Assessment Requirements for SFIAQU201

Collect broodstock and seedstock

Release: 1

Assessment Requirements for SFIAQU201 Collect broodstock and seedstock

Modification History

Release	Comments
Release 1	This version released with SFI Seafood Industry Training Package Version 1.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has collected, packed and transported broodstock and seedstock on at least one occasion, including:

- communicating and reporting to supervisor on collection activities
- preparing and operating equipment used for collection and transport
- handling, collecting, grading and packing live broodstock and seedstock to ensure minimal stress or damage
- recording observations
- cleaning work area and storing tools and equipment post-collection.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- basic characteristics of normal and abnormal behaviour of stock collected from the wild and/or on-farm facilities
- main causes of stress and damage in stock, and methods to overcome these
- operating methods and basic maintenance and repairs for collection, transport and holding equipment
- biosecurity requirements relating to collecting broodstock and seedstock
- workplace procedures for collecting broodstock and seedstock, including health and safety requirements relevant to the activity
- workplace quantity and quality requirements for grading broodstock and seedstock
- workplace reporting requirements for broodstock and seedstock collection.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in an aquaculture workplace setting or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - personal protective equipment for collecting broodstock and seedstock
 - collection, transport and holding equipment
 - culture and holding structures
 - live broodstock or seedstock for collecting and packing
 - data or recoding sheets
- specifications:
 - specific instructions and workplace procedures for collecting broodstock and seedstock
- relationships:
 - evidence of interactions with supervisor.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.
