**Assessment Requirements for PUABIO001
Conduct planning in a biosecurity
emergency response**

Release: 1

Assessment Requirements for PUABIO001 Conduct planning in a biosecurity emergency response

Modification History

Release 1. This is the first release of this unit of competency in the PUA Public Safety Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and includes

- applying Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) guidelines
- developing collection plans
- finding and using sources of biosecurity emergency response functional area information
- identifying biosecurity emergency response roles and responsibilities
- meeting legislation, industry standards, codes of practice and regulation requirements
- planning task outputs for biosecurity emergency response are produced within identified timelines
- producing inputs and outputs that meet identified functional area requirements
- using organisational documentation
- working with incident management systems including tools and templates

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria and includes knowledge of

- biosecurity emergency response planning inputs and outputs for the functional area
- biosecurity emergency response planning processes for relevant functional area
- biosecurity emergency response planning timelines
- biosecurity emergency response roles and responsibilities
- collection plans
- difference between levels of biosecurity emergency response planning tasks – strategic, tactical and operational
- dissemination of information using briefing and debriefing processes
- documentation and reporting requirements
- incident management systems including response planning guides and templates
- legislation, industry standards, codes of practice and regulations
- organisational documentation
- organisational policies and procedures
- sources of biosecurity emergency response functional area information

- types of visual displays
- Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) requirements

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Assessment must occur in workplace operational situations. Where this is not appropriate, assessment must occur in industry approved simulated workplace operational situations that reflect workplace conditions.

Resources for assessment must include access to

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, equipment, tools and personal protective clothing and equipment currently used in industry
- applicable documentation including organisational procedures, industry standards, equipment specifications, regulations, codes of practice and operation manuals.
