SFIAQU505 Plan stock health management

Release: 1

SFIAQU505 Plan stock health management

Modification History

Release	Comments
Release 1	This version released with SFI Seafood Industry Training Package Version 1.0.

Application

This unit of competency describes the skills and knowledge required to plan stock health management, including identifying and researching stock health issues, documenting management options, and implementing and monitoring the plan.

This unit applies to individuals who have specialised knowledge and technical and/or management responsibilities for stock health management in an aquaculture setting.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Aquaculture (AQU)
