Assessment Requirements for TLIB0024 Use mobile electronic track warning system

Release: 1

Assessment Requirements for TLIB0024 Use mobile electronic track warning system

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least two separate occasions and include:

- accessing and transporting, placing and removing mobile electronic track warning system
- communicating effectively with individuals and groups
- completing documentation
- complying with site safety plans, work health and safety (WHS)/occupational health and safety (OHS) regulations and rail safety regulatory requirements
- identifying job hazards and taking required action to minimise, control or eliminate identified hazards
- reading and interpreting workplace procedures for placing and removing mobile electronic track warning system.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- relevant mobile electronic track warning system and rail network workplace procedures for:
 - degradation of alarms or visual warnings
 - placing and removing mobile electronic track warning system
- relevant rail danger zones
- relevant rail safety, WHS/OHS and environmental procedures and regulations.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions..

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- relevant and appropriate materials, tools, mobile electronic track warning system equipment and personal protective equipment (PPE) currently used in industry
- applicable documentation including workplace procedures, regulations, rail network standards, codes of practice and operation manuals.
