

**Australian Government**

# **SISFFIT049 Use exercise science principles in fitness instruction**

**Release: 1**

## **SISFFIT049 Use exercise science principles in fitness instruction**

### **Modification History**

Supersedes and is not equivalent to SISFFIT019 Incorporate exercise science principles into fitness programming.

### **Application**

This unit describes the performance outcomes, skills and knowledge required to identify how exercise science principles (also known as exercise training principles) apply to fitness instruction, and use those principles in the design and ongoing modification of exercise programs for clients.

This unit has a direct relationship with, and supports the following units involving the application of exercise science and training principles to program design:

- SISFFIT041 Develop personalised exercise programs
- SISFFIT043 Develop and instruct personalised exercise programs for body composition goals
- SISFFIT044 Develop and instruct personalised exercise programs for older clients
- SISFFIT045 Develop and instruct personalised exercise programs for adolescent clients.

This unit applies to personal trainers who work independently with clients using discretion and judgement to develop and deliver individually tailored client exercise programs. They practise in settings such as fitness facilities, gyms, leisure and community centres, client workplaces and homes and outdoor locations.

The skills in this unit must be applied in accordance with Commonwealth and State or Territory legislation, Australian standards and industry codes of practice.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

### **Pre-requisite Unit**

Nil

### **Competency Field**

Fitness

### **Unit Sector**

Fitness

## Elements and Performance Criteria

### ELEMENTS

*Elements describe the essential outcomes*

1. Identify information sources for exercise science principles relevant to fitness instruction.
2. Incorporate exercise science principles in fitness instruction.
3. Maintain and update knowledge of exercise science.

### PERFORMANCE CRITERIA

*Performance criteria describe the performance needed to demonstrate achievement of the element.*

- 1.1. Identify credible sources of evidence-based information about exercise science principles that are relevant to fitness instruction.
- 1.2. Review information and identify how exercise science principles relate to safe and optimum training and client fitness improvements.
- 1.3. Interpret exercise science terminology and its application to fitness instruction.
- 2.1. Identify relevance of exercise science principles to individual clients at different stages and levels of exercise activity.
- 2.2. Design programs for individual clients that consider client characteristics and goals and appropriate exercise science principles.
- 2.3. Monitor and adjust programs consistent with exercise science principles.
- 3.1. Identify and use opportunities to update and expand knowledge of exercise science relevant to scope of practice for personal trainers.
- 3.2. Use critical thinking processes to evaluate changing and emerging evidence-based information and its application to fitness instruction.

## Foundation Skills

*Foundation skills essential to performance in this unit, but not explicit in the performance criteria are listed here, along with a brief context statement.*

### SKILLS

### DESCRIPTION

Reading skills to:

- interpret unfamiliar and complex evidence-based information including scientific, anatomical and physiological terminology.
- interpret numerical information of varying complexity involving times, frequency, intervals, volume and loads

Numeracy skills to:

- complete calculation and estimations of varying complexity for program design.

Learning skills to:

- monitor emerging and changing information for use in own practice.

## **Unit Mapping Information**

Supersedes and is not equivalent to SISFFIT019 Incorporate exercise science principles into fitness programming.
