Assessment Requirements for TLIA0010 Identify goods and store to specifications

Release: 1

Assessment Requirements for TLIA0010 Identify goods and store to specifications

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- accessing, reading and interpreting relevant goods information, policies and regulatory requirements
- applying relevant work health and safety (WHS)/occupational health and safety (OHS) requirements, legislation and workplace procedures
- communicating and working with relevant persons
- modifying activities depending on operational contingencies, risk situations and environments
- operating and adapting to differences in goods and services in accordance with operating procedures
- reporting and rectifying identified problems, faults or malfunctions promptly, in accordance with regulatory requirements and workplace procedures
- selecting and using relevant systems
- using inventory information to determine, plan and organise processes used for receival, storage, goods movement, despatch, stock levels and re-ordering processes
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- categories or groups of goods including:
  - key characteristics
  - hazard potential
  - special handling, stacking and storage requirements
- codes of practice and regulations relevant to workplace activities
- documentation requirements including reports and records concerning damaged or contaminated goods
- goods sources, destinations and potential problems

- housekeeping standards and procedures
- operational work systems, equipment, management and site operating systems
- re-ordering procedures and just-in-time planning principles
- requirements for workplace documentation, inventory systems and records
- site layout and obstacles
- sources of goods information including:
    - policies and procedures
    - product knowledge
- types of equipment and storage areas appropriate for different types of goods including:
    - dangerous goods
    - fragile
    - hazardous
    - perishable
    - sensitive items.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include:

- relevant and appropriate materials, tools, equipment and personal protective equipment (PPE) currently used in industry
- applicable documentation including legislation, regulations, codes of practice, workplace procedures and operation manuals.
