PUADEFCA206B Observe targets and coordinate multi asset firepower on multiple targets

Release: 1

PUADEFCA206B Observe targets and coordinate multi asset firepower on multiple targets

Modification History

Not applicable.

Unit Descriptor

Unit Descriptor

This unit covers the competency required to observe targets remotely from the firepower locations and to provide advice so that firepower can be employed to engage targets.

Firepower will normally be limited to the following assets:

- small arms
- indirect weapons.

While this work will be undertaken as part of a team and under the commander's direction, the individual must also have the authority to act independently.

Application of the Unit

Application of the Unit

The application of this unit in the workplace - the environments, complexities and situations involved - will be written during Phase II of the Review of the PUA00 Public Safety Training Package.

This text will be useful for the purposes of job descriptions, recruitment advice or job analysis; where possible, it will not be too job specific to allow other industries to import it into other Training Packages, where feasible.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Prerequisite Unit/s PUADEFCA205B Observe targets and direct single asset firepower on a single target

Employability Skills Information

Employability Skills This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.

Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the Required Skills and Knowledge and/or the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Occupy and prepare a location	1.1 An appropriate vantage point is occupied and concealment is maintained throughout the operation 1.2 Occupied position is established 1.3 Reference points are established and information is documented 1.4 Possible threats are observed and monitored so an appropriate plan of action can be prepared
2. Plan the engagement of firepower	2.1 Advice is received on overall operational plan which will inform the planning process 2.2 A warning order for intent of operations is transmitted to the command post 2.3 Requests for resources outside own organisation are made to the command post when required 2.4 Target data is established and recorded 2.5 Rate of movement of own personnel is calculated from available data 2.6 Resources for effective fire on targets and rates of fire are calculated 2.7 Targets are prioritised 2.8 Schedule is developed and transmitted to the command post or direct liaison is conducted with other agency to organise engagement schedule
3. Monitor fire on target	3.1 Communications are maintained with stakeholders throughout the operation 3.2 Own actions ensure personnel safety in target area 3.3 Target analysis is completed after impact and if necessary, appropriate agency command centre is referred to 3.4 Schedule is amended, as required, after analysis and is transmitted to the command post 3.5 Advice to terminate is provided as required 3.6 Records are maintained in accordance with standard procedures
4. Withdraw from an occupied location	4.1 Occupied position is reconditioned and all evidence of occupation is removed 4.2 A secure withdrawal from the occupied position is conducted

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- allocate appropriate resources to the operation
- communicate effectively
- interpret orders
- liaison skills
- maintain situational awareness
- provide reports and appropriate documentation
- work in a team

Required Knowledge

- characteristics, technical capabilities, effects, employment and limitations of weapons and weapon platforms
- communication procedures
- reporting requirements and procedures for multi agency operations
- safety associated with the operations
- safety distances for various situations
- standard procedures and special requirements
- teamwork principles

Evidence Guide

EVIDENCE GUIDE

|

EVIDENCE GUIDE

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Assessment must confirm the ability to maintain awareness of safety of friendly personnel at all times; to achieve the task using a number of simulations and at least one live fire plan using firepower from at least one outside agency; and to recognise but not exceed own level of authority.

Consistency in performance

Competency should be demonstrated over a number of simulations and at least one live fire activity

Context of and specific resources for assessment

Context of assessment

Competency should be assessed in an operational or simulated operational environment. The simulation should replicate the live environment where stress and fatigue are key features. The individual must be assessed as part of a team.

Specific resources for assessment

Access to simulation, and live fire areas, indirect fire support weapons, ammunition, and personnel to operate simulation and fire support weapons.

Guidance information for assessment

Information that will assist or guide assessment will be written during Phase II of the Review of the PUA00 Public Safety Training Package.

Range Statement

RANGE STATEMENT

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Warning orders may include

Written, verbal or transmitted instructions that explain the:

- administrative arrangements
- coordinating instructions
- higher authorities intent
- mission and outline tasks
- requirement to achieve specific effects
- schemes of manoeuvre

Target data may include

Altitude of targets
 Bearing to targets
 Grid reference
 Target description

Resources for effective fire on targets may include

Ammunition
 Number and type of weapons to complete task
 Time allocation of weapons

Schedule may include

Fire effects
 Target locations
 Target numbers
 Timings

Target analysis may include

Calculations for correction of fire
 Damage to the target
 Determination of complexity of situation
 Position of the projectile in relation to the target
 Value of the target

Records may include

Bomb damage assessment
 Fire plan proforma
 Observation post log
 Signals log book
 Situation reports
 Target records

Standard procedures may include

Australian Standards
 Defence Instructions
 Doctrinal pamphlets
 Job guides, other publications

RANGE STATEMENT

Manufacturers' handbooks, industry specifications and technical instructions
Occupational health and safety (OH&S) regulations
Organisational policies and procedures
Procedure manuals
Relevant local government by-laws
Relevant state/territory or federal legislation
Reengagement procedures
Routine Orders
Standing Operating Procedures
Standing Orders
Written and verbal orders

Unit Sector(s)

Not applicable.

Corequisite Unit/s

Co-requisite Unit/s Nil
