fractions, decimals, ratios, proportions and percentages
 - scientific notation, correct units and the correct number of significant figures
 - interpretation of statistical quantities, such as mean, median, mode, range, variance and standard deviation
- analysing performance results over a number of operating conditions
- identifying non-compliances with national measurement legislation relating to instrument or verifier performance and initiate appropriate enforcement action including warning, infringement notice, undertaking, injunction and prosecution
- identifying potential trading practice non-compliance with national measurement legislation and initiating an appropriate inspection strategy
- planning routine tasks
- developing/implementing an efficient inspection strategy that has a limited impact on traders, the public, employees and suppliers
- demonstrating professionalism and maintaining the rights of the trader at all times

REQUIRED SKILLS AND KNOWLEDGE

- solving routine/expected problems
- working safely which may include applying basic first aid, confined space entry and working with heavy machinery

Required knowledge

- general chemical and physical principles and concepts including weight, mass and gravity
- knowledge of the operating procedures across a range of environments including laboratories, retail, manufacturing, industrial, mining, construction, medical, chemical, petroleum, farming and abattoirs
- knowledge of metrological terms and terminology specific to weighing instruments such as maximum permissible errors, traceability, uncertainty, maximum permissible difference, eccentricity, repeatability, error of measurement, error of indication and linearisation
- national measurement legislation applicable to weighing instruments
- detailed knowledge of National Test Procedures and operating procedures for equipment and reference standards used in job role including:
 - purpose of test
 - test conditions and possible environmental impacts on performance of the instrument
 - key preparation/measurement steps in test method
 - calculation steps to give results in appropriate units and precision
 - maximum permissible errors for weighing instruments under inspection
- procedures for completing inspection documentation
- organisational policy and procedures for verifying weighing instruments
- safety principles and procedures relevant to instruments and test environment
- basic first aid and site safety induction if required

Evidence Guide

EVIDENCE GUIDE	
<p>The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
<p>Overview of assessment</p>	<p>Competency must be demonstrated in the ability to perform consistently at the required standard for any class of weighing instrument listed in the Range Statement.</p>
<p>Critical aspects for assessment and evidence required to demonstrate competency in this unit</p>	<p>Assessors should ensure that candidates can:</p> <ul style="list-style-type: none"> • identify, access and apply test procedures • identify and use suitable reference standards • evaluate and adjust the impact of the operating environment on the performance of the instrument • analyse test results to determine the instrument's suitability for verification (trade use) • identify the scope of a verifier performance audit and assess results with expected outcomes • audit the performance of verifiers of weighing instruments • identify and implement additional inspection strategies for non-instrument related breaches of national measurement legislation • recognise and act on non-compliance • maintain the security and confidentiality of data in accordance with organisational and regulatory requirements • report results in the required formats and expected timeframe.
<p>Context of and specific resources for assessment</p>	<p>This unit of competency is to be assessed in the workplace or simulated workplace environment.</p> <p>This unit of competency may be assessed with:</p> <ul style="list-style-type: none"> • MSATMREF301A Use and maintain reference standards. <p>Resources may include:</p> <ul style="list-style-type: none"> • limited weighing instruments, test equipment and reference standards • computer and relevant software and/or organisation information management system • Certificates of Approval for instruments

EVIDENCE GUIDE	
	<ul style="list-style-type: none"> • relevant legislative and organisational procedures.
Method of assessment	<p>The following assessment methods are suggested:</p> <ul style="list-style-type: none"> • questions to assess understanding of relevant procedures, licensing requirements, trader obligations and remedial actions • review of inspection reports and verifier performance audit reports prepared by the candidate • feedback from supervisors and peers regarding the candidate's ability to verify the performance of instruments in accordance with legislative and organisational procedures • observation of the candidate conducting an inspection. <p>In all cases, practical assessment should be supported by questions to assess underpinning knowledge and those aspects of competency which are difficult to assess directly. Questioning techniques should suit the language and literacy levels of the candidate.</p>
This competency in practice	<p>Industry representatives have provided the case studies below to illustrate the practical application of this unit of competency and to show its relevance in a workplace setting.</p> <p>An inspector has been allocated a task of verifying a digital weighing instrument at a butcher's premises. In preparation for this visit, the inspector accesses the organisation's database to establish the type of instrument to be tested and any previous history of the instrument or trader. The equipment required for this inspection is identified, accessed and stowed in the vehicle securely and safely. Particular attention is made to ensure the integrity of the reference standards is maintained and that they are still current according to their verification certificate. On arrival at the butcher's premises, the inspector introduces him/herself to the manager and explains the purpose of the visit and the process involved. During this discussion the inspector explains that he/she will inspect the instrument for compliance with its Certificate of Approval, assess the instrument's operating environment for factors that may impact on its performance and conduct the visual and performance tests in accordance with the National Test Procedure. If it</p>

EVIDENCE GUIDE

complies with these requirements, he/she will mark the instrument as being acceptable for trade use and complete all the required inspection documentation.

During the inspection the inspector finds that the instrument has a tare capacity greater than that stated in the Certificate of Approval and the weighing performance of the instrument exceeds the maximum permissible error stated in the national measurement regulations. As a result, the inspector removes the previous verification mark from the instrument and issues the butcher a warning that the instrument cannot be used for trade until it has been corrected and verified again. Before leaving the premises, the inspector examines a sample of prepacked articles and the trading practices used by the trader for compliance with trade measurement legislation.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Prescribed performance criteria for instruments

Prescribed performance criteria for instruments may include:

- design is in accordance with the appropriate Certificates of Approval
- performance meets the criteria described in the Certificates of Approval, National Test Procedure and legislation

Appropriate documentation

Where reference is made to documentation, it is expected the latest version will be used.

Appropriate documentation may include:

- reference standards
- Certificates of Verification
- Certificates of Approval for limited weighing instruments
- test procedures for verifying limited weighing instruments
- organisational test reports
- organisational procedures e.g. company quality assurance manual
- National Measurement Act
- occupational health and safety (OHS) regulations, guidelines and procedures and material safety data sheets (MSDS)
- equipment manuals and warranty, supplier catalogues and handbooks

Certificates of Approval

Certificates of Approval may include:

- any Certificate issued by the Chief Metrologist under Regulation 60 of the National Measurement Regulations approving the pattern of a limited weighing instrument as being suitable for trade

Enforcement action

Enforcement action may include:

RANGE STATEMENT	
	<ul style="list-style-type: none"> • formal warnings • infringement notice • formal undertaking • injunction • prosecution
Test equipment	<p>Test equipment may include:</p> <ul style="list-style-type: none"> • reference standards of measurement
Legislation	<p>Legislation may include:</p> <ul style="list-style-type: none"> • national measurement legislation • applicable Commonwealth, state and territory OHS legislation
National Measurement Institute policy	<p>National Measurement Institute policy may include:</p> <ul style="list-style-type: none"> • test procedure variations between a verification, in-service or audit inspection • bulletin • instruction • determination
National Test Procedures for limited weighing instruments	<p>National Test Procedures for limited weighing instruments may include:</p> <ul style="list-style-type: none"> • non-automatic weighing machines tested without substitution loads • automatic Class Y(a) Catchweighers • automatic Class Y(b) Catchweighers • any other test procedure prescribed by the National Measurement Institute
OHS and environmental management requirements	<p>OHS and environmental management requirements refers to:</p> <ul style="list-style-type: none"> • all operations must comply with enterprise OHS and environmental management requirements, which may be imposed through state/territory or Federal legislation. These requirements must not be compromised at any time • all operations assume the potentially hazardous nature of samples and require standard precautions to be applied • where relevant, users should access and apply current industry understanding of infection

RANGE STATEMENT	
	control issued by the National Health and Medical Research Council and State and Territory Departments of Health
Operating environmental impacts	Operating environmental impacts may include: <ul style="list-style-type: none"> • vibration • wind • heat • dust • electromagnetic interference • out of level
Records	Records may include: <ul style="list-style-type: none"> • test reports • safety procedures • a history of equipment calibration and test results
Weighing instruments	Inspectors may be required to test and mark classes of instruments from the following list. Weighing instruments may include: <ul style="list-style-type: none"> • non-automatic weighing machines tested without substitution loads • automatic Class Y(a) Catchweighers • automatic Class Y(b) Catchweighers • any other test procedure prescribed by the National Measurement Institute

Co-requisite units

Co-requisite units		

MSATMINS402A Inspect a range of liquid measuring instruments using volume measures

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	This unit of competency covers the ability to apply National Test Procedures to determine whether a liquid measuring instrument using volume measures is suitable for trade and then mark it accordingly. It also involves auditing the performance of verifiers who have previously tested and marked liquid measuring instruments for use.
------------------------	--

Application of the Unit

Application of the unit	<p>This unit of competency is applicable to trade measurement inspectors appointed under national measurement legislation who may inspect a wide range of liquid measuring instruments tested using a volume measure as part of their allocated duties. Liquid measuring instruments are used in a very wide range of commerce. For example, petrol bowsers measure fuel at the point of sale and flowmeters are used to measure bulk commodities such as milk, chemicals and petroleum products during production and distribution.</p> <p>Industry representatives have provided case studies to illustrate the practical application of this unit of competency and to show its relevance in a workplace setting. These are found at the end of this unit of competency under the section 'This competency in practice'.</p>
--------------------------------	---

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<p>1. Prepare for inspection</p>	<p>1.1. Identify and evaluate the type of instrument to be inspected</p> <p>1.2. Access and review any history of previous inspections at trader's premises</p> <p>1.3. Access and correctly interpret appropriate documentation required for the inspection</p> <p>1.4. Identify and access test equipment, products and consumables required for the inspection</p> <p>1.5. Ensure specified test equipment is fit for purpose in accordance with applicable legislation and organisational procedures</p> <p>1.6. Store and transport test equipment in accordance with organisational procedures and industry best practice</p> <p>1.7. Identify workplace health and safety issues relevant to the inspection</p>
<p>2. Initiate inspection</p>	<p>2.1. Identify the site controller, explain the purpose of the inspection and produce formal identification, if required</p> <p>2.2. Identify relevant site health and safety issues and implement appropriate control strategies</p> <p>2.3. Conduct a preliminary evaluation of the site's trading practices and prioritise activities to maximise inspection outcomes</p> <p>2.4. Identify trade measuring instruments and plan inspection to minimise disruption to the public and trader</p>
<p>3. Evaluate liquid measuring instrument performance</p>	<p>3.1. Evaluate whether the operating environment will impact on the instrument performance</p> <p>3.2. Modify the operating environment or implement alternative arrangements to ensure reliable test conditions as necessary</p> <p>3.3. Identify the maximum permissible errors for the instrument from the legislative requirements</p> <p>3.4. Use test equipment safely in accordance with applicable legislation and organisational procedures</p> <p>3.5. Check instrument for compliance with the appropriate Certificates of Approval</p> <p>3.6. Inspect the instrument in accordance with relevant National Test Procedure and appropriate National</p>

ELEMENT	PERFORMANCE CRITERIA
	<p>Measurement Institute policy</p> <p>3.7. Evaluate results against prescribed performance criteria and determine if the instrument is suitable for trade use in accordance with legislative requirements</p>
<p>4. Conduct a verifier performance audit</p>	<p>4.1. Identify the scope of the verifier audit</p> <p>4.2. Identify the expected outcomes of the verifier audit</p> <p>4.3. Assess the verifier's performance against the expected outcome</p> <p>4.4. Analyse any variances from the expected outcomes to identify isolated or systemic problems</p>
<p>5. Analyse and report inspection results</p>	<p>5.1. Analyse inspection data for unacceptable performance trends</p> <p>5.2. Display the inspection result on the instrument in accordance with legislative requirements</p> <p>5.3. Use test reports to present inspection results in the required format</p> <p>5.4. Complete inspection documentation in accordance with legislative requirements and organisational procedures</p> <p>5.5. Communicate inspection results within the specified time and in accordance with organisational guidelines</p> <p>5.6. Recommend follow-up actions as appropriate</p>
<p>6. Act on non-compliance</p>	<p>6.1. Select applicable enforcement action for the non-compliance in accordance with legislative requirements, organisational policy and procedures</p> <p>6.2. Inform traders of non-compliances and consequences of failing to have them corrected</p> <p>6.3. Implement enforcement action in accordance with legislative requirements, organisational policy and procedures</p> <p>6.4. Maintain the rights of the trader at all times</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- accessing, interpreting and applying a range of documents for the inspection of liquid measuring instruments including:
 - national measurement legislation
 - intermediate National Test Procedures
 - Certificates of Approval
 - National Measurement Institute inspection policy
 - Australian Standards
 - industry codes of practice
 - correction tables for volume, density and pressure for a range of liquids
 - national and international design rules
 - pattern approval documents
- accessing and interpreting Certificates of Verification for a range of reference standards
- performing inspections over extended durations in non-routine and hazardous environments
- using advanced communication and negotiation skills to:
 - explain purpose of the verification
 - inform traders of non-compliances and consequences of failing to rectify
 - access external equipment and resources to complete the verification
 - explain verification procedures and outcomes to traders, verifiers and managers
- accessing, transporting, setting up, validating, using and maintaining a broad range of test equipment and reference standards
- identifying and evaluating environmental factors that may impact on performance of liquid measuring instruments
- organising large equipment to be dispatched ahead of verification visit
- conducting tests and recording results with close attention to detail and accuracy
- performing calculations involving:
 - fractions, decimals, ratios, proportions and percentages
 - evaluation of formulae containing powers, exponents and logarithms functions
 - use of scientific notation, correct units, correct number of significant figures
 - calculation of uncertainties
 - preparation and interpretation of linear, semi-log and log-log graphs
 - interpretation of statistical quantities, such as mean, median, mode, range, variance and standard deviation
 - determination of regression line equations, correlation coefficients

REQUIRED SKILLS AND KNOWLEDGE

- preparation and interpretation of more complex control charts and frequency distribution plots
- analysing performance results over a broad range of operating conditions
- identifying non-compliances with national measurement legislation relating to instrument or verifier performance and initiate appropriate enforcement action including warning, infringement notice, undertaking, injunction and prosecution
- identifying potential trading practice non-compliance with national measurement legislation and initiating an appropriate inspection strategy
- planning complex tasks
- developing/implementing an efficient verification strategy that minimises disruption to traders, the public, technicians, employees, colleagues and suppliers
- demonstrating professionalism and maintaining the rights of the trader at all times
- solving unexpected problems and non-routine issues
- working safely which may include applying basic first aid, confined space entry, working with hazardous materials, working safely in hazardous environments, working with heavy machinery, Australian Institute of Petroleum (AIP) cold work clearance permit, safety induction and working at heights

Required knowledge

- general chemical and physical principles and concepts including:
 - physical states (solid, liquid gas), weight, mass, gravity and density
 - pressure, pressure differential, backpressure and head pressure
 - fluid flow
 - flashpoint, boiling point and ice point
 - viscosity
 - temperature effects and coefficients of expansion
- basic knowledge of the design, application and function of components used in liquid measuring instruments
- knowledge of the operating procedures across a range of environments including laboratories, retail, commercial, office, manufacturing, industrial, mining, construction, medical, chemical and petroleum
- knowledge of metrological terms and terminology specific to liquid measuring instruments such as:
 - maximum permissible errors, maximum permissible difference and maximum permissible variation
 - traceability
 - repeatability
 - uncertainty, error of measurement and error of indication
 - meter creep
 - hose dilation
 - temperature correction

REQUIRED SKILLS AND KNOWLEDGE

- linearisation
- gas elimination
- national measurement legislation applicable to liquid measuring instruments
- detailed knowledge of National Test Procedures and operating procedures for equipment and reference standards used in job role including:
 - purpose of test
 - test conditions and possible environmental impacts on performance of the instrument
 - key preparation/measurement steps in test method
 - calculation steps to give results in appropriate units and precision
 - maximum permissible errors for liquid measuring instruments under inspection
- procedures for completing inspection documentation
- organisational policy and procedures for inspecting instruments
- safety principles and procedures relevant to instruments
- basic first aid and site safety induction if required

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Competency must be demonstrated in the ability to perform consistently at the required standard for any class of liquid measuring instrument listed in the Range Statement.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Assessors should ensure that candidates can:

- identify, access and apply test procedures
- identify and use suitable reference standards
- evaluate and adjust the impact of the operating environment on the performance of the instrument
- analyse test results to determine the instrument's suitability for verification (trade use)
- identify the scope of a verifier performance audit and assess results with expected outcomes
- audit the performance of verifiers of liquid measuring instruments
- identify and implement additional inspection strategies for non-instrument related breaches of national measurement legislation
- recognise and act on non-compliance
- maintain the security and confidentiality of data in accordance with organisational and regulatory requirements
- report results in the required formats and expected timeframe.

Context of and specific resources for assessment

This unit of competency is to be assessed in the workplace or simulated workplace environment.

This unit of competency may be assessed with:

- MSATMREF301A Use and maintain reference standards.

Resources may include:

- liquid measuring instruments using volume measures, test equipment and reference standards
- safety equipment
- computer and relevant software and/or organisation information management system

EVIDENCE GUIDE	
	<ul style="list-style-type: none"> • Certificates of Approval for instruments • relevant legislative and organisational procedures.
Method of assessment	<p>The following assessment methods are suggested:</p> <ul style="list-style-type: none"> • questions to assess understanding of relevant procedures, licensing requirements, trader obligations and remedial actions • review of inspection reports and verifier performance audit reports prepared by the candidate • feedback from supervisors and peers regarding the candidate's ability to verify the performance of instruments in accordance with legislative and organisational procedures • observation of the candidate conducting an inspection. <p>In all cases, practical assessment should be supported by questions to assess underpinning knowledge and those aspects of competency which are difficult to assess directly. Questioning techniques should suit the language and literacy levels of the candidate.</p>
This competency in practice	<p>Industry representatives have provided the case studies below to illustrate the practical application of this unit of competency and to show its relevance in a workplace setting.</p> <p>An inspector arrives unannounced at a medium size service station to check the performance of a number of fuel dispensers. After introducing him/herself to the site manager, the inspector explains the purpose of the visit and asks for the location of the fuel return points. The inspector performs a safety check, completes an AIP form, places safety barriers around the work area and then prepares the test equipment and reference standards. There are seven fuel dispensers with a total of 38 hoses.</p> <p>The inspector tests a selection of dispensers visually. The National Test Procedure requires the inspector to dispense fuel into 15L reference measures and then return the fuel to storage. Approximately 90 litres are dispensed per hose. The inspector finds a number of non-compliances on site. Two hoses are dispensing fuel outside the allowable maximum permissible error, one dispenser has a faulty segment in its display and the lights are not working, the diesel dispenser failed the air</p>

EVIDENCE GUIDE

elimination test and three hoses are badly worn. The inspector removes the verification mark from all non-compliant dispensers.

While testing the fuel dispenser, the inspector notices a number of items displayed for sale outside the office. On closer inspection, some of the pre-packaged items are found not to be marked with a measurement statement.

The inspector meets with the site manager to inform him of the non-compliant dispensers. He/she advises the manager not to use any unmarked dispensers, explains how they can be rectified and issues non-compliance notices. They also discuss the non-compliant pre-packaged articles. The inspector takes details for further action, completes the AIP form and fuel usage report and then departs.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Prescribed performance criteria for instruments

Prescribed performance criteria for instruments may include:

- design is in accordance with the appropriate Certificates of Approval
- performance meets the criteria described in the Certificates of Approval, National Test Procedure and legislation

Appropriate documentation

Where reference is made to documentation, it is expected the latest version will be used.

Appropriate documentation may include:

- reference standards
- Certificates of Verification
- Certificates of Approval for liquid measuring instruments
- test procedures for verifying liquid measuring instruments
- organisational test reports
- organisational procedures e.g. company quality assurance manual
- National Measurement Act
- occupational health and safety (OHS) regulations, guidelines and procedures and material safety data sheets (MSDS)
- equipment manuals and warranty, supplier catalogues and handbooks

Certificates of Approval

Certificates of Approval may include:

- any Certificate issued by the Chief Metrologist under Regulation 60 of the National Measurement Regulations approving the pattern of a liquid measuring instrument as being suitable for trade

Enforcement action

Enforcement action may include:

RANGE STATEMENT	
	<ul style="list-style-type: none"> • formal warnings • infringement notice • formal undertaking • injunction • prosecution
Test equipment	<p>Test equipment may include:</p> <ul style="list-style-type: none"> • reference standards of measurement • equipment other than reference standards of measurement such as pumps, funnels and hoses
Legislation	<p>Legislation may include</p> <ul style="list-style-type: none"> • national measurement legislation • applicable Commonwealth, state and territory OHS legislation
National Measurement Institute policy	<p>National Measurement Institute policy may include:</p> <ul style="list-style-type: none"> • test procedure variations between a verification, in-service or audit inspection • bulletin • instruction • determination
National Test Procedures for liquid measuring instruments	<p>National Test Procedures for liquid measuring instruments may include:</p> <ul style="list-style-type: none"> • fuel dispensers other than LPG dispensers • bulk flowmetering systems for liquid hydrocarbons other than LPG tested using a volume measure • milk flowmeters tested using a volume measure • any other test procedure prescribed by the National Measurement Institute

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare for inspection	1.1. Identify and evaluate the type of trading practices to be inspected 1.2. Access and review any history of previous inspections at trader's premises 1.3. Access and correctly interpret appropriate documentation required for the inspection 1.4. Identify and access test equipment, investigation equipment and consumables required for the inspection 1.5. Ensure specified test equipment is fit for purpose in accordance with applicable legislation and organisational procedures 1.6. Store and transport test equipment in accordance with organisational procedures and industry best practice 1.7. Identify workplace health and safety issues relevant to the inspection
2. Conduct a trial purchase	2.1. Observe and assess visible trading practices prior to entry into the premises 2.2. Identify scope and expected outcomes of the trial purchase 2.3. On entry to the premises, evaluate trading practices and where applicable modify trial purchase strategy to maximise inspection outcomes 2.4. Conduct trial purchase while observing the measurement process and staff actions 2.5. Assess trader's performance against expected outcomes 2.6. Analyse any variances from the expected outcomes and identify isolated or systemic issues related to the trial purchase
3. Initiate inspection	3.1. Identify the site controller, explain the purpose of the inspection and produce formal identification, if required 3.2. Identify site workplace health and safety issues and implement appropriate control strategies 3.3. Conduct a preliminary evaluation of the site's trade measurement activities and prioritise inspection to maximise outcomes 3.4. Identify measuring instruments being used for trade

ELEMENT	PERFORMANCE CRITERIA
	3.5. Identify site's trading practice activities and plan inspection to minimise disruption to the public and trader
4. Examine measurement related advertising for compliance	4.1. Identify the articles which are required to be sold by specific measurement or in terms of a measurement at base conditions 4.2. Inspect and evaluate measurement related advertising used by the trader 4.3. Identify any non-compliances with legislative requirements
5. Examine trade measuring instrument operation	5.1. Inspect measuring instrument operating environment and determine instrument suitability for purpose 5.2. Evaluate measuring instrument operation against legislative requirements, organisational policy and procedures 5.3. Modify the operating environment or implement alternative arrangements to ensure reliable test conditions, as necessary 5.4. Identify the maximum permissible errors for the instrument from the legislative requirements 5.5. Use test equipment safely in accordance with applicable legislation and organisational procedures 5.6. Check instrument for compliance with the appropriate Certificates of Approval 5.7. Inspect the instrument in accordance with relevant National Test Procedure and appropriate National Measurement Institute policy 5.8. Evaluate results against prescribed performance criteria and determine if the instrument is suitable for trade use in accordance with legislative requirements
6. Validate the measurement of articles	6.1. Identify articles sold by reference to measurement 6.2. Examine the process used by the trader for measuring an article 6.3. Evaluate the trader's measurement procedure 6.4. Measure an article in accordance with the appropriate National Test Procedure, organisational policy and procedures
7. Analyse and report inspection results	7.1. Analyse inspection data for unacceptable trends 7.2. Use test reports to present inspection results in the required format 7.3. Complete inspection documentation in accordance

ELEMENT	PERFORMANCE CRITERIA
	<p>with legislative requirements and organisational procedures</p> <p>7.4. Communicate inspection results within the specified time and in accordance with organisational guidelines</p> <p>7.5. Recommend follow-up actions as appropriate</p>
8. Act on non-compliance	<p>8.1. Record and collect evidence of any identified non-compliance in accordance with legislative requirements, organisational policy and procedures</p> <p>8.2. Select applicable enforcement action for the non-compliance in accordance with legislative requirements, organisational policy and procedures</p> <p>8.3. Inform trader of non-compliances and the consequences of failing to have them corrected</p> <p>8.4. Implement enforcement action in accordance with legislative requirements, organisational policy and procedures</p> <p>8.5. Maintain the rights of the trader at all times</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- accessing, interpreting and applying a range of documents for the inspection of trading practices including:
 - national measurement legislation
 - National Test Procedures
 - National Measurement Institute inspection policy
- accessing and interpreting Certificates of Verification for a range of reference standards
- performing inspections over a wide range of environments
- using advanced communication and negotiation skills to:
 - explain the purpose of inspection
 - inform traders of non-compliances and consequences of failing to rectify them
 - access external equipment and resources to complete the inspection
 - explain inspection procedures and outcomes to traders and managers
- accessing, transporting, setting up, validating, using and maintaining a range of test equipment and reference standards
- identifying and evaluating environmental impacts on performance of a range of measuring instruments
- identifying and evaluating impacts of trader procedures on the measurement of articles
- conducting tests and recording results with close attention to detail and accuracy
- performing calculations involving:
 - fractions, decimals, ratios, proportions and percentages
 - scientific notation, correct units and the correct number of significant figures
 - interpretation of statistical quantities, such as mean, median, mode, range, variance and standard deviation
- identifying non-compliances with national measurement legislation relating to trading practices and initiate appropriate enforcement action including warning, infringement notice, undertaking, injunction and prosecution
- identifying potential measuring instrument non-compliance with national measurement legislation and initiating an appropriate inspection strategy
- planning routine tasks
- developing/implementing an efficient inspection strategy that has a limited impact on traders, the public, employees and suppliers
- demonstrating professionalism and maintaining the rights of the trader at all times
- solving routine/expected problems
- working safely which may include applying basic first aid

REQUIRED SKILLS AND KNOWLEDGE**Required knowledge**

- general physical principles and concepts including weight, mass, gravity, volume, length and area
- knowledge of the operating procedures across a range of retail environments and some industrial and petroleum environments
- knowledge of metrological terms and terminology such as maximum permissible errors, traceability and uncertainty
- national measurement legislation applicable to trading practices and measuring instruments
- detailed knowledge of National Test Procedures and operating procedures for equipment and reference standards used in job role including:
 - purpose of test
 - test conditions and possible environmental impacts on performance of the instrument
 - key preparation/measurement steps in test method
 - calculation steps to give results in appropriate units and precision
 - maximum permissible errors for measuring instruments under inspection
- procedures for completing inspection documentation
- organisational policy and procedures for inspecting trading practices
- safety principles and procedures relevant to instruments and test environment
- basic first aid and site safety induction if required

Evidence Guide

EVIDENCE GUIDE	
<p>The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
<p>Overview of assessment</p>	<p>Competency must be demonstrated in the ability to perform consistently at the required standard while inspecting any of the trading practices listed in the Range Statement.</p>
<p>Critical aspects for assessment and evidence required to demonstrate competency in this unit</p>	<p>Assessors should ensure that candidates can:</p> <ul style="list-style-type: none"> • identify, access and apply test procedures • identify and use suitable reference standards • evaluate and adjust the impact of the operating environment on the performance of the instrument • analyse test results to determine the instrument's suitability for verification (trade use) • identify and implement additional inspection strategies for non-trading practice related breaches of national measurement legislation • recognise and act on non-compliance • maintain the security and confidentiality of data in accordance with organisational and regulatory requirements • report results in the required formats and expected timeframe.
<p>Context of and specific resources for assessment</p>	<p>This unit of competency is to be assessed in the workplace or simulated workplace environment.</p> <p>This unit of competency may be assessed with:</p> <ul style="list-style-type: none"> • MSATMINS404A Inspect a range of pre-packaged products • MSATMINS301A Inspect a range of simple measures • MSATMINS302A Inspect a range of simple measuring instruments • MSATMINS401A Inspect a range of weighing instruments • MSATMINS402A Inspect a range of liquid measuring instruments using volume measures. <p>Resources may include:</p> <ul style="list-style-type: none"> • measuring instruments, test equipment and reference

EVIDENCE GUIDE	
	<p>standards</p> <ul style="list-style-type: none"> • computer and relevant software and/or organisation information management system • Certificates of Approval for instruments • relevant legislative and organisational procedures.
Method of assessment	<p>The following assessment methods are suggested:</p> <ul style="list-style-type: none"> • questions to assess understanding of relevant procedures, trader obligations and remedial actions • review of inspection reports prepared by the candidate • feedback from supervisors and peers regarding the candidate's ability to inspect trading practices in accordance with legislative and organisational procedures • observation of the candidate conducting a trading practice inspection. <p>In all cases, practical assessment should be supported by questions to assess underpinning knowledge and those aspects of competency which are difficult to assess directly. Questioning techniques should suit the language and literacy levels of the candidate.</p>
This competency in practice	<p>Industry representatives have provided the case studies below to illustrate the practical application of this unit of competency and to show its relevance in a workplace setting.</p> <p>An inspector is allocated a file to investigate a consumer complaint alleging that a butcher is over charging on purchases of meat. During preparation for the inspection, the inspector notices that the trader was recently issued with an infringement notice for a similar offence. On arrival at the premises, the inspector observes the trading practices visible from outside the premises and develops a trial purchase plan. On entry, the inspector inspects the shop layout, staff actions, operation of the scales, advertising and the method of selling meat. He/she observes some cuts of meat are not being advertised and sold by weight as required by national measurement legislation and eye fillet is being advertised for sale at a price per 100 g without a reference to its price per kilogram. The inspector modifies the purchase plan to include an additional purchase of meat not apparently</p>

EVIDENCE GUIDE

being sold by weight.

The inspector conducts the trial purchase of two separate cuts of meat. The first cut of meat is weighed on a scale that indicates 0.050 kg without anything on the weigh platter. The second cut is being sold for a set price per item. After paying for the meat, the inspector identifies the site controller, introduces him/herself, explains a trial purchase had been completed and the process for the remainder of the inspection. The inspector weighs the first cut of meat on the same scale used by the butcher during the trial purchase. Before weighing the meat, he/she resets the scale to zero and finds the meat weighs 0.050 kg less than the weight he/she was charged for. The pre-packaged products being offered for sale are found to be correct weight and correctly marked as required by legislation. The inspector records notes of the trial purchase in his/her notebook, then tests the accuracy of the weighing instruments and notes that the scales had been verified last month.

Before leaving the premises, the inspector informs the site controller of the non-compliances: i.e. selling an article with a short fall, using a weighing instrument incorrectly, selling meat other than by reference to its weight and not advertising meat for sale at a price per kilogram. He/she outlines the resulting enforcement actions and consequences for failing to correct the non-compliances.

On returning to the office, the inspector disposes of the trial purchase, files his/her notes and photographs as evidence of the non-compliance and reports the inspection outcomes in accordance with organisational policy and procedures.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Appropriate documentation

Where reference is made to documentation, it is expected the latest version will be used.

Appropriate documentation may include:

- reference standards
- Certificates of Verification
- measuring instrument Certificates of Approval
- test procedures for measuring instruments
- organisational test reports
- organisational procedures e.g. company quality assurance manual
- National Measurement Act
- occupational health and safety (OHS) regulations, guidelines and procedures
- material safety data sheets
- equipment manuals and warranty, supplier catalogues and handbooks

Certificates of Approval

Certificates of Approval may include:

- any Certificate issued by the Chief Metrologist under Regulation 60 of the National Measurement Regulations approving the pattern of a limited weighing instrument as being suitable for trade

Enforcement action

Enforcement action may include:

- formal warnings
- infringement notice
- formal undertaking
- injunction
- prosecution

Test equipment

Test equipment may include:

- reference standards of measurement
- weighing instruments

RANGE STATEMENT	
	<ul style="list-style-type: none"> • trolleys • cameras • video and audio recorders
Legislation	<p>Legislation may include:</p> <ul style="list-style-type: none"> • national measurement legislation • applicable Commonwealth, state and territory OHS legislation
National Measurement Institute policy	<ul style="list-style-type: none"> • National Measurement Institute policy may include: • test procedure variations between a verification, in-service or audit inspection • bulletin • instruction • determination • policy documents
National Test Procedures	<p>National Test Procedures may include:</p> <ul style="list-style-type: none"> • measuring instrument test procedures • article measurement procedures • any other test procedure prescribed by the National Measurement Institute
OHS and environmental management requirements	<p>OHS and environmental management requirements refer to:</p> <ul style="list-style-type: none"> • all operations must comply with enterprise OHS and environmental management requirements, which may be imposed through state/territory or Federal legislation. These requirements must not be compromised at any time • all operations assume the potentially hazardous nature of samples and require standard precautions to be applied • where relevant, users should access and apply current industry understanding of infection control issued by the National Health and Medical Research Council and State and Territory Departments of Health
Operating environmental impacts	<p>Operating environmental impacts may include:</p> <ul style="list-style-type: none"> • vibration • wind

RANGE STATEMENT	
	<ul style="list-style-type: none"> • heat • dust • electromagnetic interference • out of level • liquid being measured
Records	Records may include: <ul style="list-style-type: none"> • test reports • safety procedures • a history of equipment calibration and test results
Trading practices	Trading practices may include: <ul style="list-style-type: none"> • how a measuring instrument is used • position of measuring instruments • measurement advertising • how the measurement of an article is determined • the type of measurement used to sell an article • the base conditions at which the measurement of an article is determined

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare for inspection	1.1. Identify and evaluate the type of pre-packaged products to be inspected 1.2. Access and review any history of previous inspections at trader's premises 1.3. Access and correctly interpret appropriate documentation required for the inspection 1.4. Identify and access test equipment, investigation equipment and consumables required for the inspection 1.5. Ensure specified test equipment is fit for purpose in accordance with applicable legislation and organisational procedures 1.6. Store and transport test equipment in accordance with organisational procedures and industry best practice 1.7. Identify workplace health and safety issues relevant to the inspection
2. Initiate inspection	2.1. Identify the site controller, explain the purpose of the inspection and produce formal identification, if required 2.2. Identify site workplace health and safety issues and implement appropriate control strategies 2.3. Conduct a preliminary evaluation of the site's trade measurement activities and prioritise inspection to maximise outcomes 2.4. Identify the range of pre-packaged products at the premises and plan the inspection to achieve maximum outcomes while minimising disruption to the public and trader
3. Inspect packaged article markings	3.1. Identify generic trade measurement marking requirements for pre-packaged products 3.2. Identify specific trade measurement marking requirements related to the pre-packaged product selected for inspection 3.3. Assess measurement, unit pricing and packer identification markings on pre-packaged products for compliance with legislative requirements
4. Measure the net contents of pre-packaged	4.1. Identify and access National Test Procedure appropriate for measuring the product 4.2. Select pre-packaged products for measurement in

ELEMENT	PERFORMANCE CRITERIA
products	<p>accordance with marketplace intelligence, legislative requirements, organisational policy and procedures</p> <p>4.3. Identify, access and apply product handling and disposal requirements in accordance with workplace, health and safety and environmental requirements</p> <p>4.4. Select specialised equipment, reference standards and measuring devices in accordance with organisational policy and procedures</p> <p>4.5. Measure pre-packaged product in accordance with the appropriate National Test Procedure, organisational policy and procedures</p> <p>4.6. Evaluate results against prescribed performance criteria and determine if the net contents of the individual pre-packaged products and inspection lot meet legislative requirements</p>
5. Evaluate trader's measurement process	<p>5.1. Examine the process used by the trader to measure a pre-packaged product</p> <p>5.2. Evaluate the effectiveness of the trader's measurement procedure, methodology and test frequency against inspection outcomes</p> <p>5.3. Inspect measuring instrument operating environment and assess suitability for purpose</p> <p>5.4. Evaluate measuring instrument operation against legislative requirements, organisational policy and procedures</p> <p>5.5. Modify the operating environment or implement alternative arrangements to ensure reliable operating conditions for the measuring instrument as necessary</p> <p>5.6. Identify the maximum permissible errors for the instrument from the legislative requirements</p> <p>5.7. Inspect measuring instruments in accordance with relevant National Test Procedure, organisational policy and procedures</p>
6. Analyse and report inspection results	<p>6.1. Analyse inspection data for unacceptable trends</p> <p>6.2. Use test reports to present inspection results in the required format</p> <p>6.3. Complete inspection documentation in accordance with legislative requirements and organisational procedures</p> <p>6.4. Communicate inspection results within the specified time and in accordance with organisational guidelines</p>

ELEMENT	PERFORMANCE CRITERIA
	6.5.Recommend follow-up actions as appropriate
7. Act on non-compliance	<p>7.1.Record and collect evidence of any identified non-compliance in accordance with legislative requirements, organisational policy and procedures</p> <p>7.2.Select applicable enforcement action for the non-compliance in accordance with legislative requirements, organisational policy and procedures</p> <p>7.3.Inform traders of non-compliances and consequences of failing to have them corrected</p> <p>7.4.Implement enforcement action in accordance with legislative requirements, organisational policy and procedures</p> <p>7.5.Maintain the rights of the trader at all times</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- accessing, interpreting and applying a range of documents for the inspection of pre-packaged products including:
 - national measurement legislation
 - National Test Procedures
 - National Measurement Institute inspection policy
- accessing and interpreting Certificates of Verification for a range of reference standards
- performing inspections over durations exceeding one day in non-routine environments
- using advanced communication and negotiation skills to:
 - explain the purpose of inspection
 - inform traders of non-compliances and consequences of failing to rectify them
 - access external equipment and resources to complete the inspection
 - explain inspection procedures and outcomes to traders, verifiers and managers
- accessing, transporting, setting up, validating, using and maintaining a range of test equipment and reference standards
- identifying and evaluating environmental impacts on performance of a range of measuring instruments
- identifying and evaluating impacts of trader procedures on the measurement of pre-packaged products
- evaluating pre-packaged product markings for compliance with legislative requirements
- conducting tests and recording results with close attention to detail and accuracy
- performing calculations involving:
 - fractions, decimals, ratios, proportions and percentages
 - scientific notation, correct units and the correct number of significant figures
 - interpretation of statistical quantities, such as mean, median, mode, range, variance and standard deviation
- identifying non-compliances with national measurement legislation relating to trading practices and measuring instruments
- initiating appropriate enforcement action for non-compliances including warning, infringement notice, undertaking, injunction and prosecution
- planning routine tasks
- developing/implementing an efficient inspection strategy that has a limited impact on traders, the public, employees and suppliers
- demonstrating professionalism and maintaining the rights of the trader at all times

REQUIRED SKILLS AND KNOWLEDGE
<ul style="list-style-type: none"> • solving routine/expected problems • working safely which may include applying basic first aid
Required knowledge
<ul style="list-style-type: none"> • general physical principles and concepts including weight, mass, gravity, volume, length, area and displacement • knowledge of the operating procedures across a range of environments including laboratories, retail, manufacturing, industrial, chemical, petroleum, farming, abattoirs and food processing • knowledge of metrological terms and terminology such as maximum permissible errors, traceability, uncertainty, inspection lot, deficiency and shortfall • national measurement legislation applicable to pre-packaged products and measuring instruments • detailed knowledge of National Test Procedures and operating procedures for equipment and reference standards used in job role including: <ul style="list-style-type: none"> • purpose of test • test conditions and possible environmental impacts on performance of the instrument • key preparation/measurement steps in test method • calculation steps to give results in appropriate units and precision • maximum permissible errors for weighing instruments under inspection • procedures for completing inspection documentation • organisational policy and procedures for inspecting pre-packaged products • safety principles and procedures relevant to instruments and test environment • basic first aid and site safety induction if required

Evidence Guide

EVIDENCE GUIDE	
<p>The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
Overview of assessment	<p>Competency must be demonstrated in the ability to perform consistently at the required standard for a wide range of pre-packaged products.</p>
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>Assessors should ensure that candidates can:</p> <ul style="list-style-type: none"> • identify, access and apply test procedures • identify and use suitable reference standards • evaluate and adjust the impact of the operating environment on the performance of the instrument • analyse test results to determine the instrument's suitability for verification (trade use) • inspect markings and net contents of pre-packaged articles • identify and implement additional inspection strategies for pre-packaged product related breaches of national measurement legislation • recognise and act on non-compliance • maintain the security and confidentiality of data in accordance with organisational and regulatory requirements • report results in the required formats and expected timeframe.
Context of and specific resources for assessment	<p>This unit of competency is to be assessed in the workplace or simulated workplace environment.</p> <p>This unit of competency may be assessed with:</p> <ul style="list-style-type: none"> • MSATMINS403AA Inspect a range of trading practices • MSATMINS301A Inspect a range of simple measures • MSATMINS302A Inspect a range of simple measuring instruments • MSATMINS401A Inspect a range of weighing instruments • MSATMINS402A Inspect a range of liquid measuring instruments using volume measures. <p>Resources may include:</p>

EVIDENCE GUIDE	
	<ul style="list-style-type: none"> • measuring instruments, test equipment and reference standards • computer and relevant software and/or organisation information management system • Certificates of Approval for instruments • relevant legislative and organisational procedures.
Method of assessment	<p>The following assessment methods are suggested:</p> <ul style="list-style-type: none"> • questions to assess understanding of relevant procedures, trader obligations and remedial actions • review of inspection reports prepared by the candidate • feedback from supervisors and peers regarding the candidate's ability to inspect pre-packaged products in accordance with legislative and organisational procedures • observation of the candidate inspecting pre-packaged products. <p>In all cases, practical assessment should be supported by questions to assess underpinning knowledge and those aspects of competency which are difficult to assess directly. Questioning techniques should suit the language and literacy levels of the candidate.</p>
This competency in practice	<p>Industry representatives have provided the case studies below to illustrate the practical application of this unit of competency and to show its relevance in a workplace setting.</p> <p>An inspector is allocated a routine inspection at a factory which packs milk. When reviewing the trader's inspection history, the inspector notices that the trader was issued with an infringement notice 12 months ago for packing 2 L bottles of milk that had an average 4.5% shortfall. On arrival at the premises, the inspector enters the main office and explains the purpose of the visit. While waiting for the site controller to arrive, the inspector assesses the business registration documents on public display and notes they coincide with the pre-inspection documentation he/she retrieved earlier. When the site controller arrives, the inspector explains the purpose of the visit. The site controller provides a site induction and highlights the local workplace health and safety requirements. The inspector then outlines an</p>

EVIDENCE GUIDE

inspection strategy that will minimise disruption to the trader and suppliers and satisfy the factory's health and hygiene requirements.

The inspector collects the necessary equipment and documentation from his/her vehicle and validates the test equipment before proceeding with the inspection. Given the trader's history, he/she selects an inspection lot of 12 pre-packaged 2 L bottles of milk. On close examination, the inspector finds that the measurement and packer identification markings on this product do not comply with legislative requirements because the 2 L print height is too small. He/she then measures the volume of milk in each bottle and finds an average shortfall of 75 ml or 3.75%. The inspector conducts a detailed investigation of the trader's milk packaging process, measuring instruments, measurement procedure, and their methodology and frequency of measurement tests. He/she finds that the milk density used for setting volumetric fillers is incorrect and causing the shortfall.

Before leaving the premises, the inspector informs the site controller of the non-compliances: i.e. packing pre-packaged products with an average shortfall which exceeded the prescribed performance criteria and a measurement marking print height smaller than the prescribed criteria. He/she outlines the resulting enforcement actions and consequences for failing to correct the non-compliances.

On returning to the office, the inspector files his/her notes, test reports and photographs as evidence of the non-compliance and reports the inspection outcomes in accordance with organisational policy and procedures.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<p>Appropriate documentation</p>	<p>Where reference is made to documentation, it is expected the latest version will be used.</p> <p>Appropriate documentation may include:</p> <ul style="list-style-type: none"> • reference standards • Certificates of Verification • measuring instrument Certificates of Approval • test procedures for inspecting pre-packaged products and measuring instruments • organisational test reports • organisational procedures e.g. company quality assurance manual • National Measurement Act • occupational health and safety (OHS) regulations, guidelines and procedures • material safety data sheets • equipment manuals and warranty, supplier catalogues and handbooks

Co-requisite units

Co-requisite units		

MSATMINS501A Inspect a range of complex measuring instruments

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	<p>This unit of competency covers the ability to apply National Test Procedures to determine whether a complex measuring instrument is suitable for trade use. It involves the ability to perform lengthy calculations to assess instrument performance and conduct tests that may require coordination of a range of resources over long durations in hazardous environments. This unit also involves auditing the performance of verifiers who have previously tested and marked instruments for use.</p>
------------------------	---

Application of the Unit

Application of the unit	<p>This unit of competency is applicable to trade measurement inspectors appointed under national measurement legislation who may inspect a range of complex measuring instruments as part of their allocated duties. Complex measuring instruments are used in a wide range of heavy industries. For example, automatic rail weighbridges, belt weighers, totalising hoppers and liquid petroleum gas (LPG) flow meters are used throughout the mining, road/rail freight and petroleum/gas industry sectors.</p> <p>Industry representatives have provided case studies to illustrate the practical application of this unit of competency and to show its relevance in a workplace setting. These are found at the end of this unit of competency under the section 'This competency in practice'.</p>

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare for inspection	1.1. Identify and evaluate the type of instrument to be inspected 1.2. Access and correctly interpret documentation required for the inspection 1.3. Identify and access test equipment, products and consumables required for the inspection 1.4. Ensure test equipment is suitable for its purpose in accordance with applicable legislation and organisational procedures 1.5. Store and transport equipment in accordance with organisational procedures and industry best practice 1.6. Access and evaluate any previous test results for the trader 1.7. Identify workplace health and safety issues relevant to the inspection 1.8. Develop an inspection strategy to maximise resources and minimise time required for complex tests
2. Liaise with the trader to schedule complex tests	2.1. Discuss inspection arrangements with site controller where applicable 2.2. Identify relevant local workplace, health and safety issues and implement appropriate control strategies 2.3. Discuss the inspection strategy with the trader to minimise its impact on the trader's normal operations 2.4. Arrange site clearances and suitable scheduling for tests 2.5. Negotiate access to trader's equipment, materials and support personnel required for testing to be available on site 2.6. Arrange for any equipment to be provided by the trader, if required, by the National Test Procedure
3. Initiate inspection	3.1. Identify the site controller, explain/review the purpose of the inspection and, if required, produce formal identification 3.2. Review inspection strategy to ensure there is minimal disruption to the public and/or trader 3.3. Communicate inspection strategy to all personnel involved 3.4. Identify locations for product return or disposal if applicable

ELEMENT	PERFORMANCE CRITERIA
	<p>3.5. Evaluate the impacts of the operating environment on the instrument performance or test results and, where applicable, implement corrective actions</p> <p>3.6. Identify operational factors impacting on instrument performance or test result and, where applicable, implement corrective actions</p>
4. Evaluate complex measuring instrument performance	<p>4.1. Identify the maximum permissible errors for the instrument from the legislative requirements</p> <p>4.2. Manage and review resources to maintain inspection timelines</p> <p>4.3. Provide effective communication to ensure relevant personnel are informed of variations to the inspection strategy and inspection progress</p> <p>4.4. Check instrument for compliance with the appropriate Certificates of Approval</p> <p>4.5. Inspect the instrument in accordance with relevant National Test Procedure and appropriate National Measurement Institute policy</p>
5. Analyse inspection results	<p>5.1. Perform specified calculations to determine a performance result for the instrument with appropriate accuracy, precision and significant figures</p> <p>5.2. Use graphical and statistical analysis to determine unknowns as necessary</p> <p>5.3. Ensure calculations are consistent with estimations and reasonable expectations</p> <p>5.4. Evaluate results against prescribed performance criteria and determine if the instrument is suitable for trade use in accordance with legislative requirements</p>
6. Conduct a verifier performance audit	<p>6.1. Identify the scope of the verifier audit</p> <p>6.2. Identify the expected outcomes of the verifier audit</p> <p>6.3. Assess the verifier's performance against the expected outcome</p> <p>6.4. Analyse any variances from the expected outcomes to identify any isolated or systemic problems</p>
7. Report inspection results	<p>7.1. Display the inspection result on the instrument in accordance with legislative requirements</p> <p>7.2. Use test reports to present inspection results in the required format</p> <p>7.3. Complete inspection documentation in accordance with legislative requirements and organisational</p>

ELEMENT	PERFORMANCE CRITERIA
	<p>procedures</p> <p>7.4. Communicate inspection results within the specified time and in accordance with organisational guidelines</p> <p>7.5. Recommend follow-up actions as appropriate.</p>
8. Act on non-compliance	<p>8.1. Select applicable enforcement action for the non-compliance in accordance with legislative requirements, organisational policy and procedures</p> <p>8.2. Inform traders of non-compliances and consequences of failing to have them corrected</p> <p>8.3. Implement enforcement action in accordance with legislative requirements, organisational policy and procedures</p> <p>8.4. Maintain the rights of the trader at all times</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- accessing, interpreting and applying a range of documents for the inspection of complex measuring instruments including:
 - national measurement legislation
 - intermediate National Test Procedures
 - Certificates of Approval
 - National Measurement Institute inspection policy
 - Australian Standards
 - industry codes of practice
 - correction tables for volume, density and pressure for a range of liquids
 - national and international design rules
 - pattern approval documents
- accessing and interpreting Certificates of Verification for a wide range of reference standards
- performing inspection over extended durations up to five days in non-routine and hazardous environments
- using advanced communication and negotiation skills to:
 - explain purpose of the inspection
 - inform traders of non-compliances and consequences of failing to rectify
 - access external equipment and resources to complete the inspection
- explain inspection procedures and outcomes to traders, verifiers and managers
- accessing, transporting, setting up, validating, using and maintaining a broad range of test equipment and reference standards
- identifying and evaluating environmental factors that may impact on performance of complex measuring instruments
- organising large equipment to be dispatched ahead of inspection visit
- conducting lengthy tests and recording results with close attention to detail and accuracy
- performing complex calculations involving:
 - fractions, decimals, ratios, proportions and percentages
 - evaluation of formulae containing powers, exponents and logarithms functions
 - use of scientific notation, correct units and correct number of significant figures
 - calculation of uncertainties
 - preparation and interpretation of linear, semi-log and log-log graphs
 - interpretation of statistical quantities, such as mean, median, mode, range, variance and standard deviation

REQUIRED SKILLS AND KNOWLEDGE

- determination of regression line equations and correlation coefficients
- preparation and interpretation of more complex control charts and frequency distribution plots
- analysing performance results over a broad range of operating conditions
- identifying non-compliances with national measurement legislation relating to instrument or verifier performance and initiate appropriate enforcement action including warning, infringement notice, undertaking, injunction and prosecution
- identifying potential trading practice non-compliance with national measurement legislation and initiating an appropriate inspection strategy
- planning complex tasks
- developing/implementing an efficient inspection strategy that minimises disruption to traders, the public, technicians, contractors, employees, colleagues and suppliers
- demonstrating professionalism and maintaining the rights of the trader at all times
- solving unexpected problems and non-routine issues
- working safely which may include applying basic first aid, confined space entry, working with hazardous materials, working safely in hazardous environments, working with heavy machinery, Australian Institute of Petroleum (AIP) cold work clearance permit, safety induction, working at heights and biosecurity issues

Required knowledge

- general chemical and physical principles and concepts including:
 - physical states (solid, liquid gas), weight, mass, gravity and density
 - pressure, pressure differential, backpressure and head pressure
 - fluid flow
 - flashpoint, boiling point and ice point
 - viscosity
 - temperature effects and coefficients of expansion
- basic knowledge of the design, application and function of components used in complex measuring instruments
- knowledge of the operating procedures across a range of environments including laboratories, retail, commercial, office, manufacturing, industrial, mining, construction, medical, chemical, petroleum, farming and abattoirs
- knowledge of metrological terms and terminology specific to complex measuring instruments such as:
 - maximum permissible errors, maximum permissible difference and maximum permissible variation
 - traceability
 - repeatability
 - uncertainty, error of measurement and error of indication
 - meter creep
 - hose dilation

REQUIRED SKILLS AND KNOWLEDGE

- temperature correction
- linearisation
- gas elimination
- national measurement legislation applicable to complex measuring instruments
- detailed knowledge of National Test Procedures and operating procedures for equipment and reference standards used in job role including:
 - purpose of test
 - test conditions and possible environmental impacts on performance of the instrument
 - key preparation/measurement steps in test method
 - calculation steps to give results in appropriate units and precision
 - maximum permissible errors for complex measuring instruments under inspection
- procedures for completing inspection documentation
- organisational policy and procedures for inspecting instruments
- safety principles and procedures relevant to instruments
- basic first aid and site safety induction if required

Evidence Guide

EVIDENCE GUIDE	
<p>The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
<p>Overview of assessment</p>	<p>Competency must be demonstrated in the ability to perform consistently at the required standard for any class of complex instrument listed in the Range Statement.</p>
<p>Critical aspects for assessment and evidence required to demonstrate competency in this unit</p>	<p>Assessors should ensure that candidates can:</p> <ul style="list-style-type: none"> • identify, access and apply test procedures • identify and use suitable reference standards • evaluate and adjust the impact of the operating environment on the performance of the instrument • analyse test results to determine the instrument's suitability for verification (trade use) • identify the scope of a verifier performance audit and assess results with expected outcomes • audit the performance of verifiers of complex measuring instruments • identify and implement additional inspection strategies for non-instrument related breaches of national measurement legislation • recognise and act on non-compliance • maintain the security and confidentiality of data in accordance with organisational and regulatory requirements • report results in the required formats and expected timeframe.
<p>Context of and specific resources for assessment</p>	<p>This unit of competency is to be assessed in the workplace or simulated workplace environment.</p> <p>This unit of competency may be assessed with:</p> <ul style="list-style-type: none"> • MSATMREF301A Use and maintain reference standards. <p>Resources may include:</p> <ul style="list-style-type: none"> • access to a complex instrument, test equipment and reference standards • computer and relevant software and/or organisation information management system • Certificates of Approval for the instrument

EVIDENCE GUIDE	
	<ul style="list-style-type: none"> • relevant legislative and organisational procedures.
Method of assessment	<p>The following assessment methods are suggested:</p> <ul style="list-style-type: none"> • questions to assess understanding of relevant procedures, licensing requirements, trader obligations and remedial actions • review of inspection reports and verifier performance audit reports prepared by the candidate • feedback from supervisors and peers regarding the candidate's ability to inspect the performance of instruments in accordance with legislative and organisational procedures • observation of the candidate conducting an inspection. <p>In all cases, practical assessment should be supported by questions to assess underpinning knowledge and those aspects of competency which are difficult to assess directly. Questioning techniques should suit the language and literacy levels of the candidate.</p>
This competency in practice	<p>Industry representatives have provided the case studies below to illustrate the practical application of this unit of competency and to show its relevance in a workplace setting.</p> <p>An inspector has been given the task of inspecting a bulk flowmetering system at an oil company distribution terminal. In preparation, the inspector evaluates the instrument nominated for inspection, identifies and accesses appropriate documentation for the inspection, identifies and accesses equipment, evaluates previous inspection data and develops an inspection strategy. The inspector visits the terminal to discuss the proposed inspection strategy with the site controller. During this discussion, the inspector discovers that access to the instrument has been restricted and modifications will have to be made to the area surrounding the instrument. The site controller engages a contractor to make the necessary modifications and agrees on an inspection strategy that will minimise disruption to terminal operations.</p> <p>On completion of the modifications, the inspector returns to the terminal to inspect the bulk flowmetering system. The site controller has arranged for all the resources</p>

EVIDENCE GUIDE

identified at the inspection strategy meeting to be available. Prior to commencing any testing, the inspector holds a meeting with all personnel involved in the inspection and describes the inspection strategy. A fitter who will be operating the instrument identifies a problem and offers a solution. The inspector agrees and adjusts the inspection strategy accordingly. At the completion of the testing, the inspector uses the recorded data in combination with a variety of data derived from correction tables and complex mathematical formulae to determine performance result for the instrument. These results confirm the instrument's performance is outside the acceptable maximum permissible errors. The inspector informs the site controller of the outcome and issues a formal warning explaining that the instrument cannot be used for trade until it has been corrected and verified by a licensed verifier. During a follow up visit, the inspector confirms the instrument has been repaired and verifies it.

Range Statement

RANGE STATEMENT	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
<p>Prescribed performance criteria for instruments</p>	<p>Prescribed performance criteria for instruments may include:</p> <ul style="list-style-type: none"> • design is in accordance with the appropriate Certificates of Approval • performance meets the criteria described in the Certificates of Approval, National Test Procedure and legislation
<p>Appropriate documentation</p>	<p>Where reference is made to documentation, it is expected the latest version will be used.</p> <p>Appropriate documentation may include:</p> <ul style="list-style-type: none"> • reference standards • Certificates of Verification • Certificates of Approval for complex instruments • test procedures for verifying complex instruments • organisational test reports • organisational procedures e.g. company quality assurance manual • National Measurement Act • occupational health and safety (OHS) regulations, guidelines and procedures • material data safety sheets • equipment manuals and warranty, supplier catalogues and handbooks
<p>Certificates of Approval</p>	<p>Certificates of Approval may include:</p> <ul style="list-style-type: none"> • any Certificate issued under the National Measurement Regulations approving the pattern of a complex measuring instrument as being suitable for trade
<p>Enforcement action</p>	<p>Enforcement action may include:</p> <ul style="list-style-type: none"> • formal warnings

RANGE STATEMENT	
	<ul style="list-style-type: none"> • infringement notice • formal undertaking • injunction • prosecution
Test equipment	<p>Test equipment may include:</p> <ul style="list-style-type: none"> • reference standards of measurement • equipment other than reference standards of measurement such as weighing instruments, pumping units, control instruments, two way communication, hoses, fittings, rail wagons, trains and tankers • LPG cylinders
Legislation may include	<p>Legislation may include:</p> <ul style="list-style-type: none"> • national measurement legislation • applicable Commonwealth, state and territory OHS legislation
National Measurement Institute policy	<p>National Measurement Institute policy may include:</p> <ul style="list-style-type: none"> • test procedure variations between a verification, in-service or audit inspection • bulletin • instruction • determination
National Test Procedures for complex instruments	<p>National Test Procedures for complex instruments may include:</p> <ul style="list-style-type: none"> • non-automatic weighing machines >3 tonne • LPG dispensers • bulk LPG flowmetering systems • flowmetering systems tested using the master meter or gravimetric methods • automatic rail weighbridges • continuous totalising automatic weighing instruments (belt weighers) • totalising hopper weighing instruments • any other test procedure prescribed by the National Measurement Institute
OHS and environmental management requirements	<p>OHS and environmental management requirements refer to:</p>

RANGE STATEMENT	
	<ul style="list-style-type: none"> • all operations must comply with enterprise OHS and environmental management requirements, which may be imposed through state/territory or Federal legislation. These requirements must not be compromised at any time • all operations assume the potentially hazardous nature of samples and require standard precautions to be applied • where relevant, users should access and apply current industry understanding of infection control issued by the National Health and Medical Research Council and State and Territory Departments of Health
Operating environmental impacts	<p>Operating environmental impacts may include:</p> <ul style="list-style-type: none"> • vibration • wind • heat • dust • electromagnetic interference • out of level
Specified calculations	<p>Specified calculations may include:</p> <ul style="list-style-type: none"> • calculations involving fractions, decimals, ratios, proportions and percentages • evaluation of formulae containing powers, exponents and logarithms functions • use of scientific notation, correct units and correct number of significant figures • calculation of uncertainties • preparation and interpretation of linear, semi-log and log-log graphs • calculation and interpretation of statistical quantities, such as mean, median, mode, range, variance and standard deviation • determination of regression line equations and correlation coefficients • preparation and interpretation of more complex control charts and frequency distribution plots
Records	<p>Records may include:</p> <ul style="list-style-type: none"> • test reports

RANGE STATEMENT	
	<ul style="list-style-type: none"> • safety procedures • a history of equipment calibration and test results
Complex instruments	<p>Inspectors may be required to test and mark any of the classes of instruments from the following list.</p> <p>Complex instruments may include:</p> <ul style="list-style-type: none"> • non-automatic weighing machines >3 tonne • LPG dispensers • LPG bulk flowmetering systems • flowmetering systems tested using master meter or gravimetric methods • automatic rail weighbridges • continuous totalising automatic weighing instruments (belt weighers) • totalising hoppers weighing instruments • any other complex measuring instrument prescribed by the National Measurement Institute

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Maintain reference standard integrity	1.1. Identify environmental issues that may impact on reference standard integrity and implement appropriate control strategies 1.2. Store, transport and handle reference standards in accordance with organisational procedures and industry best practice 1.3. Quarantine and report damaged or compromised reference standards in accordance with organisational procedures 1.4. Plan and organise reference standard maintenance and calibration in accordance with legislative requirements and organisational procedures 1.5. Update maintenance and calibration records in accordance with organisational procedures 1.6. Ensure that personnel assisting with the activity use correct handling procedures for reference standards
2. Select appropriate reference standards	2.1. Identify the scope and expected outcomes of the planned activity 2.2. Identify and access reference standards appropriate to the activity 2.3. Evaluate reference standard limitations associated with the activity and operating environment 2.4. Validate reference standard suitability against the activity scope and expected outcomes in accordance with legislative requirements and organisational policy and procedures
3. Use reference standards	3.1. Review the expected outcomes for the activity 3.2. Access and interpret reference standard Certificates of Verification and measurement reports 3.3. Condition the reference standard as required to produce consistent and accurate measurements 3.4. Identify, interpret and apply reference standard corrections as required 3.5. Assess the results of the activity against the prescribed performance criteria 3.6. Analyse any variances from the expected outcomes to identify any isolated or systemic problems linked to the reference standard or its use
4. Maintain a safe work environment	4.1. Use established safe work practices and personal protective equipment to ensure personal safety and

ELEMENT	PERFORMANCE CRITERIA
	that of other personnel 4.2. Identify relevant local workplace, health and safety issues and implement appropriate control strategies 4.3. Handle reference standards safely in accordance with applicable legislation and organisational procedures

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- using correct documentation to obtain information about tolerances for reference standards
- identifying suitable reference standards for the planned activity
- accessing documented operating procedures for reference standards and test equipment
- using reference standards and test equipment in accordance with specified procedures
- calibrating/maintaining reference standards and test equipment
- maintaining accuracy and currency of maintenance register for reference standards
- identifying and recording/reporting malfunction of, or damage to, reference standards or test equipment
- interpreting Certificates of Verification in relation to the use of reference standards
- using graphs and tables within Certificates of Verification
- accessing and interpreting Certificates of Verification for a range of reference standards
- using a wide range of reference standards over a wide range of environments
- using advanced communication and negotiation skills to:
 - explain the purpose of the trade measurement activity
 - access external equipment and resources to complete the activity
 - explain procedures and expected outcomes of the activity to traders and managers
- accessing, transporting, setting up, validating, using and maintaining a range of test equipment and reference standards
- identifying and evaluating environmental impacts on a wide range of reference standards
- performing calculations involving:
 - fractions, decimals, ratios, proportions and percentages
 - scientific notation, correct units and the correct number of significant figures
 - interpretation of statistical quantities, such as mean, median, mode, range, variance and standard deviation
- organising large reference standards to be dispatched ahead of visit to trader's premises
- planning routine tasks
- demonstrating professionalism and maintaining the rights of the trader at all times
- solving routine/expected problems
- working safely which may include applying basic first aid, confined space entry

REQUIRED SKILLS AND KNOWLEDGE

and working with heavy machinery

Required knowledge

- general physical principles and concepts including weight, mass, gravity, density, volume, length and area
- Australian legal units of measurement
- organisations involved in legal metrology in Australia
- hierarchy of reference standards in relation to legal metrology
- purpose of Certificates of Verification issued under the national measurement legislation
- metrological terms such as: maximum permissible errors, maximum permissible variations, traceability, uncertainty
- information in graphs and tables within Certificates
- application of different classes of reference standards used to inspect/verify trade measurement instruments
- transport/storage specifications and procedures for test/specialised equipment and reference standards
- variations from transport/storage specifications and procedures requiring appropriate approval
- maintenance and calibration procedures for reference standards used in job role
- maintenance required for test equipment when manufacturer's requirements are unavailable
- actions to be taken where legal traceability can not be confirmed
- actions to be taken if reference standards and test equipment are found to be defective
- procedures for recording and reporting faults
- maintenance requirements for reference standards and test equipment
- knowledge of the operating procedures across a range of environments such as laboratories, retail, commercial, office, manufacturing, industrial, mining, construction, medical, chemical, petroleum, farming and abattoirs
- detailed knowledge of National Test Procedures and operating procedures for equipment and reference standards used in job role including:
 - purpose of test
 - test conditions and possible environmental impacts on performance of the instrument
 - key preparation/measurement steps in test method
 - calculation steps to give results in appropriate units and precision
 - maximum permissible errors for instruments under test
- workplace, health and safety requirements relating to personnel, reference standards, measuring instruments and test equipment
- basic first aid and site safety induction if required

Evidence Guide

EVIDENCE GUIDE	
<p>The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
Overview of assessment	<p>Competency must be demonstrated in the ability to perform consistently at the required standard using reference standards relevant to job role.</p>
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>Assessors should ensure that candidates can:</p> <ul style="list-style-type: none"> • identify, access and apply relevant test procedures • select and use suitable reference standards • maintain the integrity of reference standards during their transport, storage and use • determine whether reference standards are defective • validate the suitability of reference standards for activities relevant to job role • maintain the security and confidentiality of data in accordance with organisational and regulatory requirements • report results in the required formats and expected timeframe.
Context of and specific resources for assessment	<p>This unit of competency is to be assessed in the workplace or simulated workplace environment.</p> <p>This unit of competency may be assessed with the following units:</p> <ul style="list-style-type: none"> • MSATM units dealing with the inspection or verification of trade measurement instruments and inspection of trading practices and pre-packaged products. <p>Resources may include:</p> <ul style="list-style-type: none"> • reference standards • computer and relevant software and/or organisation information management system • Certificates of Verification • relevant legislative and organisational procedures.
Method of assessment	<p>The following assessment methods are suggested:</p> <ul style="list-style-type: none"> • questions to assess understanding of relevant procedures, trader obligations and remedial actions • review of maintenance records prepared or

EVIDENCE GUIDE

	<p>maintained by the candidate</p> <ul style="list-style-type: none"> • feedback from supervisors and peers regarding the candidate's ability to use and maintain reference standards in accordance with legislative and organisation's procedures • observation of the candidate using and maintaining reference standards to complete trade measurement activities. <p>In all cases, practical assessment should be supported by questions to assess underpinning knowledge and those aspects of competency which are difficult to assess directly. Questioning techniques should suit the language and literacy levels of the candidate.</p>
This competency in practice	<p>Industry representatives have provided the case studies below to illustrate the practical application of this unit of competency and to show its relevance in a workplace setting.</p> <p>An inspector is allocated a routine inspection of a hardware store. In preparation, the inspector locates the trader's file and notes that the company sells a variety of items by measurement using scales, rulers and volume measures. Using the organisation's checklist for inspecting this type of business, he/she identifies the reference standards and documentation required for the inspection. He/she confirms that the selected reference standards are suitable for the intended purpose, are currently verified and are not damaged before stowing them safely in his/her vehicle for transport to the hardware store. On arrival, the inspector meets the site controller and initiates the inspection in accordance with the organisation's standard procedures. The inspector collects the reference standards, test equipment and documentation from the vehicle. The standards include: masses to test a weighing instrument, a volume measure to test a 5 L measure for selling kerosene, a measure of length to test packages of rope, a density bottle to determine the density of turpentine for checking packages and a thermometer to measure the temperature of the density bottle and make appropriate temperature corrections. Before using the reference standards, the inspector confirms the expected outcomes for each activity, reviews the Certificates of Verification and conditions the volume reference standards as required.</p>

EVIDENCE GUIDE

After each activity, the inspector assesses the results against the prescribed performance criteria and analyses any variances from the expected outcomes to identify any problems that may be linked to the reference standard or its use. At the end of the visit, the inspector cleans the reference standards, returns them to the vehicle and re-stows them safely to maintain their integrity. On returning to the office, the inspector books the masses into the measurement standards laboratory for calibration as their Certificate of Verification is due to expire in 22 days.

A verifier is contacted by a local service station to repair and verify two of their fuel dispensers that had been recently rejected for trade use by an inspector. Before proceeding to the service station, the verifier asks the trader some questions and establishes that one fuel dispenser has a flow rate of ≤ 60 L/min and another has a flow rate ≥ 60 L/min. The verifier consults the National Test Procedure for fuel dispensers and identifies that he/she needs both a 15 L and 200 L volume reference standard to complete this work. In preparation for the visit, the verifier checks whether the reference standards are suitable, they have a current Verification Certificate and are not damaged. This examination reveals that the Certificate for the 200 L reference standard he/she intends to use has expired. He/she immediately books the measure into the measurement standards laboratory for calibration and arranges for a replacement measure with a current Certificate. Before travelling to the service station, the verifier stores the reference standards in the vehicle in accordance with standard operating procedures. On arrival, the verifier takes the time to introduce him/herself to the site controller, complete a site safety induction and outline a test strategy that is both safe and will cause minimal disruption to the trader. The verifier collects the reference standards, test equipment and documentation from the vehicle. Before using the volume measures, he/she reviews their respective Certificates of Verification and notes that there are different drainage requirements for each measure. After repairing the fuel dispensers, the verifier tests the fuel dispensers in accordance with the appropriate National Test Procedure. He/she makes sure to use the volume reference standards

EVIDENCE GUIDE	
	<p>in a manner that is consistent with the requirements set out in the Certificate of Verification and the organisation's procedures to maintain the integrity of the measurements. After completing the repairs and testing, the verifier cleans the reference standards and re-stows them in the vehicle.</p>

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<p>Appropriate documentation</p>	<p>Where reference is made to documentation, it is expected the latest version will be used.</p> <p>Appropriate documentation may include:</p> <ul style="list-style-type: none"> • reference standard Certificates of Verification • test procedures for inspecting measuring instruments, pre-packaged products and trading practices • organisational test reports • organisational procedures e.g. company quality assurance manual • National Measurement Act • occupational health and safety (OHS) regulations, guidelines and procedures • material data safety sheets • equipment manuals and warranty, supplier catalogues and handbooks

MSATMVER403A Verify inspector's class reference standards

Modification History

Not applicable.

Unit Descriptor

<p>Unit descriptor</p>	<p>This unit of competency covers the ability to calibrate reference standards to the inspector's class level in accordance with standard calibration procedures. These procedures specify all associated reference standards, equipment and methods to be used and the required parameters, quantities and ranges to be tested, including the criteria for validation or rejection. Standard calibration procedures are sometimes complex and lengthy but must be carried out in a methodical and standard manner. Personnel are not permitted to deviate from explicit instructions in any manner, nor modify the procedure, nor substitute alternative equipment.</p>
-------------------------------	--

Application of the Unit

<p>Application of the unit</p>	<p>This unit of competency is applicable to laboratory and calibration technicians who carry out testing and/or calibrations using standard calibration methods in National Association of Testing Authorities (NATA) accredited laboratories. They work under limited supervision and their results are interpreted and checked by the laboratory supervisor, quality officer or designated signatory.</p> <p>Industry representatives have provided case studies to illustrate the practical application of this unit of competency and to show its relevance in a workplace setting. These are found at the end of this unit of competency under the section 'This competency in practice'.</p>

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Receive and schedule inspector's class reference standards for calibration	1.1. Identify the level of verification required by the client 1.2. Evaluate and implement appropriate strategies where the standard's suitability for purpose does not meet client expectations 1.3. Enter details for the inspector's class reference standard into the organisation's information management system and apply appropriate tracking mechanisms 1.4. Process 'urgent' calibration requests according to the organisation's policy and procedures 1.5. Maintain confidentiality of all client and organisation data and information 1.6. Ensure that information provided to clients is accurate, relevant and authorised for release 1.7. Deal with customers politely, efficiently and in accordance with organisational policy and procedures
2. Prepare for calibration	2.1. Identify and access the appropriate procedure for the calibration in accordance with organisational policy and procedures 2.2. Identify possible sources of measurement error during calibration and implement appropriate control strategies 2.3. Condition inspector's class reference standards and high order reference standards in accordance with calibration and organisational procedures where applicable 2.4. Identify hazards and use the specified personal protective equipment, safety equipment and procedures 2.5. Evaluate the suitability of high order reference standards and measuring equipment selected for the calibration against the organisation's specification requirements and calibration procedure 2.6. Document calibration status, report out-of-calibration test equipment/high order reference standards and quarantine where required
3. Perform calibration	3.1. Assess the design and appearance of an inspector's class reference standard against prescribed standards 3.2. Perform calibration without variance according to the documented procedure to ensure repeatability of

ELEMENT	PERFORMANCE CRITERIA
	<p>measurement</p> <p>3.3. Confirm readings are the result of a valid measurement and record data as required</p> <p>3.4. Adjust inspector's class reference standard if applicable</p>
4. Analyse and report calibration results	<p>4.1. Estimate and document uncertainty of measurement in accordance with organisation's policy and procedures, if required</p> <p>4.2. Identify prescribed performance criteria for the inspector's class reference standard and evaluate against calibration results</p> <p>4.3. Analyse calibration results to confirm they are within the maximum permissible variation and uncertainty for the scope of calibration</p> <p>4.4. Analyse any variances from the performance criteria to identify isolated or systemic problems with the inspector's class reference standards or calibration procedure</p> <p>4.5. Record the results of each test/calibration accurately, unambiguously and objectively</p>
5. Finalise calibration	<p>5.1. Attach calibration labels, equipment stickers, quality control tags and tamper resistant seals as required by the organisation's procedures</p> <p>5.2. Prepare and submit to the laboratory supervisor a final report on the calibration detailing procedure, traceability, results and all other required information</p> <p>5.3. Store test equipment/high order reference standards and calibration records in accordance with organisational policy and procedures</p> <p>5.4. Identify and report unserviceable equipment or high order reference standards to the laboratory supervisor</p> <p>5.5. Clean equipment and high order reference standards in accordance with organisational policy and procedures</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- accessing, interpreting and applying a range of documents for the verification of reference standards including:
 - national measurement legislation
 - National Measurement Institute laboratory operating procedures
 - National Measurement Institute monographs
- accessing and interpreting Certificates of Verification for a range of higher order reference standards
- maintaining very close attention to procedures, accuracy and precision of measurement to ensure integrity of test/calibration results (especially during lengthy tests)
- examining each calibration step critically to ensure repeatability and validity of data
- selecting, setting up, validating, using and maintaining a range of balances and reference standards
- operating test equipment correctly and safely
- applying all relevant procedures and regulatory requirements to ensure the quality and integrity of the services or data provided
- conducting tests and recording results with close attention to detail and accuracy
- performing calculations involving:
 - fractions, decimals, ratios, proportions and percentages
 - scientific notation, correct units and the correct number of significant figures
 - interpretation of statistical quantities, such as mean, median, mode, range, variance and standard deviation
- recognising problems or departures in systems and documentation and initiating actions to prevent or minimise them
- preparing test/calibration documentation that is accurate and complies with requirements
- recognising and reporting opportunities for improvements to procedures
- planning routine tasks
- solving routine/expected problems
- working safely which may include applying basic first aid

Required knowledge

- understanding of the purpose of metrology and calibration, including common terminology, concepts, principles, procedures and applications
- detailed knowledge of specific metrology terms and principles such as uncertainty, maximum permissible variations, traceability and legal requirements for

REQUIRED SKILLS AND KNOWLEDGE

traceability

- NATA's and the National Measurement Institute's role in the measurement and testing system in Australia, measurement standards laboratories
- requirements for the competence of testing and calibration laboratories (for example, AS ISO/IEC 17025) as they affect job role and responsibilities
- national measurement legislation applicable to verification of inspector's class reference standards
- selection and application of appropriate test methods and calibration procedures
- hierarchy and appropriate selection of reference instruments
- detailed knowledge of calibration procedures (equipment, measurement steps, test conditions, environmental impacts, calculations, uncertainty treatment) to give results in appropriate accuracy, precision and units
- use of calibration and correction charts
- methods for statistical analysis (means, ranges, standard deviations) and estimation of uncertainty of measurement (may include the use of software)
- non-conformance/non-compliance procedures and protocols associated with equipment, reference material and calibration procedures
- troubleshooting procedures for equipment and test methods
- handling, transport, storage and operation of reference and working standards
- laboratory environmental control requirements
- organisation's policy and procedures for verifying inspector's class reference standards
- lines of communication, reporting procedures and legislative requirements
- relevant health, safety and environmental requirements safety principles and procedures relevant test environment, basic first aid and site safety induction if required

Evidence Guide

EVIDENCE GUIDE	
<p>The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
Overview of assessment	<p>Competency must be demonstrated in the ability to perform consistently at the required standard for any inspector's class reference standards listed in the Range Statement.</p>
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>Assessors should ensure that candidates can:</p> <ul style="list-style-type: none"> • identify, access and apply calibration procedures • identify and use high order reference standards of measurement • evaluate and adjust the impact of the operating environment on the results of the calibration • identify the scope of a calibration and compare results with expected outcomes • maintain the security and confidentiality of data in accordance with organisational and regulatory requirements • report results in the required formats and expected timeframe.
Context of and specific resources for assessment	<p>This unit of competency is to be assessed in the workplace or simulated workplace environment.</p> <p>This unit of competency may be assessed with:</p> <ul style="list-style-type: none"> • MSATMREF301A Use and maintain reference standards. <p>Resources may include:</p> <ul style="list-style-type: none"> • reference standards, balances, weighing instruments and test equipment • computer and relevant software and/or organisation information management system • National Measurement Institute laboratory operating procedures • relevant legislative and organisational procedures.
Method of assessment	<p>The following assessment methods are suggested:</p> <ul style="list-style-type: none"> • questions to assess understanding of relevant metrology/calibration terms, principles and procedures

EVIDENCE GUIDE

	<ul style="list-style-type: none"> • review of calibration reports prepared by the candidate • feedback from supervisors and peers regarding the candidate's ability to verify inspector's class reference standards in accordance with legislative and organisational procedures • observation of the candidate calibrating inspector's class reference standards. <p>In all cases, practical assessment should be supported by questions to assess underpinning knowledge and those aspects of competency which are difficult to assess directly. Questioning techniques should suit the language and literacy levels of the candidate.</p>
This competency in practice	<p>Industry representatives have provided the case studies below to illustrate the practical application of this unit of competency and to show its relevance in a workplace setting.</p> <p>A customer delivers a 200 L Inspectors Class 1 Volume measure for calibration. Personnel in the laboratory's item reception area log the job and the laboratory supervisor assigns it to a calibration technician. He/she reads the work order and retrieves the approved calibration procedure. The procedure requires the measure to be tested gravimetrically. The technician accesses and validates the test equipment and high order reference standards. The density of the town water supply is determined using a verified hydrometer. The measure is visually inspected for defects and contamination. The volume of the measure is determined three times by filling the measure with town water to the capacity mark, recording the temperature of the water and recording the mass of water. This data is used, in conjunction with the town water density (determined previously) and thermal appropriate expansion/buoyancy corrections, to calculate the actual volume of the measure. The technician notes that some values are outside the allowable tolerance and adjustments will have to be made. He/she takes another set of readings after making the necessary adjustments and records them on the report. The technician applies the required calibration marks to the measure, updates the database, produces a test report and places the item in the despatch area for inspection by the supervisor. The supervisor</p>

EVIDENCE GUIDE	
	visually inspects the item and checks the calibration data on the report. The job has taken four hours to complete.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Appropriate documentation

Where reference is made to documentation, it is expected the latest version will be used.

Appropriate documentation may include:

- high order reference standard Certificates of Verification
- test methods, calibration procedures and monographs (validated and authorised)
- organisational test reports
- organisational procedures e.g. company quality assurance manual
- National Measurement Institute laboratory operating procedures
- National Measurement Act
- occupational health and safety (OHS) regulations, guidelines and procedures
- equipment manuals and warranty, supplier catalogues and handbooks
- quality manuals, equipment and operating/technical manuals
- enterprise recording and reporting procedures and standard operating procedures (SOPs)

Hazards

Hazards may include:

- electric shock
- disturbance or interruption of services
- manual handling of heavy equipment boxes

Safety procedures

Safety procedures may include:

- use of personal protective equipment, such as hearing protection, gloves, safety glasses and coveralls
- ensuring access to service shut-off points
- regular cleaning of equipment and work areas

RANGE STATEMENT	
Inspectors Class Reference standards	Inspectors Class Reference standards may include: <ul style="list-style-type: none"> • inspector's class of reference standards as defined in the National Measurement Regulations
Operating procedures	Operating procedures may include: <ul style="list-style-type: none"> • manufacturers' specifications • industry guidelines • Australian standards • procedures and guidelines based on national measurement legislation
Legislation	Legislation may include: <ul style="list-style-type: none"> • national measurement legislation • applicable Commonwealth, state and territory OHS legislation
OHS and environmental management requirements	OHS and environmental management requirements refer to: <ul style="list-style-type: none"> • all operations must comply with enterprise OHS and environmental management requirements, which may be imposed through state/territory or Federal legislation. These requirements must not be compromised at any time • where relevant, users should access and apply current industry understanding of infection control issued by the National Health and Medical Research Council and State and Territory Departments of Health
Operating environmental impacts	Operating environmental impacts may include: <ul style="list-style-type: none"> • vibration • wind • heat • dust • electromagnetic interference • out of level • liquid being measured
Records	Records may include: <ul style="list-style-type: none"> • test reports • safety procedures

RANGE STATEMENT	
	<ul style="list-style-type: none"> a history of equipment calibration and test results
Standard calibrations	<p>Standard calibrations may involve testing and/or calibrating the following equipment and reference materials using standard methods and procedures:</p> <ul style="list-style-type: none"> common types of test equipment such as balances, calipers, masses, micrometers, tape measures, rules, temperature (digital) indicating systems, thermometers, timing devices, weighing instruments and volume measures

Co-requisite units

Co-requisite units		

MSL904001A Perform standard calibrations

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	This unit of competency covers the ability to calibrate test and measurement equipment in accordance with standard calibration procedures and documented test methods. These procedures/methods specify all associated reference standards, materials, equipment and methods to be used and the required parameters or quantities and ranges to be tested, including the criteria for rejection or approval.
------------------------	--

Application of the Unit

Application of the unit	<p>This unit of competency is applicable to laboratory and calibration technicians who carry out tests and/or calibrations using standard calibration methods in first, second and third party laboratories, and laboratories where testing and/or calibration forms part of inspection or product certification. Personnel are not permitted to deviate from explicit instructions in any manner, modify the procedure, nor substitute alternative equipment. They work under limited supervision and results of their work are interpreted and checked by the laboratory supervisor, quality inspector or designated signatory.</p> <p>Industry representatives have provided case studies to illustrate the practical application of this unit of competency and to show its relevance in a workplace setting. These are found at the end of this unit of competency under the section 'This competency in practice'.</p>

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare items for calibration	1.1. Select the authorised calibration procedure in accordance with enterprise procedures 1.2. Identify hazards and use appropriate personal protective equipment, safety equipment and procedures 1.3. Confirm all measuring equipment meets the laboratory's specification requirements and complies fully with the calibration procedure 1.4. Assemble and set up specified reference standards and associated equipment prior to testing 1.5. Verify performance of reference standards and measuring equipment prior to use and adjust or calibrate as necessary 1.6. Identify and minimise potential sources of measurement error
2. Perform calibration	2.1. Perform individual tests without variance according to the documented procedure to ensure repeatability of measurement 2.2. Confirm readings are the result of a valid measurement and record data as required (as-found or before adjustment) 2.3. Adjust device under test to bring readings within specification and record data (as-left or after adjustment) if required 2.4. Analyse resulting test data to detect trends or inconsistencies that would significantly affect the accuracy or validity of test results 2.5. Seek appropriate advice when interpretation of results is outside authorised scope of approval
3. Document results	3.1. Document compliance/non-compliance with requirements of test and/or specifications 3.2. Estimate and document uncertainty of measurement in accordance with enterprise procedures, if required 3.3. Record the results of each test/calibration accurately, unambiguously and objectively 3.4. Ensure confidentiality of enterprise information
4. Finalise calibration	4.1. Prepare and issue a final report on the job/item detailing testing carried out, traceability, statement of compliance and relevant information as required 4.2. Report any non-compliance and verify next course of

ELEMENT	PERFORMANCE CRITERIA
	action with supervisor 4.3. Attach calibration labels, equipment stickers, quality control tags and tamper resistant seals as required in enterprise procedures 4.4. Store test equipment/measurement standards and results in accordance with enterprise procedures

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Required skills include:

- selecting and applying appropriate test methods and calibration procedures
- maintaining close attention to procedures, accuracy and precision of measurement to ensure the integrity of test/calibration results
- using calibration and correction charts
- calculating to give results in appropriate accuracy, precision and units
- preparing test/calibration documentation that is accurate and complies with requirements
- operating equipment correctly and safely
- recognising problems or departures in systems and documentation and initiating actions to prevent or minimise them
- recognising and report opportunities for improvements to procedures

Required knowledge

Required knowledge includes:

- purpose of metrology and calibration, including common terminology, concepts, principles, procedures, and applications
- National Association of Testing Authority's (NATA) and National Measurements Institute's (NMI) role in the measurement and testing system in Australia
- traceability, including legal requirements for traceability
- requirements for the competence of testing and calibration laboratories (e.g. AS ISO/IEC 17025) as they affect job role and responsibilities
- hierarchy and appropriate selection of reference materials and instruments
- non-conformance/non-compliance procedures and protocols associated with equipment, reference material and calibration procedures
- troubleshooting procedures for equipment and test methods
- methods for statistical analysis (means, ranges and standard deviations) and estimation of uncertainty of measurement (may include the use of software)
- reporting procedures and legislative requirements
- handling, transport, storage and operation of reference and working standards
- laboratory environmental control requirements
- relevant health, safety and environmental requirements
- layout of the enterprise, divisions and laboratory
- organisational structure of the enterprise
- lines of communication
- role of laboratory services for the enterprise and customers

REQUIRED SKILLS AND KNOWLEDGE

Specific calibration fields

Additional knowledge requirements may apply for different calibration fields. For example, testing and calibrations conducted in the following:

- acoustic and vibration measurement
- chemical testing
- construction materials testing
- electrical testing
- heat and temperature measurement
- mechanical testing
- metrology
- non-destructive testing
- optics and radiometry
- pressure measurements

Evidence Guide

EVIDENCE GUIDE	
<p>The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>Assessors should ensure that candidates can:</p> <ul style="list-style-type: none"> • maintain very close attention to procedures, accuracy and precision of measurement to ensure integrity of test/calibration results (especially during lengthy tests) • critically examine each calibration step to ensure repeatability and validity of data • apply all relevant procedures and regulatory requirements to ensure the quality and integrity of the services or data provided • prepare test/calibration documentation that is accurate and complies with requirements • operate equipment correctly and safely • recognise problems or departures in systems and documentation and initiate actions to prevent or minimise them • recognise and report opportunities for improvements to procedures.
Context of and specific resources for assessment	<p>This unit of competency is to be assessed in the workplace or simulated workplace environment.</p> <p>This unit of competency may be assessed with:</p> <ul style="list-style-type: none"> • <i>MSL924001 Process and interpret data</i> • <i>relevant MSL974000 series unit of competency</i> • <i>relevant MSL975000 series unit of competency.</i> <p>Resources may include:</p> <ul style="list-style-type: none"> • specialised calibration/test equipment, reference standards and laboratory facilities • access to a library of calibration methods, procedures and equipment specifications • enterprise quality manual and procedures.
Method of assessment	<p>The following assessment methods are suggested:</p> <ul style="list-style-type: none"> • review of calibration results, uncertainty calculations and workplace documentation completed by the

EVIDENCE GUIDE

	<p>candidate</p> <ul style="list-style-type: none"> • feedback from supervisors and/or customers regarding quality of calibration services provided by the candidate • observation of the candidate performing standard calibrations • oral or written questioning to check underpinning knowledge of standard calibration procedures. <p>In all cases, practical assessment should be supported by questions to assess underpinning knowledge and those aspects of competency which are difficult to assess directly.</p> <p>Where applicable, reasonable adjustment must be made to work environments and training situations to accommodate ethnicity, age, gender, demographics and disability.</p> <p>Access must be provided to appropriate learning and/or assessment support when required.</p> <p>The language, literacy and numeracy demands of assessment should not be greater than those required to undertake the unit of competency in a work like environment.</p>
This competency in practice	<p>Industry representatives have provided the case studies below to illustrate the practical application of this unit of competency and to show its relevance in a workplace setting.</p> <p>Background</p> <p>Calibration work may be simple or highly complex depending upon the type of equipment being calibrated and the accuracy or uncertainties required. Manual calibrations may involve interconnecting equipment and setting the stimulus devices to the settings listed in the procedure. At each setting, the technician must verify that the response or output of the unit under test (UUT) is within the tolerances specified in the procedure. In addition, many procedures require that 'as-found' (before adjustment) and 'as-left' (after adjustment) results are recorded for maintaining the UUT documentation history.</p> <p>Often calibration technicians must assess and document the total uncertainties for a given measurement by analysing equipment specifications and methodology</p>

EVIDENCE GUIDE

during calibration. They have to interpret specifications and technical information and demonstrate initiative when adjusting and repairing instruments.

The calibration technician's workload can be routine and repetitive. A perpetual backlog of work and the constant need to reduce turn-around-time to meet client demands, coupled with enterprise productivity goals, can induce stress and mental fatigue if not carefully managed. However, it is essential that all personnel are able to perform tests and associated work tasks without undue pressure that might influence technical judgement if 'integrity of measurement' is to be retained. Errors arising from items incorrectly calibrated will, at best, have to be recalled which wastes time, resources and destabilises enterprise credibility. At worst, if undetected, they may have severe safety implications to personnel or equipment, depending on the nature of the item.

Calibration (1)

A customer delivers a test pressure gauge and requires certification that the gauge conforms to manufacturer's specifications. Personnel in the item reception area log the job and the laboratory supervisor assigns it to a calibration technician. He/she reads the work order and retrieves the approved calibration procedure. The procedure requires the customer's gauge to be tested to 1000 kPa using a hydraulic test station. The technician assembles the required apparatus and personal protective equipment. The gauge is visually inspected for defects and contamination. The temperature of the environment is checked and the hydraulic test station confirmed as fully operational. The required pressures are applied to the gauge and the indicated readings are transcribed onto the test report. The technician notes that some readings are outside the allowable tolerance and adjustments will have to be made. He/she takes another set of readings after making the necessary adjustments and records them on the report. The technician applies the required labels to the gauge, updates the database, produces a test report and places the item on the quality assurance bench for inspection by the supervisor. The supervisor visually inspects the item and checks the readings on the report. The job has taken two hours to complete.

Calibration (2)

A client has asked the laboratory to calibrate a spectrum

EVIDENCE GUIDE

analyser to manufacturer's specification. The supervisor assigns the job to a calibration technician who reads the job sheet and locates the appropriate calibration procedure. Although this spectrum analyser will be calibrated partly with the aid of automated technology, the technician estimates that the calibration will still take about nine hours to complete. The technician reads the procedure and assembles the equipment and allows for the required warm-up time for instrument stabilisation. Possible sources of error are minimised by cleaning connectors and tensioning them with the torque spanner. The technician performs the manual phase of the test and manually records 12 pages of results. The equipment is reconnected for the automated part of the procedure the test recommenced. The technician produces a further six pages of results. These are assessed for errors and non-conformances and all calculations are carefully checked. A final report is produced which accompanies the spectrum analyser to the quality assurance bench for checking by the supervisor. All cables and equipment used for the calibration are returned to the store.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Codes of practice

Where reference is made to industry codes of practice, and/or Australian/international standards, it is expected the latest version will be used

Standards, codes, procedures and/or enterprise requirements

Standards, codes, procedures and/or enterprise procedures may include:

- Australian and international standards, such as:
 - AS ISO 17025-2005 General requirements for the competence of testing and calibration laboratories
 - AS/NZS ISO 9001:2008 Quality management systems - Requirements
 - AS/NZS ISO 10005:2006 Quality management systems - Guidelines for quality plans
 - AS/NZS ISO 10012:2004 Quality assurance requirements for measurement equipment
 - ISO 5725 Accuracy (trueness and precision) of measurement methods and results
 - ISO/IEC Guide 98-3:2008 Uncertainty of measurement - Part 3 Guide to the expression of uncertainty in measurement (GUM)
- Eurachem/CITAC Guide CG4 Quantifying uncertainty in analytical measurement
- material safety data sheets (MSDS)
- enterprise recording and reporting procedures and standard operating procedures (SOPs)
- quality manuals, equipment and operating/technical manuals
- test methods and calibration procedures (validated and authorised)
- test methods and calibration procedures

RANGE STATEMENT	
	<p>published by international, national or regional standards, reputable technical organisations, scientific texts or journals and equipment manufacturers</p> <ul style="list-style-type: none"> • incident and accident/injury reports • schematics, work flows, laboratory layouts and production and laboratory schedules
Standard calibrations	<p>Standard calibrations may include testing and/or calibrating the following equipment and reference materials using standard methods and procedures:</p> <ul style="list-style-type: none"> • test equipment, such as anemometers, balances, barometers, calipers, environmental chambers, hygrometers, manometers, masses, micrometers, pressure equipment, spectrophotometers, tape measures, rules, temperature (digital) indicating systems, thermometers, thermocouples, timing devices, vibration analysis equipment and weighing instruments • electrical reference standards, such as air-lines, analogue meters, attenuators, bridges-manual balance, capacitors, DC voltage references, digital instruments (calibrators, DMMs, electronic transfer standards), inductors, instrument and ratio transformers, instrument transformer test sets, potentiometers, resistors, radio frequency (RF) power meters, RF thermistor mounts and thermal converters, shunts, time interval and frequency standards, transfer standards AC-DC, voltage dividers, volt ratio boxes and watt-hour references • working standards, instruments and testing equipment, such as electromagnetic compatibility (EMC) test equipment, field strength meters, flammability test equipment, gauges/test fingers/test pins, hipot testers, impact hammers, impulse testers, instrument calibrators, network analysers, signal generators and spectrum and harmonic analysers

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Retrieve and check data	1.1.Store and retrieve data using appropriate files and/or application software 1.2.Verify the quality of data using enterprise procedures 1.3.Rectify errors in data using enterprise procedures
2. Calculate scientific quantities	2.1.Calculate statistical values for given data 2.2.Calculate scientific quantities using given formulae and data and estimate uncertainties 2.3.Ensure calculated quantities are consistent with estimations and expectations 2.4.Report all calculated quantities using the appropriate units and correct number of significant figures
3. Present data in tables, charts and graphs	3.1.Present data in clearly labelled tables and charts 3.2.Graph data using appropriate scales to span the range of data or display trends 3.3.Report all data using the appropriate units and number of significant figures
4. Interpret data in tables, charts and graphs	4.1.Interpret significant features of graphs, such as gradients, intercepts, maximum and minimum values, and limit lines 4.2.Recognise and report trends in data
5. Keep accurate records and maintain confidentiality	5.1.Transcribe information accurately 5.2.Verify the accuracy of records following enterprise procedures 5.3.File and store workplace records in accordance with enterprise procedures 5.4.File all reference documents logically and keep them up-to-date and secured 5.5.Observe enterprise confidentiality standards

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Required skills include:

- performing calculations of scientific quantities
- using scientific notation
- applying the concepts of metrology
- applying calculations to the workplace
- coding, recording and checking of data accurately
- presenting accurate results in the required format
- preparing graphs, tables and charts (pie, bar, histogram) and interpreting trends
- preparing and interpreting process control charts
- maintaining the confidentiality of data in accordance with workplace and regulatory requirements

Required knowledge

Required knowledge includes:

- concepts of metrology
- the international system of units (SI)
- relevant scientific and technical terminology
- uncertainty associated with measurement steps
- procedures for coding, entering, storing, retrieving and communicating data
- procedures for verifying data and rectifying mistakes
- converting units involving multiples and submultiples
- significant figures, rounding off, estimating, approximating
- transposing and evaluating formulae
- calculations involving fractions, decimals, proportions and percent
- determining statistical values of data such as mean, median, mode and standard deviation
- procedures for maintaining and filing records, and maintaining security of data

Evidence Guide

EVIDENCE GUIDE	
<p>The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>Assessors should ensure that candidates can:</p> <ul style="list-style-type: none"> • code, record and check the documentation of data • calculate scientific and statistical quantities relevant to the workplace and present accurate results in the required format • recognise anomalies and trends in data • maintain the confidentiality of data in accordance with workplace and regulatory requirements • keep records up-to-date and secure.
Context of and specific resources for assessment	<p>This unit of competency is to be assessed in the workplace or simulated workplace environment.</p> <p>This unit of competency may be assessed with:</p> <ul style="list-style-type: none"> • <i>MSL924002A Use laboratory application software</i> • technical units, such as: <ul style="list-style-type: none"> • <i>relevant MSL973000 series units of competency</i> • <i>relevant MSL974000 series units of competency.</i> <p>Resources may include:</p> <ul style="list-style-type: none"> • data sets and records • computer and relevant software or laboratory information system • relevant workplace procedures.
Method of assessment	<p>The following assessment methods are suggested:</p> <ul style="list-style-type: none"> • review of data worksheets, calculations, computer files (such as spreadsheets, databases, statistical analysis), graphs, tables and/or charts prepared by the candidate • review of records transcribed, maintained or stored by the candidate • feedback from supervisors and peers • questions to assess understanding of relevant procedures and trends in data • observation of the candidate as they process data, file

EVIDENCE GUIDE	
	<p>and store records.</p> <p>In all cases, practical assessment should be supported by questions to assess underpinning knowledge and those aspects of competency which are difficult to assess directly.</p> <p>Where applicable, reasonable adjustment must be made to work environments and training situations to accommodate ethnicity, age, gender, demographics and disability.</p> <p>Access must be provided to appropriate learning and/or assessment support when required.</p> <p>The language, literacy and numeracy demands of assessment should not be greater than those required to undertake the unit of competency in a work like environment.</p>
This competency in practice	<p>Industry representatives have provided the case studies below to illustrate the practical application of this unit of competency and to show its relevance in a workplace setting.</p> <p>Manufacturing</p> <p>A laboratory assistant in a materials testing laboratory was performing routine tensile tests on samples of vinyl sheet. The assistant converted the readings from the machine to appropriate units using a simple calculation and recorded them in the logbook for that test method. After comparing these test results with previous results for the same type of vinyl material, the assistant found that the tensile strength was within the required range. However, it was at the lower rather than the upper end of the range as in previous testing. The assistant discussed the results with the laboratory supervisor. The calibration file for that machine showed that it had been calibrated four months previously and had not needed adjustment. Test results for the same period showed that the machine was giving lower than normal tensile strength readings for the few higher strength materials tested over the last two months. The assistant did some more checks and confirmed this trend. The machine was re-calibrated by the instrument company and the frequency of internal calibration checks by the laboratory assistant was increased. This problem would not have been detected or corrected as quickly without the assistant's initiative and competent recording and retrieval of test results and</p>

EVIDENCE GUIDE

calibration information.

Biomedical

A technical assistant works in a team with laboratory scientists and technical officers. Analyses of electrolytes are routine and occur in large volume throughput even in this small diagnostic laboratory. The assistant is assigned tasks that contribute to the overall production of results, their reporting and the quality control evaluation of the results. One task is the daily collection of the electrolyte analyses from the internal quality control area. In this case, the technical assistant plots the results on a Levy-Jennings graph and computes the mean value. The assistant reports immediately to the supervisor if the plots show deviations which indicate out-of-control results.

Food processing

Cooking and holding temperatures greatly affect the nutrient composition of processed foods. The CSIRO provides documentation of nutrient losses with temperature variations. For cooked foods, there is the added problem of microbial growth in the so called 'danger zone'. In one laboratory, the technical assistant conducts simple testing of foods using a temperature probe and also measures the temperature of the storage areas, holding trays or bainmaries and individual tray units. Careful documentation of the temperatures of the foods and times of measurement must be kept. The technical assistant supplies the data as tables and a plot of temperature versus time. For quality control purposes, the assistant is directed to use a cross reference of mercury thermometer readings versus probe measurements for ambient temperature. The assistant plots the thermometer readings against the probe readings and reports to the supervisor if the plot shows a slope other than the defined value.

Range Statement

RANGE STATEMENT	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Access application software	1.1. Identify software required for the task 1.2. Open software from a personal computer or network terminal
2. Use software for specified purposes	2.1. Input a range of scientific data into a computing system 2.2. Conduct searches for the retrieval of required data 2.3. Use application features for efficient computation 2.4. Construct data sets and databases for numerical and graphical analyses
3. Produce reports of retrieved data and/or processed data	3.1. Analyse data using features of the software package 3.2. Select options for constructing data reports 3.3. Print the results of data analyses using features of the software package 3.4. Integrate data from diverse application software units in a report 3.5. Report the outcomes and rationale for computerised database searches where appropriate 3.6. Reference computerised data sources according to the style requirements of the enterprise
4. Perform simple record housekeeping	4.1. Backup worked data according to enterprise standard procedures 4.2. Maintain archive data according to enterprise standard procedures 4.3. Maintain hard copy data according to standard enterprise operating procedures 4.4. Apply approved antivirus software and general standard quarantine procedures

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Required skills include:

- using software application features and instructions to input, save, analyse, sort, retrieve and display the records or data
- using software for the analysis, reporting and management of laboratory and field data and information
- using in-house software manuals to augment skills and solve operational problems
- selecting the most appropriate software package for the task
- backing up electronic storage
- using scanning software to protect in-house software and data

Required knowledge

Required knowledge includes:

- applications of the software package
- terminology associated with the software packages
- basic knowledge of the types of spreadsheet, database, data analysis packages that are available
- application of specific software package features to relevant laboratory tasks
- relationship between the protocol for data input and file storage of the data
- general file and record maintenance
- relevant health, safety and environment requirements

Evidence Guide

EVIDENCE GUIDE	
<p>The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>Assessors should ensure that candidates can:</p> <ul style="list-style-type: none"> • select the most appropriate software package for the task from the suite of software applications available • use routine instruction sets of the software package to complete the task • use software to analyse data such as quality control and instrument performance characteristics • back up electronic storage • use scanning software to protect in-house software and data.
Context of and specific resources for assessment	<p>This unit of competency is to be assessed in the workplace or simulated workplace environment.</p> <p>This unit of competency may be assessed with:</p> <ul style="list-style-type: none"> • <i>MSL925001A Analyse data and report results</i> • <i>relevant MSL974000 series units of competency</i> • <i>relevant MSL975000 series units of competency.</i> <p>Resources may include:</p> <ul style="list-style-type: none"> • access to a computer network or a personal computer • software packages that include a database package, spreadsheet, statistical analysis and simple graphics output • input and output data.
Method of assessment	<p>The following assessment methods are suggested:</p> <ul style="list-style-type: none"> • review of analysis tasks linking test results to the generation of meaningful reports by the candidate • review of simple statistical and/or graphical analysis of quality control data completed by the candidate • oral and written exercises in preparation for keyboard activities. <p>In all cases, practical assessment should be supported by questions to assess underpinning knowledge and those aspects of competency which are difficult to assess</p>

EVIDENCE GUIDE

	<p>directly.</p> <p>Where applicable, reasonable adjustment must be made to work environments and training situations to accommodate ethnicity, age, gender, demographics and disability.</p> <p>Access must be provided to appropriate learning and/or assessment support when required.</p> <p>The language, literacy and numeracy demands of assessment should not be greater than those required to undertake the unit of competency in a work like environment.</p>
This competency in practice	<p>Industry representatives have provided the case studies below to illustrate the practical application of this unit of competency and to show its relevance in a workplace setting.</p> <p>Manufacturing</p> <p>A laboratory technician performs tests on starting materials, such as appearance, identity, melting point, moisture content, trace elements, sulfated ash and assay. The results are entered in a computer database that allows trend analysis to be carried out on the test results for materials from each supplier. As a result, the technician may recognise when a supplier is experiencing potential problems with their production process. The technician would then notify the supervisor and/or supplier that there is a high probability that future supplies may be out of specification and that constant monitoring of starting materials will be required.</p> <p>Biomedical</p> <p>An important task of the technical officer in a pathology laboratory is to perform statistical analysis for quality control purposes. The software package provides for the input of data, analysis of mean value and variance as well as graphical reporting. The technical officer uses a dedicated software package or a package within the customised pathology data management system in order to assess the validity of the results produced from the analytical instrument.</p> <p>Food processing</p> <p>A technical officer is required to perform a nutrient analysis of a food product, the results of which will be</p>

EVIDENCE GUIDE

displayed on the food container. The output from the nutrient analysis is fed into a software program that calculates the levels of these components 'per portion' and 'per 100g' and displays the information in the correct tabular format. The software package is designed so that the technical officer can input new data or access existing data and manipulate that data to provide a full and accurate nutrient display or report.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Codes of practice	Where reference is made to industry codes of practice, and/or Australian/international standards, it is expected the latest version will be used
Information sources	Information sources may include: <ul style="list-style-type: none"> • manuals of enterprise standard instructions • hardware manuals • software manuals • training materials to orient software to enterprise needs • on-screen instructions embedded in the software

MSL925002A Analyse measurements and estimate uncertainties

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	This unit of competency covers the ability to estimate and report measurement uncertainty in accordance with the <i>ISO Guide to the Expression of Uncertainty in Measurement</i> . Personnel are required to review their estimates of measurement uncertainty to assist with making decisions on the fitness for purpose of the measurements.
------------------------	---

Application of the Unit

Application of the unit	This unit of competency is applicable to laboratory personnel who work in calibration and testing facilities and process and interpret data and are required to determine uncertainties using standard methods. The rigour required in estimating uncertainty will depend on the required accuracy of the particular calibration, test or measurement. Industry representatives have provided case studies to illustrate the practical application of this unit of competency and to show its relevance in a workplace setting. These can be found at the end of this unit of competency under the section 'This competency in practice'.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Identify the measured quantity and the uncertainty components	1.1. Specify an equation for the measurement 1.2. List uncertainty components that are associated with each input in the equation
2. Determine the size of each uncertainty component	2.1. Calculate the standard deviations and standard deviation of the mean from the measurement results 2.2. Use calibration reports, manufacturer's specifications, quality control and validation data, and experimental data to collect other available information on the uncertainty components
3. Reduce each uncertainty component to a standard uncertainty	3.1. Allocate an appropriate distribution for each uncertainty component 3.2. Calculate the standard uncertainties
4. Calculate an expanded uncertainty to the required confidence level	4.1. Calculate the sensitivity coefficient for each uncertainty component 4.2. Calculate a combined standard uncertainty 4.3. Determine an appropriate coverage factor based on the degrees of freedom associated with each uncertainty component 4.4. Calculate the expanded uncertainty
5. Report the expanded uncertainty	5.1. Report the result and uncertainty to an appropriate number of significant figures 5.2. Report the confidence level and coverage factor 5.3. Determine the appropriateness of the size of the expanded uncertainty relative to the tolerance or required accuracy of the test 5.4. Determine the fitness for purpose of the expanded uncertainty relative to the use of the measurement result

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Required skills include:

- gathering information on uncertainty components from calibration reports or reference material report
- making logical assumptions based on experience or experimental data
- calculating sensitivity coefficients either experimentally or by partial differentiation
- calculating a combined standard uncertainty using root-sum-of-squares, accounting for correlations where necessary
- calculating expanded uncertainty
- using spreadsheets to calculate uncertainties
- deciding if the uncertainty is suitable for the accuracy required for the test and establishing whether it is fit for purpose using the tolerance to uncertainty ratio (TUR)

Required knowledge

Required knowledge includes:

- knowledge of the steps in the measurement, test or calibration involved
- evaluation of formulae containing powers, exponents, logarithms functions
- use of scientific notation, correct units and correct number of significant figures
- preparation and interpretation of linear graphs
- mean, standard deviation, standard deviation of the mean and degrees of freedom
- significance tests such as t-test, f-test and analysis of variance (ANOVA), variances, standard deviation of prediction and linear regression (for chemical industry sector)
- the difference between errors, corrections and uncertainties
- uncertainty in the uncertainty estimation process
- uncertainty components that are common to the use of an instrument
- uncertainty components that arise due to the instrument being used under different conditions to those when it was calibrated
- procedures for determining the uncertainty components associated with each of the inputs and whether they are significant and for applying appropriate corrections
- manufacturer's specifications (e.g. instrument drift specification and reference materials)
- procedures for determining uncertainty components from quality control data
- normal, rectangular, triangular distributions and the factors used to reduce each to a standard uncertainty

REQUIRED SKILLS AND KNOWLEDGE

- the concept of degrees of freedom and how to allocate degrees of freedom to each uncertainty component including use of the Welch-Satterthwaite equation
- use of the student's t-table to get a coverage factor for a particular level of confidence
- the characteristics of a valid measurement
- relevant reporting requirements such as the GUM, National Association of Testing Authorities (NATA) or other applicable reference material

Evidence Guide

EVIDENCE GUIDE	
<p>The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>Assessors should ensure that candidates can:</p> <ul style="list-style-type: none"> • prepare a realistic uncertainty budget that is appropriate for the application • fully document the uncertainty budget • report results and uncertainties in the required formats.
Context of and specific resources for assessment	<p>This unit of competency is to be assessed in the workplace or simulated workplace environment.</p> <p>This unit of competency may be assessed with:</p> <ul style="list-style-type: none"> • <i>MSL904001A Perform standard calibrations</i> • <i>MSL905001A Perform non-standard calibrations.</i> <p>Resources may include:</p> <ul style="list-style-type: none"> • data sets and records • test methods and description of test setup • computer and relevant software or laboratory information system • relevant workplace procedures.
Method of assessment	<p>The following assessment methods are suggested:</p> <ul style="list-style-type: none"> • review of data worksheets, calculations, computer files (such as spreadsheets and databases), statistical analysis, graphs and/or tables prepared by the candidate • questions to assess understanding of relevant procedures, trends in data and sources of uncertainty • review of reports prepared by the candidate • feedback from supervisors and peers regarding the candidate's ability to estimate uncertainty in accordance with enterprise procedures. <p>In all cases, practical assessment should be supported by questions to assess underpinning knowledge and those aspects of competency which are difficult to</p>

EVIDENCE GUIDE

	<p>assess directly.</p> <p>Where applicable, reasonable adjustment must be made to work environments and training situations to accommodate ethnicity, age, gender, demographics and disability.</p> <p>Access must be provided to appropriate learning and/or assessment support when required.</p> <p>The language, literacy and numeracy demands of assessment should not be greater than those required to undertake the unit of competency in a work like environment.</p>
This competency in practice	<p>Industry representatives have provided the case studies below to illustrate the practical application of this unit of competency and to show its relevance in a workplace setting.</p> <p>Manufacturing</p> <p>Production workers in a water meter manufacturing company are required to batch test water meters. Twenty meters are connected together and tested at the same time using a test rig that collects the water in a tank that sits on top of a weighing instrument. The company's production technician needs to ensure that each water meter meets its maximum permissible error and that all measurements have a maximum permissible uncertainty that is below that specified by the regulator. The technician needs to consider the calibration uncertainty of the weighing instrument, any drift in it over time, the resolution of the meters under test and other factors relating to the temperature of the water, its effect on its density and the buoyancy correction for the weighing instrument.</p> <p>There are a number of corrections that need to be applied in order to achieve an uncertainty less than the maximum permissible uncertainty. Production workers enter readings from the meters into a palm-held device. This data is then downloaded to a computer which uses a spreadsheet program to make the required corrections, tabulate the readings, calculate the uncertainties and determine compliance of each meter with the regulations and produce a report. Uncertainty components may change for different models of water meters that have different flowrates, readability and minimum deliveries. To cope with this, the technician's</p>

EVIDENCE GUIDE

spreadsheet program has 'look-up' tables for these components according to the water meter model. Once this system was setup there is no ongoing overhead costs for uncertainty estimation. The calibration uncertainty may have to be updated when the weighing instrument is recalibrated. Estimating uncertainties have highlighted which uncertainty components have the biggest effect on the final uncertainty. This tells the technician which components to focus on and which have little effect.

Chemical

A consulting laboratory analyses beef fat for a meat export company to determine the concentration of the pesticide residue Dieldrin prior to export. The maximum residue limit for Dieldrin in beef fat is 0.2 mg/kg. The technician analyses the sample using a validated gas chromatography (GC) method. To estimate the measurement uncertainty of the analysis he/she needs to take into account such things as the:

- uncertainty from the GC calibration
- uncertainty associated with the reference materials used
- homogeneity of the sample
- calibration of the glassware used for the analysis
- the repeatability
- reproducibility of the method
- uncertainty of the method recovery.

The technician calculates a result and uncertainty of 0.19 ± 0.02 mg/kg. The reported uncertainty suggests to the meat export company that the concentration of Dieldrin in the meat products could be above the residue limit. They can now make informed decisions about whether to sell the meat or not and possibly avoid exporting meat with excessive levels of pesticide residue which could cost the exporter millions of dollars in lost revenue.

Calibration

Technicians in a commercial calibration laboratory routinely calibrate digital multimeters -including 3½ digit hand-held multimeters and high accuracy 6½ digit bench mounted multimeters. From experience, they know that there are some uncertainty components

EVIDENCE GUIDE

common to each calibration such as the:

- uncertainty of the calibration of their reference instrument (a calibrator)
- drift over time of their reference which they establish from its yearly calibrations over the last 5 years
- repeatability of their measured results at each test point from which they calculate a standard deviation of the mean
- resolution of the multimeter being calibrated.

Because of the higher accuracy of the 6½ digit multimeter, the technicians know that for these instruments they must also consider additional uncertainty components such as the input impedance of cables together with thermal and capacitive effects. (These components may be insignificant in terms of the accuracy of a 3½ digit multimeter). The uncertainty estimation and the rigour required relates to the accuracy required. The tolerance in electrical calibrations is typically the manufacturer's specification and the uncertainty needs to be smaller than that so that they can decide whether an instrument is within specification. A 4:1 tolerance to uncertainty ratio (TUR) is typical. The technician's thorough understanding of uncertainty estimation enables the laboratory to optimise their measurement effort to ensure they achieve the 4:1 ratio in an efficient manner. The laboratory has NATA accreditation which lists not only what calibrations they can perform, but their best accuracy ('least uncertainties of measurement'). As part of the process of gaining accreditation they need to submit to NATA for review their uncertainty estimations to justify the uncertainties that appear in their scope of accreditation and which they report on appropriate instruments.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Codes of practice

Where reference is made to industry codes of practice, and/or Australian/international standards, it is expected the latest version will be used

Standards, codes, procedures and/or enterprise requirements

Standards, codes, procedures and/or enterprise requirements may include:

- Australian and international standards, such as:
- AS ISO 1000-1998 The international system of units (SI) and its application
- AS ISO 17025-2005 General requirements for the competence of testing and calibration laboratories
- AS/NZS ISO 10005:2006 Quality management systems - Guidelines for quality plans
- AS/NZS ISO 10012:2004 Measurement management systems - Requirements for measurement processes and measuring equipment
- AS/NZS ISO 9000 Set:2008 Quality management systems set
- ISO 5725 Accuracy (trueness and precision) of measurement methods and results
- ISO/IEC Guide 98-3:2008 Uncertainty of measurement-Part 3 Guide to the expression of uncertainty in measurement (GUM)
- Eurachem/CITAC Guide CG4 Quantifying uncertainty in analytical measurement
- Australian code of good manufacturing practice for medicinal products (GMP)
- enterprise quality manual, customer quality plan
- equipment manuals and warranty, supplier catalogues, handbooks
- Eurolab technical report
- NATA Accreditation programs requirements
- principles of good laboratory practice (GLP)

RANGE STATEMENT	
	<ul style="list-style-type: none"> • NATA Technical notes • national measurement regulations and guidelines • Nordtest guide • sampling and test procedures and standard operating procedures (SOPs)
Data	<p>Data may:</p> <ul style="list-style-type: none"> • be recorded on worksheets or entered into spreadsheets or databases linked to information management systems • include the results of tests, measurements and analyses
Calculations	<p>Calculations may be performed with or without a calculator or computer software, such as spreadsheets, databases and statistical packages</p>
Statistical analysis	<p>Statistical analysis may include the use of:</p> <ul style="list-style-type: none"> • standard deviation, standard deviation of the mean, histograms and frequency plots • probability and normal probability plots • control charts • regression methods for calibration, linearity checks and comparing analytical methods • analysis of variance (ANOVA) • data acceptability tests, such as T and F

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Clean work preparation areas	1.1.Clean preparation areas using appropriate cleaning agents and equipment according to enterprise procedures 1.2.Remove spillages, if they occur, using appropriate agents, personal protective equipment and enterprise procedures 1.3.Collect and segregate wastes in accordance with enterprise procedures, relevant codes and regulations
2. Clean and store equipment	2.1.Collect used equipment, inspect for faults and, where necessary, remove from service 2.2.Use appropriate agents, apparatus and techniques to clean equipment 2.3.Store clean equipment in the designated locations and manner
3. Monitor stocks of materials and equipment	3.1.Perform stock checks and maintain records of usage as directed 3.2.Store labelled stocks for safe and efficient retrieval 3.3.Inform appropriate personnel of impending stock shortages to maintain continuity of supply
4. Maintain a safe work environment	4.1.Use established safe work practices and personal protective equipment to ensure personal safety and that of other personnel 4.2.Report potential hazards and/or maintenance issues in own work area to designated personnel 4.3.Minimise the generation of wastes and environmental impacts 4.4.Dispose of wastes in accordance with enterprise procedures, relevant codes and regulations

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Required skills include:

- safely cleaning work preparation areas and equipment using appropriate cleaning agents, equipment and techniques
- safely removing spillages and disposing of wastes
- minimising the exposure to hazards of self, others and the laboratory
- safely storing equipment and materials using enterprise procedures, relevant codes and guidelines
- monitoring and reporting stock levels and the condition of laboratory materials and equipment
- keeping accurate, up-to-date records
- reporting potential hazards and maintenance issues using enterprise procedures

Required knowledge

Required knowledge includes:

- enterprise procedures for the cleaning of work preparation areas, materials and equipment
- storage requirements for specific materials and equipment
- enterprise procedures for minimisation and disposal of waste
- enterprise procedures for monitoring of laboratory stocks
- information contained in material safety data sheets (MSDS) for materials handled regularly during the performance of maintenance tasks
- relevant health, safety and environment requirements

Evidence Guide

EVIDENCE GUIDE	
<p>The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>Assessors should ensure that candidates can:</p> <ul style="list-style-type: none"> • follow enterprise procedures, relevant codes and guidelines when maintaining the laboratory/field workplace • work safely and minimise exposure of hazards to self, others and the laboratory • keep accurate up-to-date records and report potential hazards and maintenance issues.
Context of and specific resources for assessment	<p>This unit of competency is to be assessed in the workplace or simulated workplace environment.</p> <p>This unit of competency may be assessed with:</p> <ul style="list-style-type: none"> • <i>MSL943002A Participate in laboratory/field workplace safety.</i> <p>Resources may include:</p> <ul style="list-style-type: none"> • access to work preparation areas, stocks, materials and equipment • cleaning, decontamination and/or disinfection agents and equipment • personal protective equipment • stock order forms, labels and records/forms.
Method of assessment	<p>The following assessment methods are suggested:</p> <ul style="list-style-type: none"> • observation of the candidate's techniques for cleaning and/or removal of spillages and waste disposal • review of stock records completed by the candidate • feedback from supervisors and peers • questioning to assess underpinning knowledge of regulations and procedures where direct observation is difficult (such as dealing with hazards) and choice of materials and equipment. <p>In all cases, practical assessment should be supported by questions to assess underpinning knowledge and those aspects of competency which are difficult to assess</p>

EVIDENCE GUIDE

	<p>directly.</p> <p>Where applicable, reasonable adjustment must be made to work environments and training situations to accommodate ethnicity, age, gender, demographics and disability.</p> <p>Access must be provided to appropriate learning and/or assessment support when required.</p> <p>The language, literacy and numeracy demands of assessment should not be greater than those required to undertake the unit of competency in a work like environment.</p>
This competency in practice	<p>Industry representatives have provided the case studies below to illustrate the practical application of this unit of competency and show its relevance in a workplace setting.</p> <p>Manufacturing</p> <p>On receipt of a bulk container of cleaning or sanitising agent, a laboratory assistant always attached to the container a description of its method of use. The assistant also attached a list of the surfaces, apparatus, utensils and machines that could be safely treated with that chemical agent as outlined in the company's quality manual. This practice reduced the likelihood of misuse of the chemical, wastage, damage to equipment and inadequate cleaning and sanitation.</p> <p>Biomedical and environmental</p> <p>Laboratory assistants and technical officers routinely examine fluids for micro-organisms using a microscope. They examine fluids, such as urine, seawater, chlorinated pool water, water from catchment areas and bottled water. To maintain microscopes in working order, they thoroughly clean the stage, oculars and each objective after use and sometimes between samples. The 100X objective requires particular care since this is the oil immersion objective. The oil is slightly acidic and will slowly corrode the objective if it is not cleaned thoroughly and regularly. After using the 100X objective they also take care not to drag the other objectives through the oil.</p> <p>Food processing</p> <p>A laboratory assistant regularly uses standard pH</p>

EVIDENCE GUIDE

solutions to calibrate the laboratory's pH meters. The assistant is aware from the label that the shelf life of these solutions after opening is two months and records the opening and disposal dates on the container. The assistant is also aware that the shelf life of unopened buffer solutions is twelve months from the date of manufacture and monitors this by noting the production date on the bottle. Requests for stock replacement take into account the normal rate of use of these buffer solutions so that unopened bottles have not reached their expiry date before use.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Codes of practice

Where reference is made to industry codes of practice, and/or Australian/international standards, it is expected the latest version will be used

Standards, codes, procedures and/or enterprise requirements

Standards, codes, procedures and/or enterprise requirements may include:

- Australian and international standards such as:
 - AS 1678 Emergency procedure guide - Transport
 - AS 1940-2004 Storage and handling of flammable and combustible liquids
 - AS 2252 Biological safety cabinets
 - AS 3780-2008 The storage and handling of corrosive substances
 - AS 4332-2004 The storage and handling of gases in cylinders
 - AS ISO 17025-2005 General requirements for the competence of testing and calibration laboratories
 - AS/NZS 1269 Set:2005 Occupational noise management set
- AS/NZS 1337 Eye protection
- AS/NZS 2161 Set:2008 Occupational protective gloves set
- AS/NZS 2210:1994 Occupational protective footwear
- AS/NZS 2243 Set:2006 Safety in laboratories set
 - AS/NZS 2243.8:2006 Safety in laboratories - Fume cupboards
 - AS/NZS 2865 Set:2005 Safe working in a confined space set
 - AS/NZS 2982.1:1997 Laboratory design and construction - General requirements

RANGE STATEMENT

- AS/NZS 4187:2003 Cleaning, disinfecting and sterilising reusable medical and surgical instruments and equipment, and maintenance of associated environments in health care facilities
- AS/NZS 4452:1997 The storage and handling of toxic substances
- AS/NZS 4501 Set:2008 Occupational clothing set
- AS/NZS ISO 14000 Set:2005 Environmental management standards set
- animal welfare legislation and codes of practice
- Australian code of good manufacturing practice for medicinal products (GMP)
- Australian Dangerous Goods Code
- Australian Quarantine and Inspection Service (AQIS) Export Control (Orders) Regulations 1982
- Australian Quarantine and Inspection Service (AQIS) Import Guidelines
- Australian Radiation Protection and Nuclear Safety Agency (ARPANSA) Codes of Practice
- enterprise or standard operating procedures (SOPs)
- equipment manuals and warranties, supplier catalogues and handbooks
- gene technology regulations
- guide to physical containment levels and facility types
- HB 9-1994 Occupational personal protection
- material safety data sheets (MSDS)
- National Code of Practice for the labelling of workplace substances (NOHSC:2012 (1994))
- national environment protection measures
- National Health and Medical Research Council (NHMRC) Guidelines
- national measurement regulations and guidelines
- occupational health and safety (OHS) national standards and codes of practice
- principles of good laboratory practice (GLP)
- Therapeutic Goods Regulations 1009

RANGE STATEMENT**Equipment, material procedures and facilities**

Equipment, material procedures and facilities may include:

- animal cages
- autoclaves
- balances
- blenders, centrifuges and separating equipment
- brushes
- cell counters and staining machines
- colorimeters/spectrometers and polarimeters
- compaction rammers and soil classification equipment
- conductivity meters and pH meters
- dishwashers, refrigerators, freezers, ovens, microwave ovens, incubators and water baths
- disintegration apparatus, thermometers and incubators
- fume hoods, biohazard containers and biological safety cabinets
- gas cylinders
- glassware, plastic ware; glass, plastic and quartz cuvettes
- hotplates, mantles, burners and muffle furnaces
- instrument chart recorders, penetrometers, force measuring equipment and tensiometers
- light and fluorescence microscopes
- melting point apparatus, viscometers and hardness testing equipment
- microtomes and tissue processors
- mixing and separating equipment such as centrifuges, riffers and splitters and mixers
- noise meters and blasting meters
- optical microscopes
- pipettes, burettes and volumetric glassware
- shovels, scoops, plates, rods, cylinder moulds and buckets
- steel ruler/tapes and spirit levels
- thermometers, thermohygrographs, instrument chart recorders, hydrometers, pH meters and ion-selective electrodes
- ultrasonic cleaners
- vehicles

RANGE STATEMENT	
Typical materials	<p>Typical materials may include:</p> <ul style="list-style-type: none"> • consumable items, such as syringes, pipette tips, weigh boats • disposable clothing and personal protective equipment • distilled water, reagents, chemicals, disinfectants, detergents, agar media and plates • equipment spares, such as fuses, bulbs and batteries • oils/lubricants, fuels, industrial gases and cryogenics, such as dry ice and liquid nitrogen • paper and stationery • reference samples and standards
Maintenance	<p>Maintenance may include:</p> <ul style="list-style-type: none"> • checking serviceability before storage • cleaning • prevention of contamination • storing
Cleaning requirements	<p>Cleaning requirements may include:</p> <ul style="list-style-type: none"> • decontamination and/or disinfection • hygiene monitoring • minimising environmental impacts • operation of automatic cleaning apparatus, such as pipette washer, ultrasonic cleaners and dishwashers • sterilisation and disposal of wastes using boiling, high pressure air or steam, microwaves, chemicals, gas, filtration, ultraviolet radiation and autoclaving • use of specialised techniques, such as chromic acid baths and soaking in hypochlorite
Preparation areas	<p>Preparation areas may include:</p> <ul style="list-style-type: none"> • benches • fume cupboards • sheds • sinks
Agents for cleaning	<p>Agents for cleaning may include:</p> <ul style="list-style-type: none"> • cleaning solutions

RANGE STATEMENT	
	<ul style="list-style-type: none"> • decontaminants • organic solvents
Spillages	<p>Spillages may include:</p> <ul style="list-style-type: none"> • chemicals • radioactive materials • biologically active materials
Wastes	<p>Wastes may include:</p> <ul style="list-style-type: none"> • broken glass • batteries • disposable personal protective equipment • excess test samples • micro-organisms • plastic and metals • sharps • solvents • spent reagents • spent samples and test pieces • used containers, boxes, bags and palettes
Stock records	<p>Stock records may include:</p> <ul style="list-style-type: none"> • calibration and maintenance history • data sheets • handbooks, warranty documents, catalogues, manuals and MSDS • records of usage, loans and breakages
Communication	<p>Communication could involve other people, such as:</p> <ul style="list-style-type: none"> • laboratory, production, administration and cleaning staff • internal/external contractors • emergency personnel
Maintenance issues	<p>Maintenance issues could involve:</p> <ul style="list-style-type: none"> • checking materials and equipment are fit for purpose • equipment malfunction • hygiene issues • potential hazards, incidents and emergencies • recycling and waste disposal

RANGE STATEMENT	
	<ul style="list-style-type: none"> • spillages, leakages, breakages and contamination • stock requirements and shortages
Hazards	<p>Hazards may include:</p> <ul style="list-style-type: none"> • aerosols from broken centrifuge tubes and pipetting • chemicals, such as acids, heavy metals, pesticides and hydrocarbons • crushing, entanglement and cuts associated with moving machinery or falling objects • cryogenics, such as dry ice and liquid nitrogen • electric shock • fluids under pressure, such as steam and industrial gas cylinders • manual handling, working at heights and working in confined spaces • microbiological organisms and agents associated with soil, air, water, blood and blood products, and human or animal tissue and fluids • occupational overuse syndrome, slips, trips and falls • pedestrian and vehicular traffic • sharps, broken glassware and hand tools • solar radiation, dust and noise • sources of ignition, flammable liquids and gases
Established safe work practices	<p>Established safe work practices may include:</p> <ul style="list-style-type: none"> • applying containment procedures through the use of appropriate equipment, such as biohazard containers, laminar flow cabinets, Class I, II and III biohazard cabinets and Class PCII, PCIII, and PCIV physical containment facilities • ensuring access to service shut-off points • following established manual handling procedures for tasks involving manual handling • handling and storage of all hazardous materials and equipment in accordance with labelling, MSDS and manufacturer's instructions • identifying and reporting operating problems or equipment malfunctions

RANGE STATEMENT	
	<ul style="list-style-type: none"> • labelling of samples, reagents, aliquoted samples and hazardous materials • recognising and observing hazard warnings and safety signs • reporting to appropriate personnel of abnormal emissions, discharges and airborne contaminants, such as noise, light, solids, liquids, water/waste water, gases, smoke, vapour, fumes, odour and particulates • use of MSDS • use of personal protective equipment, such as hard hats, hearing protection, gloves, safety glasses, goggles, face guards, coveralls, gown, body suits, respirators and safety boots
Occupational health and safety (OHS) and environmental management requirements	<p>OHS and environmental management requirements:</p> <ul style="list-style-type: none"> • all operations must comply with enterprise OHS and environmental management requirements, which may be imposed through state/territory or federal legislation - these requirements must not be compromised at any time • all operations assume the potentially hazardous nature of samples and require standard precautions to be applied • where relevant, users should access and apply current industry understanding of infection control issued by the National Health and Medical Research Council (NHMRC) and State and Territory Departments of Health

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Apply quality control procedures	1.1. Record data for quality control purposes 1.2. Recognise and report non-conformances in keeping with job role and quality procedures
2. Contribute to quality improvements	2.1. Review own work practices for opportunities to continuously improve performance 2.2. Identify and report opportunities for improvements in procedures, processes and equipment in work area
3. Maintain commitment to enterprise quality standards in own work	3.1. Maintain an objective of 'right first time' 3.2. Conduct work in accordance with sustainable energy work practices 3.3. Minimise waste and rework in accordance with enterprise guidelines 3.4. Demonstrate 'job ownership' for whole tasks through a commitment to finish and follow-up 3.5. Ensure that personal actions conform with the code of ethics relevant to the workplace
4. Assist in maintaining customer relationships	4.1. Demonstrate an understanding of the business goals, products and services of the enterprise when dealing with customers in relation to own function 4.2. Communicate appropriately with customers in keeping with knowledge and authority limitations and quality requirements
5. Update knowledge and skills as required	5.1. Recognise own strengths and limitations and take advantage of opportunities for skill development

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Required skills include:

- applying the required quality control procedures
- providing quality products and services to customers consistent with the job role
- resolving simple customer requirements
- minimising waste and rework
- contributing to improvements in productivity and quality through teamwork and commitment to personal work standards

Required knowledge

Required knowledge includes:

- concepts of metrology
- continuous improvement and waste minimisation principles
- enterprise procedures associated with the candidate's regular technical duties
- layout of the enterprise, divisions and laboratory
- lines of communication
- organisational structure of the enterprise
- products and services provided by the enterprise
- quality requirements of the candidate's job role and functions
- recording, reporting and document control requirements
- relevant health, safety and environment requirements
- role of internal and external audits
- role of laboratory services to the enterprise and customers
- scheduling of tests and procedures to meet customer requirements

Evidence Guide

EVIDENCE GUIDE	
<p>The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>Assessors should ensure that candidates can:</p> <ul style="list-style-type: none"> • apply the required quality control principles and procedures to their work • contribute to improvements in productivity and quality • maintain their personal commitment to quality objectives.
Context of and specific resources for assessment	<p>This unit of competency is to be assessed in the workplace or simulated workplace environment.</p> <p>This unit of competency may be assessed with:</p> <ul style="list-style-type: none"> • <i>MSL913001A Communicate with other people</i> • technical units of competency dealing with sampling and testing. <p>Resources may include:</p> <ul style="list-style-type: none"> • enterprise quality manual and procedures • standard operating procedures (SOPs).
Method of assessment	<p>The following assessment methods are suggested:</p> <ul style="list-style-type: none"> • review of quality control data collected by the candidate • review of quality improvements suggested by the candidate • feedback from supervisors and peers • oral or written questions about quality concepts and enterprise procedures • flow charts or diagrams prepared by the candidate to describe work flows and workplace layout (alternatively, the candidate could explain existing charts or diagrams). <p>In all cases, practical assessment should be supported by questions to assess underpinning knowledge and those aspects of competency which are difficult to assess directly.</p>

EVIDENCE GUIDE	
	<p>Where applicable, reasonable adjustment must be made to work environments and training situations to accommodate ethnicity, age, gender, demographics and disability.</p> <p>Access must be provided to appropriate learning and/or assessment support when required.</p> <p>The language, literacy and numeracy demands of assessment should not be greater than those required to undertake the unit of competency in a work like environment.</p>
This competency in practice	<p>Industry representatives have provided the case studies below to illustrate the practical application of this unit of competency and show its relevance in a workplace setting.</p> <p>Manufacturing</p> <p>Laboratory assistants must have a good working knowledge of quality control procedures and how they contribute to the achievement of enterprise quality objectives. An assistant was measuring the moisture content of coke by a standard method. The SOP for this test stated that the limits for moisture should be between 2% and 5% by weight. The assistant obtained a result of 5.8%. The assistant had followed the SOP correctly and performed the determination in triplicate and had confidence in the precision of the result. The assistant recognised and reported the non-conformance to the laboratory supervisor. The production manager took corrective action and modified the drying process to reduce the moisture content and provide a product which met the customer's requirements.</p> <p>Biomedical</p> <p>A laboratory assistant working in the pathology department of a rural hospital was responsible for serum lithium estimations by flame photometry. When asked by the office staff when the lithium results would be ready, the assistant replied that the testing schedule of the laboratory meant that the test would not be done until the following week and asked why the office staff needed to know. The answer was that an outpatient clinic was being held, and the results were needed for a consultation. Although samples were often taken a week before the clinic was to be held, the assistant realised that results were not always ready for the clinic because of</p>

EVIDENCE GUIDE

the testing schedule of the laboratory. The assistant reported the situation to the laboratory supervisor. The supervisor rescheduled lithium testing to match the clinic times, so that results would always be ready for the clinic consultation. This pleased the clinic staff, the patient did not waste a visit, the office staff no longer got irate phone calls and the quality of service was improved overall.

Food processing

A fruit processing company produced many tonnes of solid vegetable waste annually. This was dumped as landfill at considerable cost and the local council was concerned that the method of disposal was not sustainable. The laboratory assistants at the company were included in a quality improvement team to investigate the problem. The team concentrated on alternative production methods to minimise waste yields and additional production methods that would enable the waste to be profitably utilised. They identified four potential uses of the waste: a source of pectin, alcohol and sugar and conversion of raw fruit peel to glazed peel.

A cost-benefit analysis was performed in consultation with supporting industries, including a local winery to assess the merits of these value adding activities. The outcome was that the amount of waste produced by the company was significantly reduced with much of the waste channelled into marketable products with full cost recovery. After some initial doubts, the laboratory personnel realised that they were able to make useful contributions to the project. As a result, they became part of an ongoing investigation of waste minimisation and value adding practices.

Range Statement

RANGE STATEMENT	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
Codes of practice	Where reference is made to industry codes of practice, and/or Australian/international standards, it is expected the latest version will be used
Standards, codes, procedures and/or enterprise requirements	<p>Standards, codes, procedures and/or enterprise requirements may include:</p> <ul style="list-style-type: none"> • Australian and international standards, such as: <ul style="list-style-type: none"> • AS ISO 17025-2005 General requirements for the competence of testing and calibration laboratories • AS/NZS ISO 9000 Set:2008 Quality management systems set • Australia New Zealand Food Standards (ANZFS) Code • Australian code of good manufacturing practice for medicinal products (GMP) • customer specific requirements/standards • National Association of Testing Authorities (NATA) Accreditation programs requirements • principles of good laboratory practice (GLP) • Therapeutic Goods Regulations 1009
Quality control procedures	<p>Quality control procedures may include:</p> <ul style="list-style-type: none"> • standards imposed by regulatory and licensing bodies • enterprise quality procedures • working to a customer brief and associated quality procedures • checklists to monitor job progress against agreed time, costs and quality standards • the use of hold points to evaluate conformance • the use of inspection and test plans to check compliance
Concepts of metrology	Concepts of metrology may include:

RANGE STATEMENT	
	<ul style="list-style-type: none"> • that all measurements are estimates • measurements belong to a population of measurements of the measured parameters • repeatability • precision • accuracy • significant figures • sources of error • uncertainty • traceability
Sustainable energy principles and work practices	<p>Sustainable energy principles and work practices may include:</p> <ul style="list-style-type: none"> • examining work practices that use excessive electricity • switching off equipment when not in use • regularly cleaning filters • insulating rooms and buildings to reduce energy use • recycling and reusing materials wherever practicable • minimising process waste
Reporting	<p>Reporting may involve:</p> <ul style="list-style-type: none"> • verbal responses • data entry into laboratory information management system (LIMS) or enterprise databases • brief written reports using enterprise proformas
Quality improvement opportunities	<p>Quality improvement opportunities that relate to the work of laboratory assistants could include:</p> <ul style="list-style-type: none"> • improved methods for sampling, testing and recording data • improved hygiene and sanitation procedures • minimisation of waste and rework • improved laboratory layout and work flow
Occupational health and safety (OHS) and environmental management requirements	<p>OHS and environmental management requirements:</p> <ul style="list-style-type: none"> • all operations must comply with enterprise OHS and environmental management requirements, which may be imposed through

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Satisfy quality system requirements in daily work	1.1. Access information on quality system requirements for own job function 1.2. Record and report quality control data in accordance with quality system 1.3. Follow quality control procedures to ensure products, or data, are of a defined quality as an aid to acceptance or rejection 1.4. Recognise and report non-conformances or problems 1.5. Conduct work in accordance with sustainable energy work practices 1.6. Promote sustainable energy principles and work practices to other workers
2. Analyse opportunities for corrective and/or optimisation action	2.1. Compare current work practices, procedures and process or equipment performance with requirements and/or historical data or records 2.2. Recognise variances that indicate abnormal or sub-optimal performance 2.3. Collect and/or evaluate batch and/or historical records to determine possible causes for sub-optimal performance 2.4. Use appropriate quality improvement techniques to rank the probabilities of possible causes
3. Recommend corrective and/or optimisation actions	3.1. Analyse causes to predict likely impacts of changes and decide on the appropriate actions 3.2. Identify required changes to standards and procedures and training 3.3. Report recommendations to designated personnel
4. Participate in the implementation of recommended actions	4.1. Implement approved actions and monitor performance following changes to evaluate results 4.2. Implement changes to systems and procedures to eliminate possible causes 4.3. Document outcomes of actions and communicate them to relevant personnel
5. Participate in the development of continuous improvement strategies	5.1. Review all relevant features of work practice to identify possible contributing factors leading to sub-optimal performance 5.2. Identify options for removing or controlling the risk of sub-optimal performance

ELEMENT	PERFORMANCE CRITERIA
	<p>5.3. Assess the adequacy of current controls, quality methods and systems</p> <p>5.4. Identify opportunities to continuously improve performance</p> <p>5.5. Develop recommendations for continual improvements of work practices, methods, procedures and equipment effectiveness</p> <p>5.6. Consult with appropriate personnel to refine recommendations before implementation of approved improvement strategies</p> <p>5.7. Document outcomes of strategies and communicate them to relevant personnel</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Required skills include:

- applying problem solving techniques and strategies
- applying statistical analysis and statistical sampling procedures
- detecting non-conforming products or services in the work area
- documenting and reporting information about quality
- contributing effectively within a team to recognise and recommend improvements in productivity and quality
- implementing and monitoring improved practices and procedures

Required knowledge

Required knowledge includes:

- specifications for laboratory products and services in the candidate's work area
- quality requirements associated with the individual's job function and/or work area
- scientific and technical knowledge underpinning the processes, procedures, equipment and instrumentation associated with the candidate's work tasks and duties
- workplace procedures associated with the candidate's regular technical duties
- sustainable energy principles
- relevant health, safety and environment requirements
- layout of the enterprise, divisions and laboratory
- organisational structure of the enterprise
- lines of communication
- role of laboratory services to the enterprise and customers

Specific industry

Additional knowledge requirements may apply for different industry sectors. For example:

Biomedical sector:

- ethical requirements dealing with patient confidentiality
- animal welfare legislation and codes of practice
- guidelines for pre-transfusion testing
- gene technology regulations for large scale, small scale and planned release of genetically manipulated organisms

Evidence Guide

EVIDENCE GUIDE	
<p>The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>Assessors should ensure that candidates can:</p> <ul style="list-style-type: none"> • use the enterprise's quality systems and business goals as a basis for decision making and action • apply all relevant procedures and regulatory requirements to ensure the quality and integrity of the products/services or data provided • apply and promote sustainable energy principles and work practices • detect non-conforming products or services in the work area • follow enterprise procedures for documenting and reporting information about quality • contribute effectively within a team to recognise and recommend improvements in productivity and quality • apply effective problem solving strategies • implement and monitor improved practices and procedures.
Context of and specific resources for assessment	<p>This unit of competency is to be assessed in the workplace or simulated workplace environment.</p> <p>This unit of competency may be assessed with:</p> <ul style="list-style-type: none"> • <i>MSL924001A Process and interpret data</i> • <i>MSL954001A Obtain representative samples in accordance with sampling plan</i> • <i>relevant MSL974000 series units of competency</i> • <i>relevant MSL975000 series units of competency.</i> <p>Resources may include:</p> <ul style="list-style-type: none"> • enterprise quality manual and procedures • quality control data/records • customer complaints and rectifications • candidate's supervisors and peers.
Method of assessment	<p>The following assessment methods are suggested:</p> <ul style="list-style-type: none"> • review of documentation completed by the candidate

EVIDENCE GUIDE

	<p>as part of regular quality control</p> <ul style="list-style-type: none"> • feedback from supervisors and/or customers regarding quality of products/services and/or data regularly provided by the candidate • observation of the candidate's performance and participation in quality improvement teams over time in the workplace • review of reports from quality improvement teams where the candidate's role is clearly outlined and verified • verified reports of improvements suggested and implemented by the candidate individually. <p>Those aspects of competency dealing with improvement processes could be assessed by the use of suitable simulations and/or a pilot plant and/or a range of case studies and scenarios.</p> <p>In all cases, practical assessment should be supported by questions to assess essential knowledge and those aspects of competency which are difficult to assess directly.</p> <p>Where applicable, reasonable adjustment must be made to work environments and training situations to accommodate ethnicity, age, gender, demographics and disability.</p> <p>Access must be provided to appropriate learning and/or assessment support when required.</p> <p>The language, literacy and numeracy demands of assessment should not be greater than those required to undertake the unit of competency in a work like environment.</p>
This competency in practice	<p>Industry representatives have provided the case studies below to illustrate the practical application of this unit of competency and to show its relevance in a workplace setting.</p> <p>Manufacturing</p> <p>A quality improvement team at a chemical manufacturing plant was asked to propose a way of minimising the cost of disposing of chromium rich waste. Using appropriate techniques, the team narrowed the alternatives down to the option of burning the waste stream. An experienced technician agreed that this was feasible, but suggested that because the waste was petroleum high in chromium the team should consider</p>

EVIDENCE GUIDE

the environmental implications. Subsequent research indicated that the permitted chromium levels in the incinerated air waste stream would not exceed 10 ppm, which was less than the air emission standards for the plant. The technician analysed samples of the air waste stream and determined that the chromium levels were below the regulatory standards. He/she then supported the team's suggestion.

Environmental

The manager of an environmental testing laboratory believed that the team of laboratory technicians relied too much on external direction. As a result, the manager requested that whenever technicians asked for assistance they should also be ready to suggest a solution to the problem if at all possible. This strategy was implemented in a non-threatening manner and was accepted by the team. In time, the manager noted that many of the suggestions for solving problems and improving work practices that came from the team were effective and reasonable. Their skill in making realistic recommendations came from their familiarity with many of the issues that needed to be considered. It became the norm that the laboratory technicians were given public credit for suggesting successful strategies that improved safety, productivity and staff morale.

Food processing

A company that produces apple juice uses 30-35% hydrogen peroxide (H_2O_2) to sterilise packaging. A mist of atomised H_2O_2 is sprayed into pre-formed cartons and later removed with a jet of hot sterile air. The laboratory manager was concerned that some batches of product were not sterile after standing at room temperature for several days. The cause of the failure in the sterilisation procedure was not apparent and a technical officer was asked to investigate this problem.

The technical officer examined each unit operation of juice manufacture and determined that the application of H_2O_2 was a critical sterilisation point where failure could occur. The concentration of H_2O_2 in the atomiser and in opened containers was unpredictable and several problems were found to contribute to this. H_2O_2 was left in the atomiser for up to several days between packaging runs. Containers of H_2O_2 were not always used sequentially, some being opened and then not used for a

EVIDENCE GUIDE

long time. The containers were stored at room temperature after opening and some may have become contaminated with atmospheric particulates that catalyse the breakdown of H₂O₂.

The recommendations that emerged from the investigation were that:

- fresh H₂O₂ should be used at the beginning of each packaging run
- only one stock container of H₂O₂ should be open at any one time and stored chilled, with residuals discarded after 14 days
- care should be taken to exclude foreign material from the opened vessels of H₂O₂ and the atomiser.

In summary, the intolerance of the company to even low incidences of faulty product and the competency of the technical officer to investigate the processing stream resulted in increased product quality without significant cost.

Range Statement

RANGE STATEMENT	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
Codes of practice	Where reference is made to industry codes of practice, and/or Australian/international standards, it is expected the latest version will be used
Standards, codes, procedures and/or enterprise requirements	<p>Standards, codes, procedures and/or enterprise requirements may include:</p> <ul style="list-style-type: none"> • Australian and international standards, such as: <ul style="list-style-type: none"> • AS ISO 17025-2005 General requirements for the competence of testing and calibration laboratories • AS/NZS ISO 10005:2006 Quality management systems - Guidelines for quality plans • AS/NZS ISO 10012:2004 Measurement management systems - Requirements for measurement processes and measuring equipment • AS/NZS ISO 9000 Set:2008 Quality management systems set • AS 1199 Sampling procedures and tables for inspection by attributes • BS 5750 Quality systems • Australia New Zealand Food Standards (ANZFS) Code • Australian code of good manufacturing practice for medicinal products (GMP) • customer specific requirements/standards • enterprise and customer product specifications • National Association of Testing Authorities (NATA) Accreditation programs requirements • National Health and Medical Research Council (NHMRC) Guidelines • national measurement regulations and guidelines

RANGE STATEMENT	
	<ul style="list-style-type: none"> • principles of good laboratory practice (GLP) • quality manuals and procedures • Therapeutic Goods Regulations 1009
Quality control procedures	<p>Quality control procedures may include:</p> <ul style="list-style-type: none"> • standards imposed by regulatory and licensing bodies • enterprise quality procedures • working to a customer brief or batch card and associated quality procedures • checklists to monitor job progress against agreed time, costs and quality standards • preparation of sampling plans • the use of hold points to evaluate conformance • the use of inspection and test plans to check compliance

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Maintain and control stocks of materials or equipment	1.1. Label, document and store stocks in accordance with relevant standards and specific safety requirements 1.2. Follow stock rotation procedures to maximise use of stocks within permitted shelf life 1.3. Identify stock discrepancies and replace redundant or outdated stocks to maintain stocks at prescribed level 1.4. Identify and replace damaged/worn equipment or arrange for repairs or disposal as appropriate 1.5. Initiate quality control sampling and testing procedures when appropriate 1.6. Report stock problems outside own knowledge and authority limitations to relevant personnel
2. Order and receive materials and equipment	2.1. Determine requirements of customers and suppliers using appropriate communication and interpersonal skills 2.2. Determine demand for stock, taking into account peak and seasonal variations in stock usage and production conditions 2.3. Place and/or follow up approved orders using enterprise systems and procedures 2.4. Check condition of received goods and take appropriate action
3. Maintain stock records	3.1. Record all relevant details accurately using the specified forms/computer system 3.2. Ensure that written information is legible and indelible 3.3. File all records in the designated place
4. Maintain a safe work environment	4.1. Use established safe work practices and personal protective equipment to ensure personal safety and that of other laboratory personnel 4.2. Minimise the generation of wastes and environmental impacts 4.3. Ensure the safe collection of redundant/outdated stocks for subsequent disposal

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Required skills include:

- maintaining and controlling stocks or materials and equipment
- ordering and receiving materials and equipment
- maintaining stock records
- maintaining a safe work environment

Required knowledge

Required knowledge includes:

- technical terminology relating to ordering and storage of stocks
- laboratory stock, product and service information
- types of chemical reactions and rationale for recommended storage systems
- enterprise procedures and quality system requirements for stock control
- codes of practice and regulations concerning the handling, storage and transport of the stock involved
- relevant health, safety and environment requirements

Evidence Guide

EVIDENCE GUIDE	
<p>The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
Overview of assessment	
<p>Critical aspects for assessment and evidence required to demonstrate competency in this unit</p>	<p>Assessors should ensure that candidates can:</p> <ul style="list-style-type: none"> • confirm customer requirements with senior personnel where there is doubt • access online databases and/or catalogues efficiently • interpret labelling information (lot number, batch and date) and MSDS correctly • apply procedures for safe handling, storage and transport of stocks • use required safety and manual handling equipment and procedures • perform quality control sampling and testing and rotate stock in accordance with SOPs • follow workplace procedures for predicting and/or determining demand for stock • maintain stock at prescribed levels for their work area, through regular inspections, timely ordering of replacement items and followup of late orders • cope with peak and seasonal variations in stock usage and production conditions • follow workplace procedures for researching, ordering and receipt of stock • complete and record all documentation accurately • demonstrate effective and appropriate communication and interpersonal skills when dealing with customers and suppliers.
<p>Context of and specific resources for assessment</p>	<p>This unit of competency is to be assessed in the workplace or simulated workplace environment.</p> <p>This unit of competency may be assessed with:</p> <ul style="list-style-type: none"> • <i>MSL935004A Maintain instruments and equipment.</i> <p>Resources may include:</p> <ul style="list-style-type: none"> • stocks of materials and equipment • stock order forms and documentation • sampling and testing equipment.

EVIDENCE GUIDE**Method of assessment**

The following assessment methods are suggested:

- review of documentation for orders prepared by the candidate
- examination of stock records maintained by the candidate
- observation of the candidate handling stock and conducting quality control sampling and testing
- feedback from the laboratory manager, quality manager, customer service manager, supervisor, customers and peers
- explanation by the candidate of the labelling and storage requirements of a selection of stock items.

In all cases, practical assessment should be supported by questions to assess underpinning knowledge and those aspects of competency which are difficult to assess directly.

Where applicable, reasonable adjustment must be made to work environments and training situations to accommodate ethnicity, age, gender, demographics and disability.

Access must be provided to appropriate learning and/or assessment support when required.

The language, literacy and numeracy demands of assessment should not be greater than those required to undertake the unit of competency in a work like environment.

This competency in practice

Industry representatives have provided the case studies below to illustrate the practical application of this unit of competency and to show its relevance in a workplace setting.

Biotechnology

A technical officer arrived at work on Monday morning and discovered that the freezer had been turned off over the weekend and the restriction nucleases had thawed. These enzymes were to be used that morning. The technician needed to check the enzyme activity to determine whether the enzymes had been denatured by the rise in temperature. The technician quickly set up a digestion mix of affected enzyme with some viral DNA of known sequence. The digest produced DNA fragments of expected length, showing the enzyme still had activity.

EVIDENCE GUIDE

The technician reported the incident along with the results to the supervisor, who decided that the enzymes could be used for that day.

Manufacturing

Neglected chemicals may deteriorate on the shelf and turn into a completely different entity. Not only can this change in identity damage a chemical manufacturing process, it can also present an immediate hazard. For example, this occurred in a storeroom where stored ether built up high levels of peroxides. When it was used in an extraction process to make a starting material in a manufacturing process, the peroxides were concentrated and exploded. The company was fortunate that loss of life didn't occur. The company revised enterprise procedures to ensure that in the future, redundant or outdated stocks are identified and removed.

Food processing

The staff in a confectionary company laboratory use enzyme based methods to routinely analyse sugars (glucose, fructose, sucrose and lactose) in products. Although the enzymes are stored as directed by the manufacturer, typically at -20(C in the dark, they do not retain their activity indefinitely. To avoid using inactive enzyme in an analytical procedure and obtaining a reduced or false negative result, several features of each enzyme preparation are routinely noted. These include the date of purchase, the number of times the enzyme has been thawed and refrozen and its initial activity. Periodically, the enzyme activity is verified and stock is discarded where its activity has fallen to a less than acceptable value. These practices ensure that the analytical methods that use enzymes are performed with functional reagents and give accurate results.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Codes of practice

Where reference is made to industry codes of practice, and/or Australian/international standards, it is expected the latest version will be used

Standards, codes, procedures and/or enterprise requirements

Standards, codes, procedures and/or enterprise requirements may include:

- Australian and international standards such as:
 - AS 1678 Emergency procedure guide - Transport
 - AS 1940-2004 Storage and handling of flammable and combustible liquids
 - AS 3780-2008 The storage and handling of corrosive substances
 - AS 4332-2004 The storage and handling of gases in cylinders
 - AS ISO 17025-2005 General requirements for the competence of testing and calibration laboratories
 - AS/NZS 1269 Set:2005 Occupational noise management set
- AS/NZS 2243 Set:2006 Safety in laboratories set
 - AS/NZS 2982.1:1997 Laboratory design and construction - General requirements
 - AS/NZS 4452:1997 The storage and handling of toxic substances
 - AS/NZS ISO 14000 Set:2005 Environmental management standards set
- animal welfare legislation and codes of practice
- Australian code of good manufacturing practice for medicinal products (GMP)
- Australian Dangerous Goods Code
- Australian Quarantine and Inspection Service

RANGE STATEMENT	
	<p>(AQIS) Export Control (Orders) Regulations 1982</p> <ul style="list-style-type: none"> • Australian Quarantine and Inspection Service (AQIS) Import Guidelines • Australian Radiation Protection and Nuclear Safety Agency (ARPANSA) Codes of Practice • customer database and supplier catalogues • enterprise or standard operating procedures (SOPs) • equipment manuals and warranty, supplier catalogues and handbooks • gene technology regulations • internal/external stock orders and overdue actions • material safety data sheets (MSDS) • National Code of Practice for the labelling of workplace substances (NOHSC:2012 (1994)) • National Environment Protection Measures • National Health and Medical Research Council (NHMRC) Guidelines • national measurement regulations and guidelines • occupational health and safety (OHS) national standards and codes of practice • principles of good laboratory practice (GLP) • Therapeutic Goods Regulations 1009
Workplace procedures	<p>Workplace procedures may include:</p> <ul style="list-style-type: none"> • ordering, purchase and receipt of stocks • verification of temperature control for delivered and stored stocks (e.g. reagents containing enzymes) • organisation of compatible batch or lot numbers • storage of stocks, stock control and rotation of stock • quality control testing, monitoring of use by dates of standards and shelf life of reagents (e.g. DNA, enzymes, antibodies, radioisotopes and vitamins) • reporting non-conformances
Records	<p>Records could include:</p>

RANGE STATEMENT

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Store instruments safely and securely	1.1. Identify state or territory requirements for storage facilities and associated document processes 1.2. Store instruments in accordance with state or territory requirements and documented procedures 1.3. Secure instruments to prevent unauthorised access 1.4. Record instruments' movements and usage in accordance with documented procedures
2. Transport instruments safely and securely	2.1. Select vehicle suitable for the purpose 2.2. Attach regulation signage in accordance with state or territory requirements to indicate that radioactive sources are being carried 2.3. Ensure that instruments are properly located and fixed securely in place 2.4. Ensure security of instruments when the vehicle is unattended
3. Use instruments safely and maintain security	3.1. Follow safe working practices to minimise own exposure to radiation 3.2. Use radiation dosimeter to monitor own exposure to radiation 3.3. Follow safe work practices to minimise exposure of others to radiation 3.4. Follow safe work practices to protect the instrument from damage 3.5. Maintain instrument security
4. Monitor radiation levels	4.1. Check operation and calibration status of radiation survey meter 4.2. Perform radiation survey following documented procedure 4.3. Report atypical conditions and/or problems to appropriate personnel
5. Maintain records	5.1. Record observations, data and results in accordance with enterprise procedures 5.2. Maintain confidentiality of enterprise information
6. Perform emergency procedures	6.1. Identify potential emergency situations 6.2. Respond to emergencies in accordance with documented procedures 6.3. Report emergency situations to appropriate personnel

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Required skills include:

- demonstrating emergency procedures
- performing and documenting radiation surveys using radiation monitors
- using a radiation dosimeter
- placing the instrument into storage safely and securely
- transporting the instrument in a motor vehicle safely
- safely handling and maintaining the instrument and keeping other personnel clear of radiation sources
- observing, interpreting and reporting atypical situations
- promptly communicating problems to appropriate personnel

Required knowledge

Required knowledge includes:

- health, safety and emergency procedures relevant to radioactive devices
- factors affecting radiation intensity
- principles of external radiation protection and practical methods of minimising radiation exposure
- methods of measuring and detecting ionising radiation
- nature of radiation, different types of radiation, their characteristics, sources and shielding methods
- physiological effects of ionising radiation
- state or territory licensing requirements
- national codes of practice
- general guidelines for safe handling of radiation sources

Evidence Guide

EVIDENCE GUIDE	
<p>The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>Assessors should ensure that candidates can:</p> <ul style="list-style-type: none"> perform operations in accordance with standards, codes, procedures and enterprise requirements safely handle, store and transport instruments keeping other people clear of radiation sources perform and document radiation surveys recognise, interpret and report problems to appropriate personnel promptly.
Context of and specific resources for assessment	<p>This unit of competency is to be assessed in the workplace or simulated workplace environment.</p> <p>This unit of competency may be assessed with:</p> <ul style="list-style-type: none"> <i>MSL924001A Process and interpret data</i> <i>MSL943002A Participate in laboratory/field workplace safety</i> <i>MAL974010A Perform mechanical tests.</i> <p>Resources may include:</p> <ul style="list-style-type: none"> appropriate tools, instruments, equipment and materials enterprise procedures, test methods, equipment and manuals.
Method of assessment	<p>The following assessment methods are suggested:</p> <ul style="list-style-type: none"> analysis of work completed by the candidate over a period of time to ensure accuracy, consistency and timeliness observation of candidate using the instruments in a range of work contexts review of enterprise documentation completed by the candidate feedback from peers and supervisors use of suitable simulation and/or a range of case studies/scenarios. <p>In all cases, practical assessment should be supported by questions to assess underpinning knowledge and those</p>

EVIDENCE GUIDE	
	<p>aspects of competency which are difficult to assess directly.</p> <p>Where applicable, reasonable adjustment must be made to work environments and training situations to accommodate ethnicity, age, gender, demographics and disability.</p> <p>Access must be provided to appropriate learning and/or assessment support when required.</p> <p>The language, literacy and numeracy demands of assessment should not be greater than those required to undertake the unit of competency in a work like environment.</p>
This competency in practice	<p>Industry representatives have provided the case study below to illustrate the practical application of this unit of competency and show its relevance in a workplace setting.</p> <p>Construction materials testing</p> <p>Soil moisture density gauges are used extensively for measuring the density of soils, cement treated roadbase, roller compacted concrete and asphalt. They provide a non-destructive means of monitoring compaction operations during construction, so that additional rolling can be provided before the material sets or is covered with another layer. National and state/territory codes of practice regulate the use of equipment that emits ionising radiation. States and territories also have licensing and registration requirements for people involved in owning, storing, transporting or using such equipment.</p> <p>Soil moisture density gauges are used on construction sites, so they are transported to the test site in motor vehicles. They must be protected from damage and stored safely and securely while not in use. The operator must ensure that bystanders are kept clear to minimise radiation exposure. Owners of gauges are required to have documented procedures and ensure that operators are adequately trained. To ensure the safety and integrity of the gauge, radiation surveys are required at regular intervals. A hand-held radiation meter is used, and the results recorded.</p>

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Codes of practice

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Identify, control and report OHS and environmental hazards	1.1. Routinely check immediate work area for hazards prior to commencing and during work 1.2. Address hazards within area of responsibility 1.3. Report hazards and incidents to designated personnel according to enterprise policies and procedures
2. Conduct work safely	2.1. Select, fit and use appropriate personal protective clothing and equipment 2.2. Follow enterprise procedures when carrying out work tasks 2.3. Keep all work areas clean and free from obstacles 2.4. Maintain enterprise standards of personal hygiene 2.5. Safely store, transport and dispose of hazardous materials and dangerous goods
3. Follow incident and emergency response procedures	3.1. Identify incident and emergency situations 3.2. Report and record incident and emergency situations according to enterprise procedures 3.3. Follow incident and emergency procedures as appropriate to the nature of emergency, using emergency equipment according to enterprise procedures
4. Contribute to OHS in the workplace	4.1. Raise OHS and environmental issues with designated personnel in accordance with enterprise procedures and legislated rights and obligations of employees 4.2. Participate in OHS activities within scope of responsibilities

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Required skills include:

- recognising potential incidents and taking appropriate corrective action
- demonstrating workplace fire drill, incident, first aid and emergency evacuation procedures
- hazard identification and risk control, following OHS and environmental policies and procedures
- using, storing and maintaining personal protective equipment
- storing, transporting and disposing of dangerous goods following enterprise instructions and procedures
- using equipment to protect health and safety
- promptly communicating health and safety and environmental issues to designated personnel

Required knowledge

Required knowledge includes:

- roles, rights and responsibilities of self and employer
- signage, symbols and signals relating to OHS
- hazards commonly found in own job and work area and standard risk controls
- location and purpose of personal protective equipment and emergency/hazard control equipment in the work area, including first aid facilities and personnel
- use, care and storage requirements for personal protective clothing and equipment used
- location of advice and information on OHS issues, including material safety data sheets (MSDS)
- requirements and procedures for reporting OHS hazards and incidents, including injuries, illness and near misses
- the processes for raising a health and safety issue or concern
- safe work practices, including handling, storage and disposal of hazardous substances and requirements for labelling of hazardous substances
- work practices for use of handling equipment and any task-specific manual handling techniques as required by work role, according to enterprise procedures
- standard operating procedures (SOPs) for equipment used and key safety elements of the procedures
- environmental impacts and effects of interaction with hazards in the work area
- enterprise procedures and instructions that govern personal work, incidents and emergencies

REQUIRED SKILLS AND KNOWLEDGE

- reporting requirements for OHS issues and potentially hazardous situations
- site layout, including emergency exits, location and use of safety alarms, emergency response system, procedures and personnel
- enterprise OHS and environmental policies and procedures

Evidence Guide

EVIDENCE GUIDE	
<p>The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>Assessors should ensure that candidates can:</p> <ul style="list-style-type: none"> • work safely • recognise potential incidents and hazards and take appropriate corrective action • follow workplace incident, first aid and emergency response procedures • promptly communicate OHS and environmental issues to designated personnel.
Context of and specific resources for assessment	<p>This unit of competency is to be assessed in the workplace or simulated workplace environment.</p> <p>This unit of competency may be assessed with:</p> <ul style="list-style-type: none"> • other relevant technical units of competency. <p>Resources may include:</p> <ul style="list-style-type: none"> • laboratory/field work environment, equipment and materials • personal protective equipment • enterprise procedures.
Method of assessment	<p>The following assessment methods are suggested:</p> <ul style="list-style-type: none"> • observation of the candidate preparing for and undertaking a range of work tasks • written and/or oral questioning to assess underpinning knowledge and likely reactions in hazardous/emergency situations • feedback from peers and supervisors • review of candidate's responses to case studies, scenarios and/or 'what ifs'. <p>In all cases, practical assessment should be supported by questions to assess underpinning knowledge and those aspects of competency which are difficult to assess directly.</p> <p>Where applicable, reasonable adjustment must be made to work environments and training situations to</p>

EVIDENCE GUIDE	
	<p>accommodate ethnicity, age, gender, demographics and disability.</p> <p>Access must be provided to appropriate learning and/or assessment support when required.</p> <p>The language, literacy and numeracy demands of assessment should not be greater than those required to undertake the unit of competency in a work like environment.</p>
This competency in practice	<p>Industry representatives have provided the case studies below to illustrate the practical application of this unit of competency and show its relevance in a workplace setting.</p> <p>Manufacturing</p> <p>A laboratory assistant working in a laboratory was asked to produce a particular solvent-borne paint. Because of the hazardous nature of the task, the assistant referred to the MSDS which specified that a particular respirator and gloves be used. The assistant followed the requirements and safely prepared the batch of paint.</p> <p>Food processing</p> <p>One task of a laboratory assistant in a food processing company is the determination of total nitrogen in food samples by the Kjeldahl method. The assay involves digestion of the food with an aliquot of 30% hydrogen peroxide and several other reagents at more than 400°C. The assistant is familiar with the MSDS for hydrogen peroxide and uses this chemical with appropriate caution and personal protective equipment. Small spills of hydrogen peroxide sometimes occur. The assistant knows to clean these up immediately by liberally diluting the spill with water, mopping it up with a cloth and washing the hydrogen peroxide from the cloth into a sink with copious amounts of water. This attention to cleanliness is essential to minimise the risk of injury because 30% hydrogen peroxide has the appearance of water. Unlike water, it is corrosive to skin and presents a serious fire or explosion hazard if it should come into contact with many of the chemicals used in the laboratory.</p> <p>Biomedical</p> <p>After performing and verifying cell counts of plated samples, a technical assistant proceeded to dispose of the</p>

EVIDENCE GUIDE

waste. The wastes were placed in a biohazard bag. The bag was sealed with a sterilisation indicator sticker that was clearly visible, and placed in the autoclave. The assistant checked the colour of the indicator sticker to ensure that the waste was correctly processed before disposing of the bag in accordance with SOPs.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Codes of practice

Where reference is made to industry codes of practice, and/or Australian/international standards, it is expected the latest version will be used

Standards, codes, procedures and/or enterprise requirements

Standards, codes, procedures and/or enterprise requirements may include:

- Australian and international standards such as:
 - AS 1678 Emergency procedure guide - Transport
 - AS 1940-2004 Storage and handling of flammable and combustible liquids
 - AS 2252 Biological safety cabinets
 - AS 3780-2008 The storage and handling of corrosive substances
 - AS ISO 17025-2005 General requirements for the competence of testing and calibration laboratories
- AS/NZS 1269 Set:2005 Occupational noise management set
- AS/NZS 1337 Eye protection
- AS/NZS 2161 Set:2008 Occupational protective gloves set
- AS/NZS 2210:1994 Occupational protective footwear
 - AS/NZS 2243 Set:2006 Safety in laboratories set
- AS/NZS 2982.1:1997 Laboratory design and construction - General requirements
 - AS/NZS 4452:1997 The storage and handling of toxic substances
- AS/NZS 4501 Set:2008 Occupational clothing set
 - AS/NZS ISO 14000 Set:2005 Environmental management standards set

RANGE STATEMENT	
	<ul style="list-style-type: none"> • HB 9-1994 Occupational personal protection • Australian Dangerous Goods Code • Australian Quarantine and Inspection Service (AQIS) Import Guidelines • Australian Radiation Protection and Nuclear Safety Agency (ARPANSA) Codes of Practice • gene technology regulations • Guide to physical containment levels and facility types • National Code of Practice for the labelling of workplace substances [NOHSC:2012 (1994)] • OHS national standards and codes of practice
Routine checks	<p>Routine checks may include:</p> <ul style="list-style-type: none"> • general housekeeping checks, such as obstructions which may cause trip hazards • checking of safety equipment, such as eye wash stations • checking reagents and equipment are safe to use • checking availability of emergency equipment • checking functionality of personal protective equipment
Hazards	<p>Hazards may include:</p> <ul style="list-style-type: none"> • electric shock • microbiological organisms and agents associated with soil, air, water, blood and blood products, and human or animal tissue and fluids • solar radiation, dust and noise • chemicals, such as acids, heavy metals, pesticides and hydrocarbons • aerosols from broken centrifuge tubes and pipetting • radiation, such as alpha, beta, gamma, X-ray and neutron • sharps, broken glassware and hand tools • flammable liquids • cryogenics, such as dry ice and liquid nitrogen • fluids under pressure, such as steam, hydrogen in gas liquid chromatography and acetylene in atomic absorption spectrometry

RANGE STATEMENT	
	<ul style="list-style-type: none"> • sources of ignition • high temperature ashing processes • disturbance or interruption of services • occupational overuse syndrome, slips, trips and falls • manual handling, working at heights and working in confined spaces • crushing, entanglement and cuts associated with moving machinery or falling objects • pedestrian and vehicular traffic • vehicle and boat handling
Addressing hazards	<p>Addressing hazards may include:</p> <ul style="list-style-type: none"> • hazard and incident reporting and investigation procedures • elimination • substitution, such as review of nature of substances or processes used • isolation: <ul style="list-style-type: none"> • use of appropriate equipment, such as biohazard containers, laminar flow cabinets, Class I, II and III biohazard cabinets • Class PCII, PCIII, and PCIV physical containment laboratories • engineering • administrative procedures, such as: <ul style="list-style-type: none"> • ensuring access to service shut-off points • recognising and observing hazard warnings and safety signs • labelling of samples, reagents, aliquoted samples and hazardous materials • handling and storage of all hazardous materials and equipment in accordance with labelling, MSDS and manufacturer's instructions • identifying and reporting operating problems or equipment malfunctions • cleaning and decontaminating equipment and work areas regularly using recommended procedures • applying containment procedures

RANGE STATEMENT	
	<ul style="list-style-type: none"> • following established manual handling procedures for tasks involving manual handling • use of appropriate equipment and procedures to avoid personal contamination and contamination of others • following risk control measures to minimise environmental hazards • use of practices which minimise waste • reporting to appropriate personnel of abnormal emissions, discharges and airborne contaminants, such as noise, light, solids, liquids, water/waste water, gases, smoke, vapour, fumes, odour and particulates • minimising exposure to radiation, such as lasers, electromagnetic and ultraviolet • use MSDS • use of signage, barriers and service isolation tags • use of personal protective equipment, such as hard hats, hearing protection, sunscreen lotion, gloves, safety glasses, goggles, face guards, coveralls, gown, body suits, respirators and safety boots
Designated personnel	<p>Designated personnel may include:</p> <ul style="list-style-type: none"> • laboratory manager • supervisor • OHS coordinator • OHS representative
Enterprise policies and procedures	<p>Enterprise policies and procedures may refer to:</p> <ul style="list-style-type: none"> • OHS specific procedures, such as hazard and incident reporting, communication, consultation and issue resolution and risk management • controlling known hazards • minimising environmental threats • minimising and disposing of waste • responding to safety, emergency, fire and incidents • selecting/using personal protective clothing

RANGE STATEMENT	
	and equipment
Incidents	<p>Incidents may include:</p> <ul style="list-style-type: none"> • workplace injury and accidents • cutting, stabbing, puncturing, crushing, immersion in water, suffocation, hypothermia, burns, heat stress, animal bites, allergic reactions and assaults • biological, chemical or radioactive spills, fire, bomb threat, security threat and explosion
Emergency equipment	<p>Emergency equipment may include:</p> <ul style="list-style-type: none"> • first aid equipment • eye wash kit or shower • fire extinguisher
Participating in OHS activities	<p>Participating in OHS activities may include:</p> <ul style="list-style-type: none"> • seeking assistance to clarify obligations and procedures • clarifying work instructions that impact on safety and legal liability
OHS and environmental issues which may need to be raised by employees with designated personnel	<p>OHS and environmental issues which may need to be raised by employees with designated personnel may include:</p> <ul style="list-style-type: none"> • identification of hazards not otherwise addressed • assessment of risk and decisions on measures to control risk • risk reduction measures • problems with implementation of controls • problems with recycling, by-product collection and waste disposal • investigation of injury and incidents • clarification of understanding of OHS policies and procedures
OHS and environmental management requirements	<p>OHS and environmental management requirements:</p> <ul style="list-style-type: none"> • all operations must comply with enterprise OHS and environmental management requirements, which may be imposed through state/territory or federal legislation - these requirements must not be compromised at any

RANGE STATEMENT

	<p>time</p> <ul style="list-style-type: none"> • all operations assume the potentially hazardous nature of samples and require standard precautions to be applied • where relevant, users should access and apply current industry understanding of infection control issued by the National Health and Medical Research Council (NHMRC) and State and Territory Departments of Health

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Perform all work safely	1.1. Use established work practices and personal protective equipment to ensure personal safety and that of other laboratory personnel 1.2. Clean, care for and store equipment, materials and reagents as required 1.3. Minimise the generation of wastes and environmental impacts 1.4. Ensure safe disposal of laboratory/hazardous wastes
2. Ensure others in the work group are able to implement safe work practices	2.1. Ensure hazard controls and personal protective clothing and equipment appropriate to the work requirements are available and functional 2.2. Provide and communicate current information on OHS and environmental policies, procedures and programs to others 2.3. Ensure hazards and control measures relating to work responsibilities are known by those in the work area 2.4. Provide support to those in the work area to implement procedures to support safety 2.5. Identify and address training needs within level of responsibility
3. Monitor observance of safe work practices in the work area	3.1. Ensure enterprise procedures are clearly defined, documented and followed 3.2. Identify any deviation from identified procedures and report and address within level of responsibility 3.3. Ensure personal behaviour is consistent with enterprise policies and procedures 3.4. Encourage and follow up others to identify and report hazards in the work area 3.5. Monitor conditions and follow up to ensure housekeeping standards in the work area are maintained
4. Participate in risk management processes	4.1. Report and address any identified hazards and inadequacies in existing risk controls within level of responsibility and according to enterprise procedures 4.2. Participate in risk assessments to identify and analyse risks 4.3. Support the implementation of procedures to control risk (based on the hierarchy of control) 4.4. Ensure records of incidents in the work area and

ELEMENT	PERFORMANCE CRITERIA
	other required documentation are accurately completed and maintained according to enterprise procedures and legislative requirements
5. Support the implementation of participative arrangements	5.1. Inform and consult work group on OHS and environmental issues relevant to the work role 5.2. Promptly report outcomes of consultation on OHS and environmental issues back to the work group 5.3. Resolve, or promptly refer to appropriate personnel, matters raised relating to OHS and the environment
6. Support the implementation of emergency procedures within the work group	6.1. Ensure that enterprise procedures for dealing with incidents and emergencies are available and known by work group 6.2. Implement processes to ensure that others in the work area are able to respond appropriately to incidents and emergencies 6.3. Participate, as required, in investigations of hazardous incidents to identify their cause

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Required skills include:

- performing all work safely
- following procedures for hazard identification and risk control
- ensuring others in the team are able to implement safe work practices
- preparing brief reports for a range of target groups, including OHS committees, OHS representatives, managers and supervisors

Required knowledge

Required knowledge includes:

- definition of hazard, physical hazard, risk and risk management
- hazards commonly found in the work area and standard risk controls
- signage, symbols and signals relating to OHS
- location and purpose of personal protective equipment and emergency/hazard control equipment in the work area, including first aid facilities and personnel
- use, care and storage requirements for personal protective clothing and equipment used in work areas
- roles and responsibilities under OHS legislation of employers and employees, including supervisors and contractors
- requirements for record keeping that address OHS, privacy and other relevant legislation
- principles and practices of effective OHS management, including hazard identification, risk assessment and risk control
- the hierarchy of control
- enterprise procedures for OHS and environmental management
- key personnel within enterprise management structure and the OHS management system
- sources of OHS information, including specialist advisors
- the elements of an OHS management system which includes that part of the enterprise's overall management system for developing, implementing, reviewing and maintaining the activities for managing OHS risks associated with their business
- how the characteristics and composition of the workforce impact on OHS management

Evidence Guide

EVIDENCE GUIDE	
<p>The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>Assessors should ensure that candidates can:</p> <ul style="list-style-type: none"> • work safely at all times • ensure others in the workgroup work safely and follow OHS and environmental policies and procedures for hazard identification and risk control • communicate OHS and environmental issues with designated personnel • ensure that enterprise procedures for dealing with incidents and emergencies are available and known by work group • communicate effectively with personnel at all levels within the enterprise and OHS specialists • prepare brief reports for a range of target groups.
Context of and specific resources for assessment	<p>This unit of competency is to be assessed in the workplace or simulated workplace environment.</p> <p>Resources may include:</p> <ul style="list-style-type: none"> • laboratory/field work environment, equipment and materials • personal protective equipment and safety equipment • enterprise OHS management system, policies and procedures.
Method of assessment	<p>The following assessment methods are suggested:</p> <ul style="list-style-type: none"> • feedback from peers and supervisors • review of documentation prepared by candidate, such as OHS committee minutes, risk assessments and incident reports • written and/or oral questioning to assess underpinning knowledge of principles and practices of effective OHS management and the enterprise's OHS management system, OHS policies and procedures • observation of the candidate preparing for and undertaking a range of work tasks.

EVIDENCE GUIDE

	<p>In all cases, practical assessment should be supported by questions to assess underpinning knowledge and those aspects of competency which are difficult to assess directly.</p> <p>Where applicable, reasonable adjustment must be made to work environments and training situations to accommodate ethnicity, age, gender, demographics and disability.</p> <p>Access must be provided to appropriate learning and/or assessment support when required.</p> <p>The language, literacy and numeracy demands of assessment should not be greater than those required to undertake the unit of competency in a work like environment.</p>
This competency in practice	<p>Industry representatives have provided the case study below to illustrate the practical application of this unit of competency and to show its relevance in a workplace setting.</p> <p>Education</p> <p>A technical officer working for a university biology school assists honours and final year undergraduate students to perform their own experiments. The students discuss what technical work they want to do with the technical officer and what reagents and equipment will be needed. The technical officer provides MSDS and other information to the student. He/she also conducts a risk assessment to identify and analyse the risks, selects appropriate controls and outlines the risk management process to be used. In some cases, the toxicity of mixtures and the waste generated by experiments may pose an unacceptable level of risk and the technical officer will suggest safer alternatives.</p>

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Codes of practice

Where reference is made to industry codes of practice, and/or Australian/international standards, it is expected the latest version will be used

Standards, codes, procedures and/or enterprise requirements

Standards, codes, procedures and/or enterprise requirements may include:

- Australian and international standards such as:
 - AS 1678 Emergency procedure guide - Transport
 - AS 1940-2004 Storage and handling of flammable and combustible liquids
 - AS 2252 Biological safety cabinets
 - AS 3780-2008 The storage and handling of corrosive substances
 - AS ISO 17025-2005 General requirements for the competence of testing and calibration laboratories
- AS/NZS 1269 Set:2005 Occupational noise management set
- AS/NZS 1337 Eye protection
- AS/NZS 2161 Set:2008 Occupational protective gloves set
- AS/NZS 2210:1994 Occupational protective footwear
 - AS/NZS 2243 Set:2006 Safety in laboratories set
- AS/NZS 2982.1:1997 Laboratory design and construction - General requirements
 - AS/NZS 4452:1997 The storage and handling of toxic substances
- AS/NZS 4501 Set:2008 Occupational clothing set
 - AS/NZS ISO 14000 Set:2005 Environmental management standards set

RANGE STATEMENT	
	<ul style="list-style-type: none"> • HB 9-1994 Occupational personal protection • Australian Dangerous Goods Code • Australian Quarantine and Inspection Service (AQIS) Import Guidelines • Australian Radiation Protection and Nuclear Safety Agency (ARPANSA) Codes of Practice • gene technology regulations • Guide to physical containment levels and facility types • National Code of Practice for the labelling of workplace substances [NOHSC:2012 (1994)] • OHS national standards and codes of practice
Hazards	<p>Hazards may include:</p> <ul style="list-style-type: none"> • electric shock • microbiological organisms and agents associated with soil, air, water, blood and blood products, and human or animal tissue and fluids • solar radiation, dust and noise • chemicals, such as acids, heavy metals, pesticides and hydrocarbons • aerosols from broken centrifuge tubes and pipetting • radiation, such as alpha, beta, gamma, X-ray and neutron • sharps, broken glassware and hand tools • flammable liquids and gases • cryogenics, such as dry ice and liquid nitrogen • fluids under pressure, such as steam, hydrogen in gas liquid chromatography and acetylene in atomic absorption spectrometry • sources of ignition • high temperature ashing processes • disturbance or interruption of services • occupational overuse syndrome, slips, trips and falls • manual handling, working at heights and working in confined spaces • crushing, entanglement and cuts associated with moving machinery or falling objects • pedestrian and vehicular traffic

RANGE STATEMENT	
	<ul style="list-style-type: none"> • vehicle and boat handling • factors, such as inadequate work practices, lack of training or fatigue are not hazards but are conditions that may result in the loss of control of the hazard and cause injury or damage
Addressing hazards	<p>Addressing hazards may include:</p> <ul style="list-style-type: none"> • hazard and incident reporting and investigation procedures • elimination • substitution, such as review of nature of substances or processes used • isolation: <ul style="list-style-type: none"> • use of appropriate equipment, such as biohazard containers, laminar flow cabinets, Class I, II and III biohazard cabinets • Class PCII, PCIII, and PCIV physical containment laboratories • engineering • administrative procedures, such as: <ul style="list-style-type: none"> • ensuring access to service shut-off points • recognising and observing hazard warnings and safety signs • labelling of samples, reagents, aliquoted samples and hazardous materials • handling and storing hazardous materials and equipment in accordance with labelling, MSDS and manufacturer's instructions • identifying and reporting operating problems or equipment malfunctions • cleaning and decontaminating equipment and work areas regularly using enterprise procedures • applying containment procedures • following established manual handling procedures for tasks involving manual handling • using appropriate equipment and procedures to avoid personal contamination and contamination of others

RANGE STATEMENT	
	<ul style="list-style-type: none"> • following risk control measures to minimise environmental hazards • using practices which minimise waste • reporting to appropriate personnel of abnormal emissions, discharges and airborne contaminants, such as noise, light, solids, liquids, water/waste water, gases, smoke, vapour, fumes, odour and particulates • minimising exposure to radiation, such as lasers, electromagnetic and ultraviolet • using MSDS • using signage, barriers and service isolation tags • using personal protective equipment, such as hard hats, hearing protection, sunscreen lotion, gloves, safety glasses, goggles, face guards, coveralls, gowns, body suits, respirators and safety boots
Enterprise policies, procedures and programs include those that directly or indirectly cover OHS and environmental issues	<p>Enterprise policies, procedures and programs include those that directly or indirectly cover OHS and environmental issues, such as:</p> <ul style="list-style-type: none"> • hazards and control measures • minimisation of environmental threats • minimisation and disposal of waste • standard operating procedures (SOPs), work instructions, laboratory manuals, operator's manuals and manufacturers' operating manuals • safety, emergency, fire and other incidents • selection and use of personal protective clothing and equipment • reporting of hazards and incidents • consultation and issue resolution • risk management • contractor and employee handbooks • formulas and batch sheets • industry codes of practice and guidelines
Risk assessment	<p>Risk assessment includes:</p> <ul style="list-style-type: none"> • analysing the risk • identifying factors influencing the risk and the range of potential consequences

RANGE STATEMENT	
	<ul style="list-style-type: none"> • effectiveness of existing controls • likelihood of each consequence considering exposure and hazard level • combining these in some way to obtain a level of risk • comparison of the determined risk with pre-established criteria for tolerance (or as low as reasonably achievable) and the subsequent ranking of risks requiring control
Hierarchy of control	<p>Hierarchy of control includes:</p> <ul style="list-style-type: none"> • the preferred order of risk-control measures from most to least preferred, that is: <ul style="list-style-type: none"> • eliminating risk • substituting with a lesser hazard • isolating personnel from hazard • engineering controls • applying administrative controls (e.g. procedures and training) • using personal protective equipment
OHS and environmental issues	<p>OHS and environmental issues may include:</p> <ul style="list-style-type: none"> • identification of hazards • assessment of risk and decisions on measures to control risk • risk reduction measures • implementation of controls • investigation of injury and incidents • hazards not otherwise addressed • problems in implementing risk controls • incidents • clarification of policies or procedures
Consultation with the workgroup on OHS and environmental issues	<p>Consultation with the workgroup on OHS and environmental issues may involve:</p> <ul style="list-style-type: none"> • following OHS procedures and environmental risk control measures • information sessions on existing or new issues • meetings between employer and employees or representatives • access to relevant workplace information • use of clear and understandable language

RANGE STATEMENT	
	<ul style="list-style-type: none"> • provision for non-English speaking personnel • provision for hearing-impaired personnel • awareness of databases and online software for the inventory, manifest and information retrieval regarding hazardous materials • formal arrangements, such as health and safety committees and health and safety representatives (where appointed) • informal arrangements, such as toolbox meetings and coffee breaks
Incidents and emergencies	<p>Incidents and emergencies may include:</p> <ul style="list-style-type: none"> • workplace injury and accidents • biological and chemical spills • leakage of radioactivity • fire • bomb threat • security threat
OHS and environmental management requirements	<p>OHS and environmental management requirements:</p> <ul style="list-style-type: none"> • all operations must comply with enterprise OHS and environmental management requirements, which may be imposed through state/territory or federal legislation - these requirements must not be compromised at any time • all operations assume the potentially hazardous nature of samples and require standard precautions to be applied • where relevant, users should access and apply current industry understanding of infection control issued by the National Health and Medical Research Council (NHMRC) and State and Territory Departments of Health

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare for pickup	1.1. Confirm pickup sequence and any licence/permit requirements with supervisor 1.2. Check that vehicle and communication devices are in working order 1.3. Check that required transport containers and materials are in the vehicle
2. Pick up and transport items	2.1. Confirm the number and nature of items to be picked up on arrival 2.2. Ensure items match paperwork 2.3. Apply enterprise requirements to the transport of samples and/or equipment 2.4. Alert laboratory personnel to any special needs that are identified on documents accompanying the items 2.5. Complete required documentation at pickup point 2.6. Stow items in the specified transport containers and under the required conditions 2.7. Maintain sample integrity at all times 2.8. Deliver items to reception point in accordance with enterprise procedures 2.9. Maintain confidentiality of information
3. Maintain transport equipment	3.1. Maintain vehicle according to enterprise requirements 3.2. Maintain state of transport containers to ensure they are fit for purpose 3.3. Requisition stocks of consumable materials as required 3.4. Replenish stocks of collecting equipment at collection centres as required
4. Maintain a safe work environment	4.1. Use established work practices and personal protective equipment to ensure personal safety and that of others 4.2. Clean up spills, if they occur, using enterprise procedures 4.3. Minimise the generation of waste 4.4. Dispose of all waste in accordance with enterprise procedures

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Required skills include:

- planning the picking up of items in conjunction with a supervisor
- preparing a vehicle for the required journey
- using communication devices so contact is possible between the courier, reception centre, and routine pickup locations
- communicating effectively and courteously with individuals, customers, clients and reception staff
- recording details of item exchange in relevant sections of chain of custody forms, as required
- maintaining the integrity of collected samples or equipment during transport
- containing and cleaning up spillage or breakages
- using appropriate techniques and equipment to safely dispose of waste materials
- maintaining confidentiality in all aspects of work
- reporting of problems, accidents or incidents in accordance with enterprise procedures

Required knowledge

Required knowledge includes:

- the relationship between effective communication with clients and customers and enterprise business
- the need for appropriate and timely transport
- control measures for minimising exposure to hazardous materials and equipment
- effect of changes in environmental conditions, vibration and shock on samples
- procedures for the containment and cleanup of spillages and breakages
- efficient waste containment and disposal practices
- maintenance requirements of equipment used in the processes of handling and transporting samples
- relevant health, safety and environment requirements
- enterprise procedures for responding to emergencies
- contact details for key personnel

Specific industry

Additional knowledge requirements may apply for different industry sectors. For example: Biomedical samples:

- labile nature of biological and environmental samples
- possible infectivity of biological materials

REQUIRED SKILLS AND KNOWLEDGE

Evidence Guide

EVIDENCE GUIDE	
<p>The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>Assessors should ensure that candidates can:</p> <ul style="list-style-type: none"> • follow required policies and procedures to maintain the integrity of collected samples or equipment during transport • deal with customers effectively and courteously • work safely • maintain confidentiality and report problems, accidents and incidents in accordance with procedures.
Context of and specific resources for assessment	<p>This unit of competency is to be assessed in the workplace or simulated workplace environment.</p> <p>This unit of competency may be assessed with:</p> <ul style="list-style-type: none"> • <i>MSL943002A Participate in laboratory/field workplace safety.</i> <p>Resources may include:</p> <ul style="list-style-type: none"> • vehicle • enterprise procedures for the handling and transport of samples or equipment • communication devices • sample containers • containers for transporting samples and test/calibration equipment.
Method of assessment	<p>The following assessment methods are suggested:</p> <ul style="list-style-type: none"> • review of the job sheets or journal of completed activities • direct observation of work as a courier • the quality of review of results traceable to the transport of samples or equipment by candidate • oral or written questions to assess knowledge of the handling of unforeseen circumstances • simulated role plays between a courier and personnel at a reception desk or customer pickup centre.

EVIDENCE GUIDE

	<p>In all cases, practical assessment should be supported by questions to assess underpinning knowledge and those aspects of competency which are difficult to assess directly.</p> <p>Where applicable, reasonable adjustment must be made to work environments and training situations to accommodate ethnicity, age, gender, demographics and disability.</p> <p>Access must be provided to appropriate learning and/or assessment support when required.</p> <p>The language, literacy and numeracy demands of assessment should not be greater than those required to undertake the unit of competency in a work like environment.</p>
<p>This competency in practice</p>	<p>Industry representatives have provided the case studies below to illustrate the practical application of this unit of competency and show its relevance in a workplace setting.</p> <p>Calibration</p> <p>Calibration laboratories must take special care to ensure that they do not damage test equipment during handling, testing or storage. Information relating to equipment requiring special handling, transport or storage conditions should be provided to those responsible for collecting and transporting the items.</p> <p>A customer-orientated calibration laboratory offers a door to door calibration service to most of its clients. Once a week their driver arrives at a major facility and takes delivery of several precision measuring instruments. As always, the driver signs the acceptance note paying particular attention that all the items are recorded correctly, including listing all accessories and associated handbooks. But this time, two delicate items require unique transit cases to ensure they are stored and transported upright. Because the laboratory received prior notice, these cases were loaded into the van before setting off as well as a copy of the special transport and packaging instructions. The driver secures all the items in accordance with the accompanied written instructions to ensure their safe travel and minimise damage during transit. Upon return, the driver unloads the van and the instruments are acquitted by administration staff,</p>

EVIDENCE GUIDE

inspected for damage and booked into the laboratory. The lab supervisor makes sure that their technicians are aware of the special handling requirements of the two delicate instruments.

Biotechnology

During transit, samples must be handled and maintained under conditions which will ensure that their potency and efficacy are maintained. A courier has been asked to transport vaccine samples from the airport to the enterprise for laboratory evaluation. The supervisor faxes the courier company detailed instructions regarding pickup and handling/storage conditions during transit. In this case, the samples are in insulated containers and the temperature is monitored and recorded continuously. The courier collects the samples, puts them in the coolest part of the vehicle, ensuring that the package will not be subject to any sudden jolts, and transports them to the enterprise. After the samples arrive they are checked by the enterprise and appropriate documentation completed.

Biomedical

At 8 am the courier commences the day shift. The shift supervisor identifies the collection centres to be visited. The courier takes the mobile phone from the charger and checks their pager. In the vehicle, the courier logs in the odometer reading, makes a mental note of the fuel level, checks the cooler boxes and other equipment and carefully drives out. Today, there are pickups from four private hospitals and 12 collecting centres in a 200 sq km zone. As they approach the first hospital, there is a call from base with instructions to collect a tissue biopsy and bring it back immediately. He/she asks the base contact to tell haematology that their 10 am specimen arrival will be 40 minutes late because of this unforeseen diversion. Eventually, they complete the round, having remembered to replenish specimen collecting stock at each centre visited.

Environmental (1)

A technical assistant regularly handles and transports sensitive equipment over rough terrain in a 4WD vehicle. After reaching a field site, they are asked to transport expensive water monitoring equipment across an estuary in a small aluminium boat. The assistant notes that the equipment boxes are open to the weather and will need to be made waterproof. Because the water is choppy, the

EVIDENCE GUIDE

assistant adds extra packing material to cushion the most shock sensitive items. They choose to travel with the equipment rather than entrusting it to the local fisherman. Together, they carefully secure the items on the seats rather than placing them on the floor of the boat which is wet.

Environmental (2)

A waste management authority has sent one of their laboratory technicians to collect six containers that have been found by a member of the public on the verge of an industrial area service road. Given that the materials may be hazardous the technician assembles a full set of safety equipment. They also locate a laptop computer with MSDS information, a list of phone contacts for agencies responsible for handling hazardous materials and suitable containers for storing/transporting potentially hazardous materials. Upon arrival at the site, the technician locates six containers of concentrated sulphuric acid which are clearly labelled. The technician consults the MSDS for information on appropriate handling, storage and transportation procedures and follows them closely.

Range Statement

RANGE STATEMENT	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
Codes of practice	Where reference is made to industry codes of practice, and/or Australian/international standards, it is expected the latest version will be used.
Standards, codes, procedures and/or enterprise requirements	<p>Standards, codes, procedures and/or enterprise requirements may include:</p> <ul style="list-style-type: none"> • Australian and international standards such as: • AS 1678 Emergency procedure guide -Transport • AS 1940-2004 Storage and handling of flammable and combustible liquids • AS 4332-2004 The storage and handling of gases in cylinders • AS ISO 17025-2005 General requirements for the competence of testing and calibration laboratories • AS/NZS 2243 Set:2006 Safety in laboratories set • AS/NZS 4452:1997 The storage and handling of toxic substances • AS/NZS ISO 14000 Set:2005 Environmental management standards set • animal welfare legislation and codes of practice • Australia Post Guides • Australian Dangerous Goods Code • Australian Radiation Protection and Nuclear Safety Agency (ARPANSA) Codes of Practice • International Air Transport Association (IATA) Regulations • material safety data sheets (MSDS) • occupational health and safety (OHS) national standards and codes of practice
Paperwork and documentation	Paperwork and documentation may include:

RANGE STATEMENT	
	<ul style="list-style-type: none"> • enterprise protocols regarding customer liaison and communication • vehicle log books • protocols for use of pagers, mobile telephones and two-way radios • precautions for safe handling and handling of specific materials (e.g. toxic, infective, radioactive and dangerous goods) • precautions for the transport of volatile and unstable fluids • incident/accident report forms • spillage and waste containment and disposal protocols and containment materials
Maintenance of the integrity of samples or test/calibration equipment	<p>Maintenance of the integrity of samples or test/calibration equipment could involve:</p> <ul style="list-style-type: none"> • use of appropriate sample containers (glass, plastic and opaque) • use of appropriate preservatives • wrapping container in foil to exclude light • temperature control, which may involve prevention of direct contact between the sample and coolant • use of appropriate equipment boxes (insulated, shockproof and waterproof) • restraint of containers to prevent movement • checking sample viability during transport while avoiding unnecessary handling
Hazards	<p>Hazards may include:</p> <ul style="list-style-type: none"> • biohazards, such as micro-organisms and agents associated with soil, air, water, blood and blood products, and human or animal tissue and fluids • chemicals, such as acids and hydrocarbons • sharps and broken glassware • manual handling of heavy sample bags and containers and equipment
Safety practices	<p>Safety practices may include:</p> <ul style="list-style-type: none"> • use of MSDS • use personal protective equipment, such as gloves, safety glasses, goggles and coveralls

RANGE STATEMENT	
	<ul style="list-style-type: none"> • use of biohazard containers • safe road/off road driving practices • correct labelling of hazardous materials • handling and storing hazardous material and equipment in accordance with labels, MSDS, manufacturer's instructions, and enterprise procedures and regulations • regular cleaning and/or decontaminating of equipment and vehicle
Occupational health and safety (OHS) and environmental management requirements	<p>OHS and environmental management requirements:</p> <ul style="list-style-type: none"> • all operations must comply with enterprise OHS and environmental management requirements, which may be imposed through state/territory or federal legislation - these requirements must not be compromised at any time • all operations assume the potentially hazardous nature of samples and require standard precautions to be applied • where relevant, users should access and apply current industry understanding of infection control issued by the National Health and Medical Research Council (NHMRC) and State and Territory Departments of Health

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Log samples	1.1. Record date (and time of arrival, if required) of samples at enterprise 1.2. Check and match samples with request forms before they are accepted 1.3. Enter samples into the laboratory information management system (LIMS) 1.4. Apply required document tracking mechanisms 1.5. Process 'urgent' test requests according to enterprise requirements 1.6. Ensure security and traceability of all information, laboratory data and records
2. Address customer service issues	2.1. Report to referring client when samples and request forms do not comply with enterprise requirements 2.2. Refer to supervisor for instruction where 'return to source' is inappropriate or not possible 2.3. Maintain confidentiality of all client/enterprise data and information 2.4. Ensure that information provided to customers is accurate, relevant and authorised for release 2.5. Deal with customers politely and efficiently and in accordance with enterprise procedures
3. Prepare samples for testing	3.1. Perform physical separation of the samples, as required 3.2. Prepare the required number of sub-samples 3.3. Perform chemical separation of the samples as required 3.4. Place samples in appropriate transport media, if appropriate 3.5. Monitor and control sample conditions before, during and after processing
4. Distribute samples	4.1. Group samples requiring similar testing requirements 4.2. Distribute samples to work stations maintaining sample integrity 4.3. Distribute request forms for data entry or filing in accordance with enterprise procedures 4.4. Check that samples and relevant request forms have been received by laboratory personnel
5. Maintain a safe work	5.1. Apply safe work practices to ensure personal safety

ELEMENT	PERFORMANCE CRITERIA
area and environment	and that of other laboratory personnel 5.2. Use appropriate protective equipment to ensure personal safety when sampling, processing, transferring or disposing of samples 5.3. Report all accidents and spillages to supervisor 5.4. Clean up splashes and spillages immediately using appropriate techniques and precautions 5.5. Minimise the generation of wastes and environmental impacts 5.6. Ensure the safe disposal of hazardous materials and other laboratory wastes

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Required skills include:

- receipt and logging in of samples
- checking of samples for history and acceptable transport conditions
- preparing and sub-sampling of samples
- labelling samples accurately and completely
- using standard precautions when dealing with potentially hazardous materials
- applying knowledge of the relationship between specific sample preparation and associated tests
- clarifying specific client requirements with appropriate personnel promptly
- labelling and storing samples in a way which maintains sample integrity and traceability
- disposing of samples following required procedures
- maintaining equipment and the workspace

Required knowledge

Required knowledge includes:

- enterprise procedures for the receipt, documentation, distribution and storage of samples
- potentially hazardous and unstable nature of samples
- requirement of specified sample types for specific tests
- importance of maintaining effective customer relations
- sample storage and transport requirements
- relevant health, safety and environment requirements

Specific industry

Additional knowledge requirements may apply for different industry sectors. For example: Biomedical laboratories:

- potentially infective nature of all biological materials
- nature of unstable solutions, such as anti-coagulated whole blood
- non-conformance of clotted samples for procedures, such as routine haematological tests

Evidence Guide

EVIDENCE GUIDE	
<p>The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>Assessors should ensure that candidates can:</p> <ul style="list-style-type: none"> • safely receive and log samples in accordance with enterprise procedures • apply knowledge of the relationship between sample preparation requirements and associated tests • deal with customers politely and efficiently • recognise and deal with problems according to enterprise procedures • maintain sample integrity and traceability.
Context of and specific resources for assessment	<p>This unit of competency is to be assessed in the workplace or simulated workplace environment.</p> <p>This unit of competency may be assessed with:</p> <ul style="list-style-type: none"> • <i>MSL913001A Communicate with other people</i> • <i>MSL943002A Participate in laboratory/field workplace safety.</i> <p>Resources may include:</p> <ul style="list-style-type: none"> • a selection of sample containers, tubes, request forms and sample documentation • simulated samples when an authentic sample is unavailable or inappropriate.
Method of assessment	<p>The following assessment methods are suggested:</p> <ul style="list-style-type: none"> • review of sample receipt and preparation records prepared by the candidate • feedback from supervisors and peers • direct observation of sample receipt and preparation • questioning to assess knowledge of procedures where direct observation is difficult (such as sample receipt and preparation in the field). <p>In all cases, practical assessment should be supported by questions to assess underpinning knowledge and those aspects of competency which are difficult to assess directly.</p>

EVIDENCE GUIDE	
	<p>Where applicable, reasonable adjustment must be made to work environments and training situations to accommodate ethnicity, age, gender, demographics and disability.</p> <p>Access must be provided to appropriate learning and/or assessment support when required.</p> <p>The language, literacy and numeracy demands of assessment should not be greater than those required to undertake the unit of competency in a work like environment.</p>
This competency in practice	<p>Industry representatives have provided the case studies below to illustrate the practical application of this unit of competency and show its relevance in a workplace setting.</p> <p>Environmental</p> <p>A laboratory assistant at a hazardous liquid waste recycling plant is required to log in all samples, match all samples with the in-house profile of the source of the waste, label them and activate the tracking procedure. He/she then prepares a sample for a series of standard tests which are determined by the profile of the waste material (acid or alkali, organic or heavy metal, etc). Given the hazardous nature of the waste, the laboratory assistant must use appropriate safety equipment at all times and ensure the safe disposal of all hazardous material. The assistant must work efficiently as these procedures are activated upon arrival of a road tanker and when the hazardous waste has been verified and judged acceptable for treatment at the plant by the laboratory supervisor. The laboratory assistant also liaises with the truck driver, or the referring client, should the samples (and/or subsequent tests) not comply with enterprise conditions for receiving the hazardous waste.</p> <p>Construction materials testing and mineral assay</p> <p>A laboratory assistant has received a consignment of disturbed soil samples from a client for classification testing. A test request and field logs have been sent by mail. Each sample is bagged and labelled, with the label showing the name of the client, project, date and sampling location, and a field description of the material. The laboratory policy is that samples weighing more than 20 kg must be bagged so that the individual bags do not exceed this limit and labelled as bag 1 of ..., bag 2 of ...</p>

EVIDENCE GUIDE

etc. The assistant checks to ensure all component bags of such samples are present. He/she is careful to handle the samples using safe manual handling techniques. The assistant arranges the samples in order of location and reconciles them with the test request and logs. Two samples have been shown on the request but have not been received. The assistant emails the technician who despatched them and subsequently is advised that they were overlooked during despatch and will be forwarded as soon as possible.

The assistant compares the samples with the field descriptions and finds that they match. Samples that are not designated for testing immediately are set aside in the laboratory store. The remainder are placed in trays for drying in the 50°C oven. The tray numbers are carefully written on the respective worksheets. When the samples have dried and cooled they are split out sufficiently for sieve analysis and plasticity testing, making allowance for the maximum particle size of each sample. The assistant is careful to avoid raising dust during the process.

Biomedical

A laboratory assistant has just started a shift in specimen reception and puts on a coat and gloves before touching any samples. There is a pile of samples and forms in the sample box. In some cases, the samples and forms are enclosed in a plastic bag. In other cases, they are seemingly unconnected. The assistant notices that one of the samples has a bloodstained label. She/he quickly examines the samples, isolates the leaking sample in a lockable plastic bag and places the related request form in the bag's separate compartment. The assistant then disposes of her/his dirty gloves. The assistant now logs all samples into the computer, placing to one side a sample and request form that is inadequately labelled. She/he makes a note to call the referring doctor as soon as possible. The assistant places the haematology samples in the colour-coded tray and calls the laboratory for their pickup. She/he then calls the doctor of the patient whose sample is inadequately labelled. She/he records the missing date of birth on the request form, and then barcode/labels tubes for the samples' testing. Within 30 minutes, she/he has cleared the first rush of samples. She/he takes the time to carefully empty the bin of

EVIDENCE GUIDE	
	wastes.

Range Statement

RANGE STATEMENT	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
Codes of practice	Where reference is made to industry codes of practice, and/or Australian/international standards, it is expected the latest version will be used
Standards, codes, procedures and/or enterprise requirements	<p>Standards, codes, procedures and/or enterprise requirements may include:</p> <ul style="list-style-type: none"> • Australian and international standards such as: <ul style="list-style-type: none"> • AS ISO 17025-2005 General requirements for the competence of testing and calibration laboratories • AS/NZS 2243 Set:2006 Safety in laboratories set • AS/NZS ISO 14000 Set:2005 Environmental management standards set • Australia Post Guides • Australian Dangerous Goods Code • Australian Radiation Protection and Nuclear Safety Agency (ARPANSA) Codes of Practice • enterprise operating procedures for preparing samples • enterprise quality manuals • gene technology regulations • International Air Transport Association (IATA) Regulations • material safety data sheets (MSDS) • occupational health and safety (OHS) national standards and codes of practice • procedure sheets for physical and chemical separation • procedure sheets indicating how samples and sub-samples are to be labelled, processed, distributed, flagged for urgent testing or for other non-routine requirements, including referral to external laboratories

RANGE STATEMENT	
	<ul style="list-style-type: none"> • procedure sheets indicating transport and storage requirements • safety manuals describing personal protective equipment requirements, control of hazardous wastes, containment and cleanup of spillages, and disposal and recycling of wastes
Samples received	<p>Samples received may include:</p> <ul style="list-style-type: none"> • gas or air samples • liquid samples, such as water and waste water, stormwater, sludges and complex mixtures and sewage • solid samples, such as soils and sediments, rocks/minerals, concrete, quarry or mining products • solid wastes, such as hazardous, non-hazardous, domestic, commercial, industrial, mining and agricultural • biological specimens such as tissue and blood • raw materials, start, middle, end of production run samples and final products
Hazards	<p>Hazards may include:</p> <ul style="list-style-type: none"> • biohazards, such as micro-organisms and agents associated with soil, air, water, blood and blood products, and human or animal tissue and fluids • dust and noise • chemicals, such as acids and hydrocarbons • aerosols • sharps and broken glassware • manual handling of heavy sample bags and containers • crushing, entanglement and cuts associated with moving machinery
Safe work practices	<p>Safe work practices may include:</p> <ul style="list-style-type: none"> • use of MSDS • use of personal protective equipment, such as hard hats, hearing protection, gloves, safety glasses, goggles, face guards, coveralls, gowns, body suits, respirators and safety boots • use of biohazard containers and laminar flow cabinets

RANGE STATEMENT	
	<ul style="list-style-type: none"> • correct labelling of reagents and hazardous materials • handling, and storing hazardous materials and equipment in accordance with labels, MSDS, manufacturer's instructions, and enterprise procedures and regulations • regular cleaning and/or decontamination of equipment and work areas
Occupational health and safety (OHS) and environmental management requirements	<p>OHS and environmental management requirements:</p> <ul style="list-style-type: none"> • all operations must comply with enterprise OHS and environmental management requirements, which may be imposed through state/territory or federal legislation - these requirements must not be compromised at any time • all operations assume the potentially hazardous nature of samples and require standard precautions to be applied • where relevant, users should access and apply current industry understanding of infection control issued by the National Health and Medical Research Council (NHMRC) and State and Territory Departments of Health

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare for handblowing operations	1.1. Identify job, appropriate procedure, hazards and safety requirements 1.2. Use personal protective equipment and safety procedures specified for the job and materials to be used 1.3. Record description of the job to be undertaken, compare with specification and report any variations 1.4. Select and prepare tools and equipment in accordance with job requirements 1.5. Identify glass stocks and components required for the job
2. Follow sequence of operations for glasswork procedure to be performed	2.1. Prepare glass stocks and components as required for the job 2.2. Check and adjust equipment and tools for the job as applicable 2.3. Start up equipment using enterprise procedures 2.4. Carry out glasswork procedure using the appropriate standard method 2.5. Monitor process and rectify routine problems 2.6. Follow equipment shutdown procedures
3. Use annealing equipment	3.1. Prepare annealing equipment for the job 3.2. Start up, operate and shut down annealing equipment using enterprise procedures 3.3. Monitor, adjust and record annealing operation 3.4. Rectify routine problems
4. Maintain a safe work environment	4.1. Follow established work practices to ensure safety of self and other workers 4.2. Minimise the generation of wastes 4.3. Ensure the safe disposal of wastes 4.4. Clean, care for and maintain work area, equipment and tools 4.5. Report any hazards or incidents according to enterprise procedures
5. Maintain records	5.1. Record data as per enterprise requirements 5.2. Maintain equipment logs as per enterprise requirements 5.3. Maintain security and confidentiality of enterprise information

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Required skills include:

- working safely with glass
- using tools and equipment to perform basic glassblowing operations
- using appropriate glassblowing hand manipulation techniques
- cutting, heating, bending, shaping, sealing and related glassworking techniques
- techniques for minimising strain
- using coefficients of expansion
- maintaining safe working pressures
- storing glass appropriately
- making and grinding components, such as stopcocks than meet specifications
- starting up, setting up, shutting down and maintaining equipment in accordance with work instructions
- selecting appropriate grades of glass and preparation for use
- optimising of equipment operating parameters
- maintaining temperature and stress parameters
- reporting atypical results and problems to appropriate personnel according to enterprise procedures
- recording and communicating of work results
- following correct occupational health and safety (OHS) and principles of good laboratory practice (GLP)

Required knowledge

Required knowledge includes:

- composition and nature of glass types
- function and correct use of apparatus
- basic chemical and physical concepts relating to properties and behaviour of glass
- safe startup and shutdown procedures
- critical material properties and appropriate glassworking parameters
- pre-heating procedures
- basic theory of re-entry angles and stress points
- setup and annealing/conditioning process
- relationship of temperature and temporary and permanent stress
- pre-annealing, annealing and post-annealing processes
- potential quality problems
- relevant health, safety and environment requirements

Evidence Guide

EVIDENCE GUIDE	
<p>The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>Assessors should ensure that candidates can:</p> <ul style="list-style-type: none"> • use basic bench/hand glasswork techniques and equipment to fabricate general glass apparatus • start up, set up and shut down equipment in accordance with work instructions • report atypical results and problems to appropriate personnel.
Context of and specific resources for assessment	<p>This unit of competency is to be assessed in the workplace or simulated workplace environment.</p> <p>Resources may include:</p> <ul style="list-style-type: none"> • access to a scientific glassblowing facility, appropriate equipment, materials and procedures • a bank of case studies is required where these form part of the assessment method.
Method of assessment	<p>It is strongly recommended that assessment is conducted through observation over time.</p> <p>The timeframe must allow for adequate assessment of operation under all normal and a range of abnormal conditions. Where this is not practical additional assessment techniques must be used.</p> <p>The following assessment methods are suggested:</p> <ul style="list-style-type: none"> • inspection of glasswork and workplace documentation completed by the candidate • analysis of work outputs over a period of time to ensure accurate and consistent work is obtained within required timelines • feedback from peers and supervisors • use of suitable simulation and/or a range of case studies/scenarios. <p>In all cases, practical assessment should be supported by questions to assess underpinning knowledge and those aspects of competency which are difficult to assess directly.</p>

EVIDENCE GUIDE	
	<p>Where applicable, reasonable adjustment must be made to work environments and training situations to accommodate ethnicity, age, gender, demographics and disability.</p> <p>Access must be provided to appropriate learning and/or assessment support when required.</p> <p>The language, literacy and numeracy demands of assessment should not be greater than those required to undertake the unit of competency in a work like environment.</p>
This competency in practice	<p>Industry representatives have provided the case study below to illustrate the practical application of this unit of competency and show its relevance in a workplace setting.</p> <p>Education</p> <p>A trainee glassblower has been requested by her/his supervisor to make 100 Pasteur pipettes for a university chemistry practical class the next day. The trainee selects the appropriate glass and type and cuts 50 lengths of glass (two pipettes per length). She/he then proceeds to pull points at the designated markings in the centre of the glass tube using the bench burner. At the conclusion of this operation, the pipettes are cut to the relevant length and then flared at the other end using a specially profiled carbon hand tool. The pipettes are then annealed to eliminate stress caused by the manufacture process. After inspection through a polariscope, the pipettes are delivered to the laboratory for use.</p>

Range Statement

RANGE STATEMENT	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
Codes of practice	Where reference is made to industry codes of practice, and/or Australian/international standards, it is expected the latest version will be used
Standards, codes, procedures and/or enterprise requirements	<p>Standards, codes, procedures and/or enterprise requirements may include:</p> <ul style="list-style-type: none"> • calibration and maintenance schedules • enterprise recording and reporting procedures • equipment manuals • equipment startup, operation and shutdown procedures • industry codes of practice • material safety data sheets (MSDS) • material, production and product specifications • National Environment Protection Measures • OHS national standards and codes of practice • production and laboratory schedules • quality manuals • standard operating procedures (SOPs)
Tools and equipment	<p>Tools and equipment may include:</p> <ul style="list-style-type: none"> • bench burner, hand torch, micro torch and ribbon burner, gas supplies and gas economiser • dydinium glasses and polariscope • glassworking lathe • annealing oven • measuring and recording equipment • hand tools, such as carbon paddles and mandrels, range of forceps, glass tubing gauges, angle setting jigs, calipers, glass support rollers, brass shapers, carbon rods, glass knife, stainless steel gauze, vernier calipers and other measuring tools, and strain viewer

RANGE STATEMENT	
	<ul style="list-style-type: none"> • mechanical glass cutters and saws • mechanical glass grinding equipment • communication equipment
Quality problems	<p>Quality problems may include:</p> <ul style="list-style-type: none"> • temperature and strain problems • devitrification • non-uniform thickness of seals or joints • equipment problems • quality problems, such as poor optics, distortion, excessive breakage, non-uniform break pattern, incorrect cross bend, excessive bow, scratches and poor glass shape • loss of utilities
Hazards	<p>Hazards may include:</p> <ul style="list-style-type: none"> • sharps and broken glassware • heat sources, such as burners and ovens • fluids under pressure (acetylene and oxygen) • glass dust • cuts associated with glass grinders and cutters • manual handling of heavy sample bags and containers
Safe work practices	<p>Safe work practices may include:</p> <ul style="list-style-type: none"> • use of personal protective equipment, such as heat resistant gloves, safety glasses, goggles, face guards, coveralls, respirators and safety boots • correct labelling of reagents and hazardous materials • handling, and storing hazardous materials and equipment in accordance with labels, MSDS, manufacturer's instructions, and enterprise procedures and regulations • regular cleaning and/or decontamination of equipment and work areas
Occupational health and safety (OHS) and environmental management requirements	<p>OHS and environmental management requirements:</p> <ul style="list-style-type: none"> • all operations must comply with enterprise OHS and environmental management requirements, which may be imposed through state/territory or federal legislation - these

RANGE STATEMENT

	<p>requirements must not be compromised at any time</p> <ul style="list-style-type: none"> • all operations assume the potentially hazardous nature of samples and require standard precautions to be applied • where relevant, users should access and apply current industry understanding of infection control issued by the National Health and Medical Research Council (NHMRC) and State and Territory Departments of Health

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare for repair operations	1.1. Identify job, appropriate procedure, hazards and safety requirements, and apparatus required 1.2. Establish correct cleaning procedure for contaminated glassware before commencing repair operations 1.3. Use personal protective equipment and safety procedures as specified for job and materials to be used 1.4. Record job description, compare with blueprint, drawing, sketch, design or similar specification and report perceived difficulties 1.5. Prepare equipment for repair in accordance with job requirements 1.6. Identify, select and prepare glass stocks and components for job
2. Repair apparatus	2.1. Check and adjust equipment and tools for job requirements 2.2. Check and adjust equipment and tools for the job 2.3. Start up equipment using enterprise procedures 2.4. Follow supplied designs and enterprise procedures to perform the repairs required 2.5. Follow equipment shutdown procedures
3. Operate annealing equipment	3.1. Prepare annealing equipment for the job 3.2. Start up, operate and shut down annealing equipment using enterprise procedures 3.3. Monitor, adjust and record annealing operation 3.4. Rectify routine problems
4. Maintain a safe work environment	4.1. Follow established safe work practices to ensure safety of self and other workers 4.2. Minimise the generation of wastes 4.3. Ensure the safe disposal of wastes 4.4. Clean, care for and maintain work area, equipment and tools 4.5. Report hazards and incidents according to enterprise procedures
5. Maintain records	5.1. Record data as per enterprise requirements 5.2. Maintain equipment logs as per enterprise requirements 5.3. Maintain security and confidentiality of enterprise

ELEMENT	PERFORMANCE CRITERIA
	information

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Required skills include:

- determining types of contaminants present on/in apparatus
- cleaning techniques for contamination carried out before repair operations are undertaken
- using appropriate treatment processes, with particular attention to risks associated with blowing used and possibly contaminated glass
- reading and following blueprints, drawings, sketches and designs relevant to repair work
- selecting appropriate grades of glass and preparing for use
- preparing apparatus for repair
- optimising and using glassblowing equipment
- identifying atypical or out of normal repair problems
- reporting problems to either supervisor or outside service technician according to enterprise procedures
- recording and communicating work results
- following correct occupational health and safety (OHS) and principles of good laboratory practice (GLP)

Required knowledge

Required knowledge includes:

- relevant glassblowing techniques
- the risks associated with blowing used and contaminated glass
- contamination cleaning techniques to be carried out before repair operations are undertaken
- use and function of the broken apparatus
- repair materials and reason for their choice
- use of appropriate tools and equipment
- basic chemical and physical concepts related to behaviour of glass under heat and stress
- basic knowledge of how apparatus to be repaired is used
- critical material properties and appropriate glassworking parameters
- pre-repair apparatus preparation procedures
- annealing procedures
- methods of minimising potential quality problems
- relevant health, safety and environment requirements

Evidence Guide

EVIDENCE GUIDE	
<p>The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>Assessors should ensure that candidates can:</p> <ul style="list-style-type: none"> • safely repair glass apparatus following enterprise procedures • assess the economics of salvage • follow a procedure of disassembly/assembly of apparatus in accordance with specifications • apply contamination cleaning techniques before repair operations are undertaken • report problems to appropriate personnel.
Context of and specific resources for assessment	<p>This unit of competency is to be assessed in the workplace or simulated workplace environment.</p> <p>This unit of competency may be assessed with:</p> <ul style="list-style-type: none"> • <i>MSL963001A Operate basic handblowing equipment.</i> <p>Resources may include:</p> <ul style="list-style-type: none"> • access to a scientific glassblowing facility, appropriate equipment, materials and procedures • a bank of case studies where these form part of the assessment method.
Method of assessment	<p>It is strongly recommended that assessment is conducted through observation over time. The timeframe must allow for adequate assessment of operation under all normal and a range of abnormal conditions. Where this is not practical additional assessment techniques must be used.</p> <p>The following assessment methods are suggested:</p> <ul style="list-style-type: none"> • inspection of glasswork and workplace documentation completed by the candidate • analysis of work completed over a period of time to ensure accurate and consistent work is obtained within required timelines. • feedback from peers and supervisors • use of suitable simulation and/or a range of case studies/scenarios.

EVIDENCE GUIDE	
	<p>In all cases, practical assessment should be supported by questions to assess underpinning knowledge and those aspects of competency which are difficult to assess directly.</p> <p>Where applicable, reasonable adjustment must be made to work environments and training situations to accommodate ethnicity, age, gender, demographics and disability.</p> <p>Access must be provided to appropriate learning and/or assessment support when required.</p> <p>The language, literacy and numeracy demands of assessment should not be greater than those required to undertake the unit of competency in a work like environment.</p>
This competency in practice	<p>Industry representatives have provided the case study below to illustrate the practical application of this unit of competency and show its relevance in a workplace setting.</p> <p>Education</p> <p>A trainee glassblower has been asked by his/her supervisor to repair several pieces of used and broken laboratory glassware as part of a cost saving exercise. Firstly, he/she determines whether the glassware will be used for general tasks or for qualitative analysis and how urgently the job is required. He/she then clarifies whether any hazardous material has been used in the equipment and applies the correct cleaning procedures. After determining the nature of the glass and the appropriate glassworking parameters, he/she repairs the equipment using safe apparatus. Finally the glassblower subjects the equipment to the appropriate annealing/conditioning process and checks the final outcome with his/her supervisor. Any contaminated or used glass waste is disposed of appropriately.</p>

Range Statement

RANGE STATEMENT	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
Codes of practice	Where reference is made to industry codes of practice, and/or Australian/international standards, it is expected the latest version will be used
Standards, codes, procedures and/or enterprise requirements	<p>Standards, codes, procedures and/or enterprise requirements may include:</p> <ul style="list-style-type: none"> • calibration and maintenance schedules • enterprise recording and reporting procedures • equipment manuals • equipment startup, operation and shutdown procedures • industry codes of practice • material safety data sheets (MSDS) • material, production and product specifications • national environment protection measures • OHS national standards and codes of practice • production and laboratory schedules • quality manuals • standard operating procedures (SOPs)
Tools, materials and equipment	<p>Tools, materials and equipment may include:</p> <ul style="list-style-type: none"> • burners, gas supplies and gas economisers • glassworking lathes • mechanical glass cutters and saws • mechanical glass grinding equipment • annealing ovens • measuring and recording equipment • hand tools, such as carbon paddles and mandrels, range of forceps, glass tubing gauges, angle setting jigs, calipers, glass support rollers, brass shapers, carbon rods, glass knife, stainless steel gauze, vernier calipers and other measuring tools, and strain viewer

RANGE STATEMENT	
	<ul style="list-style-type: none"> • various glass types, including soda-lime, borosilicate, quartz, silica and special formula glasses • glass to metal seals • communication equipment
Hazards	<p>Hazards may include:</p> <ul style="list-style-type: none"> • sharps and broken glassware • heat sources, such as burners and ovens • fluids under pressure (acetylene and oxygen) • glass dust • cuts associated with glass grinders and cutters • manual handling of heavy sample bags and containers
Safe work practices	<p>Safe work practices may include:</p> <ul style="list-style-type: none"> • use of personal protective equipment, such as heat resistant gloves, safety glasses, goggles, face guards, coveralls, respirators and safety boots • correct labelling of reagents and hazardous materials • handling, and storing hazardous materials and equipment in accordance with labels, MSDS, manufacturer's instructions, and enterprise procedures and regulations • regular cleaning and/or decontamination of equipment and work areas

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Interpret test requirements	1.1. Review test request to identify samples to be tested, test method and equipment involved 1.2. Identify hazards and enterprise controls associated with the sample, preparation methods, reagents and/or equipment
2. Prepare sample	2.1. Record sample description, compare with specification, record and report discrepancies 2.2. Prepare sample in accordance with appropriate standard methods
3. Check equipment before use	3.1. Set up test equipment in accordance with test method 3.2. Perform pre-use and safety checks in accordance with enterprise procedures and manufacturer's instructions 3.3. Identify faulty or unsafe equipment and report to appropriate personnel 3.4. Check calibration status of equipment and report any out of calibration items to appropriate personnel
4. Perform tests on samples	4.1. Identify, prepare and weigh or measure sample and standards to be tested 4.2. Conduct tests in accordance with enterprise procedures 4.3. Record data in accordance with enterprise procedures 4.4. Perform calculations on data as required 4.5. Identify and report out of specification or atypical results promptly to appropriate personnel 4.6. Shut down equipment in accordance with operating procedures
5. Maintain a safe work environment	5.1. Use established safe work practices and personal protective equipment to ensure personal safety and that of other laboratory personnel 5.2. Minimise the generation of wastes and environmental impacts 5.3. Ensure safe disposal of laboratory and hazardous wastes 5.4. Clean, care for and store equipment and reagents as required

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Required skills include:

- interpreting enterprise procedure or standard methods accurately
- using safety information, such as material safety data sheets (MSDS) and performing procedures safely
- checking test equipment before use
- completing all tests within required timeline without sacrificing safety, accuracy or quality
- calculating, recording and presenting results accurately and legibly
- maintaining security, integrity and traceability of all samples, data/results and documentation
- cleaning and maintaining equipment

Required knowledge

Required knowledge includes:

- concepts of metrology
- the international system of units (SI)
- purpose of test
- principles of the standard method
- pre-use equipment checks
- relevant standards/specifications and their interpretation
- sources of uncertainty in measurement and methods for control
- enterprise and/or legal traceability requirements
- interpretation and recording of test result, including simple calculations
- procedures for recognition/reporting of unexpected or unusual results
- relevant health, safety and environment requirements

Evidence Guide

EVIDENCE GUIDE	
<p>The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>Assessors should ensure that candidates can:</p> <ul style="list-style-type: none"> • accurately interpret enterprise procedures or standard methods • complete all tests within the required timeline without sacrificing safety, accuracy or quality • demonstrate close attention to the accuracy and precision of measurements and the data obtained • maintain the security, integrity and traceability of all samples, data/results and documentation.
Context of and specific resources for assessment	<p>This unit of competency is to be assessed in the workplace or simulated workplace environment.</p> <p>This unit of competency may be assessed with:</p> <ul style="list-style-type: none"> • <i>MSL922001A Record and present data.</i> <p>Resources may include:</p> <ul style="list-style-type: none"> • standard laboratory equipped with appropriate equipment standards and materials • enterprise procedures and standard methods, and equipment manuals • MSDS.
Method of assessment	<p>The following assessment methods are suggested:</p> <ul style="list-style-type: none"> • review of the quality of test data/results achieved by the candidate over time • inspection of records and workplace documentation completed by the candidate • feedback from peers and supervisors • observation of the candidate performing a range of basic tests • oral or written questioning to check underpinning knowledge of test procedures. <p>In all cases, practical assessment should be supported by questions to assess underpinning knowledge and those aspects of competency which are difficult to assess</p>

EVIDENCE GUIDE	
	<p>directly.</p> <p>Where applicable, reasonable adjustment must be made to work environments and training situations to accommodate ethnicity, age, gender, demographics and disability.</p> <p>Access must be provided to appropriate learning and/or assessment support when required.</p> <p>The language, literacy and numeracy demands of assessment should not be greater than those required to undertake the unit of competency in a work like environment.</p>
This competency in practice	<p>Industry representatives have provided the case studies below to illustrate the practical application of this unit of competency and to show its relevance in a workplace setting.</p> <p>Manufacturing</p> <p>Standard testing methods may be viewed as legal requirements that must be followed to ensure that a product manufactured in a chemical plant meets the specification by which it is sold to the customer. Technical assistants perform tests in a quality control laboratory to ensure that material meets legal requirements and the material is safe and effective in use. Peroxides may be present in ether as a result of light-catalysed air oxidation. Peroxides are toxic and can give rise to mixtures which are explosive when distilled. Technical assistants test ether to ensure that the level of peroxide is within acceptable limits. The test is done by shaking ether with a solution of potassium iodide. After standing for 30 minutes in the dark the yellow colour of the aqueous phase, due to the liberation of iodine, must not be more intense than a prepared standard solution. These tests ensure the quality and safety of the ether.</p> <p>Food processing</p> <p>A snack food company produces a range of high quality, impulse purchase snack foods. Some of these products are moisture and/or oxygen sensitive and are therefore packaged in multi-layer flexible packaging to provide optimum shelflife. The packaging must also be able to withstand the rigours of the production and distribution process. While the packaging is purchased to meet the shelflife and distribution specifications, the quality</p>

EVIDENCE GUIDE

assurance program requires the periodic evaluation of the packaging materials against these specifications. A laboratory assistant uses standard methods to test the tearing resistance, bursting strength, impact resistance and permeability and/or leakage of the snack food packaging. Tests are also conducted on aspects of the manufacturing process that can affect shelflife. These tests involve the measuring of the heat-seam strength and the sealing performance of the closure process. The test results are recorded by the laboratory assistant to verify the conformance of the materials to the supplier specifications and of the process to the manufacturing specifications. The assistant reports any anomalies or non-conformances to the appropriate personnel.

Construction materials testing

A technician performs an Aggregate Stripping Test (AS 1141.50) and enters the results in the laboratory's information management system (LIMS). The resulting 20-30% stripped values (i.e. 70-80% adhering) indicate a 'fail' result. The technician notes that he has repeated the test and obtained the same 'fail' result. The laboratory manager reviews the results and asks the technician to explain how he performed the test. He describes how he prepared 3-4 mm thick plates of bitumen and binding agent in the mould and then placed 50 small clean pieces of aggregate on top. After treatment in an oven for 24 hours and a 50°C water bath in accordance with the test method, the technician had then carefully pulled out the pieces of aggregate and avoiding any twisting motion. He then estimated the % of bitumen adhering to each of the stones with the expectation that the stripped value would be about 5% (i.e. 95% adhering). The manager is satisfied that the technician has performed the test in accordance with the method and suggested that he now re-run the test with a known aggregate as a control. This test gives a stripped value of 5-7% (i.e. 93-95% adhering). The manager is now sufficiently confident of the laboratory's results to sign and issue the test report and explain the aggregate's 'test failure' to the client.

Range Statement

RANGE STATEMENT	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
Codes of practice	Where reference is made to industry codes of practice, and/or Australian/international standards, it is expected the latest version will be used
Standards, codes, procedures and/or enterprise requirements	<p>Standards, codes, procedures and/or enterprise requirements may include:</p> <ul style="list-style-type: none"> • Australian and international standards, such as: <ul style="list-style-type: none"> • AS ISO 1000-1998 The international system of units (SI) and its application • AS ISO 17025-2005 General requirements for the competence of testing and calibration laboratories • AS/NZS 2243 Set:2006 Safety in laboratories set • Australian code of good manufacturing practice for medicinal products (GMP) • calibration and maintenance schedules • enterprise recording and reporting procedures • equipment manuals • equipment startup, operation and shutdown procedures • MSDS and safety procedures • material, production and product specifications • national measurement regulations and guidelines • principles of good laboratory practice (GLP) • production and laboratory schedules • quality manuals • standard operating procedures (SOPs)
Concepts of metrology	<p>Concepts of metrology may include:</p> <ul style="list-style-type: none"> • that all measurements are estimates • measurements belong to a population of measurements of the measured parameters

RANGE STATEMENT	
	<ul style="list-style-type: none"> • repeatability • precision • accuracy • significant figures • sources of error • uncertainty • traceability
Preparation of samples	<p>Preparation of samples may include:</p> <ul style="list-style-type: none"> • sub-sampling or splitting using procedures, such as riffing, coning and quartering, manual and mechanical splitters • diluting samples • physical treatments, such as ashing, dissolving, filtration, sieving, centrifugation and comminution • moulding, casting or cutting specimens
Typical tests carried out by laboratory/field assistants	<p>Typical tests carried out by laboratory/field assistants may include:</p> <ul style="list-style-type: none"> • visual/optical tests of appearance, colour, texture, identity, turbidity, refractive index (alcohol content and Baume/Brix) • physical tests: <ul style="list-style-type: none"> • density, specific gravity and compacted density • moisture content and water activity • particle size, particle shape and size distribution • chemical tests: <ul style="list-style-type: none"> • gravimetric • colorimetric • electrical conductivity (EC) and pH • specific ions using dipsticks and kits • nutrients (e.g. nitrates and orthophosphates) using basic kits • ashes, including sulphated ashes • biological/environmental tests: <ul style="list-style-type: none"> • pH, oxygen reduction potential (ORP), dissolved oxygen (DO) and (EC) • E coli using test kits

RANGE STATEMENT

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Safely use laboratory chemicals, glassware and equipment	1.1. Apply appropriate safety precautions for use of laboratory equipment and hazardous chemical materials 1.2. Use appropriate laboratory glassware and measuring equipment 1.3. Clean and store glassware and equipment in accordance with enterprise procedures
2. Make up working solutions	2.1. Identify the relevant standard methods for solution preparation 2.2. Assemble specified laboratory equipment 2.3. Select and prepare materials and solvent of specified purity 2.4. Measure appropriate quantities of reagents for solution preparation and record data 2.5. Prepare labels and log solution details in laboratory register 2.6. Transfer solutions to appropriately labelled containers
3. Check existing stock of solutions	3.1. Monitor shelf life of working solutions according to laboratory procedures 3.2. Replace out-of-date or reject solutions according to laboratory procedures 3.3. Conduct routine titrimetric analyses, if appropriate, to determine if solutions are fit for purpose

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Required skills include:

- using appropriate materials, equipment and procedures to prepare solutions
- following appropriate occupational health and safety (OHS), and hygiene procedures, if appropriate
- using all equipment safely and efficiently
- using enterprise procedures to calculate concentrations
- identifying solutions not fit for use
- using titrations to determine the concentration of solutions
- labelling, storing and disposing of solutions appropriately
- recording and presenting data appropriately

Required knowledge

Required knowledge includes:

- relevant biological, chemical, food and laboratory terminology
- principles of metrology
- the international system of units (SI)
- concentration terms, such as % w/w, % w/v, % v/v, ppm (mg/L) and molarity
- basic theory of acids, bases, salts, buffers and neutralisation
- enterprise procedures for preparing solutions
- calculations required to prepare specified amounts of solutions of specified concentration
- appropriate OHS procedure for preparing, handling and disposal of solutions
- use of material safety data sheets (MSDS)
- relevant health, safety and environment requirements

Evidence Guide

EVIDENCE GUIDE	
<p>The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>Assessors should ensure that candidates can:</p> <ul style="list-style-type: none"> • prepare working solutions in compliance with relevant standards, appropriate procedures and/or enterprise requirements • follow OHS procedures to safely use laboratory chemicals glassware and equipment • make up working solutions according enterprise procedures • check existing stocks of solutions as being fit for purpose.
Context of and specific resources for assessment	<p>This unit of competency is to be assessed in the workplace or simulated workplace environment.</p> <p>This unit of competency may be assessed with:</p> <ul style="list-style-type: none"> • <i>MSL922001A Record and present data</i> • <i>MSL943002A Participate in laboratory/field workplace safety.</i> <p>Resources may include:</p> <ul style="list-style-type: none"> • standard laboratory equipped with appropriate equipment and reagents • SOPs and testing methods • access to appropriate containers and storage facilities.
Method of assessment	<p>The following assessment methods are suggested:</p> <ul style="list-style-type: none"> • inspection of solutions prepared, labelled and stored by the candidate • review of solution records and workplace documentation completed by the candidate • feedback from peers and supervisors • observation of the candidate preparing working solutions • oral or written questioning. <p>In all cases, practical assessment should be supported by questions to assess underpinning knowledge and those aspects of competency which are difficult to assess</p>

EVIDENCE GUIDE

	<p>directly.</p> <p>Where applicable, reasonable adjustment must be made to work environments and training situations to accommodate ethnicity, age, gender, demographics and disability.</p> <p>Access must be provided to appropriate learning and/or assessment support when required.</p> <p>The language, literacy and numeracy demands of assessment should not be greater than those required to undertake the unit of competency in a work like environment.</p>
This competency in practice	<p>Industry representatives have provided the case studies below to illustrate the practical application of this unit of competency and show its relevance in a workplace setting.</p> <p>Manufacturing</p> <p>When starting materials used for the manufacture of common household materials are in transit from the supplier to the manufacturer, they may degrade if subjected to conditions, such as heat, moisture, light and oxygen. Even when the supplier ships quality materials to the manufacturing plant, the materials may be sub-standard when they arrive. Quality control tests are designed to test starting materials to ensure they are within specification. For example, aspirin forms salicylic acid when stored under adverse conditions. Laboratory assistants prepare and monitor the quality of solutions, such as ferric chloride solution, which gives an intense violet colour when added to salicylic acid but gives no colour with aspirin. Absence of the violet colouration indicates that breakdown of the aspirin hasn't occurred.</p> <p>Biomedical</p> <p>A laboratory assistant made up 1 litre of buffer solution using buffer tablets and a 1 litre volumetric flask as specified in the method. To ensure the solution was suitable for use the assistant measured the pH and found it was within acceptable range. The assistant then appropriately labelled a storage vessel and stored the buffer according to requirements. By following enterprise procedures the shelf life of the buffer was maximised.</p>

EVIDENCE GUIDE**Environmental**

An environmental laboratory is contracted to determine the acidity of water samples taken from local lakes and streams. A laboratory assistant is required to make up small batches of 0.01M sodium hydroxide and to determine its concentration by titrating it against a standard solution of potassium acid phthalate using phenolphthalein indicator. This procedure is carried out monthly to ensure that the concentration of the sodium hydroxide solution is accurately known. Alternatively, the laboratory assistant may be required to prepare and standardise a fresh batch of sodium hydroxide on a monthly basis. In this case, he/she must understand the underpinning knowledge of basic acid/base theory, potential problems of interferences (such as slow absorption of carbon dioxide by sodium hydroxide solution) so as to ensure that the concentrations of workup solutions are accurately known. He/she must also be skilled in calculating and performing dilution when required to prepare such low concentrations (0.01M) of working solutions.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Codes of practice

Where reference is made to industry codes of practice, and/or Australian/international standards, it is expected the latest version will be used

Standards, codes, procedures and/or enterprise requirements

Standards, codes, procedures and/or enterprise requirements may include:

- Australian and international standards, such as:
 - AS 2163-2000 Laboratory glassware - Measuring cylinders
 - AS 2165-1996 Laboratory glassware - Burettes AS 2162.1-1996 Verification and use of volumetric apparatus - General - Volumetric glassware
 - AS ISO 1000-1998 The international system of units (SI) and its application
 - AS ISO 17025-2005 General requirements for the competence of testing and calibration laboratories
 - AS/NZS 2243 Set:2006 Safety in laboratories set
- Australian code of good manufacturing practice for medicinal products (GMP)
- calibration and maintenance schedules
- enterprise recording and reporting procedures
- equipment manuals
- equipment startup, operation and shutdown procedures
- MSDS and safety procedures
- material, production and product specifications
- national measurement regulations and guidelines
- principles of good laboratory practice (GLP)
- production and laboratory schedules
- quality manuals

RANGE STATEMENT	
	<ul style="list-style-type: none"> • standard operating procedures (SOPs)
Concepts of metrology	<p>Concepts of metrology may include:</p> <ul style="list-style-type: none"> • that all measurements are estimates • measurements belong to a population of measurements of the measured parameters • repeatability • precision • accuracy • significant figures • sources of error • uncertainty • traceability
Typical test solutions	<p>Typical test solutions may include:</p> <ul style="list-style-type: none"> • solutions required for diagnostic/analytical and limit tests in food and chemical laboratories, such as sulphates, chlorides and heavy metals • solutions, such as stains for standard diagnostic/analytical procedures in biomedical/environmental laboratories, such as cell staining, fixation of cells and tissues, suspension of cells and titrimetric indicators • solutions required for laboratory maintenance and disinfection, such as 70% ethanol and hypochlorite
Laboratory equipment	<p>Laboratory equipment may include:</p> <ul style="list-style-type: none"> • pH meters • balances • magnetic stirrers, water baths and hot plates • measuring cylinders, beakers, conical flasks, volumetric flasks, pipettes and burettes • filter papers and funnels • fume cupboards
Hazards	<p>Hazards may include:</p> <ul style="list-style-type: none"> • corrosive chemicals, such as acids and alkalis • sources of heat, such as burners • sharps and broken glassware • spillages
Safety precautions	<p>Safety precautions may include:</p>

RANGE STATEMENT	
	<ul style="list-style-type: none"> • use of MSDS • use of personal protective equipment, such as safety glasses, gloves and coveralls • correct labelling of reagents and hazardous materials • handling and storing hazardous materials and equipment in accordance with labels, MSDS, manufacturer's instructions, and enterprise procedures and regulations • regular cleaning and/or decontamination of equipment and work areas
Monitoring quality of solutions	<p>Monitoring quality of solutions may include:</p> <ul style="list-style-type: none"> • noting turbidity to exclude absorption of moisture • noting deposits to exclude microbial contamination or chemical degradation • noting crystals to exclude evaporation • conducting titrations to check concentration • noting colour changes indicating a pH shift with solutions containing indicators • checking expiry dates on solution containers
Occupational health and safety (OHS) and environmental management requirements	<p>OHS and environmental management requirements:</p> <ul style="list-style-type: none"> • all operations must comply with enterprise OHS and environmental management requirements, which may be imposed through state/territory or federal legislation - these requirements must not be compromised at any time • all operations assume the potentially hazardous nature of samples and require standard precautions to be applied • where relevant, users should access and apply current industry understanding of infection control issued by the National Health and Medical Research Council (NHMRC) and State and Territory Departments of Health

MSL973003A Prepare culture media

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	This unit of competency covers the ability to prepare culture media which is free of contamination to facilitate optimal growth of organisms and cells. It includes the ability to organise the materials, equipment and work environment and follow standard methods.
------------------------	--

Application of the Unit

Application of the unit	This unit of competency is applicable to laboratory assistants in the biomedical, biological, environmental, food processing and pharmaceutical industry sectors. Industry representatives have provided case studies to illustrate the practical application of this unit of competency and to show its relevance in a workplace setting. These are found at the end of this unit of competency under the section 'This competency in practice'.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare culture media	1.1. Prepare mixture of media and solvent to ensure solution and even settling of heat soluble materials 1.2. Label media to allow tracking in subsequent processes 1.3. Use a vessel large enough to endure adequate mixing and heating of the media 1.4. Dispense media into vessels for sterilisation, leaving room for expansion during heating and cooling
2. Sterilise media	2.1. Load the steriliser in keeping with maximum permitted loads and appropriate positioning of materials 2.2. Ensure a sterilisation indicator is correctly placed with the load to monitor sterilisation process 2.3. Operate sterilisation cycle in accordance with manufacturer's requirements to achieve sterilisation at the required settings 2.4. Cool media to the temperature specified in the media formulation procedures
3. Pour, label and store media	3.1. Add labile constituents where necessary, under conditions that will not lead to their denaturation or contamination of media 3.2. Ensure even mixing of additives and media before dispensing 3.3. Aseptically dispense media to minimise occurrence of procedural contamination 3.4. Label media to allow for selection, avoiding areas of the culture vessel required for examination of colony growth 3.5. Store media to maximise shelf life and minimise contamination 3.6. Date batch media to ensure correct batch rotation 3.7. Incubate control plates as a sterility check
4. Perform quality control checks	4.1. Inspect media for any evidence of possible contamination or problems with structure or sterilisation 4.2. Check useability of selective media by growth of expected organism 4.3. Check stored stocks at regular intervals for conformance to required standards

ELEMENT	PERFORMANCE CRITERIA
5. Maintain work area and equipment to prevent cross-infection and contamination	5.1. Use personal protective equipment and safe work practices to ensure safety of self and others 5.2. Place disposable and reusable items into relevant receptacles 5.3. Clean and disinfect work area and equipment after use 5.4. Transport disposable and reusable contaminated materials to relevant areas for disinfection, sterilisation and cleaning or disposal

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Required skills include:

- calculating mass and volume
- measuring accurately
- making media to support growth of the relevant micro-organism or tissue
- preventing cross-contamination
- following enterprise procedures consistently
- labelling and storing culture media according to enterprise procedures
- accurately recording data
- reporting non-compliance, anomalies or out of specification results
- sorting, collecting, treating, recycling or disposing of waste
- using appropriate personal protective equipment

Required knowledge

Required knowledge includes:

- basic microbiological concepts and terminology such as growth rates in culture, production of gas and haemolysis of red cells in media
- growth requirements of micro-organisms (bacteria, fungi, protozoans, viruses and multi-cellular parasites) in terms of their laboratory culture
- the purpose, content and features of culture media and the relationship between the correct preparation of culture media and the optimal growth of organisms or cells
- nature, properties and use of a range of biological media
- the relationship between sterile practices, hygiene procedures and the ability to obtain growth free of contamination
- the importance of physical requirements, such as pH and temperature on optimal growth of organisms and cells
- the effect of inappropriate storage on culture media quality and performance
- cleaning and sanitising requirements of equipment and work area
- relevant health, safety and environment requirements

Evidence Guide

EVIDENCE GUIDE	
<p>The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>Assessors should ensure candidates can:</p> <ul style="list-style-type: none"> • prepare culture media which is free of contamination to facilitate the optimal growth of organisms and cells • use appropriate sterilisation techniques, such as maintaining adequate space between containers • perform post-sterilisation procedures, such as dispensing or adding using aseptic technique • ensure the sterilised media has cooled down sufficiently to ensure that heat labile constituents, such as blood, hormones or antibodies are not inactivated when added to the media • consistently follow enterprise procedures • report non-compliances, anomalies or out of specification results.
Context of and specific resources for assessment	<p>This unit of competency is to be assessed in the workplace or simulated workplace environment.</p> <p>This unit of competency may be assessed with:</p> <ul style="list-style-type: none"> • <i>MSL943002A Participate in laboratory/field workplace safety</i> • <i>MSL973004A Perform aseptic techniques.</i> <p>Resources may include:</p> <ul style="list-style-type: none"> • work schedule and enterprise procedures, including advice on safe work practices • relevant equipment and personal protective equipment • MSDS.
Method of assessment	<p>The following assessment methods are suggested:</p> <ul style="list-style-type: none"> • review of quality assurance results and examination of batches of media prepared by the candidate • observation of the candidate preparing culture media • written and/or oral questioning to assess underpinning knowledge.

EVIDENCE GUIDE

	<p>In all cases, practical assessment should be supported by questions to assess underpinning knowledge and those aspects of competency which are difficult to assess directly.</p> <p>Where applicable, reasonable adjustment must be made to work environments and training situations to accommodate ethnicity, age, gender, demographics and disability.</p> <p>Access must be provided to appropriate learning and/or assessment support when required.</p> <p>The language, literacy and numeracy demands of assessment should not be greater than those required to undertake the unit of competency in a work like environment.</p>
<p>This competency in practice</p>	<p>Industry representatives have provided the case studies below to illustrate the practical application of this unit of competency and show its relevance in a workplace setting.</p> <p>Food processing</p> <p>A laboratory assistant's task was to prepare and pour agar plates in readiness for milk sampling. The assistant collected all the equipment and material needed to make an agar plate and ensured the working area was suitably prepared. The agar solution was carefully prepared and poured into a large conical flask prior to sterilisation in the autoclave. On completion of the sterilisation cycle, the agar was cooled to 42°C in a water bath. It was then poured into the plates after flaming the neck of the flask. The lids were quickly replaced on the plates to minimise contamination. The plates were then stored. Any excess plates were bagged in a laminar flow unit and then placed in the fridge. The equipment was hot washed and the benches swabbed with 70% ethanol solution.</p> <p>Biomedical</p> <p>Media preparation is a routine task of the technical assistant. The methods and standard procedures are all documented but common working knowledge and standard 'don'ts' are not always written into the methods. Some ingredients, such as labile nutrients and antibiotics must be added under sterile conditions after the basic ingredients have been mixed and autoclaved. In one laboratory there is a list of ingredients not to be</p>

EVIDENCE GUIDE

autoclaved posted on the notice board, in the media recipe book and for good measure, on the autoclave itself. One day, a technical assistant who was preparing media added all the ingredients, including the glucose, then autoclaved all 20L of it. The technical assistant learned the consequences of not paying full attention to the procedure the hard way and spent most of the day removing the 'toffee' residue from inside the autoclave!

Range Statement

RANGE STATEMENT	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare for aseptic sampling or transfer	1.1.Ensure that any sampling procedure conforms with the requirements of the sampling plan 1.2.Use specified personal protective clothing and equipment 1.3.Prepare the work area for safe and effective sample transfer 1.4.Select equipment and materials specified by the procedure 1.5.Organise equipment to minimise contamination during manipulations 1.6.Label containers for clear identification 1.7.Record details in relevant log or database
2. Transfer materials aseptically	2.1.Protect the integrity of the sample source by sterilising the sampling site and the mouth of transport or culture vessel 2.2.Sterilise inoculating loops and/or pipette where used to prevent contamination 2.3.Perform transfer while minimising opportunities for contamination and cross-infection 2.4.After transfer, and before sealing the transport or culture vessel, flame the vessel mouth to maintain sterility 2.5.Re-sterilise inoculating loops, minimising the generation of aerosols 2.6.Perform quality control checks, if required 2.7.Label transport or culture vessels for clear identification
3. Maintain work area and equipment to prevent cross-infection and contamination	3.1.Place disposable and reusable items into relevant receptacles 3.2.Clean and disinfect work area and equipment after use 3.3.Transport disposable and reusable contaminated materials to relevant areas for disinfection, sterilisation and cleaning or disposal

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Required skills include:

- sterilising equipment such as flasks, loops and pipettes
- handling of laboratory equipment and glassware to prevent contamination
- streak plating of inoculations
- sampling transfers
- labelling and storing culture media according to enterprise procedures
- recording data accurately
- reporting non-compliance, anomalies or outofspecification results
- sorting, collecting, treating, recycling or disposing of waste
- following enterprise procedures consistently
- using appropriate personal protective equipment

Required knowledge

Required knowledge includes:

- the relationship between sterile practices, hygiene procedures and the ability to obtain growth free of contamination
- cleaning and sanitising requirements of equipment and work area and effects of physical and chemical agents on microbial growth and death
- principles of infection control related to occupational health and safety (OHS), sampling and transfer of materials in microbiological investigations
- disinfection and sterilisation procedures used in the collection, processing and safe disposal of samples and materials
- importance of pure culture techniques and aseptic transfer to the successful microbiological investigation and correct interpretation of laboratory results
- growth requirements of micro-organisms (bacteria, fungi, protozoans, viruses and multi-cellular parasites) in terms of their laboratory culture
- relevant health, safety and environment requirements

Specific industry

Additional knowledge requirements may apply for different industry sectors. For example:

Food processing:

- food spoilage symptoms
- food safety principles
- beneficial/detrimental organisms relevant to specific food industry sector

Evidence Guide

EVIDENCE GUIDE	
<p>The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>In particular, assessors should look to see that the candidate:</p> <ul style="list-style-type: none"> • follows established laboratory procedures, including recording of samples, operation of equipment and cleaning/decontamination • prevents cross-contamination of sample source and sample • manipulates equipment to prevent contamination of culture medium during transfer • sterilises equipment as required to prevent cross-contamination of work area, personnel and environment.
Context of and specific resources for assessment	<p>This unit of competency is to be assessed in the workplace or simulated workplace environment.</p> <p>This unit of competency may be assessed with:</p> <ul style="list-style-type: none"> • <i>MSL943002A Participate in laboratory/field workplace safety</i> • <i>MSL973003A Prepare culture media.</i> <p>Resources may include:</p> <ul style="list-style-type: none"> • standard laboratory with appropriate equipment and materials • enterprise procedures and standard methods • MSDS.
Method of assessment	<p>The following assessment methods are suggested:</p> <ul style="list-style-type: none"> • review of quality assurance results and examination of samples transferred by the candidate • observation of the candidate successfully transferring a range of samples • written and/or oral questioning to assess underpinning knowledge. <p>In all cases, practical assessment should be supported by questions to assess underpinning knowledge and those aspects of competency which are difficult to assess</p>

EVIDENCE GUIDE

	<p>directly.</p> <p>Where applicable, reasonable adjustment must be made to work environments and training situations to accommodate ethnicity, age, gender, demographics and disability.</p> <p>Access must be provided to appropriate learning and/or assessment support when required.</p> <p>The language, literacy and numeracy demands of assessment should not be greater than those required to undertake the unit of competency in a work like environment.</p>
This competency in practice	<p>Industry representatives have provided the case studies below to illustrate the practical application of this unit of competency and show its relevance in a workplace setting.</p> <p>Food processing</p> <p>As part of the quality assurance program at an ice-cream manufacturer, six ice-creams were removed from the production line, placed in sterile bags and then stored in a freezer in the microbiology laboratory. Later in the morning, the laboratory assistant removed the samples from the freezer, registered the samples with the date received and test code and signed the register book. She/he then placed the samples in a water bath set at 42(C. While the samples were melting, the laboratory assistant labelled the respective agar plates with the registered codes. Using aseptic techniques she/he carefully transferred 1ml of ice-cream mix into the total plate count agar. The plates were then placed in the incubator. The final results were noted and recorded.</p> <p>Biomedical</p> <p>In preparation for antibiotic sensitivity testing and biochemical identification of presumed pathogenic bacteria, a technical assistant was asked to prepare a sterile peptone suspension of a lactose fermenting colony. The colony had been previously identified by the supervisor on a MacConkey's agar plate. The assistant labelled a 5mL tube of peptone broth with the sample number and a code for the identified colony and then donned a pair of disposable gloves. Bringing the labelled tube and the MacConkey's plate near to the Bunsen, she/he took an inoculating loop and sterilised it in the</p>

EVIDENCE GUIDE

incandescent flame. She/he carefully cooled the loop in a sterile area of the agar and gently scraped off half the colony. With the other hand, and in the vicinity of the heated air of the Bunsen, she/he removed the cover of the peptone tube in her/his crooked finger. In a continuous and coordinated way she/he flamed the lip of the tube and emulsified the colony in the broth. She/he then flamed the lip of the tube and replaced its cover. Finally, the technical assistant re-sterilised the inoculating loop by introducing and holding it in the Bunsen flame to minimise the generation of bacterial aerosols.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Codes of practice

Where reference is made to industry codes of practice, and/or Australian/international standards, it is expected the latest version will be used

Standards, codes, procedures and/or enterprise requirements

Standards, codes, procedures and/or enterprise requirements may include:

- Australian and international standards, such as:
 - AS/NZS 2243 Set:2006 Safety in laboratories set
 - AS/NZS 2982.1:1997 Laboratory design and construction - General requirements
 - AS/NZS 4187:2003 Cleaning, disinfecting and sterilising reusable medical and surgical instruments and equipment and maintenance of associated environments in health care facilities
 - AS/NZS ISO 14000 Set:2005 Environmental management standards set
- HB 9-1994 Occupational personal protection
- Australia New Zealand Food Standards (ANZFS) Code
- Australian code of good manufacturing practice for medicinal products (GMP)
- Australian Dangerous Goods Code
- client and product specifications
- manufacturer's instructions or verbal direction from laboratory manager, supervisor or senior technician
- material safety data sheets (MSDS)
- National Code of Practice for the labelling of workplace substances [NOHSC:2012 (1994)]
- National Health and Medical Research Council (NHMRC) Guidelines
- OHS national standards and codes of practice

RANGE STATEMENT	
	<ul style="list-style-type: none"> • operation and maintenance manuals for automated media preparation equipment • principles of good laboratory practice (GLP) • production schedules and instructions • standard operating procedures (SOPs)
Personal protective equipment	<p>Personal protective equipment may include:</p> <ul style="list-style-type: none"> • gloves, safety glasses, goggles, face guards, coveralls, gowns, body suits and respirators • biohazard containers and laminar flow cabinets

Samples	<p>Samples may include:</p> <ul style="list-style-type: none"> • body fluids and liquids • water and soil • sterile pharmaceuticals • yeasts and moulds • milk and yoghurt • swabs and smears • propagation tissue • plant material • fermented foods and beverages
Equipment	<p>Equipment may include:</p> <ul style="list-style-type: none"> • transfer equipment, such as inoculating loops, pipettes (quantitative and qualitative), flasks, tubes and spatulas • Bunsen burners and bench incinerators • anaerobic jars • incubators, water baths, refrigerators, freezers and possibly dry ice and liquid nitrogen cylinders • laminar flow units and biohazard cabinets • autoclave or pressure cooker • swabs • continuous culture systems

RANGE STATEMENT	
The range of material	<p>The range of material may involve:</p> <ul style="list-style-type: none"> • solid and/or liquid media • supplied media, such as media manufactured in the enterprise or raw material supplies for media • disinfecting and sterilising agents and materials, such as methylated spirits, ethanol and ether • disposable equipment and clothing • tissue culture media • growth media in broths, plates, deeps or slopes • receptacles for safe disposal of wastes and for processing of reusable materials • bar coding material and labels
Sterilisation techniques	<p>Sterilisation techniques may include:</p> <ul style="list-style-type: none"> • autoclaving • flaming • steam and membrane filtration • boiling • microwaving • radiation • high temperature • high pressure steam • gas and chemical treatments
Quality control checks	<p>Quality control checks may include:</p> <ul style="list-style-type: none"> • streaking out of cultures to a single colony • lawn cultures
Hazards	<p>Hazards may include:</p> <ul style="list-style-type: none"> • accessing the sample from difficult or dangerous areas • dry ice and liquid nitrogen vapour • ultraviolet (UV) light sources • heat from Bunsen burners • molten agar • sharps • hazardous substances and/or infectious agents
Workplace information	<p>Workplace information may include:</p> <ul style="list-style-type: none"> • SOPs

RANGE STATEMENT	
	<ul style="list-style-type: none"> • specifications for safe waste disposal of bio-hazardous materials • production schedules and instructions • work notes • MSDS • manufacturer's instructions • verbal instructions from laboratory manager, supervisor or senior technician • guidelines for small scale genetic manipulation work
Occupational health and safety (OHS) and environmental management requirements	<p>OHS and environmental management requirements:</p> <ul style="list-style-type: none"> • all operations must comply with enterprise OHS and environmental management requirements, which may be imposed through state/territory or federal legislation - these requirements must not be compromised at any time • all operations assume the potentially hazardous nature of samples and require standard precautions to be applied • where relevant, users should access and apply current industry understanding of infection control issued by the National Health and Medical Research Council (NHMRC) and State and Territory Departments of Health

MSL973005A Assist with fieldwork

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	This unit of competency describes the ability to perform tasks associated with the organisation of fieldwork and field surveys. It also covers basic field survival skills and collection of samples in the field.
------------------------	--

Application of the Unit

Application of the unit	<p>This unit of competency is applicable to laboratory and field assistants working in the environmental, mining, construction materials testing and rural industry sectors.</p> <p>All aspects of field and laboratory work covered by this unit of competency would be supervised by a scientific officer or technical officer. Though a supervisor may not always actually be present, the worker will follow standard operating procedures that clearly describe the permitted scope of practice. This unit of competency does not include gaining clearance for animal trapping, tagging, keeping or experimentation. It does not cover animal handling techniques.</p> <p>Industry representatives have provided case studies to illustrate the practical application of this unit of competency and to show its relevance in a workplace setting. These are found at the end of this unit of competency under the section 'This competency in practice'.</p>

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Assist with organisation of fieldwork	1.1. Purchase supplies and equipment as specified by senior staff 1.2. Assemble supplies and equipment and check against inventory 1.3. Pack supplies and equipment appropriately for safe transport
2. Support field operations	2.1. Check unpacked items against inventory 2.2. Store supplies and equipment as specified 2.3. Restock supplies as necessary 2.4. Collect and/or dispose of waste in accordance with enterprise and environmental requirements
3. Assist with field activities	3.1. Assemble equipment and materials for fieldwork as directed 3.2. Collect samples, if required, in accordance with enterprise procedures, animal care and ethics and other legislative requirements 3.3. Store samples in accordance with special requirements for continued wellbeing, viability or integrity of sample 3.4. Perform simple field measurements as directed 3.5. Collect and maintain records of site data as directed
4. Demonstrate basic field survival skills	4.1. Follow specified safety procedures 4.2. Follow specified survival procedures in the event of emergencies and accidents 4.3. Wear suitable clothing as protection against solar radiation, extreme temperatures and impact injury
5. Assist with the completion of fieldwork	5.1. Pack supplies, equipment and samples appropriately for safe return transport 5.2. Check and clean used equipment to prevent deterioration and contamination 5.3. Check that the condition of vehicles, equipment and materials comply with environmental/quarantine requirements for preventing transfer of pests 5.4. Return supplies and equipment to storage at enterprise location 5.5. Conduct a stocktake of equipment and supplies for replenishment where required 5.6. Assist with the dispatch of collected samples for laboratory analysis, as necessary

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Required skills include:

- using two-way radio and satellite phone in accordance with enterprise procedures
- using basic field survival strategies, such as map reading, use of compass and global positioning system (GPS) and 'stay with vehicle' in the event of accident or emergency
- organising, packing/unpacking and stowing materials and equipment with close attention to detail
- collecting samples in accordance with enterprise procedures and legislative requirements
- storing and maintaining samples in accordance with special requirements for continued wellbeing, viability and integrity of sample
- maintaining accurate and complete data records and checklists
- working safely and in accordance with environmental requirements
- cleaning equipment and collecting and disposing of wastes in accordance with safety and environmental requirements

Required knowledge

Required knowledge includes:

- terms used to describe the relevant industry sector's field equipment, materials, samples and specimens
- enterprise procedures relating to sample collection, maintenance and storage
- enterprise procedures relating to field testing
- specific legislation and codes of practice related to sample and animal collection (if relevant in the industry sector)
- principles of safety relating to fieldwork, such as use of LPG, operation of generators and use of protective clothing
- relevant health, safety and environment requirements

Evidence Guide

EVIDENCE GUIDE	
<p>The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>Assessors should ensure that candidates can:</p> <ul style="list-style-type: none"> perform all field activities according to enterprise procedures, legislative and environmental requirements, industry guidelines and codes of practice complete all tasks efficiently and safely.
Context of and specific resources for assessment	<p>This unit of competency is to be assessed in the workplace or simulated workplace environment.</p> <p>This unit of competency may be assessed with:</p> <ul style="list-style-type: none"> <i>MSL913001A Communicate with other people</i> <i>MSL913002A Plan and conduct laboratory/field work.</i> <p>Resources may include:</p> <ul style="list-style-type: none"> enterprise procedures, regulations and codes of practice relevant field equipment, samples, test kits and reagents.
Method of assessment	<p>The following assessment methods are suggested:</p> <ul style="list-style-type: none"> review of performance with a focus on completing field activities safely and efficiently, collection of field samples and data, basic field survival skills, teamwork and accurate record keeping paper exercises associated with organisation of fieldwork, fieldwork operations and basic field survival strategies role plays based on possible accident and emergency situations requiring use of communication procedures and basic field survival strategies oral or written questions. <p>In all cases, practical assessment should be supported by questions to assess underpinning knowledge and those aspects of competency which are difficult to assess directly.</p>

EVIDENCE GUIDE	
	<p>Where applicable, reasonable adjustment must be made to work environments and training situations to accommodate ethnicity, age, gender, demographics and disability.</p> <p>Access must be provided to appropriate learning and/or assessment support when required.</p> <p>The language, literacy and numeracy demands of assessment should not be greater than those required to undertake the unit of competency in a work like environment.</p>
This competency in practice	<p>Industry representatives have provided the case studies below to illustrate the practical application of this unit of competency and show its relevance in a workplace setting.</p> <p>Environmental (1)</p> <p>On a field trip to determine the biodiversity of an island fringing reef, a technical assistant assists with constructing a grid map of the study area. The assistant counts the number of six different species of plant in part of the grid, taking care to minimise the impact on the environment. He/she also accurately records the data on a map to show the location of each plant using a predetermined key.</p> <p>Environmental (2)</p> <p>A technical assistant is asked to pack and safely transport water sampling and monitoring equipment to a distant field site. Firstly, the assistant checks that all the equipment is in working order and that he/she is able to use and maintain it. Given that the technical assistant is licenced to operate a small boat and is a competent underwater diver, he/she also performs a simple underwater survey of macrophytes in a lake in the study area. The assistant follows standard safety and operating procedures and records the results on a grid map and in the daily log book.</p> <p>Construction materials testing</p> <p>A contract laboratory has assigned a team of three to conduct pavement investigations in a rural/remote region. The field assistant uses a checklist to assemble all the required equipment and supplies for a three day trip. The assistant checks the vehicle, toolkit and spares, communication equipment, GPS, water, first aid kit and</p>

EVIDENCE GUIDE

personal protective equipment. He/she also checks that the generator, fuel, jackhammer, dynamic cone penetrometer (DCP), sample bags, measuring devices and camera are all present and in good working order. Because the team will be working away from base for three days, the assistant knows that it is vital that all items are present and stowed safely before he/she tells the team leader that the vehicle is ready for departure.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Codes of practice

Where reference is made to industry codes of practice, and/or Australian/international standards, it is expected the latest version will be used

Standards, codes, procedures and/or enterprise requirements

Standards, codes, procedures and/or enterprise requirements may include:

- Australian and international standards such as:
 - AS 1678 Emergency procedure guide -Transport
 - AS 1940-2004 Storage and handling of flammable and combustible liquids
 - AS 4332-2004 The storage and handling of gases in cylinders
 - AS ISO 17025-2005 General requirements for the competence of testing and calibration laboratories
 - AS/NZS 2243 Set:2006 Safety in laboratories set
 - AS/NZS 4452:1997 The storage and handling of toxic substances
 - AS/NZS ISO 14000 Set:2005 Environmental management standards set
- animal welfare legislation and codes of practice
- Australian Dangerous Goods Code
- Australian Radiation Protection and Nuclear Safety Agency (ARPANSA) Codes of Practice
- basic sampling procedures (labelling, preparation, storage, transport and disposal)
- basic test procedures (validated and authorised)
- cleaning, hygiene and personal hygiene requirements
- environmental requirements related to disposal

RANGE STATEMENT	
	<p>of waste</p> <ul style="list-style-type: none"> • first aid kit and survival manual • incident and accident/injury reports • instructions to comply with new legislation, standards, guidelines and codes • material safety data sheets (MSDS) • occupational health and safety (OHS) national standards and codes of practice • safety requirements for equipment, materials or products • written fieldwork procedures, standard operating procedures (SOPs) and operating manuals
Items of equipment	<p>Items of equipment may include:</p> <ul style="list-style-type: none"> • pH meters, dissolved oxygen probes, portable colourimeters, field microscopes, hand centrifuges, sieves and filters • chemical field test kits • environmental monitoring systems • equipment required for the collection of samples and animals • equipment required for ensuring the wellbeing of animals • equipment suitable for the safe collection and disposal of biological and non-biological wastes • basic first aid equipment • data loggers • communication systems, such as two-way radio and conventional codes and symbols for signalling • tools, vehicle recovery equipment and spare parts • navigation and communication equipment, including GPS
Hazards	<p>Hazards may include:</p> <ul style="list-style-type: none"> • solar radiation, dust and noise • personnel getting lost • incidents or emergencies, such as snake or animal bites • severe weather conditions

RANGE STATEMENT	
	<ul style="list-style-type: none"> • manual handling of heavy objects • vehicle and boat handling in rough/remote conditions • moving machinery and hand tools • driving vehicles in rough terrain and over long distances during day or night
Safety procedures	<p>Safety procedures may include:</p> <ul style="list-style-type: none"> • use of personal protective equipment, such as sunscreen, hats, safety glasses, gloves and safety boots • 'stay with vehicle' and other basic survival techniques • use of a regular communication schedule • handling, storage and disposal of all hazardous materials/waste in accordance with MSDS, labels, and enterprise procedures and regulations
Occupational health and safety (OHS) and environmental management requirements	<p>OHS and environmental management requirements:</p> <ul style="list-style-type: none"> • all operations must comply with enterprise OHS and environmental management requirements, which may be imposed through state/territory or federal legislation - these requirements must not be compromised at any time • all operations assume the potentially hazardous nature of samples and require standard precautions to be applied • where relevant, users should access and apply current industry understanding of infection control issued by the National Health and Medical Research Council (NHMRC) and State and Territory Departments of Health

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare for trial batch mixing	1.1. Identify the job, materials, appropriate procedures and safety requirements 1.2. Record description of the job to be undertaken, compare with specification and report any variations 1.3. Select and prepare tools, equipment and materials in accordance with job requirements 1.4. Confirm the properties and quantities of materials to be used 1.5. Confirm that the required materials are available and ready for use
2. Mix trial batch for evaluation	2.1. Measure out quantities of materials ready for mixing 2.2. Mix the materials according to established procedures 2.3. Discharge the mixture ready for inspection and testing according to established procedures 2.4. Record details of the mix and any observations according to established procedures
3. Evaluate properties of the mixture by inspection and standard test methods	3.1. Obtain representative samples of the mix for testing 3.2. Perform specified tests according to established procedures 3.3. Handle and transport samples in accordance with established procedures 3.4. Label samples and record details in accordance with established procedures
4. Clean equipment and dispose of materials	4.1. Clean mixing, measuring, sampling and testing equipment after use 4.2. Return unused materials to storage 4.3. Dispose of excess materials safely and ethically
5. Maintain records	5.1. Record data in accordance with established procedures 5.2. Maintain equipment records in accordance with established procedures 5.3. Maintain confidentiality of enterprise information
6. Maintain a safe work environment	6.1. Use established safe work practices and personal protective equipment to ensure personal safety and that of other laboratory personnel 6.2. Minimise the generation of wastes and environmental impacts

ELEMENT	PERFORMANCE CRITERIA
	<p>6.3.Ensure safe disposal of laboratory and hazardous wastes</p> <p>6.4.Clean, care for and store equipment and reagents as required</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Required skills include:

- performing simple calculations
- making accurate measurements of volume and mass
- representative sampling
- working safely with equipment and hazardous materials
- working safely in laboratory and field conditions
- setting up and maintaining tools and equipment
- using tools and equipment to perform basic sampling and testing techniques
- observing and recording information on testing and sampling
- handling, transporting and storing materials
- observing interpreting and reporting atypical situations

Required knowledge

Required knowledge includes:

- the international system of units (SI)
- concepts of metrology
- the properties of mixing materials and how they affect the properties of the final product
- hazards involved with materials and equipment involved
- representative sampling
- uses of various materials/enterprise products
- basic testing methods for relevant materials
- enterprise traceability requirements
- relevant health, safety and environment requirements

Evidence Guide

EVIDENCE GUIDE	
<p>The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>Assessors should ensure that candidates can:</p> <ul style="list-style-type: none"> • perform operations in accordance with laboratory and/or enterprise procedures, and appropriate legislative requirements • accurately measure, calculate and record batch quantities, concentrations and other relevant parameters • evaluate properties of the mixture by inspection and standard test methods • recognise and report problems and atypical situations to relevant personnel.
Context of and specific resources for assessment	<p>This unit of competency is to be assessed in the workplace or simulated workplace environment.</p> <p>This unit of competency may be assessed with:</p> <ul style="list-style-type: none"> • <i>MSL952002A Handle and transport samples or equipment</i> • <i>MSL954001A Obtain representative samples in accordance with sampling plan</i> • <i>MSL973001A Perform basic tests.</i> <p>Resources may include:</p> <ul style="list-style-type: none"> • standard facility with appropriate tools, equipment and materials • enterprise procedures, MSDS and product formulation/specifications.
Method of assessment	<p>The following assessment methods are suggested:</p> <ul style="list-style-type: none"> • analysis of trial batches prepared by the candidate over a period of time to ensure accurate and consistent work is obtained within required timelines • inspection of workplace documentation completed by the candidate • feedback from peers and supervisors • use of suitable simulation and/or a range of case studies/scenarios.

EVIDENCE GUIDE

	<p>In all cases, practical assessment should be supported by questions to assess underpinning knowledge and those aspects of competency which are difficult to assess directly.</p> <p>Where applicable, reasonable adjustment must be made to work environments and training situations to accommodate ethnicity, age, gender, demographics and disability.</p> <p>Access must be provided to appropriate learning and/or assessment support when required.</p> <p>The language, literacy and numeracy demands of assessment should not be greater than those required to undertake the unit of competency in a work like environment.</p>
<p>This competency in practice</p>	<p>Industry representatives have provided the case study below to illustrate the practical application of this unit of competency and show its relevance in a workplace setting.</p> <p>Construction materials</p> <p>A laboratory assistant works for a concrete manufacturer. A client requires concrete for a specific project that cannot be supplied using existing standard mixes. The manufacturer must use special aggregates and cement to meet the durability and strength specifications for the project. The laboratory manager obtains quantities of the materials for evaluation purposes. The assistant tests the aggregates to determine their grading properties. From these results, he/she designs a mix to satisfy the project specifications using a standard design method. The mix requires the use of pozzolanic materials and admixtures that were obtained from the suppliers.</p> <p>The manager provides the assistant with the batch quantities required to produce one cubic metre of concrete. To test the mix design, the assistant will produce a 20litre batch in the laboratory. He/she calculates that this quantity will provide sufficient material for the required tests, without undue waste. He/she calculates the quantity of each material required for the trial batch. The assistant selects and prepares the tools and equipment she needs to mix, sample and test the concrete. He/she wears overalls, safety boots and glasses, and uses a barrier cream. He/she measures out</p>

EVIDENCE GUIDE

the quantities required for the trial batch, charges the mixer and allows it to mix for the specified time. He/she then discharges the concrete onto a suitable surface. He/she checks its slump, cohesiveness and air content, recording the data on standard enterprise forms. The manager inspects the concrete, and decides that it is over-sanded and has excessive slump. He/she adjusts the batch quantities and draws up amended values. He/she disposes of the excess concrete and cleans the equipment and tools.

He/she then mixes a new batch using the amended figures. This process continues until the manager is satisfied with the concrete quality. He/she then mixes a larger batch so that he/she can prepare specimens for testing its hardened-state properties.

Range Statement

RANGE STATEMENT	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Interpret test requirements	1.1. Review test request to identify samples to be tested, test method and equipment involved 1.2. Identify hazards associated with the sample, preparation methods and equipment and implement enterprise control measures
2. Set up work area for preparation and examination of samples	2.1. Collect equipment and arrange the workspace so that equipment can be used safely and efficiently 2.2. Perform pre-use and safety checks to ensure equipment is fit for purpose and report faulty or unsafe equipment to appropriate personnel
3. Prepare samples for examination	3.1. Log and label samples according to enterprise procedures to ensure traceability 3.2. Check suitability of the original and prepared sample for the examination and report unsuitable samples to appropriate personnel 3.3. Prepare and store the sample for examination following enterprise methods
4. Set up and use a light microscope	4.1. Set up the light path to optimise resolution 4.2. Select the appropriate objectives and filter for the sample being examined 4.3. Ensure that the lenses are clean 4.4. Adjust settings and alignment of the light path to optimise performance 4.5. Place sample correctly on the stage
5. Observe, identify and report sample characteristics	5.1. Recognise and identify significant sample characteristics 5.2. Perform required calculations accurately 5.3. Prepare and view control samples and check that results are consistent with expected values 5.4. Identify and report out of specification or atypical results promptly to appropriate personnel 5.5. Record and report data in accordance with enterprise procedures
6. Maintain a safe work environment	6.1. Ensure safety and minimise cross-contamination through the use of personal protective clothing and safety equipment 6.2. Handle all samples and equipment in accordance with enterprise safety protocols 6.3. Clean up spills using appropriate techniques to

ELEMENT	PERFORMANCE CRITERIA
	protect personnel, work area and environment 6.4.Minimise generation of waste and environmental impacts 6.5.Collect and dispose of all wastes safely 6.6.Report hazards and incidents to designated personnel using enterprise procedures

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Required skills include:

- setting up the workbench and microscope ergonomically
- setting up, cleaning and using a light microscope to achieve optimum resolution of the specimen
- using personal protective clothing and other safety equipment correctly
- performing counts on samples
- performing basic measurements using grids
- logging and tracking samples through all steps from receiving a sample through to completion of a procedure and reporting
- interpreting and recording test results, including simple calculations
- correctly handling and storing samples and equipment

Required knowledge

Required knowledge includes:

- parts and functions of a light microscope
- importance and appropriate use of controls and certified reference materials
- hazards and risks in laboratories associated with performing microscopic examination
- enterprise and/or legal traceability requirements
- relevant health, safety and environment requirements

Specific industry

Additional knowledge requirements may apply for different industry sectors. For example:

Biological industry:

- basic structure and function of cells and organelles
- basic classes and classification of organisms of organisms, such as prokaryotes, eukaryotes, plants, animals, bacteria, viruses and prions
- cell physiology and processes, such as simple and facilitated diffusion, plasmolysis, osmosis, tonicity, active transport, energy production, mitosis, motility, phagocytosis and pinocytosis
- purposes and mechanisms of staining (e.g. Gram +ve and -ve)

Evidence Guide

EVIDENCE GUIDE	
<p>The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>Assessors should ensure that candidates can:</p> <ul style="list-style-type: none"> • follow enterprise standards, procedures and practices • prepare suitable samples • recognise, identify and document significant sample characteristics • set up a light microscope for optimal resolution • maintain personal safety and that of others • minimise cross-contamination and contamination of the laboratory and environment.
Context of and specific resources for assessment	<p>This unit of competency is to be assessed in the workplace or simulated workplace environment.</p> <p>This unit of competency may be assessed with:</p> <ul style="list-style-type: none"> • <i>MSL922001A Record and present data</i> • <i>MSL933002A Contribute to the achievement of quality objectives</i> • <i>MSL943002A Participate in laboratory/field workplace safety</i> • <i>MSL953001A Receive and prepare samples for testing.</i> <p>Resources may include:</p> <ul style="list-style-type: none"> • standard laboratory equipped with appropriate equipment, such as light microscopes and samples • enterprise procedures, standard methods and materials.
Method of assessment	<p>The following assessment methods are suggested:</p> <ul style="list-style-type: none"> • observation of the candidate performing microscopic examinations • review of data records prepared by the candidate, such as counts, observations and results • feedback from supervisors and peers about adherence to enterprise/technical procedures • questioning to assess underpinning knowledge.

EVIDENCE GUIDE

	<p>In all cases, practical assessment should be supported by questions to assess underpinning knowledge and those aspects of competency which are difficult to assess directly.</p> <p>Where applicable, reasonable adjustment must be made to work environments and training situations to accommodate ethnicity, age, gender, demographics and disability.</p> <p>Access must be provided to appropriate learning and/or assessment support when required.</p> <p>The language, literacy and numeracy demands of assessment should not be greater than those required to undertake the unit of competency in a work like environment.</p>
This competency in practice	<p>Industry representatives have provided the case studies below to illustrate the practical application of this unit of competency and show its relevance in a workplace setting.</p> <p>Construction materials testing</p> <p>The supply of river sand is running out and quarries are accessing alternative sources of sand for use in concrete mixes in construction. The sand should not be an aggregate that is likely to break down into smaller particles. A technician in a quarry company is required to analyse samples of crushed rock using a light microscope. The technician looks for characteristics of the sample, such as angularities, roundness, sharpness, cracks, presence of organic matter, mineral structure and whether the particles are a conglomerate. If the sample does not meet the characteristics, the company will need to treat it to make it suitable for use in concrete mixes (for example by washing, crushing and sieving).</p> <p>Food processing</p> <p>A customer complaint is received about the baking properties of a flour delivery. The laboratory assistant at the flour mill is given the task of testing the starch content of the suspect flour. He/she prepares iodine stained samples of the returned flour and a range of baked and partially baked products prepared from it. First, the assistant makes up fresh iodine staining solution and then prepares slides of each sample for microscopic examination. He/she identifies the</p>

EVIDENCE GUIDE

characteristic starch granules of the flour sample and records the degree of gelatinisation in the starch granules in the baked samples. He/she discusses the results with the supervisor and prepares a report for the customer.

Biomedical

A laboratory assistant works in the microbiology laboratory of a public hospital and is responsible for preparing and staining sputum smears from patients for micro and culture. The assistant puts on a clean gown and gloves before collecting the specimens from the reception area of the laboratory. The assistant prepares cultures of the sputum specimens on simple and selective media before preparing, fixing and staining smears for microscopic examination. The results are checked by the supervisor, entered into the laboratory information management system (LIMS) and sent to the appropriate section of the hospital.

Environmental

A laboratory assistant prepares media for plant tissue culture. There has been some contamination of Gram-positive bacteria in the last two batches and the supervisor has initiated an overhaul of the preparation and aliquotting procedure. The laboratory assistant has been asked to follow the new procedure exactly and to remove samples at each stage of ingredient addition for microscopic examination. The laboratory assistant records the exact addition amounts, batch numbers and brands of the reagents, the location of the addition (which biohazard cabinet), the equipment used and the pre-sterilisation records of all equipment.

The laboratory assistant then prepares slides, fixes them and performs a Gram stain on each of the aliquots removed from the new preparation run. Microscopic analysis of each aliquot reveals nil contamination. The supervisor decides that there has been a breach in the old procedure and the laboratory assistant is asked to follow the new procedure and to perform a routine microscopic check on all batches for the next month.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Codes of practice

Where reference is made to industry codes of practice, and/or Australian/international standards, it is expected the latest version will be used

Standards, codes, procedures and/or enterprise requirements

Standards, codes, procedures and/or enterprise requirements may include:

- Australian and international standards, such as:
 - AS ISO 17025-2005 General requirements for the competence of testing and calibration laboratories
 - AS/NZS ISO 9000 Set:2008 Quality management systems set
 - AS/NZS 2243 Set:2006 Safety in laboratories set
- principles of good laboratory practice (GLP)
- Australian code of good manufacturing practice for medicinal products (GMP)
- safety manuals
- quality manuals and equipment and procedure manuals
- standard operating procedures (SOPs)
- material safety data sheets (MSDS)
- enterprise recording and reporting procedures
- production and laboratory schedules
- material, production and product specifications

Preparation of samples

Preparation of samples may include:

- aseptic transfer of specimen
- centrifugation
- cooling
- drying
- filling a counting chamber in one continuous flow without bubbles or overflow
- filtration

RANGE STATEMENT	
	<ul style="list-style-type: none"> • fixing of films to minimise cell damage and the production of artefacts • labelling • mounting of stained films, sections and whole mounts to ensure long term preservation • permanent labels for smears, films and sections for presentation, storage and retrieval • physical or chemical separation • selection of diluent to preserve or enhance visibility of the cells to be counted • selection, filling and cover slipping of a clean, dry counting chamber to ensure even distribution of cells during filling • serial dilution to enable individual cells to be reliably counted • staining of fixed material to illustrate required characteristics • sub-sampling • thin film or smear on a slide
Checking sample condition	<p>Checking sample condition may include:</p> <ul style="list-style-type: none"> • labelling • spillage • spoilage due to incorrect storage and transport conditions • temperature control • suitability for the examination
Pre-use checks	<p>Pre-use checks may include:</p> <ul style="list-style-type: none"> • calibration • cleaning/checking use by dates of reagents • routine maintenance
Equipment	<p>Equipment may include:</p> <ul style="list-style-type: none"> • glass slides • counting chambers (e.g. haemocytometer) • optical graticules and stage micrometers • tissue culture flasks
Light microscopes	<p>Light microscopes may include:</p> <ul style="list-style-type: none"> • bright field illumination microscopic examination up to 1000x magnification • stereomicroscopes and dissection microscopes

RANGE STATEMENT	
	<ul style="list-style-type: none"> • compound microscopes • phase contrast microscopes • inverted microscopes
Biological samples	<p>Biological samples may include:</p> <ul style="list-style-type: none"> • smears, impression smears, sections, squashes, films and whole mounts • a monolayer of cells in smears and films • fixed smears for demonstration of bacteria by the methylene blue and Gram staining techniques • blood films stained by a Romanowsky technique to clearly show differentiation of granulocytes • stained sections of animal tissues using regressive haematoxylin and eosin to differentiate cytoplasmic and nuclear detail • differentially stained monocotyledon and dicotyledon stem sections to demonstrate the structure of vascular bundles (xylem, phloem and cambium) • stained whole mounts of helminths • whole mounts, such as liver flukes, planaria and samples of animal faeces to demonstrate ova, cysts and larvae • pond water organisms • onion root tip squash • midstream sample of urine
Physical samples	<p>Physical samples may include:</p> <ul style="list-style-type: none"> • sand • asbestos fibres • coal samples • construction testing materials • geological specimens
Checking prepared samples	<p>Checking prepared samples may include looking for:</p> <ul style="list-style-type: none"> • clean and scratch-free microscope slides to reduce artefacts • preparation according to SOPs • a homogeneous suspension of sample • films and smears that have been fixed rapidly

RANGE STATEMENT	
	<ul style="list-style-type: none"> • thin films with a monolayer of cells • appropriate whole mounts for intact organisms • correct sample identification during and after processing
Sample characteristics	<p>Sample characteristics are restricted to what can be viewed by bright light microscopy and may include:</p> <ul style="list-style-type: none"> • shape and size of particles • presence of contamination • colour • consistency and variability • number of cells (e.g. cells in blood or other particulate samples, such as a yeast suspension or pollen grains) • type of cells, percentage of atypical cells, presence/absence of cells, size of cells, viable and non-viable cells and trajectory • presence of stained material, such as starch • colour/staining and morphology • motility
Calculations	<p>Calculations may include:</p> <ul style="list-style-type: none"> • dilutions • percentage viability • number of cells in original sample after dilution • calculation of cells/ml in a number of squares of a counting chamber
Hazards	<p>Hazards may include:</p> <ul style="list-style-type: none"> • micro-organisms and agents associated with soil, air, water, blood and blood products and human or animal tissue and fluids • chemicals and stains • sharps and broken glassware • aerosols
Safety practices and personal protective equipment	<p>Safety practices and personal protective equipment may include:</p> <ul style="list-style-type: none"> • use of MSDS • use of personal protective equipment, such as safety glasses, gloves and coveralls

RANGE STATEMENT	
	<ul style="list-style-type: none"> • use of biohazard containers and laminar flow cabinet • correct labelling of reagents and hazardous materials • handling and storing hazardous materials and equipment in accordance with labels, MSDS and manufacturer's instructions • ergonomic layout, correct illumination and organisation of workbench • regular cleaning and/or decontamination of equipment and work areas
Occupational health and safety (OHS) and environmental management requirements	<p>OHS and environmental management requirements:</p> <ul style="list-style-type: none"> • all operations must comply with enterprise OHS and environmental management requirements, which may be imposed through state/territory or federal legislation - these requirements must not be compromised at any time • all operations assume the potentially hazardous nature of samples and require standard precautions to be applied • where relevant, users should access and apply current industry understanding of infection control issued by the National Health and Medical Research Council (NHMRC) and State and Territory Departments of Health

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare solutions	1.1. Select appropriate procedure for solution preparation 1.2. Select equipment, materials and solvent of specified purity 1.3. Measure appropriate quantities of reagents for solution preparation and record data. 1.4. Select and assemble specified laboratory equipment and appropriate grade of glassware 1.5. Perform specified dilutions 1.6. Prepare solutions to achieve homogeneous mix of the specified concentration 1.7. Label and store solutions to maintain identity and stability
2. Standardise and use volumetric solutions	2.1. Assemble appropriate laboratory equipment 2.2. Perform serial dilutions as required 2.3. Standardise the solution to the required specified range and precision 2.4. Label and store solutions to maintain identity and stability 2.5. Use standard volumetric solutions to determine concentration of unknown solutions
3. Calculate and record data	3.1. Calculate specified concentrations 3.2. Use authorised procedure if data is to be modified 3.3. Estimate and document uncertainty of measurement in accordance with enterprise procedures, if required 3.4. Record all relevant details according to laboratory procedures and report results 3.5. Report concentration with appropriate units
4. Monitor the quality of laboratory solutions	4.1. Check solutions for visual deterioration and expiry date 4.2. Restandardise or dispose of dated or deteriorated solutions 4.3. Record details and label solutions according to laboratory procedures
5. Maintain a safe work environment	5.1. Use established safe work practices and personal protective equipment to ensure personal safety and that of other laboratory personnel 5.2. Clean up spills using appropriate techniques to protect personnel, work area and environment 5.3. Minimise generation of waste and environmental

ELEMENT	PERFORMANCE CRITERIA
	impacts 5.4.Ensure the safe collection of laboratory and hazardous waste for subsequent disposal 5.5.Store equipment and reagents as required

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Required skills include:

- interpreting and following enterprise standard operating procedures (SOPs)
- determining equivalence points using indicators and graphical methods
- using calculation methods, including appropriate units, uncertainties, balancing equations, the concentration of the solution given the chemical reaction for the titration
- using apparatus and reagents to prepare standard solutions such as balances and volumetric glassware
- selecting and using primary and secondary standards and indicators
- performing quality assurance checks for solution performance
- performing titrations
- recognising control results that are not within acceptable range
- interpreting and using safety information, such as that provided by material safety data sheets (MSDS) and follow relevant safety procedures

Required knowledge

Required knowledge includes:

- solution terminology, chemistry of acids, bases, buffers, redox reactions and complexometric reactions
- concepts of metrology
- grades of glassware, reagents and their use
- reactions used for standardisation and desirable characteristics
- enterprise communication and reporting procedures
- occupational health and safety (OHS) procedures, including those for using corrosive materials
- relevant health, safety and environment requirements

Evidence Guide

EVIDENCE GUIDE	
<p>The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>Assessors should ensure that candidates can:</p> <ul style="list-style-type: none"> • use balances and volumetric glassware • select and use primary and secondary standards • select and use indicators • perform quality assurance checks for solution performance • perform titrations using laboratory procedures with required accuracy and precision and within required timelines • calculate the concentration of the solution given the chemical reaction for the titration • recognise control results that are not within acceptable range • record results to enterprise standards • label and store solutions in accordance with enterprise procedures • interpret and follow enterprise SOPs • interpret and use safety information, such as that provided by MSDS and follow relevant safety procedures.
Context of and specific resources for assessment	<p>This unit of competency is to be assessed in the workplace or simulated workplace environment.</p> <p>This unit of competency may be assessed with:</p> <ul style="list-style-type: none"> • <i>relevant MSAL974000 series units of competency, and</i> • <i>relevant MSAL975000 series units of competency dealing with sampling, tests and measurements.</i> <p>Resources may include:</p> <ul style="list-style-type: none"> • standard laboratory equipped with appropriate volumetric equipment • laboratory reagents and equipment • SOPs and testing methods.
Method of assessment	<p>The following assessment methods are suggested:</p>

EVIDENCE GUIDE

	<ul style="list-style-type: none"> • inspection and/or testing of solutions prepared by the candidate • review of records and workplace documentation completed by candidate • review of work outputs by the candidate over time to ensure accuracy, consistency and timeliness • feedback from peers and supervisors • observation of the candidate preparing, standardising and using a range of solutions • oral or written questioning. <p>In all cases, practical assessment should be supported by questions to assess underpinning knowledge and those aspects of competency which are difficult to assess directly.</p> <p>Where applicable, reasonable adjustment must be made to work environments and training situations to accommodate ethnicity, age, gender, demographics and disability.</p> <p>Access must be provided to appropriate learning and/or assessment support when required.</p> <p>The language, literacy and numeracy demands of assessment should not be greater than those required to undertake the unit of competency in a work like environment.</p>
This competency in practice	<p>Industry representatives have provided the case studies below to illustrate the practical application of this unit of competency and to show its relevance in a workplace setting.</p> <p>Manufacturing</p> <p>A standard solution is used to determine the concentration of unknown solutions. The quality of these analyses is critically related to the accuracy with which the concentration of the standard solution is known. Therefore, laboratory technicians spend considerable effort to ensure that the materials and methods used for the preparation and standardisation will lead to a solution of accurately known concentration. For example, anhydrous sodium carbonate is often used to prepare solutions to determine the concentrations of acids. The sodium carbonate is heated at a suitable temperature to remove any trace of moisture and cooled in a dessicator. An appropriate quantity is dissolved in distilled water</p>

EVIDENCE GUIDE

and made up to volume in a volumetric flask. This solution of known concentration is then titrated with acids of unknown concentration and the concentration of the acids determined.

Environmental

A laboratory technician was required to determine the total acidity of a water sample as part of a quality control program. The total acidity was measured by titrating the water sample with sodium hydroxide of known concentration using an appropriate indicator. The concentration of the sodium hydroxide was determined via a volumetric titration against a primary standard of potassium hydrogen phthalate.

The value of the total acidity was determined by multiplying the volume of sodium hydroxide used with a numerical 'factor' which had been determined by the laboratory supervisor in order to save time. The value of the 'factor' was displayed on the titration equipment. However, a new technical assistant did the full calculation and found that his/her result differed slightly from that obtained using the 'factor'. After discussion with the laboratory supervisor it was agreed that the error was in the 'factor' and the assumption that each new batch of sodium hydroxide prepared was exactly the same concentration as all previous batches. This was incorrect as the concentration of each batch differed slightly and its actual concentration was determined accurate, using the primary standard. The procedure was changed so that the full calculation was required for all tests.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Codes of practice

Where reference is made to industry codes of practice, and/or Australian/international standards, it is expected the latest version will be used

Standards, codes, procedures and/or enterprise requirements

Standards, codes, procedures and/or enterprise requirements may include:

- Australian and international standards, such as:
 - AS 2163-2000 Laboratory glassware - Measuring cylinders
 - AS 2165-1996 Laboratory glassware - Burettes AS 2162.1-1996 Verification and use of volumetric apparatus - General - Volumetric glassware
 - AS ISO 1000-1998 The international system of units (SI) and its application
 - AS/NZS ISO 9000 Set:2008 Quality management systems set
 - AS ISO 17025-2005 General requirements for the competence of testing and calibration laboratories
 - AS/NZS 2243 Set:2006 Safety in laboratories set
- Australian code of good manufacturing practice for medicinal products (GMP)
- calibration and maintenance schedules

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Interpret and schedule test requirements	1.1. Review test request to identify samples to be tested, test method and equipment/instruments involved 1.2. Identify hazards and enterprise control measures associated with the sample, preparation/test methods, reagents and/or equipment 1.3. Plan work sequences to optimise throughput of multiple samples, if appropriate
2. Receive and prepare samples	2.1. Log samples using standard operating procedures (SOPs) 2.2. Record sample description, compare with specification and note and report discrepancies 2.3. Prepare samples and standards in accordance with chemical testing requirements 2.4. Ensure traceability of samples from receipt to reporting of results
3. Check equipment before use	3.1. Set up equipment/instruments in accordance with test method requirements 3.2. Perform pre-use and safety checks in accordance with relevant enterprise and operating procedures 3.3. Identify faulty or unsafe components and equipment and report to appropriate personnel 3.4. Check equipment calibration using specified standards and procedures, if applicable 3.5. Quarantine out of calibration equipment/instruments 3.6. Ensure reagents required for the test are available and meet quality requirements
4. Test samples to determine chemical species or properties	4.1. Operate equipment/instruments in accordance with test method requirements 4.2. Perform tests/procedures on all samples and standards, if appropriate, in accordance with specified methods 4.3. Shut down equipment/instruments in accordance with operating procedures
5. Process and interpret data	5.1. Record test data noting atypical observations 5.2. Construct calibration graphs, if appropriate, and compute results for all samples from these graphs 5.3. Ensure calculated values are consistent with expectations 5.4. Record and report results in accordance with

ELEMENT	PERFORMANCE CRITERIA
	<p>enterprise procedures</p> <p>5.5. Estimate and document uncertainty of measurement in accordance with enterprise procedures, if required</p> <p>5.6. Interpret trends in data and/or results and report out of specification or atypical results promptly to appropriate personnel</p> <p>5.7. Determine if obvious procedure or equipment problems have led to atypical data or results</p>
6. Maintain a safe work environment	<p>6.1. Use established safe work practices and personal protective equipment to ensure personal safety and that of other laboratory personnel</p> <p>6.2. Minimise the generation of wastes and environmental impacts</p> <p>6.3. Ensure the safe collection of laboratory and hazardous waste for subsequent disposal</p> <p>6.4. Care for and store equipment and reagents as required</p>
7. Maintain laboratory records	<p>7.1. Enter approved data into laboratory information management system</p> <p>7.2. Maintain confidentiality and security of enterprise information and laboratory data</p> <p>7.3. Maintain equipment and calibration logs in accordance with enterprise procedures</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Required skills include:

- interpreting test methods and procedures
- sample preparation procedures
- performing calibration checks
- using instruments for qualitative and/or quantitative analysis
- maintaining and evaluating reagents
- troubleshooting basic equipment/method
- using calculation methods, including appropriate units, uncertainties, balancing equations, and the concentration of the solution given the chemical reaction for the titration
- preparing calibration graphs and calculating results using appropriate units and precision
- applying theoretical knowledge to interpret gross features of data and make relevant conclusions such as identifying atypical results as out of normal range or an artefact
- tracing and sourcing obvious causes of an artefact
- recording and communicating results in accordance with enterprise procedures
- maintaining security, integrity, traceability of samples, sub-samples, test data, results and documentation

Required knowledge

Required knowledge includes:

- chemical principles and concepts underpinning test/procedure
- purpose of the tests
- concepts of metrology
- principles and concepts related to equipment/instrument operation and testing
- function of key components of the equipment/instrument and/or reagents
- effects of modifying equipment/instrument variables
- use of calibration procedures
- enterprise and/or legal traceability requirements
- relevant health, safety and environment requirements

Evidence Guide

EVIDENCE GUIDE	
<p>The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>Assessors should ensure that candidates can:</p> <ul style="list-style-type: none"> • interpret test methods/procedures accurately • prepare and test samples using procedures appropriate to the nature of sample • perform calibration checks (if required) • safely operate test equipment/instruments to enterprise standards and/or manufacturer's specification • prepare calibration graphs and calculate results using appropriate units and precision • apply basic theoretical knowledge to interpret gross features of data and make relevant conclusions • identify atypical results as out of normal range or an artefact • trace and source obvious causes of an artefact • communicate problems to a supervisor or outside service technician • record and communicate results in accordance with enterprise procedures • maintain security, integrity, traceability of samples, sub-samples, test data and results and documentation.
Context of and specific resources for assessment	<p>This unit of competency is to be assessed in the workplace or simulated workplace environment.</p> <p>This unit of competency may be assessed with:</p> <ul style="list-style-type: none"> • <i>MSL924001A Process and interpret data</i> • <i>MSL974001A Prepare, standardise and use solutions.</i> <p>Resources may include:</p> <ul style="list-style-type: none"> • standard laboratory equipped with appropriate test equipment/instruments, standards and reagents • enterprise procedures and standard methods.
Method of assessment	<p>The following assessment methods are suggested:</p> <ul style="list-style-type: none"> • review of test data/results obtained by the candidate

EVIDENCE GUIDE

	<p>over a period of time to check accuracy, consistency and timeliness of results</p> <ul style="list-style-type: none"> • review of test records and workplace documentation completed by the candidate • observation of candidate conducting a range of chemical tests and procedures and sample preparation • feedback from peers and supervisors • oral or written questioning of chemical principles and concepts, test methods and enterprise procedures. <p>In all cases, practical assessment should be supported by questions to assess underpinning knowledge and those aspects of competency which are difficult to assess directly.</p> <p>Where applicable, reasonable adjustment must be made to work environments and training situations to accommodate ethnicity, age, gender, demographics and disability.</p> <p>Access must be provided to appropriate learning and/or assessment support when required.</p> <p>The language, literacy and numeracy demands of assessment should not be greater than those required to undertake the unit of competency in a work like environment.</p>
This competency in practice	<p>Industry representatives have provided the case studies below to illustrate the practical application of this unit of competency and to show its relevance in a workplace setting.</p> <p>Manufacturing</p> <p>Ultraviolet spectroscopy is a suitable method for determining the concentration of sulphanilamide in pharmaceutical preparations. The ultraviolet absorption spectrum is pH dependent, with the wavelength maximum different in acid and alkaline solutions.</p> <p>Example: a technician was conducting an analysis and noted that the wavelength maxima had moved from approximately 250nm to below 230nm. After reviewing the procedure being used and checking for possible errors, the technician found that an incorrect solvent had been used for the analysis. The hydrochloric acid solvent was replaced with sodium hydroxide, as per the standard method, and the correct absorption spectrum was obtained.</p>

EVIDENCE GUIDE**Environmental**

A technician was asked to test water samples from a local lake over several days to determine the lake's nutrient levels following reports of algal blooms in the lake over the preceding weeks. He/she used a field colorimeter kit to determine both nitrates and orthophosphates using SOPs. Because the same colorimetric cells were used for the nitrate and orthophosphate tests, they were carefully washed and rinsed with distilled water between all tests (as specified in the SOP). After reviewing the results from the first three days, the technician noted that the first orthophosphate result, which was done immediately after all the nitrate tests, was much higher than subsequent orthophosphate tests which were all consistently low. The technician argued that the 'high' results for the first orthophosphate test may be due to cross-contamination from trace amounts of reagents used in previous nitrate tests despite having closely followed the cleaning/rinsing SOPs. After discussion with his/her supervisor, the technician modified the field procedures by using totally different colorimetric cells for the nitrate and orthophosphate tests. For all subsequent tests no 'high' orthophosphate results were obtained for the first sample. As a result, the laboratory supervisor amended the SOPs to incorporate this new requirement.

Food processing

Regular checks are conducted on the percentage of salt in cheese at a dairy company's laboratory. A technician checks the results from the aromatic salt-titration equipment and, if the results are abnormal, notifies the supervisor before taking appropriate action. After obtaining a high result, for example, the assistant notified the supervisor and then began checking the machine to identify a possible reason for the high reading. He/she found that the supply bottle of silver nitrate used in the test was almost empty. This had resulted in less solution being pumped through the equipment than required, leading to graph readings that indicated a high percentage of salt. After replacing the silver nitrate bottle and recalibrating the equipment, the assistant retested the cheese samples and found that they contained the expected 1-2% salt.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Codes of practice

Where reference is made to industry codes of practice, and/or Australian/international standards, it is expected the latest version will be used

Standards, codes, procedures and/or enterprise requirements

Standards, codes, procedures and/or enterprise requirements may include:

- Australian and international standards, such as:
 - AS 2134.1-1999 Recommended practice for chemical analysis by atomic absorption spectrometry - Flame atomic absorption spectrometry
 - AS 2162.1-1996 Verification and use of volumetric apparatus - General - Volumetric glassware
 - AS 3753-2001 Recommended practice for chemical analysis by ultraviolet/visible spectrophotometry
 - AS ISO 1000-1998 The international system of units (SI) and its application
 - AS ISO 17025-2005 General requirements for the competence of testing and calibration laboratories
 - AS/NZS 2243 Set:2006 Safety in laboratories set
 - AS/NZS ISO 9000 Set:2008 Quality management systems set
- Australian code of good manufacturing practice for medicinal products (GMP)
- calibration and maintenance schedules
- enterprise recording and reporting procedures
- equipment manuals
- equipment startup, operation and shutdown procedures
- industry methods, such as Royal Australian

RANGE STATEMENT	
	<p>Chemical Institute (RACI) and/or American Association of Cereal Chemists (AACC) methods for inorganic constituents</p> <ul style="list-style-type: none"> • material safety data sheets (MSDS) and safety procedures • material, production and product specifications • national measurement regulations and guidelines • principles of good laboratory practice (GLP) • production and laboratory schedules • quality manuals and equipment and procedure manuals • SOPs • waste minimisation and safe disposal procedures

Co-requisite units

Co-requisite units	

MSL974005A Perform physical tests

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	<p>This unit of competency covers the ability to interpret physical test requirements, prepare samples, conduct pre-use and calibration checks on equipment and perform routine physical tests. These tests will involve several measurement steps. The unit includes data processing and interpretation of results and tracking of obvious test malfunctions where the procedure is standardised. However, personnel are not required to analyse data, optimise tests/procedures for specific samples or troubleshoot equipment problems where the solution is not apparent.</p>
------------------------	---

Application of the Unit

Application of the unit	<p>This unit of competency is applicable to laboratory or technical assistants and instrument operators working in the manufacturing, environment, food and construction materials testing industry sectors.</p> <p>Industry representatives have provided case studies to illustrate the practical application of this unit of competency and to show its relevance in a workplace setting. These are found at the end of this unit of competency under the section 'This competency in practice'.</p>

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Interpret and schedule test requirements	1.1. Review test request to identify samples to be tested, test method and equipment/instruments involved 1.2. Identify hazards and enterprise control measures associated with the sample, preparation/test methods and/or equipment 1.3. Plan work sequences to optimise throughput of multiple samples, if appropriate
2. Receive and prepare samples	2.1. Log samples using standard operating procedures (SOPs) 2.2. Record sample description, compare with specification and note and report discrepancies 2.3. Prepare samples and standards in accordance with physical testing requirements 2.4. Ensure traceability of samples from receipt to reporting of results
3. Check equipment before use	3.1. Set up equipment/instruments in accordance with test method requirements 3.2. Perform pre-use and safety checks in accordance with relevant enterprise and operating procedures 3.3. Identify faulty or unsafe components and equipment and report to appropriate personnel 3.4. Check equipment calibration using specified procedures, if applicable 3.5. Quarantine out of calibration equipment/instruments
4. Test samples to determine physical properties	4.1. Operate equipment/instruments in accordance with test method requirements 4.2. Perform tests/procedures on all samples and standards, if appropriate, in accordance with specified methods 4.3. Shut down equipment/instruments in accordance with operating procedures
5. Process and interpret data	5.1. Record test data noting atypical observations 5.2. Ensure calculated values are consistent with expectations 5.3. Estimate and document uncertainty of measurement in accordance with enterprise procedures, if required 5.4. Record and report results in accordance with enterprise procedures 5.5. Interpret trends in data and/or results and report out

ELEMENT	PERFORMANCE CRITERIA
	<p>of specification or atypical results promptly to appropriate personnel</p> <p>5.6.Determine if obvious procedure or equipment problems have led to atypical data or results</p>
6. Maintain a safe work environment	<p>6.1.Use established safe work practices and personal protective equipment to ensure personal safety and that of other laboratory personnel</p> <p>6.2.Minimise the generation of wastes and environmental impacts</p> <p>6.3.Ensure the safe collection of laboratory and hazardous waste for subsequent disposal</p> <p>6.4.Care for and store equipment and materials as required</p>
7. Maintain laboratory records	<p>7.1.Enter approved data into laboratory information management system</p> <p>7.2.Maintain confidentiality and security of enterprise information and laboratory data</p> <p>7.3.Maintain equipment and calibration logs in accordance with enterprise procedures</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Required skills include:

- using instruments for qualitative and/or quantitative analysis
- interpreting test methods and procedures
- sample preparation procedures
- performing calibration checks
- metrology techniques underpinning test/procedure including estimating uncertainty
- using instruments for qualitative and/or quantitative analysis
- maintaining and evaluating reagents
- troubleshooting basic equipment/method
- preparing calibration graphs and calculating results using appropriate units and precision
- applying theoretical knowledge to interpret gross features of data and make relevant conclusions such as identifying atypical results as out of normal range or an artefact
- tracing and sourcing obvious causes of an artefact
- recording and communicating results in accordance with enterprise procedures
- maintaining security, integrity, traceability of samples, sub-samples, test data, results and documentation

Required knowledge

Required knowledge includes:

- physical principles and concepts underpinning the test/procedure
- purpose of tests
- function of key components of the equipment/instrument
- effects on test of modifying equipment/instrument variables
- sample preparation procedures
- concepts of metrology
- basic equipment/method troubleshooting procedures
- enterprise and/or legal traceability requirements
- relevant health, safety and environment requirements

Evidence Guide

EVIDENCE GUIDE	
<p>The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>Assessors should ensure that candidates can:</p> <ul style="list-style-type: none"> • interpret test methods/procedures accurately • prepare and test samples in accordance with specified methods • perform calibration checks (if required) • safely operate test equipment/instruments to enterprise standards and/or manufacturer's specifications • apply basic knowledge of physical properties of materials to interpret gross features of data and make relevant conclusions • identify atypical results, such as out of normal range or an artefact • trace and source obvious causes of an artefact • communicate problems to a supervisor or outside service technician • calculate, record and communicate results in accordance with enterprise procedures • maintain security, integrity and traceability of samples, sub-samples, test data/results and documentation.
Context of and specific resources for assessment	<p>This unit of competency is to be assessed in the workplace or simulated workplace environment.</p> <p>This unit of competency may be assessed with:</p> <ul style="list-style-type: none"> • <i>MSL924001A Process and interpret data.</i> <p>Resources may include:</p> <ul style="list-style-type: none"> • standard laboratory equipped with appropriate test equipment/instruments, standards and materials • enterprise procedures and standard methods.
Method of assessment	<p>The following assessment methods are suggested:</p> <ul style="list-style-type: none"> • review of test data/results obtained by the candidate over a period of time to check accuracy, consistency and timeliness of results

EVIDENCE GUIDE

	<ul style="list-style-type: none"> • review of test records and workplace documentation completed by the candidate • observation of candidate conducting a range of physical tests and procedures and sample preparation • feedback from peers and supervisors • oral or written questioning of physical principles and concepts, test methods and enterprise procedures. <p>In all cases, practical assessment should be supported by questions to assess underpinning knowledge and those aspects of competency which are difficult to assess directly.</p> <p>Where applicable, reasonable adjustment must be made to work environments and training situations to accommodate ethnicity, age, gender, demographics and disability.</p> <p>Access must be provided to appropriate learning and/or assessment support when required.</p> <p>The language, literacy and numeracy demands of assessment should not be greater than those required to undertake the unit of competency in a work like environment.</p>
This competency in practice	<p>Industry representatives have provided the case studies below to illustrate the practical application of this unit of competency and to show its relevance in a workplace setting.</p> <p>Manufacturing</p> <p>A technical assistant was measuring the specific density of a shipment of glycerol using a standard laboratory procedure. The result did not agree with the manufacturer's certificate of analysis. The assistant notified the manufacturer who came to the plant and checked the delivered material. It had been raining while the glycerol was in transit and rain water had entered the drum, diluting the glycerol. The drum was returned to the manufacturer and a new drum was supplied to the manufacturing plant. The manufacturer investigated the seals on the glycerol drums and took action to ensure that new seals would protect the product in transit.</p> <p>Food processing</p> <p>A technician was testing the melt flow index of a new type of polymer that was to be used as a sealant for</p>

EVIDENCE GUIDE

packages of freeze dried coffee. The technician measured the melt flow rate and found it was much too high. The technician then checked the melt flow equipment as per the manufacturer's directions and found the machine was out of calibration. After recalibration using recommended standards, another sample was obtained and retested. This time, the polymer was within specification and was released for use in production.

Range Statement

RANGE STATEMENT	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. NWP229B Repair minor structures

Modification History

Not applicable.

Unit Descriptor

Unit descriptor This unit of competency describes the outcomes required to construct and repair minor structural assets of the water industry, such as meter pits, erosion barriers and small weirs.

Application of the Unit

Application of the unit This unit supports the attainment of skills and knowledge required for field and operational staff with specific responsibility for ensuring that small structural assets are constructed and repaired in a safe and timely manner.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

Employability skills This unit of competency contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency. Performance criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the required skills and knowledge, and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Plan and prepare repair work.	<p>1.1 Determine work requirements from plans, specifications and instructions.</p> <p>1.2 Select and check <i>formwork, materials and equipment</i> required to ensure that safety requirements of task and site are met.</p> <p>1.3 Select, fit and use personal protective equipment.</p> <p>1.4 Conduct appropriate utility location activities prior to excavation according to <i>legislative and organisational requirements</i>.</p> <p>1.5 Arrange appropriate site boundary protection according to organisational requirements.</p>
2 Repair minor structures.	<p>2.1 Inspect structures and determine appropriate <i>repair techniques</i>.</p> <p>2.2 Apply appropriate repair techniques according to manufacturer guidelines and legislative and organisational requirements.</p>
3 Complete and record work outcomes.	<p>3.1 Check, maintain and store equipment, tools and materials according to manufacturer guidelines and organisational procedures.</p> <p>3.2 Restore work site to meet environmental and organisational requirements.</p> <p>3.3 Complete workplace records and process as required.</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This describes the essential skills and knowledge and their level, required for this unit.

Required skills:

- undertake minor repairs to structures
- interpret plans, instructions and standard operating procedures
- follow procedures and standards
- use safety equipment and personal protective equipment
- use tools and machinery
- lay concrete
- insert water stop or seal
- identify hazards
- perform work-related calculations
- give and receive instructions
- work effectively as part of a team
- communicate with customers and other employees
- use literacy skills in regard to verbal and written communication in the workplace
- apply lock-out and tag-out procedures.

Required knowledge:

- OHS procedures
- personal work site safety procedures
- construction calculations
- risk factors and potential hazards of minor structure construction and maintenance
- equipment operation
- formwork preparation and positioning
- methods of repairing concrete, brick and stone structures
- concrete placement techniques, including compaction
- water to cement ratio of concrete.

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the Assessment Guidelines for the Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

The candidate should demonstrate the ability to repair work on minor structural assets of the water industry including:

- planning and preparing work site
- performing repair tasks according to manufacturer specifications and organisational requirements
- checking work, restoring work site, storing equipment and completing documentation.

Context of and specific resources for assessment

Access to the workplace and resources including:

- documentation that should normally be available in a water industry organisation
- relevant codes, standards and government regulations.

Where applicable, physical resources should include equipment modified for people with disabilities.

Access must be provided to appropriate learning and assessment support when required.

Assessment processes and techniques must be culturally appropriate, and appropriate to the language and literacy capacity of the candidate and the work being performed.

Validity and sufficiency of evidence requires that:

- competency will need to be demonstrated over a period of time reflecting the scope of the role and the practical requirements of the workplace
- where the assessment is part of a structured learning experience the evidence collected must relate to a number of performances assessed at different points in time and separated by further learning and practice
- a decision of competence should only be made when the assessor has complete confidence in the person's competence over time and in various contexts
- all assessment that is part of a structured learning experience must include a combination of direct, indirect and supplementary evidence
- where assessment is for the purpose of recognition (RCC/RPL), the evidence provided will need to be authenticated and show that it represents competency demonstrated over a period of time

EVIDENCE GUIDE

- assessment can be through simulated project-based activity and must include evidence relating to each of the elements in this unit.

In all cases where practical assessment is used it will be combined with targeted questioning to assess the underpinning knowledge. Questioning will be undertaken in a manner appropriate to the skill levels of the operator and cultural issues that may affect responses to the questions, and will reflect the requirements of the competency and the work being performed.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording, if used in the performance criteria, is detailed below. Add any essential operating conditions that may be present with training and assessment depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts.

Formwork, materials and equipment may include:

- formwork, such as:
 - steel formwork
 - timber formwork
- equipment, such as:
 - personal protective equipment
 - hand and power tools
 - ties
 - chains
 - props
 - jacks
 - drainage aggregate
 - pipes
 - lifting and winching equipment
 - mechanical excavation equipment
 - pneumatic and motorised equipment, including:
 - compressors
 - pneumatic spades and attachments
 - motorised cutting equipment
 - cable ways
 - travellers
 - gauging stations
 - small control weirs
 - communication equipment.

Legislative and organisational requirements may include:

- relevant federal and state or territory legislation and regulations
- codes of practice, associated standards and guidance material
- documented organisational policies, manuals and induction programs
- relevant community planning and development agreements, such as land care agreements.

Repair techniques may include:

- quick-set cement
- cementitious materials
- proprietary equipment.

Unit Sector(s)

Not applicable.

Competency field

Competency field Common

PUAOPE002B Operate communications systems and equipment

Modification History

Not applicable.

Unit Descriptor

Unit Descriptor

This unit covers the competency to transmit and receive communications in routine and operational situations using the organisation's communication systems and equipment.

Application of the Unit

Application of the Unit

The application of this unit in the workplace - the environments, complexities and situations involved - will be written during Phase II of the Review of the PUA00 Public Safety Training Package.

This text will be useful for the purposes of job descriptions, recruitment advice or job analysis; where possible, it will not be too job specific to allow other industries to import it into other Training Packages, where feasible.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.

Performance Criteria describe the required performance needed to demonstrate achievement of the element.
Where bold italicised text is used, further information is detailed in the Required Skills and Knowledge and/or the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Use communication systems and equipment	<p>1.1 Equipment is used and operated safely to support communications consistent with organisation's policies and procedures</p> <p>1.2 <i>Communication equipment</i> and techniques are selected to best meet the task, context and needs of the situation</p> <p>1.3 The <i>communication system</i> is correctly utilised to facilitate transmission and reception</p> <p>1.4 Communication systems are operationally maintained according to organisation's policies and procedures</p>
2. Transmit and receive communications	<p>2.1 Information is transmitted concisely and clearly to facilitate accurate reception of the message in accordance with organisation's policy and procedures</p> <p>2.2 Contact is acknowledged, communication is confirmed and action initiated</p> <p>2.3 Communication faults and deficiencies are reported according to organisation's policy and procedures</p> <p>2.4 Alternative communication strategies are employed according to organisational procedures to address identified faults and deficiencies in communication</p> <p>2.5 Communication is processed and recorded in accordance with organisation's policies and procedures</p>
3. Maintain communications equipment	<p>3.1 Fault finding techniques are applied and basic maintenance conducted according to organisational policies and procedures</p> <p>3.2 Faulty equipment is identified and noted for repair</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- clean and service communication equipment according to organisational procedures
- report communication faults and deficiencies according to organisational procedures
- use verbal communication procedures consistent with the organisation's communication system
- utilise the organisation's communication processes and systems

Required Knowledge

- organisational policy and procedures relevant to the operation of communication equipment
- range of communication equipment available to the organisation
- the organisation's communication system

Evidence Guide

EVIDENCE GUIDE

|

EVIDENCE GUIDE

Critical aspects for assessment and evidence required to demonstrate competency in this unit

It is essential for this unit that competency be demonstrated in accurately transmitting and receiving communications using the organisation's communication system and equipment

Consistency in performance

Evidence should be gathered over a period of time in a range of actual or simulated workplace environments

Context of and specific resources for assessment

Context of assessment

Observation of the use of a range of communication equipment under non-operational and operational conditions or in a simulated environment

Specific resources for assessment

Access to relevant communication equipment

Guidance information for assessment

Information that will assist or guide assessment will be written during Phase II of the Review of the PUA00 Public Safety Training Package.

Range Statement

RANGE STATEMENT

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Communication equipment may include	<ul style="list-style-type: none"> personal computers and modems radio facsimiles signalling devices mobile landline and satellite telephones paggers
Communication systems may include	<ul style="list-style-type: none"> organisation's networks communication protocols verbal communication procedures geographical information systems relevant legislation such as Telecommunications Act
Verbal communication procedures may include	<ul style="list-style-type: none"> pro- words phonetic alphabet call signs coded messages use of abbreviations emergency procedures
Voice procedures may include	<ul style="list-style-type: none"> rhythm speed volume pitch sentences correcting mistakes repetitions

Employability Skills This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.

Performance Criteria describe the required performance needed to demonstrate achievement of the element.
Where bold italicised text is used, further information is detailed in the Required Skills and Knowledge and/or the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Determine current location, destination and resources	1.1 Incident and/or task location/requirements are obtained 1.2 Relevant maps and <i>navigation equipment</i> are gathered and checked 1.3 <i>Cartographic</i> information and <i>navigation techniques</i> are applied to plot positions on a map, and determine current location and destination within <i>accepted</i> tolerances
2. Determine and plan a safe route	2.1 Navigation records are prepared according to organisation's practices 2.2 Cartographic information, navigation techniques, local and <i>environmental conditions</i> are interpreted to determine and plan a safe and timely route 2.3 <i>Potential access restrictions</i> which may limit thoroughfare are identified and arrangements made to gain access in accordance with organisation's policies and practices and regulatory requirements
3. Navigate to destination	3.1 Record of proposed route and navigation aids are used to maintain compliance with planned route 3.2 Driver is directed to follow indicated route as required 3.3 Current location is regularly verified within accepted tolerances 3.4 Route is modified to address prevailing conditions and, if required, alternate strategies are initiated 3.5 Lost en-route procedures are implemented if required 3.6 Unanticipated access difficulties are reported in accordance with organisation's policies and procedures 3.7 En-route and arrival reporting information is communicated in accordance with organisation's policies and procedures
4. Complete post navigational activities	4.1 Navigation or nominated reports are completed in accordance with organisation's policies and procedures 4.2 Navigational equipment is recovered, reset, updated and serviced according to operational

PERFORMANCE CRITERIA

standards and manufacturer's specifications

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- identifying natural and cultural features for transport modes
- problem solving
- using navigation aids
- verbal communication

Required Knowledge

- cartographic symbols and legends
- grid/magnetic conversion
- map and chart types
- methods for determining current location
- route planning techniques and calculations

Evidence Guide

EVIDENCE GUIDE

EVIDENCE GUIDE

Critical aspects for assessment and evidence required to demonstrate competency in this unit

It is essential for this unit that competence be demonstrated in practical plotting of a navigation route maintaining accuracy within accepted tolerances when following a route, and in demonstrated ability to maintain positional awareness. Evidence should also be sought concerning the ability to effectively react to changes in the operating environment necessitating re-planning of course

Consistency in performance

Evidence should be gathered over a period of time in a range of actual or simulated workplace environments

Context of and specific resources for assessment

Context of assessment

A real life incident, exercise or simulation or series of tasks are required to demonstrate competence in this unit

Urban or rural navigation

Navigation with electronic aids

Specific resources for assessment

Access to equipment used in operational navigation is essential

Guidance information for assessment

Information that will assist or guide assessment will be written during Phase II of the Review of the PUA00 Public Safety Training Package.

Range Statement

RANGE STATEMENT

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Use of maps may include	<ul style="list-style-type: none"> defining or plotting incident location delineation of search areas planning access and egress routes plotting of areas subject to hazard impact such as flood inundation plotting and calculation of areas of fire damage
Navigational maps may include	<ul style="list-style-type: none"> street directories topographic maps aerial photographs local authority maps navigational charts cadastral maps orthophoto maps satellite imagery
Map features include	<ul style="list-style-type: none"> date of map legend contours scale north Point grid references latitude and longitude magnetic variation contour intervals datum information northings and eastings hill shading vegetation types cultural information

RANGE STATEMENT**Navigational equipment may include**

transport routes
 protractors
 scale rules
 global positioning systems (GPS)
 geographical information systems (GIS)
 magnetic compasses
 planimeters
 romers
 area plotters
 watch/stopwatch
 communications equipment
 computers
 writing equipment

Incident and task information may include

search operation
 data gathering
 establishing radii
 areas of probability
 plotting fire fronts
 flood height predictions
 rates of fireline constructions

Communication may include

verbal instructions
 radio system
 intercom system
 hand signals
 written instructions
 en-route and arrival information

Navigation techniques may include

resection and triangulation
 plotting
 route-time calculations
 magnetic conversions
 grid and latitude/longitude conversions

RANGE STATEMENT

	bearings and back bearings
Potential access restrictions may include	<p>military areas</p> <p>Aboriginal and Torres Strait Islander sacred sites</p> <p>other areas of cultural significance</p> <p>seasonal factors</p> <p>wilderness areas</p> <p>hazardous areas</p> <p>other areas requiring permission and/or authorisation to enter</p> <p>agency and regulatory requirements</p>
Environmental conditions may include	<p>flood or fire</p> <p>road conditions including vehicle height and/or width clearance requirements</p> <p>time of day</p> <p>need to match transportation mode to terrain</p> <p>atmospheric conditions</p> <p>hazardous materials</p> <p>storm damage</p>
Accepted tolerance may include	<p>relating the margin of error allowable as determined by the nature of the task/incident terrain</p> <p>prevailing weather and environmental conditions</p>
Cartographic may include	<p>the interpretation of cartographic symbology including contour lines</p> <p>scale</p> <p>magnetic variation information</p>
Organisational arrival procedures may include	<p>confirmation of timely</p> <p>safe arrival appropriate to the incident/task</p>
Alternate route strategies may include	<p>lost procedures</p> <p>dispatch of additional teams</p> <p>use of additional/alternate vehicles</p>
Reporting requirements may include	<p>pre-departure briefing</p>

PUAPOL001B Maintain operational safety

Modification History

Unit Descriptor

This unit covers the competency to assess and respond to general workplace safety risks, including the use of defensive tactics and/or restraining techniques.

This unit does not cover the specialised safety practices required of specialist officers such as Police Diver, Search and Rescue Squad member, Special Operations/Tactical response Group member, Covert Investigators or some Forensic Investigators.

Application of the Unit

The application of this unit in the workplace - the environments, complexities and situations involved - will be written during Phase II of the Review of the PUA00 Public Safety Training Package.

This text will be useful for the purposes of job descriptions, recruitment advice or job analysis; where possible, it will not be too job specific to allow other industries to import it into other Training Packages, where feasible.

Licensing/Regulatory Information

Pre-Requisites

Nil

Employability Skills Information

The required outcomes described in this Unit of Competency contain applicable facets of Employability Skills. The Employability Skills Summary of the qualification in which this Unit of Competency is packaged, will assist in identifying Employability Skill requirements.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.

Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the Required Skills and Knowledge and/or the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

Elements and Performance Criteria

Element	Performance Criteria
1 Monitor and assess situational risks in workplaces	<p>1.1 Situational safety is monitored and assessed and well informed judgements are made in accordance with agreed operational practices and the surrounding environment</p> <p>1.2 Potential risks to own safety, the safety of fellow officers and members of the public are quickly and correctly identified assessed and monitored</p>
2 Maintain a safe working environment	<p>2.1 Operational safety responses/procedures are identified and/or planned and implemented within organisation's procedures and policies</p> <p>2.2 Equipment, materials and environment are assessed for hazards and protective action is planned to ensure the health and safety of people</p> <p>2.3 Safety issues are evaluated and advised to the relevant officers and alternate responses are devised</p> <p>2.4 Appropriate protective clothing and equipment are correctly identified, worn and utilised where and when required</p> <p>2.5 Incidents are identified and observations are recorded and reported accurately, promptly and in the required format to relevant personnel</p>
3 Employ defensive tactics	<p>3.1 Situations are assessed correctly and informed judgements made as appropriate for the use of defensive tactics and/or physical restraint techniques</p> <p>3.2 Defensive tactics and/or restraining techniques are applied in accordance with jurisdictional law, organisational policy and procedures and subject to surrounding conditions</p> <p>3.3 Documentation regarding the 'use of force' is completed and submitted in accordance with organisational requirements</p>

- 3.4 Defensive tactics and restraining skills are applied at the appropriate situations and to organisational standard

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

Recognising and accurately assessing situational risks/hazards

Planning, implementing and where necessary adapting workplace safety responses to situational contexts

Minimising workplace risks to self, colleagues and the public

Effectively communicating safety issues/concerns to colleagues, supervisors and when necessary other emergency service workers and the public

Effectively communicate with a wide range of community members such as those with physical/sensory/intellectual impairment and cultural differences

The most appropriate 'use of force' (restraining and defensive tactics)

Safe operation and use of general issue and emergency operational equipment and safety clothing

Safe operation of police vehicles under a variety of operational and environmental contexts

Required Knowledge

Organisational OH&S legislation as it applies to policing

Organisational policy and procedures covering operational safety issues/practices

Potential risks associated with a full range of non-specialist operational policing activities

Established strategies to optimise safety under a range of operational scenarios

The 'use of force', its legal parameters and reporting requirements in relation to operations

General 'duty of care' responsibilities

OH&S Guidelines for lifting and carrying persons

Evidence Guide

Critical aspects for assessment and evidence required to demonstrate competency in this unit

It is essential for this unit that competence be demonstrated in identifying workplace safety risks, work practices and defensive tactics to ensure the safety of self and others

Consistency in performance

Evidence should be gathered over a period of time in a range of actual or simulated workplace environments

Context of and specific resources for assessment

Context of assessment

Evidence should be gathered over a period of time in a range of actual or simulated workplace environments

Specific resources for assessment

All necessary equipment for operational safety and vehicles and standard organisational operational accoutrements are available

Guidance information for assessment

Information that will assist or guide assessment will be written during Phase II of the Review of the PUA00 Public Safety Training Package.

Range Statement

RANGE STATEMENT

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. **Bold italicised** wording in the Performance Criteria is detailed below.

Workplaces may include

police stations
 watch-houses
 foot or mobile patrol environments
 crime/incident scenes
 public crowd/traffic control tasking sites
 sporting and social venues
 industrial/business/domestic buildings
 public transport systems

Monitoring and assessing situations may include

identification and valuation of the potential risks (and their strengths) arising from a situation or a situation's particular 'time frame'
 techniques such as personal observation
 reviewing previous reports
 gathering existing situational intelligence from colleagues
 other emergency service workers and/or public present at site
 analysis of situational intelligence and evidence
 communication with other agencies such as RTA
 Local Government
 Community Services

Potential risks may include

matters or events that could harm persons
 buildings of property and could be already present or evolve as a result of actions taken

Safe working practices should focus on the techniques/strategies that optimise the present and future safety of persons and property involved or present at the given

crowd control
 situational communication techniques
 dealing with

workplace site and cover practices/matters including but not limited to	<p>aggressive/violent/intoxicated/drugged/injured/uncooperative persons</p> <p>operation of police vehicles and equipment including weapons</p> <p>use of force' techniques/options/strategies</p> <p>use of safety clothing (visibility vests, wet weather gear, riot clothing/headgear, rubber gloves, etc)</p> <p>warning devices (portable lamps, signs, torches) and safety barriers/ warning tapes</p> <p>dealing with potentially hazardous substances such as noxious gases, chemicals, fuels</p> <p>prevention of disease transmissions</p> <p>lifting and carry persons</p> <p>risk assessment and contingency planning</p>
Safety issues may include	<p>Safety issues are defined as issues/matters that may impact on the future safety of officers and could include faulty equipment inappropriate operational procedures or the need for skills enhancement</p>
Communication in the context of this unit	<p>In this unit communication is focused on 'officer survival' and therefore covers communication techniques required for dealing with potentially hazardous situations either as a single officer or in partnership with other officers/emergency service workers and includes both verbal and non-verbal techniques</p>
Self defence and/or restraining techniques may include	<p>the range of offensive/defensive skills and tactics sanctioned by an organisation to enable an officer to defend against or restrain persons attempting to physically harm themselves</p> <p>the officer</p> <p>colleagues or members of the public</p>

Unit Sector(s)

PUAPOL005B Use and maintain operational equipment

Modification History

Unit Descriptor

This unit covers the competency to safely use and, where required, maintain administrative and general field based police equipment.

Application of the Unit

The application of this unit in the workplace - the environments, complexities and situations involved - will be written during Phase II of the Review of the PUA00 Public Safety Training Package.

This text will be useful for the purposes of job descriptions, recruitment advice or job analysis; where possible, it will not be too job specific to allow other industries to import it into other Training Packages, where feasible.

Employability Skills Information

The required outcomes described in this Unit of Competency contain applicable facets of Employability Skills. The Employability Skills Summary of the qualification in which this Unit of Competency is packaged, will assist in identifying Employability Skill requirements.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.

Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the Required Skills and Knowledge and/or the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

Elements and Performance Criteria

Element	Performance Criteria
1 Use office equipment to produce, store and transmit documents	1.1 Requisite documentation is accurately produced, copied, filed, stored, transmitted and disposed of in accordance with organisational guidelines
	1.2 User facilitated equipment maintenance/service tasks are carried out according to manufacturer's specifications and organisational policy
	1.3 Equipment and document security procedures are complied with
	1.4 Breakdowns and faults are reported as per organisational procedures
2 Use police communications equipment	2.1 Police communication equipment is used and maintained in accordance with manufacturer's specifications and organisational guidelines
	2.2 Correct radio/telephone procedures and phonetic alphabet are used when communicating
	2.3 Appropriate , concise and accurate language is used at all times
3 Utilise computer technology to assist in the completion of tasks	3.1 Computing equipment is used and maintained in accordance with manufacturer's specifications and organisational guidelines
	3.2 Security of information and equipment is undertaken in accordance with organisational guidelines
	3.3 Computer applications appropriate to the specialised area's tasks are used effectively to achieve work tasks
4 Use and maintain personal accoutrements	4.1 Accoutrements are at all times used strictly in accordance with jurisdictional laws, policy and guidelines
	4.2 Accoutrements are, at all times, used with due

regard to personal safety and that of others

- 4.3 Organisational requirements for weapons skills maintenance are complied with
 - 4.4 Maintenance of accoutrements is undertaken in accordance with required organisational procedures and any losses, damage and/or faults immediately reported to the appropriate officer
 - 4.5 Documentation relating to accoutrements use is accurately prepared and submitted in accordance with organisational requirements
- 5 **Use and operate basic safety equipment**
- 5.1 Safety equipment is operated correctly and maintained in accordance with manufacturer's guidelines and organisational policy and procedures
 - 5.2 Safety equipment is cleaned, returned and stored in accordance with organisational requirements
 - 5.3 **Faults, breakdowns** and/or deficiencies in safety clothing and equipment are immediately reported to responsible officer
- 6 **Drive and control vehicles in operational settings**
- 6.1 **Vehicle is prepared** for operational use in accordance with organisation's policies and procedures
 - 6.2 Vehicle is operated in accordance with environmental conditions, operational requirements and **vehicle sympathy**
 - 6.3 Organisational requirements for emergency and operational driving are complied with

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

using office equipment to produce, file, send/receive and secure documents, reports, proformas, maintenance/usage logs

using all types of commonly available police communications equipment

using audio and visual recording to produce evidence that is acceptable in courts

using accoutrements/appointments to resolve situations

deploying safety equipment at accident, crime, incident or other emergency situations

undertaking routine equipment maintenance

maintaining a professional safety first attitude to the use of police equipment

applying driving skills, ie. system of car control, pull push steering

Required Knowledge

jurisdictional laws, policy and procedures covering the use of administrative and operational equipment

required document layouts, styles and filing mechanisms

organisational computer systems/document security system requirements

the organisation's radio communication call signs, codes and phonetic alphabet

the legal parameters and organisational policies governing the 'use of force' and 'use of lethal force'

the various types of equipment maintenance logs/damage reports required and when they must be completed

the safety practices that must be followed when using police equipment

Evidence Guide

Critical aspects for assessment and evidence required to demonstrate competency in this unit

It is essential for this unit that competence be demonstrated in observance of all safety principles for self and others

Equipment is used in accordance with organisational policies and procedures and manufacturer's guidelines and complies with OH&S legislation

Consistency in performance

Evidence of competency in this unit will need to be gathered over time and from across a range of simulated or actual workplace situations

Context of and specific resources for assessment**Context of assessment**

Evidence should be gathered over a period of time in a range of actual or simulated workplace environment. In the case of weapons and 'use of force' equipment, assessment should be undertaken in simulated workplace settings

Specific resources for assessment

Access to equipment identified within the Range Statement

Access to weapons firing ranges

Guidance information for assessment

Information that will assist or guide assessment will be written during Phase II of the Review of the PUA00 Public Safety Training Package.

Range Statement

RANGE STATEMENT

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. **Bold italicised** wording in the Performance Criteria is detailed below.

Office equipment should cover the complete range of general administrative equipment normally found in Police Stations may include

computer systems for document production
data storage and retrieval
typewriters
printers/photocopiers
facsimiles
filing cabinets

Maintenance/service tasks may include

use of computer covers and cleaning equipment
changing ink/toner cartridges in printers/photocopiers
installing paper and fax rolls
clearing paper jams

Security procedures for ensuring security of documentation and equipment may include

access restrictions to equipment through passwords
log-in codes
equipment locks
restricted areas

Breakdowns and faults to be considered may include

computer system software/hardware failures
physical damage to equipment
poor print quality
and may require reporting to the organisation's 'IT Helpline' or the officer delegated to handle such matters

Communication equipment may include

police radios (mobile and 'in car')
'in car' computer systems
loud hailers/PA systems
telephones (fixed and mobile)

Appropriate language

Appropriate language is that language style sanctioned by an organisation via its

Interview and evidence-recording equipment may include

operational procedures manual

audiotape recorders

video cameras and recording equipment

SLR cameras authorised by the organisation for the purposes of recording interviews, statements etc that can be tendered as evidence

In some organisations interview and evidence recording equipment may also include basic fingerprinting equipment Use of the equipment should also cover the authorisation, storage and filing of tapes/film (original and duplicates)

Accoutrements may include

standard/general issue batons

handcuffs

service revolver/pistols and other organisationally sanctioned/legal personal protection devices such as Oleo-Capsicum Sprays

Due consideration and regard may include

quick and accurate analysis of the situational risks present

quick and accurate analysis of the risks arising from the application of available/potential response strategies

determining and implementing the response that will maximise the safety and security for all concerned

Basic safety equipment in the context of this unit may include

wet weather and protective clothing including reflective safety vests

rubber gloves

protective glasses

riot shields/helmets and face masks, etc.

light wands, portable flashing lights, reflective and illuminated signs, hand held spotlights

safety barriers, 'witches hats' and may be used in a variety of incident settings such as: traffic accidents, hazardous material spillages, etc

crowd control at sporting events, rallies, demonstrations, blockades, etc.

mobile RBT stations, mobile vehicle inspection/search sites, etc

in support of other emergency service agencies such as at natural disasters, fires

Computer applications may include

specific computer applications

word processing

data entry and/or retrieval such as NEPI or COPS

Vehicle preparation include

checking the vehicle for safe operation

ensuring appropriate equipment is available

checking emergency equipment is operational

Environmental considerations may include

terrain

weather conditions

traffic density

lighting

road surface

Vehicle sympathy may include

vehicle movements are within limitations and in line with manufacturer's specification

Unit Sector(s)

PUAPOL007B Manage persons in care or custody or in need of assistance

Modification History

Unit Descriptor

This unit covers the competency to process and provide for persons in police care or custody or to provide assistance pending the arrival of qualified personnel.

Application of the Unit

The application of this unit in the workplace - the environments, complexities and situations involved - will be written during Phase II of the Review of the PUA00 Public Safety Training Package.

This text will be useful for the purposes of job descriptions, recruitment advice or job analysis; where possible, it will not be too job specific to allow other industries to import it into other Training Packages, where feasible.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.

Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the Required Skills and Knowledge and/or the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

Elements and Performance Criteria

Element	Performance Criteria
1 Provide for the persons in care or custody	<p>1.1 Persons in care or custody are provided for in accordance with jurisdictional laws, policy and procedures</p> <p>1.2 Persons in care or custody are treated in a professional and ethical manner at all times</p> <p>1.3 Documentation, as required under jurisdictional laws, policy and procedures, is complied with</p> <p>1.4 Guidelines covering the special requirements of particular categories of persons are strictly adhered to</p> <p>1.5 Security of persons in care or custody is maintained and organisational operational safety guidelines adhered to</p> <p>1.6 Conditions of persons in care or custody are routinely monitored and recorded and remedial action taken where appropriate</p>
2 Process persons in care or custody	<p>2.1 Persons are processed in accordance with jurisdictional laws, policy and procedures</p> <p>2.2 Cultural awareness, sensitivity and discretion is observed when processing persons in care or custody</p> <p>2.3 Documentation, as required under organisational policy and procedures, is complied with</p> <p>2.4 Person's legal rights are ensured</p>
3 Escort/transport persons in care or custody	<p>3.1 Persons are escorted in accordance with jurisdictional laws, policy and procedures</p> <p>3.2 Any special circumstances of persons are made known to all escorting officers</p> <p>3.3 Correct documentation is conveyed with persons</p> <p>3.4 Persons are conveyed in a safe and secure manner and organisational operational safety guidelines are</p>

adhered to

- 4 **Identify need for assistance**
 - 4.1 Initial assessment is made of extent and nature of assistance required
 - 4.2 Initial assessment is communicated to appropriate personnel in accordance with the organisation's policies and procedures
- 5 **Protect casualty and others from further harm**
 - 5.1 Safety and hygiene standards are maintained at all times according to organisational standards, and relevant legislation, regulations and guidelines
 - 5.2 **Hazards** and risks are identified and **appropriate action** taken to prevent further injury
- 6 **Provide assistance**
 - 6.1 A calm, caring and reassuring manner is adopted in interaction with the casualty and others at the scene throughout care
 - 6.2 Casualty is made comfortable using available resources
 - 6.3 Casualty and **significant others** are informed where possible of procedures which are to take place
 - 6.4 Transport of the casualty is arranged with appropriate health care professional
 - 6.5 Members of other emergency services are assisted in their tasks in accordance with organisational standards and individual level of responsibility and competency
 - 6.6 Documentation is completed and processed in line with legislative, regulatory and organisational requirements

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

dealing with a range of unco-operative persons
observing, assessing and classifying human behaviour in terms of custodial risks
optimising the potential safety and security of persons in care or custody
securing and escorting persons
processing persons into/out of custodial care
identifying and arranging for the needs of specific categories of persons in care or custody

Required Knowledge

the laws, policies and procedures pertaining to providing for, processing and escorting persons in care or custody
'duty of care' responsibilities
ethnicity and cultural differences
categories of persons and their particular needs
police cell routines, procedures and security arrangements
issues/problems that can arise under police custodial care
support agencies/persons/groups and their contact points

Evidence Guide

Critical aspects for assessment and evidence required to demonstrate competency in this unit

It is essential for this unit that competence be demonstrated in the ability to ensure security and physical well-being of persons in care or custody

Consistency in performance

Evidence of competency will need to be gathered over time and from across a range of actual/simulated workplace situations involving different categories of persons

Context of and specific resources for assessment**Context of assessment**

Evidence should be gathered over a period of time in a range of actual or simulated workplace environments

Specific resources for assessment

No special requirements

Guidance information for assessment

Information that will assist or guide assessment will be written during Phase II of the Review of the PUA00 Public Safety Training Package.

Range Statement

RANGE STATEMENT

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. **Bold italicised** wording in the Performance Criteria is detailed below.

Persons in care or custody may include

Persons placed, either by police, themselves or some other agency, temporarily in police care, for example (lost children,

persons suffering dementia, victims of rape, domestic violence or other crimes)

those persons detained by police or voluntarily in police custody in connection with criminal activity or

some incident requiring further police investigation

persons being transported by police

The provision of care and/or custody could be at Police Stations/lockups

watch houses

court buildings

hospitals

in vehicles/planes in transit

Persons in care or custody are at all times to be provided with:

their full rights and entitlements applicable under Commonwealth and jurisdictional laws

a safe and secure environment during the full period of custodial care

provisions determined by the Aboriginal Deaths in Custody Report if applicable

Particular categories of persons include

aged persons

children

disabled persons

persons affected by drugs or alcohol

women

Aboriginal or Torres Strait Islander people

	persons likely to cause injury to themselves and/or others
	injured/ill persons
	people from culturally and linguistically diverse backgrounds
	physically or intellectually impaired people
	military personnel, government, diplomatic personnel and other dignitaries
	mentally ill/disordered
	transgender
Some persons may require special arrangements, as per established guidelines, such as	isolation from others
	more constant/closer supervision
	the involvement of outside persons/agencies
	access to specialised treatment
Security of persons relates to ensuring the personal safety, wellbeing and survival of	each person in custody or transit
	the police officers and/or persons attending them
	any other persons exercising lawful access to prisoners/persons in custody
	the public in general through the prevention of escapes/breakouts
Security of persons could be maintained through	use of appropriate restraining devices
	searching persons for weapons
	drugs
	potentially dangerous items/substances
	correct identification and addressing of a person's special needs/circumstances
	regular cell inspections
	compliance with documented operational practices and procedures
Processing of persons may include	preparation of relevant documentation
	searching persons for items/substances that are prohibited or could be used to effect injury or escape and the recording and storing of items confiscated
	classification/categorisation of person(s) to

	be placed in custody
	arranging, if needed, for appropriate support agency, medical, legal, family contact, arranging for interpreters, arranging for consular representatives
	locating to cells or arranging transport to another location,
	arranging for refreshments
	personal needs if appropriate
Escorting officers may include	Officers from other policing organisations and/or agencies such as: Correctional Services Community/Child Support Services Aboriginal Services, etc.
Escorting officers may be by means of may include	police vehicles (marked and unmarked) aircraft (both police service and commercially operated flights) correctional services vehicles
Details of incident obtained from	casualty visual assessment of scene others at scene
Maintaining personal safety may include	washing hands using glove
Caring manner may include	personal introduction and identification consistent with other priorities
Hazards may include	bodily fluids traffic environmental hazards downed wires bystanders
Significant others may include	family friends at scene
Appropriate action may include	protecting scene

isolating scene, eg. erecting barricade

Unit Sector(s)

PUAPOL010B Perform administrative duties

Modification History

Unit Descriptor

This unit covers the competency to perform a range of administrative functions and to prepare, submit and/or assess documentation pertaining to organisational needs, licensing/regulatory requirements and the receipt, storage and recording of money/property.

Application of the Unit

The application of this unit in the workplace - the environments, complexities and situations involved - will be written during Phase II of the Review of the PUA00 Public Safety Training Package.

This text will be useful for the purposes of job descriptions, recruitment advice or job analysis; where possible, it will not be too job specific to allow other industries to import it into other Training Packages, where feasible.

Licensing/Regulatory Information

Refer to Unit Descriptor

Pre-Requisites

Nil

Employability Skills Information

The required outcomes described in this Unit of Competency contain applicable facets of Employability Skills. The Employability Skills Summary of the qualification in which this Unit of Competency is packaged, will assist in identifying Employability Skill requirements.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.

Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the Required Skills and Knowledge and/or the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

Elements and Performance Criteria

Element	Performance Criteria
1 Manage administrative tasks correspondence and records	1.1 Administrative tasks are assessed, prioritised and executed to ensure effectiveness of operations
	1.2 Correspondence and records are completed accurately and in a timely manner
	1.3 Correspondence and records are maintained securely in compliance with organisational procedures
	1.4 Movement of correspondence and records is accurately recorded
	1.5 Correspondence and records are submitted and stored as required and in accordance with organisational guidelines
2 Maintain notes and records of duties performed	2.1 Notes/records of duties are completed and maintained in accordance with organisational requirements
	2.2 Notes are current and accurately maintained
3 Complete and submit departmental reports and forms	3.1 Documentation is completed in accordance with organisational requirements
	3.2 Content of forms/reports is accurate and complete, legible, understandable and in the correct formats
	3.3 Documentation is submitted within the required timeframe
4 Prepare, submit and/or assess documentation for the issue of licences and/or regulatory authorisations	4.1 Document preparation procedures comply with organisational requirements
	4.2 Document assessment procedures and applicant security checks carried out comply with organisational requirements
	4.3 Appropriate licence authority is correctly issued and details recorded as per organisational policy and procedures

- 5 **Receive, record and store money and property**
- 5.1 Receipt, recording and storage procedures comply with jurisdictional laws, policy and procedures
 - 5.2 Maintenance of security of stored **money/property** complies with organisational policy and procedures
 - 5.3 **Property received** is recovered from storage and disposed of in accordance with organisational policy and procedures

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

accurate keyboarding

producing clear and concise written communication

accessing databases for the purposes of checking applicant details/history

accurately completing departmental forms and reports complying with organisational requirements regarding completion/currency of maintenance logs, patrol records

the application of professional judgement in the issuing of licences/regulatory authorisations

Required Knowledge

jurisdictional laws

by-laws and regulations relating to the preparation of documentation

issuing of licences/authorities and storage of property/money

the various types of departmental and licensing system documents/proformas/logs and the preparation requirements for each

Evidence Guide

Critical aspects for assessment and evidence required to demonstrate competency in this unit

It is essential for this unit that competence be demonstrated in accurate preparation of all documentation, licence issue and receipt, storage and recording of money/property consistent with organisational policies, procedures and guidelines

Consistency in performance

Evidence of competency will need to be gathered over time and from across a range of simulated and/or actual workplace situations

Context of and specific resources for assessment**Context of assessment**

Evidence should be gathered over a period of time in a range of actual or simulated workplace environments

Specific resources for assessment

Access to appropriate departmental proformas, licence applications, property books and storage systems

Access to information databases to enable applicant suitability checks

Guidance information for assessment

Information that will assist or guide assessment will be written during Phase II of the Review of the PUA00 Public Safety Training Package.

Range Statement

RANGE STATEMENT

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. **Bold italicised** wording in the Performance Criteria is detailed below.

Administrative tasks cover the full range of tasks undertaken in support of the function's operational activities and may include

initiating telephone calls
stores requisitions and distribution equipment maintenance
organising transport

Correspondence and records may include

formatted documents
audible and accountable documents
investigation files
internal and external memos
computer
audiotape records

Departmental reports and forms may include

incident reports
motor vehicle log books
property book and disposal schedules
interview reports
time sheets, leave forms
patrol activity reports
coroner's reports
exhibit/evidence reports/briefs
accoutrements usage reports

Preparation and assessment for licences and/or regulatory authorisations may include

shooters permits (not all jurisdictions)
firearms licences (not all jurisdictions)
drivers licences (not all jurisdictions)
over dimension haulage permits
(not all jurisdictions)
'burning off' (not all jurisdictions)
and may include liaison with other agencies such as Local Government, Fire Services, Road Transport Authorities

Assessment procedures may include

checking submitted documentation for accuracy/completeness
checking applicant's criminal record
personal references
health suitability

Money and/or property received may or may not become 'evidence' in later court proceedings and may include

The disposal of money and/or property could be through return to lawful claimant, forfeiture to the Crown (under Confiscated Assets laws) or disposed of through other organisationally sanctioned means such a public auction

Money and property could be

found and handed in to police
recovered/confiscated in the process of an investigation
recovered from accident scenes

Money and/or property received may or may not

become 'evidence' in later court proceedings

The disposal of money and/or property could be

returned to lawful claimant
forfeited to the Crown (under Confiscated Assets laws) or disposed of through other organisationally sanctioned means such as a public auction

Unit Sector(s)

Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

Elements and Performance Criteria

Element	Performance Criteria
1 Convey and receive information and ideas	1.1 Communication techniques appropriate to the audience are used to present and express ideas to individuals and groups
	1.2 Communication/interaction is sensitive to social and cultural diversity and in accordance with organisational guidelines
	1.3 Client requirements are identified within the work teams/groups plans and negotiated to achieve mutually agreed outcomes to the community clients' satisfaction
	1.4 Input from others is sought and valued in developing new ideas
2 Develop trust and confidence	2.1 Regular consultation is undertaken with a range of internal and external clients
	2.2 Interpersonal styles and methods are adjusted/adapted to the social and cultural environment
	2.3 Issues raised through consultations are dealt with and resolved promptly or referred to the appropriate personnel for resolution
	2.4 The outcomes of consultation are made known promptly to stakeholders
3 Interact with others with professional integrity	3.1 Dealings with others are conducted with professional integrity and consistent with the code of ethics
	3.2 Difficult situations are resolved to achieve outcomes which are acceptable to the participants and the organisation
	3.3 Interactions reflect respect, compassion and recognise diversity

4 **Build and maintain effective networks**

- 4.1 Contact with a comprehensive range of service agencies is established according to community or organisational protocol and practice
- 4.2 Effective working relationships are established with key people in relevant agencies and services
- 4.3 Other agency principles, objectives and guidelines are identified and analysed for common and complementary purpose
- 4.4 **Support** and referral requirements of other agencies are identified, recorded and consulted
- 4.5 Concerns held by other agencies are anticipated
- 4.6 confirmed and addressed positively, honestly and respectfully

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

communicating and negotiating with colleagues, supervisors and subordinates

overtly displaying professionalism in all day to day work activities

counselling and mentoring colleagues

motivating, leading and directing individuals/teams

responding to the concerns of individuals and work teams

formal and informal monitoring of work performance

networking

Required Knowledge

jurisdictional laws

policies and procedures and in particular those related to work practices

rostering and workplace agreements and disciplinary procedures

organisational policy and procedures covering operational safety issues/practices

professionalism as expressed through an organisation's 'Codes of Ethics/Codes of Practice'

general and/or specialised policing tasks as appropriate to area of supervision

the organisation's corporate goals, plans and strategies

strategies to motivate and promote working relationships

work performance review processes and mechanisms

principles of networking

mentoring/coaching/developing others

goal setting

recognising individual differences

Evidence Guide

Critical aspects for assessment and evidence required to demonstrate competency in this unit

It is essential for this unit that competence be demonstrated in the ability to develop effective and sound internal and external relationships which facilitate the achievement of planned outcomes

Consistency in performance

Evidence of competence must be assessed over time in a range of workplace or simulated situations

Context of and specific resources for assessment

Context of assessment

Evidence should be gathered over a period of time in a range of actual or simulated workplace environments

Specific resources for assessment

No special requirements

Guidance information for assessment

Information that will assist or guide assessment will be written during Phase II of the Review of the PUA00 Public Safety Training Package.

Range Statement

RANGE STATEMENT

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. **Bold italicised** wording in the Performance Criteria is detailed below.

Information and ideas may be derived from

departmental information
 computer information systems
 internal and external intelligence
 community information
 community groups
 local/national/international media
 other organisations
 colleagues
 team members, self, other policing personnel
 provision of intelligence regarding local activities
 passing on of information/feedback on community response to team's presence/actions
 suggestions for new ways to tackle local issues
 offers to establish new community policing ventures
 requests for specialised assistance

Clients may include

internal (colleagues, supervisors, other police personnel) or external (government/non-government agencies, local community services including ethnic communities and groups, businesses, individuals)

Interpersonal styles and methods relate to the manner in which

the verbal and non-verbal communication processes are undertaken and reflect the officer's concepts of social/cultural equity and professionalism

Support may include

personal assistance
 advice

brokering of new contacts

mentoring

referrals, etc

Codes of ethics refer to

the organisation's established

gazetted or implied guidelines for
professional policing practice

**Networks may be internal or external to
the organisation and/or the workplace and
could include linkages with**

internal departments/sections

community grouped/individuals

local businesses

local disadvantaged support groups

Difficult situations may include

formal and informal complaints situations
requiring mediation

Elements and Performance Criteria

Elements and Performance Criteria

Element	Performance Criteria
1 Plan investigations	<p>1.1 A plan is prepared which reflects analysis of all available factors to set directions for the investigation</p> <p>1.2 An investigation's aims/objectives are clearly defined to provide operational focus</p> <p>1.3 Risk assessments are conducted to identify investigational opportunities and limitations</p> <p>1.4 A security plan is formulated to address the investigation's security requirements</p> <p>1.5 Investigatory phases and tasks are prioritised to inform the sequence of activities and provide for future review of the investigation process</p> <p>1.6 Methods to achieve the investigation's aims and objectives are selected and authorised in accordance with jurisdictional laws, policies and guidelines</p> <p>1.7 Communication channels are established with appropriate personnel to facilitate contact in the conduct of the operation</p> <p>1.8 A case management system is initiated to facilitate the planning, resolution and review of the investigation</p> <p>1.9 Plans developed are sufficiently flexible and adaptable to accommodate any unforeseen contingencies/issues that may arise</p>
2 Prepare documentation to support the investigation	<p>2.1 All relevant information is recorded in a timely, chronological and accurate manner and complies with organisational guidelines</p> <p>2.2 Operational documentation is compiled to provide an ongoing reference for operatives and a formal record for evidentiary purposes</p> <p>2.3 Recording procedures comply with security and</p>

evidentiary requirements

- 3 **Identify, use and coordinate resources**
 - 3.1 Available **resource requirements** are identified and accessed to support the operation
 - 3.2 Contingency responses are identified that address any resource limitations
 - 3.3 Resource usage is managed to achieve the desired aim
 - 3.4 Operational costs are monitored and controlled
- 4 **Review investigations**
 - 4.1 Investigation outcomes are reviewed against the aims and objectives specified in the investigation plan
 - 4.2 Procedures are reviewed for adherence to organisational policy and guidelines
 - 4.3 Post investigation procedures are completed to finalise the investigation
 - 4.4 Review outcomes are disseminated and where relevant used to inform future practice

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

oral communication (listening, establishing rapport, negotiation, conflict resolution)

written communication in preparing investigation plans, tactical plans resource bids etc

basic resource management including budgetary, human and physical resources and allocation/access

basic investigation methods and skills

Required Knowledge

government and policy environments within which operations will be managed

different types of criminal activity and their elements (eg. general crime, theft, burglary, assault, drugs, fraud, homicide)

available resources which may need to be deployed to support the investigation

security issues and classifications

all applicable laws, policy and procedures pertaining to the conduct of investigations within the officer's organisational environment

investigation principles and case management systems and a range of contexts in which these can be applied

court procedures and evidentiary requirements

Evidence Guide

Critical aspects for assessment and evidence required to demonstrate competency in this unit

It is essential for this unit that competence be demonstrated in planning of all resources, consistent with the objectives of the investigation; and ability to monitor the investigation and modify the investigation process when necessary

Consistency in performance

Evidence for competency in this unit must be gathered over time and in a range of workplace or simulated situations

Context of and specific resources for assessment**Context of assessment**

Evidence should be gathered over a period of time in a range of actual or simulated workplace environments

Range Statement

RANGE STATEMENT

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. **Bold italicised** wording in the Performance Criteria is detailed below.

Factors may include

any information which impacts on the formulation of the investigation plan
 topography
 climatic conditions
 political sensitivities
 time
 own resources
 subject's resources
 age
 culture or mental capacity of subject/witnesses
 own courses of action
 subject's likely course(s) of action
 cost-benefit analysis

Investigations may include

Operations
 criminal and/or coronial investigations

Investigation aims/objectives may include

apprehension and arrest of offenders
 investigation to logical conclusion
 to exclude suspects
 satisfy the coroner and provide material to assist the prosecution's case

Investigational methods may include

general (public inquiries, informant /witness inquiries, internal or external agencies)
 specialised (covert policing, technical aids, surveillance, forensic evidence, document analysis)

The case management system adopted is that

defined by the organisation's operational practices

Operational documents may include

tactical appreciations

operational orders
warrant applications
briefing notes running sheets
investigational plans
SOPs
terms of reference
memoranda of understanding
declarations of major crime
target profiles
affidavits
progress reports
investigation log
incident log
joint agency investigation agreements,
crime reporting system documents
case management system documents

Resource requirements may include

human
physical
financial
may be internal or external in origin

Recording procedures can include

material gathered for the purposes of
evidence

Security Plan can be

any plan to ensure the integrity of the
investigation

An operational plan may include

resource requirements

Elements and Performance Criteria

Elements and Performance Criteria

Element	Performance Criteria
1 Maintain and evaluate operational direction	<p>1.1 The investigation is conducted in accordance with the investigation plan</p> <p>1.2 A process of continual assessment is applied to review and evaluate progress, and new directions planned and implemented in response to unforeseen events</p> <p>1.3 The conduct of the investigation is sufficiently adaptable/flexible to allow for contingencies</p> <p>1.4 Regular briefings and debriefings of all relevant personnel are conducted to ensure the sharing of information</p>
2 Collect and analyse information relevant to investigations	<p>2.1 The relevance and reliability of information sources are assessed in accordance with organisational guidelines</p> <p>2.2 Relevant information is legitimately collected, analysed, and documented to further the investigation</p> <p>2.3 Evidence from incoming information is identified, secured and controlled in accordance with organisational guidelines</p> <p>2.4 All information obtained from crime scenes and throughout the conduct of the investigation is assessed to determine relevance</p>
3 Seize, process and manage exhibits	<p>3.1 Exhibits are identified, seized and documented</p> <p>3.2 Continuity and security of exhibits is ensured to maintain integrity</p> <p>3.3 Handling, recording, storing and disposing of exhibits complies with legislative and administrative procedures</p>

- 4 **Identify and investigate subjects and suspects**
 - 4.1 All organisational **avenues of inquiry** and investigative procedures are considered and utilised to identify **subjects** and suspects
 - 4.2 **Investigative techniques** are selected and applied, in accordance with jurisdictional laws, policies, guidelines and established 'Codes of Ethical/Professional Conduct'
 - 4.3 All relevant information is applied to identify and locate **persons relevant to the investigation** and eliminate persons who are not
 - 4.4 **Profiles** are assessed to identify further avenues of inquiry
 - 4.5 **Persons** are interviewed in accordance with organisational policies and guidelines
- 5 **Develop subject profiles**
 - 5.1 Enquiries are conducted to develop subject profiles
 - 5.2 Movements of profile subjects relating to the offence are identified and recorded
 - 5.3 Profiles of subjects' antecedents are established and recorded
 - 5.4 Risk or threat assessment levels are determined and recorded to inform subsequent action
 - 5.5 Liaison is established with other appropriate **agencies** to facilitate development/identification/analysis of profiles
 - 5.6 Profiles are recorded, documented and securely distributed, to inform relevant operatives in accordance with organisational policy
- 6 **Implement responses to investigations**
 - 6.1 **Briefings/debriefings** are conducted to inform relevant stakeholders of past and subsequent actions
 - 6.2 Relevant **recommendations** regarding the investigation are developed and forwarded to the delegated person for consideration/implementation

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

oral communication (listening, establishing rapport, negotiation, conflict resolution)
written communication, in particular the capacity to provide clear comprehensive, accurate and chronologically sequenced written documentation
analytical techniques, in particular application of logic and reasoning to identify and select avenues of inquiry and substantiate these choices
decision making and problem solving
basic investigation methods and skills
preparation and submission of documents
operational safety

Required Knowledge

EEO

Anti-discrimination Act

Disability Act

government and policy environments within which operations will be conducted
different types of criminal activity and their elements
available resources which may need to be deployed to support the investigation
security issues and classifications
correct interpretation of all applicable laws, policy and procedures
Legal and ethical considerations in investigations which involve juveniles and indigenous people
investigation principles and the range of investigation techniques available
knowledge of case management systems and the range of contexts in which they can be applied
court procedures and evidentiary requirements in provision of briefs of evidence for use by the prosecution
ethics, professionalism and cultural diversity
role and functions of other agencies who work with policing in the conduct of investigations
methods and process for subject/suspect identification and profiling
general background appreciation of pathology

the impact of the police role on individuals and groups regarding law enforcement

Evidence Guide

Critical aspects for assessment and evidence required to demonstrate competency in this unit

To demonstrate competence in this unit, processes used in the investigation must meet organisational policies and procedures and jurisdictional law

Consistency in performance

Evidence for competency in this unit must be gathered over time and across a range of workplace or simulated situations

Context of and specific resources for assessment

Context of assessment

Evidence should be gathered over a period of time in a range of actual or simulated workplace environments

Specific resources for assessment

No special requirements

Guidance information for assessment

Information that will assist or guide assessment will be written during Phase II of the Review of the PUA00 Public Safety Training Package.

Range Statement

RANGE STATEMENT

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. **Bold italicised** wording in the Performance Criteria is detailed below.

Investigations may include	multi-disciplinary approaches and may have criminal and/or coronial purposes
Unforeseen events may include	withdrawal/reduction of allocated resources critical evidence
Resources may include	human, physical and financial and may include other agencies, such as: other police organisations National Crime Authority Criminal Justice Commissions other government departments/agencies non-government agencies such as financial institutions and insurance companies
All relevant personnel may include	team members, investigation supervisors sources of information may include: witnesses/victims/informants, suspects internal/external agencies surveillance provided by self or from other legitimate sources
Information may be utilised in relation to	task allocation information analysis identification of data collection plans linking of information
Exhibits may include	the individual items of evidence that could be presented to a court and may be required for viewing by: judicial officers prosecutors

	defence counsel
	expert and non-expert witnesses
	for audit purposes
Seize incorporates	the lawful procedures that permit seizure of property/goods including the procurement and execution of relevant warrants
Processing of exhibits may include	forensic examination such as document examination
	photography, finger prints
	technical services
	presentation in court
	viewing by the prosecutor and the defence
Avenues of inquiry need to consider	financial practicalities
	physical
	human and legal constraints
Investigation techniques may include	using other sources of information such as media
	doorknocks
	forensic examination/analysis
	informants/informers
	listening devices and other covert surveillance techniques
	search and search warrants
	computer interrogation/data retrieval
Suspect identification methods may include	line-ups
	photographs
	fingerprints
	witnesses
	body samples (blood, hair, skin, fluids, cell scrapings, etc)
	handwriting analysis
	admissions/confessions
	circumstantial evidence
	modus operandi (MO)

Methods to establish last known movements may include

direct evidence from witnesses
reconstructions
analysis of physical evidence
database inquiries
time and movement analysis
analysis of known habits

Sources from which to compile antecedents may include

collection of evidence from witnesses
financial profiles
police databases
public databases,
backgrounds of family/friends
forensic/medical reports
employment history

Persons may include

suspects
informants
witnesses
juveniles
people with disabilities
people from different cultural backgrounds

Subjects may include

vehicles
premises
vessels

Operational plan may be

formal
Informal
documented

Other agencies may include

Interpol
other police organisations
government departments
charities
financial institutions
hospitals
forensic agencies

crime stoppers
neighbourhood watch
defence forces
Australian Securities Commission
Trade Practices Commission
law society
legal practitioners
complaints committee
Australian Taxation Office

Profiles may include

simple or detailed
formal or informal
victims
offenders
witnesses
financial and industrial organisations

Profiles may include

physical description
list of family and friends
criminal antecedents,
list of assets
details of any debtors/creditors
sexual identify
sexuality
sexual partners
details of siblings
race/ethnicity,
vehicles,
employment details
qualifications,
skills
affiliations

Actions taken may include

investigation techniques
arrest
summons

	caution
	closing report
	coronial reports
	forfeiture of assets
Briefing/debriefings may be	formal or informal
	written or verbal
Recommendations could include	changes to law
	policy and procedures of both internal and external agencies
Persons relevant to the investigation may include	victims (individuals and/or companies)
	complainant
	next-of-kin
	neighbours
	legal representatives
	coroners
	police pathologists
	Immigration Department
	embassies
	Defence forces
Rights may include	caution
	legal representation
	interpreter
	silence
	notification of family/friends
	opportunity to make a written statement
	audiotape or videotape
	independent adult present (for juveniles)
	support person present (for indigenous peoples, intellectually disabled)
	being treated with dignity and respect during searches examinations

Elements describe the essential outcomes of a Unit of Competency.

Performance Criteria describe the required performance needed to demonstrate achievement of the element.
Where bold italicised text is used, further information is detailed in the Required Skills and Knowledge and/or the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Use information-gathering techniques	1.1 <i>Potential sources of information</i> are identified and assessed 1.2 Identified sources of information are utilised 1.3 Information is obtained from identified sources, in accordance with organisational guidelines, Freedom of Information and Privacy legislation 1.4 <i>Informants</i> are cultivated and managed 1.5 Persons/locations of interest are monitored
2. Evaluate information	2.1 Elements of offence and coronial needs are identified 2.2 Persons/locations of interest are identified and profiles maintained 2.3 All potential intelligence/ <i>evidence</i> is identified from obtained information 2.4 The validity and integrity of the information is evaluated fairly and objectively 2.5 Relevant information is used to inform decision-making 2.6 Information is corroborated independently where possible
3. Respond to information	3.1 Information is placed into relevant information systems in accordance with organisational policy and procedures 3.2 Information is communicated to relevant areas 3.3 Security of information is maintained 3.4 Information gathered is responded to through immediate action or further inquiry or filing

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

written and oral communication (listening, establishing rapport, public relations, negotiation, conflict resolution, feedback)

sourcing

collecting and evaluating diverse pieces of information

using information storage and retrieval systems

classifying information

validating information

compliance with operational safety guidelines when dealing with informants

identifying and managing informants

disseminating information in appropriate forms

Required Knowledge

organisational corporate goals and objectives

legislation and organisational guidelines relevant to information collection

storage and retrieval including FOI and Privacy legislation

organisational guidelines for dealing with informants

investigative processes

including surveillance and intelligence processes pertaining to the area of investigational responsibility

information sources

security classification criteria and dissemination protocols

information evaluation processes for establishing validity and reliability

professional codes of conduct/ethics relating to the investigatory process

Evidence Guide

EVIDENCE GUIDE

Critical aspects for assessment and evidence required to demonstrate competency in this unit

It is essential for this unit that competence be demonstrated in the gathering of information that is accurate and relevant to the investigation

Consistency in performance

RANGE STATEMENT

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Potential sources of information may include

internal (documents/databases, intelligence, specialist sections such as covert/surveillance policing, technical services and forensic services and other police)

external (witnesses, victims/suspects/informants/informers, government agencies and authorities, private agencies, literature, members of the public, surveillance)

Informants may be cultivated and managed in the following ways

researching background reliability

communicating with persons at all levels

recording information accurately

displaying knowledge of specialist crime culture and terminology

identifying motives of informants (these may include money, revenge, consideration of penalty, civic duty)

controlling informants effectively

registering informants correctly

maintaining personal integrity

anonymity and own counsel

maintaining contact with informants regularly

being self-motivated in cultivating informants

Evidence may include

direct

circumstantial

physical

opinion

documentary

hearsay

Information systems are

either computer based or manual. What are relevant information systems depends on

importance of information

sensitivity of information

RANGE STATEMENT

reliability of information
where information is to be disseminated

Unit Sector(s)

Not applicable.

Corequisite Unit/s

Co-requisite Unit/s Nil

PUAPOL029B Coordinate multi-agency investigations

Modification History

Unit Descriptor

This unit covers the competency to coordinate multi-agency and/or multi-organisational investigations.

Application of the Unit

The application of this unit in the workplace - the environments, complexities and situations involved - will be written during Phase II of the Review of the PUA00 Public Safety Training Package.

This text will be useful for the purposes of job descriptions, recruitment advice or job analysis; where possible, it will not be too job specific to allow other industries to import it into other Training Packages, where feasible.

Licensing/Regulatory Information

Pre-Requisites

Nil

Employability Skills Information

The required outcomes described in this Unit of Competency contain applicable facets of Employability Skills. The Employability Skills Summary of the qualification in which this Unit of Competency is packaged, will assist in identifying Employability Skill requirements.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.

Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the Required Skills and Knowledge and/or the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

Elements and Performance Criteria

Element	Performance Criteria
1 Apply a case management system	<p>1.1 A functional case management system is implemented by investigating agencies</p> <p>1.2 The possible scope of the investigation is determined and an investigation plan is developed and implemented to set directions for the investigation</p> <p>1.3 Cross-organisational issues, relevant to the investigation, are identified and incorporated in the case management plan</p> <p>1.4 Aims, objectives and key issues are identified and documented to maintain operational focus</p> <p>1.5 Strategies to achieve the objectives are specified and tasks assigned to each agency to achieve a common understanding and minimise duplication</p>
2 Coordinate cross-jurisdictional agencies in the investigation of serious crime	<p>2.1 Communication channels between the agencies are formalised to facilitate immediate contact</p> <p>2.2 A command structure is formalised to facilitate effective control and coordination of the investigation</p> <p>2.3 Particular organisational requirements and procedures are identified and strategies implemented to ensure consistency throughout the investigative process</p> <p>2.4 All agencies are made aware of their obligations and outputs to support the investigation</p>
3 Plan budget and resource allocation	<p>3.1 Estimated resources required for the investigation are documented in the investigation plan</p> <p>3.2 Resources available within each agency are identified and access strategies identified</p> <p>3.3 Negotiations are undertaken with decision-makers who have responsibility for workforce deployment,</p>

to make resources available when required

- 3.4 Review/**auditing mechanisms** are included in the investigation plan to ensure maximum use of resources and agency accountability
 - 3.5 Expenditure and resource usage are monitored and controlled throughout the investigation to minimise wastage
- 4 **Assess and implement operational security requirements**
- 4.1 **Potential risks** are identified and assessed in respect of individuals, own organisation and assisting agencies
 - 4.2 Suitable **security arrangements** are implemented to avoid/overcome breaches of security
 - 4.3 Relevant **organisational security requirements** are identified and strategies implemented to ensure conformity and compliance during multi-agency investigations
 - 4.4 Security arrangements are monitored, reviewed and modified as required throughout the investigation

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

oral communication and liaison (listening, establishing rapport, public relations, negotiation, conflict resolution, feedback)

written communication

managing the organisation's computer and/or manual information management system

organisation and planning

resource management including budgetary, human and physical resources and allocation/access

reasoning and logical analysis, problem solving and decision making

making high level presentations

Required Knowledge

the broad law enforcement context and the criminal justice system

organisation's corporate goals and objectives

legislation relevant to the jurisdiction/s involved in the investigation

case management systems

jurisdictional and organisational requirements of agencies, clients, and stakeholders

macro environmental impact upon investigations of serious crime, including government, policy, political, and community interests

operational budget and resource planning processes and options to control budget levels

access and deployment mechanisms to ensure optimal economy and efficiency in the use of human, physical and financial resources

opportunities, risks and constraint assessment which may hamper the investigation

internal auditing processes

risk assessment and management techniques

'duty of care' responsibilities

security classifications and requirements within own organisation

arrangements and procedures available to maintain operational security

specialist assistance available to assist with security assessments

Evidence Guide

Critical aspects for assessment and evidence required to demonstrate competency in this unit

It is essential for this unit that competence be demonstrated in the ability to apply investigation plan to the coordination within multi-agency or multi-organisational investigations

Consistency in performance

Evidence of competency in this unit will need to be gathered over time and from across a range of simulated and/or actual workplace activities

Context of and specific resources for assessment

Context of assessment

Evidence should be gathered over a period of time in a range of actual or simulated workplace environments

Specific resources for assessment

No special requirements

Guidance information for assessment

Information that will assist or guide assessment will be written during Phase II of the Review of the PUA00 Public Safety Training Package.

Range Statement

RANGE STATEMENT

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. **Bold italicised** wording in the Performance Criteria is detailed below.

A functional case management system	requires a systematic approach to planning decision-making conducting and managing investigations utilising project management philosophies methodologies and tools Tools used in the case management system may include resource spreadsheets, evidence matrices, tactical plans, assignment sheets, investigation plans
The investigation plan would include	the aims and objectives of the investigation the possible strategies available to achieve the objectives identified risk strategies and costings It would also include reference to resources: the sources of the resources, their availability, limitations, and contingencies or alternatives
Communication channels may be	formal such as a memorandum of understanding or informal, for example, direct communication between investigation managers within respective agencies
Cross-jurisdictional issues include	legal jurisdiction and jurisdiction specific issues
Organisational requirements and procedures may include	all investigation management techniques such as exhibit control and handling procedures interview methods brief management Investigation management should be consistent throughout the investigation and

	reflect best practice methodology
Resources include	human equipment/physical financial information intelligence and may be internal or external in source as a case manager the investigator may not always be able to access all the required resources in some situations
Resource allocation decisions may be affected by	staffing and equipment levels within the relevant agency
Auditing mechanisms	such as costings records can be included in investigation plan expenditure and use of resources should be monitored on a regular basis to ensure objectives can be achieved within timeframes and resource boundaries auditing may also be required to substantiate resources utilised and money spent
Potential risks could be from	internal/external sources risk assessments should include potential for risks to individuals and organisations
Security arrangements should be implemented to ensure	integrity of investigation and information and safety of personnel. Consideration should be given to the security classification of the investigation - ranging from restricted to top secret
Organisational security requirements may include	security checks of personnel limiting the access of users on computer systems/databases

Unit Sector(s)

PUAPOL030B Review and evaluate major investigations

Modification History

Unit Descriptor

This unit covers the competency to monitor, review and evaluate major investigations.

Application of the Unit

The application of this unit in the workplace - the environments, complexities and situations involved - will be written during Phase II of the Review of the PUA00 Public Safety Training Package.

This text will be useful for the purposes of job descriptions, recruitment advice or job analysis; where possible, it will not be too job specific to allow other industries to import it into other Training Packages, where feasible.

Employability Skills Information

The required outcomes described in this Unit of Competency contain applicable facets of Employability Skills. The Employability Skills Summary of the qualification in which this Unit of Competency is packaged, will assist in identifying Employability Skill requirements.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.

Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the Required Skills and Knowledge and/or the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

Elements and Performance Criteria

Element	Performance Criteria
1 Assess investigation priorities and plans	<p>1.1 The progress of the investigation is regularly monitored to ensure tasks are completed and objectives met</p> <p>1.2 Deficiencies and areas requiring further action are identified and addressed</p> <p>1.3 Feedback on the progress of the investigation is regularly communicated to relevant personnel, management, clients and stakeholders</p>
2 Determine and report investigation status	<p>2.1 The investigation is regularly assessed against competing investigations/demands to determine priorities and monitor resource and budgetary expenditure</p> <p>2.2 The investigation is strategically assessed at regular intervals to ensure that objectives are achievable within resource and legal constraints</p> <p>2.3 Critical decisions regarding the investigation are recorded and reported to relevant personnel</p>
3 Evaluate the effectiveness of agency alliances	<p>3.1 Organisational responsibilities for resource/budgetary allocations are monitored and reviewed to facilitate achievement of objectives</p> <p>3.2 Communication and coordination between agencies is evaluated and modified where required</p> <p>3.3 Tasks performed by participating agencies are reviewed and modified, if required, to maximise use of expertise and resources available</p> <p>3.4 The effectiveness of agency alliances and partnerships is reviewed at the completion of the investigation</p> <p>3.5 Recommendations arising from the review of agency alliances are documented and forwarded to relevant managers, clients and stakeholders</p>

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

oral communication and liaison skills (listening, establishing rapport, public relations, negotiation, conflict resolution, feedback)

written communication in preparing investigation plans, tactical plans, resource bids etc.

managing the organisation's computer and/or manual information management system

ability to conduct investigations

organisation and planning skills, in particular the skills to coordinate crucial and diverse clients, law enforcement providers and stakeholders

resource management including budgetary, human and physical resources and allocation/access

reasoning and logical analysis, problem solving and decision making

high level presentations

Required Knowledge

the broad law enforcement context and the criminal justice system

organisation's corporate goals and objectives

legislation relevant to the jurisdiction/s involved in the investigation

jurisdictional and organisational requirements of agencies, clients, and stakeholder

organisation's operational priorities

macro environmental impact upon investigations of serious crime, including government, policy, political, and community interests

access and deployment mechanisms to ensure optimal economy and efficiency in the use of human, physical and financial resources

opportunities, risks and constraint assessment which may hamper the investigation

decision making processes and organisational chain of command

evaluation and auditing processes

Evidence Guide

Critical aspects for assessment and evidence required to demonstrate competency in this unit

It is essential for this unit that competence be demonstrated in applying the process of continuous reviews and assessment of investigations to achieve planned and reviewed priorities

Consistency in performance

Evidence of competency in this unit will need to be gathered over time and from across a range of simulated and/or actual workplace activities

Context of and specific resources for assessment

Context of assessment

Evidence should be gathered over a period of time in a range of actual or simulated workplace environments

Specific resources for assessment

No special requirements

Guidance information for assessment

Information that will assist or guide assessment will be written during Phase II of the Review of the PUA00 Public Safety Training Package.

Range Statement

RANGE STATEMENT

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. **Bold italicised** wording in the Performance Criteria is detailed below.

Declaration of a major investigation

An investigation may be declared to be a major investigation, in accordance with organisational policy and guidelines which may include estimated time to complete the investigation, resources required to undertake the investigation, complexity of the investigation

Deficiencies in the investigation may occur because of

budgetary/resource constraints

legal obligations

organisational policy requirements

Deficiencies and the remedial actions undertaken by the manager should be documented in the plan as the investigation progresses

Clients may include

the persons or organisations requesting investigations proceed on their behalf

Clients may be internal or external and can range from an individual to a group of people representing various levels of management from an investigative group, another section of the agency or a multi-agency and multi-organisational group

Stakeholders are

other people or organisations (not being the client) who may legitimately have an interest in the progress and results of the investigation

stakeholders may be internal or external

Strategic assessment involves

identification of emerging issues

time frames

budgetary/resource/legal constraints

new methodologies for analysis of impact on investigation

Critical decisions may be influenced by	financial and physical constraints available resources legal limitations re-focus of organisational priorities Decisions to terminate, re-prioritise, or change the focus of the investigation may be required as a result of the strategic assessment and should be documented in the investigation plan
Effective use of resources	Tasks performed by each agency should be reviewed at regular intervals to make best use of available resources, reduce wastage and ensure objectives are achieved in a timely, cost-efficient manner
The effectiveness of agency alliances and partnerships can be evidenced through	the productiveness of the partnership's ability to work harmoniously in a multi-agency, multi-organisational environment, and cooperative sharing of resources to achieve investigation objectives
Relevant personnel may include	those persons who can contribute to the investigation such as support services and technical services

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.

Performance Criteria describe the required performance needed to demonstrate achievement of the element.
Where bold italicised text is used, further information is detailed in the Required Skills and Knowledge and/or the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Plan a confiscation of assets operation	<p>1.1 An appraisal is conducted to identify opportunities and limitations for asset forfeiture that is consistent with <i>overall operational objectives</i></p> <p>1.2 A <i>plan</i> is developed to confiscate assets in accordance with organisational policy, procedures, and <i>legislation</i></p> <p>1.3 Provisions for <i>safe storage and maintenance</i> of confiscated assets are made and incorporated into the plan</p> <p>1.4 <i>Relevant personnel</i> are consulted/informed of the plan of action and the plan is modified/confirmed as required to ensure it is consistent with the overall investigation</p>
2. Confiscate assets	<p>2.1 Collect, collate, and analyse information that identifies assets owned by target(s)</p> <p>2.2 <i>Documentation</i> is prepared in accordance with organisational policy, procedures, and legislation to <i>locate and quantify assets</i></p> <p>2.3 Material that identifies and quantifies assets is seized in accordance with organisational policy, procedures, and legislation</p> <p>2.4 Documentation is prepared in accordance with organisational policy, procedures, and legislation to <i>seize or restrain assets</i></p> <p>2.5 Operatives are briefed on their duties and involvement in the operation so that they clearly comprehended the message</p> <p>2.6 Assets are seized or restrained in accordance with organisational policy, procedures, and legislation</p>
3. Dispose of assets	<p>3.1 Documentation is prepared for disposal of assets in accordance with organisational policy, procedures, and legislation</p> <p>3.2 Seized material is disposed of in accordance with organisational policy, procedures, and legislation</p> <p>3.3 Relevant personnel are advised of the outcomes of the criminal assets investigation</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

written and oral communication skills (listening, negotiation, conflict resolution)

planning

coordination and leadership skills to lead a multi-agency personnel response

presentation skills

eliciting skills

debriefing

interpreting skills to interpret intelligence information

logic and reasoning

decision making and problem solving

Required Knowledge

case officer's role

operations in general

organisational operational procedures and guidelines

relevant legislation

correct interpretation of all applicable laws, policy and procedures

planning (appreciation) process

written communication

problem solving techniques

unit and equipment capabilities and their application to a plan

briefing techniques

information management systems

government and policy environments within which operations will be conducted

available resources which may need to be deployed to support the operation, eg. security issues and classifications

court procedures and evidentiary requirements in provision of briefs of evidence for use by the prosecution

Evidence Guide

EVIDENCE GUIDE

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Competence in this unit must be established through the practical demonstration of skills in confiscating assets in accordance with organisational policy and legislation, and storing assets securely

Consistency in performance

Evidence of competency in this unit needs to be gathered over time and in a range of confiscation of assets contexts

Context of and specific resources for assessment

Context of assessment

Evidence should be gathered over a period of time in a range of actual or simulated workplace environments

Specific resources for assessment

Access to storage facilities for confiscated assets

Guidance information for assessment

Information that will assist or guide assessment will be written during Phase II of the Review of the PUA00 Public Safety Training Package.

Range Statement

RANGE STATEMENT

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

The term overall operational objectives relates to	an investigation or operation into a substantive offence/a part, of which involves an operation to seize or restrain assets
The plan would include	avenues of inquiry to be pursued timings investigative tools to be utilised such as search warrants production orders and should cover pre and post interdiction as well as the execution phase of the operation
The legislation relating to confiscation of assets include	The Proceeds of Crime Act 1987 and the Customs Act 1901
Safe storage and maintenance provisions include	the provision for vehicles vessels and other personal property valuables such as jewellery and currency maintenance of seized equipment or property maintenance of premises
Relevant personnel to be informed of the plan include	the team leader of the overall investigation other agencies involved in the investigation Department of Public Prosecutions ITSA
The documentation required to locate and quantify assets include	monitoring orders, production orders and search warrants pursuant to the Proceeds of Crime Act 1987
The documentation required to seize or restrain assets include	search warrants pursuant to the Proceeds of Crime Act 1987 seizure warrants pursuant to the Customs Act 1901 restraining orders pursuant to the Proceeds of Crime Act 1987
A briefing should contain	evidence of the existence of a search/seizure warrant or

RANGE STATEMENT**elements such as**

details of the target
 types of documents/assets to be seized
 details of the target site
 equipment required
 rehearsals
 timings of the operation
 tasks to be completed prior to, during and after the operation
 procedures of the securing of documentation/assets

Seized assets include

assets seized pursuant to the Proceeds of Crime Act 1987
 Customs Act 1901 or other appropriate legislation

Restrained assets include

assets include assets restrained pursuant to the Proceeds of Crime Act 1987 whether they are physically seized or not

The documentation required to dispose of assets include

correspondence with DPP and ITSA, confiscation and forfeiture orders pursuant to the Proceeds of Crime ACT 1987

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.

Performance Criteria describe the required performance needed to demonstrate achievement of the element.
Where bold italicised text is used, further information is detailed in the Required Skills and Knowledge and/or the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Establish project parameters	<p>1.1 <i>Strategic</i>, operational, and tactical projects are identified and prioritised to optimise resources</p> <p>1.2 <i>Clients</i> and stakeholders are identified and communication channels formalised to facilitate immediate and appropriate contact</p> <p>1.3 <i>User expectations</i> are established to formulate project objectives and outcomes</p> <p>1.4 Time frames for intelligence projects are established and agreed to reflect client needs and investigation deadlines</p> <p>1.5 Potential implications and constraints are identified and addressed in <i>the project management plan</i></p> <p>1.6 Client/stakeholders ownership is established to ensure involvement from the case officer and other <i>users</i> of the intelligence <i>product</i></p> <p>1.7 Terminology is defined to ensure a common understanding between those involved</p> <p>1.8 The project is compared to other current projects to determine its priority in terms of its scope, importance, and resource requirements</p>
2. Develop a project management plan	<p>2.1 The scope of the <i>project</i> is determined, including the linkages between different possible entities, to form the intelligence plan</p> <p>2.2 <i>Models</i> are developed to direct and inform intelligence activities</p> <p>2.3 Aims, objectives and key issues are identified</p> <p>2.4 <i>Strategies</i> to achieve the <i>objectives</i> are specified</p> <p>2.5 Communication channels between the <i>operatives</i>, client, stakeholders and users are formalised to facilitate immediate contact</p> <p>2.6 Risk factors associated with the project are identified and strategies put in place to minimise risk</p> <p>2.7 Information is managed to facilitate its ready accessibility</p> <p>2.8 The project management plan is documented and approved</p>
3. Plan resource allocation	<p>3.1 The <i>resources</i> required for the project are estimated as accurately as possible given</p>

ELEMENT

PERFORMANCE CRITERIA

available information

- 3.2 Negotiations are undertaken with decision-makers who have responsibility for resources to make them available when required
- 3.3 A resource plan seeking commitment to expend resources is clearly and concisely written for decision-makers

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

oral communication (listening, establishing rapport, negotiation, conflict resolution)

written communication in preparing intelligence plans and documentation, tactical and resource plans, etc.

resource management including budgetary, human and physical resources and allocation/access

organisation and time management

computer and information management

gather, collate and record information

operate safely as reflected

Required Knowledge

correct interpretation of all applicable laws

policy and procedures

government and policy environments within which intelligence operations will be managed and political considerations which may impact

agency goals and objectives

information management systems and law enforcement databases

possible client/users of the intelligence product and the different contexts in which this may be used

different types of criminal activity and their elements eg. general crime, theft, burglary, assault, drugs, fraud, homicide, available resources which may need to be deployed to support the intelligence operation and negotiation strategies to access these

security issues and classifications

intelligence principles and a practical knowledge of case management systems and a range of contexts in which these can be applied, and evidentiary requirements

Evidence Guide

EVIDENCE GUIDE

Critical aspects for assessment and evidence required to demonstrate competency in this unit

It is essential for this unit that competence be demonstrated in a plan that reflects strategic objective and resource constraints

Consistency in performance

Evidence of competency in this unit will need to be gathered over time and from across a range of simulated and/or actual workplace activities

Context of and specific resources for assessment

Context of assessment

Evidence should be gathered over a period of time in a range of actual or simulated workplace environments

Specific resources for assessment

No special requirements

Guidance information for assessment

Information that will assist or guide assessment will be written during Phase II of the Review of the PUA00 Public Safety Training Package.

Range Statement

RANGE STATEMENT

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

The project management plan should include

the aims and objectives of the project

the possible strategies available to achieve the objectives

identified risk strategies, and costings

It would also include reference to resources: the sources of the resources, their availability, limitations, and contingencies or alternatives

The plan would include reference to strategies put in place to maintain or replace systems

Strategic includes

environmental scanning and identification of emerging issues and trends

Clients are

the persons or organisations requesting intelligence projects for whom completed projects are intended. Clients may be internal or external and can range from an individual to a group of people representing various levels of management from an intelligence unit, another section of the agency or multi-agency and multi-organisational group

Users are

other people or organisations (not being the client) who may legitimately have access to and make use of the completed intelligence project

Users may be internal or external

A project can

have a wide range of classifications ranging from classified through to highly classified

present a range of risks to the agency and/or client should confidentiality be breached

have routine through to unusual and unfamiliar aims and expectations

have simple through to complex parameters

User expectations include

the outcomes and anticipated levels of achievement of completed intelligence projects

RANGE STATEMENT

Products can be	tactical or strategic, and can be formal or informal, written or oral, hard copy or electronic and of varying lengths
Objectives are	goals or outcomes that are realistic and measurable
Operatives may include	team members clients stakeholders and users
Strategies may include	identifying time frames constraints phases and methodologies for example: interviews, surveys, participant observation, content analysis
Resources may include	human equipment/physical financial information information technology intelligence resources may be internal or external
Limitations may include	training needs staff and equipment availability computer access time economic and financial considerations
Resource allocation decisions may be affected by	staffing and equipment levels of the analytical unit
Information sources may include	internal and external sources individuals groups organisations
Models may include	management of the collection collation and evaluation of intelligence information

Elements describe the essential outcomes of a Unit of Competency.

Performance Criteria describe the required performance needed to demonstrate achievement of the element.

Where bold italicised text is used, further information is detailed in the Required Skills and Knowledge and/or the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Develop an information collection plan	<p>1.1 The type and quality of information required is identified to inform the <i>collection plan</i></p> <p>1.2 The most suitable <i>information source(s)</i> is identified and briefed as to information required</p> <p>1.3 Potential information channels are identified to assist selection of the most suitable collection channel</p> <p>1.4 A clear, concise, and accessible information collection plan is written to inform operatives and users</p>
2. Collect information	<p>2.1 The type and quality of information required is identified and communicated clearly to information sources and collectors to facilitate desired outcomes</p> <p>2.2 <i>Information</i> is collected according to the methods outlined in the information collection plans</p> <p>2.3 Information is graded registered, recorded and stored according to organisational guidelines</p> <p>2.4 The Information Collection Plan is continually reviewed and amended as required to ensure a sound collection process</p>
3. Collate information	<p>3.1 Information is collated using methods which facilitate accessibility and rapid retrievability</p> <p>3.2 Gaps in gathered information are identified and steps taken to gather further pertinent information and give a better understanding of events</p> <p>3.3 The <i>collation</i> process is evaluated to determine what improvements can be made, and those improvements implemented</p>
4. Evaluate information	<p>4.1 The source of the <i>information is evaluated</i> to determine its reliability and value</p> <p>4.2 Previously collected information is <i>re-evaluated</i> in light of the most recently collected information to confirm a picture of events</p> <p>4.3 Invalid and/or irrelevant information is removed from further processing and retained to facilitate future reference</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

oral communication (listening, establishing rapport, negotiation, conflict resolution)
written communication in preparing intelligence documentation and collection plans
resource management including budgetary, human and physical resources and allocation/access
analyse and evaluate information
organise and manage time
decision making and problem solving, including lateral thinking and perseverance
operational safety as reflected in Unit APS 001 Maintain Operational Safety (General)

Required Knowledge

government and policy environments within which operations will be managed and political considerations which may impact
correct interpretation of all applicable laws, policy and procedures. Applicable law, policy and procedures for all the jurisdictions are detailed in the comprehensive legislation appendix at the close of the police standards submission,
available resources which may be deployed to support the intelligence operation. As an example, the provision of surveillance, technical support
security issues and classifications
Informant/source cultivation and handling/management procedures
information management and collection techniques, in the context of intelligence processes and legal requirements regarding information storage and retrieval
police information/database systems
different types of criminal activity and their elements eg general crime, theft, burglary, assault, drugs, fraud, embezzlement, homicide etc
intelligence principles and a practical knowledge of case management systems and the range of contexts in which these can be applied
evidentiary requirements

Evidence Guide

EVIDENCE GUIDE

Critical aspects for assessment and evidence required to demonstrate competency in this unit

It is essential for this unit that competence be demonstrated in the management of intelligence information consistent with the project plan

Consistency in performance

Evidence of competency in this Unit will need to be gathered over time and from across a range of simulated and/or actual workplace activities

Context of and specific resources for assessment

Context of assessment

Evidence should be gathered over a period of time in a range of actual or simulated workplace environments

Range Statement

RANGE STATEMENT

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

The information collection plan may include

time frames for the collection of the information. Such timeframes may be affected by the work involved in preparing the jobs, turn around time, and translation times,

appropriate methods of information transfer which could include: (modem, facsimile, post, courier, oral, and/or by hand

assessment of risks to the source, individual or organisation)

The unpredictable nature of subjects' activities mean

that new entities come to notice when intelligence officers and officers are providing tactical and operational support. Therefore, the Information Collection Plan must be monitored for current relevance and brought up to date from time to time to keep up with operational developments. The plan would be classified appropriately

Information sources may include

other law enforcement officers in the agency

existing holdings with the agency

other law enforcement agencies

government departments

private sector

public domain, libraries

informants

regulatory bodies and professional associations

academic and research institutes

Collection techniques may include

library searches

interviews

surveillance (physical and electronic)

observation posts

overt and covert means

surveys

RANGE STATEMENT

Information may include	<p>hearings</p> <p>data</p> <p>facts</p> <p>anecdotal evidence</p> <p>allegations and processed intelligence</p> <p>pictures</p> <p>video recordings</p> <p>audio recordings</p> <p>transcripts</p> <p>narration</p> <p>objects or things</p>
Information may be	<p>in hard copy or electronic form</p> <p>It can be obtained by overt or covert means, and apply to unclassified through to highly classified material</p>
Collation methods may include	<p>Indexing</p> <p>cross referencing</p> <p>linking</p> <p>sorting</p> <p>comparing</p> <p>categorising</p> <p>integrating</p> <p>using appropriate available software programs</p> <p>filing systems</p>
The information is evaluated according to its	<p>credibility</p> <p>validity</p> <p>reliability</p> <p>accuracy</p> <p>pertinence</p>
Re-evaluation means	<p>subjecting existing information to evaluation processes in the light of new information received</p>

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.

Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the Required Skills and Knowledge and/or the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<p>1. Reduce and describe information</p>	<p>1.1 Information to be subjected to <i>analysis</i> is identified</p> <p>1.2 <i>Information is reduced</i> and described in a suitable form to support the development of <i>interpretations</i></p> <p>1.3 The reduction and description processes are reviewed to determine their appropriateness, and improvements made where necessary</p> <p>1.4 Information not used in the reduction and description processes is archived to facilitate future reference</p>
<p>2. Analyse and interpret information</p>	<p>2.1 Appropriate <i>thinking processes</i> are used to interpret the information</p> <p>2.2 Sound inductive reasoning is applied to ensure consistency of interpretations based on the information</p> <p>2.3 Interpretations are credible to facilitate user acceptance of interpretations and formulation of inferences based on the factual quantitative and qualitative information</p>
<p>3. Develop inferences</p>	<p>3.1 Possible interpretations are tested to review credibility and consistency with new information</p> <p>3.2 <i>Interpretations are refined and consolidated</i> to strengthen inferences drawn</p> <p>3.3 Assumptions in the arguments leading to inferences are clearly stated to inform clients and users</p> <p>3.4 <i>Sound inferences</i> are formulated from facts and the tested interpretations</p> <p>3.5 The chain of reasoning in formulating inferences is clear to ensure transparency to users and clients</p> <p>3.6 Inferences are reviewed to identify and address any fallacies in reasoning</p> <p>3.7 The <i>relationship</i> between the information developed and the probable interpretations <i>is assessed</i> and reported to ensure validity and compliance with agency guidelines</p> <p>3.8 <i>Sound recommendations</i> are developed and reported to inform users of intelligence analysis outcomes</p>

ELEMENT

PERFORMANCE CRITERIA

|

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

oral communication (listening, establishing rapport, negotiation, conflict resolution, presentations)

written communication in preparing intelligence analysis reports etc,

deductive and inductive reasoning

constructing sound inductive arguments

evaluation and re-evaluation

computer and information system usage

resource management including budgetary, human and physical resources and allocation/access

work safety

Required Knowledge

government and policy environments within which operations will be managed

different types of criminal activity and their elements (eg general crime, theft, burglary, assault, drugs, fraud, embezzlement, homicide etc)

correct interpretation of all applicable laws, policy and procedures. Applicable law, policy and procedures for all the jurisdictions are detailed in the comprehensive legislation appendix at the close of the police standards submission

available resources required to support the intelligence analysis process

security issues and classifications

the range of analytical techniques appropriate for information analysis

evaluation system, such as the Admiralty Code or other system

thinking and inductive/deductive reasoning processes

the influence of human factors on information analysis, eg. prejudice and biases, personalities in analysis, construction of sound inductive arguments, and fallacies in reasoning,

criminal justice system procedures and evidentiary requirements

Evidence Guide

EVIDENCE GUIDE

Critical aspects for assessment and evidence required to demonstrate competency in this unit

It is essential for this unit that competence be demonstrated in analysis that must be logical, valid, reliable and relevant

Consistency in performance

Evidence of competency in this Unit will need to be gathered over time and from across a range of simulated and/or actual workplace activities

Context of and specific resources for assessment

Context of assessment

Evidence should be gathered over a period of time in a range of actual or simulated workplace environments

Specific resources for assessment

No special requirements

Guidance information for assessment

Information that will assist or guide assessment will be written during Phase II of the Review of the PUA00 Public Safety Training Package.

Range Statement

RANGE STATEMENT

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Analysis can be	quantitative and/or qualitative It can be explorative, descriptive, causative or predictive
Methods of analysis can include	hypothesis development link analysis comparative analysis biographical analysis demographics or geographic analysis historical analysis scenario generation Delphi technique morphological analysis
Thinking processes will be	inductive (interpreting raw information, identifying trends or patterns and testing them) deductive (beginning with a hypothesis and testing it), lateral, critical, or creative thinking processes involve the use of problem solving techniques and decision making
Forms of reduced information include	charts lists diagrams tables summaries
Testing of interpretations must be	balanced logical sceptical objective and comprehensive to be considered appropriate testing must involve logical reasoning

RANGE STATEMENT

	and may involve critical evaluation of additional information collection
Refining and consolidating interpretations involves	additional testing re-evaluation reformation or other activities aimed at conformation to a strong degree of probability
Sound inferences may include	predictions and interpretations that are probable, estimates, and/or explanations
The assessment of the relationship	between the information developed and the probable interpretations may be reported in written form, orally, formally or informally
Sound recommendations may address	both strategies and tactical issues

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.

Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where **bold italicised** text is used, further information is detailed in the **Required Skills and Knowledge** and/or the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Write reports	1.1 The client's expectation of an appropriate <i>written report protocol</i> is determined 1.2 The written report <i>format</i> , tone and language are specific to the audience and/or operational circumstances 1.3 The report content is accurate and written in a concise and logical manner 1.4 The written report conforms to acceptable writing conventions and is presented in a <i>professional manner</i> 1.5 The written report is disseminated to the intended recipients in a timely manner
2. Conduct briefings	2.1 The briefing is planned so that all essential information is included and logically arranged 2.2 Briefing content is developed and delivered in a concise and logical manner 2.3 Briefing content is structured to facilitate audience comprehension
3. Provide electronic products	3.1 Intended recipients are identified and contacted to establish needs and expectations 3.2 Caveats are determined and applied to ensure that limitations on release of the product are understood 3.3 <i>Electronic products</i> are designed to be compatible with intended recipient needs/systems and/or operational circumstances 3.4 Electronic products are selected and presented to ensure conciseness and enhance delivery and recipient understanding of the message 3.5 Electronic products are disseminated to the intended recipient in a form and timeframe to meet client needs and expectations
4. Obtain feedback from clients	4.1 Lines of communication are established and maintained to elicit feedback from clients 4.2 <i>Feedback</i> on products and dissemination methods is actively sought from clients to facilitate an improved product 4.3 Client feedback is acknowledged and recorded to enable <i>appropriate action</i> /adjustments to the intelligence product to be made

Employability Skills This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.

Performance Criteria describe the required performance needed to demonstrate achievement of the element.
Where bold italicised text is used, further information is detailed in the Required Skills and Knowledge and/or the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare vehicle for operational response	<p>1.1 The <i>vehicle</i> is selected to meet operational requirements and is suitable to use in the terrain</p> <p>1.2 Preliminary check of the vehicle is completed to ensure it is serviceable</p> <p>1.3 Equipment and accessories are checked to ensure they are available and serviceable</p> <p>1.4 <i>Cabin drill</i> and <i>start up checks</i> are completed in accordance with operational standards</p> <p>1.5 Engine is started in accordance with <i>manufacturer's specifications</i></p> <p>1.6 Audible and visual warning systems are checked to ensure that they are all operational</p>
2. Drive the vehicle	<p>2.1 Vehicle is prepared for, and safely operated in terrain suitable to the vehicle</p> <p>2.2 Vehicles and/or trailers are operated and positioned in accordance with traffic regulations and organisation's policies and procedures and to ensure safe and efficient operation</p> <p>2.3 Low risk driving techniques are used which minimise the likelihood of injury to persons or damage to equipment or property and in accordance with the organisation's policies and procedures</p>
3. Monitor traffic, road and terrain under operational conditions	<p>3.1 Vehicle movement is controlled in response to external conditions to ensure safety of persons</p> <p>3.2 The most efficient route of travel is taken through monitoring factors likely to cause delays or route deviations</p> <p>3.3 <i>Traffic and surface conditions</i> are consistently monitored and acted upon to enable safe operation and ensure no injury to people or damage to property, equipment, loads and facilities</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- low risk driving techniques
- monitor and anticipate traffic hazard

Required Knowledge

- ancillary equipment
- appreciation of automotive systems
- emergency vehicle requirements and regulations
- knowledge of emergency vehicle inspection procedures
- knowledge of equipment and accessories
- local area knowledge
- traffic legislation
- traffic rules and regulations
- vehicle operating procedures

Evidence Guide

EVIDENCE GUIDE

EVIDENCE GUIDE

Critical aspects for assessment and evidence required to demonstrate competency in this unit

It is essential for this unit that competence be demonstrated in a practical demonstration of driving skills. Maintaining personal safety, safety awareness and awareness of traffic conditions and other road users is critical

Consistency in performance

Evidence should be gathered over a period of time in a range of actual or simulated workplace environments

Context of and specific resources for assessment

Context of assessment

Competency must be demonstrated in a simulated operational situation under varying conditions

Specific resources for assessment

Assessment of this competency will require access to a relevant vehicle

Guidance information for assessment

Information that will assist or guide assessment will be written during Phase II of the Review of the PUA00 Public Safety Training Package.

Range Statement

RANGE STATEMENT

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Vehicles may include	<ul style="list-style-type: none"> all types of operational vehicles tankers troop carrier rescue vehicles buses bulk water carrier all terrain vehicles pumpers aerial appliances communication vehicles command /control vehicles
Operational conditions may include	<ul style="list-style-type: none"> non-emergency driving emergency response driving off-road driving hazardous environmental conditions driving in special environments (eg on actual airport movement areas) prevailing weather time of day/night visibility recovery
Considerations may include	<ul style="list-style-type: none"> procedures traffic conditions levels of emergency response adverse weather traffic regulations warning devices adverse terrain

RANGE STATEMENT

	type of vehicle

Unit Descriptor

Unit Descriptor

This unit covers the competency required to identify and prevent the development of workplace emergency situations, or to minimise their consequences, and to report if emergency protection systems, emergency control equipment and evacuation systems are compromised.

For this unit the term workplace is defined as the area encompassed by an individual's responsibilities.

This unit:

- has been developed to cover the broad range of *emergencies* and *workplaces* as considered in Australian Standard 37452002
- covers the work required before the emergency services or specialist response team arrives
- does not cover the specific use of equipment to prevent workplace emergency situations
- is part of a suite of eleven workplace emergency response units of competency that has three streams
- is part of the prevention stream.

Application of the Unit

Application of the Unit

The application of this unit in the workplace - the environments, complexities and situations involved - will be written during Phase II of the Review of the PUA00 Public Safety Training Package.

This text will be useful for the purposes of job descriptions, recruitment advice or job analysis; where possible, it will not be too job specific to allow other industries to import it into other Training Packages, where feasible.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.

Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the Required Skills and Knowledge and/or the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<p>1. Identify, monitor and report situations that could lead to workplace emergencies</p>	<p>1.1 <i>Situations that could lead to workplace emergencies</i> are identified and reported according to workplace procedures and accepted safe practices</p> <p>1.2 Immediate work area is routinely checked for any situations that could lead to emergencies</p> <p>1.3 <i>Hazardous work</i> is monitored to ensure precautions and workplace procedures are followed</p>
<p>2. Identify, report and correct situations that could prevent workplace emergencies from being safely handled</p>	<p>2.1 Principles of operation of relevant <i>emergency protection systems</i> are identified</p> <p>2.2 Principles of operation of relevant <i>emergency control equipment</i> are identified</p> <p>2.3 <i>Evacuation systems</i> are identified</p> <p>2.4 Immediate work area is routinely checked according to workplace procedures and accepted safe practices for any situations that could lead to emergency protection systems, emergency control equipment and evacuation systems being made inoperable</p> <p>2.5 Situations that could lead to emergency protection systems, emergency control equipment and evacuation systems being made inoperable are identified, corrected and/or reported according to workplace procedures and accepted safe practices</p> <p>2.6 Workplace procedures and accepted safe practices are regularly monitored and followed to ensure operability of emergency protection systems, emergency control equipment and evacuation systems</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- communicate effectively according to workplace procedures and accepted safe practices
- identify hazards in the workplace that reduce the effectiveness of emergency protection systems, emergency control equipment and evacuation systems
- monitor the work area to identify new and emerging risks on an on-going basis

Required Knowledge

- basic types, principles of operation and limitations of emergency protection systems and emergency control equipment typically installed in the workplace
- hazards in the workplace that reduce the effectiveness of emergency protection systems and emergency control equipment
- procedures for identifying, minimising or preventing, correcting and reporting situations within the organisation that may lead to workplace emergencies
- safe practices applicable to the workplace that help to prevent emergencies
- situations in the workplace that may lead to emergencies
- situations that may make emergency protection systems and emergency control equipment inoperable

Evidence Guide

EVIDENCE GUIDE

|

EVIDENCE GUIDE

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Assessment must confirm the ability to identify emergency protection systems, emergency control equipment and evacuation systems; to identify and report situations that may lead to or contribute to workplace incidents and/or emergencies

Consistency in performance

Competency should be demonstrated in the workplace

Context of and specific resources for assessment

Context of assessment

Competency should be assessed in the workplace

Specific resources for assessment

Access to:

- scenarios that reflect a range of emergency situations that may be expected in the workplace
- appropriate emergency protection systems and emergency control equipment
- relevant standards and workplace procedures

Guidance information for assessment

Information that will assist or guide assessment will be written during Phase II of the Review of the PUA00 Public Safety Training Package.

Range Statement

RANGE STATEMENT

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Emergencies must include those emergencies identified by the workplace hazard analysis, which may include

Animal or livestock emergencies
 Bomb threat
 Building invasion/armed invasion
 Chemical, biological and radiological
 Civil disorder
 Criminal acts
 Cyclones, including storm surge
 Deliberate self-harm
 Earthquake
 Failure of utilities
 Fire
 Flood
 Hazardous substances incidents
 Hostage situations
 Industrial accident
 Letter bomb
 Medical emergency
 Severe weather/storm damage
 Structural instability
 Terrorism
 Transport accident
 Toxic emission
 Veterinary emergencies
 Wildfire

Workplaces include

Workplaces, buildings and structures as outlined in Australian Standard 37452002

Situations that could lead to workplace emergencies may

Deficient or ineffective security arrangements
 Failure to follow safe practices

RANGE STATEMENT**include**

Fire/smoke hazards
 Poor maintenance
 Unreported faults
 Unsafe practices
 Unsafe storage and handling of dangerous goods and hazardous materials
 Unsafe use of electrical or mechanical equipment

Hazardous work includes the hazards identified in the hazard analysis and may include

Handling dangerous goods and hazardous materials (including waste)
 Hot work
 Manufacturing
 Unsafe manual handling
 Using, mixing and/or moving chemicals
 Working at heights, in confined spaces, in poorly ventilated spaces or around noise
 Working around traffic
 Working with plant and machinery
 Working with unstable equipment or equipment that has deteriorated

Emergency protection systems may include

Automatic fire/leak/spill/movement detectors
 CCTV
 Communications systems
 Manual alarms
 Passive installations, fire/smoke doors, fire walls
 Security infrastructure
 Special hazard identification systems
 Spill/leak containment systems
 Sprinkler and deluge systems
 Warning systems

Emergency control equipment may include

Communications equipment
 Escape equipment
 Fire/smoke detection, alarm, mitigation and suppression systems

RANGE STATEMENT

	First-aid kits
	Forcible entry tools
	Initial response firefighting equipment
	Isolation barriers
	Personal protection kits
	Shower and eyewash
	Spill control kits/equipment
Evacuation systems include	Access, egress
	Exits
	Procedures
Situations that could lead to emergency protection systems, emergency control equipment and evacuation systems being made inoperable may include	Blocking egress
	Compromising security infrastructure or integrity
	Emergency lighting and/or exit lighting being damaged, missing or under service
	Locking or blocking exits
	Impairing exits and/or pathways to exits
	Interfering with alarm systems
	Not replacing or replenishing used emergency equipment
	Not reporting damage to emergency control equipment or facilities
	Propping open fire/smoke doors

Where bold italicised text is used, further information is detailed in the Required Skills and Knowledge and/or the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT

PERFORMANCE CRITERIA

1. **Ensure workplace emergency prevention processes are implemented**

1.1 Workplace emergency prevention inspections are carried out according to workplace procedures, safe practices and workplace emergency management plan

1.2 *Situations that could lead to workplace emergencies* are identified, mitigated or corrected, and recorded or reported according to workplace procedures

1.3 Processes are reviewed and reported according to workplace procedures

2. **Ensure appropriate hazard analysis undertaken and results are implemented**

2.1 Workplace procedures are implemented to ensure that an emergency prevention *hazard analysis* in the area is routinely undertaken

2.2 Personnel are designated to implement the processes according to the hazard analysis

2.3 Workplace procedures are implemented to ensure personnel comply with identified emergency prevention processes

3. **Ensure workplace emergency protection systems, emergency control equipment and evacuation systems remain effective**

3.1 Workplace procedures are implemented to ensure work practices do not interfere with the area's *emergency protection systems, emergency control equipment* and *evacuation systems*

3.2 Workplace procedures are implemented to ensure problems or deficiencies with area emergency protection systems, emergency control equipment and evacuation systems are corrected and reported according to workplace procedures

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- communicate
- delegate
- leadership
- organising

Required Knowledge

- basic types, principles of operation and limitations of emergency prevention and protection systems and emergency control equipment typically installed in the workplace
- hazard analysis processes
- reporting procedures
- workplace procedures to rectify problems

Unit Descriptor

Unit Descriptor

This unit covers the competency required to participate in the management and monitoring of workplace emergency prevention and control structures for a complex workplace or a defined group of workplaces.

It involves managing problems and resolving issues in relation to the organisation's workplace emergency prevention process and emergency control structures.

This unit:

- has been developed to cover the broad range of *emergencies* and *workplaces* as considered in Australian Standard 37452002
- is part of a suite of eleven workplace emergency response units of competency that has three streams
- is part of the prevention stream.

Application of the Unit

Application of the Unit

The application of this unit in the workplace - the environments, complexities and situations involved - will be written during Phase II of the Review of the PUA00 Public Safety Training Package.

This text will be useful for the purposes of job descriptions, recruitment advice or job analysis; where possible, it will not be too job specific to allow other industries to import it into other Training Packages, where feasible.

Licensing/Regulatory Information

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.

Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the Required Skills and Knowledge and/or the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Manage emergency measures and practices	<ul style="list-style-type: none">1.1 <i>Emergency prevention measures</i>, practices and control equipment are identified, documented and disseminated according to the requirements of the workplace emergency procedures1.2 Purchasing, installation and commissioning procedures are followed1.3 Instructions in the safe and effective use and care of <i>emergency control equipment</i> are documented and disseminated1.4 <i>Situations that could lead to workplace emergencies</i> are identified and recorded, and options for mitigating or avoiding these situations are formulated, tested and implemented
2. Manage emergency control equipment	<ul style="list-style-type: none">2.1 <i>Emergency control equipment maintenance requirements</i> are specified and managed2.2 Instructions and training are provided for on-site personnel in the care of emergency control equipment2.3 Equipment maintenance is audited for compliance2.4 Emergency control equipment is assessed for useability and accessibility and is reported according to workplace procedures2.5 Procedures are followed to correct emergency control equipment defects and deficiencies
3. Record and report emergency control equipment and faults	<ul style="list-style-type: none">3.1 Schedule for verifying and reporting faults is developed and implemented3.2 Details and nature of faults are recorded and where possible rectified3.3 Maintenance logs, records and tests are consulted and corrective action is verified3.4 Reports on faults verified are provided in a timely manner and contain recommendations for improving verified faults3.5 Frequency of occurrence of faults is monitored and reported according to workplace procedures
4. Monitor emergency control structures	<ul style="list-style-type: none">4.1 Currency, compliance and appropriateness of the workplace emergency plan are monitored4.2 Emergency control organisation activities are monitored to ensure they comply with workplace

ELEMENT

PERFORMANCE CRITERIA

emergency plans, relevant standards and are appropriate for the workplace

4.3 Advice is provided to emergency planning committee and emergency control organisation

4.4 Compliance with relevant standards and statutory requirements is checked and appropriate recommendations are made where compliance is an issue

4.5 Implementation of hazard analysis recommendations is monitored

4.6 Representation on the emergency planning committee and emergency control organisation is monitored according to the workplace emergency plan, relevant standards and statutory requirements

4.7 Recommendations and reports are provided to stakeholders

4.8 Training is provided and monitored in accordance with the workplace emergency plan and statutory requirements

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- analyse operational effectiveness of emergency control equipment
- apply emergency prevention principles
- implement emergency prevention solutions
- implement maintenance auditing and fault reporting procedures
- report emergency prevention problems and suggestions for correction

Required Knowledge

- characteristics, use and limitations of workplace emergency procedures and emergency control equipment
- maintenance requirements of workplace emergency procedures and emergency control equipment
- principles of emergency prevention
- relevant legislation and standards
- typical applications of emergency prevention

Evidence Guide

EVIDENCE GUIDE

EVIDENCE GUIDE

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Assessment must confirm the ability to ensure compliance of workplace emergency procedures, emergency control structures, equipment and other resources with relevant standards and statutory requirements

Consistency in performance

Competency should be demonstrated over time with a range of emergencies that could be expected in the workplace

Context of and specific resources for assessment

Context of assessment

Competency should be assessed in the workplace or in a simulated workplace

Specific resources for assessment

Access is required to:

- scenarios that reflect a range of emergency situations that may be expected in the workplace
- workplace emergency management plan
- workplace emergency procedures
- emergency control organisation policy documents
- emergency planning committee policy documents

Guidance information for assessment

Information that will assist or guide assessment will be written during Phase II of the Review of the PUA00 Public Safety Training Package.

Range Statement

RANGE STATEMENT

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Emergency prevention and control structures may include

Emergency control organisation
Emergency planning committee

Emergencies must include those emergencies identified by the workplace hazard analysis, which may include

Animal or livestock emergencies
Bomb threat
Building invasion/armed invasion
Chemical, biological and radiological
Civil disorder
Criminal acts
Cyclones, including storm surge
Deliberate self-harm
Earthquake
Failure of utilities
Fire
Flood
Hazardous substances incidents
Hostage situations
Industrial accident
Letter bomb
Medical emergency
Severe weather/storm damage
Structural instability
Terrorism
Transport accident
Toxic emission
Veterinary emergencies
Wildfire

Workplaces include

Workplaces, buildings and structures as outlined in

RANGE STATEMENT

	Australian Standard 37452002
Emergency prevention measures may include	Emergency control equipment Emergency evacuation systems Emergency protection systems
Emergency control equipment may include	Communications equipment Escape equipment Fire/smoke detection, alarm, mitigation and suppression systems First-aid kits Forcible entry tools Initial response firefighting equipment Isolation barriers Personal protection kits Shower and eyewash Spill control kits/equipment
Situations that could lead to workplace emergencies may include	Deficient or ineffective security arrangements Failure to follow safe practices Faults not being reported Fire/smoke hazards Poor housekeeping Unsafe practices Unsafe storage and handling of dangerous goods and hazardous materials Unsafe use of electrical or mechanical equipment
Emergency control equipment maintenance requirements will cover	Australian Standards Industry practices or needs identified as specific to the organisation or workplace Legislative requirements including codes of practice Manufacturers' guidelines

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.

Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the Required Skills and Knowledge and/or the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare for emergency situations	1.1 Current workplace emergency procedures to be used by employees and other workplace occupants are identified and followed 1.2 Emergency resources in the workplace are identified and located 1.3 Emergency response exercises are participated in according to workplace emergency procedures
2. Report emergencies and potential emergencies	2.1 Emergencies and potential emergencies are identified and reported according to workplace emergency procedures 2.2 People in any immediate danger from the emergency or potential emergency are alerted according to workplace emergency procedures
3. Respond to emergency warnings and advice	3.1 Emergency warnings and advice are responded to according to workplace emergency procedures 3.2 Instructions from emergency control response personnel are complied with during an emergency 3.3 Sources of additional information are identified and information is sought from relevant people if the situation is not clear
4. Evacuate from the work area	4.1 Need to evacuate from the work area is determined according to the level of immediate danger or instruction issued under the workplace emergency procedures 4.2 Work area is prepared for evacuation according to workplace emergency procedures and the nature of the emergency 4.3 Area of danger is evacuated according to workplace emergency procedures 4.4 Where it is safe to do so, assistance is provided to people who may require assistance 4.5 Evacuation procedures and instructions from emergency control organisation or emergency response personnel are followed 4.6 Alternative pathways or methods of evacuation are identified, assessed and chosen according to workplace emergency procedures if usual means of evacuation are blocked or endangered 4.7 Communication systems are used according to workplace procedures

ELEMENT

PERFORMANCE CRITERIA

|

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- communicate effectively in an emergency situation as outlined in the workplace emergency procedures
- identify an emergency/potential emergency

Required Knowledge

- circumstances where evacuation may need to be modified
- emergency reporting systems and procedures used on site
- emergency warning system, signals and instructions used on site
- evacuation alarms and workplace emergency procedures used at the workplace
- location of assembly areas and post-evacuation actions
- location of emergency equipment in the workplace
- procedures for reporting emergencies
- roles, responsibilities and authority of emergency personnel, emergency control organisation and emergency response team
- types of emergencies, the hazards and the evacuation actions associated with each one

Evidence Guide

EVIDENCE GUIDE

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- ability to relate to a range of people from a range of cultural, linguistic, social and ethnic backgrounds, and a range of physical and intellectual abilities
- apply methods of accounting for people
- assist people who need assistance
- carry out a search pattern within an area
- communicate clearly by the means specified in the workplace emergency procedures
- contribute to emergency management planning
- exercise leadership within a workplace emergency context
- use equipment assigned to assist with implementing the workplace emergency procedures

Required Knowledge

- arrangements for evacuating people who need support
- assessing and anticipating the progress of emergencies that might reasonably be expected in the workplace
- command, control and coordinate function of the emergency control organisation
- context of own role within the workplace emergency procedures
- emergency assessment and reporting procedures
- emergency reporting signals, alarms, warnings and procedures
- emergency response and operating procedures
- members of the emergency control organisation and their roles and responsibilities
- evacuation priorities
- hazard identification
- precautions to be taken during emergencies and during an evacuation
- methods of accounting for people during and after emergencies
- need to keep the relevant person informed of the developing situation
- post initial response emergency activities
- responses to meet the various situations
- workplace procedures

Evidence Guide

EVIDENCE GUIDE

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Assessment must confirm the ability to respond to emergency reports, signals and warnings appropriately; to supply clear directions under emergency conditions; to make decisions appropriate to the situation; to keep others appropriately informed; to respond according to the workplace emergency procedures; and to take on a leadership role consistent with the emergency control organisation

Consistency in performance

Competency should be demonstrated over time with a range of emergencies that could be expected in the workplace

Context of and specific resources for assessment

Context of assessment

Competency should be assessed in the workplace or in a simulated workplace

Specific resources for assessment

Access to scenarios that reflect a range of emergency situations that may be expected in the workplace

Guidance information for assessment

Elements describe the essential outcomes of a Unit of Competency.

Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the Required Skills and Knowledge and/or the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Initiate a system of emergency response planning	<p>1.1 A system of emergency alerting is planned, specified, implemented and maintained according to the workplace emergency plan, needs, resources and relevant legislation</p> <p>1.2 A means of alerting people to the need for evacuation or other <i>initial emergency response</i> is provided in accordance with relevant legislation or appropriate standards</p> <p>1.3 Emergency risk management process is developed and implemented according to legislative requirements and <i>relevant standards</i></p> <p>1.4 Emergency control organisation is established and trained to meet organisational needs and resources and the workplace emergency plan</p> <p>1.5 Resources required to support the effective operation of the emergency control organisation are identified and allocated</p>
2. Ensure emergency control organisation is in place	<p>2.1 Possible emergencies are identified and defined and plans are developed to deal with them</p> <p>2.2 Building plans are analysed for initial emergency response issues</p> <p>2.3 Emergency response procedures are based on emergencies identified in the hazard analysis</p>
3. Provide for initiation and control of initial emergency response	<p>3.1 Procedures for initiating and controlling the initial emergency response are developed, implemented and communicated according to workplace emergency procedures</p> <p>3.2 Suitable arrangements are established for the evacuation of <i>people who need assistance</i></p> <p>3.3 Plans provide for <i>assets</i> to be secured where safe to do so</p> <p>3.4 Plans provide for restricted access to the evacuated area</p> <p>3.5 Evacuation exercises are conducted to validate and amend the procedures as required</p> <p>3.6 A system to <i>account for all people during emergencies</i> is developed and implemented</p>
4. Provide for post initial response activities	<p>4.1 Priorities for evacuation and <i>post initial response activities</i> are put in place</p> <p>4.2 Need for post initial response activities is considered and discussed with emergency</p>

ELEMENT**PERFORMANCE CRITERIA**

	<p>services</p> <p>4.3 Possible post initial response activities and procedures are documented in workplace emergency procedures</p> <p>4.4 Workplace emergency procedures provide for initial emergency response activities being completed before post initial response activities are undertaken</p> <p>4.5 Workplace emergency procedures provide for recovery activities to be identified and developed, and their implementation to be facilitated</p>
<p>5. Plan and implement emergency control organisation training</p>	<p>5.1 Training needs are identified and documented</p> <p>5.2 Relevant training is developed, implemented and regularly reviewed according to workplace emergency plan, legislative requirements and relevant standards</p> <p>5.3 Training covers topics identified in the needs analysis before a person is assigned emergency duties, when those duties are changed, or when a significant change occurs to the risk of emergencies at the workplace</p> <p>5.4 Sufficient relevant refresher training, drills and exercises are conducted so that competencies needed by the workplace emergency initial response team are maintained</p> <p>5.5 Resources required for training are identified and provided</p> <p>5.6 Training provided reflects the needs of the workplace, the individuals and statutory requirements</p> <p>5.7 Qualified and experienced people are used to provide training</p> <p>5.8 Feedback on training is sought and used to improve future training</p>
<p>6. Provide advice and support for people in the post response and recovery phase</p>	<p>6.1 Provision is made for minimising adverse consequences to people involved, the environment and the organisation</p> <p>6.2 A process is provided for debriefing to be undertaken according to workplace procedures</p> <p>6.3 A process is provided for external support services to be accessed as necessary</p> <p>6.4 Provision is made for liaison with the media to</p>

ELEMENT

PERFORMANCE CRITERIA

be undertaken according to organisation procedures

6.5 Provision is made for appropriate reports to be completed and processed according to organisation procedures

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- analyse
- chair meetings
- manage projects
- manage risk
- plan

Required Knowledge

- characteristics, limitations and use of emergency alerting systems and procedures
- emergency alerting needs
- hazard identification and the precautions to be observed during emergencies
- legislative requirements
- methods/priorities in managing media responses in emergency situations
- organisation and its human resources
- people who may need assistance and the assistance they may require
- pre-planning procedures to allow for the conduct of post initial response activities
- roles and responsibilities under legislation of employers, managers, supervisors, employees and contractors
- requirements under relevant standards and codes of practice
- resources required to support an emergency control organisation
- systems for controlling the entry of visitors, contractors and staff during an emergency
- workplace emergency hazard analysis

Evidence Guide

EVIDENCE GUIDE

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Assessment must confirm the ability to plan and prepare for the range of possible emergencies as identified by the hazard analysis

RANGE STATEMENT**during emergencies may include**

Head counts
 Provisions for people evacuated outside normal working hours or during other unusual workplace situations that can be reasonably anticipated
 Provisions related to visitors, contractors and other staff
 Roll calls or checklists
 Tagging systems
 Visitor registers

Post initial response activities may include

Advice or requests for emergency services
 Assisting with recovery activities
 Assisting with authorised restoration of normal activity
 Participating in debriefing
 Providing advice
 Requests for emergency services or specialist response team
 Relocating or providing welfare services for evacuated persons
 Restricting entry to danger areas
 Searching floors or areas
 Security
 Supplying emergency equipment

Training may include

Briefings
 Coaching
 Drills or critiques
 Exercises
 Formal and informal training sessions
 Instructions
 Meetings
 Mentoring
 On-the-job and off-the-job training
 Regular testing

External support services may include

Unit Descriptor

Unit Descriptor

This unit covers the competency required to confine small workplace emergencies.

Small workplace emergencies may include such incidents as a small fire that can be controlled using a nearby fire extinguisher; or a chemical spill that can be controlled using workplace personal protective clothing and equipment, and a small spill kit; or a workplace vehicle accident where there is no significant injury or damage.

This unit:

- has been developed to cover the broad range of *emergencies* and *workplaces* as considered in Australian Standard 37452002
- is part of a suite of eleven workplace emergency response units of competency that has three streams
- is part of the initial response stream.

This unit does not cover the competency required for first aid; there are other units that cover first aid competence such as PUAEME001B Provide emergency care.

Application of the Unit

Application of the Unit

The application of this unit in the workplace - the environments, complexities and situations involved - will be written during Phase II of the Review of the PUA00 Public Safety Training Package.

This text will be useful for the purposes of job descriptions, recruitment advice or job analysis; where possible, it will not be too job specific to allow other industries to import it into other Training Packages, where feasible.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.

Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the Required Skills and Knowledge and/or the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare for emergency situations	1.1 Possible workplace emergency situations and appropriate responses, within the range of current skills and relevant workplace emergency procedures, are identified 1.2 Relevant <i>emergency resources</i> are identified and their location is ascertained in the work area 1.3 Any problems with the serviceability of the emergency resources are identified and reported to relevant people in accordance with workplace procedures
2. Identify and assess the emergency	2.1 Emergency situation or potential emergency situation and risks are identified and the likely effectiveness of initial response action is considered 2.2 Advice in relation to emergency situation is sought according to workplace emergency procedures 2.3 Where <i>initial response actions</i> are considered unsafe or inappropriate, action is taken according to workplace emergency procedures
3. Safely confine emergencies where possible	3.1 Emergencies are confined to the immediate area according to workplace emergency procedures 3.2 Emergency resources are used within the individual's limitations imposed by current skills, relevant workplace procedures and relevant legislative requirements 3.3 Emergency resources used to confine emergency situation are used in a manner that will promote and enhance safe work conditions
4. Use initial response equipment	4.1 <i>Initial response equipment</i> is checked to ensure its serviceability prior to use 4.2 Appropriate equipment is selected for use in emergency situations 4.3 Initial response equipment is used according to accepted safe practices and training 4.4 Use of equipment is coordinated with other emergency actions
5. Report workplace emergency response	5.1 Emergency situation response is documented and reported in accordance with workplace procedures 5.2 Use of initial response equipment is documented

ELEMENT

PERFORMANCE CRITERIA

and reported according to workplace procedures

5.3 Initial response equipment is marked or positioned after use and reported to relevant personnel or authority to indicate if it requires servicing or replacing

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- communicate in an effective manner
- give and follow instructions
- implement workplace procedures
- re-stow initial response equipment
- risk management
- use initial response equipment

Required Knowledge

- actions to be followed when initial response action is not safe
- appropriate initial response equipment
- facilities that may be used to confine emergencies
- hazards involved with initial response action
- implications of the incorrect use of equipment
- limitations of initial response equipment
- limitations of use of emergency control equipment or facilities
- methods of extinguishment
- safe use of initial response equipment
- situations that must not be responded to because of the risk
- types of emergencies
- workplace procedures

Evidence Guide

EVIDENCE GUIDE

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Assessment must confirm the ability to correctly identify the type of emergency that has occurred; to identify and take action to avoid or control any associated hazards; to use initial response equipment and techniques to safely and effectively control or contain the emergency

Consistency in performance

Competency should be demonstrated over time with a range of emergencies that could be expected in the workplace using initial response equipment

Context of and specific resources for assessment

Context of assessment

Competency should be assessed in a simulated environment under conditions that safely replicate workplace emergency situations

Specific resources for assessment

Access to scenarios that reflect a range of emergency situations that may be expected in the workplace

Guidance information for assessment

Information that will assist or guide assessment will be written during Phase II of the Review of the PUA00 Public Safety Training Package.

Range Statement

RANGE STATEMENT

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Emergencies must include those emergencies identified by the workplace hazard analysis where the impact on the work area is limited, which may include

Animal or livestock emergencies
 Bomb threat
 Building invasion/armed invasion
 Chemical, biological and radiological
 Civil disorder
 Criminal acts
 Cyclones, including storm surge
 Deliberate self-harm
 Earthquake
 Failure of utilities
 Fire
 Flood
 Hazardous substances incidents
 Hostage situations
 Industrial accident
 Letter bomb
 Medical emergency
 Severe weather/storm damage
 Structural instability
 Terrorism
 Transport accident
 Toxic emission
 Veterinary emergencies
 Wildfire

Workplaces include

Workplaces, buildings and structures as outlined in Australian Standard 37452002

Emergency resources may include

Personal access bar codes/swipe cards
 Barricades

RANGE STATEMENT

	<ul style="list-style-type: none"> Communication systems Fire protection equipment First-aid kits Mechanical ventilation and air handling equipment Personal protective equipment Spill control kits Surveillance equipment Warning signs
Initial response action may include	<ul style="list-style-type: none"> Activation of response team Activation of suppression systems Alerting others Containing the emergency Evacuating the area Removing people from danger Removing the emergency Rendering basic aid as required Shut down procedures Use of containment systems Use of portable fire extinguishers, fire blankets or hose reels
Checking initial response equipment may include	<ul style="list-style-type: none"> Manufacturers'/company instructions Relevant standards Workplace procedures Written instructions
Documentation and records may be used to	<ul style="list-style-type: none"> Ensure equipment is restored to service Initiate incident investigations Record details of emergencies Report follow-up action Review own actions/performance appraisal Upgrade initial response equipment or procedures
Marking or positioning equipment after use may	<ul style="list-style-type: none"> Correctly disposing of contaminated spill absorbent

Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare for workplace emergencies	<p>1.1 <i>Emergency equipment</i> assigned for use by the initial response team is stored and maintained in a safe, accessible and serviceable state</p> <p>1.2 Current workplace emergency procedures to be used by employees are identified and accessed</p> <p>1.3 Risk assessment of initial response team activities is undertaken according to workplace procedures</p> <p>1.4 Initial response team training activities are undertaken according to workplace emergency procedures and relevant legislation</p>
2. Respond to workplace emergencies	<p>2.1 Emergency is responded to according to workplace emergency procedures</p> <p>2.2 Emergency situation is assessed for hazards and appropriate <i>precautions</i> against those <i>hazards</i> are implemented</p> <p>2.3 Identified hazards are reported to people in danger and the initial response team leader</p> <p>2.4 Instructions from the initial response team leader are confirmed and implemented safely and promptly</p> <p>2.5 Appropriate equipment is selected and operated according to workplace emergency procedures</p> <p>2.6 Situation is contained to the extent necessary to prevent an escalation of the emergency and to enable emergency services and specialist response team activity to be completed safely</p>
3. Communicate with and complement other personnel	<p>3.1 Effective communication with initial response team members and initial response team leader is constantly maintained</p> <p>3.2 Activities are consistent with the initial response team leader's plan of action and support the work of other initial response team members</p> <p>3.3 Activities support the actions of <i>other initial response teams</i></p> <p>3.4 Any injuries, accidents or near misses involving team members are reported to the team leader</p>
4. Assist with recovery from workplace emergencies	<p>4.1 Evidence relating to the cause, origin and progress of the emergency is preserved and recorded as far as possible</p> <p>4.2 Appropriate assistance is provided in accordance</p>

ELEMENT

PERFORMANCE CRITERIA

- with the workplace emergency procedures
- 4.3 Emergency equipment is returned to a state of readiness as soon as is reasonably practicable
- 4.4 Debriefings are attended and participated in as appropriate

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- access and use protective clothing and equipment safely and effectively under emergency conditions
- communication skills during emergencies
- care for protective clothing and equipment
- interpret and respond to alarm systems
- re-stow initial response equipment

Required Knowledge

- alarm systems and associated equipment
- appropriate personal protective clothing and equipment
- concept of dynamic risk assessment
- equipment operating characteristics, limitations, hazards, precautions, procedures and general care
- general emergency priorities and strategies
- hazard analysis
- hazards and the precautions necessary during control activities
- procedures for responding to alarms
- survival, rescue and recovery procedures
- tactics for safely handling specific emergencies
- workplace emergency procedures

Evidence Guide

EVIDENCE GUIDE

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Assessment must confirm the ability to be prepared for a safe and prompt response to a workplace emergency; to identify hazards and implement appropriate precautions; to use equipment safely and effectively; and to work as a team member safely and effectively under the direction of a workplace emergency initial response team leader

Consistency in performance

Competency should be demonstrated over time with a range of emergencies that could be expected in the workplace, including dealing with plausible contingencies

Context of and specific resources for assessment

Context of assessment

Competency should be assessed in a simulated environment under conditions that safely replicate workplace emergency situations

Specific resources for assessment

Access to:

- scenarios that reflect a range of emergency situations that may be expected in the workplace
- material safety data sheets
- workplace register of hazardous substances

Guidance information for assessment

Information that will assist or guide assessment will be written during Phase II of the Review of the PUA00 Public Safety Training Package.

Range Statement

RANGE STATEMENT

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Emergency services or specialist response teams may include

Ambulance/medical services
 Coast guard
 Defence workplace response teams
 Fire services
 Organisational specialist response team
 Organisations identified as response or support agencies as defined in the appropriate state/territory and/or commonwealth legislation
 Other external agencies such as hazmat teams, bomb squads, animal rescue services
 Police services
 Relevant state/territory and commonwealth authorities (such as environmental protection)
 Rescue services

Emergencies must include those emergencies identified by the workplace hazard analysis, which may include

Animal or livestock emergencies
 Bomb threat
 Building invasion/armed invasion
 Chemical, biological and radiological
 Civil disorder
 Criminal acts
 Cyclones, including storm surge

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.

Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the Required Skills and Knowledge and/or the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare the team for workplace emergencies	<p>1.1 <i>Pre-incident planning</i> sessions are conducted to familiarise team members with relevant workplace procedures and safe and effective actions to control workplace emergencies according to relevant legislative requirements</p> <p>1.2 Processes are developed and implemented to ensure the competence of team members is developed and maintained</p> <p>1.3 Discussions, practice drills and exercises are conducted in accordance with workplace emergency procedures</p> <p>1.4 <i>Emergency equipment</i> is confirmed to be in a serviceable and accessible condition in accordance with standard/operating procedures</p>
2. Coordinate the response to control workplace emergencies	<p>2.1 Initial response team is made aware of the workplace emergency</p> <p>2.2 Team's response to the emergency is coordinated according to workplace emergency procedures, risk assessment and available resources</p> <p>2.3 Situation and its likely development is constantly assessed, <i>hazards</i> are identified and appropriate <i>precautions</i> are applied and maintained to safeguard team members</p> <p>2.4 Appropriate actions to safely control the emergency are selected, and <i>contingency plans</i> are developed and implemented if needed</p> <p>2.5 Instructions to implement selected actions are conveyed to team members in a clear manner and confirmed with them</p> <p>2.6 Actions chosen for the team to implement are consistent with available resources and the priority order of safely protecting self, other people and property where safe to do so</p> <p>2.7 Team actions are monitored, recorded and adjusted if needed to ensure safe and appropriate action is maintained</p>
3. Communicate with and coordinate personnel	<p>3.1 Effective communication with team members is constantly maintained according to communication systems</p> <p>3.2 Activities are consistent with the workplace emergency procedures and team members'</p>

ELEMENT**PERFORMANCE CRITERIA****4. Lead team's recovery from workplace emergencies**

- actions are coordinated
- 3.3 Team members' actions are coordinated with the activities of *other initial response teams*
- 3.4 On arrival incident controller is briefed and control is transferred to the appropriate emergency services/specialist response team
- 3.5 Liaison is established with the responding emergency services or specialist response team, and all relevant information and support is provided to them
- 4.1 Team actions are coordinated to prevent a re-occurrence of the emergency and to enable recovery activities to be commenced safely
- 4.2 Appropriate assistance is coordinated, within the scope of the workplace emergency procedures
- 4.3 Equipment is checked, serviced and stored, replaced or disposed of, to ensure its readiness for use
- 4.4 Any injuries, accidents or near misses involving the team are reported and critical incident support services for the team are requested in accordance with relevant regulatory requirements
- 4.5 A debriefing of the team is conducted and an incident report is prepared and submitted according to workplace procedures

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the Required Skills and Knowledge and/or the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Establish and maintain initial response teams	<p>1.1 Role, authority, structure and scope of the team are negotiated with the management of the workplace and are clearly defined and documented in the workplace emergency procedures</p> <p>1.2 An appropriate and effective <i>system for alerting initial response team members</i> to an emergency is developed, demonstrated to members and regularly tested</p> <p>1.3 An appropriate business plan and budget are developed and maintained for the initial response team</p> <p>1.4 Workplace emergency systems and procedures are audited for compliance</p>
2. Provide appropriate information and procedures	<p>2.1 Risk assessment relevant to the expected activities of the initial response team is conducted at intervals relevant to the levels of risk</p> <p>2.2 Possible <i>hazards</i> are identified, and appropriate controls for those hazards are developed and implemented</p> <p>2.3 Relevant, current information is provided to the initial response team about its role, authority, structure, scope, equipment, training</p> <p>2.4 Workplace emergency procedures are developed, provided to appropriate people and regularly reviewed</p> <p>2.5 <i>Pre-incident planning</i> information about the current layout of the workplace and key features relevant to emergencies is provided to the initial response team in an accessible form</p> <p>2.6 Members of the initial response team and emergency control organisation are consulted and encouraged to participate in the development and review of relevant workplace emergency procedures</p>
3. Make recommendations for the provision of appropriate emergency equipment and manage its maintenance	<p>3.1 Recommendations are made for the acquisition of <i>emergency equipment</i> appropriate to the role and scope of the initial response team</p> <p>3.2 Safe operating procedures, based on risk assessment and manufacturers' instructions, are developed and communicated to initial response</p>

ELEMENT**PERFORMANCE CRITERIA**

	<p>team</p> <p>3.3 Appropriate arrangements are made for the storage of emergency equipment in a location that is safe, convenient and readily accessible to initial response team</p> <p>3.4 Appropriate arrangements are made to ensure emergency equipment is maintained in an accessible and serviceable condition, according to relevant standards and/or the manufacturers' instructions</p> <p>3.5 Appropriate personal protective equipment, and information about its characteristics, limitations, safe use and care, are provided to each member of the initial response team</p>
<p>4. Arrange appropriate training for the initial response teams</p>	<p>4.1 Training and assessment is arranged before a person is assigned initial response duties</p> <p>4.2 Training is arranged according to the needs analysis to ensure currency of competence and where the duties or risks within the workplace change</p> <p>4.3 Arrangements are made for the effective scheduling, promoting, reporting and recording of training</p> <p>4.4 Feedback on performance during training is used to validate and improve the training</p>
<p>5. Monitor and report on effectiveness of the initial response teams</p>	<p>5.1 Initial response team is regularly audited and reviewed for relevance and ability of the workplace to implement the system</p> <p>5.2 Status of the initial response team and emergency control system is reported to management on a regular basis</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- assess resources needed by workplace emergency initial response teams
- communicate and consult effectively with a range of agencies, professions and advisers
- conduct meetings
- deal with conflict
- develop procedures
- leadership
- manage and conduct risk assessments/analysis
- negotiation
- plan and promote training
- relate to a range of people from a range of cultural, linguistic, social and ethnic backgrounds, and a range of physical and intellectual abilities
- select team members
- write reports for a range of audiences including senior management and external agencies

Required Knowledge

- appropriate personal protective clothing and equipment
- audit management systems
- emergency warning systems
- equipment operating characteristics, limitations, hazards, precautions, procedures and general care
- general emergency priorities and strategies
- hazards and relevant precautions
- how people react in emergency situations
- maintenance management systems
- situational awareness
- statutory and legislative requirements
- tactics for safely handling specific emergencies
- training management systems
- workplace emergency management plan

Evidence Guide

EVIDENCE GUIDE

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Assessment must confirm the ability to conduct a risk assessment; to identify hazards; to implement controls effectively; and to audit all processes. There should also be clear evidence of a systematic approach to managing the workplace emergency initial response team

Consistency in performance

Competency should be demonstrated over time with a range of emergencies and workplace emergency team management issues that could be expected in the workplace

Context of and specific resources for assessment

Context of assessment

Competency should be assessed in the workplace or in a simulated workplace

Specific resources for assessment

Access is required to scenarios that reflect a range of emergency situations that may be expected in the workplace

Guidance information for assessment

Information that will assist or guide assessment will be written during Phase II of the Review of the PUA00 Public Safety Training Package.

Range Statement

RANGE STATEMENT

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Emergency services or specialist response teams may include

Ambulance/medical services
 Coast guard
 Defence workplace response teams
 Fire services
 Organisational specialist response team
 Police services
 Relevant state/territory and commonwealth authorities (such as environmental protection)
 Rescue services
 Organisations identified as response or support agencies as defined in the appropriate state/territory and/or commonwealth legislation
 Other external agencies such as hazmat teams, bomb squads, animal rescue services

Emergencies must include those emergencies identified by the workplace hazard analysis, which may include

Animal and livestock emergencies
 Bomb threat
 Building invasion/armed invasion
 Chemical, biological and radiological
 Civil disorder
 Criminal acts
 Cyclones, including storm surge
 Deliberate self-harm
 Earthquake
 Failure of utilities
 Fire
 Flood
 Hazardous substances incidents
 Hostage situations
 Industrial accident

RANGE STATEMENT

	Letter bomb
	Medical emergency
	Severe weather/storm damage
	Structural instability
	Terrorism
	Transport accident
	Toxic emission
	Veterinary emergencies
	Wildfire
Workplaces include	Workplaces, buildings and structures as outlined in Australian Standard 37452002
Systems for alerting initial response team members may include	Computer screen alert Emergency warning system Fire alarm system Radio, telephone or pager system
Hazards may include	Chemical, biological, radiological Climatic Electrical Environmental Explosive Fire Mechanical Psychological (eg critical incident stress) Noise related Security related Storm/flood Structural Thermal Wildlife related
Pre-incident planning may include	Contingency plans, sketches or notes about workplace layout, features, hazards and emergency control facilities

RANGE STATEMENT

	Discussions and/or use of operational procedures involving emergency plans, sketches, notes, procedures or material safety data sheets
Emergency equipment may include	Emergency vehicles, trailers, trolleys or caches Fire protection equipment Forcible entry tools Life support equipment Monitors (or turrets) Personal protective clothing and equipment Rescue equipment Spill or leak control kits
Management may include	Board chairperson Board of directors Chief executive officer Executive officer/director General manager

Unit Sector(s)

Not applicable.

Corequisite Unit/s

Co-requisite Unit/s Nil

RIISAM203A Use hand and power tools

Modification History

Not applicable.

Unit Descriptor

This unit covers the use of hand and power tools in resources and infrastructure industries. It includes planning and preparing for work, selecting and using hand tools and power tools, and cleaning up.

Application of the Unit

This unit is appropriate for those working in operational, service or maintenance roles, at worksites within:

- Civil construction
- Coal mining
- Drilling
- Extractive industries
- Metalliferous mining

Licensing/Regulatory Information

Refer to Unit Descriptor.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

<p>Elements describe the essential outcomes of a unit of competency.</p>	<p>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</p>
--	---

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Plan and prepare	1.1. Access, interpret and apply compliance documentation relevant to the use of hand and power tools 1.2. Obtain, confirm and apply work instructions for the allotted task 1.3. Obtain, confirm and apply safety requirements from the site safety plan and organisational policies and procedures relevant to the allotted task 1.4. Identify, confirm and apply environmental protection requirements for the allotted task from the project environmental management plan
2. Select and use hand tools	2.1. Select hand tools consistent with needs of the job 2.2. Check tools for serviceability and safety, and report faults 2.3. Clamp or fix materials in position 2.4. Use hand tools safely and effectively according to their intended use 2.5. Safely locate hand tools when not in immediate use
3. Select and use power tools	3.1. Select power tools and equipment consistent with needs of job and in accordance with standard work practice, and report any faults 3.2. Check tools for serviceability and safety, and report faults 3.3. Visually check power leads/hoses for serviceability/safety in accordance with the site safety plan 3.4. Clear route for safe placement of leads/hoses of identified hazards 3.5. Run electrical power leads to power supply so they are clear of traffic or covered where possible 3.6. Connect electric power leads to the power board or direct to power tool 3.7. Run air hoses out to the compressed air supply and covered where potential trip

	<p>hazards exist</p> <p>3.8. Connect hose to power tool and air supply</p> <p>3.9. Clamp or fix material in position for power tool application where applicable</p> <p>3.10. Use power tools safely and effectively in application processes</p> <p>3.11. Locate power tools safely when not in use</p>
4. Clean up	<p>4.1. Clear work area and dispose of or recycle materials in accordance with project environmental management plan</p> <p>4.2. Clean, check, maintain and store machinery, tools and equipment in accordance with manufacturer's recommendations and standard work practices</p>

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

Specific skills are required to achieve the performance criteria in this unit, particularly for the application in the various circumstances in which this unit may be applied. This includes the ability to carry out the following as required to use hand and power tools:

- apply legislative, organisation and site requirements and procedures
- speak clearly and directly, listening carefully to instructions and information
- interpret and understand the information required for the preparation and application of hand and power tools, including work instructions, quality assurance procedures, manufacturer's instructions, materials safety data sheets and equipment
- apply teamwork to a range of situations, particularly in a safety context
- solve problems particularly in teams and in dealing practically with safety issues
- show initiative in adapting to changing work conditions or contexts particularly when working across a variety of work placements
- manage time, particularly in organising priorities and planning work including the scheduling and use of equipment, materials and tools to avoid back tracking and re work
- take responsibility for self organisation of work priorities
- show a willingness to learn and to use a range of mediums to learn
- use technology related to determining requirements, the planning and application of hand and power tools, including the use of calculations, mechanical equipment and the reporting/recording of results

Required knowledge

Specific knowledge is required to achieve the Performance Criteria of this unit, particularly its application in a variety of circumstances in which the unit may be used. This includes knowledge of the following, as required to use hand and power tools:

- site and equipment safety requirements
- hand tools and their application
- portable power tools and their application
- power sources
- materials commonly used in the industry
- equipment types, characteristics, technical capabilities and limitations
- operational, maintenance and basic diagnostic procedures
- materials safety data sheets (MSDS) and materials handling methods
- project quality requirements
- industry and worksite terminology
- electrical and compressed air safety
- JSA's/safe work method statement

Evidence Guide

<p>The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
<p>Overview of assessment</p>	
<p>Critical aspects for assessment and evidence required to demonstrate competency in this unit</p>	<p>The evidence required to demonstrate competency in this unit must be relevant to worksite operations and satisfy all of the requirements of the performance criteria, required skills and knowledge and the range statement of this unit and include evidence of the following:</p> <ul style="list-style-type: none"> • knowledge of the requirements, procedures and instructions for the use of hand and power tools • implementation of requirements, procedures and techniques for the safe, effective and efficient use of hand and power tools • working with others to undertake the use of hand and power tools that meets all of the required outcomes • consistent timely use of hand and power tools that safely, effectively and efficiently meets the required outcomes
<p>Context of and specific resources for assessment</p>	<ul style="list-style-type: none"> • This unit must be assessed in the context of the work environment. Where personal safety or environmental damage are limiting factors, assessment may occur in a simulated environment provided it is realistic and sufficiently rigorous to cover all aspects of workplace performance, including task skills, task management skills, contingency management skills and job role environment skills. • The assessment environment should not disadvantage the participant. For example, language, literacy and numeracy demands of assessment should not be greater than those required on the job. • Customisation of assessment and delivery environment to sensitively accommodate cultural diversity. • Aboriginal people and other people from a non English speaking background may have second language issues.

	<ul style="list-style-type: none"> • Assessment of this competency requires typical resources normally used in the work environment. Selection and use of resources for particular worksites may differ due to site circumstances. • Where applicable, physical resources should include equipment modified for people with disabilities. • Access must be provided to appropriate learning and/or assessment support when required.
Method of assessment	<p>This unit may be assessed in a holistic way with other units of competency. The assessment strategy for this unit must verify required knowledge and skill and practical application using more than one of the following assessment methods:</p> <ul style="list-style-type: none"> • written and/or oral assessment of the candidate's required knowledge • observed, documented and/or first hand testimonial evidence of the candidate's: <ul style="list-style-type: none"> • implementation of appropriate requirement, procedures and techniques for the safe, effective and efficient achievement of required outcomes • consistently achieving the required outcomes • first hand testimonial evidence of the candidate's: <ul style="list-style-type: none"> • working with others to undertake the use of hand and power tools
Guidance information for assessment	Consult the SkillsDMC User Guide for further information on assessment including access and equity issues.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<p>Relevant compliance documentation may include:</p>	<ul style="list-style-type: none"> • legislative, organisation and site requirements and procedures • manufacturer's guidelines and specifications • Australian standards • code of practice • Employment and workplace relations legislation • Equal Employment Opportunity and Disability Discrimination legislation
<p>Work instructions may include:</p>	<ul style="list-style-type: none"> • verbal or written and graphical instructions, signage, work schedules/plans/specifications, work bulletins, charts and hand drawings, memos, materials safety data sheets (MSDS) and diagrams or sketches • plans and specifications • quality requirements, including: dimensions and tolerances, standards of work and material standards • safe work procedures or equivalent related to using hand and power tools
<p>Safety requirements may include:</p>	<ul style="list-style-type: none"> • protective clothing and equipment • use of tools and equipment • workplace environment and safety • handling of materials • use of fire fighting equipment • use of First Aid equipment • hazard control • hazardous materials and substances • personal protective equipment • emergency procedures related to equipment operation which may include <ul style="list-style-type: none"> • emergency shutdown and stopping • extinguishing equipment fires • organisational First Aid requirements and • evacuation

<p>Environmental protection requirements may include:</p>	<ul style="list-style-type: none"> • organisational/project environmental management plan • waste management • water quality protection • noise • vibration • dust and • clean-up management
<p>Hand tools are to include but not be limited to:</p>	<ul style="list-style-type: none"> • cramps • vices • adjustable spanners • crow bars • pinch bars • bolt cutters • brooms • chisels • hacksaws • handsaws • hammers • measuring tapes • axes • rakes • hand augers • picks • mattocks • pliers • shovels • spades • sledge hammers • spanners • wrenches • spirit levels and • wire cutters
<p>Checking tools is to include:</p>	<ul style="list-style-type: none"> • checking of electrical safety/inspection tag for currency • equipment defect identification • assessment of conditions and hazards and determination of work requirements
<p>Materials are:</p>	<ul style="list-style-type: none"> • to include those associated with the use of hand and power tools
<p>Power tools may include those</p>	<ul style="list-style-type: none"> • 240 volt electricity • compressed air

powered by but not limited to:	<ul style="list-style-type: none"> • battery driven and • hydraulics
Power tools are to include:	<ul style="list-style-type: none"> • kanga hammers • cut off saws • drills • screwdrivers • angle grinders • pneumatic wrenches • impact hammers • tampers • rotary hammers/drills • circular saws • planers • sanders and • scalers
Equipment is to include:	<ul style="list-style-type: none"> • power leads and • safety switches and • may include air hoses

Unit Sector(s)

Service and Maintenance

Competency field

Refer to Unit Sector(s).

Co-requisite units

Not applicable.

RTC2304A Operate and maintain chainsaws

Modification History

Not applicable.

Unit Descriptor

This competency standard covers the maintenance, preparation and operation of hand-held chainsaws in a work environment. It requires the application of skills and knowledge to cross-cut fallen timber using appropriate cutting techniques to maximise volume and quality recovery. It also requires knowledge of licensing and OHS legislative requirements associated with chainsaw operation along with duty of care to self, others and the environment. The work in this standard is likely to be carried out under routine supervision with intermittent checking within enterprise guidelines.

This competency standard covers the maintenance, preparation and operation of hand-held chainsaws in a work environment. It requires the application of skills and knowledge to cross-cut fallen timber using appropriate cutting techniques to maximise volume and quality recovery. Elements and Performance Criteria

Elements and Performance Criteria

Element	Performance Criteria
1 Recognise and apply workplace safety procedures	1.1 OHS procedures relevant to the maintenance and operation of chainsaws are recognised and applied according to enterprise requirements .
	1.2 Hazards in the work area are identified and controlled according to OHS and enterprise requirements.
	1.3 Suitable personal protective equipment is selected, used, maintained and stored according to OHS and enterprise requirements.
	1.4 Relevant licensing and legislative requirements with regard to the operation of chainsaws are recognised and accessed.
2 Check and maintain chainsaw	2.1 Tools and materials required for maintenance procedures are selected, checked and confirmed against maintenance plan .
	2.2 Routine checks and maintenance procedures are conducted prior to operation and according to manufacturers specifications and maintenance plan.
	2.3 Chainsaw faults or malfunctions are identified, tagged and reported for repair according to OHS and enterprise requirements.
	2.4 Completed chainsaw maintenance procedures are detailed and recorded according to enterprise requirements.
3 Operate chainsaw	3.1 A safe working site is maintained and sawing materials identified and positioned for operation according to OHS and enterprise guidelines.
	3.2 Risks to self, others and the environment are recognised and controlled according to OHS and enterprise requirements.
	3.3 Cutting methods are determined appropriate to species of material, and chainsaw is operated according to manufacturers specifications and

- enterprise requirements.
- 3.4 Effective **worksite communication** is maintained to ensure efficient workflow and address immediate problems.
 - 3.5 **Environmental implications** associated with chainsaw operation are identified, assessed and controlled according to enterprise requirements.
- 4 Complete and check chainsaw operation
- 4.1 Chainsaw damage, malfunctions or irregular performance are recorded and reported according to enterprise requirements.
 - 4.2 Chainsaw is cleaned, maintained and stored according to manufacturers specifications and enterprise requirements.
 - 4.3 Relevant **reports** are maintained to industry standards according to enterprise requirements.
 - 4.4 Personal protective equipment is cleaned, maintained and stored.

Required Skills and Knowledge

Not applicable.

Evidence Guide

What evidence is required to demonstrate competence for this standard as a whole?

Competence in this standard requires evidence of the ability to demonstrate safe workplace practices in the preparation of a suitable worksite, perform cross-cutting operations, and conduct routine pre-operational checks and maintenance of a range of hand-held chainsaws. It also requires the ability to communicate effectively, recognise and control hazards, implement risk control measures, apply basic mathematical procedures such as estimation and measurement, and monitor and maintain relevant enterprise records. The skills and knowledge required to operate and maintain chainsaws must be **transferable** to a different work environment. For example, this could include different types of timber, environments and chainsaws.

What specific knowledge is needed to achieve the performance criteria?

Knowledge and understanding are essential to apply this standard in the workplace, to transfer the skills to other contexts and to deal with unplanned events. The knowledge requirements for this competency standard are listed below:

Relevant State/Territory legislation and regulations with regard to the operation of chainsaws.

OHS legislative requirements and Codes of Practice.

Hazards and risks when using chainsaws.

Operating principles and operating methods.

Various types of chainsaws and respective functions.

Effects of timber defects on recovery.

Environment Codes of Practice with regard to chainsaw operation.

What specific skills are needed to achieve the performance criteria?

To achieve the performance criteria, appropriate literacy and numeracy levels as well as some complementary skills are required. These include the ability to:

Safely cross-cut fallen timber using compression and tension cuts with a hand held chainsaw.

Maximise volume and quality of recovery.

Demonstrate safe and environmentally responsible workplace practices.

Obtain relevant licences and permits.

Read and interpret manufacturers specifications, work and maintenance plans, and MSDSs.

Effectively communicate information, interpret and apply task instructions, and maintain records and reports.

Estimate and measure dimensions, and calculate volumes.

What processes should be applied to this competency standard?

There are a number of processes that are learnt throughout work and life, which are required in all jobs. They are fundamental processes and generally transferable to other work functions. Some of these are covered by the **key competencies**, although others may be added. The questions below highlight how these processes are applied in this competency standard. Following each question a number in brackets indicates the level to which the key competency needs to be demonstrated where 0 = not required, 1 = perform the process, 2 = perform and administer the process and 3 = perform, administer and design the process.

1. How can **communication of ideas and information** (1) be applied? Information with regard to chainsaws, their application and cutting methods may be discussed with the supervisor and others in the work group.
2. How can **information be collected, analysed and organised** (1)? Information with regard to chainsaw performance, faults and maintenance requirements may be detailed and monitored for analysis, and organised by records and reports.
3. How are **activities planned and organised** (2)? Checks and maintenance activities may be planned and coordinated around work schedules or sequenced as required.
4. How can **team work** (1) be applied? Team work may be applied in the communication and coordination of tasks to achieve specified work requirements.
5. How can the use of **mathematical ideas and techniques** (2) be applied? Mathematics may be applied in the calculation and measurement of fuel consumption and volume dimensions.
6. How can **problem-solving skills** (2) be applied? Chainsaw malfunctions or breakdown will require arrangements for repair or replacement to meet work requirements.
7. How can the **use of technology** (1) be applied? To communicate, record operational records, and troubleshoot chainsaw performance problems.

Are there other competency standards that could be assessed with this one?

This competency standard **could** be assessed on its own or in combination with other competencies relevant to the job function.

There is essential information about **assessing this competency standard for consistent performance and where and how it may be assessed**, in the Assessment Guidelines for this Training Package. All users of these competency standards must have **access** to both the **Assessment Guidelines** and the relevant **Sector Booklet**.

Range Statement

Range of Variables

The Range of Variables explains the range of contexts within which the performance and knowledge requirements of this standard may be assessed. The scope of variables chosen in training and assessment may depend on the work situations available

What **OHS** requirements may be relevant to this standard?

Safe systems and procedures for:

operating and maintaining chainsaws

hazard and risk control

manual handling including lifting and carrying

handling, application and storage of hazardous substances

outdoor work including protection from solar radiation, dust and noise

the appropriate use, maintenance and storage of personal protective equipment.

It may also include systems to ensure the assessment of workers safety skills, compliance with enterprise OHS induction, and the provision of appropriate training programs.

What types of **chainsaws** may be applicable to this standard?

Types may include engine or electrically operated hand-held chainsaws including top handle chainsaws and pole saws.

What **enterprise requirements** may be applicable to this standard?

Standard Operating Procedures (SOPs), industry standards, production schedules, Material Safety Data Sheets (MSDSs), work notes and plans, product labels, manufacturers specifications, operators' manuals, enterprise policies and procedures (including waste disposal, recycling and re-use guidelines), and supervisors oral or written instructions.

What **hazards** may be associated with chainsaw operation?

Hazards may include exposure to loud noise and exhaust fumes, cutting of treated timbers, solar radiation, dust, mechanical vibration, vibration injury, struck by tree or tree limbs, kick back from saw, presence of dangerous insects and spiders, hazardous substances (fuel), the presence of bystanders,

	livestock and wildlife, adverse weather conditions and confined spaces.
What personal protective equipment may be relevant to this standard?	PPE may include steel cap boots, hard hat, ear protection, protective eyewear, hearing protection, cut resistant trousers or chaps, reflective vest, gloves, helmets with face masks, and sun protection (e.g., sun hat, sunscreen).
What information might be included in a maintenance plan ?	This may include details of scheduled pre-operational checks and maintenance procedures, designated job tasks, selection of equipment, resources and materials to be used, supervisors instructions, timeframe for work completion, and reporting requirements.
What might be involved in routine checks and maintenance procedures?	This may include pre-start checks, inspections of chainsaw body, chain guards and chain sprockets, checks of air filters and spark plugs, checks and adjustments of chain tension, oil and fuel, and the replacement of worn or faulty parts. It may also include an assessment of saw sharpness.
What are the requirements for a safe working site ?	A level and clear surface on which to cut the material, and the regular removal of off-cuts and other debris during sawing operations to maintain surfaces and worksite.
What sawing materials may be identified and positioned?	Sawing materials may include logs and packs of timber (hardwood or softwood), and may range in size and weight. Preparation involves the safe lifting of the material to be sawed onto a clear and level surface and securing into position with chains or wedges.
What risks may be associated with the operation of chainsaws?	This may include 'kickback' which is a sudden upward and backward movement of the saw which occurs when the tip of the bar nose makes contact with the sawing material. To prevent kickback, ensure chainsaw is fitted with an inertia-activated chain break, ensure the break mechanism is clean and operates effectively, use low-kickback chain types and avoid lowering the depth gauges too much when sharpening. Risks may also include being stuck by tree or limb, vibration

injury from poorly maintained chainsaw, permanent hearing loss, cutting above shoulder height, handling the chainsaw with one hand, and fire risk as a result of fuel spillage or sparks.

What **cutting methods** and procedures may be considered?

Types of cutting techniques may include bridging, swinging, boring, limbing and horizontal cuts. Procedures may involve a visual assessment of the sawing material for defects, the selection of cutting positions and patterns to minimise capping and splitting, and maximise volume and quality of recovery.

Who might be involved in the facilitation of **worksite communication**?

This may include the supervisor and other workers.

What **environmental implications** may be associated with the operation of chainsaws?

Negative environmental impacts may result from excessive noise and exhaust emissions, the incorrect use and disposal of maintenance debris (oils and oil containers), and hazardous substances (fuel).

What **reports** may be recorded and maintained?

This may include production and tally sheets, quality forms, production sheets, mandatory or statutory inspections, maintenance outcomes, faults, malfunctions and damage details, and hazard and incident reports.

For more information on contexts, environment and variables for training and assessment, refer to the Sector Booklet.

RTC3218A Undertake a site assessment

Modification History

Not applicable.

Unit Descriptor

This competency standard covers the process of undertaking a site assessment as part of preliminary tasks leading to the development of a landscape or project design. It requires the ability to identify the purpose for site assessment, collect and collate base information, prepare for the site visit, undertake a site inspection, and document information. Undertaking a site assessment requires knowledge of map reading, soil properties, plant recognition, and environmental threats and problems. Undertaking a site assessment is likely to occur under limited supervision from others with checking only related to overall progress.

Elements and Performance Criteria

Elements and Performance Criteria

Element	Performance Criteria
1 Identify purpose for site assessment	<p>1.1 Client brief is prepared and agreed.</p> <p>1.2 Project objectives are outlined.</p>
2 Collect and collate base information	<p>2.1 Existing resources are identified and acquired.</p> <p>2.2 Local or site maps and plans are sourced.</p> <p>2.3 Base plan is prepared of the site.</p>
3 Prepare for site visit	<p>3.1 OHS hazards associated with undertaking a site visit are assessed for potential risks and controls implemented accordingly.</p> <p>3.2 Location, ownership and site boundaries are verified.</p> <p>3.3 Covenants that could affect the project design are identified and recorded.</p> <p>3.4 Climate and weather conditions are ascertained from historical data.</p> <p>3.5 Where required, formal approval is sought to visit site.</p>
4 Undertake site inspection	<p>4.1 Site orientation is undertaken.</p> <p>4.2 Existing on-site and adjacent site features that may impact upon the project objectives are identified and recorded.</p> <p>4.3 Site grades are visually identified and recorded.</p> <p>4.4 Soil characteristics are identified from soil identification reference chart guidelines and soil maps, and recorded on site inventory report.</p> <p>4.5 The species, health and location of vegetation is recorded on site inventory report.</p> <p>4.6 The presence, location and/or extent of other site features are recorded on site inventory report.</p>

- 4.7 Where required, soil samples for **testing** by others are gathered and forwarded for analysis according to enterprise guidelines.
- 5 Document information
- 5.1 Site information is **documented** in accordance with enterprise procedures.
- 5.2 Documents are completed and forwarded to supervisor/manager according to enterprise procedures.

Required Skills and Knowledge

Not applicable.

Evidence Guide

What evidence is required to demonstrate competence for this standard as a whole?

Competence in undertaking a site assessment requires evidence that information on site features, soil type and vegetation is collected, analysed and accurately recorded on a base plan. The skills and knowledge required to undertake a site assessment must be **transferable** to a different work environment. For example, this could include different sites, environments and reasons for assessing the site.

What specific knowledge is needed to achieve the performance criteria?

Knowledge and understanding are essential to apply this standard in the workplace, to transfer the skills to other contexts and to deal with unplanned events. The knowledge requirements for this competency standard are listed below:

Plant recognition.

Map reading.

Soil pH, texture and type.

Current land use and environmental threats and problems to site.

OHS hazards associated with undertaking a site assessment.

Protocols of accessing and visiting the site.

What specific skills are needed to achieve the performance criteria?

To achieve the performance criteria, appropriate literacy and numeracy levels as well as some complementary skills are required. These include the ability to:

Identify purpose for site assessment.

Collect and collate base information.

Prepare for site visit.

Undertake site inspection.

Document information.

What processes should be applied to this competency standard?

There are a number of processes that are learnt throughout work and life, which are required in all jobs. They are fundamental processes and generally transferable to other work functions. Some of these are covered by the **key competencies**, although others may be added. The questions below highlight how these processes are applied in this competency standard. Following each question a number in brackets indicates the level to which the key competency needs to be demonstrated where 0 = not required, 1 = perform the process, 2 = perform and administer the process and 3 = perform, administer and design the process.

1. How can **communication of ideas and information** (2) be applied? Ideas and information may need to be communicated to the client via a site inventory report and other site plans.
2. How can **information be collected, analysed and organised** (2)? Information on existing site features may need to be collected, analysed and organised from visual inspections and/or inspections of existing plans and maps.
3. How are **activities planned and organised** (2)? A logical sequence of events may need to be implemented in the form of a checklist when undertaking a site assessment, and all details of that assessment need to be recorded.
4. How can **team work** (2) be applied? Team work may be required when visiting a site and recording information.
5. How can the use of **mathematical ideas and techniques** (2) be applied? Mathematical ideas and techniques such as the reading of measurements and site levels may be required.
6. How can **problem-solving skills** (2) be applied? Problems may arise when assessing site boundaries and caveats
7. How can the **use of technology** (2) be applied? Technology may be applied when using levelling equipment and when using computers to generate plans and record information.

Are there other competency standards that could be assessed with this one?

This competency standard **could** be assessed on its own or in combination with other competencies relevant to the job function.

There is essential information about **assessing this competency standard for consistent performance** and **where and how it may be assessed**, in the Assessment Guidelines for this Training Package. All users of these competency standards must have **access** to both the **Assessment Guidelines** and the relevant **Sector Booklet**.

Range Statement

Range of Variables

The Range of Variables explains the contexts within which the performance and knowledge requirements of this standard may be assessed. The scope of variables chosen in particular training and assessment requirements may depend on the work situations available

What are the existing **features** likely to be found on site?

Features may include topography, vegetation, hydrology, services above and below ground, amenities, buildings and structures, access points, site modifications, fauna, location of boundaries, aspect, watercourses and paths.

What **covenants** are likely to be taken into consideration?

Covenants may include easements, right of ways, altered boundaries, council regulations or restrictions.

What is covered by **site orientation**?

Compass bearings and magnetic north, points of access, utility service locations, physical constraints of site, safety threats and hazards, environmental problems.

What **OHS hazards** may apply to undertaking a site assessment?

Hazards may include solar radiation, uneven surfaces, tapes, strings and levelling equipment that may be tripped over, and existing on-site obstacles.

What may be included under **other site features**?

Other site features may include structures, buildings, cultural elements, historical features, fauna and animal habitats, services, access to and across site, environmental problems, safety hazards and risks.

What soil **testing** is likely to be undertaken?

Soil tests may include tests for PH, salinity, texture and soil type. Samples for testing may include plugs and core samples.

How will information be **documented**?

Through plans, maps, reports, schedules and field notes.

For more information on contexts, environment and variables for training and assessment, refer to the Sector Booklet.

Elements and Performance Criteria

Elements and Performance Criteria

Element	Performance Criteria
1 Define the need for a management plan	<p>1.1 Management plan objectives are identified for the designated area.</p> <p>1.2 Brief is agreed in consultation with client.</p> <p>1.3 Planning team including specialists and consultants is identified.</p>
2 Undertake preliminary planning activities	<p>2.1 Major stakeholders are identified.</p> <p>2.2 Availability of specialists to assist in management planning work is ascertained and contracts are prepared where required.</p> <p>2.3 Timelines for development of the management plan and reporting arrangements to client are established.</p> <p>2.4 Resources required for the development of management strategies are identified.</p>
3 Prepare a site description	<p>3.1 Landscape values of the area are identified and mapped.</p> <p>3.2 Physical features and characteristics of the area are identified and mapped.</p> <p>3.3 Land uses, including current, cultural, and historical modifications, are researched and their effects on the natural resource area are determined and recorded.</p> <p>3.4 Physical condition of site is assessed and documented</p> <p>3.5 Biological characteristics of the site are documented.</p>

- 4 Analyse site information and description
 - 4.1 Information is evaluated in terms of core principles and objectives.
 - 4.2 Documents produced including plans, technical reports and maps.
 - 4.3 Priorities and key **conservation issues** are determined.
 - 4.4 Longitudinal projections of continuing impacts are prepared.
 - 4.5 **Land capability** is assessed.
 - 4.6 Opportunities and constraints to meeting planning objectives and goals are identified and documented.
 - 4.7 **Presentation** to stakeholders/clients is undertaken and feedback incorporated into planning documentation.
- 5 Identify management strategies
 - 5.1 **Management strategies** are identified that address defined objectives.
 - 5.2 Management strategies are designed to alleviate existing impacts or to target management actions.
 - 5.3 Management strategies are costed and compared to existing budgets and **available resources**.
 - 5.4 Staging of work is planned to prioritise outcomes and management resource allocation.
 - 5.5 Consultation with stakeholders/clients is undertaken and feedback incorporated into planning documentation.
- 6 Prepare the management plan
 - 6.1 Site information and management strategies are documented into a draft management plan for consultation.
 - 6.2 Consultation with stakeholders and clients is undertaken according to enterprise guidelines.
 - 6.3 Changes are made to the draft plan, and a final plan is prepared and presented to client

Required Skills and Knowledge

Not applicable.

Evidence Guide

What evidence is required to demonstrate competence for this standard as a whole?

Competence in developing a management plan for a natural resource area requires evidence that the person is able to work with a team to develop a management plan for an area that will address management objectives in accordance with the client's requirements for the area. The skills and knowledge required to develop a management plan for an area must be **transferable** to different work environments. For example, this could include different areas, environments and management objectives.

What specific knowledge is needed to achieve the performance criteria?

Knowledge and understanding are essential to apply this standard in the workplace, to transfer the skills to other contexts and to deal with unplanned events. The knowledge requirements for this competency standard are listed below:

Management planning principles and issues.

Basic civil design.

Environmental assessment, survey and analysis techniques and practical application to a range of habitats and landscapes.

Native fauna and flora identification physiology, habitat requirements, and seasonal and nutritional influences on life cycle.

Pest plant and animal and disease identification, physiology, control techniques, and equipment, pesticides and habitat requirements.

Techniques and strategies for use in the management, rehabilitation and enterprise use of a range of native Australian habitats, species and landscapes.

Indigenous flora regeneration and revegetation techniques, equipment and methods of application in relation to a range of landscape characteristics.

Management and rehabilitation techniques for the wildlife and habitat relevant to the natural resource area.

Wildlife habitats associated with the natural resource area and local geographic region.

Soil, plant and water testing processes and procedures, interpretation and application of results.

What specific skills are needed to achieve the performance criteria?

To achieve the performance criteria, appropriate literacy and numeracy levels as well as some complementary skills are required. These include the ability to:

Define the need for a management plan.

Undertake preliminary planning activities.

Prepare a site description.

Analyse site information and description.

Identify management strategies.

Prepare the management plan.

What processes should be applied to this competency standard?

There are a number of processes that are learnt throughout work and life, which are required in all jobs. They are fundamental processes and generally transferable to other work functions. Some of these are covered by the **key competencies**, although others may be added. The questions below highlight how these processes are applied in this competency standard. Following each question a number in brackets indicates the level to which the key competency needs to be demonstrated where 0 = not required, 1 = perform the process, 2 = perform and administer the process and 3 = perform, administer and design the process.

1. How can **communication of ideas and information (3)** be applied? Oral and written communication with implementation team, clients, suppliers, consultants, government agencies, community organisations, industry contacts and senior management is required.
2. How can **information be collected, analysed and organised (3)**? Information on the native habitat and management systems can be collected through site assessment, research, consultation with experts and own experience. This information will be analysed and organised in relation to the development of natural resource management plan objectives and resource availability. Reports including statistical and financial data will need to be generated.
3. How are **activities planned and organised (3)**? Activities of self and other team leaders and members are planned and delegation is used to achieve outcomes.
4. How can **team work (3)** be applied? Teamwork with colleagues, staff, experts and senior management based on effective, timely communication and consultation will help to achieve wetland management objectives.
5. How can the use of **mathematical ideas and techniques (3)** be applied? Advanced mathematical understanding will be required to analyse data from external agents regarding project costs, and physical aspects such as dimensions, analysis results, application rates, and quantitative environmental impacts. Statistical data will need to be provided to support monitoring and evaluation of implementation of natural resource management strategies.
6. How can **problem-solving skills (3)** be applied? Problems presented by collected data, known threats to the natural ecosystem, availability

of information and resources, reconciling environment, financial and enterprise requirements in the development of strategies, will require problem-solving skills.

7. How can the **use of technology (3)** be applied?

Technology used to gather information, prepare strategies, communicate, make presentations and keep records, may include computerised word processing, financial planning, email, internet and drafting, photography, video and slide equipment.

Are there other competency standards that could be assessed with this one?

This competency standard **could** be assessed on its own or in combination with other competencies relevant to the job function.

There is essential information about **assessing this competency standard for consistent performance** and **where and how it may be assessed**, in the Assessment Guidelines for this Training Package. All users of these competency standards must have **access** to both the **Assessment Guidelines** and the relevant **Sector Booklet**.

Range Statement

Range of Variables

The Range of Variables explains the contexts within which the performance and knowledge requirements of this standard may be assessed. The scope of variables chosen in training and assessment requirements may depend on the work situations available

What comprises a **management plan**?

Management plans define the core principles, objectives and responsibilities of the managing agent, cover the allocation of enterprise resources, and set parameters for resource access and use.

What **management plan objectives** may be identified for the natural resource area?

These may include objectives to provide habitat for wildlife and native predators (such as insect eating birds, parasitic wasps), maintain biodiversity, moderate local weather conditions (e.g., wind speed, rainfall run-off, watertable recharge, provide shade), selective removal of tree limbs for firewood and timber, selective harvest of seed for revegetation or human consumption, genetic resource for plant propagation and medicinal components, contribution to sustainable land use, aesthetic contribution to enterprise (such as a home-stay farm, for tourism).

Who may be the **client**?

The client may be a government agency or associated body, private landholder, or community group.

What **resources** may be accessed to develop the natural resource management plan?

This may include topographical, vegetation, and aerial maps, government, university and library based consultation, literature and internet resources, local written and oral histories of migrant and Aboriginal or Torres Strait Islander communities in the area, catchment area information and catchment management associations, local experts such as flora and fauna preservation, cultivation and identification community groups.

What **landscape values** are relevant to this competency standard?

Visual amenity, biodiversity, recreation and tourism, conservation, water and air quality, and cultural values.

What **features** and **characteristics** may be included in the site description?

These may include boundaries, fences, gates, slope gradient, contours, water courses, current land use, buildings and structures,

	eroded areas, saline areas, soil toxicity, waterlogged areas, water table recharge and discharge sites, water-repellent soils, predominant wind directions, annual rainfall, surface stones and rocks, soil types and specific historic or cultural features.
What historical modifications may be identified for the natural resource area?	These may include clearance, grazing, dry land and irrigated cropping, fire management for grass stimulation, and natural events, such as wildfire, flooding and drought.
What land uses may be relevant to this competency standard?	Agricultural, horticultural, silvicultural, recreational, industrial, commercial, and cultural.
What may be included under the physical condition of a site?	Impacts from weeds, pests, erosion, soil disturbance, run-off, water quality, people, vehicle intrusions, soil compaction, and adjacent land use.
What biological characteristics are relevant?	Native and introduced plants and animals, habitats, vegetation structure, and rare and endangered species.
What conservation issues may be identified for action?	Some examples of conservation issues may include priorities for protection, conservation and restoration works for key native flora and fauna species, disease and pest flora and fauna control, nutritional issues, and erosion, salinity and toxicity repair works and habitat rehabilitation and restoration of balance.
What may be included under land capability ?	Suitability of recreational use, engineering works, conservation values, wildlife potential, soil profiles, visual amenity, agricultural and horticultural production.
What presentation techniques may be utilised to effectively present a description of the wetland site?	These may include video and photographic footage, documented historical, biological, physical and cultural descriptions, graphed and charted statistics, references and illustrations.
What management strategies may be identified for the natural resource management plan?	These should address the conservation priorities identified in the site description and may include objectives to protect the natural resource area from grazing and pest animals, control pest plants and diseases, control

human impact, manage fire events (e.g., controlled use of hot and cold fires, wildfire prevention), establish vegetation links to nearby habitat islands, remove and redirect infrastructure such as roads, troughs and fences, conserve and enhance biodiversity and habitat balance, and monitor native habitats over time.

What **available resources** may influence the selection and priority of management objectives?

Resource availability issues may include private finance, government funding assistance, natural resource regulations and legislation, consideration for neighbouring enterprises, community in-kind support, existing indigenous flora and fauna, labour and existing administration facilities and infrastructure.

For more information on contexts, environment and variables for training and assessment, refer to the Sector Booklet.

Unit Sector(s)

Not applicable.

SITHACS006A Clean premises and equipment

Modification History

Not applicable.

Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to carry out general cleaning duties as part of a job role in a tourism or hospitality enterprise or any other service industry context. It does not include contract cleaning which is covered by the Asset Maintenance Training Package.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Application of the Unit

This unit requires the application of techniques to clean both wet and dry areas as well as knowledge of cleaning equipment and materials, including key safety and environmental issues. A person undertaking this role works under guidance and supervision.

In a tourism and hospitality context this unit would usually be undertaken in conjunction with specialist operational units such as SITHACS005A Prepare rooms for guests and SITHCCC004A Clean and maintain kitchen premises.

Licensing/Regulatory Information

Refer to Unit Descriptor

Pre-Requisites

Nil

Employability Skills Information

The required outcomes described in this unit of competency contain applicable facets of employability skills. The Employability Skills Summary of the qualification in which this unit is packaged will assist in identifying employability skills requirements.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Where **bold italicised** text is used, further information is detailed in the required skills and knowledge and/or the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

Elements and Performance Criteria

Element	Performance Criteria
1 Select and set up equipment and materials.	1.1 Select equipment according to type of cleaning to be undertaken.
	1.2 Check that all equipment is clean and in safe working condition prior to use.
	1.3 Select and prepare suitable wet and dry cleaning agents and chemicals according to relevant manufacturer and OHS and environmental requirements .
	1.4 Select and use protective clothing where necessary.
2 Clean wet and dry areas and associated equipment.	2.1 Take account of potential customer inconvenience in scheduling and performing cleaning tasks.
	2.2 Prepare wet and dry areas to be cleaned and identify any hazards .
	2.3 Barricade the work area, or place warning signs as appropriate to reduce risk to colleagues and customers.
	2.4 Select and apply correct cleaning agents or chemicals for specific areas, according to manufacturer recommendations , safety procedures and enterprise policies and procedures.
	2.5 Select and apply correct agents and chemicals for particular equipment or surfaces.
	2.6 Use equipment correctly and safely.
	2.7 Dispose of garbage and used chemicals according

- to hygiene, safety and environmental legislation requirements.
- 3 Maintain and store cleaning equipment and chemicals.
- 3.1 Clean equipment after use according to enterprise requirements and manufacturer instructions.
- 3.2 Carry out or arrange **routine maintenance** according to enterprise procedures.
- 3.3 Identify **equipment faults** and report them according to enterprise procedures.
- 3.4 Store equipment in the designated area and in a condition ready for re-use.
- 3.5 Store chemicals according to health and safety requirements.

Required Skills and Knowledge

This section describes the essential skills and knowledge and their level, required for this unit.

The following skills must be assessed as part of this unit:

- organisational skills to prepare equipment and materials for a given cleaning context
- literacy skills to interpret product labels and safety instructions
- numeracy skills to calculate quantities of chemicals and other cleaning agents.

The following knowledge must be assessed as part of this unit:

- specific requirements of state and territory OHS legislation relating to cleaning operations
- environmental legislation that impacts on cleaning operations
- safe handling of common cleaning equipment used in the relevant work context
- safe handling and treatment of common hazards encountered in areas to be cleaned, including all those listed in the range statement.

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the following is essential:

understanding of the importance of cleaning services to the overall quality of service provided by the organisation

ability to select and use relevant equipment and cleaning agents safely, efficiently and according to acceptable enterprise cleaning routines and timeframes

demonstration of skills through cleaning both wet and dry areas

completion of cleaning tasks within commercially realistic timeframes.

Context of and specific resources for assessment

Assessment must ensure access to:

- areas to be cleaned, including a range of different surfaces such as carpet, marble, ceramic, wood, clay, rubber, vinyl, leather, woodwork, painted surfaces, crystal, mirrors and glass, terrazzo, slate and granite
- cleaning equipment and cleaning agents that reflect current industry practice, including:
 - cleaner's trolley
 - chemical dispenser
 - sink and sluice sink
 - storage areas
 - appropriate chemicals, detergents, deodorisers, polishes and sanitisers
 - cleaning products, including glass and multi-surface, cream and acid
 - range of cloths, including dry, wet, lint-free and dusting
 - toilet brush and toilet cleaning cloth
 - protective gloves
 - bucket, mop and floor rags
 - range of brooms, brushes, rags and dusters for different surfaces
 - window squeegee mop and extension poles
 - 'wet floor' or 'cleaning in progress' signs
 - syringe bin and tongs
 - access to sanitary disposal systems
 - polishing machine
 - automatic scrubber.

Methods of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

direct observation of cleaning and maintenance activities

oral or written questioning to assess knowledge of cleaning and maintenance procedures, materials equipment and legislation

review of portfolios of evidence and third-party workplace reports of on-the-job performance by the candidate.

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended.

Assessing employability skills

Employability skills are integral to effective performance in the workplace and are broadly consistent across industry sectors. How these skills are applied varies between occupations and qualifications due to the different work functions and contexts. Employability skills embedded in this unit should be assessed holistically with other relevant units that make up the skill set or qualification and in the context of the job role.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording in the performance criteria is detailed below.

Equipment must include:	electrically operated equipment such as scrubbers, polishers and vacuum cleaners brushes and brooms mops and buckets dusters and pans garbage receptacles.
Cleaning agents and chemicals may include:	general and spot cleaning agents cleaning agents for specialised surfaces, including window and glass cleaners disinfectants pesticides deodorisers furniture and floor polishes.
OHS and environmental requirements may include:	enterprise policies and procedures related to cleaning operations and disposal of used chemicals legislation related to general workplace safety, hazardous substances, and manual handling and storage requirements enterprise security procedures.
Protective clothing may include:	overalls jackets aprons goggles and masks gloves waterproof clothing and footwear headwear breathing apparatus.

Wet and dry areas may include:

bathrooms
bedrooms
kitchens
balconies
private lounge areas
internal and external public areas
function rooms
storage areas.

Hazards may include:

spillages
breakages, including broken glass
wet or slippery surfaces
broken or damaged furniture
fumes
blood
needles and syringes
used condoms
sharp objects, including knives and skewers
human waste
surgical dressings
fat and oil
heated utensils and surfaces
sharp food scraps, including bones and crustacean shells.

Manufacturer recommendations may include:

cleaning and maintenance guidelines
dosage and dilution of chemicals
safety requirements.

Routine maintenance is undertaken according to planned, preventative maintenance programs and may include:

wiping down and cleaning
washing and rinsing
sanitising
drying out
dismantling and reassembling
emptying.

Equipment faults may include:

breakdowns
damage to parts, surfaces, electrical cords and connections.

Unit Sector(s)

Hospitality

Competency field

Accommodation Services

SITHACS007A Launder linen and guest clothes

Modification History

Not applicable.

Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to launder linen and guest clothes.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Application of the Unit

This unit applies to laundry attendants in all tourism and hospitality establishments with an on-premises laundry. It may also apply to personal assistants, butlers and valet attendants whose job role involves personal laundry services to employers or customers.

Licensing/Regulatory Information

Refer to Unit Descriptor

Pre-Requisites

This unit must be assessed after the following prerequisite unit:
SITXOHS002A Follow workplace hygiene procedures.

Employability Skills Information

The required outcomes described in this unit of competency contain applicable facets of employability skills. The Employability Skills Summary of the qualification in which this unit is packaged will assist in identifying employability skills requirements.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Where **bold italicised** text is used, further information is detailed in the required skills and knowledge and/or the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

Elements and Performance Criteria

Element	Performance Criteria
1 Process laundry items.	<ul style="list-style-type: none">1.1 Sort items according to cleaning process required and urgency of the item.1.2 Select laundry methods according to textile labelling codes and based on fibre and fabric, dye fastness and amount of soilage.1.3 Check items for laundering for stains and treat stains using the correct process.1.4 Use cleaning agents and chemicals according to manufacturer instructions and specific laundry equipment.1.5 Operate laundry equipment according to manufacturer instructions.1.6 Complete mending and minor repairs as required.1.7 Check items following completion of laundering process to ensure quality cleaning.1.8 Record any damage arising from the laundering process and notify appropriate persons according to enterprise procedures.1.9 Complete ironing or pressing and finishing processes.
2 Package and store laundry items.	<ul style="list-style-type: none">2.1 Package and present guest laundry according to enterprise standards and procedures.2.2 Complete records and billing information according to enterprise procedures.2.3 Return finished items to guest according to required timeframes.2.4 Store processed guest laundry where required according to guest requests or where return to guests is not possible.

Required Skills and Knowledge

This section describes the essential skills and knowledge and their level, required for this unit.

The following skills must be assessed as part of this unit:

use of specific laundry chemicals

problem-solving skills to treat stains and carry out minor repairs

literacy skills to read information about the use of laundry chemicals and optimum laundry techniques for different fabric types

writing skills to complete documentation for billing and guest information purposes

numeracy skills to calculate dilution strengths of laundry chemicals and charges for specific customers for laundry services provided.

The following knowledge must be assessed as part of this unit:

hygiene, health and safety issues of specific relevance to laundry operations, including:

manual handling

handling laundry chemicals

basic principles of infection control

maintenance of clean and dirty laundry area separation

types of fabric and laundering, and drying requirements for each

meaning of laundering and dry cleaning labels on clothing

key laundry terms

common guest laundry issues

enterprise linen control procedures, including:

clean for dirty

set amount

topping up

uniform issue

condemned linen

procedures if problems are identified.

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency

Evidence of the following is essential:

- ability to assess correctly the processes required for different types of laundry
- ability to operate laundry equipment safely, using a full range of cycles available
- ability to complete the full laundering process
- completion of tasks within enterprise-acceptable timeframes and with quality laundry outcomes
- completion of a complete laundry cycle using a variety of linen and clothing items and fabrics.

Context of and specific resources for assessment

Assessment must ensure demonstration of skills within a commercial laundry using industry-current equipment, including:

- washers
- sorting blankets
- dryers
- shelves
- irons
- steam presses
- coathangers
- polytube bags
- shirt cards
- polymarkers.

Methods of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

direct observation of the candidate carrying out specific laundry tasks within a complete cycle

inspection of items laundered by the candidate

oral or written questions about commercial laundry equipment and operation, including selection of appropriate laundry cycles and programs, chemicals and their use, stain identification and treatment and OHS issues

review of portfolios of evidence and third-party workplace reports of on-the-job performance by the candidate.

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:

SITXINV001A Receive and store stock.

Assessing employability skills

Employability skills are integral to effective performance in the workplace and are broadly consistent across industry sectors. How these skills are applied varies between occupations and qualifications due to the different work functions and contexts. Employability skills embedded in this unit should be assessed holistically with other relevant units that make up the skill set or qualification and in the context of the job role.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording in the performance criteria is detailed below.

Laundry equipment may include:

- washers
- dryers
- irons
- steam presses
- sorting baskets and shelves
- heat sealing equipment and roll plastic hangers.

Packaging and presenting guest laundry may include:

- folding
- wrapping
- heat sealing
- labelling
- providing quality reports.

Storage of laundry is required where:

- guests have requested storage
- guests have departed temporarily
- laundry has been left behind or forgotten.

Unit Sector(s)

Hospitality

Competency field

Accommodation Services

SITHCCC001A Organise and prepare food

Modification History

Not applicable.

Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to organise and prepare a variety of foods for the kitchen of a hospitality or catering operation. It focuses on general food preparation techniques.

The term organising and preparing food is also referred to as mise en place and includes basic preparation prior to serving food, which may involve cooking components of a dish but does not include the actual presentation.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Application of the Unit

This unit applies to hospitality and catering operations where food is prepared and served, and may include the preparation of food for Asian cuisines.

Those undertaking this role work under supervision and usually as part of a team.

Licensing/Regulatory Information

Refer to Unit Descriptor

Pre-Requisites

This unit must be assessed after the following prerequisite unit:
SITXOHS002A Follow workplace hygiene procedures.

Employability Skills Information

The required outcomes described in this unit of competency contain applicable facets of employability skills. The Employability Skills Summary of the qualification in which this unit is packaged will assist in identifying employability skills requirements.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Where **bold italicised** text is used, further information is detailed in the required skills and knowledge and/or the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

Elements and Performance Criteria

Element	Performance Criteria
1 Prepare and use equipment.	<p>1.1 Select equipment of the correct type and size for the job, and ensure that it is clean, safely assembled and ready before use.</p> <p>1.2 Use equipment correctly, safely and hygienically.</p>
2 Assemble and prepare ingredients for menu items.	<p>2.1 Identify ingredients according to standard recipes, recipe cards or enterprise requirements.</p> <p>2.2 Assemble ingredients according to the correct quantity, type and quality required.</p> <p>2.3 Prepare ingredients in the required form and timeframe.</p>
3 Prepare dairy, dry goods, fruits and vegetables.	<p>3.1 Prepare food according to correct weight, amount and number of portions.</p> <p>3.2 Clean, peel and prepare vegetables and fruit as required for menu items.</p> <p>3.3 Prepare dairy products as required for menu items, ensuring they are correctly handled.</p> <p>3.4 Measure, sift where appropriate, and use dry goods as required for menu items.</p> <p>3.5 Prepare general food items as required for menus.</p>
4 Prepare meat, seafood and poultry.	<p>4.1 Prepare and portion meat, seafood and poultry accurately, according to size, weight and required menu items.</p> <p>4.2 Trim, mince or slice and prepare meat correctly.</p>

- 4.3 Clean, prepare and fillet fish and seafood correctly.
- 4.4 Trim and prepare poultry correctly.
- 4.5 Store meat, seafood and poultry hygienically.

Required Skills and Knowledge

This section describes the essential skills and knowledge and their level, required for this unit.

The following skills must be assessed as part of this unit:

logical and time-efficient work flow

knife handling techniques

cutting techniques for foods as required for menu items

hygienic handling of food and equipment according to local, state or territory and national regulatory requirements

safe work practices according to OHS principles and procedures, particularly with regard to using knives

waste minimisation techniques and environmental considerations in relation to food preparation

problem-solving skills to deal with minor problems, such as shortages of ingredients

literacy skills to read recipes, menus, instructions and orders

numeracy skills to calculate portions, and weigh and measure quantities of ingredients.

The following knowledge must be assessed as part of this unit:

uses and characteristics of basic food products and types of menus as required.

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency

Evidence of the following is essential:

- application of hygiene and safety principles and procedures
- ability to organise and prepare a wide variety of general food items within realistic workplace time constraints.

Context of and specific resources for assessment

Assessment must ensure:

- demonstration of skills within normal operating conditions of a fully equipped commercial kitchen including industry-current equipment
- industry-realistic ratios of kitchen staff to customers.

Methods of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

direct observation of the candidate preparing food

inspection of food items prepared by the candidate

written or oral questions to assess knowledge of preparation techniques for various food types

review of portfolios of evidence and third-party workplace reports of on-the-job performance by the candidate.

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:

SITHCCC002A Present food

SITHCCC007A Prepare sandwiches.

Assessing employability skills

Employability skills are integral to effective performance in the workplace and are broadly consistent across industry sectors. How these skills are applied varies between occupations and qualifications due to the different work functions and contexts.

Employability skills embedded in this unit should be assessed holistically with other relevant units that make up the skill set or qualification and in the context of the job role.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording in the performance criteria is detailed below.

Equipment may be mechanical or power driven and must include:

knives, cleavers and utensils
food processors, blenders and mixers
slicers
grills or salamanders
fryers
large fixed equipment, such as bains marie and fridges.

Food items to be prepared:

must include the use of:
dairy products, including milk, yoghurt, cheeses and alternatives, e.g. soy products
dry goods, such as flours, sugars, pastas and rice
standard fruit and vegetables
general food items such as sauces, condiments and flavourings, garnishes, coatings and batters
meat, seafood and poultry that may be fresh, frozen, preserved or pre-prepared

may include the use of:
meat products such as standard cuts, sausages, hams and salami.

Elements describe the essential outcomes of a unit of competency. Performance criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the required skills and knowledge and/or the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Prepare food for service.	<p>1.1 Identify <i>foods</i> for menu items.</p> <p>1.2 Arrange sauces and garnishes to enterprise requirements for specific dishes.</p>
2 Portion and plate food.	<p>2.1 Ensure that sufficient supplies of clean, undamaged crockery are available at temperatures appropriate to food being served.</p> <p>2.2 Portion food according to enterprise policies and standard recipes.</p> <p>2.3 Plate food and present neatly and attractively, without drips or spills, to the enterprise requirements for the specified dish, taking into consideration eye appeal, colour and contrast, temperature of food, <i>service</i></p>

ELEMENT

PERFORMANCE CRITERIA

equipment, and classical and innovative arrangement styles.

2.4 Serve food to be displayed in public areas in appropriate serveware at the correct temperature, in an attractive manner, without drips or spills and giving attention to colour.

3 Work in a team.

3.1 Demonstrate good teamwork with all kitchen and food service staff to ensure timely, quality service of food.

3.2 Organise and follow a kitchen routine for food service to maximise food quality and minimise delays.

3.3 Maintain a high standard of personal and work-related hygiene practices.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the essential skills and knowledge and their level, required for this unit.

The following skills must be assessed as part of this unit:

- logical and time-efficient work flow
- safe work practices according to OHS principles and procedures
- hygienic handling of food and equipment according to regulatory requirements
- waste minimisation techniques and environmental considerations in relation to food presentation
- problem-solving skills to deal with minor problems such as shortages of ingredients, spillages and mistakes
- literacy skills to read menus and orders
- numeracy skills to calculate portions and plate menu items uniformly.

The following knowledge must be assessed as part of this unit:

- use and characteristics of basic food products and types of menus as required
- classical and innovative styles of food presentation for major food groups.

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency Evidence of the following is essential:

- application of hygiene and safety principles and procedures
- ability to plate, present and serve a general range of foods efficiently and within realistic workplace time constraints
- ability to work as part of a team in a positive and courteous manner.

EVIDENCE GUIDE

Context of and specific resources for assessment

Assessment must ensure:

- demonstration of skills within a fully equipped operational commercial kitchen, including industry-current equipment, as defined in the Assessment Guidelines
- access to a range of equipment for presenting food, including:
 - appropriate crockery and utensils for service
 - food and beverage trays
 - buffet table or unit (if displaying as buffet)
 - buffet display items, such as platters
 - display boards
- use of authentic menu items.

Methods of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- direct observation of the candidate working as a member of a team and plating and presenting food
- written or oral questions to assess knowledge of presentation techniques for different food items
- review of portfolios of evidence, such as photographs, and third-party workplace reports of on-the-job performance by the candidate.

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:

SITHCCC001B Organise and prepare food.

Assessing employability skills

Employability skills are integral to effective performance in the workplace and are broadly consistent across industry sectors. How these skills are applied varies between occupations and qualifications due to the different work functions and contexts.

Employability skills embedded in this unit should be assessed holistically with other relevant units that make up the skill set or qualification and in the context of the job role.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording in the performance criteria is detailed below.

A variety of *foods* must be plated, presented and served, including:

- entrees
- main courses
- desserts
- soups
- sandwiches
- breakfast items
- canapés and appetisers.

Service equipment may include:

- food and beverage trays
- buffet or suitable table
- dishes and platters
- buffet and smorgasbord display items.

Unit Sector(s)

Sector

Hospitality

Competency field

Competency field

Commercial Cookery and Catering

SITHCCC003A Receive and store kitchen supplies

Modification History

Not applicable.

Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to receive and store supplies in commercial cookery or catering operations. It focuses on the general stock handling procedures required for food and kitchen-related goods.

Supplies refer to all perishable and non-perishable goods received from both internal and external suppliers and maintained within a stock control system.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Application of the Unit

This unit applies to all hospitality and catering enterprises where kitchen supplies are received and stored, such as restaurants, hotels, clubs, cafeterias and other catering operations. Those undertaking this role would work under supervision and would usually be part of a team.

Licensing/Regulatory Information

Refer to Unit Descriptor

Pre-Requisites

This unit must be assessed after the following prerequisite unit:
SITXOHS002A Follow workplace hygiene procedures.

Employability Skills Information

The required outcomes described in this unit of competency contain applicable facets of employability skills. The Employability Skills Summary of the qualification in which this unit is packaged will assist in identifying employability skills requirements.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Where **bold italicised** text is used, further information is detailed in the required skills and knowledge and/or the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

Elements and Performance Criteria

Element	Performance Criteria
1 Take delivery of supplies.	<p>1.1 Check all incoming supplies against specifications, orders and delivery documentation taking into account quantity, size, weight, quality and freshness, according to enterprise procedures and regulatory requirements.</p> <p>1.2 Identify and record information about the supplier, any temperature checks undertaken, any variations and discrepancies and report them to the appropriate person.</p> <p>1.3 Inspect supplied items for damage, quality, use-by dates, breakages or discrepancies and record details according to enterprise policy and regulatory requirements.</p> <p>1.4 Manage excess stock appropriately, according to enterprise policy.</p>
2 Store supplies.	<p>2.1 Record supply levels accurately and promptly according to enterprise procedures and regulatory requirements.</p> <p>2.2 Label supplies according to enterprise procedures.</p> <p>2.3 Transport supplies to appropriate storage area promptly, ensuring that stock is protected from loss, contamination, spoilage, temperature abuse and pests according to OHS and food safety procedures.</p> <p>2.4 Store supplies in appropriate storage area, ensuring compliance with enterprise procedures, food safety program, and regulatory requirements for</p>

temperature, ventilation and sanitation.

- 3 Rotate and maintain supplies.
 - 3.1 Rotate supplies according to enterprise policy.
 - 3.2 Move and shift supplies according to safety and hygiene requirements.
 - 3.3 Check the quality of supplies and complete reports as required.
 - 3.4 Dispose of damaged or spoiled supplies according to enterprise and regulatory requirements.
 - 3.5 Identify and report any problems promptly.
 - 3.6 Maintain storage areas in optimum condition, ensuring that they are clean, at required temperature, free from vermin or infestation and free from defects.

Required Skills and Knowledge

This section describes the essential skills and knowledge and their level, required for this unit.

The following skills must be assessed as part of this unit:

ability to use a thermometer correctly to undertake temperature checks using a thermometer for a range of foods at different temperatures

logical and time-efficient work flow

safe work practices, particularly in relation to lifting and handling, and stacking and transporting goods

waste minimisation techniques and environmental considerations in relation to receipt and storage of kitchen supplies.

problem-solving skills to deal with minor problems such as shortages, variations and errors

literacy skills to read and check delivery documentation against order requirements and complete records relating to deliveries

numeracy skills to count and check quantities of stock.

The following knowledge must be assessed as part of this unit:

principles of stock control, including:

rotation

correct storage procedures for specific goods

food segregation

checking for slow moving items

common examples of stock control documentation and systems

enterprise requirements and procedures related to the Australia New Zealand Food Standards Code and food safety programs

suitable storage for the various types of food

basic supplies and commodities

hygiene procedures related to stock handling and storage.

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency

Evidence of the following is essential:

ability to receive, handle and store kitchen supplies safely and efficiently

understanding of the OHS and hygiene issues related to receipt, handling and storage of supplies.

Context of and specific resources for assessment

Assessment must ensure:

access to a range of perishable and non-perishable supplies

demonstration of skills within a fully equipped kitchen storage area as defined in the Assessment Guidelines.

Methods of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

direct observation of the candidate receiving and storing supplies for an operational commercial kitchen

written or oral questions to test knowledge of stock procedures for different food items

review of workplace reports and records related to stock control, prepared by the candidate

review of portfolios of evidence and third-party workplace reports of on-the-job performance by the candidate.

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended.

Assessing employability skills

Employability skills are integral to effective performance in the workplace and are broadly consistent across industry sectors. How these skills are applied varies between occupations and qualifications due to the different work functions and contexts. Employability skills embedded in this unit should be assessed holistically with other relevant units that make up the skill set or qualification and in the context of the job role.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. **Italicised** wording in the performance criteria is detailed below.

Supplies:	<p>must include:</p> <p>food, including dry goods, dairy products, meat and seafood, poultry, fruit and vegetables and frozen goods</p> <p>may include:</p> <p>beverages</p> <p>utensils and equipment for food preparation</p> <p>cleaning materials and equipment</p> <p>linen, such as tea towels, serviettes, tablecloths and aprons</p> <p>stationery, vouchers and tickets.</p>
Temperature checks may be taken for a range of foods at different temperatures, including:	<p>raw foods</p> <p>ingredients</p> <p>cold, frozen or reheated foods or ingredients.</p>
Variations and discrepancies must include:	<p>rejection of food that is likely to be contaminated, for example, it is at the incorrect temperature (food that is intended to be frozen but has thawed, or cold food that is in the temperature danger zone)</p> <p>packaged food that is exposed through damaged packaging</p> <p>incorrect quantities, amounts or weights</p> <p>wrong product.</p>
Regulatory requirements include:	<p>Australia New Zealand Food Standards Code</p> <p>local, state or territory food safety regulations.</p>

Storage may include:

refrigeration

freezers

coolrooms

dry stores.

Unit Sector(s)

Hospitality

Competency field

Commercial Cookery and Catering

SITHCCC004A Clean and maintain kitchen premises

Modification History

Not applicable.

Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to clean and maintain kitchens, and food preparation and storage areas in commercial cookery or catering operations.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Application of the Unit

This unit applies to all enterprises with kitchen premises and equipment, such as restaurants, hotels, clubs, cafeterias and other catering operations. Those undertaking this role work under supervision, usually as part of a team such as kitchen attendants and cooks.

Licensing/Regulatory Information

Refer to Unit Descriptor

Pre-Requisites

This unit must be assessed after the following prerequisite unit:
SITXOHS002A Follow workplace hygiene procedures.

Employability Skills Information

The required outcomes described in this unit of competency contain applicable facets of employability skills. The Employability Skills Summary of the qualification in which this unit is packaged will assist in identifying employability skills requirements.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Where **bold italicised** text is used, further information is detailed in the required skills and knowledge and/or the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

Elements and Performance Criteria

Element	Performance Criteria
1 Clean, sanitise and store equipment.	<p>1.1 Select and use chemicals for cleaning and sanitising kitchen equipment and utensils.</p> <p>1.2 Clean and sanitise equipment and utensils according to manufacturer instructions and without causing damage.</p> <p>1.3 Store or stack cleaned equipment and utensils safely and in the designated place.</p> <p>1.4 Use cleaning equipment safely and according to manufacturer instructions.</p> <p>1.5 Assemble and disassemble cleaning equipment in a safe manner.</p> <p>1.6 Store cleaning equipment safely and correctly in the designated position and area.</p>
2 Clean and sanitise premises.	<p>2.1 Follow cleaning schedules correctly.</p> <p>2.2 Use chemicals and equipment correctly and safely to clean and sanitise walls, floors, shelves and other surfaces.</p> <p>2.3 Clean and sanitise walls, floors, shelves and working surfaces without causing damage to health or property.</p> <p>2.4 Follow procedures in the event of a chemical accident according to enterprise policy and procedures.</p>
3 Handle waste and linen.	<p>3.1 Sort waste and dispose of it according to hygiene regulations, enterprise practices and procedures and environmental considerations.</p> <p>3.2 Dispose of cleaning chemicals safely and according to environmental considerations.</p> <p>3.3 Sort linen and safely remove it according to enterprise procedures.</p>

Required Skills and Knowledge

This section describes the essential skills and knowledge and their level, required for this unit.

The following skills must be assessed as part of this unit:

- correct and safe usage and storage of cleaning materials and chemicals
- safe work practices, particularly in relation to bending, lifting, carrying and using equipment
- logical and time-efficient work flow
- problem-solving skills to deal with difficult or unusual stains and soiling
- literacy skills to read instructions and labels on equipment and cleaning chemicals
- numeracy skills to calculate correct quantities of cleaning agents to use.

The following knowledge must be assessed as part of this unit:

- various types of chemicals and equipment and their uses for cleaning and sanitising in a kitchen context
- sanitising and disinfecting methods and procedures and the importance and purpose of each
- hygiene and cross-contamination issues related to kitchens
- waste management and disposal procedures and practices
- environmentally responsible products and practices in relation to kitchen cleaning.

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency

Evidence of the following is essential:

ability to clean all food preparation and presentation areas hygienically and safely according to food safety and OHS regulations

ability to clean various types of surfaces and large and small equipment and utensils commonly found in a commercial kitchen.

Context of and specific resources for assessment

Assessment must ensure:

demonstration of skills within a fully equipped operational commercial kitchen and kitchen storage area as defined in the Assessment Guidelines

access to:

various surfaces for cleaning

appropriate chemicals and material safety data sheets (MSDS)

pest control products

mops, brooms and brushes

cloths, swabs and plastic bucket

personal protective equipment, such as gloves, goggles, face masks and rubber aprons

waste sink for mops

use of appropriate cleaning materials and equipment for kitchen areas.

Methods of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

direct observation of the candidate cleaning a fully equipped commercial kitchen and storage areas

inspection of areas cleaned by the candidate

written or oral questions to test knowledge of cleaning materials and equipment, safety and hygiene issues

review of portfolios of evidence and third-party workplace reports of on-the-job performance by the candidate.

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended.

Assessing employability skills

Employability skills are integral to effective performance in the workplace and are broadly consistent across industry sectors. How these skills are applied varies between occupations and qualifications due to the different work functions and contexts. Employability skills embedded in this unit should be assessed holistically with other relevant units that make up the skill set or qualification and in the context of the job role.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording in the performance criteria is detailed below.

Equipment to be cleaned and sanitised must include:

- crockery
- glassware
- cutlery
- utensils
- pots, pans and dishes
- containers
- chopping boards
- garbage bins.

Cleaning equipment may include:

- dishwashers
- floor scrubbers or polishers
- mops
- cleaning cloths
- brooms and dustpans
- pressurised steam and water cleaners.

Surfaces to be cleaned must include:

- walls
- floors
- shelves
- benches and working surfaces
- ovens, stoves, cooking equipment and appliances
- fridges, freezers and coolrooms
- storerooms and cupboards
- extraction fans.

Procedures in the event of a chemical accident may include:

following first aid procedures within scope of individual responsibility
ensuring contaminated food is destroyed
ensuring food preparation area, surfaces and equipment are treated according to enterprise procedures to avoid any risk to food.

Linen may include:

napkins
tablecloths
serving cloths
tea towels
clothing
cleaning cloths.

---------------------------	---

Employability Skills Information

Employability skills	The required outcomes described in this unit of competency contain applicable facets of employability skills. The Employability Skills Summary of the qualification in which this unit is packaged will assist in identifying employability skills requirements.
-----------------------------	--

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the required performance needed to demonstrate achievement of the element. Where <i>bold italicised</i> text is used, further information is detailed in the required skills and knowledge and/or the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Select and use cooking equipment and technology.	1.1 Select appropriate <i>equipment and technology</i> for particular cooking methods. 1.2 Use equipment hygienically, safely and according to manufacturer instructions.

ELEMENT	PERFORMANCE CRITERIA
2 Prepare and cook food using basic methods of cookery.	<ul style="list-style-type: none">2.1 Use various <i>cookery methods</i> to prepare dishes to enterprise standard.2.2 Calculate correct quantities and ratios of <i>commodities</i> for specific cookery methods.2.3 Complete cooking process in a logical and safe manner.2.4 Identify problems with the cooking process promptly and take corrective action.2.5 Prepare dishes using a range of methods and current technology within acceptable enterprise and customer timeframes.2.6 Work cooperatively with kitchen and front-of-house colleagues to ensure timely preparation of dishes.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the essential skills and knowledge and their level, required for this unit.

The following skills must be assessed as part of this unit:

- logical and time-efficient work flow
- use and characteristics of a range of equipment used for the required methods of cookery
- safe work practices, particularly in relation to bending and lifting, and using cutting implements, appliances, heated surfaces and other equipment that carries a risk of burns
- waste minimisation techniques and environmental considerations in relation to different cookery methods
- problem-solving skills to deal with problems such as shortages of food items, mistakes or problems in commodities or meals produced, and equipment failure
- literacy skills to read menus, orders and instructions
- numeracy skills to calculate quantities and portions against orders.

The following knowledge must be assessed as part of this unit:

- food classification for the major food groups
- characteristics of different foods and appropriate cookery methods
- underlying principles of all basic methods of cookery
- culinary terms commonly used in association with the required methods of cookery
- effects of different cookery methods on the nutritional value of food
- principles and practices of personal and professional hygiene related to working in a kitchen, including appropriate uniform and personal protective equipment.

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the Assessment Guidelines for this Training Package.

EVIDENCE GUIDE

Critical aspects for assessment and evidence required to demonstrate competency

Evidence of the following is essential:

- ability to prepare dishes on more than one occasion within realistic workplace time constraints using a range of cookery methods
- knowledge of major food groups, culinary terminology and equipment as they relate to the required methods of cookery
- application of hygiene and safety principles and procedures during the cooking process.

Context of and specific resources for assessment

Assessment must ensure:

- demonstration of skills within a fully equipped operational commercial kitchen, including industry-current equipment, as defined in the Assessment Guidelines
- demonstration of cookery methods with commodities from the major food groups, including different menus and food items
- access to appropriate utensils, cutlery and equipment to undertake the full range of basic cookery methods, including poaching, stewing, braising, roasting, deep and shallow frying, boiling, atmospheric and pressure steaming, grilling and baking
- use of authentic ingredients.

EVIDENCE GUIDE

Methods of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- direct observation of the candidate using the required cookery methods
- sampling of dishes prepared by the candidate
- written or oral questions to test knowledge on suitable cookery methods for particular food items, safety issues and food quality indicators
- review of portfolios of evidence and third-party workplace reports of on-the-job performance by the candidate, such as menus and photographs.

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:

SITXFSA001A Implement food safety procedures.

Assessing employability skills

Employability skills are integral to effective performance in the workplace and are broadly consistent across industry sectors. How these skills are applied varies between occupations and qualifications due to the different work functions and contexts.

Employability skills embedded in this unit should be assessed holistically with other relevant units that make up the skill set or qualification and in the context of the job role.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. **Italicised** wording in the performance criteria is detailed below.

RANGE STATEMENT

Equipment and technology may include:

- electric, gas or induction ranges
- ovens, including combi ovens
- microwaves
- grills and griddles
- deep-fryers
- salamanders
- food processors
- blenders
- mixers
- slicers
- tilting frypan and bratt pan
- steamers
- utensils
- cutlery.

Cookery methods may include any used within an enterprise but must include the following:

- boiling
- poaching
- steaming
- stewing
- braising
- roasting
- baking
- grilling
- shallow frying
- deep-frying
- stir-frying
- pan-frying.

RANGE STATEMENT

Dishes to be prepared must use a range of commonly-found *commodities* including:

- dairy products, such as milk, butter, yoghurt, cheeses and alternatives
- dry goods, such as flours, sugars, pastas and rice
- standard fruit and vegetables
- eggs
- meat, seafood and poultry, which may be fresh, frozen, preserved or pre-prepared, and may also include meat products such as standard cuts, sausages, hams, salami and other meat products
- general food items, such as oils, sauces, condiments and flavourings, garnishes, coatings and batters.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the required performance needed to demonstrate achievement of the element. Where <i>bold italicised</i> text is used, further information is detailed in the required skills and knowledge and/or the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Prepare stocks, glazes and essences required for menu items.	1.1 Use ingredients and flavouring agents according to standard recipes and enterprise standards. 1.2 Produce a variety of <i>stocks</i> , glazes and essences to enterprise standards.

ELEMENT	PERFORMANCE CRITERIA
	1.3 Use clarifying agents appropriately.
2 Prepare sauces required for menu items.	2.1 Produce a variety of hot and cold <i>sauces</i> from classical and contemporary recipes. 2.2 Make appropriate derivations from basic sauces. 2.3 Use a variety of thickening agents and convenience products appropriately. 2.4 Evaluate sauces for flavour, colour and consistency and rectify any problems.
3 Prepare soups required for menu items.	3.1 Select and assemble the correct ingredients to produce <i>soups</i> , including stocks and prepared garnishes. 3.2 Produce a variety of soups to enterprise standards. 3.3 Use clarifying and <i>thickening agents and methods</i> , and <i>convenience products</i> where appropriate. 3.4 Evaluate soups for flavour, colour, consistency and temperature and rectify any problems. 3.5 Present soups at the right temperature in clean serviceware without drips and spills, using suitable garnishes and accompaniments.
4 Store and reconstitute stocks, sauces and soups.	4.1 Store stocks, sauces and soups to maintain optimum freshness and quality. 4.2 Reconstitute stocks, sauces and soups to appropriate standards of consistency.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the essential skills and knowledge and their level, required for this unit.

The following skills must be assessed as part of this unit:

- using various stocks and bases for a range of soups and sauces
- logical and time-efficient work flow
- safe work practices, particularly in relation to bending and lifting
- waste minimisation techniques and environmental considerations in relation to soups, stocks and sauces
- problem-solving skills to deal with problems such as mayonnaise breaking or soup curdling, shortages of food items and equipment failure
- literacy skills to read orders and instructions
- numeracy skills to calculate quantities and portions against orders
- organisational skills and teamwork.

The following knowledge must be assessed as part of this unit:

- principles and techniques of producing stocks, sauces and soups to industry standards
- common problems in stocks, sauces and soups and how to identify and rectify them
- culinary terms commonly used in the industry in relation to stocks, sauces and soups
- appropriate ingredients and food components that may be substituted to meet special dietary and cultural needs
- principles and practices of hygiene on a personal and professional level.

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the Assessment Guidelines for this Training Package.

EVIDENCE GUIDE

Critical aspects for assessment and evidence required to demonstrate competency

Evidence of the following is essential:

- ability to prepare a variety of stocks, sauces and soups from different recipes and cultural backgrounds
- detailed commodity knowledge of different classifications of stocks, sauces and soups
- preparation of sauces and soups for customers within typical workplace conditions, including working within time constraints.

Context of and specific resources for assessment

Assessment must ensure:

- demonstration of skills within a fully equipped operational commercial kitchen, including industry-current equipment, as defined in the Assessment Guidelines
- access to appropriate equipment for stocks, sauces and soups, including stock pots and mouli or food processor
- industry-realistic ratios of kitchen staff to customers
- use of a variety of real, suitable ingredients for stocks, sauces and soups.

Methods of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- direct observation of the candidate making stocks, sauces and soups
- sampling of dishes prepared by the candidate
- written or oral questions to test commodity knowledge of stocks, sauces and soups
- review of portfolios of evidence and third-party workplace reports of on-the-job performance by the candidate, such as menus and photographs.

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended.

EVIDENCE GUIDE

Assessing employability skills

Employability skills are integral to effective performance in the workplace and are broadly consistent across industry sectors. How these skills are applied varies between occupations and qualifications due to the different work functions and contexts.

Employability skills embedded in this unit should be assessed holistically with other relevant units that make up the skill set or qualification and in the context of the job role.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording in the performance criteria is detailed below.

Stocks and sauces:

- must include a selection from each of the following:
 - reduced sauces
 - thickened sauces
 - hot, warm and cold emulsion
- may include:
 - demi-glacé
 - béchamel
 - chicken and fish velouté
 - hollandaise and béarnaise
 - mayonnaise
 - jus and coulis.

Soups must include a selection from each of the following:

- clear
- broth
- purée
- cream
- bisque.

RANGE STATEMENT

Thickening agents and methods may include:

- white, blond and brown roux
- beurre mani
- cornflour, arrowroot and potato flour
- bread
- modified starch
- liaison
- sabayon.

Convenience products may include:

- stocks
- boosters
- bouillons
- flavour enhancers.

ELEMENT	PERFORMANCE CRITERIA
---------	----------------------

ELEMENT	PERFORMANCE CRITERIA
1 Prepare vegetable and fruit dishes.	1.1 Select vegetables and fruit in season according to availability, quantity, quality and price. 1.2 Select vegetables, fruit and potato accompaniments to complement and enhance menu items. 1.3 Prepare and, where appropriate, cook a variety of vegetables and fruit dishes using suitable cookery methods and preserving optimum quality and nutrition. 1.4 Where appropriate, select suitable sauces and accompaniments to be served with vegetables. 1.5 Present vegetable and fruit attractively using suitable garnishes, where appropriate.
2 Prepare farinaceous dishes.	2.1 Select and prepare a variety of <i>farinaceous foods</i> according to standard and enterprise recipes. 2.2 Prepare farinaceous foods using appropriate methods to ensure optimum quality. 2.3 Select sauces and accompaniments that are appropriate to farinaceous foods.
3 Prepare and cook egg-based dishes.	3.1 Prepare and cook a variety of <i>egg-based dishes</i> according to standard recipes, using a range of methods including boiling, poaching, frying and scrambling. 3.2 Prepare and cook egg dishes to ensure optimum and desired quality, consistency and appearance. 3.3 Select sauces and accompaniments appropriate to eggs. 3.4 Use eggs for a variety of <i>culinary uses</i> .
4 Store vegetables, eggs and farinaceous foodstuffs.	4.1 Store fresh and processed eggs, vegetables and fruit, and farinaceous foodstuffs at correct temperatures and under correct conditions to maintain optimum freshness and quality.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the essential skills and knowledge and their level, required for this unit.

The following skills must be assessed as part of this unit:

- cutting and presentation techniques, particularly in relation to vegetables and fruit
- organisational skills and teamwork
- logical and time-efficient work flow
- waste minimisation techniques and environmental considerations in relation to vegetables, fruit, eggs and farinaceous dishes
- safe work practices, particularly in relation to using knives
- problem-solving skills to deal with problems such as shortages of food items, mistakes or problems in commodities or meals produced, and equipment failure
- literacy skills to read orders and instructions
- numeracy skills to calculate quantities and portions against orders.

The following knowledge must be assessed as part of this unit:

- varieties and characteristics of vegetables, fruit, eggs and farinaceous foods
- past and current trends in culinary uses and dishes using vegetables, fruit, eggs and farinaceous foods
- nutrition related to vegetables, fruit, eggs and farinaceous dishes, in particular the food values of commodities and the effects of cooking on the nutritional value of food
- culinary uses and common industry terms in relation to vegetables, fruit, egg and farinaceous dishes
- principles and practices of hygiene, in particular those related to the use of raw ingredients.

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the Assessment Guidelines for this Training Package.

EVIDENCE GUIDE

Critical aspects for assessment and evidence required to demonstrate competency

Evidence of the following is essential:

- ability to prepare a variety of dishes using vegetables and fruit
- ability to prepare a variety of egg-based dishes, both classical and contemporary of varying cultural origins, using a variety of methods
- ability to make a variety of farinaceous dishes and present them with suitable accompanying sauces
- detailed understanding of the different classifications of vegetables, fruit, eggs and farinaceous products
- preparation of dishes for customers within typical workplace time constraints.

Context of and specific resources for assessment

Assessment must ensure:

- demonstration of skills within a fully equipped operational commercial kitchen, including industry-current equipment, as defined in the Assessment Guidelines
- use of authentic ingredients
- industry-realistic ratios of kitchen staff to customers.

Methods of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- direct observation of the candidate preparing dishes
- sampling of dishes cooked by the candidate
- written or oral questions to test knowledge of safety issues and appropriate cooking methods for various commodities
- review of portfolios of evidence and third-party workplace reports of on-the-job performance by the candidate.

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:

SITHCCC006A Prepare appetisers and salads.

EVIDENCE GUIDE

Assessing employability skills

Employability skills are integral to effective performance in the workplace and are broadly consistent across industry sectors. How these skills are applied varies between occupations and qualifications due to the different work functions and contexts.

Employability skills embedded in this unit should be assessed holistically with other relevant units that make up the skill set or qualification and in the context of the job role.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording in the performance criteria is detailed below.

Farinaceous foods may include:

- pasta
- rice
- polenta
- noodles
- couscous
- semolina
- pulses
- cracked wheat.

Egg-based dishes must include:

- omelettes and frittatas
- soufflés
- eggs benedict
- egg salads
- egg dips.

RANGE STATEMENT

Culinary uses must include:

- aerating
- binding
- setting
- coating
- enriching
- emulsifying
- glazing
- clarifying
- garnishing
- thickening.

Unit Sector(s)

Sector Hospitality

Competency field

Competency field Commercial Cookery and Catering

SITHCCC016A Develop cost-effective menus

Modification History

Not applicable.

Unit Descriptor

Unit descriptor

This unit describes the performance outcomes, skills and knowledge required to develop menus and plan, prepare and control menu-based catering costs within established enterprise systems. It does not deal with the specialised skills for the development of menus to meet market or special dietary needs which are found in the units SITHCCC035A Develop menus to meet special dietary and cultural needs and SITHCCC040A Design menus to meet market needs.

Menus may be classical, modern or ethnic.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Application of the Unit

Application of the unit

This unit applies to all hospitality and catering enterprises where food is prepared and served such as restaurants, hotels and other catering operations. It applies to those involved in planning menus and monitoring costs who work with considerable autonomy or in a supervisory role such as cooks, chefs and catering supervisors.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Prerequisite units Nil

Employability Skills Information

Employability skills The required outcomes described in this unit of competency contain applicable facets of employability skills. The Employability Skills Summary of the qualification in which this unit is packaged will assist in identifying employability skills requirements.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency. Performance criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the required skills and knowledge and/or the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Plan and develop different types of menus.	<p>1.1 Identify enterprise and customer requirements for <i>menus</i>.</p> <p>1.2 Prepare menus ensuring that menu items take into account balance in the variety of cooking methods, colours, tastes and textures; nutritional values; seasonal availability; and results of sales analysis and customer feedback.</p> <p>1.3 Cost menus to ensure maximum profitability and compliance with enterprise <i>costing constraints</i>.</p> <p>1.4 Prepare innovative menus as required by the enterprise,</p>

ELEMENT

PERFORMANCE CRITERIA

type of cuisine or particular situation.

- 1.5 Write menus using terminology appropriate to the market and style of menu, with item descriptions that promote menu items.

- 2 Control catering costs to ensure maximum profitability.
 - 2.1 Select and use appropriate *catering control systems* according to enterprise requirements.
 - 2.2 Plan production schedules, giving consideration to menu constraints, available equipment, expertise of labour and available time.
 - 2.3 Control labour costs, giving consideration to rosters, scheduling, award conditions and rates.
 - 2.4 Optimise quality and minimise waste through the application of portion control and effective yield testing.
 - 2.5 Apply stock control measures by following correct receiving and storing procedures.
 - 2.6 Apply procedures to maintain security in food production and storage areas to minimise risk of theft, damage or loss.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the essential skills and knowledge and their level, required for this unit.

The following skills must be assessed as part of this unit:

- various ways of sequencing food items in a menu, including classical and contemporary
- organisational skills and teamwork
- logical and time-efficient work flow
- problem-solving skills to make adjustments to a menu to reduce costs
- literacy skills to read and verify customer profiles and preferences
- numeracy skills to cost menu items and calculate quantities of commodities and other requirements for a menu.

The following knowledge must be assessed as part of this unit:

- different types and styles of menus
- historical development of menus, modern trends in menus
- principles of nutrition, including:
 - Dietary Guidelines for Australian Adults
 - Dietary Guidelines for Children and Adolescents in Australia
 - planning nutritionally-balanced menus
- culinary terms related to menus and food items commonly used in the industry
- determinants of profitability in menu-based catering operations
- inventory and stock control systems
- purchasing, receiving, storing, holding and issuing procedures
- costing, yield testing and portion control
- food wastage and control
- labour costs for commercial kitchens in general and for the organisation in particular.

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the Assessment Guidelines for this Training Package.

EVIDENCE GUIDE

Critical aspects for assessment and evidence required to demonstrate competency

Evidence of the following is essential:

- ability to develop a variety of innovative menus within budgetary guidelines
- development of nutritionally and seasonally balanced menus
- ability to cost menus to meet enterprise profit requirements.

Context of and specific resources for assessment

Assessment must ensure:

- demonstration of skills in planning and costing multiple menus for different customers and operational needs
- use of current industry data and prices.

Methods of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- review of samples of menus, production schedules, security plans and checklists prepared by the candidate
- oral or written questions to assess knowledge of menu items, menu types and characteristics, portion control and cost control
- review of portfolios of evidence and third-party workplace reports of on-the-job performance by the candidate.

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:

- SITHCCC029A Prepare foods according to dietary and cultural needs
- SITHCCC033B Apply catering control principles
- SITHCCC035A Develop menus to meet special dietary and cultural needs
- SITHCCC040A Design menus to meet market needs.

EVIDENCE GUIDE

Assessing employability skills

Employability skills are integral to effective performance in the workplace and are broadly consistent across industry sectors. How these skills are applied varies between occupations and qualifications due to the different work functions and contexts.

Employability skills embedded in this unit should be assessed holistically with other relevant units that make up the skill set or qualification and in the context of the job role.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording in the performance criteria is detailed below.

Types of *menus* may include:

- table d'hôte
- à la carte
- set
- function
- buffet
- cyclical.

Costing constraints may include:

- enterprise policy on menu pricing and gross margins
- budgets
- labour requirements.

RANGE STATEMENT

Catering control systems can be manual or computerised, and may include use of the following:

- production planning sheets
- sales analysis forms
- daily kitchen reports
- wastage sheets.

Unit Sector(s)

Sector Hospitality

Competency field

Competency field Commercial Cookery and Catering

SITHCCC030A Package prepared foodstuffs

Modification History

Not applicable.

Unit Descriptor

Unit descriptor

This unit describes the performance outcomes, skills and knowledge required to package prepared foodstuffs for storage and transportation from one location to another.

The type of packaging used will vary according to the enterprise needs and the type of food being packaged.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Application of the Unit

Application of the unit

This unit applies to catering operations where food and related services are provided and packaged for storage or transportation, such as restaurants, educational institutions, health establishments, defence forces, cafeterias, kiosks, cafes, residential catering, in-flight and other transport catering, events catering and private catering. Those undertaking this role usually work under supervision and as part of a team.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Prerequisite units This unit must be assessed after the following prerequisite units:
SITXFSA001A Implement food safety procedures
SITXOHS002A Follow workplace hygiene procedures.

Employability Skills Information

Employability skills The required outcomes described in this unit of competency contain applicable facets of employability skills. The Employability Skills Summary of the qualification in which this unit is packaged will assist in identifying employability skills requirements.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency. Performance criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the required skills and knowledge and/or the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Ensure food is suitable for packaging, storage and transportation.	1.1 Ensure that food meets requirements prior to packaging in terms of quality, shelf life, microbiological condition and portion control.

ELEMENT	PERFORMANCE CRITERIA
2 Select packaging materials.	2.1 Select <i>packaging materials</i> appropriate to specific foods, storage or transport requirements and enterprise procedures.
3 Package food according to needs.	3.1 Package food items using <i>appropriate packaging</i> procedures according to enterprise specifications. 3.2 Label foods according to the current Australia New Zealand Food Standards Code and local, state or territory regulations. 3.3 Comply with local, state and territory and national hygiene, OHS, and food and health regulation requirements. 3.4 Observe <i>environmental requirements</i> for the food packaging area, including temperature control, humidity and design and construction of shelving and storage facilities.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the essential skills and knowledge and their level, required for this unit.

The following skills must be assessed as part of this unit:

- safe work practices with regard to packaging, dealing with hot surfaces, lifting and bending
- problem-solving skills to deal with minor problems such as breakage of materials, lack of sufficient quantities of materials and tight timelines
- literacy skills to read instructions and orders and to write labels
- numeracy skills to calculate quantities of food items and packaging materials for particular jobs.

The following knowledge must be assessed as part of this unit:

- hygiene and food safety regulations, particularly related to storing and transporting food, including local, state or territory and national food and health regulations pertaining to food production and packaging
- characteristics and uses of different packaging materials
- environmental appropriateness of different packaging materials
- portion control practices and principles
- functional design requirements for food packaging areas.

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the Assessment Guidelines for this Training Package.

EVIDENCE GUIDE

Critical aspects for assessment and evidence required to demonstrate competency

Evidence of the following is essential:

- safe packaging within food safety requirements and regulations
- selection and use of suitable packaging materials and methods for a range of food item types
- industry-realistic timeframes for the packaging process.

Context of and specific resources for assessment

Assessment must ensure:

- demonstration of skills using a range of appropriate packaging materials, catering equipment and authentic food items.

Methods of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- direct observation of the candidate packaging foods
- inspection of items packaged by the candidate
- written or oral questions to test knowledge of packaging types and methods for different types of food, hygiene aspects of packaging, maintaining food quality and nutritional value
- review of portfolios of evidence and third-party workplace reports of on-the-job performance by the candidate.

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:

SITXFSA003A Transport and store food in a safe and hygienic manner.

EVIDENCE GUIDE

Assessing employability skills

Employability skills are integral to effective performance in the workplace and are broadly consistent across industry sectors. How these skills are applied varies between occupations and qualifications due to the different work functions and contexts.

Employability skills embedded in this unit should be assessed holistically with other relevant units that make up the skill set or qualification and in the context of the job role.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording in the performance criteria is detailed below.

Packaging materials may include:

- polystyrene foam
- cartons
- plastic cling wrap
- plastic or foil containers
- metal or plastic trays.

Appropriate packaging must be:

- non-contaminating
- of appropriate dimensions for selected food
- visually appropriate to functional need
- capable of protecting food from damage
- environmentally appropriate
- stackable and transportable.

RANGE STATEMENT

Environmental requirements
relate to:

- temperature control
- humidity
- design and construction of shelving and storage facilities
- protection from contaminants, including pests and foreign objects
- cleaning and sanitising packaging equipment and area.

Unit Sector(s)

Sector Hospitality

Competency field

Competency field Commercial Cookery and Catering

SITHCCC033A Apply catering control principles

Modification History

Not applicable.

Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to apply cost control principles to the ordering, storage and processing of food to minimise wastage.

Cost control procedures are the processes and procedures implemented at an operational level that result in the control of costs, energy usage, materials and time.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Application of the Unit

This unit applies to all operations where food and related services are provided, such as restaurants, educational institutions, health establishments, defence forces, cafeterias, kiosks, cafes, residential catering, in-flight and other transport catering, events catering and private catering.

Licensing/Regulatory Information

Refer to Unit Descriptor

Pre-Requisites

This unit must be assessed after the following prerequisite units:

SITHCCC005A Use basic methods of cookery

SITHCCC016A Develop cost-effective menus.

Employability Skills Information

The required outcomes described in this unit of competency contain applicable facets of employability skills. The Employability Skills Summary of the qualification in which this unit is packaged will assist in identifying employability skills requirements.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Where **bold italicised** text is used, further information is detailed in the required skills and knowledge and/or the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

Elements and Performance Criteria

Element	Performance Criteria
1 Identify procedures to reduce wastage.	1.1 Identify appropriate procedures for reducing wastage during ordering, storage and processing of food.
	1.2 Identify appropriate security measures to reduce loss.
2 Carry out cost control procedures.	2.1 Carry out portion control effectively using calibrated equipment where appropriate.
	2.2 Follow recipes accurately to avoid wastage.
	2.3 Order suitable quantities of stock to avoid over or under-ordering.
	2.4 Rotate and document stock accurately.
	2.5 Store food correctly and securely to minimise contamination, wastage, loss and theft.
3 Minimise waste.	3.1 Use reusable by-products of food preparation and cooking effectively where appropriate.
	3.2 Use recyclable products and dispose of them in an environmentally appropriate way.
	3.3 Dispose of non-recyclable products according to OHS requirements and relevant regulations, and in an environmentally appropriate way.

Required Skills and Knowledge

This section describes the essential skills and knowledge and their level, required for this unit.

The following skills must be assessed as part of this unit:

preparation and cooking, stock control and storage procedures that assist waste minimisation and environmental sustainability

problem-solving skills to deal with options to minimise contamination and waste, increase yield and improve security

literacy skills to read recipes, menus, instructions and orders

numeracy skills to calculate costs of menu items, commodities, portioning and yield analysis.

The following knowledge must be assessed as part of this unit:

role of the kitchen as a profit centre within an overall business

links between hygiene, food safety, waste minimisation and environmental sustainability.

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency

Evidence of the following is essential:

ability to use portion control, stock control and other waste reduction measures effectively

ability to use the food safety program effectively to minimise food contamination and spoilage

ability to minimise wastage and manage waste productively, including recycling systems

production of portion-controlled menu items.

Context of and specific resources for assessment

Assessment must ensure:

demonstration of skills within a fully equipped commercial kitchen using authentic ingredients and food items, as defined in the Assessment Guidelines.

Methods of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

evaluation of amount of products used by the candidate across a period of operation

review of reports prepared by the candidate detailing ways in which waste was minimised during a service period

written or oral questions to test knowledge of waste minimisation and control systems

review of stock control and portion control documentation prepared by the candidate

review of portfolios of evidence and third-party workplace reports of on-the-job performance by the candidate.

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended.

Assessing employability skills

Employability skills are integral to effective performance in the workplace and are broadly consistent across industry sectors. How these skills are applied varies between occupations and qualifications due to the different work functions and contexts. Employability skills embedded in this unit should be assessed holistically with other relevant units that make up the skill set or qualification and in the context of the job role.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording in the performance criteria is detailed below.

Procedures for reducing wastage must include:

portion control
ordering to specifications
stock rotation
using appropriate equipment
appropriate storage
using standard recipe cards
following a food safety risk management program.

Reusable by-products may include:

meat and fish offcuts
bones and trimmings
vegetable peelings and offcuts.

Recyclable products may include:

glass bottles and jars
plastics
paper and cardboard
tin or aluminium containers
vegetable matter.

Unit Sector(s)

Hospitality

Competency field

Commercial Cookery and Catering

SITXFSA001A Implement food safety procedures

Modification History

Not applicable.

Unit Descriptor

Unit descriptor

This unit describes the performance outcomes, skills and knowledge required to handle food safely during the storage, preparation, display, service and disposal of food within a range of service industry operations. It requires the ability to follow predetermined procedures as outlined in an organisation food safety program.

This unit is one of three hierarchical units describing varying levels of participation in food safety processes:

- SITXOHS002A Follow workplace hygiene procedures
- SITXFSA001A Implement food safety procedures
- SITXFSA002A Develop and implement a food safety program.

Food safety is nationally legislated by the Food Standards Australia New Zealand Act 1991 which provides for the operation of a statutory authority known as Food Standards Australia New Zealand.

The Australia New Zealand Food Standards Code (the Code) developed by this authority contains an individual standard for food safety practices. This unit of competency complies with the legislative requirements for food safety and safe food handling practices as outlined in the Code.

The legislative requirement for a business to comply with the national standard for food safety practices, along with training and certification requirements, differ between state and territory governments.

In some cases food handlers and especially designated food safety supervisors, may be required to formally achieve competence in implementing safe food handling practices through a registered training organisation that must use this unit as the basis for their training.

Application of the Unit

Application of the unit This unit has application to hospitality, commercial catering and retail venues where food is stored, prepared, displayed, served and disposed of. It applies to venues that operate a permanent or temporary kitchen or smaller food preparation area, including restaurants, cafes, clubs, hotels, attractions, events and conference venues, fast food restaurants, retail food outlets such as sandwich shops and food court outlets. It would apply to tour operators involved in the preparation and service of food at temporary sites.

Other industries will need to access industry-specific food safety units of competency.

Safe food handling practices are based on policies and procedures outlined in an organisation food safety program. The program and its procedures would normally be based on the hazard analysis and critical control points (HACCP) method but this unit can apply to other food safety systems.

This unit applies to frontline operational personnel who work under supervision and guidance and operate within predefined organisational food safety procedures. This function is undertaken by a diverse range of people, such as cooks, chefs, catering staff and kitchen hands, food and beverage attendants, cafe and fast food outlet cooking crew and sales people, and owner-operators of small business catering operations or retail food outlets.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Prerequisite units This unit must be assessed after the following prerequisite unit:

- SITXOHS002A Follow workplace hygiene procedures.

Employability Skills Information

Employability skills The required outcomes described in this unit of competency contain applicable facets of employability skills. The Employability Skills Summary of the qualification in which this unit is packaged will assist in identifying employability skills requirements.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency. Performance criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the required skills and knowledge and/or the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Implement procedures for food safety.	<p>1.1 Access and use the relevant documents from the organisation food safety program.</p> <p>1.2 Follow all food safety <i>policies and procedures</i> correctly and consistently according to organisation food safety program requirements to ensure compliance of all food handling practices.</p> <p>1.3 Control all <i>food hazards</i> at <i>critical control points</i>.</p> <p>1.4 Complete any <i>food safety monitoring</i> processes and complete documents as outlined in the food safety program.</p> <p>1.5 Identify and report any practices that are inconsistent with the food safety program.</p> <p>1.6 Take any corrective actions within scope of job responsibility for <i>incidents where food hazards are found not to be under control</i>.</p>

ELEMENT	PERFORMANCE CRITERIA
2 Store food safely.	<p>2.1 Select food storage conditions appropriate to the specific <i>food type</i>.</p> <p>2.2 Store food in the appropriate environmental conditions so that it is protected from contamination and to ensure its freshness, quality and appearance.</p> <p>2.3 Store food at appropriately controlled temperatures and ensure that any frozen items remain frozen during storage.</p>
3 Prepare food safely.	<p>3.1 Prepare food in a safe manner to ensure that it is protected from contamination.</p> <p>3.2 Use cooling and heating processes that will not adversely affect the microbiological safety of the food.</p> <p>3.3 Monitor temperature of food throughout the preparation process to achieve microbiological safety of the food at all times.</p> <p>3.4 <i>Ensure the safety of food prepared, served and sold to customers under other conditions.</i></p>
4 Provide safe single use items.	<p>4.1 Store, display and provide single use items so that they are protected from damage and contamination.</p> <p>4.2 Do not re-use <i>items intended for single use</i>.</p>
5 Maintain a clean environment.	<p>5.1 Clean and sanitise equipment, surfaces and utensils used during food handling process.</p> <p>5.2 Use appropriate containers and do not allow the accumulation of garbage and recycled matter.</p> <p>5.3 Identify and report any equipment that requires cleaning or <i>maintenance to ensure its cleanliness and safe operation.</i></p> <p>5.4 Dispose of any chipped, broken or cracked eating, drinking or food handling utensils or report these if disposal is outside scope of responsibility.</p> <p>5.5 Take measures within scope of responsibility to ensure food handling areas are free from animals and pests and report any incidents of animal or pest infestation.</p>

ELEMENT

PERFORMANCE CRITERIA

- 6 Dispose of food safely.
- 6.1 Mark and keep separate from other foodstuffs any *food identified for disposal* until disposal is complete.
 - 6.2 Dispose of food promptly to ensure no cross-contamination of other foodstuffs.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the essential skills and knowledge and their level, required for this unit.

The following skills must be assessed as part of this unit:

- operation of equipment, especially how to calibrate, use and clean a temperature probe and how to identify faults
- literacy skills to read and interpret relevant components of organisation food safety program, including policies, procedures and flow charts that identify critical control points and to complete basic documentation relating to monitoring food safety
- numeracy skills to take and record temperatures and to calculate times.

The following knowledge must be assessed as part of this unit:

- basic understanding of federal, and state or territory food safety legislative compliance requirements, contents of national codes and standards that underpin regulatory requirements, and local government food safety regulations and inspection regimes
- working knowledge of relevant components of the organisation food safety program, especially policies, procedures, product specifications and the use of any monitoring documents
- consequences of failure to observe food safety policies and procedures
- basic understanding of HACCP principles, procedures and processes
- critical control points for the specific food production system and the predetermined methods of control, especially time and temperature controls used in the storage, preparation, display, service and disposal of food
- meaning of hazardous foods, especially as described by local legislation and national food codes
- high risk customer groups (those who may have a higher than average risk of harm from food contamination), such as:
 - children or babies
 - pregnant women
 - aged persons
 - people with immune deficiencies or allergies
- methods of food storage, production, display, service and disposal for the industry sector and food business, especially appropriate temperature levels for each of these processes
- broad understanding of the main types of safety hazards and contamination that may be found in the main food types handled by the industry sector and food business
- broad understanding of the conditions for development of microbiological contamination for the main food types handled by the industry sector and food business
- broad understanding of the appropriate environmental conditions, including temperature controls, for the storage of the main food types handled by the industry sector and food business

REQUIRED SKILLS AND KNOWLEDGE

- temperature danger zone for the main food types handled by the industry sector and food business and the two-hour and four-hour rule
- principles and methods of safe food handling
- choice and application of cleaning, sanitising and pest control equipment and materials.

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency Evidence of the following is essential:

- ability to access and interpret safe food handling procedures and consistently apply these during day-to-day food handling activities
- knowledge of critical control points and methods of food hazard control for each critical point
- project or work activities that show the candidate's ability to apply safe food handling practices on multiple occasions across a range of different food handling circumstances to ensure consistency in the application of food safety procedures.

EVIDENCE GUIDE

Context of and specific resources for assessment

Assessment must ensure:

- access to a fully equipped industry-realistic food preparation environment, such as a commercial kitchen, catering production line, or food preparation area of a food outlet using the full range of equipment currently used in the service industries to store, prepare, display, serve and dispose of food
- access to current regulatory documents distributed by key federal, state or territory, and local government agencies, such as plain English legislative publications, and codes and standards outlining food safety requirements
- access to a food safety program inclusive of policies and procedures
- use of real ingredients and food items.

Methods of assessment

A range of assessment methods should be used to assess the practical skills and knowledge required to implement food safety procedures. The following examples are appropriate for this unit:

- direct observation of the candidate completing tasks in the food handling facility according to food safety policies and procedures
- case studies to assess ability to react to a range of incidents where hazards have not been controlled
- oral or written questions to assess knowledge of food safety legislative requirements, policies and procedures
- oral or written questions to assess knowledge of food hazards and methods of controlling hazards
- review of portfolios of evidence and third-party workplace reports of on-the-job performance by the candidate.

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:

- any commercial cookery, commercial catering, patisserie, Asian cookery or food and beverage unit directly involving food preparation.

EVIDENCE GUIDE

Assessing employability skills

Employability skills are integral to effective performance in the workplace and are broadly consistent across industry sectors. How these skills are applied varies between occupations and qualifications due to the different work functions and contexts.

Employability skills embedded in this unit should be assessed holistically with other relevant units that make up the skill set or qualification and in the context of the job role.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording in the performance criteria is detailed below.

Policies and procedures may relate to:

- food receiving, storage, preparation, display, service and disposal
- methods of food hazard control for each critical point
- systematic monitoring of hazard controls and record keeping
- personal hygiene, suitable dress and personal protective equipment and clothing
- record maintenance
- corrective actions when hazards are found not to be under control
- pest control
- cleaning and sanitation
- equipment maintenance.

RANGE STATEMENT

Food hazards may be:

- anything related to food, including work practices and procedures, that have a potential to harm the health or safety of a person
- actual or potential
- chemical, microbiological or physical
- any food contaminated with chemical or microbiological elements
- foods highly susceptible to microbiological contamination
- food containing bacteria, moulds and yeast
- food containing broken glass, metal or foreign objects
- food containing chemicals and natural poisons
- insects and vermin
- processes where food is vulnerable to contamination including:
 - requirements for food to be touched by hand
 - requirements for re-thermalisation or defrosting
 - displays of food and buffets
 - working with temperatures that promote the rapid growth of micro-organisms.

Critical control points are those where there is high risk of contamination or food spoilage, including:

- receiving
- storing
- preparing
- processing
- displaying
- packaging
- serving
- transporting
- disposing.

RANGE STATEMENT

Food safety monitoring may involve:

- monitoring and recording temperature of cold and hot storage equipment
- monitoring and recording food temperatures using a temperature probe
- checking and recording that food is stored within appropriate time limits of receipt of goods
- visual examination of food for quality review
- bacterial swabs and counts
- chemical tests.

Incidents where food hazards are found not to be under control may include:

- food poisoning
- customer complaints
- misuse of single use items
- stocks of out-of-date foodstuffs
- spoilt or contaminated food
- unclean equipment
- existence of pests and vermin.

Food types may include:

- eggs
- dairy
- meat and fish
- fruit and vegetables
- dried goods
- frozen goods.

Food prepared, served and sold to customers under other conditions may involve:

- displaying any type of food for self-service, such as:
 - buffets
 - salad bars
 - condiments
 - tea and coffee
- providing drink dispensing equipment
- pre-packaging food items
- displaying and selling pre-packaged food.

RANGE STATEMENT

Ensuring the safety of food served and sold to customers under other conditions may involve:

- supervising the display of food to prevent contamination by customers
- removing contaminated food without delay
- providing separate serving utensils for each dish
- providing protective barriers
- displaying food under temperature control
- using packaging materials suitable for use on the particular foodstuff
- ensuring that packaging is not damaged during packaging or display process
- ensuring that damaged packaging does not allow contamination.

Items intended for single use may include:

- disposable cutlery, e.g. plastic or wooden spoons or stirrers
- disposable plates, mugs, cups and bowls
- individually packaged sugars
- individually packaged condiments, e.g. tomato sauce
- individually packaged jams and spreads
- individually packaged serves of coffee, tea and whitener
- face wipes and serviettes.

Maintenance to ensure cleanliness and safe operation of equipment may involve:

- removal of food waste
- removal of grease
- removal of dirt
- removal of animal or pest waste and cleaning of affected area
- recalibration of measurement and temperature controls.

Food identified for disposal may be:

- subject to recall
- not safe, or suspected of not being safe, for consumption
- destroyed
- disposed of so that it cannot be used for human consumption
- returned to supplier.

Unit Sector(s)

Competency field Food Safety

SITXFSA003A Transport and store food in a safe and hygienic manner

Modification History

Not applicable.

Unit Descriptor

Unit descriptor

This unit describes the performance outcomes, skills and knowledge required to transport food from a food preparation area to another location. It also deals with holding or storage on its arrival. The unit applies to all catering operations but is particularly relevant to external catering and events.

This unit does not cover the transport of food for room service which is covered in SITHFAB008A Provide room service. It does not cover the skills required to drive a van or truck which are covered in TLIC107C Drive vehicle and other units of competency in the Transport and Distribution Training Package.

Transportation refers to the moving of food and food items from one location to another. For example, transporting food from a kitchen to a school or hospital or providing event catering. It does not refer to the transport of food from the kitchen to the dining room or as part of room service.

The person transporting the food may or may not be driving the vehicle.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Application of the Unit

Application of the unit This unit applies to catering operations where food is transported from the preparation area to another location and stored on arrival, such as operations associated with restaurants, educational institutions, health establishments, defence forces, cafeterias, kiosks, cafes, residential catering, in-flight and other transport catering, events catering and private catering.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Prerequisite units This unit must be assessed after the following prerequisite units:

- SITXFSA001A Implement food safety procedures
- SITXOHS002A Follow workplace hygiene procedures.

Employability Skills Information

Employability skills The required outcomes described in this unit of competency contain applicable facets of employability skills. The Employability Skills Summary of the qualification in which this unit is packaged will assist in identifying employability skills requirements.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the required skills and knowledge and/or the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Identify appropriate food transportation.	1.1 Select suitable food <i>transportation</i> vehicles according to <i>legislative requirements</i> .
2 Transport food safely and hygienically.	2.1 Package, load, restrain and unload food appropriately. 2.2 Employ hygienic work practices and observe OHS regulations. 2.3 Maintain appropriate and accurate records of food transportation.
3 Store food safely and hygienically.	3.1 Select food storage conditions appropriate to <i>specific food types</i> . 3.2 Maintain appropriate <i>environmental conditions</i> for specific food types to ensure freshness, quality and appearance. 3.3 Ensure that storage and holding methods optimise nutritional quality and comply with relevant stock control principles. 3.4 Employ hygienic work practices and observe OHS procedures and practices. 3.5 Keep storage areas free from contaminants and pests.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the essential skills and knowledge and their level, required for this unit.

The following skills must be assessed as part of this unit:

- safe work practices, in particular loading and unloading, lifting and dealing with heated surfaces
- problem-solving skills to deal with minor problems such as delays with products, traffic congestion and getting lost
- literacy skills to read directions and instructions for venues and locations
- numeracy skills to calculate quantities during the packing and unpacking process.

The following knowledge must be assessed as part of this unit:

- hygiene and OHS requirements for food storage and transport
- advantages and disadvantages of different forms of transport for particular food items, quantities and circumstances
- safe storage principles and practices for different food types, including storage options
- characteristics of different food items and conditions required to maintain optimum freshness, palatability and safety.

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency Evidence of the following is essential:

- safe transport and storage of food items within food safety requirements and regulations
- transport of a range of food item types.

EVIDENCE GUIDE

Context of and specific resources for assessment

Assessment must ensure:

- demonstration of skills using real food items to be transported and relevant transportation and storage equipment to move food between locations.

Methods of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- direct observation of the candidate transporting and storing food items
- inspection of food transported and stored by the candidate
- problem-solving and case studies to address various conditions that apply to the transport and storage of different food items
- written or oral questions to test knowledge of hygiene issues related to transport and storage
- review of portfolios of evidence and third-party workplace reports of on-the-job performance by the candidate.

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:

- SITHCCC030A Package prepared foodstuffs.

Assessing employability skills

Employability skills are integral to effective performance in the workplace and are broadly consistent across industry sectors. How these skills are applied varies between occupations and qualifications due to the different work functions and contexts.

Employability skills embedded in this unit should be assessed holistically with other relevant units that make up the skill set or qualification and in the context of the job role.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording in the performance criteria is detailed below.

- Type of *transportation* used:
- will vary according to organisation needs and type of food being transported
 - may include:
 - vans
 - cars
 - refrigerated trucks
 - trolleys, carts and buggies.

- Legislative requirements* refer to federal, state or territory, and local regulations and guidelines and may apply to:
- temperature
 - lining
 - sealing
 - food safety programs.

- Specific food types* must include:
- dairy
 - meat and fish
 - eggs
 - fruit and vegetables
 - dried goods
 - frozen food.

- Environmental conditions* may involve:
- temperature
 - humidity
 - exposure to light
 - exposure to weather
 - exposure to pests.

Unit Sector(s)

Competency field Food Safety

SITXICT001A Build and launch a website for a small business

Modification History

Not applicable.

Unit Descriptor

Unit descriptor

This unit describes the performance outcomes, skills and knowledge required to build a basic website to meet business needs, including selecting a hosting service and appropriate web development software, planning the website structure and undertaking the actual construction of the site. It requires the technical skills and knowledge typically needed by a business that elects to develop its own site rather than access the services of IT professionals.

This unit satisfies the requirements of BSBEBUS506A Plan and develop a business website, in the Business Services Training Package. BSBEBUS506A has been customised to articulate the technical skills required for building a website and define the scope of skills and knowledge required.

Application of the Unit

Application of the unit

This unit describes a skill relevant to any business within the service industries and applies to the full range of industry sectors and environments. It is particularly relevant to those in small businesses who develop their own websites.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Prerequisite units Nil

Employability Skills Information

Employability skills The required outcomes described in this unit of competency contain applicable facets of employability skills. The Employability Skills Summary of the qualification in which this unit is packaged will assist in identifying employability skills requirements.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency. Performance criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the required skills and knowledge and/or the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Plan website structure.	<p>1.1 Develop website style and structure to suit the <i>business purpose</i> and intended target audience according to business website strategy.</p> <p>1.2 Identify and include appropriate <i>features and capabilities</i> within the website structure.</p> <p>1.3 Determine layout and navigation requirements in relation to appearance, readability, links and <i>ease of operation</i>.</p> <p>1.4 Identify and apply accessibility requirements for website to ensure maximum accessibility.</p>

ELEMENT	PERFORMANCE CRITERIA
	<ul style="list-style-type: none"> 1.5 Document structure clearly and accurately to facilitate an efficient development process. 1.6 Develop and integrate appropriate interactive forms into the website structure to capture customer data. 1.7 Select <i>authoring tools and software</i> based on website requirements. 1.8 Identify and integrate website <i>security requirements</i> into the development process.
2 Develop website content.	<ul style="list-style-type: none"> 2.1 Select and use business information to create website content according to business website strategy. 2.2 Define appropriate information for inclusion in interactive forms based on the purpose of the form. 2.3 Adapt information for inclusion on the web to ensure site is clear, scannable and readable. 2.4 Use language style and tone suited to business image to be conveyed and intended target audience. 2.5 Integrate <i>content features</i> into the website according to website structure and plan. 2.6 Check content for accuracy, currency and relevance according to website plan and purpose.
3 Create website pages.	<ul style="list-style-type: none"> 3.1 Create a plan for website pages and active links to meet layout and navigation requirements. 3.2 Select page titles and key words to reflect business purpose and website content, and to assist access via search engines. 3.3 Improve <i>page presentation</i> by adding <i>features</i> to enhance web pages. 3.4 Develop <i>linked web pages</i> according to website plan, ensuring links are clearly named and unambiguous. 3.5 Use appropriate techniques to create interactive forms within website pages. 3.6 Create all pages to be consistent with site design specifications.

ELEMENT	PERFORMANCE CRITERIA
4 Select and use a web hosting service.	<p>4.1 Identify <i>relevant sources of information on web hosting options</i>.</p> <p>4.2 Evaluate different web hosting services and select according to business and technical requirements.</p> <p>4.3 Upload files to selected web hosting service according to technical requirements and business agreements.</p>
5 Test and critically evaluate website.	<p>5.1 Test website functions, processes and navigation to confirm operational status, appearance, accuracy and ease of operation.</p> <p>5.2 Evaluate effectiveness of interactive forms to ensure that required sales data is collected for the business.</p> <p>5.3 Evaluate website according to business website strategy to ensure it projects a business image suited to the e-business model.</p> <p>5.4 Identify any problems, develop a range of strategies to solve them and select appropriate and sustainable solutions.</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the essential skills and knowledge and their level, required for this unit.

The following skills must be assessed as part of this unit:

- techniques for using colour and enhancing text within a website
- techniques for capture and manipulation of digital images and graphics, including insertion into a website
- writing skills to develop and review website content for diverse purposes and audiences.

The following knowledge must be assessed as part of this unit:

- general understanding of the internet and world wide web and their application and relevance to individual businesses
- current e-business environment for a particular business context
- general overview of different services and operation systems used by internet service providers
- general principles of website architecture and design
- role of a website in the marketing mix and ways in which the marketing effectiveness of a website can be enhanced
- key features of a marketing-oriented website
- general features of browsers, search engines and web crawlers, including how these impact on website design, decisions and meta-tags
- relationships between content and site design
- functions and features of micro-content elements such as headings, highlighted words and hyperlink text
- underlying impact of hypertext markup language (HTML) and cascading style sheets on site design
- features and uses of frames, forms and tables within a website
- privacy issues, codes of practice and legislative requirements in relation to the development of a website including:
 - OECD Guidelines for Consumer Protection in the Context of Electronic Commerce
 - World Wide Web Consortium (W3C) guidelines
 - copyright laws
 - defamation laws
 - privacy legislation and confidentiality requirements
 - intellectual property
 - legal and regulatory policies affecting e-business.

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the following is essential:

- ability to build a website to meet a specific business need through the integration and application of appropriate business and technical skills
- knowledge of the key features and functions to be incorporated into a business website.

Context of and specific resources for assessment

Assessment must ensure:

- demonstration of skills using current equipment, software and authoring tools to develop a business website to meet a particular business need.

EVIDENCE GUIDE

Methods of assessment

A range of assessment methods should be used to assess the practical skills and knowledge required to build and launch a website. The following examples are appropriate for this unit:

- evaluation of a website developed by the candidate through testing of the site against key criteria
- oral or written questioning to assess knowledge of functions, features, security requirements, ISP services and website design requirements
- review of portfolios of evidence and third -party workplace reports of on -the -job performance by the candidate.

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:

- BSBEBUS604A Develop a business website strategy
- BSBEBUS507A Manage the business aspects of a website.

Assessing employability skills

Employability skills are integral to effective performance in the workplace and are broadly consistent across industry sectors. How these skills are applied varies between occupations and qualifications due to the different work functions and contexts.

Employability skills embedded in this unit should be assessed holistically with other relevant units that make up the skill set or qualification and in the context of the job role.

BSBITU301A Create and use databases

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording in the performance criteria is detailed below.

- Business purpose* may include:
- promotion
 - sales
 - contracting and procurement
 - auctions
 - provision of information
 - collaboration
 - support to multiple businesses
 - change to supply chain integration
 - electronic payments
 - consultancy services
 - certification.

RANGE STATEMENT

Website *features and capabilities* may involve:

- marketing features
- legal requirements
- privacy and confidentiality requirements
- security requirements
- authentication facility or link
- customer service requirements
- shopping cart facilities
- electronic payment facilities
- online catalogues and brochures
- knowledge bases
- frequently asked questions (FAQs)
- thumbnails
- active links
- navigation buttons
- colour, sound, video, images and graphics
- downloadable files
- search facility
- facility of user feedback on content and operation of website
- text and tags in HTML
- cut down versions of web pages in wireless markup language (WML) for access by wireless application protocol (WAP) telephones.

Ease of operation may include:

- homepage download time
- time to download files
- difficulty in navigation.

Authoring tools and software may include a wide range of text editors and commercial applications such as:

- WordPad
- Notepad
- FrontPage
- Dreamweaver
- Adobe Photoshop.

RANGE STATEMENT

Security requirements may include:

- password protection
- limited viewing of rates
- limited downloading of images or image encoding
- payment mechanism.

Content features may include:

- knowledge bases
- products and services
- catalogues and brochures
- thumbnails
- FAQs
- company profile
- staff profiles
- business history
- client testimonials
- published materials.

Page presentation may include:

- animated sequences
- sound
- movie sequence
- plug ins
- downloadable files
- use of bold, italics, subscript, superscript and strikethrough
- different fonts and font sizes
- colour
- images, e.g. photographs and graphics
- bulleted or numbered lists
- tables
- interactive forms for bookings or enquiries.

Features to enhance web pages may include use of:

- frames
- colour
- photographic images
- graphics
- text enhancement.

RANGE STATEMENT

Linked pages may include:

- relative links: between a page and the home page
- fully qualified uniform resource locator (URL) link: to a page on another website.

Relevant sources of information on web hosting options may include:

- internet service providers (ISPs)
- industry associations
- IT media reviews and articles.

Competency field

Competency field

Computer Operations and ICT Management

SITXOHS002A Follow workplace hygiene procedures

Modification History

Not applicable.

Unit Descriptor

Unit descriptor

This unit describes the performance outcomes, skills and knowledge required to apply good hygiene practices within a range of service industry operations. It requires the ability to follow predetermined procedures, identify and control simple hazards and take particular hygiene measures to ensure the non-contamination of food and other items that might put customers, colleagues and self at a health risk.

This unit is one of three hierarchical units describing varying levels of participation in food safety processes:

- SITXOHS002A Follow workplace hygiene procedures
- SITXFSA001A Implement food safety procedures
- SITXFSA002A Develop and implement a food safety program.

Food safety is nationally legislated by the Food Standards Australia New Zealand Act 1991 which provides for the operation of a statutory authority known as Food Standards Australia New Zealand. The Australia New Zealand Food Standards Code (the Code) developed by this authority contains an individual standard for food safety practices. A large component of that standard deals with the health and hygiene of food handlers. This unit of competency complies with the legislative requirements for food safety and hygiene practices as outlined in the Code.

The legislative requirement for a business to comply with the national standard for food safety practices, along with training and certification requirements, differs between state and territory governments.

In some cases food handlers, especially designated food safety supervisors, may be required to formally achieve competence in hygiene practices through a registered training organisation that may use this unit as the basis for their training.

Application of the Unit

Application of the unit Personal hygiene practices underpin a range of service industry activities. They are particularly important within a food safety regime, but can also apply to housekeeping activities and anywhere where poor hygiene could provide a contamination risk. Poor hygiene practices can risk the health of customers, colleagues and self.

For the purposes of food safety, this unit only has application to hospitality, commercial catering and retail venues where food is stored, prepared, displayed and served. It will apply to any venue that operates a permanent or temporary kitchen or smaller food preparation area, such as restaurants, cafes, clubs, hotels, attractions, events and conference venues, fast food restaurants, retail food outlets such as sandwich shops and food court outlets. It would apply to tour operators involved in the preparation and service of food at temporary sites.

Other industries will need to access industry-specific food safety units of competency.

This unit applies to frontline operational personnel who work under close supervision and guidance from others during the normal course of their daily activities. They would be required to apply little discretion and judgement because they operate within predefined organisational hygiene procedures. Personal hygiene practices apply to all personnel operating at all levels within the service industries, such as kitchen hands, cooks, chefs, catering staff, food and beverage attendants, housekeeping and, laundry staff, sandwich hands, cafe and fast food outlet cooking crew and sales people and owner-operators of small business catering operations or retail food outlets.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Prerequisite units Nil

Employability Skills Information

Employability skills The required outcomes described in this unit of competency contain applicable facets of employability skills. The Employability Skills Summary of the qualification in which this unit is packaged will assist in identifying employability skills requirements.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency. Performance criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the required skills and knowledge and/or the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Follow hygiene procedures and identify hygiene hazards.	<p>1.1 Access and follow <i>hygiene procedures and policies</i> correctly and consistently according to organisation and legal requirements to ensure health and safety of customers and colleagues.</p> <p>1.2 Identify and report <i>poor organisation practices</i> that are inconsistent with hygiene procedures.</p> <p>1.3 Identify <i>hygiene hazards</i> that may affect the health and safety of customers, colleagues and self.</p> <p>1.4 Take action to remove or minimise the hazards within</p>

ELEMENT	PERFORMANCE CRITERIA
	scope of individual responsibility and according to organisation and legal requirements.
	1.5 Promptly report hygiene hazards to appropriate person for follow up where control of hazard is beyond the scope of individual responsibility.
2 Report any personal health issues.	2.1 Report any personal <i>health issues</i> that are likely to cause a hygiene risk.
	2.2 Report incidents of food contamination that have resulted from the personal health issue.
	2.3 Do not participate in food handling activities where there is a risk of food contamination as a result of the health issue.
3 Prevent food and <i>other item</i> contamination.	3.1 Maintain clean clothes, wear required personal protective clothing and only use organisation-approved bandages and dressings to prevent contamination to food.
	3.2 Ensure that no clothing or <i>other items worn</i> contaminate food.
	3.3 Prevent unnecessary direct contact with ready to eat food.
	3.4 Do not allow food to become contaminated with any body fluids or tobacco product from sneezing, coughing, blowing nose, spitting, smoking or eating over food or food preparation surfaces.
	3.5 Maintain the use of clean materials and clothes and safe and hygienic practices to ensure that no <i>cross-contamination of other items in the workplace occurs</i> .
4 Prevent cross-contamination by washing hands.	4.1 <i>Wash hands at appropriate times</i> and follow hand washing procedures correctly and consistently according to organisation and legal requirements.
	4.2 Wash hands using <i>appropriate facilities</i> .

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the essential skills and knowledge and their level, required for this unit.

The following skills must be assessed as part of this unit:

- communication skills to verbally report hygiene hazards and poor organisation practice
- literacy skills to read and interpret relevant organisation policies, procedures and diagrams that identify good hygiene practices.

The following knowledge must be assessed as part of this unit:

- very basic understanding of federal, and state or territory food safety legislative compliance requirements, contents of national codes and standards that underpin regulatory requirements, and local government food safety regulations
- working knowledge of organisation personal hygiene policies and procedures
- ramifications of failure to observe hygiene policies and procedures
- broad understanding of the general hazards in handling food, linen, laundry and garbage, including major causes of contamination and cross-infection
- sources and effects of microbiological contamination of food and other items that would require protection in the industry sector and business
- basic understanding of the choice and application of cleaning and sanitising equipment and materials.

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the Assessment Guidelines for this Training Package.

EVIDENCE GUIDE

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the following is essential:

- ability to access and interpret hygiene procedures and consistently apply these during day-to-day activities
- understanding of the importance of following hygiene procedures and of the potential implications of disregarding those procedures
- project or work activities that show the candidate's ability to apply good hygiene practices on multiple occasions in a range of different operational circumstances to ensure consistency in the application of hygiene procedures.

Context of and specific resources for assessment

Assessment must ensure:

- access to current regulatory documents distributed by key federal, state or territory, and local government agencies such as plain English legislative publications, codes and standards outlining food safety requirements
- access to hygiene policies and procedures
- project or work activities that show candidates' ability to apply good hygiene practices within the context of the particular industry sector in which they are working or seeking work; for those undertaking generic pre-employment training, assessment must cover a range of industry contexts to allow for a broad range of vocational outcomes
- use of real products, materials and equipment.

EVIDENCE GUIDE

Methods of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- direct observation of the candidate carrying out work tasks that involve following hygiene procedures
- oral and written questions about hygiene principles and practices, policies and procedures
- oral or written questions to assess knowledge of food hygiene legislative requirements
- case studies to assess ability to react to a range of incidents where hygiene hazards exist
- review of portfolios of evidence and third-party workplace reports of on-the-job performance by the candidate.

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:

- SITHACS005A Prepare rooms for guests
- SITHACS007A Launder linen and guest clothes
- SITXFSA001A Implement food safety procedures.

Assessing employability skills

Employability skills are integral to effective performance in the workplace and are broadly consistent across industry sectors. How these skills are applied varies between occupations and qualifications due to the different work functions and contexts.

Employability skills embedded in this unit should be assessed holistically with other relevant units that make up the skill set or qualification and in the context of the job role.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording in the performance criteria is detailed below.

RANGE STATEMENT

Hygiene procedures may relate to:

- personal hygiene
- safe and hygienic handling of food and beverages
- regular hand washing
- correct food storage
- suitable dress and personal protective equipment and clothing
- avoidance of cross-contamination
- hygienic cleaning practices to avoid cross-contamination
- use of cleaning equipment, clothes and materials to avoid cross-contamination
- safe handling and disposal of linen and laundry
- appropriate handling and disposal of garbage
- cleaning and sanitising
- procedures documented in the organisation food safety program
- procedures covered by staff training programs
- procedures required by the national food safety code.

Poor organisation practices may include:

- poor personal hygiene practices
- poor food handling practices that may result in the contamination of food
- poor cleaning practices that may result in cross-contamination of food and other items
- practices inconsistent with the organisation's food safety program
- outdated practices not in keeping with current organisation activities.

RANGE STATEMENT

Hygiene hazards may include:

- contaminated food
- vermin
- airborne dust
- items such as linen, tea towels and towels that may be contaminated with human waste, such as blood and body secretions
- dirty equipment and utensils
- contaminated garbage
- use of practices not in keeping with current organisation activities
- colleagues without appropriate training or understanding of good hygiene practices, policies and procedures
- equipment not working correctly, such as fridge and temperature probes.

Health issues may relate to:

- food-borne diseases
- airborne diseases
- infectious diseases.

Other items worn may include:

- hair accessories
- jewellery
- watches
- bandages.

Cross-contamination of other items in the workplace may involve:

- infected linen
- items such as linen, tea towels and towels that may be contaminated with human waste, such as blood and body secretions
- dirty equipment and utensils
- spreading bacteria from bathroom or bedroom areas to kitchen areas in an accommodation facility.

RANGE STATEMENT

Washing hands at appropriate times might include:

- immediately before working with food
- immediately after handling raw food
- before commencing or recommencing work with food
- immediately after using the toilet
- immediately after smoking, coughing, sneezing, blowing the nose, eating, drinking, and touching the hair, scalp or any wound.

Appropriate facilities for hand washing may include:

- warm running water
- soap
- single use towels
- designated hand washing sink.

1 Conduct routine pool water tests according to regulations and respond to test irregularities	1.1 Complete routine pool water tests in compliance with public health regulatory requirements and facility procedures 1.2 Compare pool water test results to public health

regulatory requirements

- 1.3 Report pool water test irregularities to the appropriate person for corrective action
- 2 **Respond to contamination incidents**
 - 2.1 Continually implement visual checks for **pool water quality** and initiate corrective actions
- 3 **Record routine pool water tests**
 - 3.1 Record pool water test results to aquatic facility specifications and meet the **public health regulatory requirements**

Required Skills and Knowledge

Not applicable.

Evidence Guide

The Evidence Guide identifies the critical aspects, knowledge and skills to be demonstrated to confirm competence for this unit. This is an integral part of the assessment of competence and should be read in conjunction with the Range Statements

Critical aspects of evidence to be considered

Assessment must confirm the ability integrated demonstration of all elements of competency and their performance criteria, in particular the ability to

- conduct regular pool water tests in compliance with public health regulatory requirements and correctly identify irregularities
- work within organisation policy and procedures and
- follow water treatment testing procedures governed by public health regulations for the treatment of public swimming pool water

Interdependent assessment of units

This unit must be assessed after attainment of competency in the following unit(s)

Nil

This unit must be assessed in conjunction with the following unit(s)

Nil

For the purpose of integrated assessment, this unit may be assessed in conjunction with the following unit(s)

Nil

Required knowledge and skills

Required knowledge

Organisation's objectives, policies and procedures

Procedures and processes for pool water testing

Basic pool water chemistry

Relevant occupational health and safety, government and industry regulations and legislative requirements

Required skills

Communication skills to record pool water test results and report irregularities

Use of pool water testing apparatus

Visual identification of pool water quality

Resource implications

Physical resources - assessment of this competency requires access to

an aquatic facility

an effectively simulated work environment or industry approved training centre

Human resources - assessment of this unit of competency will require human resources consistent with those outlined in the Assessment Guidelines. That is, assessors (or persons within the assessment team) must

be competent in this unit but preferably be competent in the unit at the level above

be current in their knowledge and understanding of the industry through provision of evidence of professional activity in the relevant area

have attained the mandatory competency requirements for assessors under the Australian Quality Training Framework (AQTF) as specified in Standard 7.3 of the **Standards for Registered Training Organisations**

Consistency in performance

Competence in this unit must be assessed over a period of time in order to ensure consistency of performance over the Range Statements and contexts applicable to the work environment

Context for assessment

This unit of competency must be assessed in the context of community recreation in Australia. For valid and reliable assessment the community recreation activity should closely replicate the work environment. The environment should be safe, with the hazards, circumstances and equipment likely to be encountered in a real workplace

This unit of competence should be assessed

through the observation of processes and procedures, oral and/or written questioning on required knowledge and skills and consideration of required attitudes

Where performance is not directly observed and/or is required to be demonstrated over a "period of time" and/or in a "number of locations", any evidence should be authenticated by colleagues, supervisors, clients or other appropriate persons

Range Statement

Range Statements

The Range Statements provide advice to interpret the scope and context of this unit of competence, allowing for differences between enterprises and workplaces. The Range Statements relate to the unit as a whole and helps facilitate holistic assessment. In addition, the following variables may be present for this particular unit of competency

RANGE STATEMENT

CATEGORIES

Pool water quality

refers to

pool water that is maintained within the limits set by public health regulations for microbiological, disinfectant, pH and clarity levels

Public health regulatory requirements

may vary according to state/territory regulations but includes

Health Act

infectious diseases regulations

Dangerous goods Act and Regulations

Poisons Act

metropolitan water supply, sewerage and drainage by-laws

Occupational health and safety Act and Regulations

environment legislation

local government regulations

Routine poolwater tests

may include tests for

free chlorine

total bromine

total chlorine

combined chlorine

pH

alkalinity

cyanuric acid

calcium hardness

total hardness

temperature

Unit Sector(s)

Not applicable.

SRCAQU004B Maintain pool water quality

Modification History

Not applicable.

Unit Descriptor

This unit has been developed for the Community Recreation Industry Training Package and covers the skills and knowledge to maintain the water quality of swimming pools/aquatic facilities according to health standards.

Application of the Unit

Elements and Performance Criteria

Elements and Performance Criteria

Element	Performance Criteria
1 Ensure regular water quality tests are conducted according to regulations	<p>1.1 Monitor routine pool water tests results to ensure they are completed in compliance with public health regulatory requirements and facility procedures</p> <p>1.2 Develop and implement schedules for pool water microbiological testing to meet the public health regulatory requirements</p>
2 Apply principles of pool water quality to adjust disinfectant levels and water balance	<p>2.1 Anticipate bather loading and implement corrective actions to maintain pool water quality</p> <p>2.2 Develop and implement processes for the use of chemicals for maintaining disinfectant levels and chemical balance of pool water to meet public health regulatory requirements</p> <p>2.3 Carry out water treatment procedures in accordance with the aquatic facility's operating plan for the treatment of pool water</p> <p>2.4 Observe safe handling of chemicals</p> <p>2.5 Undertake and meet calculation of the amount of chemical required to correct chemical imbalances in pool water public health regulatory requirements</p> <p>2.6 Use chemical dosing equipment for the treatment of pool water in accordance with the manufacturer's specifications and occupational health and safety requirements</p>
3 Record action taken	<p>3.1 Record pool water test results and corrective actions are recorded to aquatic facility specifications and meet public health regulatory requirements</p>

Required Skills and Knowledge

Not applicable.

Evidence Guide

The Evidence Guide identifies the critical aspects, knowledge and skills to be demonstrated to confirm competence for this unit. This is an integral part of the assessment of competence and should be read in conjunction with the Range Statements

Critical aspects of evidence to be considered

Assessment must confirm the ability integrated demonstration of all elements of competency and their performance criteria, in particular the ability to

develop and implement processes to ensure regular water quality tests are conducted according to public health regulatory requirements

develop and implement processes for the use of chemicals for maintaining the correct chemical balance of pool water as governed by public health regulatory requirements

implement organisation policy and procedures

correctly anticipate pool water loadings and take appropriate corrective action

Interdependent assessment of units

This unit must be assessed after attainment of competency in the following unit(s)

Nil

This unit must be assessed in conjunction with the following unit(s)

Nil

For the purpose of integrated assessment, this unit may be assessed in conjunction with the following unit(s)

SRCAQU002B Operate aquatic facility plant and equipment

Required knowledge and skills

Required knowledge

Procedures and processes for water testing and treatment

Pool water chemistry

Relevant occupational health and safety, government and industry regulations and

legislative requirements
Chemical handling procedures
Backwash procedures
Filtration processes
Plant and equipment operation
Plant and equipment manufacturer's specifications
Isolation procedures
Standard of cleaning required
Standard maintenance procedures
Types of supplies available for cleaning and maintenance
Required skills
First aid treatment procedures related to pool water chemical accidents
Communication/interpersonal skills
Identifying hazards/unclean area/pollution
Using cleaning materials and equipment

Resource implications

Physical resources - assessment of this competency requires access to
a real or simulated work environment
appropriate documentation and resources normally used in the workplace
an aquatic facility
an effectively simulated work environment or industry approved training centre
Human resources - assessment of this competency will require human resources consistent with those outlined in the Assessment Guidelines. That is, assessors (or persons within the assessment team) must be competent in this unit but preferably be competent in the unit at the level above
be current in their knowledge and understanding of the industry through provision of evidence of professional activity

in the relevant area

have attained the mandatory competency requirements for assessors under the Australian Quality Training Framework (AQTF) as specified in Standard 7.3 of the **Standards for Registered Training Organisations**

Unit Sector(s)

Not applicable.

TAADEL501B Facilitate e-learning

Modification History

Not applicable.

Unit Descriptor

This unit specifies the competency required to facilitate learning delivered via electronic media.

Application of the Unit

E-learning encompasses a variety of applications and processes which use available electronic media to deliver vocational education and training more flexibly. E-learning covers any learning that is assisted by information and communication technology (ICT). This mainly includes computer-based online learning, but also covers interactive CD-ROMs, videos, handheld computers, mobile phones, teleconferencing and video conferencing.

Facilitating e-learning involves transferring competency in other modes to the e-learning environment where technology is the medium for delivery.

The e-learning facilitator support e-learners work towards the learning outcomes or objectives set out in the learning strategy and/or learning program guiding the e-learning process through planning and developing specific real time and asynchronous interactions with learners, providing support to learners in using e-learning resources and developing and implementing specific e-learning events and activities.

The competency to design and develop e-learning resources is separately addressed in **TAADES503B Research and design e-learning resources** and **TAADES504B Develop and evaluate e-learning resources**. The competency to develop a learning strategy and learning program is also separately addressed in **TAADES501B Design and develop learning strategies** and **TAADES402B Design and develop learning programs**.

E-learning often takes place in conjunction with other modes of delivery, e.g. face-to-face. The competency specified in this unit is typically required by trainers/facilitators, teachers, training consultants working in an e-learning environment.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where **bold italicised** text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

Elements and Performance Criteria

Element	Performance Criteria
1 Establish the e-learning environment	<p>1.1 The learning strategy and/or learning program is accessed, read and interpreted to determine learning outcomes or objectives to be met and any e-based delivery requirements</p> <p>1.2 Initial knowledge of group and individual learner styles and learner characteristics is developed to support effective planning to facilitate e-learning using available information</p> <p>1.3 The suitability of e-learning as a delivery mode is considered and appropriate recommendations are made, where required</p> <p>1.4 An e-learning delivery plan is developed to plan, manage and sequence e-learning activities and events to ensure logical progression of learning content and continuity of e-learner progress</p> <p>1.5 Technical requirements for the e-learning environment are confirmed</p> <p>1.6 E-learning resources and materials are trialled and checked for technical glitches</p> <p>1.7 Protocols for the e-learning environment are developed and documented</p> <p>1.8 Specific technical support needs and mechanisms for e-learners are identified and</p>

- organised
- 2 **Introduce e-learning**
 - 2.1 Outcomes of **learner recognition processes** are obtained from **relevant persons** to provide flexible responses to individual e-learner needs
 - 2.2 An effective **induction** to the e-learning environment is provided and objectives and e-learning protocols are discussed, clarified and agreed
 - 2.3 E-learning facilitation relationships are established between trainer/facilitator and e-learners using appropriate **communication tools and skills**
 - 2.4 Relationships between e-learners are initiated to support inclusivity, acknowledge diversity and enable a positive e-learning environment
 - 3 **Guide and facilitate e-learning**
 - 3.1 E-learning is facilitated in accordance with the e-learning delivery plan using relevant **electronic tools and facilitation skills**
 - 3.2 **Good practice in e-learning** is demonstrated to ensure an effective learning experience
 - 3.3 Technical issues are addressed where required using relevant technical support mechanisms
 - 3.4 Opportunities for authentic learning, practice and formative assessment are built into the e-learning experience
 - 4 **Monitor e-learning**
 - 4.1 E-learner progress is monitored and documented to ensure outcomes are being achieved and the needs of individual learners are being met
 - 4.2 **Support and guidance** are provided inside and outside the e-learning environment as appropriate
 - 4.3 E-learner interaction with others and participation in e-learning activities is continuously monitored and interventions are made, where necessary to maintain momentum and engagement
 - 4.4 Opportunities are provided for e-learners to reflect and record own learning progress
 - 4.5 E-learner collaboration is encouraged and promoted inside and outside the e-learning

environment to enhance learning experiences

- 4.6 Learner records are maintained, stored and secured in accordance with legal/organisational requirements
- 5 **Review e-learning processes**
- 5.1 A mid-point **review** is conducted to evaluate the effectiveness of e-learning delivery and facilitation
 - 5.2 A further review is undertaken post-completion of the learning program/ course/ qualification
 - 5.3 Time is taken to **reflect on own performance** as an e-learning trainer/facilitator and ways to improve performance are explored
 - 5.4 Recommendations for improvements in facilitating e-learning and appropriateness of e-learning systems, tools and resources are identified and documented, and discussed with relevant personnel for future action

Required Skills and Knowledge

Not applicable.

Evidence Guide

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of Assessment

To demonstrate competency against this unit candidates must be able to provide evidence that they can successfully facilitate groups of learners in an e-learning environment. This requires high-level organisational and communication skills to work with learners through electronic mediums, for example, email, discussion groups, forums and via e-learning activities.

An e-learning trainer/facilitator must demonstrate the ability to correctly use the electronic medium they are working within. They must also adapt communication skills for use electronically, for example, providing written rather than verbal feedback.

Evidence Requirements

Required knowledge includes:

learning principles, for example:

adults have a need to be self-directing and decide for themselves what they want to learn

adults have a range of life experience and connecting learning to experience is meaningful

adults have a need to know why they are learning something

training must be learner-centred

technical knowledge sufficient to distinguish between a technical problem and a content problem, and to respond accordingly

technical knowledge needed in using:

chat rooms

forums

bulletin boards

Internet/web site navigation

relevant technologies/tools, including:

those which allow the trainer/facilitator to monitor every entry and movement of the learner

those which allow the trainer/facilitator some information about what the learner is doing

learner/content management system, e.g. WebCT

other electronic methods, e.g. MS Excel and MS Word

Internet search

hyperlinks

relevant learning management systems

structure and content of relevant e-learning resources

vocational/subject matter knowledge of area of delivery

ethics related to e-learning, for example:

duty of care

security of information

plagiarism

responsibility within a public forum

rationale for the use of different learning activities, for example:

use of electronic discussion forums

use of individual activities

use of written material

accessing web sites

cultural sensitivity, particularly in regards to ensuring electronic discussions are culturally sensitive

relevant policy, legislation, codes of practice and national standards including Commonwealth and state/territory legislation, for example:

competency standards

licensing

industry/workplace requirements

duty of care under common law

recording information and confidentiality requirements

anti-discrimination including equal opportunity, racial vilification and disability discrimination

workplace relations

industrial awards/enterprise agreements

National Reporting System

OHS relating to the work role, and OHS considerations to include in the design of the e-learning resource, for example:

using technology safely

advising learners on safety issues

Required skills and attributes include:

language, literacy and numeracy skills using electronic media to:

communicate electronically using accepted language and style

communicate with learners or others verbally
establish rapport

give feedback using different mediums, e.g. email

discuss learning issues

encourage learners to get to know each other and to collaborate with each other

manage the content of electronic discussion forums and weblogs

interpret written communication clearly before responding

ensure what is being said is appropriate and understood

facilitation skills using electronic media, for example:

guiding learning activities through setting up questions, issues, scenarios to be addressed in chat, forum or email

observing in forums/chat and intervening when necessary to maintain focus/ momentum/ engagement

knowing when to intervene/when to let learners direct themselves

moderating disruptive, abusive or dominant e-learners

facilitating group work both on and off line

assisting learners in locating, using and evaluating online information

maintaining momentum and motivation of e-learners through ongoing individual contact and feedback

correctly use e-learning tools, for example:

communication tools

learning activity tools

assessment tools

monitoring tools

high-level organisational skills to:

communicate efficiently using a number of mediums

manage learners in a virtual environment

keep up-to-date with each learner's progress

provide prompt feedback

be available for support during established times

technological skills, for example:

in different media

keyboard skills

using relevant hardware and software

Internet skills

identifying technical problems and being able to troubleshoot or know where to get required technical assistance

time management skills to:

ensure e-learning discussions are kept relevant and within time frame

ensure feedback is provided promptly

manage assessment tasks

flexibility in learning approaches, for example:

being able to effectively use a variety of activities or provide directions for different learner needs

interpreting learner needs and directing them to new learning opportunities

Products that could be used as evidence include:

documentation of facilitated learning discussions

documentation produced by monitoring learners

emails

written feedback provided to learners

e-learning activities

Processes that could be used as evidence include:

how the learning techniques specific to e-learning were determined and provided

how learners were assisted to communicate electronically

how and why protocols and boundaries for learning were set up

how appropriate feedback was provided to learners electronically

Resource implications for assessment include:

time for formative assessment
relevant technology
support requirements
time needed for online delivery preparation

The collection of quality evidence requires that:

assessment must address the scope of this unit and reflect all components of the unit i.e. the Elements, Performance Criteria, Range Statement, Evidence Guide, Employability Skills

a range of appropriate assessment methods/evidence gathering techniques is used to determine competency

evidence must be gathered in the workplace whenever possible. Where no workplace is available, a simulated workplace must be provided

the evidence collected must relate to a number of performances assessed at different points in time and in a learning and assessment pathway these must be separated by further learning and practice

assessment meets the rules of evidence

a judgement of competency should only be made when the assessor is confident that the required outcomes of the unit have been achieved and that consistent performance has been demonstrated

Specific evidence requirements must include:

the facilitation of one or more e-learning programs or qualifications which individually or collectively enable the outcomes, Performance Criteria, skills and knowledge of this competency standard to be demonstrated

Integrated assessment means that:

this unit can be assessed alone or as part of an integrated assessment activity involving relevant units in the **TAA04 Training and Assessment Training Package**. Suggested units include but are not limited to:

TAADEL402B Facilitate group-based learning

TAADEL403B Facilitate individual

learning

TAADEL405B Coordinate and facilitate distance-based learning.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. **Bold italicised** wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

The learning strategy provides: a documented framework to guide and structure the learning requirements and the teaching/delivery and assessment arrangements of a vocational education and training qualification (refer **TAADES501A for more information**)

The learning program provides: a documented guide to support a cohesive and integrated learning process for the learner (refer **TAADES402A Design and develop learning programs**, for more information)

Learner styles may include:

- auditory
- visual
- kinaesthetic
- left/right brain
- global/analytical
- theoretical
- activist
- pragmatist
- reflective

Learner characteristics may include:

- level of expertise in using relevant technologies
- level and type of experience in an e-learning environment
- preferred learning styles
- specific needs
- educational background
- language, literacy and numeracy needs
- employment status
- past learning experiences
- age

Available information may relate to:

level of maturity

culture and/or language diversity

length of time resident in Australia

enrolment information

employee/personnel records (confidentiality protected)

surveys of learners to identify specific technology skills and support needs for e-learning

results of organisational training needs analyses

outcomes of RCC/RPL assessments

communication with individual learners

The suitability of e-learning may depend on:

the content focus and outcomes of the competency standards and/or learning outcomes, i.e. do the outcomes require demonstration of skills such as psychomotor skills or interpersonal skills

whether such skills have been designed into the e-learning resources or learning strategy/learning program design

the learning styles and characteristics of the learners and self-assessment of suitability for e-learning

the need for mixed mode to support learning in particular areas/skills

An e-learning delivery plan provides a tool to manage and sequence e-learning and to guide implementation of the learning program. It may include:

individual/group learning objectives or outcomes for the learning program or segment of the learning program to be addressed

number of learners and their specific support requirements

timing, sequence and number of pre-planned e-learning sessions

types of preplanned sessions - synchronous (in real time using conferencing, chat, forum) or asynchronous (not in real time using email, offline forum, bulletin boards)

topics to be addressed in e-learning sessions

learning/activities/events to be addressed in e-learning sessions

e-learning resources and/or web-based course tools to be used

determination of e-learning management tools such as feedback systems and support mechanisms

E-learning activities and events may be synchronous (in real time) or asynchronous (not in real time) and may include:

discussions/debates

questions, problems, brainstorming
games/quizzes

e-based research activities

case studies

role-plays/simulations/scenarios

practical activities
 using the Internet to find information sites
 using materials on CD-ROMs
 working through online modules
 downloading resources including materials/notes/guides from dedicated learning program/course specific web site
 working through e-learning resources such as DEST toolboxes

Technical requirements may include:

technology to be used in delivery
 type of online learning management platform
 time required for setting up and testing equipment/technology
 setting up a specific dedicated web site for the e-learning course/program
 setting up hyperlinks
 liaison with information technology (IT) personnel/specialists

E-learning environment may include the following characteristics:

is independent of a fixed or specific venue or place
 is connected through information communication technology
 the Internet provides the operating learning environment
 learners can determine how, when, and where they learn

E-learning resources and materials may include:

DEST toolboxes for specific Training Packages
 other learning resources and materials that have been specifically designed for the e-learning environment
 CD-ROMs that support printed materials

Protocols for the e-learning environment may include:

boundaries of communication/standards of behaviour in public 'spaces' - email/forums/bulletin boards/chat including abusive/disruptive/ discriminatory/culturally insensitive language
 guidelines for trainer/facilitator and e-learner

interactions, such as:

service levels

email guidelines, times for sending, expected response times, types of questions that are individual or group directed

email access and lists

chat/forum guidelines, when to submit, when to respond, cut-offs

arrangements for technical support

learning activity and assessment requirements and processes

security systems

expectations/requirements of learners, for example:

participation in learning events and activities

time requirements for submitting work

group work arrangements

being self-directed

being motivated to complete activities alone or to seek help

knowing when and how to collaborate with others

ability to work online and offline as required

technical ability

a 'study-buddy' system

technical support from IT

meeting accessibility issues

developing and providing a frequently asked questions (FAQs) service

identifying technology needs in induction

problem solving tools

support with IT literacy

support to help learners become self-directed e-learners

occupational health and safety (OHS)

Technical support needs and mechanisms may include:

	guidelines for computer-based work
Learner recognition process may include:	<p>recognition of prior learning (RPL)</p> <p>recognition of current competencies (RCC)</p> <p>formal qualifications</p>
Relevant persons may include:	<p>self</p> <p>other trainers/facilitators/assessors</p> <p>support personnel administering RPL/RCC arrangements</p>
The induction may be via online orientation, face-to-face, by teleconference and may include:	<p>overview of the qualification/learning program/ course objectives and structure</p> <p>appropriate ice breakers</p> <p>content of e-learning protocols</p> <p>information and discussion on organisational skills and time management in an e-learning environment</p> <p>recommendations for online sites to use</p> <p>information on chat, forums, bulletin boards</p> <p>style of facilitation/level of learner independence expected</p> <p>contact details of trainer/facilitator and learners - posting of photographs</p> <p>practice session working with and navigating through e-learning materials/resources</p> <p>practice session using chat/email facilities</p> <p>identifying opportunities available for group discussions and interaction with other learners including social interactions and collaborative work</p> <p>distribution of learning resources/learning materials relevant to the qualification/course/program</p> <p>checklist completed by all learners to ensure everyone is comfortable with the e-learning navigation, software, e-learning communication tools, media and requirements/expectations</p>
Communication tools and skills may	regular email contact with every individual

- include:
- e-learner
 - being accessible
 - fostering a community of learners
 - providing alternatives e.g. phone access
- Electronic tools may include:**
- those which allow the trainer/facilitator to monitor every entry and movement of the learner
 - those which allow the trainer/facilitator some information about what the learner is doing
 - Learner/Content Management System, e.g. WebCT
 - other electronic methods, e.g. MS Excel and MS Word
 - Internet search
 - hyperlinks
- Facilitation skills may include:**
- guiding learning activities through setting up questions, issues, scenarios to be addressed in chat, forum or email
 - observing in forums/chat and intervening when necessary to maintain focus/momentum/engagement
 - knowing when to intervene/when to let learners direct themselves
 - moderating disruptive, abusive or dominant e-learners
 - facilitating group work both online and offline
 - assisting learners in locating, using and evaluating online information
 - maintaining momentum and motivation of e-learners through ongoing individual contact and feedback
- Good practice in e-learning is evolving and may include:**
- learner focused delivery and support, for example:
 - providing both educational and technical support
 - offering flexible solutions to suit a range of learner needs

providing opportunities for collaboration
guiding and supporting inquiry and
engagement

being flexible to allow for and support a
range of appropriate learner skills, learning
styles and learner characteristics

ensuring options lead to integrated learning

flexible formative assessment options

appropriate use of technology to suit the
learning program and the learner, for
example:

blended delivery

mix of print and web-based resources

using educationally sound and quality
resources, including:

accurate, relevant and current content

sound pedagogical design

appropriate level of challenge and problem
solving in activities for learners

effective usability of resources

immersive and engaging online learning
environments that encourage communication
and collaboration

Support and guidance may include:

support with ICT issues, learning difficulties,
personal problems that impact on learning

using individual facilitation techniques to
address specific needs

referring learner to other e-learners or
support networks

adjusting learning or assessment as
appropriate

Review may include:

feedback from learners, colleagues,
e-learning designers via survey or discussion

identification of issues in
managing/monitoring e-learners and the need

for changes to contact/monitoring processes
identification of issues in using the delivery
plan and the need for changes/modifications
to the plan

effectiveness of the e-learning protocols,
their application and proposed changes

technology effectiveness

Reflect on own performance may include:

asking critical questions about performance,
problems, methods used and success of
learners

listening to and acting on feedback from
learners and others

Unit Sector(s)

Not applicable.

Competency Field
Delivery and Facilitation

TAADES501B Design and develop learning strategies

Modification History

Not applicable.

Unit Descriptor

This unit specifies the competency required to design, develop and evaluate learning strategies.

Application of the Unit

Learning strategies document a framework for the learning requirements and the teaching/delivery and assessment arrangements of a vocational education and training qualification. The learning strategy is the umbrella document that outlines the requirements for designing the learning and assessment process at the qualification level.

These requirements include: determining the specific criteria or learning outcomes to be achieved; any recognition and entry requirements (if appropriate); an outline of the areas of learning/content to be addressed; the assessment requirements, the broad sequence of learning, the delivery and assessment methods to be used, the resources required and any other additional information to support a learning and assessment pathway to a qualification. The criteria may already exist if the qualification is part of a Training Package. In this instance the endorsed competency standards packaged within the Training Package qualification constitute the relevant criteria. Alternatively, if the learning strategy takes the form of a course for accreditation, the learning outcomes may need to be developed to reflect an identified industry, enterprise or community need.

This unit addresses the competency requirements for developing a learning strategy relevant to both Training Package qualifications and course-based qualifications.

The learning strategy provides an overview or outline only. Detailed guidance is fleshed out through the content of specific learning programs. Each learning strategy would require development of a number of learning programs, depending on the design approach of the learning strategy.

The competency of developing learning programs is addressed separately in **TAADES402B Design and develop learning programs**.

In a traineeship or apprenticeship context, this unit should be linked directly to **TAACMQ502B Coordinate training and/or assessment arrangements for apprenticeships/ traineeships**, which more closely establishes the learning strategy requirements for that model of training delivery.

The competency specified in this unit is typically required by instructional designers, trainers/facilitators, training consultants and training coordinators/managers.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where **bold italicised** text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

Elements and Performance Criteria

Element	Performance Criteria
1 Determine the parameters of the learning strategy	1.1 The purpose of the learning strategy is clarified
	1.2 The likely target groups and their needs for learning are clarified
	1.3 The characteristics of the likely target groups are researched and identified
	1.4 Qualification options for meeting the likely target group needs are researched, and the appropriate option is selected
	1.5 Consultations are carried out to confirm the parameters of the learning strategy with relevant people
2 Develop the framework for the learning strategy	2.1 The learning strategy design reflects the qualification requirements of the selected qualification
	2.2 Industry or organisation documentation is analysed to determine additional and supporting requirements
	2.3 Options for design are researched and analysed, based on likely target groups, their learning needs

- and contexts for delivery
- 2.4 The learning strategy design reflects and is supported by **appropriate learning theories** and **instructional design principles**
 - 2.5 The design approach is determined and broad **content headings** are identified and documented
 - 2.6 Consultations are carried out to confirm the framework
 - 2.7 The review process for the learning strategy is developed
- 3 **Devise the content and structure of the learning strategy**
 - 3.1 Each content heading is elaborated and documented to form an overview of content to be addressed
 - 3.2 The content is sequenced to support learning, and overall timelines are determined within **operating constraints**
 - 3.3 Learning strategy outcomes are expressed to reflect both **generic** and specific learning outcomes to be achieved
 - 3.4 **Pathways** are addressed and documented
 - 3.5 **Appropriate delivery** and **assessment strategies** are identified and documented, taking account of the learning parameters, design framework and learning context
 - 3.6 **Operational requirements** are identified and documented
 - 3.7 The completed learning strategy is checked for completeness
- 4 **Review the learning strategy**
 - 4.1 The learning strategy is reviewed in collaboration with relevant people against **relevant criteria** prior to and post implementation
 - 4.2 A post-implementation review process is documented which includes **measures** for identifying the effectiveness and quality of the learning strategy
 - 4.3 Recommendations/changes based on outcomes of

the review processes are made, where appropriate,
and documented

- 4.4 Modifications are further confirmed with relevant
people, where appropriate

Required Skills and Knowledge

Not applicable.

Evidence Guide

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of Assessment

To demonstrate competency against this unit candidates must be able to provide evidence that they have designed at least two learning strategies.

The learning strategies provided as evidence must: establish the learning context; identify learner and client needs; identify the units or other criteria which best reflect these needs; outline the learning framework which has been designed and sequenced to maximise learning; be logical, innovative and engaging to the learner group; identify the delivery and assessment arrangements; indicate pathways to, from and within the qualification; identify the operational resources needed to deliver the strategy; and provide a review process both before and after implementation.

Evidence Requirements

Required knowledge includes:

Training Packages, including:

range of current and relevant Training Packages

structure and definition of the endorsable components of Training Packages

content of Training Package/s relevant to learning strategy

availability of relevant noted support materials

relevant accredited courses

relationship to the National Reporting System (NRS)

AQTF including:

standards for Registered Training Organisations (RTOs)

standards for State and Territory Registering/Course Accrediting Bodies

AQF including:

key features of each qualification
guidelines for each qualification title
national guidelines on cross-sector links
issuing a qualification guideline for
qualification title of the learning strategy
guidelines on cross-sector qualification
linkages

industry and enterprise knowledge, for
example:

the names of relevant industry associations
and trade unions

the relevant ISC or state/territory authorities

particular industry or enterprise requirements
relevant to the learning strategy

industry licensing arrangements (where
relevant)

particular regulations and guidelines relevant
to the learning strategy, e.g. immigration,
labour market

a general knowledge of the main branches of
adult learning theory, for example:

behavioural learning theory

information processing theory

cognitive learning theory

andragogy

vocational education and training pedagogy

learning principles, for example:

adults have a need to be self-directing

adults have a range of life experience which
they can connect to learning

adults have a need to know why they are
learning something and its benefits

training needs to be learner-centred to
motivate adults

the learning environment encourages

interaction

instructional learning design, including:

presenting material in a logical order and sequence

presenting material in order of increasing difficulty

opportunities for review of material and repetition

the need for learner activity and interactivity

inclusion of a variety of approaches and techniques for presenting information and activities and for encouraging participation by learning

structure of the information is clear, logical

assessment, including:

Training Package Assessment Guidelines requirements

AQTF requirements

the basis and rationale for different assessment methods appropriate to the learning strategy

assessment tool design

appropriate cultural sensitivity, for example:

organisation diversity policies

cultural learning styles, preferences and communication of the indigenous community

cultural learning styles, preferences and communication of other potential target groups

reasonable adjustment principles and practice

sources of information, for example:

National Training Information Service (NTIS)

vocational education and training national bodies - DEST; ISCs; National Centre for

Vocational Education Research (NCVER);
and Australian Qualifications Framework
Advisory Board (AQFAB)

State and Territory Training Authorities
(STAs) and agencies

regulatory agencies

professional associations

relevant policy, legislation, codes of practice
and national standards including
Commonwealth and state/territory
legislation, for example:

security of information

plagiarism

competency standards

licensing

industry/workplace requirements

duty of care under common law

anti-discrimination including equal
opportunity, racial vilification and disability
discrimination

workplace relations

industrial awards/enterprise agreements

relevant OHS knowledge relating to the work
role, and OHS considerations which need to
be included in the learning strategy,
including:

internal policies and procedures to meet OHS
requirements

hazards commonly found in the work
environment to which learning is related

Required skills and attributes:

literacy skills to:

read, interpret and analyse information

develop and revise the content

write the learning strategy in accordance with design requirements

document and record the strategy using appropriate computer software

planning skills to:

set timelines to develop the learning strategy

organise and structure the development process

identify the tasks to be undertaken

identify measures to monitor progress

research skills and techniques to gather and interpret information relevant to the content and development of the learning strategy, for example:

literature and web-based research

interviews

focus groups

communication skills to:

clearly articulate information

collaborate with others on the strategy development

get feedback on the strategy

interpersonal skills to:

manage conflict and problems

negotiate the strategy development

solve problems

Products that could be used as evidence include:

documented learning strategies

documented reviews of learning strategies

	evidence of collaboration that took place during the strategy development
	documentation analysing industry or organisational documentation
	documentation outlining content research
Processes that could be used as evidence include:	how learner characteristics were researched, the methods used and why
	how others were consulted to plan the strategy and why those people were selected
	how Training Package qualification rules were interpreted or how learning outcomes were defined
	how the learning framework was designed and the reasons for the approach adopted
	why the content was sequenced in the proposed order
	how reflection has been built into the learning design process and why it is important
Resource implications for assessment include:	access to industry/organisation documentation
	access to relevant learner information
	access to materials/information to support content outline of learning framework
	time to achieve the unit and meet the evidence requirements
	access to relevant persons
The collection of quality evidence requires that:	assessment must address the scope of this unit and reflect all components of the unit, i.e. the Elements, Performance Criteria, Range Statement, Evidence Guide, Employability Skills
	a range of appropriate assessment methods/evidence gathering techniques is used to determine competency
	evidence must be gathered in the workplace wherever possible. Where no workplace is available, a simulated workplace must be provided

the evidence collected must relate to a number of performances assessed at different points in time and in a learning and assessment pathway these must be separated by further learning and practice

assessment meets the rules of evidence

a judgement of competency should only be made when the assessor is confident that the required outcomes of the unit have been achieved and that consistent performance has been demonstrated

Specific evidence requirements must include:

a minimum of two examples of a learning strategy designed by the candidate with differentiated design structures in each that reflect the specific qualification requirements, client needs and contexts of application

Integrated assessment means that:

this unit can be assessed alone or as part of an integrated assessment activity involving relevant units in the **TAA04 Training and Assessment Training Package**. Suggested units include but are not limited to:

TAADES401B Use Training Packages to meet client needs.

TAACMQ502B Coordinate training and/or assessment arrangements for apprenticeships/ traineeships

TAAASS501B Lead and coordinate assessment systems and services.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. **Bold italicised** wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Purpose may be to:

implement a Training Package qualification

meet an identified client, industry or community need

provide learning pathways/career development

provide for apprenticeship/traineeship qualifications

settle in Australia

develop of English language, literacy and numeracy skills

meet regulatory requirements

A learning strategy may apply to:	<ul style="list-style-type: none"> a nationally endorsed qualification from a Training Package or accredited course a traineeship or apprenticeship a course to be accredited with an AQF qualification outcome
Likely target groups and their needs may include:	<ul style="list-style-type: none"> existing industry/enterprise employees school leavers new entrants to the workforce apprentices/trainees individuals learning new skills/knowledge individuals seeking to upgrade skills/knowledge individuals changing careers unemployed individuals and groups learners who have a disability, or are members of target groups such as Aboriginal and Torres Strait Islander communities recent migrants individuals/groups meeting licensing or other regulatory requirements particular class of visa holder
Characteristics of target groups may include:	<ul style="list-style-type: none"> level and breadth of work experience level and previous experiences of formal education skill/competency profile socio-economic background cultural background and needs age specific physical or psychological needs motivation for learning language, literacy and numeracy needs learning styles and preferences as determined by funding body, e.g. residence and length of time in Australia, length of time unemployed specific levels of English language, literacy

and numeracy skill as determined by initial assessment process

Qualification options may include:

selecting a relevant qualification from an endorsed Training Packages

using the packaging guidelines of the Training Package to determine the final mix of units which form the qualification

selecting appropriate existing accredited courses

developing a new accredited course based on combining endorsed units from different Training Packages or developing new competency standards to meet the identified need

Relevant people may include:

enterprise/industry clients

Industry Skills Councils

state/territory industry training advisory bodies

industry associations/employer bodies

trade unions

professional associations

universities

research agencies

regulatory/licensing authorities

subject or technical specialists/experts

previous clients

people working in the roles targeted by training

government agencies and departments, including:

OHS authorities

Department of Education, Science and Training (DEST)

Department of Immigration and Multicultural and Indigenous Affairs (DIMIA)

Qualification requirements may include:

relevant Training Package qualification or

packaging rules

AQF guidelines for qualifications, including:

key features of each qualification

guidelines for each qualification title

national guidelines on cross-sector linkages

issuing a qualification

Australian Quality Training Framework
(AQTF) Standards for State/Territory
Registering/Course Accrediting Bodies

levels and aspects of communication of the
National Reporting System (NRS)

**Industry or organisation
documentation may include:**

workplace policies and procedures

internal competency specifications

existing training or learner support materials

existing course information/curriculum

industry codes of practice, guidance notes
and other industry information on hazard and
risk control

business and risk management strategies

job descriptions

case studies

regulatory requirements related to the job,
including licensing

outcomes of organisational training needs
analyses

documented research relating to potential
content

contextualisation rules of relevant endorsed
industry Training Package/s

relevant Training Package noted support
materials

Options for design may include:

a learning framework that addresses each
unit of competency separately unit by unit
within the qualification

a learning framework that is based on
clustering units into meaningful
combinations to create an integrated learning

framework for the qualification

a learning framework-based on building
from less complex to more complex
tasks/skills/knowledge learning
objectives/outcomes

a learning framework designed around work
structures, work organisation and work
activities

project-based learning models

a learning framework built around
synthesising knowledge and skill
requirements across the qualification

an articulated approach

combinations of the above

**Appropriate learning theories may
include:**

behaviourist

social learning

discovery learning

cognitive learning theory

constructivist

situational

humanistic

action science

applied learning models

Instructional design principles may include:

presenting material in a logical order and sequence

presenting material in order of increasing difficulty

opportunities for review of material and repetition

the need for learner activity and interactivity

inclusion of a variety of approaches and techniques for presenting information and activities and for encouraging participation by learning

structuring the information effectively

application of adult learning principles

Content headings may separate learning into:

topics

subjects

modules

units

knowledge components

technical skill sets

work activities

the development of specific English language, literacy and numeracy skills

generic skills

Operating constraints may include:

budget

timelines

availability of support materials

nominal hours

human and physical resourcing requirements

occupational health and safety (OHS) requirements

Generic outcomes may include:

spoken and written communication

team work

numeracy

problem solving

planning and organising work

use of technology
self-management
initiative and enterprise
how to learn
OHS

Pathways may include:

entry and exit
prerequisites/co-requisites
access and equity
RPL/RCC arrangements
credit transfer arrangements
articulation with other qualifications

Appropriate delivery strategies may include:

the focus of delivery, for example:
groups of varying sizes
groups from single context/from multiple contexts
groups of similar educational/competency levels/groups with divergent educational/competency backgrounds
individuals

the context of delivery, for example:
in the workplace
in a simulated work environments
in the training room/classroom
in specialist environments - e.g. laboratory, computer room
through the Internet
at home
in a community setting

the mode of delivery, for example:
face-to-face
technology-based -
electronic/computer-based/
online/audiovisual

experiential

distance resource-based

blended

delivery methods, including:

lock step/learner-paced/mixed

interactive/participative/collaborative

trainer/facilitator-centred/learner-centred

time and place dependent/independent

demonstration

instruction

presentations

guided facilitation

learning activity-based

guided work-based

activities/applications/experiences

tutoring

project-based

individual facilitation techniques - coaching/
mentoring

blended delivery methods

Appropriate assessment strategies may include:

the identification and interpretation of competency standards/other criteria for assessment and for validation

application of Training Packages Assessment Guidelines

arrangements for recognition of existing competency (RCC/RPL), including provision of guidance and assistance to candidates in gathering and evaluating evidence

determination of assessment methods for identified competency standards

selection of assessment tools for identified competency standards

organisational arrangements for assessment, including physical and human resources, roles and responsibilities and partnership

arrangements, where relevant
nominated quality assurance mechanisms
identified risk management strategies

Operational requirements may include:

infrastructure including facilities,
plant/equipment
staffing requirements including number of
full-time, part-time and sessional
trainers/facilitators
other staffing needs including technical
support, specialist and administrative
personnel
copy/ies of relevant Training Package/s
learning resources
reference lists

Relevant criteria may include:

Training Package requirements
accreditation requirements
curriculum design
OHS implications for delivering the learning
strategy

Measures may include:

learner/participant feedback
feedback from clients and industry bodies
enrolments
completion rates
Statements of Attainment, competencies
achieved, qualifications awarded
return business
development of language, literacy and
numeracy skills as measured by the National
Reporting System (NRS)

Unit Sector(s)

Not applicable.

Competency Field

Learning Design

TLIA2207C Participate in stocktakes

Modification History

Not applicable.

Unit Descriptor

This unit involves the skills and knowledge required to participate in stocktakes in accordance with workplace requirements including preparing for stocktakes, conducting stocktakes, counting stock, identifying stock discrepancies, and completing all required documentation.

Application of the Unit

Work must be carried out in compliance with the relevant regulations and workplace requirements concerning the conduct of a stocktake.

Work is performed under some supervision generally within a team environment. It involves the application of product knowledge and an understanding of relevant workplace procedures and regulatory requirements when participating in stocktakes as part of work activities in the warehousing, distribution and/or storage industries.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

The required outcomes described in this unit of competency contain applicable facets of Employability Skills. The Employability Skills Summary of the qualification in which this competency is packaged will assist in identifying employability skill requirements.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

Elements and Performance Criteria

Element	Performance Criteria
1 Prepare for stocktake	<p>1.1 Goods to be counted and appropriate inventory systems are identified</p> <p>1.2 Required resources including equipment and record keeping systems are identified</p> <p>1.3 Allocated tasks, zones and work requirements are identified</p> <p>1.4 Sequence work role is planned in a time effective manner</p>
2 Stocktake and count stock	<p>2.1 Stocktaking and cyclical counts are undertaken in accordance with enterprise policies and procedures</p> <p>2.2 Inventory data is interpreted</p> <p>2.3 Inventory data is confirmed to match stock</p> <p>2.4 Stock levels are accurately counted and documented</p>
3 Identify stock discrepancies	<p>3.1 Discrepancies in type, number and quality of stock are accurately recorded and documented</p> <p>3.2 Products stored in inappropriate storage locations are relocated and stock records adjusted</p>
4 Complete documentation	<p>4.1 Inventory data is reconciled to match warehouse stock in accordance with company procedures</p> <p>4.2 Workplace documentation is completed</p>

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

Australian codes and regulations relevant to the conduct of stocktakes

Relevant OH&S and environmental protection procedures and guidelines

Workplace procedures and policies for the conduct of stocktakes

Focus of operation of work systems, equipment, management and site operating systems for the conduct of stocktakes

Workplace processes for records management and the production of stocktake reports

Principles of operation and functions of stocktake systems

Housekeeping standards procedures required in the workplace

Site layout and obstacles

Required skills:

Communicate effectively with others when conducting stocktakes

Read and comprehend simple statements in English

Read and interpret instructions, procedures and labels relevant to the conduct of stocktakes

Complete documentation related to the conduct of stocktakes

Work collaboratively with others when conducting stocktakes

Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others

Promptly report and/or rectify any identified problems that may arise when conducting stocktakes in accordance with regulatory requirements and workplace procedures

Apply precautions and required action to minimise, control or eliminate hazards that may exist during work activities

Monitor work activities in terms of planned schedule

Modify activities depending on differing operational contingencies, risk situations and

environments

Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment

Operate and adapt to differences in equipment in accordance with standard operating procedures

Select and use relevant communication, computing and office equipment when conducting stocktakes

Select and use required personal protective equipment conforming to industry and OH&S standards

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:

the underpinning knowledge and skills

relevant legislation and workplace procedures

other relevant aspects of the range statement

Context of and specific resources for assessment

Performance is demonstrated consistently over a period of time and in a suitable range of contexts

Resources for assessment include:

a range of relevant exercises, case studies and other simulated practical and knowledge assessment, and/or

access to an appropriate range of relevant operational situations in the workplace

In both real and simulated environments, access is required to:

relevant and appropriate materials and/or equipment, and/or

applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

Method of assessment

Assessment of this unit must be undertaken by a registered training organisation

As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests

Practical assessment must occur:

through appropriately simulated activities at the registered training organisation, and/or

in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

Work may be conducted:	in a range of work environments by day or night
Customers may be:	internal or external
Workplaces may comprise:	large, medium or small worksites
Work may be conducted in:	restricted spaces exposed conditions controlled or open environments
Goods may involve:	special handling, location, storage and/or packaging requirements, including temperature controlled goods and dangerous goods
Inventory systems may be:	automated manual paper based computerised microfiche
Categories or groups of products/stock may include:	small parts perishable goods overseas export dangerous goods refrigerated products temperature controlled stock fragile goods
The characteristics of products/stock may include:	small parts toxicity flammability form weight

	size
	state
	perishability
	fragility
	security risk
Labelling systems may include:	batch code
	bar code
	identification numbering systems
	serial numbers
	symbols for safe handling
	ADG and HAZCHEM Codes
Hazards in the work area may include:	chemicals
	dangerous or hazardous substances
	movements of equipment, goods and materials
	oil or water on floor
	a fire or explosion
	damaged packaging or pallets
	debris on floor
	faulty racking
	poorly stacked pallets
	faulty equipment
Communication in the work area may include:	phone
	electronic data interchange (EDI)
	fax
	email
	internet
	RF systems
	oral, aural or signed communications
Depending on the type of organisation concerned and the local terminology used, workplace procedures may include:	company procedures
	enterprise procedures
	organisational procedures
	established procedures

Personal protective equipment may include:	<ul style="list-style-type: none">glovessafety headwear and footwearsafety glassestwo-way radioshigh visibility clothing
Consultative processes may involve:	<ul style="list-style-type: none">other employees and supervisorssuppliers, customers and clientsrelevant authorities and institutionsmanagement and union representativesindustrial relations and OH&S specialistsother maintenance, professional or technical staff
Information/documents may include:	<ul style="list-style-type: none">goods identification numbers and codesmanifests, picking slips, merchandise transfers, stock requisitions and bar codescodes of practice and regulations relevant to the identification, handling and stacking of goodsAustralian and international regulations and codes of practice for the handling, stacking and transport of dangerous goods and hazardous substancesoperations manuals, job specifications and induction documentationmanufacturers specifications for equipmentworkplace procedures and policiessupplier and/or client instructionsdangerous goods declarations and material safety data sheets (where applicable)award, enterprise bargaining agreement, other industrial arrangementsrelevant Australian standards and certification requirementsquality assurance proceduresemergency procedures

workplace relations regulations

workers compensation regulations

Unit Sector(s)

Not applicable.

Competency Field

A - Handling Cargo/Stock

TLID107C Shift materials safely using manual handling methods

Modification History

Not applicable.

Unit Descriptor

This unit involves the skills and knowledge required to shift loads using manual handling methods, including assessing the risks associated with relocating the load, planning the relocation process and carrying out the relocation in accordance with the plan.

Application of the Unit

Work must be carried out in compliance with the relevant OH&S regulations concerning the manual lifting and movement of loads.

Work is performed under some supervision generally within a team environment.

Work involves the application of the basic principles for the safe lifting and movement of loads when shifting materials using manual handling methods as part of day-to-day work.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

The required outcomes described in this unit of competency contain applicable facets of Employability Skills. The Employability Skills Summary of the qualification in which this competency is packaged will assist in identifying employability skill requirements.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

Elements and Performance Criteria

Element	Performance Criteria
1 Assess risks arising from the relocation of the load	<p>1.1 Products, goods or materials to be relocated are identified</p> <p>1.2 Locations for storage are determined and potential routes to be followed are identified</p> <p>1.3 Effect of load relocation on original load base is predicted</p> <p>1.4 Points of balance are estimated</p> <p>1.5 Required clearances are compared to available space and adjustments made</p> <p>1.6 Effects of moving contents which may be loose, liquid, dangerous or hazardous are considered</p> <p>1.7 Potential risks in route(s) which may be followed are considered</p> <p>1.8 Risks to self are identified arising from the required lifting, load carrying, set down or movement of the goods</p> <p>1.9 Manual handling procedures for lifting, lowering and carrying, pushing and pulling are identified</p> <p>1.1 Team lifting processes are considered for application</p> <p>1.1 Appropriate personal protective equipment is worn</p>
2 Plan load relocation	<p>2.1 Relocation of the load is planned consistent with the code of practice for manual handling</p> <p>2.2 Process for relocating load is proposed including predicting and planning for potential difficulties</p> <p>2.3 Proposed process is checked against code of practice and workplace procedures for compliance</p>

3 Relocate load

- 3.1 Actions for lifting, lowering and carrying, pulling and pushing a load are in accordance with workplace procedures and OH&S requirements
- 3.2 Applications appropriate for team relocation of load are identified
- 3.3 Team lifting tasks are coordinated
- 3.4 Planned process and route are followed
- 3.5 Relocated materials are set down without damage to goods, personnel or equipment and checked for stability
- 3.6 Relocation is checked to see that it meets work requirements, with any variance(s) reported

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

Relevant OH&S procedures and guidelines concerning the manual lifting and movement of loads

Risks when manually lifting and handling materials and goods and related precautions to control the risk, including: the load on the spine during lifting; controlled actions on a movement during lifting; rotation and side movement of the spine during lifting; postures and positions during lifting; work layout; the type, weight and position of the load; frequency of shifting operations; distance over which load is to be shifted; and time allowed for the shifting of the load

Workplace procedures and policies for the handling of furniture and effects

Housekeeping standards procedures required in the workplace

Site layout and obstacles

Required skills:

Communicate effectively with others when manually lifting and handling materials and goods

Read and interpret instructions, procedures and information relevant to the manual lifting and handling of materials and goods

Interpret and follow operational instructions and prioritise work

Work collaboratively with others when manually lifting and handling materials and goods

Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others

Promptly report and/or rectify any identified problems that may arise when manually lifting and handling materials and goods in accordance with regulatory requirements and workplace procedures

Implement contingency plans for unexpected situations that may occur when manually lifting and handling materials and goods

Apply precautions and required action to minimise, control or eliminate risks that may exist when manually lifting and handling materials and goods

Monitor work activities in terms of planned schedule

Modify activities depending on differing operational contingencies, risk situations and environments

Apply fatigue management knowledge and techniques

Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment

Operate and adapt to differences in loads and materials in accordance with standard operating procedures

Select and use required personal protective equipment conforming to industry and OH&S standards

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:

the underpinning knowledge and skills

relevant legislation and workplace procedures

other relevant aspects of the range statement

Context of and specific resources for assessment

Performance is demonstrated consistently over a period of time and in a suitable range of contexts

Resources for assessment include:

a range of relevant exercises, case studies and other simulated practical and knowledge assessment, and/or

access to an appropriate range of relevant operational situations in the workplace

In both real and simulated environments, access is required to:

relevant and appropriate materials and/or equipment, and/or

applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

Method of assessment

Assessment of this unit must be undertaken by a registered training organisation

As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests

Practical assessment must occur:

through appropriately simulated activities at the registered training organisation, and/or

in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

The shifting operations may be conducted:	in a range of work environments by day or night
Customers may be:	internal or external
Workplaces may comprise:	large, medium or small worksites
