Assessment Requirements for SFIFSH204

Use pots and traps to land catch

Release: 1

Assessment Requirements for SFIFSH204 Use pots and traps to land catch

Modification History

Release	Comments
Release 1	This version released with SFI Seafood Industry Training Package Version 1.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has undertaken potting and trapping fishing operations on at least one occasion, including:

- maintaining and preparing potting and trapping gear ready for deployment
- safely deploying and retrieving trap and pot gear components
- stowing safely in readiness for future deployment
- loading and containing the catch as specified by supervisor
- handling and sorting seafood according to food safety and quality requirements.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- basic operating principle of pot and trap fishing gear
- factors that make pot and trap components effective or defective
- order in which pot and trap fishing gear components are connected and disconnected
- environmental impacts and resource protection relevant to pot and trap fishing operations
- principles that contribute to vessel stability
- food safety and hygiene requirements for handling and sorting seafood catch
- biosecurity and health and safety requirements for pot and trap fishing operations.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in a fully operational potting or trapping vessel or an environment that accurately represents workplace conditions

- resources, equipment and materials:
 - pots and traps and related equipment and machinery
 - catch suitable for sorting
- specifications:
 - potting and trapping fishing instructions
 - workplace procedures for potting and trapping fishing operations that include advice on food safety, health and safety, quality and environmental requirements
- relationships:
 - evidence of interactions with supervisor.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.
