Assessment Requirements for SFICPL411 Implement fisheries compliance

Release: 2

Assessment Requirements for SFICPL411 Implement fisheries compliance

Modification History

Release	Comments
Release 2	This version released with SFI Seafood Industry Training Package Version 2.0.
Release 1	This version released with SFI Seafood Industry Training Package Version 1.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has conducted activities to implement fisheries compliance on at least one occasion, including:

- establishing and applying current fisheries management legislation, regulations and codes of practice relevant to the jurisdiction
- communicating compliance-related matters as part of an industry or community enquiry or forum
- conducting a site inspection to monitor compliance for at least one fishery organisation
- responding to and reporting on compliance monitoring activities.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- common fishery stock in the region, and its lifecycle
- fisheries management practices used in the region
- health and disease problems associated with fishery stock in the region, including procedures to identify disease and protected species, assess results of mass mortality events and take samples
- jurisdictional policies and procedures for monitoring fishery compliance, including record-keeping protocols
- principles of environmental sustainability
- legislation, regulations and codes of practice relevant to fishery management
- requirements for site inspections of associated fishery management equipment, natural and manufactured structures and systems.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - skills must be conducted in a fisheries management compliance monitoring setting or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - range of reportable events
- specifications:
 - access to relevant jurisdictional policies and procedures, legislation, regulations and codes of practice for implementing fishery compliance
 - licensing terms and conditions.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.
