abandonment**

**Release: 3**

# Assessment Requirements for RIIOGD508D Manage well completion and abandonment

## Modification History

| Release | Comment   |
|---------|---|
| 1       | This unit replaces RIIOGD508A Manage well completion and abandonment  |
| 2       | Performance Criteria amended to make requirements more explicit.  |
| 3       | Required frequency and volume of evidence amended in Performance evidence.<br>Substantial amendments made in Assessment Conditions field, including: references to Industry Sectors, assessor and subject matter expert experience requirements, how assessment should be conducted and what it should confirm. |

## Performance Evidence

Evidence is required to be collected that demonstrates a candidate's competency in this unit. Evidence must be relevant to the roles within this sector's work operations and satisfy all of the requirements of the performance criteria of this unit and include evidence that the candidate:

- locates and applies relevant documentation, policies and procedures
- implements the requirements, procedures and techniques for the safe, effective and efficient management of well completion and abandonment including:
  - identifying, addressing and reporting potential hazards and risks
  - controlling identified hazards
  - carrying out emergency response
  - identifying, addressing and reporting environmental issues
- preparing written records and reports works effectively with others to undertake and complete managing well completion and abandonment to meet all required outcomes including:
  - communicating clearly and concisely with others to receive, give and clarify work instructions
  - preparing for and organising work activities to meet all task requirements
  - establishing and maintaining coordination with others relating to the work activity
  - complying with written and verbal reporting requirements
- demonstrates completion of management of well completion and abandonment that safely, effectively and efficiently meets all of the required outcomes on more than one (1) occasion including:
  - developing completion schedule and making preparations for release of rig

- facilitating and supervising rig down activities
- reviewing contract requirements and completing records
- troubleshoot breakdowns
- implement environmental plan
- processing work orders and invoicing
- rigging down equipment

## **Knowledge Evidence**

The candidate must demonstrate knowledge in applying the manage well completion and abandonment through:

- identifying and managing risks
- identifying, addressing and reporting environmental issues
- setting up work activity
- site isolation, signage and erecting barriers
- work health and safety
- selecting and checking for faults, all plant, tools and equipment to carry out tasks
- applying standard working practices and procedures
- applying correct methods to control identified hazards
- specific rig tear-out sequence
- applying road haulage regulations
- managing safety and environmental issues

## **Assessment Conditions**

- An assessor of this unit must satisfy the requirements of the NVR/AQTF or their successors; and Industry regulations for certification and licensing; and,
- this unit must be assessed in the context of this sector's work environment; and,
- this unit must be assessed in compliance with relevant legislation/regulation and using policies, procedures, processes and operational manuals directly related to the industry sector for which it is being assessed; and,
- assessment may be conducted in conjunction with the assessment of other Units of Competency; and,
- assessment must confirm consistent performance can be applied in a range of relevant workplace circumstances; and,
- assessors must demonstrate the performance evidence, and knowledge evidence as outlined in this Unit of Competency, and through the minimum years of current\* work experience specified below in an Industry sector relevant to the outcomes of the unit; or,

- where the assessor does not meet experience requirements a co-assessment or partnership arrangement must exist between the qualified assessor and an Industry subject matter expert. The Industry subject matter expert should hold the unit being assessed (or an equivalent unit) and/or demonstrate equivalence of skills and knowledge at the unit level. An Industry technical expert must also demonstrate skills and knowledge from the minimum years of current work experience specified below in the Industry sector, including time spent in roles related to the unit being assessed; and,
- assessor and Industry subject matter expert requirements differ depending on the Australian Qualifications Framework Level (AQF) of the qualification being assessed and/or Industry Sector as follows:

| Industry sector  | AQF** Level  | Required assessor or Industry subject matter expert experience |
|--|--|--|
| Drilling, Metalliferous Mining, Coal Mining, Extractive (Quarrying) and Civil Construction | 1  | 1 Year   |
|  | 2  | 2 Years  |
| Drilling, Coal Mining and Extractive (Quarrying)   | 3-6  | 3 Years  |
| Metalliferous Mining and Civil Construction  | 3-6  | 5 Years  |
| Other sectors  | Where this Unit is being assessed outside of the Resources and Infrastructure Sectors assessor and/or Industry subject matter expert experience should be in-line with industry standards for the sector in which it is being assessed and where no Industry standard is specified should comply with any relevant regulation. |  |

\*Assessors can demonstrate current work experience through employment within Industry in a role relevant to the outcomes of the Unit; or, for external assessors this can be demonstrated through exposure to Industry by conducting frequent site assessments across various locations.

\*\*Where a unit is being delivered outside of a Qualification the first numeric character in the Unit code should be considered to indicate the AQF level
