Assessment Requirements for TLID0002 Care for livestock in transit

Release: 1

Assessment Requirements for TLID0002 Care for livestock in transit

Modification History

Release 1. This is first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying precautions and required action to minimise, control or eliminate identified hazards
- inspecting vehicle to ensure livestock crate drainage system is in place and is effective in control of livestock effluent
- checking livestock crate for cleanliness and any hazards that could injure or damage livestock during loading, unloading and transit
- loading livestock to ensure correct density of livestock within the pen
- applying relevant work health and safety (WHS)/occupational health and safety (OHS)/occupational safety and health (OSH) requirements and guidelines and workplace procedures
- communicating effectively and working collaboratively with others in the care of livestock in transit
- completing relevant documentation including relevant sections of National Vendor declaration
- identifying and correctly using required equipment
- implementing contingency plans
- interpreting and following operational instructions and prioritising work
- modifying activities depending on operational contingencies, risk situations and environments
- monitoring work activities in terms of planned schedule
- operating and adapting to differences in equipment in accordance with operating procedures
- reporting and rectifying identified problems promptly, in accordance with regulatory requirements and workplace procedures
- reading and interpreting relevant instructions, procedures and information
- working systematically with required attention to detail without injury to self or others, or damage to animals or equipment.

Knowledge Evidence

- Australian animal welfare standards and guidelines for transporting livestock by land
- housekeeping standards and procedures when caring for livestock during transit

- insurance rights and requirements of clients
- methods of securing livestock during transit
- relevant regulations for caring for livestock in transit
- risks when caring for livestock in transit and related precautions to control the risk
- specialised livestock handling equipment and procedures for its use
- WHS/OHS/OSH requirements and guidelines for lifting and moving loads
- workplace procedures and policies for caring for livestock in transit.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment include:

- a range of relevant exercises, case studies and/or simulations
- applicable documentation including workplace procedures, regulations, codes of practice and operation manuals
- relevant materials, tools, equipment and personal protective equipment currently used in industry.
