Assessment Requirements for RIICWD523D Prepare asphalt mix design

Release: 2

Assessment Requirements for RIICWD523D Prepare asphalt mix design

Modification History

Release	Comment
1	This unit replaces RIICWD523A Prepare asphalt mix design
2	Required frequency and volume of evidence amended in Performance evidence. Substantial amendments made in Assessment Conditions field, including: references to Industry Sectors, assessor and subject matter expert experience requirements, how assessment should be conducted and what it should confirm.

Performance Evidence

Evidence is required to be collected that demonstrates a candidate's competency in this unit. Evidence must be relevant to the roles within this sector's work operations and satisfy all of the requirements of the performance criteria of this unit and include evidence that the candidate:

- locates and applies applicable legislation, documentation, policies and procedures
- implements the requirements, procedures and techniques for the safe, effective and efficient design and documentation of asphalt mixes including:
 - accessing and interpreting plans, drawings, specifications and design briefs
 - accessing and interpreting engineering survey and geotechnical information
 - accessing and interpreting hydrological, meteorological, cultural and heritage data
 - accessing and interpreting and apply Australian and other appropriate standards
 - accessing and interpreting asphalt mix selection data
 - accessing and interpreting traffic data
 - applying computer based design technology
 - applying Industry or government standard design software
 - applying engineering graphical presentation techniques
 - applying mix design procedures, such as marshall and hubbard-field
- works effectively with others to undertake and complete the design and documentation of asphalt mixes that meets all of the required outcomes including:
 - using a range of communication techniques and equipment to convey information to others
 - maintaining written and verbal reporting requirements
 - organising work activities to meet all task requirements

- communicating clearly and concisely with others to receive and clarify work instructions
- demonstrates completion of asphalt mix designs that safely, effectively and efficiently meets all of the required outcomes on more than one (1) occasion including:
 - calculate of areas, volumes, density, mass, grades, loads and stresses
 - determine asphalt mix traffic category and loadings requirements
 - select of asphalt mix design options
 - identify and select proportion asphalt mix design components
 - choose appropriate operational techniques
 - develop and apply design plans
 - undertake the design,
 - analyse relevant data and recommend the preferred option
 - Complete the design
 - finalisation of the design processes
 - completing and submitting design cost and other reporting
 - Provide clarification and advice to those applying the design
 - support the application of the design.
 - review application of design and recommending changes

Knowledge Evidence

The candidate must demonstrate knowledge of the preparing an asphalt mix design through:

- applying legislative, organisation and site requirements and procedures for:
 - risk assessment and management
 - statutory compliance
 - work health and safety
 - applying equipment safety requirements
 - complying with emergency issues
 - complying environmental issues
 - quality management
 - verbal and written communication
 - Australian and other relevant standards
 - Industry and organisational design
 - current Industry best practice
 - selecting traffic category application
 - design review principles and procedures
 - cost estimation
 - documentation and reporting
 - design approval
 - performance reviews

- system close out
- techniques for choosing preferred options
- team leadership techniques
- asphalt mix manufacture and construction plant and equipment capabilities

Assessment Conditions

- An assessor of this unit must satisfy the requirements of the NVR/AQTF or their successors; and Industry regulations for certification and licensing; and,
- this unit is best assessed in the context of this sector's work environment; and,
- outcomes of this unit that occur in an office-based setting may be assessed in a simulated environment provided it is realistic and sufficiently rigorous to cover all aspects of this sector's workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills; and,
- this unit must be assessed in compliance with relevant legislation/regulation and using policies, procedures, processes and operational manuals directly related to the industry sector for which it is being assessed; and,
- assessment may be conducted in conjunction with the assessment of other Units of Competency; and,
- assessment must confirm consistent performance can be applied in a range of relevant workplace circumstances; and,
- assessors must demonstrate the performance evidence, and knowledge evidence as outlined in this Unit of Competency, and through the minimum years of current* work experience specified below in an Industry sector relevant to the outcomes of the unit; or,
- where the assessor does not meet experience requirements a co-assessment or partnership arrangement must exist between the qualified assessor and an Industry subject matter expert. The Industry subject matter expert should hold the unit being assessed (or an equivalent unit) and/or demonstrate equivalence of skills and knowledge at the unit level. An Industry technical expert must also demonstrate skills and knowledge from the minimum years of current work experience specified below in the Industry sector, including time spent in roles related to the unit being assessed; and,
- assessor and Industry subject matter expert requirements differ depending on the Australian Qualifications Framework Level (AQF) of the qualification being assessed and/or Industry Sector as follows:

Industry sector	AQF** Level	Required assessor or Industry subject matter expert experience
Drilling, Metalliferous Mining, Coal Mining, Extractive (Quarrying) and Civil Construction	1	1 Year
	2	2 Years
Drilling, Coal Mining and Extractive (Quarrying)	3-6	3 Years
Metalliferous Mining and Civil	3-6	5 Years

Construction		
Other sectors	Where this Unit is being assessed outside of the Resources and Infrastructure Sectors assessor and/or Industry subject matter expert experience should be in-line with industry standards for the sector in which it is being assessed and where no Industry standard is specified should comply with any relevant regulation.	

*Assessors can demonstrate current work experience through employment within Industry in a role relevant to the outcomes of the Unit; or, for external assessors this can be demonstrated through exposure to Industry by conducting frequent site assessments across various locations.

**Where a unit is being delivered outside of a Qualification the first numeric character in the Unit code should be considered to indicate the AQF level
