SIRPDIS004A Assist in dispensary stock control

Revision Number: 1
SIRPDIS004A Assist in dispensary stock control

Modification History
Not applicable.

Unit Descriptor
Unit descriptor This unit covers skills and knowledge required to maintain a dispensary stock control system.

Application of the Unit
Application of the unit This unit applies to community pharmacy employees working in dispensary stock control. Work is carried out under direction of a pharmacist.

Licensing/Regulatory Information
Not applicable.

Pre-Requisites
Prerequisite units SIRPPKS001A Support the sale of pharmacy and pharmacist-only medicines
SIRPDIS003A Assist in dispensary operations
Employability Skills Information

Employability skills

The required outcomes described in this unit contain applicable facets of employability skills. The Employability Skills Summary of the qualification in which this unit is packaged will assist in identifying employability skills requirements.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency. Performance criteria describe the required performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge and/or the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the essential skills and knowledge and their level, required for this unit.

The following skills must be assessed as part of this unit:

- interpersonal communication skills to:
  - seek approval for stock orders and confirm working stock levels
  - alert pharmacist to delivery of controlled drugs
  - report discrepancies, unacceptable quality and expired, damaged and returned stock through clear and direct communication
  - ask questions to identify and confirm requirements
  - use language and concepts appropriate to cultural differences
  - use and interpret non-verbal communication
- apply literacy skills to read and interpret requisition and delivery documentation
- apply numeracy skills to support stock taking and reconciliation activities
- place orders to maintain required levels
- receive and store stock in a timely manner
- conduct stocktakes
- maintain storage areas to meet good housekeeping requirements
- plan and organise work to meet dispensary stock control requirements.

The following knowledge must be assessed as part of this unit:

- pharmacy policies, protocols and procedures relating to dispensary stock control, including:
  - dispensary access procedures
  - ordering and receiving dispensary stock
  - performing a dispensary stocktake
  - product return and recall procedures
  - maintaining security of dispensary stock
  - waste handling, sorting and disposal
- dispensary layout and storage locations for dispensary items, including requirements for storing scheduled medicines
- dispensary databases and information systems to support management of supplier information and goods requisition
- dispensary housekeeping checklist and responsibilities
- OHS and environmental management issues relating to the handling and disposal of dispensary items
- role boundaries and responsibilities for maintaining and controlling dispensary stock
REQUIRED SKILLS AND KNOWLEDGE

- communication methods and systems to operate as part of a team and provide relevant information to a pharmacist and other pharmacy staff as required
- customer entitlements to privacy and confidentiality.

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the following is essential:

- applies pharmacy policies, standards and guidelines, industry legislation and codes of practice in regard to dispensary stock control tasks, including:
  - identifying and storing dispensary products
  - procurement and stocktaking procedures
  - maintaining storage conditions
  - locating and storing dispensary products
  - risk management procedures to minimise selection errors
  - maintaining stock control records
  - safe and legal disposal of dispensary waste
- follows contingency control procedures, including procedures for returning pharmacy products to supplier or manufacturer and procedures for receiving returned goods from customer to pharmacy
- respects and protects customer privacy when communicating with customers and maintaining customer records
- recognises situations requiring referral to a pharmacist or other pharmacy staff according to pharmacy policy
- applies OHS practices
- maintains housekeeping standards in the dispensary stores area.
- plans and carries out work to meet dispensary stock control requirements.
EVIDENCE GUIDE

Context of and specific resources for assessment

Assessment must ensure:

- demonstration of dispensary stock control activities over a period of time
- demonstration of storing a range of items, including scheduled items requiring storage in secure areas and items with special handling and storage requirements
- performance is observed by the assessor or the technical expert working in partnership with the assessor.
- access to a real or simulated workplace environment that meets Pharmacy Board and relevant industry standards for dispensary stock control
- access to relevant pharmacy protocols and procedures
- access to state or territory legislation and guidelines where appropriate
- access to dispensary stock control record-keeping systems
- access to relevant documentation, such as:
  - purchase orders
  - invoices and statements
  - packing slips
  - credit slips
  - standing orders
  - electronic data interchange (EDI) forms
- access to a range of medicines and related equipment
- access to storage equipment and capacity appropriate to a dispensary.
EVIDENCE GUIDE

Methods of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- a qualified workplace assessor, or a technical expert working in partnership with the assessor, to observe the dispensary assistant performing a range of stock control tasks over sufficient time to demonstrate handling of a range of contingencies.
- written or verbal questioning to assess knowledge and understanding.
- evidence that completion of workplace documentation and records relevant to dispensary stock control operations is timely and accurate.

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended.

Assessing employability skills

Employability skills are integral to effective performance in the workplace and are broadly consistent across industry sectors. How these skills are applied varies between occupations and qualifications due to the different work functions and contexts.

Employability skills embedded in this unit should be assessed holistically in the context of the job role and with other relevant units that make up the skill set or qualification.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. **Bold italicised** wording in the performance criteria is detailed below.

**Assisting in dispensary stock control** must comply with:

- local, federal and state or territory legislation
- industry codes of practice, standards and guidelines
RANGE STATEMENT

- community pharmacy policies, protocols and procedures relating to assisting a pharmacist in dispensary stock control.

Dispensary stock may include:
- scheduled products
- products requiring special handling, e.g. refrigerated stock
- raw materials for compounding.

Storage conditions may include:
- location
- cold chain requirements
- temperature, humidity, light and security
- ventilation
- correct storage of hazardous substances.

Dispensary stock control procedures may include:
- maintaining storage conditions
- dispensary stock rotation
- keeping dispensary stock undamaged
- monitoring expiry dates
- aiding dispensary stock selection
- maintaining current shelf labels.

Disposal may include:
- return to supplier
- safe destruction according to pharmacy policy, legislative requirements and environmental protection guidelines
- disposal service.

Disposal procedures must be performed:
- under pharmacist supervision and according to federal and state or territory and local legislation.
