Assessment Requirements for RIIWSV503D Manage and monitor rig-up operations

Release: 2

Assessment Requirements for RIIWSV503D Manage and monitor rig-up operations

Modification History

Not applicable.

Performance Evidence

Evidence is required to be collected that demonstrates a candidate's competency in this unit. Evidence must be relevant to the roles within this sector's work operations and satisfy all of the requirements of the performance criteria of this unit and include evidence that the candidate:

- locates and applies relevant legislation, documentation, policies and procedures
- works effectively with others to undertake and management of well servicing rig-up operations that meets all of the required outcomes including:
 - complying with written and verbal reporting requirements and procedures
 - communicating clearly and concisely with others to receive and clarify work instructions
 - communicating clearly and concisely with others to resolve coordination requirements throughout work activities
- demonstrates the requirements, procedures and techniques for the management of well servicing rig-up operations effectively and efficiently meet all of the required outcomes on one (1) occasion including:
 - interpreting well servicing rig up program and communicate to team members
 - identifying and assigning resources
 - assessing and implementing work health and safety requirements
 - establishing effluent disposal systems
 - coordinating engine power start-up
 - conducting pre-spud inspection

Knowledge Evidence

The candidate must demonstrate knowledge of managing and monitoring rig-up operations through:

- accessing, interpreting and applying the organisation and site requirements and procedures
- maintaining company and statutory safety guidelines, procedures and practices
- establishing and maintaining safe operating procedures for operating equipment
- establishing and maintaining rig up procedures
- maintaining safe rigging and dogging practices
- identifying auxiliary equipment functions and service requirements
- knowledge and application of specific auxiliary rig up sequence
- safety and environmental issues
- using communication equipment
- establishing and preparing for emergency procedures
- establishing and maintaining preventative maintenance
- adhering to workplace relations and award conditions

Assessment Conditions

- An assessor of this unit must satisfy the requirements of the NVR/AQTF or their successors; and Industry regulations for certification and licensing; and,
- this unit must be assessed in the context of this sector's work environment; and,
- this unit must be assessed using Resources and Infrastructure Industry sector specific policies, procedures, processes and operational manuals; and,
- an assessor must demonstrate the performance evidence, and knowledge evidence as outlined in this Unit of Competency, and through five (5) years of work in the Industry sector; and,
- where a co-assessment or partnership arrangement exists between a qualified assessor and an Industry technical expert, the Industry technical expert can hold the unit being assessed, and/or demonstrate equivalency of skills and knowledge at the unit level. An Industry technical expert must also demonstrate a minimum of three (3) years of continuous work in the Industry sector, with the preceding one (1) year in the unit they are co-assessing.
