Release 1	<p>This version first released with RII Resources and Infrastructure Industry Training Package Version 6.0.</p>

Description

This skill set addresses the skills and knowledge required for those responsible for traffic management implementation on Temporary Traffic Management Category 3 environments as described in the Austroads Guide to Temporary Traffic Management.

Pathways Information

The units provide credit towards a number of Certificate II and Certificate III qualifications in the RII Resources and Infrastructure Industry Training Package and other training packages, such as RII30920 Certificate III in Civil Construction or equivalent.

Entry Requirement

This skill set may only be undertaken in addition to:

- completion of the RIISS00060 Traffic Management Implementer Skill Set for Urban Streets and Low Volume Rural Roads; and
- at least three months experience applying skills and knowledge relevant to the above-mentioned skill set in a temporary traffic management workplace; and
- providing evidence of relevant experience setting up at least 12 temporary traffic management designs including high speed roads; and at least two of the following design types:
 - pedestrian and cyclist controls
 - construction sites
 - lane closures
 - shoulder closures
 - night works

- use of portable traffic control devices.

Licensing/Regulatory Information

This skill set has been created to align to the requirements of individuals responsible for traffic management implementation on a site and road workers under their direction, as described in the Austroads Guide to Temporary Traffic Management on Temporary Traffic Management Category 3 environments. Licensing, legislative and certification requirements that apply to this skill set can vary between states, territories and industry sectors. Users must check requirements with relevant body before applying the skill set.

Skill Set Requirements

Successful completion of the following two units of competency inclusive of at least 3 different types of setups practical experience applying the relevant skills and knowledge in a temporary traffic management workplace:

- RIIBEF301D Run on-site operations
- RIIWHS305 Implement traffic management plans on motorways and freeways.

The assessment for the units of competency comprises both theoretical and practical components. The practical assessment component is to be undertaken after the practical experience is gained. Practical experience requirements must be completed on Temporary Traffic Management Category 3 roads within at least six months of successfully completing the theoretical component.

Target Group

This skill set is for individuals responsible for traffic management implementation on a site and road workers under their direction on Temporary Traffic Management Category 3 roads.

Suggested words for Statement of Attainment

These units of competency from the RII Training Package meet industry requirements for individuals responsible for traffic management implementation on a site and road workers under their direction on Temporary Traffic Management Category 3 environments as described in the Austroads Guide to Temporary Traffic Management.
