# Assessment Requirements for TLIC2059 Propel and operate light on-track equipment

# Assessment Requirements for TLIC2059 Propel and operate light on-track equipment

## Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

## Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on **at least three** separate occasions and include:

- applying relevant safeworking and workplace procedures
- communicating effectively with others when operating light on-track equipment
- identifying job hazards and taking required action to minimise, control or eliminate identified hazards
- modifying activities depending on operational contingencies, risk situations and environments
- reporting and rectifying identified problems, faults and malfunctions when operating light on-track equipment in accordance with workplace procedures
- using appropriate numeric functions when operating light on-track equipment
- working collaboratively with others when operating light on-track equipment
- working with required attention to detail without injury to self or others, or damage to equipment.

## Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- emergency management plans and procedures
- hazards that may exist when operating light on-track equipment and ways of controlling the risks involved
- Rail Infrastructure Manager rules and regulations applicable to operating light on-track equipment
- organisational procedures for operating light on-track equipment
- problems that may occur when operating light on-track equipment and action that can be taken to report or resolve these problems
- relevant rail danger zones
- relevant rail safety, work health and safety (WHS)/occupational health and safety (OHS)

and environmental procedures and regulations.

## Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

Assessment must occur in workplace operational situations or, where this is not available, in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment include:

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, tools, equipment and personal protective equipment currently used in industry
- applicable documentation and terminology as defined by the relevant Rail Infrastructure Manager safeworking system including workplace procedures, regulations, rules and codes of practice.
