

RIICBS403A Apply the principles for the application of polymer modified binder

Release: 1

RIICBS403A Apply the principles for the application of polymer modified binder

Modification History

Not applicable.

Unit Descriptor

This unit covers the supervision of the application of polymer modified binder in civil construction industry. It includes the requirements for ensuring that the planning, preparing, initiating, monitoring, adjusting and reporting of polymer modified binder selection and use are carried out in accordance with the accepted industry principles.

Application of the Unit

This unit is appropriate for those working in a supervisory role or as a technical specialist, in the selection and use of polymer modified binders within:

Civil construction

Licensing/Regulatory Information

Refer to Unit Descriptor.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the
essential outcomes of a
unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Approved Page 2 of 13

Elements and Performance Criteria

ELEMENT		PERFORMANCE CRITERIA
1.	Ensure appropriate planning and preparation is carried out	1.1. Access, interpret and apply compliance documentation relevant to the work activity 1.2. Access, interpret and clarify the specific task information and requirements relevant to undertaking polymer modified binder selection and use 1.3. Ensure a job plan is available which makes best use of the available resources and meets task requirements
2.	Ensure appropriate initiation of tasks carried out	 2.1.Confirm that the necessary <i>resources</i> are available for the safe, effective and efficient conduct of the tasks 2.2.Ensure clear and timely <i>instructions</i> are communicated to <i>team members</i> and others involved, for the safe, effective and efficient conduct of the tasks, to meet the <i>specific task requirements</i> 2.3. <i>Set out</i> tasks as required for the effective completion of the task
3.	Oversee the execution of tasks	3.1. <i>Monitor</i> task performance to ensure it achieves the <i>required outcomes</i> . 3.2. <i>Initiate</i> adjustments to work practice or job plan to ensure safe execution of work and achievement of required outcomes 3.3. Ensure plant equipment and tools maintenance requirements are carried out and recorded
4.	Report on the execution of tasks	4.1.Complete and submit reports as required 4.2.Recommend changes to improve the safety, efficiency and effectiveness of the execution of polymer modified binder selection and use

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

Specific skills are required to achieve the performance criteria in this unit, particularly for the application in the various circumstances in which this unit may be applied. This includes the ability to carry out the following as required to apply the principles for the selection and use of polymer modified binder:

- apply legislative, organisation and site requirements and procedures
- apply legislative, organisation and site requirements and procedures
- interpret project contract and specification requirements and procedures
- interpret project site soil and geological data
- identify soil and rock types
- interpret meteorological data
- identify drainage issues
- interpret material properties and test results
- interpret project site geotechnical data
- interpret project site hydrological data
- interpret project engineering survey information
- interpret project plans and drawings
- interpret project specifications
- prepare for and conduct briefings, toolbox and site meeting
- prepare short messages
- prepare and present job reports
- prepare and maintain log books and diaries
- provide leadership
- apply performance monitoring skills
- apply set out requirements and procedures
- set up and use levelling devices
- establish construction offsets
- apply supervisory skills
- develop workplace relationships
- develop individuals and the team
- apply inspection requirements and procedures
- calculate quantities for the execution of tasks, including:
 - volumes
 - grades
 - percentages
 - areas
 - resource consumption figures
- apply polymer modified binder selection processes

Approved Page 4 of 13

• provide recommendations for the improvement of the safe, effective and efficient execution of polymer modified binder selection and use

Required knowledge

Specific knowledge is required to achieve the Performance Criteria of this unit, particularly its application in a variety of circumstances in which the unit may be used. This includes knowledge of the following, as required to apply the principles for the selection and use of polymer modified binder:

- risk assessment and management requirement and procedures
- statutory compliance requirements and procedures
- occupational health and safety requirements and procedures
- environmental management requirements and procedures
- quality management requirements and procedures
- work zone traffic management requirements and procedures
- contract management requirements and procedures
- communication requirements and procedures
- administrative requirements and procedures
- the types of polymer modified binders, their specifications, applications and constraints on their use
- polymer modified binder heating and handling methods
- polymer modified binder plant and equipment capabilities, selection and use
- plant, equipment and tools maintenance requirements and procedures
- polymer modified binder manufacturing processes
- operational techniques for the execution of polymer modified binder tasks
- polymer modified binder task resource requirements and procedures
- activities scheduling requirements and procedures
- polymer modified binder materials delivery requirements and procedures
- job plan drafting of and administration requirements and procedures
- reporting requirements and procedures
- workplace relationship requirements and procedures
- organisational, client and site operational requirements
- relationship between various areas of civil works
- team leadership techniques
- works planning techniques
- polymer modified binder monitoring methods
- polymer modified binder sampling and testing methods
- engineering survey principles
- materials quality and delivery requirements and procedures
- mentoring techniques
- estimating principles
- civil works construction sequencing
- polymer application and related activities' terminology

Approved Page 5 of 13

- set out requirements and procedures
- road geometry
- ground surface treatment requirements and procedures e.g. proof rolling
- pavement drainage requirements
- works planning techniques
- monitoring methods

Approved Page 6 of 13

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	The evidence required to demonstrate competency in this unit must be relevant to worksite operations and satisfy all of the requirements of the performance criteria, required skills and knowledge and the range statement of this unit and include evidence of the following:
	• knowledge of the requirements, procedures and instructions for the application of the principles for the selection and use of polymer modified binder
	 implementation of appropriate procedures and techniques for the safe, effective and efficient selection and use of polymer modified binder working with others to plan, prepare and conduct the selection and use of polymer modified binder
	provision of clear and timely instruction and supervision by the individual of those involved in the selection and use of polymer modified binder
	evidence of the consistent successful supervision of the selection and use of polymer modified binder
Context of and specific resources for assessment	This unit must be assessed in the context of the work environment. Where personal safety or environmental damage are limiting factors, assessment may occur in a simulated environment provided it is realistic and sufficiently rigorous to cover all aspects of workplace performance, including task skills, task management skills, contingency management skills and job role environment skills.
	• Evidence for assessment is best gathered using the outcomes of products and processes in the workplace.
	The assessment environment should not disadvantage the participant. For example, language, literacy and numeracy demands of

Approved Page 7 of 13

- assessment should not be greater than those required on the job.
- Customisation of assessment and delivery environment to sensitively accommodate cultural diversity.
- Aboriginal people and other people from a non English speaking background may have second language issues.
- Assessment of this competency requires typical resources normally used in a resources and infrastructure sector environment. Selection and use of resources for particular worksite may differ due to the site circumstances.
- Where applicable, physical resources should include equipment modified for people with disabilities.
- Access must be provided to appropriate learning and/or assessment support when required.

Approved Page 8 of 13

This unit may be assessed in a holistic way with other units of competency. The assessment strategy for this unit must verify required knowledge and skill and practical application using more than one of the following assessment methods:
 written and/or oral assessment of the candidate's required knowledge observed, documented and/or first hand testimonial evidence of the candidate's: implementation of appropriate procedures and techniques for the safe, effective and efficient achievement of the required outcomes consistently achieving the required outcomes first hand testimonial evidence of the candidate's: working with others to plan, prepare and conduct the selection and use of polymer modified binder provision of clear and timely instruction and supervision by the individual of those
involved in the selection and use of polymer modified binder Consult the SkillsDMC User Guide for further information on assessment including access and

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Relevant compliance documentation may include:	 legislative, organisational and site requirements and procedures manufacturer's guidelines and specifications Australian standards code of practice Employment and workplace relations legislation Equal Employment Opportunity and Disability Discrimination legislation
Job plan is to include:	 human resource requirements plant and machinery requirements construction materials requirements sub-contractor support requirements waste disposal requirements coordination requirements activity scheduling materials delivery scheduling risk assessment and management requirements occupational health and safety requirements quality management requirements, including testing scheduling requirements traffic management requirements environmental requirements task monitoring requirements task performance monitoring requirements communication requirements reporting requirements
Polymer modified binder selection and use may include:	 new pavement construction existing pavement repair and rehabilitation application in spray seal, asphalt and slurry surfacing
Resources are to include:	labourplant, equipment and toolshighway haulage vehicles

Approved Page 10 of 13

•	construction materials
•	sub-contractor services

Approved Page 11 of 13

Instructions are to include:	• briefings
	• handovers
	work orders
	toolbox meetings
	site meetings
Team members may include:	other members of the organisation's
	management team
	members of the team directly involved in the task
	suppliers representatives
	sub-contractors representatives
	• supervisors or managers of other organisations who are involved in related tasks
Set out is to include:	control lines
bet out is to iliciade.	• off-sets
G .6° 4 1	site geological and geotechnical data,
Specific task requirements may include:	including:
may merude.	 rock types and characteristics
	 soil types and characteristics
	• site hydrological data, including:
	surface water
	• ground water
	• site meteorological data, including:
	rainfall
	humidity
	1
	• temperature
	• wind
	site engineering survey data
	known and potential site hazards, constraints and conditions
	-1414111
	 site cultural and neritage information task specifications
	task drawings
	sources of materials
	other organisations and contractors involved in
	the task or related tasks
	coordination, timing and budgeting
	requirements
Monitor is to include:	ongoing risk assessment
	engineering survey
	sampling and testing

Approved Page 12 of 13

	observation and recording
	• general supervision
Required outcomes may include:	task specifications requirements
	task drawings requirements
	coordination requirements
	activity scheduling requirements
	unit cost requirements
	overall task cost requirements
	waste management requirements
Initiate may include:	written communication
Zanzawe may merade.	oral communication
