Assessment Requirements for SFIAQU405

Develop emergency procedures for an aquaculture enterprise

Release: 1

Assessment Requirements for SFIAQU405 Develop emergency procedures for an aquaculture enterprise

Modification History

Release	Comments
Release 1	This version released with SFI Seafood Industry Training Package Version 1.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has developed and implemented contingency plans and emergency procedures for an aquaculture facility on at least one occasion, including:

- gathering information from different sources to identify possible threats and emergencies for the workplace
- identifying resources and equipment required to implement the contingency plans
- developing the contingency plans and emergency procedures that address the workplace's most critical risks and emergency situations and meet legislative requirements
- carrying out drills of documented contingency plans and emergency procedures in own organisational environment
- monitoring and making improvements to the contingency plans.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- emergency alerting systems, signals and instructions typically used within industry workplaces
- government regulations and requirements of authorities and agencies
- hazards and precautions during an emergency or evacuation, including checking and accounting procedures
- information needs of emergency response agencies at time of reporting
- health and safety legislative requirements related to risk management
- characteristics and composition of the workforce that need to be considered in an emergency or threat situation
- location of emergency procedures, equipment and evacuation assembly areas
- organisational emergency procedures, including various roles of the workplace emergency personnel

- workforce needs and entitlements post-emergency, incident and accident
- principles and priorities for evacuation, including checking and accounting procedures
- priorities and limitations of workplace response to threats and emergencies
- risk factors involved in operating an aquaculture workplace
- role, responsibility and authority of emergency response personnel and principles of effective liaison to ensure that there is no interference or hindrance to their action.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in an aquaculture workplace or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - scenarios for practical drills
 - relevant technology for communication and preparing documentation
- specifications:
 - workplace procedures and documentation relating to threats or emergencies
- relationships:
 - evidence of interactions with experts for specialist information, and staff to oversee during implementation of contingency plans and emergency procedures.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.
