Electives updated.

Release 1. This is the first release of this qualification in the PUA Public Safety Training Package.

Qualification Description

The PUA60719 Diploma of Public Safety (Community Safety) is designed for emergency service and public safety personnel who perform in senior management roles with responsibility for community safety programs. Community safety programs seek to build and enhance community resilience, health and wellbeing as it relates to feeling protected from threats, harm, risks or injury.

The role of community safety personnel is to build community safety partnerships, improve individual and community resilience, actively partner and listen to communities, understand community needs and deliver outcomes for at risk communities. This may include planning and managing community safety advertising and awareness campaigns and developing relationships with a diverse range of stakeholders and community members.

This qualification includes the units of competency required by community safety personnel to perform a range of activities such as strategically planning and managing programs and campaigns that improve community resilience whilst engaging with a broad range of community members and working closely with local governments and other agencies. It typically involves the management of community safety programs including budgets, personnel and resources.

No licensing, legislative or certification requirements apply to this qualification at the time of publication.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

A total of 12 units of competency comprising

- **3 core units** listed below; plus
- **9 elective units** from the general elective units listed

Choose a minimum of 7 elective units from the general elective unit list below.

Select the remaining 2 elective units from the elective unit list below or elsewhere within this training package or another endorsed training package or accredited course.

All elective units selected from outside this qualification must contribute to the vocational outcome of the qualification. Where imported units are selected, care must be taken to ensure that all prerequisite units specified are complied with. Prerequisites attached to any of the units must be obtained and are additional to the number of units required for this qualification.

Where a prerequisite is attached to a unit it is identified by the symbol L.

Note:

Refer to the PUA Training Package Companion Volume Implementation Guide for information on fire prerequisites.
