Assessment Requirements for RIICRC402E Supervise rigid pavement construction

Release: 1

Assessment Requirements for RIICRC402E Supervise rigid pavement construction

Modification History

Release	Comments
Release 1	This version first released with RII Resources and Infrastructure Industry Training Package Version 6.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- supervise rigid pavement construction on at least two occasions, including:
 - confirming provision of plant, tools, equipment and resources required to carry out tasks
 - overseeing the allocation, progression and completion of tasks
 - supervising the application of techniques for rigid pavement construction
 - providing support to team members where tasks require problem solving
 - checking and confirming plant, equipment and tools maintenance requirements are carried out and recorded
 - supervising clearing of work area and disposing of, reusing, recycling or storing of materials
 - reporting on task execution
 - recommending changes required to meet job requirements, including those relating to safety, efficiency and effectiveness.

During the above, the candidate must:

- locate and apply relevant documentation, policies and procedures and confirm work activity is compliant
- implement the requirements, procedures and techniques to supervise rigid pavement construction, including:
 - identifying and applying required specifications to all work activities
 - identifying, addressing and reporting potential hazards and risks
 - identifying, obtaining, confirming and supervising the implementation of signage and barrier requirements
 - supervising selection and fault checking for plant, tools and equipment required to carry out tasks

- identifying, addressing and reporting environmental issues and ground conditions
- confirming job plan is available and communicated
- optimising use of available resources to meet task requirements
- work with others to supervise rigid pavement construction in a way that meets requirements, including:
 - preparing for and organising work activities to meet task requirements
 - communicating with others to allocate work tasks and confirming and clarifying work instructions
 - monitoring movements and hazards and identifying and communicating changes to work environment.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- policies, procedures and documentation required to supervise rigid pavement construction, including those relating to:
 - site requirements
 - manufacturer specifications for required plant and equipment
 - relevant job specifications
 - hazard and risk management
 - environmental protection and ground conditions
 - work activity set up procedures
 - site isolation, signage, erecting barriers and traffic control
 - work health and safety
 - waste management
 - workplace recording and reporting
- principles and techniques for effective rigid pavement construction
- principles and techniques for effective supervision of rigid pavement construction, including:
 - resource allocation techniques, including for:
 - labour
 - plant, equipment and tools
 - highway haulage vehicles
 - construction materials
 - sub-contractor services
 - techniques for coordinating and communicating job activities with others, including:
 - briefings
 - handovers
 - work orders
 - toolbox meetings

- site meetings
- problem solving techniques
- techniques for reporting on task execution and recommending required changes.

Assessment Conditions

Mandatory conditions for assessment of this unit are stipulated below. The assessment must:

- include access to:
 - personal protective equipment
 - equipment required to supervise rigid pavement construction
- be conducted in a safe environment; and,
- be assessed in the context of this sector's work environment; and,
- be assessed in compliance with relevant legislation/regulation and using policies, procedures and processes directly related to the industry sector for which it is being assessed; and,
- confirm consistent performance can be applied in a range of relevant workplace circumstances.

Where personal safety or environmental damage are limiting factors, assessment may occur in a simulated work environment* provided it is realistic and sufficiently rigorous to cover all aspects of this sector's workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.

Assessor requirements

Assessors must be able to clearly demonstrate current and relevant industry knowledge and experience to satisfy the mandatory regulatory standards as set out in the Standards for Registered Training Organisations (RTOs) 2015/Australian Quality Training Framework mandatory requirements for assessors current at the time of assessment and any relevant licensing and certification requirements. This includes:

- vocational competencies at least to the level being delivered and assessed
- current industry skills directly relevant to the training and assessment being provided
- current knowledge and skills in vocational training and learning that informs their training and assessment
- formal relevant qualifications in training and assessment
- having knowledge of and/or experience using the latest techniques and processes
- possessing the required level of RII training product knowledge
- having an understanding and knowledge of legislation and regulations relevant to the industry and to employment and workplaces
- demonstrating the performance evidence, and knowledge evidence outlined in this unit of competency, and
- the minimum years of current** work experience after competency has been obtained as specified below in an industry sector relevant to the outcomes of the unit.

It is also acceptable for the appropriately qualified assessor to work with an industry expert to conduct assessment together and for the industry expert to be involved in the assessment judgement. The industry expert must have current industry skills directly relevant to the training and assessment being provided. This means the industry subject matter expert must demonstrate skills and knowledge from the minimum years of current work experience after competency has been obtained as specified below, including time spent in roles related to the unit being assessed:

Industry sector	AQF indicator level***	Required assessor or industry subject matter expert experience
Drilling, Metalliferous Mining, Coal Mining, Extractive (Quarrying) and Civil Infrastructure	1	1 year
	2	2 years
Drilling, Coal Mining, Extractive (Quarrying), Metalliferous Mining and Civil Infrastructure	3-6	3 years
Other sectors	Where this unit is being assessed outside of the resources and infrastructure sectors assessor and/or industry subject matter expert experience should be in-line with industry standards for the sector in which it is being assessed and where no industry standard is specified should comply with any relevant regulation.	

*Guidance on simulated environments has been stipulated in the Companion Volume Implementation Guide located on VETNet.

**Assessors can demonstrate current work experience through employment within industry in a role relevant to the outcomes of the unit; or, for external assessors this can be demonstrated through exposure to industry by conducting a minimum number of site assessments as determined by the relevant industry sector, across various locations.

*** While a unit of competency does not have an AQF level, where a unit is being delivered outside of a qualification the first numeric character in the unit code should be considered as the AQF indicator level for assessment purposes.
