TLID1001 Shift materials safely using manual handling methods
TLID1001 Shift materials safely using manual handling methods

Modification History
Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application
This unit involves the skills and knowledge required to shift loads safely using manual handling methods. Work must be carried out in compliance with the relevant work health and safety (WHS)/occupational health and safety (OHS) regulations concerning the manual handling and movement of loads.

It includes assessing the risks associated with relocating the load, planning the relocation process and carrying out the relocation in accordance with the plan.

Work is performed under some supervision generally within a team environment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit
Not applicable.

Competency Field
D – Load Handling

Unit Sector
Not applicable.

Elements and Performance Criteria

</table>
relocating load

1.2 Storage locations are determined and potential routes to be followed are identified

1.3 Effect of load relocation on original load base is predicted

1.4 Points of balance are estimated

1.5 Required clearances are compared to available space and adjustments are made to moving loads to reflect required clearance

1.6 Effects of moving contents, which may be loose, liquid, dangerous or hazardous, are considered

1.7 Risks in potential routes are considered

1.8 Risks to self are identified arising from the required lifting, load carrying, set down or movement of the goods

1.9 Manual handling procedures for lifting, lowering and carrying, pushing and pulling are identified

1.10 Team lifting processes are considered when moving loads

1.11 Appropriate personal protective equipment is determined

1.12 Size to weight ratio of items to be manually handled are identified

2 Plan load relocation

2.1 Relocation of the load is planned, consistent with the code of practice for manual handling and in accordance with the risk assessment

2.2 Process for relocating load is proposed including predicting and planning for potential difficulties

2.3 Proposed process is checked for compliance with code of practice and workplace procedures

3 Relocate load

3.1 Actions for lifting, lowering and carrying, pulling and pushing a load are in accordance with workplace procedures and WHS/OHS requirements

3.2 Applications appropriate for team relocation of load are identified

3.3 Team lifting tasks are coordinated

3.4 Planned process and route are followed
3.5 Relocated materials are set down without damage to goods, personnel or equipment and are checked for stability

3.6 Relocation is checked to see it meets work requirements and variance/s are reported

**Foundation Skills**

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

**Range of Conditions**

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the Companion Volume Implementation Guide.

**Unit Mapping Information**

This unit replaces and is equivalent to TLID1001A Shift materials safely using manual handling methods.

**Links**

Companion Volume implementation guides are found in VETNet - https://vetnet.education.gov.au/Pages/TrainingDocs.aspx?q=df441c6e-213d-43e3-874c-0b3f7036d851
