Assessment Requirements for RIICCM206D Support plant operations

Release: 2

Assessment Requirements for RIICCM206D Support plant operations

Modification History

Release	Comment
1	This unit replaces RIICCM206A Support plant operations.
2	Removed Performance Criteria 1.6; replaced 1.3; editorial corrections.

Performance Evidence

Evidence is required to be collected that demonstrates a candidate's competency in this unit. Evidence must be relevant to the roles within this sector's work operations and satisfy all of the requirements of the performance criteria of this unit and include evidence that the candidate:

- locates and applies applicable documentation, policies and procedures
- implements the requirements, procedures and techniques for the safe, effective and efficient completion of plant operations support including:
 - selecting and using relevant tools/equipment
 - identifying the location of underground services
 - communicating effectively to alert and assist operators
- works effectively with others to undertake and complete the plant operations support in a way that meets all of the required outcomes including:
 - using a range of communications techniques and equipment to convey information to others
 - complying with written and verbal reporting requirements and procedures
- demonstrates consistent timely completion of plant operations support that safely, effectively and efficiently meets the required outcomes on a minimum of three (3) separate occasions including:
 - spotting for a minimum of two (2) different activities on each occasion involving excavation, fill, spreading of imported material, trimming or pawning
 - location and marking of services on separate projects

Knowledge Evidence

The candidate must demonstrate knowledge of the following when supporting plant operations:

- accessing, interpreting and applying the organisation and site requirements and procedures for:
 - using JSAs/JSEA/safe work methods
 - achieving project quality outcomes
 - identifying and reporting on hazards related to the worksite and work activity
 - applying materials handling methods and using safety data sheets
- organising work activities
- using relevant tools and equipment safely
- identifying types, uses, limitations and maintenance requirements of plant/equipment
- applying basic principles of soil technology for civil works
- identifying site isolation and traffic control responsibilities and authorities
- using civil construction terminology
- completing housekeeping activities
-

Assessment Conditions

- An assessor of this unit must satisfy the requirements of the NVR/AQTF or their successors; and Industry regulations for certification and licensing; and,
- this unit is best assessed in the context of this sector's work environment;
- where personal safety or environmental damage are limiting factors, assessment may occur in a simulated environment provided it is realistic and sufficiently rigorous to cover all aspects of this sector's workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills; and,
- this unit must be assessed using Resources and Infrastructure Industry sector specific policies, procedures, processes and operational manuals; and,
- an assessor must demonstrate the skills and knowledge of this unit through five (5) years' work experience in the Industry sector; and,
- where the assessor does not have current experience a co-assessment or partnership arrangement needs to exist between the qualified assessor and an Industry technical expert/ subject matter expert. The Industry technical expert/subject matter expert must hold the unit being assessed and be currently working in the sector with a minimum of two (2) years' of current work experience.
