Application

This unit of competency describes the skills and knowledge required to monitor a range of aquaculture stock handling activities, including cleaning, moving and grading for cultured or held stock.

The unit applies to individuals who are responsible for stock handling activities in an aquaculture environment, working under broad direction.

All work must be carried out to comply with workplace procedures, according to state/territory health and safety, food safety, biosecurity and environmental regulations, legislation and standards that apply to the workplace.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Aquaculture (AQU)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Plan stock handling	1.1 Receive or obtain instructions for stock handling activities from supervisor

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	1.2 Identify risk factors that affect the health of stock during handling, and plan to minimise risk 1.3 Plan and communicate workplace stock handling procedures and safety precautions with team members
