RIIMCU406E Apply and monitor the inrush management plan

Release: 1

RIIMCU406E Apply and monitor the inrush management plan

Modification History

Release	Comments
Release 1	This version first released with RII Resources and Infrastructure Industry Training Package Version 5.0.

Application

This unit describes the skills and knowledge required to apply and monitor the inrush management plan in coal mining, including applying hazard controls and monitoring systems.

It applies to those working in supervisory or technical specialist roles. They generally perform a broad range of operational activities in their area of responsibility and are responsible for monitoring a safe work environment.

Licensing, legislative and certification requirements that apply to this unit can vary between states, territories, and industry sectors. Users must check requirements with relevant body before applying the unit.

Unit Sector

Coal mining (underground)

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Plan and prepare to apply and monitor the inrush management plan	1.1 Obtain, interpret, clarify and confirm work requirements 1.2 Access, interpret and apply inrush management plan documentation and confirm work activity is compliant 1.3 Communicate and explain responsibilities and tasks to personnel involved according to inrush management plan 1.4 Identify, obtain and allocate resources according to inrush management plan 1.5 Identify training needs for personnel involved according to inrush management plan and within scope of own role
2. Apply and monitor inrush activities	2.1 Identify, interpret and apply inrush monitoring, recording and reporting procedures according to inrush management plan

ELEMENT	PERFORMANCE CRITERIA
	2.2 Interpret, apply and monitor control measures according to inrush management plan 2.3 Interpret, apply and monitor actions and procedures in response to potential inrush according to inrush management plan 2.4 Confirm, apply, communicate and post permit-to-mine procedures according to inrush management plan and site requirements 2.5 Apply and monitor procedures addressing inrush personnel safety according to inrush management plan 2.6 Inspect equipment protection/defensive requirements and measures according to inrush management plan and site requirements 2.7 Participate in systems audit and review requirements according to inrush management plan
3. Apply inrush prevention system maintenance procedures	3.1 Carry out inspections, repair and maintenance activities according to site requirements 3.2 Record, report and review maintenance activities according to site requirements

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

SKILL	DESCRIPTION
Numeracy	<ul style="list-style-type: none"> Calculates resourcing requirements and performs mathematical calculations
Oral communication	<ul style="list-style-type: none"> Conveys information and requirements clearly and listens actively
Reading	<ul style="list-style-type: none"> Identifies and interprets relevant information from workplace procedures, documentation and legislation

Unit Mapping Information

Supersedes and is equivalent to RIIMCU406D Apply and monitor the inrush management plan.
