# **Assessment Requirements for RIIINHB302D Conduct reaming**

**Release: 2**

## Assessment Requirements for RIINHB302D Conduct reaming

### Modification History

Release	Comment
1	This unit replaces RIINHB302A Conduct reaming
2	Required frequency and volume of evidence amended in Performance evidence. Substantial amendments made in Assessment Conditions field, including: references to Industry Sectors, assessor and subject matter expert experience requirements, how assessment should be conducted and what it should confirm.

### Performance Evidence

Evidence is required to be collected that demonstrates a candidate's competency in this unit. Evidence must be relevant to the roles within this sector's work operations and satisfy all of the requirements of the performance criteria of this unit and include evidence that the candidate:

- locates and applies relevant documentation, policies and procedures
- implements the requirements, procedures and techniques for the safe, effective and efficient completion of reaming including:
  - interpreting reaming data and determining an appropriate course of action
  - operating machine
  - operating ancillary equipment
  - attaching the reamer
  - using thread gauge and dressing slightly damaged drill stem threads
  - lubricating threads and other components
  - inspecting and cleaning equipment and checking for wear and tear
  - disassembling, cleaning, inspecting and reassembling reaming heads
- works effectively with others to undertake and complete the conduct of reaming that meets all of the required outcomes including:
  - complying with written and verbal reporting requirements and procedures
  - communicating clearly and concisely with others to receive and clarify work instructions
  - communicating clearly and concisely with others to resolve coordination requirements prior to commencing and during work activities
- demonstrates completion of the conduction of reaming that safely, effectively and efficiently meets all of the required outcomes on more than one (1) occasion including:
  - selecting appropriate reaming tool(s)

- connecting appropriate reamer
- reaming/back reaming, adding/removing drill stem sections
- monitoring and interpreting all gauge/dial readings
- monitoring and interpreting drill fluid flow from both ends of hole
- maintaining drill log and reports

## Knowledge Evidence

The candidate must demonstrate knowledge in conducting reaming through:

- accessing, interpreting and applying the legislative, organisation and site requirements and procedures for:
  - work, health and safety
  - environmental issues
  - operating drill rig
  - housekeeping
- identifying equipment characteristics, technical capabilities and limitations
- identifying basic rock/geology types and their impact on HDD operations, including hard rock and scree
- identifying the appropriate reamers for different geology types
- understanding the principles of HDD
- using the correct types of drill fluid, their uses and make up/adjustment procedures

## Assessment Conditions

- An assessor of this unit must satisfy the requirements of the NVR/AQTF or their successors; and Industry regulations for certification and licensing; and,
- this unit must be assessed in the context of this sector's work environment; and,
- this unit must be assessed in compliance with relevant legislation/regulation and using policies, procedures, processes and operational manuals directly related to the industry sector for which it is being assessed; and,
- assessment may be conducted in conjunction with the assessment of other Units of Competency; and,
- assessment must confirm consistent performance can be applied in a range of relevant workplace circumstances; and,
- assessors must demonstrate the performance evidence, and knowledge evidence as outlined in this Unit of Competency, and through the minimum years of current\* work experience specified below in an Industry sector relevant to the outcomes of the unit; or,
- where the assessor does not meet experience requirements a co-assessment or partnership arrangement must exist between the qualified assessor and an Industry subject matter expert. The Industry subject matter expert should hold the unit being assessed (or an equivalent unit) and/or demonstrate equivalence of skills and knowledge at the unit level. An Industry technical expert must also demonstrate skills and knowledge from the minimum years of current work experience specified below in the Industry sector, including time spent in roles related to the unit being assessed; and,

- assessor and Industry subject matter expert requirements differ depending on the Australian Qualifications Framework Level (AQF) of the qualification being assessed and/or Industry Sector as follows:

<b>Industry sector</b>	<b>AQF** Level</b>	<b>Required assessor or Industry subject matter expert experience</b>
Drilling, Metalliferous Mining, Coal Mining, Extractive (Quarrying) and Civil Construction	1	1 Year
	2	2 Years
Drilling, Coal Mining and Extractive (Quarrying)	3-6	3 Years
Metalliferous Mining and Civil Construction	3-6	5 Years
Other sectors	Where this Unit is being assessed outside of the Resources and Infrastructure Sectors assessor and/or Industry subject matter expert experience should be in-line with industry standards for the sector in which it is being assessed and where no Industry standard is specified should comply with any relevant regulation.	

\*Assessors can demonstrate current work experience through employment within Industry in a role relevant to the outcomes of the Unit; or, for external assessors this can be demonstrated through exposure to Industry by conducting frequent site assessments across various locations.

\*\*Where a unit is being delivered outside of a Qualification the first numeric character in the Unit code should be considered to indicate the AQF level
