Qualification Description

This qualification reflects the roles of individuals who perform mainly routine tasks and procedures, using limited practical skills and fundamental operational knowledge, and taking some responsibility for the quality of the work outcomes.
This Certificate II in Resources and Infrastructure Work Preparation is a pathway qualification and will prepare an individual in successfully undertaking a sector specified Certificate III from the Resources and Infrastructure Industry Training Package.
Licensing, legislative, regulatory and certification requirements that apply to this qualification can vary between states, territories, and Industry sectors. Relevant information must be sourced prior to application of the qualification.

Entry Requirements

There are no entry requirements to this Qualification.

Packaging Rules

Requirements for completion of the qualification

The following provides the packaging rules for this qualification, followed by the list of relevant units of competency.

Successful completion of nine (9) units of competency made up of:

- three (3) core units, and
- six (6) elective units of which:
    - at least three (3) must be chosen from group A and/or group B
    - up to three (3) may be chosen from group C
    - up to one (1) unit may be chosen from Certificate II or Certificate III level from this, or any other Training Package

Units chosen must be relevant to the job function.

There are both licensed and non-licensed units of competency relating to high risk work in the Resources and Infrastructure Industry Training Package. To be appointed under any statutory requirements in related roles, units of competency should be selected to meet the state/territory licensing requirements.

There are no prerequisites to imported units listed in this qualification. Where a unit is imported as an elective care must be taken to ensure that all prerequisites specified are complied with.
