**Release: 2**

# Assessment Requirements for SFIAQU305 Monitor harvest and post-harvest activities

## Modification History

Release	Comments
Release 2	This version released with SFI Seafood Industry Training Package Version 2.0.
Release 1	This version released with SFI Seafood Industry Training Package Version 1.0.

## Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has monitored harvest and post-harvest activities on at least one occasion, including:

- communicating with team members on harvest activities and safety precautions
- identifying suitable stock, resource requirements and risk factors when planning harvest activities
- operating and maintaining required equipment, including the fitting of personal protective equipment (PPE)
- monitoring harvest and post-harvest activities against specifications and to ensure minimal stock damage or stress
- maintaining accurate records on harvest and post-harvest activities
- monitoring the cleaning of work area following harvest and post-harvest activities.

## Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- key aquatic stock behaviour and environmental risks associated with harvest and post-harvest activities
- key biological and water quality requirements for stock being handled, processed and transported
- harvest and post-harvest equipment options and limitations
- harvest and post-harvest principles and practices
- safety considerations and hazards associated with harvest and post-harvest activities
- quality assurance practices in stock harvesting, grading and post-harvest

- relevant legislation relating to harvesting aquatic stock
- industry guidelines relating to aquatic animal welfare
- equipment or technology requirements.

## Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
  - skills must be demonstrated in an aquaculture workplace or an environment that accurately represents workplace conditions
- resources, equipment and materials:
  - personal protective equipment
  - equipment required for harvest and post-harvest tasks
  - stock to harvest
  - containers and labels for packing
  - recording or reporting forms
- specifications:
  - harvest specification or schedule and relevant workplace procedures for harvesting aquatic stock
- relationships:
  - evidence of interactions with supervisor and team members.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.
