SISFFIT015 Collaborate with medical and allied health professionals in a fitness context

Release: 1

SISFFIT015 Collaborate with medical and allied health professionals in a fitness context

Modification History

Not applicable.

Application

This unit describes the performance outcomes, skills and knowledge required to identify situations and conditions requiring guidance from, or the need to work with, medical or allied health professionals. This unit requires the ability to undertake referrals, and interpret and implement instructions from medical or allied health professionals to ensure appropriate exercise planning and delivery within industry endorsed scope of practice.

This unit applies to personal trainers who require guidance from an appropriate medical or allied health professional following industry endorsed pre-exercise screening and risk stratification, or resulting from professional judgement.

These individuals typically work autonomously in controlled and uncontrolled fitness environments. Work is performed according to relevant legislation and organisational policies and procedures.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

Pre-requisite Unit
