Assessment Requirements for RUCBS305E Conduct asphalt paver operation

Release: 1

Assessment Requirements for RIICBS305E Conduct asphalt paver operation

Modification History

This unit replaces RIICBS305D Conduct asphalt paver operations. Minor endorseable amendments have been made to Elements, Performance Criteria, Foundation Skills, Performance Evidence and Knowledge Evidence to better reflect current industry practices and clarify training outcomes.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit; including evidence of the ability to:

- conduct asphalt paver operations according to project specifications on at least two occasions with at least two different asphalt or surface types.

During the above, the candidate must:

- work on:
 - both matching and unsupported edges
 - three longitudinal joints (of at least 100m)
 - six transverse joints
 - five sections of straight paving with one of at least 100 linear metres
 - three intersections
- conduct asphalt paver operations on at least one:
 - residential project
 - commercial project
 - highway projects project
- construct operations to required thickness, uniformity, line and level
- deliver material through the paver including manual and automatic control
- locate and apply legislation, documentation, policies and procedures
- work with others to undertake and complete asphalt paver operations that meets the required outcomes, including:
 - organising work activities to meet all task requirements
 - communicating with others to receive and clarify work instructions
 - using a range of communication techniques and systems
 - using signage to advise others of work activity and exclusion zone
 - communicating with screed hand to confirm that materials are spread to specifications
- identify, report and record hazards and risks
- clean, check, perform maintenance on, relocate and store equipment
- complete housekeeping activities.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- safety data sheet (SDS) compliance processes
- on site processes and responsibilities relating to site isolation and traffic control
- processes for calculating material requirements, mix, application rates, uniformity and travel speed
- key components of job safety analyses (JSAs)/job safety environmental analyses (JSEAs)/safe work method statements (SWMSs)
- feeder bin requirements
- key legislation for conducting asphalt paver operations
- key policies, procedures and established requirements for conducting asphalt paver operations, including those for:
 - site and equipment safety
 - work quality
 - environmental protection, including waste disposal and recycling
 - asphalt strength and performance characteristics
 - edge and joint treatments
 - operating, maintaining and relocating equipment
 - adjusting, changing and inflating tyres
 - communicating with screed hand
 - establishing exclusion zones
 - housekeeping
- key factors affecting work activities described in performance evidence above, including:
 - asphalt paving techniques
 - equipment types, characteristics, technical capabilities and limitations.

Assessment Conditions

Mandatory conditions for assessment of this unit are stipulated below. The assessment must:

- include access to:
 - asphalt paving equipment
 - personal protective equipment
- be conducted in a safe environment; and,
- be assessed in context of this sector's work environment; and,
- be assessed in compliance with legislation/regulation and using policies, procedures, processes and operational manuals directly related to the industry sector for which it is being assessed; and,
- confirm consistent performance can be applied in a range of relevant workplace circumstances.

- Where personal safety or environmental damage are limiting factors, assessment may occur in a simulated work environment* provided it is realistic and sufficiently rigorous to cover all aspects of this sectors workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.

Assessor Requirements

Assessors must be able to clearly demonstrate current and relevant industry knowledge and experience to satisfy the mandatory competency standards as set out in the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory requirements for assessors current at the time of assessment and any relevant licensing and certification requirements.

This includes:

- vocational competencies at least to the level being delivered and assessed
- current industry skills directly relevant to the training and assessment being provided
- current knowledge and skills in vocational training and learning that informs their training and assessment
- formal relevant qualifications in training and assessment
- having knowledge of and/or experience using the latest techniques and processes
- possessing a high level of RII training product knowledge
- having an understanding and knowledge of legislations and regulations relevant to the industry and to employment and workplaces
- demonstrating the performance evidence, and knowledge evidence as outlined in this unit of competency, and
- the minimum years of current** work experience after competency has been obtained as specified below in an industry sector relevant to the outcomes of the unit.

It is also acceptable for the appropriately qualified assessor to work with an industry expert to conduct assessment together and for the industry expert to be involved in the assessment judgement. The industry expert must hold the relevant vocational competencies and have current industry skills directly relevant to the training and assessment being provided and must work alongside a trainer and/or assessor to conduct the assessment. This means the industry subject matter expert should hold the unit being assessed (or an equivalent unit), and must also demonstrate skills and knowledge from the minimum years of current work experience after competency has been obtained as specified below, including time spent in roles related to the unit being assessed:

Industry sector	AQF** level	Required assessor or industry subject matter expert experience
Drilling, Metalliferous Mining, Coal Mining, Extractive (Quarrying) and Civil Construction	1	1 Year
	2	2 Years
Drilling, Coal Mining and Extractive	3-6	3 Years

Industry sector	AQF** level	Required assessor or industry subject matter expert experience
(Quarrying)		
Metalliferous Mining and Civil Construction	3-6	5 Years
Other sectors	Where this unit of competency is being assessed outside of the resources and infrastructure sectors assessor and/or industry subject matter expert experience should be in-line with industry standards for the sector in which it is being assessed and where no industry standard is specified should comply with any relevant regulation.	

*Guidance on simulated environments has been stipulated in the RII Companion Volume Implementation Guide located on VETNet.

**Assessors can demonstrate current work experience through employment within industry in a role relevant to the outcomes of the unit; or, for external assessors this can be demonstrated through exposure to industry by conducting a minimum number of site assessments as determined by the relevant industry sector, across various locations.

*** While a unit of competency does not have an AQF level, where a unit is being delivered outside of a qualification the first numeric character in the unit code should be considered as the AQF indicator level for assessment purposes.
