TLIC3033 Drive an electric tram to operational requirements

Release: 2

TLIC3033 Drive an electric tram to operational requirements

Modification History

Release 2. This is the second release of this unit of competency in the TLI Transport and Logistics Training Package:

- Minor terminology changes in Performance Criteria
- Minor statement changes in Performance Evidence
- Minor statement changes in Knowledge Evidence
- Minor statement changes in Assessment Conditions.

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to drive an electric tram to operational requirements in accordance with relevant regulations and workplace practices.

It includes operating a tram efficiently and effectively, driving a tram, completing a journey and responding effectively to external factors and emergencies.

People achieving competence in this unit will need to fulfil the applicable state/territory legislated rail safety requirements and to comply with relevant codes of practice and/or guidelines, as well as relevant Australian Road Rules and applicable state/territory tramway regulatory requirements.

Work is performed under minimal supervision, generally within a team environment. It involves the application of routine operational principles and procedures when driving an electric tram as part of workplace activities across a variety of operational contexts.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

C – Vehicle Operation.

Unit Sector

Rail sector.

Elements and Performance Criteria

ELEMENTS

PERFORMANCE CRITERIA

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1 Operate tram efficiently and effectively

- 1.1 Electric tram is operated in accordance with relevant codes of practice, workplace procedures and instructions
- 1.2 Electric tram is operated safely in accordance with traffic regulations
- 1.3 Electric tram is operated with due care of the vehicle
- 1.4 Movements are made within limits of vehicle and road dimensions, in accordance with specifications
- 1.5 Smooth and controlled movements are made
- 1.6 Electric tram performance is monitored to maintain optimum running condition and to identify faults, defects and efficiencies in accordance with tram network and workplace requirements

2 Drive tram

- 2.1 Traffic flows are anticipated and appropriate defensive actions taken to maintain the efficiency of tram operation
- 2.2 Electric tram is constantly monitored for malfunctions or factors that may affect tram performance

3 Complete tram journey

- 3.1 Tram documentation is received, interpreted and followed
- 3.2 Electric tram is operated and manoeuvred in accordance with tram documentation and workplace procedures
- 3.3 Events and circumstances affecting planned running schedule are communicated to relevant personnel en

		route
	3.4	Tram control and other instructions are received, interpreted and applied to ensure safe and effective control of the tram
	3.5	Communications are maintained with tram controllers during tram journey in accordance with relevant workplace procedures and requirements
	3.6	Instructions concerning tram operation are given to relevant personnel to ensure safe and efficient running
4 Respond effectively to external operating factors	4.1	Instructions are verified, as required, interpreted and followed, in accordance with relevant regulatory requirements and workplace policies and procedures, to ensure that actions taken are appropriate and safe
	4.2	Fixed traffic and hand signals, and verbal movement commands are interpreted and followed, in accordance with regulatory requirements and workplace policies and procedures, to ensure actions taken are appropriate and safe
	4.3	Hazardous situations are recognised and appropriate actions taken to minimise risk to personnel and equipment

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Unit Mapping Information

This unit replaces and is equivalent to TLIC3033A Drive an electric tram to operational

requirements.
