TLIC3046 Drive and operate electric passenger train
TLIC3046 Drive and operate electric passenger train

Modification History
Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application
This unit involves the skills and knowledge required to drive and operate an electric passenger train to operational requirements in accordance with safeworking and regulatory requirements and workplace procedures.

It includes applying train management techniques to manage the movement of a train, conducting all movements and related activities required to meet operational requirements, changing ends, and handing over a train to a relief crew.

People achieving competence in this unit will need to fulfil the applicable state/territory legislated rail safety requirements and to comply with relevant codes of practice and/or guidelines.

Work is generally performed without supervision and within a team environment. It involves the application of routine operational principles and procedures when driving electric passenger trains to operational requirements as part of workplace activities across a variety of operational contexts within the Australian rail systems.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit
Not applicable.

Competency Field
C – Vehicle Operation

Unit Sector
Not applicable.
Elements and Performance Criteria

ELEMENTS

Performance criteria describe the performance needed to demonstrate achievement of the element.

1 Drive train efficiently and effectively

1.1 Train is operated in accordance with relevant codes of practice, workplace procedures and instructions

1.2 Train is operated safely in accordance with track/road characteristics and route conditions

1.3 Hazards are identified, risks are assessed and risk control measures are implemented

1.4 Train operations are controlled to minimise wear, maximise efficiency and avoid damage

1.5 Train is operated with due care for passenger comfort and quality of ride

1.6 Train is safely operated to specified timetable and schedule in accordance with on-time running standards

1.7 Performance of equipment and rolling stock is monitored to maintain optimum running conditions and to identify faults, defects and efficiencies

1.8 Relevant codes of practice, work health and safety (WHS)/occupational health safety (OHS) and environmental requirements are followed to prevent injury and damage

2 Operate train in accordance with operating procedures

2.1 Train documentation is received, interpreted and followed

2.2 Relevant codes of practice, safeworking and signalling requirements are adhered to throughout train operations

2.3 Network Control Officer instructions and other instructions are received, interpreted and applied to ensure safe and effective control of train

2.4 Communications are maintained with relevant personnel during train journey in accordance with relevant codes of practice and safeworking systems

2.5 Instructions about train operation are given to relevant personnel to ensure safe and efficient running

3 Manage

3.1 Passengers are advised of station identification, emergency
communications

situations and other critical information as required, using train communications system

3.2 Network Control Officer and other instructions are received, interpreted and applied to ensure safe and effective control of train

3.3 Communications are maintained with Network Control Officer and other relevant personnel during train journey in accordance with workplace procedures, relevant codes of practice and safeworking systems

3.4 Instructions about train operation are given to relevant personnel to ensure safe and efficient on-time running

3.5 Instructions are verified as required, interpreted and followed, in accordance with relevant codes of practice, safeworking systems and requirements, and organisational policies and procedures, to ensure actions taken are appropriate and safe

3.6 Fixed and hand signals, and verbal movement commands are interpreted and followed, in accordance with relevant codes of practice, safeworking systems and organisational policies and procedures, to ensure actions taken are appropriate and safe

4 Change ends

4.1 Arrival procedures are carried out in accordance with organisational policies and procedures

4.2 Checks and terminus inspections are carried out in accordance with organisational policies and procedures

4.3 Departure procedures are carried out in accordance with organisational policies and procedures

5 Carry out in-service inspections

5.1 Train checks are made in accordance with workplace procedures

5.2 Problems and defects are identified and reported/rectified in accordance with workplace procedures, other regulatory requirements and manufacturer instructions

5.3 Incidents or unusual occurrences are reported to relevant personnel in accordance with established policies and procedures

6 Handover train to relieving driver

6.1 Identity of relieving driver is checked and confirmed as required
6.2 Relieving driver is advised of condition and location of train as required

6.3 Relieving driver is updated and is made aware of relevant documentation as required

7 Accept train handover as relief driver

7.1 Relieving driver position is taken up at correct time and location in accordance with organisational requirements

7.2 Identification is presented to train driver being relieved, as required

7.3 Relevant documentation is identified and referred to in accordance with organisational requirements

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to TLIC3046A Drive and operate electric passenger train.
