Assessment Requirements for TLIB2073 Clean road tankers

Release: 2

Assessment Requirements for TLIB2073 Clean road tankers

Modification History

Release 2. This is the second release of this unit of competency in the TLI Transport and Logistics Training Package.

- Minor changes to unit Application
- Minor changes to Performance Criteria
- Minor changes to Assessment Conditions.

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and include:

- applying precautions and required action to minimise, control or eliminate identified hazards
- carrying out required cleaning operations
- communicating effectively with others
- interpreting and following operational instructions and prioritising work
- minimising waste during cleaning operations
- operating and adapting to differences in equipment in accordance with operating procedures
- reading and interpreting relevant instructions, procedures, labels and manuals
- selecting and using appropriate cleaning equipment and materials
- selecting and using required personal protective equipment (PPE) conforming to industry and work health and safety (WHS)/occupational health and safety (OHS) standards
- working collaboratively with others
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria and include knowledge of:

- hazards that may exist when cleaning road tankers and ways of controlling the risks involved
- housekeeping standards
- materials identification, handling and storage
- precautions and procedures to dispose of or reprocess cleaning waste in accordance with environmental protection requirements

- procedures for cleaning a commercial tanker in accordance with workplace and manufacturer requirements, and established safety rules and regulations
- relevant codes such as the current Australian Dangerous Goods (ADG) Code
- relevant duty of care requirements for routine tanker cleaning
- relevant legislation and workplace procedures
- relevant recording and documentation procedures
- relevant technical knowledge to clean road tankers
- relevant WHS/OHS and pollution control procedures.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, tools, equipment and PPE currently used in industry
- applicable documentation, including legislation, regulations, ADG Code, codes of practice, workplace procedures and operation manuals.
