Release 1. This is the first release of this qualification in the TLI Transport and Logistics Training Package.

Qualification Description

This is a qualification for a person engaged in the management of rail operations. This qualification requires the self-directed application of knowledge and skills, with substantial depth in some areas where judgement is required in planning and selecting appropriate equipment, services and techniques for self and others.

Application involves participation in developing strategic initiatives as well as personal responsibility and autonomy in performing or organising others to carry out complex technical operations. It may include participation in teams, including those concerned with planning and evaluation functions. Group or team coordination may be involved.

Job roles

Job roles and titles vary across different sectors. Possible job titles relevant to this qualification include:

- Network Controller
- Passenger Services Manager
- Rail Freight Manager
- Rail Operations Manager
- Rail Maintenance Manager.

No licensing, legislative or certification requirements apply to this qualification at the time of publication.

Entry Requirements

There are no entry requirements for this qualification.
