EVIDENCE GUIDE

Methods of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- direct observation of the candidate working as part of a kitchen team
- sampling of menu items produced by the candidate
- evaluation of customer feedback about menu items and speed and timing of service
- written or oral questions to test knowledge about commodities, cookery techniques, equipment and food hygiene
- review of portfolios of evidence and third-party workplace reports of on-the-job performance by the candidate.

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended. For example, it is expected that candidates will have completed a selection of other units dealing with basic cookery skills. These must be selected according to enterprise requirements and reflect the knowledge and skills required to cook a range of menu items for a food service period in a commercial kitchen.

Assessing employability skills

Employability skills are integral to effective performance in the workplace and are broadly consistent across industry sectors. How these skills are applied varies between occupations and qualifications due to the different work functions and contexts.

Employability skills embedded in this unit should be assessed holistically with other relevant units that make up the skill set or qualification and in the context of the job role.
