**Release: 1**

# Assessment Requirements for TLIB0011 Undertake general site maintenance

## Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

## Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying control measures to deal with pest and vegetation control
- applying required safety precautions according to activity
- cleaning and inspecting maintenance equipment
- communicating and working effectively with others whilst conducting general site maintenance
- completing documentation related to general site maintenance
- disposing of refuse and returning excess materials
- handling chemicals safely according to safety procedures
- identifying and organising resources required for work activities
- interpreting and following instructions, procedures, information, labels and signs relevant to general site maintenance
- monitoring and prioritising work activities in terms of planned schedule
- operating communication equipment to required protocols
- selecting and using required personal protective equipment (PPE) conforming to industry and work health and safety (WHS)/occupational health and safety (OHS) standards
- using materials and equipment
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

## Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- characteristics of materials and equipment used in work activities
- communication techniques
- contingency plans, risk situations and environments when performing general site maintenance
- differences in types of equipment used for site maintenance
- hazardous chemicals used in general site maintenance, and related precautions and personal protection measures
- hazards that may exist during site maintenance activities and ways of controlling the risks involved
- impact on work activities of regulatory requirements
- potential problems and possible solutions relating to site maintenance activities
- relevant legislation, regulations, codes of practice, industry guidelines and workplace policies and procedures for site maintenance
- relevant recording and documentation procedures
- relevant WHS/OHS and environmental procedures and regulations
- safety data sheets (SDS)/material safety data sheets (MSDS)
- workplace documentation and records system management
- workplace technical manuals and instructions relating to work activities.

## Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- relevant and appropriate materials, tools, equipment and PPE currently used in industry
- applicable documentation including legislation, regulations, codes of practice, workplace procedures and operation manuals.
