Assessment Requirements for PUA FIR305 Respond to aviation incidents (general)

Release: 1

Assessment Requirements for PUA FIR305 Respond to aviation incidents (general)

Modification History

Release 1. This is the first release of this unit of competency in the PUA Public Safety Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and includes

- applying Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) organisational requirements
- concluding aviation operations
- conducting operations using available resources and equipment
- evacuating persons and attending to casualties
- identifying hazards and risks
- implementing aviation objectives, strategies and tactics
- participating in aircraft incident response planning
- preserving and securing evidence at scene
- responding to aviation emergency including identifying type of incident
- selecting and using firefighting equipment and extinguishing media
- selecting and using firefighting personal protective clothing and equipment

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria and includes knowledge of

- aircraft construction
- aircraft hazards
- aircraft emergency procedures
- airport operating procedures
- available resources and equipment
- characteristics and limitations of equipment and resources
- emergency procedures for aviation accidents and incidents
- fire ground strategies and tactics for aviation incidents
- objectives, strategies and tactics including control and extinguish fire, isolate aircraft fuselage from hazard and maintain safe escape routes
- organisational documentation, policies and procedures
- onsite and environmental conditions including potential conditions

- types of aviation accidents and incidents
- types of aircraft fires
- Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) organisational requirements including risk mitigation

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Assessment must occur in workplace operational situations. Where this is not appropriate, assessment must occur in industry approved simulated workplace operational situations that reflect workplace conditions.

Resources for assessment must include access to

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, equipment, tools and personal protective clothing and equipment currently used in industry including
 - airport and aircraft
 - firefighting equipment and fire extinguishment media
- applicable documentation including organisational procedures, industry standards, equipment specifications, regulations, codes of practice and operation manuals.
