**Assessment Requirements for TLIB4042
Conduct inspection of safeworking
procedures and infrastructure**

Release: 2

Assessment Requirements for TLIB4042 Conduct inspection of safeworking procedures and infrastructure

Modification History

Release 2. This is the second release of this unit of competency in the TLI Transport and Logistics Training Package:

- Minor statement changes in Assessment Conditions.

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- adapting to differences in situations and infrastructure in accordance with operating procedures
- applying relevant safeworking and workplace procedures
- identifying job hazards and taking required action to minimise, control or eliminate identified hazards
- interpreting and following operational instructions and prioritising work
- modifying activities depending on operational contingencies, risk situations and environments
- monitoring work activities in terms of planned schedule
- planning and conducting inspection of safeworking procedures and infrastructure
- reading and interpreting relevant instructions, procedures, information and signs
- reporting and/or rectifying identified problems, in accordance with regulatory requirements and workplace procedures
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- applicable state/territory legislated rail safety requirements, relevant codes of practice and/or guidelines
- documentation/authorisation processes and procedures
- emergency management plan
- hazardous situations associated with workplace activities and ways of controlling the risks involved

- hazards that may be identified during an inspection of safeworking procedures and infrastructure, and ways of controlling the risks involved
- inspection schedule
- operational equipment manuals and operating instructions
- problems that may occur when inspecting safeworking procedures and infrastructure, and action that can be taken to report or resolve these problems
- relevant rail industry standards, safeworking rules, technical specifications and manuals
- relevant safeworking system inspection records and procedures
- relevant work health and safety (WHS)/occupational health and safety (OHS) and environmental procedures and regulations
- safeworking system requirements
- workplace procedures for inspecting safeworking procedures and infrastructure.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations or, where this is not available, in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, tools, equipment and personal protective equipment (PPE) currently used in industry
- applicable documentation including workplace safeworking procedures, rail industry standards, rules, regulations, codes of practice and operation manuals.
