Assessment Requirements for PUAFIR410 Provide safety advice at a rural/land management incident

Assessment Requirements for PUAFIR410 Provide safety advice at a rural/land management incident

Modification History

Release 1. This is the first release of this unit of competency in the PUA Public Safety Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and includes

- applying Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) organisational requirements
- assessing adequacy of briefings and debriefings
- completing documentation including reports and logs
- maintaining awareness of active and developing rural and/or land management situations
- managing and communicating information
- monitoring risk management procedures and processes
- participating in and contributing to briefings contributing to the safety, health and welfare of personnel involved in a rural and/or land management incident
- participating in initial safety event investigation
- providing WHS/OHS advice to develop the Incident Action Plan
- recognising issues, activities and events that require safety advisor action
- working within the chain of command

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria and includes knowledge of

- hazard identification encountered at rural and/or land management incidents
- incident or accident investigation and reporting processes and procedures
- initial briefings formats including Situation, Mission, Execution, Administration, Commands (SMEAC)
- operational procedures, practices and implementation including Lookout, Awareness, Communications, Escape routes, Safety zones (LACES)
- organisational documentation, policies and procedures
- planning processes
- risk assessment and management principles
- roles and responsibilities of Incident Controllers, incident management teams and personnel at a rural/land management incident

- safety events including accidents, breach of safety requirements or procedures, near miss or hit and WHS/OHS incidents
- Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) organisational requirements including risk mitigation

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Assessment must occur in workplace operational situations. Where this is not appropriate, assessment must occur in industry approved simulated workplace operational situations that reflect workplace conditions.

Resources for assessment must include access to

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, equipment, tools and personal protective clothing and equipment currently used in industry including
  - actual or simulated workplace environments
- applicable documentation including organisational procedures, policies, industry standards, guidelines, equipment specifications, regulations, codes of practice and operation manuals.
