- securing and preserving scene, evidence and area or origin
- securing scene including removing non-emergency personnel from scene, isolating scene and erecting barriers
- taking notes accurately

## Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements, performance criteria and range of conditions and includes knowledge of

- factors impacting on public safety and scene preservation including those that could impact on safety of investigators, response team, security and/or preservation of actual site, security and preservation of situational evidence and traffic
- factors that may impact security of scene including topography, climatic conditions, human interference, animal interference, preservation of life/property, structural integrity and availability of personnel
- methods of securing scene
- organisational and legislative requirements
- organisational documentation, policies and procedures
- organisational procedures relative to scene preservation, collecting information and taking

witness details

- tactical factors affecting quality of investigation including environmental circumstances, chronology of events, access to scene, number of persons at scene, availability of support services and boundaries
- types of incident scenes
- witness details including name, contact details and other details are recorded, in accordance with organisational policies, procedures and legislative requirements
- Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) organisational requirements including risk mitigation

## Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Assessment must occur in workplace operational situations. Where this is not appropriate, assessment must occur in industry approved simulated workplace operational situations that reflect workplace conditions.

Resources for assessment must include access to

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, equipment, tools and personal protective clothing and equipment currently used in industry
- applicable documentation including organisational procedures, industry standards, equipment specifications, regulations, codes of practice and operation manuals.

## PUALAW002 Conduct initial investigation at incident scene

### Modification History

**Release 1.** This is the first release of this unit of competency in the PUA Public Safety Training Package.

### Application

This unit involves the skills and knowledge required to gather and collate information including obvious and accessible physical evidence from the scene of an incident and identifying potential witnesses. It does not cover the specialist skills required to interpret the evidence gathered or the specialist skills required to gather specific evidence.

The unit applies to non-specialist personnel who have been tasked with the collection of information and evidence that is obvious at an incident scene.

The fire sector is those sections of government departments, statutory authorities or organisations that have responsibility under jurisdictional arrangements for the delivery of firefighting and fire management services.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

### Pre-requisite Unit

Not applicable.

### Competency Field

Fire

### Unit Sector

Fire

### Elements and Performance Criteria

#### ELEMENTS

Elements describe the essential outcomes.

#### 1 Conduct initial assessment of scene 1.1

#### PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

Scene is assessed with regards to Work, Health and Safety (WHS)/Occupational Health and Safety (OHS)

and all actions are undertaken, in accordance with organisation policies, procedures, guidelines and duty of care requirements

- 1.2** Communication is established with the senior investigating officer and liaison is maintained throughout the investigation
  - 1.3** Circumstances surrounding the scene are ascertained from visual assessment and reports from other personnel
  - 1.4** Scene boundary is defined or redefined, as required, to preserve physical evidence for collection
  - 1.5** Obvious and accessible physical evidence is located and, where appropriate, protected from possible contamination
- 2 Control integrity of scene**
  - 2.1** Appropriate arrangements for scene access and egress are established and maintained
  - 2.2** Non-essential persons are removed from the scene and details are recorded accurately, in accordance with organisation and regulatory procedures
  - 2.3** Additional resources are identified and accessed to secure incident scene
  - 2.4** Health and safety needs of personnel and public involved in incident are identified and attended to
- 3 Examine scene**
  - 3.1** Appropriate search pattern is instigated, in accordance with organisational procedures, and instructions from senior investigating officer to ensure all evidence is located and preserved
  - 3.2** Details of the scene are recorded comprehensively and accurately, in accordance with organisational operating procedures
  - 3.3** Evidence is located, collected, packaged, labelled and stored, in accordance with organisational procedures, to ensure preservation for further post scene examination
  - 3.4** An accurate log of all evidence is maintained, in accordance with organisational procedures
  - 3.5** Scenes are assessed for future investigative requirements and appropriate personnel are notified

**4 Identify potential witnesses and initial statements recorded**

- 4.1** Bystanders are canvassed to identify potential witnesses
- 4.2** Details of potential witnesses are recorded, in accordance with organisational procedures
- 4.3** Recording practices are used, in accordance with legislative and regulatory requirements and organisational policies and procedures

**Foundation Skills**

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

**Range of Conditions**

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

incident scene must include at least two of the following

- accident or incident involving death or injury to person or damage to property
- crime scene
- industrial or mining accidents and incidents
- natural disaster
- structural fire
- vehicle accident
- vehicle fire
- wildfire

**Unit Mapping Information**

This unit replaces and is equivalent to PUALAW002B Conduct initial investigation at incident scene.

# Assessment Requirements for PUALAW002 Conduct initial investigation at incident scene

## Modification History

**Release 1.** This is the first release of this unit of competency in the PUA Public Safety Training Package.

## Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements, performance criteria and range of conditions on at least one occasion and includes

- applying Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) organisational requirements
- communicating information and liaising with stakeholders
- conducting initial assessment of scene and identifying and mitigating onsite hazards
- controlling integrity of scene and evidence
- examining scene thoroughly
- gathering physical evidence
- identifying potential witnesses and recording initial statements
- implementing legislative requirements and organisational policies and procedures
- implementing methodical and systematic approach
- making arrangements to protect integrity of evidence
- reassuring bystanders including listening and questioning them
- recording and compiling interviews and statements accurately
- recording and reporting details of incident scene in accordance with organisational requirements
- taking notes accurately
- working with a variety of professionals

## Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements, performance criteria and range of conditions and includes knowledge of

- additional resources to support initial investigation
- arrangements for protecting integrity of evidence
- circumstance initiating need for specialised investigations
- circumstances surrounding scene including sequence of events, possible causes, people and property involved, victims, suspects and witnesses, damage, injury, organisational personnel,

- other organisations and agencies, status of investigation and action taken to date
- details that may be relevant to the investigation
- factors impacting incident scene including prevailing weather, additional resources to preserve and protect incident scene, environmental circumstances, chronology of events, access to scene, number of persons at scene, availability of support services, boundaries and other organisations and/or agencies
- factors impacting security of an incident scene
- features and use of a variety of specialised equipment
- functions and roles of other professionals and experts
- identification, collection and recording of evidence
- incident scene protection and preservation
- indicators of emotional distress
- methods of evidence collection
- methods of packaging
- organisational documentation policies and procedures
- public safety risk factors including factors at incident scene that could impact on safety of investigators and security or preservation of actual site and security and preservation of situational evidence
- scene access and egress
- types of physical evidence including shoe impressions, tyre prints, skid marks, fingerprints, containers, fibres, flammable and combustible liquids, tool marks, bloodstains, identifying numbers, bodily fluids and burn patterns
- Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) organisational requirements including risk mitigation and duty of care at incident scene

## Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Assessment must occur in workplace operational situations. Where this is not appropriate, assessment must occur in industry approved simulated workplace operational situations that reflect workplace conditions.

Competency should be assessed either indoors or outdoors in a rural or urban environment.

Resources for assessment must include access to

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, equipment, tools and personal protective clothing and

equipment used in industry

- applicable documentation including organisational procedures, industry standards, equipment specifications, regulations, codes of practice and operation manuals.

# Assessment Requirements for PUAMAN001 Manage the organisation's public safety responsibilities

## Modification History

**Release 2.0** This is the second release of this unit of competency in the Public Safety Training Package.

Editorial adjustments and clarification of text in Assessment Conditions.

**Release 1.0** This is the first release of this unit of competency in the PUA Public Safety Training Package.

## Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and includes

- analysing the organisation's public safety responsibilities
- applying Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) organisational requirements
- assessing organisational needs
- communicating information
- defining problems
- establishing a risk management structure including context, nature of risk and responsibilities of the organisation
- evaluating and prioritising risk
- identifying stakeholders
- identifying, interpreting and analysing risk management requirements
- implementing a risk management strategic plan and organisational structure which meets public safety risk management needs
- reviewing organisation's risk management performance
- using analytical tools and processes.

## Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria and includes knowledge of

- communication methods and techniques including negotiation strategies and tactics
- elements which influence an organisation's ability to manage risk
- emergency management concepts and principles
- environment within which incident management responsibilities are developed
- intent and potential application of industry standards in organisational risk management

- legislative and regulative arrangements for emergency management
- organisational documentation, policies and procedures
- organisational requirements for risk management
- risk management principles and processes
- risk management structures including context, nature of risk and responsibilities
- technical, financial, social and legal considerations against which risk can be prioritised
- Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) organisational requirements including risk mitigation.

## Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in operational situations or in simulated operational training situations that reflect workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to

- a range of relevant exercises, case studies and/or simulations
- appropriate materials, equipment, tools and personal protective clothing and equipment currently used in industry
- applicable documentation including organisational procedures, industry standards, equipment specifications, regulations, codes of practice and operation manuals.

## PUAMAN002 Administer allocation of resources

### Modification History

**Release 1.** This is the first release of this unit of competency in the Public Safety Training Package.

### Application

This unit of competency involves the skills and knowledge required to administer the allocation of resources to support the achievement of organisational and operational objectives.

The unit applies to public safety managers with responsibility for resources allocation. It is relevant for managers at a local level through to organisational level.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

### Pre-requisite Unit

Not applicable.

### Competency Field

Management

### Unit Sector

Public Safety

### Elements and Performance Criteria

#### ELEMENTS

Elements describe the essential outcomes.

#### **1 Access and allocate resources**

#### PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

- 1.1** Resources are identified and accessed, in accordance with organisation's policy and procedures
- 1.2** Resources are allocated to facilitate required outcomes
- 1.3** Equipment stock and supplies are stored, in accordance with organisational policies and procedures

- |                                                         |            |                                                                                                                    |
|---------------------------------------------------------|------------|--------------------------------------------------------------------------------------------------------------------|
|                                                         | <b>1.4</b> | Resources are handled, in accordance with organisational policies and procedures and resource management systems   |
| <b>2 Monitor, evaluate and report on resource usage</b> | <b>2.1</b> | Records of resource allocation and usage are maintained, in accordance with organisational policies and procedures |
|                                                         | <b>2.2</b> | Resource usage is monitored and evaluated against targets and organisational standards                             |
|                                                         | <b>2.3</b> | Resource utilisation issues are documented and reported to relevant persons                                        |

## Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

# Assessment Requirements for PUAMAN002 Administer allocation of resources

## Modification History

**Release 1.** This is the first release of this unit of competency in the Public Safety Training Package.

## Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and includes

- allocating resources
- applying organisational policies and procedures including Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) requirements
- communicating information
- coordinating the allocation of resources in a range of contexts to achieve the organisation's objectives
- evaluating and reporting on resource usage
- interpreting budget reports
- monitoring resource allocation and usage
- preparing resource reports
- utilising resource inventories

## Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria and includes knowledge of

- budget administration
- means of accessing resources
- organisational documentation, policies and procedures including Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) requirements
- resource management systems including considerations for allocation
- stock handling
- tools to produce resource reports

## Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Assessment must occur in workplace operational situations. Where this is not appropriate, assessment must occur in industry approved simulated workplace operational situations that reflect workplace conditions.

Resources for assessment must include access to

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, equipment, tools and personal protective clothing and equipment currently used in industry
- applicable documentation including organisational procedures, industry standards, equipment specifications, regulations, codes of practice and operation manuals.

## PUAMAN003 Manage human resources

### Modification History

**Release 2.0** This is the second release of this unit of competency in the Public Safety Training Package.

Editorial adjustments and clarification of text in Assessment Conditions.

**Release 1.0** This is the first release of this unit of competency in the PUA Public Safety Training Package.

### Application

This unit of competency involves the skills and knowledge required to manage and develop human resources to achieve organisational operational objectives.

The unit applies to personnel who have a specific human resources role within a public safety organisation. Whilst some aspects may be applied in a typical management role, it has a more specialist focus beyond human resource requirements for team leaders and managers.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

### Pre-requisite Unit

The fire sector is those sections of government departments, statutory authorities or organisations that have responsibility under jurisdictional arrangements for the delivery of firefighting and fire management services.

It is essential that the prerequisite unit listed below are obtained prior to the issuance of this unit to individuals within the fire sector or the units contributing to the attainment of a fire qualification.

PUAFIR503 Coordinate human resource management activities

### Competency Field

Management

### Unit Sector

Public Safety

## Elements and Performance Criteria

### ELEMENTS

### PERFORMANCE CRITERIA

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

#### **1 Lead and motivate people**

- 1.1** Goals, personnel and teams to optimise achievement in work tasks are established and agreed
- 1.2** Advice and support sensitive to the individual's needs is provided to personnel in the performance of their duties
- 1.3** Activities are undertaken to achieve commitment to common goals
- 1.4** Initiative and innovation are recognised and encouraged
- 1.5** Achievements are recognised and communicated within the organisation

#### **2 Undertake human resource planning**

- 2.1** Human resource needs are determined and/or reviewed within anticipated operational needs and allocated budget
- 2.2** Alternatives for staffing levels which clearly demonstrate returns to the organisation are analysed
- 2.3** Contingency plans for staffing which meet key provisions of the human resource plan are developed
- 2.4** Existing competencies of staff are compared with the needs of the organisation and/or work group
- 2.5** Staffing levels are planned and negotiated with stakeholders within the organisational framework to achieve maximum efficiency of operations

#### **3 Develop and facilitate performance**

- 3.1** Performance criteria are negotiated and agreed upon with individuals, teams and work groups
- 3.2** Performance criteria are reviewed as circumstances change
- 3.3** Performance appraisal is conducted, based on clearly established and agreed performance criteria
- 3.4** Strategies to rectify performance shortfalls and recognise success are identified

- 3.5 Performance problems are addressed confidentially and in a constructive and timely manner, in accordance with organisational procedures
  - 3.6 Selections, transfers and promotions are made, in accordance with organisational policies and are supported with documented information
  - 3.7 Mechanisms are developed and implemented for the identification of human resource development needs within the work group and/or organisation taking into account the strategic plan for the organisation
- 4 Facilitate training, educational and development opportunities**
  - 4.1 Information on planned training events is made available throughout the organisation
  - 4.2 Training, educational and development plans are included as part of an individuals and/or team performance plan
  - 4.3 Individual and/or team access to and participation in training, educational and development opportunities is facilitated
  - 4.4 Coaching and mentoring strategies are used to develop personnel in an environment of change
  - 4.5 Training, educational and development opportunities to enhance individual, team and organisational performance are identified
- 5 Develop and implement issue resolution and grievance procedures**
  - 5.1 Problem solving and/or issue resolution procedures are established within legislative requirements and organisational guidelines
  - 5.2 Grievances and complaints are managed in a timely and caring way to optimise likelihood of a favourable outcome for all parties, in accordance with organisational policies and procedures
  - 5.3 Individual rights and obligations under industrial awards and/or agreements and legislation are documented and communicated in a clear and concise manner using appropriate language
  - 5.4 Hearings, interviews and meetings are conducted within the principles of industrial democracy and are participative and use consultative processes

|                                      |     |                                                                                                     |
|--------------------------------------|-----|-----------------------------------------------------------------------------------------------------|
|                                      | 5.5 | Relevant industrial parties are identified and invited to participate in the resolution process     |
| <b>6 Manage disciplinary matters</b> | 6.1 | Disciplinary matters are implemented, in accordance with organisational policies and procedures     |
|                                      | 6.2 | Investigations are conducted in a caring and confidential manner to maintain performance and morale |
|                                      | 6.3 | Feedback is provided promptly                                                                       |
|                                      | 6.4 | Appeals processes are instituted, in accordance with organisational policies and procedures         |
|                                      | 6.5 | Deficiencies in procedures are recognised and recommendations for change are made                   |

## Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

# Assessment Requirements for PUAMAN003 Manage human resources

## Modification History

**Release 2.0** This is the second release of this unit of competency in the Public Safety Training Package.

Editorial adjustments and clarification of text in Assessment Conditions.

**Release 1.0** This is the first release of this unit of competency in the PUA Public Safety Training Package.

## Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and includes

- achieving agreed results
- applying interpersonal skills
- applying organisational policies and procedures including Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) requirements
- demonstrating consistency between instructions and action in self and others
- developing and facilitating performance
- developing and reviewing performance management plans for individual staff members
- developing arrangements for issue resolution and grievance procedures
- displaying personal and professional integrity in working relationships
- establishing key performance measures for individuals, teams and/or work groups
- establishing training and development opportunities
- facilitating training, education and development of personnel
- identifying and where appropriate using stress management facilities and services
- implementing communication techniques including negotiation and resolution
- leading and motivating people
- managing disciplinary matters
- monitoring performance of individuals, teams and/or groups against key performance indicators
- undertaking human resource planning
- using consultative methods to achieve operational targets
- using management techniques and processes
- utilising decision making processes.

## Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the

requirements of the elements, performance criteria and range of conditions and includes knowledge of

- analysis of human resource development needs
- awards, conditions of service and bargaining agreements
- conflict resolution strategies
- disciplinary actions and grievance procedures
- equal opportunity and equal employment opportunity legislation
- industrial relation legislation and regulations
- leadership and management theory and principles
- management practices
- methods and techniques for training and education
- organisational documentation, policies and guidelines including Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) requirements
- performance measures including selection, transfer and promotion
- principles and process for conducting a training need analysis
- provision of opportunities for training, education and development
- stakeholders.

## Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in operational situations or in simulated operational training situations that reflect workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to

- a range of relevant exercises, case studies and/or simulations
- appropriate materials, equipment, tools and personal protective clothing and equipment currently used in industry
- applicable documentation including organisational procedures, industry standards, equipment specifications, regulations, codes of practice and operation manuals.

## PUAMAN004 Manage procurement

### Modification History

**Release 1.** This is the first release of this unit of competency in the Public Safety Training Package.

### Application

This unit of competency involves the skills and knowledge required to call for tenders and manage the awarding of contracts.

The unit applies to personnel who have a specific role relating to the calling for and management of tenders and contracts within a public safety organisation, with responsibility for ensuring that the organisation's legal and risk management process are applied.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

### Pre-requisite Unit

The fire sector is those sections of government departments, statutory authorities or organisations that have responsibility under jurisdictional arrangements for the delivery of firefighting and fire management services.

It is essential that the prerequisite units listed below are obtained prior to the issuance of this unit to individuals within the fire sector or the units contributing to the attainment of a fire qualification.

|                                            | <b>1.4</b> Inquiries during the tender process are resolved and all tenderers are advised of any relevant clarifications and/or changes, in accordance with organisational procedures         |
| <b>2 Establish the basis of tendering</b>  | <b>2.1</b> The form of tender is determined, in accordance with organisational policies and procedures                                                                                        |
|                                            | <b>2.2</b> Expressions of interest are sought through the publication of tender details                                                                                                       |
|                                            | <b>2.3</b> Expressions of interest are evaluated, and potential tenderers are short listed, in accordance with organisational procurement policy and procedures                               |
| <b>3 Receive and assess tenders</b>        | <b>3.1</b> Documents are received and opened, in accordance with organisational policies and procedures                                                                                       |
|                                            | <b>3.2</b> Tenders are checked for compliance with conditions set out in expression of interest details and/or request for offers                                                             |
|                                            | <b>3.3</b> Details of tenders are compared with established evaluation criteria, in accordance with organisational policies and procedures                                                    |
|                                            | <b>3.4</b> Checks are made, in accordance with organisational procedures, to ensure that principles of probity, fairness and commercial confidentiality are met throughout the tender process |
|                                            | <b>3.5</b> Issues which may require negotiation with applicants are identified and addressed in accordance with organisational procedures                                                     |
| <b>4 Select successful respondent</b>      | <b>4.1</b> Selection process is based on evaluation criteria                                                                                                                                  |
|                                            | <b>4.2</b> Actual or potential conflicts of interests are checked for                                                                                                                         |

disclosure

- 4.3 A contractor is selected from the registered contractors' panel to assist in the selection process, if required
- 4.4 Contractor prices and conditions are examined, in accordance with organisational procedures, to determine if their offer is clear, calculable and not open to manipulation
- 4.5 A cost benefit analysis is undertaken to show that the selected tenderer offers best value for money

## **5 Finalise contract details**

- 5.1 Letter of acceptance outlining all relevant requirements for signing of documentation and satisfaction of pre-commencement conditions is drafted and forwarded, in accordance with organisational procedures
- 5.2 Discrepancies and disagreements about proposed tender arrangements are clarified and resolved, in accordance with organisational procedures, prior to entering into a formal agreement
- 5.3 Contract is executed, in accordance with organisational procedures and legal requirements
- 5.4 Unsuccessful tenderers are informed of result of tender process and are briefed, if appropriate
- 5.5 Contract documents are prepared, approved and distributed, in accordance with organisational procedures
- 5.6 Fulfilment of any outstanding contract requirements is checked and rectified, in accordance with organisational procedures

## **6 Evaluate performance of contract on completion**

- 6.1 Contract conditions and responsibilities are reviewed with relevant personnel
- 6.2 Contract completion is authorised in writing to confirm services have been performed satisfactorily, in accordance with contract objectives and specifications
- 6.3 Contractor performance and/or level of service is evaluated, in accordance with organisational procedures, against agreed benchmarks

## Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

## Unit Mapping Information

This unit replaces and is equivalent to PUAMAN004B Manage procurement.

## Links

PUA Training Package Companion Volume Implementation Guide is found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=3eca5672-6d5a-410b-8942-810d0ba05bbf>

# Assessment Requirements for PUAMAN004 Manage procurement

## Modification History

**Release 1.** This is the first release of this unit of competency in the Public Safety Training Package.

## Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and includes

- applying organisational policies and procedures including Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) requirements
- establishing feedback and monitoring systems
- establishing the basis of tendering including utilising different forms of tenders
- evaluating contract and contractors on completion using approved evaluation criteria
- finalising contract details
- implementing risk management plans
- monitoring and reviewing contract performance
- negotiating with contractors
- preparing appropriate documentation
- receiving and assessing tenders
- selecting successful tender respondent and/or contractor
- supplying information relevant to contract performance including finalising outstanding requirements

## Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria and includes knowledge of

- assessment of tenders and selection of contractors
- awarding of contracts
- basics of contract law
- contract administration including performance of contractors
- contract requirements
- evaluation criteria
- guidelines for the calling of tenders
- legislation, industry standards, codes of practice and regulations
- negotiation processes
- organisational documentation, policies and procedures including Work, Health and Safety

(WHS)/Occupational Health and Safety (OHS) requirements

- other requirements including insurance, WorkCover and bank guarantees
- principles of quality assurance including monitoring of contractor performance
- risk management principles
- selection of contractors
- sources of legal advice
- terms and conditions of contracts
- types of tenders including public, private, selective, open and restricted

## Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Assessment must occur in workplace operational situations. Where this is not appropriate, assessment must occur in industry approved simulated workplace operational situations that reflect workplace conditions.

Resources for assessment must include access to

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, equipment, tools and personal protective clothing and equipment currently used in industry
- applicable documentation including organisational procedures, industry standards, equipment specifications, regulations, codes of practice and operation manuals.

## PUAMAN005 Manage projects

### Modification History

**Release 2.0** This is the second release of this unit of competency in the Public Safety Training Package.

Editorial adjustments and clarification of text in Assessment Conditions.

**Release 1.0** This is the first release of this unit of competency in the PUA Public Safety Training Package.

### Application

This unit of competency involves the skills and knowledge required to manage and evaluate projects.

The unit is applicable to any personnel undertaking a project management role. This includes management of small and short term projects as well as roles with a specific project management focus.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

### Pre-requisite Unit

The fire sector is those sections of government departments, statutory authorities or organisations that have responsibility under jurisdictional arrangements for the delivery of firefighting and fire management services.

It is essential that the prerequisite units listed below are obtained prior to the issuance of this unit to individuals within the fire sector or the units contributing to the attainment of a fire qualification.

PUATEA003 Lead, manage and develop teams

### Competency Field

Management

### Unit Sector

Public Safety

## Elements and Performance Criteria

### ELEMENTS

### PERFORMANCE CRITERIA

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

#### **1 Identify project scope**

**1.1** Identify and record scope, objectives and outcomes of project

**1.2** Strategy to achieve project objectives, outcomes and client requirements is developed

**1.3** A risk management system is developed and applied to ensure project objectives can be met within organisational accountability frameworks

#### **2 Acquire project resources**

**2.1** Project resources and equipment are identified, acquired and allocated

**2.2** Project scope and objectives are analysed to determine tasks to achieve agreed outcomes on time and within budget

**2.3** Process for monitoring, evaluating and reporting performance against objectives are developed and applied

**2.4** Roles and responsibilities of team members and stakeholders are identified and agreed

#### **3 Manage project activities**

**3.1** Project is initiated, in accordance with organisational policies and strategic direction, in consultation with stakeholders

**3.2** Tasks are implemented, in accordance with project plan and organisational procedures

**3.3** Communication process is established including responsibilities for conflict resolution

**3.4** Progress is monitored to ensure time, performance, cost and quality of project is achieved

**3.5** Proposed variations are investigated and negotiated, in consultation with stakeholders

#### **4 Finalise project and evaluate and report on activities**

**4.1** Project is completed, outcomes are recorded and opportunities for future improvement are established

- 4.2** Evaluation of completed project is undertaken against agreed objectives and is reported to stakeholders

## **Foundation Skills**

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## **Range of Conditions**

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

## **Unit Mapping Information**

This unit replaces and is equivalent to PUAMAN005B Manage projects.

## PUAMAN006 Manage and facilitate change

### Modification History

**Release 1.** This is the first release of this unit of competency in the PUA Public Safety Training Package.

### Application

This unit of competency involves the skills and knowledge required to introduce, manage and evaluate change in a range of organisational contexts.

The unit is applicable to managers who have the resource and financial authority to make change to organisational strategies, policies and/or procedures.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

### Pre-requisite Unit

Not applicable.

### Competency Field

Management

### Unit Sector

Public Safety

### Elements and Performance Criteria

#### ELEMENTS

Elements describe the essential outcomes.

#### **1 Develop change management strategy**

#### PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

- 1.1** Future trends and organisational needs are considered when developing a change strategy for dealing with change
- 1.2** Stakeholders are consulted when developing a strategy for dealing with organisational/workplace change

- |                                                |            |                                                                                                                                                             |
|------------------------------------------------|------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                                                | <b>1.3</b> | Options and specific proposals for an organisational/workplace change management strategy are developed                                                     |
|                                                | <b>1.4</b> | Change management strategy is adopted                                                                                                                       |
| <b>2 Facilitate change management strategy</b> | <b>2.1</b> | Advice is communicated to stakeholders on the requirements for effective change management strategy implementation                                          |
|                                                | <b>2.2</b> | Resource requirements to implement change management strategy in the organisation/workplace are obtained and used                                           |
|                                                | <b>2.3</b> | Leadership is provided to assist others to adapt to the change management strategy including providing guidance, training, support and positive role models |
| <b>3 Implement change</b>                      | <b>3.1</b> | Organisational/work practices, policies, procedures, strategies and resource requirements are amended to accommodate the change management strategy         |
|                                                | <b>3.2</b> | Outcomes of the change management strategy are achieved                                                                                                     |
| <b>4 Review effectiveness of change</b>        | <b>4.1</b> | Feedback, evaluation and monitoring mechanisms are put in place, in accordance with organisational procedures                                               |
|                                                | <b>4.2</b> | Monitoring and evaluation outcomes of the change management strategy are communicated to relevant personnel                                                 |
|                                                | <b>4.3</b> | Monitoring and evaluation results are reflected in future change management strategy implementation                                                         |

## PUAMAN007 Manage financial resources

### Modification History

**Release 2.0** This is the second release of this unit of competency in the Public Safety Training Package.

Editorial adjustments and clarification of text in Assessment Conditions.

**Release 1.0** This is the first release of this unit of competency in the PUA Public Safety Training Package.

### Application

This unit of competency involves the skills and knowledge required to manage financial resources to achieve organisation and operational objectives.

The unit applies to any personnel with authority for the management of financial resources, including budgets, within a public safety organisation.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

### Pre-requisite Unit

The fire sector is those sections of government departments, statutory authorities or organisations that have responsibility under jurisdictional arrangements for the delivery of firefighting and fire management services.

It is essential that the prerequisite units listed below are obtained prior to the issuance of this unit to individuals within the fire sector or the units contributing to the attainment of a fire qualification.

PUAFIR505 Administer cost centre's financial resources

### Competency Field

Management

### Unit Sector

Public Safety

### Elements and Performance Criteria

#### ELEMENTS

#### PERFORMANCE CRITERIA

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

## **1 Develop budget**

- 1.1** Budgets are developed in required format, in accordance with organisational procedures
- 1.2** Costs and income streams are identified and quantified, in accordance with organisational procedures
- 1.3** Comparative analysis is prepared for major items, in accordance with organisational policies and procedures
- 1.4** Subordinate budgets are integrated into the prime budget
- 1.5** Implications of major shifts in proposed or actual budget allocations, income and/or expenditure are identified and analysed when preparing the budget
- 1.6** Performance indicators are developed and implemented, in accordance with organisational procedures
- 1.7** Financial resources are allocated to support achievement of operational objectives

## **2 Allocate, authorise and monitor expenditure**

- 2.1** Expenditure management is implemented to ensure it meets organisational financial accountability requirements
- 2.2** Significant potential and actual variations from the budget are renegotiated, in accordance with organisational procedures
- 2.3** Expenditure is authorised within financial authority limits, in accordance with organisational procedures and guidelines
- 2.4** Supply and expenditure processes are in accordance with corporate governance and organisational protocols
- 2.5** Financial reports are produced, as required, in a format nominated by the organisation
- 2.6** Primary and subordinate budgets are monitored alongside achievement of financial and operational objectives
- 2.7** Financial allocations are monitored, in accordance with organisational procedures, to ensure objectives and priorities relating to service delivery are met

|                                                           |            |                                                                                                                                       |
|-----------------------------------------------------------|------------|---------------------------------------------------------------------------------------------------------------------------------------|
|                                                           | <b>2.8</b> | Reallocation of financial resources is undertaken, in accordance with organisational policy and procedures                            |
| <b>3 Utilise financial management information systems</b> | <b>3.1</b> | Management information systems are used for planning, implementing and monitoring financial resource usage                            |
|                                                           | <b>3.2</b> | Management information system reports are produced, verified and interpreted, in accordance with organisational policy and procedures |

## PUAMAN008 Manage physical resources

### Modification History

**Release 2.0** This is the second release of this unit of competency in the PUA Public Safety Training Package.

Editorial adjustments and clarification of text in Assessment Conditions.

**Release 1.0** This is the first release of this unit of competency in the PUA Public Safety Training Package.

### Application

This unit of competency involves the skills and knowledge required to undertake asset management. It includes planning for, acquiring and managing physical resources to achieve organisational objectives.

The unit is applicable to personnel who manage a specific category of resource for the organisation or for personnel who manage multiple resources within a large cost centre. It is not appropriate for personnel who only manage physical resources during incidents.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

### Pre-requisite Unit

The fire sector is those sections of government departments, statutory authorities or organisations that have responsibility under jurisdictional arrangements for the delivery of firefighting and fire management services.

It is essential that the prerequisite units listed below are obtained prior to the issuance of this unit to individuals within the fire sector or the units contributing to the attainment of a fire qualification.

PUAMAN002 Administer allocation of resources

### Competency Field

Management

### Unit Sector

Public Safety

## Elements and Performance Criteria

### ELEMENTS

Elements describe the essential outcomes.

#### **1 Identify and plan physical resource requirements**

### PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

- 1.1** Physical resource requirements are identified, in accordance with demonstrated organisational needs
- 1.2** Comparative analyses demonstrating value to the organisation are undertaken, in accordance with organisational procedures
- 1.3** Resource requirements are consolidated and rationalised, in accordance with organisational procedures
- 1.4** Resource requirements are clarified and confirmed and a plan for resource acquisition and disposal is developed, in accordance with organisational procedures and available budget
- 1.5** Major items are scheduled for acquisition, refurbishment and/or replacement based on anticipated obsolescence of equipment and/or machinery and the anticipated needs of the organisation
- 1.6** Resource specifications are developed, including reference to service and maintenance requirements, consumables and shelf life

#### **2 Coordinate acquisition and allocation of physical resources**

- 2.1** Acquisition of resources is undertaken directly or by a third party, in accordance with organisational procedures
- 2.2** Resources received are inspected to ensure they meet supply specifications
- 2.3** Received resources are entered into asset and other inventory registers for tracking
- 2.4** Resources are stored, allocated, reallocated and/or distributed, in accordance with organisational procedures and needs
- 2.5** Maintenance schedules and budgets are developed and approved in consultation with stakeholders, in accordance with organisational procedures

- |                                                             |            |                                                                                                                                                               |
|-------------------------------------------------------------|------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------|

## Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

## Unit Mapping Information

This unit replaces and is equivalent to PUAMAN008B Manage physical resources.

## Links

Companion Volume Implementation Guides are found in VETNet -  
<https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=3eca5672-6d5a-410b-8942-810d0ba05bbf>

# Assessment Requirements for PUAMAN008 Manage physical resources

## Modification History

**Release 2.0** This is the second release of this unit of competency in the Public Safety Training Package.

Editorial adjustments and clarification of text in Assessment Conditions.

**Release 1.0** This is the first release of this unit of competency in the PUA Public Safety Training Package.

## Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and includes

- adhering to reporting requirements
- analysing costs and benefits of resource acquisition and utilisation
- applying legislation, industry standards, codes of practice and regulations
- coordinating acquisition and allocation of physical resources
- determining obsolescence of equipment and machinery
- developing and implementing acquisition and disposal plans
- developing maintenance schedules and budgets
- developing resource specifications
- evaluating and reporting on physical resource provision
- evaluating resource performance
- identifying and planning for physical resource requirements
- identifying physical resources requirements
- implementing organisational policies and procedures including Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) requirements
- monitoring and maintaining physical resource provisions
- monitoring resource acquisition and allocation
- utilising resource inventory and/or assets register
- working with a variety of budget formats
- working with stakeholders.

## Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria and includes knowledge of

- budget formats and processes

- legislation, industry standards, codes of practice and regulations
- obsolescence of equipment and machinery
- organisational documentation, policies and procedures including Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) requirements and the procedures for the acquisition and allocation of resources
- physical resource monitoring
- requirements for reporting
- resource and/or asset management systems
- types of physical resources
- types of stakeholders.

## Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in operational situations or in simulated operational training situations that reflect workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to

- a range of relevant exercises, case studies and/or simulations
- appropriate materials, equipment, tools and personal protective clothing and equipment currently used in industry
- applicable documentation including organisational procedures, industry standards, equipment specifications, regulations, codes of practice and operation manuals.

# PUAOIL202 Use basic equipment operations for oil spill response

## Modification History

**Release 1.** This is the first release of this unit of competency in the PUA Public Safety Training Package.

## Application

This unit of competency involves the skills and knowledge required to operate, deploy, monitor and recover basic (Level 1) oil spill response equipment, whilst working as a team member.

An oil spill is the release of liquid petroleum hydrocarbon into the environment, either aquatic or on land. There are three categorised levels of oil spills; Level 1 spills are mild, causing localised damage in marine and or land environments.

The unit is applicable to personnel deployed to operate basic (Level 1) oil spill response equipment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Pre-requisite Unit

Not applicable.

## Competency Field

Marine Pollution Response

## Unit Sector

Not applicable

## Elements and Performance Criteria

### ELEMENTS

Elements describe the essential outcomes.

#### **1 Undertake a health and safety site review**

### PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

**1.1** Identify and communicate potential oil spill hazards and risks

**1.2** Report hazards and risks, in accordance with

|                                                   |                                                                                                                                                                                                                 |
|---------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                                                   | organisational procedures                                                                                                                                                                                       |
|                                                   | <b>1.3</b> Select and use personal protective clothing and equipment, in accordance with Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) guidelines and Safety Data Sheet (SDS) requirements |
| <b>2 Prepare Level 1 equipment for use</b>        | <b>2.1</b> Use the incident action plan and/or site specific deployment plan to identify and select oil spill response equipment, in accordance with organisational requirements and supervisor's instructions  |
|                                                   | <b>2.2</b> Use organisational procedures and manufacturers' specifications, in the management of routine preoperational checks of equipment                                                                     |
|                                                   | <b>2.3</b> Report unsafe or faulty equipment, in accordance with organisational procedures, and set aside for repair and/or replacement                                                                         |
| <b>3 Operate and/or deploy Level 1 equipment</b>  | <b>3.1</b> Operate and maintain equipment, in accordance with organisational procedures and manufacturers' specifications                                                                                       |
|                                                   | <b>3.2</b> Complete work tasks, in accordance with organisational procedures, WHS/OHS requirements and the incident action plan                                                                                 |
|                                                   | <b>3.3</b> Identify, action and monitor environmental implications associated with oil spill response and maintenance of equipment                                                                              |
|                                                   | <b>3.4</b> Monitor oil spill environmental conditions, in conjunction with operational activities                                                                                                               |
| <b>4 Check, clean and store Level 1 equipment</b> | <b>4.1</b> Report equipment use, in accordance with organisational procedures, site specific deployment plan and incident action plan requirements                                                              |
|                                                   | <b>4.2</b> Clean, secure and store equipment, including personal protective clothing and equipment, in accordance with organisational procedures, manufacturers' specifications and maintenance manuals         |
|                                                   | <b>4.3</b> Report equipment faults or damage to supervisor, in accordance with organisational procedures                                                                                                        |
|                                                   | <b>4.4</b> Maintain and clean workplace, in accordance with organisational procedures and WHS/ OHS guidelines                                                                                                   |

# Assessment Requirements for PUAOIL202 Use basic equipment operations for oil spill response

## Modification History

**Release 1.** This is the first release of this unit of competency in the Public Safety Training Package.

## Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and includes

- applying Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) requirements
- checking, cleaning and storing Level 1 equipment including monitoring their performance
- communicating with team members and organisational personnel
- following organisational policies and procedures
- identifying hazards including chemical, operational and working environments
- loading and unloading materials safely
- modifying activities in relation to risk and environment
- operating and deploying Level 1 equipment
- preparing Level 1 equipment for use including preoperational checks
- reading and interpreting Safety Data Sheets (SDS)
- recognising and addressing problems when dismantling, inspecting and assembling equipment
- undertaking a health and safety site review including identifying and assessing potential risks
- using personal protective clothing and equipment
- working in a team to safely deploy and monitor basic (Level 1) equipment for the containment, recovery and storage of oil from a spill

## Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria and includes knowledge of

- characteristics and liabilities of Level 1 oil spill equipment including operation of and environmental impact of the equipment
- environmental conditions and implications of oil spill including oil spill response equipment required
- organisational documentation, policies and procedures
- personal protective clothing and equipment

- potential hazards
- preoperational checks
- safe working procedures and practices
- Safety Data Sheets (SDS)
- Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) requirements including risk mitigation

## Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, equipment, tools and personal protective clothing and equipment currently used in industry
- applicable documentation including organisational procedures, industry standards, equipment specifications, regulations, codes of practice and operations manuals.

# PUAOIL303 Apply health, safety and risk controls when working on oiled shorelines

## Modification History

**Release 1.** This is the first release of this unit of competency in the PUA Public Safety Training Package.

## Application

This unit of competency involves the skills and knowledge required to apply health, safety and risk controls when working on an oiled shoreline. It includes identifying potential hazards, following procedures for risk control, supporting safety guidelines for working with oil and reporting on hazards, injuries and near misses.

The unit is applicable to shoreline supervisors and/or coordinators responsible for health, safety and risk controls to ensure the wellbeing of all responders reacting to an oiled shoreline incident.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Pre-requisite Unit

Not applicable.

## Competency Field

Marine Pollution Response

## Unit Sector

Not applicable

## Elements and Performance Criteria

### ELEMENTS

Elements describe the essential outcomes.

#### **1 Identify potential hazards**

### PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

**1.1** Identify and analyse hazards at oiled shoreline before and during incident

**1.2** Complete a risk assessment for identified hazards in

|                                                        |            |                                                                                                                                                  |
|--------------------------------------------------------|------------|--------------------------------------------------------------------------------------------------------------------------------------------------|
|                                                        |            | accordance organisational procedures and Work, Health and Safety (WHS)/ Occupational Health and Safety (OHS) requirements                        |
|                                                        | <b>1.3</b> | Identify and apply controls for hazards                                                                                                          |
|                                                        | <b>1.4</b> | Review effectiveness of controls within the shoreline supervisor or coordinator's scope of authority                                             |
|                                                        | <b>1.5</b> | Identify and report on any remaining risks to relevant personnel and organisations or agencies                                                   |
| <b>2 Follow procedures for risk control</b>            | <b>2.1</b> | Select, use and maintain personal protective clothing and equipment, in accordance with Safety Data Sheet (SDS) requirements                     |
|                                                        | <b>2.2</b> | Develop site specific health and safety plan and continuously review throughout incident                                                         |
|                                                        | <b>2.3</b> | Coordinate induction training for oil spill responders attending incident                                                                        |
| <b>3 Follow safety guidelines for working with oil</b> | <b>3.1</b> | Explain contact procedures for personnel involved in oil spill response                                                                          |
|                                                        | <b>3.2</b> | Follow approved safety procedures and use personal protective clothing and equipment, as specified, in accordance with organisational procedures |
|                                                        | <b>3.3</b> | Implement safety procedures when operating near volatile oil substances                                                                          |
| <b>4 Report hazards, injuries, near misses</b>         | <b>4.1</b> | Communicate and apply reporting requirements for hazards, injuries and near miss incidents                                                       |
|                                                        | <b>4.2</b> | Implement remediation strategies and practices, as required, following completion of incident report                                             |
|                                                        | <b>4.3</b> | Complete organisational documentation and reports, in accordance with organisational procedures and forward to relevant personnel                |

## Foundation Skills

# Assessment Requirements for PUAOIL303 Apply health, safety and risk controls when working on oiled shorelines

## Modification History

**Release 1.** This is the first release of this unit of competency in the PUA Public Safety Training Package.

## Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and includes

- applying Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) requirements including applying health and safety practices when working in oiled shoreline environments
- assessing risks
- complying with safety guidelines for working with oiled shorelines
- developing and reviewing site specific health and safety plans
- ensuring tasks are performed to meet safety requirements and quality systems
- following procedures for risk control
- identifying, documenting and managing health and safety, potential hazards and associated risks for oiled shorelines and continually review
- implementing controls for hazardous in oiled shoreline situations
- implementing emergency provisions
- implementing organisational policies and procedures
- recognising potential emergency situations and communicating promptly
- reporting hazards, injuries and near misses
- using personal protective clothing and equipment and material safety data sheets

## Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria and includes knowledge of

- correct use of equipment for handling materials
- environmental impacts and risks to individuals and the community
- hazards and hazardous areas including chemical, operational and working environments
- operational characteristics of oil spill equipment
- organisational documentation, policies and procedures
- personal protective clothing and equipment
- risk mitigation processes including controls for hazards
- Safety Data Sheets (SDS)

- severity of risks from materials
- site specific health and safety planning
- Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) requirements

## Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Simulations will be required for the timely assessment of this unit of competency. Simulations should be based on potential work environment and should include the use of case studies and scenarios using what if questions and answers.

Resources for assessment must include access to

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, equipment, tools and personal protective clothing and equipment currently used in industry
- applicable documentation including organisational procedures, industry standards, equipment specifications, regulations, codes of practice and operations manuals.

# PUAOIL304 Use advanced equipment operations for oil spill response

## Modification History

**Release 1.** This is the first release of this unit of competency in the PUA Public Safety Training Package.

## Application

This unit involves the skills and knowledge required to safely deploy, operate, monitor and recover advanced oil spill response equipment.

The unit is applicable to personnel responsible for the choices and deployment of appropriate advanced oil spill response equipment to meet the type of oil spill operations and environmental conditions for Level 1, 2 or 3 responses.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Pre-requisite Unit

Not applicable.

## Competency Field

Marine Pollution Response

## Unit Sector

Not applicable

## Elements and Performance Criteria

### ELEMENTS

Elements describe the essential outcomes.

#### **1 Manage safety of operation**

### PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

- 1.1** Identify hazards and risks for the site and equipment use through a job safety analysis
- 1.2** Apply the hierarchy of controls to manage hazards and risks

- |                                                                  |            |                                                                                                                                                                                                            |
|------------------------------------------------------------------|------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                                                                  | <b>1.3</b> | Select, use, maintain and store personal protective clothing and equipment, in accordance with Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) and Safety Data Sheet (SDS) requirements |
| <b>2 Communicate with work team and incident management team</b> | <b>2.1</b> | Prepare site specific deployment plans based on the incident action plan                                                                                                                                   |
|                                                                  | <b>2.2</b> | Plan, prepare and present briefs and debriefs to relevant personnel                                                                                                                                        |
|                                                                  | <b>2.3</b> | Maintain communication channels with all stakeholders involved in the deployment and recovery of oil spill response equipment                                                                              |
|                                                                  | <b>2.4</b> | Ensure oil spill response personnel can deploy equipment in a team environment                                                                                                                             |
| <b>3 Prepare equipment for use</b>                               | <b>3.1</b> | Identify required advanced oil spill response equipment using the incident action plan and/or site specific deployment plan                                                                                |
|                                                                  | <b>3.2</b> | Conduct routine preoperational checks of equipment using organisational procedures and manufacturers' specifications                                                                                       |
|                                                                  | <b>3.3</b> | Identify and segregate faulty equipment for repair or replacement                                                                                                                                          |
|                                                                  | <b>3.4</b> | Identify equipment requiring licensed operators                                                                                                                                                            |
| <b>4 Operate and/or deploy equipment</b>                         | <b>4.1</b> | Use equipment, in accordance with state, territory and Commonwealth licensing requirements                                                                                                                 |
|                                                                  | <b>4.2</b> | Operate and monitor equipment, in accordance with organisational procedures, manufacturers' specifications and supervisor's instructions                                                                   |
|                                                                  | <b>4.3</b> | Carry out work, in accordance with organisational procedures, WHS/OHS requirements and the incident action plan                                                                                            |
|                                                                  | <b>4.4</b> | Identify and record the use of equipment consumables                                                                                                                                                       |
| <b>5 Monitor operations</b>                                      | <b>5.1</b> | Monitor, assess and reassess the effectiveness of equipment and/or the recovery operation                                                                                                                  |

- |                                           |            |                                                                                                                                                                     |
|-------------------------------------------|------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                                           | <b>5.2</b> | Identify, action and monitor environmental implications associated with the operation and maintenance of equipment                                                  |
|                                           | <b>5.3</b> | Identify any changes to response as a result of ongoing monitoring of operations                                                                                    |
| <b>6 Check, clean and store equipment</b> | <b>6.1</b> | Maintain records of equipment use, in accordance with organisational procedures, the incident management system and incident action plan                            |
|                                           | <b>6.2</b> | Clean, secure and store equipment, in accordance with organisational procedures, manufacturers' specifications, maintenance manual and/or supervisor's instructions |
|                                           | <b>6.3</b> | Report and take action on equipment malfunction, fault, wear or damage, in accordance with organisational procedures                                                |
|                                           | <b>6.4</b> | Maintain and clean workplace, in accordance with organisational procedures, WHS/OHS requirements and demobilisation plan                                            |

## Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

## Unit Mapping Information

This unit replaces and is equivalent to PUAOIL302 Use advanced equipment operations for oil spill response.

## Links

PUA Training Package Companion Volume Implementation Guide is found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=3eca5672-6d5a-410b-8942-810d0ba05bbf>

# Assessment Requirements for PUAOIL304 Use advanced equipment operations for oil spill response

## Modification History

**Release 1.** This is the first release of this unit of competency in the PUA Public Safety Training Package.

## Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and includes

- applying Work, Health and Safety (OHS)/Occupational Health and Safety (OHS) requirements
- checking, cleaning and storing advanced equipment
- communicating with work team, incident management team and stakeholders including conducting briefings and debriefings
- completing maintenance records
- conducting pre-operational checks
- demonstrating safe deployment and operation of equipment to contain, recover and store oil
- ensuring safety and hazard control procedures are implemented
- following organisational policies and procedures
- handling and using equipment safely including loading and unloading of equipment and materials
- identifying hazardous situations and taking appropriate action
- identifying hazards including chemical and operational and working environments
- managing the safety of oil spill operation
- modifying activities dependent on risk and environment
- monitoring and reassessing situations to ensure response meets environmental conditions
- monitoring equipment performance including identifying equipment requiring licensed operators
- performing risk assessments
- preparing advanced equipment for use
- reading and interpreting Safety Data Sheets (SDS)
- recognising and addressing problems when dismantling, inspecting and assembling equipment
- using personal protective clothing and equipment
- working safely

## Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria and includes knowledge of

- communication methods and techniques including briefing and debriefing processes
- deployment plans
- environmental implications
- hazards including chemical and operational and working environments
- hierarchy of controls
- incident action plans
- operational characteristics of advanced oil spill response equipment
- organisational documentation, policies and procedures
- personal protective clothing and equipment
- safe operation of equipment
- Safety Data Sheets (SDS)
- WHS/OHS requirements and responsibilities including risk mitigation processes

## Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, equipment, tools and personal protective clothing and equipment currently used in industry
- applicable documentation including organisational procedures, industry standards, equipment specifications, regulations, codes of practice and operations manuals.

# PUAOIL404 Apply decision making strategies in an oil spill response

## Modification History

**Release 1.** This is the first release of this unit of competency in the Public Safety Training Package.

## Application

This unit of competency involves the skills and knowledge required to make strategic, planning and operational decisions in an oil spill response.

The unit is applicable to personnel working in functional management roles within an incident management team who have the responsibility for ensuring the viability and success of a marine pollution, oil spill, response.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Pre-requisite Unit

Not applicable

## Competency Field

Marine Pollution Response

## Unit Sector

Not applicable

## Elements and Performance Criteria

### ELEMENTS

Elements describe the essential outcomes.

#### **1 Establish context of spill**

### PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

**1.1** Gather intelligence to determine size and impact of marine pollution situation

**1.2** Identify character and behaviour of the oil spill

- |                                                   |            |                                                                                                                                                                           |
|---------------------------------------------------|------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                                                   | <b>1.3</b> | Consult and involve appropriate specialists or advisors in establishing the context of the oil spill                                                                      |
|                                                   | <b>1.4</b> | Identify and confirm oil spill response objectives                                                                                                                        |
|                                                   | <b>1.5</b> | Provide accurate, timely and relevant communication about the oil spill to stakeholders                                                                                   |
| <b>2 Consider response options for a decision</b> | <b>2.1</b> | Identify and review available response options to the oil spill                                                                                                           |
|                                                   | <b>2.2</b> | Review strengths and weakness of options with appropriate specialists or advisors                                                                                         |
|                                                   | <b>2.3</b> | Determine risk areas and levels of risk in accordance with organisational procedures and Work, Health and Safety (WHS)/ Occupational Health and Safety (OHS) requirements |
|                                                   | <b>2.4</b> | Determine and select best response options based on critical factors                                                                                                      |
|                                                   | <b>2.5</b> | Determine the scale of response to the oil spill                                                                                                                          |
|                                                   | <b>2.6</b> | Document decision making processes in response to the oil spill                                                                                                           |
| <b>3 Implement response</b>                       | <b>3.1</b> | Develop response plans for selected options, in accordance with organisational procedures and WHS/OHS requirements                                                        |
|                                                   | <b>3.2</b> | Develop an incident action plan                                                                                                                                           |
|                                                   | <b>3.3</b> | Communicate proposed response actions to relevant personnel and stakeholders                                                                                              |
|                                                   | <b>3.4</b> | Monitor and review response actions and modify, as appropriate, in response to changing circumstances                                                                     |

## Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work

environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

## **Unit Mapping Information**

This unit replaces and is equivalent to PUAOIL401 Apply decision making strategies in an oil spill response.

# Assessment Requirements for PUAOIL404 Apply decision making strategies in an oil spill response

## Modification History

**Release 1.** This is the first release of this unit of competency in the PUA Public Safety Training Package.

## Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and includes

- applying Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) requirements
- communicating with stakeholders through the incident action plan
- considering response options when making decisions
- establishing and communicating oil spill response objectives
- establishing context of oil spill including collecting intelligence
- implementing a response and scaling appropriately
- implementing response plans
- interpreting details of a management plan which includes stakeholder analysis, explanation of the risk context, critical success factors, identified and analysed risks and treatments for prioritised risks
- monitoring arrangements for risk management plan including the evaluation of treatments for risks
- solving problems appropriate to identified risks
- sourcing of intelligence including tides, currents and weather forecasts
- undertaking critical analysis of oil spill incident and determining critical factors including appropriate approvals, environment, health and safety of responders and community and minimisation of impact

## Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria and includes knowledge of

- behaviour of oil including
  - movement of oil including volume, spread, drift, area of coverage, percentage, coverage, rate of flow, flow continuing, and flow stopped
  - weathering and influence on oil character including spreading, evaporation, emulsification (mousse formation), dispersion, dissolution, sinking and sedimentation, biodegradation and photo-oxidation

- character of oil including
  - chemical characteristics including aromatic content, aliphatic content, asphaltene content and wax content
  - oil character influence on response options including selection of response equipment and amenability to chemical dispersion
  - physical characteristics such as flash point, pour point, in relation to surface water temperature, solubility, density (API gravity or specific gravity), in relation to density of sea water, viscosity, viscous or non-viscous, thickness, stickiness, in relation to adherence to physical structures or habitats and persistence
- context of the oil spill including location, environmental sensitivity, estuaries, wildlife habitats, tourism, indigenous culture and business and industry
- legislation, codes of practice and industry standards
- limitations and benefits of oil spill response equipment
- management of health and safety issues
- oil spill context, oil types, spill behaviours and effects within the marine environment
- organisational documentation, policies and procedures
- response options taking into account
  - critical factors
  - response options including monitor and evaluate, contain and recover, protect and deflect, shoreline clean up and waste management
  - scale of response including magnitude of the incident, available human and physical resources, geographic location, response timeframes and accessibility
- Safety Data Sheets (SDS)
- sources of intelligence including aerial observations, Australian Dangerous Goods Code, initial visual reports (location), Material Safety Data Sheets (MSDS)/Safety Data Sheets (SDS), net environmental benefit analysis, oil samples, oil spill response atlas, oil spill trajectory modelling, reports from operational, technical and environmental advisors and reports from ship's master indicating type and quantity of oil spill
- specialist advisors including operational, technical and environmental experts such as environmental scientists, marine pollution experts, Australian Maritime Safety Authority (AMSA), oil importers and exporters, ships masters, salvage advisors and government agencies
- stakeholders including federal, state, territory and local government agencies and representatives from businesses, community, protection and indemnity, indigenous communities, marine oil response teams, media, salvors and ship owner, charterer or manager
- strategic planning methodologies including Political, Economic, Social and Technological (PEST) analysis and Strengths, Weaknesses, Opportunities and Threats analysis (SWOT)
- Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) requirements including risk factors and risk mitigation processes

## Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of

assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment must be based on a real or simulated oil response situation where multiple decisions may be made but where critical analysis of information allows for considered and justifiable actions.

Resources for assessment must include access to

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, equipment, tools and personal protective clothing and equipment currently used in industry
- applicable documentation including organisational procedures, industry standards, equipment specifications, regulations, codes of practice and operations manuals.

# PUAOIL405 Apply oiled shoreline assessment strategies in an oil spill response

## Modification History

**Release 1.** This is the first release of this unit of competency in the PUA Public Safety Training Package.

## Application

This unit of competency involves the skills and knowledge required to lead a team in oiled shoreline assessments, as a shoreline supervisor or coordinator.

The unit is applicable to shoreline supervisors or coordinators who are responsible for collating data about shorelines and the extent and degree of oiling.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Pre-requisite Unit

Not applicable.

## Competency Field

Marine Pollution Response

## Unit Sector

Not applicable

## Elements and Performance Criteria

### ELEMENTS

Elements describe the essential outcomes.

#### 1 Conduct pre-deployment preparations

### PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

- |     |                                                                                                  |
|-----|--------------------------------------------------------------------------------------------------|
| 1.1 | Identify government and organisational jurisdictions and capabilities to establish response plan |
| 1.2 | Identify, analyse and record deployment information to aid planning                              |

- |                                    |            |                                                                                                                                                                |
|------------------------------------|------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                                    | <b>1.3</b> | Select, source and check tools and equipment consistent with response plan and Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) requirements |
|                                    | <b>1.4</b> | Document and provide information to the incident management team, in accordance with organisational procedures                                                 |
| <b>2 Conduct onsite assessment</b> | <b>2.1</b> | Plan and prepare briefing prior to onsite oiled shoreline assessment                                                                                           |
|                                    | <b>2.2</b> | Complete and record onsite assessment of oiled shoreline incident zone                                                                                         |
|                                    | <b>2.3</b> | Communicate assessment information to shoreline coordinator to assist in the management of the response                                                        |
| <b>3 Plan and monitor response</b> | <b>3.1</b> | Determine and plan clean up priorities and communicate to relevant personnel, in accordance with organisational requirements                                   |
|                                    | <b>3.2</b> | Identify and communicate specific duties and responsibilities to response team                                                                                 |
|                                    | <b>3.3</b> | Plan and communicate daily objectives and priorities to the response team                                                                                      |
|                                    | <b>3.4</b> | Monitor incident and modify response plan based on response team reports and ongoing oiling of shoreline                                                       |

## Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

## Unit Mapping Information

This unit replaces and is equivalent to PUAOIL402 Apply oiled shoreline assessment strategies

in an oil spill response.

## Links

PUA Training Package Companion Volume Implementation Guide is found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=3eca5672-6d5a-410b-8942-810d0ba05bbf>

# Assessment Requirements for PUAOIL405 Apply oiled shoreline assessment strategies in an oil spill response

## Modification History

**Release 1.** This is the first release of this unit of competency in the PUA Public Safety Training Package.

## Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and includes

- applying Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) requirements
- calculating potential waste volumes
- conducting onsite assessment including biological character, describe shoreline substrates, priorities for shoreline protection, shoreline oiling, shoreline type or form and using appropriate equipment for shoreline assessment
- conducting pre-deployment preparations and developing plans including applying environmental legislations, implementing safe work practices, interpreting maps and preparing, presenting and communicating information to stakeholders and team members
- conveying the importance of health and safety in the oiled environment to team members and stakeholders
- following organisational policies and procedures
- identifying shoreline character
- implementing plans for shoreline protection
- planning and monitoring oiled shoreline responses including considering any constraints, implementing safe work practices and implementing plans for shoreline prioritisation
- preparing, presenting and communicating information to stakeholders and team members
- utilising deployment information

## Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria and includes knowledge of

- characteristics and limitations of equipment
- communication equipment and techniques
- deployment information
- environmental legislation
- oiled shoreline assessment strategies
- organisational documentation, policies and procedures

- possible constraints on applying assessment strategies
- potential environmental impact of oiled shorelines
- shoreline attributes
- shoreline response and deployment plans
- state, territory and Commonwealth emergency marine pollution jurisdictions including related policies and procedures
- Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) organisational requirements including risk mitigation processes

## Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in multi-agency simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, equipment, tools and personal protective clothing and equipment currently used in industry
- applicable documentation including organisational procedures, industry standards, equipment specifications, regulations, codes of practice and operations manuals.

# PUAOIL406 Lead a team in oiled shoreline clean up

## Modification History

**Release 1.** This is the first release of this unit of competency in the PUA Public Safety Training Package.

## Application

This unit of competency involves the skills and knowledge required to lead a team in oiled shoreline clean ups. It involves establishing teams, planning and implementing worksite management zones and the deployment and monitoring of teams to final reporting stage of a clean up.

The unit is applicable to shoreline supervisors or coordinators, supervising and managing oiled shoreline clean up activities including preparing and disseminating plans and strategies to control an oiled shoreline incident.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Pre-requisite Unit

Not applicable.

## Competency Field

Marine Pollution Response

## Unit Sector

Not applicable

## Elements and Performance Criteria

### ELEMENTS

Elements describe the essential outcomes.

#### **1 Establish the shoreline response unit**

### PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

**1.1** Determine the size and structure of the oiled shoreline response unit

**1.2** Deploy appropriate staff to assist in the clean up

- response, in accordance with organisational procedures
- 1.3** Implement a site induction that incorporates safe systems of work, communication methods, hierarchy of roles and reporting systems used within the incident management system
  - 1.4** Identify any training that may need to be implemented
- 2 Plan clean up operations**
- 2.1** Identify hazards and assess risks relevant to the operation and ensure safe systems of work are implemented, in accordance with organisational procedures
  - 2.2** Establish priorities for shoreline protection and clean up based on data and reports received
  - 2.3** Sector and segment shoreline for identification and management of clean up zone
  - 2.4** Implement clean up methods appropriate to environmental conditions
- 3 Organise resources**
- 3.1** Identify and organise response equipment through appropriate channels, in accordance with organisational procedures
  - 3.2** Make arrangements for the transport of resources and personnel to oiled shoreline clean up site
  - 3.3** Establish onsite support for personnel, in accordance with organisational procedures
- 4 Establish worksite management zones**
- 4.1** Implement a three zone system to control access and activities around the incident control centre
  - 4.2** Organise appropriate security for oiled shoreline and incident control centre
  - 4.3** Establish a decontamination centre
- 5 Manage waste from clean up**
- 5.1** Develop and implement ways to minimise waste
  - 5.2** Establish temporary waste holding areas that allow for safe containment and appropriate segregation of waste
  - 5.3** Arrange for the removal of waste from temporary to permanent storage, in accordance with relevant legislation

- |                                        |            |                                                                                                                               |
|----------------------------------------|------------|-------------------------------------------------------------------------------------------------------------------------------|
| <b>6 Deploy and monitor work teams</b> | <b>6.1</b> | Develop and communicate work orders to relevant personnel, in accordance with organisational procedures                       |
|                                        | <b>6.2</b> | Brief teams and allocate tasks relating to relevant timeframe and role to be performed                                        |
|                                        | <b>6.3</b> | Monitor work situation on a regular basis for effectiveness and safety performance of task                                    |
|                                        | <b>6.4</b> | Maintain accurate logs to record actions and decisions made at site                                                           |
|                                        | <b>6.5</b> | Review and change plans, as required, in accordance with organisational procedures                                            |
| <b>7 Terminate response</b>            | <b>7.1</b> | Personnel are debriefed at conclusion of the incident, in accordance with organisational procedures                           |
|                                        | <b>7.2</b> | Equipment is returned to designated areas, as required                                                                        |
|                                        | <b>7.3</b> | Post spill reports are completed and submitted to relevant personnel                                                          |
|                                        | <b>7.4</b> | Records are collected, collated, checked and forwarded to appropriate personnel, in accordance with organisational procedures |

## Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

## Unit Mapping Information

# Assessment Requirements for PUAOIL406 Lead a team in oiled shoreline clean up

## Modification History

**Release 1.** This is the first release of this unit of competency in the PUA Public Safety Training Package.

## Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and includes

- applying safe work systems
- collecting, evaluating and disseminating information on the current and forecast situation
- demonstrating methodologies in planning and organising resources for a clean up response
- deploying and monitoring work teams
- establishing management zones
- establishing oiled shoreline response unit utilising appropriate staff
- establishing worksite management zones
- evaluating, planning and activating workforce deployment
- following organisational policies and procedures including Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) requirements
- identifying hazards
- implementing clean up methods to meet response plan requirements
- maintaining logs and producing reports
- managing waste from clean up
- planning clean up operations
- preparing, presenting and communicating information including induction training
- providing onsite support
- terminating oiled shoreline response
- working as a member of an oiled shoreline incident management team to resolve a clean-up incident

## Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria and includes knowledge of

- characteristics and limitations of equipment
- communication equipment
- environmental and government legislation
- oiled shoreline clean up methods being consistent with organisational procedures, response

plan, shoreline form and characteristics, WHS/OHS legislation and the characteristics of the spilt oil

- organisational documentation, policies and procedures including Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) requirements
- potential hazards
- site inductions including command and control structure, communication plan, personnel records and registration documentation and WHS/OHS procedures
- stakeholders including wildlife groups
- state, territory and Commonwealth emergency marine pollution policies and procedures

## Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

# PUAOPE001 Manage the investigation function at an incident

## Modification History

**Release 1.** This is the first release of this unit of competency in the PUA Public Safety Training Package.

## Application

This unit of competency involves the skills and knowledge required to conduct investigations initiated during an incident.

Investigation officers may be required to liaise with police and enforcement agencies in relation to criminal or coronial matters; preserve and examine scenes; protect, collect and manage evidence and/or exhibits; identify and interview witnesses and manage information related to an incident.

An individual performing this role has the title of investigation officer and is delegated responsibility by the Incident Controller or Operations Officer. The investigation function is generally carried out by an investigation unit within the operations section.

If the Incident Controller determines the need to expand the investigation unit into a functional section, then it will become an investigation section reporting directly to the Incident Controller. Investigations initiated during an incident may continue after the resolution of the incident. Authorisation to perform this role is subject to organisational policies and procedures.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Pre-requisite Unit

Not applicable

## Competency Field

Operations

## Unit Sector

Public Safety

## Elements and Performance Criteria

### ELEMENTS

### PERFORMANCE CRITERIA

Elements describe the essential    Performance criteria describe the performance needed to

outcomes.

demonstrate achievement of the element.

**1 Establish investigation section or unit**

- 1.1** Initial briefing for the incident is sought and obtained from the Incident Controller or Operations Officer where the Incident Controller's intent is confirmed
- 1.2** Investigation section or unit objectives and tasks are identified
- 1.3** Appropriate investigation section or unit structure is developed and resources are identified and obtained
- 1.4** Appropriate investigation section or unit is established, tasks are delegated and briefings are given to delegated personnel
- 1.5** Safe work practices and health and welfare arrangements for work area are implemented and monitored

**2 Manage investigation section or unit**

- 2.1** Allocated tasks are adjusted to meet incident objectives and investigation requirements
- 2.2** Workload, progress and performance of investigation section or unit is monitored and managed
- 2.3** Investigation section or unit meetings are conducted, as required
- 2.4** Information flow within the incident management team and with identified external organisations, is established and maintained
- 2.5** Investigation section or unit plan is developed and implemented, in accordance with organisational procedures
- 2.6** Maps and schematic plans are produced or obtained to meet investigation requirements
- 2.7** Arrangements are made for a log and/or record of activities and decisions to be kept and maintained

**3 Undertake investigation activities at an incident**

- 3.1** Incident investigation requirements are obtained from Incident Controller or Operations Officer
- 3.2** Intelligence and information for the incident investigation is gathered and analysed
- 3.3** Potential connections to other investigations are

- identified
- 3.4 Security plan is formulated to address investigation's requirements
  - 3.5 Investigators are briefed on the investigation plan, in accordance with organisational procedures
  - 3.6 Investigation progress is monitored and amended, as required
  - 3.7 Liaison with Planning or Information Officer to obtain intelligence and information is undertaken, as required
  - 3.8 Potential conflict between incident operations and investigative requirements is addressed through liaison with incident management team members
  - 3.9 Ethical standards are applied throughout the conduct of the investigation
  - 3.10 Local knowledge and information is sought, where appropriate
- 4 Monitor and review investigation activities**
- 4.1 Allocation and performance of resources is monitored and reviewed
  - 4.2 Briefings and debriefings are conducted
  - 4.3 Post incident analysis is initiated and/or participated in
- 5 Conclude investigation**
- 5.1 Continuity of investigation activities is maintained throughout the process of demobilisation of incident structure
  - 5.2 Investigation conclusions are documented in accordance with organisational procedures and investigation plan requirements
  - 5.3 Investigation reports are produced and communicated, in accordance with organisational procedures
  - 5.4 Documentation is completed and investigation evidence collected is stored securely

## Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

## Unit Mapping Information

New unit, no equivalent unit.

## Links

PUA Training Package Companion Volume Implementation Guide is found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=3eca5672-6d5a-410b-8942-810d0ba05bbf>

# Assessment Requirements for PUAOPE001 Manage the investigation function at an incident

## Modification History

**Release 1.** This is the first release of this qualification in the PUA – Public Safety Training Package.

## Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and includes

- analysing investigation data and information
- applying ethical standards to an investigation
- applying Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) requirements
- conducting meetings including preparing agendas
- completing documentation and investigation reports
- implementing investigation and security plans
- implementing organisational policies and procedures
- liaising with Incident Controller or operations officer and other personnel
- maintaining logs
- managing a team including technical specialists
- monitoring resources
- operating in an investigational management role including delegating responsibility, allocating tasks, monitoring performance and providing feedback
- performing briefings and debriefings
- preparing, presenting and communicating information
- taking mitigation action to ensure completion of investigations
- working as a member of an incident management team to resolve an incident investigation
- working with maps and schematic plans

## Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria and includes knowledge of

- Australasian Inter-service Incident Management System (AIIMS) structure and principles
- communication requirements for stakeholders
- ethical standards for investigations
- investigation and security plans
- investigation data and information analysis

- investigation planning requirements and processes
- investigation report requirements
- maintenance of logs
- management and facilitation of team work
- maps and schematic plans
- organisational documentation, policies and procedures
- procedures for meetings
- processes and procedures for briefings and debriefings using Situation, Mission, Execution, Administration/logistics, Command/control and Safety (SMEACS) plus questions
- resource requirements for an investigation

## Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Assessment must occur in workplace operational situations. Where this is not appropriate, assessment must occur in industry approved simulated workplace operational situations that reflect workplace conditions.

Resources for assessment must include access to

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, equipment, tools and personal protective clothing and equipment currently used in industry
- applicable documentation including organisational procedures, industry standards, equipment specifications, regulations, codes of practice and operation manuals.

## Links

PUA Training Package Companion Volume Implementation Guide is found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=3eca5672-6d5a-410b-8942-810d0ba05bbf>

## PUAOPE002 Manage the finance function at an incident

### Modification History

**Release 1.** This is the first release of this unit of competency in the Public Safety Training Package.

### Application

This unit of competency involves the skills and knowledge to manage contracts, procurement, account payments, account records, compensation, insurance claims and the timekeeping of records to support the financial management of an incident.

Finance Officers are required to account for expenditure during an incident, manage insurance and compensation claims and/or issues, collect and record cost data and undertake a cost estimation for the incident.

An individual performing this role has the title of Finance Officer and is delegated responsibility by the Incident Controller or Logistics Officer. This role supports the Incident Controller and other members of the Incident Management Team. The finance function is generally carried out by a finance unit within the logistics section.

If the Incident Controller determines the need to expand the finance unit into a functional section, then it will become a finance section reporting directly to the Incident Controller. Authorisation to perform this role is subject to organisational policies and procedures.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

demonstrate achievement of the element.

**1 Establish finance section/unit**

- 1.1** Initial briefing, including information needed to manage the finance requirements for the incident, is obtained from Incident Controller or Logistics Officer
- 1.2** Finance section or unit objectives and tasks are identified
- 1.3** Finance section or unit structure is developed and required financial management resources are identified and obtained
- 1.4** Finance section or unit is established, including subunits, and tasks are delegated and briefings are given to delegated personnel
- 1.5** Safe work practices and health and welfare arrangements for work area are implemented and monitored

**2 Manage finance section/unit**

- 2.1** Allocated tasks are adjusted to meet incident objectives and financial requirements
- 2.2** Workload, progress and performance of finance section or unit is monitored and managed, in accordance with organisational procedures
- 2.3** Finance section or unit meetings are conducted, in accordance with organisational procedures
- 2.4** Information flow within the incident management team and with identified external organisations, is established and maintained
- 2.5** Finance plan is developed and implemented, in accordance with organisational procedures
- 2.6** Arrangements are made for a log or record of activities and decisions to be kept and maintained, in accordance with organisational procedures

**3 Undertake finance activities**

- 3.1** Purchase and hire of equipment accounts are received, processed and reconciled within authorisations for expenditure
- 3.2** Agreements with financial requirements are reviewed for compliance with organisational requirements
- 3.3** Payroll and related systems and records are maintained,

# Assessment Requirements for PUAOPE002 Manage the finance function at an incident

## Modification History

**Release 1.** This is the first release of this unit of competency in the Public Safety Training Package.

## Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and includes

- applying Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) requirements
- conducting briefings and debriefings
- delegating responsibilities and monitoring performance
- delegating to sub-units within the finance section
- establishing finance section or unit
- implementing organisational documentation, policies and procedures
- keeping a log or record of activities
- liaising with Incident Controller, Logistics Officer and other members of the incident management team
- maintaining financial management system including payroll and accounts
- managing a team including allocating tasks within a time critical and dynamic environment
- managing and monitoring finance section or unit
- managing insurance requirements
- operating in a finance management role
- preparing, presenting and communicating complex financial information
- providing feedback
- recording the status of financial resources at an incident
- taking mitigation action to ensure completion of financial requirements
- using financial support services
- working as a member of an incident management team

## Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria and includes knowledge of

- agreements with financial requirements including contractual arrangements, cooperative agreements, memorandums of understanding and organisational financial policies and procedures

- Australasian Inter-service Incident Management System (AIIMS) structure and principles
- finance section or unit structure including accounts, compensation and insurance, financial monitoring and time keeping units
- financial reporting requirements
- financial support services including analysis of financial risks, collection of cost data, maintenance of records of hire and procurement, provision of cost estimates, compensation and insurance claims processing, provision of financial summaries, receipt and payment of accounts, time keeping and cost analysis
- financial tasks including analyse financial risk, receive and process purchase or hire accounts, review and comply with agreements with financial requirements, maintain payroll and related systems and records, provide financial summaries and undertake costs analysis
- insurance information including equipment, personal effects and vehicles
- management and facilitation of teams and team work including task allocations
- national, state and territory emergency management legislation, policies, procedures and interagency memorandums of understanding
- organisational documentation, policies and procedures
- organisational financial requirements to support operational planning requirements and processes
- potential and existing financial issues including claims, injury compensation, pay and procurement
- processes and requirements for briefings and debriefings including Situation, Mission, Execution, Administration/logistics, Command/control and Safety (SMEACS)
- protocols and procedures for meetings including techniques for resolving conflict
- requirements of a finance section facility
- types of incidents
- Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) requirements

## Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Assessment must occur in workplace operational situations. Where this is not appropriate, assessment must occur in industry approved simulated workplace operational situations that reflect workplace conditions.

Resources for assessment must include access to

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, equipment, tools and personal protective clothing and

equipment currently used in industry

- applicable documentation including organisational procedures, industry standards, equipment specifications, regulations, codes of practice and operation manuals.

# PUAOPE003 Manage the public information function at an incident

## Modification History

**Release 1.** This is the first release of this unit of competency in the PUA Public Safety Training Package.

## Application

This unit of competency involves the skills and knowledge required to gather, assemble and disseminate timely, tailored and relevant information to the community and media and if the Incident Controller requires and can also include government, incident personnel and their organisations.

An individual performing this role has the title of Public Information Officer and is typically appointed by the Incident Controller. Public Information Officers are required to liaise with the planning section, intelligence section/unit and other Incident Management Team (IMT) units to gather information about the incident. They then assemble this information into a form suitable for dissemination to the public, media and other stakeholders.

They will also provide timely and relevant information to stakeholders; provide warnings and information to threatened communities, other stakeholders and the public; liaise with news media; manage media liaison issues and consult with affected communities in conjunction with relief and recovery organisations and/or agencies. Authorisation to perform this role is subject to organisational policies and procedures.

No licensing, legislative or regulatory or certification requirements apply to this unit at the time of publication.

## Pre-requisite Unit

Not applicable.

## Competency Field

Operations

## Unit Sector

Public Safety

## Elements and Performance Criteria

### ELEMENTS

Elements describe the essential outcomes.

### PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

#### 1 Establish public information section

- 1.1 Initial briefing, including information required to manage the public information section, is obtained from the Incident Controller where the Incident Controller's intent is confirmed
- 1.2 Public information section objectives and tasks are identified and confirmed with the Incident Controller
- 1.3 Information on the current and projected incident situation is obtained from the planning section, the intelligence section, if established, and from external sources including media reports
- 1.4 Appropriate structure for the public information section is established, tasks are delegated and briefings are provided to assigned personnel
- 1.5 Resources are identified and obtained to meet public information section requirements
- 1.6 Safe work practices and health and welfare arrangements for the work area are implemented and monitored

#### 2 Manage public information section

- 2.1 Public information plan is prepared and objectives and strategies are specified to meet the information needs of the community and media
- 2.2 Analysis of the incident, its risks, constraints and the information to be reported to identified target audiences is incorporated into the public information plan
- 2.3 How information is to be communicated internally and externally to the community, media and other stakeholders is confirmed in the public information plan
- 2.4 Timely and relevant information on the current and projected incident situation including, incident control objectives, strategies and resources at the incident is collected, summarised and prepared for dissemination
- 2.5 Workload, progress and performance of the public

- information section is monitored and managed
- 2.6 Public information section meetings are conducted, as required
  - 2.7 Structure of the public information section is adjusted during the incident to meet predicted and actual information demands
  - 2.8 Arrangements are made for a log and/or record of activities and decisions to be kept
- 3 Manage information and warnings unit**
- 3.1 Information and warnings unit is established, if required, to provide timely, tailored and relevant information and warnings to affected communities and stakeholders on behalf of the Incident Controller
  - 3.2 Information is gathered from the incident management team to maintain situational awareness
  - 3.3 Information gathered directly from the community and used by the information and warnings unit is provided to the intelligence unit
  - 3.4 Ongoing liaison with the community liaison unit and the media unit is undertaken to ensure that information is disseminated according to the area of responsibility
- 4 Manage media unit**
- 4.1 Media unit is established, as required, to liaise with and respond to enquiries from the media at the incident
  - 4.2 Media unit is communicated as the point of contact for the media, the public and other organisations for general information about the incident
  - 4.3 Current and timely information consistent with incident requirements and local knowledge is provided to the media, in accordance with organisational procedures
  - 4.4 Preparation and issuing of media messages is managed by the media unit, working in conjunction with media networks, to disseminate key messages
  - 4.5 Preparation of key messages for press conferences and other media events involving the Incident Controller, or other members of the incident management team, are drafted and managed by the media unit
  - 4.6 Media needs and deadlines are communicated within the public information section and to the incident

management team

**4.7** Media liaison officers and/or escorts are appointed to support incident ground media liaison as approved by the Incident Controller

**4.8** Organisational requirements for media liaison are applied

**5 Manage community liaison unit**

**5.1** Community liaison unit is established, as required, to promote two-way communication between the incident management team and affected communities

**5.2** Established community networks, groups and/or systems relevant to the incident area, that may assist with the acquisition and dissemination of incident information, are identified

**5.3** In consultation with relief and recovery organisations the information needs of affected communities are identified and timely, tailored and relevant information is prepared

**5.4** Community meetings and other activities are conducted to respond to community information needs and to log concerns requiring follow up

**5.5** Liaison is maintained with the operations and planning sections, the intelligence section or unit and the resource unit to ensure the accuracy of information disseminated to the public

**5.6** Liaison with the information and warnings unit is maintained to update incident information and potential threats to communities

**5.7** Local knowledge and information provided by the community about risks, issues and local factors provided by the community are communicated to the incident management team

**5.8** Information about the current and anticipated extent of the impact and broader effect of the incident on the community is communicated in a suitable and timely manner

**5.9** Feedback is obtained from the community on the effectiveness of the community liaison unit's communication strategies and responses to community

|          |                                                       |                                                                                                                                                                                                                                                                                                                                |
|----------|-------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|

# Assessment Requirements for PUAOPE003 Manage the public information function at an incident

## Modification History

**Release 1.** This is the first release of this unit of competency in the Public Safety Training Package.

## Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and includes

- allocating and monitoring resources
- analysing incident information from a variety of sources
- applying Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) guidelines and practices
- collating and preparing timely, relevant and consistent information to be disseminated to a range of stakeholders to meet their individual information requirements
- collecting community feedback
- communicating and working effectively as a member of an incident management teams to resolve the incident
- conducting briefing and debriefings
- determining public information strategies and methods of communication
- developing a public information plan to meet internal requirements and external needs of the community, media and stakeholders and the incident
- identifying risks and constraints
- implementing organisational policies and procedures
- liaising with communities at an incident
- managing a public information section at an incident including information warnings unit, media unit, community liaison and appointing media liaison officers
- managing the implementation of a public information plan
- organising and conducting community meetings to assist local groups to prepare themselves and to manage their risks
- working with community groups and recovery and relief organisations

## Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria and includes knowledge of

- Australasian Inter-service Incident Management System (AIIMS) structure and principles
- collection methods and analysis of feedback

- communication strategies for communities both affected and likely to be affected by an incident
- confidentiality, privacy, libel and discrimination requirements
- constraints for disseminating public information including cultural, economic, environmental, physical, political, social and temporal
- current practices for media liaison with internal and external stakeholders
- different media requirements including newspapers, magazines, radio, television, internet and social media
- organisational documentation, policies and procedures
- post incident reviews and reports
- processes and requirements for planning and resourcing for managing a public information section
- processes for conducting briefings and debriefings
- public information plan requirements
- public information section including community liaison unit, information and warnings unit and media unit
- risks and constraints when disseminating public information
- role of media in disseminating information to stakeholders
- stakeholders and target audiences
- structure of a public information section including sub-units
- techniques for analysis and dissemination plan of public information
- types of warnings and methods
- types of warnings to affected communities and stakeholders including telephone based alerts and warnings, standard emergency warning signals, warnings via media outlets and/or networks and warnings via social media

## Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Assessment must occur in workplace operational situations. Where this is not appropriate, assessment must occur in industry approved simulated workplace operational situations that reflect workplace conditions.

Resources for assessment must include access to

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, equipment, tools and personal protective clothing and equipment currently used in industry

- applicable documentation including organisational procedures, industry standards, equipment specifications, regulations, codes of practice and operation manuals.

# PUAOPE004 Manage the intelligence function at an incident

## Modification History

**Release 1.** This is the first release of this unit of competency in the PUA Public Safety Training Package.

## Application

This unit of competency involves the skills and knowledge required to coordinate the collection, analysis and dissemination of intelligence to support informed decision making at an incident.

Intelligence Officers are required to collect, interpret, analyse and generate numerical, text and map based information, use and apply mathematical models and communicate complex information using a variety of formats. An individual performing this role has the title of Intelligence Officer and is delegated responsibility by the Incident Controller or Planning Officer. They will support the Incident Controller and the Incident Management Team (IMT).

The intelligence function is generally carried out by an Intelligence Unit within the Planning Section. If the Incident Controller determines the need to expand the intelligence unit into a functional section then it will become an intelligence section reporting directly to the Incident Controller. Authorisation to perform this role is subject to organisational policies and procedures.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Pre-requisite Unit

Not applicable.

## Competency Field

Operations

## Unit Sector

Public Safety

## Elements and Performance Criteria

|          | <b>1.3</b>                                 | Intelligence section or unit structure is developed and resources are identified and obtained                                                      |
|          | <b>1.4</b>                                 | Intelligence section or unit is established including units or sub-units and tasks are delegated and briefings are given to assigned personnel     |
|          | <b>1.5</b>                                 | Safe work practices and health and welfare procedures for work area are implemented and monitored                                                  |
| <b>2</b> | <b>Manage intelligence section or unit</b> |                                                                                                                                                    |
|          | <b>2.1</b>                                 | Allocated tasks are adjusted to meet incident objectives and intelligence requirements                                                             |
|          | <b>2.2</b>                                 | Workload, progress and performance of the intelligence section or unit is monitored and managed                                                    |
|          | <b>2.3</b>                                 | Intelligence section or unit meetings are conducted, as required                                                                                   |
|          | <b>2.4</b>                                 | Information flow within the incident management team and with identified external organisations is established and maintained                      |
|          | <b>2.5</b>                                 | Intelligence section or unit plan is developed and implemented                                                                                     |
|          | <b>2.6</b>                                 | Arrangements are made for a log and/or record of activities and decisions to be kept                                                               |
| <b>3</b> | <b>Identify intelligence needs</b>         |                                                                                                                                                    |
|          | <b>3.1</b>                                 | Incident intelligence requirements are obtained from the Incident Controller or Planning Officer                                                   |
|          | <b>3.2</b>                                 | Focus of the intelligence section or unit's activities are directed towards achieving the Incident Controller's critical intelligence requirements |
|          | <b>3.3</b>                                 | Intelligence requirements are prioritised and communicated to the intelligence section or unit team                                                |
|          | <b>3.4</b>                                 | Response, recovery and transition to recovery intelligence needs are identified                                                                    |
|          | <b>3.5</b>                                 | Intelligence risks and opportunities are identified and communicated to Incident Controller or Planning Officer                                    |

- |                                                        |                                                                                                                                      |
|--------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------|
| <b>4 Collect data and information</b>                  | <b>4.1</b> Collection of data and information is planned                                                                             |
|                                                        | <b>4.2</b> Sources of data and information including reports and pre-incident plans are identified and assessed                      |
|                                                        | <b>4.3</b> Data and information from reconnaissance and observations is collected                                                    |
|                                                        | <b>4.4</b> Data and information is monitored and updated to ensure accuracy and currency                                             |
|                                                        | <b>4.5</b> Data and information sufficient for the intelligence tasks is collected                                                   |
| <b>5 Process information</b>                           | <b>5.1</b> Information is formally received and recorded in a log                                                                    |
|                                                        | <b>5.2</b> Information is validated, including consideration of the credibility of information sources                               |
|                                                        | <b>5.3</b> Information is collated to support analysis                                                                               |
| <b>6 Analyse information</b>                           | <b>6.1</b> Collected data and information is analysed systematically within required time frames                                     |
|                                                        | <b>6.2</b> Conflict and uncertainties about information and analysis outcomes are identified, considered and reconciled, if possible |
|                                                        | <b>6.3</b> Intelligence requirements are addressed through information analysis, synthesis and interpretation                        |
|                                                        | <b>6.4</b> Predictions based on most likely, best and worst case scenarios for the incident are determined and evaluated             |
|                                                        | <b>6.5</b> Risks and opportunities that may affect incident activities and planning are analysed                                     |
| <b>7 Develop and disseminate intelligence products</b> | <b>7.1</b> Intelligence products are generated to meet the identified intelligence requirements of key decision makers               |
|                                                        | <b>7.2</b> A common operating picture is displayed and maintained                                                                    |
|                                                        | <b>7.3</b> Intelligence products including reports are developed in a format suited to their intended audiences                      |
|                                                        | <b>7.4</b> Intelligence products are communicated and made                                                                           |

|   |                                                 |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |
|---|-------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|   |                                                 | available to personnel within required time frames                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |
|   | 7.5                                             | Receipt of intelligence product by intended audience is confirmed                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |
| 8 | <b>Review intelligence and provide feedback</b> | <p>8.1 Feedback is sought and obtained from users of intelligence products</p> <p>8.2 Gaps in data and intelligence products are identified</p> <p>8.3 Value of operational effectiveness of intelligence products provided is evaluated</p> <p>8.4 Intelligence opportunities are identified</p> <p>8.5 Obstructions, limitations and opportunities for improvement are identified and processes are refined to improve and/or strengthen intelligence section or unit activity including how these are applied to the intelligence cycle</p> <p>8.6 Briefings and debriefings on intelligence activities are conducted</p> |

## Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

## Unit Mapping Information

New unit, there is no equivalent unit.

PUA Training Package Companion Volume Implementation Guide is found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=3eca5672-6d5a-410b-8942-810d0ba05bbf>

# Assessment Requirements for PUAOPE004 Manage the intelligence function at an incident

## Modification History

**Release 1.** This is the first release of this unit of competency in the PUA Public Safety Training Package.

## Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and includes

- applying Work, Health and Safety (WHS)/ Occupational Health and Safety (OHS) requirements
- assessing credibility of data and information sources
- collating feedback
- collecting data and information that addresses intelligence requirements
- communicating with stakeholders
- completing and presenting reports
- conducting briefings and debriefings
- dealing with complex, novel and rapidly changing incident situations
- determining and organising an intelligence plan for a section or unit
- developing a range of scenarios including identifying risks and opportunities
- evaluating intelligence information and data
- focussing intelligence products on meeting intelligence requirements
- implementing organisational policies and procedures
- maintaining a log and record of decisions taken
- maintaining shared situational awareness and communicating changes
- managing and monitoring a team within a time critical and dynamic environment including allocating tasks
- providing an initial appreciation of information on the operating environment and its likely effect on events
- providing and communicating intelligence products within the required time frames to appropriate personnel
- providing useful intelligence in time critical and high consequence situations without complete and accurate information
- representing intelligence through the common operating picture using available platforms that are readily accessible and easy to interpret structuring an intelligence section or unit
- using intelligence to update situational knowledge when key changes occur
- utilising analytical methods and tools

## Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria and includes knowledge of

- analytical tools to support prediction modelling
- Australasian Inter-service Incident Management System (AIIMS) structure and principles
- collation of feedback
- compilation and presentation of reports
- consequence management
- difference between data, information and intelligence
- evaluation techniques
- individual and shared situational awareness
- intelligence products including appreciation, common operating picture, decision and trigger points, estimates, evaluations, incident predictions, indications, intelligence, briefings, map products and warnings
- intelligence section or unit structure including mapping unit, modelling and predictions unit, situation and analysis unit and technical advice unit
- leadership and management of teams and the facilitation of team work
- organisational documentation, policies and procedures
- planning cycle requirements
- processes and procedures for conducting briefings and debriefings using Situation, Execution, Administration/logistics, Mission, Command/control and Safety (SMEACS) plus questions
- record keeping including using logs
- requirements and processes for planning cycle
- risk management principles and processes
- scenario planning for incidents
- sources of data and information
- structure and roles within an intelligence section or unit
- Work, Health and Safety (WHS)/ Occupational Health and Safety (OHS) requirements

## Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Assessment must occur in workplace operational situations. Where this is not appropriate, assessment must occur in industry approved simulated workplace operational situations that

reflect workplace conditions.

Resources for assessment must include access to

- a range of relevant exercises, case studies and/or simulations including relevant and appropriate materials, equipment, tools and personal protective clothing and equipment currently used in industry
- applicable documentation including organisational procedures, industry standards, equipment specifications, regulations, codes of practice and operations manuals

## PUAOPE006 Control multi-agency emergency situations

### Modification History

**Release 1.** This is the first release of this unit of competency in the Public Safety Training Package.

### Application

This unit of competency involves the skills and knowledge required to establish and take control of a multi-agency response to an emergency situation. Control refers to the overall direction of emergency management activities in the emergency.

Authority for control is established in legislation or in an emergency plan and carries with it the responsibility for tasking other organisations, in accordance with the needs of the situation. Control relates to situations and operates horizontally across organisations.

The unit is applicable to public safety personnel who have a command role within their own organisation and are required to manage and control staff from all agencies in a multi-agency response environment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

### Pre-requisite Unit

PUAOPE007 Command agency personnel within a multi-agency emergency response  
PUAOPE016 Manage a multi team response

### Competency Field

Operations

### Unit Sector

Public safety

### Elements and Performance Criteria

#### ELEMENTS

Elements describe the essential outcomes.

#### 1 Take control

#### PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

#### 1.1 Control of multi-agency response to an emergency is

- established, in accordance with designated responsibility or authority as specified in an emergency plan and/or relevant legislation
- 1.2 Identity of the controller is communicated to authorities and organisations participating in the emergency incident
  - 1.3 Nature and complexity of the emergency incident is identified through liaison with participating personnel and authorities
- 2 Establish a control facility**
- 2.1 An appropriate control facility is established, in accordance with approved operating procedures
  - 2.2 Establishment of a facility is communicated to participating personnel and authorities
  - 2.3 Communication systems and procedures are established to facilitate the function of control
- 3 Establish and maintain a control structure**
- 3.1 Control structure is established appropriate to the nature and complexity of the emergency, encompassing specific roles and responsibilities of each participating organisation
  - 3.2 Control structure is expanded or contracted in response to changes within the emergency environment
  - 3.3 Control systems are managed ensuring flow of information is clear, accurate, timely and follows agreed reporting mechanisms
  - 3.4 Control systems are managed ensuring human, physical, fiscal and communication systems are identified, allocated and deployed, in accordance with the control structure
  - 3.5 Control systems are managed ensuring accurate recording and reporting systems are established and maintained
- 4 Establish procedures to permit control to be exercised**
- 4.1 Control structure is communicated to participating organisations, authorities and individuals who may have a regulatory or economic interest applicable to the emergency incident
  - 4.2 Communication is implemented between the controller and all agencies and organisations engaged in the emergency incident including supporting organisations,

|                                                    |            |                                                                                                                                                    |
|----------------------------------------------------|------------|----------------------------------------------------------------------------------------------------------------------------------------------------|
|                                                    |            | coordinators, higher authorities and the media                                                                                                     |
|                                                    | <b>4.3</b> | Liaison is initiated and maintained with those organisations that may provide information or resources applicable to the emergency and/or incident |
| <b>5 Assess situation and determine priorities</b> | <b>5.1</b> | Information is continuously sought about the emergency incident from participating organisations and/or relevant sources                           |
|                                                    | <b>5.2</b> | Nature, extent and potential of the emergency incident is continually assessed                                                                     |
|                                                    | <b>5.3</b> | Information is analysed and processed to establish priorities for dealing with the emergency incident                                              |
|                                                    | <b>5.4</b> | Objectives are determined to manage the emergency incident                                                                                         |
|                                                    | <b>5.5</b> | Objectives and priorities are continually reviewed from information updates, reports and feedback                                                  |
| <b>6 Develop control plan</b>                      | <b>6.1</b> | Appropriate strategies are determined to achieve objectives                                                                                        |
|                                                    | <b>6.2</b> | Components of the strategies are determined, in consultation with participating organisations                                                      |
|                                                    | <b>6.3</b> | Control plan is documented                                                                                                                         |
|                                                    | <b>6.4</b> | Control plan is communicated to participating organisations, personnel and authorities, in accordance with organisational procedures               |
| <b>7 Implement control plan</b>                    | <b>7.1</b> | Components of the strategies are allocated to operational and support organisations                                                                |
|                                                    | <b>7.2</b> | Performance is monitored and reports and/or feedback is communicated through approved communication channels                                       |
|                                                    | <b>7.3</b> | Control plan is monitored to meet changes in conditions and modifications are made, as required                                                    |
| <b>8 Conclude emergency activities</b>             | <b>8.1</b> | Recovery management is initiated, in accordance with organisational procedures                                                                     |
|                                                    | <b>8.2</b> | Physical, human and fiscal resources are accounted for                                                                                             |
|                                                    | <b>8.3</b> | Debriefing requirements are met and operational control                                                                                            |

|                                      |            |                                                                                                               |
|--------------------------------------|------------|---------------------------------------------------------------------------------------------------------------|
|                                      |            | documentation is completed                                                                                    |
|                                      | <b>8.4</b> | Reports are produced, as required                                                                             |
| <b>9 Review emergency activities</b> | <b>9.1</b> | Plans and procedures are evaluated and reviewed                                                               |
|                                      | <b>9.2</b> | Effectiveness of control function and its interaction with command organisations is evaluated and documented  |
|                                      | <b>9.3</b> | Reports are produced and communicated, in accordance with organisational procedures and established protocols |

## Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

## Unit Mapping Information

This unit replaces and is equivalent to PUAOPE006B Control multi-agency emergency situations.

## Links

PUA Training Package Companion Volume Implementation Guide is found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=3eca5672-6d5a-410b-8942-810d0ba05bbf>

# Assessment Requirements for PUAOPE006 Control multi-agency emergency situations

## Modification History

**Release 1.** This is the first release of this unit of competency in the Public Safety Training Package.

## Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and includes

- accessing information and support from participating organisations
- assigning and monitoring organisational allocated tasks including
  - analysing emergency situations both functionally and strategically
  - applying guidelines relating to safe use of machinery and equipment
  - establishing plans including applying precautions to tasks
  - identifying hazard specific policies and procedures
  - incorporating risk management and contingency processes
  - modifying activities for changes in emergency contexts and environments
  - reacting strategically to changes within the emergency environment
  - selecting, prioritising, implementing and evaluating courses of action
  - using recovery management processes
  - working systematically to ensure minimal damage to equipment and emergency site
- applying inter-agency and/or organisational agreements
- applying Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) requirements
- assessing situation and determining priorities
- completing organisational documentation
- complying with codes of practice and/or other legislative requirements
- concluding emergency activities
- developing and implementing a control plan
- developing response plans including predicting consequences and identifying improvements
- establishing a control facility
- establishing and maintaining a control structure including the procedures to permit control to be exercised
- implementing organisational policies and procedures
- taking control
- undertaking a review of emergency activities
- using a range of information technology devices utilising resources

## Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria and includes knowledge of

- communication systems and processes
- control and response plans
- control structures
- controlled activities
- emergency site layouts
- information management systems
- inter-agency/organisational agreements
- operation of organisational systems and equipment
- organisational documentation, policies and procedures
- principles and practices of public safety management
- principles and procedures for establishing a control facility
- report mechanisms
- resources
- review processes
- sources of information
- types and nature of emergencies
- Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) requirements including risk mitigation

## Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Assessment must occur in workplace operational situations. Where this is not appropriate, assessment must occur in industry approved simulated workplace operational situations that reflect workplace conditions.

Resources for assessment must include access to

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, equipment, tools and personal protective clothing and equipment currently used in industry including
  - resources relating to personnel and facilities for an emergency
- applicable documentation including organisational procedures, industry standards, equipment

specifications, regulations, codes of practice and operation manuals.

# PUAOPE007 Command organisational personnel within a multi-agency emergency response

## Modification History

**Release 1.** This is the first release of this unit of competency in the PUA Public Safety Training Package.

## Application

This unit of competency involves the skills and knowledge required to command an organisation's personnel within a multi-agency emergency response environment.

Command is the internal direction of the members and resources of an organisation in the performance of the organisation's roles and tasks by agreement or in accordance with relevant legislation. Command operates vertically within an organisation.

The unit is applicable to public safety personnel who have a command role within their own organisation who are required to administer that command in a multi-agency response environment. It does not include commanding personnel from other organisations or agencies in a multi-organisational/agency response.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Pre-requisite Unit

The fire sector is those sections of government departments, statutory authorities or organisations that have responsibility under jurisdictional arrangements for the delivery of firefighting and fire management services.

It is essential that the prerequisite units listed below are obtained prior to the issuance of this unit to individuals within the fire sector or the units contributing to the attainment of a fire qualification.

PUAOPE012 Control a Level 1 incident

PUAOPE015 Conduct briefings and debriefings

## Competency Field

Operations

## Unit Sector

Public Sector

## Elements and Performance Criteria

### ELEMENTS

Elements describe the essential outcomes.

### PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

#### 1 Take command

- 1.1 Command is exercised, in accordance with organisational policies and procedures
- 1.2 The identity, location and contact details of the commander are communicated to internal and external personnel within the chain of command

#### 2 Establish a command facility

- 2.1 An appropriate command facility is established and operated, in accordance with organisational procedures and guidelines
- 2.2 Details of the facility are communicated to internal personnel and to relevant external authorities, organisations or individuals, as required

#### 3 Establish a command structure

- 3.1 A command structure is established appropriate to the nature and complexity of tasks undertaken by the organisation
- 3.2 The command structure is expanded, contracted or modified in response to changes within the emergency environment

#### 4 Establish procedures to permit command to be exercised

- 4.1 Command structure is communicated to internal and external personnel and external personnel applicable to the incident
- 4.2 Command information management system is implemented
- 4.3 Communication procedures are implemented between levels of command, in accordance with organisational procedures
- 4.4 Liaison is established and maintained to meet control and command requirements
- 4.5 A public information system is established, in accordance with control plan requirements

#### 5 Determine operational command plan

- 5.1 Tasks are received and/or determined, in accordance with incident requirements

- |                                                      |     |                                                                                                                         |
|------------------------------------------------------|-----|-------------------------------------------------------------------------------------------------------------------------|
|                                                      | 5.2 | Operational plan to implement strategies is developed and modified, in accordance with organisational procedures        |
|                                                      | 5.3 | Appropriate tactics to manage the incident are identified, in accordance with the operational plan                      |
| <b>6 Manage resources under organisation command</b> | 6.1 | Resources are deployed to ensure that the operational plan is implemented, in accordance with organisational procedures |
|                                                      | 6.2 | Human and physical resources are managed to achieve operational plan outcomes                                           |
| <b>7 Manage operations</b>                           | 7.1 | Operations are conducted, in accordance with the operational plan                                                       |
|                                                      | 7.2 | Significant changes in status and actions taken are reported through the chain of command                               |
|                                                      | 7.3 | Operations are prioritised to meet any change in conditions which impact the incident situation                         |
| <b>8 Conclude operations</b>                         | 8.1 | Resources are accounted for, in accordance with organisational procedures                                               |
|                                                      | 8.2 | Debriefing requirements are met, in accordance with organisational procedures                                           |
|                                                      | 8.3 | Operational documentation is completed, in accordance with organisational procedures                                    |
| <b>9 Review operations</b>                           | 9.1 | Operational plans are evaluated and reviewed, in accordance with organisational procedures                              |
|                                                      | 9.2 | Effectiveness of command and interaction with control is evaluated and documented                                       |
|                                                      | 9.3 | Reports are produced and communicated, in accordance with established organisational procedures                         |

## Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

# Assessment Requirements for PUAOPE007 Command organisational personnel within a multi-agency emergency response

## Modification History

**Release 1.** This is the first release of this unit of competency in the PUA Public Safety Training Package.

## Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and includes

- accessing information and support from control facility, other organisations' personnel and external authorities
- analysing incident situations
- applying Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) requirements
- completing documentation and reports
- conducting briefings and debriefings of personnel under the chain of command
- determining operational plan
- developing operational plans
- establishing a command facility and command structure including procedures to permit command to be exercised
- identifying risk management and contingency processes
- implementing organisational policies and procedures
- implementing responses within authority and according to organisational procedures
- liaising with chain of command
- logging and recording all actions and decisions
- managing resources under command
- managing, concluding and reviewing operations
- reacting strategically to changes within incident environment
- securing site
- selecting, prioritising, implementing and evaluating appropriate strategies and tactics
- taking command

## Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria and includes knowledge of

- agreements, codes of practice or other legislative requirements

- arrangements and processes for briefings and debriefings
- command facility establishment
- current principles and practices for conducting an activity which exercises elements of public safety management
- incident context
- incident site layout
- information management systems
- organisational command structure
- organisational documentation, policies and procedures
- personnel support activities
- report mechanisms
- resource requirements
- review processes
- sources of information
- support services
- types of incidents, imminent or actual, including technological, industrial, civil or political
- Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) requirements including risk mitigation

## Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

## PUAOPE009 Navigate in an aquatic environment

### Modification History

**Release 1.** This is the first release of this unit of competency in the Public Safety Training Package.

### Application

This unit of competency involves the skills and knowledge required to navigate a vessel in an aquatic environment including inland rivers, lakes, dams, surf zones and oceans, using a range of navigation equipment and techniques, while undertaking a search and rescue.

It includes determining current location, destination and resources; determining and planning a safe route or course; navigating to a destination; returning to home port and completing post navigational activities.

The unit is applicable in a range of open or closed water situations where a vessel of varying sizes is required to navigate. It typically applies to personnel from emergency services, volunteer organisations and/or organisations where surveillance and rescue operations in an open or closed water environment is required.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

### Pre-requisite Unit

|                                                    | <b>1.2</b> | Maps, charts, electronic navigation aids and equipment are prepared and made ready for use                                                               |
|                                                    | <b>1.3</b> | Drift, leeway and tidal influences are identified and recorded on charts                                                                                 |
|                                                    | <b>1.4</b> | Current location and estimated destination of vessel in distress are plotted on a chart using coastal navigational techniques within accepted tolerances |
| <b>2 Determine and plan a safe route or course</b> | <b>2.1</b> | Operational plan is compiled including intercept and rendezvous chart work                                                                               |
|                                                    | <b>2.2</b> | All plots are recorded on a chart allowing for variables and weather conditions, in accordance with organisational operating procedures                  |
|                                                    | <b>2.3</b> | Rescue vessel's speed in sea and weather conditions is estimated and allowances are made to provide for an estimated time of arrival                     |
|                                                    | <b>2.4</b> | Hazards en-route to the incident are researched to determine a safe route or course                                                                      |
| <b>3 Navigate to destination</b>                   | <b>3.1</b> | Route or course is checked, monitored and maintained using navigational aids and with alternates plotted, if required                                    |
|                                                    | <b>3.2</b> | Helmsman is instructed to follow planned route or course and crew look outs are instructed to report any sightings including other marine traffic        |
|                                                    | <b>3.3</b> | Regular position fixes are undertaken to determine rescue vessel's position relative to planned route                                                    |
|                                                    | <b>3.4</b> | Search and rescue patterns are initiated within incident area where distressed vessel or survivors are believed to be located                            |
|                                                    | <b>3.5</b> | En-route and arrival position reporting information is communicated to organisational base station                                                       |
| <b>4 Return to home port</b>                       | <b>4.1</b> | Course or route to return to home port with distressed vessel in tow or with survivors aboard is set, on resolution of the incident                      |
|                                                    | <b>4.2</b> | Navigational techniques are used to ensure a safe and                                                                                                    |

timely return to home or alternate port, as instructed by state and/or territory authorities

## **5 Complete post navigational activities**

- 5.1** Navigation reports are completed, in accordance with organisational procedures
- 5.2** Navigational equipment is recovered, reset, updated and serviced, in accordance with operational procedures and manufacturers' specifications

## **Foundation Skills**

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## **Range of Conditions**

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

## **Unit Mapping Information**

This unit replaces and is equivalent to PUAOPE009C Navigate in an aquatic environment.

## **Links**

PUA Training Package Companion Volume Implementation Guide is found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=3eca5672-6d5a-410b-8942-810d0ba05bbf>

# Assessment Requirements for PUAOPE009 Navigate in an aquatic environment

## Modification History

**Release 1.** This is the first release of this unit of competency in the Public Safety Training Package.

## Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and includes

- applying Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) requirements
- completing post navigational activities
- determining and planning a safe route or course using maps and charts
- determining current location, destination and resources
- following organisational policies and procedures
- identifying different types of vessels
- identifying hazards
- interpreting cartographic symbology including contour lines, scale, magnetic variation information
- maintaining accuracy within accepted tolerances when following a route
- maintaining positional awareness
- making maps and charts ready for use
- navigating to destination
- observing situational environment including scanning and picking up on physical cues
- operating radio, intercom, vessel, chart plotter, Global Positioning System (GPS), radar, Radio Direction Finder (RDF) and satellite telephones
- plotting a navigation route
- preparing reports including situational reports (SITREPS)
- reacting to changes in operating environment necessitating replanning a route or course
- returning to home port
- using a variety of communication methods and techniques
- using navigation aids and equipment

## Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria and includes knowledge of

- accepted tolerances

- calculations required for navigation cartographic information including making and using charts
- chart features and symbols
- coastal navigation techniques
- latitude and longitude plotting
- map and chart types
- methods for determining current position
- organisational documentation, policies and procedures
- potential hazards
- report requirements
- route and course planning techniques
- Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) requirements including risk mitigation

## Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Assessment must occur in workplace operational situations. Where this is not appropriate, assessment must occur in industry approved simulated workplace operational situations that reflect workplace conditions.

Resources for assessment must include access to

- a range of relevant exercises, case studies and/or simulations including
  - a variety of aquatic conditions and/or environments, weather and visibility conditions including adverse and the use of electronic navigational aids
- relevant and appropriate materials, tools, equipment and personal protective clothing and equipment currently used in industry including
  - communications room
  - equipment used in operational navigation is essential
  - Global Positioning System (GPS) chart plotters
  - operations centre with trained staff
  - rescue vessel fitted with radar
- applicable documentation including organisational procedures, industry standards, equipment specifications, regulations, codes of practice and operation manuals.

# PUAOPE010 Operate an automated external defibrillator in an emergency

## Modification History

**Release 1.** This is the first release of this unit of competency in the Public Safety Training Package.

## Application

This unit of competency involves the skills and knowledge required to treat a casualty using an Automated External Defibrillator (AED) to defibrillate at an emergency, including the before and after procedures.

It will include using techniques for the administration of an AED according to industry standards and regulatory body guidelines and following AED medically endorsed protocols which may involve working with or without other personnel whilst engaged in the resuscitation.

The unit is applicable to personnel who will be assessing casualty and develop management plans, checking equipment, attaching and operating equipment and recovering and restoring equipment. It is appropriate for personnel from emergency services and/or organisations that provide a medically supervised first aid service.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Pre-requisite Unit

HLTAID003 Provide basic first aid

## Competency Field

Operations

## Unit Sector

Public Safety

## Elements and Performance Criteria

### ELEMENTS

Elements describe the essential outcomes.

### PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

- |                                        |                                                                                                                                                                                      |
|----------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>1 Check equipment</b>               | <b>1.1</b> Pre-use check of safety and effectiveness of equipment is undertaken, in accordance with organisational procedures and manufactures' instructions                         |
|                                        | <b>1.2</b> Minor faults are diagnosed and repairs are carried out to restore equipment to working order, in accordance with organisational procedures and manufactures' instructions |
|                                        | <b>1.3</b> Faults and defects are reported and recorded, in accordance with organisational procedures and manufactures' instructions                                                 |
| <b>2 Attach and operate equipment</b>  | <b>2.1</b> Equipment is set up, in accordance with organisational procedures and manufacturers' instructions                                                                         |
|                                        | <b>2.2</b> Automated External Defibrillator (AED) is attached and operated according to manufacturers' guidelines and safety procedures                                              |
|                                        | <b>2.3</b> Work is undertaken cooperatively with whilst conducting resuscitation techniques using an AED                                                                             |
| <b>3 Recover and restore equipment</b> | <b>3.1</b> Equipment is disinfected or discarded, in accordance with organisational procedures and manufacturers' guidelines                                                         |
|                                        | <b>3.2</b> Equipment is charged, stored and safeguarded against damage or loss, in accordance with organisational procedures and manufacturers' guidelines                           |
|                                        | <b>3.3</b> Reports are completed and submitted to appropriate personnel                                                                                                              |

## Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

PUA Training Package Companion Volume Implementation Guide is found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=3eca5672-6d5a-410b-8942-810d0ba05bbf>

# Assessment Requirements for PUAOPE010 Operate an automated external defibrillator in an emergency

## Modification History

**Release 1.** This is the first release of this unit of competency in the Public Safety Training Package.

## Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and includes

- applying Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) requirements
- attaching and operating equipment
- checking equipment including pre and post checks
- communicating with casualty and team members
- estimating age and weight of casualty
- following organisational policies and procedures
- identifying hazards and risks
- implementing safe work practices while using an Automated External Defibrillator (AED)
- managing situation in a calm and orderly manner and taking action to ensure safety and comfort of casualty
- participating as a team member
- recognising signs and symptoms of sudden cardiac arrest
- recovering and restoring equipment including reporting faults
- using resuscitation equipment and techniques

## Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria and includes knowledge of

- adherence and positioning of electrode pads
- Automated External Defibrillator (AED) and Semi-Automated External Defibrillator (SAED) basic operations
- characteristics and limitations of equipment
- defibrillation safety including shock delivery protocols
- hazards
- human body and its systems
- industry standards including Australian Resuscitation Council guidelines
- organisational documentation, policies and procedures

- principles of operation and troubleshooting for AEDs
- processes for cleaning and discarding equipment
- roles and responsibilities of team members
- site and casualty safety precautions
- specifications and precautions for safe storage and handling of defibrillator resuscitation and kits
- state and territory legislative and regulatory requirements including duty of care
- types of casualties
- Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) requirements including risk mitigation

## Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Assessment must occur in workplace operational situations. Where this is not appropriate, assessment must occur in industry approved simulated workplace operational situations that reflect workplace conditions.

Competency should be assessed in a range of simulated emergencies operating an Automated External Defibrillator (AED).

Resources for assessment must include access to

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, equipment, tools and personal protective clothing and equipment currently used in industry including
  - defibrillation equipment and/or kit
  - resuscitation manikin
  - suitable site to simulate an emergency
- applicable documentation including organisational procedures, industry standards, equipment specifications, regulations, codes of practice and operation manuals.

# PUAOPE011 Inspect property and facilities

## Modification History

**Release 1.** This is the first release of this unit of competency in the Public Safety Training Package.

## Application

This unit of competency involves the skills and knowledge required to inspect various types of property for conditions and compliance with approved building regulations. It requires the ability to communicate with those involved in the inspection process and to have a clear understanding of methods for carrying out and reporting the results of a property inspection.

The unit is applicable to personnel who engage with the broader community as compliance building inspectors. Whilst developed specifically to address public safety compliance frameworks, this unit could be applied to a range of industries and roles.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Pre-requisite Unit

Not applicable.

## Competency Field

Operations

## Unit Sector

Public Safety

## Elements and Performance Criteria

### ELEMENTS

Elements describe the essential outcomes.

#### **1 Identify inspection requirements**

### PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

- 1.1** Purpose and type of inspection is established from property records and client requirements
- 1.2** Building inspection processes and timelines are negotiated and agreed to with relevant personnel and the

client, in accordance with organisational procedures

**1.3** Property documentation is gathered and reviewed to identify critical aspects of property/facility requiring inspection

**1.4** Building access arrangements are coordinated with relevant personnel, in accordance with organisational procedures

## **2 Inspect property**

**2.1** Property is inspected ensuring all aspects of the property are sighted and noted, in accordance with building regulations and organisational procedures

**2.2** Building inspection processes are completed within specified timeframes and resources are used, in accordance with organisational procedures

**2.3** Appropriate interpersonal techniques are used to access required information from inspection site personnel

**2.4** Variations in compliance with building regulations are recognised and noted, in accordance with organisational procedures and legislative requirements

**2.5** Situations requiring specialist building advice are identified and assistance is sought, in accordance with organisational procedures

## **3 Record and report inspection findings**

**3.1** Building inspection findings are organised in a format suitable for analysis and dissemination, in accordance with organisational procedures and client requirements

**3.2** Building inspection conclusions are supported by verifiable evidence and are consistent with legislative requirements and organisational procedures

**3.3** Business equipment and/or technology is used to maintain organisational documentation, in accordance with Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) guidelines, legislative requirements and organisational procedures

**3.4** Building inspection report is distributed to relevant personnel, in accordance with organisational procedures and client requirements

## Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

## Unit Mapping Information

This unit replaces and is equivalent to PUAOPE011B Inspect property and facilities.

## Links

PUA Training Package Companion Volume Implementation Guide is found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=3eca5672-6d5a-410b-8942-810d0ba05bbf>

# Assessment Requirements for PUAOPE011 Inspect property and facilities

## Modification History

**Release 1.** This is the first release of this unit of competency in the Public Safety Training Package.

## Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and includes

- applying Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) requirements
- assessing condition of property
- collating verifiable evidence from inspection
- communicating with personnel
- completing documentation and reporting findings
- complying with established inspection processes, noting any variations in approved property requirements and preparing findings in a report suitable for analysis and dissemination
- conducting and completing property inspection within agreed timeframes in compliance with industry, legal and organisational requirements
- displaying interpersonal skills that include relating to people from a wide range of backgrounds
- identifying inspection requirements
- identifying inspection site through the interpretation of maps, plans and diagrams
- identifying types of inspections
- implementing communication and coordination techniques required to access property and organise inspections
- inspecting property or facility
- negotiating client requirements and access arrangements
- planning and arranging property inspections
- recording and reporting inspection findings using organisational documentation
- scheduling and meeting timelines
- seeking specialist building advice
- using business equipment to complete reports

## Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria and includes knowledge of

- acts and regulations for buildings
- basic knowledge of property contracts and administrative requirements
- building inspection processes
- ethical practices and industry standards
- inspection methods for different property types
- organisational documentation, policies and procedures
- state and territory building regulation agencies
- types of inspection sites
- types of property and their characteristics
- Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) requirements

## Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Assessment must occur in workplace operational situations. Where this is not appropriate, assessment must occur in industry approved simulated workplace operational situations that reflect workplace conditions.

Resources for assessment must include access to

## PUAOPE012 Control a Level 1 incident

### Modification History

**Release 1.** This is the first release of this unit of competency in the Public Safety Training Package.

### Application

This unit of competency involves the skills and knowledge required to manage all activities and personnel deployed to resolve Level 1 incidents. Level 1 incidents are characterised by being able to be resolved with the use of local or initial response resources only.

It includes receiving incident response requests, proceeding to the incident, establishing control, assessing the incident, developing and implementing an incident action plan, concluding the operation and supervising post response activities.

A person performing this role has the title of Incident Controller Level 1 and is appointed by the organisation with the legislative responsibility for overall management of the incident. Authorisation to perform this role is subject to organisational policies and procedures.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

### Pre-requisite Unit

The fire sector is those sections of government departments, statutory authorities or organisations that have responsibility under jurisdictional arrangements for the delivery of firefighting and fire management services.

It is essential that the prerequisite units listed below are obtained prior to the issuance of this unit to individuals within the fire sector or the units contributing to the attainment of a fire qualification.

One of the following:

PUAFIR302 Suppress urban fire

PUAFIR303 Suppress wildfire

### Competency Field

Operations

### Unit Sector

Public Safety

## Elements and Performance Criteria

### ELEMENTS

Elements describe the essential outcomes.

### PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

- |                                            |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |

| <b>4 Assess incident</b>                   | <b>4.1</b> Initial assessment of the incident is carried out promptly                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |

- 4.2 Hazards and risks are assessed, monitored and minimised or controlled
- 4.3 Resources are assigned for the incident
- 4.4 Need for additional resources is identified and requested, in accordance with organisational policies and procedures
- 4.5 Actions are taken to protect, secure and preserve incident scene
- 4.6 Incident potential is assessed and transition to a higher level incident is considered
- 5 **Develop and implement Incident Action Plan**
  - 5.1 Incident Action Plan (IAP) appropriate to incident is developed based on available information, in accordance with organisational procedures and safety requirements
  - 5.2 Objectives, strategies and tactics are determined, and tasks are allocated to personnel
  - 5.3 Incident personnel are briefed clearly, accurately and in a timely manner
  - 5.4 Incident information is communicated to key stakeholders
  - 5.5 IAP is implemented, continually monitored, reported on and reviewed in the light of additional information and is communicated to participating and pertinent personnel and participating organisations, in accordance with organisational procedures
  - 5.6 Appropriate resources are deployed to deal with the incident
  - 5.7 Response is adjusted in a timely manner
  - 5.8 Leadership, supervision and team welfare are provided to ensure performance and practice is, in accordance with organisational policies and procedures
  - 5.9 Changes to the IAP are communicated to participating personnel and organisations
- 6 **Conclude operation**
  - 6.1 Final incident assessment is conducted, in accordance with organisational procedures

|                                             |            |                                                                                                        |
|---------------------------------------------|------------|--------------------------------------------------------------------------------------------------------|
|                                             | <b>6.2</b> | Incident actions and decisions are recorded, in accordance with organisational policies and procedures |
|                                             | <b>6.3</b> | Incident is concluded, in accordance with organisational procedures                                    |
| <b>7 Supervise post response activities</b> | <b>7.1</b> | Welfare of team members is assessed, and appropriate action is taken, as required                      |
|                                             | <b>7.2</b> | Equipment cleaning, repair, storage and replenishment is supervised                                    |
|                                             | <b>7.3</b> | Debriefing requirements are met                                                                        |
|                                             | <b>7.4</b> | Post incident reports are prepared, in accordance with organisational procedures                       |

## Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

## Unit Mapping Information

This unit replaces and is equivalent to PUAOPE012A Control a Level 1 incident.

## Links

PUA Training Package Companion Volume Implementation Guide is found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=3eca5672-6d5a-410b-8942-810d0ba05bbf>

# Assessment Requirements for PUAOPE012 Control a Level 1 incident

## Modification History

**Release 1.** This is the first release of this unit of competency in the Public Safety Training Package.

## Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and includes

- applying Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) requirements
- assessing incident including management of risks
- communicating with personnel and stakeholders
- concluding operations
- conducting briefings and debriefings
- deploying personnel and equipment to deal with incident
- developing and maintaining shared situational awareness
- developing, implementing and monitoring a written incident action plan
- directing and supervising incident activities
- establishing control
- proceeding to the incident
- protecting and preserving incident scene
- receiving incident response requests
- supervising post response operations

## Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria and includes knowledge of

- Australasian Inter-Service Incident Management System (AIIMS) structure and principles
- communication systems
- organisational documentation, policies and procedures including procedures for protecting and preserving an incident scene and recording requirements, policies and procedures for determining the control authority and appointment of the Incident Controller, procedures for establishing control and communicating to authorities and policies and procedures for liaising with stakeholders and media on scene
- organisational incident management system
- organisational process for implementing, monitoring and reviewing incident action plan for a

### Level 1 incident

- organisational processes for developing incident action plan objectives, strategies and tactics for a Level 1 incident
- personnel, equipment, consumables and/or stores which are available for an incident
- processes for briefings and debriefings
- types of hazards
- types of incidents and incident assessments
- use of aircraft in response situations
- welfare arrangements at incidents
- Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) requirements including risk mitigation

## Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Assessment must occur in workplace operational situations. Where this is not appropriate, assessment must occur in industry approved simulated workplace operational situations that reflect workplace conditions.

Resources for assessment must include access to

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, equipment, tools and personal protective clothing and equipment currently used in industry
- applicable documentation including organisational procedures, industry standards, equipment specifications, regulations, codes of practice and operations manuals.

# PUAOPE013 Operate communications systems and equipment

## Modification History

**Release 1.** This is the first release of this unit of competency in the Public Safety Training Package.

## Application

This unit of competency involves the skills and knowledge required to transmit and receive communications in routine and operational situations using the organisation's communications systems and equipment.

The unit is applicable to personnel who are required to operate an organisation's communications systems and equipment in support of the tasks they are undertaking. This may occur either in the field or from a facility.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Pre-requisite Unit

Not applicable.

## Competency Field

Operations

## Unit Sector

Public Safety

## Elements and Performance Criteria

### ELEMENTS

Elements describe the essential outcomes.

#### **1 Use communications systems and equipment**

### PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

- 1.1** Communications equipment and techniques, including verbal transmissions and voice procedures, are selected to best meet the task, context and needs of the situation
- 1.2** Equipment is operated safely to support communications

|                                              |            |                                                                                                                                                                  |
|----------------------------------------------|------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                                              |            | consistent with organisational policies and procedures                                                                                                           |
|                                              | <b>1.3</b> | Communications system is correctly utilised to facilitate transmission and reception                                                                             |
| <b>2 Transmit and receive communications</b> | <b>2.1</b> | Information is transmitted concisely and clearly to facilitate accurate reception of the message, in accordance with organisational policies and procedures      |
|                                              | <b>2.2</b> | Contact is acknowledged, communication is confirmed, and action is initiated                                                                                     |
|                                              | <b>2.3</b> | Communication faults and deficiencies are reported, in accordance with organisational policies and procedures                                                    |
|                                              | <b>2.4</b> | Alternative communications strategies are employed, in accordance with organisational procedures, to address identified faults and deficiencies in communication |
|                                              | <b>2.5</b> | Communication is processed and recorded, in accordance with organisational policies and procedures                                                               |
| <b>3 Maintain communications equipment</b>   | <b>3.1</b> | Communications equipment is inspected to ensure operational readiness                                                                                            |
|                                              | <b>3.2</b> | Fault finding techniques are applied and basic maintenance is conducted, in accordance with organisational policies and procedures                               |
|                                              | <b>3.3</b> | Faulty equipment is identified and noted for repair and documentation is completed, in accordance with organisational procedures                                 |

# PUAOPE014 Navigate to an incident

## Modification History

**Release 1.** This is the first release of this unit of competency in the PUA Public Safety Training Package.

## Application

This unit of competency involves the skills and knowledge required to navigate to an incident in urban and rural environments.

The unit is applicable to personnel who are required to make decisions about the most appropriate route to an incident. This involves determining the current location of personnel, destination and resources required, planning the route, navigating to the destination and completing any post navigating activities.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Pre-requisite Unit

Not applicable

## Competency Field

Operations

## Unit Sector

Public Safety

## Elements and Performance Criteria

### ELEMENTS

Elements describe the essential outcomes.

#### **1 Determine current location, destination and resources**

### PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

- 1.1** Incident and task information is obtained, in accordance with organisational procedures
- 1.2** Navigational maps and equipment are gathered and

|                                                |                                                                                                                                                                                                                   |
|------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|

|                                                | <b>1.3</b> Positional information and navigation techniques are applied to plot positions on a map and to determine current location and destination within accepted tolerances                                   |
| <b>2 Plan a safe route</b>                     | <b>2.1</b> Navigation plans are prepared, in accordance with organisational procedures and practices                                                                                                              |
|                                                | <b>2.2</b> Maps, navigation techniques, map features, local and environmental conditions are interpreted to plan a safe and timely route to incident                                                              |
|                                                | <b>2.3</b> Potential access restrictions which may limit thoroughfare are identified and arrangements are made to gain access, in accordance with organisational policies, procedures and regulatory requirements |
| <b>3 Navigate to destination</b>               | <b>3.1</b> Navigation plans and aids are used to follow planned route                                                                                                                                             |
|                                                | <b>3.2</b> Indicated route is communicated and followed, as required                                                                                                                                              |
|                                                | <b>3.3</b> Current location is regularly verified within accepted tolerances                                                                                                                                      |
|                                                | <b>3.4</b> Route is modified to address prevailing conditions and, if required, alternate route strategies are initiated                                                                                          |
|                                                | <b>3.5</b> Unanticipated access difficulties are reported, in accordance with organisational policies and procedures                                                                                              |
|                                                | <b>3.6</b> En-route and arrival reporting information is communicated, in accordance with organisational policies and procedures                                                                                  |
| <b>4 Complete post navigational activities</b> | <b>4.1</b> Reporting requirements are completed, in accordance with organisational policies and procedures                                                                                                        |
|                                                | <b>4.2</b> Navigational equipment and aids are recovered, reset, updated, serviced and stored, in accordance with operational procedures and manufacturers' specifications                                        |

## Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of

competency.

## **Range of Conditions**

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

## **Unit Mapping Information**

This unit replaces and is equivalent to PUAOPE014A Navigate to an incident.

## **Links**

PUA Training Package Companion Volume Implementation Guide is found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=3eca5672-6d5a-410b-8942-810d0ba05bbf>

# Assessment Requirements for PUAOPE014 Navigate to an incident

## Modification History

**Release 1.** This is the first release of this unit of competency in the Public Safety Training Package.

## Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and includes

- applying Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) requirements
- collecting incident and task information
- demonstrating navigation to an incident in urban and/or rural locations
- determining current location, destination and resources
- following organisational policies and procedures
- identifying natural and cultural features for transport modes
- maintaining and completing organisational documentation
- meeting reporting requirements
- planning a safe route
- reacting to changes in operating environment that requires replanning of route
- recovering and making operationally ready navigational equipment
- reporting using communication systems, methods and techniques
- using maps and navigation aids

## Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria and includes knowledge of

- areas requiring permission and/or authorisation to enter
- communication systems, methods and techniques
- different tasks individual personnel should be given
- environmental conditions that might be encountered whilst navigating
- grid and/or magnetic conversion
- map types and their features
- methods of communicating locations and routes
- methods of determining current location
- navigational equipment characteristics and liabilities

- organisational documentation, policies and procedures including roles and responsibilities
- reporting requirements
- route planning techniques, calculations and accepted tolerances
- types of incidents the organisation responds to
- types of navigation techniques
- Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) requirements including risk mitigation

## Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Assessment must occur in workplace operational situations. Where this is not appropriate, assessment must occur in industry approved simulated workplace operational situations that reflect workplace conditions.

Resources for assessment must include access to

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, equipment, tools and personal protective clothing and equipment currently used in industry including
  - navigation equipment
- applicable documentation including organisational procedures, industry standards, equipment specifications, regulations, codes of practice and operation manuals.

# PUAOPE015 Conduct briefings and debriefings

## Modification History

**Release 1.** This is the first release of this unit of competency in the PUA Public Safety Training Package.

## Application

This unit of competency involves the skills and knowledge required to lead and conduct a briefing and/or a debriefing in operational and nonoperational situations, in a range of environments. It includes planning and preparing for briefings and debriefings, conducting briefings and debriefings and concluding briefings and debriefings.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Pre-requisite Unit

Not applicable.

## Competency Field

Operations

## Unit Sector

Public Safety

## Elements and Performance Criteria

### ELEMENTS

Elements describe the essential outcomes.

#### **1 Plan and prepare for briefing and debriefing**

### PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

- 1.1** Content and format for briefing and debriefing are determined
- 1.2** Briefing and debriefing plan is prepared, in accordance with organisational policies and procedures
- 1.3** Personnel involved in the activity are identified and informed of briefing and debriefing requirements

|                                           |            |                                                                                                                                                                           |
|-------------------------------------------|------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                                           | <b>1.4</b> | Safe and appropriate location for the briefing and debriefing is selected                                                                                                 |
| <b>2 Conduct briefing and debriefing</b>  | <b>2.1</b> | Purpose and structure of the briefing and debriefing is outlined to incident personnel                                                                                    |
|                                           | <b>2.2</b> | Understanding is sought and clarifications are provided, as required                                                                                                      |
|                                           | <b>2.3</b> | Contributions during the debriefing and evaluation by personnel of their anticipated or actual roles in the activity is encouraged                                        |
|                                           | <b>2.4</b> | Briefing is conducted using Situation, Mission, Execution, Administration/logistics, Command/control and Safety (SMEACS)                                                  |
|                                           | <b>2.5</b> | Briefing and debriefing checklist is used, as appropriate, in accordance with organisational policies and procedures                                                      |
| <b>3 Conclude briefing and debriefing</b> | <b>3.1</b> | Contributions of personnel are acknowledged in a positive way                                                                                                             |
|                                           | <b>3.2</b> | Briefing and debriefing follow up action is identified and acted upon in a timely manner                                                                                  |
|                                           | <b>3.3</b> | Debriefing activity is reviewed against the policies, procedures and training of the organisation to identify lessons learnt and opportunities for continuous improvement |
|                                           | <b>3.4</b> | Briefing and debriefing findings are summarised and recorded, in a format suitable for subsequent action                                                                  |

## Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

content and format for briefings and

- adapting language to suit audience

debriefings must include

- collaborative approach
- descriptive and illustrative
- facilitator led
- predetermined Situation, Mission, Execution, Administration/logistics, Command/control and Safety (SMEACS)
- problem based

## Unit Mapping Information

This unit replaces and is equivalent to PUAOPE015A Conduct briefings and debriefings.

# Assessment Requirements for PUAOPE015 Conduct briefings and debriefings

## Modification History

**Release 1.** This is the first release of this unit of competency in the PUA Public Safety Training Package.

## Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements, performance criteria and range of conditions on at least one occasion and includes

- communicating with personnel in a group setting
- concluding briefings and debriefings including follow up and subsequent actions
- conducting briefings and debriefings using Situation, Mission, Execution, Administration/logistics, Command/control and Safety (SMEACS)
- eliciting and encouraging contributions to briefings and debriefings in a constructive and positive way
- following organisational policies and procedures including Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) requirements
- planning and preparing for the briefings and debriefings including content, format and location
- preparing briefing and debriefing checklist and plan

## Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements performance criteria and range of conditions and includes knowledge of

- appropriate follow up and subsequent actions after a briefing or debriefing
- briefing and debriefing plans
- content and format for conducting briefings and debriefings
- organisational documentation, policies and procedures including Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) requirements
- personnel roles and responsibilities
- personnel who may participate in briefings and debriefings including contractors, local, state, territory and federal government employees, operations personnel, support personnel, volunteers and personnel from other organisations and/or agencies
- safe and appropriate locations to conduct briefings and debriefings
- types of briefings and debriefings
- use of Situation, Mission, Execution, Administration/logistics, Command/control and Safety

(SMEACS) in briefings

## Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

## PUAOPE016 Manage a multi-team sector

### Modification History

**Release 2.0** This is the second release of this unit of competency in the Public Safety Training Package.

Editorial adjustments and clarification of text in Assessment Conditions.

**Release 1.0** This is the first release of this unit of competency in the PUA Public Safety Training Package.

### Application

This unit of competency involves the skills and knowledge required to manage a multi-team response at an incident which may be time critical and/or potentially threatening to life, property or the environment.

An individual performing in this role has the title of Sector or Division Commander and/or Level 1 Operations Officer and is delegated responsibility by either the Incident Controller or Operations Officer. The individual is responsible for managing a sector or division at an incident.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

### Pre-requisite Unit

The fire sector is those sections of government departments, statutory authorities or organisations that have responsibility under jurisdictional arrangements for the delivery of firefighting and fire management services.

It is essential that the prerequisite units listed below are obtained prior to the issuance of this unit to individuals within the fire sector or the units contributing to the attainment of a fire qualification.

One of the following

PUAFIR302 Suppress urban fire

PUAFIR303 Suppress wildfire.

### Competency Field

Operations

### Unit Sector

Public Safety

## Elements and Performance Criteria

### ELEMENTS

### PERFORMANCE CRITERIA

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

#### **1 Conduct assessment of incident**

- 1.1** Initial briefing is obtained, in accordance with organisational procedures
- 1.2** Risk assessment of all factors relevant to the sector is conducted
- 1.3** Resources for the incident are identified
- 1.4** Constraints which may impede the response are identified
- 1.5** Initial response options are identified and assessed

#### **2 Take command of sector**

- 2.1** Command of all sector personnel is established and maintained, in accordance with organisational policies and procedures
- 2.2** Communications systems are used, in accordance with organisational policies and procedures
- 2.3** Reporting processes are activated, in accordance with organisational policies and procedures, to provide continuous monitoring and evaluation of incident

#### **3 Implement operations portion of IAP**

- 3.1** Incident Action Plan (IAP) is communicated to teams, in accordance with organisational procedures
- 3.2** Resources are deployed within area of operations to ensure portion of the IAP is implemented, in accordance with organisational procedures
- 3.3** Operations are conducted and monitored, in accordance with the IAP
- 3.4** Operational reports are issued, in accordance with organisational policies and procedures
- 3.5** Operations are modified, as required, to suit the situation

#### **4 Manage and monitor sector operations**

- 4.1** Sector is managed, in accordance with organisational policies and procedures
- 4.2** Safe work practices and health and welfare procedures

and arrangements are implemented and monitored

- 4.3 Strategies are implemented, and tactics are determined, in accordance with the IAP
  - 4.4 Team leaders are briefed on Incident Controller's intent and are tasked, in accordance with the IAP
  - 4.5 Specific tasks are reviewed and modified, as required
  - 4.6 Regular exchange of information is maintained within the chain of command on incident situation, progress, achievement of incident objectives and identified risks
  - 4.7 Unexpected situations that require a quick and decisive response are recognised and responded to in accordance with the Incident Controller's intent
  - 4.8 Situation reports are provided through the chain of command on required modification to the IAP, including additional resources required, surplus resources and hazards present
  - 4.9 Need for logistical support is identified and communicated through the chain of command
  - 4.10 IAP activities are coordinated with adjacent sectors
- 5 Manage post incident operations**
- 5.1 Resources are accounted for and demobilised, in accordance with organisational requirements
  - 5.2 Post operational documentation is completed, in accordance with organisational procedures
  - 5.3 Sector debriefing is conducted, in accordance with organisational procedures

## Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

## Unit Mapping Information

This unit replaces and is equivalent to PUAOPE016A Manage a multi-team sector.

## Links

Companion Volume Implementation Guides are found in VETNet -

# Assessment Requirements for PUAOPE016 Manage a multi-team sector

## Modification History

**Release 2.0** This is the second release of this unit of competency in the Public Safety Training Package.

Editorial adjustments and clarification of text in Assessment Conditions.

**Release 1.0** This is the first release of this unit of competency in the PUA Public Safety Training Package.

## Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and includes

- accessing information and support the chain of command
- adapting tactics
- applying Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) requirements
- assessing effectiveness of strategies and tactics on sector or division
- briefing and debriefing personnel
- completing documentation
- conducting an assessment of the area of operation
- deploying and managing human and physical resources
- establishing command of sector or division
- following organisational policies and procedures
- identifying and assessing risks
- implementing operations portion of the incident action plan
- leading teams
- maintaining shared situational awareness
- making decisions, negotiating and resolving conflict
- managing and monitoring sector or division operations
- managing post incident operations including demobilisation arrangements
- providing reports through the chain of command
- using communications systems.

## Knowledge Evidence

- Australasian Inter-service Incident Management System (AIIMS) structure
- constraints on actions that may limit available options
- equipment and personnel capabilities for incident type

- human and physical resources available for the incident
- incident action plan objectives, strategies and tactics including Incident Controller's intent
- incident site layouts
- initial response options
- organisational command structure
- organisational policies, procedures and documentation for managing operations
- post operational procedures
- processes for implementing, monitoring, amending and reviewing strategies and tactics
- requirements for reporting and recording
- risk assessment
- types of incidents
- Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) requirements including risk mitigation.

## Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in operational situations or in simulated operational training situations that reflect workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to

- a range of relevant exercises, case studies and/or simulations
- appropriate materials, equipment, tools and personal protective clothing and equipment currently used in industry
- applicable documentation including organisational procedures, industry standards, equipment specifications, regulations, codes of practice and operation manuals.

# PUAOPE017 Coordinate resources for a multi-agency incident

## Modification History

**Release 2.0** This is the second release of this unit of competency in the Public Safety Training Package.

Editorial adjustment and clarification of text in Assessment Conditions.

**Release 1.0** This is the first release of this unit of competency in the PUA Public Safety Training Package.

## Application

This unit of competency involves the skills and knowledge required to bring together organisations and other resources to support an incident. It includes the systematic acquisition and application of organisational, human and equipment resources at an incident.

Incidents that require such resource coordination are typically complex incidents. These incidents will usually involve delegation of all functions.

The unit is applicable to personnel who perform the role of coordination at a complex incident. The authorisation to perform this role is subject to state, territory and Commonwealth emergency management arrangements.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Pre-requisite Unit

Not applicable

## Competency Field

Operations

## Unit Sector

Public Safety

## Elements and Performance Criteria

### ELEMENTS

Elements describe the essential outcomes.

### PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

- |                                                      |            |                                                                                                                                                                                                                |
|------------------------------------------------------|------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>1 Commence coordination of resources</b>          | <b>1.1</b> | Coordination arrangements are invoked, in accordance with agreed authority and/or responsibility                                                                                                               |
|                                                      | <b>1.2</b> | Coordination is established within an Incident Control Centre or facility, in accordance with state, territory and Commonwealth arrangements                                                                   |
|                                                      | <b>1.3</b> | Coordination arrangements are communicated to authorities and/or organisations pertinent to the type of incident                                                                                               |
| <b>2 Establish and maintain coordination network</b> | <b>2.1</b> | Coordination network and structure is established appropriate to the nature and complexity of the incident                                                                                                     |
|                                                      | <b>2.2</b> | Coordination network is integrated with the control and command activities to meet the objectives of the plan using communications processes and systems, as required                                          |
|                                                      | <b>2.3</b> | Coordination network is expanded, contracted or modified in response to changes within the incident environment                                                                                                |
| <b>3 Manage resource requirements for incident</b>   | <b>3.1</b> | Resources are identified through the coordination network, external providers and/or authorities which may be appropriate to incident requirements including any sources of information and documents required |
|                                                      | <b>3.2</b> | Resources are acquired to meet the requirements of the incident plan including personnel support activities                                                                                                    |
|                                                      | <b>3.3</b> | Estimated cost of resources is identified and monitored                                                                                                                                                        |
|                                                      | <b>3.4</b> | Resources are supplied to meet operational requirements within negotiated timeframes                                                                                                                           |
|                                                      | <b>3.5</b> | Allocation of resources is monitored and evaluated to ensure resources are fit for purpose                                                                                                                     |
| <b>4 Conclude coordination activities</b>            | <b>4.1</b> | Review is undertaken to ensure resources are acquired and supplied in a cost effective and efficient manner                                                                                                    |
|                                                      | <b>4.2</b> | Resources released from the incident are returned, in accordance with organisational procedures                                                                                                                |
| <b>5 Review coordination</b>                         | <b>5.1</b> | Debriefings are conducted to evaluate coordination effectiveness                                                                                                                                               |
|                                                      | <b>5.2</b> | Reports are produced and are communicated or disseminated, in accordance with organisational                                                                                                                   |

procedures and regulatory requirements

## **Foundation Skills**

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## **Range of Conditions**

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

## **Unit Mapping Information**

This unit replaces and is equivalent to PUAOPE017A Coordinate resources for a multi-agency incident.

## **Links**

Companion Volume Implementation Guides are found in VETNet -

# Assessment Requirements for PUAOPE017 Coordinate resources for a multi-agency incident

## Modification History

**Release 2.0** This is the second release of this qualification in the PUA – Public Safety Training Package.

Editorial adjustment and clarification of text in Assessment Conditions.

**Release 1.0** This is the first release of this unit of competency in the PUA Public Safety Training Package.

## Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and includes

- applying Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) requirements
- commencing coordination completing and maintaining organisational reports and documentation
- concluding coordination activities
- delivering briefings and debriefings
- distributing reports to meet regulatory and organisational requirements
- establishing and maintaining a coordination network
- establishing and maintaining communication about resource coordination
- following organisational policies and procedures
- identifying and acquiring resources
- identifying, analysing, selecting, prioritising, implementing and evaluating appropriate strategies for the acquisition and deployment of resources in accordance with control and command plan requirements
- implementing agreements, codes of practice, government policies and/or legislative requirements
- implementing coordination response in accordance with control plan and within authority of role
- monitoring the deployment of resources in meeting incident requirements
- reviewing coordination.

## Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria and includes knowledge of

- command, control and coordination structures

- communications processes and systems
- consideration of resource needs of response including identification and procurement type of imminent or actual incident
- coordination network
- electronic data exchange and information management systems
- incident plans including national, state, territory, regional and local incident plans
- legislative requirements
- organisational documentation, policies and procedures
- process and procedures for briefing and debriefing
- sources of information and/or documents
- Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) requirements including risk mitigation.

## Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in operational situations or in simulated operational training situations that reflect workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to

- a range of relevant exercises, case studies and/or simulations
- appropriate materials, equipment, tools and personal protective clothing and equipment currently used in industry including
  - incidents or simulations of incidents in a multi-agency response environment
- applicable documentation including organisational procedures, industry standards, equipment specifications, regulations, codes of practice and operation manuals.

## PUAOPE018 Control a Level 2 incident

### Modification History

**Release 1.** This is the first release of this unit of competency in the Public Safety Training Package.

### Application

This unit of competency involves the skills and knowledge manage all activities and personnel deployed to resolve Level 2 incidents through use of internal and external resources.

It includes establishing a control facility, developing and maintaining control structures, developing and maintaining coordination arrangements, assessing situation and determining priorities, providing public information, developing an incident action plan and complementary plans, maintaining control of incident, managing implementation of incident plans, concluding incident activities and reviewing incident activities.

Level 2 incidents are characterised by the need for deployment of resources beyond the initial response or sectorisation of the incident or the establishment of functional sections due to the levels of complexity or a combination of the above.

A person performing this role is appointed by the organisation with the legislative responsibility for overall management of the incident. The Incident Controller may delegate one or more functions to members of the Incident Management Team (IMT) based on the requirements of the incident. Authorisation to perform this role is subject to organisational policies and procedures.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

### Pre-requisite Unit

The fire sector is those sections of government departments, statutory authorities or organisations that have responsibility under jurisdictional arrangements for the delivery of firefighting and fire management services.

It is essential that the prerequisite units listed below are obtained prior to the issuance of this unit to individuals within the fire sector or the units contributing to the attainment of a fire qualification.

PUAOPE012 Control a Level 1 incident

### Competency Field

Operations

## Unit Sector

Public Safety

## Elements and Performance Criteria

### ELEMENTS

Elements describe the essential outcomes.

### PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

- |                                                        |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |
|--------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <p><b>1 Establish control</b></p>                      | <p><b>1.1</b> Control is assumed, in accordance with designated authority and briefing is received</p> <p><b>1.2</b> Communication is established, and the identity of the Incident Controller is communicated to participating and other pertinent organisations or authorities</p> <p><b>1.3</b> Key personnel and support organisations are identified and notified, and communication channels are established to allow for the exchange of information</p> <p><b>1.4</b> Nature, extent and potential of incident is identified through liaison with previous incident management team and relevant personnel and authorities</p> <p><b>1.5</b> Security is established for the incident</p> |

|          |                                                       |                                                                                                                                                                           |
|----------|-------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|          |                                                       | maintained                                                                                                                                                                |
|          | <b>3.4</b>                                            | Control systems are identified and managed, in accordance with the control structure                                                                                      |
|          | <b>3.5</b>                                            | Control structure is scaled up or down in response to changes within the incident                                                                                         |
| <b>4</b> | <b>Develop and maintain coordination arrangements</b> |                                                                                                                                                                           |
|          | <b>4.1</b>                                            | Coordination arrangements are established, reviewed and maintained commensurate with current and forecast nature and complexity of the incident                           |
|          | <b>4.2</b>                                            | Requirements for coordination with emergency management structures at a regional level are identified, in accordance with organisational policies and procedures          |
|          | <b>4.3</b>                                            | Requirements for coordination with government agencies are confirmed, in accordance with organisational policies and procedures and communication methods are established |
|          | <b>4.4</b>                                            | Requirements for coordination with infrastructure and other community support organisations are confirmed, in accordance with organisational policies and procedures      |
| <b>5</b> | <b>Assess situation and determine priorities</b>      |                                                                                                                                                                           |
|          | <b>5.1</b>                                            | Information about the incident and its context is obtained from participating organisations and approved sources, including local knowledge                               |
|          | <b>5.2</b>                                            | Incident Controller's statement of intent is developed and communicated to participating and pertinent personnel and authorities                                          |
|          | <b>5.3</b>                                            | Risk assessment, including community and environmental risks, is conducted                                                                                                |
|          | <b>5.4</b>                                            | Constraints which may impede response options are identified                                                                                                              |
|          | <b>5.5</b>                                            | Information is analysed and processed to establish priorities for dealing with the incident                                                                               |
|          | <b>5.6</b>                                            | Incident objectives are determined and are communicated internally and externally to the incident                                                                         |
|          | <b>5.7</b>                                            | Incident Controller's intent and incident objectives are reviewed against information updates, reports and                                                                |

|          |                                                             |            |                                                                                                                                                                     |
|----------|-------------------------------------------------------------|------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|          |                                                             |            | feedback                                                                                                                                                            |
| <b>6</b> | <b>Provide public information</b>                           | <b>6.1</b> | Timely and tailored warnings and information are issued to the community using approved strategies                                                                  |
|          |                                                             | <b>6.2</b> | Media liaison requirements are identified and managed, in accordance with organisational procedures                                                                 |
| <b>7</b> | <b>Develop Incident Action Plan and complementary plans</b> | <b>7.1</b> | Written Incident Action Plans (IAPs) and complementary incident plans are developed, in accordance with approved operating procedures                               |
|          |                                                             | <b>7.2</b> | Options analysis is conducted to determine appropriate course of action                                                                                             |
|          |                                                             | <b>7.3</b> | Strategies in the IAP are developed and updated commensurate with current and forecast nature and complexity of the incident                                        |
|          |                                                             | <b>7.4</b> | Resources to implement the IAP are identified and sought                                                                                                            |
|          |                                                             | <b>7.5</b> | Stakeholders are consulted about content of the IAP and complementary incident plans                                                                                |
|          |                                                             | <b>7.6</b> | IAP and complementary incident plans are approved by the Incident Controller                                                                                        |
| <b>8</b> | <b>Maintain control of incident</b>                         | <b>8.1</b> | Planning meetings are scheduled and conducted with the incident management team and key agency commanders to support progress towards achieving incident objectives |
|          |                                                             | <b>8.2</b> | Leadership is provided to support the incident management team's shared purpose and direction                                                                       |
|          |                                                             | <b>8.3</b> | Oversight is maintained, and performance of leaders of functional sections and Deputy Incident Controllers is managed                                               |
|          |                                                             | <b>8.4</b> | Incident records are maintained, in accordance with organisational procedures                                                                                       |
|          |                                                             | <b>8.5</b> | Health, safety and welfare of personnel working on the incident is considered and arrangements are maintained to support it                                         |
| <b>9</b> | <b>Manage implementation of incident plans</b>              | <b>9.1</b> | IAP and complementary incident plans are communicated to teams, in accordance with organisational procedures                                                        |

- |           |                                     |                                                                                                                                                                     |
|-----------|-------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|           | <b>9.2</b>                          | Incident strategies are implemented through the control structure and coordination with participating and pertinent organisations is maintained                     |
|           | <b>9.3</b>                          | Environmental effects of incident are managed                                                                                                                       |
|           | <b>9.4</b>                          | Progress towards objectives and success of incident strategies is regularly evaluated and corrective action is taken, as required                                   |
|           | <b>9.5</b>                          | Requirements for briefing regional emergency management structures and government agencies are met, in accordance with organisational procedures                    |
| <b>10</b> | <b>Conclude incident activities</b> |                                                                                                                                                                     |
|           | <b>10.1</b>                         | Incident management structures and delegations are scaled down, in accordance with the needs of the incident                                                        |
|           | <b>10.2</b>                         | Coordination occurs with regional managers and support and recovery organisations or agencies to ensure transition and continuity of relief and recovery activities |
|           | <b>10.3</b>                         | Information to support mitigation and rehabilitation of environmental effects of incident and response activities is collated and communicated to all stakeholders  |
|           | <b>10.4</b>                         | Human and physical resources are accounted for and demobilised, in accordance with organisational procedures                                                        |
|           | <b>10.5</b>                         | Organisational standards and requirements for financial accounting are met                                                                                          |
| <b>11</b> | <b>Review incident activities</b>   |                                                                                                                                                                     |
|           | <b>11.1</b>                         | Performance of incident management team is evaluated and communicated through the chain of command                                                                  |
|           | <b>11.2</b>                         | Debriefing plan is compiled and executed, in accordance with identified needs for debriefing                                                                        |

## Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work

environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

## **Unit Mapping Information**

This unit replaces and is equivalent to PUAOPE018A Control a Level 2 incident.

## **Links**

PUA Training Package Companion Volume Implementation Guide is found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=3eca5672-6d5a-410b-8942-810d0ba05bbf>

# Assessment Requirements for PUAOPE018 Control a Level 2 incident

## Modification History

**Release 1.** This is the first release of this unit of competency in the Public Safety Training Package.

## Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and includes

- analysing incidents both functionally and strategically
- applying Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) requirements
- approving plans and strategies to control the incident
- communicating within incident management structure and monitoring and reviewing progress towards achievement of the incident action plan
- completing reports and documentation
- concluding incident activities
- conducting briefings and debriefings
- developing, implementing, monitoring and reviewing a written Incident Action Plan
- establishing and maintaining a control structure
- identifying and responding to areas impacted by a hazard and those directly affected by the impact
- implementing agreements and operating procedures including resolving conflict and negotiating outcomes
- leading and managing a team in a dynamic environment and monitoring performance
- maintaining shared situational awareness
- reacting strategically to changes within the incident
- selecting, prioritising, implementing and evaluating courses of action
- working with organisational and government personnel as well as with stakeholders

## Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements, performance criteria and range of conditions and includes knowledge of:

- Australasian Inter-Service Incident Management System (AIIMS) including incident control structure and principles
- codes of practice and other legislative requirements

- communication requirements for emergency management agencies, stakeholders, government, other agencies and community
- community and environmental constraints on decision making
- control facility and systems
- coordination arrangements
- decision making processes in time critical and dynamic situations
- emergency management plans
- financial management requirements including financial delegations
- incident action plans and complementary plans
- organisational documentation policies and procedures
- relief and recovery arrangements
- risk controls for hazards relevant to incident type
- sources of local knowledge
- types of incidents
- Work Health and Safety (WHS)/Occupational Health and Safety (OHS) requirements

## Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Assessment must occur in workplace operational situations. Where this is not appropriate, assessment must occur in industry approved simulated workplace operational situations that reflect workplace conditions.

Resources for assessment must include access to

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, equipment, tools and personal protective clothing and equipment currently used in industry
- applicable documentation including organisational procedures, industry standards, equipment specifications, regulations, codes of practice and operation manuals.

## PUAOPE019 Control a Level 3 incident

### Modification History

**Release 2.0** This is the second release of this unit of competency in the Public Safety Training Package.

Editorial adjustments and clarification of text in Assessment Conditions.

**Release 1.0** This is the first release of this unit of competency in the PUA Public Safety Training Package.

### Application

This unit of competency involves the skills and knowledge required to manage all activities and personnel deployed to resolve a Level 3 incident through use and management of internal and external resources.

It includes establishing control, establishing control facilities, developing and maintaining a control structure, establishing procedures to permit control to be exercised, developing and maintaining coordination arrangements, assessing situation and determining priorities, providing public information, developing an incident action plan and complementary incident plans, maintaining control of incident, managing implementation of incident plans, supporting relief and recovery and concluding incident activities and review incident activities.

Level 3 incidents are characterised by degrees of complexity and consequence that may require the establishment of significant resources and structure for the effective management of the situation. These incidents will usually involve the delegation of all functions.

A person performing this role has the title of Incident Controller Level 3 and is appointed by the organisation with the legislative responsibility for overall management of the incident. The authorisation to perform this role is subject to organisational policies and procedures.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

### Pre-requisite Unit

The fire sector is those sections of government departments, statutory authorities or organisations that have responsibility under jurisdictional arrangements for the delivery of firefighting and fire management services.

It is essential that the prerequisite units listed below are obtained prior to the issuance of this unit to individuals within the fire sector or the units contributing to the attainment of a fire qualification.

PUAOPE018 Control a Level 2 incident

## Competency Field

Operations

## Unit Sector

Public Safety

## Elements and Performance Criteria

### ELEMENTS

Elements describe the essential outcomes.

#### **1 Establish control**

### PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

- 1.1** Control is assumed, in accordance with designated responsibility and authority and briefing is received
- 1.2** Identity of Incident Controller is communicated to participating and pertinent organisations and authorities
- 1.3** Establishment of Level 3 control is communicated to personnel previously involved in controlling the incident including Incident Controllers
- 1.4** Nature, extent and potential of incident is identified through liaison with previous incident management team and other relevant personnel and authorities

#### **2 Establish control facilities**

- 2.1** Control and other facilities are established, in accordance with organisational policies and procedures
- 2.2** Establishment of facilities is communicated to participating and pertinent personnel and authorities
- 2.3** Establishment of facilities is communicated to regional and state level emergency managers, in accordance with organisational policies and procedures
- 2.4** Communications systems and procedures are established to facilitate the functions of control and coordination with regional, state and territory emergency management structures and other participating and pertinent authorities and organisations

#### **3 Develop and maintain a control structure**

- 3.1** Existing control structure is reviewed, then a control structure is planned and developed commensurate with current and forecast nature and complexity of the

|                                                                 |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |

| <b>6 Assess situation and determine priorities</b>              | <p><b>6.1</b> Information about the incident and its context is sought from participating organisations and approved sources, including local knowledge</p> <p><b>6.2</b> Incident Controller's statement of intent is developed and communicated to relevant personnel and/or</p>                                                                                                                                                                                                                                                                                                                                                                                                    |

- authorities
- 6.3 Intelligence requirements are identified and communicated to intelligence and planning sections
  - 6.4 Risk assessment, including community and environmental risks, is conducted
  - 6.5 Constraints which may limit response options are identified
  - 6.6 Information is analysed and processed to establish priorities for dealing with the incident
  - 6.7 Incident objectives are determined and communicated internally and externally to the incident management structure
  - 6.8 Incident Controller's intent and incident objectives are reviewed against information updates, reports and feedback
- 7 Provide public information**
- 7.1 Timely, relevant and tailored warnings and information are issued to the community using approved strategies
  - 7.2 Community meetings are attended addressed and activities are participated in to meet community needs for information and incident objectives
  - 7.3 Media interviews are given, in accordance with organisational procedures and requirements for media liaison
- 8 Develop an Incident Action Plan and complementary incident plans**
- 8.1 Development of a written Incident Action Plan (IAP) and complementary incident plans is directed
  - 8.2 Options analysis is conducted to determine appropriate courses of action
  - 8.3 Strategies in the IAP are developed or updated commensurate with current and forecast nature and complexity of the incident
  - 8.4 Resources to implement the IAP are identified and sought
  - 8.5 Stakeholders are consulted about the content of the IAP and complementary incident plans

- 8.6 IAP and complementary incident plans reflect planning for short term, next shift or shifts, and long term, conclusion of the incident, requirements
  - 8.7 IAP and complementary incident plans are approved by the Incident Controller
- 9 **Maintain control of incident**
  - 9.1 Planning meetings are scheduled and conducted with incident management team and key agency commanders to support progress towards achievement of incident objectives
  - 9.2 Leadership is provided to support the incident management team's shared purpose and direction
  - 9.3 Oversight is maintained, and performance is managed for heads of functional sections and Deputy Incident Controllers
  - 9.4 Security is established for the incident
  - 9.5 Incident records are maintained, in accordance with organisational procedures and guidelines
  - 9.6 Current and forecast financial costs of managing the incident are considered and participating and pertinent agencies and organisations are briefed
  - 9.7 Health, safety and welfare of personnel working at the incident is considered and arrangements are maintained to support it
- 10 **Manage implementation of incident plans**
  - 10.1 IAP and complementary incident plans are communicated to participating and pertinent organisations, in accordance with organisational procedures
  - 10.2 Incident strategies are implemented through the developed control structure and coordination of participating organisations involved
  - 10.3 Two-way communication is facilitated with affected and potentially affected communities to ensure the provision of timely, relevant and tailored information
  - 10.4 Socio-economic and environmental effects of the incident are documented and managed
  - 10.5 Progress towards objectives and success of incident

strategies is regularly evaluated and corrective action is taken, if required

- 10.6** Requirements for briefing all levels of government are met, in accordance with emergency management arrangements

## **11 Support relief and recovery**

- 11.1** Control and coordination structures are established that address the need for relief and recovery activities to be undertaken concurrently with hazard response activities
- 11.2** Community needs are established and communicated, and relief services are provided or facilitated, in accordance with state and territory emergency management arrangements
- 11.3** Timely, relevant and tailored information to support relief and recovery is provided to participating and pertinent organisations or directly to the community, in accordance with established state or territory emergency management arrangements
- 11.4** Coordination is undertaken with all levels of government and participating and pertinent organisations to support the evaluation of long term community needs

## **12 Conclude incident activities**

- 12.1** Incident management structures and delegations are scaled down, in accordance with the needs of the incident
- 12.2** Coordination is undertaken with regional, state and territory managers and support and recovery organisations and agencies to ensure transition to and continuity of relief and recovery activities
- 12.3** Information to support mitigation and rehabilitation of environmental effects of the incident and response activities is collated, acted on and is communicated to all stakeholders
- 12.4** Human and physical resources and systems, including documentation, are accounted for and demobilised, in accordance with organisational procedures
- 12.5** Organisational requirements and standards for financial accounting are met

## **13 Review incident activities**

- 13.1** Performance of incident management team is evaluated and documented

- 13.2 Effectiveness of strategies and tactics in meeting incident objectives is evaluated and documented
- 13.3 Debriefing requirements within and across participating organisations are identified, in accordance with organisational procedures
- 13.4 Debriefing plan is compiled and executed, in accordance with organisational policies and procedures
- 13.5 Reports on debriefing and lessons identified are produced and communicated, in accordance with organisational procedures

## Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

## Unit Mapping Information

This unit replaces and is equivalent to PUAOPE019A Control a Level 3 incident.

## Links

Companion Volume Implementation Guides are found in VETNet -  
<https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=3eca5672-6d5a-410b-8942-810d0ba05bbf>

# Assessment Requirements for PUAOPE019 Control a Level 3 incident

## Modification History

**Release 2.0** This is the second release of this unit of competency in the PUA Public Safety Training Package.

Editorial adjustments and clarification of text in Assessment Conditions.

**Release 1.0** This is the first release of this unit of competency in the PUA Public Safety Training Package.

## Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and includes

- analysing incidents both functionally and strategically
- applying Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) requirements
- approving plans and strategies to control incident
- communicating within incident management structure and monitoring and reviewing progress towards achievement of the incident action plan
- establishing and maintaining control of incident
- identifying and considering political and/or geographic strategic implications of incident and control activities and working with stakeholders to address the issues
- identifying and responding to areas impacted by the hazard and those directly affected by the impact
- implementing agreements and operating procedures including resolving conflict and negotiating outcomes
- incorporating risk management and contingency processes
- leading and managing a team in a dynamic environment
- maintaining shared situational awareness
- operating within financial delegations
- selecting, prioritising, implementing and evaluating approved courses of action
- strategically reacting to changes within the emergency environment
- working with agency, organisational and government personnel as well as with stakeholders.

## Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria and includes knowledge of

- Australasian Inter-service Incident Management System (AIIMS) including incident control

structure and principles

- codes of practice and legislative requirements
- communication requirements for emergency management agencies, stakeholders, government, other organisations/agencies and the community
- control facilities and systems and types of control systems in use
- decision making processes in time critical and dynamic situations
- disaster and emergency management arrangements
- financial management requirements including financial delegations and constraints
- national, state and territory based coordination protocols and arrangements
- organisational documentation, policies and procedures
- processes for briefing and debriefing
- relief and recovery arrangements
- requirements for reporting
- risk management
- sources of local knowledge
- types of community and environmental risks
- types of incidents
- Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) requirements.

## Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in operational situations or in simulated operational training situations that reflect workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to

- a range of relevant exercises, case studies and/or simulations
- appropriate materials, equipment, tools and personal protective clothing and equipment currently used in industry including
  - equipment, personnel, facilities appropriate to a Level 3 incident
  - means of observing and recording activities and collecting and reviewing products
  - means of simulating and accessing a Level 3 incident
  - personnel representing an incident management team and other key stakeholders e.g. coordinating agencies, government, regional and state emergency managers
  - typical Level 3 incident control centre and/or facility with tools, materials and systems
- applicable documentation including organisational procedures, industry standards, equipment

specifications, regulations, codes of practice and operation manuals.

## PUAOPE020 Lead a crew

### Modification History

**Release 1.** This is the first release of this unit of competency in the Public Safety Training Package.

### Application

This unit of competency involves the skills and knowledge required to lead a small team to perform operational tasks at an incident. It applies to personnel who are responsible for ensuring that tasks allocated to their crew are effectively and efficiently carried out.

The work is typically performed under the supervision of a designated officer within the organisation's chain of command.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

### Pre-requisite Unit

Not applicable

### Competency Field

Operations

### Unit Sector

Public safety

### Elements and Performance Criteria

#### ELEMENTS

Elements describe the essential outcomes.

#### 1 Prepare crew for tasks

#### PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

- |            |                                                                                                                  |
|------------|------------------------------------------------------------------------------------------------------------------|
| <b>1.1</b> | Initial briefing is obtained from the designated officer, in accordance with the organisational chain of command |
| <b>1.2</b> | Additional information, equipment and resources are obtained, as required                                        |

- |                                     |            |                                                                                                                     |
|-------------------------------------|------------|---------------------------------------------------------------------------------------------------------------------|
|                                     | <b>1.3</b> | Crews are briefed and tasks are allocated                                                                           |
| <b>2 Lead crew to perform tasks</b> | <b>2.1</b> | Tasks are implemented as directed by the designated officer, in accordance with the organisational chain of command |
|                                     | <b>2.2</b> | Progress towards completion of tasks is monitored and adjustments are made, as required                             |
|                                     | <b>2.3</b> | Reports are provided to the designated officer, in accordance with organisational procedures and instructions       |
|                                     | <b>2.4</b> | Communication is maintained with supervisor, crew members and other personnel in the work/incident area             |
|                                     | <b>2.5</b> | Safety, health and wellbeing of crew members is monitored and appropriate action is taken                           |
| <b>3 Conclude tasks</b>             | <b>3.1</b> | Completion of tasks is reported to the designated officer, in accordance with organisational procedures             |
|                                     | <b>3.2</b> | Crew and equipment are made ready for further tasks                                                                 |
|                                     | <b>3.3</b> | Crew is debriefed, in accordance with organisational procedures                                                     |
|                                     | <b>3.4</b> | Documentation is completed, in accordance with organisational procedures                                            |

# Assessment Requirements for PUAOPE020 Lead a crew

## Modification History

**Release 1.** This is the first release of this unit of competency in the Public Safety Training Package.

## Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and includes

- allocating tasks to crew members to achieve required outcomes
- applying Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) requirements
- briefing and debriefing crew members
- communicating with crew members
- completing organisational documentation
- completing reporting requirements
- concluding tasks
- following organisational policies and procedures
- identifying and correctly using equipment and resources
- leading crew to perform tasks
- maintaining shared situational awareness
- monitoring and reporting on progress
- obtaining briefing from designated officer
- preparing crew for tasks
- using communication equipment

## Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements, performance criteria and range of conditions and includes knowledge of

- communication flow requirements to meet organisational command structure
- communication methods
- equipment and resources
- organisational documentation, policies and procedures
- progress monitoring (plan, do, check and adjust)
- report and documentation requirements
- resource management responsibilities and systems
- types of incidents

- Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) requirements including risk mitigation

## Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Assessment must occur in workplace operational situations. Where this is not appropriate, assessment must occur in industry approved simulated workplace operational situations that reflect workplace conditions.

Resources for assessment must include access to

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, equipment, tools and personal protective clothing and equipment currently used in industry
- applicable documentation including organisational procedures, industry standards, equipment specifications, regulations, codes of practice and operation manuals.

# PUAOPE022 Manage logistics for a complex incident

## Modification History

**Release 1.** This is the first release of this unit of competency in the Public Safety Training Package.

## Application

This unit of competency involves the skills and knowledge required to acquire and provide human and physical resources, facilities, services and materials to support achievement of incident objectives. It includes establishing a logistics section, developing logistics plans, managing activities for provision of logistics support, managing logistics processes, participating in the incident management team and monitoring and reviewing logistics functions.

An individual performing in a logistics role is delegated responsibility by the Incident Controller. They support the Incident Controller and other members of the incident management team.

Logistics Officers are required to manage those activities necessary to provide logistical support during an incident and take responsibility for managing the staff appointed to the logistics section of the incident management team. Logistics Officers contribute to objectives and strategies through input into the development of the incident action plan.

Complex incidents are characterised by one or more of the following: impact on a widespread geographical area, detailed written incident action plan with multiple related incident control strategies, consequences extending beyond area of operations, need for relief and recovery operations, resources required beyond what can be obtained at local level and extended timeframe for resolution. These incidents typically have an elevated level of risk and consequence to the community.

Incident Controllers will need to establish an extended incident management structure to support the effective resolution of the incident. Authorisation to perform this role is subject to organisational policies and procedures.

No licensing, legislative or regulatory or certification requirements apply to this unit at the time of publication.

## Pre-requisite Unit

The fire sector is those sections of government departments, statutory authorities or organisations that have responsibility under jurisdictional arrangements for the delivery of firefighting and fire management services.

It is essential that the prerequisite units listed below are obtained prior to the issuance of this unit to individuals within the fire sector or the units contributing to the attainment of a fire qualification.

PUAOPE015 Conduct briefing and debriefings

## Competency Field

Operations

## Unit Sector

Public Safety

## Elements and Performance Criteria

### ELEMENTS

Elements describe the essential outcomes.

### PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

- |                                      |                                                                                                                                                                                              |
|--------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>1 Establish logistics section</b> | <b>1.1</b> Initial briefing is obtained from the Incident Controller and Incident Controller's intent is confirmed and questions are asked                                                   |
|                                      | <b>1.2</b> Forecast operational, planning and other incident activities including logistical requirements are determined                                                                     |
|                                      | <b>1.3</b> Logistics section objectives and tasks are identified, in accordance with requirements of the incident action plan and Incident Controller's intent                               |
|                                      | <b>1.4</b> Logistics structure for incident is developed and required logistical resources are identified and obtained                                                                       |
|                                      | <b>1.5</b> Logistics units are established, tasks are delegated, and briefings are provided to personnel                                                                                     |
|                                      | <b>1.6</b> Safe work practices and health and welfare arrangements for work area are established                                                                                             |
| <b>2 Develop logistics plans</b>     | <b>2.1</b> Logistics plans for the delivery of resources, services, facilities and materials including demobilisation arrangements are identified and delegated to personnel for development |
|                                      | <b>2.2</b> Information for the development and implementation of logistics plans is identified and sourced                                                                                   |
|                                      | <b>2.3</b> Logistics plans are produced on time and provided to personnel for implementation                                                                                                 |

- 2.4 Logistics plans and components of plans required for inclusion in the incident action plan are developed
    - 2.5 Incident management team members are briefed on progress of the logistics plans
- 3 **Manage activities for provision of logistics support**
  - 3.1 Financial management oversight is maintained, in accordance with controlling organisation's requirements
  - 3.2 Provision of food and drink to incident personnel, support staff and others is made, in accordance with organisational procedures, nutritional guidelines and nominated timeframes
  - 3.3 Transport for personnel, equipment, supplies and food is provided within required timeframes
  - 3.4 Equipment, vehicles and/or vessels are prepared, maintained and secured, as required
  - 3.5 Establishment and maintenance of staging areas is facilitated, in accordance with operational requirements
  - 3.6 Medical support is provided consistent with incident action plan requirements
  - 3.7 Communication systems, networks and equipment are established and maintained, in accordance with incident communications plan and incident action plan requirements
  - 3.8 Locations and facilities where personnel work, sleep, cook, maintain and repair equipment are selected, established and managed based on organisational requirements
  - 3.9 Requests for resources, services, facilities and materials are met and feedback is provided
  - 3.10 Facilities, services and materials are procured consistent with organisational policies and procedures
  - 3.11 Resources, equipment and materials are accounted for at the conclusion of the incident
- 4 **Manage logistics processes**
  - 4.1 Logistics requirements are managed, in accordance with organisational policies and procedures

- 4.2 Safe work practices and health and welfare arrangements are implemented and monitored
  - 4.3 Logistics section meetings are conducted, as required
  - 4.4 Work load and progress against logistics plans is monitored and maintained across work periods
  - 4.5 Logistics plans are reviewed to meet current and projected requirements throughout the incident
  - 4.6 Information exchange between logistics and other functional sections is maintained
  - 4.7 Relationships between logistics section, external organisations and providers are established and maintained
  - 4.8 Arrangements are made for a log and/or record of activities and decisions to be kept and maintained, in accordance with organisational procedures
- 5 **Participate in incident management team**
  - 5.1 Incident management team planning meetings are attended
  - 5.2 Strategic advice is provided to the incident management team about prioritisation and provision of resources, services, facilities and materials
  - 5.3 Incident management team is kept informed of logistical arrangements
  - 5.4 Incident Controller is briefed on analysis of progress against logistics portion of the incident action plan
  - 5.5 Liaison with incident management team members on logistics is undertaken
  - 5.6 Incident management team is kept informed of the status of inter organisational and external supplier arrangements
- 6 **Monitor and review logistics functions**
  - 6.1 Allocation and performance of resources are monitored and reviewed
  - 6.2 Demobilisation of the logistics section is planned and staged without compromising resources required to maintain response and support activities

- 6.3 Incident reports are produced, as required
- 6.4 Post incident analyses are initiated and participated in
- 6.5 Briefings and debriefings are conducted

## Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

## Unit Mapping Information

This unit replaces and is equivalent to PUAOPE022A Manage logistics for a Level 2 incident.

## Links

PUA Training Package Companion Volume Implementation Guide is found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=3eca5672-6d5a-410b-8942-810d0ba05bbf>

# Assessment Requirements for PUAOPE022 Manage logistics for a complex incident

## Modification History

**Release 1.** This is the first release of this unit of competency in the Public Safety Training Package.

## Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and includes

- applying Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) requirements
- completing reports
- conducting meetings and preparing agendas
- contributing as a member of an incident management team to resolve an incident
- developing and supervising logistics review processes and documentation appropriate to a complex incident
- developing logistics plans
- establishing logistics section and delegating units within it
- forecasting operational logistic requirements for an incident
- implementing and monitoring logistics portion of an incident action plan
- implementing organisational requirements on the acquisition of logistics resources
- logging and recording all actions and decisions
- logistics section appropriate to incident requirements is established and resources are identified and obtained
- making decisions in a time critical and dynamic environment including managing time, prioritising tasks, resolving conflict and negotiating outcomes
- managing a team within a dynamic environment and monitoring performance
- planning for demobilisation activities
- preparing, presenting and communicating information
- providing advice
- providing feedback and taking mitigation actions to ensure completion of logistics requirements at an incident
- working with logistics plans

## Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements, performance criteria and range of conditions and includes

knowledge of

- arrangements for obtaining suppliers of services, equipment and material
- Australasian Inter-service Incident Management System (AIIMS) structure and principles
- characteristics of a complex incident
- demobilisation planning
- logistic unit roles and responsibilities including catering unit, communications support unit, facilities unit, finance unit, ground support unit, medical services unit and supply unit
- logistics plans
- national, state and territory emergency management legislation, policy, procedures and interorganisational memorandums of understanding
- operational logistics forecasting
- organisational arrangements for acquisition of resources from local area and wider regions including state, territory and national and other providers and/or organisations
- organisational documentation, policies and procedures including communication policy and procedures for logistics section
- organisational specific purchasing arrangements
- processes and protocols for briefings and debriefings
- protocols and procedures for meetings
- resource management systems and responsibilities
- use of information management systems
- Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) regulations and requirements

## Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Assessment must occur in workplace operational situations. Where this is not appropriate, assessment must occur in industry approved simulated workplace operational situations that reflect workplace conditions.

Resources for assessment must include access to

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, equipment, tools and personal protective clothing and equipment currently used in industry
- applicable documentation including organisational procedures, industry standards, equipment specifications, regulations, codes of practice and operation manuals.

## PUAOPE023 Manage operations for a Level 2 incident

### Modification History

**Release 1.** This is the first release of this unit of competency in the Public Safety Training Package.

### Application

This unit of competency involves the skills and knowledge required by an Operations Officer to manage operational resources and to resolve a Level 2 incident in accordance with the objectives identified by the Incident Controller. It includes establishing command and developing operational structure, contributing to the development of the incident action plan, managing operations, establishing communications, participating in incident management teams and monitoring and reviewing operations functions.

An individual performing the role of Operations Officer is delegated responsibility by the Incident Controller. They support the Incident Controller and works with other members of the incident management team. Operations Officers are required to implement strategies to resolve an incident; manage all activities that are directly related to resolving the incident; manage all resources, personnel and equipment assigned to the operations section and the identification of risks at an incident.

Level 2 incidents are characterised by the need for deployment of resources beyond the initial response, sectorisation of the incident, establishment of functional sections due to the levels of complexity or a combination of the above. Authorisation to perform this role is subject to organisational policies and procedures.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

### Pre-requisite Unit

The fire sector is those sections of government departments, statutory authorities or organisations that have responsibility under jurisdictional arrangements for the delivery of firefighting and fire management services.

It is essential that the prerequisite units listed below are obtained prior to the issuance of this unit to individuals within the fire sector or the units contributing to the attainment of a fire qualification.

PUAOPE015 Conduct briefing and debriefings

PUAOPE016 Manage a multi-team sector

### Competency Field

Operations

## Unit Sector

Public Safety

## Elements and Performance Criteria

### ELEMENTS

Elements describe the essential outcomes.

### PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

#### 1 Establish command and develop operational structure

**1.1** Initial briefing is obtained from Incident Controller with Incident Controller's intent confirmed and questions asked

**1.2** Command of operations function is established

**1.3** Principles of span of control are applied to operational resources

**1.4** Sectors are delineated taking account of geographic and functional requirements

**1.5** Strike teams, task forces or units are formed from allocated resources

#### 2 Contribute to development of the Incident Action Plan

**2.1** Incident Action Plan (IAP) for the operational period is monitored and reviewed

**2.2** Input into incident objectives and operational strategies is provided

**2.3** Operations component of the IAP is developed, in accordance with organisational policies, procedures, safe work practices, industrial awards and agreements

**2.4** Need for logistical support is determined and documented

#### 3 Manage operations

**3.1** Security arrangements are established

**3.2** Records of activities and decisions are kept, in accordance with organisational policies and procedures

**3.3** Operations function is established to achieve objectives and tasks are delegated, in accordance with the requirements of a Level 2 incident

- 3.4 Operations requirements are identified, and resources are sought to meet incident requirements
  - 3.5 Operations personnel are briefed, and tasks are allocated, in accordance with the IAP objectives
  - 3.6 Resources are deployed, in accordance with the IAP objectives
  - 3.7 Operations progress is monitored against the IAP and operational activities are adjusted, as required, throughout the incident
  - 3.8 Operational effectiveness is reviewed and changes to operational structure, resources and logistical support are determined and communicated to the Incident Controller
  - 3.9 Operations resources are managed, in accordance with organisational policies and procedures
  - 3.10 Safe work practices, Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) and welfare arrangements for work area are implemented and monitored
  - 3.11 Agreed protocols are followed when managing personnel from other organisations
  - 3.12 Action is taken to protect and preserve incident scene, in accordance with organisational policies and procedures
  - 3.13 Staging areas are established and maintained, as required, and this is communicated to the incident management team and participating organisations and/or agencies
- 4 Establish communications**
- 4.1 Incident communication plan is implemented, monitored and reviewed
  - 4.2 Communication is maintained with incident personnel, in accordance with organisational policies and procedures
  - 4.3 Current and emerging operational risks are communicated to personnel, in accordance with the chain of command
  - 4.4 Communication is maintained with stakeholders and

|                                                  |            |                                                                                                                             |
|--------------------------------------------------|------------|-----------------------------------------------------------------------------------------------------------------------------|
|                                                  |            | affected parties, in accordance with organisational policies and procedures                                                 |
|                                                  | <b>4.5</b> | Emerging or anticipated problems with incident communication are reported immediately                                       |
| <b>5 Participate in Incident Management Team</b> | <b>5.1</b> | Incident Management Team (IMT) planning meetings are attended, in accordance with Incident Controller's requirements        |
|                                                  | <b>5.2</b> | Incident Controller is advised about incident situation, control progress and risks in a timely manner                      |
|                                                  | <b>5.3</b> | IMT is kept informed of progress of operations plan and operational requirements                                            |
|                                                  | <b>5.4</b> | Advice is provided to the IMT on provision of services and resources and prioritisation of requirements                     |
|                                                  | <b>5.5</b> | Incident Controller is briefed on analysis of progress against the operations portion of the IAP                            |
|                                                  | <b>5.6</b> | Liaison with other members of the IMT is undertaken, as required                                                            |
|                                                  | <b>5.7</b> | Regular information exchange is maintained with planning and logistics section                                              |
|                                                  | <b>5.8</b> | Demobilisation of operations resources is undertaken while integrity of the response is maintained                          |
| <b>6 Monitor and review operations functions</b> | <b>6.1</b> | Performance of operational objectives and allocation of resources is monitored and reviewed                                 |
|                                                  | <b>6.2</b> | Incident reports are produced, as required                                                                                  |
|                                                  | <b>6.3</b> | Operational briefings and debriefings are conducted and recorded, in accordance with organisational policies and procedures |

# Assessment Requirements for PUAOPE023 Manage operations for a Level 2 incident

## Modification History

**Release 1.** This is the first release of this unit of competency in the Public Safety Training Package.

## Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and includes

- analysing situations both functionally and strategically
- applying Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) organisational requirements
- communicating information in a timely manner
- communicating within the operational structure and monitoring and reviewing progress towards achievement of the incident action plan
- conducting assessment and management of operational activities
- contributing to development of the incident action plan
- delegating responsibility
- implementing response in accordance with organisational procedures and authority
- leading and managing teams within a dynamic environment and monitoring performance
- logging and recording actions and decisions
- making decisions in a time critical and dynamic environment
- managing scene security
- providing feedback and taking mitigation action to ensure completion of operations requirements at an incident
- reacting strategically to changes within the incident including prioritising tasks and managing time
- working as part of an incident management team
- working with internal and external stakeholders including resolving conflict and negotiating outcomes

## Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria and includes knowledge of

- equipment and personnel capabilities for incident type
- incident management team roles and responsibilities
- incident scene protection and preservation

- inter-organisational arrangements relating to incident type
- operational risk identification
- organisational policies and procedures including communications policy, liaising with other organisations, post incident procedures and processes and procedures for deploying and tasking personnel
- principles of span of control and management by objectives
- processes and protocols for briefings and debriefings
- processes for determining operational priorities
- requirements for recording and reporting
- resource management responsibilities and systems
- risk management processes
- sectorisation of incidents
- security requirements for operations area
- state and territory coordination arrangements
- state and territory emergency management legislation with an emphasis on incident type
- types and purposes of incident action plans
- Work Health and Safety (WHS)/Occupational Health and Safety (OHS) organisational requirements

## Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Assessment must occur in workplace operational situations. Where this is not appropriate, assessment must occur in industry approved simulated workplace operational situations that reflect workplace conditions.

Resources for assessment must include access to

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, equipment, tools and personal protective clothing and equipment currently used in industry including
  - Level 2 incidents or simulations, supported by relevant case studies or assessment tools
  - equipment, personnel, facilities appropriate to a Level 2 incident and within the bounds of responsibility as designated to the Operations Officer by the Incident Controller
- applicable documentation including organisational procedures, industry standards, equipment specifications, regulations, codes of practice and operation manuals.

# PUAOPE024 Manage operations for a Level 3 incident

## Modification History

**Release 2.0** This is the second release of this unit of competency in the PUA Public Safety Training Package.

Editorial adjustments and clarification of text in Assessment Conditions.

**Release 1.0** This is the first release of this unit of competency in the PUA Public Safety Training Package.

## Application

This unit of competency involves the skills and knowledge required to implement actions to resolve a Level 3 incident, consistent with the objectives identified by the Incident Controller. It includes establishing command, establishing command facilities, establishing a command structure, establishing procedures to permit command to be exercised, contributing to the development of the incident action plan, managing operations, concluding operations and reviewing operations.

A person performing the role of Operations Officer is delegated responsibility by the Incident Controller. They support the Incident Controller and other members of the Incident Management Team (IMT). Operations Officers are required to implement strategies to resolve the incident, manage all activities that are undertaken directly to resolve the incident and manage all resources, people and equipment, assigned to the operations section.

Level 3 incidents are characterised by degrees of complexity and consequence that may require the establishment of significant resources and structure for the effective management of the situation. These incidents will usually involve delegation of all functions. Authorisation to perform this role is subject to organisational policies and procedures.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Pre-requisite Unit

The fire sector is those sections of government departments, statutory authorities or organisations that have responsibility under jurisdictional arrangements for the delivery of firefighting and fire management services.

It is essential that the prerequisite units listed below are obtained prior to the issuance of this unit to individuals within the fire sector or the units contributing to the attainment of a fire qualification.

## Elements and Performance Criteria

### ELEMENTS

Elements describe the essential outcomes.

### PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

#### 1 Establish command

- 1.1** Initial briefing is obtained from the Incident Controller with Incident Controller's intent confirmed and questions asked
- 1.2** Command is established and exercised, in accordance with organisational authority
- 1.3** Commander's details are communicated to internal personnel and external authorities pertinent to incident using a range of communication processes and systems
- 1.4** Commanders under supervision within the operation sections are identified
- 1.5** Record of activities and decisions is kept, as required

#### 2 Establish command facilities

- 2.1** Command facility is established and operated, in accordance with organisational requirements
- 2.2** Details of the facility are communicated to internal personnel and to external authorities, organisations and individuals including support services
- 2.3** Staging areas are established and maintained

#### 3 Establish a command structure

- 3.1** Command structure is established appropriate to nature and complexity of tasks to be undertaken by the organisation and the nature of the incident
- 3.2** Command structure is expanded, contracted or modified in response to activities and controlled changes within the incident environment considering the nature, extent

|                                                                 |            |                                                                                                                                                                                                   |

|                                                                 |            | and potential of the incident                                                                                                                                                                     |
|                                                                 | <b>3.3</b> | Agreed protocols are followed when managing another organisation's personnel                                                                                                                      |
| <b>4 Establish procedures to permit command to be exercised</b> | <b>4.1</b> | Command structure is communicated to internal and external personnel, authorities and any individuals who may have a regulatory interest in the incident                                          |
|                                                                 | <b>4.2</b> | Command information management system is implemented                                                                                                                                              |
|                                                                 | <b>4.3</b> | Communication system and procedures are implemented between levels of command, in accordance with organisational procedures                                                                       |
|                                                                 | <b>4.4</b> | Liaison is established and maintained to meet command requirements                                                                                                                                |
| <b>5 Contribute to development of the Incident Action Plan</b>  | <b>5.1</b> | Incident Action Plan (IAP) for the operational period is monitored and reviewed                                                                                                                   |
|                                                                 | <b>5.2</b> | Input is provided into incident objectives and operational strategies                                                                                                                             |
|                                                                 | <b>5.3</b> | Operations component of the IAP for risk and consequence are developed, in accordance with organisational policies, operational procedures, safe work practices, industrial awards and agreements |
|                                                                 | <b>5.4</b> | Need for logistical support is determined and documented                                                                                                                                          |
| <b>6 Manage operations</b>                                      | <b>6.1</b> | Security arrangements are established, in accordance with organisational policies and procedures                                                                                                  |
|                                                                 | <b>6.2</b> | Operations personnel are briefed and tasks are allocated, in accordance with the IAP                                                                                                              |
|                                                                 | <b>6.3</b> | IAP is implemented and modified, as required, in accordance with Incident Controller's intent                                                                                                     |
|                                                                 | <b>6.4</b> | Tactics to manage the incident are identified, in accordance with the operational portion of the IAP                                                                                              |
|                                                                 | <b>6.5</b> | Resources are deployed in area of operations to ensure IAP is implemented, in accordance with organisational requirements                                                                         |
|                                                                 | <b>6.6</b> | Human and physical resources, including personnel                                                                                                                                                 |

support activities, are managed to achieve command plan outcomes

- 6.7** Significant changes in status and actions taken are reported using agreed mechanisms, in accordance with organisational policies and procedures
- 6.8** Operations are redirected to meet changes in conditions which affect the incident situation
- 6.9** Welfare of public within the area of operations is addressed
- 6.10** Demobilisation of operational resources is undertaken while integrity of the response is maintained
- 6.11** Information for the transition from response to recovery is supplied to the incident management team

## **7 Conclude operations**

- 7.1** Physical, human and capital resources are accounted for, in accordance with organisational procedures
- 7.2** Operational debriefing requirements are met, in accordance with organisational procedures
- 7.3** Operational documentation is completed, in accordance with organisational requirements
- 7.4** Operational situational reports are produced and are submitted to relevant personnel

## **8 Review operations**

- 8.1** Plans are evaluated and reviewed, as required
- 8.2** Command and interaction with control is evaluated and documented
- 8.3** Post incident reports are produced and communicated, in accordance with organisational procedures

## **Foundation Skills**

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## **Range of Conditions**

Range is restricted to essential operating conditions and any other variables essential to the work

environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

## **Unit Mapping Information**

This unit replaces and is equivalent to PUAOPE024A Manage operations for a Level 3 incident.

# Assessment Requirements for PUAOPE024 Manage operations for a Level 3 incident

## Modification History

**Release 2.0** This is the second release of this unit of competency in the PUA Public Safety Training Package.

Editorial adjustments and clarification of text in Assessment Conditions.

**Release 1.0** This is the first release of this unit of competency in the PUA Public Safety Training Package.

## Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and includes

- analysing emergency situations both functionally and strategically
- applying Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) requirements
- communicating within operations structure and monitoring and reviewing progress towards achievement of incident action plan
- concluding operations
- conducting assessment of operational activities
- considering nature, extent and potential of an incident
- contributing to development of incident action plan
- delegating responsibility
- deploying human and physical resources
- establishing and managing an operations section appropriate to nature and complexity of incident
- establishing and operating a command facility
- implementing response according to organisational procedures and authority
- incorporating risk management and contingency processes including assessing safety of public within operations area
- leading and managing teams
- liaising with Incident Controller and internal and external stakeholders
- logging and recording all actions and decisions
- maintaining shared situational awareness
- making decisions in accordance with Incident Controller's intent
- providing feedback and taking mitigation action to ensure completion of operations requirements at an incident
- reacting strategically to changes within the incident including managing time, prioritising tasks, resolving conflict and negotiating outcomes

- securing area of operations
- selecting, prioritising, implementing and evaluating appropriate strategies
- tasking and using resources to achieve resolution of an incident according to incident action plan, Incident Controller's intent and principles of span of control
- undertaking operational briefings and debriefings
- using information management systems
- using a range of communications systems and procedures
- working with Incident Controller and other members of the incident management team.

## Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria and includes knowledge of

- activities and controlled changes
- area of operations and consequence
- communications systems
- demobilisations
- determination of operational priorities
- information management systems
- internal and external personnel and authorities
- inter-organisational memorandums of understanding in relation to incident type
- mechanisms for reporting and requirements for reporting and recording
- national, state and territory based coordination arrangements and emergency management legislation with an emphasis on incident type
- operational briefings and debriefings
- operational risk identification and consequence management
- organisational command structure
- organisational documentation, policies and procedures including those for managing and concluding Level 3 incident operations, communications, deploying and tasking personnel, liaising with other organisations and post incident activities
- processes for escalation and de-escalation of resources
- relief and recovery considerations
- resources and resource management systems and responsibilities (safe deployment and recording)
- risk management processes including contingency planning, welfare of public and consequence management
- sectors and divisions
- support services and personnel support activities
- types of incidents
- Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) requirements.

## Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in operational situations or in simulated operational training situations that reflect workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to

- a range of relevant exercises, case studies and/or simulations
- appropriate materials, equipment, tools and personal protective clothing and equipment currently used in industry
- applicable documentation including organisational procedures, industry standards, equipment specifications, regulations, codes of practice and operations manuals.

# PUAOPE025 Manage planning for a complex incident

## Modification History

**Release 1.** This is the first release of this unit of competency in the Public Safety Training Package.

## Application

This unit of competency involves the skills and knowledge required to collect, analyse and apply information and to develop plans for the resolution of a complex incident. It includes establishing a planning section, managing the planning section, interpreting and applying information on current and forecast situation, disseminating information on current and forecast situation, preparing incident plans and briefing incident management team, participating in the incident management team and monitoring and reviewing planning functions.

A person performing the role of Planning Officer is delegated responsibility by the Incident Controller. This person supports the Incident Controller and other members of the incident management team.

Complex incidents are characterised by one or more of the following: impact on a widespread geographical area, detailed written Incident Action Plan (IAP) with multiple related incident control strategies, consequences extending beyond area of operations, need for relief and recovery operations, resources required beyond what can be obtained at local level and extended timeframe for resolution.

These incidents typically have an elevated level of risk and consequence to the community. Incident Controllers will need to establish an extended incident management structure to support the effective resolution of the incident. Authorisation to perform this role is subject to organisational policies and procedures.

No licensing, legislative or regulatory or certification requirements apply to this unit at the time of publication.

## Pre-requisite Unit

The fire sector is those sections of government departments, statutory authorities or organisations that have responsibility under jurisdictional arrangements for the delivery of firefighting and fire management services.

It is essential that the prerequisite units listed below are obtained prior to the issuance of this unit to individuals within the fire sector or the units contributing to the attainment of a fire qualification.

PUAFIR502 Develop incident control strategies

PUAOPE015 Conduct briefings and debriefings

## Competency Field

Operations

## Unit Sector

Public Safety

## Elements and Performance Criteria

### ELEMENTS

Elements describe the essential outcomes.

### PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

#### 1 Establish planning section

- 1.1 Initial briefing is obtained from Incident Controller with Incident Controller's intent confirmed and questions asked
- 1.2 Current and forecast operational activities and resource levels are determined
- 1.3 Planning section objectives and tasks are identified, in accordance with Incident Controller's intent
- 1.4 Planning section structure is developed, and resources are identified and obtained
- 1.5 Planning section units are established, tasks are delegated, and briefings are given to delegated personnel
- 1.6 Safe work practices and health and welfare arrangements for work area are implemented and monitored

#### 2 Manage planning section

- 2.1 Allocated tasks are adjusted to meet incident objectives and planning requirements
- 2.2 Work load, progress and performance of planning section is monitored and managed
- 2.3 Planning section meetings are conducted
- 2.4 Information flow within the Incident Management Team (IMT) and with external organisations is established and maintained
- 2.5 Document management and record keeping systems are

|          |                                                                          |                                                                                                                                                                |

|          |                                                                          | established and maintained, in accordance with organisational procedures                                                                                       |
|          | 2.6                                                                      | Arrangements are made for a log and/or record of activities and decisions to be kept and maintained                                                            |
|          | 2.7                                                                      | Management support services are provided, as requested, in a timely manner                                                                                     |
| <b>3</b> | <b>Interpret and apply information on current and forecast situation</b> |                                                                                                                                                                |
|          | 3.1                                                                      | Information sufficient for incident prediction is collected on current incident situation                                                                      |
|          | 3.2                                                                      | Incident predictions and options analysis of risks provided by the intelligence function are interpreted                                                       |
|          | 3.3                                                                      | Significance of specialist technical information and incident behaviour predictions is provided to the IMT                                                     |
|          | 3.4                                                                      | Procedures to identify, mitigate and monitor risks related to the incident are established, in accordance with organisational procedures                       |
|          | 3.5                                                                      | Current and predicted key risk exposures are identified and impacts are mitigated, where possible                                                              |
|          | 3.6                                                                      | Risk mitigation strategies are monitored, and strategies are adjusted                                                                                          |
| <b>4</b> | <b>Disseminate information on current and forecast situation</b>         |                                                                                                                                                                |
|          | 4.1                                                                      | Appropriate incident information is provided to incident personnel                                                                                             |
|          | 4.2                                                                      | Information is provided to the IMT on incident control and safety issues                                                                                       |
|          | 4.3                                                                      | Information is prepared, displayed and maintained                                                                                                              |
|          | 4.4                                                                      | Maps and schematic plans are produced to meet incident requirements                                                                                            |
|          | 4.5                                                                      | Information sharing and transition arrangements with recovery organisations are established and maintained                                                     |
| <b>5</b> | <b>Prepare incident plans and brief IMT</b>                              |                                                                                                                                                                |
|          | 5.1                                                                      | Options and recommendations are produced in consultation with the IMT for their consideration including objectives and strategies for controlling the incident |
|          | 5.2                                                                      | Risks and likely outcomes associated with preferred and                                                                                                        |

alternative incident objectives and strategies are specified

- 5.3 Incident Controller and IMT members are briefed and incident objectives and strategies are confirmed by the Incident Controller
- 5.4 Incident Action Plan (IAP) is prepared for the subsequent operations period and is distributed and/or communicated about in a timely fashion
- 5.5 Communication plan is developed, reviewed and implemented
- 5.6 Records are kept of resources requested en route, allocated to and released from the incident
- 5.7 Resource planning and management, including fatigue management, is undertaken
- 5.8 Changeover plans are developed to complement the IAP
- 5.9 Planning for relief and recovery activities is undertaken in consultation with recovery organisations
- 5.10 Complementary incident plans are developed, in accordance with organisational policies, procedures, industrial awards and agreements

## **6 Participate in IMT**

- 6.1 IMT planning meetings are scheduled and conducted, in accordance with organisational procedures and Incident Controller's requirements
- 6.2 IMT is informed of current and predicted incident situation and progress towards incident objectives and strategies
- 6.3 Specialist information requirements are obtained and provided to the IMT
- 6.4 Strategic advice is provided to the IMT based on interpretation of information received
- 6.5 Incident Controller is briefed on analysis of progress against IAP
- 6.6 Liaison with other members of the IMT is undertaken

## **7 Monitor and review planning functions**

- 7.1 Allocation and performance of resources is monitored and reviewed, in accordance with organisational

procedures

- 7.2 Incident reports are produced, as required
- 7.3 Briefings and debriefings are conducted
- 7.4 Post incident analysis is initiated and participated in

## Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

## Unit Mapping Information

This unit replaces and is equivalent to PUAOPE025A Manage planning for a Level 2 incident.

## Links

PUA Training Package Companion Volume Implementation Guide is found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=3eca5672-6d5a-410b-8942-810d0ba05bbf>

# Assessment Requirements for PUAOPE025 Manage planning for a complex incident

## Modification History

**Release 1.** This is the first release of this unit of competency in the Public Safety Training Package.

## Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and includes

- applying Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) requirements
- collecting, evaluating and disseminating information on current and forecast incident situation
- conducting briefings and debriefings
- conducting meetings including preparing agendas
- delegating units within planning section
- determining communications plan
- establishing and managing planning section
- identifying characteristics of complex incident
- logging and recording actions and decisions
- maintaining and recording status of resources using resource management system
- managing and maintaining resource management systems
- managing teams within time critical and dynamic environment including resolving conflict and negotiating outcomes
- managing technical specialists
- participating and liaising with Incident Controller and incident management team members
- preparing and disseminating incident action plan
- preparing, presenting and communicating information including utilising maps and schematic plans
- providing feedback, monitoring performance and taking mitigation action to ensure completion of planning requirements at an incident
- providing management support services
- reviewing and monitoring planning functions
- working as a member of an incident management team to resolve an incident

## Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the

requirements of the elements and performance criteria and includes knowledge of

- Australasian Inter-service Incident Management System (AIIMS) structure and principles
- characteristics of complex incidents
- communication requirements for stakeholders, government, other agencies and community
- complementary incident plans
- incident action planning processes for a complex incident
- incident documentation and management of records and information including logs
- log of activities
- management support services
- national, state and territory emergency management legislation, policy, procedures and inter-organisational memorandums of understanding
- nature of incident
- organisational documentation, policies and procedures
- processes and procedures for briefings and debriefings using Situation, Mission, Execution, Administration/logistics, Command/control and Safety (SMEACS) plus questions
- processes for monitoring and reviewing incident action plan for a complex incident
- protocols and procedures for meetings
- protocols and procedures for meetings
- requirements of planning section facility
- resource management systems and responsibilities
- risk management processes and arrangements including incident analysis
- risks including economic, environmental, political, public safety and social
- specialist technical information
- Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) requirements

## Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Assessment must occur in workplace operational situations. Where this is not appropriate, assessment must occur in industry approved simulated workplace operational situations that reflect workplace conditions.

Resources for assessment must include access to

- a range of relevant exercises, case studies and/or simulations relevant
- appropriate materials, equipment, tools and personal protective clothing and equipment currently used in industry

- applicable documentation including organisational procedures, industry standards, equipment specifications, regulations, codes of practice and operations manuals.

## PUAOPE026 Provide strategic safety advice at an incident

### Modification History

**Release 1.** This is the first release of this unit of competency in the Public Safety Training Package.

### Application

This unit of competency involves the skills and knowledge required to provide strategic advice to the Incident Controller on issues related to safety, health and welfare at an incident. This unit applies to a person who is appointed to the role of safety officer. It includes contributing to safety, health and welfare of all personnel involved in an incident, providing strategic advice to personnel on mitigating safety, health and welfare risks, managing safety team and resources, contributing to planning processes and supporting the management of safety event investigations.

A person performing the role of Safety Officer is appointed by the Incident Controller. If appointed the safety officer will report directly to the Incident Controller however, the Incident Controller may elect to have the role report directly to a Deputy Incident Controller. The authorisation to perform this role is subject to organisational policies and procedures.

Providing a safe working environment for people at an incident is the shared responsibility of the Incident Controller, each member of the incident management team and at their respective levels all persons involved at the incident.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

### Pre-requisite Unit

outcomes.

demonstrate achievement of the element.

**1 Contribute to safety, health and welfare of personnel involved at incident**

- 1.1** Initial briefing is sought and obtained from the Incident Controller with Incident Controller's intent confirmed and questions asked
- 1.2** Identity and location of field based safety officers is established and communication methods are confirmed
- 1.3** Safety team priorities are obtained and confirmed with Incident Controller throughout the incident
- 1.4** Safety, health and welfare requirements at the incident are identified
- 1.5** Safety, health and welfare of operational and associated personnel is monitored and reviewed throughout incident
- 1.6** Information relating to incident safety, health and welfare is collected, collated and analysed
- 1.7** Predictions and forecasts are made about safety, health and welfare environment at the incident
- 1.8** Mitigation strategies for risks that may not have been identified in the planning process are developed
- 1.9** Safety roles are identified
- 1.10** Oversight of adequacy of procedures related to safety is maintained throughout the incident
- 1.11** Meetings and briefings are monitored for adequacy of safety, health and welfare information

**2 Provide strategic advice on mitigating safety, health and welfare risks**

- 2.1** Personnel are informed of actions or conditions that have the potential to place lives or safety at risk
- 2.2** Mitigation actions are recommended where actions or conditions have the potential to place any person's life, safety, health or welfare at risk
- 2.3** Work is undertaken with incident management team personnel to ensure safety, health and welfare issues are addressed throughout the incident
- 2.4** Work, Health and Safety (WHS)/Occupational Health

- and Safety (OHS) advice is provided and is documented throughout the incident
- 2.5** Incident Controller is alerted to unsafe work practices and alternative strategies and/or mitigations are recommended
- 3 Manage safety resources**
- 3.1** Safety team resources are established, in accordance with Incident Controller's direction and incident risk profile
- 3.2** Safety resources are adjusted to meet the predicted and actual safety demands of the incident
- 3.3** Arrangements are made for a log and/or record of activities and decisions to be kept
- 3.4** Performance of the safety team is monitored, in accordance with organisational procedures and the demands of the incident
- 3.5** Operational plans are produced for the safety team and all members are briefed on their roles and responsibilities
- 3.6** Work undertaken by the safety team is supervised, monitored and reviewed
- 3.7** Demobilisation of the safety team is planned
- 3.8** Handover briefings are prepared and delivered
- 4 Contribute to planning processes**
- 4.1** Meetings, briefings and debriefing sessions are attended, and safety issues are identified
- 4.2** Liaison is undertaken with the incident management team to produce an operational plan that addresses safety requirements
- 4.3** Safety advice is provided for the development of the Incident Action Plan (IAP) and complementary plans in relation to incident safety
- 4.4** Relevant sections of the IAP are reviewed as they are developed
- 4.5** Participation in the development and dissemination of specific plans is undertaken
- 5 Support management of**
- 5.1** Safety related incidents are reported to participating

**safety event investigations**

and/or pertinent organisations, in accordance with organisational procedures

- 5.2 Initial investigation and/or analysis of safety event is commenced
- 5.3 Interaction is maintained with personnel during and following a safety event
- 5.4 Information is referred to Incident Controller in relation to safety event investigations at the incident and any impact this may have on operations
- 5.5 Information relating to safety event cause including recommended mitigation processes and procedures is referred to the Incident Controller
- 5.6 Hazards and risks associated with safety events are analysed to determine control strategies have been identified and put in place
- 5.7 Safety event report and recommendations for the prevention of similar occurrences is submitted to Incident Controller
- 5.8 Follow up actions for safety events are included, where appropriate, in demobilisation and recovery plans

## Foundation Skills

# Assessment Requirements for PUAOPE026 Provide strategic safety advice at an incident

## Modification History

**Release 1.** This is the first release of this unit of competency in the Public Safety Training Package.

## Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and includes

- analysing operational plans for potential to compromise safety
- applying Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) requirements
- assessing safety hazards and risks at an incident
- attending meetings with Incident Controller and personnel
- complying with legislation and codes of practice
- contributing safety advice to complementary plans including catering, communication, division and sector, facility, fatigue management, medical, recovery, resource management, traffic and transport
- contributing to planning processes
- contributing to the safety, health and welfare of personnel involved in an incident
- identifying issues related to safety, health and welfare of personnel and actions to mitigate and/or control risks
- identifying potential issues and maintaining a strategic focus when providing safety advice
- implementing organisational documentation, policies and procedures
- investigating and managing safety events
- maintaining strategic focus on safety in conditions of high operational demand
- managing personnel, information and resources
- preparing reports
- providing advice to Incident Controller and personnel on mitigating safety, health and welfare risks
- providing briefings and debriefings to the incident management team
- recording observations and recommendations and reporting on safety issues to Incident Controller and members of incident management team
- reviewing sections of the incident action plan
- supporting management in investigation of safety events
- using complimentary plans

## Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria and includes knowledge of

- Australasian Inter-service Incident Management System (AIIMS) and principles
- complementary plans including catering, communication, division and sector, facility, fatigue management, medical, recovery, resource management, traffic and transport
- incident action plans including planning processes
- incident management team meeting processes and procedures
- methods for monitoring safe work practices at incidents organisational documentation, policies and procedures principles of span of control
- processes for briefings and debriefings using Situation, Mission, Execution, Administration/logistics, Command/control and Safety (SMEACS) plus questions
- relevant personnel at an incident
- risk management and mitigation processes
- safety events and investigations
- Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) requirements

## Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

# PUAOPE027 Undertake beach safety management activities

## Modification History

**Release 1.** This is the first release of this unit of competency in the Public Safety Training Package.

## Application

This unit of competency involves the skills and knowledge required to coordinate beach surveillance and rescues as a part of beach safety management activities. It includes preparing for beach surveillance and rescue, undertaking preventative actions, responding to casualties in distress, completing beach surveillance and rescue recovery requirements.

The unit is applicable for personnel from emergency services and organisations where beach surveillance and rescue is coordinated as part of beach safety management activities.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Pre-requisite Unit

Not applicable

# Assessment Requirements for PUAOPE027 Undertake beach safety management activities

## Modification History

**Release 1.** This is the first release of this unit of competency in the Public Safety Training Package.

## Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and includes

- accessing and interpreting data
- applying Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) requirements
- assessing beach conditions including identifying rips and wave types
- communicating with public, colleagues and stakeholders
- completing beach surveillance and rescue recovery
- coordinating a range of beach related issues and/or rescues
- coordinating a rescue situation
- finalising organisational documentation
- following organisational policies and procedures
- managing a range of situations in a calm and concise manner
- planning safest swimming location
- reporting to operational command
- responding to casualties in distress
- setting up for beach surveillance and appropriately locating signage and equipment
- undertaking a risk assessment
- undertaking preventative actions
- using rescue equipment

## Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria and includes knowledge of

- beach conditions including dangers associated with different wave types
- casualty rescues
- characteristics and limitations of equipment
- different types of beaches and associated hazards
- industry standards for signage and beach safety including use of Australian Beach Safety and Management Program (ABSAMP) local government by-laws and regulations

- organisational documentation, policies and procedures
- organisational operating procedures and structure including roles and responsibilities
- other emergency organisations and skilled personnel
- weather forecasts and impact on beach conditions
- Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) requirements including risk mitigation

## Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Assessment must occur in workplace operational situations. Where this is not appropriate, assessment must occur in industry approved simulated workplace operational situations that reflect workplace conditions.

Competency should be assessed during patrol activities as a part of structured beach set up and surveillance scenario throughout a range of conditions.

Resources for assessment must include access to

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, equipment, tools and personal protective clothing and equipment currently used in industry including
  - rescue equipment, patrol personnel and a range of beaches with varying conditions
- applicable documentation including organisational procedures, industry standards, equipment specifications, regulations, codes of practice and operation manuals.

# Assessment Requirements for PUAPRO001 Promote a learning environment in the workplace

## Modification History

**Release 2.0** This is the second release of this unit of competency in the Public Safety Training Package.

Editorial adjustments and clarification of text in Assessment Conditions.

**Release 1.0** This is the first release of this unit of competency in the PUA Public Safety Training Package.

## Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and includes

- arranging support for individuals who have learning difficulties
- creating learning opportunities
- developing learning plans
- developing links between work and learning
- encouraging and promoting achievement of competencies
- facilitating and promoting learning
- following organisational policies and procedures
- monitoring and improving learning effectiveness
- promoting collaborative processes in learning environments
- providing leadership and support to individuals and teams to develop and maintain flexible learning environments
- supporting and encouraging learning by individuals and teams.

## Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria and includes knowledge of

- group dynamics
- learning opportunities within the organisation or team
- learning strategies including coaching, mentoring, exchanges and/or rotations, action learning and structured training programs
- organisational documentation, policies and procedures
- organisational records and reports on competencies
- principles of adult learning.

## Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in operational situations or in simulated operational training situations that reflect workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to

- a range of relevant exercises, case studies and/or simulations
- appropriate materials, equipment, tools and personal protective clothing and equipment currently used in industry
- applicable documentation including organisational procedures, industry standards, equipment specifications, regulations, codes of practice and operation manuals.

## PUAPRS205 Manage marketing requirements

### Modification History

**Release 1.** This is the first release of this unit of competency in the Public Safety Training Package.

### Application

This unit of competency involves the skills and knowledge required to conduct and manage marketing activities. It includes evaluating markets and organisational capacity for service, developing marketing strategies and plans and implementing and monitoring marketing strategies.

The unit is applicable to personnel undertaking marketing activities linked specifically to organisational entrepreneurial activities.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

### Pre-requisite Unit

Not applicable

### Competency Field

Marketing

### Unit Sector

Public Safety

### Elements and Performance Criteria

#### ELEMENTS

Elements describe the essential outcomes.

#### **1 Evaluate markets and organisational capacity**

#### PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

- 1.1** Markets for existing or new services and products are identified, researched and analysed for possible entry and/or development
- 1.2** An audit of existing service capacities is undertaken to

- identify scope for increased service provision
- 1.3** Preferred business profile is identified from business plans and other organisational documentation
  - 1.4** Economic, community, environmental and political trends are assessed for relevance against organisational profile
- 2 Develop marketing strategies and plans**
- 2.1** Alternative marketing strategies for the organisation are identified and compared with existing strategies
  - 2.2** Services and markets for the organisation are clearly identified, in accordance with organisational procedures
  - 2.3** Marketing strategies incorporate suitable advice from marketing professionals, as required
  - 2.4** Marketing service organisations are identified, and their services are accessed, as required
  - 2.5** Cost effective marketing plans and pricing strategies are developed, in accordance with organisational procedures
  - 2.6** Proposed service and/or product marketing plan is tested to verify demand, strategies, cost and ability to deliver, in accordance with organisational procedures and guidelines
- 3 Implement marketing strategies**
- 3.1** Suitable advertising and other promotional strategies are evaluated for cost effectiveness
  - 3.2** Plans, schedules and targets are set for the introduction of new or improved strategies
  - 3.3** Organisational marketing strategy and the roles and responsibilities within it are communicated to relevant personnel
  - 3.4** Plans are developed to take into account the nature of the target client's business and seasonal cycles
  - 3.5** Measures are taken to educate clients in value added services provided by the organisation
  - 3.6** Implementation of marketing strategy is directed towards achieving planned outcomes
- 4 Monitor marketing strategy**
- 4.1** Evaluation criteria to assess effectiveness of marketing is established, in accordance with organisational

procedures

- 4.2 Records of performance against evaluation criteria are kept
- 4.3 Marketing strategy is adjusted in response to monitoring of performance

## Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

## Unit Mapping Information

This unit replaces and is equivalent to PUAPRS20529B Manage marketing requirements.

# Assessment Requirements for PUAPRS205 Manage marketing requirements

## Modification History

**Release 1.** This is the first release of this unit of competency in the Public Safety Training Package.

## Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and includes

- communicating information
- comparing alternative marketing strategies with existing strategies
- developing and evaluating strategies, plans and advertising for cost effectiveness
- developing, implementing and evaluating marketing strategies and plans
- following organisational policies and procedures
- incorporating advice into marketing strategies
- maintaining records
- monitoring marketing strategies including establishing and documenting evaluation criteria, measuring performance against the evaluation criteria and adjusting the marketing strategy
- researching and assessing external trends for relevance to organisational profile
- researching, analysing and evaluating markets to determine organisational capacity for service
- setting schedules and targets for the introduction of new or improved strategies

## Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria and includes knowledge of

- advertising strategies
- communication techniques
- community, environment and political trends
- external marketing services
- key parts of marketing strategies
- market strategy evaluation criteria
- marketing plans, principles, schedules and strategies
- organisational documentation, policies and procedures
- organisational service capacities
- range of promotional strategies
- target client's business and seasonal cycles

- types of marketing
- value added services provided by organisations

## Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Assessment must occur in workplace operational situations. Where this is not appropriate, assessment must occur in industry-approved simulated workplace operational situations that reflect workplace conditions.

Competency be demonstrated in the development, implementation and evaluation of a marketing strategy and the knowledge of a range of marketing strategies.

Resources for assessment must include access to

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, equipment, tools and personal protective clothing and equipment currently used in industry
- applicable documentation including organisational procedures, industry standards, equipment specifications, regulations, codes of practice and operation manuals.

# PUASAR001 Perform land based swiftwater and floodwater rescue and recovery

## Modification History

**Release 1.** This is the first release of this unit of competency in the PUA Public Safety Training Package.

## Application

This unit of competency involves the skills and knowledge required to perform land based swiftwater and floodwater rescues and recoveries as a member of a specialist team.

Swiftwater and floodwater recovery involves the rescue of persons from fast moving water in areas such as stormwater drains, canals, rivers and/or creeks. It involves the use of a variety of rescue techniques with suitably equipped responders entering the water.

The unit is applicable to personnel who may perform a narrow range of land based rescues from a swiftwater and/or floodwater environment while working under direct supervision.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Pre-requisite Unit

HLTAID003 Provide first aid

## Competency Field

Search and Rescue

## Unit Sector

Not applicable

## Elements and Performance Criteria

### ELEMENTS

Elements describe the essential outcomes.

#### **1 Prepare and respond to the rescue**

### PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

#### **1.1 Operation and task information is obtained from communication centre or supervisor**

- 1.2 Rescue equipment and/or resources are identified and selected based on incident information, as directed by supervisor
    - 1.3 Personal protective clothing and equipment is selected based on nature of the rescue operation
    - 1.4 Any further details on the nature of the rescue received en route is assessed with rescue team members
    - 1.5 Anticipated situational and environmental hazards are discussed with rescue team members whilst on approach
- 2 Participate in assessing the rescue scene**
  - 2.1 Information is collected from relevant persons at the scene and observations are made to determine the location, number and condition of trapped casualties
  - 2.2 Situational and environmental hazards are identified and reported to supervisor
  - 2.3 Risk control procedures are implemented, as directed by supervisor
  - 2.4 Based on assessment of rescue scene personal capabilities and limitations are recognised and referred to supervisor
  - 2.5 Defensive and aggressive swimming techniques are used for self-rescue in event of accidental entry into swiftwater or floodwater
  - 2.6 Need for additional personnel and/or specialist equipment is reported through the chain of command
  - 2.7 Communication with other team members is maintained using appropriate techniques and terminology
- 3 Participate in developing primary and secondary rescue plans**
  - 3.1 Rescue and recovery techniques suitable for casualties and vehicles in swiftwater and floodwater conditions are identified
  - 3.2 Primary and secondary rescue plans are formulated, in consultation with other team members and other organisations/agencies on site and is communicated to relevant personnel
  - 3.3 Equipment and resources required to perform land based rescues and recoveries in swiftwater and floodwater are identified and selected, in accordance with the rescue

|                                                         |            |                                                                                                                                                      |
|---------------------------------------------------------|------------|------------------------------------------------------------------------------------------------------------------------------------------------------|
|                                                         |            | plan                                                                                                                                                 |
|                                                         | <b>3.4</b> | Deployment of the secondary rescue plan downstream is implemented                                                                                    |
| <b>4 Gain access and perform rescue on casualty</b>     | <b>4.1</b> | Isolation techniques are used to stabilise positioning of casualty to assist in extrication                                                          |
|                                                         | <b>4.2</b> | Land based rescue techniques and equipment are deployed, as identified in the rescue plan, to gain access to the casualty                            |
|                                                         | <b>4.3</b> | Casualty is extricated and or secured using appropriate rescue techniques and equipment                                                              |
| <b>5 Remove casualty from swiftwater and floodwater</b> | <b>5.1</b> | Casualties are retrieved from swiftwater and floodwater using recognised techniques for removal, in accordance with organisational procedures        |
|                                                         | <b>5.2</b> | Casualties are packaged and handled, in accordance with organisational emergency care procedures, or as directed by first aid or medical personnel   |
| <b>6 Conclude swiftwater and floodwater rescue</b>      | <b>6.1</b> | Prior to leaving scene equipment is recovered, cleaned and maintained, in accordance with organisational procedures and manufacturers' guidelines    |
|                                                         | <b>6.2</b> | During cleaning of rescue equipment and personal protective equipment hygiene precautions are followed, in accordance with organisational procedures |
|                                                         | <b>6.3</b> | Signs and symptoms of operational stress in self and others are recognised and reported to appropriate personnel                                     |
|                                                         | <b>6.4</b> | Operational debriefing is participated in and documentation is completed, in accordance with organisational procedures and standards                 |

## Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work

environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

recognised techniques for removal must include

- manual carry
- spine board
- stretcher

## Unit Mapping Information

This unit replaces and is equivalent to PUASAR033 Perform land based swiftwater and floodwater rescue and recovery.

## Links

PUA Training Package Companion Volume Implementation Guide is found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=3eca5672-6d5a-410b-8942-810d0ba05bbf>

# Assessment Requirements for PUASAR001 Perform land based swiftwater and floodwater rescue and recovery

## Modification History

**Release 1.** This is the first release of this unit of competency in the PUA Public Safety Training Package.

## Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements, performance criteria and range of conditions on at least one occasion and includes

- adapting to problems or issues that may arise during a swiftwater floodwater rescue and recovery to ensure safety of self and the team
- applying Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) requirements
- assessing rescue scene
- communicating with other members of the rescue team, organisation and casualty
- completing documentation
- concluding swiftwater and floodwater rescue
- determining rescue and recovery methods and isolation techniques including using yell or talk and reach and throw strategies
- developing primary and secondary rescue plans
- gaining access and performing casualty rescue
- identifying and selecting rescue equipment and resources
- identifying changes in casualty condition and position
- identifying changes in water flow, currents, eddies and other hydrological features
- identifying suitable rescue and recovery techniques including reach rescue, throwing bag rescue and yelling to give safety or rescue directions
- packaging and handling casualties
- preparing and responding to a swiftwater and floodwater rescue
- providing basic first aid
- removing casualty from swiftwater and floodwater using recognised removal techniques
- selecting and using personal protective clothing and equipment
- selecting and using rescue equipment and resources in a variety of swiftwater and floodwater rescue and recovery situations
- swimming defensively and aggressively
- taking part in operational briefings and contributing to debriefings
- throwing rescue equipment to a swimmer in swiftwater and/or floodwater
- using equipment to reach a swimmer in swiftwater or flood water

## Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements, performance criteria range of conditions and includes knowledge of

- aggressive and defensive swimming techniques to escape hazards
- behaviour of vehicles trapped in swiftwater and floodwater
- care and maintenance of rescue equipment
- causality and/or patient packaging and handling
- communication and isolation techniques
- equipment characteristics and limitations
- facility emergency response plan
- first aid or medical personnel
- hazards and risks associated with land based swiftwater and floodwater rescues and recoveries including situational and environmental hazards
- knots and anchors
- operational briefing and debriefing procedures and processes
- organisational documentation, policies and procedures
- other organisations agencies and persons
- personal protective clothing and equipment
- principles of dynamic risk assessment
- psychological considerations of swiftwater and floodwater rescues and the potential need for support resources for the rescuer, casualty and onlookers
- rescue and recovery techniques including reach rescue, throwing bag rescue and yelling to give safety or rescue directions
- rescue equipment and resources
- roles and responsibilities of rescue team members
- situational and environmental hazards
- swiftwater and floodwater entrapment
- swiftwater and floodwater hydrology and impact of weather on water flow
- techniques for removal
- water contaminants and their potential impact on the rescuer and casualty
- Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) requirements including risk mitigation

## Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, equipment, tools and personal protective clothing and equipment currently used in industry including
  - personnel for team based rescues
  - rescue, recovery, safety, first aid and activity specific equipment and resources
  - simulated swiftwater and floodwater location
- applicable documentation including organisational procedures, industry standards, equipment specifications, regulations, codes of practice and operations manuals.

# PUASAR002 Undertake swiftwater and floodwater rescue and recovery

## Modification History

**Release 1.** This is the first release of this unit of competency in the PUA Public Safety Training Package.

## Application

This unit of competency involves the skills and knowledge required to undertake swiftwater and floodwater rescues and recoveries as a member of a specialist team.

Swiftwater and floodwater recovery involves the rescue of persons from fast moving water in areas such as stormwater drains, canals, rivers and/or creeks. It involves the use of a variety of rescue techniques with suitably equipped and responders entering the water.

The unit applies to personnel who are skilled operators who may be required to use a range of rescue techniques within a swiftwater and floodwater environment. They may provide technical advice and support to a team and may adopt a leadership role during a rescue. A person operating at this level will not be performing under direct supervision.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Pre-requisite Unit

PUASAR001 Perform land based swiftwater and floodwater rescue and recovery

## Competency Field

Search and Rescue

## Unit Sector

Not applicable

## Elements and Performance Criteria

### ELEMENTS

Elements describe the essential outcomes.

### PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

- |                                                     |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |

- and recoveries, as identified in the rescue plan
- 3.4 Roles and equipment are allocated to other team members, in accordance with organisational procedures
  - 3.5 In conjunction with the primary plan deployment of secondary rescue plan downstream is implemented
- 4 Use rope and mechanical advantage systems**
- 4.1 Rescue and recovery situations requiring the use of rope and mechanical advantage systems are identified
  - 4.2 Suitable rope and mechanical advantage systems are established to perform rescue and recovery
  - 4.3 Rope and mechanical advantage system equipment is used, in accordance with organisational policies and procedures and manufacturers' recommendations, to ensure design limits are not exceeded
  - 4.4 Rope and mechanical advantage system is modified to increase efficiency, where necessary, while maintaining communication with team members
- 5 Gain access and perform casualty rescue**
- 5.1 Defensive and aggressive swimming techniques are used to gain access to casualty when water entry is required, in accordance with organisational procedures
  - 5.2 Isolation techniques are used to stabilise positioning of casualty and vehicle to assist in extrication
  - 5.3 Craft is tethered to perform a rescue or recovery, as required, in accordance with the rescue plan
  - 5.4 Rescue plan is implemented and trapped casualty is extricated or secured using appropriate rescue and recovery techniques and equipment
- 6 Remove casualty from swiftwater and floodwater**
- 6.1 Casualty is retrieved from swiftwater and floodwater using techniques for removal, in accordance with organisational policies and procedures
  - 6.2 Casualty is packaged and handled, in accordance with organisational emergency care procedures or as directed by first aid or medical personnel
- 7 Conclude swiftwater and floodwater rescue**
- 7.1 Prior to leaving the scene equipment is recovered, cleaned and maintained, in accordance with organisational procedures and manufacturers' guidelines
  - 7.2 During cleaning of rescue equipment and personal

protective equipment, hygiene precautions are followed, in accordance with organisational procedures

- 7.3 Signs and symptoms of operational stress in self and others is recognised and reported to appropriate personnel
- 7.4 Operational debriefing is participated in or conducted, in accordance with organisational procedures
- 7.5 Documentation is completed, in accordance with organisational procedures

## Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

## Unit Mapping Information

This unit replaces and is equivalent to PUASAR034 Undertake swiftwater and floodwater rescue and recovery.

## Links

PUA Training Package Companion Volume Implementation Guide is found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=3eca5672-6d5a-410b-8942-810d0ba05bbf>

# Assessment Requirements for PUASAR002 Undertake swiftwater and floodwater rescue and recovery

## Modification History

**Release 1.** This is the first release of this unit of competency in the PUA Public Safety Training Package.

## Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and includes

- anticipating, identifying and mitigating hazards and risks
- applying basic first aid
- applying wading, aggressive, manoeuvring and defensive swimming techniques to escape hazards
- applying Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) requirements
- assessing a rescue scene
- completing documentation
- concluding swiftwater and floodwater rescue
- constructing and using rope and mechanical advantage systems
- developing primary and secondary rescue plans
- extricating a casualty from entrapment including alternate entries, controlled release or immediate release
- gaining access and performing casualty rescue
- handling and packaging casualties
- handling and tethering non-powered boat/craft safely
- identifying and selecting equipment and resources based on incident information
- identifying changes in water flow, currents, eddies and other hydrological features, and operating in a range of conditions
- identifying suitable rescue and recovery techniques
- implementing isolation techniques
- implementing organisational policies and procedures relating to swiftwater and floodwater rescues and recoveries
- implementing search techniques and management procedures using wading techniques
- informing appropriate personnel of progress
- interacting with other members of the rescue team and casualties
- packaging and handling a casualty
- preparing and responding to swiftwater and floodwater rescues
- recognising and identifying changes in casualty condition and position

- removing casualty from swiftwater and floodwater using recognised extrication techniques, including manual handling, stretcher and packaging
- selecting and using personal protective clothing and equipment based on nature of rescue operation
- selecting swiftwater and floodwater rescue and recovery equipment and resources
- swimming aggressively and defensively
- taking part in operational briefings and contributing to debriefings
- tethering craft
- using communication techniques including hand signals, radio, whistle, talking and yelling
- using knots, anchors and mechanical advantage systems to conduct rescues or recoveries
- using removal techniques including manual carry and stretcher
- utilising rescue techniques for entrapment and/or vehicle rescue from swiftwater or floodwater
- working as part of a team and supporting others in a rescue operation

## Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria and includes knowledge of

- behaviour and vehicles trapped in swiftwater and floodwater
- characteristics and limitations of rescue and recovery equipment including its care and maintenance
- communication methods and techniques
- environmental considerations based on whether operating in an urban or rural context
- facility emergency response plan
- first aid or medical personnel on scene
- hazards and risks associated with rescues and recoveries from swiftwater and floodwater
- isolation techniques
- mechanical advantage systems
- operational briefing and debriefing processes
- organisational documentation, policies and procedures
- other organisations, agencies and personnel
- personal protective clothing and equipment
- principles of risk assessment including hierarchy of control and risk control methods
- psychological considerations of swiftwater and floodwater rescue and the potential need for support resources for the rescuer, casualty and onlookers
- rescue and recovery techniques
- rescue equipment and resources
- roles and responsibilities of team members
- signs and symptoms of operational stress
- situational and environmental hazards
- suitability and operation of water based crafts

- swiftwater and floodwater hydrology and impact of weather on water flow
- types of entrapment
- water contaminants and their potential impact on rescuer and casualties
- Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) requirements

## Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in organisationally approved simulated operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, equipment, tools and personal protective clothing and equipment used in industry including
  - personnel for team based rescues
  - rescue, recovery, safety, first aid and activity specific equipment and resources
  - simulated swiftwater and floodwater location
- applicable documentation including organisational procedures, industry standards, equipment specifications, regulations, codes of practice and operations manuals.

# PUASAR003 Develop plans for deployment of a USAR team

## Modification History

**Release 1.** This is the first release of this unit of competency in the Public Safety Training Package.

## Application

This unit of competency involves the skills and knowledge required to prepare and develop Urban Search and Rescue (USAR) team plans for the deployment of a USAR team. It includes analysing operational requirements arising from an incident and determining requisite team capabilities needed by the team prior to deployment.

The unit is applicable to personnel within the incident management team with responsibility for the development of deployment plans for a USAR team. Compliance with legislative or regulatory requirements of Australian jurisdictions or the host country may be required. The authorisation to perform this role is subject to organisational policies and procedures.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Pre-requisite Unit

PUACOM007 Liaise with other organisations  
PUACOM012 Liaise with media at a local level  
PUAEMR002 Assess emergency risk  
PUAMAN007 Manage financial resources  
PUAOPE015 Conduct briefings and debriefings

## Competency Field

Search and Rescue

## Unit Sector

Not applicable

## Elements and Performance Criteria

### ELEMENTS

### PERFORMANCE CRITERIA

Elements describe the essential    Performance criteria describe the performance needed to

outcomes.

demonstrate achievement of the element.

**1 Prepare USAR team for mobilisation**

- 1.1** Request for support is received and team leader is briefed by relevant personnel with roles and responsibilities confirmed
- 1.2** Organisations and/or agencies involved in the emergency incident are confirmed and liaison arrangements established, as required
- 1.3** Transport, welfare, communication and mobilisation plans are prepared and documented for USAR team deployment, in accordance with the emergency management arrangements and the policies and procedures of the state, territory or country requesting assistance
- 1.4** Risk management processes are utilised when developing transport, welfare and mobilisation plans
- 1.5** USAR team resources are organised and recorded in accordance with asset management principles and procedures used by the organisation
- 1.6** Reception and departure centre establishment plans are developed for receiving incoming emergency response teams, in accordance with organisational procedures
- 1.7** Financial considerations when deploying a USAR team are factored into the planning for mobilisation and deployment of resources
- 1.8** Reports and summaries are maintained, in accordance with organisational procedures
- 1.9** Deployment notification processes are implemented, in accordance with the policies and procedures of the state, territory or country requesting USAR team
- 1.10** USAR team briefing is conducted using Situation, Mission, Execution, Administration/logistics, Command/control and Safety (SMEACS) format

**2 Establish arrangements for mobilisation of USAR team**

- 2.1** Reception and departure centre is established and incoming emergency response teams are processed and briefing paper for incoming team is prepared
- 2.2** USAR team reconnaissance and forward deployment capabilities are confirmed, in accordance with agreed

|                                                                  |            |                                                                                                                              |

# Assessment Requirements for PUASAR003 Develop plans for deployment of a USAR team

## Modification History

**Release 1.** This is the first release of this unit of competency in the Public Safety Training Package.

## Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and includes

- applying Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) requirements including risk management processes
- assessing requests for assistance and preparing USAR team capability and resources
- completing USAR team administration information
- creating reception and departure centre including central point for cross border processes, liaison point for incoming USAR teams and logistical supply point for incoming teams
- delegating tasks including roles and responsibilities
- developing plans to support USAR team ongoing arrangements
- establishing arrangements for mobilisation of a USAR team
- implementing plans including commutation, demobilisation, deployment, evacuation, media, mobilisation, transport of USAR team resources and welfare plan arrangements
- implementing risk management processes to planning
- leading and managing personnel
- liaising with media
- managing budgets and finances
- preparing and documenting communication, demobilisation, evacuation, mobilisation, transport and welfare plans
- preparing briefing paper for incoming teams using Situation, Mission, Execution, Administration/Logistics, Command/Signal and Safety (SMEACS)
- preparing USAR team for mobilisation
- preparing, implementing, communicating and managing media plan
- supporting emergency response teams

## Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria and includes knowledge of

- asset management principles
- Australian Inter-service Incident Management System (AIIMS) and New Zealand

### Coordinated incident Management System (CIMS)

- communication plan
- demobilisation plan including decontamination, disposal, donation and rehabilitation of cache post operations, logistics planning, notification and transport arrangements
- deployment notification processes including notification method and processes as applied within the state, territory or nation and utilisation of preplanning information regarding personnel availability
- emergency management arrangements, policies and procedures including facility emergency response plan
- evacuation plan including emergency and medical evacuation
- financial considerations when deploying a USAR team
- legislation, regulations and codes of practice
- media plan including briefing notes, point of contact for media, policy for media engagement and talking points
- organisational documentation, policies and procedures
- organisations and/or agencies involved in emergency incident
- other organisations, agencies and personnel that may be used
- planning processes
- plans for transport, welfare and mobilisation
- procedures for establishing a reception and departure centre for incoming emergency response teams
- processes for emergency response teams
- purpose of reconnaissance
- requests for support
- roles and responsibilities of USAR management team members including
  - coordination and allocation of resources under their supervision
  - implementing their portion of the incident action plan
  - maintaining effective two-way information flows within the incident control structure
  - reporting on incident situation, the progress of operations, emerging risks and the status of resources
- types of briefings and debriefings including use of Situation, Mission, Execution, Administration/logistics, Command/control and Safety (SMEACS)
- Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) requirements including risk management principles and processes

## Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, equipment, tools and personal protective clothing and equipment currently used in industry including
  - personnel for team based rescues
  - rescue, recovery, safety, first aid and activity specific equipment and resources
  - simulated swiftwater and floodwater location
- applicable documentation including organisational procedures, industry standards, equipment specifications, regulations, codes of practice and operations manuals.

## PUASAR004 Implement and monitor USAR operation plans

### Modification History

**Release 1.** This is the first release of this unit of competency in the PUA Public Safety Training Package.

### Application

This unit of competency involves the skills and knowledge required to establish and manage operational priorities for a deployed Urban Search and Rescue (USAR) team. USAR team leaders implement and monitor operational plans developed for the USAR team.

The unit is applicable to personnel performing roles within USAR management teams who are responsible for implementing and monitoring USAR operations plans. Compliance with legislative or regulatory requirements of Australian jurisdictions or the host country may be required. Authorisation to perform this role is subject to organisational policies and procedures.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

### Pre-requisite Unit

PUASAR003 Develop plans for deployment of a USAR team

### Competency Field

Search and Rescue

### Unit Sector

Not applicable

### Elements and Performance Criteria

#### ELEMENTS

Elements describe the essential outcomes.

#### **1 Interpret results of structural triage from area of operations**

#### PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

#### **1.1 USAR team is briefed on operations portion of the Incident Action Plan (IAP) using Situation, Mission, Execution, Administration/logistics, Command/control and Safety (SMEACS) format**

- |                                                  |            |                                                                                                                                                                |
|--------------------------------------------------|------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                                                  | <b>1.2</b> | Results of structural triage are analysed and resources are assigned to the area of operations                                                                 |
| <b>2 Establish and manage base of operations</b> | <b>2.1</b> | Location for base of operations is confirmed, in accordance with Urban Search and Rescue (USAR) team requirements                                              |
|                                                  | <b>2.2</b> | Base of operations is established; base camp manager is appointed and arrangements are communicated to appropriate personnel                                   |
|                                                  | <b>2.3</b> | Resources for base of operations are acquired and allocated, as required, and tasks are delegated to appropriate personnel                                     |
|                                                  | <b>2.4</b> | Base of operations and resources are managed, in accordance with organisational procedures                                                                     |
|                                                  | <b>2.5</b> | Security arrangements, fire protection and evacuation arrangements are identified and communicated to USAR team                                                |
|                                                  | <b>2.6</b> | Personnel working within base of operations are briefed on key responsibilities and operational priorities, including accountabilities                         |
| <b>3 Manage deployed USAR team</b>               | <b>3.1</b> | USAR team communication and welfare plans are disseminated to relevant personnel and are implemented and monitored                                             |
|                                                  | <b>3.2</b> | USAR team personnel are tasked with collecting and recording of operational information                                                                        |
|                                                  | <b>3.3</b> | Internal and external reporting arrangements for the USAR team are established and information flow is monitored to ensure it is accurate, timely and relevant |
|                                                  | <b>3.4</b> | Information management systems are utilised to maintain operational data and records                                                                           |
|                                                  | <b>3.5</b> | Media requests are managed, in accordance with the media plan and, where required, a media liaison officer is appointed                                        |
|                                                  | <b>3.6</b> | USAR team logistics is managed through the appointment of a logistics officer with delegated financial responsibilities                                        |
|                                                  | <b>3.7</b> | Financial expenditure for the deployed team is managed                                                                                                         |

- and appropriate financial control measures are implemented
- 4 Manage implementation of and monitor USAR operations portion of IAP**
- 3.8** Liaison arrangements are managed, through the appointment of a liaison officer, as required
  - 4.1** Preparation of the USAR operations portion of the IAP is managed, in accordance with organisational requirements
  - 4.2** Implementation of the USAR operations portion of the IAP is managed, in accordance with organisational requirements and for consistency with the approved IAP
  - 4.3** Plan and actions to ensure the safety, health and welfare of USAR team members at an incident are communicated to relevant personnel and are implemented and monitored
  - 4.4** Identified risks are mitigated within the scope of USAR operations and safe work practices are monitored and adhered to
  - 4.5** Ongoing liaison is maintained with supervisor about incident situation, process towards achievement of allocated tasks, IAP modifications, additional resources requirements and significant events occurring
  - 4.6** Ongoing liaison is maintained with USAR team regarding work progress, resource status, needs, location and any significant changes or emerging risks
  - 4.7** Regular and timely reports are prepared and distributed to relevant personnel
  - 4.8** Activities with adjacent areas of operation are coordinated, in accordance with organisational procedures
  - 4.9** Log of activities and decisions is kept and maintained throughout deployment
- 5 Reassign USAR rescuers**
- 5.1** Resources are reassigned to different worksites or teams, in accordance with emergency management arrangements
  - 5.2** Reconnaissance deployment briefing is conducted for reassigned rescue personnel

|                                           |            |                                                                                                                        |
|-------------------------------------------|------------|------------------------------------------------------------------------------------------------------------------------|
|                                           | <b>5.3</b> | Reassigned rescue personnel are deployed and reconnaissance operations are supervised and managed                      |
| <b>6 Demobilise or evacuate USAR team</b> | <b>6.1</b> | USAR team demobilisation plan is communicated to relevant personnel, implemented and monitored                         |
|                                           | <b>6.2</b> | Disposal, donation and decontamination of equipment and resources is implemented, in accordance with the approved plan |
|                                           | <b>6.3</b> | USAR team evacuation plan is implemented, as required, in conjunction with mobilisation preplanning processes          |

## Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

## Unit Mapping Information

This unit replaces and is equivalent to PUASAR036 Implement and monitor USAR task force plans.

## Links

PUA Training Package Companion Volume Implementation Guide is found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=3eca5672-6d5a-410b-8942-810d0ba05bbf>

# Assessment Requirements for PUASAR004 Implement and monitor USAR operation plans

## Modification History

**Release 1.** This is the first release of this unit of competency in the PUA Public Safety Training Package.

## Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and includes

- analysing risk assessment, reconnaissance and intelligence to determine operational priorities
- applying Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) requirements
- conducting and participating in briefings using Situation, Mission, Execution, Administration/logistics, Command/control and Safety (SMEACS) format
- delegating roles and responsibilities within the team
- delivering briefings on operations portion of the incident action plan
- demobilising or evacuating Urban Search and Rescue (USAR) teams
- establishing and managing base of operations
- implementing and monitoring plans to support USAR operations
- interpreting results of structural triage from area of operations
- leading and managing USAR teams and personnel including those deployed
- making presentations including specifically to the media
- managing implementation and monitoring of USAR operations portion of the IAP
- managing liaison arrangements including with key stakeholders
- managing logistics
- reassigning rescuers to other worksites
- reporting on operations progress
- utilising information management systems
- working with competing priorities including work load and time

## Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria and includes knowledge of

- communication plan including internal and external communication networks
- fire protection and evacuation plan including assembly areas, emergency signals and fire protection
- information management systems and storage processes used in USAR operations including

- equipment and sufficient redundancy
- legislation, industry standards and codes of practice
- location of base of operations and its functions and requirements
- media plan
- organisational documentation, policies and procedures including facility emergency response plans
- processes for briefings and debriefings including use of SMEACS
- purpose and content of incident action plans
- purpose of plans prepared to support and direct USAR teams
- reception and departure centre resources and requirements
- resources for base of operations including documentation, equipment and self-sustainability cache
- risk management principles and processes
- roles and responsibilities of USAR team personnel
- structural triage principles including composition of triage teams, detailed triage assessment of allocated structures, initial triage at incident site, hazard identification and priorities of a triage team
- structural triage processes including establishment of operational priorities, preparation of triage documentation and re-evaluation of structures as situation changes
- team demobilisation plan
- team evacuation plan including key considerations if emergency evacuation is required, medical evacuation of a team member, role of team leader and security
- team logistics including transportation and self-sustainability cache management
- welfare plan
- Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) legislated requirements

## Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in organisationally approved simulated operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, equipment, tools and personal protective clothing and

equipment used in industry including

- information sources including emergency management arrangements and international guidelines
- sample USAR task force plans
- applicable documentation including organisational procedures, industry standards, equipment specifications, regulations, codes of practices and operations manuals.

# PUASAR005 Review USAR team plans implemented at an incident

## Modification History

**Release 1.** This is the first release of this unit of competency in the PUA Public Safety Training Package.

## Application

This unit of competency involves the skills and knowledge required to review the implementation of Urban Search and Rescue (USAR) team plans and to assess their effectiveness in achieving incident objectives and the needs of the USAR team.

The unit is applicable to personnel performing in the role of USAR team leader who will be required to perform reviews of team plan implementation. Authorisation to perform this role is subject to organisational policies and procedures.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Pre-requisite Unit

PUASAR003 Develop plans for deployment of a USAR team

PUASAR004 Implement and monitor USAR team plans

## Competency Field

Search and Rescue

## Unit Sector

Not applicable

## Elements and Performance Criteria

### ELEMENTS

Elements describe the essential outcomes.

- 1 Confirm arrangements for conducting a post operations review of**

### PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

- 1.1** Roles and responsibilities of Urban Search and Rescue (USAR) team personnel involved in review of team

|                                                            |            |                                                                                                                                                    |
|------------------------------------------------------------|------------|----------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>USAR incident</b>                                       |            | plans and operations are determined and delegated                                                                                                  |
|                                                            | <b>1.2</b> | Other organisation or agency personnel involved in the conduct of the post operations review are confirmed                                         |
|                                                            | <b>1.3</b> | Information required for post operations review is identified, sought and received                                                                 |
| <b>2 Review mobilisation</b>                               | <b>2.1</b> | Mobilisation process is received against objectives of the mobilisation plan                                                                       |
|                                                            | <b>2.2</b> | Effectiveness of mobilisation plan is assessed                                                                                                     |
| <b>3 Perform post operations review of USAR team plans</b> | <b>3.1</b> | USAR operations portion of incident action plan and other plans developed to support USAR team are reviewed                                        |
|                                                            | <b>3.2</b> | Post operations information is conveyed to personnel and is recorded promptly and accurately, in accordance with organisational procedures         |
|                                                            | <b>3.3</b> | Data collected during incident is provided to appropriate organisations, agencies and/or authorities to support recovery arrangements, as required |
|                                                            | <b>3.4</b> | Effectiveness of decontamination, disposal and donation of equipment are reviewed                                                                  |
| <b>4 Review demobilisation</b>                             | <b>4.1</b> | Demobilisation process is reviewed against objectives of demobilisation plan                                                                       |
|                                                            | <b>4.2</b> | Effectiveness of demobilisation plan is assessed                                                                                                   |
| <b>5 Complete required post incident reports</b>           | <b>5.1</b> | Information and reports including recommendations, are provided to other organisations and agencies, as required                                   |
|                                                            | <b>5.2</b> | Operational information from the incident is collected to provide a basis for performance reporting                                                |

## Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

# Assessment Requirements for PUASAR005 Review USAR team plans implemented at an incident

## Modification History

**Release 1.** This is the first release of this unit of competency in the Public Safety Training Package.

## Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and includes

- applying Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) requirements
- completing required post incident reports
- confirming arrangements for conducting post operations review of USAR incident
- delegating roles and responsibilities
- leading and managing personnel in review process
- liaising and working with other organisation and/or agency personnel
- making recommendations for improvements
- performing post operations review of USAR team plans, including USAR portion of the incident action plan
- reviewing mobilisation and demobilisation processes
- undertaking post operations review

## Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria and includes knowledge of

- demobilisation process including decontamination; disposal, donation and rehabilitation of cache post operations; logistics planning; notifications and transport arrangements
- legislative compliance
- mobilisation and demobilisation processes
- organisational documentation, policies and procedures
- other organisations, agencies and personnel
- post incident analyses
- post operational reviews
- purpose and processes required for conducting a post operational review
- risk management principles and processes
- types of plans implemented by USAR teams
- USAR team plans including operations portion of incident action plan

- Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) legislated requirements

## Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

# PUASAR011 Search as a member of an aquatic search team

## Modification History

**Release 1.** This is the first release of this unit of competency in the PUA Public Safety Training Package.

## Application

This unit of competency involves the skills and knowledge required to search for and locate missing persons and/or items as a member of an aquatic search team working in a range of search terrains.

While normally undertaken in variety of craft, aquatic searches may also include cliff searches and searches assisted by aerial support or other craft. Search operations are generally conducted in support of police and may include searches for missing persons, objects and/or evidence.

Participating in an aquatic search operation, generally as a member of a team, will require the application of a variety of skills. Competence in this unit will include appropriate preparedness, response, direct participation in a search and appropriate post search recovery.

The unit is applicable to lifesavers, lifeguards or other personnel who are required to perform or participate in a search, regularly or occasionally, in an aquatic environment. Successful achievement of this unit will require practical application of skills in a real or simulated search operation.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

|                                         | <b>1.4</b> Faulty equipment is identified and reported to supervisor                                                                              |
| <b>2 Participate in aquatic search</b>  | <b>2.1</b> Specified team roles and functions are carried out, in accordance with organisational procedures and task information                  |
|                                         | <b>2.2</b> Search formation or grids are used to locate missing persons or objects                                                                |
|                                         | <b>2.3</b> Search boundaries are marked, in accordance with task requirements                                                                     |
|                                         | <b>2.4</b> Observation skills are applied and any clues or objects located are reported immediately, in accordance with organisational procedures |
|                                         | <b>2.5</b> Communication is maintained with team members throughout the search, in accordance with organisational procedures                      |
|                                         | <b>2.6</b> Personal capabilities and limitations are recognised and referred to team leader                                                       |
| <b>3 Maintain aquatic search safety</b> | <b>3.1</b> Search safety procedures are implemented, in accordance with organisational procedures                                                 |
|                                         | <b>3.2</b> Survival techniques are applied, as required                                                                                           |
|                                         | <b>3.3</b> Lost searcher procedures are implemented, when necessary                                                                               |
| <b>4 Recover person or findings</b>     | <b>4.1</b> Team leader is immediately advised of located persons or findings, in accordance with organisational procedures                        |
|                                         | <b>4.2</b> Persons or findings are recovered and treated using appropriate search safety procedures                                               |

- |                                                    |            |                                                                                                                                   |
|----------------------------------------------------|------------|-----------------------------------------------------------------------------------------------------------------------------------|
|                                                    | <b>4.3</b> | Initial preservation procedures are implemented to maintain integrity of evidence, as required                                    |
|                                                    | <b>4.4</b> | Initial scene preservation is conducted, in accordance with organisational procedures                                             |
| <b>5 Complete recall and stand down procedures</b> | <b>5.1</b> | Search equipment is recovered, cleaned and maintained, in accordance with organisational procedures and manufacturers' guidelines |
|                                                    | <b>5.2</b> | Operational debriefing is participated in and relevant documentation is completed, in accordance with organisational procedures   |
|                                                    | <b>5.3</b> | Symptoms of operational stress in self or others is recognised and reported to relevant personnel                                 |

## Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

## Unit Mapping Information

This unit replaces and is equivalent to PUASAR011C Search as a member of an aquatic search team.

## Links

PUA Training Package Companion Volume Implementation Guide is found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=3eca5672-6d5a-410b-8942-810d0ba05bbf>

# Assessment Requirements for PUASAR011 Search as a member of an aquatic search team

## Modification History

**Release 1.** This is the first release of this unit of competency in the PUA Public Safety Training Package.

## Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and includes

- applying Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) requirements
- communicating with team members and casualties
- completing recall and stand down procedures
- complying with search orders
- dealing with clues and location of objects or casualties
- determining and maintaining search and task information
- finalising organisational documentation
- following organisational policies and procedures
- identifying and repairing or replacing faulty equipment, in accordance with organisational procedures
- identifying and reporting personal capabilities and limitations
- implementing lost searcher procedures
- maintaining aquatic search safety
- marking and spacing boundaries or grids
- observing situation and/or environment
- observing the safety of self and others during search
- participating in an aquatic search
- participating in operational briefing and debriefing sessions
- preparing for an aquatic search
- preserving rescue scene and recovering evidence
- recognising and reporting operational stress
- recovering missing persons and/or findings
- using personal protective clothing and equipment
- utilising survival techniques
- working in a team

## Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria and includes knowledge of

- aquatic search
- communication techniques including hand signals and language style
- composition of teams including roles and responsibilities and duty of care responsibilities
- hazards and environmental threats
- lost searcher procedures
- map reading
- object recovery procedures
- operating procedures relevant to terrain and conditions
- organisational documentation, policies and procedures
- preservation of a crime scene and evidence
- processes for briefings and debriefings
- recall procedures
- search equipment
- search formations and grids
- signs and symptoms of operational stress including post traumatic stress disorder
- state, territory and Commonwealth search management arrangements
- survival techniques
- task information
- Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) legislative requirements including risk mitigation

## Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to

- a range of relevant exercises, case studies and/or simulations including
  - an extended day/night activity during which a variety of searches for persons and objects are undertaken

- relevant and appropriate materials, equipment, tools and personal protective clothing and equipment currently used in industry including
  - an appropriate environment to conduct search operation
  - relevant agencies in the operation such as police, helicopter rescue, marine search and rescue and other aquatic organisations
- applicable documentation including organisational procedures, industry standards, equipment specifications, regulations, codes of practice and operations manuals.

# PUASAR012 Apply surf awareness and self-rescue skills

## Modification History

**Release 1.** This is the first release of this unit of competency in the PUA Public Safety Training Package.

## Application

This unit of competency involves the skills and knowledge required for surf awareness, self-rescue techniques and safely participating in activities in a surf environment.

Participating in any potentially hazardous aquatic operation will require the effective application of a variety of surf skills and self-rescue techniques. Competence in this unit will include appropriate application of surf awareness surf skills and self-rescue techniques in a surf environment and will require the practical and effective application of skills in a real or simulated activity in a surf environment.

The unit is applicable to lifesavers, lifeguards, search and rescue officers or other rescue personnel who are required to perform or participate in activities in a surf environment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Pre-requisite Unit

Not applicable.

## Competency Field

Search and Rescue

## Unit Sector

Not applicable

## Elements and Performance Criteria

### ELEMENTS

Elements describe the essential outcomes.

#### **1 Apply knowledge of the surf environment**

### PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

#### **1.1** Potential hazards and environmental conditions of the surf environment are identified, risks are assessed and

|                                           |                                                                                                        |
|-------------------------------------------|--------------------------------------------------------------------------------------------------------|
|                                           | control measures are implemented                                                                       |
|                                           | <b>1.2</b> Characteristics of different types of waves and their impact on surf safety are identified  |
|                                           | <b>1.3</b> Distinguishing features of rips, gutters and sweeps are identified                          |
|                                           | <b>1.4</b> Different types of beaches and the safety aspects of the beach structure are identified     |
| <b>2 Apply surf skills and techniques</b> | <b>2.1</b> Techniques for survival in the water are implemented                                        |
|                                           | <b>2.2</b> Personal safety is observed and environmental hazards are avoided while in the water        |
|                                           | <b>2.3</b> Hand and flag signals are used, in accordance with organisational procedures                |
| <b>3 Implement self-rescue techniques</b> | <b>3.1</b> Surf is negotiated in prevailing conditions, with and without flotation devices             |
|                                           | <b>3.2</b> Return to shore, in prevailing conditions, is undertaken with and without flotation devices |
|                                           | <b>3.3</b> Strategies when not able to self-rescue or return to shore unassisted are implemented       |

## Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

## Unit Mapping Information

# Assessment Requirements for PUASAR012 Apply surf awareness and self-rescue skills

## Modification History

**Release 1.** This is the first release of this unit of competency in the PUA Public Safety Training Package.

## Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and includes

- applying situational awareness of the surf environment, surf skills and techniques
- applying Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) requirements including implementing risk control measures
- completing risk assessments
- following organisational policies and procedures
- identifying hazards and environmental conditions
- identifying surf conditions and factors that affect these conditions
- implementing self-rescue techniques
- negotiating and returning through surf
- paddling surf craft and using rescue tube
- recognising potential hazards and environmental risks
- recognising types of beaches, waves and distinguishing features of rips, gutters and sweeps when selecting a suitable surf location
- swimming in the surf, in moderate conditions
- using personal safety techniques, recognised signals and survival techniques

## Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria and includes knowledge of

- effects of wind, tide, swell and ocean floor on surf conditions
- environmental conditions including prevailing conditions
- features and signs of rips, gutters, sweeps and currents
- hand and flag signals
- organisational documentation, policies and processes
- personal safety and situational awareness
- self-rescue techniques
- strategies to use when not able to self-rescue
- surf awareness including beach safety zones

- surf hazards including environmental hazards
- techniques for survival including surf survival techniques
- types of crafts including floatation devices
- types of waves and their characteristic features
- Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) requirements including risk mitigation

## Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to

- a range of relevant exercises, case studies and/or other simulations including
  - participating in lifesaving activities or in a simulated environment under a range of weather conditions
- relevant and appropriate materials, tools, equipment and personal protective clothing and equipment currently used in industry including
  - a beach with prevailing conditions appropriate to the level of activity
  - suitable surf craft and rescue tubes
- applicable documentation including organisational procedures, industry standards, equipment specifications, regulations, codes of practice and operations manuals.

# PUASAR013 Participate in an aquatic rescue operation

## Modification History

**Release 1.** This is the first release of this unit of competency in the PUA Public Safety Training Package.

## Application

This unit of competency involves the skills and knowledge required to participate in rescue operations as a member of an aquatic rescue team. Rescue operations may occur at inland rivers, lakes, dams, surf zones and oceans.

Participation in a rescue operation may involve working with personnel who are trained appropriately to treat casualties including members of the public, first aid officers, lifesavers, lifeguards, ambulance crew, doctors, nurses and paramedics.

The unit underpins specialist rescue operations and includes rescue preparedness, response, direct participation and appropriate post rescue recovery and is applicable to lifesavers, lifeguards or other rescue personnel who are required to perform or participate in rescues (regularly or occasionally) in an aquatic environment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Pre-requisite Unit

Not applicable.

## Competency Field

Search and Rescue

## Unit Sector

Not applicable

## Elements and Performance Criteria

### ELEMENTS

Elements describe the essential outcomes.

#### 1 Prepare and respond to

### PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

#### 1.1 Operation and task information is obtained and

|                                                    |                                                                                                                                                                  |
|----------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>rescue</b>                                      | discussed with team members                                                                                                                                      |
|                                                    | <b>1.2</b> Appropriate rescue equipment is identified and selected based on task information, as directed by supervisor                                          |
|                                                    | <b>1.3</b> Personal protective clothing and equipment is selected based on the nature of the rescue operation                                                    |
|                                                    | <b>1.4</b> Any further details of the nature of the rescue are received en route and acted on, in accordance with organisational procedures                      |
| <b>2 Participate in assessing the rescue scene</b> | <b>2.1</b> Hazards are identified and associated risks are assessed on approach to rescue scene                                                                  |
|                                                    | <b>2.2</b> Methods for minimising hazards are discussed and agreed to by team members                                                                            |
|                                                    | <b>2.3</b> Hazards and environmental conditions are minimised or controlled using risk mitigation processes, in accordance with organisational procedures        |
|                                                    | <b>2.4</b> Communication with other team members is maintained using appropriate techniques and terminology                                                      |
|                                                    | <b>2.5</b> Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) and security procedures are followed, in accordance with organisational procedures |
|                                                    | <b>2.6</b> Personal capabilities and limitations are recognised and referred to supervisor, as required, in accordance with organisational procedures            |
|                                                    | <b>2.7</b> Need for additional personnel and/or specialist equipment is reported to supervisor                                                                   |
|                                                    | <b>2.8</b> Casualties at scene are identified, reported to supervisor and action is taken, as directed                                                           |
| <b>3 Perform rescue</b>                            | <b>3.1</b> Access to incident and/or casualties is gained using techniques and equipment, in accordance with organisational procedures                           |
|                                                    | <b>3.2</b> Rescue procedures are conducted, in accordance with organisational procedures and supervisor's instructions                                           |
|                                                    | <b>3.3</b> Casualties are prepared for removal and/or extricated safely, in accordance with organisational procedures and supervisor's instructions              |

- |                                     |                                                                                                                                                                                                       |
|-------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>4 Conclude rescue operations</b> | <b>3.4</b> Hygiene precautions are implemented, in accordance with organisational requirements                                                                                                        |
|                                     | <b>4.1</b> Equipment is recovered, cleaned and maintained, in accordance with organisational procedures and manufacturers' guidelines and is restored appropriately to maintain operational readiness |
|                                     | <b>4.2</b> Signs and symptoms of operational stress in self and others is reported to relevant personnel                                                                                              |
|                                     | <b>4.3</b> Operational debriefing is participated in and documentation is completed, in accordance with organisational procedures                                                                     |

## Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

## Unit Mapping Information

This unit replaces and is equivalent to PUASAR013A Participate in an aquatic rescue operation.

PUA Training Package Companion Volume Implementation Guide is found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=3eca5672-6d5a-410b-8942-810d0ba05bbf>

# Assessment Requirements for PUASAR013 Participate in an aquatic rescue operation

## Modification History

**Release 1.** This is the first release of this unit of competency in the PUA Public Safety Training Package.

## Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and includes

- applying safe work practices in rescue operations
- applying Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) requirements including applying risk mitigation
- completing organisational documentation
- concluding rescue operations
- following organisational policies and procedures
- identifying, recording, preparing and extricating casualties
- implementing hygiene precautions and security procedures
- participating as a team member
- participating in assessing aquatic rescue scene
- participating in briefings and debriefings
- preparing and performing aquatic rescue
- recognising and reporting on signs of stress
- recovering, cleaning and maintaining equipment including reporting damaged equipment in accordance with organisational procedures
- responding and reacting to instructions in a safe and timely manner
- selecting and wearing personal protective clothing and equipment
- using appropriate communication techniques and terminology
- using rescue equipment
- working on a constantly moving platform

## Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria and includes knowledge of

- capabilities and limitations of rescue equipment
- casualty handling techniques
- communication techniques including hand signals
- environmental conditions and hazards

- hygiene precautions
- manual handling techniques
- nationally agreed hazard marking systems
- organisational documentation, policies and procedures including procedures for reporting injuries and accidents
- personal capabilities
- personal hygiene
- personal protective clothing and equipment
- rescue equipment
- rescue operations including surface search and clearance of casualties
- roles and responsibilities of team members
- safety precautions including situation awareness
- signs and symptoms of stress
- Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) requirements including risk mitigation

## Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Competency must be demonstrated in a range of rescue operations whilst on the job or in a simulated environment performed under a variety of weather conditions

Resources for assessment must include access to

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, equipment, tools and personal protective clothing and equipment used in industry including
  - access to rescue equipment and a suitable environment to conduct a range of rescue operations
- applicable documentation including organisational procedures, industry standards, equipment specifications, regulations, codes of practice and operations manuals.

# PUASAR014 Operate and maintain a small powercraft and motor for rescue operations

## Modification History

**Release 1.** This is the first release of this unit of competency in the Public Safety Training Package.

## Application

This unit of competency involves the skills and knowledge required to maintain and operate a small power craft and motor and to direct a crew during rescue operations. It includes a range of open water rescue situations using small boats.

The unit is applicable for personnel from emergency services, volunteer organisations and/or organisations where surveillance and rescue operations in open water is required.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Pre-requisite Unit

Not applicable

## Competency Field

Search and Rescue

## Unit Sector

Not applicable

## Elements and Performance Criteria

### ELEMENTS

Elements describe the essential outcomes.

#### 1 Prepare powercraft and motor for operations

### PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

- 1.1** Logbooks are reviewed for previous operational feedback and pre-use information is completed, in accordance with organisational procedures and requirements

- |                                                              |            |                                                                                                                                                                      |
|--------------------------------------------------------------|------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                                                              | <b>1.2</b> | Prelaunch check of motor and fuel cell is completed and they are installed on powercraft, in accordance with organisational procedures and manufacturers' guidelines |
|                                                              | <b>1.3</b> | Crew person is overseen in prelaunch checking of powercraft and ancillary equipment                                                                                  |
|                                                              | <b>1.4</b> | Personal protective clothing and equipment is stowed, as appropriate, in accordance with organisational procedures                                                   |
|                                                              | <b>1.5</b> | Two-way radio equipment is prepared for operational communications, in accordance with organisational procedures                                                     |
| <b>2 Transport powercraft to launch site</b>                 | <b>2.1</b> | Powercraft is transported to launch site with safe manual handling techniques used by crew and other support personnel                                               |
|                                                              | <b>2.2</b> | Powercraft is unloaded and positioned at water's edge ready for operational activities, in accordance with organisational procedures                                 |
|                                                              | <b>2.3</b> | Safety brief is completed with crew person and other team members, in accordance with organisational procedures                                                      |
| <b>3 Launch and operate powercraft through surf</b>          | <b>3.1</b> | Competence level of operator and crew person is reviewed in relation to surf conditions                                                                              |
|                                                              | <b>3.2</b> | Powercraft is lifted and dragged to water with crew person                                                                                                           |
|                                                              | <b>3.3</b> | Motor is started when appropriate and safe to do so                                                                                                                  |
|                                                              | <b>3.4</b> | Powercraft is boarded safely and a secure position is assumed                                                                                                        |
|                                                              | <b>3.5</b> | Crew person is instructed to enter craft, when appropriate, in accordance with organisational procedures and surf conditions                                         |
|                                                              | <b>3.6</b> | Instructions are communicated to crew person, as required                                                                                                            |
| <b>4 Maintain safe working environment for self and crew</b> | <b>4.1</b> | Powercraft is operated safely around bathing public, in accordance with organisational procedures and prevailing surf conditions                                     |

- 4.2 Safe distances from bathing public and hazards in the water are maintained, in accordance with organisational procedures
  - 4.3 Communication is maintained with shore and crew person
  - 4.4 Safe operational conditions of powercraft is maintained, in accordance with organisational procedures and prevailing surf conditions
  - 4.5 Emergency procedures are implemented, in accordance with organisational procedures
  - 4.6 Powercraft is safely manoeuvred without operational motor
- 5 **Perform rescue and operational task**
  - 5.1 Requests for assistance or tasks from supervisor are acknowledged, in accordance with organisational procedures
  - 5.2 Rescue or task information is communicated to crew person
  - 5.3 Operational tasks are safely performed, in accordance with organisational procedures
  - 5.4 Crew person is directed to retrieve casualty or object using appropriate retrieval techniques, in accordance with organisational procedures
- 6 **Return powercraft to shore safely**
  - 6.1 Safety and security of powercraft, operator, crew person and casualty or cargo for beaching is maintained
  - 6.2 Permission to return to shore is signalled, in accordance with organisational procedures
  - 6.3 Observation for hazards is maintained throughout rescue operation
  - 6.4 Powercraft is beached on shoreline with appropriate speed or direction
  - 6.5 Casualty or cargo is lifted from powercraft safely
  - 6.6 Safe position of craft is maintained, in accordance with organisational procedures and operational readiness
- 7 **Recover and restore**
  - 7.1 Powercraft is transported to storage using safe manual

## powercraft

## handling techniques

- 7.2 Post operational checks and maintenance of motor are performed, in accordance with organisational procedures and manufacturers' guidelines
- 7.3 Post operational checks are supervised with powercraft washed down and ancillary equipment stored by crew person
- 7.4 Powercraft and motor are stored, in accordance with organisational procedures and requirements
- 7.5 Crew person is debriefed and operational documentation is completed, in accordance with organisational procedures

## Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

## Unit Mapping Information

This unit replaces and is equivalent to PUASAR014A Operate and maintain a small powercraft and motor for rescue operations.

# Assessment Requirements for PUASAR014 Operate and maintain a small powercraft and motor for rescue operations

## Modification History

**Release 1.** This is the first release of this qualification in the PUA – Public Safety Training Package.

## Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and includes

- applying self-rescue techniques
- applying Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) requirements
- communicating with colleagues including using recognised signals
- completing operational logbooks and documentation
- conducting safety briefings and debriefing crew
- following policies and procedures
- handling boats safely including when coming alongside and towing
- handling casualty safely
- identifying and avoiding hazards
- implementing emergency procedures
- launching powercraft through surf
- leading a powercraft crew
- maintaining a safe working environment for self and crew person/s
- maintaining logbooks
- manoeuvring powercraft without operational motor
- obtaining operational feedback
- operating a powercraft during rescue operations in a range of surf conditions
- performing rescue and operational tasks
- preparing powercraft and motor for operations including pre-launch checking of motor, fuel cell and powercraft
- recovering and restoring powercraft including conducting post-operational checks
- returning powercraft to shore safely
- securing powercraft using knots and lashings
- transporting powercraft to launch site
- using radio communication
- utilising rescue and ancillary equipment
- wearing personal protective clothing and equipment

## Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria and includes knowledge of

- emergency procedures including on board fire drills
- equipment characteristics and limitations
- manual handling methods
- motor faults and associated repairs including air in fuel cell and motor, loose components, loose ignition leads and restarting a motor after capsizing
- organisational documentation, policies and procedures including operating procedures, pre and post operational checks and maintenance of powercraft and motor
- personal protective clothing and equipment
- retrieval techniques
- role and duties of a powercraft crew person
- surf awareness and situation awareness including beach safety zones
- surf hazards and environmental threats
- surf survival and self-rescue techniques
- types of waves and their characteristic features including effects of wind, tide, swell and ocean floor on surf conditions and features and signs of rips, gutters, sweeps and currents
- Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) requirements including risk mitigation

## Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Competency must be demonstrated and assessed by completing rescue boat operations, exercises or scenarios.

Resources for assessment must include access to

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, equipment, tools and personal protective clothing and equipment currently used in industry
  - access is required to equipment used in rescue boat operations and open water

- range of challenging surf conditions relevant to area of operations
- applicable documentation including organisational procedures, industry standards, equipment specifications, regulations, codes of practice and operations manuals.

# PUASAR015 Crew small powercraft in a rescue operation

## Modification History

**Release 1.** This is the first release of this unit of competency in the PUA Public Safety Training Package.

## Application

This unit of competency involves the skills and knowledge required to act as crew under direction of a skilled operator in a small powercraft during rescue operations in a surf and/or aquatic environment. It includes a range of open water rescue situations crewing small boats.

The unit is applicable to personnel from emergency services and/or volunteer organisations or organisations where additional support on a powercraft is required during surveillance and rescue operations in a surf, aquatic environment and/or open water.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Pre-requisite Unit

Not applicable.

## Competency Field

Search and Rescue

## Unit Sector

Not applicable

## Elements and Performance Criteria

|                                                                           | <b>2.2</b> | Operator is assisted to unload and position powercraft at water's edge                                                                                                                                    |
| <b>3 Launch and stabilise powercraft through surf aquatic environment</b> | <b>3.1</b> | Level of competence is conveyed to operator in relation to review of surf and/or aquatic environmental conditions                                                                                         |
|                                                                           | <b>3.2</b> | Powercraft is lifted and dragged into water, as directed by operator                                                                                                                                      |
|                                                                           | <b>3.3</b> | Powercraft is secured and positioned, as required, for surf or aquatic environmental conditions                                                                                                           |
|                                                                           | <b>3.4</b> | Powercraft is boarded safely on operator command and a secure position is assumed                                                                                                                         |
|                                                                           | <b>3.5</b> | Position in powercraft is changed at operator's direction to assist with maintaining trim and negotiating surf or aquatic environmental conditions                                                        |
|                                                                           | <b>3.6</b> | Lookout for hazards in surf or aquatic environment is maintained and information concerning objects in the water is communicated to operator                                                              |
|                                                                           | <b>3.7</b> | Assistance with beaching and stabilising powercraft is provided on return to shore, as directed by operator                                                                                               |
| <b>4 Participate in emergency</b>                                         | <b>4.1</b> | Emergency procedures are implemented safely, as directed by the operator                                                                                                                                  |
|                                                                           | <b>4.2</b> | Assistance is provided with safe manoeuvring of powercraft without operational motor                                                                                                                      |
| <b>5 Participate in rescue</b>                                            | <b>5.1</b> | Casualty and/or object is retrieved using appropriate retrieval techniques, as directed by operator                                                                                                       |

- 5.2 Patient care of casualty is performed, as required
  - 5.3 Casualty and/or object is secured for return to shore, in accordance with organisational procedures
  - 5.4 Casualty is lifted and object is removed safely from powercraft, as directed by operator
- 6 **Assist with powercraft recovery and restore**
  - 6.1 Safe manual handling techniques are used to assist operator with transport of craft to storage
  - 6.2 Powercraft is cleaned and stored, in accordance with organisational procedures and as directed by the operator
  - 6.3 Ancillary equipment is cleaned and stowed, in accordance with organisational procedures and as directed by operator
  - 6.4 Operational documentation is completed, as specified

## Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

## Unit Mapping Information

This unit replaces and is equivalent to PUASAR015A Crew small powercraft in a rescue operation.

## Links

PUA Training Package Companion Volume Implementation Guide is found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=3eca5672-6d5a-410b-8942-810d0ba05bbf>

# Assessment Requirements for PUASAR015 Crew small powercraft in a rescue operation

## Modification History

**Release 1.** This is the first release of this unit of competency in the PUA Public Safety Training Package.

## Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and includes

- applying patient care including handling casualty safely
- applying Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) requirements including safety principles and the identification and monitoring of hazards
- assisting operator to transport powercraft
- assisting with powercraft recovery and restoring
- communicating with team members and /or casualties
- completing operational logbooks and documentation
- crewing powercraft confidently and safely in a rescue operation
- following organisational policies and procedures
- launching and stabilising powercraft through surf aquatic environment
- loading and manoeuvring a vessel safely using manual handling methods
- manoeuvring a small powercraft without an operational motor in a rescue operation
- participating in emergency procedures
- performing a rescue
- preparing powercraft for operations including pre-launch checks
- rescuing and retrieving people and recovering objects from water
- securing powercraft using knots and lashings
- using recognised signals, rescue tubes and rescue and ancillary equipment
- wearing personal protective clothing and equipment

## Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria and includes knowledge of

- characteristics of small powercraft equipment including ancillary equipment
- cleaning and discarding equipment to meet environmental management and sustainability requirements
- effects of wind, tide, swell and ocean floor on surf/aquatic environment conditions
- emergency procedures

- features and signs of rips, gutters, sweeps and currents
- hazards and environmental threats
- manual handling methods
- organisational documentation, policies and procedures including operating procedures
- organisational standards
- patient care
- personal protective clothing and equipment
- powercraft manoeuvring
- powercraft operating procedures
- retrieval techniques
- self-rescue techniques
- surf and aquatic environmental awareness including beach safety zones
- surf and aquatic environmental hazards
- surf and aquatic environmental survival techniques
- types of waves and their characteristic features
- Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) requirements including risk mitigation

## Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Competency must be demonstrated over one or more exercises, scenarios or incidents to develop confident boat crewing and may involve setting scenarios to be completed by a rescue boat crew.

Resources for assessment must include access to

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, equipment, tools and personal protective clothing and equipment used in industry including
  - equipment used in rescue boat operations
  - open water
  - range of challenging surf or aquatic environmental conditions relevant to the area of operations
- applicable documentation including organisational procedures, industry standards, equipment

specifications, regulations, codes of practice and operations manuals.

# PUASAR016 Operate and maintain a personal water craft for rescue operations

## Modification History

**Release 1.** This is the first release of this unit of competency in the Public Safety Training Package.

## Application

This unit of competency involves the skills and knowledge required to operate and maintain a Personal Water Craft (PWC) and to use PWCs during aquatic rescue operations in surf or open water environments. It includes a range of open water rescue situations using PWCs.

Operators of PWCs will need to fulfil state or territory maritime licensing requirements to operate a PWC.

The unit is applicable to personnel from the emergency services, volunteer organisations and/or organisations where surveillance and rescue operations in open water are undertaken.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Pre-requisite Unit

Not applicable

## Competency Field

Search and Rescue

## Unit Sector

Not applicable

## Elements and Performance Criteria

### ELEMENTS

Elements describe the essential outcomes.

#### **1 Prepare for operations**

### PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

- 1.1** Logbooks are reviewed for operational feedback and pre-use information is completed, in accordance with

- organisational procedures and requirements
- 1.2** Pre-operational checks of Personal Water Craft (PWC) are completed, in accordance with organisational procedures and manufacturers' guidelines
  - 1.3** Ancillary equipment is checked and securely stowed, in accordance with organisational procedures
  - 1.4** Personal protective clothing and equipment is applied or stowed, as appropriate
  - 1.5** PWC is transported to launching site and is launched, in accordance with organisational procedures and manufacturers' guidelines
- 2 Receive task information**
- 2.1** Task information received verbally or through communications system is acknowledged
  - 2.2** Personal capability to perform task, based on surf conditions, is evaluated prior to accepting task and this information is communicated to the supervisor, in accordance with organisational procedures
- 3 Manoeuvre PWC according to surf conditions**
- 3.1** PWC is operated safely, in accordance with surf conditions and within the personal skills and limitations of operator
  - 3.2** Local regulations and legislation relevant to the operation of PWC are identified and followed
  - 3.3** Communication with operational base is maintained, in accordance with organisational procedures
  - 3.4** Personal protective clothing and equipment is worn, as required
  - 3.5** Emergency procedures are implemented, in accordance with organisational procedures
- 4 Assess rescue scene**
- 4.1** Risk analysis of rescue scene is undertaken and hazards are identified
  - 4.2** Rescue method suitable to the situation is selected, in accordance with organisational procedures
  - 4.3** Safe passage to and out of the rescue scene is assessed for suitability
- 5 Perform rescue**
- 5.1** Safe passage to and out of the rescue scene is navigated,

- in accordance with organisational procedures
- 5.2 PWC is positioned safely at rescue scene
  - 5.3 Casualty is retrieved safely and is secured, in accordance with organisational procedures
  - 5.4 Progress is communicated to operational base, in accordance with organisational procedures
  - 5.5 Casualty is handed over at designated point, in accordance with organisational procedures
  - 5.6 Casualty transfer is completed, in accordance with organisational procedures
- 6 Complete rescue operations and recovery requirements**
- 6.1 PWC is recovered from launch site and is transported to storage
  - 6.2 Post operational checks and maintenance are completed, in accordance with organisational procedures and manufacturers' instructions
  - 6.3 Debriefing with supervisor or other operational staff is completed
  - 6.4 Logbooks are completed, in accordance with organisational procedures and requirements

## Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

## Unit Mapping Information

This unit replaces and is equivalent to PUASAR016A Operate and maintain a personal water craft for rescue operations.

# Assessment Requirements for PUASAR016 Operate and maintain a personal water craft for rescue operations

## Modification History

**Release 1.** This is the first release of this unit of competency in the Public Safety Training Package.

## Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and includes

- applying Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) requirements
- assessing rescue scene
- completing operational logbooks and documentation
- finalising rescue operations and recovery requirements including conducting post operational checks and maintenance
- following organisational policies and procedures
- identifying risks and avoiding hazards for rescue operations
- implementing emergency procedures
- interpreting surf conditions
- manoeuvring Personal Water Craft (PWC) to meet with surf conditions including moving PWC safely
- obtaining operational feedback
- operating a PWC safely during rescue operations in a range of surf conditions
- participating in rescue operation briefings and debriefings including receiving task information
- performing rescue safely including implementing a safe passage and transferring casualties safely
- preparing for PWC operations including conducting pre-operational checks
- utilising rescue and ancillary equipment
- wearing personal protective clothing and equipment

## Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria and includes knowledge of

- equipment characteristics and limitations
- organisational documentation, policies and procedures including PWC operational procedures and procedures for cleaning and discarding equipment in terms of environmental

management and sustainability

- personal protective clothing and equipment
- retrieval techniques
- search and rescue techniques for rescue operations
- self-rescue techniques for rescue operations
- situation awareness
- surf awareness including beach safety zones
- surf hazards
- surf survival techniques
- types of waves and their characteristic features including effects of wind, tide, swell and ocean floor on surf conditions and features and signs of rips, gutters, sweeps and currents
- Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) legislated requirements including risk mitigation

## Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations in a range of actual or simulated surf conditions where it is appropriate to do so; where this is not appropriate, assessment must occur in industry approved simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, equipment, tools and personal protective clothing and equipment currently used in industry including
  - equipment used in Personal Water Craft (PWC) rescue operations
  - open water
  - range of challenging surf conditions relevant to area of operations
- applicable documentation including organisational procedures, industry standards, equipment specifications, regulations, codes of practice and operations manuals.

# PUASAR017 Undertake advanced surf rescue

## Modification History

**Release 1.** This is the first release of this unit of competency in the PUA Public Safety Training Package.

## Application

This unit of competency involves the skills and knowledge required to perform advanced surf rescues in challenging surf conditions without assistance from other team members. It includes lifeguards and lifesavers working in limited team environments.

The unit is applicable to personnel from the emergency services, volunteer organisations and/or organisations where a structured beach surveillance and rescue service is supplied.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Pre-requisite Unit

PUACOM001 Communicate in the workplace

PUASAR012 Apply surf awareness and self-rescue skills

PUASAR013 Participate in an aquatic rescue operation

## Competency Field

Search and Rescue

## Unit Sector

Not applicable

## Elements and Performance Criteria

### ELEMENTS

Elements describe the essential outcomes.

#### 1 Prepare for surf rescue

### PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

- 1.1** Pre-use checks of equipment are completed, in accordance with organisational procedures

- |                                          |            |                                                                                                                                                                                           |
|------------------------------------------|------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                                          | <b>1.2</b> | Hazards to bathers, at the surf location, are identified                                                                                                                                  |
|                                          | <b>1.3</b> | Equipment is placed in surf locations identified as of most likely need                                                                                                                   |
| <b>2 Perform surveillance duties</b>     | <b>2.1</b> | Location, that gives the best view of area of responsibility and ready access to equipment and water for response to casualties in distress, is determined and surveillance is maintained |
|                                          | <b>2.2</b> | People who match the profile of high risk bathers are identified and close attention is paid to them                                                                                      |
|                                          | <b>2.3</b> | Appropriate methods to avoid fatigue are used while providing surveillance, in accordance with organisational procedures                                                                  |
| <b>3 Respond to casualty in distress</b> | <b>3.1</b> | Casualty in distress is recognised                                                                                                                                                        |
|                                          | <b>3.2</b> | Operational command is notified of intention to perform rescue                                                                                                                            |
|                                          | <b>3.3</b> | Conditions are assessed and rescue techniques and equipment are selected                                                                                                                  |
|                                          | <b>3.4</b> | Challenging surf conditions are negotiated using sand bars and rip currents to reach casualty                                                                                             |
|                                          | <b>3.5</b> | Defensive approach is used to ensure own safety with a conscious panicking casualty                                                                                                       |
|                                          | <b>3.6</b> | On approach, conscious casualty is reassured                                                                                                                                              |
|                                          | <b>3.7</b> | Unconscious casualty is assessed for breathing and initial rescue breaths are performed, as required                                                                                      |
|                                          | <b>3.8</b> | Casualty is secured, in accordance with organisational procedures and available equipment                                                                                                 |
| <b>4 Return casualty to shore</b>        | <b>4.1</b> | Prevailing surf conditions are assessed and safe return to shore is navigated, in accordance with organisational procedures                                                               |
|                                          | <b>4.2</b> | Conscious casualty is assessed for first aid requirements or medical care and is managed, in accordance with organisational procedures                                                    |
|                                          | <b>4.3</b> | Unconscious casualty is dragged unaided above the high                                                                                                                                    |

- water line using approved techniques
- 4.4 Unconscious casualty is lowered using approved techniques and is assessed for signs of life and patient care is administered, as required
  - 4.5 Operational command is notified that casualty has been retrieved and whether any further assistance is required
  - 4.6 First aid is provided to casualty until further assistance arrives
  - 4.7 Casualty is handed over with details provided on incident, treatment provided and current condition
- 5 **Recover and restore equipment to operational readiness**
- 5.1 Debriefing is participated in and reports are completed, in accordance with organisational procedures
  - 5.2 Post operational checks and maintenance of equipment is performed, in accordance with organisational procedures
  - 5.3 Any damage to equipment is reported, in accordance with organisational procedures

## Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

## Unit Mapping Information

This unit replaces and is equivalent to PUASAR017A Undertake advanced surf rescue.

## Links

# Assessment Requirements for PUASAR017 Undertake advanced surf rescue

## Modification History

**Release 1.** This is the first release of this unit of competency in the PUA Public Safety Training Package.

## Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and includes

- applying Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) requirements
- appraising distance to casualty
- communicating with colleagues and reassuring stakeholders
- following organisational policies and procedures
- identifying hazards
- identifying high risk locations, locations that gives the best view of area, rip currents, surf locations and wave types
- identifying methods to avoid fatigue related issues
- managing a surf rescue unaided from identification of casualty through to handover
- paddling equipment including rescue boards or tubes in challenging surf conditions
- performing a complex surf rescue with multiple casualties
- performing first aid using resuscitation techniques
- performing surveillance duties including identifying high risk bathers
- preparing for surf rescue including undertaking pre-use checks of equipment
- reporting to operational command
- responding to casualties in distress including use of appropriate defensive approaches
- returning casualties to shore using appropriate securing, dragging and lowering techniques
- self-rescuing in a surf environment
- swimming in challenging surf conditions
- undertaking debriefings
- using, recovering and restoring equipment to operational readiness

## Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria and includes knowledge of

- availability of rip currents to use when proceeding out to sea including lulls between sets of waves, size of surf and time between waves

- beach types and hazard ratings
- equipment used in surf rescues including their characteristics and limitations and pre-use checks
- escape techniques from a panicking casualty
- fatigue management strategies
- first aid techniques and industry standards
- further assistance available
- hazards of the surf beach environment including high risk locations
- high risk bather profile
- operational command structure including roles and responsibilities
- organisational documentation, policies and procedures including procedures relating to debriefing and reporting requirements, maintaining equipment in terms of environmental management and sustainability and rescue and recovery
- rescue techniques including appraising distance to casualty
- roles of lifesavers, lifeguards and other personnel
- signals for communication between team members on shore and in the water
- Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) requirements including risk mitigation

## Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Competency must be demonstrated by performing actual or simulated rescues at a surf beach using both rescue boards and tubes in a range of actual surf conditions.

Resources for assessment must include access to

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, equipment, tools and personal protective clothing and equipment used in industry including
  - appropriate rescue equipment
  - a surf beach
- applicable documentation including organisational procedures, industry standards, equipment specifications, regulations, codes of practice and operations manuals.

# PUASAR018 Select and maintain canines to be part of a canine search team for USAR incidents

## Modification History

**Release 1.** This is the first release of this unit of competency in the PUA Public Safety Training Package.

## Application

This unit of competency involves the skills and knowledge required to select canines to be part of a canine search team for Urban Search and Rescue (USAR) incidents, to maintain the health and welfare of canines, to provide daily care to canines and to plan search and rescue training for search canines. A canine search team consists of one disaster search canine and one canine search specialist.

The unit is applicable to canine search specialists responsible for developing a canine search team for USAR incidents.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Pre-requisite Unit

Not applicable.

## Competency Field

Search and Rescue

## Unit Sector

Not applicable

## Elements and Performance Criteria

### ELEMENTS

Elements describe the essential outcomes.

#### **1 Assess canines for USAR work**

### PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

#### **1.1 Selection criteria for canines to work in an Urban Search and Rescue (USAR) environment are determined**

- |                                                               |            |                                                                                                                                                                                      |
|---------------------------------------------------------------|------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                                                               | <b>1.2</b> | Canines are observed and assessed in relation to determined criteria                                                                                                                 |
|                                                               | <b>1.3</b> | Canines assessed as meeting determined criteria are selected to be part of canine search team                                                                                        |
| <b>2 Maintain search canine health</b>                        | <b>2.1</b> | Symptoms of ill health or injury in search canines are identified                                                                                                                    |
|                                                               | <b>2.2</b> | Animal health care practitioners who can be consulted about the establishment or maintenance of search canine health are identified                                                  |
|                                                               | <b>2.3</b> | Program of health maintenance to prevent common illnesses or parasites is implemented, in accordance with organisational procedures                                                  |
|                                                               | <b>2.4</b> | Recommended treatment program for ill or injured search canine is followed, as required                                                                                              |
|                                                               | <b>2.5</b> | First aid kit for treating injured search canines is maintained, in accordance with organisational procedures                                                                        |
| <b>3 Manage search canine hygiene and welfare</b>             | <b>3.1</b> | Living environment, training areas and search canine transportation are maintained, in accordance with organisational procedures and animal health and welfare regulations           |
|                                                               | <b>3.2</b> | Health, welfare and fitness of search canines is maintained for USAR operational and environmental conditions                                                                        |
|                                                               | <b>3.3</b> | Healthy diet is maintained for search canines based upon individual animal requirements                                                                                              |
|                                                               | <b>3.4</b> | Need to retire a search canine is assessed and recommended, in accordance with organisational procedures, specialist advice and/or animal health and welfare standards               |
| <b>4 Maintain records of search canine health and welfare</b> | <b>4.1</b> | Vaccination, treatment and other preventative health records for search canines are established and maintained, in accordance with organisational procedures and industry guidelines |
|                                                               | <b>4.2</b> | Decisions to retire search canines are recorded, in accordance with organisational procedures                                                                                        |

- |                                                |            |                                                                                                                                     |
|------------------------------------------------|------------|-------------------------------------------------------------------------------------------------------------------------------------|
|                                                | <b>4.3</b> | Organisational policies and procedures for recording and reporting incidents that result in injuries to search canines are followed |
| <b>5 Develop and implement a training plan</b> | <b>5.1</b> | Training needs of canine search team are identified                                                                                 |
|                                                | <b>5.2</b> | Training plan that addresses the needs, strengths, weakness of the canine search team is developed                                  |
|                                                | <b>5.3</b> | Training plan is reviewed and amended, as required, to reflect the changing needs of the canine search team                         |
|                                                | <b>5.4</b> | Training equipment is maintained, in accordance with organisational procedures                                                      |
|                                                | <b>5.5</b> | Progress of canine search team training is recorded and reported, in accordance with organisational procedures                      |

## Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

## Unit Mapping Information

This unit replaces and is equivalent to PUASAR018A Select and maintain canines to be part of a canine search team for USAR incidents.

## Links

PUA Training Package Companion Volume Implementation Guide is found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=3eca5672-6d5a-410b-8942-810d0ba05bbf>

# Assessment Requirements for PUASAR018 Select and maintain canines to be part of a canine search team for USAR incidents

## Modification History

**Release 1.** This is the first release of this unit of competency in the PUA Public Safety Training Package.

## Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and includes

- applying first aid techniques to canines including administering preventative or curative medicines and treatments to canines
- applying Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) requirements
- assessing canines for desired characteristics and physical attributes for USAR work
- collecting, analysing and organising information to produce records and reports required by the organisation and animal welfare authorities
- developing and implementing a training plan based on identified needs
- following organisational policies and procedures
- interpreting actions and indications given by a canine
- maintaining living environment, training areas and canines to the required standard of hygiene
- maintaining records of search canine's health and welfare
- maintaining search canine's health
- managing search canine's hygiene and welfare
- monitoring diet and exercise regimes to maintain the health and welfare of canines
- observing and monitoring search canines in relation to their ability to work in a USAR environment
- providing recommendations on the health and welfare of search canines deployed in USAR incidents
- recognising symptoms of ill health and injury in canines
- seeking canine specialist advice including animal health care practitioner
- working independently and in teams to manage the hygiene and welfare of canines

## Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria and includes knowledge of

- anatomy and signs of health and/or ill health and injury of canines including canine anatomy,

physiology of canines, psychology and behaviour of canines, canine developmental stages, canine grooming requirements and dietary and exercise requirements of working canines

- animal health and welfare regulations
- canine search principles, methods and techniques
- canine training plans, procedures and processes
- capabilities of canines working within a USAR environment including typical characteristics and temperaments of various breeds of canines that are suited to working within the USAR environment and restricted canine breeds
- first aid techniques that can be used to treat injured canines including common illnesses, diseases, parasites and other causes of ill health or injury affecting working canines
- location of veterinarians and other authorities and specialists who can assist in the maintenance of the health and welfare of canines
- organisational documentation including required records and reports
- organisational policies and procedures including procedures and criteria for acquiring and retiring canines
- preventative measures for controlling illnesses and parasites that can affect canines
- work environment in which canines can be deployed including emergency deployment
- Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) requirements including risk mitigation processes

## Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, equipment, tools and personal protective clothing and equipment currently used in industry including
  - canines training to work in a USAR environment
  - legislation, policy, procedures and guidelines relating to the health and welfare of canines
  - search canines
- applicable documentation including organisational procedures, industry standards, equipment specifications, regulations, codes of practice and operations manuals.

# PUASAR019 Train canines to work in a USAR environment

## Modification History

**Release 1.** This is the first release of this unit of competency in the Public Safety Training Package.

## Application

This unit of competency involves the skills and knowledge required to acclimatise canines to work within an Urban Search and Rescue (USAR) environment, develop a canine's ability to detect live human scent and to indicate live human scent with alert behaviours. It also includes managing training assistants in a simulated USAR environment for the purposes of training canines.

The unit is applicable to canine search specialists responsible for developing a search canine to be part of a USAR canine search team.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Pre-requisite Unit

Not applicable

## Competency Field

Search and Rescue

## Unit Sector

## Elements and Performance Criteria

### ELEMENTS

Elements describe the essential outcomes.

#### **1 Work in a USAR environment**

### PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

#### **1.1 Risk assessment of Urban Search and Rescue (USAR) environment is undertaken, in accordance with organisational procedures**

- |                                                            |            |                                                                                                                                                      |
|------------------------------------------------------------|------------|------------------------------------------------------------------------------------------------------------------------------------------------------|
|                                                            | <b>1.2</b> | Personal protective clothing and equipment appropriate to the USAR environment is selected and worn                                                  |
|                                                            | <b>1.3</b> | Principles and organisational procedures for working safely in a USAR environment are implemented                                                    |
| <b>2 Introduce canines to a USAR environment</b>           | <b>2.1</b> | An incremental approach is followed to introduce canines to a USAR environment                                                                       |
|                                                            | <b>2.2</b> | Problems that may develop with canines being introduced to a USAR environment are identified and solved within area of responsibility                |
|                                                            | <b>2.3</b> | Problems outside area of responsibility are referred to appropriate personnel for action and recommendations are made, as required                   |
| <b>3 Prepare canines for detection of live human scent</b> | <b>3.1</b> | Scent factors that limit the capability of canines to function efficiently are identified                                                            |
|                                                            | <b>3.2</b> | Canine behaviour and responses are interpreted, and appropriate action is taken, in accordance with organisational procedures                        |
|                                                            | <b>3.3</b> | Regular interaction with canine is undertaken to maintain an enthusiastic, effective and appropriate level of work and behaviour at search locations |
|                                                            | <b>3.4</b> | Canine is deployed to detect live human scent in a range of areas and situations                                                                     |
| <b>4 Develop alert behaviour in canines</b>                | <b>4.1</b> | Training tools and techniques are used to shape the desired bark alert behaviour in canine                                                           |
|                                                            | <b>4.2</b> | Problems encountered in bark alert training are diagnosed and solved, in accordance with organisational procedures                                   |
| <b>5 Train canine using appropriate methods</b>            | <b>5.1</b> | Humane ways of training are used that reflect positive reinforcement techniques                                                                      |
|                                                            | <b>5.2</b> | Canine psychology and drives are recognised and applied when training canine                                                                         |
|                                                            | <b>5.3</b> | Appropriate degree of correction is used to discourage unwanted canine behaviour                                                                     |
|                                                            | <b>5.4</b> | Canine involved in training is handled and controlled in                                                                                             |

a way that maintains performance and safety

## **6 Manage training assistants**

- 6.1** Training assistant is selected for the training exercise to be performed in a simulated USAR environment
- 6.2** Training assistant is briefed on the expected outcomes of the exercise
- 6.3** Job safety analysis is provided to training assistant prior to commencement of training exercise
- 6.4** Safety and welfare of training assistant is maintained throughout the training exercise
- 6.5** Problems encountered with the training assistant are diagnosed and resolved, or referred to relevant personnel, in accordance with organisational procedures

## **Foundation Skills**

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## **Range of Conditions**

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

## **Unit Mapping Information**

This unit replaces and is equivalent to PUASAR019A Train canines to work in a USAR environment.

# Assessment Requirements for PUASAR019 Train canines to work in a USAR environment

## Modification History

**Release 1.** This is the first release of this unit of competency in the Public Safety Training Package.

## Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and includes

- applying Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) requirements
- conducting briefings
- conducting safety analysis
- controlling a search canine, off lead
- developing alert behaviour in canines
- ensuring safety and welfare of canines and personnel
- following organisational policies and procedures
- identifying safety risks
- interpreting reactions given by a search canine
- introducing canines to an Urban Search and Rescue (USAR) environment using an incremental approach
- managing training assistants
- preparing canines for detection of live human scent
- solving canine problems including safety risks
- training canines using appropriate methods and tools including correction procedures
- using personal protective clothing and equipment
- working as part of a USAR team including using communication techniques
- working safely in a USAR environment with search canines at disasters

## Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria and includes knowledge of

- canine psychology including behaviour and responses, bark alert behaviour and degree of correction
- canine search principles, methods and techniques
- communication techniques and briefing protocols
- how physical conditions and hazards will affect training strategies

- how to introduce canines to disaster sites and the importance of exposing them to varied disaster scenarios including incremental approach in introducing canines to a USAR environment
- organisational documentation, policies and procedures
- principles and procedures for working safely in a USAR environment
- risks associated with disaster sites
- safe work practices at disaster sites
- scent theory including factors affecting the location of human scent including differences in surfaces, pollution and environmental factors, factors affecting scenting ability of search canines, scent movement in a disaster site and how scent movement will affect search strategy
- selection and use of personal protective clothing and equipment
- state, territory and Commonwealth government canine welfare legislation
- training assistant characteristics
- training tools and techniques appropriate to alert behaviour
- Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) requirements including safety and welfare, safety assessments and risk mitigation

## Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, equipment, tools and personal protective clothing and equipment currently used in industry including
  - canines training to work in a USAR environment
  - legislation, policy, procedures and guidelines relating to the health and welfare of canines
  - training assistants
- applicable documentation including organisational procedures, industry standards, equipment specifications, regulations, codes of practice and operations manuals.

# PUASAR020 Develop a canine search team for USAR incidents

## Modification History

**Release 1.** This is the first release of this unit of competency in the PUA Public Safety Training Package.

## Application

This unit of competency involves the skills and knowledge required to prepare a canine search team to search for and locate people concealed in a structural collapse, and to manage a search canine during an incident. A canine search team consists of one disaster search canine and one canine search specialist.

The types of incidents that may require an Urban Search and Rescue (USAR) canine search team, working as a member of a USAR task force, includes earthquakes, terrorist incidents, aircraft crashes, disasters or major structural collapses.

The unit is applicable to personnel actively involved in and/or training as canine search specialists for USAR incidents and disaster operations.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Pre-requisite Unit

PUASAR018 Select and maintain canines to be part of a canine search team for USAR incidents

PUASAR019 Train canines to work in a USAR environment

PUASAR023 Participate in an urban search and rescue Category 1

## Competency Field

Search and Rescue

## Unit Sector

Not applicable.

## Elements and Performance Criteria

### ELEMENTS

Elements describe the essential outcomes.

### PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

- |                                                      |                                                                                                                                                                                                  |
|------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>1 Maintain canine obedience</b>                   | <b>1.1</b> Canine search specialist maintains canine obedience while canine is heeling, off lead                                                                                                 |
|                                                      | <b>1.2</b> Emergency stop with recall is performed by canine search specialist with canine                                                                                                       |
|                                                      | <b>1.3</b> At the direction of the canine search specialist, a down stay is performed by canine while under distraction                                                                          |
|                                                      | <b>1.4</b> Canine specialist ensures canine tasks are performed without canine demonstrating aggressive behaviour towards people or other animals                                                |
| <b>2 Demonstrate canine agility</b>                  | <b>2.1</b> Under canine search specialist direction, an agility course is completed by canine, within required timeframe                                                                         |
|                                                      | <b>2.2</b> Under canine search specialist direction, a turn on an elevated plank is performed by canine                                                                                          |
|                                                      | <b>2.3</b> Agility course is negotiated by canine and canine search specialist in a controlled, safe and appropriate manner                                                                      |
| <b>3 Maintain direction and control</b>              | <b>3.1</b> Canine is directed by canine search specialist to required elevation, direction commands are given to canine and elevation is jumped on by canine                                     |
|                                                      | <b>3.2</b> Elevation is sustained by canine for a minimum of five seconds until directed by canine search specialist                                                                             |
|                                                      | <b>3.3</b> Direction and control course is negotiated by canine and canine search specialist within required timeframe                                                                           |
|                                                      | <b>3.4</b> Ability to control work at a distance by canine is demonstrated by canine search specialist                                                                                           |
| <b>4 Develop canine to indicate live human scent</b> | <b>4.1</b> Location of and commitment to live human scent is demonstrated by canine and is interpreted and acted on by canine specialist                                                         |
|                                                      | <b>4.2</b> Alert exercise is undertaken by canine and canine search specialist within required timeframe with location of live human scent being correctly indicated by canine with a bark alert |
| <b>5 Manage canine in a search to locate victims</b> | <b>5.1</b> Interviews and site assessment is conducted to establish an appropriate search strategy                                                                                               |
|                                                      | <b>5.2</b> Canine is deployed off lead and appropriate actions, indications and characteristics are used by canine and                                                                           |

canine search specialist to ensure search area is covered within required timeframe

- 5.3 Control of canine is maintained by canine search specialist at all times and assistance to canine is provided, as required
- 5.4 Adjustments are made to search strategy by canine search specialist, as required, in accordance with changes in information, environmental conditions, search progress and current rescue work being undertaken
- 5.5 Location of live human scent is indicated by canine with a bark alert during search of a collapse site
- 5.6 Canine actions, indications and characteristics are interpreted correctly to identify the presence of live human scent by canine specialist
- 5.7 Appropriate care, safety and welfare procedures for canine and canine search specialist are followed, in accordance with organisational policies and procedures and relevant legislation
- 5.8 Post search examination of canine is conducted, in accordance with organisational procedures

## Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

## Unit Mapping Information

This unit replaces and is equivalent to PUASAR020A Develop a canine search team for USAR incidents.

# Assessment Requirements for PUASAR020 Develop a canine search team for USAR incidents

## Modification History

**Release 1.** This is the first release of this unit of competency in the PUA Public Safety Training Package.

## Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and includes

- adjusting handling and search strategies in response to changing environments
- applying canine and Urban Search and Rescue (USAR) industry guidelines, standards and procedures
- applying Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) requirements
- assisting canine at search sites
- caring for canine
- collecting, analysing and organising information to develop an effective search strategy
- completing site assessments
- conducting a search of a nominated search area
- constructing and completing direction and control course training
- controlling a canine, off lead, including in public locations
- demonstrating appropriate commands when handling a canine
- demonstrating canine agility including completing recall, emergency stops and moving in different directions
- developing canine to indicate live human scent
- following organisational policies and procedures
- handling a canine to maintain control and prevent accidents or injury to canine search specialist and/or others including members of the public
- implementing USAR canine search methods and techniques
- interpreting actions and indications given by a canine
- maintaining direction and control of canine including with distractions
- maintaining physical fitness of canine
- managing canine in a search to locate victims
- managing timeframes and priorities in response to changing search environments
- undertaking post search examination of canine
- working search canines in a controlled and safe manner

## Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria and includes knowledge of

- alert behaviours of canines and their causes such as a bark
- canine capabilities within Urban Search and Rescue (USAR) operations including canine behaviour, physiology, psychology, olfactory system and care
- canine welfare legislation
- factors that can determine appropriate search strategies
- hazard identification and risk analysis
- industry guidelines or standards on USAR canine search methods and techniques
- organisational documentation, policies and procedures
- principles of canine training including control, association, repetition, commands, rewards, correction, positive motivational methodologies, obedience and agility
- safe working systems to reduce canine related incidents
- scent theory and its application to the USAR environment
- site assessment
- Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) requirements including risk mitigation

## Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, equipment, tools and personal protective clothing and equipment currently used in industry including
  - canines training to work in a USAR environment
- applicable documentation including organisational procedures, industry standards, guidelines, equipment specifications, regulations, codes of practice and operations manuals.

# PUASAR021 Search as part of a canine search team at USAR incidents

## Modification History

**Release 1.** This is the first release of this unit of competency in the PUA Public Safety Training Package.

## Application

Canine search teams must be capable of working together in disaster search operations to locate victims. A canine must be capable of searching independently and efficiently, as directed by the canine search specialist.

The types of incidents that may require an Urban Search and Rescue (USAR) canine search team, working as a member of a USAR task force, includes earthquakes, terrorist incidents, aircraft crashes, disasters or major structural collapses. The unit is applicable to canine search specialists intending to work with task forces actively involved in USAR incidents and disaster operations.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Pre-requisite Unit

PUASAR020 Develop a canine search team for USAR incidents

## Competency Field

Search and Rescue

## Unit Sector

Not applicable

## Elements and Performance Criteria

### ELEMENTS

Elements describe the essential outcomes.

### PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

- 1 Prepare for search**
  - 1.1** Interviews and site assessment are conducted to establish an appropriate search strategy
  - 1.2** Risks contained in the search area are identified and assessed and appropriate safety procedures are implemented
  - 1.3** Adjustments are made, where appropriate, to search strategy, in accordance with any changes in information, environmental conditions, search progress and current rescue work being undertaken
- 2 Handle and control canine**
  - 2.1** Work is undertaken with canine in a safe and appropriate manner
  - 2.2** Control of canine is maintained, at all times
  - 2.3** Canine search specialist encourages willingness to work independently in the canine, which is demonstrated by the canine, whilst maintaining control
  - 2.4** Canine search specialist maintains control whilst, commands are responded to by the canine, in the presence of distractions
  - 2.5** Assistance is provided by canine search specialist to canine throughout the search, where appropriate
- 3 Conduct search**
  - 3.1** Canine search specialist deploys canine off lead and confirms appropriate actions and indications by canine to ensure search area is covered
  - 3.2** Canine search specialist interprets canine demonstration of location is acted upon
  - 3.3** Actions and indications of canine to correctly identify the presence of live human scent are correctly interpreted by canine search specialist
  - 3.4** Search area is covered by canine search specialist and canine within required timeframe
- 4 Provide search debriefing**
  - 4.1** Relevant information is recorded accurately, in accordance with organisational procedures and legislative requirements
  - 4.2** Sketch of search area showing alert locations is provided to relevant personnel on completion of search

- |                                             |            |                                                                                                                                                                                              |

# Assessment Requirements for PUASAR021 Search as part of a canine search team at USAR incidents

## Modification History

**Release 1.** This is the first release of this unit of competency in the PUA Public Safety Training Package.

## Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and includes

- adjusting handling and search strategies in response to changing environments
- applying emergency first aid techniques for canines
- applying industry guidelines
- applying Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) requirements
- assisting canines at search sites
- caring for canines
- collecting, analysing and organising information to develop an effective search strategy
- completing site assessments
- conducting a search
- controlling a canine off lead including in public locations
- demonstrating appropriate commands when handling a canine
- following organisational policies and procedures
- handling a canine to maintain control and prevent accidents or injury to canine search specialist and/or others including members of the public
- handling and controlling canine including with distractions
- implementing Urban Search and Rescue (USAR) canine search methods and techniques
- indicating location of live human scent with a bark alert
- interpreting the actions and indications given by a canine
- maintaining canine welfare and safety
- maintaining physical fitness of canine
- making recommendations
- making sound decisions in rapidly changing and often high-risk environments
- managing timeframes and priorities
- preparing for a search
- providing search debriefings
- reporting to relevant personnel
- sketching search site
- undertaking interview questions to ascertain search environment and conditions

- working search canines in a controlled and safe manner
- working with other canine search teams

## Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria and includes knowledge of

- alert behaviours of canines and their causes such as a bark alert
- biological and infectious hazards and safe management, particularly involving human remains
- canine capabilities within Urban Search and Rescue (USAR) operations including canine behaviour, physiology, psychology and olfactory system
- canine care including canine welfare legislation
- disaster victim identification principles and phases of operation
- factors that can determine appropriate search strategies
- hazard identification and risk analysis
- industry guidelines on USAR canine search methods and techniques
- International Search and Rescue Advisory Group (INSARAG) structural and victim marking systems
- interviewing techniques
- organisational documentation, policies and procedures
- principles of canine training including control, association, repetition, commands, rewards, correction, positive motivational methodologies, obedience and agility
- report and information requirements
- safe working systems to reduce canine related incidents
- scent theory and its application to the USAR environment
- site assessments
- site sketching techniques
- Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) requirements including risk mitigation

## Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Competency must be demonstrated by accompanying a canine on the rubble pile only when a find is indicated or when directed by the assessor and by conducting four searches within a twenty-four (24) hour period; two searches must be conducted consecutively.

Resources for assessment must include access to

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, equipment, tools and personal protective clothing and equipment used in industry including
  - canines training to work in a USAR environment
- applicable documentation including organisational procedures, industry standards, equipment specifications, regulations, codes of practice and operations manuals.

## PUASAR022 Participate in a rescue operation

### Modification History

**Release 1.** This is the first release of this unit of competency in the PUA Public Safety Training Package.

### Application

Typically, personnel performing these roles have completed induction or recruitment training and are commencing work as a member of an operational team. They will work under supervision in a team but may be responsible for completing singular tasks relating to a rescue.

It is applicable to personnel from the emergency services, volunteer organisations and/or associated industries.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

### Pre-requisite Unit

The fire sector is those sections of government departments, statutory authorities or organisations that have responsibility under jurisdictional arrangements for the delivery of firefighting and fire management services.

It is essential that the prerequisite units listed below are obtained prior to the issuance of this unit to individuals within the fire sector or the units contributing to the attainment of a fire qualification.

HLTAID003 Provide first aid

### Competency Field

Search and Rescue

### Unit Sector

Not applicable

### Elements and Performance Criteria

demonstrate achievement of the element.

**1 Prepare and respond to rescue**

- 1.1** Rescue operation and task information is received through a briefing, in accordance with organisational procedures
- 1.2** Rescue equipment is identified and selected based on incident information, as directed by the supervisor
- 1.3** Personal protective clothing and equipment is selected based on the nature of the rescue operation
- 1.4** Any further details on the nature of the rescue are received en route and acted on, in accordance with organisational procedures
- 1.5** Anticipated hazards and associated risks are discussed with rescue team members while on approach to rescue operation

**2 Contribute to a risk assessment at the scene**

- 2.1** Rescue scene assessment is conducted, and hazards and risks identified at the scene are reported to the supervisor
- 2.2** Communication with other team members is maintained using appropriate methods, techniques and terminology
- 2.3** Hazards and environmental conditions are minimised and/or controlled using risk mitigation processes, as directed
- 2.4** Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) and security procedures are followed, in accordance with organisational policies and relevant legislation
- 2.5** Need for additional personnel and/or specialist equipment is reported to the supervisor
- 2.6** Casualties at scene are identified, reported to supervisor and action is taken, as directed

**3 Perform rescue**

- 3.1** Access to incident and/or casualties is gained using techniques and equipment, in accordance with organisational procedures
- 3.2** Rescue procedures are conducted, in accordance with organisational procedures and supervisor's instructions
- 3.3** Casualties are prepared for removal and extricated

|                                     |                                                                                                                                                               |

|                                     | safely using appropriate equipment, rescue techniques and procedures, whilst under the direction of appropriately trained personnel                           |
|                                     | <b>3.4</b> Incident scene is constantly monitored for hazards to prevent injury to self and/or others and reports are provided to the supervisor, as required |
|                                     | <b>3.5</b> Hygiene precautions are implemented, in accordance with organisational requirements                                                                |
| <b>4 Conclude rescue operations</b> | <b>4.1</b> Appropriate actions are taken to preserve the incident scene, in accordance with organisational procedures                                         |
|                                     | <b>4.2</b> Equipment is recovered, cleaned and serviced, in accordance with organisational procedures and manufacturers' guidelines                           |
|                                     | <b>4.3</b> Hygiene precautions are implemented, in accordance with organisational procedures                                                                  |
|                                     | <b>4.4</b> Decontamination procedures are followed, in accordance with organisational procedures                                                              |
|                                     | <b>4.5</b> Operational debriefing is participated in, in accordance organisational procedures                                                                 |
|                                     | <b>4.6</b> Operational documentation including post incident reports is completed, in accordance with organisational procedures                               |

## Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

rescue operation must include at least one or more of the following

- confined spaces rescue
- flood rescue
- industrial rescue
- road crash rescue
- search and rescue

rescue equipment must include at least one or more of the following

- swift water rescue
- trench rescue
- vertical rescue
- fire extinguishers
- glass management kit
- hand tools
- ladders
- lighting equipment
- powered tools (battery, electric and fuel) such as
  - air bags
  - chain saws
  - cutting tools
  - drills
  - excavating tools
  - hydraulic tools
  - pneumatic equipment
  - winches
- rescue vehicles
- ropes
- stretchers
- tarpaulins

## Unit Mapping Information

This unit replaces and is equivalent to PUASAR022A Participate in a rescue operation.

PUA Training Package Companion Volume Implementation Guide is found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=3eca5672-6d5a-410b-8942-810d0ba05bbf>

# Assessment Requirements for PUASAR022 Participate in a rescue operation

## Modification History

**Release 1.** This is the first release of this unit of competency in the PUA Public Safety Training Package.

## Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements, performance criteria and range of conditions on at least one occasion and includes

- applying safe work practices in rescue operations
- applying Work, Health and Safety (WHS)/Organisational Health and Safety (OHS) requirements
- completing organisational documentation which can include incident reports, notebooks and logbooks
- concluding rescue operations
- contributing to a risk assessment at the scene
- following organisational policies and procedures
- identifying and monitoring hazards
- identifying, recording, preparing and extricating casualties
- identifying, selecting and using rescue equipment
- implementing hygiene precautions
- implementing risk mitigation processes
- implementing security procedures
- participating in and contributing to briefings and debriefings
- performing rescues
- preparing and responding to rescue
- preserving evidence at scene
- recognising types of hazards including situational and environmental hazards including adverse weather, insufficient light, difficult terrain, heights and still and moving bodies of water, damaged utilities and infrastructure including electricity, gas, water, rubble and debris, hazardous materials and atmospheres and mobile hazards including traffic and wild and domestic animals
- removing, cleaning and maintaining equipment
- reporting injuries and accidents to relevant personnel
- responding and reacting to instructions in a safe, correct and timely manner
- selecting and wearing personal protective clothing and equipment
- undertaking rescue scene assessment and monitoring
- using communication methods, techniques and terminology

## Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements, performance criteria and range of conditions and includes knowledge of

- capabilities and limitations of rescue equipment
- casualty handling techniques
- communication methods and techniques including signals and signs
- hygiene precautions including avoiding contact with body fluids, washing hands and wearing protective clothing
- manual handling techniques
- organisational documentation which may include incident report, notebook and logbook
- organisational policies and procedures
- personal protective clothing and equipment
- personnel roles and responsibilities including other trained personnel that may support a rescue operation
- procedures for reporting injuries and accidents
- processes and procedures for briefings and debriefings
- ropes and knots
- trained personnel
- types of environmental hazards
- Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) requirements including risk mitigation and safe work practices

## Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in organisationally approved simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, equipment, tools and personal protective clothing and equipment used in industry

- applicable documentation including organisational procedures, industry standards, equipment specifications, regulations, codes of practice and operations manuals.

PUA Training Package Companion Volume Implementation Guide is found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=3eca5672-6d5a-410b-8942-810d0ba05bbf>

# PUASAR023 Participate in a first response urban search and rescue Category 1

## Modification History

**Release 1.** This is the first release of this unit of competency in the PUA Public Safety Training Package.

## Application

This unit of competency applies to the role of a USAR Category 1 first responder and involves the skills and knowledge required to provide safe and effective rescue support at a first response Urban Search and Rescue (USAR) incident.

Participating in an urban search and rescue involves assisting with the rescue and removal of surface casualties (lightly trapped) and/or deceased victims, applying basic search techniques and following safe work practices related to Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) requirements.

It also includes the application of specialist equipment and techniques used at USAR incidents and the ability to work as a team member. A person performing this role will operate, under direct supervision, as a member of a USAR first responder rescue team.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Pre-requisite Unit

HLTAID003 Provide first aid

## Competency Field

Search and Rescue

## Unit Sector

USAR

## Elements and Performance Criteria

### ELEMENTS

### PERFORMANCE CRITERIA

Elements describe the essential    Performance criteria describe the performance needed to

outcomes.

demonstrate achievement of the element.

**1 Prepare for structural collapse rescue**

- 1.1** Operation and task information is obtained, and clarification is sought at briefing
- 1.2** Based on incident information received rescue resources are identified, selected and checked to ensure they are ready for use
- 1.3** Personal protective clothing and equipment is selected based on the nature of the structural collapse operation
- 1.4** Systematic approach to identifying potential hazards and associated risks is discussed with team members en route and on approach to the incident

**2 Participate in assessing structural collapse rescue**

- 2.1** Worksite scene reconnaissance and size up is conducted and the results are reported to supervisor and other rescue team members
- 2.2** Dynamic risk assessment is undertaken, in accordance with organisational procedures, to identify, analyse, record, treat and monitor situational and environmental hazards
- 2.3** Building use, type of occupancy and time of day are assessed for the potential presence of trapped persons and hazards
- 2.4** Building construction methods and collapse patterns are assessed for the presence of survivable voids
- 2.5** Need for additional personnel and/or specialist equipment is reported to supervisor
- 2.6** Communication with primary response team members is maintained using approved communication systems, methods, techniques, terminology and warning system
- 2.7** Liaison with other response organisations or agencies in proximity is maintained
- 2.8** Marking systems and exclusion zones are implemented, in accordance with organisational procedures

**3 Determine location and condition of surface casualties**

- 3.1** Intelligence on location of surface casualties within a collapsed structure is collected, analysed and reported, in accordance with organisational policies and procedures

|                                                         |            |                                                                                                                                                    |
|---------------------------------------------------------|------------|----------------------------------------------------------------------------------------------------------------------------------------------------|
|                                                         | <b>3.2</b> | Surface search techniques are implemented to identify and locate casualties, in accordance with organisational procedures and safe work practices  |
|                                                         | <b>3.3</b> | Condition of surface or lightly trapped casualties and nature of entrapment is ascertained, where possible                                         |
| <b>4 Gain access to surface casualties</b>              | <b>4.1</b> | Rescue techniques and equipment are employed to stabilise and make incident site safe                                                              |
|                                                         | <b>4.2</b> | Located and rescued casualties are packaged, in accordance with organisational procedures and in consultation with medical personnel in attendance |
| <b>5 Remove casualties</b>                              | <b>5.1</b> | Rescue techniques and resources are used to remove surface or partially trapped casualties, in accordance with organisational procedures           |
|                                                         | <b>5.2</b> | Evidence of casualty identity is collected and processed, in accordance with organisational procedures                                             |
|                                                         | <b>5.3</b> | Actions are taken to preserve the incident scene, where possible, for evidentiary purposes                                                         |
| <b>6 Conclude structural collapse rescue operations</b> | <b>6.1</b> | Equipment is recovered, cleaned and serviced, in accordance with organisational procedures and manufacturers' guidelines                           |
|                                                         | <b>6.2</b> | Signs and symptoms of operational stress in self and others are reported to relevant personnel                                                     |
|                                                         | <b>6.3</b> | Operational debrief is attended and documentation is completed, in accordance with organisational procedures                                       |
|                                                         | <b>6.4</b> | Hygiene precautions are implemented, in accordance with organisational procedures                                                                  |

## Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

casualties must include at least one of the following

- partially and/or lightly trapped casualties able to be rescued using available rescue equipment
- surface and subsurface casualties trapped and not able to be rescued using available rescue equipment
- surface casualties not trapped within the structure

## Unit Mapping Information

This unit replaces and is equivalent to PUASAR023A Participate in an urban search and rescue Category 1.

## Links

PUA Training Package Companion Volume Implementation Guide is found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=3eca5672-6d5a-410b-8942-810d0ba05bbf>

# Assessment Requirements for PUASAR023 Participate in a first response urban search and rescue Category 1

## Modification History

**Release 1.** This is the first release of this unit of competency in the PUA Public Safety Training Package.

## Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements, performance criteria and range of conditions on at least one occasion and includes

- applying Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) requirements including safe work practices when working with a USAR rescue team
- communicating with rescue team and stakeholders
- completing organisational documentation
- concluding structural collapse rescue operations
- conducting dynamic risk assessments
- determining location and condition of surface casualties
- gaining access to surface casualties with no further injury to persons or damage to property including handling casualties safely
- identifying signs of structural collapse including those associated with secondary collapse
- implementing hygiene precautions
- implementing surface search procedures and clearance of casualties using a systematic approach
- maintaining situational awareness and being alert to and treating environmental and situational hazards
- operating structural rescue equipment safely including stretchers
- participating in assessing structural collapse rescue through reconnaissance
- participating in briefings and debriefings
- preparing for structural collapse rescue, including collecting task information and rescue resources
- preserving the incident scene including disturbing scene only to gain access or make scene safe, taking notes and reporting to supervisor of observations made and preserving the integrity of evidence
- recovering, cleaning and servicing of rescue equipment
- removing casualties
- responding and reacting to instructions in a safe and timely manner
- traversing unstable environments
- using approved marking systems
- utilising equipment and techniques to treat and stabilise trapped casualties

- wearing personal protective clothing and equipment
- working as part of a team within responsible organisation's command and control structure

## Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements, performance criteria and range of conditions and includes knowledge of

- briefings using Situation, Mission, Execution, Administration/logistics, Command/control and Safety (SMEACS)
- dangers associated with damaged structures, collapse patterns and presence of survivable voids
- establishment of exclusion zones
- hygiene precautions
- industry standards including internationally accepted warning systems
- likelihood of casualties in relation to time of incident, building use and type of occupancy
- methods to preserve the incident scene including disturbing only to gain access or make scene safe, note taking and reporting to supervisor of observations made and preserving the integrity of evidence
- organisational policies and procedures including
  - command and control structure
  - documentation including exposure records
  - equipment security and maintenance
  - hazardous materials procedures
  - injuries and accident reporting procedures
  - legislation, industry standards and codes of practice
  - primary survey procedures
  - roles, responsibilities and capabilities of first response USAR team
  - safe work practices
  - scene assessment for an urban search and rescue
  - search and rescue procedures including calling and listening
  - stretcher handling procedures
- personal protective clothing and equipment
- preservation of scenes
- principles of structural collapse rescue
- purpose of briefs and debriefs
- signs and symptoms of physical and emotional stress
- situational and environmental hazards and dynamic risk assessment
- situational hazards including adverse weather conditions, below debris hazards, biological hazards, hazardous materials, overhead hazards, structural instability, surface hazards and utilities
- structural collapse equipment typically used in the rescue of surface casualties including

- capabilities and limitations of rescue equipment
- structural collapse marking system and sectors and boundaries
- task information requirements
- Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) legislated requirements including risk mitigation

## Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Assessment must occur in workplace operational situations. Where this is not appropriate, assessment must occur in organisationally approved simulated workplace operational situations that reflect workplace conditions.

Resources for assessment must include access to

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, equipment, tools and personal protective clothing and equipment currently used in industry including
  - equipment, personnel and facilities etc. appropriate to an USAR incident
  - USAR incident or simulation of a USAR incident
- applicable documentation including organisational procedures, industry standards, equipment specifications, regulations, codes of practice and operations manuals.

# PUASAR024 Undertake road crash rescue

## Modification History

**Release 1.** This is the first release of this unit of competency in the PUA Public Safety Training Package.

## Application

This unit of competency involved the skills and knowledge required to gain access to and extricate casualties from vehicles that have crashed on the road, such as cars, motorcycles, buses, vans, trucks and semi-trailers, whilst minimising the potential for further injury and preserving the integrity of evidence.

The unit is applicable to members of rescue teams and requires responders to access casualties using a range of techniques, and to operate specialist equipment to undertake the rescue.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Pre-requisite Unit

HLTAID003 Provide first aid

PUASAR022 Participate in a rescue operation

## Competency Field

Search and Rescue

## Unit Sector

Not applicable

## Elements and Performance Criteria

### ELEMENTS

Elements describe the essential outcomes.

#### **1 Prepare and respond to road crash rescue**

### PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

- 1.1** Operation and task information is obtained through a briefing, in accordance with organisational procedures
- 1.2** Road rescue equipment is checked, serviced and made

- operationally ready for use
- 1.3** Rescue equipment is selected based on incident information
  - 1.4** Personal protective clothing and equipment is selected relevant to the nature of the rescue operation
  - 1.5** Any further details on the nature of the rescue are received en route, in accordance with organisational procedures
  - 1.6** Anticipated hazards and associated risks are discussed with rescue team members while on route, in accordance with organisational procedures
- 2 Establish and maintain rescue scene safety**
- 2.1** Road crash scene is assessed, hazards and risks are identified and appropriate control measures and ongoing monitoring processes are put in place
  - 2.2** Scene management procedures are followed, in accordance with organisational procedures and legal requirements
  - 2.3** Safe working area is established and monitored to prevent injury to self and/or others
  - 2.4** Vehicles are stabilised to prevent movement during access and removal of casualties, in accordance with organisational procedures
- 3 Manage casualties**
- 3.1** Hygiene precautions are maintained, in accordance with organisational procedures
  - 3.2** Casualties are assessed and stabilised to minimise further injury or discomfort during rescue operations
  - 3.3** Nature of injuries or entrapment is ascertained to develop an extrication plan, in accordance with organisational procedures
  - 3.4** Support is provided to medical personnel assisting with the treatment of casualties, as required
- 4 Remove casualties from vehicle**
- 4.1** Access plans are determined in consultation with team leader and medical personnel
  - 4.2** Safety procedures are implemented to protect casualties from further injury or discomfort during access and removal from vehicle

- |                                                |            |                                                                                                                            |
|------------------------------------------------|------------|----------------------------------------------------------------------------------------------------------------------------|
|                                                | <b>4.3</b> | Access path is provided for removal of casualties using appropriate rescue techniques and equipment                        |
|                                                | <b>4.4</b> | Casualties are removed from vehicle using appropriate rescue removal techniques and equipment                              |
| <b>5 Conclude road crash rescue operations</b> | <b>5.1</b> | Appropriate actions are taken to preserve the incident scene, in accordance with organisational procedures                 |
|                                                | <b>5.2</b> | Equipment is recovered, cleaned and maintained, in accordance with organisational procedures and manufacturers' guidelines |
|                                                | <b>5.3</b> | Decontamination procedures are followed, in accordance with organisational procedures                                      |
|                                                | <b>5.4</b> | Hygiene precautions are implemented, in accordance with organisational procedures                                          |
|                                                | <b>5.5</b> | Operational debriefing is participated in and documentation is completed, in accordance with organisational procedures     |
|                                                | <b>5.6</b> | Operational documentation including post incident report is completed, in accordance with organisational procedures        |

## Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

## Unit Mapping Information

# Assessment Requirements for PUASAR024 Undertake road crash rescue

## Modification History

**Release 1.** This is the first release of this unit of competency in the PUA Public Safety Training Package.

## Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and includes

- applying hygiene precautions
- applying rescue scene management procedures and safe work practices
- applying Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) requirements
- checking, servicing and cleaning recovered equipment
- communicating and operating in a multi-agency environment
- completing decontamination procedures
- completing operational documentation including exposure records, incident field notes, incident reports, post operational reports using organisational reporting system
- concluding road crash rescue operations
- confirming operation and task information including environmental and other hazards, location, other agencies or organisations responding and type and number of casualties and vehicles
- contributing to debriefings
- developing and implementing extrication and access plans
- establishing and maintaining rescue scene safety
- following organisational policies and procedures
- following rescue scene management procedures
- identifying hazards, assessing risks and implementing control measures
- implementing emergency care practices
- implementing safety procedures to protect casualties
- managing casualties
- obtaining operation and task information
- preparing and responding to road crash rescues
- preserving crash scene evidence and incident scene
- removing casualty from vehicle using rescue removal techniques
- selecting and wearing personal protective clothing and equipment including rescue equipment
- stabilising vehicles to prevent movement during the assessment and removal of casualties

- supporting medical personnel
- undertaking initial and ongoing scene assessments
- using appropriate rescue technique and rescue equipment safely in a range of situations
- using road crash rescue techniques
- working in teams

## Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria and includes knowledge of

- appropriate rescue techniques
- casualty access and extrication methods and techniques
- dangers associated with vehicle safety devices
- emergency care procedures including controlled and immediate releases and protecting casualties using alternative entries
- establishment and maintenance of safe working areas and minimisation of hazards
- extrication plans including alternate entries and controlled and immediate releases
- field notes, incident reports and logbook requirements
- hazards
- hygiene precautions
- infection control and hygiene procedures
- legal requirements related to road crash rescue responders
- manufacturers' guidelines
- operation and task information including environmental and other hazards, location, other agencies or organisations responding and type and number of casualties and/or vehicles
- operational readiness
- organisational documentation, policies and procedures
- powered tools including lifting, cutting and pneumatic equipment and hydraulic tools
- preserving evidence at the scene including disturbing only to gain access or make scene safe, preserving incident scene until investigation activities are completed and preserving integrity of evidence
- procedures for returning equipment to operational readiness
- processes and procedures for briefings and debriefings
- rescue equipment characteristics and limitations
- rescue equipment including cutting equipment, fire protection equipment, glass management kit, hand tools, hydraulic tools, lifting equipment and pneumatic equipment
- rescue removal techniques including extrication devices, spinal immobilisation device and spine board (backboard)
- rescue scene management procedures including access and egress, cordoning and screening scene, electrical systems, glass management, isolating vehicle, managing bystanders and media, positioning response vehicles, preserving evidence, removing hazards, searching for missing occupants, staging areas, traffic control and traffic plans
- road crash and rescues procedures relevant to a range of vehicles including door removal,

folding down sill and foot well or front seat

- roles and responsibilities of rescue personnel and other participating agencies or organisations
- ropes and ladders
- safe working capacity of rescue equipment
- safety procedures to protect casualties including padding of sharp hazards (hard and soft protection), personal protective clothing and equipment for casualty including helmets, glasses, dust mask and ear protection and shielding from debris, glass and tools
- stabilisation of vehicle including chaining, chocking, jacking, propping, ratchet straps, roping, tensioning and use of webbing
- stabilising equipment and winches
- types of collisions including crushed vehicle, head on, jack knife, load management, multiple vehicle accidents, off set (quarter oblique), rear impact, side impact (T-bone), vehicle rollover and vehicle under ride or over ride
- types of hazards including adverse weather and environmental conditions, after dark operations, biohazards, composite materials including carbon fibre and fibre glass, difficult terrain, electricity, gas, hazardous materials, other road users, supplementary restraint systems, including airbags, traffic and bystanders, vehicle fuel, propulsion systems and glazing, wild or domestic animals, water and sewerage utilities and occupational stress
- types of vehicle including buses, cars, farm vehicles, motorcycles, semi-trailers and trucks
- use of personal protective clothing and equipment
- vehicle construction and dangers in cutting vehicle parts and panels
- Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) requirements including risk mitigation

## Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in organisationally approved simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, rescue tools, communication equipment and personal protective clothing and equipment currently used in industry
- applicable documentation including organisational procedures, industry standards, equipment

specifications, regulations, codes of practice and operation manuals.

# PUASAR025 Undertake confined space rescue

## Modification History

**Release 1.** This is the first release of this unit of competency in the PUA Public Safety Training Package.

## Application

This unit of competency involves the skills and knowledge required to undertake rescues in confined spaces as a member of a single organisation or team involving multiple organisations.

A confined space is determined by the hazards associated with a set of specific circumstances and not just because work is performed in a small space. A confined space means an enclosed or partially enclosed space that

- is not designed or intended primarily to be occupied by a person, and
- is, or is designed or intended to be, at normal atmospheric pressure while any person is in the space, and
- is or is likely to be a risk to health and safety from
  - an atmosphere that does not have a safe oxygen level, or
  - contaminants, including airborne gases, vapours and dusts, that may cause injury from fire or explosion, or
  - harmful concentrations of any airborne contaminants, or engulfment.

The unit is applicable to a range of confined space rescue situations undertaken by personnel from the emergency services, volunteer organisations and/or organisations where confined space work is performed. Permits may be required to perform work in a confined space in various jurisdictions.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Pre-requisite Unit

The fire sector is those sections of government departments, statutory authorities or organisations that have responsibility under jurisdictional arrangements for the delivery of firefighting and fire management services.

It is essential that the prerequisite units listed below are obtained prior to the issuance of this unit to individuals within the fire sector or the units contributing to the attainment of a fire qualification.

PUAFIR306 Identify, detect and monitor hazardous materials at an incident

PUASAR022 Participate in a rescue operation

## Competency Field

Search and Rescue

## Unit Sector

Not applicable

## Elements and Performance Criteria

### ELEMENTS

Elements describe the essential outcomes.

#### **1 Prepare for confined space rescue operation**

### PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

- 1.1** Appropriate rescue equipment is identified and selected based on incident information, as directed by the supervisor
- 1.2** Operation and task information is obtained through a briefing, in accordance with organisational procedures
- 1.3** Personal protective clothing and equipment is selected relevant to the nature of the confined space rescue operation
- 1.4** Any further details of the nature of the rescue received en route is assessed
- 1.5** Anticipated hazards and associated risks are discussed with rescue team members while en route, in accordance with organisational procedures

#### **2 Assess and manage confined space rescue**

- 2.1** Confined space is assessed, hazards and risks are identified and appropriate control measures and ongoing monitoring processes are put in place, in accordance with organisational procedures
- 2.2** Physical features of confined space rescue scene are assessed before deploying rescue resources
- 2.3** Confined space rescue is managed by controlling access and maintaining a safe operational environment, in accordance with organisational procedures
- 2.4** Communication with other personnel on site is established and maintained throughout the rescue

- |                                                         |                                                                                                                                     |
|---------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------|
| <b>3 Determine location and condition of casualties</b> | <b>3.1</b> Assessment of confined space incident scene is undertaken to determine possible location of casualties                   |
|                                                         | <b>3.2</b> Appropriate equipment is used to assist in the location of casualties                                                    |
|                                                         | <b>3.3</b> Evidence of the location of casualties within confined space is collected and reported to appropriate personnel          |
|                                                         | <b>3.4</b> Condition of casualties and nature of entrapment is ascertained, as required                                             |
|                                                         | <b>3.5</b> Hygiene precautions are applied, in accordance with organisational procedures                                            |
| <b>4 Gain entry to confined space</b>                   | <b>4.1</b> Entry permit is located and relevant information is obtained, as required                                                |
|                                                         | <b>4.2</b> Entry procedures are implemented, in accordance with organisational requirements                                         |
|                                                         | <b>4.3</b> Atmosphere is monitored, in accordance with organisational procedures and industry standards                             |
|                                                         | <b>4.4</b> Appropriate ventilation procedures are implemented, as required, in accordance with organisational procedures            |
|                                                         | <b>4.5</b> Appropriate respiratory protection equipment is used in hazardous atmospheres                                            |
|                                                         | <b>4.6</b> Confined space rescue techniques and equipment are employed to access casualties                                         |
|                                                         | <b>4.7</b> Located casualties are treated, in consultation with medical personnel and in accordance with organisational procedures  |
| <b>5 Remove casualties</b>                              | <b>5.1</b> Casualties are removed, in accordance with organisational procedures                                                     |
|                                                         | <b>5.2</b> Appropriate actions are taken to preserve confined space incident scene                                                  |
| <b>6 Conclude rescue operations</b>                     | <b>6.1</b> Appropriate actions are taken to preserve the incident scene, in accordance with organisational procedures               |
|                                                         | <b>6.2</b> Equipment is recovered, cleaned and serviced, in accordance with organisational procedures and manufacturers' guidelines |

- 6.3 Hygiene precautions are implemented, in accordance with organisational procedures
- 6.4 Decontamination procedures are followed, in accordance with organisational procedures
- 6.5 Operational debriefing is participated in, in accordance with organisational procedures
- 6.6 Operational documentation including post incident report is completed, in accordance with organisational procedures

## Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

## Unit Mapping Information

This unit replaces and is equivalent to PUASAR025A Undertake confined space rescue.

## Links

PUA Training Package Companion Volume Implementation Guide is found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=3eca5672-6d5a-410b-8942-810d0ba05bbf>

# Assessment Requirements for PUASAR025 Undertake confined space rescue

## Modification History

**Release 1.** This is the first release of this unit of competency in the PUA Public Safety Training Package.

## Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and includes

- applying hygiene precautions
- applying Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) requirements
- assessing and managing confined space rescue
- collecting evidence
- completing operational and organisational documentation
- concluding confined space rescue operations
- determining location and condition of casualties
- extricating casualties whilst minimising further injury to casualties, self and others
- following organisational policies and procedures
- gaining entry to confined space
- identifying situational and environmental hazards and applying risk mitigation and control procedures
- participating in and contributing to briefings and debriefings
- preserving incident scene and collecting evidence
- using personal protective clothing and equipment
- using rescue equipment

## Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria and includes knowledge of

- characteristics and limitations of equipment
- confined space industry standards
- confined space rescue and other relevant personnel
- engulfment
- falls from heights or into depths
- field notes, logbooks, rope logs, exposure records and post incident report requirements
- heat exhaustion or hypothermia

- hygiene precautions
- lock, tag out and isolation procedures
- movement of machinery either electrical or mechanical
- organisational documentation, policies and procedures including atmospheric monitoring, entry control, entry permits and equipment procedures
- personal protective clothing and equipment
- processes and procedures for briefings and debriefings
- scene preservation of evidence
- selection, use and maintenance of respiratory devices
- sewers and stormwater canals
- situational and environmental control measures
- situational or environmental hazards including engulfment, falls from heights or into depths; hazardous atmospheres including oxygen enrichment and/or deficiency; atmospheric contaminants such as hydrogen sulphide; methane and carbon dioxide; hazardous materials; heat exhaustion or hypothermia; moving machinery either electrical or mechanical; sewers and stormwater canals and stored energy
- types of rescue equipment including atmospheric monitoring equipment, communications, escape sets and harnesses, marking systems, life rescue lines, litters and stretchers, isolation equipment, ropes and tapes, self-contained breathing apparatus and airline, tripod and edge management, ventilation and purging equipment
- use of ropes and knots for accessing confined spaces
- ventilation procedures
- Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) requirements including risk mitigation

## Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in organisationally approved simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to

- a range of relevant exercises, case studies and/or simulations
  - in a confined space environment
- relevant and appropriate materials, rescue tools, rescue and communications equipment, and personal protective clothing and equipment currently used in industry

- applicable documentation including organisational procedures, industry guidelines, industry standards, equipment specifications, regulations, codes of practice and operations manuals.

# PUASAR026 Undertake industrial and domestic rescue

## Modification History

**Release 1.** This is the first release of this unit of competency in the PUA Public Safety Training Package.

## Application

This unit of competency involves the skills and knowledge required to gain access to and extricate casualties from a range of industrial or domestic incidents whilst minimising the potential for further injury and preserving the integrity of evidence.

An industrial rescue involves the safe removal of persons who have had an accident in a workplace such as a factory, warehouse or building site. It involves disentanglement from machinery and extrication from heavy machinery; rescue of occupants trapped in elevators and escalators is included.

Domestic rescues involve the rescue of occupants trapped in household settings. This includes such things as children with fingers stuck in drain plug holes and persons who are physically incapable of removing themselves from their house due to ill health.

The unit requires a responder to access casualties using a range of techniques and to operate rescue equipment. It is applicable to members of a rescue team.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Pre-requisite Unit

Not applicable.

## Competency Field

Search and Rescue

## Unit Sector

Not applicable

## Elements and Performance Criteria

### ELEMENTS

### PERFORMANCE CRITERIA

outcomes.

demonstrate achievement of the element.

**1 Prepare for industrial/domestic rescue**

- 1.1** Operation and task information is received through a briefing, in accordance with organisational procedures
- 1.2** Appropriate rescue resources are identified, selected, and checked to ensure they are ready for use
- 1.3** Personal protective and clothing equipment is selected based on type of industrial or domestic rescue situation
- 1.4** Systematic approach to identifying potential hazards and associated risks is undertaken en route and on approach to the incident

**2 Establish and maintain rescue scene safety**

- 2.1** Communication and ongoing liaison with rescue team members is established and maintained throughout rescue incident
- 2.2** Liaison with other personnel is established and maintained, in accordance with organisational procedures
- 2.3** Rescue scene assessment is conducted, as required
- 2.4** Hazards and environmental conditions are identified, monitored and controlled using risk mitigation processes
- 2.5** Rescue team is positioned taking into account potential dangers, requirements for personnel and vehicles to access the incident scene and limitations of operating equipment
- 2.6** Safe work area is established to protect casualties, emergency services personnel and members of the public
- 2.7** Impact effects of rescue operation on occupancy areas and potential effects on casualties are assessed
- 2.8** Techniques and equipment are employed to stabilise occupancy area surrounding rescue operation and to make incident site safe
- 2.9** Rescue resources and equipment are accessed based on an assessment of the incident, in accordance with organisational procedures

**3 Manage casualties**

- 3.1** Hygiene precautions are implemented, in accordance with organisational procedures

- 3.2 Techniques and equipment are used to gain access to casualties
  - 3.3 Primary survey of casualty is undertaken to determine type and severity of injury
  - 3.4 Injuries that may complicate removal of casualty from area are confirmed and appropriate action is taken
  - 3.5 In the event of multiple casualties a triage assessment is undertaken to determine priorities for medical treatment and extrication
  - 3.6 Need for additional personnel and/or specialist equipment is requested, as required
  - 3.7 Treatment of located casualty is undertaken in consultation with medical personnel and in accordance with organisational procedures
  - 3.8 Support is provided to medical personnel assisting with the treatment of casualties, as required
- 4 **Conduct industrial/technical rescue operation**
  - 4.1 Features of the occupancy in rescue area, including materials and design elements, that may impact on the casualty extrication are taken into account when using rescue techniques and equipment
  - 4.2 Access and extrication plans are determined in consultation with team leader, medical staff and other technical specialists
  - 4.3 Access path is provided for the removal of casualty using appropriate rescue techniques and equipment
  - 4.4 Casualty is extricated using recognised rescue techniques and equipment
  - 4.5 Organisational procedures are implemented to protect casualty from further injury or discomfort during access and extrication
- 5 **Conclude rescue operations**
  - 5.1 Appropriate actions are taken to preserve the incident scene, in accordance with organisational procedures
  - 5.2 Equipment is recovered, cleaned and serviced, in accordance with organisational procedures and manufacturers' guidelines

- 5.3 Hygiene precautions are implemented, in accordance with organisational procedures
- 5.4 Decontamination procedures are followed, in accordance with organisational procedures
- 5.5 Operational debriefing is participated in, in accordance with organisational procedures
- 5.6 Operational documentation including post incident report is completed, in accordance with organisational procedures

## Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

# Assessment Requirements for PUASAR026 Undertake industrial and domestic rescue

## Modification History

**Release 1.** This is the first release of this unit of competency in the PUA Public Safety Training Package.

## Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and includes

- accessing the scene including allowing clear access and egress for other responding vehicles and ambulances and establishing a clear area to manoeuvre personnel and stretchers
- applying a systematic approach to rescues and implementing safe work practices throughout the incident
- applying Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) requirements including risk mitigation
- assessing and monitoring impact effects on occupancy areas
- completing documentation including post incident exposure reports
- conducting a primary survey
- conducting and concluding industrial and/or domestic rescue operations
- developing access plans
- establishing and maintaining communication methods
- establishing and maintaining rescue scene safety
- establishing safe work areas
- extracting casualties safely whilst minimising further injury or discomfort to casualty, self and others
- following organisational policies and procedures
- gaining access to casualties
- identifying, selecting and checking rescue resources
- implementing hygiene precautions
- maintaining situational awareness and being alert to environmental and situation hazards
- making decisions related to the rescue
- managing and removing casualties
- operating rescue equipment to gain access to casualties
- participating in briefings and contributing to debriefings
- performing triage assessments
- preparing for industrial and/or domestic rescues including collecting operational and task information and resources
- preserving scene evidence including defining and redefining scene boundary, preserving

- evidence and related legal requirements and securing the scene
- recovering, cleaning and servicing rescue equipment
- selecting and wearing personal protective clothing and equipment
- stabilising and treating casualties
- stabilising the occupancy area
- undertaking a systematic approach to identifying potential hazards and risks
- undertaking rescue scene assessments including collecting information about casualties and hazards, isolating and eliminating utilities and surveying the incident scene
- using communication equipment and techniques
- working as a member of a rescue team in a multi-organisational environment and within an organisation's incident management structure

## Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria includes knowledge of

- access to casualty including accessing elevator shafts, disassembly of machinery, managing moving machinery, managing utilities supplies and removing domestic plumbing
- access to the scene including allowing clear access and egress for other responding vehicles and ambulances and establishing a clear area to manoeuvre personnel and stretchers
- casualty care procedures including triage
- casualty extrication including potential impacts and effects and use of rescue spinal boards, stretchers and team stretcher handling
- characteristics and limitations of rescue equipment
- communication methods and techniques
- hazard treatments
- hygiene precautions
- impact effects on occupancy areas including isolation of essential services
- incident reports, field notes and logbook requirements
- limitation of rescue equipment including access to incident site and equipment capabilities and limitations
- manufacturers' equipment guidelines
- need for situational awareness
- operation and task information including availability of company personnel to provide technical advice, environmental and other hazards at the scene, other public safety organisations at the scene or en route, time of day and difficulty in accessing scene, type of machinery or household items involved and type of rescue and number of casualties
- organisational documentation, policies and procedures
- other relevant personnel and/or experts
- potential hazards and risks
- preserving evidence
- primary surveys
- processes and procedures for briefings and debriefings

- recover, clean and service equipment including cleaning or disposal, contaminated clothing and equipment, equipment inspected for damage and serviceability and inventories checked
- removal of casualties including rescue and spine boards, stretchers, team stretcher and handling
- rescue personnel roles and responsibilities and role of participating organisations
- rescue resources including ancillary equipment such as stretchers, equipment and hand tools; hot cutting equipment; lifting and hauling equipment; lighting equipment; pneumatic, hydraulic and mechanical electrical tools; patient protection equipment; rescue units and sowed equipment and tools boxes
- rescue scene assessment including collecting information about casualties and hazards; isolating and eliminating utilities and surveying incident scene
- risk assessment processes including safe work practices
- situational and environmental hazards including adverse weather, biological hazards such as body fluids and tissue, convergence, difficult terrain, dusts, electrical and mechanical moving machinery, electricity, equipment power and drive systems, gas, hazardous materials and atmospheres, location, stability and movements of machinery, machinery fuel systems, mobile property, sharp and jagged objects, slippery surfaces, water and sewerage utilities
- systematic approach identifying potential hazards and risks
- treating hazards including eliminating the hazard; isolating the area and source; stabilising overhead hazards and using personal protective clothing and equipment
- types of domestic rescue procedures and techniques including children with fingers in drain plugs; removal of rings and persons who are physically incapable of removing themselves from their houses due to ill health
- types of industrial rescue procedures and techniques including agricultural machinery; disentanglement from machinery located in factories, warehouses and building sites; elevators and escalators; industrial and construction incidents; industrial machinery entrapments; occupants trapped in elevators and escalators and shut in shipping containers
- use of personal protective clothing and equipment
- Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) requirements including risk mitigation

## Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in organisationally approved simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Competency must be demonstrated in simulations using a range of domestic appliances and industrial machinery.

Resources for assessment must include access to

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, rescue tools, rescue equipment and personal protective clothing and equipment used in industry including
  - equipment, personnel and facilities appropriate to an industrial and/or domestic rescue incident training exercise
- applicable documentation including organisational procedures, industry standards, equipment specifications, regulations, codes of practice and operations manuals.

## PUASAR027 Undertake land search rescue

### Modification History

**Release 1.** This is the first release of this unit of competency in the PUA Public Safety Training Package.

### Application

This unit of competency involves the skills and knowledge required to search for and locate lost persons and/or items as a member of a land search team.

The unit is applicable to individuals who are required to perform a land search as a member of a team, under the direction of a team leader, in a range of environments and conditions.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

### Pre-requisite Unit

The fire sector is those sections of government departments, statutory authorities or organisations that have responsibility under jurisdictional arrangements for the delivery of firefighting and fire management services.

It is essential that the prerequisite units listed below are obtained prior to the issuance of this unit to individuals within the fire sector or the units contributing to the attainment of a fire qualification.

|-----------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>1 Prepare for land search</b>        | <b>1.1</b> Operation and task information is obtained and assessed and safety briefing is received                                                            |
|                                         | <b>1.2</b> Incident information is used to determine personal protective clothing and equipment needed for search operation, appropriate to search terrain    |
|                                         | <b>1.3</b> Land search equipment is identified, checked and packed for use in the expected terrain and conditions                                             |
| <b>2 Participate in search</b>          | <b>2.1</b> Specified team roles and functions for search operations are carried out and safety briefing is conducted and/or attended                          |
|                                         | <b>2.2</b> Search techniques are maintained, as specified by the search coordinator                                                                           |
|                                         | <b>2.3</b> Search boundaries are marked, in accordance with organisational procedures and task requirements                                                   |
|                                         | <b>2.4</b> Observation skills are applied and any clues that locate persons or objects are reported immediately, in accordance with organisational procedures |
|                                         | <b>2.5</b> Communication is maintained within the team, in accordance with organisational procedures                                                          |
|                                         | <b>2.6</b> Personal capabilities and limitations are recognised and referred to the supervisor                                                                |
| <b>3 Maintain search safety</b>         | <b>3.1</b> Survival techniques are applied, as required                                                                                                       |
|                                         | <b>3.2</b> Search safety procedures are implemented, in accordance with organisational procedures                                                             |
|                                         | <b>3.3</b> Lost searcher procedures are implemented, as required                                                                                              |
| <b>4 Preserve scene</b>                 | <b>4.1</b> Supervisor is immediately advised of located persons or findings, in accordance with organisational procedures                                     |
|                                         | <b>4.2</b> Initial preservation procedures are implemented to maintain the integrity of evidence                                                              |
|                                         | <b>4.3</b> Initial and/or ongoing scene preservation is conducted, in accordance with organisational procedures                                               |
| <b>5 Complete stand down procedures</b> | <b>5.1</b> Search equipment is recovered, cleaned and maintained, in accordance with organisational procedures and manufacturers' specifications              |

- 5.2 Operational debriefing is participated in and documentation is completed, in accordance with organisational procedures
- 5.3 Symptoms of operational stress in self and others is recognised and reported to appropriate personnel
- 5.4 Decontamination procedures are followed, in accordance with organisational procedures

## Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

## Unit Mapping Information

This unit replaces and is equivalent to PUASAR027A Undertake land search rescue.

## Links

PUA Training Package Companion Volume Implementation Guide is found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=3eca5672-6d5a-410b-8942-810d0ba05bbf>

# Assessment Requirements for PUASAR027 Undertake land search rescue

## Modification History

**Release 1.** This is the first release of this unit of competency in the PUA Public Safety Training Package.

## Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and includes

- applying decontamination procedures
- applying Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) requirements
- attending and receiving safety briefings
- communicating with others using appropriate methods and techniques
- completing organisational documentation including notes, photographs, sketches of findings and/or other information that may be required for coronial or legal proceedings
- completing stand down procedures
- complying with search orders and organisational requirements
- demonstrating situation awareness
- determining specified team roles based on the selected search pattern requirements
- following organisational policies and procedures
- identifying personal capabilities and/or limitations
- implementing lost searcher procedures
- implementing survival techniques and dealing appropriately with clues and location of objects and/or casualties
- maintaining search safety
- marking search boundaries whilst applying spacing and boundary marking procedures
- observing the safety of self and others during a search
- participating in and contributing to briefing and debriefing sessions
- participating in land search
- preserving scenes
- recognising and reporting signs of stress
- recognising search terrains
- selecting, checking, maintaining and cleaning equipment
- undertaking search operations in a variety of terrains and conditions including using day and night observation skills
- using land search rescue equipment
- wearing personal protective clothing and equipment

- working in a team

## Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria and includes knowledge of

- communication methods and techniques
- decontamination implementation procedures
- hazards and environmental threats
- incident information
- lost searcher procedures
- operation and task information including type of information to be collected and assessed
- organisational documentation, policies and procedures
- personal protective clothing and equipment
- potential land search conditions and terrain
- procedures for briefings and debriefings
- procedures to locate person or object
- recall procedures including state and territory search management arrangements
- requirements to preserve a crime scene and evidence
- rescue equipment
- safety briefings
- search operations
- signs and symptoms of operational stress
- specified team roles based on selected search pattern including track line search, parallel line search and creeping line search, barrier search
- survival techniques
- Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) requirements including risk mitigation

## Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, equipment, tools and personal protective clothing and equipment used in industry
- applicable documentation including organisational procedures, industry standards, equipment specifications, regulations, codes of practice and operations manuals.

# PUASAR028 Undertake rescue from a partial structural collapse

## Modification History

**Release 1.** This is the first release of this unit of competency in the PUA Public Safety Training Package.

## Application

It requires the responder to stabilise the structure and where casualties are present the responder is required to remove the casualties using a range of techniques relevant to the type of structure, type of collapse and nature of entrapment.

The unit is applicable to members of rescue teams particularly, responders working within the capability of a local response team. It cannot be used to certify competency for an Urban Search and Rescue (USAR) team member.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Pre-requisite Unit

PUASAR023 Participate in a first response urban search and rescue Category 1

## Competency Field

Search and Rescue

## Unit Sector

Not applicable

## Elements and Performance Criteria

### ELEMENTS

Elements describe the essential outcomes.

#### **1 Prepare for structural collapse operation**

### PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

**1.1** Operation and task information is received through a briefing, in accordance with organisational procedures

- 1.2 Rescue resources are identified and selected based on incident information received and are checked to ensure they are ready for use
    - 1.3 Personal protective clothing and equipment is selected based on the nature of the incident and rescue resources to be used
    - 1.4 Systematic approach to identifying potential hazards and associated risks is discussed with team members en route and on approach to the incident
- 2 Establish and maintain rescue scene safety**
  - 2.1 Rescue scene assessment is conducted, in accordance with organisational procedures
  - 2.2 Hazards and environmental conditions are identified, monitored and controlled using risk mitigation processes
  - 2.3 Scene is managed to control access and maintain a safe and effective operational environment
  - 2.4 Communication with other personnel on site is established and maintained, in accordance with organisational procedures
- 3 Determine location and condition of casualties**
  - 3.1 Evidence of the location of casualties within the collapsed structure is identified, analysed and reported, in accordance with organisational procedures
  - 3.2 Appropriate resources are used to extricate surface or lightly trapped casualties
  - 3.3 Condition of surface or lightly trapped casualties and nature of entrapment is ascertained, where possible
  - 3.4 Specialist resources are requested to assist with extricating casualties where entrapment exceeds that of surface or lightly trapped
  - 3.5 Search marking systems are utilised, as required
- 4 Stabilise and make safe incident scene**
  - 4.1 Exclusion zone is established to provide a safe working environment
  - 4.2 Stabilisation techniques are utilised to make the collapsed site safe
  - 4.3 Incident scene is constantly monitored for situational and environmental hazards and structural stability to

- prevent injury to self or others
- 4.4** Stabilisation that requires the use of specialist resources is requested, as required
- 5 Gain access to casualties**
- 5.1** Techniques appropriate to the nature of the entrapment are utilised to access casualties
- 5.2** Located casualties are treated in consultation with medical personnel, in accordance with organisational procedures
- 5.3** Hygiene precautions are implemented, in accordance with organisational procedures
- 6 Remove casualties**
- 6.1** Techniques and equipment are used to remove the casualty from within the structure
- 6.2** Casualties are released, treated and stabilised, in accordance with organisational procedures
- 6.3** Casualties are removed from scene, in accordance with organisational procedures
- 6.4** Evidence of casualty's identity is collected and processed, in accordance with organisational procedures
- 6.5** Appropriate actions are taken to preserve the incident scene, in accordance with organisational procedures
- 7 Conclude rescue operations**
- 7.1** Appropriate actions are taken to preserve the incident, in accordance with organisational procedures
- 7.2** Equipment is recovered, cleaned and serviced, in accordance with organisational procedures and manufacturers' guidelines
- 7.3** Hygiene precautions are implemented, in accordance with organisational procedures
- 7.4** Decontamination procedures are followed, in accordance with organisational procedures
- 7.5** Operational debriefing is participated in, in accordance with organisational procedures
- 7.6** Operational documentation including post incident report is completed, in accordance with organisational procedures

## Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

personal protective clothing and equipment must include

- boots
- ear protection (plugs and muffs)
- eye protection (goggles and glasses)
- gloves
- hand held lighting
- helmet and light
- knee and elbow protection
- masks and respirators
- protective clothing
- safety harnesses
- surgical gloves
- wet weather gear
- whistle

## Unit Mapping Information

This unit replaces and is equivalent to PUASAR028A Undertake rescue from a partial structural collapse.

## Links

PUA Training Package Companion Volume Implementation Guide is found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=3eca5672-6d5a-410b-8942-810d0ba05bbf>

# Assessment Requirements for PUASAR028 Undertake rescue from a partial structural collapse

## Modification History

**Release 1.** This is the first release of this unit of competency in the PUA Public Safety Training Package.

## Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and includes

- applying hygiene precautions
- applying safe work practices
- communicating with team members and casualties
- competing victim marking
- completing post incident reports
- concluding rescue operations
- conducting a dynamic risk assessment
- conducting primary surface search and rescue involving audible and visible search, line and hail search and physical search
- determining location and condition of casualties
- establishing and maintaining exclusion zones
- establishing and maintaining rescue scene safety
- extricating a casualty whilst minimising further injury to casualty, self and others
- following organisational policies and procedures including Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) requirements
- gaining access to casualties
- identifying evidence of the location of casualties within the collapsed structure
- identifying, monitoring and controlling hazards and environmental conditions
- maintaining situational awareness
- managing the scene to control access including implementing structural collapse marking system and sectoring site of structural collapse and defining boundaries
- monitoring incident site
- operating rescue equipment
- participating and contributing to briefings and debriefings
- preparing for structural collapse operation
- preserving scene evidence
- recognising and discussing potential hazards and associated risks
- recovering, cleaning and maintaining equipment
- removing casualties

- stabilising and making safe incident scene
- undertaking rescue scene assessment
- using debris removal and shoring techniques
- using hauling and lifting techniques
- using rescue equipment including cutting and breaking equipment, generators and lighting equipment, lifting and hauling equipment and powered equipment
- using rescue techniques including shoring and debris removal
- using ropes, anchors and rigging systems
- using systematic approach when undertaking rescue from a partial structural collapse
- wearing personal protective clothing and equipment
- working autonomously and/or as part of a team and within the responsible organisation or agency's command and control structure

## Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements, performance criteria and range of conditions and includes knowledge of

- hazard identification and risk management
- medical considerations and patient packaging for partial structural collapse casualties
- nature of incident resulting in structural instability and partial collapse
- operational briefing and debriefing procedures
- organisational documentation, policies and procedures including maintaining post incident records
- organisational incident command and control systems
- participating in briefings and contributing to debriefings
- personal protective clothing and equipment
- personnel roles and responsibilities
- powered tools including cutting equipment, hydraulic tools, lifting equipment, pneumatic equipment, stabilising equipment, winches and ropes and ladders
- principles and practices of structural collapse operations
- rescue equipment capabilities and limitations
- rescue equipment including atmosphere monitoring equipment, buckets, chain saws, communications equipment, drills, electrical detectors, generators, hand tools, lifting and hauling equipment, lighting, medical equipment, ropes, shoring and building stabilisation and wheel barrows
- rescue equipment used to extricate casualty including fire protection equipment, glass management kit, hand tools and lighting equipment
- rescue scene assessment
- stabilisation techniques including controlling entry and entry points, cribbing, removing debris and using temporary and permanent shoring
- systematic approaches to rescues
- task information including environmental and other hazards, nature, cause and location of

incident, occupancy, type and magnitude of incident, type and number of casualties, vehicles and type of structure

- treating hazards including eliminating hazard, isolating area or source, stabilising overhead hazards and using personal protective clothing and equipment
- types of evidence identifying casualties within a collapsed structure
- types of hazards including biological hazards including body fluids and tissue, untreated sewage, damaged utilities and infrastructure including electricity, gas, water, rubble and debris, hazardous materials and atmospheres, mobile hazards including traffic and wild or domestic animals and situational and environmental hazards including adverse weather, insufficient light, difficult terrain, heights and still and moving bodies of water
- Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) requirements including risk mitigation

## Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in organisationally approved simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to

- a range of relevant exercises, case studies and/or simulations involving structural instability and rescue
- relevant and appropriate materials, rescue tools, rescue equipment and personal protective clothing and equipment used in industry including
  - equipment, personnel, faculties appropriate to a range of incidents
  - structural collapse rescue or simulation of a structural collapse incident
- applicable documentation including organisational procedures, industry standards, equipment specifications, regulations, codes of practice and operations manuals.

# PUASAR029 Undertake a complex transport rescue

## Modification History

**Release 1.** This is the first release of this unit of competency in the PUA Public Safety Training Package.

## Application

This unit of competency involved the skills and knowledge required to gain access to and extricate casualties from complex transport, such as trains, trams, light aircraft, and self-propelled heavy plant, whilst minimising the potential for further injury and preserving the integrity of evidence.

The unit requires the responder to access casualties using a range of techniques and to operate specialist equipment. It is applicable to personnel working in a rescue team.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Pre-requisite Unit

HLTAID003 Provide first aid

## Competency Field

Search and Rescue

## Unit Sector

Not applicable

## Elements and Performance Criteria

### ELEMENTS

Elements describe the essential outcomes.

#### **1 Prepare for complex transport rescue**

### PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

- 1.1** Operation and task information is obtained through a briefing, in accordance with organisational procedures
- 1.2** Appropriate rescue equipment is identified and selected based on incident information received and is checked to

- ensure that it is ready for use
- 1.3 Personal protective clothing and equipment is selected based on type of transport and nature of collision
  - 1.4 Systematic approach to identifying potential hazards and associated risks is undertaken en route and on approach to rescue incident
- 2 Establish and maintain rescue scene safety**
- 2.1 Rescue scene assessment is conducted, as required
  - 2.2 Communication and ongoing liaison with rescue team members is established and maintained throughout the rescue
  - 2.3 Liaison with other relevant personnel is established and maintained, in accordance with organisational procedures
  - 2.4 Hazards are identified, analysed, evaluated, treated marked and monitored, in accordance with organisational procedures
  - 2.5 Rescue team is positioned taking into account potential dangers, requirements for personnel and vehicles to access incident scene and limitations of operating equipment
  - 2.6 Safe work area is established to protect casualties, emergency services personnel and members of the public
  - 2.7 Impact effects on transport and potential effects on casualties are assessed
  - 2.8 Techniques and equipment are employed to stabilise transport and to make incident scene safe
  - 2.9 Rescue resources and equipment are accessed based on assessment of the incident, in accordance with organisational procedures
- 3 Manage casualties**
- 3.1 Hygiene precautions are implemented, in accordance with organisational procedures
  - 3.2 Techniques and equipment are used to gain access to casualties
  - 3.3 Primary survey of casualty is undertaken to determine

type and severity of injury

- 3.4 Injuries that may complicate removal of casualties from the area are confirmed and appropriate action is taken
- 3.5 In the event of multiple casualties, a triage assessment is undertaken to determine priorities for medical treatment and extrication
- 3.6 Need for additional personnel and/or specialist equipment is requested, as required
- 3.7 Treatment of located casualties is undertaken, in accordance with organisational procedures and in consultation with medical personnel
- 3.8 Support is provided to medical personnel assisting with the treatment of the casualties, as required

#### **4 Extricate casualties**

- 4.1 Transport design, materials and safety features that may impact on casualty extrication is considered when using rescue techniques and equipment
- 4.2 Access and extrication plans are determined in consultation with team leader, medical staff and other technical specialists
- 4.3 Casualties are extricated using recognised rescue techniques and equipment

#### **5 Conclude rescue operations**

- 5.1 Appropriate actions are taken to preserve the incident scene, in accordance with organisational procedures
- 5.2 Equipment is recovered, cleaned and serviced, in accordance with organisational procedures and manufacturers' guidelines
- 5.3 Hygiene precautions are implemented, in accordance with organisational procedures
- 5.4 Decontamination procedures are followed, in accordance with organisational procedures
- 5.5 Operational debriefing is participated in, in accordance organisational procedures
- 5.6 Operational documentation including post incident report is completed, in accordance with organisational procedures

## Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

## Unit Mapping Information

This unit replaces but is not equivalent to PUASAR029A Undertake a complex transport rescue.

## Links

PUA Training Package Companion Volume Implementation Guide is found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=3eca5672-6d5a-410b-8942-810d0ba05bbf>

# Assessment Requirements for PUASAR029 Undertake a complex transport rescue

## Modification History

**Release 1.** This is the first release of this unit of competency in the PUA Public Safety Training Package.

## Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and includes

- applying a systematic approach to a complex transport rescue and to implementing safe work practices throughout the incident
- applying Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) requirements including risk mitigation
- assessing impact effects
- completing documentation including completing post incident reports
- concluding complex transport rescue operations
- conducting rescue scene assessment including collecting information about casualties and hazards, isolating and eliminating utilities and surveying the incident scene
- developing access plans and accessing rescue scene including allowing clear access and egress for other responding vehicles and ambulances and establishing a clear area to manoeuvre personnel and stretchers
- establishing and maintaining communication methods
- establishing and maintaining complex transport rescue scene safety and safe work areas
- extricating a casualty safely whilst minimising further injury to casualty, self and others
- getting access to casualties
- implementing hygiene precautions
- maintaining situational awareness and being alert to environmental and situational hazards and appropriate risk mitigation
- making decisions related to the rescue
- managing casualties and performing triage assessments
- operating equipment to gain access to casualties
- participating in and contributing to briefings and debriefings
- preparing for complex transport rescues including collecting operational and task information and resources
- preserving incident scene including evidence
- recovering, cleaning and maintaining rescue equipment
- selecting rescue equipment including personal protective clothing and equipment
- stabilising and treating casualties
- stabilising transport

- undertaking a primary survey of casualties and rescue scene assessment
- undertaking systematic approach to identifying potential hazards and associated risks
- using communication equipment and techniques
- working as a member of a rescue team in a multi-organisational environment and within organisational incident management structures

## Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria and includes knowledge of

- processes and procedures for briefings and debriefings
- characteristics and limitations of rescue equipment
- communication equipment, techniques and methods
- complex transport design and safety features
- dynamic risk assessments
- equipment for removing casualties including rescue or spine board and stretchers appropriate for packaging in a range of situations
- hygiene precautions
- injury prevention and minimisation
- legislation, industry standards, codes of practice and regulations
- limitations of rescue equipment including accessing incident site and equipment capacities
- manual handling methods and techniques
- nature of transport including heavy plant including bulldozers, light aircraft and trains and trams
- organisation incident management system
- organisational documentation, policies and procedures
- other relevant personnel
- personal protective clothing and equipment
- potential hazards and associated risks including downed power lines near vehicle, downwind of contaminants, hazardous materials and locations where they collect, oncoming traffic and stability and position of transport involved
- preservation of incident scene including disturbing only to gain access or make scene safe, preservation of incident scenes until investigation activities are completed and preservation of integrity of evidence
- primary survey of casualties
- procedures for access to casualties in different types of complex transport incidents including doors, emergency exits, the front, roof and side and managing electrical supplies, glass and debris
- recognised techniques including casualty packaging and team stretcher handling
- recovering, cleaning and maintaining of equipment, including checking inventories, cleaning or disposing of contaminated clothing and equipment and inspecting equipment for damage and serviceability
- rescue equipment including cutting equipment, fire protection equipment, glass management

kit, hand tools, hydraulic tools, lifting equipment and lighting equipment such as

- powered tools including lifting equipment, cutting equipment, hydraulic tools, pneumatic equipment, ropes and ladders, stabilising equipment, stabilising equipment and winches
- safe work practices
- scene preservation of evidence
- situational, environmental and electrical hazards including biological hazards such as body fluids and tissue, climate, composite fibres, dangerous goods and hazardous substances, different types of surfaces, dust and wind, noise and vibration, overhead hazards such as falling debris and power lines, pressurised containers, pyrotechnic safety device, sharp and jagged objects, structural instability and water and/or foam run off and oil
- systematic approaches to rescues
- task information including environmental and other hazards at the scene, exact location of complex transport involved in incident, other public safety organisations at the scene or en route, time of day and difficulty accessing scene, types of complex transport involved and potential number of casualties and with direction
- transport design including
  - heavy reinforced compartment cell
  - light framed composite material
  - maintaining body rigidity
  - major components such as frame (chassis), body parts, doors, windows, glass, seats, trim, removable panels, additional fittings and equipment, steering columns and wheels
  - new safety systems
  - two-storey transport
- treatment of hazards including elimination of the hazard, isolating the area and source, stabilising overhead hazards and using personal protective clothing and equipment
- treating located casualties, including assisting medical personnel with patient triage, if required; first aid, primary and secondary survey and respiratory protection
- types of complex transport collisions including
  - heavy plant rollover or impact with stationary object
  - light aircraft on take-off and landing, mid-air collision (impact into rural and/or urban environment) or collision with structure
  - trains and trams including derailment, impact with another train, impact with electrical infrastructure and level crossing
- Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) requirements including risk mitigation

## Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of

assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in organisationally approved simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, rescue tools, rescue and communications equipment and personal protective clothing and equipment currently used in industry
- applicable documentation including organisational procedures, industry standards, equipment specifications, regulations, codes of practice and operations manuals.

## PUASAR030 Undertake trench rescue

### Modification History

**Release 1.** This is the first release of this unit of competency in the PUA Public Safety Training Package.

### Application

This unit of competency involves the skills and knowledge required to undertake trench rescues as member of a single organisation or multi-disciplinary team. It includes a range of trench rescue situations.

The unit is applicable to personnel from the emergency services, volunteer organisations and/or organisations working in environments where the potential for trench collapse is prevalent.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

### Pre-requisite Unit

PUASAR022 Participate in a rescue operation

### Competency Field

Search and Rescue

### Unit Sector

Not applicable

### Elements and Performance Criteria

#### ELEMENTS

Elements describe the essential outcomes.

#### 1 Prepare for trench rescue operation

#### PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

- |            |                                                                                                                                |
|------------|--------------------------------------------------------------------------------------------------------------------------------|
| <b>1.1</b> | Operation and task information is obtained through a briefing, in accordance with organisational procedures                    |
| <b>1.2</b> | Shoring, propping up and excavating equipment is identified and prepared for use, in accordance with organisational procedures |

- 1.3 Personal protective clothing and equipment and trench rescue equipment is selected, in accordance with organisational procedures
    - 1.4 Any further details on the nature of the rescue are received and analysed en route
    - 1.5 Potential hazards and associated risks are discussed with rescue team members while on route
- 2 Assess and manage trench rescue scene**
  - 2.1 Physical features of the trench rescue are assessed before deploying rescue resources and team members
  - 2.2 Hazards and environmental conditions are identified, monitored and controlled using risk mitigation processes
  - 2.3 Trench rescue scene is managed to control access and to maintain a safe operational environment
  - 2.4 Scene management procedures are followed, in accordance with organisational procedures
  - 2.5 Communication with other personnel on site is established and maintained throughout the rescue operation
- 3 Stabilise trench**
  - 3.1 Trench collapse pattern and signs of further collapse are identified
  - 3.2 Action to minimise further trench collapse is undertaken, in accordance with organisational procedures
- 4 Locate and enter collapsed trench**
  - 4.1 Assessment of incident scene is undertaken to determine possible location of casualties
  - 4.2 Appropriate resources are used to assist in location of casualties
  - 4.3 Condition of casualties and nature of entrapment is ascertained, where possible, in accordance with organisational procedures
  - 4.4 Appropriate excavation techniques are employed to gain access to casualties
  - 4.5 Located casualties are treated, in accordance with organisational procedures and in consultation with medical personnel

- |                                     |            |                                                                                                                          |
|-------------------------------------|------------|--------------------------------------------------------------------------------------------------------------------------|
|                                     | <b>4.6</b> | Hygiene precautions are followed, in accordance with organisational procedures                                           |
| <b>5 Remove casualties</b>          | <b>5.1</b> | Casualties are released, treated and stabilised, in accordance with organisational procedures                            |
|                                     | <b>5.2</b> | Released casualties are removed from scene using recognised techniques                                                   |
|                                     | <b>5.3</b> | Appropriate actions are taken to preserve the incident scene, in accordance with organisational procedures               |
| <b>6 Conclude rescue operations</b> | <b>6.1</b> | Equipment is recovered, cleaned and serviced, in accordance with organisational procedures and manufacturers' guidelines |
|                                     | <b>6.2</b> | Hygiene precautions are implemented, in accordance with organisational procedures                                        |
|                                     | <b>6.3</b> | Decontamination procedures are followed, in accordance with organisational procedures                                    |
|                                     | <b>6.4</b> | Operational debriefing is participated in, in accordance organisational procedures                                       |
|                                     | <b>6.5</b> | Operational documentation including post incident report is completed, in accordance with organisational procedures      |

## Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

## Unit Mapping Information

This unit replaces and is equivalent to PUASAR030A Undertake trench rescue.

## Links

PUA Training Package Companion Volume Implementation Guide is found in VETNet -

# Assessment Requirements for PUASAR030 Undertake trench rescue

## Modification History

**Release 1.** This is the first release of this unit of competency in the PUA Public Safety Training Package.

## Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and includes

- applying excavation techniques
- applying Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) requirements including identifying, controlling and treating situational and environmental hazards
- assessing and managing a trench rescue scene
- communicating with personnel and casualties
- completing organisational documentation
- concluding rescue operations
- constructing and installing shoring, shielding and edge management systems
- extricating casualties' safely whilst minimising further injury to casualty, self and others
- following organisational policies and procedures
- identifying and operating trench rescue equipment including lifting systems, lowering and hauling systems and ventilation equipment
- implementing hygiene precautions
- locating and entering a collapsed trench
- participating in and contributing to briefings and debriefings
- preparing for a trench rescue operation including collecting operational and task information and rescue resources
- preserving scene evidence
- recognising further signs of trench collapse
- recovering, cleaning and maintaining rescue equipment
- removing casualties using approved techniques
- stabilising the trench
- undertaking and monitoring rescue scene management
- undertaking temporary and permanent shoring
- using personal protective clothing and equipment

## Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria and includes knowledge of

- casualty location and removal techniques including edge management, shielding and excavating and temporary and permanent shoring
- characteristics and limitations of trench rescue equipment
- communication methods and techniques
- environmental and situational hazards including exposure to toxic, biological or other substance, falls from heights or into depths, further trench collapse, hazardous atmospheres, heat exhaustion or hypothermia, moving machinery either electrical or mechanical, tides, vibrations from external sources, water and weather
- excavation, shoring, shielding and edge management techniques
- field notes, incident reports, notebook and logbook requirements
- hygiene precautions
- organisational documentation, policies and procedures
- personal protective clothing and equipment
- preservation of scene evidence
- processes and procedures for briefings and debriefings
- recognised removal techniques including edge management, shielding and excavating, shoring and temporary and permanent shoring
- rescue scene management processes including establishing and monitoring safety zones, establishing barriers and perimeter access controls, liaising with medical services, managing bystanders and preserving evidence
- soil stability
- trench collapse system
- trench definition as specified in state or territory legislation, or regulations
- trench rescue equipment and excavation techniques
- trench rescue equipment including atmospheric monitoring, edge management systems, equipment, excavating equipment, hand tools, ladders, pumps, ropes, shielding, shoring and ventilation equipment
- Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) requirements including risk mitigation and safe work practices

## Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in organisationally approved simulated

workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, equipment, rescue tools and personal protective clothing and equipment currently used in industry
- applicable documentation including organisational procedures, industry standards, equipment specifications, regulations, codes of practice and operations manuals.

## **PUASAR031 Undertake an urban search and rescue Category 2 rescue technician**

### **Modification History**

**Release 1.** This is the first release of this unit of competency in the PUA Public Safety Training Package.

### **Application**

This unit of competency involves the skills and knowledge required to provide safe and effective rescues at an Urban Search and Rescue (USAR) incident as a Category 2 technician who is a member of a USAR team.

USAR is a specialised technical rescue capability for the location and rescue of trapped people following a structural collapse. The types of incidents that may require the skills and knowledge of a USAR Category 2 technician include earthquakes, terrorist and transport accidents, crashes, disasters and/or major structural collapses.

The unit is applicable to locating and removing trapped and injured casualties or deceased victims from partially or totally collapsed structures or environments and providing emergency medical care, as required.

It also includes using USAR specialist equipment and techniques and the ability to work as a team member. The authorisation to perform this role is subject to organisational policies and procedures. A person performing this role will typically operate under supervision as a member of a USAR team.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

### **Pre-requisite Unit**

PUASAR023 Participate in an urban search and rescue Category 1

### **Competency Field**

Search and Rescue

### **Unit Sector**

USAR

## Elements and Performance Criteria

### ELEMENTS

Elements describe the essential outcomes.

### PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

#### 1 Prepare and plan to respond to USAR incidents

- 1.1 Personal documentation and kit is prepared appropriate to the nature of the incident and length of deployment
- 1.2 Pre-deployment briefing detailing mission information is received and clarified
- 1.3 Based on incident information received appropriate rescue resources are identified, selected and checked to ensure they are ready for use
- 1.4 Personal protective clothing and equipment is selected based on the nature of the incident and rescue resources to be used

#### 2 Mobilise as part of a task force

- 2.1 Adequate communication is maintained with team members
- 2.2 Personal conduct is maintained, in accordance with applicable situation, cultural sensitivities and organisational requirements
- 2.3 Systematic approach to identifying potential hazards and associated risks is discussed with team members en route to the incident
- 2.4 Personal hygiene and safety is maintained, in accordance with organisational procedures

#### 3 Assess and work within USAR incidents

- 3.1 Reconnaissance of area of operation is undertaken with other team members
- 3.2 Incident briefing detailing operational and task information is received and communicated with team members
- 3.3 Area of operations is managed to control access and maintain a safe and effective operational environment, in accordance with organisational procedures
- 3.4 Initial rescue operations are undertaken with other team members

- 3.5 Establishment of a base of operations is undertaken with other team members, in accordance with organisational procedures
  - 3.6 Communication is established and maintained with other organisations/agencies on scene
  - 3.7 Appropriate marking systems are used
  - 3.8 Personal wellbeing and fatigue management strategies are implemented
  - 3.9 Allocated rescue, logistics and communications tasks are undertaken, as directed
- 4 **Determine location and condition of casualties**
  - 4.1 Search techniques and equipment are used to locate trapped casualties under the surface, in voids and spaces and from heights
  - 4.2 Nature of casualty entrapment is ascertained, where possible
- 5 **Gain access to casualties**
  - 5.1 Exclusion zone is established, in accordance with organisational procedures to provide a safe working environment
  - 5.2 Stabilisation techniques are utilised to make collapsed structure and/or site safe
  - 5.3 Rescue techniques appropriate to the nature of entrapment is used to access casualties
  - 5.4 Located casualties are treated in consultation with medical personnel, in accordance with organisational procedures
  - 5.5 Incident scene is constantly monitored for situational and environmental hazards and structural stability to prevent injury to self or others
- 6 **Remove casualties**
  - 6.1 Casualties are safely prioritised, packaged and handled from surface and sub-surface voids and spaces using recognised techniques and equipment to minimise further injury to casualty, self and others
  - 6.2 Evidence of casualty identity is collected and processed, in accordance with jurisdictional disaster victim identification procedures

- |                                            |            |                                                                                                                            |
|--------------------------------------------|------------|----------------------------------------------------------------------------------------------------------------------------|
|                                            | <b>6.3</b> | Appropriate actions are taken to preserve site, where possible, for evidentiary purposes                                   |
| <b>7 Demobilise as part of a USAR team</b> | <b>7.1</b> | Equipment is recovered, cleaned and maintained, in accordance with organisational procedures and manufacturers' guidelines |
|                                            | <b>7.2</b> | Demobilisation of base of operations is undertaken with other team members, in accordance with organisational requirements |
|                                            | <b>7.3</b> | Operational readiness is maintained to support redeployment of USAR team and individual members, if required               |
|                                            | <b>7.4</b> | Signs and symptoms of fatigue and operational stress in self and others is reported to relevant personnel                  |
|                                            | <b>7.5</b> | Operational debriefing is attended and contributed to, in accordance with organisational requirements                      |
|                                            | <b>7.6</b> | Hygiene precautions are implemented in accordance with organisational procedures                                           |
|                                            | <b>7.7</b> | Exposure reports are completed, in accordance with organisational procedures                                               |

## Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

## Unit Mapping Information

This unit replaces and is equivalent to PUASAR031A Undertake an urban search and rescue Category 2.

## Links

# Assessment Requirements for PUASAR031 Undertake an urban search and rescue Category 2 rescue technician

## Modification History

**Release 1.** This is the first release of this unit of competency in the PUA Public Safety Training Package.

## Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and includes

- accessing and utilising rescue resources
- applying Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) requirements including secondary structure collapse monitoring procedures and safe work practices in a range of environments
- assessing and working within USAR incidents including reconnaissance
- completing allocated rescue, logistics and communications tasks
- completing organisational documentation including exposure records
- cutting concrete, reinforcing bar, structural steel, timber and a range of non-structural components and contents
- demobilising as part of a USAR team
- determining location and condition of casualties
- gaining access to casualties
- implementing hygiene precautions
- implementing stabilisation techniques
- maintaining situational awareness and being alert to environmental and situational hazards including assessing and evaluating potential risks and hazards, monitoring and using acquired information of collapse patterns in structures and putting strategies in place prior to hazards becoming a threat to the team
- managing and controlling access at a scene including tag in and tag out procedures
- managing USAR scene
- mobilising and participating in the establishment of a remote base of operations
- mobilising as part of a USAR team
- operating equipment techniques including
  - air bags and other lifting equipment
  - concrete cutting, coring, breaching and lifting equipment
  - generators and lighting equipment
  - heavy duty cutting, breaking and lifting equipment
  - jacks and props
  - manual handling equipment

- ropes, anchors and rigging systems
- structural collapse rescue equipment
- visual and audible locating devices
- participating in rescue scene reconnaissance activities
- preparing and planning to respond to USAR incidents including collecting task information and rescue resources
- preserving evidence at incident scene
- prioritising, packaging and handling patients in surface/confined space environments
- recognising and reporting on signs and symptoms of fatigue and stress
- recovering, cleaning and maintaining of rescue equipment including
  - checking inventories
  - cleaning or disposing of contaminated clothing and equipment
  - conducting a general clean-up of the rescue work area
  - inspecting equipment for damage and serviceability
- rescue scene reconnaissance
- removing casualties whilst minimising further injury to self or others using recognised techniques and equipment for removing casualties including
  - creation of exit route for technicians and packaged casualty
  - mechanical advantage hauling and lowering systems
  - stretcher packaging as appropriate including
    - rescue and spine board
    - stretchers appropriate for packaging in a range of situations
    - team stretcher handling
- taking part in briefings and debriefings
- treating located casualties must include packaging and removal of casualties for handover to local authority
- undertaking a primary survey using methodical processes to identify immediate life-threatening injuries and conditions that require intervention
- using a range of
  - breaching, coring and cutting equipment
  - equipment and techniques to locate and stabilise trapped casualties
  - search techniques and equipment to locate trapped casualties
  - shoring and cribbing techniques including constructing and safety assembling a range of shoring and cribbing sets needed to allow teams to safely move in and around a collapsed or practically collapsed structure and/or zone
  - techniques appropriate to nature of entrapment
- utilising appropriate marking systems
- wearing personal protective clothing and equipment
- working with tunnelling techniques safely
- working in a team within an organisational command and control structure

## Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria and includes knowledge of

- base of operations
- casualty search techniques and strategies
- communication methods and techniques including face to face, marking systems, radio communications and whistle or horn warning signals
- construction and utilisation of a vertical raising and lowering system
- cutting concrete, reinforcing bar, structural steel, timber, non-structural components and contents
- disaster victim identification procedures
- equipment and expertise to support lifting loads utilising heavy equipment
- equipment capabilities and limitations
- extrication techniques appropriate to nature of entrapment including
  - HAZMAT (hazardous materials) detection and reporting
  - individually or as part of a team demonstrate breaking and breaching including
    - concrete coring
    - dirty and clean breaches
    - penetrating below to a void space, laterally to a void space and overhead to a void space
  - individually or as part of a team demonstrate shoring - stabilising and supporting structural components with the use of
    - cribbing and wedges
    - horizontal shores
    - split sole shore
    - T-shore, sloped floor shore, laced post shore, and vertical or dead shore
    - window and door shores
- first aid including primary surveys
- hazards including adverse weather conditions, below debris hazards, biological hazards, different levels of elevation, hazardous materials, overhead hazards, structural instability and surface hazards
- heavy lifting techniques including manual handling
- industry standards, guidelines and methodology for marking systems
- lift equipment to move loads
- manage scenes to control access
- medical considerations and casualty packaging
- movement and lifting of concrete slabs
- operational briefing and debriefing processes including tasking information
- organisational documentation including exposure reports
- organisational incident command and control system
- organisational policies and procedures including relevant legislation and personnel roles and

responsibilities

- personal documentation and kit
- personal protective clothing and equipment
- potential hazards
- preserving evidence at a scene
- principles of dynamic risk assessments
- principles of structural collapse operations
- range of environments
- relationship of USAR team with other rescue response and emergency management organisations or agencies
- rescue resources
- search techniques and equipment to locate trapped casualties including primary surface search and rescue and technical search equipment
- signs and symptoms of fatigue and stress
- situational and cultural sensitivity requirements when working with trapped persons
- sources of information
- stabilisation techniques appropriate to a range of environments
- structural collapse patterns and monitoring techniques
- tasking information
- treatment of located casualties
- types of personnel including local emergency management personnel
- voids and spaces
- Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) requirements including risks associated with working in voids and spaces

## Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Assessment must occur in workplace operational situations. Where this is not appropriate, assessment must occur in industry approved simulated workplace operational situations that reflect workplace conditions.

Competency should be assessed where

- designated role as an active team member are performed within a team structure and given scenarios
- mobilisation and remote living procedures of a USAR team are rehearsed

- rescue techniques are applied throughout, at a minimum, a 36 hour continuous exercise which incorporates a minimum of three shift changes

Resources for assessment must include access to

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, equipment, tools and personal protective clothing and equipment currently used in industry including
  - equipment, personnel and facilities appropriate to a USAR incident
  - simulation of a USAR incident in a multi-organisational/agency response environment
- applicable documentation including organisational procedures, industry standards, equipment specifications, regulations, codes of practice and operations manuals.

## PUASAR032 Undertake vertical rescue

### Modification History

**Release 1.** This is the first release of this unit of competency in the PUA Public Safety Training Package.

### Application

This unit of competency involves the skills and knowledge required to undertake vertical rescues in a range of emergency situations in natural and manmade environments. It includes a range of vertical rescue situations, preparing and responding to rescue situations, assessing rescue scenes, establishing vertical rescue systems and performing in and terminating rescues.

The unit is applicable to personnel from the emergency services, volunteer organisations and associated industries.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

### Pre-requisite Unit

PUASAR022 Participate in a rescue operation

### Competency Field

Search and Rescue

### Unit Sector

Not applicable

### Elements and Performance Criteria

#### ELEMENTS

Elements describe the essential outcomes.

#### 1 Prepare and respond to vertical rescue

#### PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

- 1.1** Operation and task information is received through a briefing, in accordance with organisational procedures
- 1.2** Vertical rescue equipment is selected based on incident information and is checked to ensure it is ready for use

- |                                           |            |                                                                                                                                                |
|-------------------------------------------|------------|------------------------------------------------------------------------------------------------------------------------------------------------|
|                                           | <b>1.3</b> | Personal protective clothing and equipment for vertical rescue is selected                                                                     |
| <b>2 Assess scene</b>                     | <b>2.1</b> | Scene reconnaissance is conducted, and results are reported to relevant personnel                                                              |
|                                           | <b>2.2</b> | Location and condition of casualties is determined                                                                                             |
|                                           | <b>2.3</b> | Vertical rescue scene management procedures are followed, in accordance with organisational procedures                                         |
|                                           | <b>2.4</b> | Physical and environmental features of scene are assessed before deploying rescue resources                                                    |
|                                           | <b>2.5</b> | Risk assessment is conducted, in accordance with organisational procedures                                                                     |
|                                           | <b>2.6</b> | Access is controlled, and a safe and effective operational environment is maintained                                                           |
|                                           | <b>2.7</b> | Communication with other personnel on site is established and maintained including team and safety briefings relevant to tasks                 |
| <b>3 Establish vertical rescue system</b> | <b>3.1</b> | Vertical rescue system is conducted as appropriate to incident                                                                                 |
|                                           | <b>3.2</b> | Vertical rescue system and anchors are established, checked and monitored                                                                      |
|                                           | <b>3.3</b> | Equipment is prepared, and appropriate techniques are used, in accordance with organisational procedures                                       |

|                                           | <b>4.2</b> | Access is gained to casualties or trapped persons using vertical rescue techniques and equipment, in accordance with organisational procedures |
|                                           | <b>4.3</b> | Casualties or trapped persons are secured and prepared for removal in consultation with medical personnel                                      |
|                                           | <b>4.4</b> | Casualties are removed using vertical rescue techniques and equipment whilst preventing further injury                                         |
|                                           | <b>4.5</b> | Appropriate actions are taken to preserve incident scene, in accordance with organisational procedures                                         |

- |                                               |                                                                                                                                     |
|-----------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------|
| <b>5 Terminate vertical rescue operations</b> | <b>5.1</b> Equipment is recovered, cleaned and serviced, in accordance with organisational procedures and manufacturers' guidelines |
|                                               | <b>5.2</b> Hygiene precautions are implemented, in accordance with organisational procedures                                        |
|                                               | <b>5.3</b> Decontamination procedures are followed, in accordance with organisational procedures                                    |
|                                               | <b>5.4</b> Operational debriefing is participated in, in accordance organisational procedure                                        |
|                                               | <b>5.5</b> Operational documentation including post incident report is completed, in accordance with organisational procedures      |

## Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

## Unit Mapping Information

This unit replaces and is equivalent to PUASAR032A Undertake vertical rescue.

## Links

PUA Training Package Companion Volume Implementation Guide is found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=3eca5672-6d5a-410b-8942-810d0ba05bbf>

# Assessment Requirements for PUASAR032 Undertake vertical rescue

## Modification History

**Release 1.** This is the first release of this unit of competency in the PUA Public Safety Training Package.

## Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and includes

- applying hygiene precautions
- applying organisational policies and procedures including following scene management procedures, implementing decontamination procedures and scene preservation and management procedures
- applying Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) requirements including safe work practices
- assessing a scene
- assessing, treating and packaging casualties
- checking and maintaining vertical rescue equipment
- communicating with team members and casualties
- completing organisational documentation
- concluding vertical rescue operations
- conducting risk assessment
- determining and establishing a vertical rescue system appropriate to the type of incident including selecting and using vertical rescue techniques and equipment
- establishing safe systems to gain access to and recover casualties
- extricating casualties safely and minimising further injury or discomfort to self and others
- managing edge protection and equipment
- participating in and contributing to briefings and debriefings
- performing vertical rescues and securing and removing casualties
- preparing and responding to vertical rescue situations
- securing and removing casualties
- undertaking scene assessment and reporting on this
- using industrial fall arrest systems and devices
- using personal protective clothing and rescue equipment
- using stretchers in raising and lowering operations
- working in a team

## Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria and includes knowledge of

- casualty assessment and packaging
- conditions determining vertical rescue techniques including type of vertical rescue incident and organisational procedures
- field notes, logbook and post incident reporting requirements
- hygiene precautions
- industrial fall arrest systems and devices including harnesses, stretchers and packaging
- operational briefing processes and procedures including collecting information on operation, location, information about access and egress routes and team roles such as team leader, safety officer, technicians and command, control and coordination arrangements
- organisational documentation, policies and procedures
- physical and environmental features including weather and environmental conditions; plant machinery; utilities and services; structural elements; hazardous atmospheres; exposed, unprotected and sharp edges; natural, manmade and physical environmental features
- preservation of incident scene must include disturbing only to gain access or make scene safe and not disturbing fatality scenes until police investigation activities are completed
- principles of suspension trauma
- procedures for operating vertical rescue equipment
- processes and procedures for debriefings
- rescue scene assessment
- rescue scene management procedures including establishing and monitoring safety zones, establishing barriers and perimeter access controls, liaising with media and managing bystanders
- safety factors including safe working loads and breaking strains of vertical rescue equipment
- sources of information including personnel on scene and the public
- vertical rescue and safety systems including anchors, ascending and descending devices, edge management devices, edge protection, karabiners, lighting, pulleys, rescue ropes and tapes to industry standards
- vertical rescue equipment characteristics and limitations
- voice, whistle and other communication systems
- Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) requirements including risk mitigation and safe work practices

## Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of

assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in organisationally approved simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, rescue tools, rescue and communications equipment and personal protective clothing and equipment currently used in industry including
  - an appropriate venue for vertical rescue activities
  - vertical rescue equipment and personnel for team based activities
- applicable documentation including organisational procedures, industry standards, equipment specifications, regulations, codes of practice and operations manuals.

## PUASES001 Assess trees at emergency incidents

### Modification History

**Release 1.0** This is the first release of this unit of competency in the PUA Public Safety Training Package.

### Application

This unit of competency describes the skills and knowledge required to undertake the assessment of trees at emergency incidents. It includes trees that are no longer standing and are on the ground, are partially fallen or are lying against a structure. The unit applies to trees that have been impacted by an emergency incident which present an unacceptable risk to residents, emergency personnel, utilities, the environment and/or structures.

Tree removal can be undertaken using chainsaws and/or hand tools during emergency incidents. In removing trees, it is essential that safe systems of work to eliminate or minimise risk are implemented. Tree felling licensing and/or certification requirements may apply in some jurisdictions.

The unit is applicable to emergency services personnel who are required to assess trees for removal or stabilisation, under the direction of a crew leader, during an emergency incident. It includes preparing for a tree assessment, undertaking an initial scene assessment, conducting a tree assessment and recording and reporting on tree assessments.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

### Pre-requisite Unit

Not applicable.

### Competency Field

SES

### Unit Sector

SES

### Elements and Performance Criteria

#### ELEMENTS

#### PERFORMANCE CRITERIA

Elements describe the essential Performance criteria describe the performance needed to

outcomes.

demonstrate achievement of the element.

**1 Prepare for tree assessment**

- 1.1** Select and wear personal protective clothing and equipment, in accordance with organisational procedures, to undertake assessment of trees at the emergency incident
- 1.2** Identify and comply with organisational procedures for assessing trees, including safety requirements and Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) obligations
- 1.3** Establish and maintain communication with crew members whilst assessing trees using approved methods and tools, including hand signals

**2 Undertake initial scene assessment**

- 2.1** Review environmental conditions, including storm and fire, at emergency incident
- 2.2** Conduct an initial assessment of emergency incident scene
- 2.3** Identify and communicate environmental and other hazards, in accordance with organisational procedures
- 2.4** Assess each scene condition likely to affect safety, including the stability of each tree
- 2.5** Identify entry and exit routes, in accordance with organisational procedures
- 2.6** Complete organisational procedures and/or documentation for tree assessments

**3 Conduct tree assessments**

- 3.1** Visually assess trees, estimate mass and identify defects
- 3.2** Identify effect of gravity on compression, tension and torsion forces that occur in various parts of the trees
- 3.3** Identify the major load bearing branches of the trees and potential pivot points
- 3.4** Determine and review other factors that may affect removal of trees at emergency incident

**4 Record and report on tree assessments**

- 4.1** Finalise and record tree assessments, in accordance with organisational procedures
- 4.2** Report tree assessments to approved personnel, in accordance with organisational procedures

## Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

## Unit Mapping Information

This is a new unit.

## Links

# Assessment Requirements for PUASES001 Assess trees at emergency incidents

## Modification History

**Release 1.0** This is the first release of this unit of competency in the PUA Public Safety Training Package.

## Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and must include one practical exercise involving the assessment of trees at an emergency incident in an operational context

- complying with Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) obligations
- conducting visual assessments of trees to identify structural defects and stresses
- determining and reviewing other factors that may affect the removal of trees
- establishing and maintaining communication with crew members and others using approved methods and tools including hand signals
- estimating tree mass
- following organisational policies and procedures including safety requirements for tree operations
- identifying and communicating environmental and other hazards to crew members
- identifying compression, tension and torsion forces in trees
- recognising and reviewing environmental conditions including storm and/or fire conditions that impact trees
- recording and reporting tree assessments
- undertaking scene safety assessments including identifying entry and escape routes
- wearing personal protective clothing and equipment.

## Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and includes knowledge of

- communication methods and/or tools including hand signals
- effects of gravity on compression, tension and torsion forces and the likely outcomes when these forces are released from a tree
- emergency evacuation methods and procedures
- how to conduct tree assessments
- how to estimate tree mass
- organisational policies and procedures relevant to assessing trees at emergency incidents

- safety requirements at emergency incidents including entry and escape routes
- storm and fire conditions and how they impact trees
- types and correct fit of personal protective clothing and equipment
- types of environmental and other hazards at emergency incidents associated with assessing trees
- types of factors and other variables that may impact trees during an emergency incident
- where compression, tension and torsion forces may exist in a tree
- Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) obligations.

## Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace situations or in simulated training situations that reflect workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to a range of

- exercises, case studies or other simulations
- materials, equipment and tools used in industry including personal protective clothing and equipment
- documentation including organisational policies and procedures, industry standards, regulations, codes of practice, operational manuals and equipment specifications.

## PUASES002 Develop work plan for tree stabilisation and removal

### Modification History

**Release 1.0** This is the first release of this unit of competency in the PUA Public Safety Training Package.

### Application

This unit of competency describes the skills and knowledge required to develop a work plan for the safe removal and/or stabilisation of trees when they have been impacted by an emergency incident. It includes trees that are no longer standing and are on the ground, are partially fallen or are lying against a structure.

Trees damaged in emergency incidents, such as storms or fires, may require stabilisation and or removal to ensure the safety of emergency services personnel and volunteers. Consideration of forces that may be trapped within a tree when using chainsaws and/or hand tools is essential. Tree felling licensing and/or certification requirements may apply in some jurisdictions.

The unit is applicable to emergency services personnel and volunteers who are required, under the direction of a crew leader, to apply tree stabilisation techniques or to cut up and remove trees that are no longer standing upright. It includes formulating a work plan and ensuring that appropriate equipment is available to complete required work tasks.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

### Pre-requisite Unit

PUSES001 Assess trees at emergency incidents

# Assessment Requirements for PUASES002 Develop work plan for tree stabilisation and removal

## Modification History

**Release 1.0** This is the first release of this unit of competency in the PUA Public Safety Training Package.

## Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and must include one practical exercise involving the development of a work plan for tree stabilisation and removal in an operational context

- communicating work plan to crew members including safety protocols, dumpsites, work zones and management of debris
- complying with industry standards, legislative requirements and Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) obligations
- determining additional equipment requirements
- determining entry and escape routes
- developing work plan for tree stabilisation and/or removal
- ensuring appropriate personal protective clothing and equipment is available
- ensuring removal or exclusion of bystanders from work zones
- following organisational policies and procedures including completing all required documentation
- identifying compression, tension and torsion forces and whether chain saw and/or hand tools are required
- identifying personal capabilities
- recognising tree safety hazards and determining risk control measures
- undertaking dynamic risk assessments
- verifying equipment readiness.

## Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and includes knowledge of

- communication methods and tools including hand signals
- dynamic risk assessments
- effects of gravity on compression, tension and torsion forces and likely outcomes when these forces are released from a tree
- entry and escape routes at emergency incidents

- environmental conditions including storm and fire and how they impact trees
- industry standards, legislative requirements and Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) obligations
- organisational policies and procedures including equipment maintenance and development of work plans
- safety requirements for tree stabilisation and/or removal
- tree defects including identification of dangerous trees
- tree safety hazards and risk control measures
- types and correct fit of personal protective clothing and equipment
- types of work plans for tree stabilisation and/or removal including safety protocols, dumpsites, work zones and management of debris
- use of equipment to stabilise and support trees during an operation.

## Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace situations or in simulated training situations that reflect workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to a range of

- exercises, case studies or other simulations
- materials, equipment and tools used in industry including personal protective clothing and equipment
- documentation including organisational policies and procedures, industry standards, regulations, codes of practice, operational manuals and equipment specifications.

# PUASES003 Stabilise and remove trees during emergency incidents

## Modification History

**Release 1.0** This is the first release of this unit of competency in the PUA Public Safety Training Package.

## Application

This unit of competency describes the skills and knowledge required to safely remove or stabilise trees when they have been affected by an emergency incident. It applies to trees that have been impacted by an emergency incident which present an unacceptable risk to residents, emergency personnel, utilities, the environment and/or structures.

Tree removal can be undertaken using chainsaws and/or hand tools during emergency incidents. In removing trees, it is essential that safe systems of work to eliminate or minimise risk are implemented. Tree felling licensing and/or certification requirements may apply in some jurisdictions.

The unit is applicable to emergency services personnel and volunteers who are required, under the direction of a crew leader, to remove trees that are no longer safe. It includes establishing operational management of work zones, determining the order of tree removal, removing trees and concluding tree removal operations.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Pre-requisite Unit

PUASES002 Develop work plan for tree stabilisation and removal

## Competency Field

SES

## Unit Sector

SES

## Elements and Performance Criteria

### ELEMENTS

### PERFORMANCE CRITERIA

Elements describe the essential    Performance criteria describe the performance needed to

outcomes.

demonstrate achievement of the element.

## **1 Establish operational management of work zone**

- 1.1** Confirm adherence to work zones identified in work plan
- 1.2** Verify entry and exit routes for work zone where tree removal operations will take place
- 1.3** Brief crew members on plan of attack for chain saw and/or hand tool operations
- 1.4** Review communication methods and tools including hand signals to be used in the work zone
- 1.5** Ensure safety and evacuation plan for injured personnel is established
- 1.6** Ensure personal protective clothing and equipment is used, in accordance with organisational procedures
- 1.7** Crew members are asked to confirm their capability for tree removal tasks
- 1.8** Check and maintain equipment, including chainsaw, in accordance with manufacturer's recommendations

## **2 Prepare to commence cutting plan**

- 2.1** Assess requirements for additional equipment and tools
- 2.2** Assess each tree to determine the order for stabilisation and/or removal work
- 2.3** Stabilise trees, as required
- 2.4** Develop plan for a sequence of cuts for tree removal
- 2.5** Review compression forces at the location of the proposed cuts
- 2.6** Determine effects and consequences of proposed cuts
- 2.7** Make adjustments to the cutting plan, as required

## **3 Remove trees**

- 3.1** Implement cutting plan, in accordance with organisational procedures
- 3.2** Undertake dynamic and ongoing risk assessment, in accordance with organisational procedures, throughout cutting activities

- 3.3 Communicate changes to cutting activities to crew members within the work zone
  - 3.4 Make adjustments to the cutting and safety plan, as required
  - 3.5 Monitor hydration and fatigue level, in accordance with organisational procedures
  - 3.6 Monitor tree operations equipment and personal safety, in accordance with organisational procedures
  - 3.7 Clear working area for tree removal operations of debris, in accordance with organisational procedures
  - 3.8 Review environmental hazards and risk control measures, as required
- 4 **Conclude tree removal operations**
  - 4.1 Conclude tree removal operations and recover equipment, in accordance with organisational procedures
  - 4.2 Complete and submit organisational documentation to conclude tree removal operations
  - 4.3 Provide a final report to the crew leader, in accordance with organisational procedures

## Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

## Unit Mapping Information

This is a new unit.

## **Links**

Companion Volume Implementation Guides are found in VETNet -

# Assessment Requirements for PUASES003 Stabilise and remove trees during emergency incidents

## Modification History

**Release 1.0** This is the first release of this unit of competency in the PUA Public Safety Training Package.

## Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and must include one practical exercise involving the stabilisation and removal of a tree in an operational context

- actioning work plan for tree stabilisation and removal including establishing the order of tree stabilisation and removal work and adherence to work zones
- assessing additional equipment requirements
- briefing crew members on plan of attack
- checking and maintaining equipment to manufacturers' recommendations and organisational policies and procedures
- clearing debris
- communicating with personnel using approved methods and tools including hand signals
- completing near miss incident and final reporting requirements
- complying with industry standards, legislative requirements and Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) obligations
- conducting assessments of trees including identifying structural defects and stresses
- determining personal capabilities of crew members
- determining the consequences of proposed cuts and reviewing compression forces
- following organisational policies and procedures including safety requirements
- implementing and adjusting cutting plan including reviewing tree cutting sequence
- monitoring hydration, fatigue, equipment and personal safety
- recognising tree safety hazards and implementing risk control measures
- reporting to crew leader
- reviewing environmental conditions
- using approved equipment to stabilise and remove trees
- using dynamic risk assessments
- verifying entry and escape routes
- wearing personal protective clothing and equipment
- working with approved equipment including chainsaws and/or hand tools to stabilise and remove trees.

## Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and includes knowledge of

- communication methods and tools including hand signals
- dynamic risk assessments
- effects and consequences of proposed cuts on compression forces in trees
- effects of gravity on compression, tension and torsion forces and likely outcomes when these forces are released from a tree
- environmental conditions and how they impact trees
- environmental hazards relevant to tree removal
- hydration, fatigue, equipment and personal safety requirements
- identification of tree defects
- incident and final report requirements including near miss reporting
- industry standards, legislative requirements and Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) obligations
- maintenance of equipment to manufacturers' recommendations
- order of tree stabilisation and removal work at an emergency incident
- organisational policies and procedures
- personal protective clothing and equipment
- procedures for clearing debris
- requirements for briefings
- safety and evacuation plans
- safety requirements for tree stabilisation and removal at emergency incidents
- sequence for stabilising and removing a tree safely including steps in planning for the management of compression forces
- tree hazards and risk control measures
- types of equipment that stabilise and/or support trees
- types of work zones.

## Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace situations or in simulated training situations that reflect workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to a range of

- exercises, case studies or other simulations
- materials, equipment and tools used in industry including personal protective clothing and equipment
- documentation including organisational policies and procedures, industry standards, regulations, codes of practice, operational manuals and equipment specifications.

# PUASES008 Undertake storm and water damage operations

## Modification History

**Release 1.** This is the first release of this unit of competency in the Public Safety Training Package.

## Application

This unit of competency involves the skills and knowledge required to undertake storm and water damage operations as a member of a response team.

Flooding whether caused by slow river rise, storm water, storm surge or flash flooding, has a similar impact in terms of water damage. Techniques for minimising the effects of water entry into properties are common to storm, flood and other water damage events.

The unit applies to personnel responding as a member of a team to storm and/or water damage operations in rural and urban environments which can range in intensity and impact from localised thunderstorm or windstorm events to tropical cyclones. Evacuation and rescue by boat are not considered in this unit.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Pre-requisite Unit

Not applicable

## Competency Field

SES Sector

## Unit Sector

State/Territory Emergency Services

## Elements and Performance Criteria

### ELEMENTS

Elements describe the essential outcomes.

#### **1 Prepare for storm and water operations**

### PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

#### **1.1** Operation and task information is obtained through situational awareness and command structure at an

- incident site
- 1.2** Hazard identification, risk assessment and control measures are undertaken, in accordance with organisational policies and procedures
  - 1.3** Equipment is selected based on incident information and is checked to ensure it is ready for operational use
  - 1.4** Personal protective clothing and equipment is selected and appropriately worn
  - 1.5** Work area isolation methods are applied to ensure safety, in accordance with organisational policies and procedures
  - 1.6** Support for safe and timely evacuation is provided
- 2 Provide information which assists with operations**
- 2.1** Liaison with stakeholders is undertaken to provide information which increases awareness of incident situation, safety and to facilitate operational requirements
  - 2.2** Information is provided to crew/team leader
- 3 Undertake storm and water operations**
- 3.1** Safety is ensured when undertaking and completing operational tasks, by working safely in conjunction with other team members
  - 3.2** Debris is removed, cleared and/or controlled to minimise risk of injury and any further damage to structure and to ensure safe access to and from incident site
  - 3.3** Techniques for temporary repairs and/or improvised support are applied, in accordance with organisational procedures
  - 3.4** Sandbagging techniques are used to minimise further damage
  - 3.5** Water diversions are created to mitigate the effects of damage
  - 3.6** Support is provided to personnel undertaking roof repairs and/or working at height through the setup, placement and access to appropriate tools and equipment
  - 3.7** Trees causing a hazard to life or property are secured,

removed and/or reported, in accordance with organisational policies and procedures

#### **4 Complete operations**

- 4.1** Equipment is recovered, cleaned and serviced, in accordance with organisational procedures and manufacturers' guidelines
- 4.2** Equipment failure and/or deficiency is reported, in accordance with organisational procedures
- 4.3** Signs and symptoms of operational stress in self and others are recognised and reported to relevant personnel
- 4.4** Information for operational documentation and equipment logs is contributed to
- 4.5** Debriefing is participated in, as required, in accordance with organisational policies and procedures

### **Foundation Skills**

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

### **Range of Conditions**

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

### **Unit Mapping Information**

This unit replaces and is equivalent to PUASES008A Undertake storm and water damage operations.

### **Links**

PUA Training Package Companion Volume Implementation Guide is found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=3eca5672-6d5a-410b-8942-810d0ba05bbf>

# Assessment Requirements for PUASES008 Undertake storm and water damage operations

## Modification History

**Release 1.** This is the first release of this unit of competency in the Public Safety Training Package.

## Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and includes

- applying work area isolation techniques
- applying Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) requirements
- communicating with stakeholders about situational awareness, safety and operational requirements
- completing operations including participating in operational debriefs
- completing organisational documentation
- constructing sandbag barriers and temporary repairs
- identifying and using equipment and tools
- identifying hazards and implementing risk assessment and control measures
- meeting reporting requirements
- preparing for storm and water operations including using task information
- providing information which assists with operations
- recognising and reporting operational stress
- removing debris safely
- returning equipment to operational readiness after use
- supporting roof and height crews to complete operations
- taking precautions against electrical hazards
- undertaking situational awareness
- undertaking storm and water operations
- undertaking water diversions
- using initiative to operate effectively under direction
- using mitigation techniques to minimise and/or restrict water damage
- utilising temporary structural weather proofing techniques to minimise further damage and to make safe
- wearing appropriate personal protective clothing and equipment working safely

## Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria and includes knowledge of

- anchors either constructed or improvised characteristics and limitations of equipment and tools
- emergency public information and warning techniques
- equipment and tools including types of pumps and power tools suitable for use
- hazard identification and risk control techniques
- height operations
- legislation related to storm and water operations including entry into property and/or workplaces
- operational and task information requirements
- organisational documentation, policies and procedures
- organisational policies and procedures including performance standards, personnel roles and responsibilities and Work, Health and Safety (WHS)/Occupational Health and Safety requirements, practices and guidelines
- potential stakeholders
- processes and procedures for debriefings
- resources and techniques for communicating with the community
- safety principles and practices
- set up, placement and access to tools and equipment including using safe access techniques
- signs and symptoms of operational stress
- situational awareness processes
- storm and water damage mitigation techniques
- structural integrity
- support organisations and agencies
- water diversions techniques including earth walls, fabricated barriers, work area isolation, temporary repairs and sandbagging
- working at height systems

## Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Assessment must occur in workplace operational situations. Where this is not appropriate, assessment must occur in industry approved simulated workplace operational situations that

reflect workplace conditions.

Resources for assessment must include access to

- a range of relevant exercises, case studies and/or simulations including
  - storm damage and flood mitigation operations and/or scenarios as a member of a team acting under direction and supervision
- relevant and appropriate materials, equipment, tools and personal protective clothing and equipment currently used in industry including
  - access to a response team
- applicable documentation including organisational procedures, industry standards, equipment specifications, regulations, codes of practice and operations manuals.

## PUASES009 Undertake inland floodboat operations

### Modification History

**Release 1.** This is the first release of this unit of competency in the Public Safety Training Package.

### Application

This unit of competency involves the skills and knowledge required to act as a member of a crew of a floodboat on inland waterways in low risk water environments, including in times of flood. Floodboat operations may be conducted in urban or rural environments but does not include offshore operations.

Floodboat operators are expected to act as either the operator of the boat or as a member of the crew. A minimum of two operators is required on a floodboat, one person will be in charge of the floodboat.

Requirements for the operation of the floodboat and crew tasks will be determined by the nature of the incident and/or operation, legislative requirements, emergency management plans, organisational policies and procedures and incident context. Typical operations may include evacuations, transport, searches, rescues and resupply operations.

The unit applies to emergency services personnel, marine operators and waterways management organisations, and marine rescue organisations.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

### Pre-requisite Unit

demonstrate achievement of the element.

## **1 Prepare for floodboat operation**

- 1.1** Operational and task information is obtained
- 1.2** Operational and task information is used to determine response and equipment requirements
- 1.3** Equipment is checked for serviceability and is stowed for road transportation to prevent loss or damage
- 1.4** Pre-launch checks are conducted, in accordance with organisational policies and procedures
- 1.5** Personal protective clothing and equipment is selected and worn, as appropriate

## **2 Operate floodboat**

- 2.1** Hazard identification, risk assessment and control measures are undertaken, in accordance with organisational policies and procedures
- 2.2** Vessel is launched safely, in accordance with organisational procedures
- 2.3** Pre-start checks are conducted, in accordance with organisational policies and procedures
- 2.4** Start up procedures are followed, in accordance with organisational policies, procedures and manufacturers' guidelines
- 2.5** Vessel is correctly boarded, loaded and trimmed for safety
- 2.6** Vessel is operated applying appropriate techniques
- 2.7** Emergency drills are conducted, as required
- 2.8** Lookout procedures are conducted, in accordance with organisational policies and procedures

## **3 Undertake floodboat tasks**

- 3.1** Floodboat search procedures are conducted, in accordance with organisational procedures and standards
- 3.2** Cargo is transported safely and efficiently
- 3.3** People or objects in the water are recovered safely and efficiently

|                                        |            |                                                                                                                                              |
|----------------------------------------|------------|----------------------------------------------------------------------------------------------------------------------------------------------|
|                                        | <b>3.4</b> | Bodies are recovered using appropriate equipment and tools, in accordance with organisational procedures, to meet coronial requirements      |
| <b>4 Recover and restore floodboat</b> | <b>4.1</b> | Vessel is recovered                                                                                                                          |
|                                        | <b>4.2</b> | Vessel and associated equipment are stored, cleaned and serviced, in accordance with organisational procedures and manufacturers' guidelines |
|                                        | <b>4.3</b> | Signs and symptoms of operational stress in self and others is recognised and reported to relevant personnel                                 |
|                                        | <b>4.4</b> | Debriefing requirements are contributed to, in accordance with organisational policies and procedures                                        |
|                                        | <b>4.5</b> | Operational documentation is completed, in accordance with organisational policies and procedures                                            |

## Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

emergency drills must include

- abandon ship
- break down
- capsize
- distress
- emergency stop
- fire
- manoeuvring without motor
- person overboard
- towing

## Unit Mapping Information

This unit replaces and is equivalent to PUASES009A Undertake inland floodboat operations.

# Assessment Requirements for PUASES009 Undertake inland floodboat operations

## Modification History

**Release 1.** This is the first release of this unit of competency in the Public Safety Training Package.

## Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements, performance criteria and range of conditions on at least one occasion and includes

- applying Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) requirements
- collecting and using operational and/or task information
- communicating with people recovered from water and crew members particularly in relation to situational awareness, safety and operational requirements
- completing organisational documentation
- contributing to debriefing sessions
- determining techniques for conducting waterway searches
- handling injured casualties with care whilst recovering to floodboat
- identifying hazards and implementing risk assessments and control measures
- implementing floodboat handling techniques in a variety of conditions
- implementing organisational policies and procedures
- implementing techniques for securing vessel
- operating a floodboat
- participating in emergency drills
- preparing for floodboat operations
- recovering and restoring floodboat
- rescuing people and recovering objects from water
- returning equipment to organisational readiness after use including conducting wash downs and motor flushes
- selecting and using equipment and tools appropriately
- undertaking floodboat tasks
- using personal protective clothing and equipment

## Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements, performance criteria and range of conditions and includes

knowledge of

- boat handling under adverse conditions including fast flowing currents and operating in and around buildings, structures, fences and power lines
- characteristics and limitations of floodboats and equipment
- effects of water moving over objects and obstacles
- emergency drills
- interorganisational service arrangements including roles and responsibilities of other emergency services and relationships with
- nature of flood water hazards including environmental threats
- organisational documentation, policies and procedures including operational doctrine; personnel roles and responsibilities; risk mitigation; personal hygiene; reconnaissance processes and Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) legislated requirements, practices and guidelines
- personal protective clothing and equipment
- processes and procedures for debriefings
- signs and symptoms of stress

## Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Assessment must occur in workplace operational situations. Where this is not appropriate, assessment must occur in industry approved simulated workplace operational situations that reflect workplace conditions.

Resources for assessment must include access to

- a range of relevant exercises, case studies, simulations and/or scenarios for floodboats
- relevant and appropriate materials, tools and personal protective clothing and equipment currently used in industry including
  - equipment used in floodboat operations and a floodboat crew
- applicable documentation including organisational procedures, industry standards, equipment specifications, regulations, codes of practice and operations manuals.

# PUASES010 Plan, activate and maintain a communications network

## Modification History

**Release 1.** This is the first release of this unit of competency in the Public Safety Training Package.

## Application

This unit of competency involves the skills and knowledge required to plan, activate and maintain a communications network in routine and operational situations. It informs the roles and responsibilities of individuals who plan, activate and maintain a communications network.

The unit is applicable to emergency services personnel, conservation and land management agencies, tourism operators, search and rescue operators, local government agencies, contractors and volunteer organisations.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Pre-requisite Unit

PUAOPE013 Operate communications systems and equipment

## Competency Field

SES Sector

## Unit Sector

State/Territory Emergency Services

## Elements and Performance Criteria

### ELEMENTS

Elements describe the essential outcomes.

#### **1 Identify operational communication needs**

### PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

**1.1** Operational communications considerations and requirements are identified, based on operational needs

**1.2** Operational and task information is used to determine

|                                                      |            |                                                                                                                                     |
|------------------------------------------------------|------------|-------------------------------------------------------------------------------------------------------------------------------------|
|                                                      |            | communication network and equipment requirements                                                                                    |
|                                                      | <b>1.3</b> | Agencies, organisations and individuals involved in the operation are identified                                                    |
|                                                      | <b>1.4</b> | Established arrangements and equipment for communication are identified                                                             |
|                                                      | <b>1.5</b> | Hazards and environmental conditions likely to impact on communication are identified, assessed and controlled                      |
| <b>2 Establish communications plan</b>               | <b>2.1</b> | Communications plan is prepared based on identified operational communication needs                                                 |
|                                                      | <b>2.2</b> | Appropriate communication strategies and equipment are included in the communications plan and network                              |
|                                                      | <b>2.3</b> | Personnel are briefed on communications plan details                                                                                |
|                                                      | <b>2.4</b> | Communications plan is implemented, monitored and modified to meet changes in operational situation                                 |
| <b>3 Activate and maintain communication network</b> | <b>3.1</b> | Prior to activation of the communications plan the communication network is set up and tested, with faults identified and addressed |
|                                                      | <b>3.2</b> | Communication network is activated                                                                                                  |
|                                                      | <b>3.3</b> | Communication network performance is monitored, analysed and adjusted to ensure effective and efficient communications              |
|                                                      | <b>3.4</b> | Communication network is modified to meet changes in operational situation and network capacity                                     |
| <b>4 Terminate communication network</b>             | <b>4.1</b> | Communication network is closed, in accordance with organisational policies, procedures and operational requirements                |
|                                                      | <b>4.2</b> | Communication network is dismantled and refurbished, in accordance with organisational procedures and manufacturers' guidelines     |
|                                                      | <b>4.3</b> | Maintenance requirements are recognised, recorded and reported, in accordance with organisational procedures                        |
|                                                      | <b>4.4</b> | Operational documentation is completed, in accordance with organisational policies and procedures                                   |

- 4.5** Efficiency of the communications plan and network is reviewed

## **Foundation Skills**

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## **Range of Conditions**

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

## **Unit Mapping Information**

This unit replaces and is equivalent to PUASES010A Plan, activate and maintain a communications network.

## **Links**

PUA Training Package Companion Volume Implementation Guide is found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=3eca5672-6d5a-410b-8942-810d0ba05bbf>

# Assessment Requirements for PUASES010 Plan, activate and maintain a communications network

## Modification History

**Release 1.** This is the first release of this unit of competency in the Public Safety Training Package.

## Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and includes

- activating and maintaining communication network using appropriate strategies
- analysing communication network performance
- applying Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) requirements
- communicating technical information clearly and concisely
- establishing communications plan
- identifying operational communication needs
- interpreting topographic, meteorological and geophysical data and its impact on communication
- planning, solving problems and make decisions about communication network implementation
- preparing, implementing and monitoring communications plan
- terminating communication network
- using communications equipment

## Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria and includes knowledge of

- communication resources and capabilities
- communication strategies
- factors that influence communication network performance
- features of different communication equipment and networks
- installation and performance of communication equipment internet and mobile communication technologies and systems
- operational context and considerations for communication pre-plans organisational documentation
- organisational policies and procedures including legislation related to the Federal Radio Communications Act; operational, corporate and strategic plans; communication policies and

- personnel roles and responsibilities
- requirements for communication networks
- roles, resources and capabilities of other communication providers
- security issues for operational communication networks
- Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) legislated responsibilities, practices and guidelines including risk mitigation

## Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Assessment must occur in workplace operational situations. Where this is not appropriate, assessment must occur in industry approved simulated workplace operational situations that reflect workplace conditions.

Competency must demonstrate skills and knowledge of operational communication considerations including access to

- adverse radio or telecommunications conditions
- an established operations centre or operations in a field situation
- determinations of scope, size and nature of response
- limited resources
- pre-planned communication networks
- single or multi-agency or organisational response

Resources for assessment must include access to

- a range of relevant exercises, case studies and/or simulations relevant and appropriate materials, tools and personal protective clothing and equipment currently used in industry including
  - organisational communications equipment
- applicable documentation including organisational procedures, industry standards, equipment specifications, regulations, codes of practice and operations manuals.

## PUASES011 Manage emergency operations

### Modification History

**Release 1.** This is the first release of this unit of competency in the Public Safety Training Package.

### Application

This unit of competency involves the skills and knowledge required to manage emergency operations, usually within a single agency command context.

Emergency operations are usually the result of an event such as a flood, storm or bushfire that generates a significant response requirement over a large area for protracted periods of time. Operations such as this differ from incidents where relatively small responses are required in tightly defined areas for relatively short periods of time such as a road accident.

The unit is applicable to personnel who act as operational managers during emergency operations.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

### Pre-requisite Unit

Not applicable.

### Competency Field

SES Sector

### Unit Sector

State/Territory Emergency Services

### Elements and Performance Criteria

#### ELEMENTS

Elements describe the essential outcomes.

#### **1 Prepare for operations**

#### PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

- 1.1** Operational information is obtained, and hazards are identified to permit accurate risk assessment of the problem

- |                                         |            |                                                                                                                                                                             |
|-----------------------------------------|------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                                         | <b>1.2</b> | Operational plans are activated, in accordance with emergency management practices and procedures                                                                           |
|                                         | <b>1.3</b> | Operations centre is activated and confirmed as ready for use                                                                                                               |
|                                         | <b>1.4</b> | Operations centre staff recall system is activated                                                                                                                          |
| <b>2 Manage an operations centre</b>    | <b>2.1</b> | Operations centre tasks are allocated, staff rosters are confirmed, and briefings are conducted, in accordance with organisational procedures and operational plans         |
|                                         | <b>2.2</b> | Internal and external liaison networks are activated and maintained to ensure ongoing communication                                                                         |
|                                         | <b>2.3</b> | Operations centre staff are supervised to ensure they meet Work, Health and Safety (WHS)/ Occupational Health and Safety (OHS) guidelines and other regulatory requirements |
|                                         | <b>2.4</b> | Physical and financial resources are managed, in accordance with organisational policies and procedures                                                                     |
|                                         | <b>2.5</b> | Operations centre staff are tasked to collect and collate operational information, in accordance with organisational procedures                                             |
| <b>3 Manage operational information</b> | <b>3.1</b> | Information flow is managed, in accordance with organisational procedures                                                                                                   |
|                                         | <b>3.2</b> | Operational information is analysed to modify and update plans and prioritise tasks, in accordance with organisational policies, procedures and operational plans           |
|                                         | <b>3.3</b> | Regular and timely situation reports are raised and distributed, in accordance with organisational procedures and standards                                                 |
|                                         | <b>3.4</b> | Media liaison is managed, in accordance with organisational procedures and operational objectives                                                                           |
|                                         | <b>3.5</b> | Communication and information systems are implemented and monitored to ensure operational objectives are met                                                                |
| <b>4 Make operational decisions</b>     | <b>4.1</b> | Extent of operational area and objectives are identified and promptly detailed                                                                                              |
|                                         | <b>4.2</b> | Operational strategies are identified, assessed and implemented, in accordance with organisational                                                                          |

- procedures and emergency management arrangements
- 4.3 Hazards are identified and prioritised, risks assessed to ensure control measure response is appropriate to the type and scale of event
  - 4.4 Response teams are rostered, in accordance with organisational procedures
  - 4.5 Termination of operation is accomplished, in accordance with organisational procedures and operational standards
- 5 Provide leadership**
- 5.1 Briefings are conducted with operational team members
  - 5.2 Operational objectives are identified and communicated to all team members and staff
  - 5.3 Team cohesion is developed and maintained
  - 5.4 Conflict is dealt with promptly and appropriately
  - 5.5 Leadership is displayed through management, guidance, supervision of the performance of staff in emergency operations situations
  - 5.6 Concise, clear delegation and accountability processes are implemented
  - 5.7 Relevant legislation is implemented and complied with
  - 5.8 Signs and symptoms of operational stress in self and others is recognised and action is initiated
- 6 Manage post operation activities**
- 6.1 Debriefing is conducted with operational team members and staff
  - 6.2 Operational reports are prepared, in accordance with organisational procedures and standards

## Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work

environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

## **Unit Mapping Information**

This unit replaces and is equivalent to PUASES011A Manage emergency operations.

# Assessment Requirements for PUASES011 Manage emergency operations

## Modification History

**Release 1.** This is the first release of this unit of competency in the Public Safety Training Package.

## Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and includes

- applying Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) requirements
- assessing local community demographic factors such as age and language
- communicating clearly with colleagues and stakeholders
- conducting clear, structured briefings and debriefings with lesson learned reports distributed and acted on
- creating an operational plan and adapting it as circumstances change
- delegating tasks and roles appropriately
- establishing an improvised operations centre
- forecasting resource requirements
- identifying operational areas of concern and subdividing as needed
- leading operations centre staff and team leaders
- making decisions using problem solving techniques
- making operational decisions
- managing an operations centre
- managing communications within and between teams and organisations
- managing operations centre staffing including rostering, allocation of tasks, shift handovers, rest and break periods, conflict resolution, managing information and recognising stress in self
- managing post operation activities
- participating in planning for an emergency response including setting up appropriate control, command and coordination structures
- preparing for operations
- providing leadership whilst working in a team
- providing regular and timely situation reports
- recognising need for and taking personal rest periods
- supervising operational information

## Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria and includes knowledge of

- alerts and warning systems
- communication equipment
- emergency management arrangements including activation of operations centres
- hazards
- impact of emergencies on the community and environment
- information management and communication systems
- level and complexity of activities of operations centres including criteria for allocating tasks, assessments of tasks, resources available and response team competency and authority to act
- operational information requirements
- operational plans and reports
- organisational documentation
- organisational policies and procedures including legislation, operational, corporate and strategic plans, personnel roles and responsibilities and media liaison
- principles and practices of conflict resolution, operational and response management, risk management and leadership management processes and procedures for briefings and debriefings
- resource capabilities and access to them
- roster requirements, rest periods and processes for shift handovers
- signs and symptoms of operational stress
- Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) legislated requirements

## Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

# PUASES012 Work as a team member in an emergency operations centre

## Modification History

**Release 1.** This is the first release of this unit of competency in the Public Safety Training Package.

## Application

This unit of competency involves the skills and knowledge required to support an emergency operation as a member of a team by providing information collection, collation, dissemination and presentation in an emergency operations centre. It informs the roles and responsibilities of individuals who act as a member of a team within an emergency operation centre at the commencement, during and completion of an incident operational period.

The unit is applicable to members of emergency services organisations, police officers, ambulance and paramedic services, fire service personnel and volunteers.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Pre-requisite Unit

Not applicable

## Competency Field

SES Sector

## Unit Sector

State/Territory Emergency Services

## Elements and Performance Criteria

### ELEMENTS

Elements describe the essential outcomes.

#### **1 Activate an operations centre and initiating systems**

### PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

#### **1.1 Initial task information is obtained on likely nature of incident response**

- 1.2 Operations centre is opened, in accordance with organisational procedures
  - 1.3 Communications and information management computerised systems are activated or established, in accordance with organisational procedures
  - 1.4 Appropriate plans and directories are accessed, in accordance with organisational decisions on the nature of response
  - 1.5 Operations centre staff are activated, in accordance with organisational procedures
  - 1.6 Other organisations/agencies are informed that the operations centre has been activated, in accordance with organisational procedures
- 2 **Collect, maintain and display information**
  - 2.1 Operational information is actively sought
  - 2.2 Operational information is recorded legibly and/or electronically, in accordance with organisational procedures
  - 2.3 Operational priorities are applied, in accordance with organisational procedures
  - 2.4 Information is evaluated for currency and correctness and advice is provided to appropriate personnel
  - 2.5 Incident files are maintained, in accordance with organisational policies and procedures
  - 2.6 Information displays are plotted and/or updated, as required, in accordance with organisational procedures
- 3 **Disseminate information**
  - 3.1 Briefing areas are prepared, in accordance with organisational procedures
  - 3.2 Information for situational reports, operational orders and media releases is assembled for appropriate personnel
  - 3.3 Relevant information is disseminated under direction of appropriate personnel, in accordance with organisational policies and procedures
  - 3.4 Information is distributed within the operations centre, in accordance with organisational policies and

procedures

**3.5** Relevant information is included in incoming shift hand over details

**4 Close an operations centre 4.1** Records and information are filed, in accordance with organisational procedures

**4.2** Communication systems are reset to standby modes, in accordance with organisational policies and procedures

**4.3** Operations centre is returned to operational readiness to allow for rapid reactivation, as required

**4.4** Information is provided to appropriate personnel to assist with post operational reports, in accordance with organisational procedures

**4.5** Signs and symptoms of operational stress in self and others is recognised and promptly reported to appropriate personnel

**4.6** Debriefing requirements are met, in accordance with organisational procedures

**4.7** Other organisations/agencies are informed that the operations centre has been closed, in accordance with organisational policies and procedures

## Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

## Unit Mapping Information

This unit replaces and is equivalent to PUASES012A Work as a team member in an emergency operations centre.

# Assessment Requirements for PUASES012 Work as a team member in an emergency operations centre

## Modification History

**Release 1.** This is the first release of this unit of competency in the Public Safety Training Package.

## Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and includes

- activating an operations centre and initiating systems
- applying Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) requirements
- closing an operations centre
- collecting, maintaining and displaying operational information
- completing organisational documentation using approved recording processes
- disseminating information
- participating in debriefings plotting operational information
- presenting information for and to decision makers
- reading and interpreting information including maps
- recognising and reporting stress
- recording and prioritising requests for assistance
- undertaking electronic communications clearly and concisely
- undertaking work in an emergency operations centre in a variety of roles
- using communications systems, equipment and computerised information storage and/or retrieval systems

## Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria and includes knowledge of

- dissemination of information
- emergency operations
- emergency operations centre activation and deactivation procedures
- information and communication technology systems used in emergency operation centres
- information collecting
- local, state, territory and federal emergency management organisations operational information plotting
- organisational and operational documentation

- organisational policies and procedures including operational, corporate and strategic plans; personnel roles and responsibilities and legislative obligations
- other organisations, agencies and/or stakeholders
- plans and directories
- processes and procedures for debriefings
- processes and procedures for requests for assistance online or electronically
- signs and symptoms of operational stress
- types of operational information
- Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) requirements, practices and guidelines including hazard and risk control methods

## Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

# PUASES013 Undertake storm and water damage operations performed at heights

## Modification History

**Release 1.** This is the first release of this unit of competency in the Public Safety Training Package.

## Application

This unit of competency involves the skills and knowledge required to undertake storm and water damage operations performed at height as a member of a response team. It informs the roles and responsibilities for those undertaking tasks performed at heights to mitigate damage caused by storm.

Height is defined by organisational policy and legislation that deals specifically with working at height.

The unit is applicable to members of emergency services organisations, roof repair services, emergency operators in the mining industry and rural and metropolitan firefighters.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Pre-requisite Unit

PUASES008 Undertake storm and water damage operations

## Competency Field

|-----------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                                               | command structure at the incident site                                                                                                                                         |
|                                               | <b>1.2</b> Scene reconnaissance is promptly conducted at height and the results are reported                                                                                   |
|                                               | <b>1.3</b> Hazards and environmental conditions are identified, risks are assessed, and control measures are implemented                                                       |
| <b>2 Mitigate the effects of storm damage</b> | <b>2.1</b> Safety systems for working at heights are identified, established and are used, in accordance with organisational procedures                                        |
|                                               | <b>2.2</b> Equipment is selected based on incident information and is checked, in accordance with organisational procedures, to ensure it is ready for operational use         |
|                                               | <b>2.3</b> Personal protective clothing and equipment is prepared and worn, as required                                                                                        |
|                                               | <b>2.4</b> Techniques are used to minimise further damage from water entry and to provide for safe access to and from buildings or structures, wherever possible               |
|                                               | <b>2.5</b> Buildings or structures are temporarily repaired to make them safe, to minimise further damage and to provide for safe access to and from the property, as required |
| <b>3 Complete operations</b>                  | <b>3.1</b> Equipment is recovered, cleaned and serviced, in accordance with organisational procedures and manufacturers' guidelines, prior to standing down from the operation |
|                                               | <b>3.2</b> Signs and symptoms of operational stress in self and others is recognised and reported to relevant personnel                                                        |
|                                               | <b>3.3</b> Operational documentation is completed, in accordance with organisational procedures and standards                                                                  |

## Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work

environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

## **Unit Mapping Information**

This unit replaces and is equivalent to PUASES013A Undertake storm and water damage operations performed at heights.

## **Links**

PUA Training Package Companion Volume Implementation Guide is found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=3eca5672-6d5a-410b-8942-810d0ba05bbf>

# Assessment Requirements for PUASES013 Undertake storm and water damage operations performed at heights

## Modification History

**Release 1.** This is the first release of this unit of competency in the Public Safety Training Package.

## Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and includes

- applying Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) requirements
- collecting and reporting operational and task information including access and egress routes, command, control and coordination arrangements, extent and nature of damage, location, magnitude and type of event, identified and potential hazards and weather forecasts
- communicating with personnel in relation to situational awareness, safety and operational requirements
- completing documentation
- conducting and completing at height storm and water damage operations
- conducting scene reconnaissance including gathering systematic operational and task information on route to and after arrival at scene
- eliminating and controlling hazards
- identifying hazards and defining risk
- implementing safety precautions for working at heights systems
- implementing techniques to make structures and roofing safe
- mitigating effects of storm damage
- providing temporary roof waterproofing repairs
- using equipment including hand and/or power tools, ladders, ropes, anchors and safe work at heights system
- using temporary roof coverings
- wearing personal protective clothing and equipment
- working in a team

## Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria and includes knowledge of

- characteristics and limitations of equipment
- communication methods and techniques

- general building construction techniques
- hazard minimisation and risk control techniques
- legislation surrounding entry into residences and/or workplaces
- nature of potential hazards including hazardous materials and electricity
- organisational documentation and policies and procedures including legislation, operational plans and personnel roles and responsibilities
- processes and procedures for briefings and debriefings
- roof materials and repair methods
- scene reconnaissance
- signs and symptoms of operational stress
- storm and water damage operational and task information requirements
- storm damage mitigation concepts
- techniques for temporary repair of damaged buildings and structures
- types of buildings
- types of environmental conditions
- Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) requirements, practices and guidelines including personal protective clothing and equipment and safe work systems for working at heights

## Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Assessment must occur in workplace operational situations. Where this is not appropriate, assessment must occur in industry approved simulated workplace operational situations that reflect workplace conditions.

Resources for assessment must include access to

- a range of relevant exercises, case studies and/or simulations including
  - working as a member of a team under supervision though some skills may be demonstrated individually
  - working at height in an emergency environment
- relevant and appropriate materials, tools and personal protective clothing and equipment currently used in industry including
  - equipment used in storm and water damage at height operations
- applicable documentation including organisational procedures, industry standards, equipment specifications, regulations, codes of practice and operations manuals.

# PUASES014 Apply flood and fast moving water safety techniques

## Modification History

**Release 1.** This is the first release of this unit of competency in the Public Safety Training Package.

## Application

This unit of competency involves the skills and knowledge required to operate safely and perform self-rescues in and around water. It is applicable to personnel who will be performing activities and tasks in or around water that is in flood or is fast moving but is not specifically rapids, swift water and/or white water.

Roles to which this unit may apply include emergency services personnel and marine operators.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Pre-requisite Unit

HLTAID003 Provide first aid

## Competency Field

SES Sector

## Unit Sector

State/Territory Emergency Services

## Elements and Performance Criteria

### ELEMENTS

Elements describe the essential outcomes.

#### **1 Prepare for operations in or around flood and fast moving water**

### PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

- |            |                                                                                                             |
|------------|-------------------------------------------------------------------------------------------------------------|
| <b>1.1</b> | Appropriate personal protective clothing and equipment is selected and used                                 |
| <b>1.2</b> | Safe and efficient operational activities are ensured by working and communicating with others through team |

|                                                                                         |            |                                                                                                                                  |
|-----------------------------------------------------------------------------------------|------------|----------------------------------------------------------------------------------------------------------------------------------|
|                                                                                         |            | work                                                                                                                             |
|                                                                                         | <b>1.3</b> | Hazards associated with operations are identified and risk assessment is undertaken                                              |
| <b>2 Contribute to safe rescue operations in and around flood and fast moving water</b> | <b>2.1</b> | Safe and stable platforms are identified and used to commence rescue activities, in accordance with organisational procedures    |
|                                                                                         | <b>2.2</b> | Appropriate techniques for safe operations from land, vessel and/or water are used, in accordance with organisational procedures |
|                                                                                         | <b>2.3</b> | Safety of self and others when undertaking rescue operations is monitored                                                        |
|                                                                                         | <b>2.4</b> | Communication with others is undertaken to assist with rescue operations                                                         |
| <b>3 Apply self-rescue</b>                                                              | <b>3.1</b> | Potential hazards when operating in moving water are identified and control measures are implemented                             |
|                                                                                         | <b>3.2</b> | Correct body position and techniques to survive and to minimise injury are adopted                                               |
|                                                                                         | <b>3.3</b> | Opportunities and activities where others may be trying to assist with self-rescue are identified                                |
|                                                                                         | <b>3.4</b> | Communication is undertaken with others on the bank edge or vessel to assist with self-rescue                                    |
| <b>4 Perform safe self-landing techniques</b>                                           | <b>4.1</b> | Appropriate landing techniques to safely exit water are applied                                                                  |
|                                                                                         | <b>4.2</b> | After consideration of physical ability, type of craft and situational variances, method of landing is selected                  |
|                                                                                         | <b>4.3</b> | Safety of others when landing and/or re-entry to a vessel is ensured                                                             |

## Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

# Assessment Requirements for PUASES014 Apply flood and fast moving water safety techniques

## Modification History

**Release 1.** This is the first release of this unit of competency in the Public Safety Training Package.

## Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and includes

- applying Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) requirements including risk mitigation, hazard identification and risk control measures
- communicating with personnel and/or persons involved particularly in relation to situational awareness, safety and operational requirements
- contributing to safe rescue operations in and around flood and fast moving water
- determining and performing safe self-landing techniques
- manoeuvring in flood and/or fast moving water whilst using personal protective clothing and equipment
- performing self-rescue techniques to ensure own safety
- preparing for operations in or around flood and fast moving water
- surviving in or around inland moving water using body position techniques
- using platforms for rescues
- utilising appropriate self-rescue techniques working safely around water

## Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria and includes knowledge of

- basic hydrology
- body position techniques including defensive and/or aggressive swimming
- communication techniques
- hazard identification and risk control measures
- organisational documentation, policies and procedures
- personal protective clothing and equipment possible responses by personnel involved in flood and fast moving water safety and how to react to these responses
- safe operational and rescue techniques
- situational variances
- techniques for landing
- techniques for safe operations

- Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) legislated requirements including risk mitigation

## Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Assessment must occur in workplace operational situations. Where this is not appropriate, assessment must occur in industry approved simulated workplace operational situations that reflect workplace conditions.

Resources for assessment must include access to

- a range of relevant exercises, case studies and/or simulations including
  - at least two possible hazards applicable to flood and/or fast moving waters
  - scenarios are to be completed either individually or as a member of a team due to unpredictability of flood and/or fast moving water events
- relevant and appropriate materials, tools and personal protective clothing and equipment currently used in industry including
  - equipment used in flood and/or fast moving water operations
- applicable documentation including organisational procedures, industry standards, equipment specifications, regulations, codes of practice and operations manuals.

# PUASES015 Operate over-snow vehicle

## Modification History

**Release 1.** This is the first release of this unit of competency in the Public Safety Training Package.

## Application

This unit of competency involves the skills and knowledge required to operate an over-snow vehicle safely including the systematic, safe and efficient control of all vehicle functions and the effective management of hazardous conditions.

The unit is applicable for the safe operation of an over-snow vehicles for transportation of personnel, resources and stores in snow covered environments and terrains. A current, valid driver's license is required to undertake this unit of competency.

Roles to which this unit may apply could include emergency services personnel, wildlife and park rangers, tourism operators and facility emergency response operators.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Pre-requisite Unit

Not applicable

## Competency Field

SES Sector

## Unit Sector

State/Territory Emergency Services

## Elements and Performance Criteria

### ELEMENTS

Elements describe the essential outcomes.

#### **1 Undertake personal safety preparation**

### PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

**1.1** Personal protective clothing and equipment is selected and checked, in accordance with organisational procedures, to ensure it is operational prior to departure

- 1.2 Personal protective clothing and equipment appropriate to dealing with the hazard is selected, worn and/or fitted and used, in accordance with organisational policies and procedures and manufacturers' guidelines
    - 1.3 Water and food requirements are identified and stowed on the vehicle
    - 1.4 En route rest and shelter areas are identified
    - 1.5 Survival techniques and/or strategies are implemented, in accordance with organisational policies and guidelines
- 2 Prepare over-snow vehicle for operation**
  - 2.1 Start up checks are completed, in accordance with organisational procedures
  - 2.2 Engine is started, in accordance with manufacturers' specifications
  - 2.3 Instruments and gauges are checked to ensure all are operational
  - 2.4 Pre-use checks of over-snow trailer are completed, in accordance with organisational policies and procedures and manufacturers' specifications
- 3 Operate over-snow vehicle**
  - 3.1 Over-snow vehicle is prepared for and safely operated in terrain suitable to the vehicle
  - 3.2 Passengers are briefed on safety and objectives of the trip
  - 3.3 Vehicle movement is controlled in response to external conditions to ensure personal safety
  - 3.4 Vehicle is operated, in accordance with organisational policies, procedures and regulations
  - 3.5 Low risk manoeuvring techniques are used to minimise the likelihood of injury and damage to equipment or property, in accordance with organisational policies and procedures
  - 3.6 Recovery of vehicle techniques are used to minimise the likelihood of injury to personnel and equipment, in accordance with organisational policies and procedures
- 4 Navigate to destination**
  - 4.1 Most efficient route for travel is taken by monitoring

|                                           |                                                                                                                                                                                                                   |
|-------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>and monitor terrain</b>                | factors likely to cause delays or route deviations                                                                                                                                                                |
|                                           | <b>4.2</b> Potential access restrictions which may limit thoroughfare are identified and arrangements are made to gain access, in accordance with organisational policies, procedures and regulatory requirements |
|                                           | <b>4.3</b> Environmental conditions are consistently monitored and acted upon to enable safe operation and to ensure no injury to personnel or damage to property or equipment                                    |
| <b>5 Clean, maintain and stow vehicle</b> | <b>5.1</b> Vehicle and equipment are cleaned, maintained, assembled and stowed, in accordance with organisational procedures and manufacturers' guidelines                                                        |
|                                           | <b>5.2</b> Vehicle and equipment records are updated, in accordance with organisational procedures                                                                                                                |
|                                           | <b>5.3</b> Faulty equipment is identified, recorded and reported for repair, in accordance with organisational policies and procedures                                                                            |

# Assessment Requirements for PUASES015 Operate over-snow vehicle

## Modification History

**Release 1.** This is the first release of this unit of competency in the Public Safety Training Package.

## Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and includes

- applying Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) requirements
- cleaning, maintaining and stowing vehicle
- communicating with passengers particularly in relation to situational awareness, safety and operational requirements
- completing recording and reporting procedures
- driving and riding an over-snow vehicle
- identifying rest and shelter areas
- implementing low risk over-snow vehicle manoeuvring techniques
- implementing survival techniques
- maintaining personal safety
- monitoring and anticipating environmental conditions and terrain hazards
- navigating to destination and monitoring terrain
- performing start up checks
- preparing over-snow vehicle for operation
- recognising movements that must be controlled
- undertaking personal safety preparations including using personal protective clothing and equipment and appropriate clothing

## Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria and includes knowledge of

- automotive systems
- controlled movements in over-snow vehicles
- environmental conditions including weather
- equipment and accessories including manufacturers' specifications
- industry and operational standards
- organisational documentation, policies and procedures including legislation and personnel

roles and responsibilities

- over-snow vehicle movement impacts
- over-snow vehicle operating and inspection procedures including instruments, gauges and trailers
- over-snow vehicle requirements and regulations
- personal protective clothing and equipment requirements
- potential access restrictions
- recovery of over-snow vehicle techniques
- requirements for recording and reporting
- start up checks
- survival techniques and strategies including rest and shelter areas
- types of operating terrains
- Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) legislated requirements including risk mitigation

## Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Assessment must occur in workplace operational situations. Where this is not appropriate, assessment must occur in industry approved simulated workplace operational situations that reflect workplace conditions.

Resources for assessment must include access to

- a range of relevant exercises, case studies and/or simulations including
  - simulated operational situations under varying conditions
- relevant and appropriate materials, equipment, tools and personal protective clothing and equipment currently used in industry including
  - an appropriate environment for use of over-snow vehicle
- applicable documentation including organisational procedures, industry standards, equipment specifications, regulations, codes of practice and operations manuals.

# PUASES016 Apply snowcraft skills when performing search operations

## Modification History

**Release 1.** This is the first release of this unit of competency in the Public Safety Training Package.

## Application

This unit of competency involves the skills and knowledge required to operate safely, perform search operations and apply survival techniques for self and others in an alpine environment. It is applicable to personnel who will be performing operational search activities and/or tasks in an alpine environment and in all weather conditions.

Roles to which this unit may apply include emergency services personnel and other agencies and/or organisations involved in searches operations.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Pre-requisite Unit

Not applicable

## Competency Field

SES Sector

## Unit Sector

State/Territory Emergency Services

## Elements and Performance Criteria

### ELEMENTS

Elements describe the essential outcomes.

#### **1 Prepare for operation in alpine environments**

### PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

**1.1** Operational and task information is obtained from search coordinator or delegated personnel

**1.2** Specific hazards and equipment requirements for

- environmental and operational requirements are identified
- 1.3** Personal protective clothing and equipment is selected and used
- 1.4** Food and water requirements for the operation, environment and physical activity are identified and selected, in accordance with organisational procedures
- 1.5** Environment and/or weather conditions for anticipated period of operational response are determined
- 1.6** Own ability to meet anticipated physical and psychological requirements of operation is evaluated and any issues anticipated are reported to the team leader
- 2 Undertake operations in an alpine environment**
- 2.1** Deployment to operational response area using transportation is undertaken in a safe and timely manner
- 2.2** Specified team roles and functions are carried out safely, as directed by the team leader
- 2.3** Search safety is maintained, in accordance with organisational procedures
- 2.4** Search formation and spacing are undertaken and maintained as outlined by the team leader, in accordance with organisational procedures
- 2.5** Search boundaries are marked, in accordance with task requirements, under the direction of the team leader
- 2.6** Observation skills are applied, and any clues or objects located are immediately reported, in accordance with organisational procedures
- 2.7** Communication within the team is maintained
- 2.8** Safety and wellbeing of self and others is monitored, and any concerns are reported to the team leader
- 2.9** Hazards are continually monitored, risks assessed, and any concerns identified are reported, in accordance with organisational procedures
- 3 Perform survival techniques**
- 3.1** Emergency shelter is constructed appropriately for current and anticipated conditions

- 3.2 Weather conditions and other information is interpreted, and actions are taken to minimise effects of weather on self and others
  - 3.3 First aid is applied to self and others, as required
  - 3.4 Lost searcher drills are conducted, as required, in accordance with organisational procedures
  - 3.5 Welfare of self and others is sustained
  - 3.6 Situational awareness is maintained and changing environment and weather conditions are responded to in a timely manner
- 4 **Complete recall and stand down procedures**
  - 4.1 Search equipment is recovered, cleaned and maintained, in accordance with organisational procedures and manufacturers' guidelines
  - 4.2 Operational debriefing is participated in and documentation is completed, in accordance with organisational procedures and standards
  - 4.3 Symptoms of operational stress in self and others is recognised and reported to relevant personnel

## Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

## Unit Mapping Information

This unit replaces and is equivalent to PUASES016A Apply snowcraft skills when performing search operations.

# Assessment Requirements for PUASES016 Apply snowcraft skills when performing search operations

## Modification History

**Release 1.** This is the first release of this unit of competency in the Public Safety Training Package.

## Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and includes

- anticipating current and future conditions and other factors
- applying Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) requirements including hazard identification, risk management and working safely
- communicating with team members
- completing recall and stand down procedures including debriefings
- constructing temporary emergency snow shelters
- identifying food and water requirements
- implementing organisational policies and procedures
- interpreting weather conditions and/or information
- meeting physical and psychological requirements
- performing and applying survival techniques in an alpine environment including conducting lost searcher drills and applying first aid
- preparing for operation in an alpine environment
- recognising and reporting stress
- sustaining welfare of self and others
- travelling in an alpine environment over snow
- undertaking search operations in an alpine environment including using observation skills and marking boundaries
- using snow equipment including personal protective clothing and equipment

## Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria and includes knowledge of

- communication techniques
- factors and conditions that may impact search operations
- factors that impact avalanches including terrain
- first aid inclusive of the signs, symptoms and treatment of hypothermia
- memorandums of understanding, agreements and codes of practice

- minimisation of environmental impact
- organisational documentation, policies and procedures including the procedures for cleaning and discarding equipment
- physical and psychological requirements
- signs and symptoms of stress
- snow equipment including personal protective clothing and equipment
- snow shelter construction techniques
- sources of information on weather and snow conditions
- survival techniques including food, water and shelter
- Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) legislated requirements including hazard identification, risk mitigation and safe working practices

## Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Assessment must occur in workplace operational situations. Where this is not appropriate, assessment must occur in industry approved simulated workplace operational situations that reflect workplace conditions.

Resources for assessment must include access to

- a range of relevant exercises, case studies and/or simulations including
  - at least two hazards which are applicable to taking part in activities in an alpine environment in variable weather and conditions
- relevant and appropriate materials, tools and personal protective clothing and equipment currently used in industry including
  - equipment used in alpine operations
- applicable documentation including organisational procedures, industry standards, equipment specifications, regulations, codes of practice and operations manuals.

## PUATEA001 Work in a team

### Modification History

**Release 1.** This is the first release of this unit of competency in the Public Safety Training Package.

### Application

This unit of competency involves the skills and knowledge required to work with others whilst making a positive contribution to the effectiveness and efficiency of a team in a work environment, when under direct supervision. Limited responsibility towards others is required.

The unit applies to personnel working in public safety and is particularly pertinent to new staff in assisting with integration into the team culture of the organisation.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

### Pre-requisite Unit

Not applicable

### Competency Field

Team work

### Unit Sector

Not applicable

### Elements and Performance Criteria

#### ELEMENTS

Elements describe the essential outcomes.

#### **1 Contribute to team activities**

#### PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

- 1.1** Roles and responsibilities of team members are recognised
- 1.2** Contribution is made to identifying team goals and objectives

- |          |                                                         |                                                                                                                                                                      |
|----------|---------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------|

# Assessment Requirements for PUATEA001 Work in a team

## Modification History

**Release 1.** This is the first release of this unit of competency in the Public Safety Training Package.

## Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and includes

- applying Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) requirements
- attending and working in a variety of team situations
- completing organisational documentation
- contributing to organisational goals and team activities, team meetings and the achievement of tasks consistent with goals
- displaying interpersonal skills and encouraging team members
- following instructions
- following organisational policies and procedures
- giving and receiving support to and from team members
- identifying work conditions and types of activities to be undertaken
- listening and using a variety of communication skills
- providing appropriate suggestions, feedback and information to team members
- reporting information
- requesting assistance from appropriate personnel
- sharing knowledge and information

## Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria and includes knowledge of

- composition of teams including roles and responsibilities of members
- nonoperational and operational communication processes
- organisational documentation, policies and procedures
- organisational goals and activities
- potential work task conditions
- techniques for assisting and supporting others
- techniques for giving and receiving feedback in a constructive manner
- Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) requirements including risk mitigation

## Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, equipment, tools and personal protective clothing and equipment currently used in industry
- applicable documentation including organisational procedures, industry standards, equipment specifications, regulations, codes of practice and operational manuals.

## PUATEA002 Work autonomously

### Modification History

**Release 1.** This is the first release of this unit of competency in the Public Safety Training Package.

### Application

This unit of competency involves the skills and knowledge required to work as a member of a team, or as an individual for periods of time without direct supervision, and to mentor and coach either in an operational or nonoperational environment.

The unit applies to personnel working in public safety but is particularly pertinent to new staff seeking to understand and apply organisational expectations and limits with regards to decision making.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

### Pre-requisite Unit

The fire sector is those sections of government departments, statutory authorities or organisations that have responsibility under jurisdictional arrangements for the delivery of firefighting and fire management services.

It is essential that the prerequisite units listed below are obtained prior to the issuance of this unit to individuals within the fire sector or the units contributing to the attainment of a fire qualification.

| <b>1 Undertake work activities</b>    | <b>1.1</b> Work requirements are identified, and activities are undertaken, in accordance with organisational procedures                                            |
|                                       | <b>1.2</b> Instructions and directions are identified and implemented                                                                                               |
|                                       | <b>1.3</b> Communication is maintained with team leader or supervisor advising of progress of task activity                                                         |
|                                       | <b>1.4</b> Personal safety and the safety of others is maintained, in accordance with organisational procedures                                                     |
|                                       | <b>1.5</b> Legal requirements and/or the ramifications of work activities are communicated to the team leader or supervisor                                         |
|                                       | <b>1.6</b> Work area is determined or selected, in accordance with organisational procedures                                                                        |
|                                       | <b>1.7</b> Equipment is operated, in accordance with manufacturers' specifications                                                                                  |
|                                       | <b>1.8</b> Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) and organisational policies and procedures are applied                                |
| <b>2 Accept responsibilities</b>      | <b>2.1</b> Responsibilities are accepted, in accordance with organisational policies and procedures                                                                 |
|                                       | <b>2.2</b> Team leader is appraised of the outcome of work task activity                                                                                            |
|                                       | <b>2.3</b> Any activity that exceeds the scope of the defined task is referred to the team leader or supervisor                                                     |
| <b>3 Set performance requirements</b> | <b>3.1</b> Performance requirements are based on organisational objectives and goals and agreed to with the team leader or supervisor                               |
|                                       | <b>3.2</b> Performance requirements are reviewed with the team leader or supervisor                                                                                 |
| <b>4 Maintain team performance</b>    | <b>4.1</b> Individual performance is monitored against organisational performance requirements and appropriate action is taken to maintain performance, as required |

- 4.2 Performance of others is monitored, in accordance with organisational procedures and appropriate action is taken through coaching and mentoring to ensure team objectives and goals are met
- 4.3 Feedback and constructive advice is provided to the supervisor or team leader
- 4.4 Issues which cannot be rectified or addressed are referred to the supervisor or team leader for action, in accordance with organisational policies and procedures
- 4.5 Supervisor or team leader is advised of any changes in work priorities or tasks
- 4.6 Documentation relevant to team and individual performance is completed, in accordance with organisational procedures

## **5 Act as a team leader**

- 5.1 Responsibility for the performance of the team is accepted
- 5.2 Work goals are set, tasks are identified and are presented to team members
- 5.3 Instructions and directions are communicated to team members clearly and unambiguously
- 5.4 Team members' concerns and queries are recognised, discussed and dealt with
- 5.5 Legal requirements or ramifications of work activities are communicated to team members
- 5.6 Duties, rosters and responsibilities are allocated to team members having regard to the competency required to undertake assignments or tasks, in accordance with organisational policies and procedures
- 5.7 Feedback on own performance is sought
- 5.8 Level of authority is recognised and adhered to when acting as a team leader
- 5.9 Operational debriefing is conducted, in accordance with the organisational procedures

## Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

## Unit Mapping Information

This unit replaces and is equivalent to PUATEA002B Work autonomously.

# Assessment Requirements for PUATEA002 Work autonomously

## Modification History

**Release 1.** This is the first release of this unit of competency in the Public Safety Training Package.

## Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and includes

- accepting work task or activity responsibilities
- applying Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) requirements
- assessing the impact of legal requirements on activities
- carrying out team leader responsibilities including coaching and mentoring team members
- communicating performance expectations including providing feedback
- completing a range of organisational documentation
- conducting debriefings
- conveying work activity or task instructions and directions
- encouraging and monitoring team members' performance
- following organisational policies and procedures
- identifying and undertaking work activities
- identifying conditions and working area impacts
- implementing team building activities
- maintaining team performance
- offering informal performance counselling
- performing operational and nonoperational activities
- representing and reporting issues to management
- scoping of allocated tasks
- setting goals, identifying tasks, allocating duties, rosters and responsibilities
- setting performance requirements

## Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria and includes knowledge of

- impact of performance issues
- legal requirements and ramifications of team activities
- methods of setting performance expectations and monitoring performance
- organisational documentation, policies and procedures

- possible work areas and conditions
- requirements for documenting team performance and work activities or tasks
- scope of operational and nonoperational activities
- team dynamics
- team members' duties and responsibilities including team leader responsibilities
- Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) requirements including personal safety, safety of others, duty of care responsibilities and risk mitigation

## Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Assessment must occur in workplace operational situations. Where this is not appropriate, assessment must occur in industry approved simulated workplace operational situations that reflect workplace conditions.

Resources for assessment must include access to

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, equipment, tools and personal protective clothing and equipment currently used in industry
- applicable documentation including organisational procedures, industry standards, equipment specifications, regulations, codes of practice and operational manuals.

## PUATEA003 Lead, manage and develop teams

### Modification History

**Release 1.** This is the first release of this unit of competency in the Public Safety Training Package.

### Application

This unit of competency involves the skills and knowledge required to achieve organisational objectives and working relationships through leading, managing and developing individuals and teams.

The unit applies to public safety personnel who have a management and/or leadership role that includes basic human resource functions and responsibilities for the ongoing development of a team.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

### Pre-requisite Unit

The fire sector is those sections of government departments, statutory authorities or organisations that have responsibility under jurisdictional arrangements for the delivery of firefighting and fire management services.

It is essential that the prerequisite units listed below are obtained prior to the issuance of this unit to individuals within the fire sector or the units contributing to the attainment of a fire qualification.

PUATEA002 Work autonomously

# Assessment Requirements for PUATEA003 Lead, manage and develop teams

## Modification History

**Release 1.** This is the first release of this unit of competency in the Public Safety Training Package.

## Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and includes

- allocating tasks and activities
- applying conflict resolution and negotiation techniques
- applying Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) requirements including recognising and managing hazards
- assessing team and individual training needs
- communicating organisational objectives and standards
- completing organisational documentation
- consulting team members developing and maintaining a team including creating productive work conditions
- displaying and using interpersonal skills including coaching and mentoring
- following organisational policies and procedures
- identifying and meeting organisational objectives and performance requirements
- leading and supervising individuals and teams including managing and improving the performance of teams and individuals
- managing team and individual difficulties to achieve positive outcomes
- providing constructive feedback and leadership to individuals and teams
- supporting and participating in development activities

## Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria and includes knowledge of

- courses and opportunities for training and development
- industrial awards and agreements
- organisational documentation, policies and procedures
- organisational human resource and personnel practices and guidelines
- organisational training standards
- principles related to team operations, leadership and human resource management
- protocols and organisational standards, including legislative, related to work group activities

- roles and responsibilities of organisational personnel
- Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) requirements including hazard identification and risk mitigation

## Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, equipment, tools and personal protective clothing and equipment currently used in industry
- applicable documentation including organisational procedures, industry standards, equipment specifications, regulations, codes of practice and operational manuals.

# PUATEA005 Manage own professional performance

## Modification History

**Release 1.** This is the first release of this unit of competency in the Public Safety Training Package.

## Application

This unit of competency involves the skills and knowledge required to manage own professional performance and to perform ethically and with the integrity required to ensure the public's confidence.

The unit applies to personnel working within a public safety environment where the principles of own professional management apply. It includes modelling high standards of personal performance, ethics and integrity, reviewing and monitoring own performance, developing and maintaining ongoing personal competence, managing personal work priorities, assisting and supporting other personnel and maintaining physical and emotional health.

Individuals must operate within the law through complying with organisational policies and procedures. However, work in dangerous and fluid environments requires that they act independently and manage their own performance.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

|                                                                             | <b>1.4</b> | Breaches of organisational codes of ethics or practices are recognised and reported, in accordance with organisational procedures                                  |
| <b>2 Review and monitor own performance</b>                                 | <b>2.1</b> | Required personal and professional performance standards are identified and acknowledged                                                                           |
|                                                                             | <b>2.2</b> | Self-assessment and reflection is regularly used to monitor performance against established standards and to accurately identify personal strengths and weaknesses |
|                                                                             | <b>2.3</b> | Formal and informal performance feedback is regularly sought and acted upon, in accordance with organisational procedures                                          |
|                                                                             | <b>2.4</b> | Tasks are carried out to achieve outcomes in a manner that minimises resource usage                                                                                |
| <b>3 Develop and maintain ongoing personal competence</b>                   | <b>3.1</b> | Currency of professional operational competencies is maintained                                                                                                    |
|                                                                             | <b>3.2</b> | Personal development strategies are identified, planned and implemented and results are evaluated, in accordance with organisational procedures                    |
|                                                                             | <b>3.3</b> | New organisational developments are identified and required competencies are acquired and applied                                                                  |
| <b>4 Manage personal work priorities</b>                                    | <b>4.1</b> | Jobs or tasks are prioritised and undertaken, in accordance with team goals                                                                                        |
|                                                                             | <b>4.2</b> | Competing demands are assessed and organised within time constraints to achieve individual, team and organisational priorities                                     |
|                                                                             | <b>4.3</b> | Operational and self-development needs are balanced within the work environment                                                                                    |

- |                                                 |                                                                                                                        |
|-------------------------------------------------|------------------------------------------------------------------------------------------------------------------------|
| <b>5 Assist and support other personnel</b>     | <b>5.1</b> Informative and constructive feedback is provided to other personnel in a positive manner                   |
|                                                 | <b>5.2</b> Productive and harmonious work environment is promoted through interaction with others                      |
|                                                 | <b>5.3</b> Encouragement, support and advice is provided to personnel, in accordance with organisational protocols     |
| <b>6 Maintain physical and emotional health</b> | <b>6.1</b> Levels of personal, physical and emotional health are routinely monitored and appropriately managed         |
|                                                 | <b>6.2</b> Support is sought to enable identification and implementation of positive alternatives to personal problems |

## Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

## Unit Mapping Information

This unit replaces and is equivalent to PUATEA005A Manage own professional performance.

## Links

PUA Training Package Companion Volume Implementation Guide is found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=3eca5672-6d5a-410b-8942-810d0ba05bbf>

# Assessment Requirements for PUATEA005 Manage own professional performance

## Modification History

**Release 1.** This is the first release of this unit of competency in the Public Safety Training Package.

## Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and includes

- applying Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) requirements
- assisting and supporting other personnel to meet organisational procedures
- communicating with others
- developing and maintaining ongoing personal competence
- following organisational policies and procedures
- maintaining high levels of personal presentation including dress code, manners and respect
- maintaining high levels of professional ethics and integrity in work practices including dealing with and responding to issues or events that challenge professional ethics
- maintaining personal health and stress that enables optimum operational performance
- maintaining professional performance standards consistently
- managing personal and work priorities
- planning and implementing personal improvement plans
- recognising, accurately assessing and acknowledging personal strengths and weaknesses
- reporting breaches of integrity and behaviour to appropriate personnel
- reviewing and monitoring own performance
- seeking out and responding to feedback related to personal performance
- working in a team environment including within time constraints to achieve individual, team and organisational priorities

## Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria and include knowledge of

- acceptable and non-acceptable behaviour and practices
- breaches of professional ethics and procedures for dealing with
- communication techniques
- factors pertaining to role that impacts on personal health and stress
- internal and external professional support and development mechanisms

- methods for assessing and reviewing personal performance and for planning and implementing personal improvement strategies
- organisational documentation, policies and procedures including codes of practice and ethics
- professional integrity and organisational behaviour standards
- team dynamics and its impacts on personal work performance
- Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) requirements

## Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, equipment, tools and personal protective clothing and equipment currently used in industry
- applicable documentation including organisational procedures, industry standards, equipment specifications, regulations, codes of practice and operational manuals.

## PUATEA006 Lead a functional unit at an incident

### Modification History

**Release 1.** This is the first release of this unit of competency in the PUA Public Safety Training Package.

### Application

A function is a defined grouping of related tasks and activities addressing core responsibilities of the Incident Controller. The work of a function is performed under the direction of a Functional Officer who reports to the Incident Controller. Functions are further divided into defined units (a functional unit) under the leadership of a unit leader reporting to a functional officer.

The unit of competency addresses the leadership, management and communication skills required to lead a functional unit in an operational environment. It includes establishing a functional unit, leading and managing a functional unit, communicating effectively within an incident environment and monitoring and reviewing a functional unit.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

### Pre-requisite Unit

Not applicable

### Competency Field

Teamwork

### Unit Sector

Not applicable

### Elements and Performance Criteria

#### ELEMENTS

Elements describe the essential outcomes.

#### 1 Establish functional unit

#### PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

**1.1** Initial briefing, including information needed to lead the functional unit, is obtained from the Functional Officer

- and the Incident Controller's intent is confirmed
- 1.2 Functional unit objectives and tasks are identified
  - 1.3 Functional unit structure is developed, and resources required to perform activities are determined and sought
  - 1.4 Safe work practices and health and welfare arrangements for work area are established and monitored
- 2 Lead and manage functional unit**
- 2.1 Functional unit tasks are delegated based on an understanding of personnel and their capability, meetings are held, and briefings are given
  - 2.2 Additional information, equipment and resources are obtained, as required
  - 2.3 Performance of unit personnel is monitored, and support provided, as required
  - 2.4 Progress towards completion of tasks and achievement of objectives is monitored and work is adjusted and reallocated, as required
  - 2.5 Reports are provided through the chain of command
  - 2.6 Document and record management systems are established and maintained in accordance with organisational procedures
  - 2.7 Log of activities and decisions is maintained, in accordance with organisational procedures
  - 2.8 Injuries, accidents or near misses involving unit personnel are reported and critical incident support services for the unit are requested, in accordance with organisational procedures
- 3 Communicate effectively within incident environment**
- 3.1 Information sources and users required to perform, and support unit activities are
  - 3.2 Communication is undertaken with information sources and users
  - 3.3 Information received is recorded, clarified, confirmed, interpreted and accurately communicated and/or reported

- |                                             |            |                                                                                                                                                       |
|---------------------------------------------|------------|-------------------------------------------------------------------------------------------------------------------------------------------------------|
|                                             | <b>3.4</b> | Procedures are implemented and followed when using communications systems during incident                                                             |
|                                             | <b>3.5</b> | Information flows between own unit and other units and functions is established and maintained to support shared situational awareness                |
| <b>4 Monitor and review functional unit</b> | <b>4.1</b> | Functional unit activities are monitored and reviewed to determine the ongoing need for retaining the unit in support of the incident management team |
|                                             | <b>4.2</b> | Unit objectives and task requirements are monitored and reviewed to ensure ongoing relevance and timeliness as incident situation changes             |
|                                             | <b>4.3</b> | Functional unit is demobilised, in accordance with incident demobilisation plan                                                                       |
|                                             | <b>4.4</b> | Briefings and debriefings are conducted, as required                                                                                                  |
|                                             | <b>4.5</b> | Performance of functional unit is reviewed, and a report is provided, in accordance with organisational requirements                                  |

## Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

## Unit Mapping Information

New unit, there is no equivalent unit.

# Assessment Requirements for PUATEA006 Lead a functional unit at an incident

## Modification History

**Release 1.** This is the first release of this unit of competency in the PUA Public Safety Training Package.

## Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and includes

- applying Work Health and Safety (WHS)/Occupational Health and Safety (OHS) requirements
- completing reports
- conducting briefings and debriefings
- conducting meetings and preparing agendas
- delegating tasks to individuals within the unit
- demobilising functional unit
- identifying equipment and resources required by the unit
- implementing organisational policies and procedures
- maintaining a log of activities and decisions
- managing and leading a team including delegating responsibilities and tasks, monitoring performance, providing feedback and acting to ensure completion of functional unit requirements
- reporting injuries, accidents and near misses
- seeking, processing and communicating information using and maintaining a records management system
- working and liaising with the incident management team and external stakeholders

## Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria and includes knowledge of

- Australasian Inter-service Incident Management System (AIIMS) structure and principles
- communication methods
- communication requirements for stakeholders
- demobilisation of functional unit
- equipment and resources for a functional unit
- incident documentation, record management systems and the management of information organisational documentation, policies and procedures including welfare arrangements

- procedures for meetings including agendas
- processes for conducting briefings and debriefings
- processes for monitoring functional unit progress
- report requirements and obligations
- team leadership and management including awareness of how personnel may react in incident response situations, basic principles of unit and team coordination, leadership practices, factors affecting decision making, maintenance of personal and shared situational awareness within the team and techniques for listening and questioning
- Work Health and Safety (WHS)/Occupational Health and Safety (OHS) requirements

## Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Assessment must occur in workplace operational situations. Where this is not appropriate, assessment must occur in industry approved simulated workplace operational situations that reflect workplace conditions.

Resources for assessment must include access to

- a range of relevant activities, exercises, case studies and/or simulations
- relevant and appropriate materials, tools, equipment and personal protective clothing and equipment currently used in industry
- applicable documentation including organisational procedures, industry standards, equipment specifications, regulations, codes of practice and operation manuals.

# PUAVEH001 Drive vehicles under operational conditions

## Modification History

**Release 1.** This is the first release of this unit of competency in the Public Safety Training Package.

## Application

This unit of competency involves the skills and knowledge required to drive vehicles safely, including the systematic and safe control of all vehicles' functions and the management of hazardous situations under operational conditions.

The unit is applicable to public safety personnel who are required to operate vehicles both on and off road during public safety operations.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Pre-requisite Unit

Not applicable

## Competency Field

Vehicles

## Unit Sector

State/Territory Emergency Services

## Elements and Performance Criteria

### ELEMENTS

Elements describe the essential outcomes.

#### **1 Prepare vehicle for operational response**

### PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

- 1.1** Vehicle is selected to meet operational requirements and is suitable for use in operational terrain
- 1.2** Preliminary check of the vehicle is completed to ensure it is operational

- |                                                                         |            |                                                                                                                                                                                               |
|-------------------------------------------------------------------------|------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                                                                         | <b>1.3</b> | Equipment and accessories are checked to ensure they are available and are operational                                                                                                        |
|                                                                         | <b>1.4</b> | Cabin drill and start up checks are completed, in accordance with organisational procedures and operational standards                                                                         |
|                                                                         | <b>1.5</b> | Engine is started, in accordance with manufacturers' specifications                                                                                                                           |
|                                                                         | <b>1.6</b> | Audible and visual warning systems are checked to ensure that they are all operational                                                                                                        |
| <b>2 Drive the vehicle</b>                                              | <b>2.1</b> | Vehicle is prepared for and is safely operated in terrain suitable to the vehicle                                                                                                             |
|                                                                         | <b>2.2</b> | Vehicles and/or trailers are operated and positioned, in accordance with organisational policies and procedures to ensure safe operation and traffic regulations                              |
|                                                                         | <b>2.3</b> | Low risk driving techniques are used, in accordance with organisational policies and procedures, to minimise the likelihood of injury to persons or damage to equipment or property           |
| <b>3 Monitor traffic, road and terrain under operational conditions</b> | <b>3.1</b> | Vehicle movement is controlled in response to external conditions to ensure safety of persons                                                                                                 |
|                                                                         | <b>3.2</b> | Most efficient route for travel is taken including monitoring factors likely to cause delays or deviations                                                                                    |
|                                                                         | <b>3.3</b> | Traffic and surface conditions are consistently monitored and acted upon to enable safe operation and to ensure no injury to people or damage to property, equipment, loads and/or facilities |

## Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

cabin drill must include

- adjustment of seats
- all crew seated and/or restrained
- dash layout
- gauges
- mirrors and steering
- radio on
- seatbelts
- warning lights

## Unit Mapping Information

This unit replaces and is equivalent to PUAVEH001B Drive vehicles under operational conditions.

# Assessment Requirements for PUAVEH001 Drive vehicles under operational conditions

## Modification History

**Release 1.** This is the first release of this unit of competency in the Public Safety Training Package.

## Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements, performance criteria and range of conditions on at least one occasion and includes

- applying Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) requirements
- checking and anticipating traffic hazards and taking appropriate action
- communicating with others
- conducting pre-operational checks including inspecting and preparing vehicle for operational response
- maintaining personal safety and awareness of traffic conditions and other road users
- modifying activities depending on differing operational contingencies, risk situations and environments
- monitoring performance of vehicle and taking appropriate actions, as required
- performing low risk driving techniques
- performing start ups and cabin drills

## Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements, performance criteria and range of conditions and includes knowledge of

- ancillary equipment and accessories
- automotive systems
- cabin drills and start up checks
- causes and effect of fatigue on drivers including on road techniques
- emergency vehicle operating procedures
- environmental requirements for vehicles
- fatigue management techniques
- hazards and related low risk driving techniques
- local area knowledge
- manufacturers' specifications

- operational conditions
- organisational documentation, policies and procedures
- other considerations including weather and adverse surfaces
- potential traffic conditions
- pre-operational checks carried out on vehicle and related actions including fuel, coolant, oil, pump, water, equipment and locker security, visual inspection of vehicle, operation of emergency warning devices such as lights and sirens, crew communication system and physical check or scan of gauges
- traffic legislation, rules and regulations including accident protocols and procedures and appropriate licences
- vehicle controls, indicators, instruments and gauges including tachometer, temperature, electrical charging, systems indicators including high beam turn signals and parking brakes, speedometer, oil pressure, brake warning lights, audible warning devices and water tank level indicator, where applicable
- Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) legislated requirements including risk mitigation

## Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Assessment must occur in workplace operational situations. Where this is not appropriate, assessment must occur in industry approved simulated workplace operational situations that reflect workplace conditions.

Resources for assessment must include access to

- a range of relevant exercises, case studies and/or simulations including
  - access to emergency vehicles
- relevant and appropriate materials, equipment, tools and personal protective clothing and equipment currently used in industry
- applicable documentation including organisational procedures, industry standards, equipment specifications, regulations, codes of practice and operations manuals.

# PUAWHS001 Follow defined work, health and safety policies and procedures

## Modification History

**Release 1.** This is the first release of this unit of competency in the Public Safety Training Package.

## Application

This unit of competency involves the skills and knowledge required to applying general work, health and safety requirements when in a workplace environment, excluding emergency incidents.

The unit is applicable to personnel within the public safety sector however, it is particularly relevant to new personnel who need to apply Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) requirements in a public safety context.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Pre-requisite Unit

Not applicable

## Competency Field

Work, Health and Safety

## Unit Sector

Public Safety

## Elements and Performance Criteria

### ELEMENTS

Elements describe the essential outcomes.

#### **1 Follow procedures for hazard identification and risk control**

### PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

#### **1.1 Hazards in the work area are identified, controlled and reported on to designated personnel, in accordance with organisational procedures**

- |          |            |                                                                                                                                                                        |
|----------|------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|          | <b>1.2</b> | Organisational procedures and work instructions for controlling risks are followed                                                                                     |
|          | <b>1.3</b> | Organisational procedures for dealing with workplace emergencies are followed within duty of care responsibilities and competencies                                    |
| <b>2</b> |            | <b>Contribute to participative arrangements for WHS/OHS</b>                                                                                                            |
|          | <b>2.1</b> | WHS/OHS issues are raised with designated personnel, in accordance with organisational procedures and legislative requirements                                         |
|          | <b>2.2</b> | Contributions to participative arrangements in the workplace are made, in accordance with organisational procedures and duty of care responsibilities and competencies |

## Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

## Unit Mapping Information

This unit replaces and is equivalent to PUAOHS001C Follow defined occupational health and safety policies and procedures.

# Assessment Requirements for PUAWHS001 Follow defined work, health and safety policies and procedures

## Modification History

**Release 1.** This is the first release of this unit of competency in the Public Safety Training Package.

## Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and includes

- applying Work Health and Safety (WHS)/Occupational Health and Safety (OHS) requirements
- communicating with others
- contributing to WHS/OHS participative arrangements including group meetings
- following organisational procedures for hazard identification, risk control and mitigation
- using communication technology to workplace requirements

## Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria and includes knowledge of

- legislation and regulations
- organisational documentation
- organisational policies and procedures including hazard reporting, risk control and mitigation
- participative arrangements for Work Health and Safety (WHS)/Occupational Health and Safety (OHS)
- Safety Data Sheet (SDS) requirements
- types of hazards
- WHS/OHS organisational requirements
- WHS/OHS signs and symbols relevant to area of work
- workplace/area emergencies

## Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

## PUAWHS002 Maintain safety at an incident scene

### Modification History

**Release 1.** This is the first release of this unit of competency in the Public Safety Training Package.

### Application

This unit of competency involves the skills and knowledge required to recognise potential health and safety risks and to then act to eliminate or control those risks at incident scenes and to prevent injury to self, other personnel or members of the public.

The unit is applicable to public safety personnel attending an incident scene and links to the individual's duty of care responsibility to maintain personal safety and to be aware of how actions affect the safety of others including team members, other agency/organisational personnel and the public.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

### Pre-requisite Unit

The fire sector is those sections of government departments, statutory authorities or organisations that have responsibility under jurisdictional arrangements for the delivery of firefighting and fire management services.

It is essential that the prerequisite units listed below are obtained prior to the issuance of this unit to individuals within the fire sector or the units contributing to the attainment of a fire qualification.

PUAFIR210 Prevent injury

### Competency Field

Work, Health and Safety

### Unit Sector

Public Safety

### Elements and Performance Criteria

#### ELEMENTS

#### PERFORMANCE CRITERIA

Elements describe the essential    Performance criteria describe the performance needed to

outcomes.

demonstrate achievement of the element.

**1 Determine hazards at incident site**

- 1.1** Site hazards affecting the safety of self or other personnel are identified, risks are assessed and are communicated with others at the scene
- 1.2** Operational safety procedures are implemented, in accordance with organisational policies and procedures
- 1.3** Duties are undertaken, in accordance with Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) requirements

**2 Implement hazard controls at incident scene**

- 2.1** Hazards are identified, and mitigation procedures are selected, in accordance with organisational procedures
- 2.2** Control measures are applied, reported and recorded, in accordance with organisational policies and procedures
- 2.3** Changes in incident situation or conditions are reported immediately to designated personnel
- 2.4** Hazard controls are monitored and communicated to relevant personnel to ensure continuing effectiveness
- 2.5** Hazard control and risk mitigation measures are implemented with minimum damage to the environment, whilst maintaining safety of self and others
- 2.6** Incident and/or accident scene is secured to preserve the scene and maintain public safety, in accordance with organisational policies and procedures

**3 Maintain personal safety**

- 3.1** Personal protective clothing and equipment is selected and checked, in accordance with organisational procedures, to ensure it is operational prior to entry into incident situation
- 3.2** Personal protective clothing and equipment appropriate to dealing with the hazard is worn and used, in accordance with organisational procedures and manufacturers' guidelines
- 3.3** Water and food intake, rest breaks and shelter requirements are maintained
- 3.4** Survival techniques and/or strategies are implemented, in accordance with organisational policies, procedures

and guidelines

- |                                                                  |            |                                                                                        |
|------------------------------------------------------------------|------------|----------------------------------------------------------------------------------------|
| <b>4 Contribute to maintaining safety of other group members</b> | <b>4.1</b> | Impact of own or others' actions on safety is considered and modified, as required     |
|                                                                  | <b>4.2</b> | Contact is maintained with group members, in accordance with organisational procedures |
|                                                                  | <b>4.3</b> | Signals are correctly used, interpreted, confirmed and acted upon                      |

# Assessment Requirements for PUAWHS002 Maintain safety at an incident scene

## Modification History

**Release 1.** This is the first release of this unit of competency in the Public Safety Training Package.

## Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and includes

- applying Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) requirements
- communicating using non-verbal and verbal techniques
- determining hazards and assessing risks at incident site
- following organisational policies and procedures
- implementing hazard controls at incident scene
- maintaining safety at an incident scene including personal safety and contributing to the safety of other group members
- recording information, updating records and completing documentation
- using communication equipment
- using personal protective clothing and equipment
- working with others in a team

## Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria and includes knowledge of

- awareness of incident hazards and hazard control equipment
- commonly encountered hazards and safety precautions to prevent injury
- concept of risk
- duty of care responsibilities and obligations
- factors that may affect safety at an incident which must require monitoring
- legislation and regulations
- means of relaying warnings to other personnel
- methods of hazard control
- organisational documentation, policies and procedures
- personal protective clothing and equipment
- requirements for reporting
- roles and responsibilities at an incident scene

- safety procedures and hazard equipment to prevent injury
- survival techniques and strategies at an incident
- work environments including incidents and response situations
- Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) requirements including risk mitigation

## Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

## PUAWHS003 Implement and monitor organisational work, health and safety policies, procedures and programs

### Modification History

**Release 1.** This is the first release of this unit of competency in the Public Safety Training Package.

### Application

This unit of competency involves the skills and knowledge required to implementing and monitoring Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) policies, procedures and safety awareness programs in the work place.

The unit is applicable to personnel who perform legislated or delegated roles within a public safety organisation and who are required to ensure WHS/OHS policy and procedures are implemented in specific teams and/or work groups.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

### Pre-requisite Unit

Not applicable

### Competency Field

Work, Health and Safety

### Unit Sector

Public Safety

### Elements and Performance Criteria

#### ELEMENTS

Elements describe the essential outcomes.

#### **1 Provide WHS/OHS information to work**

#### PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

- 1.1** Relevant provisions of Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) legislation and codes of practice are accurately and clearly explained to team and/or work group

- |                                                                                     |            |                                                                                                                                                               |
|-------------------------------------------------------------------------------------|------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                                                                                     | <b>1.2</b> | Information on organisational WHS/OHS policies, procedures and safety awareness programs are provided and are clearly explained to the team and/or work group |
|                                                                                     | <b>1.3</b> | Existing hazard information, risk assessment and control procedures are provided and is clearly explained to the team and/or work group                       |
| <b>2 Implement and monitor participative arrangements for management of WHS/OHS</b> | <b>2.1</b> | WHS/OHS procedures for team and/or work group consultation are implemented and monitored to ensure all members have an opportunity to contribute              |
|                                                                                     | <b>2.2</b> | Issues raised through consultation resolved promptly or are referred to appropriate personnel for resolution, in accordance with organisational procedures    |
|                                                                                     | <b>2.3</b> | Outcomes of consultations are communicated to the team and/or work group promptly                                                                             |
| <b>3 Implement and monitor organisational procedures for controlling risks</b>      | <b>3.1</b> | Existing and potential hazards in the workplace or area are identified and reported, in accordance with organisational procedures                             |
|                                                                                     | <b>3.2</b> | Organisational procedures to control risks are implemented and monitored by team and/or work group                                                            |
|                                                                                     | <b>3.3</b> | Existing risk control measures are monitored, and results are reported, in accordance with organisational procedures                                          |
|                                                                                     | <b>3.4</b> | Existing risk control measures are reviewed, in accordance with the hierarchy of risk control and any variations are reported to designated personnel         |
|                                                                                     | <b>3.5</b> | Inadequate resource allocation for implementation of risk control measures are identified and reported to designated personnel                                |
| <b>4 Implement organisational procedures for dealing with hazardous events</b>      | <b>4.1</b> | Organisational procedures for dealing with hazardous events are implemented, as required, to ensure prompt control action is undertaken                       |
|                                                                                     | <b>4.2</b> | Hazardous events are investigated to identify cause of the event, in accordance with organisational procedures                                                |
|                                                                                     | <b>4.3</b> | Control measures to prevent recurrence and minimise risk of hazardous events are implemented based on the                                                     |

|                                                                                                 |            |                                                                                                                                                                                                            |
|-------------------------------------------------------------------------------------------------|------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                                                                                                 |            | hierarchy of risk control or are referred to designated personnel for implementation                                                                                                                       |
| <b>5 Implement and monitor organisational procedure for providing safety awareness training</b> | <b>5.1</b> | Safety awareness training needs are identified from specified WHS/OHS competencies currently held by team and/or work group members                                                                        |
|                                                                                                 | <b>5.2</b> | WHS/OHS training needs are identified, and training arrangements are implemented, in consultation with relevant personnel                                                                                  |
| <b>6 Implement and monitor organisational procedures for maintaining WHS/OHS records</b>        | <b>6.1</b> | WHS/OHS records for work place or area are accurately completed, in accordance with organisational requirements                                                                                            |
|                                                                                                 | <b>6.2</b> | Information from WHS/OHS records is used to identify hazards and monitor risk control procedures within work place or area, in accordance with organisational procedures and duty of care responsibilities |

## Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

## Unit Mapping Information

This unit replaces and is equivalent to PUAOHS003B Implement and monitor the organisation's occupational health and safety policies, procedures and programs.

# Assessment Requirements for PUAWHS003 Implement and monitor organisational work, health and safety policies, procedures and programs

## Modification History

**Release 1.** This is the first release of this unit of competency in the Public Safety Training Package.

## Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and includes

- applying Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) requirements
- communicating information orally and in writing
- completing organisational documentation
- implementing and monitoring participative arrangements for the management of WHS/OHS organisational requirements
- implementing safety awareness programs
- providing WHS/OHS information and organisational policies, procedures and safety awareness programs to team and/or work group
- working with organisational policies and implementing and monitoring organisational procedures for identifying hazards and assessing risks, controlling hazards and risks, dealing with hazardous events, providing safety awareness training and maintaining WHS/OHS records

## Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria and includes knowledge of

- duty of care obligations and responsibilities
- emergency services including contact details and availability
- hazardous events
- hierarchy of risk control including elimination of hazards, substitute hazard with something safer, isolate hazard from people, reduction of risk through engineering controls, reduction of exposure to hazard using administrative actions and use of personal protection clothing and equipment
- organisational documentation, policies and procedures including implementing accident investigations, completing accident reporting and dealing with hazardous event procedures
- principles and procedures relating to organisational Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) policies and procedures

- provisions of WHS/OHS legislated requirements
- root cause analysis requirements
- safety awareness programs
- work place or area layout

## Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Assessment must occur in workplace operational situations. Where this is not appropriate, assessment must occur in industry approved simulated workplace operational situations that reflect workplace conditions.

Resources for assessment must include access to

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, equipment, tools and personal protective clothing and equipment currently used in industry
- applicable documentation including organisational policies and procedures, industry standards, equipment specifications, regulations, codes of practice and operation manuals.

# PUAWHS004 Establish and maintain the work, health and safety system

## Modification History

**Release 2.0** This is the first release of this unit of competency in the Public Safety Training Package.

Editorial adjustments and clarification of text in Assessment Conditions.

**Release 1.0** This is the first release of this unit of competency in the PUA Public Safety Training Package.

## Application

This unit involves the skills and knowledge required to establish, maintain and evaluate a work, health and safety system in the work environment. This may require significant role or delegated authority to allow for implementation and review. It does not cover the broader implementation of an organisational wide Work, Health and Safety (WHS) /Occupational Health and Safety (OHS) policy.

The unit is applicable to personnel who have either a legislated or delegated responsibility to implement systems to meet organisational WHS/OHS policy requirements. While designed for public safety personnel this unit may be applied in a range of industries.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Pre-requisite Unit

Not applicable

## Competency Field

Public safety

## Unit Sector

Public Safety

## Elements and Performance Criteria

### ELEMENTS

### PERFORMANCE CRITERIA

Elements describe the essential Performance criteria describe the performance needed to

outcomes.

demonstrate achievement of the element.

**1 Organise consultation process**

- 1.1** Personnel are identified and invited into the development and maintenance process
- 1.2** Issues raised through consultation are handled, in accordance with organisational procedures
- 1.3** Results from the consultation process are verified and made available to relevant personnel
- 1.4** Consultative processes are flexible and consistent with representatives' requirements

**2 Design WHS/OHS framework**

- 2.1** Hazards and risks are identified and confirmed, in accordance with Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) legislation and codes of practice
- 2.2** Procedures for ongoing identification of hazards and risks are developed and integrated within the organisational WHS/OHS framework
- 2.3** WHS/OHS policies are developed, in accordance with legislative requirements
- 2.4** WHS/OHS responsibilities and duties are defined and incorporated into job/role descriptions and/or statements
- 2.5** Resources are sourced and provided in a timely and consistent manner
- 2.6** Measures to control risks are developed and implemented, in accordance with the hierarchy of risk control, WHS/OHS safety legislation and code of practice
- 2.7** Interim solutions are implemented until a permanent control measure is developed
- 2.8** Details of interim solutions are clearly recorded, in accordance with organisational policies and procedures and WHS/OHS legislation

**3 Design and implement a WHS/OHS awareness training program**

- 3.1** Educational information about the WHS/OHS system is made available to all personnel
- 3.2** Appropriate training is provided to all personnel to enable the implementation of safety procedures

- |                                                                                               |                                                                                                                                                                                          |

| <b>4 Establish, monitor and maintain WHS/OHS</b>                                              | <b>4.1</b> A system for keeping WHS/OHS records is established, in accordance with legislative requirements                                                                              |
|                                                                                               | <b>4.2</b> Work activities are monitored to ensure that hazard identification, risk assessment and risk control procedures are adopted                                                   |
|                                                                                               | <b>4.3</b> Hazard identification, risk assessment and risk control measures are reviewed, in accordance with the hierarchy of risk control and are reported to designated personnel      |
|                                                                                               | <b>4.4</b> Amendments to organisational procedures are undertaken through appropriate consultation                                                                                       |
| <b>5 Establish and maintain a system for accident investigation</b>                           | <b>5.1</b> A safety management system is developed and implemented for reporting and investigating accidents and/or incidents, in accordance with organisational policies and procedures |
|                                                                                               | <b>5.2</b> Training is provided to personnel responsible for accident investigation                                                                                                      |
|                                                                                               | <b>5.3</b> Organisational policies and procedures for reporting and investigating accidents and/or incidents are reviewed and updated, as required                                       |
| <b>6 Evaluate organisational WHS/OHS system and related policies, procedures and programs</b> | <b>6.1</b> Effectiveness of the WHS/OHS system and related policies, procedures and programs are assessed, in accordance with organisational safety policy                               |
|                                                                                               | <b>6.2</b> Improvements to the WHS/OHS system are developed and implemented                                                                                                              |
|                                                                                               | <b>6.3</b> Compliance with WHS/OHS legislation and codes of practice is assessed to ensure legal requirements and organisational standards are maintained                                |

## Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

## **Unit Mapping Information**

This unit replaces and is equivalent to PUAOHS004B Establish and maintain the occupational health and safety system.

## **Links**

Companion Volume Implementation Guides are found in VETNet -  
<https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=3eca5672-6d5a-410b-8942-810d0ba05bbf>

# Assessment Requirements for PUAWHS004 Establish and maintain the work, health and safety system

## Modification History

**Release 2.0** This is the second release of this unit of competency in the Public Safety Training Package.

Editorial adjustments and clarification of text in Assessment Conditions.

**Release 1.0** This is the first release of this unit of competency in the PUA Public Safety Training Package.

## Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements, performance criteria and range of conditions on at least one occasion and includes

- applying Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) requirements
- communicating information designing a WHS/OHS framework
- developing and implementing WHS/OHS awareness training programs
- establishing, monitoring and maintaining WHS/OHS systems including accident investigation
- evaluating organisational WHS/OHS systems and related policies, procedures and programs
- organising consultation processes
- using management systems.

## Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements, performance criteria and range of conditions and includes knowledge of

- communication methods and techniques
- consultative processes
- details of Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) legislation and codes of practice and their relevance to organisational operations
- hierarchy of control
- interim solutions
- management of system
- organisational documentation, policies and procedures
- relevant personnel
- resources

- types of WHS/OHS training programs
- WHS/OHS organisational framework and policies
- WHS/OHS organisational requirements including risk mitigation and hazard identification
- WHS/OHS trends.

## Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in operational situations or in simulated operational training situations that reflect workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to

- a range of relevant exercises, case studies and/or simulations
- appropriate materials, equipment, tools and personal protective clothing and equipment currently used in industry
- applicable documentation including organisational procedures, industry standards, equipment specifications, regulations, codes of practice and operation manuals.

# AHCBER301 Work effectively in an emergency disease or plant pest response

## Modification History

| Release | TP Version | Comment         |
|---------|------------|-----------------|
| 1       | AHCv1.0    | Initial release |

## Application

This unit of competency covers the skills and knowledge required to work effectively within own area of responsibility while responding to an emergency disease or plant pest incursion.

The unit applies to personnel who have been appointed or engaged to undertake a role within an emergency disease or plant pest incursion response.

This unit applies to individuals who work under broad direction and take responsibility for their own work including limited responsibility for the work of others. They provide and communicate solutions to a range of predictable problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

## Pre-requisite Unit

Nil.

## Unit Sector

Emergency Response (BER)

# Assessment Requirements for AHCBER301 Work effectively in an emergency disease or plant pest response

## Modification History

| Release | TP Version | Comment         |
|---------|------------|-----------------|
| 1       | AHCv1.0    | Initial release |

## Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- access and use information to determine appropriate response, work needs, and information and resources to be accessed from stakeholders
- carry out work activities to conform with national plan
- communicate with stakeholders
- identify hazards and risks
- manage own work load and priorities
- interpret work instructions and seek clarification as needed
- recognise and respond to personal stress
- promote cooperation and respect within work team
- communicate the need for physical and human resources
- comply with biosecurity requirements for personal protective equipment and fomites, reporting biosecurity breaches and completing records
- adapt to and monitor change
- complete biosecurity records.

## Knowledge Evidence

The candidate must demonstrate knowledge of:

- AUSVETPLAN or PLANTPLAN, relevant standards, guidelines and protocols, and Nationally Agreed Standard Operating Procedures (NASOP) relating to an emergency disease or plant pest incursion response
- organisational procedures for communication in an emergency response
- common physical and human resources needed in an emergency response
- common work health and safety, and biosecurity hazards in an emergency response

- personal protective equipment, and fomites relevant to emergency response
- signs of personal stress and potential impact on response
- techniques for prioritising work activities and time management
- techniques for managing own responses to change, and to personal stress
- communication principles for working effectively in teams, and reporting information
- records required to be kept during an emergency response.

## Assessment Conditions

Assessors must satisfy current standards for RTOs.

# AHCBER303 Carry out emergency disease or plant pest control procedures at infected premises

## Modification History

| Release | TP Version | Comment         |
|---------|------------|-----------------|
| 1       | AHCv1.0    | Initial release |

## Application

This unit of competency describes the skills and knowledge required to carry out emergency disease or plant pest control activities at a site affected by an emergency disease outbreak or plant pest incursion.

The unit applies to personnel who undertake a role within an emergency disease or plant pest incursion response.

This unit applies to individuals who work under broad direction and take responsibility for their own work including limited responsibility for the work of others. They provide and communicate solutions to a range of predictable problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

## Pre-requisite Unit

Nil.

## Unit Sector

Emergency Response (BER)

## Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

## Range of Conditions

## Unit Mapping Information

This unit is equivalent to AHC BIO303A Carry out emergency disease or plant pest control procedures at infected premises.

## Links

Companion Volume implementation guides are found in VETNet -  
<https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=c6399549-9c62-4a5e-bf1a-524b2322cf72>

## Assessment Requirements for AHCBER303 Carry out emergency disease or plant pest control procedures at infected premises

### Modification History

| Release | TP Version | Comment         |
|---------|------------|-----------------|
| 1       | AHCv1.0    | Initial release |

### Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- prepare for control activities
- follow infected premises (IP) site supervisor instructions
- identify animal welfare concerns
- select, prepare and use personal protective equipment (PPE)
- apply biosecurity principles and work health and safety practices in implementing, monitoring and reporting on variations to control activities
- implement control activities
- monitor, review and report on control activities within area of own responsibility, for compliance and effectiveness
- undertake remedial action within own scope of authority
- provide reports to IP site supervisor on variations to activities, failure to meet objectives and recommendations for adjustments to work instructions
- communicate effectively with IP site supervisor and when giving and receiving work instructions to others
- maintain log of activities as required.

### Knowledge Evidence

The candidate must demonstrate knowledge of:

- common control activities associated with emergency disease and plant pest control procedures at infected premises (IP)
- objectives and work instructions commonly associated with IP control responses
- own work role and responsibilities within an IP control response

- animal welfare guidelines relevant to the species, disease and IP environment if animals are under control procedures
- PPE gear commonly used in IP control response
- biosecurity principles commonly associated with an IP control response
- safe work practices applicable to work role and responsibilities in an IP environment
- reporting templates and requirements for logging control activities
- communication principles used in giving, receiving and clarifying instructions, and reporting on control activities.

## Assessment Conditions

Assessors must satisfy current standards for RTOs.

# AHCBER304 Carry out movement and security procedures

## Modification History

| Release | TP Version | Comment         |
|---------|------------|-----------------|
| 1       | AHCv1.0    | Initial release |

## Application

This unit of competency describes the skills and knowledge required to implement appropriate procedures to restrict the movement of vehicles, personnel, products, livestock and plant material in relation to managing an emergency disease or plant pest incursion.

The unit applies to personnel who have been appointed or engaged to undertake a role within an emergency disease or plant pest incursion response.

This unit applies to individuals who work under broad direction and take responsibility for their own work including limited responsibility for the work of others. They provide and communicate solutions to a range of predictable problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

## Pre-requisite Unit

Nil.

## Unit Sector

Emergency Response (BER)

## Elements and Performance Criteria

## Assessment Requirements for AHCBER304 Carry out movement and security procedures

### Modification History

| Release | TP Version | Comment         |
|---------|------------|-----------------|
| 1       | AHCv1.0    | Initial release |

### Performance Evidence

The candidate must undertake movement and security procedures including establishing a traffic check point and monitoring the movement of vehicles and issuing permits.

The candidate must demonstrate that they can:

- determine logistics and required documentation applicable to specific movement and security operations
- obtain and check any resources and personal protective equipment (PPE)
- establish and operate traffic checkpoint
- issue and check permits
- respond to vehicles without valid permit for load being transported as appropriate to standards and protocols
- liaise with external security providers
- use PPE and decontaminate resources as required
- monitor, review and report on application of movement and security procedures within area of own responsibility
- undertake remedial action within own scope of authority
- provide reports on variations to appropriate authorities in consistency, currency and ongoing effectiveness or failure to achieve objectives
- communicate recommendations on adjusting movement and security procedures to supervisor and appropriate authorities.

### Knowledge Evidence

The candidate must demonstrate knowledge of:

- movement and security procedures commonly associated with movement and security controls during a disease or plant pest incursion
- AUSVETPLAN or PLANTPLAN, and other relevant standards and protocols to determine:

- permits and documentation associated with implementing movement and security procedures
- action required for any vehicle without a valid permit
- biosecurity principles associated with movement and security procedures, use of PPE gear, and need for decontamination
- safe work practices
- objectives and work instructions associated with movement and security procedures
- own work role, responsibilities and scope of authority in implementing movement and security procedures
- decontamination procedures for PPE and resources
- reporting templates
- communication principles used in operating a traffic control point, issuing permits and documentation, and reporting to supervisor and appropriate authorities.

## Assessment Conditions

Assessors must satisfy current standards for RTOs.

# AHCBER401 Plan and supervise control activities on infected premises

## Modification History

| Release | TP Version | Comment         |
|---------|------------|-----------------|
| 1       | AHCv1.0    | Initial release |

## Application

This unit of competency describes the skills and knowledge required to supervise others in the range of activities required on infected premises (IP).

The unit applies to personnel who have been appointed or engaged to undertake a role within an emergency disease or plant pest incursion response. Work is generally carried out under general instructions from the IP operations manager.

This unit applies to individuals who take responsibility for their own work and for the quality of the work of others within known parameters. They provide and communicate solutions to a range of predictable and sometimes unpredictable problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

## Pre-requisite Unit

Nil.

## Unit Sector

Emergency Response (BER)

## Elements and Performance Criteria

## Assessment Requirements for AHCBER401 Plan and supervise control activities on infected premises

### Modification History

| Release | TP Version | Comment         |
|---------|------------|-----------------|
| 1       | AHCv1.0    | Initial release |

### Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- consult with infected premises (IP) manager and property owner or manager on planning and implementation matters
- plan control activities for emergency disease or plant pest control response:
- schedule implementation of control activities
- identify IP procedures required, and confirm with IP manager
- request resources required for planned activities
- establish reporting processes
- establish staff rosters
- communicate with property owner or manager on IP procedures
- supervise and motivate personnel to carry out control activities to standards and protocols required, and confirm with on-site inspections of teams
- monitor supplies of materials and resources and maintain to meet needs of control activities
- monitor all IP service provision for adherence to standards, protocols and contractual arrangements
- maintain incident log, and records of control activities
- monitor control activities for value for money, and minimal impact on property, effectiveness and progress against planned objectives
- report on progress of control activities against plan to IP operations manager
- revise control activities as required to address relevant protocols whilst maintaining cost effectiveness and wider impacts
- communicate revisions to control activities to Local Control Centre (LCC).

## Knowledge Evidence

The candidate must demonstrate knowledge of:

- AUSVETPLAN or PLANTPLAN, relevant standards, guidelines and protocols, and Nationally Agreed Standard Operating Procedures (NASOP) that guide development and implementation of IP control plan, contractual arrangements and control procedures
- planning processes
- communication principles used for consultation, providing information, reporting, and in interacting with personnel
- supervisory and monitoring practices used with personnel
- techniques for motivating personnel
- contractual arrangements
- reporting requirements
- processes for planning, scheduling, monitoring progress and costs.

## Assessment Conditions

Assessors must satisfy current standards for RTOs.

# AHCBER402 Carry out field surveillance for a specific emergency disease or plant pest

## Modification History

| Release | TP Version | Comment         |
|---------|------------|-----------------|
| 1       | AHCv1.0    | Initial release |

## Application

This unit of competency describes the skills and knowledge required to carry out field surveillance for a specific emergency disease or plant pest.

The unit applies to personnel who have been appointed or engaged as part of a field surveillance team to undertake a role within an emergency disease or plant pest incursion response. Field surveillance teams work under instructions from the control centre.

This unit applies to individuals who take responsibility for their own work and for the quality of the work of others within known parameters. They use discretion and judgement in the selection, allocation and use of available resources.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

## Pre-requisite Unit

Nil.

## Unit Sector

Emergency Response (BER)

## Elements and Performance Criteria

| Element                                   | Performance criteria                                                                            |
|-------------------------------------------|-------------------------------------------------------------------------------------------------|
| Elements describe the essential outcomes. | Performance criteria describe the performance needed to demonstrate achievement of the element. |

| Element                                                         | Performance criteria                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |

## Assessment Requirements for AHCBER402 Carry out field surveillance for a specific emergency disease or plant pest

### Modification History

| Release | TP Version | Comment         |
|---------|------------|-----------------|
| 1       | AHCv1.0    | Initial release |

### Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- undertake field surveillance for specific disease or plant pest as directed
- report findings of specific disease or plant pest along with samples and evidence to support find
- follow relevant standards and protocols to identify and report findings
- use appropriate available expertise to assist in identification and diagnosis
- follow relevant standards and protocols in collection, handling, packaging and despatch of samples
- contain emergency disease of plant pest as directed by control centre and relevant guidelines
- collect and report information relevant to management of outbreak to surveillance coordinator
- give directions and warnings to property owners or person in charge re the suspected presence of emergency disease or plant pest
- decontaminate self and where appropriate equipment and vehicles.

### Knowledge Evidence

The candidate must demonstrate knowledge of:

- standards, guidelines and protocols for the emergency disease or plant pest
- signs of specific disease or plant pest which is the subject to surveillance
- emergency disease or plant pest surveillance procedures for:
  - collecting and handling samples and supporting evidence of diagnosis
  - reporting findings and information that may help in control response
  - containment of outbreak

- personal and general decontamination
- process for locating expertise
- communication principles for providing direction and warnings to property owners and managers, liaising with disease or plant pest experts, and reporting to surveillance coordinator.

## Assessment Conditions

Assessors must satisfy current standards for RTOs.

# AHCBER501 Manage active operational emergency disease or plant pest sites

## Modification History

| Release | TP Version | Comment         |
|---------|------------|-----------------|
| 1       | AHCv1.0    | Initial release |

## Application

This unit of competency describes the skills and knowledge required to manage active operational emergency disease or plant pest sites.

The unit applies to personnel who have been appointed or engaged to undertake a role within an emergency disease or plant pest incursion response.

This unit applies to individuals who take personal responsibility for their own work and exercise autonomy in undertaking complex work. They analyse information and demonstrate deep knowledge in a specific technical area. They analyse, design and communicate solutions to sometimes complex problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

## Pre-requisite Unit

Nil.

## Unit Sector

Emergency Response (BER)

## Elements and Performance Criteria

| Element                                   | Performance criteria                                                                            |
|-------------------------------------------|-------------------------------------------------------------------------------------------------|
| Elements describe the essential outcomes. | Performance criteria describe the performance needed to demonstrate achievement of the element. |

## Assessment Requirements for AHCBER501 Manage active operational emergency disease or plant pest sites

### Modification History

| Release | TP Version | Comment         |
|---------|------------|-----------------|
| 1       | AHCv1.0    | Initial release |

### Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- apply standards, guidelines, protocols and legislation in:
  - planning control procedures
  - resourcing the control plan
  - addressing work health and safety requirements
  - determining criteria for implementing control procedures
  - contracting services
  - monitoring implementation of control procedures for cost effectiveness
  - monitoring, reviewing control operations and revising priorities as part of managing active emergency disease or plant pest sites
- plan and resource control procedures, and contingency plans
- engage with stakeholders and field personnel in planning process
- engage with stakeholders, field staff, property owners/managers and others in control centre throughout the control period
- manage and monitor implementation of control procedures
- monitor personnel against specified objectives
- monitor supply of resources
- review priorities and revise as appropriate after consultation
- review control activities as required and communicate to stakeholders and personnel.

### Knowledge Evidence

The candidate must demonstrate knowledge of:

- AUSVETPLAN or PLANTPLAN, and relevant standards, guidelines and protocols, and Nationally Agreed Standard Operating Procedures (NASOP)
- incident control management procedures
- the requirements of relevant commonwealth, state and territory legislation
- relevant public sector policies, practices and constraints in relation to emergency disease or plant pest management
- techniques for monitoring and reviewing control procedures, and resource expenditure
- advanced communication principles to consult and communicate with a range of stakeholders and the control centre
- project management principles.

## Assessment Conditions

Assessors must satisfy current standards for RTOs.

# AHCBER502 Manage the implementation of an emergency disease or plant pest control program

## Modification History

| Release | TP Version | Comment         |
|---------|------------|-----------------|
| 1       | AHCv1.0    | Initial release |

## Application

This unit of competency describes the skills and knowledge required to manage and implement an emergency disease or plant pest control program.

The unit applies to personnel who have been appointed or engaged to undertake a role within an emergency disease or plant pest incursion response.

This unit applies to individuals who take personal responsibility for their own work and exercise autonomy in undertaking complex work. They analyse information and demonstrate deep knowledge in a specific technical area. They analyse, design and communicate solutions to sometimes complex problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

## Pre-requisite Unit

Nil.

## Unit Sector

Emergency Response (BER)

## Elements and Performance Criteria

| Element                                   | Performance criteria                                                                            |
|-------------------------------------------|-------------------------------------------------------------------------------------------------|
| Elements describe the essential outcomes. | Performance criteria describe the performance needed to demonstrate achievement of the element. |

| Element                                                                        | Performance criteria                                                                                                                                                                                                                                                                                                                                                                                                           |
|--------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1. Initiate emergency disease or plant pest control program                    | 1.1 Identify, source or develop control procedures needed to manage an infection or infestation according to standards, protocols and situational variables<br>1.2 Develop operational plans for own area of responsibility<br>1.3 Make contributions as required to other plans and strategies<br>1.4 Source resources required to control or eradicate emergency disease or plant pest                                       |

# Assessment Requirements for AHCBER502 Manage the implementation of an emergency disease or plant pest control program

## Modification History

| Release | TP Version | Comment         |
|---------|------------|-----------------|
| 1       | AHCv1.0    | Initial release |

## Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- apply standards, guidelines and protocols in:
  - setting up and implementing control procedures
  - monitoring the status of properties and effectiveness of operational or control plan as part of an emergency disease or plant pest control response
- contribute to other plans and strategies, and develop operational plan within own area of responsibility
- source resources for control program
- direct implementation of the control plan and procedures utilising reporting and information management system
- monitor appropriateness and effectiveness of emergency disease or plant pest control procedures and review against and relevant guidelines, and operational or control plan
- monitor effectiveness of emergency disease or plant pest and information management system and revise procedures as necessary to ensure completeness of records
- monitor resource expenditure and availability against requirements of the operational or control plan and reallocate resources as required.

## Knowledge Evidence

The candidate must demonstrate knowledge of:

- AUSVETPLAN or PLANTPLAN, and relevant standards, guidelines and protocols, and Nationally Agreed Standard Operating Procedures (NASOP)
- incident control management procedures
- the requirements of relevant commonwealth, state and territory legislation

- relevant public sector policies, practices and constraints in relation to emergency disease or plant pest management
- information management systems and procedures for use and reporting
- techniques for monitoring and reviewing operational or control plans, and resource expenditure and allocation
- communication principles to liaise with other agencies, and direct implementation of the operation or control plan
- project management principles.

## Assessment Conditions

Assessors must satisfy current standards for RTOs.

# AHCBER601 Plan and oversee an emergency disease or plant pest control program

## Modification History

| Release | TP Version | Comment         |
|---------|------------|-----------------|
| 1       | AHCv1.0    | Initial release |

## Application

This unit of competency describes the skills and knowledge required to plan and oversee an emergency disease or plant pest control program according to the relevant standards and protocols provided in a national response plan.

The unit applies to personnel who have been appointed or engaged to undertake a role within an emergency disease or plant pest incursion response.

This unit applies to individuals who take personal responsibility for their own work and exercise autonomy in undertaking complex work. They analyse, design and communicate solutions to a range of complex problems. They work in contexts that are subject to change and adapt a range of fundamental principles accordingly.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

## Pre-requisite Unit

Nil.

## Unit Sector

Emergency Response (BER)

## Assessment Requirements for AHCBER601 Plan and oversee an emergency disease or plant pest control program

### Modification History

| Release | TP Version | Comment         |
|---------|------------|-----------------|
| 1       | AHCv1.0    | Initial release |

### Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in an emergency disease or plant pest setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- apply standards, guidelines, protocols, and legislation in:
  - planning and amending a control program
  - recording information and disseminating
  - disseminating reports
  - identifying appropriate personnel along lines of communication as part of planning and overseeing an emergency disease or plant pest control program
- plan a control program around identified strategies with input of experts and submit to for approval
- identify declared areas that are within the jurisdiction of the control program
- brief appropriate personnel and organisations/agencies on developments and consequences of emergency disease or plant pest outbreak, and its ongoing management
- implement and monitor control plans utilising information management system and reporting as set out in standards and protocols
- monitor control strategies in use against the intended outcomes, and amend control plans as appropriate
- monitor resource requirements are sufficient to ensure strategies are achieved
- communicate revisions to control strategies and/or plans to appropriate personnel.

### Knowledge Evidence

The candidate must demonstrate knowledge of:

- AUSVETPLAN or PLANTPLAN, and other Nationally Agreed Standard Operating Procedures (NASOP), relevant standards, guidelines and protocols and associated manuals
- incident management functions

- phases of a response
- the requirements of relevant commonwealth, state and territory legislation
- strategies for controlling emergency disease or plant pest situations
- support agencies and sources of expertise
- control procedures relevant to the emergency disease or plant pest situation
- project management principles
- consequences and impacts of the outbreak and management controls
- information management system
- processes for monitoring and reviewing control plans, and resource expenditure
- human and physical resources required to implement the control plan
- methods of communicating with stakeholders.

## Assessment Conditions

Assessors must satisfy current standards for RTOs.

## AHC BIO202 Follow site quarantine procedures

### Modification History

| Release | TP Version | Comment         |
|---------|------------|-----------------|
| 1       | AHCv1.0    | Initial release |

### Application

This unit of competency describes the skills and knowledge required to follow the organisation's procedures that reduce the likelihood of pathogenic organisms entering a quarantine site.

It applies to any personnel entering and leaving the quarantine area.

This unit applies to individuals who work under general supervision and exercise limited autonomy. They undertake defined activities and work in a structured context.

Licensing, legislative, regulatory or certification requirements may apply to this unit in some states and territories in relation to use of farm chemicals in quarantine situations, national vendor declarations, and movement of livestock and plant material. Therefore, it will be necessary to check with the relevant state or territory regulators for current licensing, legislative or regulatory requirements before undertaking this unit.

### Pre-requisite Unit

Nil.

### Unit Sector

Biosecurity (BIO)

### Elements and Performance Criteria

| Element                                   | Performance criteria                                                                            |
|-------------------------------------------|-------------------------------------------------------------------------------------------------|
| Elements describe the essential outcomes. | Performance criteria describe the performance needed to demonstrate achievement of the element. |

# Assessment Requirements for AHC BIO202 Follow site quarantine procedures

## Modification History

| Release | TP Version | Comment         |
|---------|------------|-----------------|
| 1       | AHCv1.0    | Initial release |

## Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- meet site security and entry/exit requirements for vehicles, apparel and personal hygiene and safety
- follow procedures and biosecurity protocols for handling and storing chemicals, medications, feed mixes, soils, growing media and other products
- report disease/pest infestation, breaches of quarantine procedures and work health and safety hazards to supervisor
- dispose of waste products, deceased livestock, unwanted biological material, damaged or infected plant stock, contaminated stock and contaminated material as instructed
- record information related to work in quarantine area, including any breach or problem
- maintain security of quarantine site, any site identified as a quarantine breach and any site considered a problem area
- direct visitors in their obligations to follow quarantine procedures
- control site deliveries to ensure quarantine procedures are followed
- follow quarantine procedure and biosecurity protocols in responding to a site quarantine breach or problem
- clean and disinfect any quarantine breach sites
- isolate and monitor livestock, plant stock or other items suspected of being exposed to contaminants.

## Knowledge Evidence

The participant must demonstrate knowledge of:

- site quarantine procedures and biosecurity protocols for:

- disposal of waste products, diseased livestock, unwanted biological material, damaged or infected plant stock, contaminated stock or contaminated material
- directing visitors at the quarantine site
- reporting diseases and pest infestations problem, work health and safety hazards
- handling and storing chemicals, medications, feed mixes, soil, growing media
- controlling entry of deliveries to a quarantine site
- isolating livestock and monitoring livestock
- cleaning and disinfecting quarantine area
- maintaining security for the quarantine site
- recording information about own work and any quarantine breaches
- personal protective equipment appropriate to site quarantine procedures and biosecurity protocols
- work health and safety hazards
- methods for cleaning and disinfecting quarantine site or area of quarantine breach
- biosecurity protocols and how they apply to the work site, industry and in the context of a work role.

## Assessment Conditions

Assessors must satisfy current standards for RTOs.

# AHC BIO302 Identify and report unusual disease or plant pest signs

## Modification History

| Release | TP Version | Comment         |
|---------|------------|-----------------|
| 1       | AHCv1.0    | Initial release |

## Application

This unit of competency describes the skills and knowledge required to recognise unusual disease or plant pest signs during day-to-day work and take appropriate reporting action.

The unit is typically performed by those who have daily contact with plants, birds, animals or fish. It would usually be carried out in conjunction with routine animal or plant husbandry tasks.

This unit applied to individuals who work under broad direction and take responsibility for their own work including limited responsibility for the work of others. They provide and communicate solutions to a range of predictable problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

## Pre-requisite Unit

Nil.

## Unit Sector

Biosecurity (BIO)

## Elements and Performance Criteria

# Assessment Requirements for AHC BIO302 Identify and report unusual disease or plant pest signs

## Modification History

| Release | TP Version | Comment         |
|---------|------------|-----------------|
| 1       | AHCv1.0    | Initial release |

## Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify unusual disease or pest signs
- assess the severity and extent of problem in the disease or pest species
- seek advice from supervisors or professionals
- notify appropriate authorities
- implement appropriate biosecurity measures.

## Knowledge Evidence

The candidate must demonstrate knowledge of:

- signs of common endemic diseases or plant pests in the species
- signs indicating unusual disease or plant pests
- methods for assessing severity and extent of problem
- biosecurity measures associated with enterprise biosecurity plans
- the process of reporting any unusual findings to appropriate authorities.

## Assessment Conditions

Assessors must satisfy current standards for RTOs.

# AHCBUS615 Implement a monitoring, evaluation and reporting program

## Modification History

| Release   | Comments                                                                                                                    |
|-----------|-----------------------------------------------------------------------------------------------------------------------------|
| Release 1 | This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 4.0. |

## Application

This unit of competency describes the skills and knowledge required to implement a monitoring, evaluation and reporting program.

This unit applies to individuals who take personal responsibility for their own work and exercise autonomy in undertaking complex work. They must analyse information and exercise judgement to complete a range of advanced skilled activities in relation to implementing the program. They analyse, design and communicate solutions to a range of complex problems.

All work must be carried out to comply with organisational requirements, workplace health and safety legislation and codes, sustainability practices, and in consultation with the management team.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Pre-requisite Unit

Nil

## Unit Sector

Business (BUS)

## Elements and Performance Criteria

## Assessment Requirements for AHCBUS615 Implement a monitoring, evaluation and reporting program

### Modification History

| Release   | Comments                                                                                                                    |
|-----------|-----------------------------------------------------------------------------------------------------------------------------|
| Release 1 | This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 4.0. |

### Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that the individual has implemented a monitoring, evaluation and reporting program for at least one enterprise, or enterprise activity, including:

- collected and managed data
- analysed production or project data
- prepared reports and presented information to stakeholders
- evaluated the effectiveness, efficiency and appropriateness of investment in a project or program
- made recommendations for improvement
- reviewed the evaluation process.

### Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- quantitative and qualitative methods for monitoring and evaluation
- communication and consultation skills to present findings and recommendations
- data management processes and systems
- policy and program management processes
- adaptive management and review cycles.

### Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - skills must be demonstrated in workplace setting or an environment that accurately represents workplace conditions
- resources, equipment and materials:

- enterprise process or project to be monitored and evaluated.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

## AHCCCF406 Facilitate ongoing group development

### Modification History

| Release | TP Version | Comment         |
|---------|------------|-----------------|
| 1       | AHCv1.0    | Initial release |

### Application

This unit of competency describes the skills and knowledge required to facilitate ongoing group development.

It applies to those who support a community Landcare group or similar, in its ongoing management and resolution of issues.

This unit applies to individuals who take responsibility for others and provide and communicate solutions to a range of predictable and sometimes unpredictable problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

### Pre-requisite Unit

Nil.

### Unit Sector

Community Coordination and Facilitation (CCF)

### Elements and Performance Criteria

| Element                                   | Performance criteria                                                                            |
|-------------------------------------------|-------------------------------------------------------------------------------------------------|
| Elements describe the essential outcomes. | Performance criteria describe the performance needed to demonstrate achievement of the element. |
| 1. Maintain contact on group activities   | 1.1 Maintain contact with group on current and proposed activities and projects                 |

| Element                                                  | Performance criteria                                                                                                                                                                                                                                                                                                                                                                  |
|----------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                                                          | 1.2 Provide advice on group operation and opportunities when sought<br>1.3 Define role of coordinator in group operations with the management committee to avoid misunderstanding                                                                                                                                                                                                     |
| 2. Provide fresh input into group                        | 2.1 Identify relevant new initiatives and ideas from other groups and program areas<br>2.2 Seek new initiatives and ideas from appropriate sources<br>2.3 Develop any suggestions to include local group and program context                                                                                                                                                          |
| 3. Maintain network of contacts                          | 3.1 Maintain contacts with members of the group and community to provide interchange of ideas and information                                                                                                                                                                                                                                                                         |
| 4. Facilitate resolution of group operating difficulties | 4.1 Identify issues with potential to hinder operations before damage occurs to the group<br>4.2 Assess external threats and facilitate negotiation of solutions between the group and external parties<br>4.3 Resolve internal conflict through facilitation and use of relevant expert advice<br>4.4 Implement change management processes for groups requiring major restructuring |

## Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

## Range of Conditions

## Unit Mapping Information

This unit is equivalent to AHCCCF406A Facilitate ongoing group development.

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=c6399549-9c62-4a5e-bf1a-524b2322cf72>

## Assessment Requirements for AHCCCF406 Facilitate ongoing group development

### Modification History

| Release | TP Version | Comment         |
|---------|------------|-----------------|
| 1       | AHCv1.0    | Initial release |

### Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- maintain contact with group to facilitate community networking
- share ideas between groups to foster initiative and innovation
- identify sources of conflict and issues that detract from the effective and equitable functioning of a group
- resolve group conflict and refer group issues for specialist advice if required
- use a range of facilitation strategies to work with groups.

### Knowledge Evidence

The candidate must demonstrate knowledge of:

- group development and facilitation techniques
- program guidelines, purpose and aims
- general understanding of natural resource management, sciences and technologies associated with program
- committee and group procedures.

### Assessment Conditions

Assessors must satisfy current standards for RTOs.

## AHCCCF413 Service committees

### Modification History

| Release | TP Version | Comment         |
|---------|------------|-----------------|
| 1       | AHCv1.0    | Initial release |

### Application

This unit of competency describes the skills and knowledge required to provide support services to committees.

This unit applies to community program leaders who organise meetings for committees and sub-committees at the group and regional levels to support the operation of community groups. These individuals take responsibility for their own work and provide and communicate solutions to a range of predictable and sometimes unpredictable problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

### Pre-requisite Unit

Nil.

### Unit Sector

Community Coordination and Facilitation (CCF)

### Elements and Performance Criteria

| Element                                   | Performance criteria                                                                                                                                                                  |
|-------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Elements describe the essential outcomes. | Performance criteria describe the performance needed to demonstrate achievement of the element.                                                                                       |
| 1. Organise meetings                      | 1.1 Clarify purpose of meeting with the chair, secretary or coordinator<br>1.2 Prepare and maintain schedule of meetings in line with program, group, regional or agency requirements |

| Element                                  | Performance criteria                                                                                                                                                                                                                                                                                                                                                                                                     |
|------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                                          | 1.3 Organise venue and date of meeting according to meeting schedule, group requirements and within any budget constraints<br>1.4 Advise participants of any changes to original meeting details<br>1.5 Advise all appropriate individuals of details of meetings and follow up for confirmation of attendance<br>1.6 Accept and record any apologies<br>1.7 Set up meeting room in a timely manner to suit arrangements |
| 2. Prepare business papers for meetings  | 2.1 Prepare notice of meeting and agenda and provide details<br>2.2 Prepare reports for meeting<br>2.3 Distribute business papers to appropriate individuals following established guidelines                                                                                                                                                                                                                            |
| 3. # Assessment Requirements for AHCCCF413 Service committees

## Modification History

| Release | TP Version | Comment         |
|---------|------------|-----------------|
| 1       | AHCv1.0    | Initial release |

## Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- organise formal meetings and advise members of details within agreed timeframes
- prepare business papers and additional information for meetings
- take meeting notes to meet enterprise requirements
- carry out follow up actions within agreed timeframes
- prepare minutes according to committee, organisational and legislative requirements
- distribute meeting minutes within agreed timeframes

## Knowledge Evidence

The candidate must demonstrate knowledge of:

- meeting procedures, both formal and informal
- agency guidelines or instructions where applicable
- relevant program and incorporation requirements for group where applicable
- local facilities for meetings
- local arrangements for authorising expenditure
- office and related business procedures

## Assessment Conditions

Assessors must satisfy current standards for RTOs.

## AHCCCF505 Contribute to regional planning process

### Modification History

| Release | TP Version | Comment         |
|---------|------------|-----------------|
| 1       | AHCv1.0    | Initial release |

### Application

This unit of competency describes the skills and knowledge required to contribute to a regional planning process.

This unit applies to those whose job role requires them to contribute to and assist in the regional planning process under the broad direction of technical specialists, facilitator and/or group and panels. These individuals take personal responsibility and exercise autonomy in managing and undertaking complex work and analyse, design and communicate solutions to sometimes complex problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

### Pre-requisite Unit

Nil.

### Unit Sector

Community Coordination and Facilitation (CCF)

### Elements and Performance Criteria

| Element                                                       | Performance criteria                                                                                                                       |
|---------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------|
| Elements describe the essential outcomes.                     | Performance criteria describe the performance needed to demonstrate achievement of the element.                                            |
| 1. Participate in panels and group discussion on the planning | 1.1 Submit natural resource management issues, economic and social factors, and potential solutions or directions to groups for discussion |

## Assessment Requirements for AHCCCF505 Contribute to regional planning process

### Modification History

| Release | TP Version | Comment         |
|---------|------------|-----------------|
| 1       | AHCv1.0    | Initial release |

### Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- participate in panels and group discussion on the planning process
- collect information on local land management issues and relate to economic, industry and social factors
- submit views on natural resource management priorities and solutions
- review draft plans in terms of impact on the local and wider region to identify deficiencies and propose solutions
- participate in community consultation

### Knowledge Evidence

The candidate must demonstrate knowledge of:

- local community issues including economic, industry and social factors
- natural resource management issues for local area or region
- legislative, program and other requirements for regional plans and the planning process
- regional planning concepts
- natural resource management processes
- consultation approaches

### Assessment Conditions

Assessors must satisfy current standards for RTOs.

## AHCILM506 Operate within Community cultures and goals

### Modification History

| Release Number | TP Version | Comments        |
|----------------|------------|-----------------|
| 1              | AHCv1.0    | Initial release |

### Application

This unit of competency describes the skills and knowledge required to explore and understand the culture and goals of a Community or group and operate appropriately within those parameters.

This unit applies to individuals who work autonomously and apply judgement and defined responsibility in known or changing contexts and within broad but established parameters.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

### Pre-requisite Unit

Nil.

### Unit Sector

Indigenous Land Management (ILM)

## Assessment Requirements for AHCILM506 Operate within Community cultures and goals

### Modification History

| Release Number | TP Version | Comments        |
|----------------|------------|-----------------|
| 1              | AHCv1.0    | Initial release |

### Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- investigate a Community's culture
- identify the roles of Cultural Authorities, Elders, Custodians and other members of the Community
- follow Community protocols for consultation, promotion and use of information
- research the background and goals of Community, and their perspectives on natural resource management issues
- promote Community programs, plans and history according to permissions given by Cultural Authority, Elders or Custodians
- plan for consultation within the Community by working with their culture and goals and applying Community protocols

### Knowledge Evidence

The candidate must demonstrate knowledge of:

- Community structure or hierarchy
- research methods for investigating Community history
- current social and environment affairs for Community and wider region

### Assessment Conditions

Assessment must comply with Community protocols and be supported by Elders and Custodians of Country.

Assessors must satisfy current standards for RTOs.

## Foundation Skills

*This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.*

| Skill                      | Description                                                                                                                                                                                                                                                                     |
|----------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Reading                    | <ul style="list-style-type: none"> <li>Interpret textual information from a range of sources to identify relevant and key information about workplace operations</li> </ul>                                                                                                     |
| Writing                    | <ul style="list-style-type: none"> <li>Document site health and safety in the workplace, environmental and traffic control measures</li> </ul>                                                                                                                                  |
| Oral communication         | <ul style="list-style-type: none"> <li>Use clear language to report hazards and risks and to confirm work site, first aid and emergency personnel, equipment and procedures</li> <li>Participate in verbal exchanges to respond to questions and clarify information</li> </ul> |
| Numeracy                   | <ul style="list-style-type: none"> <li>Calculate fuel oil ratios and fuel quantities</li> </ul>                                                                                                                                                                                 |
| Navigate the world of work | <ul style="list-style-type: none"> <li>Recognise and follow workplace requirements, including safety requirements, associated with own role and area of responsibility</li> </ul>                                                                                               |
| Interact with others       | <ul style="list-style-type: none"> <li>Use verbal and non-verbal communications with work team during operations using voice, hand and whistle signals</li> </ul>                                                                                                               |

## Range of Conditions

*This section specifies different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.*

|                                                                            |                                                                                                                                                                                                       |
|----------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Personal protective equipment must include:                                | <ul style="list-style-type: none"> <li>• safety helmet</li> <li>• mesh visor</li> <li>• gloves</li> <li>• hearing protection</li> <li>• safety glasses or goggles</li> <li>• safety boots.</li> </ul> |
| Routine checks and maintenance must include at least two of the following: | <ul style="list-style-type: none"> <li>• checking and adjusting bar</li> <li>• cleaning air filter</li> <li>• cleaning and/or replacing spark plug</li> <li>• sharpening chain.</li> </ul>            |
| Supports must include at least one of the following:                       | <ul style="list-style-type: none"> <li>• fallen timber</li> <li>• saw horse trestle</li> <li>• v-shaped supports.</li> </ul>                                                                          |
| Cutting methods must include:                                              | <ul style="list-style-type: none"> <li>• pulling chains cuts (bottom of bar)</li> <li>• pushing chainsaw cuts (top of bar)</li> <li>• bore / plunge cuts (tip of bar).</li> </ul>                     |
| Tools must include:                                                        | <ul style="list-style-type: none"> <li>• bars</li> <li>• chains</li> <li>• files</li> <li>• plug spanner.</li> </ul>                                                                                  |

| Release 1 | This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.0. |

### Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that the individual has safely operated a hand-held chainsaw at least once, maintained it in working condition and demonstrated the following:

- determined site location for work and work details and clarified with supervisor
- identified site hazards, assessed risks and reported to supervisor
- confirmed work zone with work crew and monitored site
- confirmed first aid and emergency personnel, equipment and procedures
- applied hazard and risk assessment and implemented controls for chainsaw use
- performed routine checks and maintenance for chainsaw usage according to operation and maintenance manual
- identified, tagged and reported chainsaw faults and malfunctions
- recorded and implemented site health and safety in the workplace, environmental and traffic control measures
- used personal protective equipment that complies with Australian Standards
- safely cross-cut fallen timber using compression and tension cuts with a hand held chainsaw
- used appropriate tools and materials to maintain chainsaw
- applied environmentally responsible workplace practices
- applied low risk work practices including stopping, disengaging quickly and dealing with foreign matter
- cleaned and stored chainsaw
- followed workplace procedures relevant to safely operating a chainsaw.

## Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- the principles and practice for operating chainsaws
- chainsaw routine checks and maintenance according to operation and maintenance manual, including:
  - checking and adjusting bar
  - cleaning air filter
  - cleaning and replacing spark plug
  - sharpening chain
- workplace safe operating procedures
- hazards and risks when operating a chainsaw
- relevant Australian Standards concerning chainsaw operation including use of personal protective equipment
- components of chainsaws and their respective functions
- common defects in woody materials
- cutting methods and techniques, patterns and sequence of cuts
- health and safety in the workplace requirements for the operation of a chainsaw including caution and hazard signs and symbols
- environmental impacts associated with operating chainsaws.

## Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - a workplace setting or an environment that accurately represents workplace conditions
  - personal protective equipment must be worn whilst operating chainsaw
  - individual must not be under the influence of alcohol or drugs
  - individual must not be taking any medication (prescribed or otherwise) that may impair judgement
- resources, equipment and materials:
  - chainsaws
  - chainsaw tools
  - wood
  - safety equipment and personal protective equipment applicable to the task being undertaken
- specifications:
  - chainsaw manufacturer specifications and operator manuals
- timeframes:
  - according to the job requirements.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

# AHCNAR302 Collect and preserve biological samples

## Modification History

| Release | TP Version | Comment         |
|---------|------------|-----------------|
| 1       | AHCv1.0    | Initial release |

## Application

This unit of competency describes the skills and knowledge required to collect and preserve biological samples as part of a monitoring program.

This unit applies to individuals who most likely work under limited supervision from others with checking only related to overall progress.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

## Pre-requisite Unit

Nil.

## Unit Sector

Natural Area Restoration (NAR)

## Elements and Performance Criteria

| Element                                   | Performance criteria                                                                                                                                                                                                                                                             |

# Assessment Requirements for AHCNAR302 Collect and preserve biological samples

## Modification History

| Release | TP Version | Comment         |
|---------|------------|-----------------|
| 1       | AHCv1.0    | Initial release |

## Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- collect and preserve biological samples as part of a monitoring program according to enterprise procedures
- establish the sampling purpose and requirements
- plan the collection
- prepare equipment and facilities to take biological samples
- carry out biological sampling as part of a monitoring program and according to enterprise procedures
- preserve and record samples as part of a monitoring program and forward for testing if required according to enterprise procedures
- record sampling data and observations according to enterprise procedures
- report outcomes of collection according to enterprise procedures and monitoring program
- apply work health and safety practices in the context of own work
- apply biosecurity measures in the context of own work
- apply appropriate sustainability practices in the context of own work

## Knowledge Evidence

The candidate must demonstrate knowledge of:

- types of biological samples that may be included in the plan, including water, animal, plant samples
- industry biological sampling and preserving guidelines and protocols
- field procedures for biological sampling and preservation
- collecting equipment and methods

- preservation equipment and processes
- fauna and flora recognition relevant to sampling activities
- own role in complying with relevant environmental legislation

## Assessment Conditions

Assessors must satisfy current standards for RTOs.

## AHCPMG510 Develop a pest survey strategy

### Modification History

| RELEASE   | COMMENTS                                                                                                                 |
|-----------|--------------------------------------------------------------------------------------------------------------------------|
| Release 2 | This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 2.0. |
| Release 1 | This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 1.0. |

### Application

This unit of competency describes the skills and knowledge required to develop a plant pest survey strategy to determine the presence, distribution and prevalence of a pest. Pests may be weeds, vertebrate or invertebrate pests or a combination of these.

The work may be conducted as part of an emergency response to an incursion or as part of routine surveillance, and must be conducted in accordance with established standards and protocols.

This unit applies to individuals who have been appointed or engaged to undertake a role within a pest incursion response. They may also be involved with planning responses to emergency animal diseases and aquatic animal diseases. Individuals take personal responsibility and exercise autonomy in undertaking complex work. They are accountable for the work of others within broad parameters and analyse information and exercise judgement to complete a range of advanced skilled activities.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication. However, all units of competency dealing with animals in the AHC Training Package have the requirements for animals to be handled humanely to minimise stress and discomfort.

### Pre-requisite Unit

Nil.

### Unit Sector

Pest Management (PMG)

## Elements and Performance Criteria

| Element                                                        | Performance criteria                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |

| Release 1 | This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 1.0. |

## Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- produce a pest survey strategy in accordance with local, regional, State/Territory and national pest management strategies
- write work instructions for survey teams
- work with other technical experts
- analyse biological information for survey design
- develop survey methodology appropriate for target pest, environment and terrain
- prepare plans to workplace and authority standards
- develop review processes according to workplace requirements
- apply biosecurity measures in the context of own work
- apply appropriate sustainability practices in the context of own work

## Knowledge Evidence

The candidate must demonstrate detailed knowledge of:

- biometric principles to biological survey design
- the biology of groups of pests and pathogens relevant to the survey
- the types and distribution of hosts relevant to the survey
- requirements for ensuring the welfare of animals described in the relevant Codes of Practice

The candidate must demonstrate knowledge of:

- pest biology, behaviour and lifecycles
- diagnostic tests for use in confirming pest presence in samples
- resources required for survey activities

## Assessment Conditions

Assessment must take place in a functioning control centre, or a control centre established for a pest response simulation exercise.

Assessors must satisfy current standards for RTOs.

## BSBCMM401 Make a presentation

### Modification History

| Release   | Comments                                                                            |
|-----------|-------------------------------------------------------------------------------------|
| Release 1 | This version first released with BSB Business Services Training Package Version 1.0 |

### Application

This unit covers the skills and knowledge required to prepare, deliver and review a presentation to a target audience.

This unit applies to individuals who may be expected to make presentations for a range of purposes, such as marketing, training and promotions. They contribute well developed communication skills in presenting a range of concepts and ideas.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

### Unit Sector

Communication – Interpersonal Communication

### Elements and Performance Criteria

# Assessment Requirements for BSBCMM401 Make a presentation

## Modification History

| Release   | Comments                                                                             |
|-----------|--------------------------------------------------------------------------------------|
| Release 1 | This version first released with BSB Business Services Training Package Version 1.0. |

## Performance Evidence

Evidence of the ability to:

- prepare and deliver presentations related to occupation or area of interest which demonstrate the use of:
  - effective presentation strategies and communication principles
  - aids and materials to support the presentation
- select and implement methods to review the effectiveness of own presentation and document any changes which would improve future presentations.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- identify information collection methods that will support review and feedback of presentations
- identify regulatory and organisational obligations and requirements relevant to presentations
- describe the principles of effective communication
- describe the range of presentation aids and materials available to support presentations.

## Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced by individuals using interpersonal communication skills in the workplace and include access to:

- equipment, materials and business software packages for making a presentation
- business technology
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

# Assessment Requirements for BSBCMM411 Make presentations

## Modification History

| Release   | Comments                                                                             |
|-----------|--------------------------------------------------------------------------------------|
| Release 1 | This version first released with BSB Business Services Training Package Version 7.0. |

## Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- prepare and deliver at least two different presentations.

In the course of the above, the candidate must:

- use aids and materials to support the presentation
- select and implement methods to review the effectiveness of presentation and document suggested improvements.

## Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- information collection methods that support review and feedback of presentations
- organisational and legislative obligations and requirements relevant to presentations
- structure of presentations according to intended outcomes
- principles of effective communication including:
  - persuasive communication techniques
  - verbal and non-verbal communication
- presentation methods
- different aids, materials and techniques that can be used for presentations.

## Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- equipment, materials and business software packages for making a presentation.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

## BSBCON401 Work effectively in a business continuity context

### Modification History

| Release   | Comments                                                                             |
|-----------|--------------------------------------------------------------------------------------|
| Release 1 | This version first released with BSB Business Services Training Package Version 1.0. |

### Application

This unit describes the skills and knowledge required to understand the organisation's overall business continuity management framework and support business continuity strategies.

It applies to individuals working in administrative and/or support roles who require a basic knowledge of the processes relating to the organisation's business continuity requirements.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

### Unit Sector

Industry Capability – Continuity

### Elements and Performance Criteria

# Assessment Requirements for BSBCON401 Work effectively in a business continuity context

## Modification History

| Release   | Comments                                                                             |
|-----------|--------------------------------------------------------------------------------------|
| Release 1 | This version first released with BSB Business Services Training Package Version 1.0. |

## Performance Evidence

Evidence of the ability to:

- assess and review business continuity organisational policies and procedures and risk treatments
- undertake emergency response and business continuity training
- identify own role within the organisation's emergency response and continuity strategy
- recognise internal and external risks and report to senior personnel.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain the overall operations of the organisation, including existing data and information systems
- explain how own role contributes to the work of others
- identify the relevant legislation, regulations, standards and codes of practice that impact business continuity.

## Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the industry capability – continuity field of work and include access to:

- risk management policies and procedures
- business continuity management framework
- business impact assessments and strategies
- case studies and, where possible, real situations.

Assessors must satisfy NVR/AQTF assessor requirements.

## Application

This unit describes the skills and knowledge required to work within the business continuity framework to develop and implement business continuity plans for an organisation to manage risk and ensure business resilience when faced with a disruptive event.

It applies to individuals working in positions of authority who are approved to implement change across the division, business area, program area or project area.

This unit addresses the knowledge and processes necessary to develop and maintain business continuity requirements. Business continuity awareness and planning help the organisation to identify barriers and/or interruptions and determine how the organisation will achieve critical business objectives (even at diminished capacity) until full functionality is restored.

The focus is on risk and vulnerability assessment, business impact assessments, and business continuity and communication plans.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

| Release 2 | This version first released with BSB Business Services Training Package Version 1.1.<br>Version created to correct mapping table information |
| Release 1 | This version first released with BSB Business Services Training Package Version 1.0.                                                         |

## Performance Evidence

Evidence of the ability to:

- develop and implement a business continuity plan that includes appropriate links to emergency response, disaster recovery plans and detailed continuity and recovery strategies
- communicate effectively with relevant personnel to promote an understanding of business continuity frameworks.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain relevant policies and procedures impacting business continuity, including business continuity strategies
- summarise the overall operations of the organisation, including existing data and information systems, paper and digital recordkeeping systems
- describe past and current internal, external and industry disruptions.

## Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the industry capability – continuity field of work and include access to:

- business continuity documentation
- interaction with others
- case studies and, where possible, real situations.

Assessors must satisfy NVR/AQTF assessor requirements.

## BSBCUE203 Conduct customer engagement

### Modification History

| Release   | Comments                                                                             |
|-----------|--------------------------------------------------------------------------------------|
| Release 1 | This version first released with BSB Business Services Training Package Version 1.0. |

### Application

This unit describes the skills and knowledge required to respond effectively to customer engagement while complying with requirements and using a variety of communication methods.

It applies to individuals who perform a range of mainly routine tasks, using limited practical skills and fundamental operational knowledge and who work under some supervision and guidance.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

### Unit Sector

Stakeholder Relations – Customer Engagement

### Elements and Performance Criteria

| ELEMENT                                          | PERFORMANCE CRITERIA                                                                                                                                                                                                                                                                                                                                           |
|--------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <i>Elements describe the essential outcomes.</i> | <i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>                                                                                                                                                                                                                                                         |

# Assessment Requirements for BSBCUE203 Conduct customer engagement

## Modification History

| Release   | Comments                                                                         |
|-----------|----------------------------------------------------------------------------------|
| Release 1 | This version first released with Business Services Training Package Version 1.0. |

## Performance Evidence

Evidence of the ability to:

- provide customer services to organisation's standards and guidelines
- use communication equipment and systems efficiently and effectively
- adapt communication techniques to suit customer profile and requirements.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe operational environment – customer base, company products and services
- describe organisational performance standards and customer service expectations
- identify organisational policies, procedures, protocols and communication channels
- outline principles of customer service
- outline operation of equipment and systems.

## Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the stakeholder relations – customer engagement field of work and include access to:

- information technology and telecommunications equipment
- workplace information and data
- performance management records and data and quality assurance guidelines
- call/engagement guides.

Assessors must satisfy NVR/AQTF assessor requirements.

## BSBCUE301 Use multiple information systems

### Modification History

| Release   | Comments                                                                             |
|-----------|--------------------------------------------------------------------------------------|
| Release 1 | This version first released with BSB Business Services Training Package Version 1.0. |

### Application

This unit describes the skills and knowledge required to use multiple information systems to research information and records, and to maintain up-to-date customer information.

It applies to individuals who apply a broad range of competencies in a varied work context, using some discretion and judgement and relevant theoretical knowledge, and who may provide technical advice and support to a team.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

### Unit Sector

Stakeholder Relations – Customer Engagement

### Elements and Performance Criteria

# Assessment Requirements for BSBCUE301 Use multiple information systems

## Modification History

| Release   | Comments                                                                         |
|-----------|----------------------------------------------------------------------------------|
| Release 1 | This version first released with Business Services Training Package Version 1.0. |

## Performance Evidence

Evidence of the ability to:

- access, use and manage information systems to organisational requirements
- navigate systems to locate information required to complete customer inquiry or transaction
- identify and rectify information system and processing errors to established procedures and policies
- provide service to customers in accordance with organisational and regulatory requirements.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain computer and system troubleshooting principles
- identify enterprise business systems and operating platforms relevant to role
- identify enterprise policies, procedures and guidelines regarding use and security of information systems
- explain operation of social networking websites
- explain escalation process for reporting information technology issues.

## Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the stakeholder relations – customer engagement field of work and include access to:

- relevant standards and guidelines for use of systems

- workplace information and data
- quality assurance and system user error reports
- troubleshooting and escalation reports
- a work environment to observe operation of systems.

Assessors must satisfy NVR/AQTF assessor requirements.

## BSBCUE307 Work effectively in customer engagement

### Modification History

| Release   | Comments                                                                             |
|-----------|--------------------------------------------------------------------------------------|
| Release 1 | This version first released with BSB Business Services Training Package Version 1.0. |

### Application

This unit describes the skills and knowledge required to conduct customer engagement operations. It requires an understanding of organisational requirements, expectations, policies and procedures.

It applies to individuals who apply a broad range of competencies in a varied work context, using some discretion and judgement and relevant theoretical knowledge, and who may provide technical advice and support to a team. This work is undertaken with some supervision and guidance.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

### Unit Sector

Stakeholder Relations – Customer Engagement

### Elements and Performance Criteria

## Assessment Requirements for BSBCUE307 Work effectively in customer engagement

### Modification History

| Release   | Comments                                                                             |
|-----------|--------------------------------------------------------------------------------------|
| Release 1 | This version first released with BSB Business Services Training Package Version 1.0. |

### Performance Evidence

Evidence of the ability to:

- achieve identified KPIs in a customer engagement role in compliance with organisational processes, policies and procedures
- develop and maintain a professional approach to own role and responsibilities
- participate effectively in team-based operations, contributing to establishment of objectives and achievement of outcomes.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

### Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe customer base, company products and services
- explain performance indicator requirements and performance management outcomes
- explain industry-specific regulatory and legislative requirements in relation to customer engagement
- outline operational systems used within scope of own role and scope of customer engagement operations and key relationships
- outline organisational mission and business goals.

### Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the stakeholder relations – customer engagement field of work and include access to:

- relevant information, such as organisational policies, standard operating procedures and guidelines, performance management guidelines, role position descriptions and organisational charts
- peer and line manager feedback in a contact centre environment to observe performance.

Assessors must satisfy NVR/AQTF assessor requirements.

## BSBFLM312 Contribute to team effectiveness

### Modification History

| Release   | Comments                                                                             |
|-----------|--------------------------------------------------------------------------------------|
| Release 1 | This version first released with BSB Business Services Training Package Version 1.0. |

### Application

This unit describes the skills and knowledge required to contribute to the effectiveness of the work team. It involves planning with the team to meet expected outcomes, developing team cohesion, participating in and facilitating the work team, and communicating with the management of the organisation.

It applies to individuals who play a prominent part in motivating, mentoring, coaching and developing team cohesion through team leadership and forming the link between the management of the organisation and the team members. At this level, work will normally be carried out within known routines, methods and procedures, and may also involve complex or non-routine activities that require some discretion and judgement.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

### Unit Sector

Management and Leadership – Frontline Management

### Elements and Performance Criteria

| ELEMENT                                          | PERFORMANCE CRITERIA                                                                                                                                          |

# Assessment Requirements for BSBFLM312 Contribute to team effectiveness

## Modification History

| Release   | Comments                                                                             |
|-----------|--------------------------------------------------------------------------------------|
| Release 1 | This version first released with BSB Business Services Training Package Version 1.0. |

## Performance Evidence

Evidence of the ability to:

- discuss and clarify goals and responsibilities with a team of people
- apply management and communication skills with a range of people that:
  - provides direction and leadership
  - assists individuals to achieve goals
  - motivates and builds team cohesion
  - fosters contribution of and respect for ideas
- apply techniques for resolving problems within organisational and legislative requirements
- communicate effectively with management including escalating problems outside own area of responsibility
- manage communication of information to, and between, the team.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- list organisational goals, objectives and plans that relate to the team
- identify legislation, regulations, standards or codes of practice that may impact team performance and outcomes
- describe the organisational structure with reference to the organisational chart
- describe options for addressing performance issues in the organisation
- explain the principles and techniques of:
  - group dynamics and processes
  - motivation

- negotiation
- explain why considering individual behaviour and differences is important to a manager.

## Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the management field of work and include access to:

- relevant workplace documentation and resources
- relevant legislation
- case studies and, where possible, real situations
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

## BSBINN502 Build and sustain an innovative work environment

### Modification History

| Release   | Comments                                                                             |
|-----------|--------------------------------------------------------------------------------------|
| Release 1 | This version first released with BSB Business Services Training Package Version 1.0. |

### Application

This unit describes the skills and knowledge required to create an environment that enables and supports the application of innovative practice focusing on a holistic approach to the integration of innovation across all areas of work practice.

It applies to individuals working in leadership or management roles in any industry or community context. The individual could be employed by the organisation, but may also be an external contractor, the leader of a cross organisation team or of a self-formed team of individuals. The work group could be permanent or temporary in nature.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

### Unit Sector

Creativity and Innovation – Innovation

### Elements and Performance Criteria

| ELEMENT                                          | PERFORMANCE CRITERIA                                                                                                                                                                                                                                  |

# Assessment Requirements for BSBINN502 Build and sustain an innovative work environment

## Modification History

| Release   | Comments                                                                             |
|-----------|--------------------------------------------------------------------------------------|
| Release 1 | This version first released with BSB Business Services Training Package Version 1.0. |

## Performance Evidence

Evidence of the ability to maximise opportunities for innovation by:

- establishing procedures and practices that foster innovation including:
  - collaborative work arrangements
  - building team capacity to contribute to innovation
  - providing formal and informal learning opportunities
  - evaluating ideas
  - celebration and promotion of innovation
  - consultation
  - respectful communications and sharing of ideas and feedback
- reinforcing the value of innovation to the vision and objectives of the organisation,
- modelling behaviour including being receptive to ideas, giving constructive advice, evaluating own work, establishing and maintaining relationships based on mutual respect and trust, taking considered risks that provide opportunities for innovation
- evaluating how the physical environment can be enhanced to support innovation and collaboration and collaborating on ideas to make improvements including in the selection of physical resources and equipment, and the design, fit-out and decoration of the workspaces
- making changes to a workspace that will encourage innovation in at least one of
  - design
  - fit-out
  - decoration.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain the concepts and theories of innovation and how these link to innovation in practice
- explain the context for innovation in the workplace including core business values, overall objectives, broader environmental context and the need to ensure the value and benefit of innovative ideas and projects
- discuss the factors and tools that can motivate individuals to use creative thinking and apply innovative work practices
- research the legislative framework that impacts on operations in the relevant workplace context
- explain how different approaches to management and leadership can support or hinder innovation
- discuss typical challenges and barriers to innovation within teams and organisations and ways of overcoming these including rewarding and celebrating innovation, coaching and learning, modelling behaviour and managing the physical environment.
- 

## Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the creativity and innovation and include access to:

- workplace documents
- case studies and, where possible, real situations
- office equipment and resources
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

# BSBINN801 Lead innovative thinking and practice

## Modification History

| Release   | Comments                                                                             |
|-----------|--------------------------------------------------------------------------------------|
| Release 1 | This version first released with BSB Business Services Training Package Version 1.0. |

## Application

This unit describes the skills and knowledge required to generate, lead and sustain innovative organisational thinking and practice.

It applies to individuals who initiate and lead innovation in any industry or community context. Each organisation's thinking and practice will be different depending on its core business, purpose, size, complexity and broader operating context.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

## Unit Sector

Creativity and Innovation – Innovation

# Assessment Requirements for BSBINN801 Lead innovative thinking and practice

## Modification History

| Release   | Comments                                                                             |
|-----------|--------------------------------------------------------------------------------------|
| Release 1 | This version first released with BSB Business Services Training Package Version 1.0. |

## Performance Evidence

Evidence of the ability to:

- use various techniques and tools to stimulate creative or innovative thinking
- research, review and critically analyse trends in thinking and emerging practices as they relate to an organisation's current thinking and practices
- develop own capacity to lead innovative thinking and practice in an organisational context
- complete a workplace project or case study to demonstrate a comprehensive understanding and application of key concepts, current theories and processes for introducing, communicating, promoting, supporting and sustaining innovative thinking and practices in an organisational context.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- compare and contrast current and past theories and thinking about innovation
- explain how theory and thinking on innovation and creativity can contribute to applied practice
- discuss the impact of leadership style on innovation in organisations, including how specific approaches may encourage or inhibit innovation
- discuss the relevance of organisational and industry context on innovation
- analyse the internal and external conditions or factors that impact on organisational innovation
- outline strategies for identifying, assessing and managing risks associated with innovation
- provide examples of innovation drivers in an organisation
- provide examples of innovation enablers in an organisation

- list and describe mechanisms at system or process level that can support innovative practices
- discuss typical challenges and barriers to innovation within an organisation and ways of overcoming these challenges and barriers.

## Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the creativity and innovation field of work and include access to:

- workplace documentation and resources
- office equipment and materials
- case studies or, where available, real situations
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

# BSBINS501 Implement information and knowledge management systems

## Modification History

| Release   | Comments                                                                             |
|-----------|--------------------------------------------------------------------------------------|
| Release 1 | This version first released with BSB Business Services Training Package Version 7.0. |

## Application

This unit describes the skills and knowledge required to organise training for an information and knowledge management system and to implement the use of the system.

The unit applies to individuals who are responsible for ensuring relevant information and corporate knowledge are retained, accessible and improve business outcomes.

It applies to information and knowledge management systems that comprise policies, protocols, procedures and practices to manage information or knowledge within the organisation and among relevant stakeholders.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Technical Skills – Information Services

## Elements and Performance Criteria

# Assessment Requirements for BSBINS501 Implement information and knowledge management systems

## Modification History

| Release   | Comments                                                                             |
|-----------|--------------------------------------------------------------------------------------|
| Release 1 | This version first released with BSB Business Services Training Package Version 7.0. |

## Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- implement and review one information management system
- implement and review one knowledge management system
- facilitate learning on both these information and knowledge management systems.

In the course of the above, the candidate must:

- identify learning needs and plan and implement learning activities to enable personnel to use information and knowledge management system
- monitor performance and address issues and contingencies as they arise including:
  - accessing technical specialists, as required
  - applying correct policies and procedures for the information or knowledge management system
  - evaluating effectiveness of information or knowledge management system for intended outcomes
- recommend improvements to systems, policies and practices, where required.

## Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- relevant legislation, regulation, standards and codes
- organisational policies and procedures, including those related to:
  - information management
  - knowledge management
- organisational operations and existing data and information systems
- relevant learning activities and key performance indicators.

## Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- legislation, regulation, standards and codes relevant to information and knowledge management
- workplace systems, documentation and resources relevant to performance evidence.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

## BSBLDR411 Demonstrate leadership in the workplace

### Modification History

| Release   | Comments                                                                             |
|-----------|--------------------------------------------------------------------------------------|
| Release 1 | This version first released with BSB Business Services Training Package Version 7.0. |

### Application

This unit describes the skills and knowledge required to lead teams and individuals by modelling high standards of conduct to reflect the organisation's standards and values.

The unit applies to individuals who are making the transition from being a team member to taking responsibility for the work and performance of others and providing the first level of leadership within the organisation. These leaders have a strong influence on the work culture, values and ethics of the teams they supervise.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

### Unit Sector

Social Competence – Leadership

### Elements and Performance Criteria

| ELEMENT                                          | PERFORMANCE CRITERIA                                                                                                                                                                                                                                                                                                                                                                                              |
|--------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <i>Elements describe the essential outcomes.</i> | <i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>                                                                                                                                                                                                                                                                                                            |
| 1. Prepare to demonstrate leadership             | 1.1 Identify organisation's requirements for management performance<br>1.2 Identify qualities required for positive management performance according to organisational policies and procedures<br>1.3 Develop and implement performance plans for individual and team according to organisation's business objectives<br>1.4 Establish key performance indicators according to organisation's business objectives |
| 2. Align behaviour with                          | 2.1 Locate and assess organisation's standards and values for                                                                                                                                                                                                                                                                                                                                                     |

| ELEMENT                       | PERFORMANCE CRITERIA                                                                                                                                                                                                                                                                                                                                                                |
|-------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| organisational values         | <p>conducting business</p> <p>2.2 Identify how own performance will contribute to upholding organisational values</p> <p>2.3 Identify issues to be resolved according to organisational values</p> <p>2.4 Gather and organise information relevant to the issues under consideration</p>                                                                                            |
| 3. Model leadership behaviour | <p>3.1 Facilitate individual's and team's active participation in team decision-making processes</p> <p>3.2 Examine options and assess associated risks to determine preferred course of action</p> <p>3.3 Develop plan to implement decisions agreed by relevant individuals and teams</p> <p>3.4 Use feedback processes to monitor the implementation and impact of decisions</p> |

## Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

| SKILL                     | DESCRIPTION                                                                                                                                                                                                                                                                                                        |
|---------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Reading                   | <ul style="list-style-type: none"> <li>Gathers, interprets and analyses text relating to organisational goals, standards and values to aid planning and decision making</li> </ul>                                                                                                                                 |
| Writing                   | <ul style="list-style-type: none"> <li>Records and reports key information related to the organisational goals, standards and objectives</li> <li>Researches, plans and prepares documentation for relevant stakeholders</li> </ul>                                                                                |

# Assessment Requirements for BSBLDR411 Demonstrate leadership in the workplace

## Modification History

| Release   | Comments                                                                             |
|-----------|--------------------------------------------------------------------------------------|
| Release 1 | This version first released with BSB Business Services Training Package Version 7.0. |

## Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- develop and implement at least two performance plans, including one relating to individuals and one relating to teams.

In the course of the above, the candidate must:

- comply with organisation's standards and values
- evaluate own behaviour and performance against organisational standards and values and adjust to achieve required standards
- ensure own behaviour and performance contributes to the integrity and credibility of the organisation
- facilitate processes to make decisions that are based on:
  - relevant information
  - examination of options and associated risks
  - input from relevant people
- communicate about making and implementing decisions including:
  - facilitating agreement on the preferred course of action and implementation plans
  - monitoring and seeking feedback on the implementation and impact of decisions.

## Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- methods to identify an organisation's standards and values when they are stated, and where they are implied
- organisational values and expectations of behaviour
- basic leadership theories
- common leadership styles

- organisation's process for raising questions about standards and values
- examples of behaviours and performance that would typically be considered damaging to an organisation
- concepts of:
  - organisational values and ethics
  - role modelling
  - integrity and credibility
  - leadership.

## Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- workplace documentation and resources.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

## BSBLDR413 Lead effective workplace relationships

### Modification History

| Release   | Comments                                                                             |
|-----------|--------------------------------------------------------------------------------------|
| Release 1 | This version first released with BSB Business Services Training Package Version 7.0. |

### Application

This unit describes the skills, knowledge and outcomes required to use leadership to promote team cohesion. It includes motivating, mentoring, coaching and developing the team and forming the bridge between the management of the organisation and team members.

The unit applies to team leaders, supervisors and new or emerging managers where leadership plays a role in developing and maintaining effective workplace relationships. It applies in any industry or community context. At this level work will normally be carried out within routine and non-routine methods and procedures, which require planning, evaluation, leadership and guidance of others.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

# Assessment Requirements for BSBLDR413 Lead effective workplace relationships

## Modification History

| Release   | Comments                                                                             |
|-----------|--------------------------------------------------------------------------------------|
| Release 1 | This version first released with BSB Business Services Training Package Version 7.0. |

## Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- lead effective workplace relationships on at least four occasions with different individuals or groups.

In the course of the above, the candidate must:

- access and analyse information required to achieve planned outcomes
- collaborate with work team to develop and implement a work task strategy
- apply techniques for resolving problems and conflicts, and dealing with poor performance according to organisational and legislative requirements
- monitor and communicate work progress to relevant internal and external stakeholders
- seek and review feedback to improve workplace leadership.

## Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- considerations for communicating information including audience cultural and social diversity
- consultation processes including internal and external sources of consultees
- impacts of relationships, cultural and social environment, in supporting or hindering the achievement of planned outcomes
- techniques for developing positive work relationships and building trust and confidence in a team, including:
  - interpersonal styles
  - communications
  - consultation
  - cultural and social sensitivity
  - networking

- impact of legislation and organisational policies on workplace relationships
- techniques for communicating information and ideas to a range of stakeholders
- common methods to resolve workplace conflict
- common methods to manage poor work performance
- common methods to monitor, analyse and improve work relationships.

## Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- legislation, regulations, standards and codes relevant to performance evidence
- workplace documentation and resources
- interaction with others.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

## BSBLDR414 Lead team effectiveness

### Modification History

| Release   | Comments                                                                             |
|-----------|--------------------------------------------------------------------------------------|
| Release 1 | This version first released with BSB Business Services Training Package Version 7.0. |

### Application

This unit describes the skills, knowledge and outcomes required to lead the performance of a team and to develop team cohesion.

The unit applies team leaders, supervisors and new emerging managers who have an important leadership role in the development of efficient and effective work teams. Leaders at this level also provide leadership for the team and bridge the gap between the management of the organisation and the team members. As such they must 'manage up' as well as manage their team/s.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

### Unit Sector

Social Competence – Leadership

### Elements and Performance Criteria

## BSBLDR522 Manage people performance

### Modification History

| Release   | Comments                                                                             |
|-----------|--------------------------------------------------------------------------------------|
| Release 1 | This version first released with BSB Business Services Training Package Version 7.0. |

### Application

This unit describes the skills and knowledge required to manage the performance of staff that are direct reports.

The unit applies to individuals who manage people. It covers work allocation and the methods to review performance, reward excellence and provide feedback. The unit makes the link between performance management and performance development and reinforces both functions as a key requirement for effective managers.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

### Unit Sector

Social Competence – Leadership

### Elements and Performance Criteria

| ELEMENT                                          | PERFORMANCE CRITERIA                                                                                                                                                                                                                                                                                                                                                                                                  |

# Assessment Requirements for BSBLDR522 Manage people performance

## Modification History

| Release   | Comments                                                                             |
|-----------|--------------------------------------------------------------------------------------|
| Release 1 | This version first released with BSB Business Services Training Package Version 7.0. |

## Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- manage performance of at least two individuals
- manage performance of at least one team.

In the course of the above, the candidate must:

- consult with stakeholders to identify work requirements, performance standards and agreed performance indicators
- develop work plans and allocate work to achieve outcomes efficiently and within organisational and legal requirements
- assess performance against performance indicators according to performance management and review processes
- monitor, evaluate and provide feedback on performance and provide coaching or training, as needed
- keep records and documentation in accordance with the organisational performance management system
- reinforce excellence in performance through recognition and continuous feedback
- respond to underperforming individuals according to organisational policies, as required.

## Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- legislative and regulatory and organisational requirements for performance management and review
- organisational risk management plan
- organisational human resource support services
- organisational performance measurement systems
- key features of unlawful dismissal rules and due process

- staff development options and information.

## Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- legislation on performance management
- workplace documentation and resources for performance management and review.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

# BSBLDR801 Lead personal and strategic transformation

## Modification History

| Release   | Comments                                                                             |
|-----------|--------------------------------------------------------------------------------------|
| Release 1 | This version first released with BSB Business Services Training Package Version 1.0. |

## Application

This unit describes the skills and knowledge required to analyse and improve personal leadership style and professional competence and to lead organisational transformation and learning for strategic outcomes.

It covers leading transformational practices, cultivating collaborative practices, completing ongoing professional development and providing strategic leadership in a dynamic context.

It applies to those who use cognitive and creative skills to review, critically analyse, consolidate and synthesise knowledge, in order to generate ideas and provide solutions to complex problems. They use communication skills to demonstrate their understanding of theoretical concepts and to transfer knowledge and ideas to others.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Management and Leadership - Leadership

## Elements and Performance Criteria

# Assessment Requirements for BSBLDR801 Lead personal and strategic transformation

## Modification History

| Release   | Comments                                                                             |
|-----------|--------------------------------------------------------------------------------------|
| Release 1 | This version first released with BSB Business Services Training Package Version 1.0. |

## Performance Evidence

Evidence of the ability to:

- reflect on and improve own development, personal leadership style and self-management skills
- demonstrate the application of leadership styles and approaches appropriate to individuals involved, the outcomes being sought and the context
- model and encourage collaboration
- provide strategic leadership during a change process
- effectively manage workplace relationships
- analyse relevant legislation, information and intelligence sources.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline the relevant legislative and regulatory context of the organisation
- state the organisation's mission, purpose and values
- outline organisation's objectives, plans and strategies
- describe a range of leadership styles
- describe personal development planning methodologies
- outline data collection methods
- explain the process for external environment scanning relating to social, political, economic and technological developments
- explain emotional intelligence and its relationship to individual and team effectiveness
- explain organisational transformation and the management of the stages of change
- explain organisational design and building in responsiveness of operations to change in customer or market conditions.

## Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the management and leadership field of work and include access to:

- legislation, regulations and codes of practice
- workplace plans, mission statements, policies and procedures
- case studies and, where possible, real situations
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

# BSBLDR802 Lead the strategic planning process for an organisation

## Modification History

| Release   | Comments                                                                             |
|-----------|--------------------------------------------------------------------------------------|
| Release 1 | This version first released with BSB Business Services Training Package Version 1.0. |

## Application

This unit describes the skills and knowledge required to lead the development of high-level strategic plans that serve the vision and mission of an organisation. It addresses analysing the environment, identifying risks and opportunities, planning staffing requirements, succession planning, and establishing and monitoring financial and non-financial performance indicators.

Leadership is applied in order to engage people with the organisation's vision and goals and in developing and implementing the plan.

It applies to senior managers and business owners who use cognitive and creative skills to review, critically analyse, consolidate and synthesise knowledge, in order to generate ideas and provide solutions to complex problems. They use communication skills to demonstrate their understanding of theoretical concepts and to transfer knowledge and ideas to others.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

| Release 1 | This version first released with BSB Business Services Training Package Version 1.0. |

## Performance Evidence

Evidence of the ability to:

- facilitate processes to develop an organisation-wide strategic plan including:
  - consulting with decision makers and other stakeholders
  - planning and budgeting for human, financial and capital resources and implementing staff development and succession plans
  - identifying and analysing information about the organisation and its environment including research about industry trends and practices, an environmental and organisational scan, existing organisational strategic planning documents, a strengths, weaknesses, opportunities and threats (SWOT) analysis and identifying risks to achieving the organisation's goals
  - aligning the strategic plan to the vision, mission and key goals of the organisation
  - identifying performance indicators
  - communicating with and engaging stakeholders in the development, sign off and implementation of the plan
- harness resources, staff and stakeholder commitment to ensure implementation of the strategic plan by consulting and engaging with them throughout the process
- implement and evaluate the strategic plan including developing tactical or operational annual plans and refining the plan to respond to changed conditions.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline contractual requirements and implications for the business
- explain financial management requirements and processes of the business
- describe industry trends and practices of relevance to the organisation's strategic direction

- specify organisational resource requirements to undertake projects
- describe processes and procedures for identifying strategic goals setting and activities
- describe risk management processes such as SWOT
- outline strategic and operational planning processes

## Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the management and leadership field of work and include access to:

- organisational and industry information and data
- workplace documents including strategic planning documentation
- case studies and, where available, real situations
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

## Application

This unit describes the skills and knowledge required to establish collaborative partnerships and relationships with business and industry stakeholders.

This unit covers communicating to influence others, cultivating new and existing partnerships, establishing positive collaborative relationships, leading the establishment of a partnership program and establishing reporting mechanisms.

It applies to people who use cognitive and creative skills to review, critically analyse, consolidate and synthesise knowledge, in order to generate ideas and provide solutions to complex problems. They use communication skills to demonstrate their understanding of theoretical concepts and to transfer knowledge and ideas to others.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

| Release 1 | This version first released with BSB Business Services Training Package Version 1.0.                                                         |

## Performance Evidence

Evidence of the ability to:

- demonstrate and model skills and knowledge to foster partnerships, conduct stakeholder consultation and use strategic and personally enhancing communication skills
- develop collaborative approaches to enhance individual, team and organisational outcomes
- initiate and implement partnerships in line with relevant regulatory, employment and organisational requirements.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline the legislative and regulatory context of the organisation
- outline the organisation's mission, purpose, values, objectives and strategies
- explain techniques that cultivate collaborative relationships and partnerships
- describe data collection methods
- explain the external context including social, political, economic and technological developments
- explain emotional intelligence and its relationship to individual and team effectiveness
- explain organisational transformation and the management of the stages of change.

## Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the management and leadership field of work and include access to:

- relevant legislation, regulations, standards and codes
- workplace documents including business strategic plans, policies and procedures
- case studies and, where possible, real situations
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

## BSBLDR805 Lead and influence change

### Modification History

| Release   | Comments                                                                             |
|-----------|--------------------------------------------------------------------------------------|
| Release 1 | This version first released with BSB Business Services Training Package Version 1.0. |

### Application

This unit describes the skills and knowledge required to apply organisational leadership in change management through influencing and shaping an organisational culture that is receptive to and embraces the opportunities for change.

The unit includes influencing organisational culture, anticipating change and providing strategic leadership in change management.

It applies to people who use cognitive and creative skills to review, critically analyse, consolidate and synthesise knowledge, in order to generate ideas and provide solutions to complex problems. They use communication skills to demonstrate their understanding of theoretical concepts and to transfer knowledge and ideas to others.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

### Unit Sector

Management and Leadership - Leadership

### Elements and Performance Criteria

| ELEMENT                                          | PERFORMANCE CRITERIA                                                                                                                    |
|--------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------|
| <i>Elements describe the essential outcomes.</i> | <i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>                                  |
| 1. Influence organisational culture              | 1.1 Undertake a strategic review of organisational culture to establish existing attitudes to change and identify key issues for action |

| ELEMENT                                              | PERFORMANCE CRITERIA                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |

# Assessment Requirements for BSBLDR805 Lead and influence change

## Modification History

| Release   | Comments                                                                             |
|-----------|--------------------------------------------------------------------------------------|
| Release 1 | This version first released with BSB Business Services Training Package Version 1.0. |

## Performance Evidence

Evidence of the ability to:

- plan and implement a strategic review of organisational culture in an organisation and develop a vision for the future
- research and anticipate the likelihood of change for the organisation
- identify, support and promote the advantages of change to stakeholders by communication, role modelling and celebrating success
- embed change management into organisational policies, procedures and practices including recruitment, training, procurement and resourcing
- implement and monitor change management in a continuous improvement cycle.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain change management models and current best practice
- give examples of change management leadership strategies
- outline the effects of change and ways to ensure strategic advantage
- list the key factors driving change in the internal and external operating environment of the business and community
- outline organisational goals, policies, procedures and guidelines relevant to change management
- outline the relevant legislative and regulatory context of the organisation as it relates to change management.

## Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the management and leadership field of work and include access to:

- relevant legislation, regulations, standards and codes
- organisational and industry information and data
- workplace documents including examples of strategic planning documents
- case studies and, where available, real situations
- interactions with others.

Assessors must satisfy NVR/AQTF assessor requirements.

## BSBLDR806 Lead and influence ethical practice

### Modification History

| Release   | Comments                                                                             |
|-----------|--------------------------------------------------------------------------------------|
| Release 1 | This version first released with BSB Business Services Training Package Version 1.0. |

### Application

This unit describes the skills and knowledge required to apply ethical leadership and take responsibility for influencing ethical practice. It addresses modelling organisational values, embedding ethical practice into the organisation's culture and processes and promoting ethical leadership and decision making at all levels of the organisation.

It applies to people who use cognitive and creative skills to review, critically analyse, consolidate and synthesise knowledge, in order to generate ideas and provide solutions to complex problems. They use communication skills to demonstrate their understanding of theoretical concepts and to transfer knowledge and ideas to others.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

### Unit Sector

Management and Leadership - Leadership

# Assessment Requirements for BSBLDR806 Lead and influence ethical practice

## Modification History

| Release   | Comments                                                                             |
|-----------|--------------------------------------------------------------------------------------|
| Release 1 | This version first released with BSB Business Services Training Package Version 1.0. |

## Performance Evidence

Evidence of the ability to:

- lead and influence ethical practice in an organisation by demonstrating a personal commitment to the professionalism, ethical values and principles of the organisation and encouraging others to do so
- research and maintain a high level of ethical expertise including the ability to interpret complex ethical matters and provide advice
- report and deal with suspected unethical conduct confidentially and promptly
- research, develop and implement policies and procedures for managing ethical practices in an organisation
- promote ethical leadership and decision making including providing leadership and reviewing ethical practices.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe national and international trends in the development of ethical organisations
- describe frameworks for ethical decision making/problem solving and policy setting
- explain organisational ethics, values and standards
- outline the role of organisational codes of ethics/conduct
- explain procedural fairness
- outline procedures, strategies or protocols that can be used to identify and address unethical conduct
- outline the legislative and regulatory context of the organisation, as it relates to ethical work practices.

## Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the management and leadership field of work and include access to:

- legislation, regulations and workplace standards relevant to ethical practice
- workplace documents, including organisational strategic plans and policies and procedures
- case studies and, where possible, real situations
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

## BSBMGT401 Show leadership in the workplace

### Modification History

| Release   | Comments                                                                             |
|-----------|--------------------------------------------------------------------------------------|
| Release 1 | This version first released with BSB Business Services Training Package Version 1.0. |

### Application

This unit describes the skills and knowledge required to lead teams and individuals by modelling high standards of conduct to reflect the organisation's standards and values.

It applies to individuals who are making the transition from being a team member to taking responsibility for the work and performance of others and providing the first level of leadership within the organisation. These managers have a strong influence on the work culture, values and ethics of the teams they supervise.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

### Unit Sector

Management and Leadership – Management

### Elements and Performance Criteria

| ELEMENT                                                         | PERFORMANCE CRITERIA                                                                                                                                                                                                                                                                                                                                  |

# Assessment Requirements for BSBMGT401 Show leadership in the workplace

## Modification History

| Release   | Comments                                                                             |
|-----------|--------------------------------------------------------------------------------------|
| Release 1 | This version first released with BSB Business Services Training Package Version 1.0. |

## Performance Evidence

Evidence of the ability to:

- identify the organisation's standards and values, whether stated or implied by the way the organisation conducts its business
- evaluate own behaviour and performance against these and adjust to achieve required standards
- develop and implement performance plans and key performance indicators (KPIs) to meet organisation's goals and objectives
- use established communication channels to raise questions about standards and values that may be damaging to the organisation
- ensure own behaviour and performance contributes to the integrity and credibility of the organisation
- facilitate processes to make decisions that are based on:
  - relevant information
  - examination of options and associated risks
  - input from relevant people
- communicate about making and implementing decisions including:
  - facilitating agreement on the preferred course of action and implementation plans
  - monitoring and feedback on the implementation and impact of decisions.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain how to identify an organisation's standards and values when they are:
  - stated

- implied
- articulate organisational values and expectations of behaviour
- explain basic theory of group behaviour
- outline the organisation's process for raising questions about standards and values
- give examples of behaviours and performance that would typically be considered damaging to an organisation
- explain concepts including:
  - organisational values
  - role modelling
  - integrity and credibility
  - leadership.

## Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the management and leadership field of work and include access to:

- relevant workplace documentation and resources
- case studies and, where possible, real situations
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

## BSBMGT402 Implement operational plan

### Modification History

| Release   | Comments                                                                             |
|-----------|--------------------------------------------------------------------------------------|
| Release 1 | This version first released with BSB Business Services Training Package Version 1.0. |

### Application

This unit describes the skills and knowledge required to implement the operational plan by monitoring and adjusting operational performance, planning and acquiring resources and providing reports on performance as required.

It applies to individuals who plan activities to achieve the measurable, stated objectives of the team and the organisation. At this level work will normally be carried out within routine and non-routine methods and procedures which require planning, evaluation, leadership and guidance of others.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

### Unit Sector

Management and Leadership – Management

### Elements and Performance Criteria

| ELEMENT                                          | PERFORMANCE CRITERIA                                                                                                                                                                                                                                                                                                                         |

# Assessment Requirements for BSBMGT402 Implement operational plan

## Modification History

| Release   | Comments                                                                             |
|-----------|--------------------------------------------------------------------------------------|
| Release 1 | This version first released with BSB Business Services Training Package Version 1.0. |

## Performance Evidence

Evidence of the ability to:

- interact with a range of people/groups to identify resource requirements, performance objectives, systems, procedures and records relating to the operational plan
- vary the operational plan and gain approval to deal with contingencies
- monitor operational performance against the performance objectives and budgets and take action to rectify unsatisfactory performance
- plan and acquire physical and human resources using organisation's systems and procedures
- manage and support personnel to achieve performance objectives. including inducting new employees and providing mentoring and coaching
- present information and recommendations to support implementation and variation of the operational plan
- document and provide reports on performance as required by the organisation.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe performance monitoring systems and processes
- describe methods for problem solving
- explain how organisational policies and procedures relate to the operational plan.

## Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the management and leadership field of work and include access to:

- organisational operational plans, policies and procedures
- workplace documentation and resources including budgets, physical and human resource procurement documentation, employee induction and performance monitoring procedures
- case studies and, where possible, real situations.

Assessors must satisfy NVR/AQTF assessor requirements.

## BSBMGT403 Implement continuous improvement

### Modification History

| Release   | Comments                                                                             |
|-----------|--------------------------------------------------------------------------------------|
| Release 1 | This version first released with BSB Business Services Training Package Version 1.0. |

### Application

This unit describes the skills and knowledge required to implement the organisation's continuous improvement systems and processes. It covers using systems and strategies to actively encourage the team to participate in the process, monitoring and reviewing performance, and identifying opportunities for further improvements.

It applies to managers who have an active role in implementing the continuous improvement process to achieve the organisation's objectives. Their position is closely associated with the creation and delivery of products and services which means that they have an important role in influencing the ongoing development of the organisation.

At this level, work will normally be carried out within routine and non-routine methods and procedures, which require planning, evaluation, leadership and guidance of others.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

# Assessment Requirements for BSBMGT403 Implement continuous improvement

## Modification History

| Release   | Comments                                                                             |
|-----------|--------------------------------------------------------------------------------------|
| Release 1 | This version first released with BSB Business Services Training Package Version 1.0. |

## Performance Evidence

Evidence of the ability to:

- implement continuous improvement systems and provide mentoring and coaching support to enable individuals and teams to participate in decisions, take responsibility, show initiative and implement improvement processes
- implement processes to inform team members about savings and productivity/service improvements achievements
- communicate effectively to support the continuous improvement system and implementation of improvements
- apply continuous improvement to customer services including internal and external customers
- implement, monitor and adjust improvement plans, processes and procedures to improve performance
- document performance to identify further opportunities for improvement
- manage records and reports within the organisation's systems and procedures.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- give examples of continuous improvement processes
- list typical areas of need for coaching and mentoring to support continuous improvement
- explain how change management techniques can support continuous improvement and initiative
- identify the organisation's systems and data that can be used for benchmarking and monitoring performance for continuous improvement.

## Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the management and leadership field of work and include access to:

- relevant workplace documentation and resources
- case studies and, where possible, real situations
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

# BSBMGT803 Use financial and economic information for strategic decision making

## Modification History

| Release   | Comments                                                                             |
|-----------|--------------------------------------------------------------------------------------|
| Release 1 | This version first released with BSB Business Services Training Package Version 1.0. |

## Application

This unit describes the skills and knowledge required to analyse financial and economic information to achieve the objectives of an organisation. It covers the use and interpretation of financial information to support business decision making, analysis and use of budget systems and reporting processes and the impact of micro and macro-economic information on enterprise planning.

It applies to senior management, including strategic business analysts and executive managers, who use cognitive and creative skills to review, critically analyse, consolidate and synthesise knowledge, generate ideas and provide solutions to complex problems. They use communication skills to demonstrate their understanding of theoretical concepts and to transfer knowledge and ideas to others.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

## Unit Sector

Management and Leadership - Management

## Elements and Performance Criteria

| ELEMENT                                          | PERFORMANCE CRITERIA                                                                                               |
|--------------------------------------------------|--------------------------------------------------------------------------------------------------------------------|
| <i>Elements describe the essential outcomes.</i> | <i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>             |
| 1. Analyse financial resources                   | 1.1 Identify and incorporate the financial resources required to achieve organisational objectives from the budget |

| ELEMENT                                                 | PERFORMANCE CRITERIA                                                                                                                                                                                                                                                                                                                                                                                                                                                              |

## Assessment Requirements for BSBMGT803 Use financial and economic information for strategic decision making

### Modification History

| Release   | Comments                                                                             |
|-----------|--------------------------------------------------------------------------------------|
| Release 1 | This version first released with BSB Business Services Training Package Version 1.0. |

### Performance Evidence

Evidence of the ability to:

- negotiate, monitor and review an enterprise financial strategy based on valid data analysis
- use and analyse financial and economic information to achieve enterprise objectives and maximise returns on financial resources
- analyse and use budget systems and reporting processes including:
  - calculating balance sheet ratios
  - calculating income statement ratios
  - calculating cash flow statement ratios
  - monitoring income and expenditure
  - forecasting expenditure
  - developing contingency plans
  - adjusting budgets
- review and report on financial performance
- use financial data to support strategic decision making including:
  - modelling financial scenarios
  - conducting a cost benefit analysis
  - consulting with financial advisers
  - agreeing on performance indicators.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

### Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain relevant financial and accounting principles relating to analysis and interpretation of financial reports and resources

- summarise financial, accounting and economic terminology and systems relevant to the financial strategy
- explain techniques for calculating and analysing financial data and how they are applied.

## Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the management and leadership field of work and include access to:

- legislation, regulations and codes of practice
- workplace policies and procedures
- business equipment and resources
- case studies and, where possible, real situations.

Assessors must satisfy NVR/AQTF assessor requirements.

# Assessment Requirements for BSBMKG431 Assess marketing opportunities

## Modification History

| Release   | Comments                                                                             |
|-----------|--------------------------------------------------------------------------------------|
| Release 1 | This version first released with BSB Business Services Training Package Version 7.0. |

## Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- identify and evaluate at least three different marketing opportunities according to task requirements.

In the course of the above, the candidate must:

- identify and research marketing opportunities
- perform a market segmentation and identify marketing focus using segmentation results
- evaluate and select preferred marketing opportunities in consultation with relevant personnel
- document and present selected opportunities to management.

## Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- requirements of legislation affecting marketing roles
- data collection and analysis techniques
- marketing industry knowledge, including:
  - components of marketing mix
  - elements of marketing planning
- marketing communications concepts and processes
- organisational structures, roles, responsibilities, business and marketing plans
- relevant product and service standards
- best practice techniques related to marketing
- relevant statistical terms used by the Australian Bureau of Statistics.

## Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- legislation, regulations, standards and codes
- workplace documentation and resources relevant to performance evidence.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

# BSBMKG551 Create multiplatform advertisements for mass media

## Modification History

| Release   | Comments                                                                             |
|-----------|--------------------------------------------------------------------------------------|
| Release 1 | This version first released with BSB Business Services Training Package Version 7.0. |

## Application

This unit describes the skills and knowledge required to create multiplatform advertisements for the communication of a product, service or idea to consumers.

The unit applies to individuals who work in supervisory management roles within an advertising team or media organisation and are primarily responsible for the development of advertisements.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Technical Skills – Marketing

## Elements and Performance Criteria

# Assessment Requirements for BSBMKG551 Create multiplatform advertisements for mass media

## Modification History

| Release   | Comments                                                                             |
|-----------|--------------------------------------------------------------------------------------|
| Release 1 | This version first released with BSB Business Services Training Package Version 7.0. |

## Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- create at least three advertisements for multi-platform advertising.

In the course of the above, the candidate must:

- adhere to time, schedule, budget and legal requirements
- evaluate multiplatform advertisements and identify and document areas for improvement.

## Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- industry, services, products and organisation
- purposes and principles of advertising
- principles of consumer behaviour
- content and development requirements for specific advertising platform
- provisions of legislation, codes of practice and standards affecting advertising
- legal and ethical principles relevant to advertising industry timelines, budget and resources requirements.

## Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- legislation and codes of practice relevant to creating multiplatform advertisements
- organisational policies and procedures for developing advertisements
- industry software and technology for developing advertisements

- creative briefs.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

# Assessment Requirements for BSBMKG626 Develop advertising campaigns

## Modification History

| Release   | Comments                                                                             |
|-----------|--------------------------------------------------------------------------------------|
| Release 1 | This version first released with BSB Business Services Training Package Version 7.0. |

## Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- develop at least two advertising campaigns.

## Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- principles of effective advertising for different markets
- contents of advertising briefs
- ethical requirements relevant to the advertising industry
- organisational products or services
- principles and purposes of advertising, consumer behaviour, and influences on buyer behaviour
- provisions of relevant legislation, codes of practice and national standards affecting business operations.

## Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- legislation and codes of practice for advertising campaigns
- organisational policies and procedures on advertising campaigns
- business technology for developing advertising campaigns.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

## BSBOPS505 Manage organisational customer service

### Modification History

| Release   | Comments                                                                             |
|-----------|--------------------------------------------------------------------------------------|
| Release 1 | This version first released with BSB Business Services Training Package Version 7.0. |

### Application

This unit describes the skills and knowledge required to develop strategies to manage organisational systems that ensure products and services are delivered and maintained to standards agreed by the organisation.

The unit applies to individuals who supervise customer service provided by others within an organisation. At this level, individuals must exercise considerable discretion and judgement, using a range of problem solving and decision making strategies.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

### Unit Sector

Business Competence – Business Operations

### Elements and Performance Criteria

| ELEMENT                                          | PERFORMANCE CRITERIA                                                                                                                                                                                                                                                        |

## Assessment Requirements for BSBOPS505 Manage organisational customer service

### Modification History

| Release   | Comments                                                                             |
|-----------|--------------------------------------------------------------------------------------|
| Release 1 | This version first released with BSB Business Services Training Package Version 7.0. |

### Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- develop and review strategy for delivering and monitoring quality customer service for an organisation or work area.

In the course of the above, the candidate must:

- implement quality customer service policies and procedures
- identify and resolve system problems relating to poor customer service
- assist teams to meet customer service requirements
- develop, procure and use human and physical resources to support quality customer service delivery.

### Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- legislative and regulatory frameworks governing customer service
- elements of effective customer service including quality, time and cost
- organisational policies and procedures for customer service and handling customer complaints
- relevant service standards and best practice models
- key principles of public relations and product promotion
- common techniques for solving complaints
- principles and techniques involved in managing:
  - customer behaviour
  - specific customer needs
  - customer research
  - customer relations

- ongoing product and service quality
- problem identification and resolution
- quality customer service delivery
- record keeping and management methods
- strategies for monitoring, managing and introducing ways to improve customer service relationships
- strategies to obtain customer feedback.

## Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- legislation, regulations and codes of practice related to customer service
- workplace documentation and resources
- complex customer complaints.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

# Assessment Requirements for BSBPMG429 Apply project stakeholder engagement techniques

## Modification History

| Release   | Comments                                                                             |
|-----------|--------------------------------------------------------------------------------------|
| Release 1 | This version first released with BSB Business Services Training Package Version 7.0. |

## Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- assist in conducting stakeholder engagements and communication during at least two projects.

In the course of above, the candidate must:

- work with others to establish various stakeholders needs and interests
- engage with project stakeholders using effective interpersonal skills and appropriate methods of communication
- select and use communications methods relevant to the project needs and stakeholder expectations.

## Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- different types of stakeholders
- different levels of stakeholder engagement on projects
- techniques and strategies for stakeholder engagement
- interests and expectations of stakeholders
- common problems leading to variances in stakeholder engagement.

## Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- project documentation detailing stakeholder engagement
- examples of stakeholder engagement activities.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

## BSBRES801 Initiate and lead applied research

### Modification History

| Release   | Comments                                                                             |
|-----------|--------------------------------------------------------------------------------------|
| Release 1 | This version first released with BSB Business Services Training Package Version 1.0. |

### Application

This unit describes the skills and knowledge required to plan, conduct and report on applied research to influence strategic practices and outcomes within an organisational context.

The unit also covers constructing an applied research strategy, using a range of applied research techniques, and analysing and presenting findings.

It applies to leaders or managers using applied research to ensure learning can enhance individual, team and organisational performance. The intended purpose and approach to applied research may vary across a range of contexts and organisations. In this unit, the focus is on applied research to attain improved organisational outcomes.

No licensing, legislation or certification requirements apply to this unit at the time of publication.

### Unit Sector

Knowledge Management – Research

### Elements and Performance Criteria

# Assessment Requirements for BSBRES801 Initiate and lead applied research

## Modification History

| Release   | Comments                                                                             |
|-----------|--------------------------------------------------------------------------------------|
| Release 1 | This version first released with BSB Business Services Training Package Version 1.0. |

## Performance Evidence

Evidence of the ability to:

- plan, conduct and report on applied research relevant to organisational strategic practices and outcomes
- formulate a research proposal or plan which includes:
  - specific research questions or hypotheses
  - valid population or sample size
  - description of the geographical, cultural, social or institutional context within which the research will be carried out
  - full description of the data collection methods
  - analysis of the limitations to research design including the reliability and validity of data
- design an applied research project using applied research tools and techniques
- document and present research findings including analysis of data, valid and reliable findings and recommendations for further research.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe communication processes and methods
- explain data collection and analysis methods including the use of technology and technology services
- explain legal requirements, policies, procedures and guidelines relating to research including handling and storing data, privacy and freedom of information
- describe presentation techniques

- describe reporting methods
- explain research ethics and codes of conduct
- give examples of applied research tools and methods and how they are applied.

## Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the knowledge management – research field of work and include access to:

- business technology
- relevant workplace policies and procedures
- relevant legislation and codes of conduct
- case studies and, where possible, real situations .

Assessors must satisfy NVR/AQTF assessor requirements.

## BSBWHS301 Maintain workplace safety

### Modification History

| Release   | Comments                                                                             |
|-----------|--------------------------------------------------------------------------------------|
| Release 1 | This version first released with BSB Business Services Training Package Version 1.0. |

### Application

This unit describes the skills and knowledge required to implement and monitor the organisation's work health and safety (WHS) policies, procedures and programs as part of a small work team.

The unit applies to individuals who have a key role in maintaining workplace safety in an organisation. In their role they closely monitor aspects of work associated with the safe delivery of products and services, and they have a responsibility for influencing safety in the workplace.

NOTE: The terms 'occupational health and safety' (OHS) and 'work health and safety' (WHS) are equivalent and generally either can be used in the workplace. In jurisdictions where the Model WHS Legislation has not been implemented RTOs are advised to contextualise the unit of competency by referring to the existing State/Territory OHS legislative requirements.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

### Unit Sector

Regulation, Licensing and Risk – Work Health and Safety

### Elements and Performance Criteria

| ELEMENT                                          | PERFORMANCE CRITERIA                                                                                   |
|--------------------------------------------------|--------------------------------------------------------------------------------------------------------|
| <i>Elements describe the essential outcomes.</i> | <i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i> |
| 1. Assist with                                   | 1.1 Use WHS legislation as the basis for meeting the health and                                        |

| ELEMENT                                                                                      | PERFORMANCE CRITERIA                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |

# Assessment Requirements for BSBWHS301 Maintain workplace safety

## Modification History

| Release   | Comments                                                                             |
|-----------|--------------------------------------------------------------------------------------|
| Release 1 | This version first released with BSB Business Services Training Package Version 1.0. |

## Performance Evidence

Evidence of the ability to:

- implement and monitor the organisation's work health and safety (WHS) policies and procedures
- identify hazards and assess and control risks
- assist in explaining and improving WHS policies, procedures and legislative requirements applicable to the organisation
- assist in explaining hazards identification and risk assessment outcomes to other team members
- implement and monitor consultation about WHS according to legislative and organisational requirements
- deal promptly with issues raised as a result of WHS consultation
- encourage work team to contribute to identifying and implementing improvements to WHS feedback
- assist others to develop WHS competence and provide advice on training needs
- complete WHS documentation.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe characteristics and composition of the work team
- describe procedures for identifying hazards and assessing and controlling associated risks to health and safety, including the hierarchy of control
- outline organisational WHS policies and procedures including those relating to risk management, fire, emergencies, evacuation, incident investigation and reporting

- describe relevant Acts, regulations and codes of practice from all levels of government that impact on business operations, especially with regard to WHS and environmental issues, equal opportunity, industrial relations and anti-discrimination
- identify WHS aspects of other organisational systems and procedures.

## Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced by individuals carrying out work health and safety duties in the workplace and include access to:

- safety processes relevant to the area of work
- organisational policies and procedures, standard operating procedures and plans
- WHS Acts, regulations, codes of practice, licensing requirements and standards
- appropriate office equipment and resources used in the identification and rectification of WHS compliance breaches.

Assessors must satisfy NVR/AQTF assessor requirements.

# BSBWHS307 Apply knowledge of WHS laws in the workplace

## Modification History

| Release   | Comments                                                                             |
|-----------|--------------------------------------------------------------------------------------|
| Release 1 | This version first released with BSB Business Services Training Package Version 5.0. |

## Application

This unit describes the skills and knowledge required to understand work health and safety (WHS) laws, and comply with them in one's own workplace.

The unit applies to those who contribute to compliance with WHS laws as part of their WHS responsibilities, which are in addition to their main duties.

## NOTES

1. The terms 'occupational health and safety' (OHS) and 'work health and safety' (WHS) are equivalent, and generally either can be used in the workplace. In jurisdictions where *model WHS laws* have not been implemented, registered training organisations (RTOs) are advised to contextualise this unit of competency by referring to existing WHS legislative requirements.

2. The *model WHS laws* include the model WHS Act, model WHS Regulations and model WHS Codes of Practice. See Safe Work Australia for further information.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

## Unit Sector

Regulation, Licensing and Risk – Work Health and Safety

## Elements and Performance Criteria

| ELEMENTS                                         | PERFORMANCE CRITERIA                                                                                   |
|--------------------------------------------------|--------------------------------------------------------------------------------------------------------|
| <i>Elements describe the essential outcomes.</i> | <i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i> |

| ELEMENTS                                                                      | PERFORMANCE CRITERIA                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |
|-------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1. Identify WHS legal and compliance framework as it applies to the workplace | <p>1.1 Identify and access current standards and WHS laws relevant to the workplace, occupation and industry</p> <p>1.2 Apply knowledge of relationship between WHS laws and related documentation to assist in identifying WHS legislative requirements in the workplace</p> <p>1.3 Identify consequences of non-compliance with WHS laws and organisational WHS policies, procedures, processes and systems</p> <p>1.4 Identify duty holders and their role in the workplace</p> <p>1.5 Identify legal obligations and duties about who to consult with regarding training of workers and health and safety representatives</p> |
| 2. Contribute to WHS legislative compliance                                   | <p>2.1 Assist in monitoring workplace compliance with WHS laws according to organisational policies and procedures</p> <p>2.2 Contribute to ensuring that workplace complies with WHS laws</p> <p>2.3 Identify and report non-compliance with WHS laws to relevant stakeholders according to organisational policies and procedures</p> <p>2.4 Identify limits of own expertise and legal duties, and access help and advice when required</p>                                                                                                                                                                                    |
| 3. Maintain current knowledge of WHS laws and publications                    | <p>3.1 Identify and access sources to keep up to date with WHS laws and WHS-related publications within scope of own role</p> <p>3.2 Communicate information about relevant legislative changes and publications to others according to organisational policies and procedures</p>                                                                                                                                                                                                                                                                                                                                                |

## Foundation Skills

| Release 1 | This version first released with BSB Business Services Training Package Version 5.0. |

## Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, and to:

- identify and apply at least two different standards or work health and safety (WHS) laws relevant to own work role, workplace and industry.

During the above, the candidate must:

- communicate WHS information to others
- refer any identified non-compliances with WHS laws to responsible persons or authorities
- seek advice from relevant stakeholders if any non-compliance matters are identified that are outside own expertise and legal duties.
- 

## Knowledge Evidence

The candidate must demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit. This includes knowledge of:

- WHS legislative duties of self and others, including limits of own expertise
- organisational WHS policies, procedures, processes and systems for:
  - monitoring workplace compliance with WHS laws
  - identifying and reporting non-compliance with WHS laws
  - communicating WHS-related information
- requirements of commonwealth and state/territory WHS laws, standards and guidance material, and publications relevant to own work role, workplace and industry
- obligations and duties relating to consultation regarding training of workers, and health and safety representatives, including who must be consulted
- consequences of non-compliance with WHS laws, related documentation and organisational WHS policies, procedures, processes and systems

- individuals and duty holders to access for advice and accountability about WHS compliance
- sources of information about compliance with legislation.

## Assessment Conditions

Assessment must comply with WHS laws, and WHS legal responsibilities and duty of care required for this unit. It must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities undertaken by individuals carrying out WHS duties in the workplace, and must include access to:

- organisational policies, procedures and plans relating to compliance requirements specified in the performance evidence
- WHS laws, licensing requirements and standards relevant to the work of the unit
- guidance materials and alerts issued by the relevant WHS regulator
- workplace equipment and resources required for the performance evidence.

Assessors of this unit must satisfy the assessor requirements in applicable vocational education and training legislation, frameworks and/or standards.

## BSBWHS308 Participate in WHS hazard identification, risk assessment and risk control processes

### Modification History

| Release   | Comments                                                                             |
|-----------|--------------------------------------------------------------------------------------|
| Release 1 | This version first released with BSB Business Services Training Package Version 5.0. |

### Application

This unit describes the skills and knowledge required to participate in the processes of work health and safety (WHS) hazard identification, risk assessment and risk control. It includes participating in worker consultation and support to contribute to a healthy and safe workplace.

The unit applies to those who assist with identifying workplace hazards and assessing and controlling WHS risks as part of their WHS responsibilities, which are in addition to their main duties.

### NOTES

1. The terms ‘occupational health and safety’ (OHS) and ‘work health and safety’ (WHS) are equivalent, and generally either can be used in the workplace. In jurisdictions where *model WHS laws* have not been implemented, registered training organisations (RTOs) are advised to contextualise this unit of competency by referring to existing WHS legislative requirements.
2. The *model WHS laws* include the model WHS Act, model WHS Regulations and model WHS Codes of Practice. See Safe Work Australia for further information.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

### Unit Sector

Regulation, Licensing and Risk – Work Health and Safety

### Elements and Performance Criteria

| ELEMENTS | PERFORMANCE CRITERIA |
|----------|----------------------|
|----------|----------------------|

| ELEMENTS                                                          | PERFORMANCE CRITERIA                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |
|-------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <i>Elements describe the essential outcomes.</i>                  | <i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |
| 1. Participate in WHS hazard identification in the workplace      | <p>1.1 Participate in selecting hazard identification methods for the workplace according to organisational policies and procedures</p> <p>1.2 Use selected methods to identify, report and record hazards according to organisational policies and procedures, standards and WHS laws</p> <p>1.3 Provide information and assistance to required personnel during hazard identification process</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |
| 2. Participate in WHS risk assessment                             | <p>2.1 Participate in selecting suitable risk assessment methods for the workplace according to organisational policies and procedures</p> <p>2.2 Assess and record risks using selected methods according to organisational procedures, standards and WHS laws</p> <p>2.3 Provide information and assistance to required personnel during risk assessment process</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |
| 3. Contribute to developing and implementing WHS control measures | <p>3.1 Obtain organisation records of the outcomes of hazard identifications and risk assessments, and use them to participate in developing risk control options</p> <p>3.2 Identify duty holders according to WHS laws and organisational WHS policies, procedures, processes and systems</p> <p>3.3 Participate in selecting risk control options using criteria agreed to by work team, and according to organisational policies, procedures, processes and systems</p> <p>3.4 Identify and report factors impeding successful implementation of selected risk control options to determine potential control measures to be implemented</p> <p>3.5 Review and document potential control measures for compliance with relevant WHS laws</p> <p>3.6 Contribute to developing a risk control implementation plan according to the hierarchy of control measures</p> <p>3.7 Provide written information to individuals and duty holders to facilitate implementation of reviewed control measures</p> |
| 4. Contribute to consultative arrangements for hazard             | <p>4.1 Assist engaging work team in hazard identification and risk assessment according to organisational WHS</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |

| ELEMENTS                                                                     | PERFORMANCE CRITERIA                                                                                                                                                                                                                                                                                                                                                                                                                       |

# Assessment Requirements for BSBWHS308 Participate in WHS hazard identification, risk assessment and risk control processes

## Modification History

| Release   | Comments                                                                             |
|-----------|--------------------------------------------------------------------------------------|
| Release 1 | This version first released with BSB Business Services Training Package Version 5.0. |

## Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit and, on at least two occasions, to:

- participate in selecting and using required methods to identify, report and record hazards
- assess and record risks for identified hazards
- promote and support worker consultation and participation in hazard identification and risk assessment
- participate in developing, selecting and implementing risk control options and plans for identified hazards.
- 

## Knowledge Evidence

The candidate must demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit. This includes knowledge of:

- work health and safety (WHS) legislative requirements, regulations, codes of practice and standards relating to:
  - WHS hazard identification, risk assessment and risk control
  - WHS hazard communication, consultation and participation
  - identifying duty holders
  - recordkeeping
  - specific hazard identification, risk assessment and control methods
- internal and external sources of WHS information and data, and procedures for accessing them
- concept of hazards, risks and risk factors
- basic principles of incident causation and injury processes
- WHS organisational policies and procedures relating to identifying hazards, and assessing and controlling risks:

- WHS hazards that may be present in the workplace, the harm they can cause and how this harm occurs
- types of hazard and risk registers
- responding to WHS issues, including risk control options for different hazards and work situations, and suitable risk assessment methods
- workplace communication processes for reporting and recording, and plans for sharing information about hazard identification, risk assessment and risk control.
- 

## Assessment Conditions

Assessment must comply with WHS laws, and WHS legal responsibilities and duty of care required for this unit. It must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities undertaken by individuals carrying out WHS duties in the workplace, and must include access to:

- organisational policies, standard operating procedures and plans required for the performance evidence
- WHS laws relevant to hazard identification, risk assessment and risk control
- relevant WHS data files
- opportunities for interaction with others
- workplace equipment and resources required to demonstrate the performance evidence.

Assessors of this unit must satisfy the assessor requirements in applicable vocational education and training legislation, frameworks and/or standards.

## BSBWHS309 Contribute effectively to WHS communication and consultation processes

### Modification History

| Release   | Comments                                                                             |
|-----------|--------------------------------------------------------------------------------------|
| Release 1 | This version first released with BSB Business Services Training Package Version 5.0. |

### Application

This unit describes the skills and knowledge required to contribute to work health and safety (WHS) communication and consultation in the workplace. It involves communicating WHS information to required personnel, and taking appropriate follow-up action to assist in ensuring that communication and consultation processes are effective and conducive to others in the workplace who raise WHS issues.

The unit applies to those who contribute to WHS communication and consultation as part of their work health and safety responsibilities, which are in addition to their main duties.

### NOTES

1. The terms ‘occupational health and safety’ (OHS) and ‘work health and safety’ (WHS) are equivalent, and generally either can be used in the workplace. In jurisdictions where *model WHS laws* have not been implemented, registered training organisations (RTOs) are advised to contextualise this unit of competency by referring to existing WHS legislative requirements.
2. The *model WHS laws* include the model WHS Act, model WHS Regulations and model WHS Codes of Practice. See Safe Work Australia for further information.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

### Unit Sector

Regulation, Licensing and Risk – Work Health and Safety

### Elements and Performance Criteria

| ELEMENTS | PERFORMANCE CRITERIA |
|----------|----------------------|
|----------|----------------------|

| ELEMENTS                                                       | PERFORMANCE CRITERIA                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |

# Assessment Requirements for BSBWHS309 Contribute effectively to WHS communication and consultation processes

## Modification History

| Release   | Comments                                                                             |
|-----------|--------------------------------------------------------------------------------------|
| Release 1 | This version first released with BSB Business Services Training Package Version 5.0. |

## Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, and to:

- contribute to two different work health and safety (WHS) communication and consultation processes.

During the above, the candidate must:

- communicate WHS information to others
- raise WHS issues in meetings and follow up on outcomes
- take appropriate actions to assist with removing any barriers to communication and consultation processes identified during above processes
- support others to raise relevant WHS issues.
- 

## Knowledge Evidence

The candidate must demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit. This includes knowledge of:

- purpose of organisational WHS policies, procedures, processes and systems
- organisational WHS obligations relating to communication and consultation
- commonwealth and state/territory WHS laws and publications relating to:
  - identifying and recording key stakeholders
  - WHS communication and consultation processes
- organisational policies and procedures relating to:
  - consultation and communication methods, and processes for revising them
  - addressing barriers to effective WHS consultation and participation processes, including barrier reporting protocols
  - recording and communicating WHS discussions

- elements of WHS communication and consultation:
  - potential barriers to WHS consultation and participation processes, and methods to overcome them
  - roles and responsibilities of WHS personnel
  - how the consultation process influences and is related to workplace information management procedures, processes and systems
  - methods to engage others with workplace procedures, and information sourcing and sharing.
- 

## Assessment Conditions

Assessment must comply with WHS laws, and WHS legal responsibilities and duty of care required for this unit. It must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities undertaken by individuals carrying out WHS duties in the workplace, and must include access to:

- organisational policies, standard operating procedures, plans and procedures with information about compliance requirements required to demonstrate the performance evidence
- required WHS laws and data files to contribute to WHS communication and consultation processes
- opportunities for interaction with others
- workplace equipment and resources required for the performance evidence.

Assessors of this unit must satisfy the assessor requirements in applicable vocational education and training legislation, frameworks and/or standards.

## BSBWHS401 Implement and monitor WHS policies, procedures and programs to meet legislative requirements

### Modification History

| Release   | Comments                                                                            |
|-----------|-------------------------------------------------------------------------------------|
| Release 1 | This version first released with BSB Business Services Training Package release 1.0 |

### Application

This unit describes the skills and knowledge required to implement and monitor an organisation's work health and safety (WHS) policies, procedures and programs in the relevant work area in order to meet legislative requirements.

It applies to individuals with supervisory responsibilities for implementing and monitoring the organisation's WHS policies, procedures and programs in a work area. These individuals have a broad knowledge of WHS policies and contribute well developed skills in creating solutions to unpredictable problems through analysis and evaluation of information from a variety of sources. They provide supervision and guidance to others and have limited responsibility for the output of others.

NOTE: The terms 'occupational health and safety' (OHS) and 'work health and safety' (WHS) are equivalent and generally either can be used in the workplace. In jurisdictions where the Model WHS Legislation has not been implemented RTOs are advised to contextualise the unit of competency by referring to the existing State/Territory OHS legislative requirements.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

# Assessment Requirements for BSBWHS401 Implement and monitor WHS policies, procedures and programs to meet legislative requirements

## Modification History

| Release   | Comments                                                                             |
|-----------|--------------------------------------------------------------------------------------|
| Release 1 | This version first released with BSB Business Services Training Package Version 1.0. |

## Performance Evidence

Evidence of the ability to:

- explain clearly and accurately to work team the relevant work health and safety (WHS) information including:
  - WHS legislative and organisational requirements
  - identified hazards and outcomes of risk assessment and control
- ensure that the team has access to information about WHS policies, procedures and programs in appropriate structure and language
- implement and monitor procedures according to organisational and legislative WHS requirements including:
  - consultation and communications to enable team members to participate in managing WHS risks and hazards
  - identifying WHS training needs and providing learning opportunities, coaching and mentoring as appropriate to needs
  - identifying, reporting and taking action on WHS hazards and risks
  - identifying and reporting inadequacies in existing risk controls and monitoring outcomes to ensure a prompt organisational response
  - reporting on the cost of WHS training
  - keeping WHS records
  - analysing aggregate WHS data to identify hazards and monitor risk control procedures in work area.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline the legal responsibilities and duties of managers, supervisors, persons conducting businesses or undertakings (PCBUs) and workers in relation to WHS risk management in the workplace
- identify key provisions of relevant WHS Acts, regulations and codes of practice that apply to the business and outline how they apply in the work area
- explain organisational policies and procedures relating to hazard identification, risk management, fire, emergency and evacuation, incident investigation and reporting
- explain the importance of effective consultation mechanisms in managing health and safety risks in the workplace
- explain how the hierarchy of control applies in the work area.

## Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced by individuals carrying out work health and safety duties in the workplace and include access to:

- an actual workplace or simulated environment
- workplace equipment and resources
- examples of documents relating to workplace safety, hazard identification and risk assessment
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

## BSBWHS412 Assist with workplace compliance with WHS laws

### Modification History

| Release   | Comments                                                                             |
|-----------|--------------------------------------------------------------------------------------|
| Release 1 | This version first released with BSB Business Services Training Package Version 5.0. |

### Application

This unit describes the skills and knowledge required to assist with establishing and maintaining workplace compliance with work health and safety (WHS) laws. It includes identifying applicable WHS laws, duties, rights and obligations, and the necessary actions to ensure WHS compliance in the workplace.

It also includes assisting with providing advice about the legislative duties, rights and obligations of individuals and parties prescribed in WHS laws and those of WHS regulators.

The unit applies to those working in a broad range of WHS roles across all industries.

### NOTES

1. The terms ‘occupational health and safety’ (OHS) and ‘work health and safety’ (WHS) are equivalent, and generally either can be used in the workplace. In jurisdictions where *model WHS laws* have not been implemented, registered training organisations (RTOs) are advised to contextualise this unit of competency by referring to existing WHS legislative requirements.
2. The *model WHS laws* include the model WHS Act, model WHS Regulations and model WHS Codes of Practice. See Safe Work Australia for further information.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

### Unit Sector

Regulation, Licensing and Risk – Work Health and Safety

# Assessment Requirements for BSBWHS412 Assist with workplace compliance with WHS laws

## Modification History

| Release   | Comments                                                                             |
|-----------|--------------------------------------------------------------------------------------|
| Release 1 | This version first released with BSB Business Services Training Package Version 5.0. |

## Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, and to:

- assist with establishing workplace compliance with work health and safety (WHS) laws in relation to at least two different compliance matters and within scope of own role.

During the above, the candidate must assist with:

- identifying current WHS legal requirements for the workplace
- providing advice about current WHS legal requirements for the workplace
- assessing and maintaining workplace compliance with WHS legislative requirements
- making recommendations for implementing workplace changes in order to achieve WHS legal compliance
- monitoring compliance with WHS laws according to organisational policies and procedures.
- 

## Knowledge Evidence

The candidate must demonstrate the knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit. This includes knowledge of:

- internal and external sources of WHS information, and procedures for accessing them
- duties, rights and obligations of work team as specified in WHS laws, and location of relevant information about WHS laws
- functions and powers of relevant WHS regulator and how they are exercised
- regulatory compliance matters, including objectives and principles underpinning WHS laws
- methods used for:
  - assessing and maintaining WHS compliance
  - determining training needs in relation to WHS compliance

- implementing changes to policies, procedures, processes and systems to achieve WHS compliance
- organisational policies and procedures for:
  - documenting compliance requirements
  - assessing WHS compliance obligations and processes to address non-compliance
  - recording and documenting compliance assessment.
  -

## Assessment Conditions

Assessment must comply with WHS laws, legal responsibilities and duty of care required for this unit. It must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities undertaken by individuals carrying out WHS duties in the workplace, and must include access to:

- WHS laws and organisational documentation required to demonstrate the performance evidence
- reports from individuals and parties consulted about WHS compliance
- case studies and, where possible, real situations
- opportunities for interaction with others.

Assessors of this unit must satisfy the assessor requirements in applicable vocational education and training legislation, frameworks and/or standards.

## BSBWHS413 Contribute to implementation and maintenance of WHS consultation and participation processes

### Modification History

| Release   | Comments                                                                             |
|-----------|--------------------------------------------------------------------------------------|
| Release 1 | This version first released with BSB Business Services Training Package Version 5.0. |

### Application

This unit describes the skills and knowledge required to contribute to implementing and maintaining work health and safety (WHS) consultation and participation as prescribed in legislation.

It also covers contributing to communicating relevant information, identifying feedback opportunities, and improving consultation and participation.

The unit applies to those working in a broad range of WHS roles across all industries.

### NOTES

1. The terms ‘occupational health and safety’ (OHS) and ‘work health and safety’ (WHS) are equivalent, and generally either can be used in the workplace. In jurisdictions where *model WHS laws* have not been implemented, registered training organisations (RTOs) are advised to contextualise this unit of competency by referring to existing WHS legislative requirements.
2. The *model WHS laws* include the model WHS Act, model WHS Regulations and model WHS Codes of Practice. See Safe Work Australia for further information.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

### Unit Sector

Regulation, Licensing and Risk – Work Health and Safety

### Elements and Performance Criteria

| ELEMENTS | PERFORMANCE CRITERIA |

# Assessment Requirements for BSBWHS413 Contribute to implementation and maintenance of WHS consultation and participation processes

## Modification History

| Release   | Comments                                                                             |
|-----------|--------------------------------------------------------------------------------------|
| Release 1 | This version first released with BSB Business Services Training Package Version 5.0. |

## Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, and to:

- on at least two occasions contribute to each of the following, as applicable to own role and work area:
  - implementing and maintaining work health and safety (WHS) consultation and participation to ensure that required personnel are encouraged to participate
  - communicating information and data about WHS consultation and participation processes
  - explaining to individuals and parties the legal roles, duties, rights and responsibilities of self and others regarding WHS consultation and participation processes
  - creating opportunities for feedback on consultation and participation processes
  - identifying barriers to, and opportunities for improving, effectiveness of WHS consultation and participation processes, and to implement and maintain improvement measures.
- 

## Knowledge Evidence

The candidate must demonstrate the knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit. This includes knowledge of:

- requirements under WHS laws for consultation and participation processes, training requirements, and the roles and responsibilities of individuals and parties required to participate
- essential components of WHS consultation processes
- organisational policies and procedures for:
  - identifying and communicating WHS consultation and participation information
  - documenting consultation barriers, opportunities and feedback

- storing WHS information and data
- internal and external sources of WHS information and data, and procedures for accessing them
- key principles, uses and components of the hierarchy of control measures that assist with implementing and maintaining WHS consultation and participation processes
- methods for obtaining feedback from individuals and/or parties on consultation and participation processes.
- 

## Assessment Conditions

Assessment must comply with WHS laws, legal responsibilities and duty of care required for this unit. It must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities undertaken by individuals carrying out WHS duties in the workplace, and must include access to:

- workplace equipment, technology, software and consumables required to access information about WHS laws
- WHS laws, organisational documentation, and personnel required to demonstrate the performance evidence
- case studies and, where possible, real situations
- opportunities for interaction with others.

Assessors of this unit must satisfy the assessor requirements in applicable vocational education and training legislation, frameworks and/or standards.

## BSBWHS414 Contribute to WHS risk management

### Modification History

| Release   | Comments                                                                             |
|-----------|--------------------------------------------------------------------------------------|
| Release 1 | This version first released with BSB Business Services Training Package Version 5.0. |

### Application

This unit describes the skills and knowledge required to contribute to WHS risk management, which includes the processes for identifying work health and safety (WHS) hazards and assessing and controlling the risk relating to those identified hazards.

It involves contributing to the development, implementation and evaluation of risk controls according to legislative and organisational requirements.

The unit applies to those working in a broad range of roles across all industries. WHS hazard identification and risk control processes are those defined in written workplace procedures.

### NOTES

1. The terms ‘occupational health and safety’ (OHS) and ‘work health and safety’ (WHS) are equivalent, and generally either can be used in the workplace. In jurisdictions where *model WHS laws* have not been implemented, registered training organisations (RTOs) are advised to contextualise this unit of competency by referring to existing WHS legislative requirements.
2. The *model WHS laws* include the model WHS Act, model WHS Regulations and model WHS Codes of Practice. See Safe Work Australia for further information.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

### Unit Sector

Regulation, Licensing and Risk – Work Health and Safety

### Elements and Performance Criteria

| ELEMENTS | PERFORMANCE CRITERIA |
|----------|----------------------|
|----------|----------------------|

| ELEMENTS                                                                                 | PERFORMANCE CRITERIA                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |
|------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <i>Elements describe the essential outcomes.</i>                                         | <i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |
| 1. Access information and data used to identify hazards, and to assess and control risks | <p>1.1 Access and review current WHS laws relevant to organisation's hazard identification and risk control processes</p> <p>1.2 Access workplace sources of information and data to inform hazard identification, risk assessment and risk controls</p> <p>1.3 Access external sources of information and data to inform hazard identification, risk assessment and risk controls</p> <p>1.4 Analyse information and data and determine nature and scope of workplace hazards, risk assessment and risk controls</p> <p>1.5 Confirm information and data with required stakeholders, seeking input from technical and other advisors as required</p> |
| 2. Contribute to identifying risk management requirements and compliance                 | <p>2.1 Contribute to identifying and complying with requirements of organisational policies, procedures, processes and systems for hazard identification, risk assessment and risk controls</p> <p>2.2 Contribute to identifying and complying with requirements of WHS laws and guidelines for hazard identification, risk assessment and risk controls</p> <p>2.3 Identify duty holders, and their roles and responsibilities according to risk management requirements</p> <p>2.4 Identify tools used by organisational in current hazard identification and risk control processes</p>                                                            |
| 3. Contribute to workplace hazard identification                                         | <p>3.1 Contribute to selecting hazard identification tools and techniques according to WHS laws, and risk management requirements</p> <p>3.2 Use hazard identification tools and techniques to assist with identifying hazards according to risk management requirements</p> <p>3.3 Contribute to documenting hazard identification processes and results according to risk management requirements</p> <p>3.4 Apply knowledge of hazards to advise individuals and/or parties about workplace hazards and the harms they may</p>                                                                                                                     |

# Assessment Requirements for BSBWHS414 Contribute to WHS risk management

## Modification History

| Release   | Comments                                                                             |
|-----------|--------------------------------------------------------------------------------------|
| Release 1 | This version first released with BSB Business Services Training Package Version 5.0. |

## Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, and to contribute to:

- identifying at least two different (WHS) hazards and controlling the risks associated with those hazards
- evaluating the effectiveness of the above risk controls.

During each of the above occasions, the candidate must:

- identify and interpret information and data about WHS requirements and apply them to the selection and application of techniques, tools and processes for hazard identification, risk assessment and risk control
- contribute to documenting processes
- communicate with required people about WHS requirements and compliance
- comply with WHS requirements for hazard identification, risk assessment, and risk control activities
- identify WHS duty holders and their duties.
- 

## Knowledge Evidence

The candidate must demonstrate the knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit. This includes knowledge of:

- internal and external sources of WHS information and data relating to the performance evidence, and procedures for accessing them
- WHS hazard identification, risk assessment and risk control processes specified in:
  - required WHS laws
  - organisational WHS policies, procedures, processes, and systems
- risk management requirements, including:
  - identifying duty holders and their roles and responsibilities

- selecting and using hazard identification tools and techniques
- undertaking, documenting and communicating risk assessments
- evaluating risk controls
- documenting and communicating risk control plan
- differences between hazards and risks in the workplace
- range of common workplace hazards, and the nature, severity and likelihood of those hazards
- risk assessment and controls that can eliminate or minimise risks.
- 

## Assessment Conditions

Assessment must comply with WHS laws, legal responsibilities and duty of care required for this unit. It must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities undertaken by individuals carrying out WHS duties in the workplace, and must include access to:

- workplace equipment, technology, software and consumables required to access information on WHS laws
- WHS laws, and organisational policies, procedures, processes and systems required to demonstrate the performance evidence
- case studies and, where possible, real situations
- opportunities for interaction with others.

Assessors of this unit must satisfy the assessor requirements in applicable vocational education and training legislation, frameworks and/or standards.

# BSBWHS416 Contribute to workplace incident response

## Modification History

| Release   | Comments                                                                             |
|-----------|--------------------------------------------------------------------------------------|
| Release 1 | This version first released with BSB Business Services Training Package Version 5.0. |

## Application

This unit describes the skills and knowledge required to assist with actions and activities performed in response to workplace incidents according to work health and safety (WHS) legislative and organisational requirements.

The unit applies to those who contribute to workplace incident responses by undertaking a varied range of activities in a structured and familiar work environment as defined in written procedures. It applies to people who work in a broad range of WHS roles across all industries.

## NOTES

1. The terms ‘incident’ and ‘accident’ are equivalent. Specific state/territory legislation may use one or the other. In jurisdictions where *model WHS laws* have not been implemented, RTOs are advised to contextualise this unit of competency by referring to the existing state/territory OHS legislative requirements and industry-specific legislative variances.
2. The terms ‘occupational health and safety’ (OHS) and ‘work health and safety’ (WHS) are equivalent, and generally either can be used in the workplace. In jurisdictions where *model WHS laws* have not been implemented, registered training organisations (RTOs) are advised to contextualise this unit of competency by referring to existing WHS legislative requirements.
3. The *model WHS laws* include the model WHS Act, model WHS Regulations and model WHS Codes of Practice. See Safe Work Australia for further information.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Regulation, Licensing and Risk – Work Health and Safety

## Elements and Performance Criteria

| ELEMENTS                                                                           | PERFORMANCE CRITERIA                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |

# Assessment Requirements for BSBWHS416 Contribute to workplace incident response

## Modification History

| Release   | Comments                                                                             |
|-----------|--------------------------------------------------------------------------------------|
| Release 1 | This version first released with BSB Business Services Training Package Version 5.0. |

## Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, and to:

- contribute to responding to at least two different workplace incidents according to work health and safety (WHS) legislative and organisational requirements.

During the above, the candidate must:

- identify duty holders relevant to incident response
- contribute to:
  - communicating WHS requirements clearly and accurately to individuals and/or parties involved
  - reporting each incident according to WHS legislative and organisational requirements
  - obtaining information about each incident using appropriate data-collection techniques
  - developing and contributing to implementing required actions in response to each incident
  - investigating incident
  - communicating and implementing recommendations from investigation.
- 

## Knowledge Evidence

The candidate must demonstrate the knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit. This includes knowledge of:

- WHS laws about investigating and reporting workplace incidents
- sources of internal and external WHS information and data relating to incidents, and procedures for accessing them
- organisational policies, procedures, processes and systems relevant to own role or work area that relate to incident response and investigation, including those for:

- recording information relating to workplace incident responses
- reporting information to external authorities
- implementing improvements to policies, procedures, processes and systems as a result of an incident
- communication strategies to facilitate engagement of individuals and/or parties in incident response
- roles and responsibilities of self and duty holders in responding to workplace incidents.
- 

## Assessment Conditions

Assessment must comply with WHS laws, legal responsibilities and duty of care required for this unit. It must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities undertaken by individuals carrying out WHS duties in the workplace, and must include access to:

- organisational policies, standard operating procedures, procedures and plans required to demonstrate the performance evidence
- WHS legislation, licensing requirements and standards required to demonstrate the performance evidence
- WHS data required to contribute to incident response
- case studies and, where possible, real situations
- workplace equipment and resources
- opportunities for interaction with others.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

# BSBWHS520 Manage implementation of emergency procedures

## Modification History

| Release   | Comments                                                                             |
|-----------|--------------------------------------------------------------------------------------|
| Release 1 | This version first released with BSB Business Services Training Package Version 5.0. |

## Application

This unit describes the skills and knowledge required to implement initial response procedures for emergencies. Its focus is on the implementation of procedures already developed for short-term emergency responses. It assumes that expert advice will be available in identifying potential emergencies and in formulating response plans.

The unit applies to those with supervisory responsibilities for managing work health and safety (WHS) in the workplace who contribute to the implementation of procedures for responding to emergencies. These people work in a range of WHS roles across all industries, and apply a substantial knowledge base and well-developed skills in a wide variety of WHS contexts.

## NOTES

1. The terms ‘occupational health and safety’ (OHS) and ‘work health and safety’ (WHS) are equivalent, and generally either can be used in the workplace. In jurisdictions where *model WHS laws* have not been implemented, registered training organisations (RTOs) are advised to contextualise this unit of competency by referring to existing WHS legislative requirements.
2. The *model WHS laws* include the model WHS Act, model WHS Regulations and model WHS Codes of Practice. See Safe Work Australia for further information.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Regulation, Licensing and Risk – Work Health and Safety

## Elements and Performance Criteria

| ELEMENTS                                         | PERFORMANCE CRITERIA                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |

# Assessment Requirements for BSBWHS520 Manage implementation of emergency procedures

## Modification History

| Release   | Comments                                                                             |
|-----------|--------------------------------------------------------------------------------------|
| Release 1 | This version first released with BSB Business Services Training Package Version 5.0. |

## Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, and to:

- manage the planning, implementation and review of initial response procedures for at least two different emergencies.

During the above, the candidate must:

- identify and prioritise causes and options for initial response to contain or limit potential emergencies and their impact
- liaise with specialist advisers, emergency services and/or specialist response teams as required.
- 

## Knowledge Evidence

The candidate must demonstrate the knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit. This includes knowledge of:

- commonwealth and state/territory work health and safety (WHS) legislation and how it applies to managing the implementation of initial response procedures
- organisational and workplace WHS policies and procedures relating to initial response, including:
  - identifying and reporting emergencies
  - categorising major types of potential emergencies
  - essential communication and actions in an emergency
  - reporting on response to emergency
- internal and external sources of WHS information and data, and procedures for accessing them
- organisational structure, roles and responsibilities of WHS personnel managing the implementation of initial response procedures

- workplace emergency response equipment, including:
  - emergency alerting systems
  - emergency protection systems
  - smoke alarms, fire alarms and fire extinguishers
  - required safety wear
  - security systems
- nature of work, work site and hazards that may result in an emergency situation
- hazards arising and precautions to be taken during emergency response
- information needs of emergency response personnel during reporting, arrival and response to an emergency
- principles and priorities of fire protection and emergency response applicable to performance evidence
- accepted industry practice when responding to workplace emergencies.
- 

## Assessment Conditions

Assessment must comply with WHS laws, legal responsibilities and duty of care required for this unit. It must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities undertaken by individuals carrying out WHS duties in the workplace, and must include access to:

- workplace equipment and resources
- WHS laws, and organisational policies and procedures required to demonstrate the performance evidence
- case studies and, where possible, real situations
- opportunities for interaction with others.

Assessors of this unit must satisfy the assessor requirements in applicable vocational education and training legislation, frameworks and/or standards.

## BSBWHS521 Ensure a safe workplace for a work area

### Modification History

| Release   | Comments                                                                             |
|-----------|--------------------------------------------------------------------------------------|
| Release 1 | This version first released with BSB Business Services Training Package Version 5.0. |

### Application

This unit describes the skills and knowledge required to establish, maintain and evaluate an organisation's work health and safety (WHS) policies, procedures and programs in a work area to ensure a safe workplace, according to WHS legislative requirements. It takes a systems approach and addresses compliance with relevant legislative requirements.

The unit applies to those working in a range of contexts who have, or are likely to have, responsibility for WHS as part of their broader management role. It is relevant for people with obligations under WHS laws, for example persons conducting a business or undertaking (PCBUs) or officers, as defined by WHS laws.

### NOTES

1. The terms 'occupational health and safety' (OHS) and 'work health and safety' (WHS) are equivalent, and generally either can be used in the workplace. In jurisdictions where *model WHS laws* have not been implemented, registered training organisations (RTOs) are advised to contextualise this unit of competency by referring to existing WHS legislative requirements.

2. The *model WHS laws* include the model WHS Act, model WHS Regulations and model WHS Codes of Practice. See Safe Work Australia for further information.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

### Unit Sector

Regulation, Licensing and Risk – Work Health and Safety

### Elements and Performance Criteria

| ELEMENTS | PERFORMANCE CRITERIA |
|----------|----------------------|
|----------|----------------------|

| ELEMENTS                                                                                                                   | PERFORMANCE CRITERIA                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |

| <i>Elements describe the essential outcomes.</i>                                                                           | <i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |
| 1. Establish a WHS management system in a work area                                                                        | <p>1.1 Locate, adapt, adopt and communicate WHS policies that define the organisation's commitment to complying with WHS laws</p> <p>1.2 Identify duty holders and define WHS responsibilities for all workplace personnel in the work area according to WHS laws, policies, procedures and programs</p> <p>1.3 Identify and approve financial and human resources required by the WHS management system (WHSMS) according to organisational procedures</p>                                                                                                                                                                                                                                                                                                                                                                                                       |
| 2. Establish and maintain effective and compliant consultative arrangements for managing WHS in a work area                | <p>2.1 Work with required personnel to set up and maintain consultative arrangements according to required WHS laws</p> <p>2.2 Resolve issues raised through participation and consultation arrangements according to required WHS laws and organisational protocols</p> <p>2.3 Provide information about consultation and participation outcomes to required personnel according to organisational policies and procedures</p>                                                                                                                                                                                                                                                                                                                                                                                                                                   |
| 3. Establish and maintain procedures for effectively identifying hazards, and assessing and controlling risks in work area | <p>3.1 Develop procedures for ongoing hazard identification, and assessment and control of associated risks</p> <p>3.2 Include hazard identification at the planning, design and evaluation stages of any workplace change to ensure that new hazards are not created by proposed changes and existing hazards are controlled</p> <p>3.3 Develop and maintain procedures for selecting and implementing risk controls according to the hierarchy of control measures and WHS legislative requirements</p> <p>3.4 Identify inadequacies in existing risk controls according to the hierarchy of control measures and WHS legislative requirements, and promptly provide resources to enable implementation of new measures</p> <p>3.5 Identify requirements for expert WHS advice, and request this advice as required, according to organisational procedures</p> |
| 4. Evaluate and maintain a work area WHS management system                                                                 | 4.1 Develop and provide a WHS induction and training program for required personnel in a work area as part of                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |

| ELEMENTS | PERFORMANCE CRITERIA                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |

# Assessment Requirements for BSBWHS521 Ensure a safe workplace for a work area

## Modification History

| Release   | Comments                                                                             |
|-----------|--------------------------------------------------------------------------------------|
| Release 1 | This version first released with BSB Business Services Training Package Version 5.0. |

## Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, and to:

- establish, implement, maintain and evaluate one work health and safety management system (WHSMS) for a work area of an organisation that complies with WHS laws, and organisational policies and procedures.

During the above, the candidate must:

- establish, implement, maintain and evaluate effective and compliant consultative arrangements for managing WHS, including:
  - identifying duty holders
  - identifying and approving required resources
  - developing and implementing a training program
- establish, implement, maintain and evaluate procedures for effectively identifying hazards, and assessing and controlling risks using the hierarchy of control measures.
- 

## Knowledge Evidence

The candidate must demonstrate the knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit. This includes knowledge of:

- details of relevant WHS laws relating to ensuring a safe workplace
- WHS organisational policies, procedures, programs and practices required for the performance evidence
- hazard identification and risk-management processes
- key principles, uses and components of the hierarchy of control measures and procedures for applying it in the workplace
- organisational and WHS legislative reporting requirements.
-

## Assessment Conditions

Assessment must comply with WHS laws, legal responsibilities and duty of care required for this unit. It must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities undertaken by individuals carrying out WHS duties in the workplace, and must include access to:

- organisational WHS policies and procedures required to demonstrate the performance evidence
- WHS laws required to demonstrate the performance evidence
- case studies and, where possible, real situations
- opportunities for interaction with others.

Assessors of this unit must satisfy the assessor requirements in applicable vocational education and training legislation, frameworks and/or standards.

## BSBWOR201 Manage personal stress in the workplace

### Modification History

| Release   | Comments                                                                             |
|-----------|--------------------------------------------------------------------------------------|
| Release 1 | This version first released with BSB Business Services Training Package Version 1.0. |

### Application

This unit describes the skills and knowledge required to understand signs and sources of stress within the broader framework of the job role and work environment.

It applies to individuals who usually work with some guidance and supervision in an environment where they are likely to encounter difficult customers and situations from time to time. It typically applies in a contact centre environment owing to the very measured, structured, high volume and potentially repetitive nature of the work, but can apply in any work environment.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

### Unit Sector

Industry Capability – Workplace Effectiveness

### Elements and Performance Criteria

# Assessment Requirements for BSBWOR201 Manage personal stress in the workplace

## Modification History

| Release   | Comments                                                                             |
|-----------|--------------------------------------------------------------------------------------|
| Release 1 | This version first released with BSB Business Services Training Package Version 1.0. |

## Performance Evidence

Evidence of the ability to:

- recognise and understand potential stress in the work environment
- develop and use techniques and strategies to manage stress and stressful situations
- adopt and monitor potential sources of stress and fatigue, seeking assistance as required
- monitor own performance against performance requirements and key performance indicators (KPIs)
- use techniques to achieve work/life balance.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe job role priorities and KPIs
- list internal and external sources of assistance, including escalation pathways
- outline signs and sources of existing and potential stress or difficult situations
- discuss stress management and reduction techniques
- describe time management tools and techniques.

## Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the industry capability – workplace effectiveness field of work and include access to:

- office equipment and resources
- time management tools

- workplace documentation
- case studies and, where possible, real situations
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

### Application

This unit describes the skills and knowledge required to work cooperatively with others and deal effectively with issues, problems and conflict.

It applies to individuals who perform a range of routine tasks using a limited range of practical skills, and a fundamental knowledge of teamwork in a defined context under direct supervision or with limited individual responsibility.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

| Release 2 | This version first released with BSB Business Services Training Package Version 1.1.<br>Version created to correct mapping table information |
| Release 1 | This version first released with BSB Business Services Training Package Version 1.0.                                                         |

## Performance Evidence

Evidence of the ability to:

- identify own responsibilities in relation to the team and the organisation's requirements
- work effectively in a workgroup including:
  - supporting team members
  - using culturally appropriate communication skills
  - acting on constructive feedback
  - cooperating and contributing to team goals
  - identifying improvement opportunities
- identify problems and conflicts and address them appropriately.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline the organisational standards, policies and procedures that relate to own work role
- outline team responsibilities and duties and their relationship to individual responsibilities and duties.
- summarise conflict resolution techniques.

## Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the industry capability – workplace effectiveness field of work and include access to:

- office equipment and resources
- workplace documentation
- case studies and, where possible, real situations
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

|-----------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Release 1 | <p>This version was released in <i>CHC Community Services Training Package release 2.0</i> and meets the requirements of the 2012 Standards for Training Packages.</p> <p>Significant changes to performance criteria</p> <p>New evidence requirements for assessment including volume and frequency requirements</p> |

### Application

This unit describes the skills and knowledge required to provide opportunities for community groups and individuals to participate and design cooperative arrangements for addressing common concerns.

This unit applies to workers in both health and community sectors and/or a community development work context. Workers at this level will be part of a professional team and under the guidance of a supervisor.

*The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.*

### Elements and Performance Criteria

#### ELEMENT

#### PERFORMANCE CRITERIA

*Elements define the essential outcomes*

*Performance criteria describe the performance needed to demonstrate achievement of the element.*

1. Contribute to planning processes

1.1 Identify key community stakeholders

1.2 Identify and document community strengths and key priorities to be addressed

1.3 Participate in planning to ensure key priorities are addressed

1.4 Participate in evaluating processes to ensure they are

**ELEMENT****PERFORMANCE CRITERIA**

forward looking and proactive

2. Promote and engage community participation in planning

2.1 Use appropriate interpersonal and networking skills to enlist support from key people and groups within the community

2.2 Proactively develop and provide opportunities for community input to planning provision of services

3. Support existing community activities

3.1 Review existing community activities and resources, based on changing community priorities

3.2 Provide support and assistance to existing community activities to obtain additional resources required for effective operation

3.3 Provide support to community groups to monitor and evaluate processes, progress and outcomes of activities

3.4 Provide appropriate support to community groups to become self managing in the implementation of plans

**Foundation Skills**

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

*Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.*

**Unit Mapping Information**

No Equivalent unit

## Assessment Requirements for CHCCDE001 Support participative planning processes

### Modification History

| Release   | Comments                                                                                                                                                                                                                                                                                                              |
|-----------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Release 1 | <p>This version was released in <i>CHC Community Services Training Package release 2.0</i> and meets the requirements of the 2012 Standards for Training Packages.</p> <p>Significant changes to performance criteria</p> <p>New evidence requirements for assessment including volume and frequency requirements</p> |

### Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be demonstrated evidence that the candidate has:

- contributed to the development of at least 1 community activity plan in collaboration with key people and groups, including supported participation of key stakeholders in planning activities on at least 3 occasions

### Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage the task and manage contingencies in the context of the work role. This includes knowledge of:

- relevant legislation and public policies
- social, community and youth issues
- contemporary economics and politics and their impact on community development
- community development as a social change strategy, including:
  - traditional community development approaches:
    - needs-based
    - gap-based
- principles and practices of contemporary community development approaches and techniques for mobilisation in relation to:
  - asset-based (ABCD)
  - rights-based
- funding sources and their policies and strategies for encouraging community input and participation

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions. Where simulation is used, it must reflect real working conditions by modelling industry operating conditions and contingencies, as well as, using suitable facilities, equipment and resources.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

### Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be demonstrated evidence that the candidate has:

- researched individual and group issues of at least 1 specific community
- engaged effectively with a range of individuals from at least 1 specific community group, validated by community acceptance over at least 3 different occasions

### Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage the task and manage contingencies in the context of the work role. This includes knowledge of:

- social, political, cultural and historical issues that affect or are relevant to specific communities and groups
- models of society
- critique of socialisation theory
- specific information relating to client community group, including:
  - group composition
  - specific community and group structures
  - practices and values
  - cultural preferences

- social issues relevant to the specific group
- health issues relevant to the specific group
- relevant networks, people and stakeholders
- specific communication protocols and practices
- strength, talents and abilities of the community
- impact of community values and structures on individuals
- culture and diversity
- family and power
- deviance
- identity theories

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions. Where simulation is used, it must reflect real working conditions by modelling industry operating conditions and contingencies, as well as, using suitable facilities, equipment and resources.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

|-----------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Release 1 | <p>This version was released in <i>CHC Community Services Training Package release 3.0</i> and meets the requirements of the 2012 Standards for Training Packages.</p> <p>Minimal changes to the elements and performance criteria. New evidence requirements for assessment including volume and frequency requirements. Significant changes to knowledge evidence.</p> <p>Supersedes CHCDFV404C</p> |

## Application

This unit describes the knowledge and skills required to identify gaps in existing information, services and resources and to promote community awareness of domestic and family violence issues to support prevention.

This unit applies to workers in a range of community service contexts. These workers may not be specialised family violence workers.

*The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand Standards and industry codes of practice.*

## Elements and Performance Criteria

### ELEMENT

*Elements define the essential outcomes*

### PERFORMANCE CRITERIA

*Performance criteria describe the performance needed to demonstrate achievement of the element.*

| ELEMENT                                                    | PERFORMANCE CRITERIA                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |
|------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1. ## Assessment Requirements for CHCDFV003 Promote community awareness of domestic and family violence

### Modification History

| Release   | Comments                                                                                                                                                                                                                                                                                                                                                                                              |
|-----------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Release 1 | <p>This version was released in <i>CHC Community Services Training Package release 3.0</i> and meets the requirements of the 2012 Standards for Training Packages.</p> <p>Minimal changes to the elements and performance criteria. New evidence requirements for assessment including volume and frequency requirements. Significant changes to knowledge evidence.</p> <p>Supersedes CHCDFV404C</p> |

### Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- developed at least 1 program to promote community awareness of domestic and family violence including using communication methods suited to the specific community:
  - identified and documented specific needs
  - collaborated with at least 3 internal/external colleagues and community members
  - created a project plan that provides details of:
    - scope
    - timelines and responsibilities
    - resource requirements
    - communication requirements.

### Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- legal and ethical considerations (national and state/territory) for domestic and family violence, and how these are applied in organisations and individual practice:
  - codes of conduct
  - copyright and intellectual property
  - discrimination
  - duty of care
  - human rights
  - privacy, confidentiality and disclosure
  - rights and responsibilities of:
    - workers and employers
    - individuals, families, the community and society to minimise or prevent domestic violence
  - work role boundaries – responsibilities and limitations
- general principles and practices of community development, education and consciousness raising
- domestic violence and its context, including:
  - social, historical, political and economic context of domestic violence, including types and nature of domestic violence, power and gender issues, child abuse and associated criminal issues
  - prevalence of myths, unhelpful beliefs, attitudes and practices in the broader society regarding domestic violence and their effects on individuals' rights to safety and autonomy
- underpinning values and philosophies relating to domestic violence, including:
  - all individuals have the right to be free from violence
  - the community has a responsibility to work toward the prevention of domestic violence and to demonstrate the unacceptability of all forms of domestic violence
  - all forms of domestic violence are unacceptable in any group, culture or creed
  - those who use violence should take responsibility for their behaviour and have access to programs to assist them change their behaviour to ensure the safety of their family
  - domestic violence is widespread and complex
  - domestic violence impacts on the physical, emotional, social, and financial well-being and safety of individuals in families
  - domestic violence and abuse has devastating effects on family members and results in significant social and economic costs to the community
- cultural and language groups represented within the local/regional community, and a respect for their values and beliefs
- impacts of cultural, sub-cultural, social, sexual identity, religious, gender, age, disability, language issues, etc. on attitudes towards domestic violence
- key people and groups within the community who are able to influence community values
- current theory and research knowledge in the domestic violence area
- processes used to formally and informally communicate the domestic violence prevention needs of the community
- organisation current domestic violence activities, programs and services

- current organisation procedures, protocols and practice for promotion of services
- program planning techniques.

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - current information about domestic and family violence
  - organisation policies and procedures
- modelling of industry operating conditions, including:
  - scenarios that involve interactions with other people.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

New evidence requirements for assessment including volume and frequency requirements. Significant change to knowledge evidence.</p> |

### Application

This unit describes the skills and knowledge required to participate in, and provide general support for, group work. It does not include the leadership or facilitation of groups.

This unit applies to individuals involved group work in a range of community service settings. They work according to established organisation procedures.

*The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand Standards and industry codes of practice.*

### Elements and Performance Criteria

#### ELEMENT

*Elements define the essential outcomes*

#### PERFORMANCE CRITERIA

*Performance criteria describe the performance needed to demonstrate achievement of the element.*

| <b>ELEMENT</b>                                | <b>PERFORMANCE CRITERIA</b>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |

## Assessment Requirements for CHCGRP001 Support group activities

### Modification History

| Release   | Comments                                                                                                                                                                                                                                                                                                                                                                                                                 |
|-----------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Release 1 | <p>This version was released in <i>CHC Community Services Training Package release 3.0</i> and meets the requirements of the 2012 Standards for Training Packages.</p> <p>Merged CHCGROUP201C and CHCGROUP302D.</p> <p>Significant changes to the elements and performance criteria. New evidence requirements for assessment including volume and frequency requirements. Significant change to knowledge evidence.</p> |

### Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- participated in, and supported the activities of, at least 3 different groups, where groups comprise at least 5 members
- modelled the following communication skills when participating in groups:
  - active listening
  - questioning
  - rapport-building
  - conflict resolution
  - clarity in communication.

### Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- legal and ethical considerations for group work, and how these are applied in organisations and individual practice:
  - codes of conduct
  - discrimination
  - duty of care

- mandatory reporting
- privacy, confidentiality and disclosure
- records management
- work role boundaries – responsibilities and limitations
- work health and safety
- policies and procedures
- nature of groups and the way they operate at an overview level, including:
  - dynamics of groups
  - stages of group development
  - stages of change
  - styles of group leadership and decision-making
- communication techniques and how they are used within groups, including:
  - active listening and questioning
  - rapport building
  - conflict resolution
  - non-verbal communication
- nature of resources provided to groups, including:
  - information/referrals
  - facilities
  - equipment/materials
  - administrative support
  - facilitation of meetings
  - worker skills/expertise
- nature of support provided including:
  - resources managed by the organisation
  - advice, information and facilitation
  - individual or group supervision.

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - organisation policies and procedures
  - group member information
- modelling of industry operating conditions, including:
  - scenarios that involve interactions with groups.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

|-----------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Release 1 | <p>This version was released in <i>CHC Community Services Training Package release 3.0</i> and meets the requirements of the 2012 Standards for Training Packages.</p> <p>Significant changes to the elements and performance criteria. New evidence requirements for assessment including volume and frequency requirements. Significant change to knowledge evidence.</p> <p>Supersedes CHCGROUP403D</p> |

### Application

This unit describes the knowledge and skills required to establish, lead and participate in a groups using a collaborative, strengths-based approach.

This unit applies to any individual involved in planning and leading group activities. Groups may be formal or informal.

*The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand Standards and industry codes of practice.*

### Elements and Performance Criteria

#### ELEMENT

#### PERFORMANCE CRITERIA

*Elements define the essential outcomes*

*Performance criteria describe the performance needed to demonstrate achievement of the element.*

1. Plan group activities and resources

1.1 Review available information and identify the needs of the group

1.2 Generate ideas for activities that respond to identified needs

1.3 Identify, calculate and document the resources required for group activities

1.4 Identify and follow up on the need to make

**ELEMENT****PERFORMANCE CRITERIA**

submissions for potential sources of assistance and resources within scope of own job role

1.5 Organise resources according to organisation procedures

2. Coordinate group planning processes

2.1 Seek opportunities actively for collaborative planning and shared ownership with clients

2.2 Solicit, analyse and prioritise information about group's needs and expectations

2.3 Negotiate the purpose of group activities with the group allowing time and opportunity for individuals to articulate their ideas and wishes

2.4 Translate purpose of proposed group activity into a set of documented aims and objectives based on input

2.5 Analyse potential impact on group operation of the values and beliefs of both worker and client

2.6 Design group strategies that promote effective group operation and take into account specific characteristics of participating clients

3. Manage group processes and conflict

3.1 Promote opportunities for open dialogue and active listening between group members

3.2 Encourage and model sensitivity to diverse participants

3.3 Use strategies to prevent conflict within own role, power and capacity

3.4 Identify and reinforce the outcomes of positive conflict

3.5 Clarify and confirm principles and practices of conflict resolution in a group and seek agreement to implement them

3.6 Encourage acknowledgement of rights and responsibilities and perceptions of all participants in the conflict situation

3.7 Offer opportunity to all participants for debriefing, support, mediation, consultation and facilitation

**ELEMENT****PERFORMANCE CRITERIA****4. Evaluate group activities**

4.1 Ensure aims and objectives of the group activity provide the basis for evaluation and feedback

4.2 Seek feedback from group participants on leadership style, group process, achievement of objectives, other achievements and areas for development

4.3 Document evaluation information according to organisation procedures and distribute to relevant people

**Foundation Skills**

*The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.*

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

**Unit Mapping Information**

No equivalent unit.

|-----------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Release 1 | <p>This version was released in <i>CHC Community Services Training Package release 3.0</i> and meets the requirements of the 2012 Standards for Training Packages.</p> <p>Significant changes to the elements and performance criteria. New evidence requirements for assessment including volume and frequency requirements. Significant change to knowledge evidence.</p> <p>Supersedes CHCGROUP403D</p> |

### Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- planned and conducted at least 3 different group activities for groups with diverse participant profiles, including:
  - identified the following resource requirements:
    - financial
    - human
    - physical
  - worked collaboratively with groups to plan activities
- facilitated at least 3 different group sessions, each with a minimum group size of 5 people, using the following communication and interpersonal skills:
  - listening
  - questioning
  - effective non-verbal communication
  - empathetic responding
  - paraphrasing
  - summarising
  - negotiation
  - techniques for maintaining group cohesion
  - conflict resolution.

## Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- legal and ethical considerations for group work, and how these are applied in organisations and individual practice:
  - codes of conduct
  - discrimination
  - duty of care
  - mandatory reporting
  - privacy, confidentiality and disclosure
  - records management
  - work role boundaries – responsibilities and limitations
  - work health and safety
- principles and processes of strengths-based practice
- types and purposes of groups in the community services context
- types of resources required for group activities, including:
  - venues
  - equipment
  - information materials
  - administrative support
  - specialist expertise
- dynamics of groups and group behaviour
- processes and techniques for engaging in, and managing group planning processes
- communication techniques and how these are applied in working with groups, including:
  - collaboration
  - conflict resolution
  - different styles of group leadership
  - effective non-verbal communication
  - empathetic responding
  - listening
  - negotiation
  - paraphrasing
  - questioning
  - summarising
  - techniques for maintaining group cohesion
- relevant models including stages of group development and stages of change
- types of additional support that may be provided to groups, including:
  - information and resources (internal or external)
  - individualised services

- referrals to further support.

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - information about group needs
  - organisation policies and procedures
- modelling of industry operating conditions, including:
  - scenarios that involve groups comprising at least 5 people.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

### Application

This unit describes the skills and knowledge required to identify networking and collaboration needs and develop formal and informal partnerships to enhance service delivery and improve professional practice.

This unit applies to work in all industry sectors, and to individuals who take pro-active responsibility for improving collaboration between workers and organisations.

*The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice*

### Elements and Performance Criteria

#### ELEMENT

*Elements define the essential outcomes*

#### PERFORMANCE CRITERIA

*Performance criteria describe the performance needed to demonstrate achievement of the element*

| <b>ELEMENT</b>                                                   | <b>PERFORMANCE CRITERIA</b>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |

Significant change to knowledge evidence. |

## Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- developed strategies for networking and collaboration for at least 1 organisation
- worked collaboratively with external individuals or groups in at least 3 different service delivery situations

## Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- legal and ethical considerations for collaborative practice, including:
  - copyright and intellectual property
  - privacy, confidentiality and disclosure
- principles of networking and collaboration
- different types of networks and collaboration:
  - organisational
  - individual

- virtual
- formal/informal
- benefits of networking and collaboration:
  - for clients
  - for the organisation
  - for the worker
- values, limitations and dynamics of networks and collaborative partnerships
- industry structure and interrelationships between different organisations, both public and private
- established networks in relevant area of work:
  - structure
  - key stakeholders
  - vision and purpose
  - opportunities for participation

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including information relating to peak bodies, network groups and web based network services
- modelling of industry operating conditions, including presence of situations that allow interactions with individuals and organisations

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

| 1.2                             | Identify and review a range of possible programs to meet the defined needs                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |
| 1.3                             | Select a program type based on client needs, organisational criteria and availability of resources                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |
| <br>                            |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |
| 2. Prepare program plan         | <p>2.1 Undertake appropriate strategic planning activities to ensure client needs are met</p> <p>2.2 Plan activities in consultation with key clients and stakeholders</p> <p>2.3 Determine operational arrangements for conducting the program and assess their feasibility</p> <p>2.4 Ensure planning activities reflect accepted good practice in working with young people</p> <p>2.5 Develop flexible implementation plans to suit a variety of contexts and to cope with contingencies</p> <p>2.6 Identify appropriate implementation and evaluation strategies in the program plan in consultation with stakeholders</p> |
| <br>                            |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |
| 3. Deliver program              | <p>3.1 Implement program in accordance with program plan, organisation guidelines and legal/statutory requirements</p> <p>3.2 Provide participants with access to a range of activities suited to their needs and interests</p> <p>3.3 Implement contingency plans and adapt program to changing needs of participants as required</p> <p>3.4 Ensure problems in program delivery are addressed promptly</p>                                                                                                                                                                                                                    |
| <br>                            |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |
| 4. Monitor and evaluate program | <p>4.1 Use appropriate evaluation strategies during and after program and for revision and development</p> <p>4.2 Collect, organise and report evaluation information in a format which is accessible and meaningful to clients and stakeholders</p> <p>4.3 Prepare and present reports as required by</p>                                                                                                                                                                                                                                                                                                                      |

**ELEMENT**

*Elements define the essential outcomes.*

**PERFORMANCE CRITERIA**

*Performance criteria specify the level of performance needed to demonstrate achievement of the element.*

organisational, funding and other requirements

**Foundation Skills**

*The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.*

- Reading – in order to collect and analyse evidence to inform program requirements.
- Writing – in order to prepare reports in line with workplace policies and procedures.

The remaining foundation skills essential to performance are explicit in the performance criteria of this unit.

**Range of Conditions**

*Specifies different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.*

*Range is restricted to essential operating conditions and any other variables essential to the work environment.*

Context for youth work must include one or more of the following:

- centre-based work
- drop-in centres, recreational facilities
- housing and residential services
- outreach and home visits, street, parks
- schools
- online youth work, web-based, emails, discussion rooms
- telephone contact

**Unit Mapping Information**

No equivalent unit.

# Assessment Requirements for CHCYTH009 Support youth programs

## Modification History

| Release   | Comments                                                                                                                                                                                                                                                                          |
|-----------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Release 2 | Updated: <ul style="list-style-type: none"><li>• assessor requirements statement</li><li>• foundation skills lead in statement</li><li>• licensing statement</li><li>• modification history to reflect 2012 standards</li></ul> Equivalent outcome.                               |
| Release 1 | This version was released in <i>CHC Community Services Training Package release 1.0</i> and meets the requirements of the 2012 Standards for Training Packages.<br><br>Significant changes to elements and performance criteria.<br><br>New evidence requirements for assessment. |

## Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be demonstrated evidence that the candidate has completed the following tasks at least once:

- collected, analysed and reviewed relevant evidence and a range of programs to determine the need for a specific program
- prepared at least one program plan, including:
  - outlining activities and actions
  - determining operational arrangements for calculating costs, space and resources
  - assessing feasibility
  - developing implementation and evaluation strategies
- supported the implementation of at least one program in a variety of contexts, adapting program to the changing needs of participants and evaluating outcomes, including:
  - using evaluation techniques and reporting outcomes to clients and stakeholders in an accessible format.

## Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively do the task outlined in elements and performance criteria of this unit, manage the task and manage contingencies in the context of the identified work role.

These include knowledge of:

- target groups relevant to the worker and the program
- a range of relevant youth activities and programs
- legal and safety requirements as they relate to activities and programs
- techniques of evaluation
- relevant funding sources
- organisational standards, policies and procedures
- techniques for writing complete and accurate reports.

## Assessment Conditions

Skills must be demonstrated in the workplace.

In addition, simulations and scenarios must be used where the full range of contexts and situations cannot be provided in the workplace or may occur only rarely. These are situations relating to emergency or unplanned procedures where assessment in these circumstances would be unsafe or is impractical.

Simulated assessment environments must simulate the real-life working environment where these skills and knowledge would be performed, with all the relevant equipment and resources of that working environment.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

# CPCMCM8001 Plan and manage complex projects

## Modification History

Release 1.

This version first released with CPC Construction, Plumbing and Services Training Package Version 1.

Replaces superseded equivalent CPCMCM7001A Plan and manage complex projects.

## Application

This unit of competency specifies the outcomes required to identify, plan, control and finalise complex projects.

The unit addresses the management of projects of significant scope and duration, for example developing and implementing a major new program or service, or constructing or designing a significant new piece of infrastructure.

The environment in which the project is managed is also complex and involves managing a project team which typically includes staff with diverse skill sets. Managing complex projects also involves significant reporting requirements.

This unit supports the attainment of skills and knowledge required for competent workplace performance in organisations of all sizes. It will support senior managers in all sectors of the construction industry who must exercise the skills needed to ensure projects are planned and managed effectively in order to deliver the required outcomes on time and within budget.

The unit may be contextualised to suit the strategic context in which the unit is applied, which may be across all sectors in the construction industry provided the essential outcomes of the unit are not changed.

No licensing, legislative, accreditation, regulatory or certification requirements apply to this unit at the time of endorsement.

## Pre-requisite Unit

Nil

## Competency Field

Management

## Unit Sector

Common

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.

- |                                                                                   |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |
|-----------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1. Identify strategic and operational needs of the project during planning phase. | 1.1. Project's strategic context and operational requirements are identified and analysed.<br>1.2. Organisation's strategic and business plans and their output requirements are identified and analysed.<br>1.3. Client requirements and impact of <b><i>legislation and industry codes and standards</i></b> are identified and fully explored.<br>1.4. <b><i>Risk management analysis</i></b> is conducted and risk management plan is developed and documented.                                                                                                                                      |
| 2. Prepare project plan.                                                          | 2.1. Precise <b><i>specifications and terms of reference</i></b> for the project are defined and documented.<br>2.2. Project budget is developed, specified to a level that can be used for managing sub-tasks, and documented.<br>2.3. Skills needed for successful completion of project are defined.<br>2.4. Physical and other resources required to support project are defined and documented and processes to secure them are commenced.<br>2.5. Timelines, schedules and critical path for the project are developed and documented, taking into consideration contingencies and time slippages. |

- 2.6. Reporting and communication strategy or process is defined and documented.
- 3. Assemble project team and commence work.
  - 3.1. Appropriate project team members are secured and briefed regarding the project, their roles, levels of delegated responsibility, and outcomes to be achieved.
  - 3.2. Communication processes are put in place to coordinate work and inform team members of progress.
  - 3.3. Clear reporting processes for team members are communicated.
- 4. Manage project.
  - 4.1. Project progress is monitored according to project plan requirements, using appropriate **project management tools** and methodologies.
  - 4.2. Team members are supported and their output is managed against key performance indicators identified in project plan.
  - 4.3. Corrections, changes and additions are made to project plan in light of changing circumstances to ensure project aims and outcomes are met.
  - 4.4. Resourcing to support project is monitored and corrections are made to reflect changing circumstances.
  - 4.5. Reporting of overall project progress is made to senior management or client as required and in line with project plan.
- 5. Finalise project.
  - 5.1. Required handover to staff members responsible for ongoing implementation or maintenance of project products or services is conducted efficiently, effectively and in line with organisational procedures.
  - 5.2. Project team members and relevant stakeholders are debriefed about conduct of project and outcomes achieved.
  - 5.3. Report is prepared analysing strengths and weaknesses of project plan and conduct of project.

- |                                             |                                                                                                                      |
|---------------------------------------------|----------------------------------------------------------------------------------------------------------------------|
| 6. Use project to improve future processes. | 6.1. Learning outcomes are identified and analysed to inform future complex projects.                                |
|                                             | 6.2. Strategic impact of project is considered and fed into the organisation's ongoing strategic planning processes. |

## Foundation Skills

This section describes core skills that are essential to performance and not explicit in the performance criteria. Employment skills essential to performance are explicit in the performance criteria of this unit of competency.

| Skill                         | Performance feature                                                                                                                                                                                                                                                                                                                                                                                                 |
|-------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Learning skills to:           | <ul style="list-style-type: none"><li>engage in processes designed to research and update own knowledge of products, software systems and technology used in managing complex projects</li><li>reflect on and critically analyse experiences of planning and managing complex projects to determine training and development required to improve future performance of self, others and the organisation.</li></ul> |
| Numeracy skills to:           | <ul style="list-style-type: none"><li>represent and monitor projected resource costs in the form of budgets over the life of a complex project</li><li>estimate, monitor and manage the allocation of own time on project tasks and supervise the use of others' time to allocated project tasks.</li></ul>                                                                                                         |
| Oral communication skills to: | <ul style="list-style-type: none"><li>liaise with clients and other stakeholders on project progress using appropriate vocabulary and technical terminology.</li></ul>                                                                                                                                                                                                                                              |
| Reading skills to:            | <ul style="list-style-type: none"><li>interpret and engage in analysis of documentation, including legislation, drawings, plans and specifications.</li></ul>                                                                                                                                                                                                                                                       |
| Writing skills to:            | <ul style="list-style-type: none"><li>organise and present data in reports and strategy documents that respond to complex project requirements and include project plans and communication strategies involving analysis and recommendations.</li></ul>                                                                                                                                                             |

## Range of Conditions

This section specifies work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Bold italicised wording, if used in the performance criteria, is detailed below.

***Legislation and industry codes and standards*** must include:

- Australian and international standards applicable to the project
- building Acts and regulations
- infrastructure supply regulations
- National Construction Code.

***Risk management analysis*** must include:

- analysing potential for workers' compensation claims
- assessing public liability requirements
- establishing or confirming business continuity plans
- considering changing government policy or funding arrangements
- identifying environmental obligations
- identifying and mitigating work health and safety risks
- identifying property development and maintenance requirements.

***Specifications and terms of reference*** must include:

- defining project aims
- describing outcomes to be achieved using clear metrics
- describing all stakeholders
- describing project parameters and scope of operations.

***Project management tools*** must include:

- critical path analysis
- Gantt or PERT charts or other industry-accepted project management tools
- in-house or proprietary software
- scheduling and reporting templates.

## Unit Mapping Information

CPCMCM7001A Plan and manage complex projects

## Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=7e15fa6a-68b8-4097-b099-030a5569b1ad>

# Assessment Requirements for CPCMCM8001 Plan and manage complex projects

## Modification History

Release 1.

This version first released with CPC Construction, Plumbing and Services Training Package Version 1.

Replaces superseded equivalent CPCMCM7001A Plan and manage complex projects.

## Performance Evidence

A person demonstrating competency in this unit must satisfy all of the elements, performance criteria and foundation skills of this unit. The person must successfully design, implement, manage and finalise two complex projects.

For each project, the person must produce a detailed project plan outlining a process and methodology for the planning, scheduling and sourcing of human and other resources. Each plan must also:

- specify how the project team members will be resourced, assembled and briefed on roles, responsibilities and deliverables
- outline processes for managing and communicating with a team of diverse skills and roles, including:
  - architects
  - lead contractors
  - mechanical engineers
  - hydraulic engineers
  - electrical engineers
- specify a process for project reporting that details frequency and format of reports
- ensure the project aligns to and supports organisational strategies and requirements.

For each project, the person must identify:

- at least one key learning outcome from the project
- where this learning could refine and improve future complex project management processes.

## Knowledge Evidence

A person demonstrating competency in this unit must be able to demonstrate knowledge of:

- processes and practices involved in developing budgets
- principles of team leadership and human resource management relating to managing others working on a complex project
- processes involved in risk management, risk analysis and planning
- legislation, codes and standards relevant to the specific project:
  - Australian standards
  - building Acts and regulations
  - infrastructure supply regulations
  - international standards
  - the National Construction Code
- reporting mechanisms relevant to updating and informing clients and other stakeholders of project progress
- roles and responsibilities of relevant building project personnel
- sustainability requirements relevant to the project:
  - energy conservation
  - water conservation
- tools and models of project management used in managing complex construction projects.

## Assessment Conditions

Assessment must be conducted in the workplace or a close simulation of the workplace.

Suitable assessment of performance would require:

- equipment:
  - computer with internet and email access
  - proprietary software with spreadsheet and word processing functionality and project management capabilities
- materials:
  - current legislation, codes and standards relevant to the specific project and the jurisdiction in which the project work is taking place, including:
    - building Acts and regulations
    - infrastructure supply regulations
    - Australian standards
    - international standards
  - project documentation, including design or project briefs, drawings, specifications, construction schedules and other supporting documents
  - research resources, including product information and data.

## Assessor requirements

Assessors must satisfy the assessor requirements in the Standards for Registered Training Organisations (RTOs) current at the time of assessment.

## Links

Companion Volume implementation guides are found in VETNet -  
<https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=7e15fa6a-68b8-4097-b099-030a5569b1ad>

# CPPSEC3028A Compile investigative report

## Modification History

Not Applicable

## Unit Descriptor

**Unit descriptor** This unit of competency specifies the outcomes required to organise and present information gathered by surveillance or factual investigation. It requires the ability to organise and evaluate gathered information and data and prepare and present reports and attachments in a format suitable for review and dissemination.

This unit may form part of the licensing requirements for persons engaged in investigative work in those states and territories where these are regulated activities.

## Application of the Unit

**Application of the unit** This unit of competency has application in a range of work roles in investigative services. Work is performed under limited supervision and competency requires some judgement and decision-making. The knowledge and skills described in this unit are to be applied within relevant legislative guidelines.

## Licensing/Regulatory Information

Refer to Unit Descriptor

## Pre-Requisites

Not Applicable

## Employability Skills Information

**Employability skills** This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency. Performance criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the required skills and knowledge section and/or the range statement. Assessment of performance is to be consistent with the evidence guide.

## Elements and Performance Criteria

| ELEMENT                                | PERFORMANCE CRITERIA                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |
|----------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>1 Organise information.</b>         | <p>1.1 Investigative information is obtained within the specified time and budget constraints in accordance with client and <b><i>legislative requirements</i></b>.</p> <p>1.2 Information is assessed for relevance and accuracy and is consistent with client terms of reference, reporting and legislative requirements.</p> <p>1.3 Investigative <b><i>information</i></b> is gathered, prioritised and organised with regard to continuity of evidence in accordance with <b><i>assignment instructions</i></b>.</p>           |
| <b>2 Compile investigative report.</b> | <p>2.1 Report is prepared presenting all relevant facts and observations from <b><i>investigation</i></b> in an appropriate <b><i>format</i></b> according to client requirements.</p> <p>2.2 Content is reviewed and additional information relating to the investigation is sought as required.</p> <p>2.3 Content uses clear and concise language is supported by information gathered and verifiable evidence.</p> <p>2.4 <b><i>Attachments</i></b> are relevant and consistent with references made in body of the report.</p> |
| <b>3 Complete report.</b>              | <p>3.1 Report printing and collation is negotiated and organised to meet identified timelines.</p> <p>3.2 Report including all attachments is forwarded safely and securely to <b><i>relevant persons</i></b> in accordance with legislative guidelines.</p>                                                                                                                                                                                                                                                                        |

**ELEMENT****PERFORMANCE CRITERIA**

3.3 **Feedback** is sought and any areas of client dissatisfaction promptly rectified.

3.4 All information relating to the investigation is safely and securely maintained in accordance with client confidentiality and legislative requirements.

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge and their level required for this unit.

#### Required skills

- basic analysis
- complete workplace documentation and reports
- evaluate diverse or conflicting pieces of information
- identify and access relevant information from reliable sources
- information technology
- literacy skills to understand and communicate information (reading, writing, speaking, numeracy and listening)
- make discretionary decisions
- numeracy skills to estimate time to complete work tasks and resource requirements
- personal skills to relate to people from a range of social, cultural and ethnic backgrounds and varying physical and mental abilities
- prioritise work tasks and complete activities within designated timeframes
- problem solving and negotiation
- questioning to check understanding
- research
- verify information for accuracy and relevance.

#### Required knowledge

- basic investigation techniques
- how to safeguard confidential information
- how to use business equipment to present information
- information gathering methods and techniques
- information management systems and methods
- legal and ethical obligations with regard to the gathering and distribution of information
- legislative requirements applicable to the conduct and reporting of investigations
- methods to ensure validity and reliability of gathered information

## REQUIRED SKILLS AND KNOWLEDGE

- Occupational Health and Safety (OHS) requirements
- operational principles and capabilities of investigative equipment
- reliable sources of information
- requirements for the presentation of investigative information
- standards and procedures for client service.

## Evidence Guide

### EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

#### **Critical aspects for assessment and evidence required to demonstrate competency in this unit**

A person who demonstrates competency in this unit must be able to provide evidence of:

- gathering and organising relevant and accurate investigative information in a logical manner within specified time and budgetary constraints
- compiling and reviewing report content to identify any gaps pertaining to the investigation and ensuring accuracy and relevance to client requirements
- seeking and using client feedback to improve investigative report
- safely and securely maintaining investigative information with due regard to client confidentiality and privacy.

#### **Context of and specific resources for assessment**

Context of assessment includes:

- a setting in the workplace or environment that simulates the conditions of performance described in the elements, performance criteria and range statement.

Resource implications for assessment include:

- access to a registered provider of assessment services
- access to a suitable venue and equipment
- access to plain English version of relevant statutes and procedures
- assessment instruments including personal planner and assessment record book
- work schedules, organisational policies and duty statements.

Reasonable adjustments must be made to assessment processes

where required for people with disabilities. This could include access to modified equipment and other physical resources, and the provision of appropriate assessment support.

**Method of assessment** This unit of competency should be assessed using questioning of underpinning knowledge and skills.

**Guidance information for assessment** Assessment processes and techniques must be culturally appropriate and suitable to the language, literacy and numeracy capacity of the candidate and the competency being assessed. In all cases where practical assessment is used, it should be combined with targeted questioning to assess the underpinning knowledge.

Oral questioning and written assessment should be used to assess underpinning knowledge.

Supplementary evidence may be obtained from relevant authenticated correspondence from existing supervisors, team leaders or specialist training staff.

## Range Statement

### RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

***Legislative requirements may relate to:***

- applicable commonwealth, state and territory legislation which affects investigative work such as:
  - workplace safety
  - environmental issues
  - equal employment opportunity
  - industrial relations
  - anti-discrimination and diversity
- Australian standards and quality assurance
- authority to conduct investigation
- award and enterprise agreements
- evidence collection
- freedom of information
- licensing arrangements and certification requirements

- Information may include:***
- privacy requirements
  - relevant industry codes of practice
  - restrictions on the use of recording devices
  - surveillance and listening devices.
  - acceptable modes of enquiry
  - cost schedules
  - deliverables
  - investigative limitations and exclusions
  - maps, plans or schematics
  - photographs
  - sources of information and contact requirements
  - summary of case history
  - terms of reference
  - timeframes.
- Assignment instructions may include:***
- assignment tasks and procedures
  - assignment timeframe
  - client information
  - investigation purpose and objective
  - methods of investigation
  - reporting and documentation requirements and timeframes
  - resource and equipment allocations.
- Investigation may be:***
- factual
  - surveillance.
- Format may relate to:***
- enclosures
  - hardcopy or electronic format
  - length
  - sequence of content
  - style
  - use of abbreviations
  - use of appendices
  - use of common industry terminology
  - use of plain English.
- Attachments may include:***
- background documents
  - notes
  - photographs
  - physical evidence
  - plans
  - recordings
  - sketches
  - statements

- Relevant persons may include:**
- videos.
  - supervisor
  - client
  - police
  - colleagues.
- Feedback may be sought from:**
- client feedback questionnaire
  - comments from supervisor, colleagues or client
  - formal or informal performance appraisals
  - personal, reflective behaviour strategies
  - workplace assessment.

# CPPSIS3011 Produce basic maps

## Modification History

Release 1.

Replaces superseded equivalent CPPSIS3011A Apply map presentation principles.

This version first released with CPP Property Services Training Package Version 3.

## Application

This unit of competency specifies the outcomes required to use mapping software, such as geographic information system (GIS) functionality, to produce a basic map. The unit covers activities to prepare and process basic spatial data and produce a basic map, which includes simple marginal information and content, to meet task specifications.

The unit supports those who work under supervision in a surveying and spatial information services team, in areas such as surveying, cartography, mapping, town planning and GIS.

No licensing, legislative, regulatory, or certification requirements apply to this unit of competency at the time of endorsement.

## Pre-requisite Unit

Nil

## Unit Sector

Surveying and spatial information services

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.

- |                                 |                                                                                             |
|---------------------------------|---------------------------------------------------------------------------------------------|
| 1. Prepare to create basic map. | 1.1. <b><i>Task requirements</i></b> are clarified with <b><i>appropriate persons</i></b> . |

| 2. | Compile map content.           | 2.1. Map marginal information and content are prepared according to task specifications.               |
|    | 2.2.                           | Spatial data is processed to prepare map content according to task specifications.                     |
| 3. | Finalise basic map production. | 3.1. Map is produced in required format and content according to task requirements.                    |
|    | 3.2.                           | Map content and format are checked against task requirements in consultation with appropriate persons. |
|    | 3.3.                           | Map is finalised and documentation completed according to organisational requirements.                 |

## Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria.

### Performance feature

#### Skill

Numeracy skills to:

- apply datums and projections to map
- read data attributes and numerical data.

Oral communication skills to:

- ask questions to clarify task requirements.

Reading skills to:

- interpret instructions in standard operating procedures
- interpret spatial data, software menus and messages.

Writing skills to:

- label marginal information and map content.

Technology skills to:

- use mapping functions of basic software to format maps that meet task specifications.

## Range of Conditions

This section specifies work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Bold italicised wording, if used in the performance criteria, is detailed below.

***Task requirements must include:***

- coordinate system
- format of map
- map content
- marginal information
- spatial data to be used
- type of map.

***Appropriate persons*** must include at least one of the following:

- experienced colleague
- supervisor or line manager.

## Unit Mapping Information

CPPSIS3011A Apply map presentation principles

# Assessment Requirements for CPPSIS3011 Produce basic maps

## Modification History

Release 1.

Replaces superseded equivalent CPPSIS3011A Apply map presentation principles.

This version first released with CPP Property Services Training Package Version 3.

## Performance Evidence

A person demonstrating competency in this unit must satisfy the requirements of the elements, performance criteria, foundation skills and range of conditions of this unit. The person must also use suitable software to produce two basic maps containing the following:

- two man-made features and two natural features and their symbology depicting data by points, lines and polygons
- data that has been geoprocessed from retrieved spatial data
- simple marginal information, including:
  - data sources
  - georeferencing system
  - legend
  - north point
  - scale.

While producing the above basic maps, the person must:

- communicate clearly when clarifying work tasks
- comply with organisational requirements regarding health and safety and completing records and documentation
- use a computer, printer and required ancillary hardware
- use basic software mapping functions to:
  - apply scale
  - change data appearance
  - change symbology
  - import simple point, line and areal data
  - label features
  - pan zoom
  - perform simple thematic mapping

- symbolise features by attributes.

## Knowledge Evidence

A person demonstrating competency in this unit must demonstrate knowledge of:

- functions of mapping software suitable for making basic maps
- key geographic feature types and how they are portrayed in mapping software, including using points, lines and polygons
- key features of coordinate systems, datums and projections
- common types of maps used for surveying and spatial information services
- organisational policies and guidelines relating to basic map production
- typical scales used on different types of maps
- typical spatial referencing systems used on different types of maps
- typical symbology used on different types of maps.

## Assessment Conditions

The following must be present and available to learners during assessment activities:

- equipment:
  - computers and software relevant to basic map production
- specifications:
  - work task specifications
  - organisational policies, procedures and documentation relating to work health and safety when using screen-based equipment
- physical conditions:
  - access to equipped work station
- relationships with team members and supervisor:
  - working under supervision.

Timeframe:

- as specified by task and organisational requirements.

## Assessor requirements

As a minimum, assessors must satisfy the assessor requirements in the Standards for Registered Training Organisations (RTOs) current at the time of assessment.

## Links

Companion Volume implementation guides are found in VETNet -

<https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# **CPPSIS3015 Collect basic surveying data**

## **Modification History**

Release 1.

This version first released with CPP Property Services Training Package Version 3.

Replaces superseded non-equivalent CPPSIS3015A Collect spatial data.

## **Application**

This unit of competency specifies the outcomes required to collect basic surveying data using measurements taken in the field. Basic surveying data refers to measurements of distances, angles and height difference with accuracy of one centimetre or better. The unit covers preparing for data collection by clarifying the data collection tasks and equipment to be used, and identifying and reporting hazards. The unit also covers operating equipment to take basic surveying measurements, and performing required data reductions and computations to ensure the accuracy of collected data before leaving the field. It requires the ability to follow standard operating procedures for setting up, using, checking and storing equipment; and completing records and documentation.

The unit supports those who work under supervision in a surveying and spatial information services team, in positions relating to field data collection.

No licensing, legislative, regulatory, or certification requirements apply to this unit of competency at the time of endorsement.

## **Pre-requisite Unit**

Nil

## **Unit Sector**

Surveying and spatial information services

## **Elements and Performance Criteria**

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of

conditions.

## Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria.

### Skill

### Performance feature

Numeracy skills to:

- perform mathematical reductions.

- Oral communication skills to:
- ask questions to clarify task requirements and equipment selection.
- Reading skills to:
- locate specific information in forms and standard operating procedures required for using equipment and recording collected data.
- Writing skills to:
- record clear and accurate measurements, computations, and field checks.

## Range of Conditions

This section specifies work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Bold italicised wording, if used in the performance criteria, is detailed below.

- Appropriate persons*** must include at least one of the following:
- experienced colleague
  - site personnel
  - supervisor or line manager.

## Unit Mapping Information

No equivalent unit

## Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# Assessment Requirements for CPPSIS3015 Collect basic surveying data

## Modification History

Release 1.

This version first released with CPP Property Services Training Package Version 3.

Replaces superseded non-equivalent CPPSIS3015A Collect spatial data.

## Performance Evidence

A person demonstrating competency in this unit must satisfy the requirements of the elements, performance criteria, foundation skills and range of conditions of this unit. The person must also accurately record basic surveying data for two field projects, including data relating to the position of geographic features and their attributes, including angles, distances and height.

During the above projects, the person must collect the basic surveying data using two of the following pieces of equipment:

- automatic, digital or laser level
- electromagnetic recording equipment
- global positioning system (GPS) for:
  - determining point position
  - navigating and recording a traverse
  - collecting designated attributes for designated features
- ground penetrating radar
- total station.

In addition, while collecting basic surveying data, the person must use two of the following:

- digital or hard copy maps and images
- distance measuring
- measuring bearings or angles
- measuring vertical angles or slopes.

During the above projects, the person must also:

- communicate clearly with others to clarify work tasks and equipment selection

- comply with organisational, legislative and manufacturer requirements to work safely and use personal protective equipment (PPE)
- comply with relevant safe work method statements (SWMS)
- follow manufacturer specifications and standard operating procedures to correctly set up, operate, pack up, and store tools and equipment
- use organisational and industry procedures and proformas to accurately collect and record measurements and data.

## Knowledge Evidence

A person demonstrating competency in this unit must demonstrate knowledge of:

- accepted organisational standards for recording surveying metadata
- attributes associated with a dataset
- organisational and industry policies and procedures relating to collecting, recording and storing surveying data
- organisational and industry procedures relating to work tasks specified in the performance evidence, including equipment use
- spatial data collection procedures for equipment used, as specified in the performance evidence
- work health and safety procedures relating to data collection activities.

## Assessment Conditions

The following must be present and available to learners during assessment activities:

- equipment:
  - as specified in the performance evidence
- specifications:
  - standard operating procedures and documentation relating to data collection tasks
- relationships with team members and supervisor:
  - working under supervision.

Timeframe:

- as specified by task and organisational requirements.

## Assessor requirements

As a minimum, assessors must satisfy the assessor requirements in the Standards for Registered Training Organisations (RTOs) current at the time of assessment.

# **CPPSIS4026 Digitally enhance and process image data**

## **Modification History**

Release 1.

Replaces superseded non-equivalent CPPSIS4026A Read and interpret image data.

This version first released with CPP Property Services Training Package Version 3.

## **Application**

This unit of competency specifies the outcomes required to enhance and process image data using digital techniques. The unit covers using remote sensing software to manipulate, enhance, classify and process data to reveal geographic patterns and relationships and improve resolution. Image data can be digital, multispectral scanner, or radar. Platforms can be aircraft, unmanned aerial vehicles or satellites at low to high altitudes. The unit requires assessing the survey area and project specifications to determine the types and possible sources of image data to meet requirements.

The unit supports those who work in a spatial information services team in support positions, such as image analyst, geographic information system (GIS) analyst, GIS officer, or cartographer.

No licensing, legislative, regulatory, or certification requirements apply to this unit of competency at the time of endorsement.

## **Pre-requisite Unit**

Nil

## **Unit Sector**

Surveying and spatial information services

## **Elements and Performance Criteria**

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of

conditions.

## Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria.

### Skill

### Performance feature

Learning skills to: • conduct research to identify image data sources.

Numeracy skills to: • calculate scale of image data

- solve problems relating to area, height, depth, dimension, direction and position in actual operational activity and virtual representation.
- Oral communication skills to:
- ask questions to clarify data image requirements.
- Reading skills to:
- interpret graphical and technical information, including shapes and patterns within digital images.
- Writing skills to:
- record clear and accurate measurements and computations.
- Technology skills to:
- use a computer and software to manipulate and enhance image resolution.

## Range of Conditions

This section specifies work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Bold italicised wording, if used in the performance criteria, is detailed below.

- Appropriate persons*** must include at least one of the following:
- client
  - experienced colleague
  - supervisor or line manager.

## Unit Mapping Information

No equivalent unit.

## Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# Assessment Requirements for CPPSIS4026 Digitally enhance and process image data

## Modification History

Release 1.

Replaces superseded non-equivalent CPPSIS4026A Read and interpret image data.

This version first released with CPP Property Services Training Package Version 3.

## Performance Evidence

A person demonstrating competency in this unit must satisfy the requirements of the elements, performance criteria, foundation skills and range of conditions of this unit. The person must also use remote sensing applications to digitally enhance, process and classify two of the following types of image data for two different projects:

- digital aerial photographs
- digital terrestrial images
- images from an unmanned aerial vehicle
- light detection and ranging (LiDAR)
- satellite images.

One of the above projects must have a built environment focus, and the other a natural environment focus.

While digitally enhancing and processing the above image data, the person must:

- analyse project specifications to clarify types of image data required and to identify possible sources of suitable image data
- apply ground controls to aerial photographs
- calculate information in digital and hard copy image data to measure and identify scale
- communicate clearly with others to clarify and discuss work tasks
- comply with industry-accepted standards for processing remotely sensed data
- comply with legislative and organisational requirements relating to data privacy and information copyright
- comply with organisational requirements relating to health and safety when using screen-based equipment, and completing records and documentation
- georeference images
- identify and resolve constraints and problems relating to image data
- identify ground controls, including targets for horizontal and vertical control

- use software applications to access, analyse and enhance image data.

## Knowledge Evidence

A person demonstrating competency in this unit must demonstrate knowledge of:

- basic properties and characteristics of image data used in spatial applications
- key features of spectral signatures, discriminant functions, supervised and unsupervised clustering, and ground trothing
- organisational policies and guidelines relating to equipment use, health and safety, and accessing and formatting image data and copyright
- photogrammetric control requirements relating to three-dimensional (3-D) model image data
- possible sources of image data
- set-out and format requirements for image data
- techniques for enhancing image resolution, including basic interpolation.

## Assessment Conditions

The following must be present and available to learners during assessment activities:

- equipment:
  - computer and software with image enhancement functionality
- specifications:
  - task specifications
  - organisational policies and procedures relating to:
    - work health and safety
    - data privacy and information copyright
- physical conditions:
  - access to equipped workstation
- relationships with team members and supervisor:
  - working in a team.

Timeframe:

- as specified by project requirements.

## Assessor requirements

As a minimum, assessors must satisfy the assessor requirements in the Standards for Registered Training Organisations (RTOs) current at the time of assessment.

# **CPPSIS4035 Apply GIS software to solve spatial data problems**

## **Modification History**

Release 1.

Replaces superseded equivalent CPPSIS4035A Apply GIS software to problem-solving techniques.

This version first released with CPP Property Services Training Package Version 3.

## **Application**

This unit of competency specifies the outcomes required to use geographic information system (GIS) software applications to integrate data and solve spatial data problems. The unit covers setting up hardware and GIS software applications and using features, such as spatial overlay techniques, to solve problems and test and validate the cartographic integrity of data. The unit also covers producing reports based on analysing basic spatial data and archiving the data. The unit requires the ability to use entity and attribute queries to generate results for presenting spatial data, and using univariate statistics to explore datasets.

The unit supports those who work in support positions in a spatial information services team in areas such as field work coordination, data collection and administration.

No licensing, legislative, regulatory, or certification requirements apply to this unit of competency at the time of endorsement.

## **Pre-requisite Unit**

Nil

## **Unit Sector**

Surveying and spatial information services

## **Elements and Performance Criteria**

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of

conditions.

1. Query spatial data.
  - 1.1. Task requirements are clarified with ***appropriate persons***.
  - 1.2. GIS software and equipment are set up and checked to ensure correct operation and functionality.
  - 1.3. Spatial datasets are accessed, interpreted and manipulated to ensure they are in acceptable format to meet task requirements.
  - 1.4. Entities and attributes are used to display spatial information, and entity and attribute queries are used to generate summary results.
  - 1.5. Query results are used to present spatial data graphically according to organisational requirements.
  - 1.6. Entity and attribute queries are applied when using univariate statistics to explore the dataset.
  - 1.7. Routine spatial data problems or irregularities are identified and resolved in consultation with appropriate persons.
2. Solve spatial data problems.
  - 2.1. Existing spatial and aspatial data is adjusted to integrate with new data according to organisational requirements.
  - 2.2. Spatial techniques and tools are used to combine spatial layers data to solve problems, highlight selected features, and improve visual aspects.
  - 2.3. Spatial overlay techniques are used to solve problems and generate results relating to spatial task in consultation with appropriate persons.
  - 2.4. Cartographic integrity is tested and validated to solve accuracy and quality problems.
3. Produce reports based on basic spatial data analysis.
  - 3.1. Map or plans are integrated into reports according to task requirements.
  - 3.2. Results, summary statistics and graphs from mapping application are incorporated into reports according to organisational requirements.

4. Archive data.
  - 4.1. Spatial dataset to be archived is checked for completeness and manipulated where necessary, according to organisational requirements.
  - 4.2. **Metadata** is created according to organisational requirements.
  - 4.3. Archived spatial data is stored in a secure location, and details are recorded according to organisational requirements.

## Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria.

Problem-solving skills to:

- identify errors by cross-referencing validation results.

## Range of Conditions

This section specifies work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Bold italicised wording, if used in the performance criteria, is detailed below.

***Appropriate persons*** must include at least two of the following:

- colleague
- end user
- supervisor or line manager
- supplier.

***Metadata*** must include at least four of the following:

- availability
- conditions of use
- coordinate system
- currency
- custodian
- data accuracy
- data description
- date of acquisition
- licence
- quality
- source
- spatial data acquisition methodologies
- version control.

# Assessment Requirements for CPPSIS4035 Apply GIS software to solve spatial data problems

## Modification History

Release 1.

Replaces superseded equivalent CPPSIS4035A Apply GIS software to problem-solving techniques.

This version first released with CPP Property Services Training Package Version 3.

## Performance Evidence

A person demonstrating competency in this unit must satisfy the requirements of the elements, performance criteria, foundation skills and range of conditions of this unit. The person must also use geographic information system (GIS) software applications to integrate data and solve spatial data problems for two different tasks.

While undertaking the above tasks, the person must:

- combine spatial layers data, including:
  - raster, including aerial and terrestrial photography and satellite imagery in digital format
  - vector overlay
- comply with organisational requirements for documentation and reporting relating to:
  - audit trails
  - naming standards
  - templates
  - version control
- comply with organisational requirements to work safely when using the equipment specified in the assessment conditions
- comply with legal and ethical requirements for producing reports based on spatial data analysis
- display spatial information using entities and attributes, including:
  - arcs
  - circles
  - colour
  - hatch
  - layer
  - level

- lines, including type and width
- symbology
- text
- manage and manipulate a range of spatial data, including:
  - digital
  - hard copy
  - image
  - text
  - raster
  - vector
- operate a range of GIS software to perform entity and attribute queries and explore datasets
- use geospatial techniques, including:
  - buffer
  - clip
  - dissolve
  - intersect
  - merge union
  - overlay.

## Knowledge Evidence

A person demonstrating competency in this unit must demonstrate knowledge of:

- legal requirements for accessing, manipulating, reporting and archiving digital and hard copy spatial data, including data privacy and information copyright
- methods for using univariate statistics and charting, including:
  - arithmetic mean, median and mode
  - histograms that illustrate the concepts of normal and other distributions
  - maximum and minimum
  - range
  - standard deviation
  - variance
- methods for validating test results to identify systematic distortions in accuracy of information
- printing and image formats for map production
- querying and browsing techniques for obtaining information from databases and solving problems
- spatial data storage technology
- spatial overlay techniques
- key features of spatial reference systems.

## Assessment Conditions

The following must be present and available to learners during assessment activities:

- equipment:
  - computer with access to GIS software applications
  - printer and other hardware necessary for work tasks
- specifications:
  - organisational policies and procedures relating to:
    - work health and safety
    - data privacy and information copyright
- physical conditions:
  - access to equipped work station
- relationships with team members and supervisor:
  - working in a team.

Timeframe:

- as specified by task and organisational requirements.

### Assessor requirements

As a minimum, assessors must satisfy the assessor requirements in the Standards for Registered Training Organisations (RTOs) current at the time of assessment.

# DEFFOR005 Compile and submit electronic media forensic documentation

## Modification History

| Release | Comments                                                                                                          |
|---------|-------------------------------------------------------------------------------------------------------------------|
| 1       | This unit was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages. |

## Application

This unit describes the skills required to compile and submit documentation relating to electronic forensic investigation. It includes completing forms, compiling reports and returns, compiling statements, affidavits and statutory declarations, compiling statements of evidence, compiling exhibit registers and logs, and completing the day-to-day paperwork required in the area of electronic forensics.

This unit applies to those working in the gathering and analysis of electronic information.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to, particularly those relating to WHS and the completion and submission of documentation relating to electronic forensic investigations.

Those undertaking this unit would work independently or as part of a team, under indirect supervision, while performing routine tasks in a range of contexts. They must be able to use discretion and judgement and take responsibility for the quality of their outputs.

No licensing, legislative or certification requirements apply to unit at the time of publication.

## Competency Field

Electronic Forensics

## Elements and Performance Criteria

| ELEMENTS                                 | PERFORMANCE CRITERIA                                                                                                                                                                                                                                             |
|------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Elements describe the essential outcomes | Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.                                                          |
| <b>1. Maintain documentation</b>         | 1.1 Compile and maintain accurate, complete, legible and comprehensible documentation including notes, and associated records relating to cases/jobs/tasks.<br>1.2 Ensure appropriate handling of documentation to the security level of the document concerned. |
| <b>2. Handle documentation</b>           | 2.1 Submit documentation such as notes, reports and associated records.<br>2.2 Store/archive notes and associated records at the conclusion of proceedings.                                                                                                      |

## Foundation Skills

The foundation skills demands of this unit have been mapped for alignment with the Australian Core Skills Framework (ACSF). The following tables outline the performance levels indicated for successful attainment of the unit.

ACSF levels indicative of performance:

|          |   |   |   |   |         |   |   |   |   |         |   |   |   |   |                    |   |   |   |   |              |   |   |   |   |
|----------|---|---|---|---|---------|---|---|---|---|---------|---|---|---|---|--------------------|---|---|---|---|--------------|---|---|---|---|
| 1        | 2 | 3 | 4 | 5 | 1       | 2 | 3 | 4 | 5 | 1       | 2 | 3 | 4 | 5 | 1                  | 2 | 3 | 4 | 5 | 1            | 2 | 3 | 4 | 5 |
| Learning |   |   |   |   | Reading |   |   |   |   | Writing |   |   |   |   | Oral communication |   |   |   |   | Numeracy N/A |   |   |   |   |

Performance variables

|         |   |   |   |   |         |   |   |   |   |                 |   |   |   |   |                 |   |   |   |   |
|---------|---|---|---|---|---------|---|---|---|---|-----------------|---|---|---|---|-----------------|---|---|---|---|
| 1       | 2 | 3 | 4 | 5 | 1       | 2 | 3 | 4 | 5 | 1               | 2 | 3 | 4 | 5 | 1               | 2 | 3 | 4 | 5 |
| Support |   |   |   |   | Context |   |   |   |   | Text complexity |   |   |   |   | Task complexity |   |   |   |   |

Further information on ACSF and the foundation skills underpinning this unit can be found in the Foundation Skills Guide on the GSA website.

## Unit Mapping Information

# Assessment Requirements for DEFFOR005 Compile and submit electronic media forensic documentation

## Modification History

| Release | Comments                                                                                                                              |
|---------|---------------------------------------------------------------------------------------------------------------------------------------|
| 1       | These Assessment Requirements were released in DEF Defence Training Package release 1.0 and meet the Standards for Training Packages. |

## Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- preparing, completing and submitting statements, reports, task files, logs and other forensic documentation including at least two of:
  - handwritten notes
  - forensic reports
  - legal reports
  - sketch plans
  - photographs
  - scale plans
  - video/audio tapes
  - digital voice records
  - task logs
  - witness statements
  - external reports
  - exhibit registers
  - exhibit logs
  - photocopies of published research/supporting materials
  - database and case management system entries
  - reports, including statements, statutory declarations and affidavits
- preparing exhibits including at least two of:
  - sketch and scale plans
  - photographs
  - digital voice records
  - task logs

- reports
- photocopies of published research/supporting materials
- database and case management system entries
- information technology skills
- organisational skills
- gathering, recording, collating, analysing and re-evaluating techniques
- maximising the potential evidentiary value of the electronic media forensic documentation

## Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- quality system requirements relating to note taking and preparation of task files/reports
- organisational policy and procedural requirements for the reporting of findings to clients/stakeholders
- approved formats of forms, case files and reports

## Assessment Conditions

Competency should be assessed in an actual workplace or in a simulated environment, with access to equipment and infrastructure appropriate to the outcome. Competency should be demonstrated over time to ensure the candidate is assessed across a variety of situations, with access to electronic devices with content suitable for forensic extraction including mobile devices, computers or communications equipment.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

## FWPCOT2236 Fall trees manually (basic)

### Modification History

| Release | Comment                                                                                                                                                                                                                                         |
|---------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1       | <p>Replaces equivalent unit FPICOT2236 Fall trees manually (basic), which was first released with FPI11 Forest and Forest Products Training Package Version 2.2.</p> <p>This is the first release of this unit in the new standards format.</p> |

### Application

This unit of competency describes the outcomes required to assess and manually fall small trees with a low level of complexity and to complete operator maintenance.

Basic trees typical to the scope of this unit may include the following characteristics:

- lean and distribution of the crown weight does not create a complex situation to assess or fell
- small dimensions relative to local forest size distribution
- no excessive lean
- no visible damage or defect
- species that are not prone to free splitting and adverse reactions during felling
- single stem or non-complex multi-stems
- diameter of tree is less than chainsaw bar length
- grown on terrain and slope that does not add significant complexity to the operation

The unit applies to those in a forest, agricultural, local council, emergencies services and other government agency environment. With the exception of minor forest produce, it is not relevant to commercial harvesting operations.

Licensing, legislative, regulatory, or certification requirements apply to this unit in some states & territories at the time of publication, and may differ according to jurisdiction.

### Pre-requisite Unit

Nil

### Unit Sector

Common Technical

## Elements and Performance Criteria

| Release | Comment                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |
|---------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1       | <p>Replaces equivalent unit FPICOT2236 Fall trees manually (basic), which was first released with FPI11 Forest and Forest Products Training Package Version 2.2. This is the first release of this unit in the new standards format.</p> <p>Assessment requirements now specify the performance and knowledge evidence, as well as assessment conditions for this unit of competency. These sections simplify and replace components used in the previous unit format, including Required Skills and Knowledge, Evidence Guide and Range Statement.</p> |

### Performance Evidence

A person demonstrating competency in this unit must satisfy all of the elements, performance criteria and foundation skills of this unit. If a specific volume or frequency is not stated below, then evidence must be provided that the following requirements have been performed on at least one occasion:

- comply with applicable federal, state or territory legislative and regulatory requirements and codes of practice including WHS, environmental and organisational policies and procedures relevant to felling trees at a basic level
- comply with organisational policies and procedures relevant to felling trees manually at a basic level
- comply with applicable licensing or certification requirements relevant to felling trees manually
- effectively communicate and use safe working practices, including maintaining an awareness of activity by other personnel in the work area
- assess site conditions, by applying environmental protection measures, detecting hazards and own skill level for felling trees at a basic level
- conduct a tree assessment
- identify structural defects and stresses in trees and the impact on felling, including exclusion of trees from hand felling due to hazardous and difficult situations for assessment, monitoring and safe falling including a crown that contains dead or broken material, entanglement or malformation
- plan a felling sequence for individual trees and preparing surroundings including escape route

- fell basic trees using a appropriate cuts safely without damage to personnel, equipment and surrounding environment
- identify trees that are hung up
- select, prepare and maintain chainsaw equipment including recognising faults, problems and malfunctions
- assess, plan and safely operate chainsaw equipment to manually fell trees at a basic level in forest, rural and community environments
- use tree felling techniques including scarf cutting , back cutting to provide hinge-wood and the use of wedges to assist in controlling falling direction.

## Knowledge Evidence

A person competent in this unit must be able to demonstrate knowledge of:

- Workplace health and safety (WHS) requirements including:
  - PPE and clothing
  - safety equipment
  - first aid equipment
  - firefighting equipment
  - hazard and risk control procedures
  - fatigue management procedures
  - appropriate signage
  - elimination of hazardous materials and substances procedures
  - safe forest practices, including required actions relating to fire
  - techniques for manual handling, including shifting, lifting and carrying
- types and purposes of cuts to fell trees, including scarf cutting and back cutting to provide hinge-wood and maintain control of tree
- typical tree defects and how these affect tree felling activities:
  - shakes
  - insect defects
  - knots and resin pockets
  - pipe
  - drysides
- identifying trees:
  - that contain hazards and are deemed unsafe to fell
  - considered outside own skill level
  - trees where cuts made may lead to loss of control of tree in felling
- hazards and related risks and the impact on felling trees of:
  - uneven and unstable terrain
  - unsafe trees
  - fires
  - overhead and underground services

- excavations
- traffic
- structures
- hazardous materials
- insects and animals
- other personnel and machinery
- methods used to remove trees that are hung up and procedures for removal
- methods for assessing chain condition
- environmental protection measures to follow when felling trees related to:
  - native vegetation
  - soil and water
  - heritage and archeological artefacts
  - flora and fauna
  - geomorphologic features
  - landscape
  - external site pollution
  - recreational opportunities
  - regeneration opportunities
  - cleaning plant, tools and equipment
  - disposing of, recycling and reusing timber and other waste
- key features of these varying environmental conditions and their effects on basic tree felling activities:
  - general forest lean
  - ground growth
  - ground hazards and obstacles
  - ground slope
  - gullies
  - presence and density of seed and habitat trees
  - water courses
  - wet and adverse weather conditions
  - wind speed and direction
- the use of types of tools and equipment for felling trees manually, and the procedures for their safe use, operation and maintenance including:
  - warning signs
  - chainsaw and components
  - PPE and clothing
  - first aid equipment
  - maintenance requirements
  - support tools.

## Assessment Conditions

The following resources must be made available:

- workplace location or simulated workplace of a forest environment that contains small trees with a low level of falling complexity
- PPE and clothing including:
  - safety helmet
  - safety gloves
  - protective footwear
  - eye protection
  - hearing protection
  - high visibility clothing
  - leg protection (trousers or chaps)
- materials and equipment including;
  - warning signs
  - chainsaw and components
  - first aid equipment
  - maintenance tools and equipment
  - support tools
  - manufacturers' instructions for use and maintenance of equipment
  - radio or communication device
  - fire fighting equipment (if prescribed)
- specifications and work instructions, including
  - information and instructions relevant to tree-felling operations, including processing location details and trees to be felled and retained
  - policy and procedures for work health and safety (WHS)
  - risk assessment plan
  - general and specific environmental requirements
  - relevant state or territory logging code of practice
  - emergency and evacuation procedures
  - fire protocols
- relevant personnel for the purposes of communicating information

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

### Assessor requirements

Assessors must:

- hold the appropriate assessor competency standards as outlined in regulations; and
- be able to demonstrate vocational competencies at least to the level being assessed; and
- be able to demonstrate how they are continuing to develop their VET knowledge and skills as well as maintaining their industry currency and assessor competence.

| 1       | Replaces equivalent unit FPICOT2237A Maintain chainsaws, which was first released with FPI11 Forest and Forest Products Training Package Version 2.2.<br><br>This is the first release of this unit in the new standards format. |

### Application

This unit of competency describes the outcomes required to maintain engine or electrically operated hand-held chainsaws. It includes sharpening chains and completing routine and frequently required service requirements as well as periodic servicing. Work is completed in a variety of work settings including a forest environment, agricultural, workshop, arboretum and horticultural settings.

The unit applies to chainsaw operators.

No licensing, legislative, regulatory, or certification requirements apply to this unit at the time of publication.

### Pre-requisite Unit

### Elements and Performance Criteria

| ELEMENTS                                         | PERFORMANCE CRITERIA                                                                                                                                                                                   |
|--------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <i>Elements describe the essential outcomes.</i> | <i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.</i> |
| 1. Prepare for chainsaw maintenance              | 1.1 Select appropriate personal protective, maintenance and repair equipment and check for operational effectiveness in line with manufacturer's recommendations.                                      |

| ELEMENTS                                     | PERFORMANCE CRITERIA                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |
|----------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                                              | 1.2 Plan repair and maintenance activities in line with manufacturer's instructions and recommendations and organisational requirements                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |
| 2. Complete chainsaw maintenance             | 2.1 Follow organisational safety procedures to lock out equipment.<br>2.2 Complete routine and frequently required service requirements on chainsaws in line with manufacturer's instructions and organisational requirements<br>2.3 Complete periodic service requirements on chainsaws in line with manufacturer's recommendations and organisational requirements<br>2.4 Check chain for bluntness or damage.<br>2.5 Remove, sharpen, adjust and replace chain and other components in line with manufacturer's recommendations.<br>2.6 Identify, diagnose, tag and report chainsaw faults, malfunctions or irregular operation for repair or replacement.<br>2.7 Reassemble serviced chainsaw components, check for operational effectiveness, tag and store. |
| 3. Complete maintenance records and clean up | 3.1 Complete, process and maintain records and reports in line with organisational procedures.<br>3.2 Clear and clean work area and tools, and dispose of and recycle waste materials in line with environmental protection practices.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |

## Foundation Skills

This section describes those core and employment skills that are essential to performance and are not explicit in the performance criteria.

|                                    |                                                                                                                                                                                                                                                                 |
|------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Numeracy skills to:                | <ul style="list-style-type: none"> <li>calculate ratios and measure quantities of oils and fuels.</li> </ul>                                                                                                                                                    |
| Reading skills to:                 | <ul style="list-style-type: none"> <li>interpret:               <ul style="list-style-type: none"> <li>workplace health and safety procedures</li> <li>work orders</li> <li>manufacturer's instructions and maintenance recommendations.</li> </ul> </li> </ul> |
| Writing skills to:                 | <ul style="list-style-type: none"> <li>complete basic accurate records of repairs, maintenance activities and equipment faults.</li> </ul>                                                                                                                      |
| Planning and organising skills to: | <ul style="list-style-type: none"> <li>efficiently and logically sequence stages of repair and maintenance work.</li> </ul>                                                                                                                                     |

# Assessment Requirements for FWPCOT2237 Maintain chainsaws

## Modification History

| Release | Comment                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |
|---------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1       | <p>Replaces equivalent unit FPICOT2237A Maintain chainsaws, which was first released with FPI11 Forest and Forest Products Training Package Version 2.2.</p> <p>Assessment requirements now specify the performance and knowledge evidence, as well as assessment conditions for this unit of competency. These sections simplify and replace components used in the previous unit format, including Required Skills and Knowledge, Evidence Guide and Range Statement. This is the first release of this unit in the new standards format.</p> |

## Performance Evidence

A person demonstrating competency in this unit must satisfy all of the elements, performance criteria and foundation skills of this unit. If a specific volume or frequency is not stated below, then evidence must be provided that the following requirements have been performed on at least one occasion:

- complete these routine and frequently required service requirements on chainsaws in line with manufacturer's instructions:
  - removing, checking and cleaning air filter for damage and penetration of foreign material
  - cleaning saw body, air intake vents and cooling fins
  - cleaning chain brake
  - inspecting chain and guide bar
  - checking screws and nuts for tightness
  - checking safety devices
  - filling fuel tanks and chain oil tanks
- complete these types of periodic service requirements on chainsaws in line with manufacturer's instructions:
  - replacing drive sprocket
  - cleaning or replacing and setting spark plug
  - checking and replacing fuel filter
  - checking chain brake, oil system, flywheel assembly, anti-vibration system, muffler and spark arrestor
  - inspecting and replacing starter cord and starter spring

- matching pitches and gauges of cutting components
- dressing and cleaning cutter bar
- cleaning fly wheel
- removing and cleaning exhaust and fire screen
- complete these activities to check and sharpen chain saw chains in line with manufacturer's instructions:
  - inspecting and adjusting chain
  - inspecting and replacing chain that is worn, damaged or incorrectly sharpened
  - sharpening chain types and setting of depth gauges.

## Knowledge Evidence

A person competent in this unit must be able to demonstrate knowledge of:

- types, purpose, features and operation of chainsaws for which repairs are completed
- features and names of different parts of chainsaws
- purpose, features and operation of tools and equipment used to repair and maintain chainsaws
- specifications and types of bars, chains and sprockets
- differences between frequent and periodic chainsaw maintenance requirements
- techniques for:
  - removing chains and other chainsaw components
  - assessing chain condition
  - sharpening chains to specified requirements
  - reassembling chainsaw components
- hazards for maintaining chainsaws and methods to minimise associated risks:
  - loud noise and exhaust fumes
  - mechanical vibration
  - handling hazardous substances
  - cuts and hot surfaces
  - rotating parts
- organisational procedures specific to repairing and maintaining chainsaws:
  - workplace health and safety with particular emphasis on equipment lock out and use of personal protective equipment
  - communication reporting lines
  - recording and reporting repairs, maintenance activities and equipment faults
- environmental protection practices for repairing and maintaining chainsaws:
  - cleaning plant, tools and equipment
  - disposing of, recycling and reusing materials
  - disposing of hazardous substances.

## Assessment Conditions

The following resources must be made available:

- engine or electrically operated hand-held chainsaws
- tools and equipment used to repair and maintain chainsaws
- consumable chainsaw parts, oil and fuel
- personal protective equipment suitable for repairing and maintaining chainsaws including:
  - Safety boots
  - Safety helmet
  - Cut resistant leg protection
  - First aid kit
  - Hearing protection
  - High visibility clothing
  - Eye protection
  - Apron
  - Chain mesh gloves
- manufacturers' instructions and recommendations for repair and maintenance of chainsaws
- template documents for recording repairs, maintenance activities and equipment faults.
- organisational procedures for repairing and maintaining chainsaws.

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

### Assessor requirements

Assessors must:

- hold the appropriate assessor competency standards as outlined in regulations; and
- be able to demonstrate vocational competencies at least to the level being assessed; and
- be able to demonstrate how they are continuing to develop their VET knowledge and skills as well as maintaining their industry currency and assessor competence.

### Application

This unit describes the outcomes required to trim and cut felled trees with a chainsaw and to complete operator maintenance. It applies to situations where the production of timber is not the primary focus of the activity.

The unit applies to a forestry worker, chainsaw operator, forest harvester, harvesting technician and arboriculture worker.

No licensing, legislative, regulatory, or certification requirements apply to this unit at the time of publication.

### Pre-requisite Unit

## Performance Evidence

A person demonstrating competency in this unit must satisfy all of the elements, performance criteria and foundation skills of this unit.

There must be evidence that, on at least one occasion, the individual has:

- safely and efficiently used a chainsaw to complete these activities:
  - trim and cut hardwood or softwood trees
  - delimb trees
  - trim branches
  - trim burls and other small growths
- used the following cutting techniques:
  - bridging cuts
  - swinging cuts
  - side bind cuts
  - boring
  - wedge cut
  - ripping cuts
- trimmed and cut trees in varied weather conditions
- completed the following maintenance activities on a chainsaw:
  - sharpening
  - refuelling
  - inspection, identification and replacement of bar, chain, drive sprockets
  - bar oil checks and top up

- air filter, check, clean and replacement
- cleaning of saw body, air intake vents and cooling fans
- fitting spare chain and tension chain.

## Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- environmental protection measures including:
  - action to limit the impact of noise, wind speed and direction, fallen trees, ground slope, ground hazards and obstacles, general forest lean
  - action to limit the impact to ground growth, canopy, density of trees
  - action to limit the impact on flora, fauna and habitat
  - soil and water protection
- cleaning plant, tools and equipment
- disposing of, recycling and reusing timber and other waste
- key features of these varying site conditions and effects on tree cutting and trimming activities:
  - ground growth
  - ground hazards and obstacles
  - ground slope
- key features of these varying weather conditions and effects on tree cutting and trimming activities:
  - dry, wet and adverse weather conditions
  - low and moderate wind speed and direction
- typical tree defects and how they affect tree cutting activities:
  - splits
  - falling damage
  - fire damage
  - insect infestation
  - pipe
  - shake
  - twist
  - knots and resin pockets
  - the presence of foreign bodies such as stakes and nails
- typical tree stresses and how they affect tree cutting activities:
  - tension (fibres being stretched)
  - compression (fibres being squashed)
  - neutral fibres
- range of chainsaw cutting techniques:
  - bridging cuts

- swinging cuts
- side bind cuts
- delimbing
- boring
- wedge cut
- ripping cuts
- cutting patterns used to optimise time and recovery of product from trees
- cutting sequences used to maintain control of cut sections and minimise cutting problems
- purpose, features, operation and basic non-specialist repair and maintenance of chainsaws
- methods for assessing chain condition
- organisational procedures specific to tree trimming and cutting activities:
  - workplace health and safety with particular emphasis on equipment lock out and use of personal protective equipment
  - communication reporting lines
  - recording and reporting tree cutting outcomes, equipment faults and maintenance requirements.

## Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting
- resources, equipment and materials:
  - chainsaws
  - chainsaw fuel and oil containers
  - support tools appropriate for work tasks (hammer, wedges, logging tape, cant hook and/or breaking bar)
  - mobile plant and equipment appropriate for work tasks (wood chipper and/or loaders)
  - maintenance tools and equipment for chainsaws
  - personal protective equipment suitable for cutting trees and maintaining chainsaws
- specifications:
  - manufacturer's instructions for use and maintenance of equipment
  - work order with specific instructions for tree cutting activities
  - template reports for recording tree cutting outcomes, equipment faults and maintenance requirements
  - organisational procedures for tree trimming and cutting activities.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

## FWPCOT2253 Fell trees manually (basic)

### Modification History

| Release   | Comments                                                                              |
|-----------|---------------------------------------------------------------------------------------|
| Release 1 | This version released with FWP Forest and Wood Products Training Package Version 6.0. |

### Application

This unit of competency describes the skills and knowledge required to assess and fell basic trees manually using a chainsaw, and to complete routine operator chainsaw maintenance.

Trees typical to the scope of this unit may have some of the following characteristics:

- lean and distribution of the crown weight does not create a complex situation to assess, place the cut or fall
- no excessive lean
- no visible damage or defect
- uniform in structure
- species that are not prone to free splitting and adverse reactions during felling
- single stem or non-complex multi-stems
- small or medium diameter that can be safely felled using standard and basic felling techniques
- site characteristics that do not add significant complexity to the operation.

The unit applies to individuals who fell basic trees as part of arboriculture, forestry, agriculture, conservation and land management, local government, emergency services and other government agency operations. With the exception of minor forest produce, this unit does not apply to commercial harvesting operations.

All work must be carried out to comply with workplace procedures, according to state/territory health and safety regulations, legislation and standards that apply to the workplace.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Assessment Requirements for FWPCOT2253 Fell trees manually (basic)

### Modification History

| Release   | Comments                                                                              |
|-----------|---------------------------------------------------------------------------------------|
| Release 1 | This version released with FWP Forest and Wood Products Training Package Version 6.0. |

### Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has assessed, planned and conducted the felling of four basic trees following workplace policy and procedures and current workplace health and safety legislation and regulations.

In completing this work, the individual must demonstrate that, for each tree, the felling technique was consistent with current Australian Standards and industry codes of practice applicable to tree felling operations.

There must also be evidence that in felling each tree, the individual has made a standard scarf cut facing the direction of intended fall. In performing this cut, the individual must have ensured that:

- the scarf cut includes a top cut angled at 45° and a depth of 1/4 of the tree diameter and a horizontal flat bottom cut that meets precisely with the lowest part of the top cut
- the back cut is parallel to and above the scarf line by 1/10 of the tree diameter
- a minimum 10% of the tree diameter remains uncut, leaving hinge wood.

There must also be evidence that, on at least one occasion, the individual has inspected and carried out routine maintenance on one chainsaw and its cutting attachments according to manufacturer requirements.

### Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- Australian Standards and codes of practice applicable to tree felling operations
- hazards and risks related to felling trees with chainsaws, and methods to minimise associated risks:
  - physical conditions of the site
  - unsafe/hazardous trees

- fire and other emergency situations
- overhead and underground services
- nearby structures
- standing vegetation in the intended direction of fall
- falling branches
- weather conditions
- impediments of escape routes
- vehicle and traffic access
- people on or near worksite
- machinery on or near worksite
- carrying and transporting a chainsaw
- user fatigue
- hazards related to maintaining chainsaws, and methods to minimise associated risks
- features of unsafe/hazardous basic trees and defects of trees and how they affect tree felling activities
- characteristics of basic trees
- methods used to identify basic trees:
  - that contain hazards and are deemed unsafe to fell
  - that are considered outside own skill level
  - where cuts made may lead to loss of control of tree in felling
- types and purposes of cuts to fell basic trees, including scarf cutting and back cutting using different methods to provide hinge wood and wedges to maintain control of tree
- methods for assessing chain condition
- types, safe use, operation and maintenance of chainsaws, support tools and attachments
- workplace procedures specific to felling trees with chainsaws:
  - workplace health and safety, with particular emphasis on equipment lock-out, use of personal protective equipment (PPE), safe manual handling and fire prevention measures
  - communication reporting lines
  - recording and reporting repairs, maintenance activities and equipment faults
- environmental protection measures that meet legal obligations and requirements of the industry, state and local standards and/or codes of practice for felling trees with chainsaws:
  - protection of natural and cultural assets
  - cleaning plant, tools and equipment
  - disposing of, recycling and reusing materials
  - disposing of hazardous substances.

## Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
  - skills must be demonstrated in the workplace or an environment that accurately represents workplace conditions
- resources, equipment and materials:
  - chainsaw and accessories
  - suitable trees to fell
  - PPE required in tree felling operations
  - communication system
- specifications:
  - access to workplace safety and environmental policies and procedures applicable to tree felling and chainsaw operations
  - access to site emergency procedure
  - access to workplace standard operating procedures or operator manual for chainsaws.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

## FWPCOT2254 Maintain chainsaws

### Modification History

| Release   | Comments                                                                              |
|-----------|---------------------------------------------------------------------------------------|
| Release 1 | This version released with FWP Forest and Wood Products Training Package Version 6.0. |

### Application

This unit of competency describes the knowledge and skills required to maintain fuel or electrically powered hand-held chainsaws. The unit includes completing routine maintenance service as well as periodic maintenance servicing and chain sharpening.

The unit applies to individuals who maintain chainsaws for or as part of arboriculture, forestry, horticulture, agriculture, conservation and land management, local government, emergency services and other government agency operations.

All work must be carried out to comply with workplace procedures, according to state/territory health and safety regulations, legislation and standards that apply to the workplace.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

### Pre-requisite Unit

Nil

### Unit Sector

Common Technical (COT)

### Elements and Performance Criteria

| Elements                                         | Performance Criteria                                                                                                                     |
|--------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------|
| <i>Elements describe the essential outcomes.</i> | <i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>                                   |
| 1. Prepare for chainsaw maintenance              | 1.1 Determine maintenance requirements from work order or instruction and, where required, seek clarification from appropriate personnel |

| Elements                                         | Performance Criteria                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |

## Assessment Requirements for FWPCOT2254 Maintain chainsaws

### Modification History

| Release   | Comments                                                                              |
|-----------|---------------------------------------------------------------------------------------|
| Release 1 | This version released with FWP Forest and Wood Products Training Package Version 6.0. |

### Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that, on one occasion, the individual has:

- completed the routine and frequently required service requirements for one chainsaw according to manufacturer instructions
- completed the periodic service requirements for one chainsaw according to manufacturer instructions
- checked and sharpened at least two chains according to manufacturer instructions.

### Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- types, purpose, features and operation of chainsaws
- features and names of different parts of fuel powered and electrically powered chainsaws
- purpose, features and operation of tools and equipment used in chainsaw maintenance activities
- specifications and types of bars, chains and sprockets
- differences between frequent and periodic chainsaw maintenance requirements
- techniques for:
  - removing chains and other chainsaw components
  - assessing chain condition
  - sharpening chains to specified requirements
  - reassembling chainsaw components
  - assessing battery condition, if applicable, and visually inspecting state of electrical cords and plugs for electrically powered chainsaws
- hazards associated with maintaining chainsaws, and methods to minimise associated risks:
  - noise
  - fumes

- mechanical vibration
- hazardous substances
- cuts
- burns
- rotating parts
- electric shock for electrically powered chainsaws
- workplace procedures specific to maintaining chainsaws:
  - workplace health and safety, with particular emphasis on equipment lock-out, use of personal protective equipment (PPE) and safe manual handling
  - communication reporting lines
  - recording and reporting repairs, maintenance activities and equipment faults
- environmental protection practices relevant to maintaining chainsaws:
  - cleaning plant, tools and equipment
  - disposing of, recycling and reusing materials
  - disposing of hazardous substances.

## Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
  - skills must be demonstrated in a workplace location or an environment that accurately represents workplace conditions
- resources, equipment and materials:
  - fuel or electrically powered hand-held chainsaws
  - tools and equipment used to maintain chainsaws
  - consumable chainsaw parts, oil and fuel
  - PPE required in chainsaw maintenance activities
- specifications:
  - access to work order or instruction detailing chainsaw maintenance activities to be carried out by operator
  - access to workplace safety and environmental policies and procedures applicable to chainsaw maintenance activities
  - access to workplace standard operating procedures or operator manual for chainsaws.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

## FWPCOT2256 Trim and cut felled trees

### Modification History

| Release   | Comments                                                                              |
|-----------|---------------------------------------------------------------------------------------|
| Release 1 | This version released with FWP Forest and Wood Products Training Package Version 6.0. |

### Application

This unit describes the skills and knowledge required to trim and cut felled trees with a chainsaw and complete operator maintenance.

The unit applies to individuals who trim and cut felled trees as part of arboriculture, forestry, agriculture, conservation and land management, local government, emergency services and other government agency operations. With the exception of minor forest produce, this unit does not apply to commercial harvesting operations.

All work must be carried out to comply with workplace procedures, according to state/territory health and safety regulations, legislation, standards and industry codes of practice that apply to the workplace.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

### Pre-requisite Unit

Nil

### Unit Sector

Common Technical (COT)

### Elements and Performance Criteria

| Elements                                         | Performance Criteria                                                                                                                                                                               |

# Assessment Requirements for FWPCOT2256 Trim and cut felled trees

## Modification History

| Release   | Comments                                                                              |
|-----------|---------------------------------------------------------------------------------------|
| Release 1 | This version released with FWP Forest and Wood Products Training Package Version 6.0. |

## Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has:

- assessed, planned and conducted the trimming and cutting of six felled trees using a chainsaw and demonstrated three or more cut types from the list below:
  - bridging cuts
  - swinging cuts
  - side bind cuts
  - boring cuts
  - wedge cuts
  - ripping cuts
  - step cuts.

In performing this work, there must be evidence that the individual has:

- followed workplace policies and procedures, current workplace health and safety legislation, regulations and related industry standards and codes of practice applicable to trimming and cutting felled tree operations
- checked and sharpened or changed a saw chain post trimming and cutting operation on one occasion according to manufacturer instructions.

## Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- environmental protection measures suitable for a worksite where trimming and cutting operations are performed:
  - noise control
  - protection of flora, fauna and habitat

- protection of soil
- protection of water
- disposal, recycling and reuse of waste
- cleaning of plant, equipment and tools
- protection of adjacent land uses and fixed assets
- vehicle control
- access restrictions
- fire prevention
- protection of cultural heritage
- hazard control measures suitable for a worksite where trimming and cutting operations are performed, related to:
  - trees and other vegetation
  - ground conditions
  - noise
  - fire and other emergency situations
  - vehicle and traffic access
  - foot access
  - plant, tools and equipment
  - weather conditions
  - adjacent land uses
  - dangerous goods
- tree defects and how they affect tree cutting activities:
  - splits
  - falling damage
  - fire damage
  - insect infestation
  - pipe
  - shake
  - twist
  - knots and resin pockets
  - the presence of foreign bodies such as stakes and nails
- felled tree stresses and how they affect tree cutting activities:
  - tension (fibres being stretched)
  - compression (fibres being squashed)
  - neutral fibres
- chainsaw cutting techniques:
  - bridging cut
  - swinging cut
  - side bind cut
  - boring cut

- wedge cut
- ripping cut
- step cut
- cutting patterns used to optimise time and recovery of product from felled trees
- cutting sequences used to maintain control of cut sections and minimise cutting problems
- purpose and procedures for routine operator maintenance of chainsaws
- procedures used to free a pinched or stuck chainsaw
- methods for assessing chain condition
- workplace procedures specific to felled tree trimming and cutting activities:
  - workplace health and safety, with particular emphasis on equipment lock-out and use of personal protective equipment (PPE)
  - communication reporting lines
  - reporting felled tree cutting outcomes, equipment faults and maintenance requirements.

## Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
  - competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting
- resources, equipment and materials:
  - chainsaw and accessories
  - suitable felled trees to trim and cut
  - PPE required in trimming and cutting felled trees
  - communication system
- specifications:
  - access to workplace safety and environmental policies and procedures applicable to trimming and cutting operations and chainsaw use
  - access to workplace standard operating procedures or operator manual for chainsaws.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

# FWPCOT3259 Operate a four wheel drive on unsealed roads

## Modification History

| Release | Comment                                                                                                                                                                                                                                                   |
|---------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1       | Replaces equivalent unit FPICOT3259 Operate a four wheel drive on unsealed roads, which was first released with FPI11 Forest and Forest Products Training Package Version 1.0.<br><br>This is the first release of this unit in the new standards format. |

## Application

This unit of competency describes the outcomes required to safely operate a four wheel drive (4x4) vehicle on unsealed roads.

The unit applies to operating a 4x4 vehicle in a variety of work settings with different terrains.

Licensing, legislative, regulatory, or certification requirements apply to this unit in some states and territories at the time of publication, and may differ according to jurisdiction.

## Pre-requisite Unit

Nil

## Unit Sector

Forest Growing and Management

Harvesting and Haulage

Sawmilling and Processing

Timber Manufactured Products

## Elements and Performance Criteria

| ELEMENTS                                         | PERFORMANCE CRITERIA                                                                                                                                                                                   |
|--------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <i>Elements describe the essential outcomes.</i> | <i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.</i> |
| 1. Identify four-wheel                           | 1.1 Access, interpret and apply information relevant to                                                                                                                                                |

| ELEMENTS                                         | PERFORMANCE CRITERIA                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |
|--------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| drive specific terms and terminology             | <p>operating a four-wheel drive vehicle on unsealed roads.</p> <p>1.2 Identify the structural and handling differences between a conventional two-wheel drive vehicle and a four-wheel drive vehicle.</p> <p>1.3 Identify four-wheel drive techniques.</p>                                                                                                                                                                                                                                                                                                                                                                                                                        |
| 2. Conduct checks of 4x4 vehicle and equipment   | <p>2.1 Perform pre-start checks.</p> <p>2.2 Secure loads in line with organisational, workplace safety and environmental requirements.</p> <p>2.3 Select suitable navigation aids where necessary.</p> <p>2.4 Advise passengers of any special safety precautions to be taken when traversing rough terrain.</p> <p>2.5 Check that tyre pressure is suitable for terrain and that it is changed as required in line with organisational procedures.</p> <p>2.6 Select and access maintenance equipment prior to departure after considering the contextual issues.</p>                                                                                                            |
| 3. Prepare for 4x4 operations                    | <p>3.1 Identify and follow work health and safety (WHS), environmental, and organisational requirements relevant to operating a 4x4 vehicle.</p> <p>3.2 Determine type of operation and ensure safe operating conditions.</p> <p>3.3 Establish communication with others and choose the required safety mechanisms in line with organisational requirements.</p>                                                                                                                                                                                                                                                                                                                  |
| 4. Operate 4x4 vehicle on unsealed terrain types | <p>4.1 Continually monitor the track to identify hazards, assess risks, and select the best route in line with WHS and environmental requirements.</p> <p>4.2 Identify situations where the engagement of four-wheel drive is required and engage front hubs or centre differential lock where fitted.</p> <p>4.3 Use appropriate range, gear, speed, driving and braking technique to negotiate a range of terrain types while maintaining control of vehicle at all times.</p> <p>4.4 Check brakes and undercarriage after negotiating varying terrain.</p> <p>4.5 Park and shut down 4x4 vehicle in line with manufacturer specifications and organisational requirements.</p> |
| 5. Operate 4x4 vehicle on                        | 5.1 Inspect intended 4x4 vehicle path prior to negotiation of slope.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |

| ELEMENTS                                                 | PERFORMANCE CRITERIA                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |
|----------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| a steep slope                                            | <p>5.2 Use appropriate range, gear, speed, driving and braking technique to negotiate a steep slope, while maintaining control of vehicle.</p> <p>5.3 Use control braking to ascend and descend, and avoid skidding.</p> <p>5.4 Maintain traction in line with requirements of 4x4 vehicle.</p> <p>5.5 Apply appropriate automatic and manual techniques when 4x4 vehicle cannot proceed any further on a steep slope due to traction problems.</p>                                                                                                                  |
| 6. Perform maintenance and minor repairs on 4x4 vehicles | <p>6.1 Perform operational maintenance and minor repairs as detailed in the vehicle operator manual and report vehicle defects to the appropriate person.</p> <p>6.2 Demonstrate safe use of a jack to support a 4x4 vehicle while changing a tyre under relevant road terrains and conditions within the operating environment</p> <p>6.3 Clean and store 4x4 vehicle and equipment after use in line with manufacturer specifications and organisational procedures.</p> <p>6.4 Document maintenance and minor repairs in line with organisational procedures.</p> |

## Foundation Skills

This section describes those core and employment skills that are essential to performance and are not explicit in the performance criteria.

|                            |                                                                                                                                                                                                                                                                                                                                                                                                                                            |

## Assessment Requirements for FWPCOT3259 Operate a four wheel drive on unsealed roads

### Modification History

| Release | Comment                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |
|---------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1       | <p>Replaces equivalent unit FPICOT3259 Operate a four wheel drive on unsealed roads, which was first released with FPI11 Forest and Forest Products Training Package version 1.0. This is the first release of this unit in the new standards format.</p> <p>Assessment requirements now specify the performance and knowledge evidence, as well as assessment conditions for this unit of competency. These sections simplify and replace components used in the previous unit format, including 'Required Skills and Knowledge, Evidence Guide and Range Statement'.</p> |

### Performance Evidence

A person demonstrating competency in this unit must satisfy all of the elements, performance criteria and foundation skills of this unit. If a specific volume or frequency is not stated below, then evidence must be provided that the following requirements have been performed on at least one occasion:

- follow applicable workplace safety, environmental and regulatory requirements and codes of practice relevant to operating a 4x4 vehicle
- follow organisational policies and procedures relevant to operating a 4x4 vehicle, including:
  - own work role and responsibilities
  - procedural manuals
  - quality and continuous improvement
  - WHS, emergency and evacuation procedures
  - recording and reporting requirements
  - equipment use, maintenance and storage requirements
  - environmental management requirements
- communicate and work safely with others in rough terrain when operating a 4x4 vehicle
- perform pre-start checks of vehicle and equipment suitable to different terrains by checking loads and tyre pressure, selecting navigation aids and advising passengers of safety precautions
- operate safely, a 4x4 vehicle, on unsealed road conditions and different terrain types, including negotiating steep slopes, by identifying hazards and assessing risks
- use appropriate range, gear, speed, driving and braking techniques safely when operating a 4x4 vehicle on a steep slope

- demonstrate safe use of a jack to support a 4x4 vehicle while changing a tyre under relevant road terrains and conditions within the operating environment
- park and shut down 4x4 vehicle in line with **manufacturer specifications** and organisational requirements
- perform and document operational maintenance as permitted by vehicle operator handbook.

## Knowledge Evidence

A person competent in this unit must be able to demonstrate knowledge of:

- four wheel drive operational information
- structural differences between conventional two wheel drive and a four wheel drive including:
  - recovery hooks and mounting features
  - purpose and use of front wheel hubs
  - factors affecting tyre size, fitment, rating and pressure
- applicable regulations, standards, codes of practice and established safe practices relevant to the operating a 4x4 vehicle
- road rules, regulations, permit and licence requirements of the relevant state or territory
- environmental protection requirements including the safe disposal of waste material
- prestart checks for 4 x 4 vehicle on:
  - fuel, either diesel, gas or petrol
  - water
  - oil
  - brake and transmission fluid levels
  - battery water levels and electrolyte checks
  - tyres
  - belts
  - leads
  - hydraulic lines and connections
  - air cleaners
  - brakes
  - off-road safety equipment
  - traction devices
- Types of communication equipment including:
  - personal location beacon (PLB)
  - flares
  - markers
  - phone
  - radio
  - V-Sheet

- safe operating conditions for a 4 X 4 vehicle
  - interpreting weather conditions to determine suitability for driving
  - determining food, water, PPE (sunglasses, high-visibility vest, etc.) and clothing requirements for journey
  - selecting routes to minimise damage to the environment
  - on and off-road conditions
  - traffic pattern and density
  - visibility
  - loading of four-wheel drive, including techniques to reduce overloading
- types of environmental risks and hazards associated with operating a 4x4 vehicle on unsealed roads including:
  - rocks and other unexpected obstacles
  - damage to vehicle
  - tidal influences
  - fire in vehicle
  - faulty brakes
  - leaking fuel
  - faulty steering mechanism on vehicle
  - animals and objects in vehicle path
  - crocodiles and snakes in some areas
  - windy or foggy sections of terrain
  - steep slopes
  - side slopes
  - slippery surfaces
  - land slides
  - overhead tree limbs
  - black ice
  - towing trailers
  - other vehicles
  - fallen trees, limbs and logs
  - icy terrain
  - flooded terrain
  - oil on road
  - parked vehicles on road
  - pedestrians on or near the road
  - poor visibility
- 4x4 driving techniques in different terrains including:
  - smooth
  - rough
  - uneven

- slippery
- wet
- boggy
- sandy
- steep or hilly
- rock
- icy
- snow
- mud, including:
  - brown clay
  - black silt
  - salt pan mud
  - red
- hard ground
- water
- operational knowledge of a 4x4 vehicle, including controls, instruments, indicators and their use
- tyre management principles for checking, changing and maintenance
- workplace communication channels and protocols
- techniques for travelling in convoy
- problem identification and resolution strategies, and common fault-finding techniques relevant to safely operating a four wheel drive vehicle
- types of tools and equipment relating to a 4x4 vehicle, and procedures for their safe use and maintenance
- maintenance equipment including spares and fluids
- procedures for recording and reporting workplace information.

## Assessment Conditions

The following resources must be made available:

- workplace location or simulated workplace offering conditions including different terrain on unsealed roads and steep slopes
- materials and equipment relevant to undertaking work applicable to this unit, including manual or automatic four-wheel drive or all-wheel drive
- specifications and work instructions relevant to workplace requirements and the safe operation of four wheel drive vehicles
- personal protective equipment required for operating a four wheel drive on unsealed roads
- relevant personnel for the purposes of communicating information.

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

## Assessor requirements

Assessors must:

- hold the appropriate assessor competency standards as outlined in regulations; and
- be able to demonstrate vocational competencies at least to the level being assessed; and
- be able to demonstrate how they are continuing to develop their VET knowledge and skills as well as maintaining their industry currency and assessor competence.

## FWPFGM3212 Fall trees manually (intermediate)

### Modification History

| Release | Comment                                                                                                                                                                                                                                                |
|---------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1       | <p>Replaces equivalent unit FPIFGM3212 Fall trees manually (intermediate), which was first released with FPI11 Forest and Forest Products Training Package Version 2.2.</p> <p>This is the first release of this unit in the new standards format.</p> |

### Application

This unit of competency describes the outcomes required to assess, plan and safely carry out manual tree-felling operations using a chainsaw.

This unit covers the felling procedures for trees with a level of complexity that requires significant tree assessment and practical felling skills.

Persons competent in this unit should be able to effectively fell most trees except very large trees, and/or those with significant defects and/or characteristics that cause excessive complexity.

It applies to trees that have a diameter greater than the bar length of the chainsaw.

Trees typical to the scope of this unit may include the following characteristics:

- lean and weight distribution, which can be assessed and readily adapted to felling direction with the use of wedges and/or control with hinge-wood
- various dimensions relative to local forest size distribution
- limited visible damage or defect
- species prone to free splitting and adverse reactions during felling
- single or multi-stems
- diameter of tree greater than chainsaw bar length
- grown on terrain and slope that can add complexity to the operation

The unit applies to a non-production environment, including forest, rural and community environments.

Licensing, legislative, regulatory, or certification requirements apply to this unit in some states & territories at the time of publication, and may differ according to jurisdiction

### Pre-requisite Unit

Nil

## Unit Sector

Forest Growing and Management

## Elements and Performance Criteria

| <i>Elements describe the essential outcomes.</i>    | <i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.</i>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |
|-----------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1. Prepare for felling                              | <p>1.1 Identify and comply with applicable work health and safety (WHS), environmental, legislative and organisational requirements relevant to felling trees</p> <p>1.2 Identify and adhere to site environmental protection measures according to relevant legislation and regulations</p> <p>1.3 Review and check job requirements with appropriate personnel</p> <p>1.4 Sharpen and adjust chainsaw or change components according to manufacturer recommendations</p> <p>1.5 Assess tree and determine felling requirements</p> <p>1.6 Identify and control potential and existing risks and hazards in the work area</p> <p>1.7 Identify trees to be retained and felled</p> <p>1.8 Establish and maintain communication with others according to WHS requirements</p> |
| 2. Visually assess site conditions and surroundings | <p>2.1 Review terrain and slope to determine if they add complexity to the operation</p> <p>2.2 Assess general factors affecting felling requirements and detect and control specific forest or site risks and hazards</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |
| 3. Assess tree and plan felling                     | <p>3.1 Visually assess tree for felling characteristics</p> <p>3.2 Confirm tree is safe to fell</p> <p>3.3 Select tools and equipment appropriate to work requirements and check for operational effectiveness according to manufacturer recommendations</p> <p>3.4 Identify trees to be felled for size, significant defects and any characteristics causing excessive complexity</p> <p>3.5 Assess and progressively plan tree-felling sequence for individual trees</p> <p>3.6 Assess and check required falling direction and possible deviation</p> <p>3.7 Plan sequence of cuts to fell tree according to standard felling</p>                                                                                                                                         |

|                                  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |
|----------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                                  | <p>procedures</p> <p>3.8 Assess limitations of own skills in safely felling trees, identify trees considered outside own skill level and seek assistance from appropriate personnel where required</p> <p>3.9 Monitor and exclude location and activity of other personnel on the work site</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |
| 4. Apply tree-felling techniques | <p>4.1 Select suitable escape route and clear of growth and other obstacles according to environmental care principles and statutory requirements</p> <p>4.2 Fell individual trees using planned techniques according to site requirements, at a safe distance from other personnel in the work area</p> <p>4.3 Adjust cutting technique in response to movement and condition of tree</p> <p>4.4 Use planned escape route when tree starts to fall and monitor the fall and movement of tree on ground until determined stable</p> <p>4.5 Delay movement back into the felling area until all tree material, including from adjacent tree crowns, has fallen</p> <p>4.6 Identify and implement procedures for removal of trees that are hung-up</p> <p>4.7 Dispose of waste materials in line with environmental and operational requirements</p> <p>4.8 Detect, rectify and report blunt or damaged saw chain according to workplace procedures</p> <p>4.9 Monitor chainsaw for operational effectiveness and record and report faults, malfunctions and problems according to workplace procedures</p> |

## Foundation Skills

*This section describes those core and employment skills that are essential to performance and are not explicit in the performance criteria.*

|                               |                                                                                                                                                                                                                                                                                   |
|-------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Numeracy skills to:           | <ul style="list-style-type: none"> <li>• measure and record tree height, length and diameter</li> <li>• estimate, measure and compare height, size and distance relevant to tree felling</li> <li>• calculate product mass of individual trees and determine fall zone</li> </ul> |
| Oral communication skills to: | <ul style="list-style-type: none"> <li>• select and use appropriate spoken communication strategies with work colleagues and other personnel on site when felling trees</li> <li>• interpret hand signals with other operators to ensure safe tree</li> </ul>                     |

## Assessment Requirements for FWPFGM3212 Fall trees manually (intermediate)

### Modification History

| Release | Comment                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |
|---------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1       | <p>Replaces equivalent unit FPIFGM3212 Fall trees manually (intermediate), which was first released with FPI11 Forest and Forest Products Training Package Version 2.2. This is the first release of this unit in the new standards format.</p> <p>Assessment requirements now specify the performance and knowledge evidence, as well as assessment conditions for this unit of competency. These sections simplify and replace components used in the previous unit format, including Required Skills and Knowledge, Evidence Guide and Range Statement.</p> |

### Performance Evidence

A person demonstrating competency in this unit must satisfy all of the elements, performance criteria and foundation skills of this unit. If a specific volume or frequency is not stated below, then evidence must be provided that the following requirements have been performed on at least one occasion:

- comply with applicable federal, state or territory legislative and regulatory requirements and codes of practice including WHS, environmental and organisational policies and procedures relevant to felling trees at an intermediate level
- comply with organisational policies and procedures relevant to felling trees manually at an intermediate level
- comply with applicable licensing and certification requirements relevant to felling trees at an intermediate level
- effectively communicate and use safe working practices, including maintaining an awareness of other personnel activity in the work area
- assess site conditions, by applying environmental protection measures, detecting hazards and own skill level for felling trees at an intermediate level
- conduct a tree assessment
- identify structural defects and stresses in trees and the impact on felling, including exclusion of trees from hand felling due to hazardous and difficult situations for assessment, monitoring and safe falling including a crown that contains dead or broken material, entanglement or malformation
- plan a felling sequence for individual trees and preparing surroundings including escape route
- fell intermediate trees using appropriate cuts safely without damage to personnel, equipment and surrounding environment
- identify trees that are hung up

- select, prepare and maintain chainsaw equipment including recognising faults, problems and malfunctions
- assess, plan and safely operate chainsaw equipment to manually fell trees at an intermediate level in forest, rural and community environments
- use tree felling techniques including scarf cutting , back cutting to provide hinge-wood and the use of wedges to assist in controlling falling direction
- 

## Knowledge Evidence

A person competent in this unit must be able to demonstrate knowledge of:

- Workplace health and safety (WHS) requirements including:
  - PPE and clothing
  - safety equipment
  - first aid equipment
  - firefighting equipment
  - hazard and risk control procedures
  - fatigue management procedures
  - appropriate signage
  - elimination of hazardous materials and substances procedures
  - safe forest practices, including required actions relating to fire
  - techniques for manual handling, including shifting, lifting and carrying
  - types and purposes of cuts to fell trees, including scarf cutting and back cutting to provide hinge-wood and maintain control of tree
- typical tree defects and how these affect tree felling activities:
  - shakes
  - insect defects
  - knots and resin pockets
  - pipe
  - drysides
- Identifying trees:
  - that contain hazards and are deemed unsafe to fell
  - considered outside own skill level
  - trees where cuts made may lead to loss of control of tree in felling
- hazards and related risks and the impact on felling trees of:
  - uneven and unstable terrain
  - unsafe trees
  - fires
  - overhead and underground services
  - excavations

- traffic
- structures
- hazardous materials
- insects and animals
- other personnel and machinery
- methods used to remove trees that are hung up and procedures for removal
- methods for assessing chain condition
- environmental protection measures to follow when felling trees related to:
  - native vegetation
  - soil and water
  - heritage and archeological artefacts
  - flora and fauna
  - geomorphologic features
  - landscape
  - external site pollution
  - recreational opportunities
  - regeneration opportunities
  - cleaning plant, tools and equipment
  - disposing of, recycling and reusing timber and other waste
- key features of these varying environmental conditions and their effects on intermediate tree felling activities:
  - general forest lean
  - ground growth
  - ground hazards and obstacles
  - ground slope
  - gullies
  - presence and density of seed and habitat trees
  - water courses
  - wet and adverse weather conditions
  - wind speed and direction
- the use of types of tools and equipment for felling trees manually, and the procedures for their safe use, operation and maintenance including:
  - warning signs
  - chainsaw and components
  - PPE and clothing
  - first aid equipment
  - maintenance requirements
  - support tools
  -

## Assessment Conditions

The following resources must be made available:

- workplace location or simulated workplace of a forest environment with trees typical to the scope of this unit
- relevant personnel for the purposes of communicating information
- PPE and clothing including:
  - Safety helmet
  - Safety gloves
  - Protective footwear
  - Eye protection
  - Hearing protection
  - High visibility clothing
  - Leg protection (trousers or chaps)
- materials and equipment including;
  - warning signs
  - chainsaw and components
  - first aid equipment
  - maintenance tools and equipment
  - support tools
  - manufacturers' instructions for use and maintenance of equipment
  - radio or communication device
  - fire fighting equipment (if prescribed)
- specifications and work instructions, including
  - information and instructions relevant to tree-felling operations, including processing location details and trees to be felled and retained
  - policy and procedures for work health and safety (WHS)
  - risk assessment plan
  - general and specific environmental requirements
  - applicable state or territory logging code of practice
  - emergency and evacuation procedures
  - fire protocols

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

### Assessor requirements

Assessors must:

- hold the appropriate assessor competency standards as outlined in regulations; and
- be able to demonstrate vocational competencies at least to the level being assessed; and
- be able to demonstrate how they are continuing to develop their VET knowledge and skills as well as maintaining their industry currency and assessor competence.

## FWPFGM3213 Fall trees manually (advanced)

### Modification History

| Release | Comment                                                                                                                                                                                                                                 |
|---------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1       | Replaces equivalent unit FPIFGM3213 Fall trees manually (advanced), which was first released with FPI11 Forest and Forest Products Training Package Version 2.2.<br>This is the first release of this unit in the new standards format. |

### Application

This unit of competency describes the outcomes required to assess, plan and safely carry out manual tree-felling operations using a chainsaw.

This unit covers the felling procedures for trees with a level of complexity that requires significant tree assessment and advanced practical felling skills.

Persons competent in this unit should be able to effectively fell trees of any size, species and condition, including those with significant defects and characteristics that cause excessive felling complexity, that are deemed safe to fell.

Trees typical to the scope of this unit may include the following characteristics:

- lean and weight distribution that adds significant complexity yet can be assessed and adapted to site requirements
- larger dimensions relative to local forest size distribution
- substantial lean
- damage or defect that requires complex felling techniques
- multi-legged, hollow butts, culls and stags
- species prone to free splitting and adverse reactions during felling
- single or complex multi-stems
- diameter of tree greater than chainsaw bar length
- grown on terrain and slope that can add significant complexity to the operation

The unit applies to a non-production environment, including forest, rural and community environments.

Licensing, legislative, regulatory, or certification requirements apply to this unit in some states & territories at the time of publication, and may differ according to jurisdiction

### Pre-requisite Unit

Nil

## Unit Sector

Forest Growing and Management

## Elements and Performance Criteria

| <i>Elements describe the essential outcomes.</i>    | <i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.</i>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |
|-----------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1. Prepare for felling                              | <p>1.1 Identify and comply with applicable work health and safety (WHS), environmental, legislative and organisational requirements relevant to felling trees</p> <p>1.2 Identify and adhere to site environmental protection measures according to relevant legislation and regulations</p> <p>1.3 Review job requirements and check with appropriate personnel</p> <p>1.4 Select tools and equipment appropriate to work requirements and check for operational effectiveness according to manufacturer recommendations</p> <p>1.5 Sharpen and adjust chainsaw or change components according to manufacturer recommendations</p> <p>1.6 Identify and control potential and existing risks and hazards in the work area</p> <p>1.7 Identify trees to be felled as being safe to fell</p> <p>1.8 Establish and maintain communication with others according to OHS requirements</p> |
| 2. Visually assess site conditions and surroundings | <p>2.1 Review terrain and slope to determine if they add significant complexity to the operation</p> <p>2.2 Assess general factors affecting felling requirements and detect and control specific forest or site risks and hazards</p> <p>2.3 Assess and progressively plan tree-felling sequence for individual trees</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |
| 3. Assess tree and plan felling                     | <p>3.1 Locate and visually assess tree for felling characteristics</p> <p>3.2 Confirm tree is safe to fell</p> <p>3.3 Assess and check required falling direction and possible deviation</p> <p>3.4 Plan sequence of cuts to fell tree according to standard felling procedures</p> <p>3.5 Assess limitations of own skills in safely felling trees, identify trees considered outside own skill level and seek assistance from</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                  |

|                                  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |
|----------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                                  | <p>appropriate personnel where required</p> <p>3.6 Monitor and exclude location and activity of other personnel on the work site</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |
| 4. Apply tree-felling techniques | <p>4.1 Select suitable escape route and clear of growth and other obstacles according to environmental care principles and statutory requirements</p> <p>4.2 Fell individual trees using planned techniques according to site requirements, at a safe distance from other personnel in the work area</p> <p>4.3 Adjust cutting technique in response to movement and condition of tree</p> <p>4.4 Use planned escape route when tree starts to fall and monitor the fall and movement of tree on ground until determined stable</p> <p>4.5 Delay movement back into the felling area until all tree material, including from adjacent tree crowns, has fallen</p> <p>4.6 Identify and implement procedures for removal of trees that are hung-up</p> <p>4.7 Dispose of waste materials in line with environmental and operational requirements</p> <p>4.8 Detect, rectify and report blunt or damaged saw chain according to workplace procedures</p> <p>4.9 Monitor chainsaw for operational effectiveness and record and report faults, malfunctions and problems according to workplace procedures</p> |

## Foundation Skills

*This section describes those core and employment skills that are essential to performance and are not explicit in the performance criteria.*

|                               |                                                                                                                                                                                                                                                                                   |
|-------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Numeracy skills to:           | <ul style="list-style-type: none"> <li>• measure and record tree height, length and diameter</li> <li>• estimate, measure and compare height, size and distance relevant to tree felling</li> <li>• calculate product mass of individual trees and determine fall zone</li> </ul> |
| Oral communication skills to: | <ul style="list-style-type: none"> <li>• select and use appropriate spoken communication strategies with work colleagues and other personnel on site when felling trees</li> <li>• interpret hand signals with other operators to ensure safe tree felling</li> </ul>             |
| Reading skills to:            | <ul style="list-style-type: none"> <li>• interpret: <ul style="list-style-type: none"> <li>• workplace health and safety, industry standards and</li> </ul> </li> </ul>                                                                                                           |

|                                    |                                                                                                                                                                                                                                                                                                                         |
|------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                                    | <p>regulations for felling trees and other relevant tree felling procedures</p> <ul style="list-style-type: none"><li>• work orders</li><li>• manufacturers maintenance recommendations</li></ul>                                                                                                                       |
| Writing skills to:                 | <ul style="list-style-type: none"><li>• complete forms to record WHS considerations for felling trees</li><li>• report equipment faults and request maintenance of equipment.</li><li>• complete log book requirements</li></ul>                                                                                        |
| Planning and organising skills to: | <ul style="list-style-type: none"><li>• identify an unsafe tree.</li><li>• efficiently and logically sequence the stages of preparation for and felling of trees using work order to guide activities.</li></ul>                                                                                                        |
| Problem solving skills to:         | <ul style="list-style-type: none"><li>• plan and apply the hierarchy of risk control</li><li>• review and identify work requirements</li><li>• recognise own limitations in conditions and trees for felling</li><li>• identify problems and equipment faults and demonstrate appropriate response procedures</li></ul> |

## Assessment Requirements for FWPFGM3213 Fall trees manually (advanced)

### Modification History

| Release | Comment                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |
|---------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1       | <p>Replaces equivalent unit FPIFGM3213 Fall trees manually (advanced), which was first released with FPI11 Forest and Forest Products Training Package Version 2.2. This is the first release of this unit in the new standards format.</p> <p>Assessment requirements now specify the performance and knowledge evidence, as well as assessment conditions for this unit of competency. These sections simplify and replace components used in the previous unit format, including Required Skills and Knowledge, Evidence Guide and Range Statement.</p> |

### Performance Evidence

A person demonstrating competency in this unit must satisfy all of the elements, performance criteria and foundation skills of this unit. If a specific volume or frequency is not stated below, then evidence must be provided that the following requirements have been performed on at least one occasion:

- comply with applicable federal, state or territory legislative and regulatory requirements and codes of practice including OHS, environmental and organisational policies and procedures relevant to felling trees at an advanced level
- comply with applicable licensing or certification requirements relevant to felling trees manually at an advanced level
- effectively communicate and use safe working practices, including maintaining an awareness of other personnel activity in the work area
- assess site conditions, by applying environmental protection measures, detecting hazards and own skill level for felling trees at an advanced level
- conduct a tree assessment
- identify structural defects and stresses in trees and the impact on felling, including exclusion of trees from hand felling due to hazardous and difficult situations for assessment, monitoring and safe falling including a crown that contains dead or broken material, entanglement or malformation
- plan a felling sequence for individual trees and preparing surroundings including escape route
- fell advanced trees using appropriate cuts safely without damage to personnel, equipment and surrounding environment

- identify trees that are hung up
- select, prepare and maintain chainsaw equipment including recognising faults, problems and malfunctions
- assess, plan and safely operate chainsaw equipment to manually fell trees at an advanced level in forest, rural and community environments
- use tree felling techniques including scarf cutting , back cutting to provide hinge-wood and the use of wedges to assist in controlling falling direction

## Knowledge Evidence

A person competent in this unit must be able to demonstrate knowledge of:

- workplace health and safety (WHS) requirements including:
  - PPE and clothing
  - safety equipment
  - first aid equipment
  - firefighting equipment
  - hazard and risk control procedures
  - fatigue management procedures
  - appropriate signage
  - elimination of hazardous materials and substances procedures
  - safe forest practices, including required actions relating to fire
  - techniques for manual handling, including shifting, lifting and carrying
- types and purposes of cuts to fell trees, including scarf cutting and back cutting to provide hinge-wood and maintain control of tree
- typical tree defects and how these affect tree felling activities:
  - shakes
  - insect defects
  - knots and resin pockets
  - pipe
  - drysides
- Identifying trees:
  - that contain hazards and are deemed unsafe to fell
  - considered outside own skill level
  - trees where cuts made may lead to loss of control of tree in felling
- hazards and related risks and the impact on felling trees of:
  - uneven and unstable terrain
  - unsafe trees
  - fires
  - overhead and underground services
  - excavations
  - traffic

- structures
- hazardous materials
- insects and animals
- other personnel and machinery
- methods used to remove trees that are hung up and procedures for removal
- methods for assessing chain condition
- environmental protection measures to follow when felling trees related to:
  - native vegetation
  - soil and water
  - heritage and archeological artefacts
  - flora and fauna
  - geomorphologic features
  - landscape
  - external site pollution
  - recreational opportunities
  - regeneration opportunities
  - cleaning plant, tools and equipment
  - disposing of, recycling and reusing timber and other waste
- key features of these varying environmental conditions and their effects on advanced tree felling activities:
  - general forest lean
  - ground growth
  - ground hazards and obstacles
  - ground slope
  - gullies
  - presence and density of seed and habitat trees
  - water courses
  - wet and adverse weather conditions
  - wind speed and direction
- the use of types of tools and equipment for felling trees manually, and the procedures for their safe use, operation and maintenance including:
  - warning signs
  - chainsaw and components
  - PPE and clothing
  - first aid equipment
  - maintenance requirements
  - support tools
  -

## Assessment Conditions

The following resources must be made available:

- workplace location or simulated workplace of a forest environment with trees typical to the scope of this unit
- relevant personnel for the purposes of communicating information
- PPE and clothing including:
  - safety helmet
  - safety gloves
  - protective footwear
  - eye protection
  - hearing protection
  - high visibility clothing
  - leg protection (trousers or chaps)
- materials and equipment including;
  - warning signs
  - chainsaw and components
  - first aid equipment
  - maintenance tools and equipment
  - support tools
  - manufacturers' instructions for use and maintenance of equipment
  - radio or communication device
  - fire fighting equipment (if prescribed)
- specifications and work instructions, including
  - information and instructions relevant to tree-felling operations, including processing location details and trees to be felled and retained
  - policy and procedures for work health and safety (WHS)
  - risk assessment plan
  - general and specific environmental requirements
  - applicable state or territory logging code of practice
  - emergency and evacuation procedures
  - fire protocols

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

### Assessor requirements

Assessors must:

- hold the appropriate assessor competency standards as outlined in regulations; and
- be able to demonstrate vocational competencies at least to the level being assessed; and
- be able to demonstrate how they are continuing to develop their VET knowledge and skills as well as maintaining their industry currency and assessor competence.

## FWPFGM3215 Perform complex 4x4 operations

### Modification History

| Release | Comment                                                                                                                                                                                                                                 |
|---------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1       | Replaces equivalent unit FPIFGM3215 Perform complex 4x4 operations, which was first released with FPI11 Forest and Forest Products Training Package Version 2.2.<br>This is the first release of this unit in the new standards format. |

### Application

This unit of competency describes the outcomes required to perform complex four-wheel drive (4x4) vehicle operations, including operations over rugged terrain and water crossings.

The unit applies to those who operate a four wheel drive in forest and timber processing environments.

Licensing, legislative, regulatory, or certification requirements apply to this unit in some states and territories at the time of publication, and may differ according to jurisdiction.

### Pre-requisite Unit

Nil

### Unit Sector

Forest Growing and Management

Harvesting and Haulage

Sawmilling and Processing

### Elements and Performance Criteria

| <i>Elements describe the essential outcomes.</i> | <i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.</i>                                 |
|--------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1. Prepare for complex 4x4 operations            | 1.1 Identify and assess types of water crossings and terrain being accessed for safe operating conditions.<br>1.2 Check that 4x4 vehicle being used is appropriate to conditions and operationally effective in line with manufacturer |

|                                                                        |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |
|------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                                                                        | <p>specifications.</p> <p>1.3 Identify appropriate range of personal protective equipment (PPE) to be carried for the trip conditions.</p> <p>1.4 Establish communication with others and choose required safety mechanisms in line with organisational requirements.</p>                                                                                                                                                                                                           |
| 2. Prepare 4x4 vehicle for water crossing                              | <p>2.1 Place cover securely across the front of the vehicle when required by water depth.</p> <p>2.2 Protect electrical connectors, battery terminals and electrical components.</p> <p>2.3 Check wheel hubs to engage/lock position.</p> <p>2.4 Select appropriate gear for water crossing.</p> <p>2.5 Allow vehicle to cool down before entering water</p>                                                                                                                        |
| 3. Negotiate water crossing                                            | <p>3.1 Assess hazards and risks associated with water crossings.</p> <p>3.2 Determine safety of water crossing.</p> <p>3.3 Establish and select entry and exit points for crossing in line with current flow and risk assessment.</p> <p>3.4 Access water crossing to determine depth of water at intended crossing point.</p> <p>3.5 Monitor the track continually to identify hazards and assess risks.</p> <p>3.6 Perform water crossing by maintaining a constant bow wave.</p> |
| 4. Perform check of vehicle operations on completion of water crossing | <p>4.1 Drain water from 4x4 vehicle back into the water crossing.</p> <p>4.2 Dry brakes off by gentle application while moving.</p> <p>4.3 Check engine oils for contamination.</p> <p>4.4 Check air cleaner elements for water intrusion and assess air intake operational effectiveness.</p> <p>4.5 Check differential and gear box oils after prolonged periods in the water.</p>                                                                                                |
| 5. Operate vehicle in rugged terrain                                   | <p>5.1 Determine intended route prior to departure.</p> <p>5.2 Inspect intended vehicle path prior to negotiation of rugged terrain.</p> <p>5.3 Identify potential hazards and risks when operating vehicle in rugged terrain and ensure appropriate response can be applied</p> <p>5.4 Inspect, position and secure vehicle load to maximise traction for 4x4 driving.</p> <p>5.5 Set vehicle controls in line with manufacturer specifications</p>                                |

|                                                          |                                                                                                                                                                                |
|----------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                                                          | and for operation in the rugged terrain.<br>5.6 Negotiate terrain in line with requirements for specific driving conditions.                                                   |
| 6. Recover vehicle from loss of traction while ascending | 6.1 Determine intended route backwards.<br>6.2 Use correct brake and engine techniques to reverse vehicle.<br>6.3 Ensure vehicle comes to a safe stop.                         |
| 7. Perform post-trip tasks                               | 7.1 Notify relevant personnel of trip completion.<br>7.2 Carry out maintenance on allocated vehicle.<br>7.3 Record and report activity in line with organisational procedures. |

## Foundation Skills

This section describes those core and employment skills that are essential to performance and are not explicit in the performance criteria.

|---------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1       | <p>Replaces equivalent FPIFGM3215 Perform complex 4x4 operations, which was first released with FPI11 Forest and Forest Products Training Package Version 2.2. This is the first release of this unit in the new standards format.</p> <p>Assessment requirements now specify the performance and knowledge evidence, as well as assessment conditions for this unit of competency. These sections simplify and replace components used in the previous unit format, including 'Required Skills and Knowledge, Evidence Guide and Range Statement'.</p> |

### Performance Evidence

- A person demonstrating competency in this unit must satisfy all of the elements, performance criteria and foundation skills of this unit. If a specific volume or frequency is not stated below, then evidence must be provided that the following requirements have been performed on at least one occasion:
- follow applicable legal and regulatory requirements, and codes of practice relevant to performing complex 4x4 operations
- follow organisational policies and procedures relevant to performing complex 4x4 operations
- assess the safety and potential hazards of planned water and rugged terrain crossings including consideration of:
  - assessment of water speed and depth
  - underwater hazards
  - debris in water
  - rocks and other unexpected obstacles
  - variable water depth and width of crossing
  - risk of vehicle being swept down the waterway
  - tidal influences
  - wet and iced terrain
  - flooded terrain
  - fire in vehicle
  - faulty brakes

- leaking fuel
- faulty steering mechanism on vehicle
- animals and objects in vehicle path
- crocodiles and snakes in some areas
- windy or foggy sections of terrain
- steep slopes
- slippery surfaces
- land slides
- tree limbs
- black ice
- trailers
- safely perform 4x4 operations over rugged terrain and water crossings in line with the conditions and 4x4 operating requirements
- select correct gear/range to negotiate terrain
- engage and disengage freewheel hubs in line with driving conditions
- identify safe locations for entry into and out of a waterway
- identify and prepare supplies and resources appropriate to the journey
- use correct techniques to safely stop and start on steep terrain
- use and maintain relevant tools, machinery and equipment.

## Knowledge Evidence

A person competent in this unit must be able to demonstrate knowledge of:

- applicable regulations, standards, codes of practice and established safe practices relevant to the full range of processes when performing complex 4x4 operations
- environmental risks and hazards, organisational and site standards, requirements, policies and procedures for performing complex 4x4 operations
- road rules, regulations, permit and licence requirements of the relevant state or territory
- operational knowledge of 4x4 vehicle, including controls, instruments and indicators, and their use
- environmental protection requirements relating to 4x4 operations in rugged terrain
- organisational and site standards, requirements, policies and procedures for performing complex 4x4 operations
- road rules, regulations, permit and licence requirements of the relevant state or territory
- operational knowledge of 4x4 vehicle, including controls, instruments and indicators and their use
- four-wheel drive techniques, including to safely cross water and operate 4x4 vehicle in rugged terrain
- vehicle maintenance requirements following water crossings
- established communication channels and protocols
- vehicle problem identification and common vehicle fault-finding techniques

- common vehicle operating problems and appropriate operator response in line with organisational and manufacturer requirements
- types of tools and equipment, and procedures for their safe use and maintenance.

## Assessment Conditions

The following resources must be made available:

- manual or automatic or all wheel drive (AWD) four-wheel drive
- access to a water crossing and rugged terrain with safe entry into and out of a waterway, shallow run-ins and a firm base
- locations that minimise the impact on the environment
- personal protective equipment required for performing complex 4x4 operations.

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

### Assessor requirements

Assessors must:

- hold the appropriate assessor competency standards as outlined in regulations; and
- be able to demonstrate vocational competencies at least to the level being assessed; and
- be able to demonstrate how they are continuing to develop their VET knowledge and skills as well as maintaining their industry currency and assessor competence.
-

## FWPFGM3216 Fell trees manually (intermediate)

### Modification History

| Release   | Comments                                                                              |
|-----------|---------------------------------------------------------------------------------------|
| Release 1 | This version released with FWP Forest and Wood Products Training Package Version 6.0. |

### Application

This unit of competency describes the skills and knowledge required to assess, plan and safely carry out manual felling of intermediate trees using a chainsaw. This unit covers the felling procedures for trees with a level of complexity that requires significant tree assessment and practical felling skills.

Individuals competent in this unit should be able to effectively fell most trees, except advanced trees and/or those with significant defects and/or characteristics that cause excessive complexity.

Trees typical to the scope of this unit may have some of the following characteristics:

- lean and weight distribution that can be assessed and readily adapted to falling direction with the use of wedges and/or controlled with hinge wood of a larger size than typical for the local environment
- limited visible damage or defect
- multi-stems
- forward lean, backward lean or side lean
- small or medium size diameter trees that can be safely felled with intermediate felling techniques
- dead trees with minimal visible damage or defects that do not add significant complexity to the cutting technique
- various dimensions relative to other trees when working in a forest environment
- in local site conditions that add additional complexity to the felling operation, including site conditions that impact the working position of the operator or the natural direction of fall of the tree.

The unit applies to individuals who fell intermediate trees as part of arboriculture, forestry, agriculture, conservation and land management, local government, emergency services and other government agency operations. With the exception of minor forest produce, this unit does not apply to commercial harvesting operations.

All work must be carried out to comply with workplace procedures, according to state/territory health and safety regulations, legislation and standards that apply to the workplace.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Pre-requisite Unit

Nil

## Unit Sector

Forest Growing and Management (FGM)

## Elements and Performance Criteria

| Elements                                         | Performance Criteria                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |

## Assessment Requirements for FWPFGM3216 Fell trees manually (intermediate)

### Modification History

| Release   | Comments                                                                              |
|-----------|---------------------------------------------------------------------------------------|
| Release 1 | This version released with FWP Forest and Wood Products Training Package Version 6.0. |

### Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has assessed, planned and conducted the felling of six intermediate trees. This must include demonstration of:

- two different scarf cutting techniques
- two different back cutting techniques, which must be for either forward leaning, side leaning or back leaning trees
- applying, on one occasion, an industry approved technique, such as the use of wedges, to ensure that the tree falls in the direction of the scarf cut.

The scarfing methods must be selected from the following:

- Standard
- Humboldt
- 90 degree scarf
- V scarf.

In performing all cuts, the individual must have complied with the following criteria:

- direction – the scarf must be in the direction of the desired fell
- depth – the depth of the scarf is 1/4 to 1/3 of the diameter of the tree
- size (width) of opening – 2/3 across the front of the tree
- top and bottom scarf cuts – the two cuts should meet without overcutting or undercutting, the scarf line is level and the scarf line is at 90 degrees to the intended direction of fall
- back cut height – the back cut is level and above the scarf line by about 1/10 of the tree diameter
- hinge wood thickness is about 1/10 of the tree diameter.

In completing this work, the individual must demonstrate that, for each tree, the felling technique was consistent with current Australian Standards and industry codes of practice applicable to tree felling operations.

There must also be evidence that the individual has inspected and carried out routine maintenance on one occasion on one chainsaw and its cutting attachments according to manufacturer requirements.

This work must comply with workplace policy and procedures and current workplace health and safety legislation and regulations.

## Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- Australian Standards and codes of practice applicable to tree felling operations
- hazards and risks related to felling trees with chainsaws, and methods to minimise associated risks:
  - physical conditions of the site
  - unsafe/hazardous trees
  - fire and other emergency situations
  - overhead and underground services
  - nearby structures
  - standing vegetation in the intended direction of fall
  - falling branches
  - weather conditions
  - impediments of escape routes
  - vehicle and traffic access
  - people on or near worksite
  - machinery on or near worksite
  - carrying and transporting a chainsaw
  - user fatigue
- hazards related to maintaining chainsaws, and methods to minimise associated risks
- features of unsafe/hazardous intermediate trees and defects of trees and how they affect tree felling activities
- types and purposes of cuts to fell intermediate trees:
  - scarf cuts
  - back cuts using different methods to provide hinge wood and wedges to maintain control of tree
- characteristics of intermediate trees
- methods used to identify intermediate trees:
  - that contain hazards and are deemed unsafe to fell
  - that are considered outside own skill level
  - where cuts made may lead to loss of control of tree in felling
- methods used to remove trees that are hung up, and procedures for removal
- methods for assessing chain condition

- types, safe use, operation and maintenance of chainsaws, support tools and attachments
- workplace procedures specific to felling trees with chainsaws:
  - workplace health and safety, with particular emphasis on equipment lock-out, use of personal protective equipment (PPE), safe manual handling and fire prevention measures
  - communication reporting lines
  - recording and reporting repairs, maintenance activities and equipment faults
- environmental protection measures that meet legal obligations and requirements of the industry, state and local standards and/or codes of practice for felling trees with chainsaws:
  - protection of natural and cultural assets
  - cleaning plant, tools and equipment
  - disposing of, recycling and reusing materials
  - disposing of hazardous substances.

## Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
  - skills must be demonstrated in the workplace or an environment that accurately represents workplace conditions
- resources, equipment and materials:
  - chainsaw and accessories
  - suitable trees to fell
  - tools and equipment to fell trees
  - PPE required in tree felling operations
  - communication system
- specifications:
  - access to workplace safety and environmental policies and procedures applicable to tree felling and chainsaw operations
  - access to workplace standard operating procedures or operator manual for chainsaws.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

## FWPFGM3217 Fell trees manually (advanced)

### Modification History

| Release   | Comments                                                                              |
|-----------|---------------------------------------------------------------------------------------|
| Release 1 | This version released with FWP Forest and Wood Products Training Package Version 6.0. |

### Application

This unit of competency describes the skills and knowledge required to assess, plan and safely carry out manual felling of advanced trees using a chainsaw. This unit covers the felling procedures for advanced trees with a level of complexity that requires significant tree assessment and advanced practical felling skills.

Individuals competent in this unit should be able to effectively fell trees of any size, species and condition, including those with significant defects and characteristics that cause excessive felling complexity, that are deemed safe to fell.

Trees typical to the scope of this unit may have some of the following characteristics:

- lean and weight distribution that adds significant complexity yet can be assessed and adapted to site requirements
- large diameter trees, but not exclusively, that can be safely felled with complex felling techniques heavy forward lean
- lean in a direction away from the fall zone or side-leaning to the available fall zone
- damage or defect that requires complex felling techniques, including trees with visible lightning damage, burnt out trees and those with fire damaged butts
- hung up trees that can be removed safely
- multi-legged, hollow butts, culls and stags
- species prone to free splitting and adverse reactions during felling
- complex multi-stems
- terrain, slope and environment that can add significant complexity to the operation.

The unit applies to individuals who fell advanced trees as part of arboriculture, forestry, agriculture, conservation and land management, local government, emergency services and other government agency operations. With the exception of minor forest produce, this unit does not apply to commercial harvesting operations.

All work must be carried out to comply with workplace procedures, according to state/territory health and safety regulations, legislation and standards that apply to the workplace.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Pre-requisite Unit

Nil

## Unit Sector

Forest Growing and Management (FGM)

## Elements and Performance Criteria

| Elements                                         | Performance Criteria                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |
|--------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <i>Elements describe the essential outcomes.</i> | <i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |
| 1. Prepare for felling                           | 1.1 Determine job requirements from work order or instruction and, where required, seek clarification from appropriate personnel<br>1.2 Confirm safety and environmental protection requirements for the task according to workplace procedures<br>1.3 Identify, assess and take actions to mitigate risks and hazards associated with felling advanced trees<br>1.4 Identify, assess and determine felling requirements of trees to fell according to work order or instruction<br>1.5 Consult and maintain communication with team members and other appropriate personnel to ensure that work is coordinated effectively with others in the workplace<br>1.6 Select, fit and use personal protective equipment<br>1.7 Obtain tools and equipment needed for the work, and check for correct operation and safety |
| 2. Assess site conditions and surroundings       | 2.1 Inspect site for conditions likely to affect safe implementation of felling activities<br>2.2 Identify and report site environmental conditions to appropriate personnel<br>2.3 Determine fall zone and implement control measures to minimise risks and hazards in the zone according to safe work procedures<br>2.4 Monitor location and activity of other personnel on the work site, and implement control measures according to workplace safety procedures                                                                                                                                                                                                                                                                                                                                                |
| 3. Assess tree and plan felling                  | 3.1 Identify trees considered outside own skill level, and seek assistance from appropriate personnel where required                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |

| Elements                                         | Performance Criteria                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |

## Foundation Skills

*This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.*

| Skill              | Description                                                                                                                                                                                                                                                       |

# Assessment Requirements for FWPFGM3217 Fell trees manually (advanced)

## Modification History

| Release   | Comments                                                                              |
|-----------|---------------------------------------------------------------------------------------|
| Release 1 | This version released with FWP Forest and Wood Products Training Package Version 6.0. |

## Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has assessed, planned and conducted the felling of six advanced trees following workplace policies and procedures and current workplace health and safety legislation and regulations.

In completing this work, the individual must demonstrate that, for each tree, the felling technique used was appropriate and consistent with current Australian Standards and industry codes of practice applicable to tree felling operations.

There must also be evidence that the individual has inspected and carried out routine maintenance on one chainsaw and its cutting attachments on one occasion according to manufacturer requirements.

## Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- Australian Standards and codes of practice applicable to tree felling operations
- hazards and risks related to felling trees with chainsaws, and methods to minimise associated risks:
  - physical conditions of the site
  - unsafe/hazardous trees
  - fire and other emergency situations
  - overhead and underground services
  - nearby structures
  - standing vegetation in the intended direction of fall
  - falling branches
  - weather conditions

- impediments of escape routes
- vehicle and traffic access
- people on or near worksite
- machinery on or near worksite
- carrying and transporting a chainsaw
- user fatigue
- hazards related to maintaining chainsaws, and methods to minimise associated risks
- features of unsafe/hazardous advanced trees and defects of trees and how they affect tree felling activities
- types and purposes of cuts to fell advanced trees:
  - scarf cut
  - back cut using different methods to provide hinge wood and wedges to maintain control of tree
- characteristics of advanced trees
- methods used to identify advanced trees:
  - that contain hazards and are deemed unsafe to fell
  - that are considered outside own skill level
  - where cuts made may lead to loss of control of tree in felling
- methods used to remove trees that are hung up, and procedures for removal
- methods for assessing chain condition
- types, safe use, operation and maintenance of chainsaws, support tools and attachments
- workplace procedures specific to felling trees with chainsaws:
  - workplace health and safety, with particular emphasis on equipment lock-out, use of personal protective equipment (PPE), safe manual handling and fire prevention measures
  - communication reporting lines
  - recording and reporting repairs, maintenance activities and equipment faults
- environmental protection measures that meet legal obligations and requirements of the industry, state and local standards and/or codes of practice for felling trees with chainsaws:
  - protection of natural and cultural assets
  - cleaning plant, tools and equipment
  - disposing of, recycling and reusing materials
  - disposing of hazardous substances.

## Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
  - skills must be demonstrated in the workplace or an environment that accurately represents workplace conditions

- resources, equipment and materials:
  - chainsaw and accessories
  - suitable trees to fell
  - tools and equipment to fell trees
  - PPE required in tree felling operations
  - communication system
- specifications:
  - access to workplace safety and environmental protection policies and procedures applicable to tree felling and chainsaw operations
  - access to workplace standard operating procedures or operator manual for chainsaws.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Changes to evidence requirements relative to revised scope of unit.</p> |

### Application

This unit describes the skills and knowledge required to recognise and respond to life-threatening emergencies in line with the Australian Resuscitation Council (ARC) Guidelines.

This unit applies to all workers who may be required to provide an emergency response in a range of situations, including community and workplace settings.

*Specific licensing /regulatory requirements relating to this competency, including requirements for refresher training should be obtained from the relevant national/state/territory Work Health and Safety Regulatory Authorities.*

## Elements and Performance Criteria

### ELEMENT

### PERFORMANCE CRITERIA

*Elements define the essential outcomes.*

*Performance criteria specify the level of performance needed to demonstrate achievement of the element.*

#### 1. Respond to an emergency situation

- 1.1 Recognise an emergency situation
- 1.2 Identify, assess and minimise immediate hazards to health and safety of self and others
- 1.3 Assess the casualty and recognise the need for first aid response
- 1.4 Assess the situation and seek assistance from emergency response services

#### 2. Apply appropriate first aid procedures

- 2.1 Perform cardiopulmonary resuscitation (CPR) in accordance with ARC guidelines
- 2.2 Provide first aid in accordance with established first aid principles
- 2.3 Display respectful behaviour towards casualty
- 2.4 Obtain consent from casualty where possible
- 2.5 Use available resources and equipment to make the casualty as comfortable as possible
- 2.6 Operate first aid equipment according to manufacturer's instructions
- 2.7 Monitor the casualty's condition and respond in accordance with first aid principles

#### 3. Communicate details of the incident

- 3.1 Accurately convey incident details to emergency response services
- 3.2 Report details of incident to workplace supervisor as appropriate
- 3.3 Maintain confidentiality of records and information in line with statutory and/or organisational policies

## Foundation Skills

*The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.*

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Unit Mapping Information

No equivalent unit.

| Release 1 | <p>This version was released in <i>HLT Health Training Package release 1.0</i> and meets the requirements of the 2012 Standards for Training Packages.</p> <p>Significant changes to elements and performance criteria, changes to scope of unit. Changes to evidence requirements relative to revised scope of unit.</p> |

## Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role.

There must be evidence that the candidate has completed the following tasks in line with state/territory regulations, first aid codes of practice, Australian Resuscitation Council (ARC) guidelines and workplace procedures:

- Followed DRSABCD in line with ARC guidelines, including:
  - performed at least 2 minutes of uninterrupted single rescuer cardiopulmonary resuscitation (CPR) (5 cycles of both compressions and ventilations) on an adult resuscitation manikin placed on the floor

- performed at least 2 minutes of uninterrupted single rescuer CPR (5 cycles both compressions and ventilations) on an infant resuscitation manikin placed on a firm surface
- responded appropriately in the event of regurgitation or vomiting
- managed the unconscious breathing casualty
- followed single rescue procedure, including the demonstration of a rotation of operators with minimal interruptions to compressions
- followed the prompts of an Automated External Defibrillator (AED)
- Responded to at least one simulated first aid scenario contextualised to the candidate's workplace/community setting, including:
  - demonstrated safe manual handling techniques
  - provided an accurate verbal or written report of the incident
- Applied first aid procedures for the following:
  - allergic reaction
  - anaphylaxis
  - bleeding control
  - choking and airway obstruction
  - respiratory distress, including asthma
  - shock

## Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- State/Territory regulations, first aid codes of practice and workplace procedures including:
  - ARC Guidelines relevant to provision of CPR and first aid
  - safe work practices to minimise risks and potential hazards
  - Infection control principles and procedures, including use of standard precautions
  - requirements for currency of skill and knowledge
- legal, workplace and community considerations, including:
  - awareness of potential need for stress-management techniques and available support following an emergency situation
  - duty of care requirements
  - respectful behaviour towards a casualty
  - own skills and limitations
  - consent
  - privacy and confidentiality requirements
  - importance of debriefing
- considerations when providing basic emergency life support, including:
  - airway obstruction due to body position

- appropriate duration and cessation of CPR
- appropriate use of an AED
- chain of survival
- standard precautions
- principles and procedures for first aid management of the following scenarios:
  - allergic reaction
  - anaphylaxis
  - bleeding control
  - cardiac conditions, including chest pain
  - choking and airway obstruction
  - respiratory distress, including asthma
  - shock
  - stroke
- basic anatomy and physiology relating to:
  - considerations in provision of first aid for specified conditions
  - chest
  - how to recognise a person is not breathing normally
  - response/consciousness
  - upper airway and effect of positional change

## Assessment Conditions

Skills must be demonstrated working individually in an environment that provides realistic in-depth, industry-validated scenarios and simulations to assess candidates' skills and knowledge.

Assessment resources must include:

- adult and infant resuscitation manikins in line with ARC Guidelines for the purpose of assessment of CPR procedures
- adrenaline auto-injector training device
- AED training device
- placebo bronchodilator and spacer device
- roller bandages
- triangular bandage
- workplace First Aid kit
- workplace injury, trauma and/or illness record, or other appropriate workplace incident report form
- wound dressing

Simulated assessment environments must simulate the real-life working environment where these skills and knowledge would be performed, with all the relevant equipment and resources of that working environment.

### **Assessor requirements**

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

In addition hold current first aid certificate HLTAID003 or higher.

### Application

This unit describes the skills and knowledge required to provide a first aid response to a casualty. The unit applies to all workers who may be required to provide a first aid response in a range of situations, including community and workplace settings.

*Specific licensing /regulatory requirements relating to this competency, including requirements for refresher training should be obtained from the relevant national/state/territory Work Health and Safety Regulatory Authorities.*

## Elements and Performance Criteria

### ELEMENT

### PERFORMANCE CRITERIA

*Elements define the essential outcomes.*

*Performance criteria specify the level of performance needed to demonstrate achievement of the element.*

1. Respond to an emergency situation

- 1.1 Recognise an emergency situation
- 1.2 Identify, assess and manage immediate hazards to health and safety of self and others
- 1.3 Assess the casualty and recognise the need for first aid response
- 1.4 Assess the situation and seek assistance from emergency response services

2. Apply appropriate first aid procedures

- 2.1 Perform cardiopulmonary resuscitation (CPR) in accordance with Australian Resuscitation Council (ARC) guidelines
- 2.2 Provide first aid in accordance with established first aid principles
- 2.3 Display respectful behaviour towards casualty
- 2.4 Obtain consent from casualty where possible
- 2.5 Use available resources and equipment to make the casualty as comfortable as possible
- 2.6 Operate first aid equipment according to manufacturer's instructions
- 2.7 Monitor the casualty's condition and respond in accordance with first aid principles

3. Communicate details of the incident

- 3.1 Accurately convey incident details to emergency response services
- 3.2 Report details of incident to workplace supervisor as appropriate
- 3.3 Maintain confidentiality of records and information in line with statutory and/or organisational policies

**ELEMENT****PERFORMANCE CRITERIA**

*Elements define the essential outcomes.*

*Performance criteria specify the level of performance needed to demonstrate achievement of the element.*

4. Evaluate the incident and own performance

4.1 Recognise the possible psychological impacts on self and other rescuers involved in critical incidents

4.2 Participate in debriefing to address individual needs

**Foundation Skills**

*The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.*

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

| Release 1 | This version was released in <i>HLT Health Training Package release 1.0</i> and meets the requirements of the 2012 Standards for Training Packages.<br><br>Significant changes to elements and performance criteria, changes to scope of unit. New evidence requirements for assessment.<br><br>Removal of prerequisite unit. |

### Performance Evidence

e candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role.

There must be evidence that the candidate has completed the following tasks in line with state/territory regulations, first aid codes of practice, Australian Resuscitation Council (ARC) guidelines and workplace procedures:

- Followed DRSABCD in line with ARC guidelines, including:

- performed at least 2 minutes of uninterrupted single rescuer cardiopulmonary resuscitation (CPR) (5 cycles of both compressions and ventilations) on an adult resuscitation manikin placed on the floor
- performed at least 2 minutes of uninterrupted single rescuer CPR (5 cycles both compressions and ventilations) on an infant resuscitation manikin placed on a firm surface
- responded appropriately in the event of regurgitation or vomiting
- managed the unconscious breathing casualty
- followed single rescue procedure, including the demonstration of a rotation of operators with minimal interruptions to compressions
- followed the prompts of an Automated External Defibrillator (AED)
- Responded to at least two simulated first aid scenarios contextualised to the candidate's workplace/community setting, including:
  - conducted a visual and verbal assessment of the casualty
  - demonstrated safe manual handling techniques
  - post-incident debrief and evaluation
  - provided an accurate verbal or written report of the incident
- Applied first aid procedures for the following:
  - allergic reaction
  - anaphylaxis
  - bleeding control
  - choking and airway obstruction
  - envenomation, using pressure immobilisation
  - fractures, sprains and strains, using arm slings, roller bandages or other appropriate immobilisation techniques
  - respiratory distress, including asthma
  - shock

## Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- State/Territory regulations, first aid codes of practice and workplace procedures including:
  - ARC Guidelines relevant to provision of CPR and first aid
  - safe work practices to minimise risks and potential hazards
  - infection control principles and procedures, including use of standard precautions
  - requirements for currency of skill and knowledge
- legal, workplace and community considerations including:
  - awareness of potential need for stress-management techniques and available support following an emergency situation
  - duty of care requirements

- respectful behaviour towards a casualty
- own skills and limitations
- consent
- privacy and confidentiality requirements
- importance of debriefing
- considerations when providing first aid including:
  - airway obstruction due to body position
  - appropriate duration and cessation of CPR
  - appropriate use of an AED
  - chain of survival
  - standard precautions
  - how to conduct a visual and verbal assessment of the casualty
- principles and procedures for first aid management of the following scenarios:
  - abdominal injuries
  - allergic reaction
  - anaphylaxis
  - basic care of a wound
  - bleeding control
  - burns
  - cardiac conditions, including chest pain
  - choking and airway obstruction
  - crush injuries
  - diabetes
  - dislocations
  - drowning
  - envenomation
  - environmental impact, including hypothermia, hyperthermia, dehydration and heat stroke
  - eye and ear injuries
  - fractures
  - febrile convulsions
  - head, neck and spinal injuries
  - minor skin injuries
  - needle stick injuries
  - poisoning and toxic substances
  - respiratory distress, including asthma
  - seizures, including epilepsy
  - shock
  - soft tissue injuries, including strains and, sprains
  - stroke

- unconsciousness
- basic anatomy and physiology relating to:
  - how to recognise a person is not breathing normally
  - chest
  - response/consciousness
  - upper airway and effect of positional change
  - considerations in provision of first aid for specified conditions

## Assessment Conditions

Skills must be demonstrated working individually in an environment that provides realistic in-depth, industry-validated scenarios and simulations to assess candidates' skills and knowledge.

Assessment resources must include:

- adult and infant resuscitation manikins in line with ARC Guidelines for the purpose of assessment of CPR procedures
- adrenaline auto-injector training device
- AED training device
- placebo bronchodilator and spacer device
- roller bandages
- triangular bandages
- workplace First Aid kit
- workplace injury, trauma and/or illness record, or other appropriate workplace incident report form for written reports
- wound dressings

Simulated assessment environments must simulate the real-life working environment where these skills and knowledge would be performed, with all the relevant equipment and resources of that working environment.

## Assessor requirements

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

| Release 1 | <p>This version was released in <i>HLT Health Training Package release 1.0</i> and meets the requirements of the New Standards for Training Packages.</p> <p>Significant changes to elements and performance criteria, changes to scope of unit.</p> <p>New evidence requirements for assessment, including use of contextualised remote scenarios.</p> |

### Application

This unit describes the skills and knowledge required to provide first aid response and emergency life support to a casualty in a remote and/or isolated situation.

The unit applies to workers who may be required to prepare for and provide a first aid response in locations beyond the reach of timely medical assistance.

*Specific licensing /regulatory requirements relating to this competency, including requirements for refresher training should be obtained from the relevant national/state/territory Work Health and Safety Regulatory Authorities.*

## Elements and Performance Criteria

### ELEMENT

### PERFORMANCE CRITERIA

*Elements define the essential outcomes.*

*Performance criteria specify the level of performance needed to demonstrate achievement of the element.*

1. Respond to a remote emergency situation

- 1.1 Plan for isolated travel or work if required, accounting for expected contingencies
- 1.2 Recognise an emergency situation
- 1.3 Identify, assess and manage immediate hazards to health and safety of self and others
- 1.4 Assess the casualty and recognise the need for first aid response
- 1.5 Assess the situation and evaluate options for medical assistance
- 1.6 Evaluate options for transporting casualty or waiting for medical assistance in relation to environmental issues, risks, transport availability and casualty condition

2. Apply appropriate first aid procedures

- 2.1 Perform cardiopulmonary resuscitation (CPR) in accordance with Australian Resuscitation Council (ARC) guidelines
- 2.2 Provide first aid in accordance with established first aid principles
- 2.3 Display respectful behaviour towards casualty
- 2.4 Obtain consent from casualty where possible
- 2.5 Use available resources and equipment to make the casualty as comfortable as possible
- 2.6 Operate first aid equipment according to manufacturer's instructions
- 2.7 Monitor the casualty's condition and respond in accordance with first aid principles

3. Manage the incident

- 3.1 Seek assistance from others present to manage incident circumstances
- 3.2 Establish communication links with emergency response services and convey incident details
- 3.3 Report details of casualty condition, changes in

**ELEMENT**

*Elements define the essential outcomes.*

**PERFORMANCE CRITERIA**

*Performance criteria specify the level of performance needed to demonstrate achievement of the element.*

condition, management and responses

3.4 Assist in the evacuation of the casualty by following directions given by emergency response services as required

3.5 Maintain confidentiality of records and information in line with statutory and/or organisational policies

4. Evaluate the incident and own performance

4.1 Recognise the possible psychological impacts on self and other rescuers involved in critical incidents

4.2 Participate in debriefing to address individual needs

**Foundation Skills**

*The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.*

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

**Unit Mapping Information**

No equivalent unit

| Release 1 | <p>This version was released in <i>HLT Health Training Package release 1.0</i> and meets the requirements of the New Standards for Training Packages.</p> <p>Significant changes to elements and performance criteria, changes to scope of unit.</p> <p>New evidence requirements for assessment, including use of contextualised remote scenarios.</p> |

### Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role.

There must be evidence that the candidate has completed the following tasks in line with state/territory regulations, first aid codes of practice, Australian Resuscitation Council (ARC) guidelines and workplace procedures:

- Followed DRSABCD in line with ARC guidelines, including:
  - performed at least 2 minutes of uninterrupted single rescuer cardiopulmonary resuscitation (CPR) (5 cycles of both compressions and ventilations) on an adult resuscitation manikin placed on the floor

- performed at least 2 minutes of uninterrupted single rescuer CPR (5 cycles both compressions and ventilations) on an infant resuscitation manikin placed on a firm surface
- responded appropriately in the event of regurgitation or vomiting
- managed the unconscious breathing casualty
- followed single rescue procedure, including the demonstration of a rotation of operators with minimal interruptions to compressions
- followed the prompts of an Automated External Defibrillator (AED)
- Responded to at least three simulated first aid scenarios contextualised to the candidate's remote and/or isolated situation:
  - demonstrated safe manual handling techniques
  - conducted a visual and verbal secondary survey assessment of the casualty
  - assessed vital signs, including respirations, pulse and temperature
  - post-incident debrief and evaluation
  - provided an accurate verbal and written report of the incident
- Applied first aid response in a remote situation for the following:
  - allergic reaction
  - anaphylaxis
  - basic care of a wound
  - bleeding control
  - choking and airway obstruction
  - envenomation, using pressure immobilisation
  - environmental impacts, including hypothermia, hyperthermia, dehydration and heat stroke
  - fractures, sprains and strains, using arm slings, roller bandages or other appropriate immobilisation techniques
  - head, neck and spinal injuries, using immobilisation principles
  - respiratory distress, including asthma
  - shock

## Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- State/Territory regulations, first aid codes of practice and workplace procedures including:
  - ARC guidelines relevant to provision of CPR and first aid
  - safe work practices to minimise risks and potential hazards
  - infection control principles and procedures, including use of standard precautions
  - requirements for currency of skill and knowledge
- legal, workplace and community considerations including:

- awareness of potential need for stress-management techniques and available support following an emergency situation
- duty of care requirements
- respectful behaviour towards a casualty
- own skills and limitations
- consent
- privacy and confidentiality requirements
- importance of debriefing
- considerations when providing first aid, including:
  - airway obstruction due to body position
  - appropriate duration and cessation of CPR
  - appropriate use of an AED
  - chain of survival
  - standard precautions
  - how to conduct a visual and verbal secondary survey assessment
  - assessment and interpretation of vital signs, including respirations, temperature and pulse
- principles and procedures for first aid management of the following scenarios, contextualised to the candidate's remote and/or isolated situation:
  - abdominal injuries
  - allergic reaction
  - anaphylaxis
  - basic care of a wound
  - bleeding control
  - burns
  - cardiac conditions, including chest pain
  - choking and airway obstruction
  - crush injuries
  - diabetes
  - dislocations
  - drowning
  - envenomation
  - environmental impact, including hypothermia, hyperthermia, dehydration and heat stroke
  - eye and ear injuries
  - febrile convulsions
  - fractures
  - head, neck and spinal injuries
  - minor skin injuries
  - needle stick injuries

- poisoning and toxic substances
- respiratory distress, including asthma
- seizures, including epilepsy
- shock
- soft tissue injuries, including sprains and strains
- stroke
- unconsciousness
- remote considerations in the provision of first aid, including:
  - typical hazards and strategies for preparing supplies to address contingencies
  - management options relating to transporting casualty, including aero-medical evacuation
  - how to identify and prepare areas for safe evacuation, including aero-medical evacuation
  - how and when to access emergency response services
  - communication systems, equipment and methods available in remote situations
  - priorities of management in first aid when dealing with life-threatening conditions
  - specific considerations contextualised to alpine, desert, marine, rural/remote settings and tropical environments
- basic anatomy and physiology relating to:
  - how to recognise a person is not breathing normally
  - chest
  - response/consciousness
  - upper airway and effect of positional change
  - considerations in provision of first aid for specified conditions, including specific considerations for remote settings

## Assessment Conditions

Skills must be demonstrated working individually in an environment that provides realistic in-depth, industry-validated scenarios and simulations to assess candidates' skills and knowledge.

- Assessment resources must include:
  - adult and infant resuscitation manikins in line with ARC Guidelines for the purpose of assessment of CPR procedures
  - adrenaline auto-injector training device
  - AED training device
  - placebo bronchodilator and spacer device
  - roller bandages
  - thermometer
  - triangular bandages
  - workplace First Aid kit suitable for remote locations

- workplace injury, trauma and/or illness record, or other appropriate workplace incident report form
- wound dressings

Simulated assessment environments must simulate the real-life working environment where these skills and knowledge would be performed, with all the relevant equipment and resources of that working environment.

### **Assessor requirements**

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

| Release 1 | <p>This version was released in <i>HLT Health Training Package release 1.0</i> and meets the requirements of the 2012 Standards for Training Packages.</p> <p>Significant changes to elements and performance criteria, changes to scope of unit.</p> <p>Removal of embedded content from HLTFA412A Apply First Aid.</p> <p>New evidence requirements for assessment.</p> <p>Removal of pre-requisite unit.</p> |

### Application

This unit describes the skills and knowledge required to provide an advanced first aid response, including management of the incident and other first aiders, until the arrival of medical or other assistance.

The unit applies to workers who may be required to provide, coordinate and manage a first aid response across a range of complex situations, including community and workplace settings.

*Specific licensing /regulatory requirements relating to this competency, including requirements for refresher training should be obtained from the relevant national/state/territory Work Health and Safety Regulatory Authorities.*

## Elements and Performance Criteria

### ELEMENT

### PERFORMANCE CRITERIA

*Elements define the essential outcomes.*

*Performance criteria specify the level of performance needed to demonstrate achievement of the element.*

1. Respond to an emergency situation

- 1.1 Recognise an emergency situation
- 1.2 Identify, assess and manage immediate hazards to health and safety of self and others
- 1.3 Assess the casualty and recognise the need for first aid response
- 1.4 Assess the situation and seek assistance from emergency response services
- 1.5 Deploy resources to appropriate locations as required in line with workplace procedures

2. Apply appropriate first aid procedures

- 2.1 Perform cardiopulmonary resuscitation (CPR) in accordance with Australian Resuscitation Council (ARC) guidelines
- 2.2 Provide first aid in accordance with established first aid principles
- 2.3 Display respectful behaviour towards casualty
- 2.4 Obtain consent from casualty where possible
- 2.5 Use available resources and equipment to make the casualty as comfortable as possible
- 2.6 Operate first aid equipment according to manufacturer's instructions
- 2.7 Monitor the casualty's condition and respond in accordance with first aid principles

**ELEMENT****PERFORMANCE CRITERIA**

*Elements define the essential outcomes.*

*Performance criteria specify the level of performance needed to demonstrate achievement of the element.*

3. Coordinate first aid activities until arrival of medical assistance

3.1 Identify available resources required and establish communication links with appropriate personnel, emergency management services and medical assistance as appropriate

3.2 Deploy correct amount of required resources to appropriate locations in an effective manner to ensure timely arrival

3.3 Document the provision of resources and recommend modifications as required

3.4 Monitor the condition of casualties in accordance with first aid principles and workplace procedures

3.5 Coordinate evacuation of casualties according to relevant evacuation procedures

3.6 Arrange support services for personnel involved in the incident in accordance with relevant principles and procedures

4. Communicate details of the incident

4.1 Accurately convey incident details to emergency response services

4.2 Report details of incident in line with organisational policies

4.3 Maintain confidentiality of records and information in line with statutory and/or organisational policies

5. Evaluate the incident and own performance

5.1 Recognise the possible psychological impacts on self and other rescuers involved in critical incidents

5.2 Participate in debriefing to address individual needs

5.3 Evaluate management of the incident and develop an action plan in consultation with relevant parties

5.4 Review contingency planning to identify and select alternative management principles and procedures as required

## Foundation Skills

*The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.*

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Unit Mapping Information

No equivalent unit

## Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role.

There must be evidence that the candidate has completed the following tasks in line with state/territory regulations, first aid codes of practice, Australian Resuscitation Council (ARC) guidelines and workplace procedures:

- followed DRSABCD in line with ARC guidelines, including:

- performed at least 2 minutes of uninterrupted single rescuer cardiopulmonary resuscitation (CPR) (5 cycles of both compressions and ventilations) on an adult resuscitation manikin placed on the floor
- performed at least 2 minutes of uninterrupted single rescuer CPR (5 cycles both compressions and ventilations) on an infant resuscitation manikin placed on a firm surface
- performed at least 2 minutes of Bag-valve-mask ventilation and at least 2 minutes of compression during a two rescuer procedure on an adult resuscitation manikin placed on the floor
- responded appropriately in the event of regurgitation or vomiting
- managed the unconscious breathing casualty
- followed the prompts of a Automated External Defibrillator (AED)
- followed single rescue procedure, including the demonstration of a rotation of operators with minimal interruptions to compressions
- responded to at least three simulated first aid scenarios contextualised to the candidate's workplace/community setting, including:
  - demonstrated safe manual handling techniques
  - conducted a visual and verbal secondary survey assessment of the casualty
  - assessed vital signs (respirations, pulse and temperature)
  - communicated effectively with a first aid team providing direction and coordination of other first aiders
  - post-incident debrief and evaluation
  - provided an accurate verbal and written report of the incident
- applied first aid procedures for the following:
  - allergic reaction
  - anaphylaxis
  - bleeding control
  - choking and airway obstruction
  - conducted a basic triage for multiple casualty incident
  - envenomation (using pressure immobilisation)
  - fractures, sprains and strains (using arm slings, roller bandages or other appropriate immobilisation principles)
  - head, neck and spinal injuries (using immobilisation principles)
  - respiratory distress - including asthma
  - seizures - including epilepsy
  - shock
- located and interpreted workplace policies and procedures

## Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- State/Territory regulations, first aid codes of practice and workplace procedures including:
  - ARC guidelines relevant to provision of CPR and first aid
  - guidelines of Australian national peak clinical bodies
  - safe work practices to deal with risks and potential hazards including manual handling, hazardous substances, dangerous goods and chemicals
  - infection control principles and procedures, including use of standard precautions
  - requirements for currency of skill and knowledge
- legal, workplace and community considerations including:
  - awareness of potential need for stress-management techniques and available support following an emergency situation
  - capabilities of emergency management services
  - consent
  - duty of care requirements
  - importance of debriefing
  - own skills and limitations
  - legal requirements of administration of medication and the rights and responsibilities of the First Aider in the workplace regarding medication
  - privacy and confidentiality requirements
  - respectful behaviour towards a casualty
- considerations when providing first aid including:
  - airway obstruction due to body position
  - appropriate duration and cessation of CPR
  - appropriate use of an AED
  - assessment and interpretation of vital signs, including respirations, temperature and pulse
  - chain of survival
  - how to conduct a visual and verbal secondary survey assessment of casualty
  - priorities of management in first aid when dealing with life-threatening conditions
  - procedures for dealing with casualties who are aged or infirmed
  - procedures for dealing with major and minor accidents in the workplace
  - procedures when providing first aid to children
  - standard precautions
- principles and procedures for first aid management of the following scenarios, including complications:
  - abdominal injuries
  - allergic reaction

- anaphylaxis
- basic care of a wound
- bleeding control
- burns, including thermal, chemical, friction and electrical
- cardiac conditions, including chest pain
- choking and airway obstruction
- crush injuries
- diabetes
- drowning
- emergency childbirth
- envenomation
- environmental impact including hypothermia, hyperthermia, dehydration and heat stroke
- eye and ear injuries
- febrile convulsions
- head, neck and spinal injuries
- levels of consciousness
- needle stick injuries
- poisoning and toxic substances
- respiratory distress, including asthma
- seizures, including epilepsy
- shock
- skin injuries
- soft tissue musculoskeletal, including injuries including sprains, strains, dislocations and fractures
- stroke
- substance misuse, including common drugs and alcohol, including illicit drugs
- basic anatomy and physiology relating to:
  - how to recognise a person is not breathing normally
  - chest, skeleton, joints and muscles
  - response/level of consciousness
  - upper airway and effect of positional change
  - considerations in provision of first aid for specified conditions

## Assessment Conditions

Skills must be demonstrated working individually in an environment that provides realistic in-depth, industry-validated scenarios and simulations to assess candidates' skills and knowledge.

Assessment resources must include:

- adult and infant resuscitation manikins in line with ARC Guidelines for the purpose of assessment of CPR procedures
- adrenaline auto-injector training device
- AED training device.
- bag-valve-mask
- eye patch
- placebo bronchodilator and spacer device
- roller bandages
- thermometer
- triangular bandages
- workplace first Aid kit
- workplace injury, trauma and/or illness record, or other appropriate workplace incident report form
- wound dressings

Simulated assessment environments must simulate the real-life working environment where these skills and knowledge would be performed, with all the relevant equipment and resources of that working environment.

### **Assessor requirements**

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

### Application

This unit describes the skills and knowledge required to use specialised equipment in the provision of resuscitation in line with the Australian Resuscitation Council (ARC) guidelines.

This unit applies to workers who may be required to use specialised equipment to provide resuscitation in a range of complex situations, include community and workplace settings.

*Specific licensing requirements relating to this competency, including requirements for refresher training, should be obtained from the relevant state/territory Work Health and Safety Regulatory Authority.*

### ELEMENT

### PERFORMANCE CRITERIA

*Elements define the essential outcomes.*

*Performance criteria specify the level of performance needed to demonstrate achievement of the element.*

1. Respond to an emergency situation

- 1.1 Recognise an emergency situation
- 1.2 Identify, assess and manage immediate hazards to health and safety of self and others
- 1.3 Assess the casualty and recognise the need for advanced resuscitation response
- 1.4 Assess the situation and seek assistance from emergency response services where required

2. Perform advanced resuscitation

- 2.1 Perform cardiopulmonary resuscitation (CPR) in accordance with ARC guidelines
- 2.2 Provide supplemental oxygen
- 2.3 Display respectful behaviour towards casualty
- 2.4 Obtain consent from casualty where possible
- 2.5 Use available resources and equipment to make the casualty as comfortable as possible
- 2.6 Monitor casualty condition and rectify issues preventing adequate treatment

3. Communicate details of the incident

- 3.1 Accurately convey incident details to emergency response services
- 3.2 Report details of incident in line with organisational policies
- 3.3 Maintain confidentiality of records and information in line with statutory and/or organisational policies

4. Evaluate the incident and own performance

- 4.1 Recognise the possible psychological impacts on self and other rescuers involved in critical incidents
- 4.2 Participate in debriefing to address individual needs
- 4.3 Check, maintain and clean equipment ready for future use

## Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Unit Mapping Information

## Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role.

The demonstrated evidence is performed in line within state/territory regulations, first aid codes of practice, Australian Resuscitation Council (ARC) guidelines and workplace procedures.

- Followed DRSABCD in line with ARC guidelines, including:
  - performed at least 2 minutes of uninterrupted single rescuer cardiopulmonary resuscitation (CPR) (5 cycles of both compressions and ventilations) on an adult resuscitation manikin placed on the floor
  - performed at least 2 minutes of uninterrupted single rescuer CPR (5 cycles both compressions and ventilations) on an infant resuscitation manikin placed on a firm surface
  - performed at least 2 minutes of bag-valve-mask ventilation and at least 2 minutes of compression on an adult resuscitation manikin placed on the floor
  - responded appropriately in the event of regurgitation or vomiting
  - managed the unconscious breathing casualty
  - followed the prompts of an Automated External Defibrillator (AED)
  - followed single rescue procedure, including the demonstration of a rotation of operators with minimal interruptions to compressions
- conducted a visual and verbal secondary survey assessment of the casualty
- assessed vital signs (respirations, pulse and temperature)
- responded to at least three simulated first aid scenarios contextualised to the candidate's workplace/community setting, including:
  - demonstrated safe manual handling techniques
  - clearing the airway using a suction device
  - post-incident debrief and evaluation
  - provided an accurate verbal and written report of the incident
- selected and inserted an oropharyngeal airway adjunct
- administered oxygen to an unconscious/conscious casualty, including:
  - selected and prepared correct oxygen equipment
  - administered oxygen safely at correct flow rate
- monitored and coordinated maintenance of resuscitation equipment
  - dismantling
  - storage
  - disposal
  - cleaning and decontamination
  - checking and diagnosis of faults
- located and interpreted workplace policies and procedures
- 

## Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- State/Territory regulations, first aid codes of practice and workplace procedures including:
  - ARC guidelines relevant to provision of CPR
  - guidelines of Australian national peak clinical bodies
  - safe work practices to deal with risks and potential hazards including manual handling, hazardous substances, dangerous goods and chemicals
  - infection control principles and procedures, including use of standard precautions
  - requirements for currency of skill and knowledge
- legal, workplace or community considerations including:
  - awareness of potential need for stress-management techniques and available support following an emergency situation
  - capabilities of emergency management services
  - consent
  - duty of care requirements
  - importance of debriefing
  - legal requirements of administration of medication and the rights and responsibilities of the First Aider in the workplace regarding medication
  - own skills and limitations
  - privacy and confidentiality requirements
  - respectful behaviour towards a casualty
- considerations when performing resuscitation including:
  - airway obstruction due to body position
  - appropriate duration and cessation of CPR
  - appropriate use of an AED
  - assessment and interpretation of vital signs (respirations, temperature and pulse)
  - benefits, contraindications and complications with the use of an oropharyngeal airway
  - chain of survival
  - how to conduct a visual and verbal secondary survey assessment
  - standard precautions
- considerations when providing supplementary oxygen, including:
  - benefits, contraindications and complications of providing oxygen to a casualty and of providing suction during the application of advanced resuscitation techniques
  - complications with the use of a bag-valve-mask device and suitable strategies to minimise these
  - selection and operation of oxygen masks and other appropriate delivery devices
- basic anatomy, physiology and toxicology as it relates to the provision of advanced resuscitation, including:
  - basic electrical activity associated with normal and abnormal heart rhythm
  - how to recognise a person is not breathing normally
  - relevant organs of the cardio pulmonary system and their operation

- response/level of consciousness
- upper airway and effect of positional change
- methods for cleaning, replenishing, recharging and maintaining resuscitation and oxygen equipment including:
  - actions to rectify problems
  - procedures to ensure operational readiness
  - storage, cleaning, decontamination and safe disposal of consumables
  - troubleshooting to identify minor and major faults
- 

## Assessment Conditions

Skills must be demonstrated working individually in an environment that provides realistic in-depth, industry-validated scenarios and simulations to assess candidates' skills and knowledge.

Assessment resources must include:

- adult and infant resuscitation manikins in line with ARC Guidelines for the purpose of assessment of CPR procedures
- airway model suitable for insertion of an oropharyngeal airway
- Automated External Defibrillator (AED) training device.
- bag-valve-mask
- oropharyngeal airway adjunct
- oxygen resuscitation system with oxygen cylinder
- selection of oxygen masks with tubing; nasal cannula, therapy mask, resuscitation mask with oxygen port
- thermometer
- suction device
- workplace incident, injury, trauma or illness record or other appropriate workplace incident report form.

Simulated assessment environments must simulate the real-life working environment where these skills and knowledge would be performed, with all the relevant equipment and resources of that working environment.

### Assessor requirements

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

# HLTWHS006 Manage personal stressors in the work environment

## Modification History

| Release   | Comments                                                                                                                                                                                                                                                                                                              |
|-----------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Release 1 | <p>This version was released in <i>HLT Health Training Package release 2.0</i> and meets the requirements of the 2012 Standards for Training Packages.</p> <p>Significant changes to the elements and performance criteria. New evidence requirements for assessment including volume and frequency requirements.</p> |

## Application

This unit describes the skills and knowledge required to maintain health and wellbeing by preventing and managing personal stress.

This unit applies to work in a range of health and community services settings, in particular work roles that operate in high stress situations and circumstances.

*The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.*

## Elements and Performance Criteria

### ELEMENT

### PERFORMANCE CRITERIA

*Elements define the essential outcomes*

*Performance criteria describe the performance needed to demonstrate achievement of the element*

1. Develop strategies to manage personal stress

- 1.1 Recognise sources of stress in own job role
- 1.2 Recognise triggers and own response to stress
- 1.3 Identify strategies to effectively prevent, reduce and manage stress
- 1.4 Identify internal and external options and resources for

additional support

1.5 Develop a personal stress management plan that responds to identified stressors and triggers

2. Implement stress management strategies

2.1 Use strategies from personal stress management plan that address personal triggers and stressors

2.2 Organise own workload to minimise stress and inform relevant personnel of any variations and difficulties affecting work requirements

2.3 Identify and adopt strategies to balance work/life priorities

3. Evaluate stress reducing strategies

3.1 Monitor and review effectiveness of stress management strategies

3.2 Adjust strategies not meeting the desired outcome and recognise when additional resources and/or support is needed

3.3 Access internal or external options and resources for additional support to meet desired outcomes of the stress management plan

## Foundation Skills

*The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.*

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Unit Mapping Information

No equivalent unit.

# Assessment Requirements for HLTWHS006 Manage personal stressors in the work environment

## Modification History

| Release   | Comments                                                                                                                                                                                                                                                                                                              |
|-----------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Release 1 | <p>This version was released in <i>HLT Health Training Package release 2.0</i> and meets the requirements of the 2012 Standards for Training Packages.</p> <p>Significant changes to the elements and performance criteria. New evidence requirements for assessment including volume and frequency requirements.</p> |

## Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- developed, implemented and reviewed 1 personal stress management plan that includes identified sources, triggers and responses to stress
- used strategies from personal stress management plan to manage 2 stressful situations in the workplace involving colleagues and/or clients

## Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- sources of stress and how they manifest in health and/or community services work environment including:
  - complex client behaviour (emotional, aggressive, cognitive deficit, non-compliance)
  - grief and loss experienced by workers
  - exposure to stressful working conditions and stressful incidents
- work planning and prioritisation techniques e.g. time management strategies
- legal rights relating to the Fair Work Act
- services available for referral, both within the organisation and in the community e.g. informal/formal debriefing sessions and/or workplace counselling

- self-care techniques including:
  - impact of exercise, diet and nutrition on physical health
  - work/life balance strategies
  - complementary and alternative health options

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions. Where simulation is used, it must reflect real working conditions by modelling industry operating conditions and contingencies, as well as, using suitable facilities, equipment and resources.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

# ICTICT103 Use, communicate and search securely on the internet

## Modification History

| Release   | Comments                                                                                                     |
|-----------|--------------------------------------------------------------------------------------------------------------|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 1.0. |

## Application

This unit describes the skills and knowledge required to connect to the internet, securely send and receive emails, search the internet using web browsers and interact securely and in a socially responsible manner with a range of different internet sites.

It applies to individuals who use business technology to perform a range of routine tasks in the workplace or home office with limited responsibility.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

General ICT

## Elements and Performance Criteria

## Assessment Requirements for ICTICT103 Use, communicate and search securely on the internet

### Modification History

| Release   | Comments                                                                                                     |
|-----------|--------------------------------------------------------------------------------------------------------------|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 1.0. |

### Performance Evidence

Evidence of the ability to:

- connect to and access the internet
- send and receive emails
- secure internet access and email communications
- use search tools to locate information
- use different internet search techniques
- research and select appropriate website
- undertake online transactions
- assess the accuracy, currency, authority and reliability of the site and information located.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

### Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must :

- list basic technical terminology related to reading help files and prompts
- describe the basics of copyright and privacy statements
- explain different types of messages that occur, including error messages and messages to install plug-ins
- list different types of search engines and web browsers
- list procedures for using email applications
- list procedures for evaluating and assessing the authority, reliability and authenticity of information
- outline internet search functions
- describe internet speed and traffic loads related to times of accessing the internet
- describe the makeup and structure of internet addresses

- list organisational guidelines on internet and email use (web etiquette or netiquette)
- describe business process related to online transactions
- describe web browser update techniques
- explain what key words and bookmarks are used for.

## Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the general information and communications technology (ICT) industry, and include access to:

- a personal computer or digital device with internet
- search engines currently used in industry
- organisational policies on internet usage.

Assessors must satisfy NVR/AQTF assessor requirements.

# ICTICT214 Operate application software packages

## Modification History

| Release   | Comments                                                                                                     |
|-----------|--------------------------------------------------------------------------------------------------------------|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 6.0. |

## Application

This unit describes the skills and knowledge required to identify, select and operate commercial software packages, including a word-processing and a spreadsheet application package.

It applies to individuals who utilise different software applications within a small to large office environment to produce diverse documents.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

General ICT

## Elements and Performance Criteria

| ELEMENT                                          | PERFORMANCE CRITERIA                                                                                                                                                                                                                                                                                                                                                                                       |
|--------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <i>Elements describe the essential outcomes.</i> | <i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>                                                                                                                                                                                                                                                                                                     |

# Assessment Requirements for ICTICT214 Operate application software packages

## Modification History

| Release   | Comments                                                                                                     |
|-----------|--------------------------------------------------------------------------------------------------------------|
| Release 1 | This version first released with ICT Information and Communications Technology Training Package Version 6.0. |

## Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- produce three workplace documents using three different software packages including word processing, spreadsheets and one additional software application package on at least one occasion.

In the course of the above, the candidate must:

- apply workplace health and safety (WHS) principles and responsibilities
- follow organisational requirements.

## Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- organisational application software packages
- technical terminology applicable to reading help files and responding to system help prompts
- industry standard business practices applicable to preparing reports using
- features and functions of commercial computing packages and of the industry standard software
- functions and features of Portable Document Formats (PDFs)
- import and export software functions
- document linking functions
- WHS principles and responsibilities
- purpose of input and output devices.

## Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- required hardware device
- industry standard software
- documents detailing organisational style guide and policy
- data required in developing software application documents.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

# LGACOM502B Devise and conduct community consultations

## Modification History

LGACOM502B Release 2: Layout adjusted. Range statement edited.

LGACOM502B Release 1: Primary release.

## Unit Descriptor

This unit covers devising and conducting community consultations and reporting on results. The vital and unique responsibility councils have to engage and consult with communities in order to respond to the needs of the community in a timely and effective manner is recognised.

## Application of the Unit

This unit supports the attainment of skills and knowledge required for competent workplace performance in councils of all sizes. Knowledge of the legislation and regulations within which councils must operate is essential. The unique nature of councils, as a tier of government directed by elected members and reflecting the needs of local communities, must be appropriately reflected.

## Licensing/Regulatory Information

Not applicable.

## Pre-Requisites

Not applicable.

## Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency

Performance criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of performance is to be

consistent with the Evidence Guide.

## Elements and Performance Criteria

| ELEMENT                                  | PERFORMANCE CRITERIA                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |
|------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1. Devise consultation strategies        | <p>1.1. A range of consultation strategies is identified and assessed for suitability.</p> <p>1.2. <b>Interested and affected parties</b> are identified.</p> <p>1.3. <b>Resources</b> required to conduct consultation are assessed.</p> <p>1.4. <b>Consultation strategies</b> are chosen that <b>enable and encourage relevant groups</b> or individuals to be involved.</p> <p>1.5. <b>Legislative</b> and council requirements are reviewed to ensure strategies meet all criteria.</p>                                                                                                                                                                                        |
| 2. Conduct consultations                 | <p>2.1. <b>Information</b> is prepared that is clear, accurate and appropriate to the needs of all parties.</p> <p>2.2. All people involved in conducting the consultations are briefed on the process of consultation and the parties involved.</p> <p>2.3. <b>Information is presented</b> to affected parties at an appropriate time and place.</p> <p>2.4. <b>Access and equity</b> requirements are implemented in the consultations.</p> <p>2.5. Measures to expedite community consultation are taken to ensure consultation occurs within an identified time frame.</p> <p>2.6. Consultation is undertaken in an orderly manner to ensure all viewpoints are canvassed.</p> |
| 3. Record, analyse and report on results | <p>3.1. Public consultation responses and processes are formatted to enable informed decision making to proceed.</p> <p>3.2. Appropriate suggestions for improvement are incorporated into design parameters.</p> <p>3.3. Summaries of responses and adopted amendments are provided to interested parties to ensure public consultation is recognised.</p> <p>3.4. Other issues raised during consultation are directed to relevant department or person to respond to community concern.</p> <p>3.5. An accurate report on community consultation that includes recommendations is prepared to enable informed decision making to occur.</p>                                      |

**ELEMENT****PERFORMANCE CRITERIA**

- 3.6. The overall effectiveness of the consultation process is reviewed and evaluated and action is taken where necessary.

## Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit

### Required Skills

- consultation, presentation, negotiation and report writing
- research
- planning and organising
- information gathering and analysis

### Required Knowledge

- relevant council policies and procedures
- relevant legislation, including planning and anti-discrimination
- relevant sections of local government act
- access and equity issues
- strategies for consultation
- codes of conduct and ethics

## Evidence Guide

### Overview of assessment requirements

A person who demonstrates competency in this unit will be able to perform the outcomes described in the Elements to the required performance level detailed in the Performance Criteria. The knowledge and skill requirements described in the Range Statement must also be demonstrated. For example, knowledge of the legislative framework and safe work practices that underpin the performance of the unit are also required to be demonstrated.

### Critical aspects of evidence to be considered

The demonstrated ability to devise and conduct community consultations where:

- consultation ensures council's image or reputation is maintained or enhanced
- community consultation produces valid and useful information

|                                                                      |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |
|----------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Context of assessment</b>                                         | Assessment of performance requirements in this unit should be undertaken within the context of the local government framework. Competency is demonstrated by performance of all stated criteria, including the Range of Variables applicable to the workplace environment.                                                                                                                                                                                                                                                                                                               |
| <b>Method of assessment</b>                                          | <p>The following assessment methods are suggested:</p> <ul style="list-style-type: none"> <li>• observation of the learner performing a range of workplace tasks over sufficient time to demonstrate handling of a range of contingencies</li> <li>• written and/or oral questioning to assess knowledge and understanding</li> <li>• completion of workplace documentation</li> <li>• third-party reports from experienced practitioners</li> <li>• completion of self-paced learning materials including personal reflection and feedback from trainer, coach or supervisor</li> </ul> |
| <b>Evidence required for demonstration of consistent performance</b> | Evidence should be gathered over a period of time in a range of actual or simulated management environments.                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |
| <b>Resource implications</b>                                         | <p>Access to a range of real or simulated consultation processes including:</p> <ul style="list-style-type: none"> <li>• public and community meetings and forums</li> <li>• surveys and door knocks</li> <li>• appropriate communications equipment and aids such as overhead projectors and computer-based presentations</li> </ul>                                                                                                                                                                                                                                                    |

## Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

|                                                            |                                                                                                                                                                                                                                                                                           |

Develop environmental health education, promotion and awareness strategies   | <p>1.1 Goals and objectives for health education, promotion and awareness are established.</p> <p>1.2 Information to assist in health needs analysis is identified, researched and collated.</p> <p>1.3 Health surveys that identify <b>public health needs</b> are developed.</p> <p>1.4 Existing services and strategies are reviewed and evaluated to ensure relevance.</p> <p>1.5 Community networks are established and maintained to ensure broad exposure to local development needs.</p>                                       |
| 2. Implement environmental health education, promotion and awareness strategies | <p>2.1 Appropriate health education, promotion and awareness programs are developed based on community development needs and in accordance with council policy.</p> <p>2.2 Programs are implemented using appropriate educational, promotional and awareness activities.</p> <p>2.3 Health education, <b>promotion</b> and awareness <b>programs</b> are monitored and evaluated to assess performance against goals and objectives of the program.</p>                                                                                |
| 3. Undertake entrepreneurial programs                                           | <p>3.1 The opportunity for an <b>entrepreneurial program</b> is identified from the market place.</p> <p>3.2 The <b>viability</b> of a program is assessed by <b>internal and external consultation</b>.</p> <p>3.3 Reports are prepared for council with recommendations and supporting information.</p> <p>3.4 The program is implemented and monitored to ensure objectives are met within budget, resources and time limitations.</p> <p>3.5 The program is reviewed and assessed using consumer response and internal audits.</p> |

## Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit

### Required Skills

- program planning
- consulting with public
- budget management

- presenting to public

### Required Knowledge

- council structure, services and relevant policies
- health services
- health education policy
- promotional strategies

## Evidence Guide

### Overview of assessment requirements

A person who demonstrates competency in this unit will be able to perform the outcomes described in the Elements to the required performance level detailed in the Performance Criteria. The knowledge and skill requirements described in the Range Statement must also be demonstrated. For example, knowledge of the legislative framework and safe work practices that underpin the performance of the unit are also required to be demonstrated

### Critical aspects of evidence to be considered

Goals and objectives of programs are achieved.

### Context of assessment

On the job or in a simulated work environment.

### Method of assessment

The following assessment methods are suggested:

- observation of the learner performing a range of workplace tasks over sufficient time to demonstrate handling of a range of contingencies
- written and/or oral questioning to assess knowledge and understanding
- completing workplace documentation
- third-party reports from experienced practitioners
- completion of self-paced learning materials including personal reflection and feedback from trainer, coach or supervisor

### Evidence required for demonstration of consistent performance

Competency must be demonstrated in all Elements across a range of variables relevant to council's size, location and strategic plan.

### Resource implications

Access to a workplace or simulated case study that provides relevant equipment and materials such as videotapes and pamphlets.

## Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

|                                                                        |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |

## Unit Sector(s)

Health and Environment

# LGAEHRR504C Implement public environmental health education programs

## Modification History

LGAEHRR504C Release 2: Layout adjusted.

LGAEHRR504C Release 1: Primary release.

## Unit Descriptor

This unit covers the development and delivery of public environmental health education, promotion and awareness strategies, including campaigns and programs.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

## Application of the Unit

This unit supports the attainment of skills and knowledge required for competent workplace performance within councils of varying size and locations. Knowledge of the legislation and regulations within which councils must operate is essential. The role of council staff, elected members and management in protecting and managing the natural and built environment must be appropriately reflected.

## Licensing/Regulatory Information

Not applicable.

## Pre-Requisites

Not applicable.

## Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a

Performance criteria describe the required performance needed to demonstrate achievement of the element. Where **bold italicised** text is used, further information is detailed in the

## Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit

### Required Skills

- information gathering and research
- survey design
- cooperative and professional communication and interaction with a wide range of stakeholders
- problem solving and conflict management
- well developed and effective written communication
- implementation of promotional strategies
- program planning
- networking
- implementation of public consultation strategies
- implementation of program evaluation strategies
- participation in public presentations
- budget management
- monitoring own work and adjusting to meet agreed standards and expectations
- engaging in activities that promote own ongoing learning requirements, which may include maintaining current knowledge of legislation and common law
- using technology relevant to the job/role, which may include the use of computers and other relevant office technology

### Required Knowledge

- council structure and services
- relevant council procedures
- relevant legislation and standards
- principles of positive interaction with diverse groups within the community
- community consultation and information strategies
- local health services and relevant professionals
- council's health education policy
- current and potential health issues affecting the community

## Evidence Guide

### Overview of assessment requirements

A person who demonstrates competency in this unit will be able to perform the outcomes described in the elements to the required performance level detailed in the performance criteria. The unit's skill and knowledge requirements must also be demonstrated. For example, knowledge of the legislative framework and safe work practices that underpin the

|                                                                      |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |

Health and Environment

# LGAPLEM403A Attend requests for building and planning information and advice

## Modification History

LGAPLEM403A Release 2: Layout adjusted.

LGAPLEM403A Release 1: Primary release.

## Unit Descriptor

This unit covers responding to and prioritising requests for building and planning information and advice.

## Application of the Unit

This unit supports the attainment of skills and knowledge required for competent workplace performance in councils of all sizes. Knowledge of the legislation and regulations within which councils must operate is essential. The unique nature of councils, as a tier of government directed by elected members and reflecting the needs of local communities, must be appropriately reflected.

## Licensing/Regulatory Information

Not applicable.

## Pre-Requisites

Not applicable.

## Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency

Performance criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

## Elements and Performance Criteria

| ELEMENT                                                    | PERFORMANCE CRITERIA                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |
|------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1 <b>Identify nature and type of service requests</b>      | <p>1.1 <b>Requests</b> are assessed to establish if they are within the <b>jurisdiction and ability</b> of the building or planning area of relevant authority and are then referred as appropriate.</p> <p>1.2 Requests are assessed to establish necessity for compliance with statutory requirements.</p> <p>1.3 Time required to service requests is established to identify if an immediate response will satisfy requirements.</p> <p>1.4 Requests requiring additional research are prioritised and recorded to ensure important matters are finalised promptly.</p> |
| 2 <b>Research information relevant to service requests</b> | <p>2.1 Accurate <b>research</b> and action are undertaken in priority order to obtain required information or result.</p> <p>2.2 Sources of relevant information are correctly identified.</p> <p>2.3 <b>Information</b> is collated to enable preparation of a satisfactory <b>response</b> to the request.</p> <p>2.4 <b>Professional advice</b> is identified and incorporated where appropriate.</p> <p>2.5 Affected relevant authorities are consulted.</p>                                                                                                            |
| 3 <b>Determine suitable response</b>                       | <p>3.1 Response is prepared within statutory constraints and levels of authority that protects council interests.</p> <p>3.2 Response facilitates discussion and consultation so that client expectations can be satisfied.</p> <p>3.3 Relevant form of response is selected within council policies and procedures.</p>                                                                                                                                                                                                                                                    |
| 4 <b>Communicate information and advice</b>                | <p>4.1 Written information and advice provided are clear and concise to minimise the need for follow-up action.</p> <p>4.2 Verbal advice is presented clearly and in a courteous manner so that the need for follow up is minimised.</p> <p>4.3 Advice given is recorded according to council procedures.</p> <p>4.4 Discretionary advice on major issues is made available according to council policy and procedures.</p>                                                                                                                                                 |

## Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit

## Required Skills

- telephone, face-to-face and front counter customer service
- interpersonal
- written and verbal communication strategies within a multicultural/diverse community context
- research and calculations

## Required Knowledge

- relevant building and planning legislation requirements
- council development control, planning and customer service policies and practices
- relevant environmental legislation and practices
- council building and planning application procedures
- materials and construction techniques

## Evidence Guide

|                                                      |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |
|------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Overview of assessment requirements</b>           | A person who demonstrates competency in this unit will be able to perform the outcomes described in the Elements to the required performance level detailed in the Performance Criteria. The knowledge and skill requirements described in the Range Statement must also be demonstrated. For example, knowledge of the legislative framework and safe work practices that underpin the performance of the unit are also required to be demonstrated.                                                                                                                       |
| <b>Critical aspects of evidence to be considered</b> | Accurate, timely and courteous advice is provided.<br>All relevant building and planning requirements are met.                                                                                                                                                                                                                                                                                                                                                                                                                                                              |
| <b>Context of assessment</b>                         | On the job or in a simulated work environment.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |
| <b>Method of assessment</b>                          | The following assessment methods are suggested: <ul style="list-style-type: none"><li>• observation of the learner performing a range of workplace tasks over sufficient time to demonstrate handling of a range of contingencies</li><li>• written and/or oral questioning to assess knowledge and understanding</li><li>• completion of workplace documentation</li><li>• third-party reports from experienced practitioners</li><li>• completion of self-paced learning materials including personal reflection and feedback from trainer, coach or supervisor</li></ul> |

**Evidence required for demonstration of consistent performance**

Evidence will need to be gathered over time across a range of variables depending on council work flow and planning cycle as long as the critical aspects of evidence can be demonstrated.

**Resource implications**

Access to a workplace or case study that encompasses such resources as:

- copies of relevant building and planning legislation
- examples of council policies and procedures
- reports and council records
- experts such as building surveyors, engineers and town planners

## Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

***Requests*** may include:

- verbal (face-to-face or telephone)
- written
- complaints
- technical advice
- problems
- information
- copies of plans
- property enquiries
- access to council records

***Jurisdiction and ability*** may include:

- freedom of information
- copyright
- council policy
- relevant building and planning legislation
- state acts and policies

***Research*** may include:

- literature survey
- obtaining telephone information
- checking council records
- statutory controls

***Information*** may include:

- written records
- oral
- anecdotes
- reports
- instructions

- directions from supervisor or management
- formal and informal interviews
- team meetings
- reports from other services
- agencies
- specialists
- experts
- media
- verbal
- written

**Response** may include:

**Professional advice** may include:

- statutory authorities
- building surveyors
- engineers
- town planners

## Unit Sector(s)

Planning Units

# LGAPLEM404A Prepare and present geographic information systems data

## Modification History

LGAPLEM404A Release 2: Layout adjusted.

LGAPLEM404A Release 1: Primary release.

## Unit Descriptor

This unit covers designing, generating and producing information to meet user requirements.

## Application of the Unit

This unit supports the attainment of skills and knowledge required for competent workplace performance in councils of all sizes. Knowledge of the legislation and regulations within which councils must operate is essential. The unique nature of councils, as a tier of government directed by elected members and reflecting the needs of local communities, must be appropriately reflected.

## Licensing/Regulatory Information

Not applicable.

## Pre-Requisites

Not applicable.

## Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency

Performance criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

## Elements and Performance Criteria

| ELEMENT                                     | PERFORMANCE CRITERIA                                                                                                                                                                                                                                                                                                                                                                                                               |
|---------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1 <b>Identify presentation requirements</b> | <p>1.1 Presentation requirements are determined in consultation with end user.</p> <p>1.2 Extent, content and intended use of output are considered in recommending presentation format and medium.</p>                                                                                                                                                                                                                            |
| 2 <b>Format and present data</b>            | <p>2.1 Relevant data elements are assembled.</p> <p>2.2 Procedures are designed for formatting data into compatible format.</p> <p>2.3 <b>Data formats</b> are selected to meet customer requirements.</p> <p>2.4 Information is presented to meet user requirements using suitable media in an attractive, informative and useable manner.</p> <p>2.5 Information is presented in line with appropriate Australian standards.</p> |
| 3 <b>Ensure customer satisfaction</b>       | <p>3.1 Work is completed in line with council <b>quality requirements</b>.</p> <p>3.2 Feedback is sought from customer regarding satisfaction with information and presentation.</p> <p>3.3 Any areas of dissatisfaction are resolved in line with council policies and procedures.</p> <p>3.4 Customer feedback is analysed and used as a quality improvement tool.</p>                                                           |

## Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit

### Required Skills

- layout and design
- attention to detail
- consultation and negotiation with customers

### Required Knowledge

- display principles including colour, composition, layout, text and line style, appropriate scale, media, font types and sizes, legends and projectives
- use of software and hardware such as GIS, CAD, desktop publishing, desktop mapping,

multimedia, graphic animation, plotters, printers and terminals

- Australian standards: drawing
- council policies relevant to information presentation

## Evidence Guide

Elements describe the essential outcomes of a Unit of Competency

Performance criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

## Elements and Performance Criteria

| ELEMENT                                                                    | PERFORMANCE CRITERIA                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |
|----------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1 <b>Assess resource availability</b>                                      | <p>1.1 Data on <b>resources</b> where council can influence use are identified and collated in a comprehensive manner.</p> <p>1.2 Targeted resources are defined in-house and/or in the local government area by type, amount and degree of availability.</p>                                                                                                                                                                                                                                                                                                                                              |
| 2 <b>Assess current resource utilisation</b>                               | <p>2.1 Reliable measurable indicators of resource utilisation are identified to provide data on resource consumption.</p> <p>2.2 Measurement is undertaken accurately and comprehensively.</p> <p>2.3 Comparisons are made against identified practice from a variety of sources and accepted standards of performance.</p>                                                                                                                                                                                                                                                                                |
| 3 <b>Develop strategies for efficient resource usage</b>                   | <p>3.1 The potential for efficient resource usage is identified.</p> <p>3.2 A practical feasibility analysis is carried out on opportunities and options for minimisation in the local context.</p> <p>3.3 Strategies are selected and prioritised based on effectiveness, efficiency and availability of resources.</p> <p>3.4 Personnel responsible for strategy implementation are identified.</p> <p>3.5 Strategies are presented at appropriate organisational level for endorsement and are referred to appropriate personnel for implementation.</p>                                                |
| 4 <b>Monitor and review effectiveness of ways to reduce resource usage</b> | <p>4.1 Regular data is collected and analysed to provide accurate measures of performance.</p> <p>4.2 Comparisons are made with strategy objectives to <b>assess</b> effectiveness.</p> <p>4.3 Changes to implementation strategy are made as required in a timely manner to ensure outcomes are achieved or alternatives are introduced.</p> <p>4.4 <b>Information</b> obtained during monitoring and review is used to develop new strategies that are based on accumulated knowledge and experience.</p> <p>4.5 Information is shared on a regular basis with other councils and relevant agencies.</p> |

## Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit

### Required Skills

- data gathering
- analytical
- budget cycle
- program planning, review and monitoring
- evaluation processes
- presentation

### Required Knowledge

- environmental issues
- principles of ecologically sustainable development
- impacts on the environment of overuse of resources
- state of the environment reports
- relevant legislation
- available resources
- minimisation of resource usage
- community needs and expectations
- regulations, standards and policies
- training requirements
- community information
- community demographics
- council policies and protocols

## Evidence Guide

### Overview of assessment requirements

A person who demonstrates competency in this unit will be able to perform the outcomes described in the Elements to the required performance level detailed in the Performance Criteria. The knowledge and skill requirements described in the Range Statement must also be demonstrated. For example, knowledge of the legislative framework and safe work practices that underpin the performance of the unit are also required to be demonstrated.

### Critical aspects of evidence to be considered

Comprehensive data of local relevant resources.

Relevant data gathered from a variety of sources.

Analysis of data to indicate options for sustainable use of resources.

|                                                                      |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |

|                                                                      | <p>Evidence of consultation with appropriate stakeholders to gain support for identified strategies.</p> <p>Clear and accessible reports that provide practical strategies.</p> <p>Evidence of review and monitoring of strategies.</p> <p>Material prepared and disseminated to community and other stakeholders.</p>                                                                                                                                                                                                                                                                   |
| <b>Context of assessment</b>                                         | On the job or in a simulated work environment.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |
| <b>Method of assessment</b>                                          | <p>The following assessment methods are suggested:</p> <ul style="list-style-type: none"> <li>• observation of the learner performing a range of workplace tasks over sufficient time to demonstrate handling of a range of contingencies</li> <li>• written and/or oral questioning to assess knowledge and understanding</li> <li>• completion of workplace documentation</li> <li>• third-party reports from experienced practitioners</li> <li>• completion of self-paced learning materials including personal reflection and feedback from trainer, coach or supervisor</li> </ul> |
| <b>Evidence required for demonstration of consistent performance</b> | Evidence will need to be gathered over time across a range of variables.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |
| <b>Resource implications</b>                                         | <p>Access to natural resources which form the focus of the assessment, including:</p> <ul style="list-style-type: none"> <li>• water</li> <li>• land</li> <li>• soil</li> <li>• rock</li> <li>• air.</li> <li>• Access to previously collected data from sources including:</li> <li>• surveys</li> <li>• government reports</li> <li>• academic research</li> <li>• the Internet</li> </ul>                                                                                                                                                                                             |

## Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in

the Performance Criteria is detailed below.

**Resources** may include:

- water
- energy
- timber
- soil, sand and rock
- ores
- air

**Assessment** may include:

- audits, such as energy audits
- surveys

**Information** may include:

- Internet information
- state of the environment reports
- new technology developments related to sustainability
- results of monitoring and research

## Unit Sector(s)

Planning

# LGAPLEM506A Improve community knowledge and skills in environmental management practices

## Modification History

LGAPLEM506A Release 2: Layout adjusted.

LGAPLEM506A Release 1: Primary release.

## Unit Descriptor

This unit covers identifying, implementing and reviewing methods for improving community knowledge and skills in environmental management practices.

## Application of the Unit

This unit supports the attainment of skills and knowledge required for competent workplace performance in councils of all sizes. Knowledge of the legislation and regulations within which councils must operate is essential. The unique nature of councils, as a tier of government directed by elected members and reflecting the needs of local communities, must be appropriately reflected.

## Licensing/Regulatory Information

Not applicable.

## Pre-Requisites

Not applicable.

## Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency

Performance criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

## Elements and Performance Criteria

| ELEMENT                                                                                                                                      | PERFORMANCE CRITERIA                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |
|----------------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1 <b>Identify the demographic composition of the community, and of interest groups and organisations in the community</b>                    | <p>1.1 Demographic <b>data on community</b> is gathered and collated.</p> <p>1.2 Community interest groups and organisations are identified.</p> <p>1.3 Data is analysed to identify the composition and characteristics of the local community.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |
| 2 <b>Identify community need for information, skills and opportunities for involvement in environmental management practices</b>             | <p>2.1 Relevant information to assist <b>community knowledge , skills</b> and opportunities for community involvement in environmental management is identified, researched and collated.</p> <p>2.2 Links with community interest groups, organisations and the broader community are established to identify information, skills and opportunities.</p> <p>2.3 Community needs and opportunities for community involvement are established.</p> <p>2.4 Gaps between expectations and current environmental management practices in the community are identified.</p> <p>2.5 The need for modification or improvement of existing environmental practices in the community is identified.</p> <p>2.6 New areas that require the implementation of environmental management practices in the community are identified.</p> |
| 3 <b>Identify and assess the effectiveness of methods for creating and raising community awareness of environmental management practices</b> | <p>3.1 Data on the effectiveness of various methods is gathered and analysed in the context of known community data and environmental management targets.</p> <p>3.2 <b>Criteria</b> for determining the range and effectiveness of methods are determined, based on known information.</p> <p>3.3 Criteria are applied to known methods in order to determine relative effectiveness.</p> <p>3.4 Specialist knowledge and skills are applied to determine the most suitable methods in the community.</p>                                                                                                                                                                                                                                                                                                                 |
| 4 <b>Implement appropriate methods to improve community awareness, skills and involvement in community environmental management</b>          | <p>4.1 Financial resources are identified within budget cycles to support the achievement of required outcomes.</p> <p>4.2 Personnel are identified, trained and assigned to tasks so that strategy requirements for skills and knowledge are met.</p> <p>4.3 Physical facilities and equipment are identified and procured within budget cycles.</p> <p>4.4 Prioritised methods are implemented appropriately by identified staff.</p> <p>4.5 Improvement in community awareness of environmental</p>                                                                                                                                                                                                                                                                                                                     |

| ELEMENT                                                   | PERFORMANCE CRITERIA                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |
|-----------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>practices</b>                                          | issues is achieved in accordance with local policy, procedures and relevant legislative requirements.                                                                                                                                                                                                                                                                                                                                                                                                      |
| <b>5 Monitor and review levels of community awareness</b> | <p>5.1 Regular data is collected and analysed to provide accurate measures of performance.</p> <p>5.2 Comparisons are made with required outcomes to assess effectiveness.</p> <p>5.3 Recommendations are made for changes to methods and systems.</p> <p>5.4 Changes to methods and systems are made to ensure outcomes are achieved.</p> <p>5.5 Information obtained during monitoring and review is used to develop new methods and systems that are based on accumulated knowledge and experience.</p> |

## Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit

### Required Skills

- collecting and analysing quantitative and qualitative data
- community consultation
- community education
- presenting information to diverse individuals or groups
- programming activities
- program planning, implementation and review
- budgeting
- evaluating

### Required Knowledge

- environmental issues
- community needs and expectations
- council structure, services, policies and procedures
- training requirements and networks
- community development strategies
- native title

## Evidence Guide

**Overview of assessment requirements** A person who demonstrates competency in this unit will be able to perform the outcomes described in the Elements to the required performance level detailed in the Performance Criteria. The knowledge and skill requirements described in the Range Statement must also be demonstrated. For example, knowledge of the legislative framework and safe work practices that underpin the performance of the unit are also required to be demonstrated.

**Critical aspects of evidence to be considered**

A range of relevant environmental management practices are identified and documented.

Community consultation is carried out and documented.

Resources are identified within budget cycle.

Topics are prioritised relevant to community expectations, identified outcomes and resource constraints.

A variety of methods to improve community knowledge, skills and opportunities for involvement is activated.

Monitoring and review process is carried out and results are documented.

**Context of assessment** On the job or in a simulated work environment.

**Method of assessment** The following assessment methods are suggested:

- observation of the learner performing a range of workplace tasks over sufficient time to demonstrate handling of a range of contingencies
- written and/or oral questioning to assess knowledge and understanding
- completion of workplace documentation
- third-party reports from experienced practitioners
- completion of self-paced learning materials including personal reflection and feedback from trainer, coach or supervisor

**Evidence required for demonstration of consistent performance** Evidence will need to be gathered over time across a range of variables.

**Resource implications** Access to relevant data sets including:

- Australian Bureau of Statistics
- community profiles
- real or simulated community consultation processes such as workshops

- forums
- participation in community events

## Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

- |                                                |                                                                                                                                                                                                                                                                                                                                                                                                                                             |

## Unit Sector(s)

Planning

# LGAPLEM606B Develop ecologically sustainable land management systems

## Modification History

LGAPLEM606B Release 2: Layout adjusted.

LGAPLEM606B Release 1: Primary release.

## Unit Descriptor

This unit covers developing, implementing and monitoring ecologically sustainable land management systems.

## Application of the Unit

This unit supports the attainment of skills and knowledge required for competent workplace performance in councils of all sizes. Knowledge of the legislation and regulations within which councils must operate is essential. The unique nature of councils, as a tier of government directed by elected members and reflecting the needs of local communities, must be appropriately reflected.

## Licensing/Regulatory Information

Not applicable.

## Pre-Requisites

Not applicable.

## Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency

Performance criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

## Elements and Performance Criteria

| ELEMENT                                                                 | PERFORMANCE CRITERIA                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |
|-------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>1 Identify current land uses, condition and practices</b>            | <p>1.1 Existing data is collated and reviewed to identify current land uses, condition and practices.</p> <p>1.2 Need for additional information is assessed as required.</p>                                                                                                                                                                                                                                                                                                                                                                                           |
| <b>2 Undertake a land capability study</b>                              | <p>2.1 Information needs to assess land capability are determined.</p> <p>2.2 Suitable methods to collate information on land capability are established.</p> <p>2.3 Information on land capability is collected from primary and secondary sources using objective and best practice techniques.</p> <p>2.4 Data to identify major characteristics of land capability is analysed, collated and tabulated.</p> <p>2.5 A clearly written and illustrated report is prepared on land capability with clearly documented conclusions supported by available evidence.</p> |
| <b>3 Develop optional land management strategies</b>                    | <p>3.1 Information on land capability, condition and uses is assessed to identify evidence of inappropriate practices.</p> <p>3.2 Local, regional and national significance factors are considered in the review of land capability.</p> <p>3.3 Preferred land use options are established.</p> <p>3.4 Areas of degradation requiring urgent attention are classified.</p> <p>3.5 Appropriate land uses are clearly established based on an assessment of land capability, planning zone modifications and existing conditions.</p>                                     |
| <b>4 Develop action plans for identified land management strategies</b> | <p>4.1 Action plans to implement strategies are prepared that set priorities, time lines and relevant responsibilities.</p> <p>4.2 Draft strategy documentation is prepared that clearly presents all data and recommendations.</p> <p>4.3 Draft strategy is released for public comment and provides adequate time for considered input.</p> <p>4.4 Final strategy and action plan are prepared incorporating public and expert input to assist in achieving strategy objectives.</p>                                                                                  |
| <b>5 Implement strategies to achieve ecologically sustainable land</b>  | <p>5.1 Educational packages are developed to inform land owners of preferred strategies for land use.</p> <p>5.2 An appropriate protocol for council staff is prepared.</p> <p>5.3 Cooperative and consultative arrangements are established</p>                                                                                                                                                                                                                                                                                                                        |

| ELEMENT                                                                     | PERFORMANCE CRITERIA                                                                                                                                   |
|-----------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>management</b>                                                           | with other land management authorities, landowners and adjacent council.                                                                               |
|                                                                             | 5.4 Action plans based on endorsed strategies are implemented in accordance with agreed time lines and budget.                                         |
| <b>6 Monitor and review the effectiveness of land management strategies</b> | 6.1 Regular data is collected and analysed to provide accurate measures on performance.                                                                |
|                                                                             | 6.2 Comparisons are made with strategy objectives to assess effectiveness.                                                                             |
|                                                                             | 6.3 Changes to strategy are made as required to ensure outcomes are achieved.                                                                          |
|                                                                             | 6.4 Information obtained during monitoring and review is used to develop new <b>strategies</b> that are based on accumulated knowledge and experience. |

## Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit

### Required Skills

- data collection
- analytical
- presentation
- policy planning
- program planning
- monitoring
- consultation with diverse community and relevant authorities
- budgeting and budget cycle

### Required Knowledge

- agricultural and forestry practices
- land capabilities and economics
- land management practices
- council structure and services
- council planning
- relevant organisations
- relevant legislation, including native title

## Evidence Guide

|                                                                      |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |
|----------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Overview of assessment requirements</b>                           | A person who demonstrates competency in this unit will be able to perform the outcomes described in the Elements to the required performance level detailed in the Performance Criteria. The knowledge and skill requirements described in the Range Statement must also be demonstrated. For example, knowledge of the legislative framework and safe work practices that underpin the performance of the unit are also required to be demonstrated.                                                                                                                                    |
| <b>Critical aspects of evidence to be considered</b>                 | <p>The demonstrated ability to:</p> <ul style="list-style-type: none"> <li>• collect and analyse information on land capability and sustainable practices</li> <li>• write and illustrate appropriately a report on land capability and sustainability challenges and opportunities</li> <li>• produce action plans with time lines and responsibilities for identified priorities</li> <li>• develop and disseminate educational materials</li> <li>• put in place, monitor and review processes and reports</li> <li>• account for the relationship to native title</li> </ul>         |
| <b>Context of assessment</b>                                         | Assessment of performance requirements in this unit should be undertaken within the context of the local government framework. Competency is demonstrated by performance of all stated criteria, including the Range of Variables applicable to the workplace environment.                                                                                                                                                                                                                                                                                                               |
| <b>Method of assessment</b>                                          | <p>The following assessment methods are suggested:</p> <ul style="list-style-type: none"> <li>• observation of the learner performing a range of workplace tasks over sufficient time to demonstrate handling of a range of contingencies</li> <li>• written and/or oral questioning to assess knowledge and understanding</li> <li>• completion of workplace documentation</li> <li>• third-party reports from experienced practitioners</li> <li>• completion of self-paced learning materials including personal reflection and feedback from trainer, coach or supervisor</li> </ul> |
| <b>Evidence required for demonstration of consistent performance</b> | Evidence should be gathered over a period of time in a range of actual or simulated management environments.                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |
| <b>Resource implications</b>                                         | <p>Access to a workplace or simulated case study that includes access to:</p> <ul style="list-style-type: none"> <li>• an appropriate land area</li> </ul>                                                                                                                                                                                                                                                                                                                                                                                                                               |

- real or simulated consultation processes
- real or simulated data systems
- council staff
- relevant technical information

## Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

***Strategies*** may include:

- formalised land use incentive programs
- financial incentives and disincentives

## Unit Sector(s)

Land Management

# MARF006 Observe personal safety and social responsibility

## Modification History

Release 2. ISC upgrade. KE amended to better align with the STCW.

Release 1. New unit of competency.

## Application

This unit involves the skills and knowledge required to contribute to the safety management system processes where there is responsibility for own work outputs.

This unit applies to people working in the maritime industry requiring a Certificate of Safety Training.

This unit has links to legislative and certification requirements.

## Pre-requisite Unit

Not applicable.

## Competency Field

F - Operational Quality and Safety

## Unit Sector

Not applicable.

## Elements and Performance Criteria

| ELEMENTS                                  | PERFORMANCE CRITERIA                                                                                                                                                                                                                     |
|-------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Elements describe the essential outcomes. | Performance criteria describe the performance needed to demonstrate achievement of the element.                                                                                                                                          |
| <b>1 Plan and conduct work safely</b>     | <b>1.1</b> Individual rights and responsibilities on board a vessel are interpreted and fulfilled<br><br><b>1.2</b> Work is planned in accordance with work health and safety (WHS)/occupational health and safety (OHS) legislation and |

|          |                                                                                         | safety management system requirements                                                                                                          |
|          | 1.3                                                                                     | Work is carried out according to established performance standards                                                                             |
|          | 1.4                                                                                     | Hazards are identified as part of work planning and work processes                                                                             |
|          | 1.5                                                                                     | Identified hazards are addressed prior to starting work                                                                                        |
|          | 1.6                                                                                     | Inadequacies in control measures are reported according to the safety management system                                                        |
|          | 1.7                                                                                     | Incidents and injuries are reported according to organisational procedures                                                                     |
|          | 1.8                                                                                     | WHS/OHS housekeeping is undertaken in own work area                                                                                            |
| <b>2</b> | <b>Contribute to WHS/OHS participation processes</b>                                    |                                                                                                                                                |
|          | 2.1                                                                                     | WHS/OHS representatives and committees are supported to undertake their roles and responsibilities                                             |
|          | 2.2                                                                                     | WHS/OHS issues are raised according to organisational procedures                                                                               |
|          | 2.3                                                                                     | Contributions to WHS/OHS meetings, vessel inspections or other consultative activities are provided in a constructive manner to improve safety |
| <b>3</b> | <b>Contribute to hazard identification, risk assessment and risk control activities</b> |                                                                                                                                                |
|          | 3.1                                                                                     | Vessel is checked for hazards using itemised checklists according to the safety management system                                              |
|          | 3.2                                                                                     | Identified hazards and inadequacies in risk controls are reported according to the safety management system                                    |
|          | 3.3                                                                                     | Contributions to risk assessments are made                                                                                                     |
|          | 3.4                                                                                     | Input is provided to development and implementation of control measures, with reference to the hierarchy of control                            |
|          | 3.5                                                                                     | Where relevant, procedures and precautions for entry into pump room, fuel tanks or other confined spaces on a vessel are correctly followed    |
| <b>4</b> | <b>Participate in controlling WHS/OHS emergency situations</b>                          |                                                                                                                                                |
|          | 4.1                                                                                     | Scale of the emergency situation is correctly recognised                                                                                       |
|          | 4.2                                                                                     | Prompt, accurate and clear information is given on raising alarm                                                                               |
|          | 4.3                                                                                     | Initial action is taken to control/confine emergency according to organisational procedures, taking account of the nature                      |

|                                   |     |                                                                                                   |
|-----------------------------------|-----|---------------------------------------------------------------------------------------------------|
|                                   |     | and scope of the emergency                                                                        |
|                                   | 4.4 | Emergency response procedures are implemented                                                     |
| <b>5 Complete WHS/OHS records</b> | 5.1 | WHS/OHS records for vessel are correctly completed                                                |
|                                   | 5.2 | Legal requirements for the maintenance of records of occupational injury and disease are followed |

## Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Range of Conditions

Specifies different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Individual rights and responsibilities include one or more of the following:

- avoiding and preventing harassment of others
- avoiding drug and alcohol abuse on board vessel
- implementing appropriate precautions to avoid contributing to the spread of the human immunodeficiency virus infection/acquired immunodeficiency syndrome (HIV/AIDS) and other communicable diseases
- maintaining appropriate standards of hygiene and cleanliness
- providing a good example to others as a responsible, fair, sympathetic, and equitable member of the shipboard team
- respecting the religious and cultural habits of crew members

Hazards include one or more of the following:

- contact with chemicals and hazardous substances
- contaminants
- contact with electricity

- contact with plant and marine life
- dangerous organisms
- equipment operation and maintenance
- falls, trips and slips
- exposure to heat, cold and water
- hitting or being hit by stationary or moving objects
- immersion in water without a personal flotation device (PFD)
- ladders
- manual handling
- noise
- poor housekeeping and lack of deck space
- repetitive movements and awkward postures
- smoking and alcohol
- unventilated holds
- weather and water conditions
- working in confined spaces
- working with inappropriate clothing
- working with knives

Emergency situations include one or more of the following:

- beaching with and without heavy surf
- chemical spills
- collisions
- disabled vessel
- electrocution
- falling or being dragged overboard
- fire
- flood
- grounding
- hull damage
- immersion in water
- injuries associated with dangerous organisms (such as bites, stings, poisoning)
- injuries associated with machines, vehicles, vessels, diving
- loss of rudder
- lost or fouled propeller
- rescue activities
- rough weather and heavy seas
- vessel capsize

WHS/OHS records include one or more of the

- accident reports
- incident reports

following:

- injury reports
- hazard reports

## Unit Mapping Information

This is a new unit. This unit is equivalent to MARF3002A Observe personal safety and social responsibility.

## Links

Companion Volume implementation guides are found in VETNet -

# Assessment Requirements for MARF006 Observe personal safety and social responsibility

## Modification History

Release 2. ISC upgrade. KE amended to better align with the STCW.

Release 1. New unit of competency.

## Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying the hierarchy of control (the preferred order of risk control measures from most to least preferred, that is, elimination of risk, substitution, engineering controls, administrative controls and personal protective equipment)
- communicating with crew and others as appropriate about WHS/OHS matters
- conforming to established emergency response procedures for initial and follow-up action
- keeping accurate records/minutes of discussions with consultation forums on WHS/OHS matters
- identifying WHS/OHS training needs of crew
- interpreting and following information on WHS/OHS legislation, safety management system, organisational procedures, written job instructions, specifications, standard operating procedures, charts, lists, and other applicable reference documents
- investigating incidents according to organisational procedures
- keeping records for monitoring the effectiveness of practices and procedures with respect to the safety of the vessel
- maintaining incident records according to standard workplace procedures
- obtaining results of safety audits according to organisational procedures
- participating in consultation forums
- participating in safety drills
- reporting and documenting the processes and outcomes of WHS/OHS requirements
- scheduling meetings with the relevant consultation forums to discuss WHS/OHS matters.

## Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- applicable commonwealth, state or territory WHS/OHS legislation, regulations, codes of practice, standards
- dangers of drug and alcohol abuse

- difference between hazards (something or a source or situation with the potential to harm life or health) and risks (chance of something occurring that will result in injury or damage)
- fatigue management and the importance of adequate rest
- handling and stowage of dangerous, hazardous and harmful substances and liquids
- hazard identification procedures such as vessel inspections and review of WHS/OHS data
- hierarchy of control and its application
- international measures for accident prevention at sea, including the International Labour Organization (ILO) Conventions
- legal rights and responsibilities of management, crew and others as appropriate
- location of escape routes
- location and use of fire fighting equipment
- nature of common hazards for example chemicals, bodily fluids, noise, manual handling, work postures, underfoot hazards and moving parts of machinery
- organisation specific information including:
  - hazards of the particular work environment
  - hazard identification procedures relevant to hazards in the organisation
  - designated person for raising WHS/OHS issues
  - organisation and work procedures particularly those related to performance of own work, specific hazards and risk control, reporting of hazards, incidents and injuries and WHS/OHS issue resolution, consultation, use of personal protective equipment and emergency response
  - potential emergency situations, alarms and signals, and required response
- personal protective equipment requirements, including use, storage and maintenance
- principles of basic risk assessment
- potential emergency situations, alarms and signals, and required response
- purpose of Safe Data Sheets (SDS)
- roles and responsibilities of:
  - employees, supervisors and managers in the organisation
  - safety representatives and committees
- safety signs and their meanings, including signs for:
  - personal protective equipment
  - emergency equipment
  - dangerous goods class signs
- sources of WHS/OHS information within in the organisation with knowledge of external sources of WHS/OHS information
- specific hazards, such as sharps and radiation
- standard emergency signals, alarms and required responses.

## Assessment Conditions

Assessors must satisfy National Vocational Education and Training Regulator (NVR)/Australian Quality Training Framework (AQTF) assessor requirements.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that reflect workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- tools, equipment, machinery, materials and personal protective equipment currently used in industry
- applicable documentation such as legislation, regulations, codes of practice, workplace procedures and operational manuals
- range of relevant exercises, case studies and/or simulations.

# MARF008 Prevent and fight fires on board a vessel

## Modification History

Release 2. ISC upgrade. KE amended to better align with the STCW and working effectively as part of a team included in KE and PE.

Release 1. New unit of competency.

## Application

This unit involves the skills and knowledge required to prevent fires and to respond effectively to any fire emergency on board a vessel.

This unit applies to deck and engine workers working in the maritime industry requiring a Certificate of Safety Training.

This unit has links to legislative and certification requirements.

## Pre-requisite Unit

Not applicable.

## Competency Field

F - Operational Quality and Safety

## Unit Sector

Not applicable.

## Elements and Performance Criteria

### ELEMENTS

Elements describe the essential outcomes.

#### 1 Actively prevent fire

### PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

- |     |                                                                                                                         |
|-----|-------------------------------------------------------------------------------------------------------------------------|
| 1.1 | Fire hazards (pre-conditions for fire) on board a vessel are identified and rectified according to workplace procedures |
| 1.2 | Onboard procedures for preventing fire are accessed and                                                                 |

- implemented
- 2 Prepare response to fire**
- 2.1 Location and class of fire is identified
  - 2.2 Alarm is raised
  - 2.3 Condition of firefighting equipment and systems in work area is monitored according to planned maintenance schedules
  - 2.4 Realistic drills and musters are practised to ensure pre-incident readiness of response personnel
  - 2.5 Appropriate protective clothing and equipment including self contained breathing apparatus (SCBA) is made ready
  - 2.6 All available means to limit the spread of fire and smoke are employed
  - 2.7 Appropriate pump/s and ancillary equipment are readied to support firefighting operations
  - 2.8 Extinguishing media/agent is selected according to the class/classes of fire
- 3 Combat fire**
- 3.1 Threats to life or health are identified within the emergency area
  - 3.2 Activities and tactics to combat the fire are selected so that the safety of the vessel and all on board is not compromised
  - 3.3 Fire is located and access is gained in the safest and most timely manner
  - 3.4 Fire is attacked using the extinguishing media/agent and application techniques appropriate to the class and size of fire
  - 3.5 SCBA is donned and used correctly while undertaking fire extinguishment and rescue
  - 3.6 Effectiveness of combat activities and tactics is evaluated and altered as required
  - 3.7 Communication is maintained to ensure safety and efficiency of firefighting operation
- 4 Complete post-fire activities**
- 4.1 Fire watch is maintained to prevent further outbreak
  - 4.2 Equipment is restored to operational condition

- 4.3 Fire scene is preserved prior to investigation, if appropriate
- 4.4 Information relating to the incident is provided as part of fire debriefing session

## Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Range of Conditions

Specifies different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Fire hazards must include:

- accommodation
- cargo areas
- engine rooms
- electrical distribution systems
- fuel handling systems
- galleys
- lack of maintenance
- laundry
- poor housekeeping
- smoking
- stores areas

Classes of fire must include:

- A Carbonaceous Solids
- B Flammable Liquids
- C Flammable Gases
- D Combustible Metals
- E Energised Electrical Equipment

- F Cooking Oils and Fats
- Firefighting equipment and systems must include:
- hoses
  - fixed fitted detection and suppression systems
  - foam applicators
  - international ship-to-shore connection
  - nozzles
  - portable and semi-portable extinguishers
  - stretchers/ropes and lines
- Protective clothing and equipment must include:
- head protection /helmet
  - hand protection /gloves
  - radiant heat protection /coat
  - foot protection/ boots
  - firefighter outfit as per current Fire Safety Systems Code (as applicable)
  - SCBA
- Extinguishing media/agent must include:
- extinguishing powder
  - foam
  - gaseous extinguishing agents
  - water
- Firefighting activities must include:
- boundary control
  - containing the spread of fire
  - evacuation of casualties from heated smoke filled environments
  - extinguishment
  - overhaul/fire watch
- Firefighting tactics must include:
- combination of attack
  - cooling the fuels
  - direct offensive (attack team)
  - direction of attack
  - exclusion of oxygen – smothering
  - indirect defensive (fixed system)
  - interrupting the chemical chain reaction
  - removal of fuels - starvation

Restoring equipment must include:

- cleaning
- re-stowing
- recharging according to Australian Standards
- servicing

## Unit Mapping Information

This is a new unit. This unit is equivalent to MARF3005A Prevent and fight fires on board a vessel.

## Links

Companion Volume implementation guides are found in VETNet -  
<https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=772efb7b-4cce-47fe-9bbd-ee3b1d1eb4c2>

# Assessment Requirements for MARF008 Prevent and fight fires on board a vessel

## Modification History

Release 2. ISC upgrade. KE amended to better align with the STCW and working effectively as part of a team included in KE and PE.

Release 1. New unit of competency.

## Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying extinguishing media to fire
- applying safe working practices at all times
- assisting in the setting up and use of foam making equipment
- correctly donning and using self contained breathing apparatus (SCBA) while undertaking fire extinguishment and rescue in a heated smoke filled compartment
- entering and moving through a compartment filled with high expansion foam with the aid of a lifeline and without breathing apparatus
- extinguishing a fire with a fire blanket
- logging SCBA wearers correctly on a control board
- operating charged hose-lines and nozzles
- operating portable firefighting extinguishers
- performing after-use maintenance on SCBA
- working effectively with team members when responding to a fire.

## Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- action to be taken:
  - in an emergency
  - on board ship
- alarms and signals during onboard emergencies
- chemistry of fire, including the fire tetrahedron and its relationship to materials typically found on vessels
- classification of fire and applicable extinguishing agents
- correct use of all lifesaving appliances and firefighting appliances

- different classes of fire, their characteristics and strategies and equipment needed for their extinguishment
- elements of fire and explosion (the fire triangle)
- extinguishing media including firefighting foams
- fire and smoke detection and automatic alarm systems
- firefighting tactics, techniques and procedures
- flammable materials, fire hazards and spread of fire
- hazards and threats to life or health during onboard firefighting operations
- lifeline signals
- location of firefighting appliances and emergency escape routes
- maintenance of lifesaving appliances and firefighting appliances
- need for constant vigilance
- onboard Emergency Response Organisation and procedures
- own ability and limits
- portable fire extinguishers
- purpose, function and location of fixed installations/systems
- principles and methods of fire extinguishment
- principles underlying the spread of fire
- relevant Australian Standards
- role and responsibility of self and team members
- safe working practices
- shipboard firefighting organisation
- statutory requirements pertaining to lifesaving appliances and firefighting appliances
- types and sources of ignition
- types of fire detection, firefighting equipment and systems used on vessels, their features, principles of operation, procedures for their use and problems that can occur
- ventilation procedures
- vessel construction as it relates to fire prevention/protection
- work health and safety (WHS)/occupational health and safety (OHS) requirements and work practices

## Assessment Conditions

Assessors must satisfy National Vocational Education and Training Regulator (NVR)/Australian Quality Training Framework (AQTF) assessor requirements.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that reflect workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- tools, equipment, machinery, materials and personal protective equipment currently used in industry
- applicable documentation such as legislation, regulations, codes of practice, workplace procedures and operational manuals
- range of relevant exercises, case studies and/or simulations.

# MARF029 Meet work health and safety requirements

## Modification History

Release 1. New unit of competency. Licensing/regulatory information has been incorporated in accordance with Regulatory requirements. Assessment Requirements have been strengthened in accordance with Regulatory requirements.

## Application

This unit involves the skills and knowledge required to follow defined work health and safety (WHS)/occupational health and safety (OHS) policies and procedures to ensure the safety of self, others on board and the vessel. This unit applies to people working in the maritime industry in a deck and or engine room capacity on vessels up to 80 m and with propulsion power <3000 kW in waters to the outer limits of the exclusive economic zone (EEZ). They could be working independently or as part of a vessel crew.

## Licensing/Regulatory Information

Legislative and regulatory requirements are applicable to this unit. This unit is one of the requirements to obtain Australian Maritime Safety Authority (AMSA) certification as a General Purpose Hand NC, Coxswain Grade 2 NC, Coxswain Grade 1 NC, Marine Engine Driver Grade 3 NC, Master Inland Waters, Master <24 m NC, Marine Engine Driver Grade 2 NC, Master <35 m NC and Marine Engine Driver Grade 1 NC as defined in the National Standard for Commercial Vessels (NSCV) Part D. The AMSA mandated practical assessment (AMPA) is a requirement for AMSA certification. The Australian Maritime Safety Authority (AMSA) mandated practical assessment (AMPA) will cover a range, but not all, of the requirements identified in the Performance Evidence and Knowledge Evidence. The AMPA shall be undertaken in accordance with its instructions.

Assessors of AMPA must hold as a minimum:

- a current certificate of competency issued under Marine Safety (Domestic Commercial Vessel) National Law Act 2012 at the same level as the qualification being assessed with at least 12 months relevant sea service, or
- a relevant seafarer certificate, as master, engineer or deck officer, issued under the Navigation Act 2012.

## Pre-requisite Unit

Not Applicable

## Competency Field

F – Operational Quality and Safety

## Unit Sector

Not Applicable

## Elements and Performance Criteria

### ELEMENTS

### PERFORMANCE CRITERIA

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

#### **1 Recognise safety management system requirements**

**1.1** WHS/OHS responsibilities and duties are identified and accountability processes are outlined

**1.2** WHS/OHS policies and procedures are accessed and reviewed, and clarification is sought where necessary

**1.3** Implications of changes to the safety management system (SMS) are identified and addressed

**1.4** Records are accurately completed

#### **2 Work safely**

**2.1** Established safety procedures are followed when conducting work

**2.2** Work for which personal protective equipment (PPE) is required is identified

**2.3** PPE is used, maintained and stored according to workplace procedures

**2.4** Safety checks on all equipment and machinery are undertaken before operation according to workplace procedures

**2.5** Hazardous chemicals are identified and handled according to workplace procedures

**2.6** Safe manual handling techniques are used when conducting work

**2.7** Worker or employee responsibilities prescribed in WHS/OHS legislation are recognised and carried out

#### **3 Follow workplace procedures for hazard identification, risk assessment and risk**

**3.1** Hazards in the workplace are recognised and reported to designated personnel according to workplace procedures

**control**

- |                                                                    |            |                                                                                                         |
|--------------------------------------------------------------------|------------|---------------------------------------------------------------------------------------------------------|
|                                                                    | <b>3.2</b> | Assessment of risks associated with identified hazards is made according to workplace procedures        |
|                                                                    | <b>3.3</b> | Workplace procedures and work instructions for controlling risks are followed                           |
|                                                                    | <b>3.4</b> | Risks to fellow workers and other people are recognised and action is taken to eliminate or reduce them |
| <b>4 Participate effectively in WHS/OHS consultation processes</b> | <b>4.1</b> | WHS/OHS issues are raised with designated personnel according to workplace procedures                   |
|                                                                    | <b>4.2</b> | Contributions are made to workplace meetings, inspections and other WHS/OHS activities                  |
|                                                                    | <b>4.3</b> | Ideas are provided to control the level of risk associated with work tasks                              |
| <b>5 Follow emergency procedures</b>                               | <b>5.1</b> | Emergency incidents are identified and reported                                                         |
|                                                                    | <b>5.2</b> | Emergency procedures are followed in responding to emergency incidents                                  |
|                                                                    | <b>5.3</b> | Emergency equipment is used in responding to emergency incidents                                        |
|                                                                    | <b>5.4</b> | Appropriate personnel are notified according to workplace procedures                                    |

## Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

## Unit Mapping Information

This unit replaces and is equivalent to MARF004 Meet work health and safety requirements.

## Links

Companion Volume implementation guides are found in VETNet -  
<https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=772efb7b-4cce-47fe-9bbd-ee3b1d1eb4c2>

# Assessment Requirements for MARF029 Meet work health and safety requirements

## Modification History

Release 1. New unit of competency. Licensing/regulatory information has been incorporated in accordance with Regulatory requirements. Assessment Requirements have been strengthened in accordance with Regulatory requirements.

## Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- accessing workplace information on work health and safety (WHS)/occupational health and safety (OHS) policies and procedures
- accessing workplace information on safety management systems (SMS)
- applying problem solving skills to investigate and identify causes of WHS/OHS incidents
- applying safe manual handling techniques
- cooperating with employer or supervisor on any action taken to comply with WHS/OHS legislation
- demonstrating safe work practices
- identifying and responding to typical emergency situations
- identifying isolation points for equipment and following workplace procedures for lock out or tag out of equipment as required
- identifying WHS/OHS hazards related to work responsibilities and taking required action to remove or control hazards
- maintaining housekeeping standards in work area
- reporting WHS/OHS information according to workplace procedures
- selecting, fitting and using appropriate personal protective equipment (PPE)
- taking reasonable care for own health and safety
- using consultation processes to consult others on WHS/OHS issues.

## Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- action to be taken in the event of emergencies, including:
  - chemical spills
  - collisions
  - disabled vessel
  - electrocution

- falling or being dragged overboard
- fire
- grounding
- hull damage
- injuries associated with dangerous organisms (such as bites, stings and poisoning)
- injuries associated with machines, vehicles, vessels and diving
- loss of rudder
- lost or fouled propeller
- rescue activities
- rough weather and heavy seas
- vessel capsize
- water ingress
- application of concepts relating to hazard identification, risk assessment and control options
- communication systems and consultation arrangements
- designated personnel and their role, including:
  - master of the vessel
  - supervisors, managers and team leaders
  - workplace WHS/OHS personnel
  - other persons authorised or nominated by the workplace to perform, approve, inspect or direct specified work
- difference between hazards (source of potential harm) and risks (chance of something occurring that will result in injury or damage)
- disposition of persons on board to ensure satisfactory stability and trim
- emergency and evacuation procedures
- emergency incidents, including:
  - general safety duties relating to domestic vessels under the Marine Safety (Domestic Commercial Vessel) National Law Act 2012
- hazardous chemicals, including:
  - battery acid
  - cleaning fluids
  - fuel
  - gas
  - oils and lubricants
  - paint
  - thinners
- identifying confined spaces and procedures and legislative requirements for working in confined spaces
- impact of housekeeping on safety
- location of advice on WHS/OHS issues, including documents such as procedures and safety data sheets (SDS)/material safety data sheets (MSDS)
- obligations and safety duties towards all persons on board domestic commercial vessels

- procedures and responsibilities for investigating WHS/OHS incidents and assessing risk
- purpose and procedure for collecting and reporting WHS/OHS information
- safe work procedures relating to work responsibilities, including:
  - accident and incident reporting
  - electrical safety
  - emergency procedures
  - health and hygiene
  - isolation
  - manual handling
  - noise and vibration
  - fatigue management
  - permits to work
  - plant and equipment
  - rescue procedures
  - use and storage of hazardous substances
  - SDS/MSDS
  - vessel housekeeping
  - work in rough weather
  - working with the elements
- SMS
- steps to be taken after collision, grounding or other marine casualty and resulting hull damage
- storage requirements for hazardous goods used in work area
- typical hazards related to work responsibilities, including:
  - contact with chemicals and hazardous substances
  - contact with electricity
  - contact with plant and marine life
  - dangerous organisms
  - equipment operation and maintenance
  - exposure to heat, cold and water
  - falls, trips and slips
  - fatigue
  - hitting or being hit by stationary or moving objects
  - immersion in water without a personal flotation device (PFD)
  - ladders
  - manual handling
  - noise
  - poor housekeeping and lack of deck space
  - repetitive movements and awkward postures
  - unventilated holds

- weather and water conditions
- working in confined spaces
- working with inappropriate clothing
- working with knives
- use, care and storage of PPE
- use of distress signals and penalty for misuse
- WHS/OHS legislation, regulations, codes of practice and organisational policies and procedures associated with work responsibilities.

## Assessment Conditions

Assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment. As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment. Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Practical assessment must occur in a workplace, or realistic simulated workplace, under the normal range of workplace conditions. Simulations and scenarios may be used where situations cannot be provided in the workplace or may occur only rarely, in particular for situations relating to emergency procedures and adverse weather conditions where assessment would be unsafe, impractical or may lead to environmental damage.

Resources for assessment must include access to:

- applicable documentation, such as legislation, regulations, codes of practice, workplace procedures and operational manuals
- a vessel  $\geq 5.0$  metres in length
- tools, equipment, machinery, materials and relevant PPE currently used in industry.

# MARK008 Manoeuvre a vessel up to 24 metres within Near Coastal waters

## Modification History

Release 1. New unit of competency. Licensing/regulatory information has been incorporated in accordance with Regulatory requirements. Assessment Requirements have been strengthened in accordance with Regulatory requirements.

## Application

This unit involves the skills and knowledge required to manoeuvre a vessel of up to 24 m in length within Near Coastal (NC) waters.

This unit applies to people working in the maritime industry in the capacity of:

- master on commercial vessels <24 m in length within the exclusive economic zone (EEZ) or
- chief mate or deck watchkeeper on vessels <35 m in length within the EEZ or
- chief mate or deck watchkeeper on vessels <80 m in length in inshore waters; and
- master on commercial vessels <24 m in length in inland waters.

## Licensing/Regulatory Information

Legislative and regulatory requirements are applicable to this unit. This unit is one of the requirements to obtain Australian Maritime Safety Authority (AMSA) certification as a Master (Inland waters) and Master <24 m NC as defined in the National Standard for Commercial Vessels (NSCV) Part D. The AMSA mandated practical assessment (AMPA) is a requirement for AMSA certification. The Australian Maritime Safety Authority (AMSA) mandated practical assessment (AMPA) will cover a range, but not all, of the requirements identified in the Performance Evidence and Knowledge Evidence. The AMPA shall be undertaken in accordance with its instructions.

Assessors of AMPA must hold as a minimum:

- a current certificate of competency issued under Marine Safety (Domestic Commercial Vessel) National Law Act 2012 at the same level as the qualification being assessed with at least 12 months' relevant sea service, or
- a relevant seafarer certificate, as master or deck officer, issued under the Navigation Act 2012.

## Pre-requisite Unit

Not Applicable

## Competency Field

K – Manoeuvring Vessels

## Unit Sector

Not Applicable

## Elements and Performance Criteria

### ELEMENTS

Elements describe the essential outcomes.

#### **1 Manoeuvre vessel in normal conditions**

### PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

- 1.1** Features of vessel that relate to its handling characteristics are recognised
- 1.2** Details of manoeuvres are communicated to relevant personnel clearly and concisely using standard maritime vocabulary
- 1.3** Situational awareness is maintained to ensure safe manoeuvres
- 1.4** Manoeuvres are completed to meet passage requirements
- 1.5** Propulsion equipment is used and monitored to assist in completing manoeuvres safely
- 1.6** Appropriate alterations to vessel heading are made in response to operational environment
- 1.7** Safe operating limits of propulsion and steering equipment are not exceeded

#### **2 Manoeuvre vessel in adverse weather conditions**

- 2.1** Nature of adverse weather conditions is identified and the potential impact on the manoeuvrability of the vessel is determined
- 2.2** Appropriate action is taken to ensure the safety of vessel
- 2.3** Propulsion equipment is used and monitored to assist in completing actions safely
- 2.4** Heading is maintained within acceptable limits

- |                                          |     |                                                                                                                                                         |
|------------------------------------------|-----|---------------------------------------------------------------------------------------------------------------------------------------------------------|
|                                          | 2.5 | Appropriate allowance is made for effects of deadweight, draft, trim, speed and underwater keel clearances during turning circles and stopping distance |
|                                          | 2.6 | Safe operating limits of propulsion and steering equipment are not exceeded                                                                             |
|                                          | 2.7 | Situational awareness is maintained at all times to review actions and ensure safety of vessel                                                          |
| <b>3 Manoeuvre vessel in emergencies</b> | 3.1 | Nature of the emergency is established and required action is determined                                                                                |
|                                          | 3.2 | Risks to the vessel and the safety of persons on board are assessed and safety of required action is confirmed                                          |
|                                          | 3.3 | Details of action are communicated to relevant personnel clearly and concisely using standard maritime vocabulary                                       |
|                                          | 3.4 | Appropriate manoeuvres are made during the emergency to maintain the safety of the vessel and those on board, and any other vessels or persons involved |
|                                          | 3.5 | Propulsion equipment is used and monitored to assist in completing actions safely                                                                       |
|                                          | 3.6 | Safe operating limits of propulsion and steering equipment are not exceeded                                                                             |
| <b>4 Tow and be towed</b>                | 4.1 | Preparations for towing are safely made according to established nautical practice                                                                      |
|                                          | 4.2 | Correct towing procedures and precautions are applied when towing and being towed                                                                       |

## Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

## Unit Mapping Information

This unit replaces and is equivalent to MARK002 Manoeuvre a vessel up to 24 metres within near coastal waters.

## Links

Companion Volume implementation guides are found in VETNet -

<https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=772efb7b-4cce-47fe-9bbd-ee3b1d1eb4c2>

# Assessment Requirements for MARK008 Manoeuvre a vessel up to 24 metres within Near Coastal waters

## Modification History

Release 1. New unit of competency. Licensing/regulatory information has been incorporated in accordance with Regulatory requirements. Assessment Requirements have been strengthened in accordance with Regulatory requirements.

## Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- anchoring a vessel
- determining required action for a range of emergency situations
- handling a disabled or partially disabled vessel
- issuing helm and engine orders
- manoeuvring a vessel astern
- manoeuvring a vessel to:
  - approach an anchorage
  - berth and leave a berth
  - come to and leave a mooring
  - safely launch and retrieve boats or life rafts
  - turn short around
  - turn across the tide or across the wind
- maintaining situational awareness, including:
  - vessels in the vicinity
  - own vessel position in relation to shallow water and other obstructions
  - weather conditions that may affect the manoeuvre
- operating secondary or emergency means of steering
- rescuing a person overboard, including:
  - manoeuvring to retrieve person overboard
  - Williamson turn
- manoeuvring a vessel in adverse weather conditions, including:
  - steering a course to minimise the effect of wind and sea
  - reducing speed
  - seeking shelter
- towing and being towed
- undertaking preparations for towing.

## Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- appropriate reports to be made for authorities when towing
- deployment and use of sea anchor to keep vessel head to sea
- effects of interaction with passing or moored vessels
- effects of trim and displacement on the manoeuvring characteristics of a vessel
- factors that could adversely affect vessel safety during operations
- features of a vessel that relate to its handling characteristics, and their effects, including:
  - displacement and planing hulls
  - propellers
  - propulsion units, including:
    - inboard engines
    - inboard-outboard engines
    - jet propulsion
    - outboard engines
  - rudders
- launching procedures for boats or life rafts
- manoeuvring conditions that may affect the safety of the vessel, including:
  - heading to wind and sea to ride out the adverse weather
  - to cross a bar with and against the sea
  - in heavy weather
  - in heavy swell and surf
  - in a narrow channel or shallow water
  - in fog and restricted visibility
- lessening drift and use of oil
- manoeuvring procedures to:
  - assist a vessel or aircraft in search and rescue
  - beach and re-float the vessel
  - position for helicopter evacuation
- manoeuvring procedures in the event of:
  - beaching
  - collision
  - damage to the vessel
  - disabled or partially disabled vessel
  - fire
  - grounding
  - loss of steering gear
  - person overboard

- precautions when manoeuvring or launching boats or life rafts in bad weather
- procedures for towing and being towed
- process and requirement to assist vessels in distress
- preparations for towing, including:
  - crew briefings that include the task at hand and risks to persons on both vessels
  - ensuring appropriate lights and shapes for the tow are available and in working order
  - ensuring means of communication between the two vessels is available
  - ensuring tow ropes are in good condition and of adequate strength for the proposed tow
  - ensuring tow line is of sufficient length to minimise shock loading on tow-line
  - making tow fast to the towing vessel to ensure steerage can be maintained
  - making provision for rapid slipping of the tow in emergency situations
  - preparing messenger ropes for passing tow lines.
- work health and safety (WHS)/occupational health and safety (OHS) requirements and work practices.

## Assessment Conditions

Assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment. As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment. Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Practical assessment must occur in a workplace, or realistic simulated workplace, under the normal range of workplace conditions. Simulations and scenarios may be used where situations cannot be provided in the workplace or may occur only rarely, in particular for situations relating to emergency procedures and adverse weather conditions where assessment would be unsafe, impractical or may lead to environmental damage.

Resources for assessment must include access to:

- applicable documentation, such as legislation, regulations, codes of practice, safety management system (SMS), workplace procedures and operational manuals
- a commercial vessel  $\geq 7.5$  m in length
- tools, equipment, machinery, materials and relevant personal protective equipment (PPE) that are currently used in industry.

# NWPGEN006 Implement and manage environmental management policies

## Modification History

Release 2: Minor document layout changes, no content changes.

Release 1: This unit was released in NWP Water Training Package release 1.0 and meets the Standards for Training Packages.

This unit supersedes and is equivalent to NWP505B Implement and monitor environmental management policies, plans, procedures and programs.

- Unit code updated
- Content and formatting updated to comply with the new standards
- All PC transitioned from passive to active voice
- Unit title changed to better reflect unit outcomes
- Elements 2 and 3 merged
- PC 3.1, 3.2 and 3.3 merged

## Application

This unit involves the skills and knowledge required to implement and manage environmental management policies.

It includes consulting with stakeholders effectively, interpreting complex information and maintaining environmental records. It also includes implementing and monitoring procedures for quantifying environmental impacts, controlling risks and dealing with environmental incidents.

This unit applies to those working as managers with responsibility for environmental management within the organisation. Those undertaking this unit would work autonomously, supervising staff, while performing sophisticated tasks in a range of familiar contexts.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Pre-requisite Unit

Not applicable.

## Competency Field

General

## Unit Sector

Not applicable.

## Elements and Performance Criteria

### ELEMENTS

### PERFORMANCE CRITERIA

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

#### **1 Gather environmental management information**

- 1.1** Review and interpret the organisation environmental policies and plans against current environmental legislation and perceived stakeholder attitudes and expectations
- 1.2** Identify all stakeholders and their relationship with the enterprise and their impact on, or relationship with, policies and plans
- 1.3** Identify the available resources to implement policies and plans
- 1.4** Confirm responsibilities and authorities as outlined in the policies and plans
- 1.5** Establish best practice procedures for the implementation of management plans

#### **2 Implement and monitor environmental policies and plans**

- 2.1** Develop and apply environmental management processes and workplace procedures to achieve policy
- 2.2** Monitor the effectiveness of policies and plans against objectives, timelines and key performance indicators
- 2.3** Audit environmental management processes and workplace procedures
- 2.4** Review and modify processes and procedures to achieve policy and plan objectives
- 2.5** Identify, quantify and report environmental risks as well as existing and potential events and or activities that may affect the environment

#### **3 Implement and monitor the procedures for quantifying**

- 3.1** Implement work procedures to control risks or remedy damage

## environmental impacts and controlling risks

- |          |                                                                                  |                                                                                                                                            |
|----------|----------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------|
|          | <b>3.2</b>                                                                       | Monitor risk control measures and report results                                                                                           |
|          | <b>3.3</b>                                                                       | Identify inadequacies in risk control measures, report to the appropriate authority and remedy                                             |
|          | <b>3.4</b>                                                                       | Quantify and record environmental impacts                                                                                                  |
|          | <b>3.5</b>                                                                       | Report adverse environmental impacts and make recommendations to minimise the impacts                                                      |
| <b>4</b> | <b>Implement and monitor procedures for dealing with environmental incidents</b> |                                                                                                                                            |
|          | <b>4.1</b>                                                                       | Implement workplace procedures for managing incidents of environmental significance or harm to ensure prompt control and remediation       |
|          | <b>4.2</b>                                                                       | Investigate incidents of environmental impact to identify their cause                                                                      |
|          | <b>4.3</b>                                                                       | Implement control measures to prevent recurrence and minimise risks of events                                                              |
|          | <b>4.4</b>                                                                       | Record and report incidences of environmental impact, significance or harm according to enterprise procedures and legislative requirements |
| <b>5</b> | <b>Maintain environmental records</b>                                            |                                                                                                                                            |
|          | <b>5.1</b>                                                                       | Complete environmental management documentation for the work area                                                                          |
|          | <b>5.2</b>                                                                       | Store environmental records for easy access and review                                                                                     |
|          | <b>5.3</b>                                                                       | Identify long term trends and impacts through review and assessment of environmental records                                               |
|          | <b>5.4</b>                                                                       | Report results of record reviews                                                                                                           |

## Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

# Assessment Requirements for NWPGEN006 Implement and manage environmental management policies

## Modification History

Release 2: Minor document layout changes and assessment conditions updated.

Release 1: These Assessment Requirements were released in NWP Water Training Package release 1.0 and meet the Standards for Training Packages.

- Assessment Requirements created drawing upon specified assessment information from superseded unit

## Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and includes:

- applying control procedures
- applying enterprise environmental policies
- applying relevant legislative requirements
- assessing and managing risks
- assessing environmental risks
- collecting, recording, assessing and reporting data associated with the performance of the environmental management plan
- consulting and communicating with internal and external groups and/or individuals
- gathering and interpreting information relating to environmental management
- implementing environmental management plans in consultation with relevant stakeholders
- managing activities associated with the implementation and management of environmental management policies, plans, procedures and programs
- managing records
- monitoring the effective implementation of environmental management plans
- responding to emergencies
- taking effective steps to ensure the remediation of environmental problems or impacts

## Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria and includes knowledge of:

- economic systems and development needs
- enterprise consultation processes
- enterprise emergency response requirements
- relevant legislation, policies and procedures

- work health and safety legislation

## Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- relevant and appropriate materials, tools, equipment and personal protective equipment currently used in industry
- applicable documentation including legislation, regulations, codes of practice, workplace procedures and operation manuals.

# PMAWHS214 Undertake helicopter safety and escape

## Modification History

Release 1. Supersedes and is equivalent to PMAOHS214B Undertake helicopter safety and escape

## Application

This unit of competency covers the skills and knowledge required to exit a helicopter under abnormal conditions at sea.

This unit of competency applies to personnel who are required to undertake pre-flight preparation, escape from an inverted and/or submerged helicopter, don and successfully employ a life jacket, deploy safety and emergency equipment, deploy life rafts and help other survivors.

This unit of competency applies to all persons who regularly travel by helicopter, for example, to any of the following installations or facilities:

- offshore rig/installation
- floating facility (e.g. floating storage and offloading (FSO), floating production, storage and offloading (FPSO), and floating liquefied natural gas (FLNG))
- support vessel.

Some jurisdictions may require the holder of this unit to be licensed or certified and users should check with the relevant authorities.

## Pre-requisite Unit

Nil

## Competency Field

Work health and safety

## Unit Sector

## Elements and Performance Criteria

Elements describe the      Performance criteria describe the performance needed to

essential outcomes. demonstrate achievement of the element.

| 2 | <b>Board the helicopter</b>            | 2.1 | Approach helicopter as directed by the pilot or ground crew                                                                                                                             |
|   |                                        | 2.2 | Put on seat belt and hearing protection                                                                                                                                                 |
|   |                                        | 2.3 | Familiarise oneself with the helicopter layout                                                                                                                                          |
|   |                                        | 2.4 | Locate and identify all the safety equipment                                                                                                                                            |
|   |                                        | 2.5 | Locate and identify primary and secondary exits                                                                                                                                         |
|   |                                        | 2.6 | Listen to instructions on emergency egress from the aircraft                                                                                                                            |
| 3 | <b>Prepare for helicopter ditching</b> | 3.1 | Facilitate a controlled and safe egress from a ditched helicopter from a knowledge of helicopter layout, including the location and operation of emergency exits and equipment          |
|   |                                        | 3.2 | Secure personal items within the cabin prior to the evacuation to facilitate escape                                                                                                     |
|   |                                        | 3.3 | Check harnesses, seat belts and life jackets to ensure that they are properly fastened and secured prior to the ditching in order to minimise personal injury or gear failure           |
|   |                                        | 3.4 | Adopt the required brace position in order to allow for proper positioning prior to ditching                                                                                            |

- |   |                                                 |     |                                                                                                                                                  |
|---|-------------------------------------------------|-----|--------------------------------------------------------------------------------------------------------------------------------------------------|
|   |                                                 | 3.5 | Acknowledge and respond to information communicated by the helicopter crew advising the nature and extent of the situation                       |
| 4 | <b>Undertake evacuation from the helicopter</b> | 4.1 | Identify appropriate primary and secondary escape routes in order to determine the locations through which the evacuation will be undertaken     |
|   |                                                 | 4.2 | Wait until rotors have stopped turning and all movement has ceased                                                                               |
|   |                                                 | 4.3 | Undo, in a controlled sequential manner, seat belts and harnesses to facilitate exit from the helicopter                                         |
|   |                                                 | 4.4 | Deploy available safety equipment as instructed in order to assist the individual's sea survival after evacuation has been safely completed      |
|   |                                                 | 4.5 | Acknowledge and respond to information communicated by the helicopter crew advising the nature and extent of the situation                       |
| 5 | <b>Facilitate recovery process</b>              | 5.1 | Deploy position indicating devices and use appropriate signalling devices to facilitate the location of personnel by air-sea rescue group        |
|   |                                                 | 5.2 | Use emergency supplies and equipment to ensure that available supplies are maximised and are able to meet the nature and extent of the emergency |
|   |                                                 | 5.3 | Apply appropriate helicopter/vessel rescue techniques to the recovery process                                                                    |
| 6 | <b>Control hazards</b>                          | 6.1 | Identify and act upon potential hazards to minimise injury to personnel or damage to equipment                                                   |
|   |                                                 | 6.2 | Manage use of life raft by applying knowledge of life raft operation and requirements                                                            |
|   |                                                 | 6.3 | Apply suitable swimming techniques (whilst wearing life jacket) in the water in order to aid movement and boarding of the deployed life raft     |

- 6.4 Rescue and recover persons in the water, minimising further potential for injury through the appropriate raft boarding and righting techniques
- 6.5 Employ suitable techniques, both in the life raft and in the water, in order to delay the onset of hypothermia
- 6.6 Assess and treat hypothermia, as required

## Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

- Regulatory framework** The latest version of all legislation, regulations, industry codes of practice and Australian/international standards, or the version specified by the local regulatory authority, must be used, and include one or more of the following:
- legislative requirements, including work health and safety (WHS)
  - industry codes of practice and guidelines
  - environmental regulations and guidelines
  - Australian and other standards
  - licence and certification requirements

All operations to which this unit applies are subject to stringent health, safety and environment (HSE) requirements, which may be imposed through state/territory or federal legislation, and these must not be compromised at any time. Where there is an apparent conflict between performance criteria and HSE requirements, the HSE requirements take precedence.

- Procedures** All operations must be performed in accordance with relevant procedures.

Procedures are written, verbal, visual, computer-based or in some other form, include one or more of the following:

- emergency procedures
- work instructions
- standard operating procedures (SOPs)
- safe work method statements (SWMS)
- formulas/recipes
- batch sheets
- temporary instructions
- any similar instructions provided for the smooth running of the plant.

**Equipment** Equipment includes one or more of the following:

- helicopter simulators
- beacons
- life rafts
- distress flares
- life jackets
- emergency position-indicating radio beacon (EPIRB)

**Routine problems** Routine problems must be resolved by applying known solutions.

Routine problems are predictable and include one or more of the following:

- jammed or damaged survival equipment
- personal injury or injury to others
- trapped personnel
- loose or damaged equipment
- adverse weather conditions

Known solutions are drawn from one or more of the following:

- procedures
- training
- remembered experience

Non-routine problems must be reported according to according to relevant procedures.

**Hazards** Hazards include one or more of the following:

- heat, smoke, darkness, dust or other atmospheric hazards
- electricity
- equipment failures
- equipment or product mass
- noise, rotational equipment or vibration
- unauthorised personnel
- sharp edges, protrusions or obstructions
- slippery surfaces, spills or leaks
- extreme weather
- drowning and hypothermia
- other hazards that might arise

## Unit Mapping Information

Release 1. Supersedes and is equivalent to PMAOHS214B Undertake helicopter safety and escape

# **Assessment Requirements for PMAWHS214 Undertake helicopter safety and escape**

## **Modification History**

Release 1. Supersedes and is equivalent to PMAOHS214B Undertake helicopter safety and escape

## **Performance Evidence**

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria, and include the ability to:

- correctly fit and wear required personal emergency equipment
- respond instantly to pilot commands
- deploy life rafts or other emergency equipment
- orient oneself whilst upside down under water
- remove doors and/or windows from the aircraft
- extricate oneself from the aircraft
- correctly inflate life jacket
- locate and gain access to life raft where deployed
- locate other survivors and assist them
- apply rescue and recover procedures
- assess and treat hypothermia.

## **Knowledge Evidence**

- Evidence must be provided that demonstrates knowledge of:
- helicopter escape techniques
- integral equipment functions to the level needed to act rationally and recognise and resolve problems
- hazards boarding and departing from helicopters under normal and emergency situations
- inverted and submerged helicopter escape techniques
- life jacket operation
- emergency equipment deployment techniques
- life raft operation and deployment
- rescue and recovery techniques

hypothermia prevention and reduction techniques (delaying and offsetting).

## Assessment Conditions

- Assessment for this unit of competency will involve a helicopter simulator. The unit will be assessed in as holistic a manner as is practical and the judgement of competence based on a holistic assessment of the evidence.
- Assessment may be integrated with the assessment of other relevant units of competency, for example:
  - PMAWHS215 Apply offshore facility abandonment and sea survival procedures and practices.
- Simulation should be based on actual helicopter ditchings and will include walk-throughs of the relevant competency components. Simulations may also include the use of case studies/scenarios, role plays and 3-D virtual reality interactive systems. In the case of evacuation training or training for competencies practised in life threatening situations, simulation may be used for the bulk of the training.
- The collection of performance evidence:
  - should provide evidence of the ability to perform over the range of situations which might be expected to be encountered, including typical disruptions to normal, smooth work conditions
  - must include the use of a simulated helicopter ditching in real water of sufficient depth for complete immersion, appropriate tools, equipment and safety gear
  - may also use other industry-based simulation particularly where safety, lack of opportunity or significant cost is an issue.
- Off-the-job assessment must sufficiently reflect realistic operational workplace conditions that cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Knowledge evidence may be collected concurrently with performance evidence (provided a record is kept) or through an independent process, such as workbooks, written assessments or interviews (provided a record is kept).
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.
- The regulatory framework will be reflected in workplace policies and procedures and is not required to be independently assessed.
- Foundation skills are integral to competent performance of the unit and should not be assessed separately.
- Assessors must satisfy the assessor competency requirements that are in place at the time of the assessment as set by the VET regulator.
- In addition, the assessor or anyone acting in subject matter expert role in assessment must demonstrate both technical competency and currency. If the assessor cannot demonstrate technical competency and currency they must assess with a subject matter expert who does meet these requirements.
- Technical competence can be demonstrated through one or more of:
  - relevant VET or other qualification/Statement of Attainment

- appropriate workplace experience undertaking the type of work being assessed under routine and non-routine conditions
- appropriate workplace experience supervising/evaluating the type of work being assessed under routine and non-routine conditions
- Currency can be demonstrated through one or more of:
  - being currently employed undertaking the type of work being assessed
  - being employed by the organisation undertaking the type of work being assessed and having maintained currency in accordance with that organisation's policies and procedures
  - having consulted/had contact with an organisation undertaking the type of work being assessed within the last twelve months, the consultation/contact being related to assessment
  - conducting on-the-job training/assessments of the type of work being assessed
  - being an active member of a relevant professional body and participating in activities relevant to the assessment of this type of work.

### Application

This unit describes the skills required to identify and treat risk using the organisation's risk management procedures and treatments. It applies to the risks inherent in all aspects of everyday work in the public sector as well as to specific functional activities and projects related to the particular mandate of the organisation. It includes establishing the risk context, analysing and evaluating risks and monitoring and reviewing the risk treatment plan.

This unit applies to those working in generalist or specialist roles within the public sector.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would work independently, performing complex tasks in a range of familiar and unfamiliar contexts.

No licensing, legislative or certification requirements apply to unit at the time of publication.

### Competency Field

General

## Elements and Performance Criteria

| ELEMENTS                                 | PERFORMANCE CRITERIA                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |
|------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Elements describe the essential outcomes | Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.                                                                                                                                                                                                                                                                                                                                                                                            |
| <b>1. Establish the risk context</b>     | 1.1 Establish the nature and extent of the work activity within the broader organisational context.<br>1.2 Identify and document outcomes to be achieved.<br>1.3 Analyse relationship between the activity and its environment and identify critical factors in the environment that may impact on the achievement of outcomes.<br>1.4 Identify and consult stakeholders to understand their opinions, concerns and needs.<br>1.5 Determine risk evaluation criteria for the activity.                                                                                                             |
| <b>2. Identify risks</b>                 | 2.1 Select method/s for identifying risks in accordance with risk management policy and procedures, budgetary and time constraints relative to the type of activity to be undertaken.<br>2.2 Identify and document sources of risk as required.<br>2.3 Identify and record risk events related to each source of risk.<br>2.4 Undertake consultation to ensure all possible risks are identified.                                                                                                                                                                                                  |
| <b>3. Analyse risks</b>                  | 3.1 Analyse and rate the probability of identified risks occurring and consequences.<br>3.2 Consider current control measures for any of the identified risks in the risk analysis, and analyse and include residual risks if necessary.<br>3.3 Determine levels of risk in accordance with risk matrix used by the organisation.<br>3.4 Consult as required to confirm risk levels, and document analysis.                                                                                                                                                                                        |
| <b>4. Evaluate risks</b>                 | 4.1 Evaluate risks by comparing the level of risk with risk evaluation criteria established at the beginning of the risk management process.<br>4.2 Consider the importance of the activity, its outcomes and the degree of control over the risks.<br>4.3 Consider potential and actual losses which may arise from the risk.<br>4.4 Take into account benefits and opportunities presented by the risk.<br>4.5 Identify risks as acceptable or unacceptable in accordance with risk evaluation criteria, and obtain approval.<br>4.6 Prioritise unacceptable risks and document the reason/s for |

| 1       | <p>These Assessment Requirements were released in PSP Public Sector Training Package release 1.0 and meet the Standards for Training Packages.</p> <ul style="list-style-type: none"><li>• Assessment Requirements created drawing upon specified assessment information from superseded unit</li></ul> |

## Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- applying legislation, regulations and policies relating to risk management
- researching and analysing the wider context affecting the organisation
- communicating and consulting with a diverse range of stakeholders
- estimating and arranging resources needed for implementation of risk treatments

## Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- public sector legislation including WHS and environment, regulations, policies, procedures and guidelines relating to risk management
- AS/NZS ISO 31000:2009 risk management – principles and guidelines
- HB 436:2004 (guidelines to AS/NZS 4360:2004) Risk Management Guidelines Companion to AS/NZS 4360:2004
- the organisation's risk management framework
- the relationship of risk to context – how the context may define the risks
- the importance of consultation and communication at every stage of the risk management cycle
- risk management as a core activity of everyday work in the public sector
- the diversity of risks in the public sector

## Assessment Conditions

This unit contains no specific industry-mandated assessment conditions. Guidance on suggested and recommended conditions and methods can be found in the Implementation Guide.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

| 1       | <p>This unit was released in PSP Public Sector Training Package release 1.0 and meets the Standards for Training Packages.</p> <p>This unit supersedes and is equivalent to PSPGOV515A Develop and use political nous.</p> <ul style="list-style-type: none"><li>• Unit code updated</li><li>• Content and formatting updated to comply with new standards</li><li>• All PC transitioned from passive to active voice</li></ul> |

### Application

This unit describes the skills required to develop and use political nous to navigate and succeed in the political environment of the public sector. It includes identifying the political terrain, evaluating the political environment, forming alliances, and bargaining and negotiating to achieve outcomes.

This unit applies to those working in public sector roles but may be applied to anyone working in a similar organisational context.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would work independently, while performing complex tasks in a familiar context.

No licensing, legislative or certification requirements apply to unit at the time of publication.

## PSPGEN071 Prepare high-level written communication

### Modification History

| Release | Comments                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |
|---------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1       | <p>This unit was released in PSP Public Sector Training Package release 1.0 and meets the Standards for Training Packages.</p> <p>This unit supersedes and is equivalent to PSPGOV606A Prepare high-level/sensitive written materials.</p> <ul style="list-style-type: none"><li>• Unit code updated</li><li>• Unit title changed</li><li>• Content and formatting updated to comply with new standards</li><li>• All PC transitioned from passive to active voice</li></ul> |

### Application

This unit describes the skills required to prepare high-level written communication including the preparation of complex, sensitive materials. It includes preparing for high-level written communication, critically analysing other positions and preparing persuasive written communication.

This unit applies to those working in generalist and specialist roles within the public sector.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would work independently seeking advice as required, performing complex tasks in a range of familiar and unfamiliar contexts.

No licensing, legislative or certification requirements apply to unit at the time of publication.

# Assessment Requirements for PSPGEN071 Prepare high-level written communication

## Modification History

| Release | Comments                                                                                                                                                                                                                                                                                                |
|---------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1       | <p>These Assessment Requirements were released in PSP Public Sector Training Package release 1.0 and meet the Standards for Training Packages.</p> <ul style="list-style-type: none"> <li>Assessment Requirements created drawing upon specified assessment information from superseded unit</li> </ul> |

## Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified, the candidate must demonstrate evidence of performance of the following on at least one occasion.

- reading and writing at a level to cope with complex and sensitive workplace materials, including identifying:
  - subtext
  - significant inclusions and exclusions
  - socio-cultural values
  - attitudes and bias
  - assumptions
- critically analysing and synthesising information to compose complex written documents
- researching other pertinent information, including supporting/opposing position papers
- refining content, structure and sequence according to the required purpose of written material
- analysing and using language structures and features that influence the interpretation of written communication, including:
  - using spelling, punctuation and grammar for workplace documents at an experienced level
  - providing feedback on other people's work in ways suited to the diversity of the workplace, including creation of learning opportunities to improve research and document input
- cross-cultural communication requirements

## Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified, the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- public sector legislation including WHS and environment
- regulations, policies, procedures and guidelines relating to written communication in the public sector, including privacy, freedom of information, information security, confidentiality, copyright and intellectual property
- critical analysis of complex information in a government context
- politically and culturally sensitive documents
- organisational requirements for complex written documents
- government style manual requirements
- persuasive written language devices and their ethical use for calculated effect
- the ways in which socio-cultural factors, language features and structures combine to influence the interpretation of written information

## Assessment Conditions

This unit contains no specific industry-mandated assessment conditions. Guidance on suggested and recommended conditions and methods can be found in the Implementation Guide.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

## PSPGEN083 Manage public affairs

### Modification History

| Release | Comments                                                                                                                                                                                                                                                                                                                                                                                                              |
|---------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1       | <p>This unit was released in PSP Public Sector Training Package release 1.0 and meets the Standards for Training Packages.</p> <p>This unit supersedes and is equivalent to PSPPA601A Manage public affairs.</p> <ul style="list-style-type: none"><li>• Unit code updated</li><li>• Content and formatting updated to comply with new standards</li><li>• All PC transitioned from passive to active voice</li></ul> |

### Application

This unit describes the skills required to manage public affairs. It includes contributing to public affairs scope and direction, planning and managing public affairs programs, developing crisis management strategies and handling high-profile events.

This unit applies to those working in the public sector managing public affairs.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would work independently supervising others, while performing complex tasks in a range of contexts.

No licensing, legislative or certification requirements apply to unit at the time of publication.

| 1       | <p>These Assessment Requirements were released in PSP Public Sector Training Package release 1.0 and meet the Standards for Training Packages.</p> <ul style="list-style-type: none"><li>• Assessment Requirements created drawing upon specified assessment information from superseded unit</li></ul> |

## Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified, the candidate must demonstrate evidence of performance of the following on at least one occasion.

- applying legislation, regulations and policies relating to public affairs
- planning and setting objectives
- undertaking strategy development
- documenting crisis management communication strategies and protocols, including post crisis communication to inform crisis management action plans
- establishing and maintaining relationships inside and outside the organisation
- communication including consulting, negotiating and liaising with diverse groups
- applying procedures relating to work health and safety and the environment in the context of public affairs

## Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified, the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- public sector legislation including work health and safety and the environment, regulations, policies, procedures and guidelines relating to public affairs
- public affairs capability and how this relates to organisational objectives
- event management
- requirements of crisis management communication strategies

## Assessment Conditions

This unit contains no specific industry-mandated assessment conditions. Guidance on suggested and recommended conditions and methods can be found in the Implementation Guide.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

### Application

This unit describes the skills required to contribute to the consultative and validation stages of policy development, provide feedback and contribute to the review of policy.

This unit applies to public sector staff and other stakeholders whose roles include contributing to the policy development process.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would work independently, and as part of a team, with occasional supervisory responsibilities. They would perform complex tasks in a range of familiar contexts.

No licensing, legislative or certification requirements apply to unit at the time of publication.

## Competency Field

Policy

### Elements and Performance Criteria

| ELEMENTS                                                             | PERFORMANCE CRITERIA                                                                                                                                                                                                                                                                                                                                                                                      |

## Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. The candidate must demonstrate evidence of performance of the following on at least one occasion:

- reading and evaluating complex and formal documents
- making judgments on impact of policy and legislation on the organisation
- consulting on and validating policy
- adjusting communication to suit different audiences
- undertaking research involving collecting and analysing data for evaluation
- preparing written reports

## Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- current policies underpinning the work area
- the policy cycle
- organisation and government processes and procedures
- public sector code/s of ethics and code/s of conduct
- principle of community and stakeholder engagement in policy development

## Assessment Conditions

This unit contains no specific industry-mandated assessment conditions. Guidance on suggested and recommended conditions and methods can be found in the Implementation Guide.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

### Application

This unit describes the skills required to promote client compliance. It includes advising and assisting clients to comply with legislation or standards and implementing communication strategies to improve compliance.

This unit applies to those working in public sector roles conducting regulatory activities.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would work independently as part of a team, performing routine tasks in a range of familiar and unfamiliar contexts.

No licensing, legislative or certification requirements apply to unit at the time of publication.

## Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- providing advice and discussion involving exchanges of sometimes complex oral information
- delivering presentations tailored to the needs of people from diverse backgrounds
- reading and explaining complex and formal documents, including their application to clients' situations
- using active listening and questioning strategies to clarify understanding
- using information technology to access relevant legislation and guidelines

## Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- public sector legislation including
- consequences of non-compliance
- terminology used in legislation and procedures
- organisational procedures, guidelines and protocols
- delivery approaches to address diverse learning styles
- industry knowledge

## Assessment Conditions

This unit contains no specific industry-mandated assessment conditions. Guidance on suggested and recommended conditions and methods can be found in the Implementation Guide.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

| 1       | <p>This unit was released in PSP Public Sector Training Package release 1.0 and meets the Standards for Training Packages.</p> <p>This unit supersedes and is equivalent to PSPREG403B Assess compliance.</p> <ul style="list-style-type: none"><li>• Unit code updated</li><li>• Content and formatting updated to comply with new standards</li><li>• All PC transitioned from passive to active voice</li></ul> |

### Application

This unit describes the skills required to assess risk, monitor situations, environments and behaviours, and analyse information to assess compliance with legislation and/or standards. It includes monitoring areas under own jurisdiction, receiving or identifying allegations of non-compliance, and conducting research to determine levels of compliance.

This unit applies to those working in regulatory roles involving compliance assessment.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would work independently, performing routine tasks in a range of familiar and unfamiliar contexts.

No licensing, legislative or certification requirements apply to unit at the time of publication.

## Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- undertaking research, analysis and problem solving in the context of assessing compliance
- applying regulations and codes of practice
- using information technology for data analysis, recording and reporting
- communicating including questioning and negotiating of meaning in sometimes difficult situations
- reading and applying complex information from legislation

## Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- public sector legislation
- organisational procedures, guidelines and protocols
- knowledge of own and others' jurisdictions
- risk management in the context of compliance assessment
- application of audit tools
- research and sampling methodologies
- security storage of evidence and/or information
- procedures for recording allegations and/or complaints
- specialist equipment

## Assessment Conditions

This unit contains no specific industry-mandated assessment conditions. Guidance on suggested and recommended conditions and methods can be found in the Implementation Guide.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

### Application

This unit describes the skills required to gather information through interviews. It includes preparing for and conducting interviews and reviewing and correlating information.

This unit applies to those working in regulatory roles within the public sector involved in information gathering through interviews.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would work independently as part of a team, performing complex tasks in a range of familiar and unfamiliar contexts.

No licensing, legislative or certification requirements apply to unit at the time of publication.

## Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- using interviewing techniques and varying style and language structure to suit situation and interviewee(s)
- engaging in exchanges of sometimes complex oral information
- using techniques to deal with difficult interview situations
- using communication techniques, including establishing rapport, listening, probing, reflecting, negotiation, conflict resolution
- using critical analysis, evaluation and deductive reasoning
- using problem solving and decision making related to interviewing
- using judgment, to test the veracity of information and vary questions and interviewing techniques to suit
- preparing interview documentation requiring accuracy of expression and formality in structure and format
- operating technical and electronic equipment, where necessary

## Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- application of legislation to interviewing including, privacy, ethics, confidentiality and freedom of information

- organisational policies and guidelines relating to interviews
- questioning techniques
- legal and ethical considerations for conducting interviews
- cultural awareness in the context of interviewing
- procedures for using interpreters
- legal and organisational requirements for documentation
- legal requirements relating to recording of information
- public sector legislation

## Assessment Conditions

This unit contains no specific industry-mandated assessment conditions. Guidance on suggested and recommended conditions and methods can be found in the Implementation Guide.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

### Application

This unit describes the skills required to manage regulatory compliance, a management role with responsibility for regulatory officers who enforce and promote compliance with legislation. It includes interpreting and advising on enabling and related legislation; developing and implementing strategies to promote long term voluntary compliance and develop a culture of compliance in the community; and providing strategic advice on compliance matters.

This unit applies to those working in management roles within the public sector involved in regulatory compliance.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would work autonomously, performing complex tasks in a range of familiar contexts.

No licensing, legislative or certification requirements apply to unit at the time of publication.

## Competency Field

Regulatory

### Elements and Performance Criteria

| ELEMENTS                                                           | PERFORMANCE CRITERIA                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |

## Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- undertaking planning and information analysis
- engaging in mentoring and coaching
- interpreting complex written materials
- preparing written reports requiring formal structure and language
- providing oral advice to diverse audiences requiring adaptation of style and language
- using active listening and questioning to confirm understanding

## Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- enabling legislation
- aspects of common law
- strategic management of regulatory compliance
- organisational reporting procedures
- public sector policy and legislation, including WHS and environment relating to the management of regulatory compliance

## Assessment Conditions

This unit contains no specific industry-mandated assessment conditions. Guidance on suggested and recommended conditions and methods can be found in the Implementation Guide.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

### Application

This unit describes the skills required to evaluate compliance outcomes, and review regulatory policies, procedures and legislation to improve compliance outcomes. It includes developing compliance measures and/or targets, evaluating the extent of compliance, reviewing procedures and guidelines to improve compliance, and contributing to new legislation or the review of existing legislation.

This unit applies to those working as a manager with responsibility for regulatory officers who enforce and promote compliance with the organisation's enabling legislation.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would work autonomously, performing complex tasks in a range of familiar and unfamiliar contexts.

No licensing, legislative or certification requirements apply to unit at the time of publication.

# SISCAQU001 Test pool water quality

## Modification History

Not applicable.

## Application

This unit describes the performance outcomes, skills and knowledge required to conduct pool water tests, record test results and make visual ongoing checks.

This unit applies to those working as pool attendants or aquatic operators in aquatic environments, such as council or commercially operated aquatic and leisure centres. Work is performed according to public health regulatory requirements, organisational policies and procedures, and relevant legislation.

Work may be carried out under supervision or with some autonomy, depending on the individual situation and job role.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

## Pre-requisite Unit

Nil

## Competency Field

Aquatics

## Unit Sector

Community Recreation

## Elements and Performance Criteria

### ELEMENTS

Elements describe the essential outcomes

### PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

1. Conduct pool water tests.
  - 1.1 Complete routine pool water tests according to public health regulatory requirements.
  - 1.2 Interpret test results and compare with public health regulatory requirements.
  - 1.3 Identify and report pool water test irregularities to appropriate personnel for corrective action.
  - 1.4 Respond to contamination incidents within scope of own role.
  - 1.5 Conduct regular sample collection and initiate corrective actions as required.
  - 1.6 Perform regular visual checks of pool water quality, identify issues and initiate corrective actions when required.
2. Record test results.
  - 2.1 Record pool water test results accurately.
  - 2.2 Update swimming pool log according to aquatic facility specifications.

## Foundation Skills

Foundation skills essential to performance in this unit are explicit in the performance criteria of this unit of competency.

## Unit Mapping Information

SISCAQU201A Monitor pool water quality

## Links

Companion Volume implementation guides are found in VETNet -

# Assessment Requirements for SISCAQU001 Test pool water quality

## Modification History

Not applicable.

## Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- test pool water for the following on a minimum of four separate occasions:
  - free chlorine and/or total bromine
  - total chlorine
  - combined chlorine
  - pH
  - total alkalinity
  - cyanuric acid
  - calcium hardness
  - total hardness
  - temperature
- perform routine visual checks for pool water quality.

## Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- legislation and organisational policies and procedures:
  - public health regulatory requirements in the local area
  - health acts
  - infectious diseases regulations
  - dangerous goods act and regulations
  - work health and safety/occupational health and safety
  - environmental legislation
  - local government regulation
  - roles, responsibilities and limitations of own role
- pool water chemistry terms and their meaning:
  - pH levels
  - alkalinity
  - chlorine and or bromine

- temperature
- calcium hardness
- types of pool water tests, their purpose and testing procedures
- visual checks made by pool attendants
- equipment and resources used for testing pool water quality
- responses to contamination incidents.

## Assessment Conditions

Skills must be demonstrated in:

- a workplace or simulated aquatic facility with an operating pool.

Assessment must ensure use of:

- pool water testing apparatus
- public health regulatory documentation
- organisational policies and procedures.

Assessment activities that allow the individual to:

- conduct regular pool water tests within industry realistic timeframes.

Assessors must satisfy the Standards for Registered Training Organisations' requirements for assessors.

## SISCAQU002 Perform basic water rescues

### Modification History

Not applicable.

### Application

This unit describes the performance outcomes, skills and knowledge required to perform basic water rescues in indoor or outdoor aquatic venues.

The unit applies to all workers who may be required to perform basic water rescues in a range of situations, including swimming pools. Work is performed according to accepted best practice principles of aquatic rescues, relevant legislation and organisational policies.

Specific licensing requirements relating to this competency, including requirements for refresher training, should be obtained from the relevant state/territory work health and safety regulatory authority.

### Pre-requisite Unit

Nil

### Competency Field

Aquatics

### Unit Sector

Community Recreation

### Elements and Performance Criteria

#### ELEMENTS

Elements describe the essential outcomes

1. Identify and evaluate aquatic emergencies.

#### PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

- 1.1 Recognise signs and signals of a person in difficulty.
- 1.2 Assess situation to determine appropriate response in an aquatic emergency.
- 1.3 Identify and assess immediate hazards and risks to self

and others.

- |                                         |                                                                                                                                            |
|-----------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------|
| 2. Apply basic water rescue principles. | 2.1 Determine rescue type required and promptly formulate a rescue plan.                                                                   |
|                                         | 2.2 Access and use available equipment, as required.                                                                                       |
|                                         | 2.3 Perform basic water rescue techniques according to emergency needs using fitness and strength levels required in own work environment. |
|                                         | 2.4 Delegate tasks when required.                                                                                                          |
|                                         | 2.5 Identify and promptly respond to issues that arise during the rescue.                                                                  |
|                                         | 2.6 Monitor the condition of the casualty and plan a course of action.                                                                     |
| 3. Communicate incident details.        | 3.1 Convey incident details accurately to emergency response services.                                                                     |
|                                         | 3.2 Report details of incident to workplace supervisor as appropriate.                                                                     |
|                                         | 3.3 Provide reassurance to bystanders as required.                                                                                         |
|                                         | 3.4 Maintain confidentiality of records and information in line with statutory and/or organisational policies.                             |

## Foundation Skills

Foundation skills essential to performance in this unit are explicit in the performance criteria of this unit of competency.

## Unit Mapping Information

No equivalent unit.

## Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=1ca50016-24d2-4161-a044-d3faa200268b>

# Assessment Requirements for SISCAQU002 Perform basic water rescues

## Modification History

Not applicable.

## Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- identify, evaluate and respond to aquatic emergencies according to organisational and legislative requirements
- identify and respond to all of the following signs and signals:
  - call for help
  - vertical body position
  - minimal or non-supportive leg action
  - vigorous arm movements
  - submerged or unconscious person
- perform the following non-swimming rescues:
  - reach
  - rope throw
  - throw flotation aid
- perform the following swimming rescues demonstrating the fitness and strength to tow a person in difficulty at least 10 metres with their mouth and nose above water to a point of safety:
  - accompanied
  - wade
  - non-contact tow
  - contact tow
- incorporate appropriate adjustments for each of the above rescues to ensure safety of self and others.

## Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- legislation, organisational policies and procedures and industry standards in relation to:
  - the safe conduct of water rescues
  - accurate completion of incident documentation

- common signs and signals of a person experiencing difficulties in the water and possible contributing factors:
  - call for help
  - vertical body position
  - minimal or non-supportive leg action
  - vigorous arm movements
  - submerged or unconscious person
- use and location of equipment types
- non-swimming rescue methods and techniques:
  - reach
  - rope throw
  - throw flotation aid
- swimming rescue methods and techniques:
  - accompanied
  - wade
  - non-contact tow
  - contact tow
- issues that arise during rescues and appropriate adjustments to ensure safety of self and others
- communication systems used during rescues to inform managers, other employees and emergency services of progress
- potential dangers in a range of aquatic environments and how to respond.

## Assessment Conditions

Skills must be demonstrated in:

- a workplace or simulated aquatic facility or environment such as an indoor pool, outdoor pool, or shallow water venue.

Assessment must ensure use of:

- pool safety equipment:
  - flotation devices
  - first aid facilities and equipment
  - ropes
  - suitable to perform a reach rescue
- participants to enable demonstration of all water rescue techniques and scenarios, these can be:
  - participants in a workplace, or
  - individuals who participate in project activities, role plays or simulated activities, set up for the purpose of assessment, within a training organisation.

Assessment activities that allow the individual to:

- demonstrate water rescue techniques and broader emergency responses in required emergency situation timeframes
- communicate with relevant personnel and emergency response services.

Assessors must satisfy the Standards for Registered Training Organisations' requirements for assessors.

# SISCAQU004 Develop and implement pool water maintenance procedures

## Modification History

Not applicable.

## Application

This unit describes the performance outcomes, skills and knowledge required to develop, implement, monitor and evaluate systems and procedures for the maintenance of quality pool water in an aquatic recreation facility.

This unit applies to those working autonomously in aquatic leisure centres or community pools, in roles such as program coordinators, swim school coordinators, recreation coordinators or duty managers. Work is performed according to relevant legislation, and organisational policies and procedures.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

## Pre-requisite Unit

Nil

## Competency Field

Aquatics

## Unit Sector

Community Recreation

## Elements and Performance Criteria

### ELEMENTS

Elements describe the essential outcomes

1. Develop pool water maintenance

### PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

- 1.1 Evaluate pool water quality maintenance and treatment needs according to regulatory framework.

|                                                 |                                                                                                                         |
|-------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------|
| procedures.                                     | 1.2 Develop and document systems for pool water maintenance in consultation with appropriate personnel.                 |
| 2. Implement pool water maintenance procedures. | 2.1 Provide accurate and current information and instruction to staff about legislative and technical requirements.     |
|                                                 | 2.2 Delegate testing and treatment tasks according to staff skills.                                                     |
|                                                 | 2.3 Test pool water quality following established procedures.                                                           |
|                                                 | 2.4 Interpret results of tests made by self and others and identify where correction is needed.                         |
|                                                 | 2.5 Calculate the amount of chemicals required to correct chemical imbalances in pool water.                            |
|                                                 | 2.6 Select and use chemical dosing equipment for treatment of pool water according to manufacturer specifications.      |
|                                                 | 2.7 Monitor pool water quality on ongoing basis, identify issues of concern and respond according to agreed procedures. |
|                                                 | 2.8 Identify and respond to emergency situations according to agreed procedures.                                        |
|                                                 | 2.9 Complete accurate documentation                                                                                     |
| 3. Evaluate pool water maintenance procedures.  | 3.1 Assess effectiveness of pool water maintenance procedures against testing and treatment records.                    |
|                                                 | 3.2 Identify and document potential improvements to maintenance procedures.                                             |
|                                                 | 3.3 Communicate improvements and changes to relevant staff and stakeholders.                                            |

## Foundation Skills

Foundation skills essential to performance in this unit, but not explicit in the performance criteria are listed here, along with a brief context statement.

### SKILLS

### DESCRIPTION

Reading skills to:

- interpret technical content of regulatory requirements.

## Unit Mapping Information

SISCAQU414A Develop pool water maintenance procedures

## Links

Companion Volume implementation guides are found in VETNet -

<https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=1ca50016-24d2-4161-a044-d3faa200268b>

# Assessment Requirements for SISCAQU004 Develop and implement pool water maintenance procedures

## Modification History

Not applicable.

## Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- develop and document pool water maintenance procedures that meet regulatory requirements for at least one aquatic facility that incorporate:
  - monitoring and treatment procedures for:
    - microbiological levels
    - disinfectant levels
    - pH levels
    - clarity levels
  - staff training requirements
  - safety procedures
  - emergency response procedures
  - documentation and reporting
- implement and evaluate pool water maintenance procedures for at least one aquatic facility
- implement emergency procedures in the event of a chemical emergency on at least one occasion.

## Knowledge Evidence

Demonstrated knowledge required to do the task outlined in elements and performance criteria of this unit:

- legislation and industry standards relevant to aquatic facility maintenance with specific focus on local requirements:
  - work health and safety/occupational health and safety
  - dangerous goods act and regulations
  - local government regulations
  - building codes and regulations
- organisational policies and procedures:
  - standard operating conditions and levels
  - work health and safety/occupational health and safety
  - risk assessment and control

- handling of hazardous chemicals
- emergency response
- factors that affect pool water treatment needs in different contexts:
  - condition of aquatic facility
  - location
  - size
  - nature of services provided
  - availability of resources
- characteristics of water quality:
  - pH levels
  - alkalinity
  - chlorine and / or bromine
  - temperature
  - calcium hardness
  - disinfectant levels
- waterborne bacteria and how to enable these to be monitored and controlled safely:
  - pseudomonas
  - aeruginosa
- consultation and communication mechanisms to develop and implement procedural systems
- content considerations for procedure documents:
  - specific testing and treatment procedures
  - safety requirements (chemicals, plant and equipment)
  - emergency response
  - training requirements
  - documentation and reporting requirements
- water treatment processes:
  - routine pool water tests
  - pool water microbiological tests
  - superchlorination
  - shock dosing
  - dechlorination
  - ozonisation or use of sanitizer
  - pool water filtration and recirculation
  - backwashing
  - manual removal of visible contaminants
- features and sources of products for pool water quality maintenance.

## Assessment Conditions

Skills must be demonstrated in:

- a workplace or simulated aquatic facility or environment.

Assessment must ensure use of:

- a pool for which a maintenance program would be developed
- information about pool water quality maintenance to allow the individual to develop a tailored system
- organisational policies and procedures
- incident reporting documentation
- resources to maintain facility and equipment.

Assessment activities that allow the individual to:

- implement and monitor pool quality maintenance over time
- respond to a chemical emergency situation.

Assessors must satisfy the Standards for Registered Training Organisations' requirements for assessors.

# SISCAQU005 Develop and implement aquatic facility maintenance procedures

## Modification History

Not applicable.

## Application

This unit describes the performance outcomes, skills and knowledge required to develop, implement and evaluate maintenance schedules for an aquatic recreation facility.

This unit applies to those working autonomously at aquatic leisure centres or community pools in roles such as program coordinators, swim school coordinators, recreation coordinators or duty managers. Work is performed according to relevant legislation, organisational policies and procedures.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

## Pre-requisite Unit

Nil

## Competency Field

Aquatics

## Unit Sector

Community Recreation

## Elements and Performance Criteria

### ELEMENTS

Elements describe the essential outcomes

1. Plan maintenance procedures.

### PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

- 1.1 Evaluate operational maintenance needs according to regulatory and business requirements.
- 1.2 Document uses and condition of the aquatic facility plant

- and equipment and identify priorities for action.
- 1.3 Identify potential sources of increased efficiency of the aquatic facility plant and equipment.
  - 1.4 Identify human, physical and financial resources associated with needed maintenance of aquatic facility.
  - 1.5 Integrate maintenance program with asset acquisition and disposal plans.
  - 1.6 Schedule maintenance activities to minimise disruption to facility users and ensure that supplies are available.
  - 1.7 Confirm, document and communicate maintenance procedures and costs according to organisational approval protocols.
2. Implement maintenance procedures.
    - 2.1 Monitor completion of inspection and maintenance schedules.
    - 2.2 Identify and assess failed or unsafe aquatic facility plant and equipment and determine underlying cause within scope of own role.
    - 2.3 Identify and evaluate emergency situations and respond according to local regulatory and organisational procedures.
    - 2.4 Remove defective equipment and/or facilities from operation and complete repairs within designated responsibility.
    - 2.5 Arrange for required repairs to be carried out by qualified and/or licensed contractors and record actions taken.
    - 2.6 Monitor maintenance records and take corrective action as required.
    - 2.7 Communicate maintenance actions to appropriate staff or personnel.
  3. Evaluate maintenance procedures.
    - 3.1 Assess the effectiveness of maintenance systems against short and long-term maintenance requirements.
    - 3.2 Identify and use alternative maintenance methods to maintain cost effectiveness.
    - 3.3 Document and communicate improvements and changes to maintenance systems.

## Foundation Skills

Foundation skills essential to performance in this unit, but not explicit in the performance criteria are listed here, along with a brief context statement.

### SKILLS

### DESCRIPTION

Reading skills to:

- interpret technical content of regulatory requirements.

## Unit Mapping Information

SISCAQU415A Develop aquatic facility maintenance procedures

## Links

Companion Volume implementation guides are found in VETNet -  
<https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=1ca50016-24d2-4161-a044-d3faa200268b>

# Assessment Requirements for SISCAQU005 Develop and implement aquatic facility maintenance procedures

## Modification History

Not applicable.

## Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- develop and document maintenance procedures for at least one aquatic facility, incorporating consideration of:
  - circulation plant
  - heating systems
  - lighting or ventilation systems
  - disinfection systems
  - required supplies
  - servicing and repair
  - equipment replacement/redundancy
- implement and evaluate maintenance procedures for at least one aquatic facility.

## Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- legislation and industry standards relevant to aquatic facility maintenance:
  - work health and safety/occupational health and safety
  - dangerous goods act and regulations
  - local government regulations
  - building codes and regulations
- organisational policies and procedures:
  - standard operating conditions and levels
  - work health and safety/occupational health and safety
  - risk assessment and control
  - handling of hazardous chemicals
  - emergency evacuation
- factors affecting the operating cost of an aquatic facility:
  - faulty operation
  - cleaning requirements

- consumables
- replacements (whole or part)
- servicing and repair
- utility costs
- staff costs
- contractor costs
- plant and equipment manufacturer specifications in relation to operation, servicing and repair of:
  - circulation plant
  - heating systems
  - lighting and ventilation systems
  - disinfection systems
  - supplies
- emergency situations that can occur with plant and equipment, and how to respond
- project management techniques:
  - planning and scheduling
  - consultation and communication
  - evaluation.

## Assessment Conditions

Skills must be demonstrated in:

- a workplace or simulated aquatic facility or environment.

Assessment must ensure use of:

- equipment and plant for which the candidate plans maintenance procedures
- organisational policies, procedures and budget
- equipment operating and maintenance instructions
- resources to maintain facility and equipment.

Assessment activities that allow the individual to:

- implement and monitor maintenance activity over time.

Assessors must satisfy the Standards for Registered Training Organisations' requirements for assessors.

# SISCAQU006 Supervise clients in aquatic locations

## Modification History

Not applicable.

## Application

This unit describes the performance outcomes, skills and knowledge required to supervise clients in aquatic locations, minimising risk through identifying and responding to potential hazards and emergencies.

This unit applies to those working in aquatic settings or environments such as swimming pools and other aquatic recreation facilities. Work is performed according to best practice principles of aquatic activities, relevant legislation and organisational policies and procedures.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

## Pre-requisite Unit

Nil

## Competency Field

Aquatics

## Unit Sector

Community Recreation

## Elements and Performance Criteria

### ELEMENTS

Elements describe the essential outcomes

1. Identify potential hazardous behaviours and situations.

### PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

- 1.1 Access and interpret the organisation's risk management plan.
- 1.2 Identify hazardous behaviours and activities of clients.
- 1.3 Identify clients at risk or those who have specific needs.

- 1.4 Identify environmental hazards for clients in aquatic facilities or environments.
2. Maintain a safe aquatic facility or environment.
  - 2.1 Promote compliance with safety rules to clients and staff and provide clear information on requirements.
  - 2.2 Identify supervision requirements and select techniques suited to the facility or environment.
  - 2.3 Monitor client behaviour and activities and identify situations that pose a risk to the individual or other facility users.
  - 2.4 Inform clients of unacceptable behaviours and provide clear information about required behaviour.
  - 2.5 Select and use communication and conflict resolution techniques that maximise the chance of positive outcomes.
  - 2.6 Report and document unsafe situations.
3. Assess possible emergency or rescue situations.
  - 3.1 Identify signs of possible casualty or difficulty.
  - 3.2 Assess situation and determine appropriate response to emergency.
  - 3.3 Promptly communicate emergency situation to appropriate personnel.
  - 3.4 Report and document incidents.

## Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Unit Mapping Information

SISCAQU306A Supervise clients at an aquatic facility of environment

## Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=1ca50016-24d2-4161-a044-d3faa200268b>

# Assessment Requirements for SISCAQU006 Supervise clients in aquatic locations

## Modification History

Not applicable.

## Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- identify hazardous situations and action appropriate responses to all of the following situations:
  - inappropriate behaviour
  - environmental
  - individual(s) experiencing difficulty in the water
  - emergency/rescue situations
- select and use communication techniques as appropriate to each of the hazardous situations:
  - clear verbal communication
  - negotiation
  - conflict resolution.

## Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- legislation and organisational policies and procedures:
  - work health and safety/occupational health and safety
  - use and care of equipment
  - communication protocols
  - safety, rescue and emergency procedures
  - incident reporting
  - appropriate responses to potential risk
  - behaviour management
- industry standards that enables a low risk environment for client activities and appropriate response to emergencies
- hazardous behaviour and activities that pose risks to clients and how to identify and deal with them appropriately:
  - misusing equipment
  - swimming in unsafe areas

- behaving with disregard for the safety of others or self
- diving into shallow water
- consuming alcohol or illegal drugs
- signs and signals of people experiencing difficulties in the water and how to respond:
  - lack of movement
  - arm waving
  - calling for help
- signs and symptoms of physical injury
- environmental hazards and how to respond:
  - weather conditions
  - reflective glare
  - water clarity or turbidity
  - rips
  - shallow water
- characteristics and needs of individuals who are high risk:
  - overweight
  - elderly
  - people with a disability
  - young children
  - drug or alcohol effected
  - weak or non-swimmers
  - injured swimmers
- incidence and features of alcohol related drowning
- best practice principles of aquatic rescues:
  - accepted preventative practice adopted in aquatic industry
  - guidelines and codes of conduct
  - culture of life saving
- communication techniques
  - clear communication
  - negotiation
  - conflict resolution techniques.

## Assessment Conditions

Skills must be demonstrated in:

- a workplace or simulated aquatic facility or confined natural shallow water environment.

Assessment must ensure use of:

- organisational policies and procedures appropriate to risk management
- first aid facilities and equipment

- incident reporting documentation
- participants using the aquatic facility, these can be:
  - participants in a workplace, or
  - individuals who participate in project activities, role plays or simulated activities, set up for the purpose of assessment, within a training organisation.

Assessment activities that allow the individual to:

- respond to problems and emergency situations.

Assessors must satisfy the Standards for Registered Training Organisations' requirements for assessors.

## Links

# SISCAQU007 Perform advanced water rescues

## Modification History

Not applicable.

## Application

This unit describes the performance outcomes, skills and knowledge required to identify, evaluate and respond to aquatic emergencies using established rescue procedures.

The unit applies to lifeguards (and others when a lifeguard is not available) who perform advanced water rescues in a range of situations, including swimming pools. Work is performed according to accepted best practice principles of aquatic rescues, first aid, relevant legislation and organisational policies.

Specific licensing requirements relating to this competency, including requirements for refresher training, should be obtained from the relevant state/territory work health and safety regulatory authority.

## Pre-requisite Unit

HLTAID003 Provide first aid

SISCAQU002 Perform basic water rescues

## Competency Field

Aquatics

## Unit Sector

Community Recreation

## Elements and Performance Criteria

### ELEMENTS

Elements describe the essential outcomes

1. Identify and evaluate major aquatic

### PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

- 1.1 Recognise factors which contribute to aquatic emergencies.

- |                                                 |                                                                                                                       |
|-------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------|
| emergencies.                                    | 1.2 Recognise signs and signals of aquatic emergency and communicate initial assessment to appropriate personnel.     |
|                                                 | 1.3 Identify appropriate emergency response for the situation and people involved.                                    |
|                                                 | 1.4 Promote compliance with safety rules of aquatic facility to clients.                                              |
| 2. Respond to aquatic emergency.                | 2.1 Activate emergency systems and implement strategies for group control.                                            |
|                                                 | 2.2 Assess factors impacting on the advanced water rescue and formulate a rescue plan.                                |
|                                                 | 2.3 Determine appropriate involvement of others, type of rescue required and rescue equipment needed.                 |
|                                                 | 2.4 Identify hazards and take appropriate action to prevent further injury to the casualty, self or others.           |
|                                                 | 2.5 Perform an advanced water rescue using established techniques and procedures and safe manual handling techniques. |
| 3. Assess the casualty.                         | 3.1 Observe and assess condition of the casualty.                                                                     |
|                                                 | 3.2 Assess vital signs and symptoms of shock and provide appropriate treatment.                                       |
| 4. Organise further emergency care as required. | 4.1 Contact emergency services and provide accurate information to obtain required assistance.                        |
|                                                 | 4.2 Monitor casualty or arrange further treatment until emergency response team assumes responsibility.               |
| 5. Record and report the incident.              | 5.1 Complete required documentation in agreed format.                                                                 |
|                                                 | 5.2 Notify other personnel and statutory authorities of incident as required.                                         |

## Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Unit Mapping Information

No equivalent unit.

## Links

# Assessment Requirements for SISCAQU007 Perform advanced water rescues

## Modification History

Not applicable.

## Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- identify and respond to all of the following signs and signals of aquatic emergencies according to organisational and legislative requirements:
  - call for help
  - vertical body position
  - diagonal body position
  - minimal or non-supportive leg action
  - vigorous arm movements
  - submerged or unconscious person
- use the following equipment and techniques during rescue situations:
  - spinal immobilisation equipment
  - oxygen supplemented resuscitation
  - oxygen therapy
  - safe manual handling techniques
- demonstrate correct swimming strokes, personal survival and rescue skills:
  - personal survival and defensive techniques on approach to a casualty
  - contact tow of both a conscious and unconscious casualty
  - non-contact tow of a conscious casualty
- successfully complete fitness and strength tests:
  - swim 200 metres in less than 6 minutes without using equipment
  - retrieve an object from the deepest water within the aquatic environment no greater than 3 metres in depth. If depth is greater than 3 metres assistance may be used e.g. fins
- respond in a team to at least two of each of the simulated emergency scenarios contextualised to the candidate's workplace/aquatic environment:
  - assist two other team members with the removal of an unconscious person from the water
  - complete a 25 metre swim and 25 metre non-contact tow of a conscious casualty with assisted landing in less than 1minute 45 seconds
  - work as a team to perform spinal immobilisation, stabilization and removal of a suspected spinal injury casualty in both shallow and deep water:

- immobilise and roll over as per workplace and pool depth
- use of available spinal immobilisation equipment.

## Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- legislation and organisational policies and procedures that enable the safe and appropriate conduct of all activities:
  - work health and safety/occupational health and safety
  - duty of care
  - working with children
  - communication protocols
  - rescue and emergency procedures
  - incident reporting
- factors leading to aquatic emergencies:
  - swimming ability
  - deep water
  - shallow water
  - river currents
  - surf conditions
  - strong winds
  - risk taking behaviour
- different aquatic emergencies and appropriate responses:
  - sudden unconsciousness
  - spinal injury
  - drowning
  - heart attack
  - severe bleeding
  - epileptic seizures
  - severe asthma attacks
- factors contributing to aquatic emergencies to enable prompt and accurate assessment of emergency situations:
  - number of casualties
  - rescue equipment
  - number and location of other staff
- accepted best practice principles of aquatic rescues
- first aid techniques and standards to enable provision of safe and effective response and treatment of casualties
- types and characteristics of water rescue equipment used in advanced water rescue to enable safe and effective use:

- spinal immobilisation equipment
- oxygen supplemented resuscitation
- oxygen therapy
- role of lifeguards and other personnel during major aquatic emergencies to enable effective emergency responses.

## Assessment Conditions

Skills must be demonstrated in:

- a workplace or simulated aquatic facility or environment appropriate to the candidate's current or intended work role.

Assessment must ensure use of:

- CPR mannequins
- rescue equipment:
  - reaching aids
  - spinal immobilisation equipment
  - pool rescue equipment (rescue tubes/rings)
- suitable participants to enable demonstration of all water rescue techniques and scenarios, these can be:
  - participants in a workplace, or
  - individuals who participate in project activities, role plays or simulated activities, set up for the purpose of assessment, within a training organisation.

Assessment activities that allow the individual to:

- respond to realistic in-depth, industry-validated rescue scenarios and simulations.

Assessors must satisfy the Standards for Registered Training Organisations' requirements for assessors.

# SISCAQU012 Assist participants with a disability during aquatic activities

## Modification History

Not applicable.

## Application

This unit describes the performance outcomes, skills and knowledge required to identify the needs of participants with a disability, assist them to safely enter and exit the water and to provide appropriate support during aquatic activities.

This unit applies to those conducting learn-to-swim and water familiarisation classes in swimming pools or confined natural shallow water venues. Work is performed according to relevant legislation, public health regulatory requirements and organisational policies and procedures.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

## Pre-requisite Unit

Nil

## Competency Field

Aquatics

## Unit Sector

Community Recreation

## Elements and Performance Criteria

### ELEMENTS

Elements describe the essential outcomes

1. Identify participant needs.

### PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

- 1.1 Consider participant group characteristics and suitability of environmental features to participant needs.

- 1.2 Assess the degree and type of support required.
  - 1.3 Determine entry and exit requirements, and appropriate entry and exit points.
  - 1.4 Report any unsuitable environmental features or entry and exit points.
2. Provide aquatic support.
  - 2.1 Select and use communication techniques suited to participants.
  - 2.2 Advise participants and caregivers of location and appropriate use of resources.
  - 2.3 Provide clear information and demonstrations to participants and caregivers and confirm understanding.
  - 2.4 Seek and respond to questions or feedback from participants and caregivers.
  - 2.5 Provide appropriate type and level of support.
  - 2.6 Observe and monitor participant responses and adjust support provided, as required.
  - 2.7 Respond to participants or caregivers experiencing difficulties.
3. Review aquatic support.
  - 3.1 Respond to participant and caregiver concerns, feedback and questions as required.
  - 3.2 Report on resources and aspects needing further emphasis, attention or intervention in future sessions.
  - 3.3 Review own performance and identify areas needing improvement and appropriate strategies as required.

## Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Unit Mapping Information

SISCAQU312A Assist participants with a disability during aquatic activities.

## Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=1ca50016-24d2-4161-a044-d3faa200268b>

# Assessment Requirements for SISCAQU012 Assist participants with a disability during aquatic activities

## Modification History

Not applicable.

## Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- provide support to at least three clients with different types of disability
- correctly use the following physical support techniques:
  - hands on torso
  - hands to hands
  - back hold in vertical or horizontal positions
  - short arm hold
  - cradling
  - carry hold
  - hip hold
  - prone hold
  - prone side hold
  - assisted entries and exits
- select and use communication strategies suited to individual clients, including the following:
  - active listening
  - open questioning
  - non-verbal
  - visual
  - sensory
  - tactile.

## Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- legal, ethical and organisational policies and procedures:
  - work health and safety/occupational health and safety
  - duty of care
  - working with children

- communication protocols
- codes of conduct
- best practice principles of aquatic activities
- disability specific legislation
- current policies and frameworks supporting provision of services to people with a disability
- factors affecting support requirements:
  - physical disability
  - intellectual or sensory impairment
  - mobility
  - fitness
  - body type and composition
  - age
- environmental features to be considered:
  - ramps
  - hoists
  - steps
  - surface type
  - railings
  - water depth
  - available water space
- aquatic support techniques and their application to different participant requirements, as specified in the Performance Evidence
- communication techniques and the need to adapt to specific needs:
  - clear verbal communication
  - visual
  - tactile
- use, care and maintenance of equipment used to support people with a disability
- first aid and water rescue techniques to enable appropriate responses to participants or caregivers experiencing difficulties
- cardiopulmonary resuscitation techniques to enable initial response to emergencies as per Australian Resuscitation Council (ARC) guidelines.

## Assessment Conditions

Skills must be demonstrated in:

- a workplace or simulated aquatic facility or confined natural shallow water environment.

Assessment must ensure use of:

- participants with a disability to whom services are provided

- organisational policies and procedures appropriate to risk management
- incident reporting documentation.

Assessment must ensure access to:

- first aid facilities and equipment.

Assessment activities that allow the individual to:

- respond to typical challenges that arise when providing support to people with a disability.

Assessors must satisfy the Standards for Registered Training Organisations' requirements for assessors.

# SISCAQU013 Coordinate lifeguard service at an aquatic facility

## Modification History

Not applicable.

## Application

This unit describes the performance outcomes, skills and knowledge required to implement and monitor lifeguard supervision requirements in an aquatic facility according to regulatory requirements.

This unit applies to managers and coordinators in aquatic environments, such as council or commercially operated aquatic and leisure centres, who are responsible for supervising the activities of staff. Work is performed according to relevant legislation and organisational policies and procedures.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

## Pre-requisite Unit

Nil

## Competency Field

Aquatics

## Unit Sector

Community Recreation

## Elements and Performance Criteria

### ELEMENTS

Elements describe the essential outcomes

1. Identify lifeguard supervision requirements.

### PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

- 1.1 Identify and document use of aquatic facility or environment.
- 1.2 Access and interpret information to establish supervision

- requirements.
- 1.3 Allocate resources to meet identified supervision requirements.
- 1.4 Document details of supervision to be provided.
- 2. Implement supervision requirements.
  - 2.1 Communicate policies, procedures, roles and responsibilities to staff.
  - 2.2 Identify training requirements, current capability and fill gaps where required.
  - 2.3 Monitor, evaluate, and provide feedback on staff performance.
  - 2.4 Adjust supervision to meet changing requirements.
  - 2.5 Inspect the facility regularly to identify potential risks and take action to minimise within scope of responsibility.
- 3. Manage emergency situations.
  - 3.1 Communicate emergency procedures to staff.
  - 3.2 Conduct emergency drills according to agreed procedures.
  - 3.3 Assess and manage emergencies according to agreed procedures.
  - 3.4 Contact and use emergency services, as required.
  - 3.5 Record and report incidents.
- 4. Review and adapt lifeguard operations.
  - 4.1 Evaluate lifeguard operations according to agreed mechanisms.
  - 4.2 Review own performance and seek feedback from stakeholders.
  - 4.3 Review and implement modifications to lifeguard operations in response to feedback.

## Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Unit Mapping Information

SISCAQU416A Coordinate lifeguard service at an aquatic facility

## Links

# Assessment Requirements for SISCAQU013 Coordinate lifeguard service at an aquatic facility

## Modification History

Not applicable.

## Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- identify and document supervision requirements for at least three different operational situations according to regulatory requirements
- implement and monitor supervision requirements at an aquatic facility on at least three different occasions, involving at least three of the following situations:
  - where requirements change without notice
  - when there are groups of children in the facility
  - where inflatables are being used
  - during periods of high use
  - during periods of low use
- assess, manage and report on at least two different emergency situations.

## Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- legislation and organisational policies and procedures:
  - work health and safety/occupational health and safety
  - use and care of equipment
  - communication protocols
  - safety, rescue and emergency procedures
  - incident reporting
  - appropriate responses to potential risk
  - behaviour management
- factors for consideration in planning supervision requirements and regulatory requirements:
  - level of use
  - pattern of use
  - profile of users
  - nature of the location
- human resource management techniques in the context of lifeguard operations:

- rostering
- performance management
- training
- potential dangers or hazards commonly encountered in aquatic environments:
  - misuse of equipment
  - swimming in unsafe areas
  - behaving with disregard for the safety of others
- facility or environment hazards and how these can be monitored through supervision
- factors affecting the classification of emergencies:
  - nature and size
  - likely development
  - availability of support to enable an appropriate response
- supervision techniques:
  - opening and closing procedures
  - rostering lifeguards
  - allocating duties and responsibilities
  - cleaning and maintenance
- first aid, emergency and rescue procedures appropriate to the conditions.

## Assessment Conditions

Skills must be demonstrated in:

- a workplace or simulated aquatic environment.

Assessment must ensure use of:

- individuals to whom the candidate provides leadership, training and supervision
- organisational policies and procedures appropriate to risk management
- incident reporting documentation
- Participants to be supervised by lifeguards, these can be:
  - participants in a workplace, or
  - individuals who participate in project activities, role plays or simulated activities, set up for the purpose of assessment, within a training organisation.

Assessment activities to allow the individual to:

- monitor activities over a period of time
- respond to problems typical of lifeguard service provision.

Assessors must satisfy the Standards for Registered Training Organisations' requirements for assessors.

## **SISONAV403A Navigate in uncontrolled environments**

### **Modification History**

Not Applicable

### **Unit Descriptor**

This unit describes the performance outcomes, skills and knowledge required to Navigate in uncontrolled environments within an activity-specific context. This includes areas which are totally natural with no modifications made to the natural surface and where the onset of extreme environmental conditions may have a significant adverse impact upon the activity.

### **Application of the Unit**

This unit applies to adventure guides or outdoor leaders working for private outdoor adventure companies and or school based outdoor education programs, such as holiday programs and camps. Activities requiring navigation may include bushwalking, skiing and snowboarding in unmodified landscapes in extreme environmental conditions which are totally natural with no modifications made to the natural surface, no clearance or signage, indistinct track alignment and are not managed for public risk.

This may include those working for private outdoor adventure companies, volunteer organisations, not for profit organisations, government agencies, or group instructors in outdoor education programs.

### **Licensing/Regulatory Information**

No licensing, regulatory or certification requirements apply to this unit at the time of endorsement.

### **Pre-Requisites**

Nil

### **Employability Skills Information**

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

### Elements and Performance Criteria

#### ELEMENT

#### PERFORMANCE CRITERIA

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the Evidence Guide.

#### 1. Plan for navigation.

- 1.1. Obtain and become familiar with appropriate ***map or maps*** for the activity.
- 1.2. Identify ***symbols and information*** contained on the map that may be used in navigation.
- 1.3. Apply information contained on the map to plan an efficient route or course according to specific activity requirements, ***contextual issues, relevant legislation, and organisational policies and procedures.***
- 1.4. Obtain and identify essential features of a compass and how it is used to maintain a designated course.
- 1.5. Calculate grid and magnetic bearings using a map and compass.
- 1.6. Prepare a ***navigation data sheet*** and identify emergency or contingency escape routes.

#### 2. Navigate in unmodified landscapes.

- 2.1. Apply ***navigation techniques*** to orientate map to ***surroundings*** with a compass and identify factors that affect accuracy.
- 2.2. Follow a route in ***unmodified landscapes***, demonstrating use of a combination of ***navigation aids*** according to relevant legislation and organisational policies and procedures.
- 2.3. Apply ***techniques for estimating distance*** travelled in the absence of identifying features.
- 2.4. Maintain, where necessary, a compass course while bypassing an ***obstacle.***
- 2.5. Identify unknown features and ***hazards in extreme environmental conditions*** using navigation aids.
- 2.6. Fix position using a combination of navigation techniques and identify unknown features when lost.

#### 3. Evaluate navigations.

- 3.1. Evaluate ***relevant aspects*** of navigation.
- 3.2. Identify improvements or modifications for future navigations in unmodified landscapes in extreme environmental conditions.

## Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

### Required skills

- literacy skills to:
  - read and interpret maps
  - follow instructions and procedures
  - develop a navigation data sheet
- planning and organising skills to:
  - obtain navigation equipment
  - plan and follow routes and courses
- numeracy skills to calculate grid and magnetic bearings and distances using a map and compass in conditions of poor visibility
- problem-solving skills to:
  - make prompt decisions
  - maintain a compass course while bypassing an obstacle
  - fix position and determine current location when lost in unmodified landscapes in extreme environmental conditions.

### Required knowledge

- legislation and organisational policies and procedures to enable safe conduct of all activities
- different types of maps, sources of error and factors affecting accuracy in extreme environmental conditions to enable appropriate map selection and use
- map features, including symbols, contour lines, scales, grid lines and legends to enable efficient map reading
- features of a compass, their use and factors that affect compass accuracy
- route planning and factors that should be considered when navigating in unmodified landscapes in extreme environmental conditions
- navigation techniques in unmodified landscapes to determine distance, location, direction and potential obstacles and hazards
- techniques for estimating distance travelled, determining position when lost and navigating around obstacles in unmodified landscapes.

## Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment

Guidelines for the Training Package.

## Overview of assessment

### Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the following is essential:

- applies relevant process to plan a route in unmodified landscapes and demonstrates navigation techniques to orientate and follow directions in extreme environmental conditions
- navigates around obstacles and hazards in unmodified landscapes while maintaining a compass course
- evaluates and reflects on own navigation performance to identify strengths, weaknesses and areas that need improvement.

### Context of and specific resources for assessment

Assessment must ensure participation in navigation activities in unmodified landscapes that are of sufficient breadth and duration to demonstrate competency and consistency of performance.

Assessment must also ensure access to:

- a suitable outdoor location with unmodified landscapes within an activity-specific context that align to Class 6 Tracks within the Australian Standard for Walking Tracks
- navigation equipment such as map or maps, compass, GPS and activity-specific equipment.

### Method of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- oral or written questioning to assess knowledge of navigation techniques used to maintain a course in unmodified landscapes
- observation of safe participation and demonstration of navigation skills, such as maintaining a compass course while bypassing an obstacle and fixing position when lost
- third-party reports from a supervisor detailing performance.

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:

- SISOBWG404A Bushwalk in unmodified landscapes.

## Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

***Map or maps*** may include:

- cadastral and topographic maps
- charts
- hydrographic
- aerial photographs
- guide books and diagrams.

***Symbols and information*** may include:

- grid lines and numbers
- contour lines
- magnetic variation
- scale
- map legend
- topographic features
- markers and beacons
- water depth.

***Contextual issues*** may include:

- weather conditions, including times
- seasons
- transport
- location
- trip distance and duration
- group objectives
- group size.

***Relevant legislation*** may include:

- occupational health and safety
- permits or permission for access
- environmental regulations.

***Organisational policies and procedures*** may include:

- occupational health and safety
- communication protocols
- use and maintenance of equipment
- code of ethics.

***Navigation data sheet*** may include:

- grid reference points
- grid and magnetic bearings
- distances
- estimated travelling times

***Navigation techniques*** may include:

- height gain or loss
- gradient
- identifiable features
- escape routes.
- use of compass
- linear features
- point features
- attack points
- aiming off
- collecting features
- spiral search
- sweep search
- backbearings and resections
- use of Global Positioning Systems (GPS)
- use of stars and sun
- use of natural features.

***Surroundings*** may include:

- snow conditions
- bodies of water
- beacons and markers
- natural formations
- landmarks
- man-made features.

***Unmodified landscapes*** include:

- uncleared tracks
- unsigned
- terrain and man-made hazards
- tracks not managed for public risk
- tracks align with Class 6 Tracks within the Australian Standard for Walking Tracks.

***Navigation aids*** may include:

- track and creek junctions and crossings
- survey markers
- beacons
- track markers
- cairns
- paths
- lines
- signs
- arrows
- watch
- weather charts
- man-made objects or features
- transits.

***Techniques for estimating distance*** may include:

- time
- observation of surroundings
- relation to features if present
- pacing.

***Obstacles*** may include:

- logs
- rocks
- gullies
- snow conditions
- exposed areas
- thick vegetation
- drops and climbs
- marshes and bogs
- fog
- rivers, lakes and dams.

***Hazards*** may include:

- temperature extremes
- slippery or unstable terrain
- dangerous animals and insects
- stinging trees and nettles
- dense vegetation
- group management hazards.

***Extreme environmental conditions*** may include:

- very poor visibility
- severe weather
- unexpected and sudden weather changes.

***Relevant aspects*** may include:

- objectives
- planning process
- activity site
- weather
- equipment selection
- clothing selection
- food selection
- instructional content
- instructional technique
- assessment technique
- group feedback
- directing techniques
- rescue techniques employed.

## **Unit Sector(s)**

Outdoor Recreation

# Competency Field

Navigation

# SISOOPS202A Use and maintain a temporary or overnight site

## Modification History

Not Applicable

## Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to establish, use and maintain a temporary or overnight site. Temporary sites include sites used for rest stops, overnight camping and emergency shelters.

## Application of the Unit

This unit applies to those working in a range of outdoor recreation environments that require use of temporary overnight sites.

This unit may also apply to leaders working for outdoor education or adventure providers; volunteer groups; not-for-profit organisations or government agencies.

## Licensing/Regulatory Information

No licensing, regulatory or certification requirements apply to this unit at the time of endorsement.

## Pre-Requisites

Nil

## Employability Skills Information

This unit contains employability skills.

|                           | 5.2. Identify improvements for future overnight stays.                                                                        |

## Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

### Required skills

- literacy and numeracy skills to:
  - read and interpret legislation and organisational policies and procedures
  - analyse weather and environmental information
- planning and organising skills to:
  - allocate and select equipment for overnight stay
  - establish and erect shelter at an appropriate site
- communication skills to:
  - interact with other participants
  - work as a team to set up camp and maintain a positive and safe environment
- problem-solving skills to:
  - deal with unforeseen circumstances
  - keep warm and sheltered, in the case of extreme environmental conditions and or loss of equipment
  - handle and prepare food hygienically
  - apply minimal impact camping techniques
- first aid and emergency response skills appropriate to the location to enable initial response to emergencies and personal health care.

### Required knowledge

- legislation and organisational policies and procedures to enable safe conduct of camping activities
- minimal impact camping and walking codes to ensure protection of environment
- equipment, clothing, footwear, food and water required for the duration of activity
- packing and maintenance techniques before, during and after the activity to protect personal and group equipment and ensure prolonged life
- principles of nutrition to maintain health and energy during activity

- food and water in emergency situations to maintain health for prolonged periods
- food preparation and cooking methods used in outdoor environments
- sanitation procedures in outdoor environments to avoid contamination and illness
- types and purposes of different shelters to enable selection and use in various weather conditions
- weather and environmental information to ascertain possible conditions and their affect on the activity including life threatening conditions
- emergency procedures and potential hazards relevant to the location to ensure risk minimisation to self and group.

## Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

### Overview of assessment

#### Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the following is essential:

- makes logistical arrangements based on knowledge of the area and selects equipment and supply requirements according to the conditions and duration of the activity
- applies camping techniques and adapts to contingencies that may arise, such as sudden change of weather
- takes precautions to maintain physical well being of self and group, such as hygiene and sanitation procedures to prevent contamination and illnesses
- evaluates and reflects on performance to identify strengths, weaknesses and areas that need improvement.

#### Context of and specific resources for assessment

Assessment must ensure establishment, use and maintenance of a temporary or overnight site on multiple occasions to demonstrate competency and consistency of performance.

Assessment must also ensure access to:

- resources and information regarding site to plan logistical arrangements
- a suitable outdoor location
- appropriate camping equipment.

#### Method of assessment

A range of assessment methods should be used to assess

practical skills and knowledge. The following examples are appropriate for this unit:

- observation of planning logistical arrangements for the activity
- oral and or written questioning and reports to assess knowledge in relation to human impact on the environment
- observation of establishing and maintaining an overnight shelter
- observation of dealing with contingencies, such as repairing and or improvising on items of essential equipment in the case of breakage or loss.
- written and or verbal self evaluation.

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:

- SISOOPS201A Minimise environmental impact
- Activity-specific units requiring the use and maintenance of a temporary or overnight site.

## Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

***Information*** may include:

- maps and charts
- guide books
- land managers and agencies.

***Temporary sites*** may include:

- rest stops
- activity sites
- temporary or overnight shelter.

***Relevant legislation*** may include:

- occupational health and safety
- permits or permission for access
- environmental regulations
- marine regulations.

***Organisational policies and procedures*** may include:

- occupational health and safety
- use and maintenance of equipment
- camp fire regulations

- Relevant sources** may include:
- emergency procedures
  - code of ethics.
  - Bureau of Meteorology
  - media
  - land managers or agencies
  - local knowledge.
- Weather and environmental information** may include:
- satellite images
  - daily and weekly forecasts
  - maximum and minimum temperatures
  - weather warnings
  - event warnings
  - river levels
  - synoptic charts
  - high and low tide predictions.
- Hazards** may include:
- temperature extremes
  - slippery or unstable terrain
  - dangerous animals and insects
  - stinging trees and nettles
  - dense vegetation
  - group management hazards.
- Human impact** may include:
- pollution
  - physical damage
  - alteration to the environment
  - visual
  - noise
  - damage to cultural heritage
  - crowding.
- Risk** may include:
- hypothermia
  - frostbite
  - dehydration
  - heat exhaustion
  - hyperthermia
  - injuries and illness
  - insect bites and stings
  - food poisoning
  - lost party or party member
  - falling trees and branches.
- Food and water requirements** may include:
- menu planning and preparation
  - range of foods:
    - perishability
    - packaging

- Principles of nutrition** may include:
- storage
  - cooking methods.
  - food groups
  - dietary guidelines
  - essential nutrients
  - food preparation:
    - methods of cooking
    - safe food handling and hygiene practices
  - individual food requirements and allergies.
- Equipment** may include:
- torch
  - tent
  - poles
  - tarp
  - sleeping bag
  - cooking system and utensils
  - pots and pans
  - ropes
  - plastic bags for rubbish
  - first aid kit
  - activity-specific equipment.
- Contextual issues** may include:
- weather conditions, including times
  - season
  - transport
  - location
  - trip distance and duration
  - group objectives
  - group size.
- Shelter** may include:
- tents
  - bivvies
  - snow caves
  - lean-to
  - mobile trailers and vans.
- Impact on natural environment** may include:
- soil
  - plants
  - water
  - geology
  - wildlife.
- Pack up** may include:
- gather all rubbish for removal
  - wipe or clean gear.
- Relevant aspects** may include:
- objectives
  - planning process

- activity site
- weather
- equipment selection
- clothing selection
- food selection
- instructional content
- instructional technique
- assessment technique
- group feedback
- directing techniques
- rescue techniques employed.

# SITXMPR001 Coordinate production of brochures and marketing materials

## Modification History

Not applicable.

## Application

This unit describes the performance outcomes, skills and knowledge required to coordinate the development process for brochures and other marketing materials from a content and production perspective.

The unit applies to all industry sectors and all types of marketing materials, both physical and virtual. Individuals working independently with limited supervision undertake this role. Depending on the business context, this could include sales and marketing personnel, managers, and owner-operators of small businesses.

This unit reflects the general skills needed by those involved in sales and marketing activities and does not include the skills required by professional graphic designers or copywriters.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

## Pre-requisite Unit

Nil

## Competency Field

Marketing and Public Relations

## Unit Sector

Cross-Sector

## Elements and Performance Criteria

Check and correct production work as required.</li><li>5.3. Approve artwork according to organisational guidelines.</li><li>5.4. Obtain and deliver materials on schedule or action contingency measures.</li></ul>                                                            |

## Foundation Skills

Foundation skills essential to performance in this unit, but not explicit in the performance criteria are listed here, along with a brief context statement.

### SKILLS

### DESCRIPTION

- Reading skills to:
- interpret quotations and product conditions
  - proofread and edit draft materials
  - create copy or check quality of outsourced copy
  - research information for inclusion from varied and potentially unfamiliar sources.
- Oral communication skills to:
- collaborate with others on technical, organisational and creative issues.
- Numeracy skills to:
- calculate costs and quantities of materials to be produced
  - work with:
    - numerical concepts of size, shape and layout
    - detailed product costings.
- Problem-solving skills to:
- evaluate factors that impact on production of marketing materials
  - respond to challenges that arise in the production of marketing materials.
- Technology skills to:
- liaise with others about technical production issues
  - work with current industry marketing technologies.

# Assessment Requirements for SITXMPR001 Coordinate production of brochures and marketing materials

## Modification History

Not applicable.

## Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- produce at least three of the marketing materials listed in the knowledge evidence, coordinating all aspects of the development process within specified deadlines
- produce each of the above marketing materials to:
  - meet stated objectives
  - provide current and accurate information
- proofread each of the above to ensure they are free of errors.

## Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- key features of marketing materials:
  - advertising material
  - conference program or registration form
  - destination guide
  - direct mail piece
  - display material
  - event prospectus
  - invitation
  - product brochure
  - product support manual
  - promotional flyer or leaflet
  - venue maps
- objectives of marketing materials and the markets for which material is required
- physical and virtual media marketing opportunities
- factors that impact production of materials in both physical and virtual contexts:
  - accessibility for those with disabilities
  - availability of information
  - design issues:

- style
- size
- legal requirements
- marketing considerations:
  - distribution considerations
  - market for review of competitive materials
  - objectives
- resource constraints:
  - budget
  - in-house capability
- technology:
  - digital media opportunities
- objectives of the material
- sustainability considerations
- time parameters
- current digital print production technologies, processes and terminology
- printing and industry conventions in relation to placement of information, page numbering and copyright information
- specification inclusions:
  - conditions of contract
  - delivery platform
  - interactivity requirements
  - layout and style of text
  - number of colours
  - number of photographs
  - production and delivery deadlines
  - size
  - total number required
  - type of paper (for print-based materials)
- quality indicators in marketing material production:
  - readability
  - photographic quality
  - effective use of colour
  - spacing requirements
- creative writing techniques used for the content of brochures and other marketing materials
- procedures and requirements for preparation and proofing of material
- copyright laws and restrictions that apply to the inclusion of certain content in brochures and other marketing materials
- procedures for copyright clearance of restricted materials

- trade practices requirements around the need for accuracy of information in marketing materials.

## Assessment Conditions

Skills must be demonstrated in an operational business environment for which brochures and marketing materials can be developed. This can be:

- an industry workplace
- a simulated industry environment.

Assessment must ensure access to:

- current information and communications technology for the development of content
- suppliers of graphic design services, print production organisations and copywriters with whom the individual can interact; these can be:
  - those in an industry workplace who are assisted by the individual during the assessment process; or
  - individuals who participate in role plays or simulated activities, set up for the purpose of assessment, in a simulated industry environment operated within a training organisation.

Assessors must satisfy the Standards for Registered Training Organisations' requirements for assessors.

## SITXMPR002 Create a promotional display or stand

### Modification History

Not applicable.

### Application

This unit describes the performance outcomes, skills and knowledge required to create a display or stand for promotional purposes. It requires the ability to identify the objectives of the promotion, determine the audience, select all display components and assemble the display or stand.

The unit applies to all industry sectors. Individuals working with some level of independence create displays at promotional events or within their own workplaces. This includes sales and marketing personnel, managers, and owner-operators of small businesses. Displays may be used to promote any product, service, or event; a group of products cooperatively marketed, or even a whole city, region or tourism precinct.

This unit does not cover the skills of a specialist display designer or visual merchandiser.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

### Pre-requisite Unit

# Assessment Requirements for SITXMPR002 Create a promotional display or stand

## Modification History

Not applicable.

## Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- create two different displays and dress two different promotional stands to meet specific organisational objectives
- use three of the following in the above displays and stands:
  - cultural artefacts
  - fabric
  - flags
  - freestanding display options
  - local produce
  - printed materials
  - product samples
  - signs
  - three-dimensional (3-D) materials
- create the above displays and stands:
  - applying the elements and principles of design
  - safely and within typical workplace time constraints.

## Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- industry contexts in which displays are used:
  - information centre displays
  - promotional functions
  - shopping centre promotions
  - trade and consumer shows
  - window displays
- information to be considered when preparing a promotional display or stand:
  - budget allocation
  - floor plans

- nature of display area
- need for utilities
- need for waste management
- work health and safety requirements
- security
- set-up times and duration
- type of surface on which display is to be created
- materials and equipment used for display in different locations and settings
- elements and principles of design as they apply to the creation of displays
- visual merchandising techniques using commonly available materials, and techniques for maximising the effectiveness of collateral in displays
- work health and safety practices for transporting, carrying and assembling the display or stand
- safety issues associated with the construction and operation of promotional displays and stands in different venues.

## Assessment Conditions

Skills must be demonstrated in an operational business environment or activity. This can be:

- an industry workplace
- a simulated industry environment.

Assessment must ensure access to:

- display space or promotional stand
- display and promotional materials used in the relevant industry sector
- display supplies:
  - adhesives and velcro
  - audio-visual systems
  - balloons and other decorations
  - collateral materials
  - computers
  - floral arrangements and potted plants
  - furniture
  - mobiles
  - pins
  - scissors
  - string.

Assessors must satisfy the Standards for Registered Training Organisations' requirements for assessors.

## TAEASS301 Contribute to assessment

### Modification History

| Release   | Comments                                                                                          |
|-----------|---------------------------------------------------------------------------------------------------|
| Release 1 | This version first released with <i>TAE Training and Education Training Package Version 2.0</i> . |

### Application

This unit describes the skills and knowledge required to contribute to the assessment process.

It applies to a person with technical or vocational expertise who is in a supervisory or mentoring/coaching work role, and for whom collecting the evidence for assessment is an adjunct to principal work responsibilities. The unit applies to those involved in collecting evidence for assessment against units of competency or accredited courses.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

### Unit Sector

# Assessment Requirements for TAEASS301 Contribute to assessment

## Modification History

| Release   | Comments                                                                                          |
|-----------|---------------------------------------------------------------------------------------------------|
| Release 1 | This version first released with <i>TAE Training and Education Training Package Version 2.0</i> . |

## Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in the elements and performance criteria of this unit, including:

- clarifying the role to be taken during the assessment
- clarifying the assessment plan with the qualified assessor, including agreement about:
  - what evidence will be collected
  - how the evidence will be collected
- carrying out a minimum of three evidence-gathering activities and, on each occasion:
  - document evidence in a clear and concise manner
  - document feedback from others involved in the assessment

reporting findings to the qualified assessor, including an explanation of how the assessment meets the rules of evidence on each of the three occasions.

## Knowledge Evidence

The candidate must be able to demonstrate essential knowledge to effectively complete the task outlined in the elements and performance criteria of this unit. This includes knowledge of:

- competency-based assessment
- the principles of assessment
- the rules of evidence
- the different purposes of assessment
- the diversity of assessment contexts
- different types of evidence
- evidence-gathering methods
- the purpose and features of assessment tools, and assessment plans

- potential barriers and processes relating to evidence-gathering procedures, and assessment processes
- the organisational policies and procedures relevant to this unit of competency.

## Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Conditions must be typical of those experienced in the training and assessment environment, and include access to qualified assessors for consultation.

Assessors must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

## TAEASS401 Plan assessment activities and processes

### Modification History

| Release   | Comments                                                                                                                                |
|-----------|-----------------------------------------------------------------------------------------------------------------------------------------|
| Release 2 | This was first released with <i>TAE Training and Education Training Package Release 2.1</i> .<br>Minor update to Assessment Conditions. |
| Release 1 | This version first released with <i>TAE Training and Education Training Package Release 2.0</i> .                                       |

### Application

This unit describes the skills and knowledge required to plan the assessment process, including recognition of prior learning (RPL), in a competency-based assessment system.

It applies to individuals with assessment planning responsibilities.

In planning activities and processes, individuals are required to identify the components of assessment tools, analyse and interpret assessment tools, and develop assessment instruments (also known as assessment tasks) and assessment plans.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

### Unit Sector

Assessment

### Elements and Performance Criteria

| ELEMENT                                          | PERFORMANCE CRITERIA                                                                                                       |
|--------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------|
| <i>Elements describe the essential outcomes.</i> | <i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>                     |
| 1. Determine the assessment approach             | 1.1 Identify the candidate and confirm the purposes and context of the assessment with relevant people according to legal, |

| ELEMENT                                                     | PERFORMANCE CRITERIA                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |
|-------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|

### Performance Evidence

The candidate must demonstrate the ability to complete tasks outlined in the elements and performance criteria of this unit, including:

- planning and organising the assessment process on a minimum of five separate occasions
- planning and organising two Recognition of Prior Learning (RPL) assessments (which may be two of the five assessment processes above.)

The evidence requirements for each occasion must include:

- a documented assessment plan
- a different endorsed or accredited unit of competency (or clusters of units of competency) for each of the five occasions
- contextualisation of the unit(s) of competency and the selected assessment tools, where required
- incorporation of reasonable adjustment strategies
- development of suitable assessment instruments for each of the five occasions

following organisational arrangements.

### Knowledge Evidence

The candidate must be able to demonstrate essential knowledge to effectively complete the task outlined in the elements and performance criteria of this unit. This includes knowledge of:

- obligations of an assessor under applicable legislation and/or standards

- the major features of a unit of competency, and how they are to be addressed in assessment activities and processes
- interpreting competency standards as the minimum standard for assessment
- guidelines for contextualising units of competency
- different purposes of assessment and different assessment contexts, including RPL
- the purpose and features of evidence, and different types of evidence, used in competency-based assessments, including RPL
- the principles of assessment, and how they guide the assessment process
- the rules of evidence and how they guide the assessment process
- different assessment methods, including their suitability for collecting various types of evidence
- the components of assessment tools

different types of assessment instruments and their purpose and relevance for specific evidence-gathering opportunities.

## Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and which are typical of those experienced in the training and assessment environment. This includes access to the units of competency used in assessment planning activities.

Assessors must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

### Application

This unit describes the skills and knowledge required to implement an assessment plan, and gather quality evidence to assess the competence of a candidate using compliant assessment tools.

It applies to teachers, trainers and assessors in enterprises and registered training organisations (RTOs) and those providing assessment advisory services.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Assessment Requirements for TAEASS402 Assess competence

### Modification History

| Release   | Comments                                                                                                                                |
|-----------|-----------------------------------------------------------------------------------------------------------------------------------------|
| Release 2 | This was first released with <i>TAE Training and Education Training Package Release 2.1</i> .<br>Minor update to Assessment Conditions. |
| Release 1 | This version first released with <i>TAE Training and Education Training Package Release 2.0</i> .                                       |

### Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in the elements and performance criteria of this unit, including:

- assessment of at least five candidates within the vocational education and training (VET) context against at least one endorsed or accredited unit of competency according to the organisation's assessment processes and practices.
- using recognition of prior learning (RPL) processes in the assessment of at least one candidate (which may be one of the five candidates above)
- making reasonable adjustments in the assessment of at least one candidate.

The assessments must be undertaken under the supervision of a qualified assessor and cover an entire unit of competency for each candidate, including:

- the application of different assessment methods and instruments involving a range of activities and events
- using two-way communication and feedback with the candidate
- exercising judgement in making the assessment decision
- recording and reporting assessment outcomes in accordance with the assessment system and organisational, legal and ethical requirements

reviewing the assessment process.

### Knowledge Evidence

The candidate must be able to demonstrate essential knowledge to effectively complete the task outlined in the elements and performance criteria of this unit. This includes knowledge of:

- competency-based assessment, including:
  - VET as a competency-based system
  - how competency based assessment differs from other types of assessment
  - competency standards as the basis of qualifications
  - structure and application of competency standards
  - the principles of assessment and how they are applied
  - the distinction between assessment tools and assessment instruments
  - the rules of evidence and how they are applied
  - the range of assessment purposes and assessment contexts, including RPL
  - different assessment methods, including suitability for gathering various types of evidence, suitability for the content of units, and resource requirements and associated costs
  - reasonable adjustments and when they are applicable
  - types and forms of evidence, including assessment instruments that are relevant to gathering different types of evidence used in competency-based assessment, including RPL
  - the training and assessment strategies, including policies and procedures established by the industry, organisation or training authority
- RPL policies and procedures established by the organisation
- cultural sensitivity and equity considerations in assessment activities
- current legislative requirements relevant to the assessor and the assessment process
- workplace health and safety (WHS) responsibilities associated with assessing competence, including:
  - requirements for reporting hazards and incidents
  - emergency procedures
  - procedures for the use of relevant personal protective equipment
  - the safe use and maintenance of relevant equipment
  - sources of WHS information.

## Assessment Conditions

Gather evidence to demonstrate consistent performance in a real assessment environment. The assessment environment must include access to assessment tools and recording materials.

Assessors must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

| Release 1 | This version first released with <i>TAE Training and Education Training Package Release 2.0</i>                                          |

### Application

This unit describes the skills and knowledge required to participate in an assessment validation process.

It applies to assessors and workplace supervisors with assessment validation responsibilities participating in, but not necessarily leading, the process.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

|                                                      | <p>1.3 Check all documents used in the validation process for accuracy and version control</p> <p>1.4 Analyse relevant units of competency and agree on the evidence needed to demonstrate competence</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |
| 2. Participate in the validation of assessment tools | <p>2.1 Demonstrate active and appropriate participation in validation sessions and activities using agreed communication methods and modes</p> <p>2.2 Apply principles of assessment and rules of evidence during validation sessions and activities</p> <p>2.3 Check that context and conditions of assessment include clear instructions for assessor and candidate and relate directly to the assessment conditions of the relevant unit</p> <p>2.4 Check that tasks to be administered to the candidate include clear and concise instructions and an outline of evidence requirements</p> <p>2.5 Check that assessment decision-making rules and benchmarks, are clear and enable consistent outcomes</p> <p>2.6 Check that recording mechanisms are clear and allow for sufficient information to be recorded</p> <p>2.7 Review and use assessment maps to assist in determining validity of assessment instruments</p> |
| 3. Contribute to validation outcomes                 | <p>3.1 Discuss validation findings to support improvements in the quality of assessment in a collective environment</p> <p>3.2 Discuss, agree and record recommendations to improve assessment practice</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |

## Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

| Skill                      | Performance Criteria                             | Description                                                                                                                                                                                                                                                                                             |

| Release 1 | This version first released with <i>TAE Training and Education Training Package Release 2.0</i>                                    |

### Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in the elements and performance criteria of this unit, including:

- actively participating in a minimum of three validation sessions that address the critical aspects of validation
- clearly identifying the purpose for each validation, and the legal and ethical responsibilities of assessors
- collating and presenting documentation for each validation in a logical manner
- communicating and liaising with relevant people
- providing feedback and interpreting documentation in validation sessions
- recording their contribution to validation findings.
- 

### Knowledge Evidence

The candidate must be able to demonstrate essential knowledge to effectively complete the task outlined in the elements and performance criteria of this unit. This includes knowledge of:

- how to determine the evidence needed to demonstrate competence in a competency-based environment
- the reasons for carrying out validation and different approaches to validation that may be appropriate before, during and after an assessment
- the components of assessment tools
- critical aspects of validation, including validation of assessment processes, methods and products
- how principles of assessment are addressed in validation

- how rules of evidence are addressed in validation
- work health and safety legislation, codes of practice, standards and guidelines that impact on assessment
- obligations of an assessor under applicable legislation and/or standards, particularly in relation to validation activities.
- 

## Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Conditions must be typical of those experienced in the training and assessment environment, and include access to:

- the texts and tasks usually found in the workplace
- units of competency and other materials used in validation sessions.

Assessors must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

### Application

This unit describes the skills and knowledge required to design and to develop assessment tools used to guide the collection of quality evidence, including their application in formative, summative and recognition of prior learning (RPL) assessment.

It applies to experienced practitioners responsible for the development and/or delivery of training and assessment products and services.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

| 2. Design the assessment tool           | <p>2.1 Select assessment methods that support the collection of defined evidence, taking into account the context in which the assessment will take place, and meeting the principles of assessment</p> <p>2.2 Enable candidates to show or support their claim for recognition of current competency through selected assessment methods</p> <p>2.3 Consider different assessment instruments for the selected assessment methods to generate options for collection of evidence</p> <p>2.4 Consider how the assessment instruments will be administered</p> |
| 3. Develop the assessment tool          | <p>3.1 Develop specific assessment instruments that support the collection of evidence that meets the rules of evidence</p> <p>3.2 Define and document clear and specific procedures instructing assessor and candidate on the administration and use of assessment instruments</p> <p>3.3 Consider the requirements of assessment system policies and procedures, and address storage and retrieval needs, and review, evaluation and version control procedures as part of this process</p>                                                                 |
| 4. Review and trial the assessment tool | <p>4.1 Check draft assessment tools against evaluation criteria and amend as required</p> <p>4.2 Trial assessment tools to validate content and applicability</p> <p>4.3 Collect and document feedback from relevant people involved in trialling</p> <p>4.4 Make amendments to the final tool based on the analysis of feedback</p> <p>4.5 Appropriately format, and file, finalised assessment tool according to assessment system policies and procedures</p>                                                                                              |

## Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

| Skill                      | Performance Criteria                             | Description                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |

# Assessment Requirements for TAEASS502 Design and develop assessment tools

## Modification History

| Release   | Comments                                                                                                                                |
|-----------|-----------------------------------------------------------------------------------------------------------------------------------------|
| Release 2 | This was first released with <i>TAE Training and Education Training Package Release 2.1</i> .<br>Minor update to Assessment Conditions. |
| Release 1 | This version first released with <i>TAE Training and Education Training Package Release 2.0</i> .                                       |

## Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in the elements and performance criteria of this unit, including:

- developing at least three assessment tools that support different assessment methods, and address at least one unit of competency each. Each assessment tool must:
- include the instruments for collecting evidence, reflecting the principles of assessment and the rules of evidence, and related instructions to the assessor/s and candidates
- show how the contextual needs of different environments are addressed

reporting on the trial and review of each assessment tool, including proposed changes.

## Knowledge Evidence

The candidate must be able to demonstrate essential knowledge to effectively complete the task outlined in the elements and performance criteria of this unit. This includes knowledge of:

- the principles of assessment and how they are applied when developing assessment tools
- the rules of evidence and how they have been incorporated in the tools developed
- different assessment contexts and their relationship to developing assessment tools
- the dimensions of competency and how they are incorporated in the development of assessment tools
- the contextualisation of units of competency and contextualisation guidelines
- the components of training packages relevant to the development of assessment tools
- different assessment methods, their purposes and uses
- evaluation methods appropriate to the trial and review of assessment tools
- the principles of reasonable adjustment

- workplace health and safety (WHS) responsibilities associated with assessing competence, including:
  - requirements for reporting hazards and incidents
  - emergency procedures
  - procedures for the use of relevant personal protective equipment
  - sources of WHS information.

## Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Conditions must be typical of those experienced in the training and assessment environment, and include access to relevant organisational policies and procedures in relation to the assessment system.

Assessors must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

## TAEDEL301 Provide work skill instruction

### Modification History

| Release   | Comments                                                                                          |
|-----------|---------------------------------------------------------------------------------------------------|
| Release 1 | This version first released with <i>TAE Training and Education Training Package Version 2.0</i> . |

### Application

This unit describes the skills and knowledge required to conduct individual and group instruction, demonstrate work skills and assess the success of training and one's own training performance, using existing learning resources in a safe and comfortable learning environment.

It emphasises the training as being driven by the work process and context, and applies to a person working under supervision as a work skill instructor in a wide range of settings not restricted to training organisations,

No licensing, legislative or certification requirements apply to this unit at the time of publication.

### Unit Sector

Delivery and facilitation

### Elements and Performance Criteria

| ELEMENT                                          | PERFORMANCE CRITERIA                                                                                                                                                                                                                                                                |

# Assessment Requirements for TAEDEL301 Provide work skill instruction

## Modification History

| Release   | Comments                                                                                          |
|-----------|---------------------------------------------------------------------------------------------------|
| Release 1 | This version first released with <i>TAE Training and Education Training Package Version 2.0</i> . |

## Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in the elements and performance criteria of this unit, including:

- carrying out a minimum of three training sessions, involving demonstrating and instructing particular work skills for at least two different individuals or small groups, with each session addressing:
  - different learning objectives
  - a range of delivery techniques and effective communication skills appropriate to the audience.

## Knowledge Evidence

The candidate must be able to demonstrate essential knowledge to effectively complete the task outlined in the elements and performance criteria of this unit. This includes knowledge of:

- learner characteristics and needs
- the content and requirements of the relevant learning program, and/or the delivery plan
- the sources and availability of relevant learning resources and learning materials
- the content of relevant learning resources and learning materials
- training techniques that enhance learning, and when to use them
- introductory knowledge of learning principles and learning styles
- key workplace health and safety (WHS) issues in the learning environment, including:
  - roles and responsibilities of key personnel
  - responsibilities of learners
  - relevant policies and procedures, including hazard identification, risk assessment, reporting requirements, safe use of equipment and emergency procedures
  - risk controls for the specific learning environment.

## Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Conditions must be typical of those experienced in the training and assessment environment and include access to any necessary workplace documents.

Assessors must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

## Application

This unit describes the skills and knowledge required to plan, organise and deliver training for individuals within a group.

It applies to a person working as an entry-level trainer, teacher or facilitator structuring a learning program developed by others in, or with, a training and assessment organisation.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Delivery and facilitation

## Elements and Performance Criteria

| ELEMENT                                                     | PERFORMANCE CRITERIA                                                                                                                                                                                                                                                                           |
|-------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <i>Elements describe the essential outcomes.</i>            | <i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>                                                                                                                                                                                         |
| 1. Interpret learning environment and delivery requirements | 1.1 Access, read, and interpret learning program documentation to determine delivery requirements<br>1.2 Use available information and documentation to identify group and individual learner needs, and learner characteristics<br>1.3 Identify and assess constraints, and risks to delivery |

| ELEMENT                                     | PERFORMANCE CRITERIA                                                                                                                                                                                                                                                                                                                                                                       |
|---------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                                             | 1.4 Confirm personal role and responsibilities in planning, and delivering training, with relevant personnel                                                                                                                                                                                                                                                                               |
| 2. Prepare session plans                    | 2.1 Refine existing learning objectives according to program requirements and specific needs of individual learners<br>2.2 Develop session plans and document these plans for each segment of the learning program<br>2.3 Use knowledge of learning principles and theories to generate ideas for managing session delivery                                                                |
| 3. Prepare resources for delivery           | 3.1 Contextualise learning materials to meet the needs of the specific learner group<br>3.2 Finalise learning materials and organise facility, technology and equipment needs in time for delivery of learning sessions<br>3.3 Confirm overall delivery arrangements with relevant personnel                                                                                               |
| 4. Deliver and facilitate training sessions | 4.1 Conduct each session according to the session plan, modified where appropriate to meet learner needs<br>4.2 Use the diversity of the group as another resource to support learning<br>4.3 Employ a range of delivery methods to optimise learner experiences<br>4.4 Demonstrate effective facilitation skills to ensure effective participation and group management                   |
| 5. Support and monitor learning             | 5.1 Monitor, and document, learner progress to ensure outcomes are being achieved, and individual learner needs are being met<br>5.2 Make adjustments to the delivery sessions to reflect specific needs and circumstances<br>5.3 Manage inappropriate behaviour to ensure that learning can take place<br>5.4 Maintain and store learner records according to organisational requirements |

## Foundation Skills

| Release 2 | This was first released with <i>TAE Training and Education Training Package Release 2.1</i> .<br>Minor update to Assessment Conditions. |
| Release 1 | This version first released with <i>TAE Training and Education Training Package Release 2.0</i> .                                       |

## Performance Evidence

The candidate must show evidence of the ability to complete the tasks outlined in the elements and performance criteria of this unit, including:

- facilitating group-based learning by preparing and delivering at least three training sessions, including:
  - at least two consecutive sessions of at least 40 minutes duration, that follow one of the learning program designs, to a learner group of at least eight individuals
  - at least one session delivered to a learner group of at least eight individuals, with evidence of how the characteristics and needs of this group were addressed
- identifying and responding to individual needs
- accessing and using documented resources, and any support personnel required to guide inclusive practices.
- 

## Knowledge Evidence

The candidate must be able to demonstrate essential knowledge to effectively complete the task outlined in the elements and performance criteria of this unit. This includes knowledge of:

- learning theories and principles
- resources available to identify different learner styles
- the relevant industry area and subject matter of the delivery
- the learner group profile, including characteristics and needs of individual learners in the group
- the requirements of the learning program and/or delivery plan, and the content purpose
- different delivery methods and techniques appropriate to face-to-face group delivery

- different techniques for the recognition and resolution of inappropriate behaviours
- behaviours that may indicate learner difficulties, and the methods used to address these difficulties
- the purpose of organisational record-management systems and reporting requirements
- evaluation and revision techniques used to improve session plans
- specific resources, equipment and support services available for learners with special needs
- assessment and risk control measures relating to the facilitation of group-based learning
- policies and procedures relevant to the learning environment.

## Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Conditions must be typical of those experienced in the training and assessment environment, and include access to learning program designs in use in the learning environment.

Assessors must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

## Application

This unit describes skills and knowledge required to plan, organise and facilitate learning for individuals in a workplace, using real work activities as the basis for learning.

It applies to a person working as an entry-level trainer, teacher or facilitator or an employee, team leader or workplace supervisor responsible for guiding learning through work.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Delivery and facilitation

## Elements and Performance Criteria

| ELEMENT                                              | PERFORMANCE CRITERIA                                                                                                                                                                                      |
|------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <i>Elements describe the essential outcomes.</i>     | <i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>                                                                                                    |
| 1. Establish effective work environment for learning | 1.1 Establish, and agree upon, the objectives and scope of the work-based learning<br>1.2 Analyse work practices and routines to determine their effectiveness in meeting established learning objectives |

| ELEMENT                                                        | PERFORMANCE CRITERIA                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |
|----------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                                                                | 1.3 Identify, and address any workplace health and safety (WHS) implications of using work as the basis for learning                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |
| 2. Develop a work-based learning pathway                       | 2.1 Address contractual requirements and responsibilities for learning at work<br>2.2 Arrange for the integration and monitoring of external learning activities with the work-based learning pathway<br>2.3 Obtain agreement from relevant personnel to implement the work-based learning pathway                                                                                                                                                                                                                                                                                                                           |
| 3. Establish the learning-facilitation relationship            | 3.1 Identify the context for learning and the individual's learning style<br>3.2 Select an appropriate technique or process to facilitate learning, and explain the basis of the technique to the learner<br>3.3 Develop, document and discuss an individualised learning plan with the learner<br>3.4 Access, read and interpret documentation outlining the WHS responsibilities of the various parties in the learning environment<br>3.5 Monitor supervisory arrangements appropriate to learner's levels of knowledge, skill and experience to provide support and encouragement and ensure learner's health and safety |
| 4. Implement the work-based learning pathway                   | 4.1 Explain the objectives of work-based learning, and the processes involved, to the learner<br>4.2 Sequence the introduction of workplace tasks, activities and processes to reflect the agreed work-based learning pathway<br>4.3 Encourage learner to take responsibility for learning and to self-reflect<br>4.4 Develop techniques that facilitate the learner's transfer of skills and knowledge                                                                                                                                                                                                                      |
| 5. Maintain and develop the learning-facilitation relationship | 5.1 Prepare for each session<br>5.2 Structure learning activities to support and reinforce new learning, build on strengths, and identify areas for further development<br>5.3 Observe learner cues, and change approaches where necessary, in order to maintain momentum<br>5.4 Practise ethical behaviour at all times<br>5.5 Monitor the effectiveness of the learning/facilitation relationship through regular meetings between the parties                                                                                                                                                                             |

| ELEMENT                                                      | PERFORMANCE CRITERIA                                                                                                                                                                                                                                                                                                                                                                                                |
|--------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 6. Close and evaluate the learning-facilitation relationship | <p>6.1 Carry out the closure smoothly, using appropriate interpersonal and communication skills</p> <p>6.2 Seek feedback from the learner on the outcomes achieved, and the value of the relationship</p> <p>6.3 Evaluate effectiveness of the work-based pathway against the objectives, processes and techniques used</p> <p>6.4 Recommend improvements to work-based practice in light of the review process</p> |

## Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

| Skill                      | Performance Criteria              | Description                                                                                                                                                                                                                                                                                                                                                                      |
|----------------------------|-----------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|

# Assessment Requirements for TAEDEL402 Plan, organise and facilitate learning in the workplace

## Modification History

| Release   | Comments                                                                                                                                |
|-----------|-----------------------------------------------------------------------------------------------------------------------------------------|
| Release 2 | This was first released with <i>TAE Training and Education Training Package Release 2.1</i> .<br>Minor update to Assessment Conditions. |
| Release 1 | This version first released with <i>TAE Training and Education Training Package Release 2.0</i> .                                       |

## Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in the elements and performance criteria of this unit, including:

- preparing and facilitating work-based learning
- providing a minimum of two examples of developing work-based learning pathways, that include:
  - identifying needs for learning
  - analysing work practices, work environment and work activities
  - organising and allocating work in a way that reflects learning needs, and provides effective learning opportunities through work processes
- conducting a learning facilitation relationship:
  - with at least two individuals
  - demonstrating communication skills and flexibility
  - demonstrating one or more of the processes, or techniques, identified.

## Knowledge Evidence

The candidate must be able to demonstrate essential knowledge to effectively complete the task outlined in the elements and performance criteria of this unit. This includes knowledge of:

- systems, processes and practices within the organisation where work-based learning is taking place
- systems for identifying skill needs within the workplace
- different learning styles, and how to encourage learning for those who learn in different ways

- workplace health and safety (WHS) relating to the work role, including:
  - hazards relating to the industry and specific workplace
  - reporting requirements for hazards and incidents
  - specific procedures for work tasks
  - safe use and maintenance of relevant equipment
  - emergency procedures
  - sources of WHS information.
- 

## Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Conditions must be typical of those experienced in the training and assessment environment, and include access to any documentation relating to workplace procedures required by the candidate.

Assessors must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

# TAEDEL404 Mentor in the workplace

## Modification History

| Release   | Comments                                                                                          |
|-----------|---------------------------------------------------------------------------------------------------|
| Release 1 | This version first released with <i>TAE Training and Education Training Package Version 2.0</i> . |

## Application

This unit describes the skills and knowledge required to establish and develop a professional mentoring relationship with an individual in a workplace.

It applies to workplace supervisors or other work colleagues who work under limited supervision and who have responsibility for mentoring one or more individuals in the workplace. This may include, but is not limited to, those who mentor an apprentice or trainee employed by, or undertaking a work placement within, an organisation.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Delivery and facilitation

## Elements and Performance Criteria

| ELEMENT                                          | PERFORMANCE CRITERIA                                                                                                                                                                                                                                                                                                         |

# Assessment Requirements for TAEDEL404 Mentor in the workplace

## Modification History

| Release  | Comments                                                                                          |
|----------|---------------------------------------------------------------------------------------------------|
| Release1 | This version first released with <i>TAE Training and Education Training Package Version 2.0</i> . |

## Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, including:

- preparing a mentoring plan between the mentor and mentee that sets out clear objectives for a mentoring relationship that will last at least one year
- facilitating at least three mentoring sessions
- documenting information on sessions, including comments and notes from both mentor and mentee.
- 

## Knowledge Evidence

The candidate must be able to demonstrate essential knowledge to effectively complete the task outlined in the elements and performance criteria of this unit. This includes knowledge of:

- relevant policy, legislation, codes of practice and national standards likely to impact on the provision of workplace mentoring, including training contracts and responsibilities of employer, registered training organisation (RTO) and funding body where they exist
- mentoring methodologies and strategies
- learning theories in relation to mentoring
- strategies for working with a mentee including encouraging self reflection, confidence and the building of rapport
- acceptable behaviour in the mentoring relationship
- equal employment opportunity, equity and diversity principles
- how a mentor can support the mentee's employer to meet its WHS obligations for the mentee.
-

## Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Conditions must be typical of those experienced in the training and assessment environment and include access to:

- documentation of any existing training plan or contract if applicable to the mentoring relationship.

Assessors must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

# Assessment Requirements for TAEDES502 Design and develop learning resources

## Modification History

| Release   | Comments                                                                                          |
|-----------|---------------------------------------------------------------------------------------------------|
| Release 1 | This version first released with <i>TAE Training and Education Training Package Version 2.0</i> . |

## Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in the elements and performance criteria of this unit, including:

- researching, designing and developing two print based resources that reflect client needs and the contexts of application, with documented evidence of:
  - consultation with clients, research and findings
  - completed designs for the two resources
- completed development of one resource, with documented evidence of:
  - a review and trial of the resource, including user feedback and how this impacted on the development of the resource
  - the final print-based resource, either complete, or in part, or a sample
  - the candidate's specific role in the development process.

## Knowledge Evidence

The candidate must be able to demonstrate essential knowledge to effectively complete the task outlined in the elements and performance criteria of this unit. This includes knowledge of:

- the principles, theories and contemporary practices of instructional design
- the main branches of learning theory incorporating behavioural learning theory, cognitive learning theory, experiential learning theory, information processing theory and current research on learning, as it relates to teaching in an adult environment
- language, literacy and numeracy (LLN) issues, including:
  - requirements of the target audience
  - using the Australian Core Skills Framework (ACSF) as a framework to aid instructional design
- legal, organisational and ethical responsibilities associated with the assessment system, including:
  - maintaining client privacy and confidentiality

- providing accurate information
- duty of care under common law
- compliance with NVR/AQTF requirements
- copyright and its effect on the design, and development of learning resources.

## Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Conditions must be typical of those experienced in the training and assessment environment.

Assessors must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

# TAETAS501 Undertake organisational training needs analysis

## Modification History

| Release   | Comments                                                                                          |
|-----------|---------------------------------------------------------------------------------------------------|
| Release 1 | This version first released with <i>TAE Training and Education Training Package Version 2.0</i> . |

## Application

This unit describes the skills and knowledge required to undertake a training needs analysis (TNA) to identify the training and assessment needs of an organisation.

It applies to those working under limited supervision in roles that require them to work with organisations to identify training needs.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Training advisory services

## Elements and Performance Criteria

| ELEMENT                                          | PERFORMANCE CRITERIA                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |
|--------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <i>Elements describe the essential outcomes.</i> | <i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>                                                                                                                                                                                                                                                                                                                                                                                            |
| 1. Identify the organisation's needs             | <p>1.1 Discuss with relevant staff from the organisation their objectives, expectations and organisational requirements</p> <p>1.2 Use appropriate communication and interpersonal skills to develop a professional relationship with the organisation</p> <p>1.3 Identify, analyse and address any existing, or potential, issues that may impact on the organisation's objectives and requirements</p> <p>1.4 Identify and access resources, in accordance with organisational requirements</p> |

| ELEMENT                               | PERFORMANCE CRITERIA                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |
|---------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                                       | 1.5 Develop a project plan for the conduct of the TNA with relevant persons to be negotiated and agreed by the organisation                                                                                                                                                                                                                                                                                                                                                                                                                          |
| 2. Conduct training needs analysis    | <p>2.1 Use reliable, appropriate and efficient methods for collecting information and data on current, emerging and future training needs</p> <p>2.2 Analyse the organisation's work roles to determine skills and competencies needed for effective performance</p> <p>2.3 Follow legal, organisational and ethical requirements to gather information and data, to assess the current skills and competencies of staff</p> <p>2.4 Use reliable and valid data analysis methods to determine current and emerging organisational training needs</p> |
| 3. Provide advice to the organisation | <p>3.1 Provide the organisation with clear advice and recommendations on training and assessment needs in the format preferred by the client organisation</p> <p>3.2 Provide the organisation with options for meeting identified training needs</p> <p>3.3 Obtain feedback and comments from the organisation on the suitability and sufficiency of advice and recommendations</p> <p>3.4 Use legal requirements to process, complete and present final report to the organisation</p>                                                              |

## Foundation Skills

# Assessment Requirements for TAETAS501 Undertake organisational training needs analysis

## Modification History

| Release   | Comments                                                                                  |
|-----------|-------------------------------------------------------------------------------------------|
| Release 1 | This version first released with TAE Training and Education Training Package Version 2.0. |

## Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in the elements and performance criteria of this unit, including:

- researching, conducting and providing advice through a training needs analysis
- preparing at least two training needs analyses for one, or more organisations, and for each of these demonstrating:
  - the processes that were used to determine the organisation's needs
  - details of the research methods undertaken to identify suitable training and/or assessment
  - planning for the training needs analysis
  - presentations that outline advice and recommendations.

## Knowledge Evidence

The candidate must be able to demonstrate essential knowledge to effectively complete the task outlined in the elements and performance criteria of this unit. This includes knowledge of:

- competency standards, training packages and accredited courses
- NVR/AQTF requirements and standards
- risk identification and management strategies
- industry and enterprise knowledge
- evaluation and research methodologies
- the principles of intellectual property
- training and development strategies
- change management concepts/strategies
- workplace health and safety (WHS) relating to undertaking an organisational training needs analysis.

## Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Conditions must be typical of those experienced in the training and assessment environment.

Assessors must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

# **TLIH2001 Interpret road maps and navigate pre-determined routes**

## **Modification History**

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

## **Application**

This unit involves the skills and knowledge required to interpret road maps and to navigate routes as part of transport operations.

It includes identifying and determining the most appropriate route, and completing required route documentation in accordance with operational requirements.

Work is performed under general or limited supervision. It involves the application of map reading principles and procedures when interpreting street directories and road maps, and following pre-determined routes.

Work must be carried out in accordance with relevant state/territory roads and traffic authority regulations.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## **Pre-requisite Unit**

Not applicable.

## **Competency Field**

H – Route Planning and Navigation

## **Unit Sector**

Not applicable.

## Elements and Performance Criteria

### ELEMENTS

Elements describe the essential outcomes.

#### **1 Identify and determine pre-planned route**

### PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

- 1.1 Pre-determined route documentation is accessed and interpreted
  - 1.2 Relevant street directory, global positioning system (GPS) and road maps are identified and accessed
  - 1.3 Street directory, GPS and road map symbols are recognised and interpreted
  - 1.4 Points of departure and destination are identified in a directory index and information is used to locate designated places on appropriate map
  - 1.5 Pre-determined route directions are interpreted and route is traced using a street directory, GPS and road map
  - 1.6 Key intersections and other landmarks along route are identified for use in following planned route
  - 1.7 Alternative contingency routes are identified for emergencies or traffic delays
  - 1.8 Pre-determined route is correctly followed
- 2 Complete necessary documentation**
- 2.1 Required route documentation is completed in accordance with purpose of transportation and workplace requirements
  - 2.2 Required route documentation is filed in accordance with workplace requirements

## Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the Companion Volume Implementation Guide.

## Unit Mapping Information

This unit replaces and is equivalent to TLIH2001A Interpret road maps and navigate pre-determined routes.

## Links

Companion Volume implementation guides are found in VETNet -

# Assessment Requirements for TLIH2001 Interpret road maps and navigate pre-determined routes

## Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

## Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying relevant legislation and workplace procedures
- completing documentation related to route navigation
- estimating route distances using map information
- interpreting and following operational instructions and prioritising work
- navigating a pre-determined route
- operating and adapting to differences in equipment in accordance with standard operating procedures
- operating electronic communications equipment in accordance with workplace protocols
- planning alternative contingency routes for road works, emergencies or delays
- planning own work, predicting consequences and identifying improvements
- plotting a route from one destination to another relevant to job role
- reading and interpreting relevant instructions, procedures, information and signs
- using global positioning system (GPS) devices to navigate pre-determined routes as required
- using maps and other route documentation to correctly identify and interpret:
  - map symbols
  - roads and intersections
  - town and suburb locations
- working collaboratively with others as required (such as fleet managers, sales team)
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

## Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- current information about accidents or emergencies that might close or restrict traffic on a particular route
- height, width and mass limitations of bridges, tunnels and other critical physical structures along a possible route
- location of service stations/rest stops as required
- operational procedures for interpreting road maps, using GPS devices and navigating routes
- relevant state/territory permit and licence regulations and requirements
- road conditions for various routes, including sections undergoing road works
- security hazards and issues
- traffic conditions at various times of the day/night along specific routes
- typical problems that may arise concerning interpreting road maps, using GPS devices and navigating pre-determined routes, and appropriate action that should be taken
- workplace requirements for recording and documenting route information.

## Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment include:

- a range of relevant exercises, case studies and/or simulations
- applicable documentation including workplace procedures, regulations, codes of practice and operation manuals
- relevant materials, tools, equipment and personal protective equipment currently used in industry:
  - GPS
  - road map

- street directory.

A simulator/online assessment is not suitable for the final assessment of this unit of competency.

## **PUASS00052 Air Search Observer**

### **Modification History**

This Skill Set replaces and is equivalent to PUASS00026 Air Search Observer.

### **Description**

This Skill Set PUASS00052 Air Search Observer provides the skills and knowledge required to perform air search observer operations within the Australian Public Safety Training Package environment.

### **Pathways Information**

This Skill Set PUASS00052 Air Search Observer is part of the Public Safety Training Package.

This Skill Set can be a standalone outcome, or the units may be included in a qualification as core or elective options.

The units of competency in this Skill Set can contribute to the completion of relevant Certificate III, Certificate IV, Diploma and Advanced Diploma qualifications from the Public Safety Training Package.

### **Licensing/Regulatory Information**

Not applicable.

### **Skill Set Requirements**

A total of two units of competency must be attained.

|           |                                          |
|-----------|------------------------------------------|
| PUAAMS001 | Work in an aviation environment          |
| PUAAMS002 | Search as a member of an air search team |

### **Target Group**

This Skill Set PUASS00052 Air Search Observer is suitable for those who will perform as a member of an air search team.

### **Suggested words for Statement of Attainment**

This Skill Set PUASS00052 Air Search Observer from the Public Safety Training Package meets

the minimum industry requirements to perform as an air search team member within the SES.

## **Custom Content Section**

Not applicable.

# PUASS00053 Alpine Search and Survival Operations

## Modification History

This Skill Set replaces and is equivalent to PUASS00027 Alpine Search and Survival Operations.

## Description

This Skill Set PUASS00053 Alpine Search and Survival Operations provides the skills and knowledge required to perform alpine land search operations within the Australian Public Safety Training Package environment.

## Pathways Information

This Skill Set PUASS00053 Alpine Search and Survival Operations is part of the Public Safety Training Package.

This Skill Set can be a standalone outcome, or the units may be included in a qualification as core or elective options.

The units of competency in this Skill Set can contribute to the completion of relevant Certificate III, Certificate IV, Diploma and Advanced Diploma qualifications from the Public Safety Training Package.

## Licensing/Regulatory Information

Not applicable.

## Skill Set Requirements

A total of eight units of competency must be attained.

|             |                                                          |
|-------------|----------------------------------------------------------|
| HLTAID003   | Provide first aid                                        |
| PUALAW001   | Protect and preserve incident scene                      |
| PUAOPE013   | Operate communications systems and equipment             |
| PUASAR027   | Undertake land search rescue                             |
| PUASES016   | Apply snowcraft skills when performing search operations |
| PUATEA001   | Work in a team                                           |
| SISONAV403A | Navigate in uncontrolled environments                    |

SISOOPS202A      Use and maintain a temporary or overnight site

## **Target Group**

This Skill Set PUASS00053 Alpine Search and Survival Operations is suitable for those who will perform as a member of an alpine land search team during winter operations.

## **Suggested words for Statement of Attainment**

This Skill Set PUASS00053 Alpine Search and Survival Operations from the Public Safety Training Package meets the minimum industry requirements to perform as an alpine land search team member within the SES.

## **Custom Content Section**

Not applicable.

## PUASS00054 Basic Rescue

### Modification History

This Skill Set replaces and is equivalent to PUASS00028 Basic Rescue.

### Description

This Skill Set PUASS00054 Basic Rescue provides the skills and knowledge required to perform basic rescue operations within the Australian Public Safety Training Package environment.

### Pathways Information

This Skill Set PUASS00054 Basic Rescue is part of the Public Safety Training Package.

This Skill Set can be a standalone outcome, or the units may be included in a qualification as core or elective options.

The units of competency in this Skill Set can contribute to the completion of relevant Certificate III, Certificate IV, Diploma and Advanced Diploma qualifications from the Public Safety Training Package.

### Licensing/Regulatory Information

Not applicable.

### Skill Set Requirements

A total of five units of competency must be attained.

|           |                                               |
|-----------|-----------------------------------------------|
| PUACOM001 | Communicate in the workplace                  |
| HLTAID003 | Provide first aid                             |
| PUAEQU001 | Prepare, maintain and test response equipment |
| PUALAW001 | Protect and preserve incident scene           |
| PUASAR022 | Participate in a rescue operation             |

### Target Group

This Skill Set PUASS00054 Basic Rescue is suitable for those who will perform as a member of a rescue team.

## **Suggested words for Statement of Attainment**

This Skill Set PUASS00054 Basic Rescue from the Public Safety Training Package meets the minimum industry requirements to perform as a rescue team member within the SES.

## **Custom Content Section**

Not applicable.

## PUASS00055 Basic Tree Operations

### Modification History

This Skill Set replaces and is equivalent to PUASS00029 Basic Tree Operations.

### Description

This Skill Set PUASS00055 Basic Tree Operations provides the skills and knowledge required to perform basic tree operations within the Australian Public Safety Training Package environment.

### Pathways Information

This Skill Set PUASS00055 Basic Tree Operations is part of the Public Safety Training Package.

This Skill Set can be a standalone outcome, or the units may be included in a qualification as core or elective options.

The units of competency in this Skill Set can contribute to the completion of relevant Certificate III, Certificate IV, Diploma and Advanced Diploma qualifications from the Public Safety Training Package.

### Licensing/Regulatory Information

Not applicable.

### Skill Set Requirements

A total of three units of competency must be attained.

|            |                                               |
|------------|-----------------------------------------------|
| FWPCOT2239 | Trim and cut felled trees                     |
| PUAEQU001  | Prepare, maintain and test response equipment |
| PUAWHS002  | Maintain safety at an incident scene          |

### Target Group

This Skill Set PUASS00055 Basic Tree Operations is suitable for those who will perform as a member of an operations or response team with responsibility for trees being felled.

## **Suggested words for Statement of Attainment**

This Skill Set PUASS00055 Basic Tree Operations from the Public Safety Training Package meets the minimum industry requirements to perform as a member of a tree operations team within the SES.

## **Custom Content Section**

Not applicable.

# PUASS00056 Beach Operations Management

## Modification History

This Skill Set replaces and is equivalent to PUASS00030 Beach Operations Management.

## Description

This Skill Set PUASS00056 Beach Operations Management provides the skills and knowledge required to perform beach operations management within the Australian Public Safety Training Package environment.

## Pathways Information

This Skill Set PUASS00056 Beach Operations Management is part of the Public Safety Training Package.

This Skill Set can be a standalone outcome, or the units may be included in a qualification as core or elective options.

The units of competency in this Skill Set can contribute to the completion of relevant Certificate III, Certificate IV, Diploma and Advanced Diploma qualifications from the Public Safety Training Package.

## Licensing/Regulatory Information

Not applicable.

## Skill Set Requirements

A total of three units of competency must be attained.

|           |                                              |
|-----------|----------------------------------------------|
| PUAOPE012 | Control a Level 1 incident                   |
| PUAOPE015 | Conduct briefings and debriefings            |
| PUASAR011 | Search as a member of an aquatic search team |

## Target Group

This Skill Set PUASS00056 Beach Operations Management is suitable for those who will be leading a surf rescue team or patrol responding to a range of incidents including search and rescue operations.

## **Suggested words for Statement of Attainment**

This Skill Set PUASS00056 Beach Operations Management from the Public Safety Training Package meets the minimum industry requirements to perform as a leader of a surf rescue or response team.

## **Custom Content Section**

Not applicable.

# PUASS00057 Beach Safety and Risk Management

## Modification History

This Skill Set replaces and is equivalent to PUASS00031 Beach Safety and Risk Management.

## Description

This Skill Set PUASS00057 Beach Safety and Risk Management provides the skills and knowledge required to perform beach safety and risk management operations within the Australian Public Safety Training Package environment.

## Pathways Information

This Skill Set PUASS00057 Beach Safety and Risk Management is part of the Public Safety Training Package.

This Skill Set can be a standalone outcome, or the units may be included in a qualification as core or elective options.

The units of competency in this Skill Set can contribute to the completion of relevant Certificate III, Certificate IV, Diploma and Advanced Diploma qualifications from the Public Safety Training Package.

## Licensing/Regulatory Information

Not applicable.

## Skill Set Requirements

A total of three units of competency must be attained.

|           |                                      |
|-----------|--------------------------------------|
| PUAEMR005 | Treat operational risk               |
| PUAEMR006 | Assess operational risk              |
| PUAWHS002 | Maintain safety at an incident scene |

## Target Group

This Skill Set PUASS00057 Beach Safety and Risk Management is suitable for those who will perform as a team member or leader in beach safety and risk management operations.

## **Suggested words for Statement of Attainment**

This Skill Set PUASS00057 Beach Safety and Risk Management from the Public Safety Training Package meets the minimum industry requirements for the safety of surf patrol teams including applying risk management measures.

## **Custom Content Section**

Not applicable.

# PUASS00058 Beach Team Management

## Modification History

This Skill Set replaces and is equivalent to PUASS00032 Beach Team Management.

## Description

This Skill Set PUASS00058 Beach Team Management provides the skills and knowledge required to perform in beach team management within the Australian Public Safety Training Package environment.

## Pathways Information

This Skill Set PUASS00058 Beach Team Management is part of the Public Safety Training Package.

This Skill Set can be a standalone outcome, or the units may be included in a qualification as core or elective options.

The units of competency in this Skill Set can contribute to the completion of relevant Certificate III, Certificate IV, Diploma and Advanced Diploma qualifications from the Public Safety Training Package.

## Licensing/Regulatory Information

Not applicable.

## Skill Set Requirements

A total of three units of competency must be attained.

|           |                                    |
|-----------|------------------------------------|
| PUACOM003 | Manage information                 |
| PUAMAN002 | Administer allocation of resources |
| PUATEA003 | Lead, manage and develop teams     |

## Target Group

This Skill Set PUASS00058 Beach Team Management is suitable for those who will be leading a surf rescue team or patrol.

## **Suggested words for Statement of Attainment**

This Skill Set PUASS00058 Beach Team Management from the Public Safety Training Package meets the minimum industry requirements to perform as a leader of a surf rescue or response team.

## **Custom Content Section**

Not applicable.

# PUASS00059 Biosecurity Field Surveillance

## Modification History

This Skill Set PUASS00059 Biosecurity Field Surveillance is new.

## Description

This Skill Set is for individuals who perform the duties of a biosecurity field surveillance team member within Australian biosecurity emergency response operational environments. It provides the skills and knowledge required to carry out field surveillance activities and identify a specific animal or plant emergency disease or pest within a biosecurity emergency response.

## Pathways Information

This Skill Set PUASS00059 Biosecurity Field Surveillance is part of the Public Safety Training Package.

The Skill Set can be a standalone outcome, or the units may be included in a qualification as core or elective options.

Individuals may undertake further training towards attainment of the PUA30919 Certificate III in Public Safety (Biosecurity Emergency Response Operations).

## Licensing/Regulatory Information

Not applicable.

## Skill Set Requirements

A total of two units of competency must be attained.

|           |                                                                             |
|-----------|-----------------------------------------------------------------------------|
| AHCBIO302 | Identify and report unusual disease or plant pest signs                     |
| AHCBER402 | Carry out field surveillance for a specific emergency disease or plant pest |

## Target Group

This Skill Set PUASS00059 Biosecurity Field Surveillance is suitable for those who will perform biosecurity field surveillance activities in a biosecurity response operational environment.

## **Suggested words for Statement of Attainment**

This Skill Set PUASS00059 Biosecurity Field Surveillance from the Public Safety Training Package meets the minimum industry requirements to perform in a biosecurity response operational environment.

## **Custom Content Section**

Not applicable.

# PUASS00060 Biosecurity Infected Premises Operations

## Modification History

This Skill Set PUASS00060 Biosecurity Infected Premises Operations is new.

## Description

This Skill Set is for individuals who perform the duties of biosecurity infected premises operations within Australian biosecurity emergency response operational environments. It provides the skills and knowledge required to follow site quarantine procedures and carry out emergency disease or pest control procedures at infected premises within a biosecurity emergency response.

## Pathways Information

This Skill Set PUASS00060 Biosecurity Infected Premises Operations is part of the Public Safety Training Package.

The Skill Set can be a standalone outcome, or the units may be included in a qualification as core or elective options.

Individuals may undertake further training towards the PUA30919 Certificate III in Public Safety (Biosecurity Emergency Response Operations).

## Licensing/Regulatory Information

Not applicable.

## Skill Set Requirements

A total of two units of competency must be attained.

|           |                                                                                   |
|-----------|-----------------------------------------------------------------------------------|
| AHCBIO202 | Follow site quarantine procedures                                                 |
| AHCBER303 | Carry out emergency disease or plant pest control procedures at infected premises |

## Target Group

This Skill Set PUASS00060 Biosecurity Infected Premises Operations is suitable for those who will perform as an infected premises operator in a biosecurity response operational environment.

## **Suggested words for Statement of Attainment**

This Skill Set PUASS00060 Biosecurity Infected Premises Operations from the Public Safety Training Package meets the minimum industry requirements to perform in a biosecurity response operational environment.

## **Custom Content Section**

Not applicable.

# PUASS00061 Biosecurity Infected Premises Supervisor

## Modification History

This Skill Set PUASS00061 Biosecurity Infected Premises Supervision is new.

## Description

This Skill Set is for individuals who perform the duties of biosecurity infected premises supervision within Australian biosecurity emergency response operational environments. It provides the skills and knowledge required to plan and supervise activities and manage operations on infected premises within a biosecurity emergency response.

## Pathways Information

This Skill Set PUASS00061 Biosecurity Infected Premises Supervision is part of the Public Safety Training Package.

The Skill Set can be a standalone outcome, or the units may be included in a qualification as core or elective options.

Individuals may undertake further training towards the PUA40419 Certificate IV in Public Safety (Biosecurity Emergency Response Leadership).

## Licensing/Regulatory Information

Not applicable.

## Skill Set Requirements

A total of two units of competency must be attained.

|           |                                                                 |
|-----------|-----------------------------------------------------------------|
| AHCBER401 | Plan and supervise control activities on infected premises      |
| AHCBER501 | Manage active operational emergency disease or plant pest sites |

## Target Group

This Skill Set PUASS00061 Biosecurity Infected Premises Supervisor is suitable for those who will supervise infected premises teams in a biosecurity response operational environment.

## **Suggested words for Statement of Attainment**

This Skill Set PUASS00061 Infected Premises Supervisor from the Public Safety Training Package meets the minimum industry requirements to perform in a biosecurity response operations environment.

## **Custom Content Section**

Not applicable.

# PUASS00062 Biosecurity Movement Control

## Modification History

This Skill Set PUASS00062 Biosecurity Movement Control is new.

## Description

This Skill Set is for individuals who perform the duties of biosecurity movement control within Australian biosecurity emergency response operational environments. It provides the skills and knowledge required to carry out movement control and security procedures within a biosecurity emergency response.

## Pathways Information

This Skill Set PUASS00062 Biosecurity Movement Control is part of the Public Safety Training Package.

The Skill Set can be a standalone outcome, or the units may be included in a qualification as core or elective options.

Individuals may undertake further training towards the PUA30919 Certificate III in Public Safety (Biosecurity Emergency Response Operations).

## Licensing/Regulatory Information

Not applicable.

## Skill Set Requirements

A total of one unit of competency must be attained.

|           |                                            |
|-----------|--------------------------------------------|
| AHCBER304 | Carry out movement and security procedures |
|-----------|--------------------------------------------|

## Target Group

This Skill Set PUASS00062 Biosecurity Movement Control is suitable for those who will perform biosecurity movement control activities in a biosecurity response operational environment.

## Suggested words for Statement of Attainment

This Skill Set PUASS00062 Biosecurity Movement Control from the Public Safety Training

Package meets the minimum industry requirements to perform in a biosecurity response operational environment.

## **Custom Content Section**

Not applicable.

# PUASS00063 Biosecurity Responder

## Modification History

This Skill Set PUASS00063 Biosecurity Emergency Responder is new.

## Description

This Skill Set is for individuals who perform the duties of biosecurity emergency responder within Australian biosecurity emergency response operational environments. It provides the skills and knowledge required to work safely and effectively within a biosecurity emergency response.

## Pathways Information

This Skill Set PUASS00063 Biosecurity Emergency Responder is part of the Public Safety Training Package.

The Skill Set can be a standalone outcome, or the units may be included in a qualification as core or elective options.

Individuals may undertake further training towards the PUA30919 Certificate III in Public Safety (Biosecurity Emergency Response Operations).

## Licensing/Regulatory Information

Not applicable.

## Skill Set Requirements

A total of five units of competency must be attained.

|           |                                                                 |
|-----------|-----------------------------------------------------------------|
| AHCBER301 | Work effectively in an emergency disease or plant pest response |
| PUACOM001 | Communicate in the workplace                                    |
| PUACOM003 | Manage information                                              |
| PUAWHS001 | Follow defined work, health and safety policies and procedures  |
| PUATEA001 | Work in a team                                                  |

## Target Group

This Skill Set PUASS00063 Biosecurity Emergency Responder is suitable for those who will perform as a responder in a biosecurity response operations team.

## Suggested words for Statement of Attainment

This Skill Set PUASS00063 Biosecurity Emergency Responder from the Public Safety Training Package meets the minimum industry requirements in a biosecurity response operational environment.

## Custom Content Section

Not applicable.

# PUASS00064 Biosecurity Response Leader

## Modification History

This Skill Set PUASS00064 Biosecurity Emergency Response Leader is new.

## Description

This Skill Set is for individuals who perform the duties of a biosecurity emergency response leader within Australian biosecurity emergency response operational environments. It provides the skills and knowledge required to lead teams safely and effectively within a biosecurity emergency response.

## Pathways Information

This Skill Set PUASS00064 Biosecurity Emergency Response Leader is part of the Public Safety Training Package.

The Skill Set can be a standalone outcome, or the units may be included in a qualification as core or elective options.

Individuals may undertake further training towards the PUA40419 Certificate IV in Public Safety (Biosecurity Emergency Response Leadership).

Not applicable.

## Skill Set Requirements

A total of five units of competency must be attained.

|           |                                                                                              |
|-----------|----------------------------------------------------------------------------------------------|
| BSBWHS401 | Implement and monitor WHS policies, procedures and programs to meet legislative requirements |
| PUAMAN002 | Administer allocation of resources                                                           |
| PUAOPE015 | Conduct briefings and debriefings                                                            |
| PSPGEN038 | Identify and treat risks                                                                     |
| PUAOPE020 | Lead a crew                                                                                  |

## Target Group

This Skill Set PUASS00064 Biosecurity Emergency Response Leader is suitable for those who will perform as a team leader of biosecurity response operational teams.

## Suggested words for Statement of Attainment

This Skill Set PUASS00064 Biosecurity Emergency Response Leader from the Public Safety Training Package meets the minimum industry requirements to perform in a biosecurity response operational team.

## Custom Content Section

Not applicable.

# PUASS00065 Biosecurity Response Manager

## Modification History

This Skill Set PUASS00065 Biosecurity Emergency Response Manager is new.

## Description

This Skill Set is for individuals who perform the duties of biosecurity emergency response manager within Australian biosecurity emergency response operational environments. It provides the skills and knowledge required to manage a multi-team biosecurity emergency response.

## Pathways Information

This Skill Set PUASS00065 Biosecurity Emergency Response Manager is part of the Public Safety Training Package.

The Skill Set can be a standalone outcome, or the units may be included in a qualification as core or elective options.

Individuals may undertake further training towards the PUA50219 Diploma of Public Safety (Biosecurity Emergency Response Management).

## Licensing/Regulatory Information

Not applicable.

## Skill Set Requirements

A total of five units of competency must be attained.

|           |                                                                                 |
|-----------|---------------------------------------------------------------------------------|
| AHCBER502 | Manage the implementation of an emergency disease or plant pest control program |
| PUACOM007 | Liaise with other organisations                                                 |
| PUAOPE015 | Conduct briefings and debriefings                                               |
| PUAOPE018 | Control a Level 2 incident                                                      |
| PUATEA003 | Lead, manage and develop teams                                                  |

## Target Group

This Skill Set PUASS00065 Biosecurity Emergency Response Manager is suitable for those who will perform as a manager in an incident management team in a biosecurity emergency response.

## Suggested words for Statement of Attainment

This Skill Set PUASS00065 Biosecurity Emergency Response Manager from the Public Safety Training Package meets the minimum industry requirements to perform in a biosecurity response operational environment.

## Custom Content Section

Not applicable.

# PUASS00066 Community Engagement

## Modification History

This Skill Set replaces and is equivalent to PUASS00033 Community Engagement.

## Description

This Skill Set PUASS00066 Community Engagement provides the skills and knowledge required to perform community engagement operations within the Australian Public Safety Training Package environment.

## Pathways Information

This Skill Set PUASS00066 Community Engagement is part of the Public Safety Training Package.

This Skill Set can be a standalone outcome, or the units may be included in a qualification as core or elective options.

The units of competency in this Skill Set can contribute to the completion of relevant Certificate III, Certificate IV, Diploma and Advanced Diploma qualifications from the Public Safety Training Package.

## Licensing/Regulatory Information

Not applicable.

## Skill Set Requirements

A total of three units of competency must be attained.

|           |                                                         |
|-----------|---------------------------------------------------------|
| PUACOM005 | Foster a positive organisational image in the community |
| PUACOM007 | Liaise with other organisations                         |

A total of two units of competency must be attained.

|           |                                                                  |
|-----------|------------------------------------------------------------------|
| PUASES008 | Undertake storm and water damage operations                      |
| PUASAR001 | Perform land based swiftwater and floodwater rescue and recovery |

## Target Group

This Skill Set PUASS00069 Flood Response Operations is suitable for those who will perform as an SES member in a flood response operations team.

## **Suggested words for Statement of Attainment**

This Skill Set PUASS00069 Flood Response Operations from the Public Safety Training Package meets the minimum industry requirements to perform as a flood response operations team member within the SES.

## **Custom Content Section**

Not applicable.

# PUASS00070 Floodboat Response Operations

## Modification History

This Skill Set replaces and is equivalent to PUASS00035 Floodboat Response Operations.

## Description

This Skill Set PUASS00070 Floodboat Response Operations provides the skills and knowledge required to perform floodboat response operations within the Australian Public Safety Training Package environment.

## Pathways Information

This Skill Set PUASS00070 Flood Response Operations is part of the Public Safety Training Package.

This Skill Set can be a standalone outcome, or the units may be included in a qualification as core or elective options.

The units of competency in this Skill Set can contribute to the completion of relevant Certificate III, Certificate IV, Diploma and Advanced Diploma qualifications from the Public Safety Training Package.

## Licensing/Regulatory Information

Not applicable.

## Skill Set Requirements

A total of four units of competency must be attained.

|           |                                               |
|-----------|-----------------------------------------------|
| PUAEQU001 | Prepare, maintain and test response equipment |
| PUAWHS002 | Maintain safety at an incident scene          |
| PUASES009 | Undertake inland floodboat operations         |
| PUATEA001 | Work in a team                                |

## Target Group

This Skill Set PUASS00070 Floodboat Response Operations is suitable for those who will

perform as a member in an SES floodboat response team during flood response operations.

## **Suggested words for Statement of Attainment**

This Skill Set PUASS00070 Floodboat Response Operations from the Public Safety Training Package meets the minimum industry requirements to perform as a floodboat response team member within the SES during flood response operations.

## **Custom Content Section**

Not applicable.

## PUASS00071 Incident Response Crew/Team Leader

### Modification History

This Skill Set replaces and is equivalent to PUASS00036 Incident Response Crew/Team Leader.

### Description

This Skill Set PUASS00071 Incident Response Crew/Team Leader provides the skills and knowledge required to operate as an SES team leader of an incident response team within the Australian Public Safety Training Package environment.

### Pathways Information

This Skill Set PUASS00071 Incident Response Crew/Team Leader is part of the Public Safety Training Package.

This Skill Set can be a standalone outcome, or the units may be included in a qualification as core or elective options.

The units of competency in this Skill Set can contribute to the completion of relevant Certificate III, Certificate IV, Diploma and Advanced Diploma qualifications from the Public Safety Training Package.

### Licensing/Regulatory Information

Not applicable.

### Skill Set Requirements

A total of two units of competency must be attained.

|           |                                   |
|-----------|-----------------------------------|
| PUAOPE012 | Control a Level 1 incident        |
| PUAOPE015 | Conduct briefings and debriefings |

### Target Group

This Skill Set PUASS00071 Incident Response Crew/Team Leader is suitable for those who undertake the leadership of an SES incident response team.

## **Suggested words for Statement of Attainment**

This Skill Set PUASS00071 Incident Response Crew/Team Leader from the Public Safety Training Package meets the minimum industry requirements to undertake leadership of an incident response team within the SES.

## **Custom Content Section**

Not applicable.

## PUASS00072 Land Search Team
